THE DIVISION OF INDIAN EDUCATION OF THE NEW MEXICO STATE DEPARTMENT OF PUBLIC INSTRUCTION TO THE BUREAU OF INDIAN AFFAIRS. ANNUAL REPORT, 1966-67.

BY- OWENS, CHARLES S.

NEW MEXICO STATE DEPT. OF EDUCATION, SANTA FE

PUB DATE 67

EDRS PRICE MF-\$0.25 HC-\$1.34 44P.

DESCRIPTORS- #AMERICAN INDIANS, CULTURAL DIFFERENCES, COUNSELING, DEPRESSED AREAS (GEOGRAPHIC), #DROPOUTS, DROPOUT RESEARCH, EDUCATION, #EARLY CHILDHOOD EDUCATION, ENGLISH (SECOND LANGUAGE), EDUCATIONAL OPPORTUNITIES, FEDERAL PROGRAMS, #GUIDANCE, HEALTH SERVICES, IMPROVEMENT, INSERVICE TEACHER EDUCATION, MINORITY GROUPS, NEEDS, SUMMER SCHOOLS, SPECIAL SERVICES, VALUES, JOHNSON-O'MALLEY ACT,

DURING THE PAST 15 YEARS THE AVERAGE ENROLLMENT AND DAILY ATTENDANCE FIGURES FOR NEW MEXICO INDIAN CHILDREN IN THE JOHNSON-O'MALLEY PROGRAM HAVE INCREASED. THIS INCREASE INDICATES PROGRESS BY THE INDIAN CHILDREN IN THE MASTERY OF LANGUAGE, WHICH HAS BEEN ENCOURAGED BY THE DIVISION OF INDIAN EDUCATION OF THE NEW MEXICO STATE DEPARTMENT OF EDUCATION. INDIAN CHILDREN HAVE BENEFITED FROM THE USE OF JOHNSON-O'MALLEY FUNDS BY AN INCREASE IN EARLY CHILDHOOD EDUCATION, GUIDANCE AND COUNSELING SERVICES, HEALTH SERVICES, TRANSPORTATION, TEXTBOOKS AND SCHOOL SUPPLIES, AND LUNCH PROGRAMS. THE GUIDANCE SECTION OF THE DIVISION OF INDIAN EDUCATION HAS HAD THREE PRIMARY OBJECTIVES--(1) ENCOURAGE SELF-MOTIVATION AND SELF-DIRECTION OF INDIAN PUPILS, THEIR PARENTS, AND THEIR TEACHERS, (2) SECURE MORE PARENTAL INVOLVEMENT IN EDUCATION AND CITIZENSHIP RESPONSIBILITIES, AND (3) EMPHASIZE CULTURAL SIMILARITIES OF ALL PUPILS AS A NEW DIRECTION WITHIN THE TOTAL EDUCATIONAL SITUATION, WHILE LEARNING ABOUT GROUP AND INDIVIDUAL DIFFERENCES. IN ORDER TO ACHIEVE THESE OBJECTIVES, THE GUIDANCE OFFICE BECAME INVOLVED IN VARIOUS WORKSHOPS, CONFERENCES, AND MEETINGS, INITIATED TWO RESEARCH PROJECTS PERTAINING TO SCHOOL DROPOUTS ON THE SECONDARY LEVEL, AND CONDUCTED A SURVEY INVOLVING INDIAN STUDENTS IN HIGHER EDUCATION. THE TOTAL NUMBERS OF INDIAN CHILDREN IN THE JOHNSON-O'MALLEY PROGRAM FOR NEW MEXICO ARE INCLUDED IN TABULAR FORM. (ES)

Building the Foundations of Responsible Citizenship

RESUME OF A FIELD TRIP

By Nora Monte

Through the cooperation and help of the Magdalena Dormitory Student Council, the Magdalena High School Student Council, the Bureau of Indian Affairs, and Title I, I was able to attend the 1967 National Association of Student Councils at Abington, Pennsylvania.

The most important aspects about this experience are: You get together with students from all over the United States and share your problems about student council. you exchange ideas of how student council might operate better in other schools, you learn to get along with different people and make new friends. Through this we learn to cooperate with our fellow students and faculty at our schools.

The enclosed photograph is of a girl from Hegins, Pennsylvania, who was attending the N.A.S.C. too, and me. She and I stayed with the same family. We stayed at the home of Mr. and Mrs. Thomas Hollis of Glenside, Pennsylvania.

In appreciation for their hospitality, cooperation, and kindness, I gave them a Navajo woven rug, which my mother and I made. I wanted to give them something of my own culture, and I got my mother to help me make the rug. I felt this was the best I could do.

LAGUNA – ACOMA HIGH

Roberta R. Carrillo – Laguna-Acoma High ranked number six in the Eighteenth Annual High School Mathematics contest; sponsored jointly by the Mathematical Association of America, the Society of Actuaries and Mu Alpha Theta. Laguna-Acoma ranked eleventh among the sixty-three participating schools, from New Mexico and Arizona.

Report of the Director

The national concern for the improvement of education and educational opportunities, especially among minority groups and in economically distressed areas, has resulted in numerous and diverse theories and suggestions concerning the development of efficient quality programs of education for all the nation's children. Those who expound a rigid concept of cultural differences continue to arrange groups of people into various selected categories, ignore the similarities among human beings, condemn the so-called middle class values, while claiming personal sanctuary in their embrace of such values.

It appears that there is a rapidly increasing group who advocate innovation for innovation's sake. Another significant number make a "religion" of some technique, which, by their definition, is the panacea of all ills.

It is our belief that similarities among people constitute the day-by-day working relationships and that middle class values have generally provided democratic representation in government, national vigor, and genuine interest in the common welfare. The problem seems to be one of helping people to attain and preserve middle class values while retaining their individual identities.

We consider a good program of education one that meets the unique and individual needs of children, regardless of ethnic or racial backgrounds. Motivation, response, and effective learning result from sincere efforts to help and guide young people in the realization of their aspirations and potentials. Cultural backgrounds are given due consideration without over-magnification. Likewise, methods and techniques are important, but only as means and not as ultimate goals.

THE SCHOOL ENROLLMENT AND ATTENDANCE OF INDIAN CHILDREN

The following average enrollment and average daily attendance figures for Indian children in the Johnson-O'Malley program illustrate the increase during the past fifteen years. Average daily attendance has improved somewhat but is still below the total percentage in the state.

Enumeration of the high school enrollees and graduates during a ten year period indicates significant improvement. The average increase in percentage of graduates over the increase in total high school enrollment is 3.7. During the school year 1966-67, the percentage of graduates to total high school enrollment was 15.7. This compares with a statewide percentage of 19.5

Year	Enrollment	A. D. A.	High School Enrollment	No. of Graduates	Percentage
1952-53	1,347	1186			
1953-54	1,746	1491			
1954-55	2,141	1837			
1955-56	2,260	1923			
1956-57	3,669	3195			
1957-58	4,407	3977	860	105	12.2
1958-59	5,264	4673	733	122	16.6
1959-60	6,240	5738	930	150	16.1
1960-61	7,148	6687	1,035	161	15.6
1961-62	7,380	6771	1,249	166	13.3
1962-63	8,166	7378	1,567	217	13.8
1963-64	8,706	7942	1,709	237	13.9
1964-65	9,154	8330	1,846	311	16.8
1965-66	9,774	8849	2,017	352	17.4
1966-67	10,687	9704	2,198	346	15.7

During the school year 1966-67, New Mexico had 14,005 high school graduates of a total high school enrollment of 71,966, a percentage of 19.46.

THE INSTRUCTION OF INDIAN CHILDREN

While the increase in percentage of high school enrollees indicates progress in the mastery of language, there is still much to be done to bring the Indian students to comparable levels with non-Indians. Through the years this Division has advocated and encouraged kindergartens, summer schools, special teachers in unusual circumstances, reasonable teacher-pupil ratios, desirable and adequate materials and supplies, and well-planned pilot programs designed to facilitate and reinforce language.

Special transportation was provided in a few districts where distances would otherwise prevent Indian students from participation in various activities of the schools.

In cases where school officials certify that Indian parents are unable to provide course fees, activities admissions, or P.E. equipment for junior high and senior high students, a uniform reimbursement is allowed.

CONSIDERATIONS FOR FUTURE ACTION

1. Early childhood education should be provided for every child. These programs should include closer home-school cooperation and relate to adult education programs.
2. An expansion of summer school programs would be highly desirable.
3. Training in personal finance and basic economics should be an important part of curriculum offerings.
4. Vocational-technical courses should be increased and students should be well informed regarding the requirements and opportunities in technical fields.
5. The in-service training of teachers should be a continuous part of the over-all program of the school.
6. Teachers should be relieved of routine details and duties in order that they may concentrate on instruction.
7. Coordination of activities of the numerous and varied educational agencies and programs would result in more effective use of personnel and funds.
8. A greater number of qualified Indian citizens should be serving on local boards of education. (Five districts in New Mexico presently have Indian board members.)

In our heterogeneous society, individuals and groups must realize that while the right to differ, to debate and to oppose is a vital element of freedom, it is imperative that their actions be orderly, responsible, and within the framework set up by a democratic law-abiding people. Of paramount importance is the full realization that the life force and strength of the nation is welded together by our common interests and our dedication to the way of life which characterizes a free people.

Report of the Guidance Specialist

On the second time around, this report culminates one year of association with the Division of Indian Education of the State Department of Education.

The essence of intergroup education appears to be losing its uniqueness as educators have become fascinated with a wider range of materials and contributions of educational agencies and individuals to the education of all pupils. We are becoming more aware of teaching pupils with a little less emphasis on the uniqueness of Indian pupils.

In the activities involving the Division of Indian Education, we have attempted to achieve three objectives:

1. Encourage self-motivation and self-direction of Indian pupils, their parents, and their teachers.
2. Secure more parental involvement in education and citizenship responsibilities.

3. Emphasize cultural similarities of all pupils as a new direction within the total educational situation, while learning about group and individual differences.

To achieve the above objectives, the activities of this office were many and varied. While our activities were numerous, we will include only the highlights in this report. These activities included involvement in "Teaching English as a Second Language" workshops set up by various public school districts and Bureau of Indian Affairs schools, attendance at Indian Education conferences, participation in workshops, conferences and general meetings concerning Indian education as consultants, observers, or active participants, visiting and observing demonstration schools seeking new or better techniques in teaching Indian pupils, attendance at consultations on counseling youth of minority groups and attending budget hearings in the districts enrolling Indian pupils.

Other activities included conferences and meetings with individuals and group of school counselors, individual pupil counseling, group guidance meetings with Indian pupils, securing information regarding post high school training available in terminal programs, colleges, and employment, securing scholarship information available to Indian pupils, public relations, meetings with tribal groups, and participation in community activities through service organizations.

Two research projects were initiated pertaining to the school dropouts on the secondary level (grades 7-12), and a survey involving Indian students in higher education.

The first project is a secondary school Indian pupil dropout study which involves pupils in grades seven through twelve in the public schools in New Mexico which have a substantial enrollment of Indian pupils. We intend to develop this project into a longitudinal study to last from two to three years. Since there is some evidence that the school dropout becomes a problem both to himself and to society, we feel that it is important that the school dropout problem receive careful study and consideration.

The purpose of the study is:

1. To identify and describe certain characteristics, influences, and causal factors relating to Indian pupil school dropouts.
2. To determine the extent of Indian pupil dropouts in the public schools of New Mexico and, hopefully, to include other schools that are involved in the education of Indian pupils.
3. To encourage the early collection of pertinent information on students for the purpose of identifying the potential dropout.
4. To determine the extent and nature of the dropout problem of Indian pupils in the state of New Mexico.
5. To bring the dropout problem to the attention of educators in schools enrolling Indian pupils throughout the state of New Mexico.
6. To seek solutions to the Indian pupil dropout problem after analyzing all available factors that contribute to dropouts.

Cooperation from the school districts involved has been excellent with a few exceptions. An interim report of this project should be ready by late December of 1967.

The second project involves Indian students attending New Mexico colleges and universities and includes all Indian pupils who have attended or graduated from New Mexico public, parochial, BIA or private schools. As an ethnic group, the attrition rate of Indian college students appears very high and the college GPA very low.

Many assumptions are voiced regarding this high attrition rate and college GPA without any empirical base.

The purpose of this survey is generally:

1. To identify and describe certain characteristics and causal factors relating to the success or non-success of Indian college students.
2. To determine the age, sex and tribal affiliation of Indian college students and relate these to college GPA etc.
3. To determine mean scores in factors measured by the American College Tests and the School and College Ability Tests, and relate these to the college GPA;
4. To determine the mean high school grade point average and college grade point average;
5. To determine the relationship between the high school GPA and college GPA for Indian students;
6. To determine the relationship between English and Math percentile scores on the ACT and SCAT and the college grade received in these courses by the Indian college students;
7. To determine the college major most often chosen by Indian students and why it is chosen;
8. To determine whether the size and type of school has any relationship to college GPA for Indian students;
9. To determine the extent of the influence on the college GPA of Indian students by the number of hours carried the first year;

The list of objectives appears long; however, it is to be a longitudinal study that will progress over a period of several years. Many of the above-mentioned factors will be gathered as the project moves along. An interim report concerning the first year should be available in January of 1968.

Indications seem to point out that these projects will yield much more information than we have described. Our sincere appreciation is extended to the teachers, counselors, and administrators who assisted in our beginning attempts. Their fine suggestions facilitated our efforts in getting our projects under way.

Innovation, fascination, and sometimes frustration appear to be very much in evidence in various schools with Johnson-O'Malley Indian enrollment. With financial assistance available through Johnson-O'Malley and Title I of ESEA, many fine experimental programs involving Indian pupils were initiated during the 1966-67 school year. !

Especially evident were the efforts of some of the school districts to include "Teaching English as a Second Language" techniques in their classroom programs. The Miami reading program for the first two levels along with the language arts laboratories were welcome innovations in many schools.

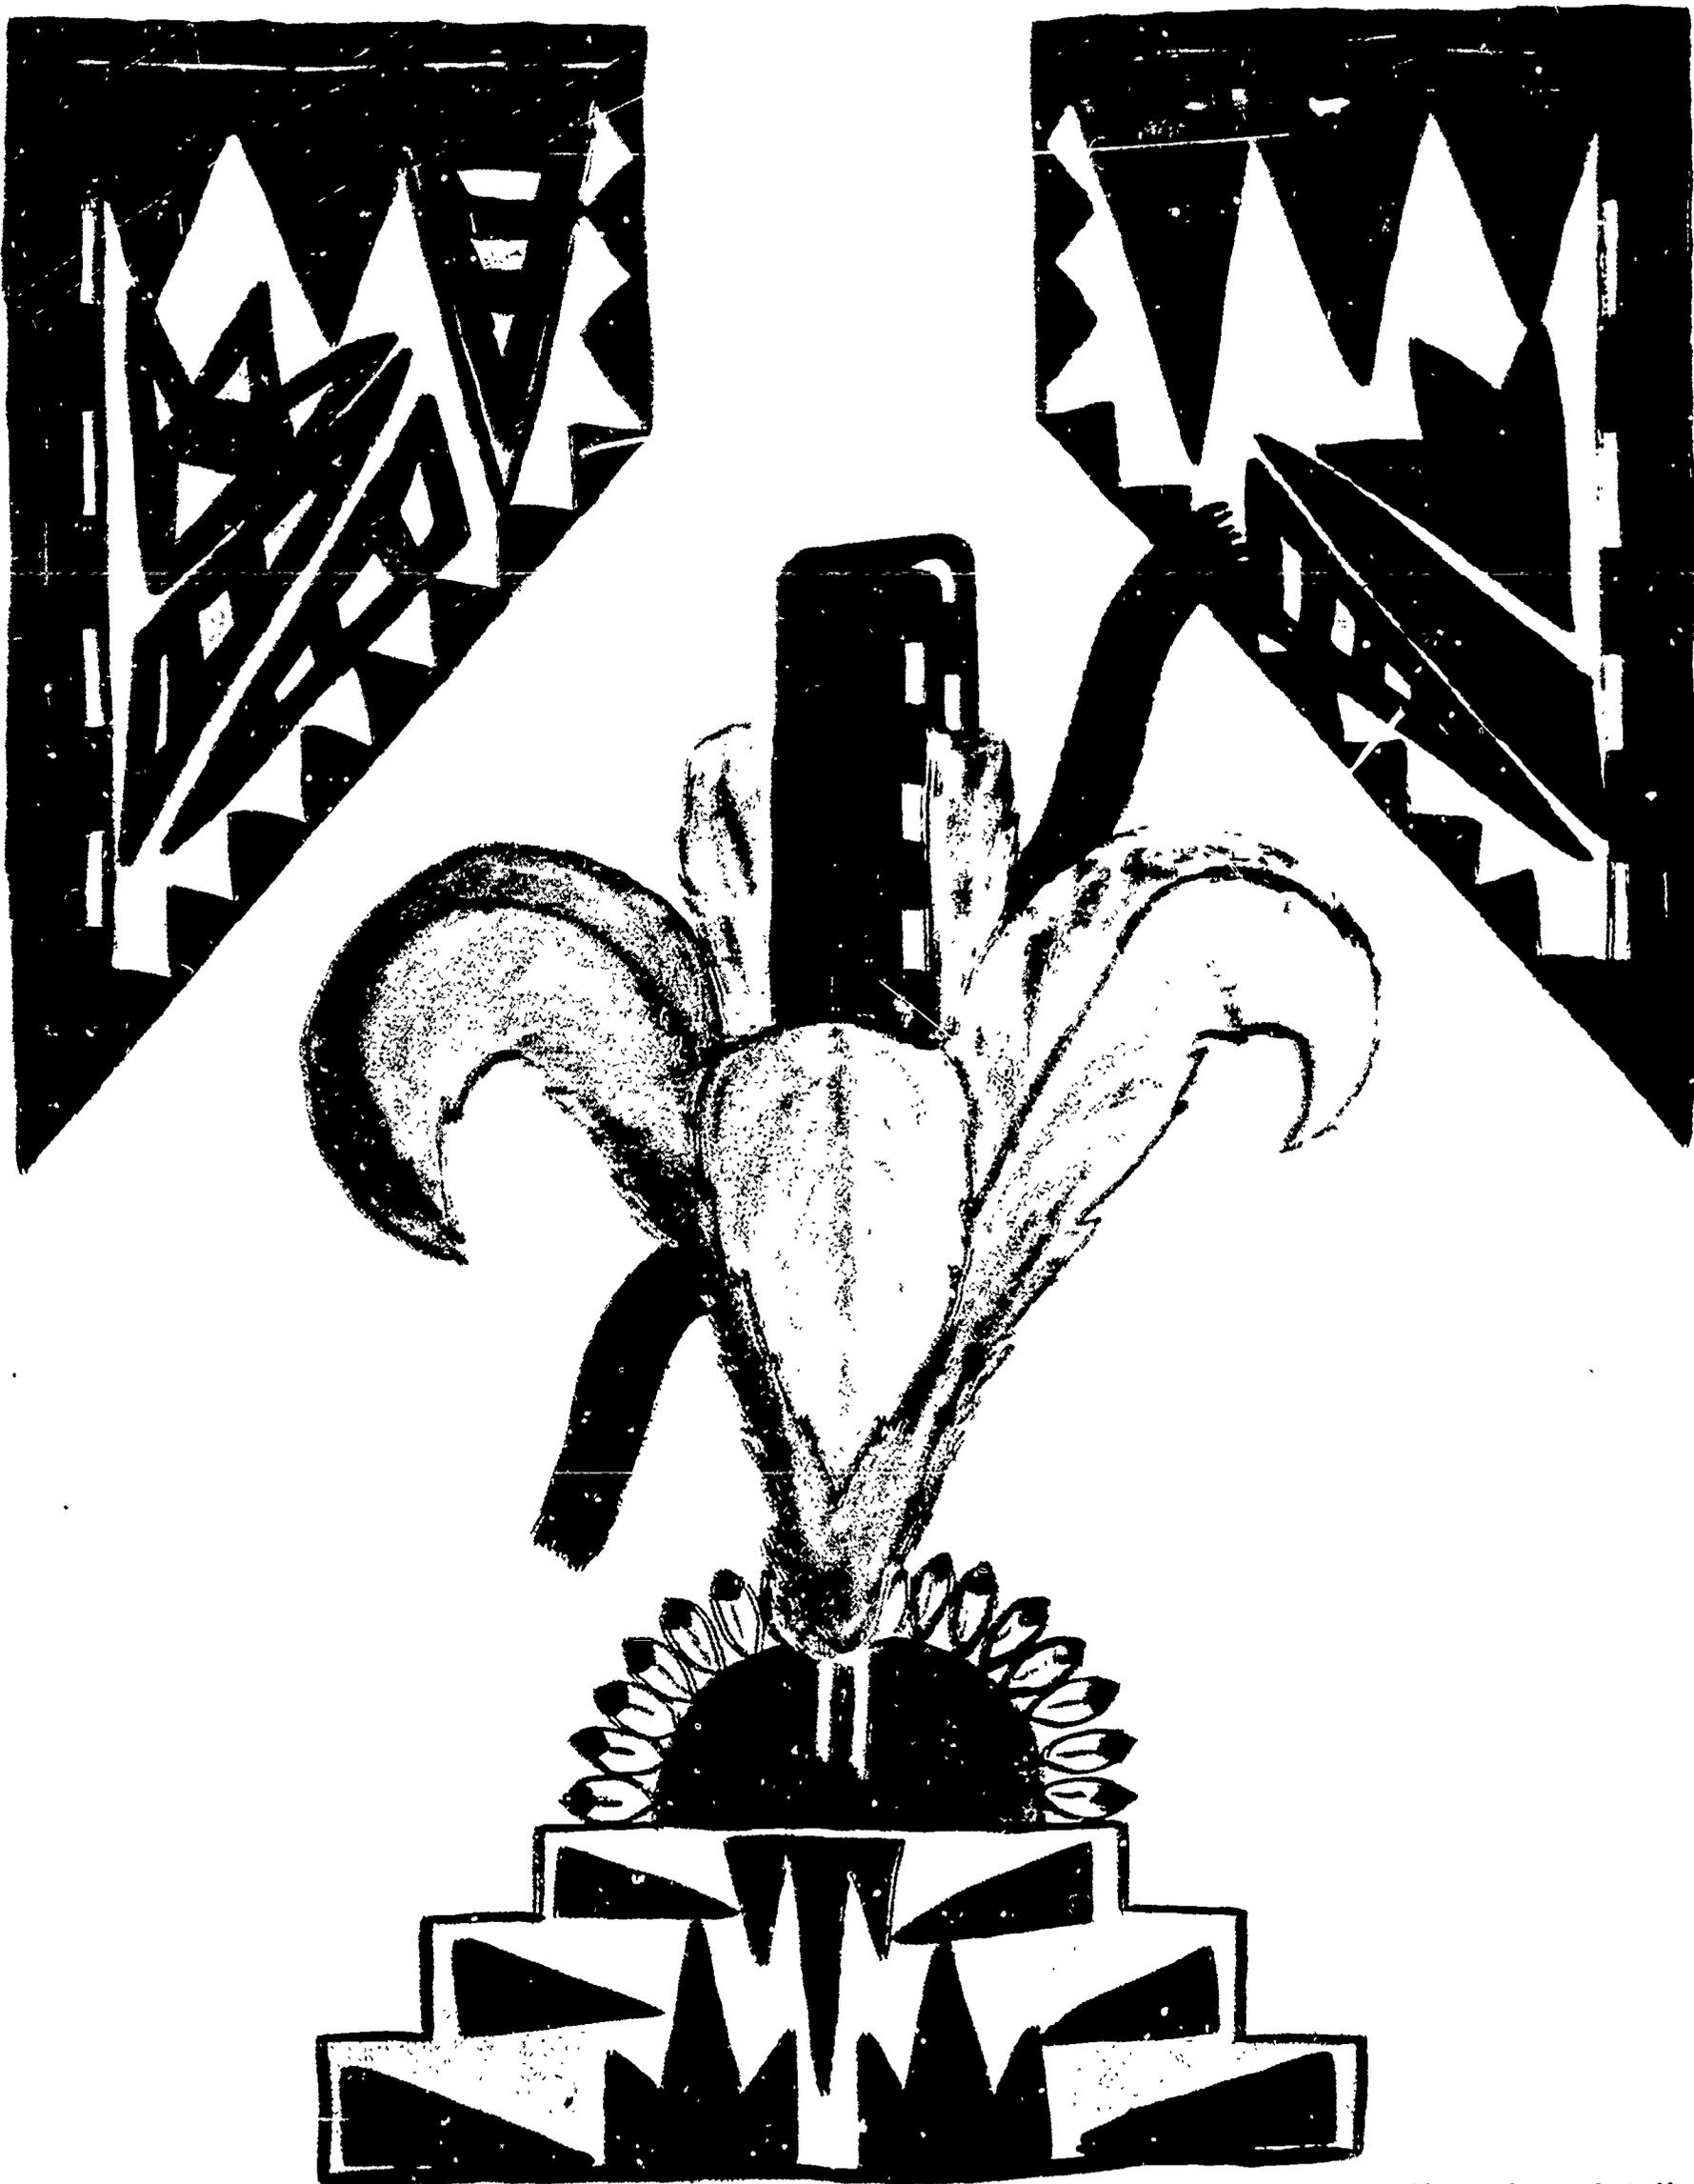

Many summer schools were in operation and Indian pupils, along with other pupils, enrolled in many of the programs.

Guidance and counseling services have been expanded in many schools. Remedial reading programs have been added to the curriculum which included reading laboratories.

The efforts to upgrade the school achievement of Indian pupils now underway is an encouraging sign; however, for the future, we must intensify:

1. Our efforts to gain for Indian pupils more experiences on verbal and non-verbal levels;
2. The verbal and sensory communication between the teachers and individual pupils as well as small groups of children;
3. Our emphasis on individual and group uniqueness rather than differences brought about by ethnic origin.
