Descriptors-*Elementary School Students, *Music Education, *Music Techniques, *Orchestras, *Teaching Methods

A project to develop a plan for adding contemporary music to the repertory of elementary students of stringed instruments found virtually no contemporary music published in the United States suitable for early stages of instruction. Since much contemporary music literature exists for beginning piano students, it was assumed that the dearth of similar material for stringed instruments was caused by the nature of the instruments or by the way they are taught. To develop the project plan, standard string method books were analyzed to identify the skills that can be reasonably expected from young students and these skills were related to the performance of contemporary music. A Composers Guide (appendix A) was then designed to give composers interested in writing music for elementary string students recommendations concerning beginners' technical skills and current pedagogical methods, while placing no restrictions on musical style. Six composers were commissioned to use the Composers Guide in writing 24 pieces introducing characteristic contemporary techniques (appendix E). The Composers Guide was found to be useful and was well received by the composers. Success of this approach with beginning students remains to be seen and depends upon gaining the support of music teachers. (TT)

THE SUMMARY

The purpose of this project is the development of a plan for adding contemporary music to the repertory of elementary students of stringed instruments. Most string methods and materials are designed to train students for the performance of the literature of the past. Virtually no contemporary music suitable for the early stages of instruction has been published in this country. As a result, procedures for introducing innovative compositional practices have not been devised.

It was assumed at the outset that the musical idioms of the 20th century can be employed in compositions suitable for performance by children. The existing literature for piano students supports this belief and suggests that the dearth of similar material for stringed instruments is caused by the nature of the instruments, or the way in which they are taught. The compilation of pertinent information for composers was undertaken as the major task of the project. A guide was written to explain the technical capabilities of young string students. Six composers agreed to write a few pieces for children, using the guide as a basis for setting technical limitations. The project was licensed to reproduce copies of these compositions for trial by participating teachers.

The plan developed in this project is embodied in the "Composers Guide." Although no restrictions are placed upon choice of musical style, the guide recommends that composers employ those instrumental skills customarily taught by current pedagogical methods. In view of the number and variety of new compositional practices that must be assimilated if contemporary music is to be adequately presented, an approach which offers teachers the opportunity to gradually expand procedures appears necessary.

The project composers are Herbert Bielawa, Ralph Shapey, Seymour Shifrin, Alan Shulman, Halsey Stevens, and Richard Wernick. All responded favorably to the "Composers Guide", expressing strong support of our purpose and our plan. Twenty-four attractive and colorful pieces are finished and ready for trial by teachers. Written carefully for young minds and hands, they introduce a number of characteristic contemporary technics. Although instrumental skills required are those commonly attained in the first years of study, children trained solely through the use of standard string methods are likely to need special preparation for some of these pieces. Anticipated difficulties are not entirely due to 20th century innovations. Experience acquired in an informal testing program indicates that a repertory of folk songs and simplified transcriptions does not develop the musicianship needed for the performance of the project compositions. The project recommends the

preparation of supplementary instructional materials for the use of teachers participating in the testing program and others who wish to introduce contemporary music to students.

INTRODUCTION

The literature available to beginning students of stringed instruments is remarkable for its limitations. In a time of unprecedented artistic ferment and experimentation children are restricted to a musical world bound by the key, the triad, rigid meter, and relentless melodic symmetry. Popular method books and collections of easy pieces contain familiar folk songs and ballads, arrangements of melodies by famous composers of the past, and original compositions in traditional style, usually of the class that the Yale Seminar on Education labeled "pseudomusic." The writer has not been able to find any published music suitable for first and second year violin students by American composers using 20th century compositional technics. The few pieces available from foreign publishers are expensive and hard to obtain. For the intermediate student there is a handful of compositions, mostly published abroad. For the advanced performer and mature professional there is a wealth of solo and chamber music written by the finest composers of our time. This imbalance does not mean simply that the experience of playing contemporary music is delayed and requires a degree of skill that many amateurs never reach. It causes serious problems for even gifted players and may establish permanent impediments to the enjoyment and performance of new music. The string player trained exclusively in music of the 18th and 19th centuries determines relationships of pitch by reference to a tonal center and rhythm by conventional metrical divisions. His ability to read fluently is based upon these concepts. The idiomatic patterns of the music he has studied are built into his technical skills. Much new music seems enormously difficult because he becomes quite literally lost, technically and musically.

If the art of string playing is to continue to flourish it must be taught as a living tradition. By limiting children to a repertory selected and pruned to satisfy the requirements of a pedagogical method concerned solely with the music of the past, we present instrumental techniques as steps towards a fixed goal. We imply that a formal musical education consists of training in a finite number of skills necessary for the proper performance of an existing literature. This approach distorts the nature of the performing arts and threatens their vitality. The militant guardian of our heritage of masterworks is in danger of handing on only the ritual gestures characteristic of a static art form.

The antidote is fresh, unpredictable, irreverent music that surprises the ear and awakens the mind - the music of our own time. By offering the child the music of living composers we invite him to participate in the art of the present and prepare him for the future contributions of his own generation. We place him in the studio of the craftsman instead of the gallery of the museum and, in so doing, we teach the traditions of the past more honestly. Instrumental technics are inventions, not rules, and can be thoroughly understood only in musical context. The study of literature from a variety of periods helps the student to grasp the relationship between performing skills and musical style. Those who play contemporary music also learn that the stringed instruments do not speak a dead language but one that is in a continual state of revision and expansion. It is possible, however, that unless we provide an education which encourages young performers to contribute to this process we may wholly alienate the composer, thus leaving the violin in the hands of musical historical societies.

At present these arguments are largely academic. The string teacher who is convinced that elementary students should play contemporary music has no means of acting on his belief. There is no literature available. Any realistic attempt to remedy this situation must recognize the influence of current pedagogical methods. By ignoring the radical changes of the past sixty years, teachers have avoided the necessity of devising procedures for introducing innovative compositional practices. This project proposes to develop a plan for adding contemporary music to the repertory of young string players by exploring the nature of the problems that must be solved by composers and teachers.

It was assumed at the outset that the musical idioms of the 20th century can be employed in compositions suitable for performance by children. The growing body of contemporary literature written expressly for piano students supports this belief and suggests that the dearth of similar material for stringed instruments is caused by the nature of the instruments or the way in which they are taught, rather than the difficulty of writing for the young. A glance at popular string methods published within the last thirty years provides additional evidence. Certain carefully planned and widely used procedures for teaching basic instrumental skills are incompatible with some of the most influential compositional theories and practices of our time. A striking example is the simultaneous development of the "finger pattern" system of teaching and the serial method of composition.

Instrumental technics are solutions to musical problems. Current teaching procedures are designed to prepare students for an *existing* literature, the music which they, in fact, learn to play. In the opinion of the writer, these procedures do not provide an adequate preparation for the music of the 20th century but the absence of a contemporary student repertory makes spontaneous revision unlikely.

The first objective of this project is to obtain a group of original compositions for young players which can be offered for study and trial.

Composers, as well as teachers, must understand the problems before proposing a solution. Much of the standard repertory is drawn from the literature of the 18th century when a musical education included the study of violin as a matter of course. Today the professional training of a composer is not likely to cover the fundamentals of string playing and teaching. Yet those who write for children must work in the realm of the possible. The compilation of practical and pertinent information for composers was undertaken as the major task of the project.

In essence, it is proposed to provide a bridge from composer to teacher by offering technical advice which will enable composers to give teachers new music appropriate for their students. At the beginning of the project it was recognized that the successful development of this plan would depend upon our ability to enlist the cooperation of imaginative composers and to offer them information which is useful, but not excessively restrictive.

PROCEDURES

Funds were granted to support the project for one year, beginning December 1, 1966. Procedures were planned to be accomplished in three stages: (1) preparation of a technical guide for composers, (2) composition of pieces by composers using the guide, and (3) trial of new music by teachers. The first two were scheduled for completion within the year. The third was expected to continue beyond the duration of this project as part of the University of Illinois String Research Project.

Composers Guide

The guide is designed for the use of composers interested in writing music for elementary students of stringed instruments. Because of the time limitation, it seemed advisable to restrict specific directions and illustrations to music for the violin. It was assumed that the principles involved could be applied to compositions for the other stringed instruments without serious difficulty.

The task of writing the Guide was approached in the following steps:

1. Standard string method books were analyzed to identify the instrumental technics taught in the early stages of instruction, and the order in which they are customarily presented.
2. This information was organized as an outline of the technical capabilities which can reasonably be expected of young students.
3. The possibility of employing the performing skills described in the outline in a variety of contemporary compositional styles was discussed with advisors.
4. The outline and the suggestions of the consultants were given to William Mullen, a graduate assistant in composition at the University of Illinois assigned to the project. He was asked to write a group of sample pieces for informal testing.

Throughout the preparation of the Guide, the technical materials being produced in the University of Illinois String Research Project were studied. Paul Rolland, Project Director, and members of the staff offered many useful suggestions. Virginia Givens, instructor of pre-instrumental music classes for children at Northwestern University, also acted as an advisor.

Current compositional practices and their application to music for children were discussed with Ralph Shapey, Music Director of the Contemporary Chamber Players of the University of Chicago. Work with William Mullen contributed to an understanding of the composer's problems and resources.

The first draft of the Guide was read by consultants Ralph Shapey and Anthony Donato, Professor of Music at Northwestern University. As a result of their suggestions, it was completely rewritten. The second draft, submitted to the consultants, the Project Director and Richard Colwell, Associate Director of the String Research Project, was subsequently revised once more. The final version is attached as Appendix A.

Composition of New Pieces

In order to test the usefulness of the Composers Guide and to obtain pieces for trial, a few composers were invited to write for the project. Choice was based upon suggestions from a variety of sources in the hope of finding composers of widely different styles.

Recommendations were made by the Contemporary Music Project of the Music Educators National Conference, as well as the project consultants and interested teachers.

The plan called for six composers. The first seven letters brought only one refusal. All others expressed interest, although several made acceptance conditional upon examination and approval of the Guide. Some months after receiving the Guide, one composer withdrew. At this point, an extension of time for completion of the project was requested in order to replace this composer. Composers retained to write for the project are: Herbert Bielawa, Ralph Shapey, Seymour Shifrin, Alan Shulman, Halsey Stevens, and Richard Wernick.

Composers were asked to write three short pieces for stringed instruments, using the Guide as a basis for limiting instrumental technics. No restrictions were placed upon choice of compositional technics other than those implicit in the nature of the work. Criticism and comments on the contents of the Guide were requested. In order to enlarge testing possibilities, each composer was asked to write at least one piece suitable for mixed string class (violin, viola, cello). Composers licensed the project to reproduce a limited number of copies of each piece for trial by teachers participating in the University of Illinois String Research Project. Arnold Fish, Associate Director of the Juilliard Repertory Project, was consulted about the terms of the licensing agreement and other questions concerning plans for a testing program.

Manuscripts received from the six composers who agreed to write for the project have been carefully studied and edited. All editorial suggestions were submitted to composers for approval. Minor revisions requested have been made. The pieces are ready for trial in 1968-69.

Trial of Contemporary Music

Early in 1967, an informal testing program was initiated to explore problems encountered by teachers introducing 20th century musical idioms to children. Music was written for this program by William Mullen. Trial of these experimental pieces was proposed as a means of identifying some of the skills required for the performance of contemporary music that are not developed by the study of traditional teaching materials. Discussion of ways to prepare students for the acquisition of these skills might lead teachers to reassess current methods and consider new procedures which would allow them to present the basic elements of music in terms applicable to the present as well as the past. It was planned to report the reactions of teachers participating in this program in the form of a syllabus which would suggest ways to establish a musical orientation appropriate for our time.

Seven short pieces by Mr. Mullen, (see Appendix C), were given to three teachers in Urbana and four in the Chicago area between February 18 and March 8, 1967. All of these teachers are themselves string players. Six teach in the public schools and one gives private lessons in violin. Participation was entirely voluntary. The writer talked to each of the teachers personally to explain the nature of the project and the purpose of the testing program. No effort was made to involve anyone reluctant to engage in experimental work. On the contrary, the importance of genuine interest was emphasized. Those who were given Mr. Mullen's compositions had all expressed pleasure at the opportunity to participate in the project and a desire to try new music.

A brief outline of information desired was given to each teacher. A copy of these instructions will be found in Appendix D. The investigator requested an opportunity to observe classes working on the pieces being tested. Teachers were encouraged to make a selection from the group of pieces if they did not find all suitable for their students. They were asked to complete the trial and report results verbally to the investigator by the middle of June.

In order to stimulate discussion of teaching procedures appropriate for contemporary compositional practices, the writer outlined a method of teaching students to identify and measure differences in pitch and duration. Four of the participating teachers who expressed an interest in examining a new approach were given the outline for consideration.

This program was unsuccessful. The proposed syllabus was not written because the teachers did not give the pieces adequate trial and did not respond to the invitation to consider new teaching procedures. The outline provided by the investigator was received with indifference. When asked directly for an opinion on the practicality of suggestions for introducing melodic and rhythmic patterns characteristic of this century, several replied that they did not know, had never tried anything of like nature, and that it would take too much time, in any case.

Only one of the seven participating teachers made a serious effort to teach any of the pieces thoroughly. She gave one piece to a five-year-old and two pieces to two students aged six and seven. All three children took private lessons. The teacher reported that the children were able to play the pieces well, learned them with little difficulty, and enjoyed them. Three teachers gave some of the pieces a token reading. One arranged to present two pieces in a class session with the investigator present as an observer. The music was

introduced effectively and the students responded with obvious enthusiasm. Despite this success, no additional work on these compositions, or any of the others, was subsequently reported. The remaining three teachers did not try any of the pieces.

The writer discussed the program with each of the teachers several times during the trial period. Almost all apologized for failing to fulfill their commitment, explaining that they could not find the time. Apparently, they felt that an inordinate amount of time would be required to present and explain music in a contemporary idiom. It is assumed that they do not believe conventional methods and materials provide an adequate musical preparation because no one considered the instrumental technics unusually difficult. In the opinion of the writer, the teachers agreed to test the pieces in good faith but were not able to relate them to their accustomed programs of instruction. Several spoke of introducing contemporary music as "curriculum enrichment." They seemed to believe that the trial pieces would provide an interesting experience but did not consider the possibility of adding them to the student repertory. The six public school teachers appeared reluctant to evaluate the new pieces in either musical or technical terms. They did not reject the music as poorly written or unsuitable for children. Only one expressed any dislike for it. The others gave the impression that they found Mr. Mullen's music irrelevant to their purposes.

RESULTS

Response of Composers

Six gifted composers have written music for elementary students of stringed instruments. It was not at all difficult to find composers willing to write for children, although the fees were minimal. The letter of invitation, explaining the purpose of the project, brought immediate, encouraging response. Composers participating in the project strongly support this point of view. They are aware of the gulf between contemporary compositional practices and educational materials; they are disturbed by the results. They realize that many performers are not properly prepared for music being written today.

These composers are concerned with the nature and quality of the musical experience offered to students. Written specifically for young minds and hands, the project compositions are designed for performance by children. They give students the opportunity to fully and honestly realize the intentions of the composer and thus become, in fact, youthful musicians.

Evaluation of the Composers Guide

The Composers Guide was received favorably by the six composers writing for the project. All described it as helpful and none objected to any part, although criticism was invited. An examination of the pieces leaves no doubt that the composers studied the Guide seriously. Remarkably few passages deviate from the technical limitations recommended. Those that do exist are of minor importance and can be defended.

A few technical problems not discussed in the Guide appeared. As a result, some composers were asked for slight revisions to eliminate these difficulties. Several involved technics peculiar to the cello, and two composers suggested that these problems might well be included in the Guide. The Supplement to the Composers Guide, Appendix B, contains information on these and a few other points which were not adequately covered.

The Guide places no restrictions upon the composer's choice of musical structure or idiom. On the contrary, he is urged to find new ways to employ elementary performing skills. The Guide does suggest that composers should understand and accept the technical limitations of students taught by conventional methods. Essentially, it is proposed that the existing impasse between traditional teachers and innovative composers can best be solved by compromise. Composers are asked to work within the technical limitations set by current methods in the expectation that teaching procedures can be expanded to accommodate new sounds and forms of musical expression.

The pieces written for the project indicate that this approach may be effective. Inventive composers are able to use conventional instrumental technics in a variety of ways. The treatment of finger patterns is a good example. When the outline for the Guide was under discussion, the feasibility of recommending this teaching device to contemporary composers was seriously questioned. The first finger pattern, a major tetrachord, is firmly tied to the major scale in conventional materials. It is also a practical method of reducing intonation problems for beginners which could be particularly helpful in unfamiliar or atonal music. The project composers apparently recognized the usefulness of this approach and adapted it to their purposes ingeniously. Seven pieces are written entirely in Finger Pattern I. Excerpts may be found in Part II of the Supplement, Appendix B. Other compositions employ finger patterns in combinations which limit the amount of left hand adjustment. Similarly, the bowing patterns described in the Guide were applied to rhythmic figures in changing meters or asymmetrical designs.

Response of Teachers

The new compositions have been received with some surprise by those accustomed to the standard repertory for students. There is a remarkable difference in the sound. Music written for stringed instruments by imaginative composers has infinitely more color and resonance than the folk songs and transcriptions that fill the collections we now teach. In spite of stringent limitations imposed by the nature of the assignment, composers have written with wit and verve.

In the opinion of the writer and other teachers in the project, the pieces employ instrumental technics commonly attained by students in the early stages of instruction; structure and idiom may create difficulties for the conventionally trained. Until the trial phase has been initiated, problems of teaching the project pieces cannot be satisfactorily explored. However, comparison with published materials suggests that students may not be adequately prepared for the following:

1. Ensemble Technics

Without exception, composers expect some skill in ensemble playing. Even in the easiest duets, each part is given a degree of independence. Most class methods, designed primarily for unison playing, offer little preparation for contrapuntal music. First ensemble pieces in method books are usually written in chordal style, with each part moving in identical rhythm. Although the ensemble technics required for the performance of the project compositions are rudimentary, students must be able to observe rests, make entrances, and fit an individual part into the whole.

2. Rhythm

In general, the new pieces offer far more rhythmic variety than standard materials. Change of meter should not prove excessively difficult since the pulse, or metrical unit, remains constant. Frequent short, irregularly spaced rests are likely to be more troublesome. Rhythmic accents may fall at irregular intervals also, forming phrases of varying length. One composition is polymetric and one contains polyrhythmic passages. Rhythmic patterns are well planned for young performers but do require more than conventional metrical training.

3. Tonality

Most pieces are tonal although they are not confined to one key. Careful use of finger patterns reduces aural problems in atonal and polytonal pieces. The composers have handled problems of pitch so skillfully that unusual intonation difficulties are not anticipated with well trained students.

4. Expression Marks

One of the teachers who tried the pieces written by William Mullen remarked that students are not accustomed to change of dynamics. The writer can find little justification for the dearth of expressive words and symbols in published methods. Even after two or three years of instruction, many students have not learned to observe indications affecting tempo, dynamics, accent, or phrasing. The project composers use all of these signs as a matter of course.

Project Compositions

A brief description of the compositions written for the project follows. The terms Stage I, Stage II, Stage III refer to a system of grading illustrated in the Composers Guide. Reference is made also to technical problems described in the Guide (Finger Patterns, Bowing Patterns). All duets for violin and cello have optional viola parts and may be used in string classes. Excerpts from the pieces may be found in the Supplement to the Composers Guide, Appendix B. The commissioned pieces are presented in Appendix E.

Herbert Bielawa: *FOUR LEGENDS, for violin and cello*

FIDDLE-FLING, three pieces for violin and piano

The four duets for violin and cello, all in canon form, are built on tunes of folk song character. Each can be played without change of finger pattern, with the exception of a few bars in the cello part of No. 3. The first, in Finger Pattern I, and the second in Pattern II, are suitable for Stage I. The third and fourth, in Patterns IIIa and IIIb, are more difficult, particularly for the cellist who must be able to play long passages in extended position. Short slurs are used to provide a variety of rhythmic groupings of irregular length.

The violin and piano pieces are designed for Stage III. The first is technically easy but the others are too advanced for most students at this level. Sustained double-notes in the second piece demand skillful bowing. Since one note is always an open string, the left hand difficulties are not excessive. The last piece employs glissandi and pizzicati on single notes and chords.

Ralph Shapey: *MARCH, SONG, AND DANCE, for violin, viola, cello and percussion (3 players)*

Technically, these pieces are easy, employing instrumental skills that are mastered in Stage II. Parts for all instruments are written in Finger Pattern I. Bowing techniques are elementary also. However, there are ensemble problems and rhythmic difficulties, particularly in the Dance. Meter changes almost every measure, although the pulse remains constant, and there are some polyrhythmic passages. "March", which is scored for strings only, can be played by a trio without a conductor, but in the other two pieces students will need cues and rhythmic direction. Percussion parts are written for rhythmic instruments which can be played by anyone able to read music. Wood-block, triangle, and hand drum are suggested. These pieces have been skillfully written to sound well in the hands of children. By

limiting the instrumental technics the composer has made the study of more complex rhythmic problems feasible. The combination of strings and percussion is highly effective. Easy double-notes, pizzicati, and glissandi provide additional color.

Seymour Shifrin: LULLABY, for violin solo

PLAY, for violin and cello

DUETTINO, for violin and piano

"Lullaby" is a simple, expressive melody for unaccompanied violin. Bowing techniques and rhythmic patterns are easy. Frequent changes of finger pattern are well planned for students in Stage III. The other two pieces require training in ensemble playing. "Play" employs elementary instrumental skills suitable for students at the beginning of Stage III. Change of meter and frequent short rests in a quick tempo demand rhythmic precision. Although the violin part of "Duetto" is easy to play alone, fairly complex rhythmic writing for the piano may cause ensemble problems. String parts include indications for accent, staccato, dynamics, and tempo, as well as passages marked pizzicato, con sordino, sul ponticello.

Alan Shulman: THEME AND VARIATIONS, for two violins

DUET, for violin and cello

STUDY, for violin, viola, cello

These pieces provide good training for students not experienced in ensemble playing. Although each part is given some degree of independence, rhythmic problems are minimal. "Theme and Variations" can be played easily by students in Stage II, if they are ready to learn Finger Pattern IIIa. The duet for violin and cello and the trio are suitable for Stage III. All parts lie well for the instruments. Easy double-notes are effectively used in the duet. Dynamics are carefully indicated throughout.

Halsey Stevens: TWO DUETS, for two violins

FOUR DUETS, for violin and cello

The violin duets offer an excellent introduction to two-part contrapuntal music. In the first, a canon, one change of finger pattern occurs in the second violin part. The other is in Finger Pattern I exclusively. Both require control of legato bowing and

change of string within a slur. The rhythm is easy and bowing patterns remain constant.

The duets for violin and cello are more difficult. Students in Stage III should play the second and third easily. Although it is technically suitable, the style of the first is too mature for young children. It is more appropriate for capable students of junior high school age. The fourth duet is likely to be too difficult for students in Stage III unless they have acquired considerable agility and precision. In all the duets, players must be able to listen to one another and follow the leading part. There are no unusual rhythmic problems. String writing is idiomatic, employing double-notes, slurs, and staccato effectively.

Richard Wernick: *YOU CAN'T CATCH ME*, canon for three violins or two violins and cello (or viola)

PETER'S MARCH, for two violins

A MUSICAL GAME OF TAG, for two violins

These three easy pieces for Stage I introduce the beginner to contemporary rhythmic practices. The first, a strict canon, in three parts, is played entirely upon open strings. It is divided into three phrases of equal length. Each is written in a different meter, and each employs a different method of producing sound - arco, col legno, and pizzicato. When all three players have entered these phrases are heard simultaneously. It is an ingenious way of teaching polymeter. The other two pieces can be played by children who have learned Finger Pattern I and simple detached bow strokes. Rhythmic figures are not difficult but parts move independently of one another and there are frequent short rests. In "A Musical Game of Tag" an atonal melodic line is divided between the players.

CONCLUSIONS AND RECOMMENDATIONS

The plan developed in this project is embodied in the Composers Guide. Composers are asked to write music expressly for children, using elementary instrumental technics developed by current pedagogical methods in order to reduce the problems of teachers. If first contemporary compositions utilize skills commonly attained by students, procedures for introducing 20th century music may be devised without immediate, radical revision of basic methods. The response of the six composers who used the Guide indicates that this approach is effective. Compositions written for the project place contemporary musical idioms in settings suitable for performance by children.

The ease with which new music was obtained suggests that the absence of a contemporary student repertory is not due to the disinterest of composers. Those who participated in the project were extremely cooperative, expressing vigorous support of our goals. Comments on the Guide indicate that technical information offered was helpful, possibly indispensable to those who are not themselves string players. This phase of the project was more successful than we dared hope. Composers proved willing and able to write for children, receptive to the recommendations in the Guide, and pleased to provide new music for trial. Plainly, they are prepared to meet teachers halfway.

We do not know what the response of string teachers will be when the compositions are offered for trial. However, we have reason to anticipate difficulties. The informal testing program initiated in the course of the project produced negative results. Although this failure is not particularly significant in itself, we believe that the attitude of these teachers is not atypical. Those who use string class methods may not be prepared to present the project compositions. New problems are not entirely due to the innovations of the 20th century. Standard student materials are not designed to develop the musicianship required for the performance of the new pieces.

There are many ways of teaching. Not everyone depends solely upon published class methods. Hopefully, some teachers will be able to use these pieces with little difficulty. Others may devise procedures to prepare students for new musical problems. However, the writer and others concerned with the project believe that it is unrealistic to assume that a large number of teachers will be able to use these pieces successfully without assistance.

The Composers Guide appears to be a useful technical tool and an effective means of drawing attention to the need for new literature. Tested by experienced composers and expanded to include examples of their work, it may prove helpful to others who want to write for string students. The project compositions are worthy of publication, but without supplementary instructional materials widespread acceptance is doubtful. The project recommends the preparation of a manual for the use of teachers in the testing program and others who wish to introduce contemporary music to students. Our plan has gained the support of gifted composers but unless we are equally successful with teachers their music will not be played by the children for whom it was written.

UNIVERSITY OF ILLINOIS STRING RESEARCH PROJECT

Paul Rolland, Director

1967

The research reported herein was performed pursuant to a contract with the United States Department of Health, Education and Welfare, Office of Education, under the provisions of the Cooperative Research Program.

FOREWORD

This guide has been prepared for composers who are interested in writing music for students of stringed instruments. It provides an explanation of current pedagogical practices, a description of the technical capabilities of young players, and suggestions for the use of instrumental skills in compositions for students in the early stages of instruction. Although it is directly concerned with music for the violin, most suggestions are applicable to compositions for the other stringed instruments.

At the present time, beginning string students are confined to a repertory which is singularly lacking in variety and imagination. For two or three years, most children play nothing but familiar folk tunes and arrangements of melodies by famous composers of the 18th and 19th centuries, or their 20th century imitators. A few of these pieces appear in this guide as illustrations of typical teaching materials. They are not intended to influence or restrict the composer's choice of musical style. The sole purpose of all musical examples is clarification of the text.

Although music for children must be easy, it need not be trite. This writer believes that the current literature is the result of an excessively pedantic approach which tends to stifle both musical growth and youthful enthusiasm. The idioms of the 20th century are as suitable as those of any other period in the hands of a composer who understands the musical abilities and technical limitations of children. The young do not demand a conventional use of meter or tonality until they have been trained to hear with 18th century ears. New pieces and new sounds are urgently needed.

INTRODUCTION

The composer of music for students is writing for both children and teachers. From a practical standpoint, acceptance by the teacher is most important since the choice of literature is his. Unless the composer understands modern pedagogical methods, his pieces are not likely to reach the hands of children. Few teachers are willing to use music which requires radical changes in their normal procedures. For this reason, it seems wise to begin with a brief discussion of current practices. Descriptions of teaching methods and materials are offered as preliminary considerations to assist the composer, not as rules to be followed. If pieces are not suitable for practical teaching situations, they will not be played, but if they are not more than technical tools, they should not be written. Although the requirements and attitudes of teachers must be considered, the major responsibility of the composer is to the child. The sole purpose of this guide is to provide information which will enable the composer to write meaningful music which children can play and will want to play.

The private teacher needs pieces for solo violin with piano accompaniment, suitable for students of various ages. Although private lessons may be started at any time after the age of three, the children at the levels of advancement described in this guide are likely to be between four and fourteen years old. The accompaniment, which will probably be played by the teacher, should not be technically demanding. It should be light in texture to avoid overpowering the young soloist. Violin duets for two students, or for student and teacher, are possible alternatives.

Solo pieces may be used in violin classes, particularly in beginning classes for young children. The largest market for student music is provided by the public school string classes, but in the schools all the stringed instruments may be taught simultaneously. Classes are customarily started in the fourth or fifth grade, using class method books written for violin, viola, cello, and string bass. Solo pieces designed for mixed string classes must be more restricted in range and style. However, practices vary, and in some public schools violin students are taught in separate classes part of the time. In violin classes, solo pieces can be played in unison with or without piano accompaniment. Two-part pieces without accompaniment are particularly useful in class teaching. Unless the group is very small, it is difficult to teach children effectively from the piano bench. Parts should be equally attractive and reasonably interesting when played separately in individual practice sessions at home.

Two-part pieces may also be designed to meet the varied requirements of the string class. If a piece for solo violin has an optional part, suitable for the lower instruments, it can be used by teachers of either violin classes or mixed string classes, and by private teachers as well. In compositions for students each part should be designed to ensure the player's attention. Class morale and discipline depend upon keeping all children occupied.

Accompaniments may be written for simple percussion instruments. This is practical if music is for use in public schools, where a variety of instruments are likely to be available. Small rhythm instruments, such as the hand drum, triangle, tambourine, and wood blocks, can be played by children. In this way, students may take turns playing the solo and accompanying parts.

Virtually all writers of violin methods published in recent years introduce fundamental musical and playing skills in approximately the same order and use the same type of musical materials. The size and accessibility of the school market has encouraged the publication of materials suitable for the mixed string class, as well as the violin class or private student. To meet the requirements of group teaching, writers of beginning methods have developed procedures for presenting elementary skills slowly in a series of carefully graded steps. This tends to prevent the use of additional music unless the same sequence is followed.

At present, the rote approach advocated by the Japanese teacher Shinichi Suzuki is receiving widespread attention. Although rote methods change the way in which children are taught, they do not appear to have had much effect upon what they are taught. The children who study with teachers trained or influenced by Suzuki are playing the same folk songs and transcriptions as those who are using written music. However, the composer of music for beginners has more freedom in writing for children who are being taught by rote. Much more rhythmic variety is feasible when the intricacies of notation do not have to be explained at once. Emphasis upon listening, rather than reading, develops aural memory which will assist the child in learning unconventional melodic patterns. The elimination of music reading in the earliest stages of instruction tends to encourage more rapid development of instrumental technics, including change of position (change of hand placement on the fingerboard).

In the following pages, elementary musical and instrumental skills are outlined in the order in which they are usually taught. It is probable that two to three years will be devoted to this training, but the time spent in any stage of learning depends upon individual attitudes and circumstances. Typical teaching pieces are offered as illustrations, not as models for the composer. This guide has been written in the hope of expanding the literature for students. However, it is important that the musical experience of the average student be taken into consideration.

At this time, it is not possible to know how influential the trend towards rote teaching will become. The demonstrations of Suzuki have provided a great impetus, but traditional methods are strongly supported. The majority of American students are still being taught to play from written materials, even in the first lessons. It is probable that new pieces for students will be more widely accepted if they are confined to first position and are written in simple notation. On the other hand, the teachers who are following Suzuki's example, or are exploring other approaches to rote teaching, are in need of material and may be more receptive to contemporary pieces. For this reason, suggestions will be included for music which may be taught by rote or by teachers who are not completely dependent upon conventional method books.

STAGE I: TECHNICAL LIMITATIONS

Bowing

The bow is most easily controlled on detached strokes in the middle. In the beginning, best results are obtained by using from one-fourth to one-half of the bow length on a single stroke. This means that notes should be no longer than ♩ ($\text{♩} = 92$). The average student is able to change bow direction easily if short strokes are used. Fairly rapid notes on one pitch are practical, even in the earliest pieces. (♩♩♩ , $\text{♩} = 100$).

The playing of beginners is never truly legato. Slurs are not taught at this stage, and a smooth, imperceptible change of bow direction is rarely achieved during the period of study described in this guide. In Stage I, notes may be either detached or staccato. No indication is required for detached notes. Omission of slurs guarantees a slight articulation at each change of bow. A simple staccato is easily played. It will be firm, not light, because the bow will remain on the string.

Rhythmic Patterns

The easiest patterns are those which do not require any change in the speed of the bow stroke. In spite of its appearance, Example A is easier for the beginner to bow than Example B.

Assume that the student is using half the bow length for the half notes. In Example A, the quarter notes can be played with a fourth of the bow, but in Example B the quarter notes must also be played with a half-bow in order to have sufficient bow for the second half note. This means that the bow arm must move twice as fast on the up-bow (♩) as on the down-bow (♩).

Rests would simplify bowing problems in Example B.

Beginners tend to draw the bow at approximately the same rate of speed all the time. A little skill and experience must be acquired before a child can be expected to determine the amount of bow needed and control the motion of his arm in passages requiring changes of bow speed. In Stage I, all rhythmic figures should be designed to avoid this difficulty.

In most published methods, all pieces are in 4/4 or 2/4. Usually, only quarter and half notes are written. Technically, this limitation is not necessary. Many easy rhythmic figures can be played with a constant bow speed.

For example:

Any rhythmic figure which can be played without changing bow speed and is easy to remember can be taught to beginners by rote. Students who play only what they can read are usually limited to the following rhythmic symbols at this time:

Intonation

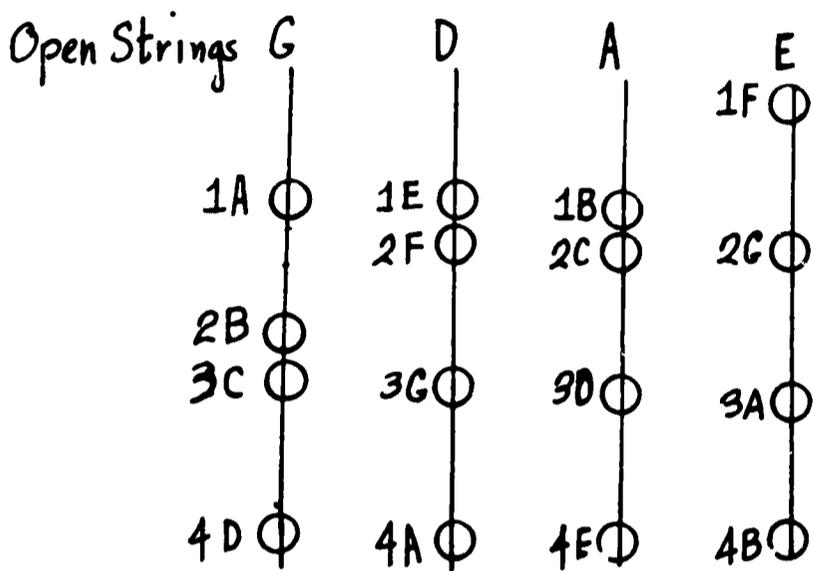

There can be little doubt that most students find control of pitch the most difficult of all technical problems. Everyone agrees that good intonation depends upon the ear, but, apparently, writers of violin methods do not believe that systematic aural training is necessary, or they do not consider it to be the responsibility of instrumental teachers. The realistic composer will not assume that students have been given instruction in solfeggio or any method of ear-training. In these circumstances, it is necessary to simplify problems of pitch as much as possible. The organization of musical materials by finger patterns is a practical method of reducing the complexities of left hand technic. This approach, which has been adopted by virtually all teachers and writers of string methods, should be studied carefully by composers of music for elementary students.

Finger Patterns

The term "finger pattern" is used to describe the spacing between the fingers of the left hand in one position. The hand is said to be in

first position when it is placed so that all four fingers fall within the range of a fifth from the open strings.

Example A
First Position

Theoretically, chromatic alterations do not affect the position, although the hand may move slightly. Both examples below are considered to be in first position.

Adjustment of pitch is guided by the ear, but accuracy is possible only if the left hand is properly placed. The violinist gradually learns through the sense of touch correct finger spacing for the various intervals. The hand itself is the basic measuring device of the string player, taking the place of keys or frets on other instruments.

If a violinist plays the notes shown in the previous diagram (Example A), he must use three different finger patterns. On the G string there is a half-step from the second to the third finger, on the D and A strings the half-step is from the first to second finger, and on the E string it is from the open string to the first finger. Beginners are almost always taught these patterns one at a time, starting with the half-step from second to third finger, which is called Finger Pattern I in this guide.

Example B
Finger Pattern I

Open Strings

	G	D	A	E
1	A	E	B	F [#]
2	B	F [#]	C [#]	G [#]
3	C	G	D	A

In the first stage of instruction, most students are able to play only Finger Pattern I, using the notes shown above in Example B. It is common practice to avoid the use of the fourth finger at this time.

The Positions

The left hand of the violinist normally spans a fourth. In first position, the hand covers the first four notes on each string. In succeeding positions, the hand moves up by step. Open strings may be played from any position, of course.

First Position

Second Pos.

Third Pos.

Fourth Pos.

Fifth Pos.

Traditionally, the violin student is limited to first position for a year or more. However, it is quite possible for elementary students to play in more than one position, and some teachers recommend the use of several positions from the beginning. Most children can play in second and third positions without much difficulty. The fourth and fifth are harder because the string is farther from the fingerboard and more strength is needed to produce a clear tone. The higher positions are not suitable for elementary students.

The real difficulty is change of position. As long as the hand remains in any one position the fingers may be placed in relation to one another. When the hand moves up the fingerboard the young violinist must depend upon his ability to anticipate the sound of the next note. Eventually, he will learn to judge the distance between positions kinesthetically, but this requires considerable experience. Time and practice are needed, also, for the acquisition of an unobtrusive shift. In music for the levels that are outlined in this guide neither speed nor agility should be expected in changing positions.

The composer who wishes to write music which is suitable for most beginners should limit himself to the notes of first position. On the other hand, there are some teachers who want to develop left hand mobility from the beginning and need appropriate literature. If pieces are written specifically for those who teach beginners to play in more than one position, the following sequences may be considered. All are in Finger Pattern I.

Example C

Second Pos.

Second Pos.

Third Pos.

In order to place the hand in the proper position, the student can adjust the pitch of G, D, A, or E to the open string at the unison or octave. It is wise to start with one of these notes and to build melodic figures from it.

Second Pos.

Third Pos.

If the student is asked to change position he must be given adequate time to place his hand. All shifts should be preceded by a rest or an open string. Above all, the student must have no doubt as to the pitch of the first note in the new position. The following are suitable.

$\text{♩} = 72$

A) First Pos. 3rd Pos. 1st Pos. 2nd Pos. 1st. 3rd.

Pieces in second and third positions are more likely to be used by beginners who are being taught by rote. A comparison of the notes in Example C (second and third positions) with those shown in Example B (first position) reveals problems for the student who is playing from notation. When Finger Pattern 1 is written in first position the beginner has only 16 notes to remember. Each note is played by the same finger on the same string whenever it occurs. For example, the note E on the first line of the staff is learned as the first finger on the D string. This greatly simplifies the reading of music for beginners.

$\text{♩} = 92$

A. Suitable

B. Too Hard

C. Suitable

Meter

Few students play music that is not in 2/4, 3/4, 4/4, or 6/8, until they are well past the early stages of study. This restriction is totally unnecessary. Other metrical designs, including changing meters, are suitable from the beginning. The young player is not able to execute subtle or intricate rhythmic figures, but he does not have to be confined to symmetrical arrangements of quarter and eighth notes. Almost any clearly defined rhythmic pattern can be learned by children. However, they should not be asked to change patterns frequently and quickly within one piece.

Tonality

At present, elementary violin students rarely have the opportunity to play music not in a key. Most beginning pieces are in D, A, or G major. It is quite possible for children to study for a year, or more, without encountering modulations or altered notes. Even compositions in minor are rare in conventional methods. Under these conditions, the student naturally becomes accustomed to the sound of the major scale and gradually develops an aural recognition of tonal relationships within a key which serves as a basis for the control of pitch. However, the child also depends upon the sense of touch in measuring differences of pitch. Melodic figures based upon finger patterns which conform to the shape of the hand are relatively easy to play in tune, and can be used in either tonal or atonal pieces.

Finger Patterns

Obviously, Finger Pattern I in first position is based upon the major scale. It is difficult to construct an extended melodic line from these notes outside of a major key. Frequent large leaps might offer a solution, but they are impractical for beginners who cannot move the left hand quickly. This guide is not an attack upon the key system or the major scale. The argument against new tunes in D, A, or G major is simply that there is already an adequate supply. However, children cannot be taught all phases of 20th century style at once. If the rhythmic structure is more complicated than that found in traditional pieces, it is wise to make melodic figures simple or conventional. It would be helpful, also, to introduce tonal music which is not built upon the unaltered major scale,

Finger Pattern I in second position offers another opportunity for less conventional melodic writing. Unfortunately, beginning pieces in second and third positions may not be used by many teachers.

Double-Notes

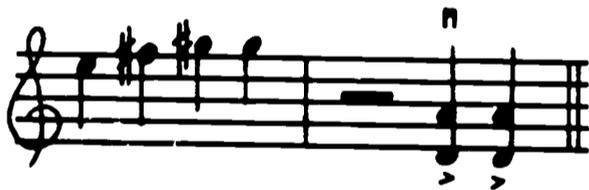

The beginner can play open string double-notes easily if short, firm bow strokes are used. He will not be able to control sustained or soft strokes on two strings. It is best to start double-notes with a down-bow.

The upper note may be fingered. The following are possible in Stage I. pieces in first position.

The student must be given time to place the bow evenly on both strings.

If one note is fingered, even more time must be allowed, unless the finger is already in place.

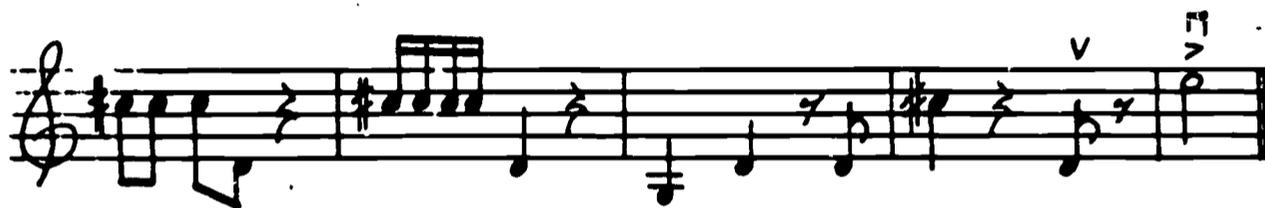

String Crossing Figures

All combinations that can be played as double-notes may also be used in repetitive figures. In the following example, the student leaves his finger on the C sharp and simply moves his bow from one string to the other.

Other open strings may be added.

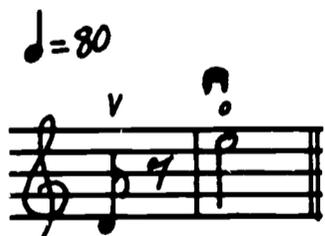

In writing passages of this type, avoid a quick succession of string changes. The following is too difficult for Stage I.

Too hard

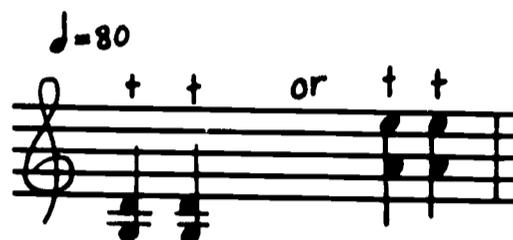

Adequate time must be provided if the player is required to jump over a string. When the second note is an open string the leap is not difficult. If the left hand must be placed as well as the bow, more time is needed. In either case, after the bow has been lifted over the intervening string the next stroke should be down-bow.

Violinistic Effects

One of the most striking limitations of the current student repertory is the absence of instrumental effects. Children are delighted with colorful sounds and frequently discover many well known violinistic effects for themselves. The only technic of this nature commonly taught to beginners is pizzicato. Open strings sound well when plucked by young violinists, but fingered notes are too soft for extended pizzicato passages in solo pieces. Left hand pizzicato on open strings may be written for all stages. It is easier for beginners to aim for the two outer strings.

If strings are to be plucked with the right hand, any open string or combination of two adjacent strings may be written. Guitar pizzicato across four strings is also possible. Do not ask a child to try this with three strings. He will not be able to avoid hitting them all. Tempo should be moderate in pizzicato passages. If combined with arco, a rest of at least four beats ($\text{♩} = 60$), will be required for the child to make the necessary change in bow grip.

A soft percussive effect may be achieved by tapping the fingers of the left hand on the fingerboard. It is best if the fingers are dropped on the edge of the fingerboard, left of the G string.

If young children are asked to play col legno the result is likely to include chipped violins and broken bows. However, a similar effect may be produced by striking two open strings with the bow held in normal playing position. There is no name for this stroke. It might be described as a drum stroke because the bow is used to tap rhythmic figures as if it were a stick.

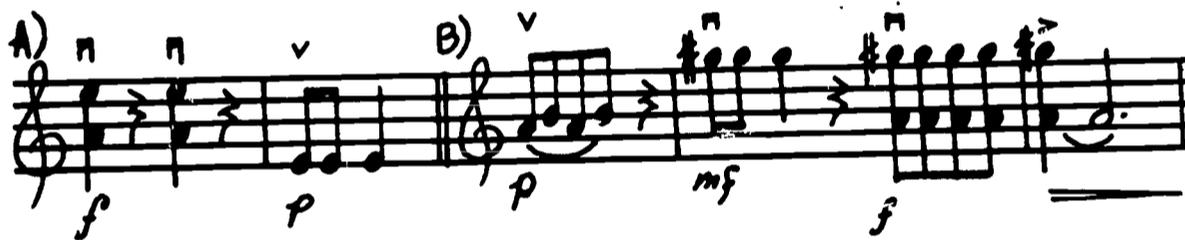

Children seem to have an affinity for the glissando, although they are almost always forced to look upon it as extra-curricular, if not contraband. The realist will not expect a stop on a fixed pitch at this stage. Descent to an open string is suggested for those who do not subscribe to random technics.

A few natural harmonics may be written if they are approached with care. The first harmonic (an octave above the open string) is not difficult for students who are accustomed to playing in more than one position. It is most easily reached by extending the fourth finger when the hand is in third position.

Change of Tempo and Dynamics

Indications of tempo and dynamic changes are as important in music for students as in any other type of composition. In pieces for early stages, strong contrasts are best. Slow and fast, loud and soft are good but not subtle changes of nuance. A considerable dynamic range is available to beginners if the physical properties of the instrument are exploited. The open strings, particularly E and A, are very brilliant when attacked down-bow. In the following, dynamic change is almost unavoidable.

Although children soon become capable of crescendo, decrescendo, accelerando, ritard, these indications are meagre in most elementary pieces. This is unfortunate because children enjoy dynamic variety and respond to an invitation to play faster and faster with the same zest they display in running down a hill.

Vibrato

There is great difference of opinion about the early introduction of vibrato. Although there are indications that an increasing number of teachers advocate the use of vibrato by young players, it is unlikely that many children develop much control in the first two years. It should be assumed that all pieces will be played without vibrato by the great majority of elementary students.

Length

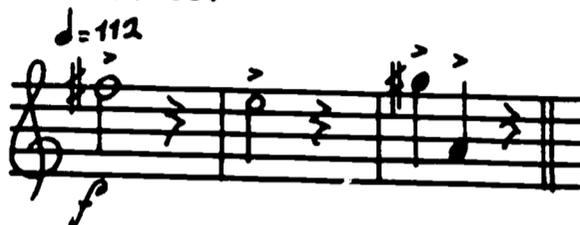

All pieces should be very short. One of the best ways to determine the suitability of both length and style of a composition for first-year students is to imagine teaching it by rote. If pieces cannot be remembered easily they will not be practical for most students, even those who are using music. Reading skills are not very dependable at first.

STAGE II: TECHNICAL LIMITATIONS

Bowing

Students should be able to use the whole bow, but long passages requiring very slow bow strokes should not be written. The ability to draw the bow slowly and evenly, sustaining a tone of pure quality, is gained only through hours of practice and years of study. Dynamic extremes make the problem greater. The child normally plays successive whole bows *moderato*, *mezzo-forte*.

If notes are not connected and the bow arm moves quickly, whole bow strokes can be played *forte*. The outer strings (E and G) are best for heavily accented strokes.

A short passage may be written *pianissimo*.

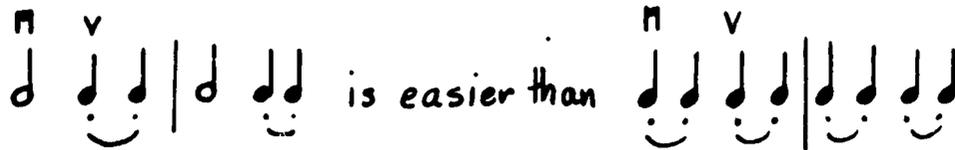

If open strings are used, a soft passage may be longer. The open string can be subjected to uneven pressure without disastrous results.

Short slurs of two, three, or four notes are written for students at this stage. Slurred staccato and portato strokes are taught. A slow spiccato in the lower part of the bow is possible for most students. Fast spiccato and staccato strokes are far too difficult for young players.

The speed with which slurred figures can be played depends upon the length and complexity of the passage, as well as the ability of the individual student. The metronome speeds given below are about the maximum.

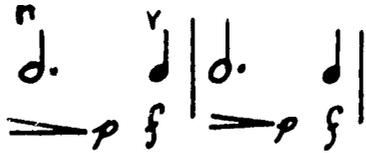

Staccato should not be continued for more than a few beats at a time, unless tempo is slow. It is easier to control if it is combined with detached notes, especially if the staccato can be played up-bow.

Spiccato passages should be interrupted frequently by rests, or strokes which are not lifted, to avoid tiring the arm.

Rhythmic Patterns

At this time, children will be learning to change the speed of the bow stroke when necessary, but they will not be very skillful at controlling the volume of sound on long strokes. In the following example, the violinist must move the up-bow three times faster than the down-bow. The probable result of first attempts is illustrated by dynamics.

It is much easier to control change of speed on short strokes. For example:

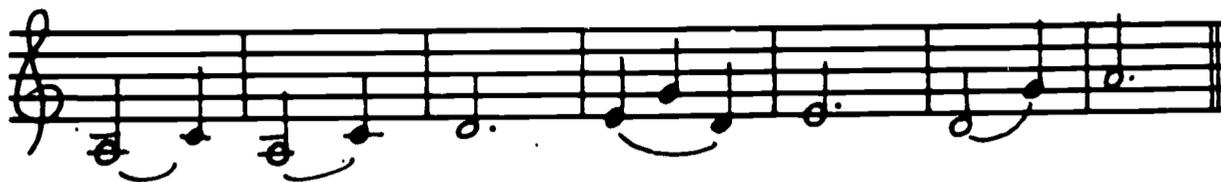

Rhythmic patterns which require changes in bow speed should not be used in repeated figures, unless strokes are very short. Example A is awkward. The others are much easier.

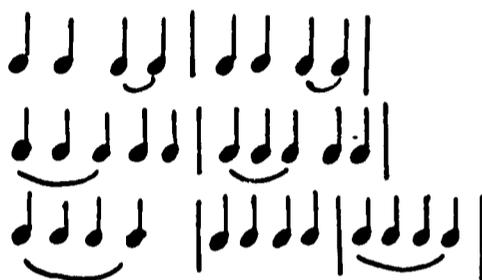

Slurs are helpful in avoiding clumsy bowing patterns. Short slurs on one string are not at all difficult. Rapid change of bow speed

requires more technical control. The following example would be hard for students to play well if there were no slurs.

In Stage II, children should not be asked to handle frequent changes of bow speed and a variety of slurred figures at the same time. If detached and slurred notes are combined, bow speed should be constant most of the time. A few of many suitable possibilities are shown below.

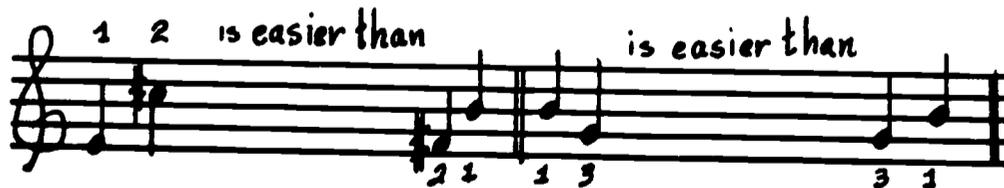

Students may learn the following notation.

Change of String

In this stage, students are taught to cross from one fingered note to another. This is more easily done if the crossing is made from a lower to a higher finger.

The most difficult crossing is the ascending augmented fourth. It should be avoided in the first stages.

Although students can now be expected to move the bow quickly to an adjacent string, a series of string crossings should not be written unless one note is an open string.

A slur accentuates the problem of a legato string crossing. At this time, it is advisable to prepare at least one finger.

A perfect fifth should not be written in a legato passage (except on open strings). The finger must be placed on both strings at the same time, an impossibility for many children.

Fourth Finger

Students in Stage II learn when to use the fourth finger. In first

position, it may be substituted for the open string to avoid changing strings for one note within a phrase.

Fourth finger is also used to avoid changing strings within a slur.

The fourth finger is most easily approached from below.

Avoid the fourth finger on the highest or most prominent note of a phrase. Few children produce a strong, clear tone with the fourth finger at this time.

Fourth finger note is too prominent.

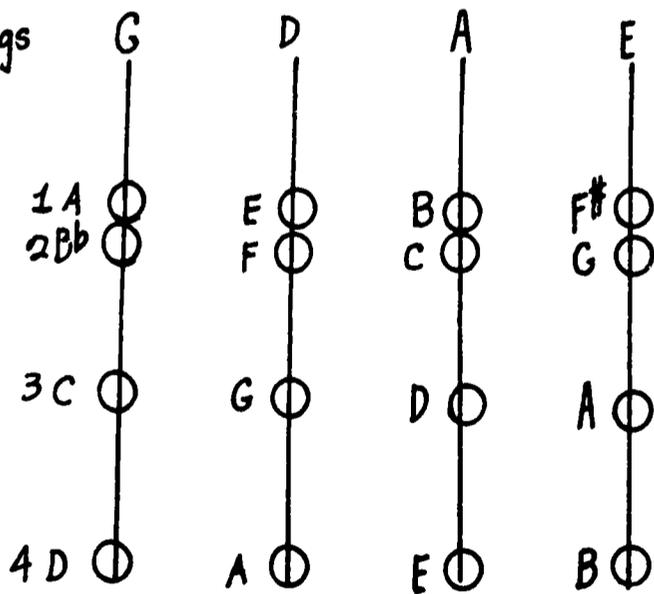

Finger Patterns

The second finger pattern is introduced at this time. The half step will be from the first to the second finger.

Finger Pattern II
First Position

Open Strings

At first, pieces are usually written in either Finger Pattern I or Finger Pattern II. A little later, the two patterns will be combined. The notes for the first, third, and fourth fingers are the same in both patterns. Only the second finger may be changed.

Because modulation is rare in conventional methods, change of finger pattern usually coincides with change of string. For example, a piece may use only these notes:

Key of C

Key of D

Change of pattern on one string is customarily taught in studies through simple figures, such as the following:

STAGE II: *OUTLINE OF CONVENTIONAL TEACHING METHODS*

Pieces may be in 3/4 or 6/8

 are added in 2/4, 3/4, 4/4

 are added in 6/8

There are occasional passages in which the bow speed is not constant.

Two, three, and four note slurs are written. The slurred staccato and portato are taught.

Fourth finger is used. At this time it is usually approached from below.

Easy string crossings with fingers on both strings are introduced.

Finger Pattern II is taught at this time, usually on the D and A strings.

Finger Patterns I and II may appear in the same piece. In most cases, there is only one pattern for each string.

Occasionally, the second finger may move chromatically.

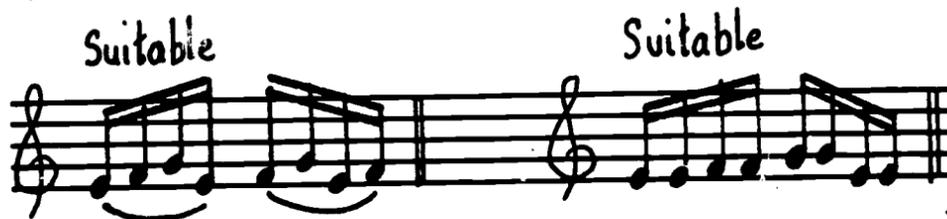

Typical pieces for Stage II are folk tunes, or arrangements of melodies by famous composers.

STAGE II: SUGGESTIONS FOR COMPOSERS

Melodic Figures

Most students develop left hand speed gradually. A little more fluency can be expected at this stage, but rapid figures should be confined to one string. Do not ask for both change of pitch and change of bow on each note in a fast passage.

Do not expect the same degree of agility and accuracy if the fourth finger must be used. The example below is not practical for young players. The fourth finger must be placed too quickly. Open A cannot be substituted without distortion. (The open string will sound noticeably louder.)

Too Difficult

These notes can be played easily with a different fingering. Unfortunately, most students are not accustomed to playing in second position.

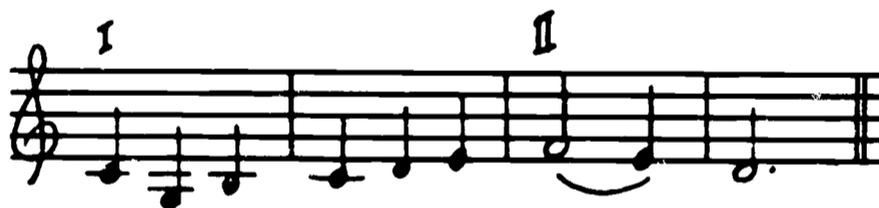

Easy string crossings may be written more freely, making it possible to use more large melodic leaps. In most conventional student pieces, melodic lines are predominantly conjunct. Larger intervals are almost always chordal, outlining major or minor triads. The leap of a seventh is rare. When it does appear, it is usually part of a dominant seventh chord. For this reason, it is wise to consider intonation problems when writing disjunct lines for beginners. Even the youngest student can readily learn to recognize and adjust perfect octaves and fourths from the open strings. In the following example, the first interval sets the hand. Once the high A is in place, the other notes are not difficult to find.

Finger Patterns

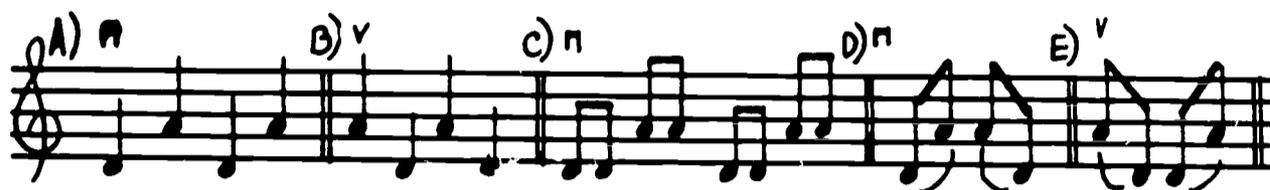

In writing music which combines the first two finger patterns, the composer should remember that students have learned change of pattern in the context of the key system. In reading the following example some children may lower the second finger on the D string because they know that E to F is a half-step. It is more likely that they will be told to play Finger Pattern I on the G string and Finger Pattern II on the D string, or that the half-steps will be marked. Of even more importance is the probability that students will be able to adjust the F because they are familiar with the sound of the major scale.

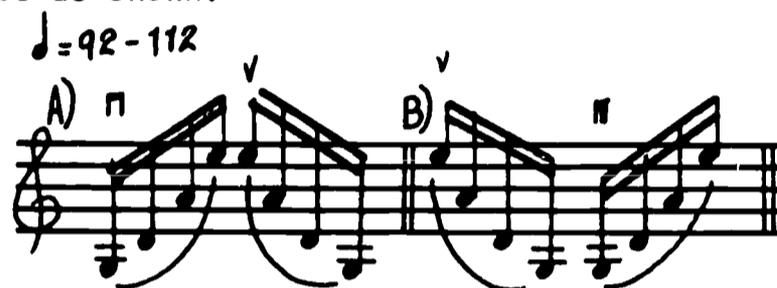

It is not realistic to depend entirely upon reading skills for the correct placement of intervals at this level. Most teachers point out the difference between F and F sharp, but the system is against them. The beginner has no practical reason to observe key signatures as long as he plays nothing but one pattern in first position. When only two patterns are required it is still easier to play by ear or by relating change of pattern to change of string. It is possible to follow the latter method without staying in one key. For example, a piece might be based upon the following:

are easier when the direction of the stroke is the same as the direction of the crossing. The natural arm movement is from the lower to the higher string on the down-bow, and the reverse on the up-bow. The following patterns are suitable.

All four strings may be used in slurred string crossings. Bow direction must always be as shown.

Fast string crossing figures for three strings are more difficult. If the arm moves quickly it is hard for the inexperienced player to avoid striking the fourth string.

Chordal figures can be played without moving the fingers of the left hand. Passages of this type should not be long. The left hand tires easily when it is immobilized.

String crossing figures can combine an open string and fingered notes. In an extended passage change of pitch is easier on the higher string.

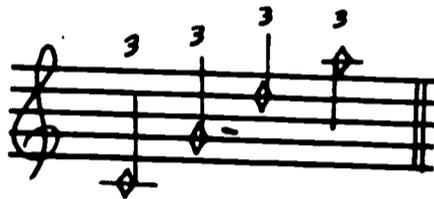

Tremolo

When children are allowed to explore the violin they almost invariably discover tremolo. Naturally, it tends to get out of control. Ample time

must be allowed for coasting to a gradual stop. It is also necessary to give the child a chance to place his bow before the passage starts because tremolo must be played near the tip. Do not ask for precise change of pitch and do not write extended passages. A child's arm tires quickly. About eight beats ($\text{♩} = 60$) is probably the limit for a continuous tremolo. A combination of glissando and tremolo will be greeted with joy by students.

Harmonics

The following are possible for good students. The bow must move very smoothly on harmonics. Long fast strokes are best.

Length

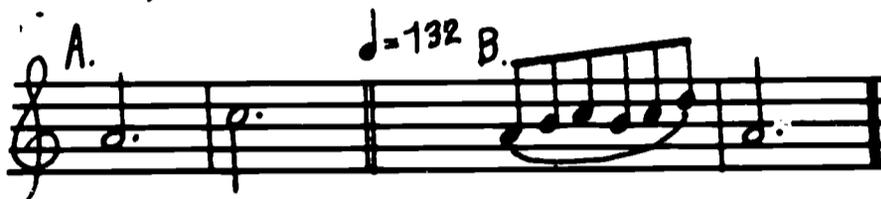

Pieces should be short, between one and two minutes on the average.

STAGE III: TECHNICAL LIMITATIONS

Bowing

New bowing technics are not likely to be added at this time. Work will continue on basic strokes which have been introduced previously. A smooth whole bow stroke can be expected, but slow sustained passages will be too difficult for most students if they are prolonged.

Slightly longer slurs may be written occasionally if the notes will be played quickly. It is more difficult to maintain an even tone in Example B than in A, even if the bow moves at the same pace.

Long slurs are particularly difficult for very young players. It must be remembered that most children do not start with full size instruments, and many are not able to reach the tip of even a short bow.

Rhythmic Patterns

Rhythmic figures may be a little more complicated. Students will be familiar with notation for more difficult subdivisions of the beat, such as:

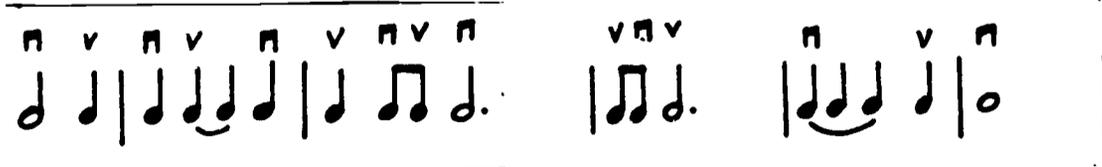

Change of bow speed should be handled with more assurance by students in Stage III, but bowing patterns should always be considered when rhythmic groupings are difficult, or change frequently. Few children will be able to play the following example well at this stage.

In the first two measures the down-bow must move more slowly than the up-bow. In measures three and four this pattern is reversed. The first bow stroke must be quick if there is to be sufficient length available for the dotted half note. Then the slow down-bow returns in the fifth measure.

The example below is much easier. The fifth measure still requires a slow down-bow, but it has not been preceded by the reverse pattern

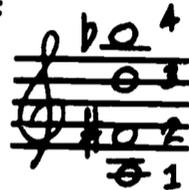

Change of String

Although the left hand should be fairly well controlled by now, certain legato string crossings will still present problems. The intervals most easily played in a smooth string crossing are those which lie well as double-stops. At the moment of crossing both fingers must be in place, as in playing double-stops.

To play  the left hand moves in this fashion: 

The notes most easily played as double-stops (and in legato change of string) conform to the shape of the hand. The fingers of the violinist are not at right angles to the strings. The slant of the hand, necessary because of the left arm position, makes some combinations more comfortable than others. If all fingers are placed on different strings, the most natural position is:

For this reason, the easiest combinations for change of string and for double-stops are those in which the lower finger is on the lower string.

For example:

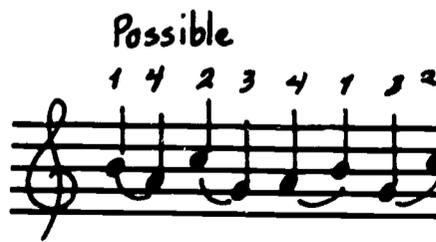

(In general, minor sixths are more easily played than major sixths. The major sixth from third to fourth finger is difficult for many students.)

Reverse combinations of first to third and first to second are not too difficult.

First to fourth and second to third are possible at moderate speed. Third to fourth should be avoided.

Possible  Too Hard 

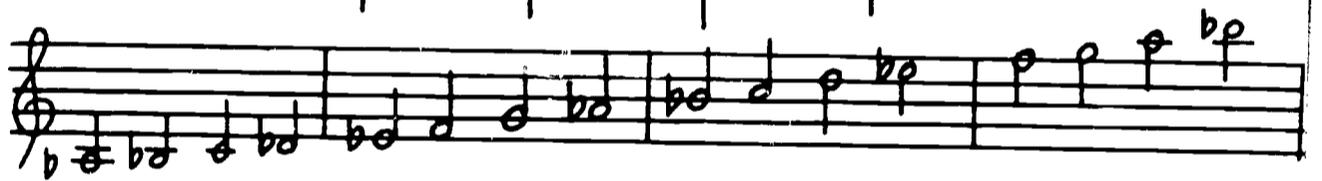

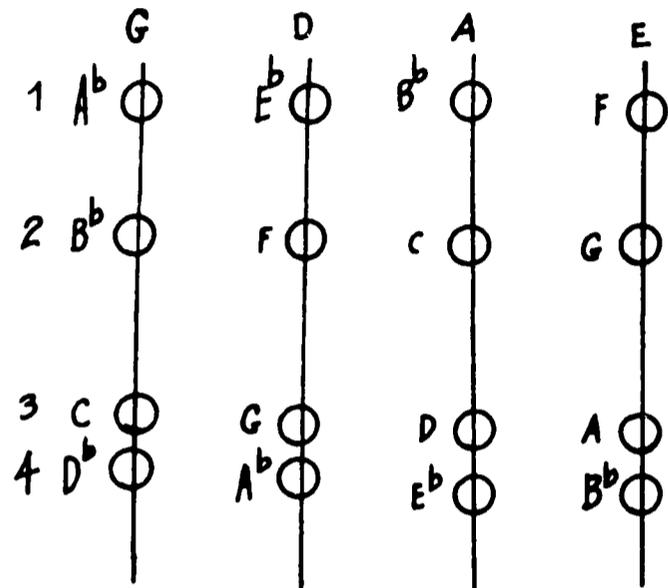

Finger Patterns

In Stage III, the major technical advance is the expansion of reading and playing skills through the addition and transposition of new finger patterns.

In Finger Pattern III, the half-step lies between the third and fourth fingers. This sequence is taught in two forms designated IIIa and IIIb in this guide. If students are using a class method, the following is usually presented first.

Finger Pattern IIIa

First Position

In materials designed for violin only IIIb may be taught before IIIa.

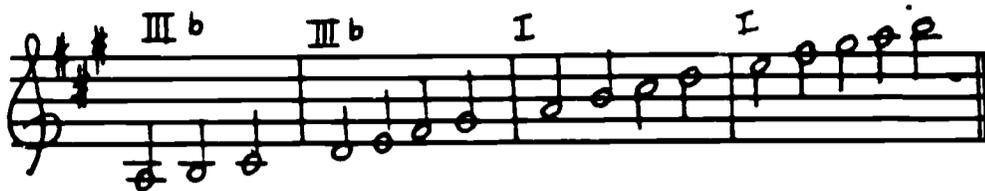

Finger Pattern IIIb

Finger Pattern IIIa may be combined with Finger Pattern II, or IIIb with I. In either case, only one finger placement is altered by change of pattern.

Third Finger is Lowered

Finger Pattern IV (four whole steps) may also appear at this time, but is rarely used in extended passages. The augmented fourth from first to fourth finger and the major third from second to fourth are difficult for children.

Finger Pattern IVa

Finger Pattern IVb

Positions

Once the first four basic finger patterns are learned in first position, conventional teaching methods introduce change of position. It is customary to start with third position in Finger Pattern III or I.

Common sequences for first studies in third position

First pieces usually remain in third position, or shift between first and third position after an open string. Before long, students are expected to change position by step. Early shifts will not be legato, nor will they be played quickly.

The first legato shifts from first to third position are usually started with the first finger. It is easier to ascend from a lower to a higher finger. In descending shifts the reverse is true.

STAGE III: *OUTLINE OF CONVENTIONAL TEACHING METHODS*

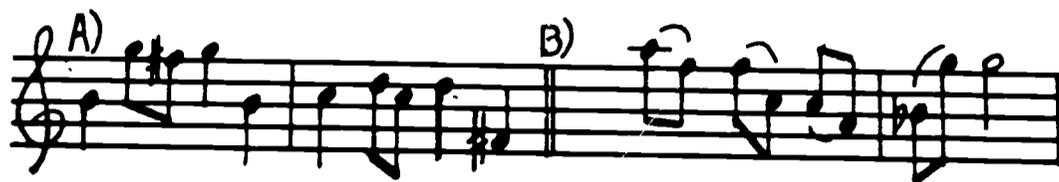

Bowing patterns requiring strokes of varied speed are used more often.

More difficult subdivisions of the beat are found.

There are more frequent string crossings.

Finger Pattern III is introduced. In most cases, no more than two patterns are combined in one piece, and the change from one pattern to another is made by altering the placement of only one finger.

Patterns II and IIIa. The first finger is lower on the A string.

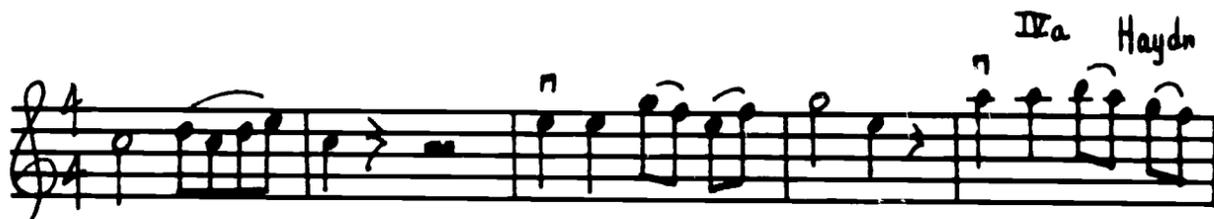

Patterns I and IIIb. The third finger is higher on the G string.

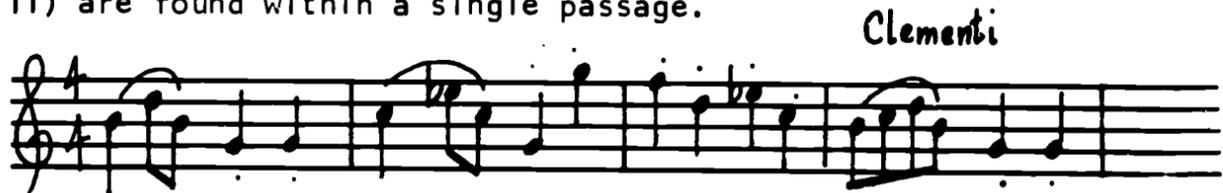

Some books include pieces in Patterns I, II and III.

Finger Pattern IV is taught, but occurs infrequently in pieces.

All finger patterns may be combined at this stage, but usually the combinations described in this section and in Stage II (Finger Patterns I and II) are found within a single passage.

This is one of the more difficult passages for change of pattern found in this stage. It is taken from a violin method used by private teachers.

STAGE III: SUGGESTIONS FOR COMPOSERS

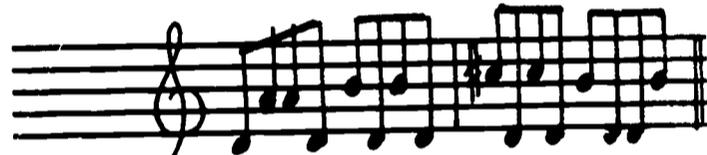

String Crossing Figures

Students should be reasonably adept at crossing strings. Figures involving two adjacent strings are easy to bow if the pattern of string change remains constant and conforms to the natural direction of arm movement (see suggestions for Stage II). Additional bowing figures possible at this stage are:

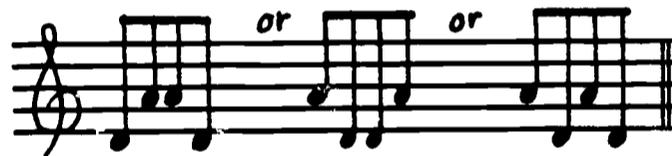

Changes in pattern or direction in string crossing figures are too difficult unless tempo is very slow.

Too many patterns.

One should be chosen for a short passage.

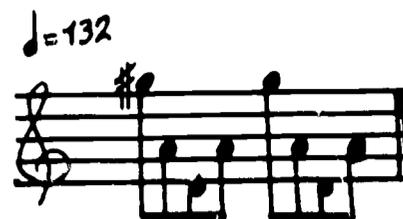

Too hard because arm direction changes in third measure.

Suitable

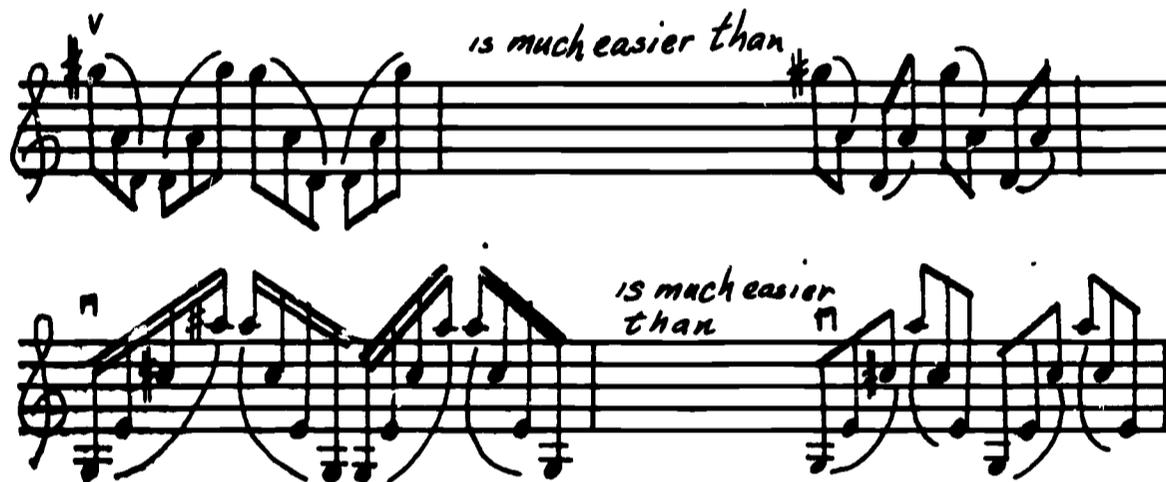

Figures for three or four strings should not be written unless notes are slurred. The following is very hard, even for a more advanced player.

When slurred, the figure is much easier.

Both the highest and the lowest note should be repeated in figures of this type.

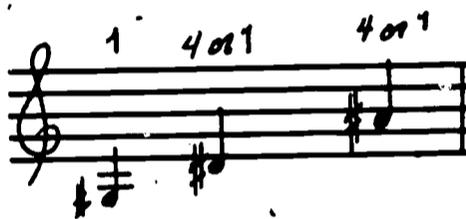

Pitch Notation

When students have learned the first four finger patterns they are able to play tones of any pitch in first position. In addition to the natural notes, they should be able to read the following:

They will probably be taught:

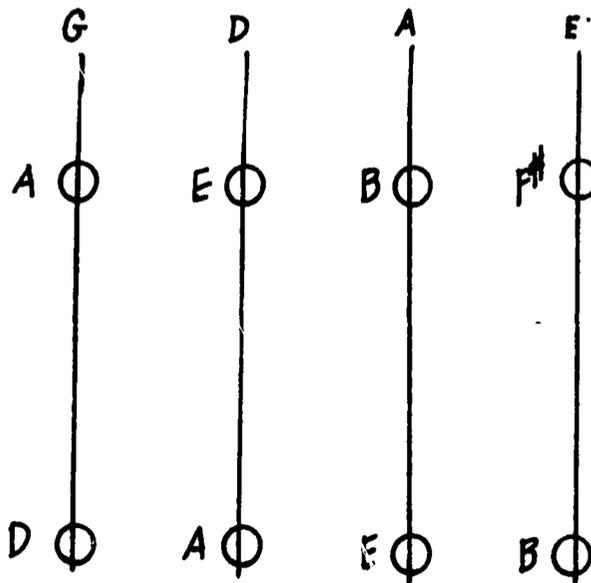

The notes below are unfamiliar to most elementary students. They should not be written frequently in compositions for the average student.

Combination of Finger Patterns

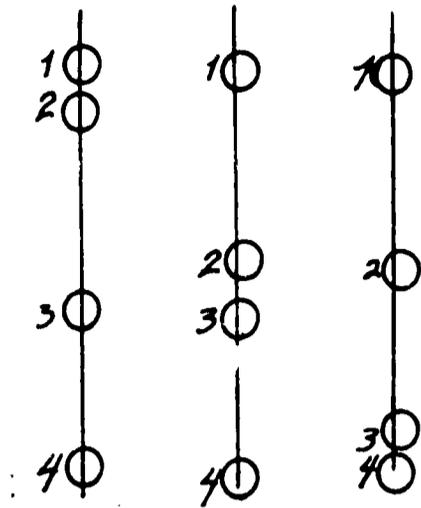

Although most children read music fairly well by the time they reach Stage III, frequent changes of finger pattern are likely to cause difficulties, especially in unfamiliar musical idioms. Intonation will be more secure if new demands upon the traditionally trained ear are balanced by a limited number of left hand adjustments.

As long as the outer fingers remain in position over the finger-board, change of pattern is relatively easy, at this stage of advancement. For example, these notes are played on the same place on each string.

Within the hand span of a perfect fourth, three patterns are possible, at this time.

When the first and fourth fingers fall in the same place on each string, moving directly across by perfect fifth, they keep the hand in place, serving as fixed outer boundaries. Inside this frame, the second or third finger may move a half-step up or down without disturbing the total placement of the hand.

The easiest combinations of finger patterns are those in which the first and fourth fingers are in the same place on each string.

Transposition of Finger Pattern I does not create exceptionally difficult technical problems, but because conventional methods avoid flat keys the notation is likely to cause consternation.

Finger Pattern II should not be transposed a half-step lower. The left hand is too cramped in this position.

Change of First Finger Placement

When the first finger changes position intonation may suffer. This apparently innocent example contains a notorious trap for the inexperienced.

If the F is low enough (highly unlikely), the A will probably be flat. The change of finger pattern here is from II to IIIa.

This combination can be used, but discretion is recommended in approaching the lowered first finger, particularly on the E string where it is difficult to maintain the correct hand position. In either of the following, the student is more likely to play what is written because he has time to pull his first finger back.

Change of Finger Patterns

In writing for students, the composer must determine the feasibility of changing patterns and strings in each individual passage. If speed is expected figures should remain in one finger pattern. An open string will greatly facilitate a rapid string crossing.

In general, intonation will be better if no more than two finger patterns are used in a short piece. Longer pieces may change combinations at the end of a section.

The Positions

One of the most common weaknesses in pieces designed for first position is the inclusion of melodic figures which lie in the proper range but cannot be played musically without change of position. Frequent change of string can distort a legato phrase. Even a more advanced player would find it difficult to keep the following from sounding choppy.

First Position
E and A strings

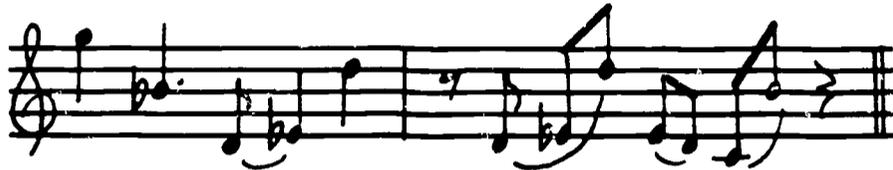

The phrase can be played smoothly in third position.

Third Position
A string only

In the following example it is impossible to play the last two notes legato in first position because they do not lie on adjacent strings.

A shift to third position will solve the problem, but a student needs more time. The example below is suitable for Stage III.

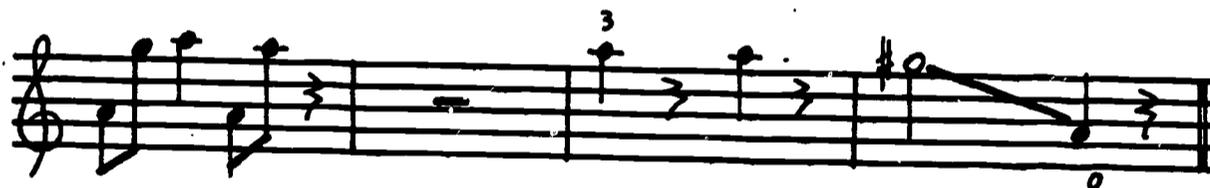

Most children will be given some training in third position during this period of instruction, but very few will be able to change positions with agility. Shifting techniques are difficult to master. Early attempts may be very wide of the mark. Intonation, insecure in the best of circumstances, will be extremely dubious in unfamiliar musical idioms unless shifts are planned with care. Composers should decide which position is appropriate for each figure, or phrase, and be sure that it is possible for the student to be in that position at the proper time. It is advisable to continue to follow the suggestions given in Stage I for suitable shifts. An additional possibility is a sequential use of one finger pattern in three positions. (It should be noted that children who are beginning the study of the positions at this time will probably not be familiar with the second position. The following examples are more suitable for those who were taught change of position in an earlier stage.)

One or two notes may be written in fourth or fifth position for a special effect.

First Position

Fifth Position (A String)

Whenever a student is asked to shift from one position to another, he should be given time to make the move and an aural point of reference for the pitch of the new note.

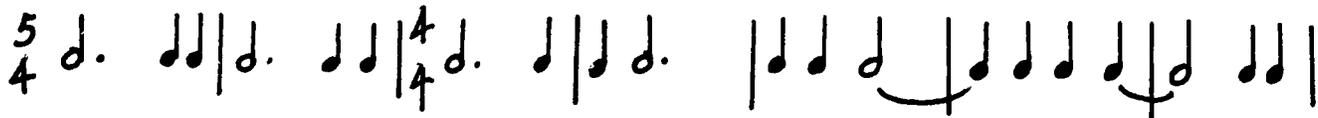

* * *

On nearly every page of this guide the word "pattern" occurs, like a persistent leitmotif. It can hardly be avoided in a discussion of this nature since children learn to play the violin through the study of patterns, aural and physical. It is particularly important that the composer of music for beginners understands how this is accomplished because the stringed instruments require entirely different right and left hand technics. The child must learn to control two patterns of motion simultaneously. At first, of course, he turns his attention from one to the other. Many of the suggestions in the preceding pages are specific instructions for giving him a chance to do this. Elementary students should not be given more than one new or difficult problem at a time. If the bowing is hard, the left hand figures should be simple. If the rhythm is more complicated than usual, the easier bow strokes should be used. As every musician knows, patterns learned through repetition become habitual, forming the basis for instrumental technic.

Most effective pieces for students are simply constructed. The repeated phrases of the folk song and 18th century dance forms are very practical for teaching purposes. Repetition and sequence are not characteristic of much 20th century music, but it is hard to imagine how they can be avoided in music for young children. The inexperienced player is not capable of rapid and frequent change, musical or technical. On the other hand, he can play more varied music than he is usually given. Any set of skills, or any pattern, has many possible applications.

Each finger pattern, for example, can be played on all four strings as soon as it is learned on one. It can also be played in the first three positions, if the teacher is adventurous enough to let the child try. By taking a sequence of notes which lie within the hand span and changing strings, order, and rhythm, a reasonable amount of variety can be achieved in the earliest pieces.

Bowing patterns are quickly learned. Once established, they can be maintained against shifting accents or groupings in the accompaniment. A pattern may also be continued through change of meter.

One last recommendation: exploit the open strings. They can be inserted nearly anywhere to provide time for a shift, string crossing, or a difficult change of pitch. Because the open strings are the most resonant notes on the instrument, they are useful for accents, especially when unaccented notes lie on a lower string. The open E always sounds brilliant, even in the hands of a beginner.

Finally, the composer who does not play the violin himself needs a good editor. Many technical difficulties can be eliminated by the smallest of changes - a brief rest, a slur, the omission of an eighth note. If a violin teacher is not available, any young student will do. He may not be able to suggest solutions for awkward passages, but he will expose them with the utmost clarity.

UNIVERSITY OF ILLINOIS STRING RESEARCH PROJECT

Paul Rolland, Director

1968

SUPPLEMENT TO COMPOSERS GUIDE

The Composers Guide was given to six composers for trial and evaluation. Each was asked to write a group of pieces expressly for students in the stages of advancement described in the Guide. The Supplement is based upon a study of these compositions. The first section contains additional technical information. In the second part, examples from the music written for the project illustrate a variety of solutions to the problems of writing string music for children.

PART I: TECHNICAL INFORMATION

Finger Patterns for the Cello

Finger Patterns I and II are easily played on the cello. Because the left hand remains in the same position on the fingerboard for both, music which combines the first two patterns is not difficult for the beginner.

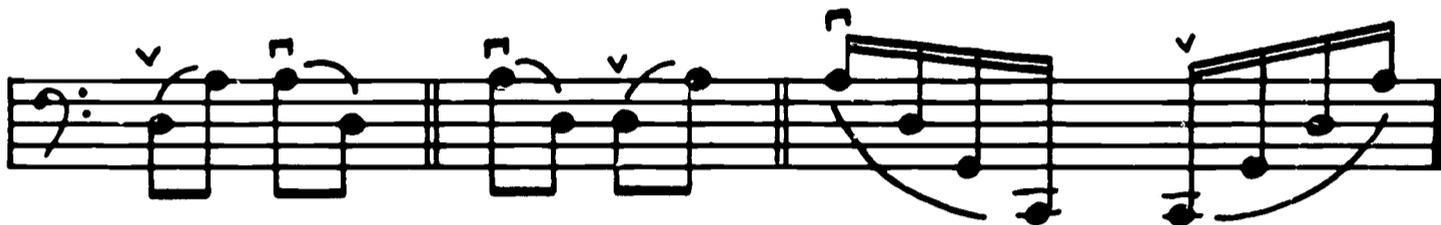

Finger Patterns IIIa and IIIb are played in extended position. Long passages in Finger Pattern III are not suitable for beginning cellists. The stretch from first to second finger is tiring for young hands.

String Crossing Figures for the Cello

Because of the position of the instrument, the natural bow direction of the cellist is the reverse of the violinist. The cellist moves more easily from higher to lower strings on the down-bow. This is particularly important in slurred passages.

Change of String

Simple figures which are easily played by the advanced performer may lie awkwardly for the beginner who is confined to one position. Rapid changes back and forth between two strings are audible and should be avoided unless the sound of the crossings is musically desirable. In the following example, string crossings make the second measure sound quite different from the first.

If one note of a phrase is played on a different string it is almost certain to be conspicuous. In Example A, change to the E string contributes to the sense of the passage. In Example B it disturbs the phrasing.

Two slurred notes a step apart usually sound better on one string. In first position the violinist may avoid awkward crossings by substituting the fourth finger for the open string, but this is not possible for the cellist.

In Example D below, change of string and timbre will break the cello slur from the stopped G to the more resonant open A.

Diminished Fifth

The interval of the diminished fifth requires unconventional fingering on the violin. It is not difficult for students who are accustomed to change of finger pattern, but should be avoided in Stage I and handled with care in Stage II. Example A should not present an unreasonable problem at a moderate tempo. Example B is likely to give trouble. The G may be played with the third or the fourth finger but, in either case, the hand must be opened quickly if the second F sharp is to be in tune.

A Possible **B More Difficult** (4)

On the cello the same passage is easily played with normal fingering (Example C). Example D is not suitable. The E and F may be taken with the second and third fingers, but the G cannot be played with the fourth finger without shifting.

C Easy **D Too Difficult**

Double-Notes, Stage III

Passages of sustained double-notes should be carefully planned. Example A is suitable for Stage III. The change from one pair of strings to another makes Example B more difficult. Example C requires more control than can be expected of elementary students. A fairly advanced bow technic is needed to play double-notes softly with an even pressure on both strings. It is difficult, also, for the inexperienced player to move smoothly from one string to two at the beginning of the second measure and to make a legato crossing to the A and D strings without playing more loudly (measure 3). The passage ends with a unison, the most difficult of all intervals to play in tune.

A Suitable

$\text{♩} = 92$

B Possible

C Too Difficult
Adagio

PART II: EXAMPLES FROM COMPOSITIONS WRITTEN FOR THE PROJECT*

These excerpts have been chosen to illustrate a variety of solutions to the problems of writing within the limitations recommended in the Composers Guide.

Finger Patterns

A number of composers confined entire pieces to the notes of one finger pattern. The following are all in Finger Pattern 1.

♩ = B4

Bicinia for Two Violins

© by HALSEY STEVENS 1968

2. Andantino ♩ = 160

Musical score for two violins, measures 1-8. The music is in 6/8 time and features a key signature of one sharp (F#). The first system (measures 1-4) shows the two staves with various rhythmic patterns and slurs. The second system (measures 5-8) continues the piece, including a measure with a fermata and a measure with a trill-like figure. Dynamics include *v* (vibrato) and *mf* (mezzo-forte).

FOUR LEGENDS

Smoothly (♩ = 100-112)

I.

© HERBERT BIELAWA, 1967

Musical score for piano, measures 1-8. The piece is in 4/4 time and features a key signature of one sharp (F#). The first system (measures 1-4) shows the right and left hands with a mezzo-forte (*mf*) dynamic. The second system (measures 5-8) continues the piece, including a measure with a fermata and a measure with a trill-like figure. Dynamics include *mf* (mezzo-forte).

A MUSICAL GAME of TAG

Allegro $\text{♩} = 92$ *

© by Richard WERNICK, 1968

Musical score for 'A Musical Game of Tag' in 4/4 time, marked Allegro with a tempo of 92. The score consists of two systems of two staves each. The first system includes dynamic markings of *mp* and *mp*, and performance instructions: *(AS legato AS possible)*, *pizz.*, and *arco*. The second system includes *pizz.* and *arco* markings. A small inset box on the right shows a close-up of a specific musical phrase with *arco* and *pizz.* markings.

In the following only one finger changes position.

Lullaby

Andante

Solo Violin

© by Seymour Shifrin, 1968

Musical score for 'Lullaby' in 3/4 time, marked Andante. The score is for Solo Violin and includes the instruction *con sord.* (con sordina). The first system shows a melodic line starting with a *p* dynamic. The second system shows a continuation of the melody with a *poco* marking. The score is written on a single staff.

PLAY for the Young

Alla breve *

© Seymour Shifrin, 1968

Musical notation for the first system, measures 1-4. The piece is in Alla breve. The notation includes piano (*p*) and *lightly* markings. The first system consists of two staves: the upper staff is in treble clef and the lower staff is in bass clef. The music begins with a piano (*p*) dynamic and a *lightly* instruction. The first measure contains a quarter rest in the upper staff and a half note in the lower staff. The second measure has a quarter note in the upper staff and a half note in the lower staff. The third measure has a quarter note in the upper staff and a half note in the lower staff. The fourth measure has a quarter note in the upper staff and a half note in the lower staff.

Musical notation for the second system, measures 5-8. The tempo marking is $\text{♩} = \text{♩}$. The notation includes dynamic markings. The second system consists of two staves: the upper staff is in treble clef and the lower staff is in bass clef. The music begins with a piano (*p*) dynamic and a *lightly* instruction. The first measure contains a quarter rest in the upper staff and a half note in the lower staff. The second measure has a quarter note in the upper staff and a half note in the lower staff. The third measure has a quarter note in the upper staff and a half note in the lower staff. The fourth measure has a quarter note in the upper staff and a half note in the lower staff.

Musical notation for the third system, measures 9-12. The notation includes a forte (*f*) marking and an **END** marking. The third system consists of two staves: the upper staff is in treble clef and the lower staff is in bass clef. The music begins with a piano (*p*) dynamic and a *lightly* instruction. The first measure contains a quarter rest in the upper staff and a half note in the lower staff. The second measure has a quarter note in the upper staff and a half note in the lower staff. The third measure has a quarter note in the upper staff and a half note in the lower staff. The fourth measure has a quarter note in the upper staff and a half note in the lower staff.

* $\text{♩} = 60$ to begin with; $\text{♩} = 120-132$ as a goal

Change of String

These passages, exploiting frequent change of string, lie well for the violin.

$\text{♩} = 50$

String Crossing Figures

The following can be played easily by beginners.

PETER'S MARCH

Richard Wernick

The first system of musical notation consists of two staves. The top staff is in treble clef with a key signature of one sharp (F#) and a 4/4 time signature. It contains a sequence of notes: a quarter rest, a quarter note G4, a quarter note A4, a quarter note B4, a quarter note C5, a quarter note B4, a quarter note A4, a quarter note G4, a quarter note F#4, a quarter note E4, a quarter note D4, and a quarter note C4. The bottom staff is in bass clef and contains a sequence of notes: a quarter note C4, a quarter note D4, a quarter note E4, a quarter note F#4, a quarter note G4, a quarter note A4, a quarter note B4, a quarter note C5, a quarter note B4, a quarter note A4, a quarter note G4, and a quarter note F#4. There are vertical bar lines after the first and second measures.

The second system of musical notation consists of two staves. The top staff is in treble clef with a key signature of one sharp (F#) and a 4/4 time signature. It contains a sequence of notes: a quarter note G4, a quarter note A4, a quarter note B4, a quarter note C5, a quarter note B4, a quarter note A4, a quarter note G4, a quarter note F#4, a quarter note E4, a quarter note D4, and a quarter note C4. The bottom staff is in bass clef and contains a sequence of notes: a quarter note C4, a quarter note D4, a quarter note E4, a quarter note F#4, a quarter note G4, a quarter note A4, a quarter note B4, a quarter note C5, a quarter note B4, a quarter note A4, a quarter note G4, and a quarter note F#4. There are vertical bar lines after the first and second measures.

The third system of musical notation consists of two staves. The top staff is in treble clef with a key signature of one sharp (F#) and a 4/4 time signature. It contains a sequence of notes: a quarter note G4, a quarter note A4, a quarter note B4, a quarter note C5, a quarter note B4, a quarter note A4, a quarter note G4, a quarter note F#4, a quarter note E4, a quarter note D4, and a quarter note C4. The bottom staff is in bass clef and contains a sequence of notes: a quarter note C4, a quarter note D4, a quarter note E4, a quarter note F#4, a quarter note G4, a quarter note A4, a quarter note B4, a quarter note C5, a quarter note B4, a quarter note A4, a quarter note G4, and a quarter note F#4. There are vertical bar lines after the first and second measures.

© by Richard Wernick, 1968

MARCH

© RALPH SHAPEY, 1968

The first system of the musical score consists of three staves: Violin I (Vn), Violin II (Vla), and Cello (Cello). The music is in 4/4 time and begins with a treble clef. The key signature has one sharp (F#). The first measure of each staff contains a dynamic marking of *f* (forte) and a fermata over the first note. The Violin I part features a melodic line with eighth and sixteenth notes. The Violin II part provides a harmonic accompaniment with similar rhythmic patterns. The Cello part plays a bass line with eighth notes. The system concludes with a double bar line.

The second system of the musical score continues the three staves: Violin I (Vn), Violin II (Vla), and Cello (Cello). The music remains in 4/4 time and the key signature of one sharp. The Violin I part starts with a dynamic marking of *f* and includes a fermata over the first note. The Violin II part features a melodic line with eighth notes and a dynamic marking of *f*. The Cello part continues the bass line with eighth notes and includes a dynamic marking of *f*. The system concludes with a double bar line.

Double-Notes

Many of the composers used easy double-notes. In the two examples below, the resonance of the open strings is effective.

Instrumental Effects

Inventive composers find many ways to add color.

The first example, by Richard Wernick, is a canon for three violins to be played solely on open strings. Entrances are marked (2) and (3).

Violin

You Can't Catch Me A CANON FOR THREE PLAYERS

© RICHARD WERNICK, 1968

III. DANCE

$\text{♩} = 80$ ($\text{♩} = 160$)

© RALPH SHAPEY, 1968

The first system of the musical score consists of four staves: Violin (Vln.), Viola (Vla.), Cello (Cello), and Double Bass (L.M.). The Violin staff begins with a whole rest, followed by a sixteenth rest, and then a half note G4 marked with an asterisk. The Viola and Cello staves play a rhythmic pattern of eighth notes, starting with a dynamic of *f* and changing to *mf* after the first measure. The Double Bass staff plays a bass line with chords, marked with *f* and *mf*. A *Pizz.* (pizzicato) instruction is written above the Viola and Cello staves. A hairpin crescendo is shown between the Viola and Cello staves. A note in the first measure of the Violin staff is marked with an asterisk, with a note below it stating: ** ♩ always remains constant*.

The second system of the musical score consists of four staves: Violin (Vln.), Viola (Vla.), Cello (Cello), and Double Bass (L.M.). The Violin staff plays a melodic line starting with a dynamic of *f*. The Viola, Cello, and Double Bass staves continue with their respective parts, with dynamics of *mf* for the Viola and Cello, and *mf* for the Double Bass. The Double Bass staff includes chord diagrams and fingering numbers (7, x, x, x, x).

SONG

©RALPH SHAPEY, 1968

♩ = 40-50

14

Musical score for measures 14-16. The score is written for four staves: Treble Clef (2), Bass Clef (1), Bass Clef (10), and Bass Clef (3). The time signature is 3/4. Measure 14 starts with a treble clef and a 3/4 time signature. The bass clef 10 staff has a dynamic marking of *mp*. Measure 15 features a slur over the first two measures and a sharp sign (#) above the second measure. Measure 16 includes a dynamic marking of *p* and a glissando marking (*gliss.*) above the staff. The bass clef 3 staff contains rhythmic notation with 'x' marks.

17

Musical score for measures 17-18. The score is written for four staves: Treble Clef (2), Bass Clef (1), Bass Clef (10), and Bass Clef (3). The time signature is 3/4. Measure 17 starts with a treble clef and a 3/4 time signature. The bass clef 10 staff has a dynamic marking of *mp*. Measure 18 features a dynamic marking of *mf* and a glissando marking (*gliss.*) above the staff. The bass clef 3 staff contains rhythmic notation with 'x' marks and a dynamic marking of *p*. The score concludes with a double bar line.

Pieces Written for the Project

by

William Mullen

PIECE #1

Wm. Mullen

Handwritten musical score for "PIECE #1" by Wm. Mullen. The score is written on ten staves, organized into two systems of five staves each. The first system (staves 1-5) features a treble clef, a 2/4 time signature, and a key signature of one sharp (F#). It includes dynamic markings such as 'p', 'mf', and 'f', and contains a triplet of eighth notes. The second system (staves 6-10) includes dynamic markings like 'pp', 'ppp', and 'f', and features a 'trill' marking above a note. The notation includes various note values, rests, and articulation marks.

Instructions Given to the Teachers
Who Agreed to Test the Pieces Written
by William Mullen

Contemporary Music for Students

University of Illinois String Research Project

The ultimate purpose of this project is the development of a plan for the composition and use of contemporary music for string students. We hope to assist the composer by providing a detailed description of the technical capabilities of students in the early stages of instruction. We are equally concerned with the problems of teaching the contemporary idiom. We want to know if an unfamiliar musical style presents serious difficulties. Can students apply instrumental skills to either contemporary or traditional compositions with equal facility?

In order to explore this question, we have asked you to try a few new pieces. Follow your customary procedures in teaching these pieces in either private or class lessons to students at the proper stage of advancement. Please record the response to each piece tested. We need to know:

1. Did the student have any unusual difficulty in learning the piece? If so, what was the problem? Rhythm? Intonation? Memory?
2. Did the student like the piece? At once? After becoming familiar with it?
3. Did the student indicate any reason for either a positive or a negative reaction?
4. What other pieces did the student learn at about the same time? Were they easier to teach? If so, why?

Any additional comments are most welcome.

41

Musical staff 41: Treble clef, starting with a flat key signature. The melody consists of eighth and quarter notes with slurs and ties.

44

Musical staff 44: Treble clef, continuing the melody with eighth and quarter notes.

48

Musical staff 48: Treble clef, featuring a triplet of eighth notes and a final measure with a '2' above it.

54 (SINGINGLY)

Legato mp

Musical staff 54: Treble clef, marked '(SINGINGLY)', 'Legato', and 'mp'. The melody uses sharp notes and slurs.

59

Musical staff 59: Treble clef, ending with a forte 'f' dynamic marking.

64

Musical staff 64: Treble clef, featuring a slur over the first half and a fermata over the second half.

69

Musical staff 69: Treble clef, ending with a fermata.

74

ff Fiddle-Fling - 2

Musical staff 74: Treble clef, marked 'ff' and 'Fiddle-Fling - 2'. The melody is more rhythmic with eighth notes.

THREE PIECES
for
VIOLIN and PIANO

"FIDDLE-FLING"

CHEERFULLY (♩ = 144)

HERBERT BIELAWA

The musical score is written for Violin and Piano. It consists of three systems of music, each with a Violin staff (top) and a Piano staff (bottom). The key signature is one sharp (F#), and the time signature is 4/4. The tempo is marked 'CHEERFULLY' with a quarter note equal to 144 beats per minute. The first system includes the instruction 'WELL ARTICULATED' and dynamic markings 'f' and 'mf'. The second system continues the piece with various melodic and harmonic developments. The third system concludes the piece with a final cadence. The score is written in a clear, professional style with standard musical notation including notes, rests, stems, beams, and dynamic markings.

PED

PED

(SINGINGLY)

LEGATO

mp

PED

Handwritten musical score for piano, consisting of six systems of staves. The score includes treble and bass clefs, various musical notations such as notes, rests, and slurs, and performance instructions like *f*, *8va*, and *PED*. The music is written in a style characteristic of early 20th-century manuscript notation.

25

Musical notation for measures 25-28. The system consists of two staves. The upper staff is in treble clef and the lower staff is in bass clef. The key signature has one sharp (F#). Measure 25 starts with a half note G4. Measure 26 has a half note A4 with a forte (f) dynamic. Measure 27 has a half note B4 with a piano (p) dynamic. Measure 28 has a half note C5 with a piano (p) dynamic. The bass line consists of quarter notes: G2, A2, B2, C3, D3, E3, F3, G3, A3, B3, C4, D4, E4, F4, G4.

29

Musical notation for measures 29-32. The system consists of two staves. The upper staff is in treble clef and the lower staff is in bass clef. The key signature has one sharp (F#). Measure 29 has a half note D4 with a piano (p) dynamic. Measure 30 has a half note E4 with a piano (p) dynamic. Measure 31 has a half note F#4 with a forte (f) dynamic. Measure 32 has a half note G4 with a forte (f) dynamic. The bass line continues with quarter notes: A3, B3, C4, D4, E4, F4, G4, A4, B4, C5, D5, E5, F5, G5, A5, B5, C6.

33

Musical notation for measures 33-36. The system consists of two staves. The upper staff is in treble clef and the lower staff is in bass clef. The key signature has one sharp (F#). Measure 33 has a half note G4. Measure 34 has a half note A4. Measure 35 has a half note B4. Measure 36 has a half note C5. The bass line continues with quarter notes: D4, E4, F4, G4, A4, B4, C5, D5, E5, F5, G5, A5, B5, C6.

37

Musical notation for measures 37-40. The system consists of two staves. The upper staff is in treble clef and the lower staff is in bass clef. The key signature has one sharp (F#). Measure 37 has a half note D4. Measure 38 has a half note E4. Measure 39 has a half note F#4. Measure 40 has a half note G4. The bass line continues with quarter notes: A4, B4, C5, D5, E5, F5, G5, A5, B5, C6.

Smoothly (♩ = 100-112)

I.

Herbert BIELAWA

VOICED

mf

mf

Detailed description: This system contains the first four measures of the piece. The right hand (treble clef) begins with a melody starting on G4, moving up stepwise to D5, with some chromatic alterations. The left hand (bass clef) provides a harmonic accompaniment with notes G2, B2, and D3, moving up stepwise. Dynamics are marked 'mf' in both hands.

5

Detailed description: This system contains measures 5 through 8. The right hand continues the melodic line with more chromatic movement. The left hand accompaniment remains consistent. Measure 8 ends with a fermata over the final note.

9

p

p

Detailed description: This system contains measures 9 through 12. The dynamics are marked 'p' (piano) in both hands. The melodic line in the right hand continues, and the left hand accompaniment provides a steady rhythmic and harmonic support.

13

Detailed description: This system contains measures 13 through 15. The right hand features a more active melodic line with eighth notes. The left hand accompaniment continues with a steady eighth-note pattern.

16

f

Detailed description: This system contains measures 16 through 19. The dynamics are marked 'f' (forte) in the right hand. The piece concludes with a final melodic flourish in the right hand and a sustained accompaniment in the left hand.

27

II.

Boldly (d. 80-92)

6

Musical notation for measures 6-9. The system consists of two staves. The upper staff is in treble clef and the lower in bass clef. Measure 6 starts with a treble clef and a key signature of one sharp (F#). The music features a melodic line in the treble and a supporting bass line. Dynamic markings include *mf* and *b* (basso).

10

Musical notation for measures 10-13. The system consists of two staves. The upper staff is in treble clef and the lower in bass clef. Measure 10 starts with a treble clef and a key signature of two sharps (F#, C#). The music continues with melodic and bass lines. Dynamic markings include *mf*.

14

Musical notation for measures 14-18. The system consists of two staves. The upper staff is in treble clef and the lower in bass clef. Measure 14 starts with a treble clef and a key signature of two sharps (F#, C#). The music continues with melodic and bass lines. Dynamic markings include *b* (basso).

19

Musical notation for measures 19-23. The system consists of two staves. The upper staff is in treble clef and the lower in bass clef. Measure 19 starts with a treble clef and a key signature of two sharps (F#, C#). The music continues with melodic and bass lines. Dynamic markings include *ff* (fortissimo) and *sub. p* (subito piano).

24

Musical notation for measures 24-27. The system consists of two staves. The upper staff is in treble clef and the lower in bass clef. Measure 24 starts with a treble clef and a key signature of two sharps (F#, C#). The music continues with melodic and bass lines. Dynamic markings include *f* (forte).

BIELAWA 3

24

Musical notation for measures 24-33. Treble clef, bass clef. Dynamics include 'f'.

34

Musical notation for measures 34-38. Treble clef, bass clef. Dynamics include 'ff'. Includes accidentals like # and b.

39

Musical notation for measures 39-42. Treble clef, bass clef. Includes accidentals like b.

III.

Warmly (♩ = 104-112)

Musical notation for measures 43-52. Treble clef, bass clef. Includes 'con sord.' and 'mp' markings. Includes a 3/4 time signature.

Musical staff 1: Measures 1-5. Starts with a treble clef, a key signature of one sharp (F#), and a 4/4 time signature. The melody begins with a half note G4, followed by quarter notes A4, B4, C5, B4, A4, G4. Dynamics include a forte (f) marking under the first measure and a mezzo-piano (mp) marking under the fifth measure.

Musical staff 2: Measures 6-9. Continues the melody from the previous staff. Measure 6 starts with a forte (f) dynamic. Measure 9 ends with a fermata over a half note G4.

Musical staff 3: Measures 10-13. Measure 10 starts with a piano (p) dynamic. Measure 13 ends with a fermata over a half note G4.

Musical staff 4: Measures 14-17. Measure 17 ends with a fermata over a half note G4. A dashed line with the word "CRESC." (crescendo) is written below the staff.

Musical staff 5: Measures 18-22. Measure 22 ends with a fermata over a half note G4. A dashed line from the previous staff continues below this staff.

Musical staff 6: Measures 23-27. Measure 27 ends with a fermata over a half note G4. A forte (f) dynamic marking is placed below the staff.

Musical staff 7: Measures 28-32. Measure 32 ends with a fermata over a half note G4. Dynamics include piano (p) and forte (f) markings.

Musical staff 8: Measures 33-36. Measure 36 ends with a fermata over a half note G4.

Musical staff 9: Measures 37-40. Measure 40 ends with a double bar line. Dynamics include piano (p) and forte (f) markings.

IV.

Musical score for section IV, measures 1-37. The score is written on a single staff in treble clef with a key signature of one sharp (F#). The tempo is marked 'Sprightly' with a quarter note equal to 80-88 beats per minute. The instruction 'SENZA SORD.' is present. The score consists of nine lines of music, each starting with a measure number: 1, 6, 10, 14, 18, 23, 28, 33, and 37. The music features a variety of note values including quarter, eighth, and sixteenth notes, often beamed together. Dynamic markings include *f*, *mp*, *p*, and *ff*. A 'Crescendo' (CRESC.) is indicated by a dashed line starting at measure 14 and ending at measure 18. The piece concludes with a double bar line at measure 37.

THREE CONCERT PIECES for Young Players

I. March

Ralph SHAPEY

$\text{♩} = 84$

Violin

f DETACHÉ

Viola

mf DETACHÉ

Cello

mf DETACHÉ

* M = MAIN VOICE

© by RALPH SHAPEY 1968

Handwritten musical score for the first system, consisting of three staves (treble, alto, and bass clefs). The music features various notes, rests, and dynamic markings such as 'f' and 'mf'. There are also some handwritten annotations above the notes, possibly indicating fingerings or breath marks.

Handwritten musical score for the second system, consisting of three staves (treble, alto, and bass clefs). The music continues with similar notation to the first system, including notes, rests, and dynamic markings like 'mf' and 'f'. The piece concludes with the handwritten text 'SHAPEY-2' at the bottom right of the system.

SHAPEY-2

3

Handwritten musical score for system 3, measures 3-5. It consists of three staves: Treble, Alto, and Bass. Measure 3 has a treble staff with notes G4, A4, B4, C5, and a bass staff with notes G2, A2, B2, C3. Measure 4 has a treble staff with notes G4, A4, B4, C5 and a bass staff with notes G2, A2, B2, C3. Measure 5 has a treble staff with notes G4, A4, B4, C5 and a bass staff with notes G2, A2, B2, C3. Dynamics include 'f' and 'M'. There are also some handwritten annotations like 'v' and '#0'.

6

Handwritten musical score for system 6, measures 6-8. It consists of three staves: Treble, Alto, and Bass. Measure 6 has a treble staff with notes G4, A4, B4, C5 and a bass staff with notes G2, A2, B2, C3. Measure 7 has a treble staff with notes G4, A4, B4, C5 and a bass staff with notes G2, A2, B2, C3. Measure 8 has a treble staff with notes G4, A4, B4, C5 and a bass staff with notes G2, A2, B2, C3. Dynamics include 'f'. There are also some handwritten annotations like 'v' and '#0'.

SHAPEY-3

Handwritten musical score for the first system, consisting of three staves. The top staff is in treble clef, the middle in alto clef, and the bottom in bass clef. The music includes various note values, rests, and dynamic markings such as *f*. There are also some handwritten annotations above the notes, possibly indicating fingerings or articulation.

Handwritten musical score for the second system, consisting of three staves. The top staff is in treble clef, the middle in alto clef, and the bottom in bass clef. The music includes various note values, rests, and dynamic markings such as *f*. There are also some handwritten annotations above the notes, possibly indicating fingerings or articulation.

SHAPEY-4

5

Handwritten musical score for the first system, consisting of three staves. The top staff is in treble clef, the middle in alto clef, and the bottom in bass clef. The music features various notes, rests, and dynamic markings such as *f* and *mf*. There are also some handwritten annotations above the notes, possibly indicating fingerings or articulation.

Handwritten musical score for the second system, consisting of three staves. The top staff is in treble clef, the middle in alto clef, and the bottom in bass clef. The music continues with various notes and rests, including dynamic markings like *mf*.

SHAPPEY-5

Handwritten musical notation on three staves. The top staff is in treble clef, the middle in alto clef, and the bottom in bass clef. The music features various notes, rests, and dynamic markings such as *f* and *M_v*. There are also some handwritten annotations like *v* and *#* above notes.

Handwritten musical notation on three staves, continuing from the previous system. It includes dynamic markings like *f* and *M_v*, and features a variety of rhythmic patterns and note values.

SHAPE4-6

7

Handwritten musical score for the first system, measures 1-4. It consists of three staves: Treble, Bass, and Bass. The music is in 4/4 time. The first staff has notes with accidentals and dynamics like 'f'. The second staff has notes with accidentals and dynamics like 'f'. The third staff has notes with dynamics like 'f'.

8

Handwritten musical score for the second system, measures 5-8. It consists of three staves: Treble, Bass, and Bass. The music is in 4/4 time. The first staff has notes with accidentals and dynamics like 'f'. The second staff has notes with accidentals and dynamics like 'f'. The third staff has notes with dynamics like 'f'.

SHAPEY-7

Handwritten musical score for guitar, first system. The top staff is in treble clef, and the bottom staff is in bass clef. The music is in 4/4 time. The first measure has a dynamic marking of *mp*. The second measure has a dynamic marking of *p*. The third measure has a dynamic marking of *mp*. A slur covers the first two measures, with a *gliss.* marking above it. A fermata is placed over the second measure. A circled 'e' is written above the second measure. The bottom staff contains guitar-specific notation, including fret numbers (e.g., 5, 7, 9) and various symbols (x, y, z) indicating fingerings or techniques.

Handwritten musical score for guitar, second system. The top staff is in treble clef, and the bottom staff is in bass clef. The music is in 4/4 time. The first measure has a dynamic marking of *mf*. The second measure has a dynamic marking of *p*. The third measure has a dynamic marking of *p*. The fourth measure has a dynamic marking of *p*. The fifth measure has a dynamic marking of *p*. The sixth measure has a dynamic marking of *p*. The seventh measure has a dynamic marking of *p*. The eighth measure has a dynamic marking of *p*. The bottom staff contains guitar-specific notation, including fret numbers (e.g., 5, 7, 9) and various symbols (x, y, z) indicating fingerings or techniques.

Handwritten musical score for guitar, third system. The top staff is in treble clef, and the bottom staff is in bass clef. The music is in 4/4 time. The first measure has a dynamic marking of *mf*. The second measure has a dynamic marking of *p*. The third measure has a dynamic marking of *mp*. The fourth measure has a dynamic marking of *p*. The fifth measure has a dynamic marking of *p*. The sixth measure has a dynamic marking of *p*. The seventh measure has a dynamic marking of *p*. The eighth measure has a dynamic marking of *p*. The bottom staff contains guitar-specific notation, including fret numbers (e.g., 5, 7, 9) and various symbols (x, y, z) indicating fingerings or techniques.

SHAPEY-9

2

Musical score for system 2, measures 2-3. The system consists of four staves. The top staff is a treble clef staff with notes and dynamics (mp). The second staff is a middle staff with a glissando line and notes. The third staff is a bass clef staff with notes and dynamics (mp). The bottom staff is a guitar staff with chords and dynamics (p).

4

Musical score for system 4, measures 4-5. The system consists of four staves. The top staff is a treble clef staff with notes and dynamics (mp). The second staff is a middle staff with a glissando line and notes. The third staff is a bass clef staff with notes and dynamics (mp). The bottom staff is a guitar staff with chords and dynamics (p).

Shapey - 10

Musical score for the first section, consisting of three staves. The top two staves contain melodic lines with dynamics *mp*, *mf*, and *ppp*. The word *gliss.* is written above the staves. The bottom staff contains a bass line with chords and dynamics *mp* and *p*.

III. DANCE

$\text{♩} = 80$ ($\text{♩} = 160$)

Musical score for the 'DANCE' section, consisting of three staves. The top staff has a melodic line with dynamics *f* and *mf*. The middle two staves contain melodic lines with dynamics *f* and *mf*. The word *Pizz.* is written above the middle staves. The bottom staff contains a bass line with chords and dynamics *f* and *mf*. A star symbol (*) is placed above the first measure of the middle staves.

* ♩ always remains constant

The first system of the musical score consists of four staves. The top staff is in Treble clef with a key signature of one sharp (F#) and a 7/4 time signature. It begins with a dynamic marking of *f* and contains several measures of music, including a measure with a *v* (accents) marking. The second staff is in Alto clef with a dynamic marking of *mf*. The third staff is in Bass clef with a dynamic marking of *mf*. The fourth staff is a guitar staff with a dynamic marking of *mf*, showing chord diagrams with 'x' marks for fretted notes and 'y' marks for natural notes.

The second system of the musical score also consists of four staves. The top staff is in Treble clef with a key signature of one sharp (F#) and a 7/4 time signature. It begins with a dynamic marking of *f*. The second staff is in Alto clef with a dynamic marking of *mf*. The third staff is in Bass clef with a dynamic marking of *mf*. The fourth staff is a guitar staff with a dynamic marking of *mf*, showing chord diagrams with 'x' marks for fretted notes and 'y' marks for natural notes.

f

f

Musical score for the first system, measures 1-6. The score is written for four staves: Treble Clef (top), Bass Clef (second), Bass Clef (third), and Treble Clef (bottom). The time signature is 4/4. The first staff contains a melody with dynamics *f* and accents. The second staff contains a melody with dynamics *mf*. The third staff contains a bass line with dynamics *mf*. The fourth staff contains guitar chords with dynamics *mf*.

Musical score for the second system, measures 7-14. The score is written for four staves: Treble Clef (top), Bass Clef (second), Bass Clef (third), and Treble Clef (bottom). The time signature is 4/4. The first staff contains a melody with dynamics *f* and accents. The second staff contains a melody with dynamics *mf*. The third staff contains a bass line with dynamics *mf*. The fourth staff contains guitar chords with dynamics *mf*.

The first system of the handwritten musical score consists of four staves. The top staff is in treble clef with a 2/4 time signature, containing a melodic line with various notes and rests. The second staff is in alto clef, the third in bass clef, and the fourth is a guitar staff with chord diagrams and fret numbers. The system is divided into three measures by vertical bar lines.

The second system of the handwritten musical score also consists of four staves. The top staff is in treble clef with a 2/4 time signature, featuring a melodic line with a fermata over the first measure. The second staff is in alto clef, the third in bass clef, and the fourth is a guitar staff with chord diagrams and fret numbers. The system is divided into three measures by vertical bar lines. The dynamic marking *mf* is present in the second and third measures of the second, third, and fourth staves.

Musical score for the first system, measures 1-5. The score is written for four staves. The first staff is in treble clef, the second and third are in bass clef, and the fourth is a guitar-style staff with an F-clef. The time signature is 2/4. The first measure (measure 1) has a dynamic marking of *f*. The second measure (measure 2) has a dynamic marking of *f*. The third measure (measure 3) has a dynamic marking of *f*. The fourth measure (measure 4) has a dynamic marking of *mf*. The fifth measure (measure 5) has a dynamic marking of *mf*. The score includes various musical notations such as notes, rests, and accidentals.

Musical score for the second system, measures 6-9. The score is written for four staves. The first staff is in treble clef, the second and third are in bass clef, and the fourth is a guitar-style staff with an F-clef. The time signature is 2/4. The first measure (measure 6) has a dynamic marking of *f*. The second measure (measure 7) has a dynamic marking of *f*. The third measure (measure 8) has a dynamic marking of *ff*. The fourth measure (measure 9) has a dynamic marking of *ff*. The score includes various musical notations such as notes, rests, and accidentals. The word "ARCO" is written in a box above the second and third staves in measures 8 and 9. The number "9" is written at the beginning of the first staff.

Shapey - 16

Handwritten musical score for guitar, measures 1-4. The score is written on four staves. The top staff is in treble clef and contains a melody with notes, rests, and accidentals (sharps). The second and third staves are in bass clef and contain accompaniment with notes and rests. The bottom staff is a guitar-specific staff with fretting notation (numbers 1-4) and picking notation (x for downstroke, y for upstroke). Dynamics include *ff* (fortissimo) and accents (^). The piece concludes with a double bar line and a wavy line indicating a tremolo effect.

Handwritten musical score for guitar, measures 5-6. The score is written on four staves. The top staff is in treble clef and contains a melody with notes and rests. The second and third staves are in bass clef and contain accompaniment with notes and rests. The bottom staff is a guitar-specific staff with fretting notation (numbers 1-4) and picking notation (x for downstroke, y for upstroke). Dynamics include *ff* (fortissimo). The piece concludes with a double bar line and a wavy line indicating a tremolo effect.

Shapey-17

Violin

II. Song

$\text{♩} = 40-50$

Handwritten musical notation for measures 1-3. Measure 1 starts with a treble clef, a 5/4 time signature, and a *mp* dynamic. The melody consists of quarter notes: G4, A4, B4, C5. A slur covers measures 2 and 3, with a glissando line above it. Measure 2 contains a half note G4. Measure 3 contains a half note A4. A handwritten note reads: "gliss. (as high as possible on 'D' string) (very slow)". The piece ends with a double bar line and a *mp* dynamic.

Handwritten musical notation for measures 4-5. Measure 4 starts with a treble clef, a 4/4 time signature, and a *mp* dynamic. The melody consists of quarter notes: B4, C5, D5, E5. A slur covers measures 4 and 5, with a glissando line above it. Measure 5 contains a half note E5. The piece ends with a double bar line and a *mp* dynamic.

Handwritten musical notation for measures 6-8. Measure 6 starts with a treble clef, a 4/4 time signature, and a *mf* dynamic. The melody consists of quarter notes: F5, G5, A5, B5. A slur covers measures 6 and 7, with a glissando line above it. Measure 8 contains a half note B5. The piece ends with a double bar line.

Handwritten musical notation for measures 9-12. Measure 9 starts with a treble clef, a 4/4 time signature, and a *mf* dynamic. The melody consists of quarter notes: C6, D6, E6, F6. A slur covers measures 9 and 10, with a glissando line above it. Measure 11 contains a half note F6. Measure 12 contains a half note G6. The piece ends with a double bar line and a *mp* dynamic.

Handwritten musical notation for measures 13-16. Measure 13 starts with a treble clef, a 4/4 time signature, and a *mf* dynamic. The melody consists of quarter notes: A6, B6, C7, D7. A slur covers measures 13 and 14, with a glissando line above it. Measure 15 contains a half note D7. Measure 16 contains a half note E7. The piece ends with a double bar line.

Handwritten musical notation for measures 17-18. Measure 17 starts with a treble clef, a 4/4 time signature, and a *mf* dynamic. The melody consists of quarter notes: F7, G7, A7, B7. A slur covers measures 17 and 18, with a glissando line above it. Measure 18 contains a half note B7. The piece ends with a double bar line and a *PPP* dynamic.

Violin

III. DANCE

$\text{♩} = 80$ ($\text{♩} = 160$)

First staff of music, measures 1-4. It begins with a treble clef and a 4/4 time signature. The key signature has one sharp (F#). The first measure contains a whole rest. The second measure contains a whole rest. The third measure contains a quarter rest followed by a quarter note F#4. The fourth measure contains a quarter note F#4, a quarter note G4, and a quarter note A4. The piece ends with a fermata over the final note.

Second staff of music, measures 5-8. Measure 5 starts with a measure rest, followed by a quarter note F#4. Measure 6 contains a quarter note G4, a quarter note A4, and a quarter note B4. Measure 7 contains a quarter note C5, a quarter note B4, and a quarter note A4. Measure 8 contains a quarter note G4, a quarter note F#4, and a quarter note E4. The piece ends with a fermata over the final note.

Third staff of music, measures 9-12. Measure 9 starts with a measure rest, followed by a quarter note F#4. Measure 10 contains a quarter note G4, a quarter note A4, and a quarter note B4. Measure 11 contains a quarter note C5, a quarter note B4, and a quarter note A4. Measure 12 contains a quarter note G4, a quarter note F#4, and a quarter note E4. The piece ends with a fermata over the final note.

Fourth staff of music, measures 13-16. Measure 13 starts with a measure rest, followed by a quarter note F#4. Measure 14 contains a quarter note G4, a quarter note A4, and a quarter note B4. Measure 15 contains a quarter note C5, a quarter note B4, and a quarter note A4. Measure 16 contains a quarter note G4, a quarter note F#4, and a quarter note E4. The piece ends with a fermata over the final note.

Fifth staff of music, measures 17-20. Measure 17 starts with a measure rest, followed by a quarter note F#4. Measure 18 contains a quarter note G4, a quarter note A4, and a quarter note B4. Measure 19 contains a quarter note C5, a quarter note B4, and a quarter note A4. Measure 20 contains a quarter note G4, a quarter note F#4, and a quarter note E4. The piece ends with a fermata over the final note.

Sixth staff of music, measures 21-24. Measure 21 starts with a measure rest, followed by a quarter note F#4. Measure 22 contains a quarter note G4, a quarter note A4, and a quarter note B4. Measure 23 contains a quarter note C5, a quarter note B4, and a quarter note A4. Measure 24 contains a quarter note G4, a quarter note F#4, and a quarter note E4. The piece ends with a fermata over the final note.

Seventh staff of music, measures 25-28. Measure 25 starts with a measure rest, followed by a quarter note F#4. Measure 26 contains a quarter note G4, a quarter note A4, and a quarter note B4. Measure 27 contains a quarter note C5, a quarter note B4, and a quarter note A4. Measure 28 contains a quarter note G4, a quarter note F#4, and a quarter note E4. The piece ends with a fermata over the final note.

BICINIA for Two Violins

1. ANDANTE ♩ = 144; ♩ = 48

Halsey STEVENS

Musical notation for the first system of the first movement, measures 1-6. The music is in 3/4 time. The upper staff begins with a treble clef and a 3/4 time signature. The lower staff begins with a bass clef and a 3/4 time signature. The melody in the upper staff consists of eighth and quarter notes with slurs. The lower staff provides a harmonic accompaniment with eighth and quarter notes.

Musical notation for the second system of the first movement, measures 7-13. The upper staff continues the melody with slurs and accents. The lower staff continues the accompaniment, featuring some chromatic movement with sharps.

Musical notation for the third system of the first movement, measures 14-20. The upper staff concludes the first phrase with a repeat sign. The lower staff continues the accompaniment.

2. ANDANTINO ♩ = 160

Musical notation for the first system of the second movement, measures 1-4. The music is in 6/8 time. The upper staff begins with a treble clef and a 6/8 time signature. The lower staff begins with a bass clef and a 6/8 time signature. The melody in the upper staff features a triplet and slurs. The lower staff provides a rhythmic accompaniment with eighth notes and rests.

5

Musical notation for measures 5-8. The system consists of two staves. The upper staff begins with a treble clef and a key signature of one sharp (F#). It contains four measures of music with various note values, including eighth and sixteenth notes, and rests. The lower staff also begins with a treble clef and contains four measures of music, including a triplet of eighth notes in the second measure and a sixteenth-note triplet in the third measure. Dynamic markings include accents (v) and hairpins.

9

Musical notation for measures 9-12. The system consists of two staves. The upper staff begins with a treble clef and a key signature of one sharp (F#). It contains four measures of music with eighth and sixteenth notes. The lower staff also begins with a treble clef and contains four measures of music with eighth and sixteenth notes. Dynamic markings include accents (v) and hairpins.

13

Musical notation for measures 13-16. The system consists of two staves. The upper staff begins with a treble clef and a key signature of one sharp (F#). It contains four measures of music with eighth and sixteenth notes. The lower staff also begins with a treble clef and contains four measures of music, including a triplet of eighth notes in the second measure and a sixteenth-note triplet in the third measure. Dynamic markings include accents (v) and hairpins.

17

Musical notation for measures 17-20. The system consists of two staves. The upper staff begins with a treble clef and a key signature of one sharp (F#). It contains four measures of music with eighth and sixteenth notes. The lower staff also begins with a treble clef and contains four measures of music with eighth and sixteenth notes. Dynamic markings include accents (v) and hairpins.

FOUR DUETS for VIOLIN AND CELLO

1. LIBERAMENTE ♩ = 128

HALSEY STEVENS

The musical score is written for Violin and Cello. It consists of four systems of two staves each. The first system (measures 1-5) begins with a dynamic marking of *f* and includes a fermata over the final measure. The second system (measures 6-10) continues the melodic and harmonic development. The third system (measures 11-15) features a dynamic marking of *piu f* and includes a fermata. The fourth system (measures 16-20) concludes the piece with a final fermata. The notation includes various note values, rests, and articulation marks such as accents and slurs.

© by Halsey Stevens 1968

21

Musical notation for measures 21-25. The system consists of two staves. The upper staff is in treble clef and the lower staff is in bass clef. Measure 21 starts with a whole rest in the treble and a half note in the bass. Measure 22 has a quarter note in the treble and a half note in the bass. Measure 23 has a quarter note in the treble and a half note in the bass. Measure 24 has a quarter note in the treble and a half note in the bass. Measure 25 has a quarter note in the treble and a half note in the bass. There are dynamic markings *mf* and *f* in the bass staff.

26

Musical notation for measures 26-30. The system consists of two staves. The upper staff is in treble clef and the lower staff is in bass clef. Measure 26 starts with a whole rest in the treble and a half note in the bass. Measure 27 has a quarter note in the treble and a half note in the bass. Measure 28 has a quarter note in the treble and a half note in the bass. Measure 29 has a quarter note in the treble and a half note in the bass. Measure 30 has a quarter note in the treble and a half note in the bass. There are dynamic markings *f* and *mf* in the bass staff.

31

Musical notation for measures 31-35. The system consists of two staves. The upper staff is in treble clef and the lower staff is in bass clef. Measure 31 starts with a whole rest in the treble and a half note in the bass. Measure 32 has a quarter note in the treble and a half note in the bass. Measure 33 has a quarter note in the treble and a half note in the bass. Measure 34 has a quarter note in the treble and a half note in the bass. Measure 35 has a quarter note in the treble and a half note in the bass. There are dynamic markings *mf* and *f* in the bass staff.

36

Musical notation for measures 36-40. The system consists of two staves. The upper staff is in treble clef and the lower staff is in bass clef. Measure 36 starts with a whole rest in the treble and a half note in the bass. Measure 37 has a quarter note in the treble and a half note in the bass. Measure 38 has a quarter note in the treble and a half note in the bass. Measure 39 has a quarter note in the treble and a half note in the bass. Measure 40 has a quarter note in the treble and a half note in the bass. There are dynamic markings *mf* and *f* in the bass staff.

41

Musical notation for measures 41-45. The system consists of two staves. The upper staff is in treble clef and the lower staff is in bass clef. Measure 41 starts with a whole rest in the treble and a half note in the bass. Measure 42 has a quarter note in the treble and a half note in the bass. Measure 43 has a quarter note in the treble and a half note in the bass. Measure 44 has a quarter note in the treble and a half note in the bass. Measure 45 has a quarter note in the treble and a half note in the bass. There are dynamic markings *rit.* and *mf* in the bass staff.

STEVENS-2

2. ANDANTE $\text{♩} = 64$

Musical notation for measures 1-5. The piece is in 3/2 time. The first staff (treble clef) begins with a dynamic marking of *p espr.* and a *v* (accents) over the first two notes. The second staff (bass clef) also begins with *p espr.*. The music features a mix of eighth and quarter notes, with some notes beamed together.

Musical notation for measures 6-9. Measure 6 starts with a *4* (fingerings) above the first note. Measure 7 has a *3* above the first note. Measure 8 has a *2* above the first note. Measure 9 has a *4* above the first note. The dynamic marking *cresc.* appears in both staves at the beginning of measure 8.

Musical notation for measures 10-14. Measure 10 has a *0* above the first note. Measure 11 has a *4* above the first note. The dynamic marking *dim.* appears in both staves at the beginning of measure 11.

Musical notation for measures 15-19. Measure 15 has a *3* above the first note. Measure 16 has a *2* above the first note. Measure 17 has a *p* (piano) marking above the first note. Measure 18 has a *v* (accents) above the first note. Measure 19 has a *p* marking above the first note. The piece concludes with a double bar line.

STEVENS - 3

3. Mormorevole $\text{♩} = 80$

Musical notation for measures 1-6. The piece is in 4/4 time. The treble clef part begins with a piano (*poco p*) dynamic and a melodic line of eighth notes. The bass clef part provides a simple accompaniment of half notes. A fermata is placed over the final note of the treble staff in measure 6.

Musical notation for measures 7-12. The treble clef part continues with eighth notes, featuring a fermata in measure 10. The bass clef part continues with half notes, including a fermata in measure 12.

Musical notation for measures 13-17. The treble clef part features a melodic line of eighth notes with a fermata in measure 17. The bass clef part continues with half notes, including a fermata in measure 17. A piano (*p*) dynamic marking is present in measure 17.

Musical notation for measures 18-22. The treble clef part begins with a crescendo (*cresc.*) and ends with a decrescendo (*dim.*). The bass clef part also features a crescendo and decrescendo. A piano (*p*) dynamic marking is present in measure 22.

Musical notation for measures 23-27. The treble clef part features a melodic line of eighth notes with a crescendo (*cresc.*) and a fermata in measure 27. The bass clef part continues with half notes, including a crescendo and a fermata in measure 27.

4. Allegro Moderato $\text{♩} = 96$

Musical staff 1, measures 1-10. The staff is in 2/4 time with a key signature of one flat. It begins with a forte (*f*) dynamic. The melody consists of quarter notes and eighth notes, with some notes beamed together.

Musical staff 2, measures 11-20. Measures 11-15 continue the melody from the previous staff. Measures 16-20 feature a more active melody with eighth notes and some slurs.

Musical staff 3, measures 21-27. Measures 21-24 show a melodic line with eighth notes. Measures 25-27 include a descending eighth-note scale and a final chord.

Musical staff 4, measures 28-35. Measures 28-32 feature a melodic line with eighth notes. Measure 33 has a *CRESC.* marking. Measure 34 has a fortissimo (*ff*) dynamic. Measure 35 ends with a chord.

Musical staff 5, measures 36-45. Measures 36-40 continue the melodic line. Measure 41 has a forte (*f*) dynamic. Measures 42-45 show a melodic line with eighth notes and a final chord.

Musical staff 6, measures 46-54. Measures 46-50 continue the melodic line. Measures 51-54 feature a more active melody with eighth notes and a final chord.

Musical staff 7, measures 55-65. Measures 55-60 continue the melodic line. Measures 61-65 feature a more active melody with eighth notes and a final chord.

Musical staff 8, measures 66-74. Measures 66-70 continue the melodic line. Measures 71-74 feature a more active melody with eighth notes and a final chord.

Musical staff 9, measures 75-80. Measures 75-78 continue the melodic line. Measures 79-80 feature a final melodic phrase with a slur and a fermata. The tempo marking *allargando* is written below the staff.

still louder and faster (♩ = 112)

Musical notation system 1, consisting of two staves. The upper staff contains a melodic line with a key signature of one sharp (F#) and a dynamic marking of *f*. The lower staff contains a rhythmic accompaniment, also marked *f*.

Musical notation system 2, consisting of two staves. The upper staff features a melodic line with a key signature of one sharp (F#). The lower staff includes a pizzicato section marked "pizz. +", followed by an arco section marked "arco".

Musical notation system 3, consisting of two staves. The upper staff has a melodic line with a key signature of one sharp (F#). The lower staff provides a rhythmic accompaniment.

Musical notation system 4, consisting of two staves. The upper staff begins with a pizzicato section marked "pizz. +", followed by an arco section marked "arco". The lower staff continues the rhythmic accompaniment.

Musical notation system 5, consisting of two staves. The upper staff features a melodic line with a key signature of one sharp (F#) and a dynamic marking of *ff*. The lower staff provides a rhythmic accompaniment.

Viola

You Can't Catch Me

A CANON FOR THREE PLAYERS

$\text{♩} = 60$ ARCO

Richard WERNICK

First staff of music for Viola. It begins with a treble clef, a 4/4 time signature, and a key signature of one flat (B-flat). The tempo is marked as quarter note = 60. The performance instruction is 'ARCO' (arco). The first measure contains a half note G3, followed by a half note F3. The second measure contains a half note E3. The third measure contains a half note D3. The fourth measure contains a half note C3. The fifth measure contains a half note B2. The sixth measure contains a half note A2. The seventh measure contains a half note G2. The eighth measure contains a half note F2. The dynamic marking 'mf' is placed below the first measure. There are accents (v) above the notes in the second, fourth, and sixth measures. A slur is placed over the notes in the fourth and fifth measures.

col legno battuto

Second staff of music for Viola, marked '(2)'. It contains rhythmic patterns for the second part of the canon. The notation consists of eighth notes and rests, with a 3/4 time signature indicated above the staff. The patterns are: 3 eighth notes, 2 eighth notes, 3 eighth notes, 2 eighth notes.

(3) pizz.

Third staff of music for Viola, marked '(3)'. It contains rhythmic patterns for the third part of the canon. The notation consists of eighth notes and rests, with a 5/4 time signature indicated above the staff. The patterns are: 5 eighth notes, 4 eighth notes, 5 eighth notes, 4 eighth notes. The dynamic marking 'f' is placed below the first measure. The staff ends with a double bar line and repeat dots.

Cello

You Can't Catch Me

A CANON FOR THREE PLAYERS

$\text{♩} = 60$ ARCO

Richard WERNICK

First staff of music for Cello. It begins with a bass clef, a 4/4 time signature, and a key signature of one flat (B-flat). The tempo is marked as quarter note = 60. The performance instruction is 'ARCO' (arco). The first measure contains a half note G2, followed by a half note F2. The second measure contains a half note E2. The third measure contains a half note D2. The fourth measure contains a half note C2. The fifth measure contains a half note B1. The sixth measure contains a half note A1. The seventh measure contains a half note G1. The eighth measure contains a half note F1. The dynamic marking 'mf' is placed below the first measure. There are accents (v) above the notes in the second, fourth, and sixth measures. A slur is placed over the notes in the fourth and fifth measures.

col legno battuto

Second staff of music for Cello, marked '(2)'. It contains rhythmic patterns for the second part of the canon. The notation consists of eighth notes and rests, with a 3/4 time signature indicated above the staff. The patterns are: 3 eighth notes, 2 eighth notes, 3 eighth notes, 2 eighth notes.

(3) pizz.

Third staff of music for Cello, marked '(3)'. It contains rhythmic patterns for the third part of the canon. The notation consists of eighth notes and rests, with a 5/4 time signature indicated above the staff. The patterns are: 5 eighth notes, 4 eighth notes, 5 eighth notes, 4 eighth notes. The dynamic marking 'f' is placed below the first measure. The staff ends with a double bar line and repeat dots.

SCORE

You Can't Catch Me
A-CANON for THREE PLAYERS

RICHARD WERNICK

$\text{♩} = 60$ *Arco* *mf* *(2) col legno battuto*

mf *Arco* *mf* *(2) col legno battuto*

mf *Arco* *mf* *(2) col legno battuto*

This system contains three staves of music. The top staff is in treble clef, the middle in alto clef, and the bottom in bass clef. It includes dynamic markings such as *mf* and *Arco*, and performance instructions like *(2) col legno battuto*. The notation includes various note values, rests, and slurs.

col legno battuto *(2)*

col legno battuto *(2)*

This system continues the musical score with three staves. It features similar notation to the first system, including dynamic markings and performance instructions. The notes are arranged in a way that suggests a canon for three players.

A musical staff with a treble clef, containing a sequence of notes and rests. The notes are mostly quarter notes, with some eighth notes. There are several rests of varying lengths.

col legno battuto

(2)

A musical staff with a bass clef, containing a sequence of notes and rests. The notes are mostly quarter notes, with some eighth notes. There are several rests of varying lengths.

col legno battuto

(2)

A musical staff with a bass clef, containing a sequence of notes and rests. The notes are mostly quarter notes, with some eighth notes. There are several rests of varying lengths.

(3) pizz.

A musical staff with a treble clef, containing a sequence of notes and rests. The notes are mostly quarter notes, with some eighth notes. There are several rests of varying lengths.

f

pizz.

(3)

A musical staff with a bass clef, containing a sequence of notes and rests. The notes are mostly quarter notes, with some eighth notes. There are several rests of varying lengths.

f

pizz.

(3)

A musical staff with a bass clef, containing a sequence of notes and rests. The notes are mostly quarter notes, with some eighth notes. There are several rests of varying lengths.

Peter's March

for two violins

♩ = 96

Richard WERNICK

Musical notation for the first system, featuring two staves: VI. I (Violin I) and VI. II (Violin II). The key signature has one sharp (F#) and the time signature is 4/4. The first measure of the Violin I staff contains a whole note chord (F#4, A4, C5) with a forte (**ff**) dynamic. The Violin II staff begins with a forte (**ff**) dynamic and a series of eighth notes: F#4, A4, B4, C5, B4, A4, G#4, F#4. A *sim.* (sustained) marking is placed above the first measure of the Violin II staff. The system concludes with a final measure in the Violin I staff containing a whole note chord (F#4, A4, C5) with a forte (**ff**) dynamic.

Musical notation for the second system, continuing the two-staff arrangement. The Violin I staff features a series of eighth notes: F#4, A4, B4, C5, B4, A4, G#4, F#4, with a *sim.* marking above. The Violin II staff continues with eighth notes: F#4, A4, B4, C5, B4, A4, G#4, F#4, also with a *sim.* marking above. The system ends with a final measure in the Violin I staff containing a whole note chord (F#4, A4, C5) with a forte (**ff**) dynamic.

Musical notation for the third system. The Violin I staff continues with eighth notes: F#4, A4, B4, C5, B4, A4, G#4, F#4, with a *sim.* marking above. The Violin II staff continues with eighth notes: F#4, A4, B4, C5, B4, A4, G#4, F#4, also with a *sim.* marking above. The system concludes with a final measure in the Violin I staff containing a whole note chord (F#4, A4, C5) with a forte (**ff**) dynamic.

II Duetto

With Verre
pizz. $\text{♩} = 84-88$

Violin

Violin part of the musical score. It begins with a *mf* dynamic and includes a *arco* instruction. The notation features various rhythmic values, including eighth and sixteenth notes, and rests. A *mf* dynamic is also present later in the section.

piano

Piano part of the musical score. It includes a *sulpt.* instruction and a *mf* dynamic. The notation is dense with chords and includes a *f* dynamic. A *4.* measure repeat sign is present. The score also features a *drum strike* instruction, a *ped.* (pedal) instruction, and a *mf* dynamic. A *rit.* (ritardando) instruction is followed by a *a tempo ff* instruction. The piece concludes with a *ff* dynamic and a *sample ff* instruction.

pizz.

f

Handwritten musical notation for measures 15 and 16. Measure 15 shows a treble clef with a sharp key signature and a half note. Measure 16 shows a treble clef with a sharp key signature, a half note, and a dynamic marking 'f'. The bottom staff shows a bass clef with a half note and a dynamic marking 'p'.

arco drum strike

mf

Handwritten musical notation for measures 17 and 18. Measure 17 shows a treble clef with a sharp key signature, a half note, and a dynamic marking 'mf'. Measure 18 shows a treble clef with a sharp key signature, a half note, and a dynamic marking 'pp'. The bottom staff shows a bass clef with a half note and a dynamic marking 'p'.

simple p

Rit.

Rit.

Handwritten musical notation for measures 19 and 20. Measure 19 shows a treble clef with a sharp key signature, a half note, and a dynamic marking 'p'. Measure 20 shows a treble clef with a sharp key signature, a half note, and a dynamic marking 'pp'. The bottom staff shows a bass clef with a half note and a dynamic marking 'p'.
