Descriptors-Audiologists, Auditory Evaluation, Auditory Tests, \*Aurally Handicapped, Chief Administrators, Clinical Diagnosis, \*Clinics, Community Programs, Counseling Services, \*Exceptional Child Services, Hearing Clinics, Hearing Therapy, Language Handicapped, Professional Personnel, Speech Clinics, Speech Evaluation, \*Speech Handicapped, Speech Therapists, Speech Therapy, State Programs

A listing of speech pathology and audiology services in the United States, the guide includes the names of 910 clinics and of 216 members of the American Speech and Hearing Association who are engaged in full time private practice. Arranged geographically, by state and city, the guide specifies the following for each clinic: official name, address, director, size and certification of staff, type of clinic, and services offered. The 28 clinics registered with the Professional Services Board (PSB) of the American Board of Examiners in Speech Pathology and Audiology are coded as well as listed separately. For each private practitioner, the entry states name, address, and certification status. Additional information is given concerning the PSB program and the Certificate of Clinical Competence. (JD)

## FOREWORD

This Guide to Clinical Services in Speech Pathology and Audiology is a listing of speech pathology and audiology services available in the United States. It includes the names of 910 clinics located in the 50 states and it also lists 216 Members of the American Speech and Hearing Association who are engaged in full-time private practice. Listed separately are the speech and hearing clinics registered by the Professional Services Board (PSB) of the American Board of Examiners in Speech Pathology and Audiology.

This Guide will be updated from time to time and any errors appearing in this initial edition will be corrected.

We wish to express our appreciation to the clinic directors who cooperated in supplying information for this Guide, and especially to George K. Schueller and Frances S. Lichtenberg of the National Office staff, who were responsible for its final compilation.

**Associate Secretary for Research  
and Scientific Affairs**

## **PSB-APPROVED CLINICS**

The clinics listed below have been registered by the American Boards of Examiners in Speech Pathology and Audiology (ABESPA) upon recommendation of the Professional Services Board (PSB). An asterisk is used to designate these PSB-approved clinics in the more descriptive list which begins on page 1. These clinics may be used with full confidence that they meet the highest standards of professional excellence.

PSB recommendations are based upon site examinations which consider such features as: staff, clinical practices and procedures, supervision, professional interrelationships, administration, records and reports, physical facilities, and equipment. PSB was established as one of the boards of the ABESPA by the American Speech and Hearing Association in 1959. It was established for the purposes of formulating standards, examining, and issuing appropriate certificates. Services may be registered in both speech pathology and audiology or separately in speech pathology or audiology. Registration is voluntarily initiated by application to: Chairman, Professional Services Board, 9030 Old Georgetown Road, Washington, D.C. 20014.

### **SPEECH PATHOLOGY AND AUDIOLOGY**

Chicago, Illinois 60611**

## INTRODUCTION TO THE GUIDE

The information in this Guide is arranged alphabetically and geographically, with clinics and private practitioners listed by state and city.

Data for the clinic listings began to be collected one year ago when lists of member agencies of all societies and organizations involved with the habilitation and rehabilitation of multiply handicapped or speech and hearing handicapped individuals were compiled. In February 1968, questionnaires were mailed to 1105 clinics which might offer services in speech pathology and audiology. The 910 speech and hearing clinics included in this Guide represent the most complete list currently available.

The list of private practitioners was compiled through a questionnaire mailed to all Members of the American Speech and Hearing Association in the summer of 1968. Those included here devote at least 30 hours per week to private practice. Many more ASHA Members are engaged in part-time private practice; their names may be found in the Association's annual Directory.

### Important Note Concerning the Certificate of Clinical Competence

The Certificate of Clinical Competence (CCC) is issued by the American Speech and Hearing Association to those who have specialized graduate training and who provide satisfactory evidence of ability to work independently in providing services to persons with disorders of speech, hearing, and language. For the purposes of certification, speech pathology and audiology are regarded as separate areas. A qualified Member may be certified in either area, or in both.

Revised requirements for the CCC became effective in January 1965, and a five-year transition period is currently in effect. By 1970, Association Members will have to possess the CCC in order to engage in clinical services, or be in violation of the Association's Code of Ethics.

### Format of the Listings

#### The Clinical Listings

For each clinic, the Guide gives the following information: official name, address, director, size of professional staff, and services offered. An asterisk is used to indicate clinics registered with PSB. (A separate list of PSB-registered clinics and an explanation of this program appear on page iii.)

Four major subheadings are given under the name and address of each clinic:

*Director.* The name of the director and his academic or professional title come directly below the address of the clinic. In some cases the name appearing here will be that of the administrative head of a larger facility of which the speech and hearing clinic is a part. In others it will be the director of the clinic itself.

**Staff.** Clinic directors were asked: "What is the number of staff persons who either possess or have completed the academic requirements for Certificates of Clinical Competence from the American Speech and Hearing Association (ASHA) in: (a) both speech pathology and audiology, (b) speech pathology only, and (c) audiology only?" The answers are shown by the numbers beside the following symbols: SP&A for CCC in both speech pathology and audiology; SP for CCC in speech pathology; and A for CCC in audiology.

**Setting.** The names of most of the clinics clearly identify the settings of which they are a part; e.g., Speech and Hearing Clinic—Auburn University obviously operates within the administrative framework of a university. In other cases, the setting is not indicated by the name. Therefore, the following code is used to describe the type of clinic:

- A. Community Speech and Hearing Center
- B. Non-University Medical or Health Facility (e.g., medical or rehabilitation center)
- C. University Hospital, Medical College, or other Health Facility (e.g., dental school)
- D. University or College Program (excluding university hospitals, medical centers, or medical colleges)
- E. Elementary or Secondary School

If none of these categories is appropriate, a description of the setting is included.

**Services.** The following numbering system is used to show the types of speech and hearing services offered by each clinic at the time the questionnaires were returned:

1. Screening for speech problems
2. Screening for language problems
3. Administering complete tests for articulation problems
4. Testing for voice problems
5. Testing for aphasia and related behaviors
6. Testing for language development
7. Evaluating stuttering behavior
8. Evaluations for persons with cleft palate and lip
9. Evaluations for persons with cerebral palsy
10. Evaluations for persons with Parkinson's disease, multiple sclerosis, or related syndromes
11. Evaluations for persons with mental retardation
12. Evaluations for persons with hearing handicaps
13. Evaluations for persons with emotional disorders
14. Evaluations for persons with special learning disabilities
15. Speech correction for functional articulation problems
16. Therapy for stutterers
17. Speech correction for dysphonias (malfunctions of voice—harshness, hoarseness, breathiness)
18. Preoperative orientation for laryngectomees, or other persons whose surgery might affect speech
19. Esophageal speech lessons
20. Speech correction or instruction for persons with cleft palate
21. Speech correction or instruction for persons with hyper- or hypo-nasality
22. Speech correction or instruction for persons with cerebral palsy
23. Speech or language correction or instruction for persons with aphasia
24. Speech or language correction or instruction for persons with special learning disabilities

25. Speech or language correction or instruction for persons with mental retardation
26. Speech or language correction or instruction for persons with hearing handicaps
27. Speech or language correction or instruction for persons with emotional disorders
28. Speech or language correction or instruction for persons with dialectual or bilingual problems
29. Speech improvement lessons
30. Tongue thrust or abnormal swallowing correction procedures
31. Language development for culturally deprived
32. Audiometric screening
33. Pure tone air conduction tests
34. Pure tone bone conduction tests
35. Measurement of speech reception thresholds
36. Measurement of speech discrimination
37. Tolerance tests
38. Tests for functional (nonorganic) hearing loss; psychogenic
39. Galvanic skin (electrodermal) response audiometry
40. Bekesy audiometry
41. Loudness balance tests
42. SISI tests
43. Tone decay tests
44. Impedance measurements
45. Electronystagmography tests
46. Electroencephalography tests
47. Screening of newborn
48. Audiometric tests for preschool children
49. Evaluating hearing aids for their usefulness to patients
50. Selection of hearing aid
51. Hearing aid orientation
52. Hearing aid rechecks
53. Auditory training
54. Speechreading (lipreading) lessons
55. Clinical speech training or speech conservation for the hearing handicapped
56. Tutoring or education for hearing handicapped
57. Counseling patients
58. Counseling parents or family
59. Counseling employers of the handicapped

#### **The Listings of Private Practitioners**

For each private practitioner the listing includes: name, address, and certification status. Certification is shown by the following symbols: SP = Certificate of Clinical Competence in Speech Pathology; A = Certificate of Clinical Competence in Audiology. A qualified person in private practice may be certified in either area, or both, there is no joint certificate. LM denotes Life Member; F denotes Fellow.

## PROFILES OF INDIVIDUAL CLINICS AND ASHA MEMBERS

### ALABAMA

#### AUBURN

##### SPEECH AND HEARING CLINIC—AUBURN UNIVERSITY

Auburn, AL 36830

*Director:* J. Buckminster Ranney, Ph.D.  
*Staff:* 1-SP & A, 3-SP, 1-A *Setting:* D  
*Services:* 1-24, 26, 28, 30, 32-39, 41-43, 47-55, 57-59
