Principles and Philosophy of Vocational Education.

Kansas State Board for Vocational Education, Topeka; Kansas State Teachers College, Emporia.

Pub Date 67

Note-113p.

Available from-Department of Business, Kansas State Teachers College, Cremer Hall, Emporia, Kansas 66801 (\$2.50).

EDRS Price MF-\$0.50 HC-\$5.75

Descriptors-College Students, *Educational Philosophy, *Educational Principles, Federal Laws, Individual Instruction, Orientation Materials, Preservice Education, Programed Materials, *Programed Texts, *Teacher Education, *Vocational Education

The principles and philosophy of vocational education are presented in this document in programed instruction form for use by potential vocational education teachers in teacher preparation courses in colleges or universities. Orientation and basic terminology is included under headings of: (1) The Place of Vocational Education. (2) Vocational Education Defined. (3) Types of Vocational Education Students. (4) Vocational Areas and Services. (5) Vocational Instruction. (6) Coordination of Instruction and Work. (7) Occupational Concept and Vocational Education, and (8) Review of the Federal Acts. The material was developed by college instructors for individualized instruction and revised after field trial. The document is mimeographed. (DM)

Supplementary Information on Instructional Material

Provide information below which is not included in the publication. Mark N/A in each blank for which information is not available or not applicable. Mark P when information is included in the publication. See reverse side for further instructions.

(1) Source of Available Copies:

Agency Department of Business--Kansas State Teachers College
Address Cremer Hall, Emporia, Kansas 66801
Limitation on Available Copies none Price/Unit 2.50
(quantity prices)

(2) Means Used to Develop Material:

Development Group Co-Authors
Level of Group College Instructors
Method of Design, Testing, and Trial This is the second revision of the text after trial on the first printing.

(3) Utilization of Material:

Appropriate School Setting Colleges or Universities
Type of Program Teacher preparation
Occupational Focus Teaching profession
Geographic Adaptability Usable anywhere
Uses of Material Orientation and basic terminology
Users of Material Potential vocational education teachers

(4) Requirements for Using Material:

Teacher Competency none
Student Selection Criteria none

Time Allotment Individualized, at own rate

Supplemental Media --

Necessary) (Check Which)
Desirable)

Describe Programmed text to be used by student-trainees at their own rate.

PRINCIPLES AND PHILOSOPHY OF
VOCATIONAL EDUCATION

INSTRUCTIONS

This manual is in a new form. The form is called programmed learning. It is the same as a teaching machine, but in this case you, yourself, are the machine and must turn the pages. The advantage of this system is that you do not learn the wrong answers and then have to unlearn them.

On page one at the upper right hand corner you will find a sentence with 1Q. in front of it. This is the first question. Fill in the blank; whether your answer is right or wrong does not matter. Then turn the page. You will find in the upper left hand corner the notation 1A. This is the answer to the 1Q. If your answer was correct, proceed to the next page and here you will find 2Q. If your answer was wrong, erase it and enter the right answer; then go on to 2Q. Read 2Q. and answer it, and then turn the page to 2A. This is the answer to 2Q. If it was right, keep on going. If it was wrong, erase and enter the right answer and then go on.

Make it easy on yourself

1. Do not try to go down the page before turning to the next page. The order of the questions is important, and if you try skipping you may get confused.
2. Change your answer when you are wrong and then proceed.
3. If you are confused, don't stop. The next three or four questions may clear up your confusion.
4. Work one section and then quit for a while. Do not work after you are tired.
5. Feel free to repeat the manual if you want to.
6. Remember the order and turn the page after each question.

Do not try to go down the page.

CHAPTER ONE

- 1Q. The primary purpose of this chapter is to show the place of vocational education in the overall framework of education.
- 9A. liberal
- 10Q. Some education courses naturally occur in the curriculum of all schools. There are very few true _____ education programs.
- 18A. education
- 19Q. This methodology may also include the philosophy of the various schools of _____.
- 27A. progressive
- 28Q. While the academic philosophy stresses the acquisition of knowledge, the progressive philosophy might be said to stress the acquisition of attitudes about the subject as well as knowledge of it. True or False.
- 36A. vocational
- 37Q. However, as now defined by law, education for those jobs which require a four-year college degree is now said to be professional _____.
- 45A. non-reimbursable
- 46Q. A reimbursable program would be one in which part of the cost of building and instruction or material is _____ by the Federal government.

- 1A. no answer
- 2Q. Vocational education is a part of the over-all area of _____.
- 10A. liberal
- 11Q. Courses in the arts, history, music, and literature, sometimes called the humanities, are also referred to as _____ education.
- 19A. education
- 20Q. One of the oldest over-all philosophies of education might be said to be the academic _____.
- 28A. True
- 29Q. There is possibly a third over-all philosophy of methodology of education, and this might be called the vocational _____ of education.
- 37A. education
- 38Q. Vocational education, even in the subjects which train students to make a living or perform a job, is restricted to less than college level.
- 46A. reimbursed
- 47Q. There are many good vocational programs which are supported by local or state funds, but which are not _____ by the Federal government.

- 2A. education

3Q. While education is obviously wider than just preparing for a vocation, vocational education is nevertheless an important part of education. Both formal and informal types of learning occur in both education and _____.

11A. liberal

12Q. After liberal education, the next major subject matter classification would be general education.

20A. philosophy

21Q. The academic method of education generally holds that subject matter is the primary business of education and that the job of the instructor is to teach the _____.
_____.

29A. philosophy

30Q. It might be said that the _____ philosophy tends to stress the skill rather than knowledge or attitude.

38A. four-year

39Q. Since this is a definition by law of the level of _____ education, there is little point in arguing the matter.

47A. reimbursed

48Q. This distinction between reimbursed and non-reimbursed programs on the part of a _____ government is done because non-reimbursed programs do not offer enough unity in pattern for us to discuss them intelligently.

- 3A. vocational education
- 4Q. By formal learning in this chapter, we shall refer to that learning, or _____, which is organized into regular class periods with an instructor and student relationship.
- 12A. no answer
- 13Q. Knowledge and information which is known to be of value to all people is organized into courses and referred to as _____ education.
- 21A. subject matter
- 22Q. The academic philosophy in _____ has a long and respected history.
- 30A. vocational
- 31Q. In this respect, _____ philosophy may be said to have a more limited objective than the other two.
- 39A. vocational
- 40Q. Therefore, we may assume that, in general, _____ education will be restricted to less than college level.
- 48A. Federal
- 49Q. The uniformity of the Federally _____ programs is created by the legislation which made them possible.

- 4A. formal education
- 5Q. Obviously, people learn many things when they are not in classrooms and not in a formal learning situation. This type of education is referred to as _____.
- 13A. general
- 14Q. As a rule, there are general education courses not only in general education curriculum, but also in the liberal curriculum and the vocational curriculum. True or False.
- 22A. education
- 23Q. Where only a small proportion of the population attends the secondary and higher schools, there is much to be said for the _____ philosophy of education.
- 31A. vocational
- 32Q. However, since no student attends a strictly _____ program, this is a greater problem in theory than fact.
- 40A. vocational
- 41Q. Within this definition of _____ education, there are also two additional distinctions.
- 49A. reimbursed
- 50Q. The majority of classifications which we shall use are due in part to _____ law.

5A. informal education

6Q. However, since informal education is not particularly organized, we shall restrict our discussion to the _____ patterns.

14A. True

15Q. The third subject matter area in the over-all field of education is vocational education.

23A. academic

24Q. The primary emphasis of an _____ philosophy of education is the acquisition of knowledge.

32A. vocational

33Q. Probably none of these three philosophies or subject matters will ever be found in isolation. There are elements of the liberal, _____, and vocational subjects in the curriculum of all schools.

41A. vocational

42Q. The two other distinctions made in vocational education are whether it is federally reimbursed or non-federally reimbursed. True or False.

50A. Federal

51Q. For purposes of this class, generally speaking, a _____ education program is a program that is Federally reimbursed.

- 6A. formal education
- 7Q. In the general field of education, education is organized by subject matter into liberal, general, and vocational education.
- 15A. no answer
- 16Q. Those curricula which are designed to prepare people to go to work are usually referred to as _____ education programs.
- 24A. academic
- 25Q. The second, or the general philosophy method of education, might be called the progressive education _____.
- 33A. general
- 34Q. The student is not usually exposed exclusively to either the academic philosophy, _____ philosophy, or vocational philosophy.
- 42A. True
- 43Q. For example, it is quite possible to have work experience programs which are Federal and would be described as non _____.
- 51A. vocational
- 52Q. Most Federal _____ programs are divided into two major types: those designed for persons still attending formal school, and those for persons in full-time employment.

- 7A. no answer
- 8Q. In this particular arrangement of over-all _____, liberal education is usually discussed first.
- 16A. vocational
- 17Q. In the formal education program in the United States, the area of _____ education has really been ignored while liberal and general education have been well supported.
- 25A. philosophy
- 26Q. It is the contention of the _____ philosophy of education that not only is the subject matter, but the method and the type of person taught important also.
- 34A. progressive
- 35Q. There is a problem in outlining any type of vocational _____.
- 43A. reimbursed programs
- 44Q. There are a great many types of vocational education programs. However, for purposes of this class, we shall make the further distinction of _____ programs into reimbursable and non-reimbursable vocational programs.
- 52A. vocational

8A. education

9Q. Traditionally, the _____ education program arose from the training of ministers.

17A. vocational

18Q. In addition to being oriented by subject matter, over-all _____ may also be divided according to method.

26A. progressive

27Q. Some of the changes in educational methodology, introduced by the _____ philosophy, have been audio-visual aids, laboratory experiences for science students, and emphasis on method of instruction as well as academic preparation.

35A. education

36Q. For example, the education of a physician or an engineer is obviously _____ education.

44A. vocational

45Q. It should be remembered that this distinction between reimbursable and _____ programs is quite arbitrary and is done only for clarification.

CHAPTER TWO

- 10Q. Since vocational education can be defined as preparation for work, we shall deal with the major methods of preparing people for _____ as recommended in Federal programs.
- 13A. experience
- 14Q. The work _____ program is the most general term that we have.
- 26A. vocational
- 27Q. The two elements which are important in a day-trade program and in vocational education are _____ and _____.
- 39A. full-time
- 40Q. Evidence that the apprenticeship program is a vocational program may be shown by the fact that all three elements--_____, _____, and _____ are present in an apprenticeship program.
- 52A. compensated
- 53Q. Therefore, since the majority of these workers are already being compensated, the element most emphasized is training.
- 65A. vocational
- 66Q. The three categories by subject matter of education are _____, _____, and _____.

1A. work

2Q. To illustrate the difference between education and general education, let us consider the industrial arts field.

14A. experience

15Q. For instance, a student may work downtown without compensation from the school and without any particular training, but usually with some school supervision. This would be a work experience program. True or False.

27A. training
supervision

28Q. The last type of instruction provided under the _____ educational acts is the cooperative program.

40A. compensation
training
supervision

41Q. All three elements of a good vocational training program--training, supervision, and compensation, are present in the _____ training program.

53A. full-time

54Q. The range of programs in _____ must be quite wide in order to meet the needs of the people.

66A. liberal
general
vocational

67Q. After the three divisions by subject matter, we have three divisions of education by philosophy, and these are _____, _____, and _____.

- 2A. vocational
- 3Q. Industrial arts education is frequently considered as general education rather than _____ education because of its basic purpose.
- 15A. True
- 16Q. On the other hand, a student may work downtown for compensation from a private employer without any attempt at training or grading or without school supervision. This would also be a work _____ program.
- 28A. vocational
- 29Q. In the cooperative training program, all three elements considered important in vocational education are present. These three are _____, _____, and _____.
- 41A. apprenticeship
- 42Q. The apprenticeship program is separated from the extension program by the fact that all _____ elements are present in the apprenticeship program.
- 54A. extension
- 55Q. The primary consideration in training for workers is that the training be job oriented.
- 67A. academic
progressive
vocational
- 68Q. We have divided vocational education into two arbitrary classifications of _____ and _____.

34A. vocational

- 4Q. Industrial arts is not necessarily preparation for work; it tends to be exploratory and training in appreciation which is general education rather than _____.

16A. experience

- 17Q. Of the three elements usually considered important in a vocational program--compensation, training, and supervision--only one is generally present in a work _____ program.

29A. compensation
training
supervision

- 30Q. In the cooperative program a student attends class during the day, works part time during the day for compensation and is supervised both by the employer and the school. Thus all _____ elements are present.

42A. three

- 43Q. All three elements of vocational education are not necessarily present in an extension program, as they are in an _____.

55A. full-time

- 56Q. Consequently, the types of training offered in _____ are usually job related.

68A. reimbursable
non-reimbursable

- 69Q. The two major types of reimbursable vocational education have been defined as those for _____ youth and _____ workers.

4A. vocational

5Q. Consequently, as part of the program in industrial arts there is a greater tendency toward a laboratory type experience than toward _____ experience.

17A. experience

18Q. In a work-experience program, one of three elements which may be are _____, _____, or _____.

30A. three

31Q. In order of sophistication we might say the vocational education programs go from work-study, to work-experience, to on-the-job, to day trade, to coop. True or False.

43A. apprenticeship

44Q. All three elements--compensation, training, and supervision--may be present in an adult _____ program.

56A. extension

57Q. Not only must the training be job related, but also it must be specific and to the point of the needs of _____ workers are to be met.

9A. in-school
full-time

70Q. The work orientation activities in vocational education for in-school use has been defined as _____, _____, _____, _____, and _____.

5A. work

6Q. It is felt that the laboratory experiences will serve a greater exploratory and appreciation function rather than a _____ training experience.

18A. supervision
training
compensation

19Q. On-the-job training, a type of work experience program, is the next most sophisticated type of _____.

31A. True

32Q. This, then, would summarize the type of vocational _____ for in-school use.

44A. extension

45Q. Adult extension programs in _____ education have an even wider range and variety than the programs for in-school youth.

57A. full-time

58Q. Furthermore, because students are already employed, a great deal of background information may be deleted and the program can be designed for the specific _____ of the workers.

70A. work-study
work-experience
on-the-job training
day-trade
coop

71Q. The two major categories of training for full-time workers have been classified as _____ and _____.

6A. work

- 7Q. Contrasted with the laboratory experience of industrial arts, there are many types of _____ experience programs in vocational education.

19A. vocational

- 20Q. In the on-the-job training, two of the _____ elements required in vocational education are present. These are compensation and supervision.

32A. education

- 33Q. Having reviewed the method by which in-school youth are prepared for _____, let us review the second function of vocational education.

45A. vocational

- 46Q. Programs may range from a simple two hours of instruction in a specific field or to a six-month to one-year training program in an extension program. True or False.

58A. needs

- 59Q. Extension programs vary from a very simple training program for employees to a very complicated program for managers. The primary consideration is that the training _____ of _____ workers be met.

71A. apprenticeship extension

- 72Q. The three major elements in any type of vocational education that distinguish it from general or liberal education have been defined as _____, _____, and _____.

7A. work

8Q. The three major facets to be considered in a vocational program, which train for work, are _____, _____, _____, and an actual on-the-job experience.

20A. three

21Q. In the on-the-job training program the compensation may be partly private and partly Federal, but there is _____.

33A. work

34Q. Not only is vocational education designed to prepare students for work but to upgrade people who are already employed, is one of the objectives of _____ education.

46A. True

47Q. Evidence of the importance of adult programs in _____ education may be shown by the enrollment.

59A. needs
full-time

60Q. In recent years, new types of vocational _____ programs have been added to meet the needs in _____ education.

72A. compensation
training, and
supervision

73Q. By compensation, we mean the student receives money for his work. In other words, he is _____ for working.

- 8A. compensation
supervision
training
- 9Q. The least complicated program would be the work-study program. In the work _____ program, compensation is the primary consideration.
- 21A. compensation
- 22Q. In the on-the-job training program, there may also be a private and public sharing of _____.
- 34A. vocational
- 35Q. In-school youth and full-time workers may be considered as the two types of individuals served by _____ education.
- 47A. vocational
- 48Q. According to Federal enrollment figures, the adult enrollment of overall _____ education is nearly three to one over in-school youth.
- 60A. extension
vocational
- 61Q. These programs may provide extensive training in a residential center with compensation provided by the Government. All three elements in vocational education here are provided for the student. These three elements are: compensation, training, and supervision. True or False.
- 73A. paid
- 74Q. By training, we are referring not only to the fact that instruction is given, but also that this instruction is coordinated with his work activities, thus making a good tie between _____ and work activities.

9A. study

10Q. Under the work study program, a student is permitted to work and he is paid by the school for working in non-profit organizations in the community. In the work _____ program there is no provision for grading or evaluation of the work.

22A. supervision

23Q. In the normal on-the-job training program, however, there is no emphasis on formal _____.

35A. vocational

36Q. Vocational education is designed to train two primary types of people, _____ - youth and _____ - _____ workers.

48A. vocational

49Q. Thus we can see that the _____ service is an important area in vocational education.

61A. True

62Q. These types of adult programs are designed primarily for people who have left school or are out of school and need retraining in order to become _____ - _____ workers.

74A. training

75Q. It is important in training that the formal education be _____ with the work experience.

- 10A. study 11Q. In work study programs, while the element of compensation is present, supervision and training are not present in these work programs.
- 23A. education 24Q. In the day-trade program, as contrasted with the on-the-job training program, the two elements considered important in a _____ education program are training and supervision.
- 36A. in-school full-time 37Q. While the training of _____ - _____ youth is to prepare them to go to work, the training for the _____ worker is primarily designed for upgrading as now defined by law.
- 49A. extension 50Q. Obviously, in serving the needs of so many people, there must be a great variety in _____ programs.
- 62A. full-time 63Q. While these students are not quite meeting the need of _____ employees neither are the in-school youth.
- 75A. coordinated 76Q. This coordination of instruction and work experience is what we will refer to as supervision. True or False.

11A. study

12Q. After the work _____ program, the next most sophisticated program would be entitled a work experience program.

24A. vocational

25Q. The day-trade program, since it is primarily a _____ education program, is very much concerned with training.

37A. in-school
full-time

38Q. For all practical purposes, the two major types of training available to the _____ worker through vocational education are apprenticeship and extension.

50A. extension

51Q. In extension programs, compensation is not as an important element as the people who are already employed. True or False.

63A. full-time

64Q. Because they are definitely not _____ youth, this category of students has been placed in the adult and the _____ divisions.

76A. True

12A. study

13Q. The work _____ program may include compensation, training, and supervision by school authorities, but none of these is necessary for this type of program.

25A. vocational

26Q. In the case of the day-trade program, the student actually learns the skills and performs the skills required in industry under the close supervision of a _____ teacher.

38A. full-time

39Q. The apprenticeship program is designed to increase the efficiency of _____ workers.

51A. True

52Q. The reason for this is that the people, being full-time workers, are already being _____ by their employers.

64A. in-school extension

65Q. To summarize thus far, _____ education is one of the important areas in all education.

CHAPTER THREE

- 1Q. Thomas Jefferson first pointed out that liberal education was undoubtedly fine; nevertheless, a large number of young men needed to learn practical jobs. The Federal government made no significant move for education.
- 13A. trade and industry
- 14Q. Special programs called continuation programs were also designed for _____ youths.
- 26A. agricultural
- 27Q. In review then, vocational training in agriculture was in agriculture rather than occupations.
- 39A. vocational
- 40Q. The primary aim as a result of this act, was the shift toward training in occupations rather than in _____ or _____.
- 52A. philosophy
- 53Q. However, the Vocational Act of 1963 did show that the Federal government had accepted the utility of _____ education and also taken more responsibility for its development.
- 65A. Congress
- 66Q. However, while numerous experimental programs are being tried, it must be noticed that more funds were made available with a traditional education program.

- 1A. vocational
- 2Q. Probably, partly as a result of the need for officers in the Civil War, the Federal government passed the Morrill Act of 1862. These were the first Federal funds in _____.
- 14A. out-of-school
- 15Q. This type of training was similar to the earlier apprenticeship training programs in that these training programs were designed for students that had already quit school and thus were out-of-school youth. True or False.
- 27A. agricultural
- 28Q. Trade and industrial education by its very nature, tended more toward training in the _____ rather than the area.
- 40A. area or services
- 41Q. It was felt by the President's Committee on _____ Education that vocational education had not kept up with the times.
- 53A. vocational
- 54Q. While the Federal government has now accepted responsibility for _____ education, it also chose several experiments and agencies other than the U. S. Office of Education. The U.S. Office of Education, however, has the primary responsibility for _____ education.
- 66A. vocational
- 67Q. The involvement of the _____ government in vocational education is now greater than it has ever been.

- 2A. education
- 3Q. The land-grant colleges were established to offer training in agriculture and mechanical engineering as a form of _____ education.
- 15A. True
- 16Q. While there has been previous training in some classes for adults in both agriculture and home economics, Federal monies were provided for the first time for secondary schools in _____.
- 28A. occupation
- 29Q. Nevertheless, people in trade and industry, were trained generally in the trade skills and not in the facets of management. True or False.
- 41A. Vocational
- 42Q. Thus business education was added to _____ education.
- 54A. vocational
vocational
- 55Q. However, several other forms of preparing people for employment other than traditional _____ education are found in other government agencies. Besides the United States Office of _____ the United States Department of Labor and the Office of Economic Opportunity also have some vocational education programs.
- 67A. Federal
- 68Q. As a result of the Vocational Act of 1963, several entirely new developments are possible in _____ education.

- 3A. vocational
- 4Q. Until the time of the _____ Act of 1862, students at land-grant colleges were also required to take ROTC.
- 16A. home economics
- 17Q. The Smith-Hughes Act of _____ is usually considered as the first major over-all vocational act.
- 29A. True
- 30Q. While in the area of home _____, training was restricted to preparing women to be successful housewives and mothers.
- 42A. vocational
- 43Q. While some provision was made for the office occupations in the Smith-Hughes Act of _____, it was not a separate area but was part of trade and industry.
- 55A. vocational Education
- 56Q. The Job Corps program, for example, is under the Office of Economic _____.
- 68A. 1963 vocational
- 69Q. To begin with, the concept of an area vocational school came into being with the _____ of 1963.

4A. Morrill

5Q. The _____ Act of 1862, which formed _____ colleges, made recognition of the need for vocational and technical education by the Federal government.

17A. 1917

18Q. The _____ Act of _____ provided for vocational training in the areas of agriculture, _____ and _____, and home economics.

30A. economics

31Q. These four service areas--agriculture, trade and industry, home economics and distributive education were then the core of vocational education. True or False.

43A. 1917

44Q. Consequently, the Vocational Act of _____, for the first time, provided specifically for Federal funds for the _____ occupations.

56A. Opportunity

57Q. The Office of _____ has the responsibility for the Job Corps program. While it does have some vocational implications, it is generally not considered as a vocational education act.

69A. Vocational Education Act

70Q. Not only did the concept and ideas of _____ schools come into being but also cross-service training developed.

- 5A. Morrill
land-grant
- 6Q. It was not until 1917 that the next major development in Federal aid to _____ education was made.
- 18A. Smith-Hughes
1917
Trade & industry
- 19Q. The three areas of vocational training started under the Smith-Hughes Act were _____, _____, and _____.
- 31A. True
- 32Q. However, in the early 1960's, partly as a result of the Russian sputnik, changes were made in Federal aid to _____ education. Two new areas of service were added in the early 1960's; these were technical and health services in _____ education.
- 44A. 1963
office
- 45Q. However, while the Vocational Act of 1963 did include another area or _____, at the same time the Federal Office of Education was reorganized along lines other than services or areas.
- 57A. Economic
Opportunity
- 58Q. Likewise the Manpower Development and Training Act, while it is in many respects a vocational training program, is not under the United States Office of _____ as such.
- 70A. area
vocational
- 71Q. By a cross-service program, we would mean a program involving two or more services designed to train in a specific occupation.

6A. vocational

7Q. Under the Smith-Hughes Act of 1917 the _____ government provided funds for the promotion and encouragement of vocational education.

19A. agriculture
trade and industry
home economics

20Q. The Smith-Hughes Act also set up three different types of programs within each service. This training was for in-school youth, continuation programs, and _____.

32A. vocational
vocational

33Q. However, it should be noted that technical education was not particularly a vocational act, but rather was a National Defense Education Act.

45A. service

46Q. Whereas the old Office of Education had been oriented around agriculture, trade and industry, home economics, distributive education and the other areas or services, now the Federal office has changed. True or False.

58A. Education

59Q. The Manpower Development and _____ program is referred to as the office agency program.

71A. no answer

72Q. As an example of a _____ service program we might use agri-business. The _____ - _____ is an example of a cross-service program.

7A. Federal

8Q. The _____ Act provided Federal funds for the promotion and encouragement of education at the secondary level in agriculture, trade and industry, and home economics.

20A. extension

21Q. The three types of instructional programs provided for under the Smith-Hughes Act were _____, _____, and _____.

33A. education

34Q. But the NDEA Act did provide for training in _____ education and the responsibility for this technical education was given to vocational education at the same time health services were recognized.

46A. True

47Q. This reorganization of the United States Office away from area or service lines represents probably the most important change in the philosophy of _____ education.

59A. Training

60Q. The MDTA in its full name is known as the Manpower Development and Training Act. True or False.

72A. cross
agri-business

73Q. In an _____ program, two services such as distribution and agriculture, might be involved in the training for an occupation.

8A. Smith-Hughes

9Q. It is believed by some people that during times of national emergencies, such as wars, the usefulness of _____ education is demonstrated.

21A. in-school continuation extension

22Q. The Federal government passed no more significant legislation until the George-Deen Act of 1936, when provision was made for distributive education and cooperative programs in _____ education.

34A. vocational

35Q. Consequently, under a special act, training for practical nurses in _____ education was provided for under the umbrella of vocational education.

47A. vocational

48Q. It is highly probable that the Congress of the United States, while admitting the desirability of _____ education, felt that the 1963 act was in need of revision.

60A. True

61Q. The _____ and _____ Act is known as the MDTA.

73A. agri-business

74Q. The philosophy of the _____ Act of 1963 is reflected in the fact that the training in such a program is for a specific occupation.

- 9A. vocational 10Q. The Smith-Hughes Act provided for three basic types of _____ education.
- 22A. vocational 23Q. The passage of the George-Deen Act in _____ established vocational training in distributive education.
- 35A. health 36Q. The primary program in _____ education was education for practical nurses.
- 48A. vocational 49Q. In other words, the idea of education was accepted as worthwhile, useful, and necessary; but the methods of doing this education were not judged satisfactory.
- 61A. Manpower Training and Development Act 62Q. Traditionally, vocational education has been designed to prepare the normal person with average difficulties in preparation for _____.
- 74A. Vocational Education 75Q. Training for an occupation which would be services rather than training in the _____ is new to the 1963 picture.

10A. vocational

11Q. The three types of training were for in-school youth, further training for out-of-school youth, and training for adults known as _____.

23A. 1936

24Q. The Federal pattern of reimbursement by areas for services has been established in _____ education.

36A. health

37Q. However, in the early sixties, vocational education was re-examined by the President's Committee for Vocational _____.

49A. vocational

50Q. As a result of the Vocational _____ of _____, several significant changes in philosophy were introduced by the Federal government.

62A. work

63Q. In the case of some of these programs such as the Manpower Development and Training Act as well as the _____, we are dealing with people who have unusual hardships.

75A. services

76Q. The two major changes in thinking introduced by the Vocational Act of 1963 were the tendency to de-emphasize the services and provide for training in occupations. True or False.

11A. extension

- 12Q. In the case of in-school youth, shops and training facilities were provided for students in trade and industry and home economics.

24A. vocational

- 25Q. By services and areas, we mean such things as agriculture, trade & industry, home economics, and _____.

37A. Education

- 38Q. As a result of the President's _____ on _____ Education, the Vocational Act of 1963 was introduced and passed.

50A. Act
1963

- 51Q. Particularly the Vocational Act of 1963 encouraged experimentation and development of new designs in _____ education.

63A. Job Corps

- 64Q. Again it is probable that the separation of some _____ education into various agencies is a reflection of the fact that Congress was not sure that the methods in _____ education were necessarily proven.

76A. True

12A. no answer

13Q. In addition to shops and training facilities for students in home economics, and _____ and _____, further provision was made for equipment and materials in agricultural secondary training.

25A. distributive education

26Q. The policy of reimbursing for training in agriculture rather than _____ occupations was now established.

38A. Committee Vocational

39Q. The Vocational Act of 1963, which is the present major _____ education act, is considerably different from the previous acts.

51A. vocational

52Q. These changes, as a result of change in _____, will be discussed specifically in the areas where they are important later in the manual.

64A. vocational vocational

65Q. As a result of wanting to try for experimentation in vocational education, the _____ apparently decided to experiment with different agency approaches to unemployment.

CHAPTER FOUR

- 1Q. By areas or services in vocational education, we are referring primarily to early established areas of agriculture, trade and industry, home economics, distributive education, and now _____.
- 8A. tillage of the soil and the care of domestic animals 9Q. After agriculture, the second major area in vocational education is _____ economics.
- 16A. woman 17Q. The new definition of home economics then might well be those skills and knowledges required for the _____ of children and the _____ of the home, as well as the use or sale of those services in the business world.
- 24A. education, services areas, trade, industrial 25Q. One of the old classical definitions, which has also changed in recent years, is that of commercial _____.
- 32A. commercial distributive 33Q. Distributive education is primarily concerned with training in the skills and knowledges required in the _____ process.
- 40A. technical 41Q. Along with the growth of knowledge in all areas, medical science has also advanced and as this happened, _____ education found it necessary to move into the health occupations.

- 1A. business education
- 2Q. The areas or services in vocational education have always been a part of vocational education and are found in the first Federal act, the _____ Act of 1862.
- 9A. home
- 10Q. Home economics is defined as the acquisition of the skills and knowledges required in the rearing of a family and the _____ of a home.
- 17A. rearing management
- 18Q. Furthermore, as more of the _____ making skills have become commercialized and are being done outside the home, these skills have an application in the business world.
- 25A. education
- 26Q. Commercial education was initially defined as training in those skills and areas used in the business and recording of business transactions. True or False.
- 33A. marketing
- 34Q. In this respect, _____ education is quite different from business education in that _____ education deals primarily with the processes of distributing goods.
- 41A. vocational
- 42Q. And so, today, we have a separate division in the vocational field known as _____ occupations.

2A. Morrill

- 3Q. With the Smith-Hughes Act in 1917 following the _____ Act in 1862, three primary areas or services were added. These areas or _____ added were agriculture, trade and industry, and home economics.

10A. management

- 11Q. Home economics then is defined as those _____ and _____ required in the _____ of children and the _____ of the home.

18A. home

- 19Q. Therefore, home economics under the Vocational Education Act of 1963 is now required to devote 10 per cent of its industry to training for _____ outside of the _____.

26A. True

- 27Q. While this definition might still be true of education, _____ education has now been divided into at least two major categories.

34A. distributive
commercial

- 35Q. In this respect, also, _____ education is more restricted in these areas than is business education.

42A. health

- 3A. Morrill services
- 4Q. However, the idea of an area or _____ really started with the _____ Act of 1862.
- 11A. skills and knowledges rearing management
- 12Q. This definition, however, is more classical than modern; therefore, as reviewed, _____ and _____ required in the _____ of children and the _____ of the home, we find it no longer completely fits.
- 19A. work home
- 20Q. Consequently, home economics today not only has the skills and knowledges required in the home for subject matter, but also has some of those home skills which have been commercialized, such as the cooking and serving of food in _____ establishments.
- 27A. commercial
- 28Q. That phase of commercial education, which deals with the recording and processing of data and information about _____ processes is known as _____ education.
- 35A. distributive
- 36Q. For example, there is a great deal of business communication involved in the manufacturing process itself. True or False.

- 4A. service
Morrill
- 5Q. The service of _____ has been defined as those knowledges or skills which are necessary for the tillage of the soil and the care of domestic animals.
- 12A. skills
knowledges
rearing
management
- 13Q. The classical definition of home economics was that it was the _____ in required in the rearing of _____ and the managemert of the _____.
- 20A. commercial
- 21Q. Having discussed agriculture and home economics, let us now turn to trade and industrial _____.
- 28A. commercial
business
- 29Q. _____ education deals primarily with processes of communication in business rather than with business itself.
- 36A. True
- 37Q. The need to file blueprints, to communicate about blueprints, to pass the work along in the factory with work orders, etc., are all business. _____ and _____ education subjects.

- 5A. agriculture
- 6Q. Agriculture, then, is defined as those _____ which are necessary to the _____ of the soil and the _____ of domestic animals.
- 13A. knowledges and skills children home
- 14Q. However, with the advent of the factory system and the industrial revolution, women have more and more been employed outside of the _____.
- 21A. education
- 22Q. Trade and industrial education has been defined as the skills and knowledges used in the making and manufacturing process, as well as the traditional building trades; it will be referred to as trade and industrial _____.
- 29A. business
- 30Q. Business education consists primarily of typing, shorthand, and bookkeeping or accounting. All of these processes are forms of business communication. True or False.
- 37A. communication business
- 38Q. Also, with the further development of _____ and _____ education, certain skills and knowledges became so refined that they became technical.

- 6A. knowledge and
skills
tillage
care
- 7Q. In this respect, agriculture is one of the
oldest areas of _____ education.
- 14A. home
- 15Q. For example, in the state of Kansas, at this
time, one out of every three workers is a
woman. Therefore, it seems that training is
a major occupational need for women outside
of the home. True or False.
- 22A. education
- 23Q. Examples of _____ and _____
education programs would be such things as
auto mechanics, machine shop, sheet metal
work, machinists, carpentry, and other skills
used in industry.
- 30A. True
- 31Q. With the tremendous growth in the need for
_____ within the commercial world,
_____ education has expanded
tremendously.
- 38A. trade
industrial
- 39Q. This is, of course, merely an extension
of the process of the division of labor which
originally made _____ and _____
education necessary.

7A. vocational

8Q. In vocational education, agriculture is defined as dealing with knowledges and skills necessary for the _____.

15A. True

16Q. Today home economics realizes the necessity for training the modern _____ for work outside of the home.

23A. trade
industrial

24Q. Trade and industrial _____ refers to those _____ and _____ used in the process of manufacturing and industrial processing. This is known as _____ and _____ education.

31A. communication
business

32Q. Along with the growth of communication in business has come the need for a greater knowledge of the distribution and marketing of products. This new form of _____ education is now known as _____ education.

39A. trade
industrial

40Q. Thus, some jobs in trade and industrial education, as the industrial revolution progressed, became more advanced and are known today as _____ education.

CHAPTER FIVE

- 1Q. Since the fundamental principle of vocational education is preparing for _____, this affects the method of instruction.
- 8A. doing
- 9Q. Not only is the ability to perform important in vocational education, but also this performance must be a commercially accepted _____.
- 16A. preparation
- 17Q. The preparation of the learner is the important _____ step in the four-step method.
- 24A. application
- 25Q. After the instructor has demonstrated, the student is then expected to do. This is the doing portion of _____.
- 22A. learned
- 33Q. The four-step method of instruction is considered one of the basic methods of _____ instruction.
- 40A. work
- 41Q. Also, with the shortening of work experience for the student's laboratory, equipment may be more necessary as _____ are used more.

- 1A. gainful employment
- 2Q. The guideline for _____
is "learning by doing."
- 9A. performance
- 10Q. For example, if five minutes is commercially accepted time for writing a showcard, the students should be able to _____ the task in five minutes.
- 17A. first
- 18Q. The second step in the _____
method is presentation.
- 25A. application
- 26Q. After the application step has been performed, he should then repeat the task and explain what he has done to the instructor.
- 33A. vocational
- 34Q. The four-step method is particularly effective where the test of instruction is performance.
True or False.
- 41A. projects
- 42Q. With more laboratory equipment, the instructor will need more confidence in the operation of _____.

2A. vocational education

3Q. And, since one of the best tests of vocational instruction is on-the-job performance, _____ by doing is important.

10A. perform

11Q. It is this work orientation and preparation for gainful employment that affects _____ instruction.

18A. four-step

19Q. By _____, we mean a demonstration of what the student is to learn.

26A. no answer

27Q. This doing and telling are the two substeps in the third or _____ step.

34A. True

35Q. Consequently, this method is particularly well adapted to _____ education.

42A. equipment

43Q. Therefore, the project method should result in more use of the _____ method.

3A. learning

4Q. Therefore, since vocational education has a more limited objective than general or liberal education, "learning by _____" is a good criteria for instruction.

11A. vocational

12Q. Because of this work orientation, instruction must result in this _____.

19A. presentation

20Q. This demonstration is most important in the second or _____ step.

27A. application

28Q. After the student has performed the task and has told the instructor what he has done, the application step is completed. True or False.

35A. vocational

36Q. Where the project method is substituted for work experience, the _____ method is even more valuable.

43A. four-step

2

- 4A. doing 5Q. To illustrate this point, you can teach a student to type and the measure of achievement is _____.
- 12A. performance 13Q. Consequently, more machinery and equipment will be required in this _____ instruction than in other forms.
- 20A. presentation 21Q. The second step in the four-step method is _____.
- 28A. True 29Q. Thus, the application step is broken into two substeps which are _____ and _____.
- 36A. four-step 37Q. The _____, in order to be effective, should result in the student's performing in some fashion.

- 5A. performance 6Q. In the study of history you cannot have the students start a revolution, so "by doing" does not particularly apply.
- 13A. vocational 14Q. In the state of Kansas the four-step method of instruction has been selected because it aids in achieving _____.
- 21A. presentation 22Q. After _____ comes the step known as application.
- 29A. doing telling 30Q. After the _____ step, we have the follow-up.
- 37A. project 38Q. This _____ may be in the form of task completion or test answers.

6A. learning

7Q. In liberal arts courses, as a rule, the learning is about the thing and not _____ the thing.

14A. performance

15Q. The first step is preparation of the learner in the four-step method. True or False.

22A. presentation

23Q. This step, known as _____, may be broken into two substeps.

30A. application

31Q. The fourth step in the four-step method of instruction is known as _____.

38A. performance

39Q. But satisfactory performance will probably depend on the use of some variation of the _____ method.

7A. doing

8Q. Whereas in vocational education, the emphasis should be on _____.

15A. True

16Q. By preparing the learner, we mean giving him something of the "why" in preparing him for learning. This is the _____ step.

23A. application

24Q. The substeps of doing and telling are part of the _____.

31A. follow-up

32Q. The follow-up consists of checking on the performance of the student shortly after he has shown he has _____ the task.

39A. four-step

40Q. Obviously, the projects will make the work experience of a coordinator more valuable, since the _____ experience of the student may be shortened.

CHAPTER SIX

- 1Q. Among the principles of _____ education, the cardinal principle is training for gainful employment.

10A. specific

11Q. As a result of the requirements for _____ knowledge for success in work, vocational education relies upon job analysis.

20A. general

21Q. This individualism of _____ is essential to good vocational education.

30A. True

31Q. This is because typing is now a useful skill for many people who do not earn their living by _____.

40A. directly

41Q. The directly related instruction is instruction given in specific knowledge and skills related to the student's _____.

50A. instructor

51Q. Since the real test of vocational education is in performance, an instructor without work experience could not judge well the _____ of the students.

1A. vocational

2Q. That this is the _____ principle of vocational education should be obvious by observation.

11A. specific

12Q. Job analysis is a method of securing _____ information about a job.

21A. instruction

22Q. Because the job and places of work of the students vary greatly, instruction must be individualized. True or False.

31A. typing

32Q. It can be easily seen that the line between vocational and _____ education can become quite thin.

41A. job

42Q. Generally related instruction refers to that instruction which is useful to all _____.

51A. performance

52Q. In summary, the cardinal principle of vocational education is that it should be _____ oriented.

2A. cardinal

3Q. After all, if vocational training is training for _____ employment, then the training must be work oriented.

12A. specific

13Q. Therefore, one of the most important tools in determining how to teach in vocational education is job _____.

22A. True

23Q. The most useful check on whether or not the instruction is meeting the needs of the student on the job is provided by the _____.

32A. general

33Q. Frequently, the test of _____ education is usage after the student leaves school.

42A. workers

43Q. However, generally related instruction should be more useful to workers than _____.

52A. work

53Q. As a result of this work orientation, the best test of vocational education is on the job.

3A. gainful

4Q. As a result of this _____ or job orientation, vocational education differs fundamentally from general or liberal education.

13A. analysis

14Q. Job analysis is a method of breaking a teacher's job into a series of small specific tasks. True or False.

23A. coordinator

24Q. Coordination is the method by which _____ in the school and the work experience are related to each other.

33A. vocational

34Q. For a girl who takes typing and never uses it to make a living, typing is _____ education.

43A. non-workers

44Q. Another principle of vocational education is the requirement of _____ experience for the teacher.

53A. performance

54Q. Because of this test of performance, vocational education must be _____.

14A. work

5Q. As a result of the _____ orientation of vocational education, the training tends to be specific rather than general.

14A. True

15Q. Furthermore, as a result of the work orientation of _____ education, the training should be tested by performance.

24A. instruction

25Q. Although vocational education must be _____ to meet student and job needs, some instruction can be general.

34A. general

35Q. For a girl who takes typing and uses it in her work, typing is _____ education.

44A. work

45Q. The reason for this is that the instruction given should be _____ oriented.

54A. individualized

55Q. However, since not all instruction is individual, there is room for _____ instruction.

5A. work

6Q. In order to do a job, one must know the _____, not generalities.

15A. vocational

16Q. The student's learning in vocational education should be tested by a _____ on the job.

25A. individualized

26Q. The criteria for _____ instruction is that this instruction should be more useful for a worker than a non-worker in this field.

35A. vocational

36Q. Because of the need for both _____ and specific information, vocational courses usually are divided into two sections.

45A. job

46Q. If the instructor has not worked, he will have difficulty in job orienting for instruction. True or False.

55A. general

56Q. The criteria for general instruction in vocational education is that it must be more useful to a worker than a _____.

6A. specifics

7Q. For example, I know generally how an automobile works.

16A. performance

17Q. For this reason, it is important that the school instruction and the job _____ be coordinated.

26A. individualized

27Q. For example, we would admit that income tax is useful for all _____.

36A. general

37Q. These two sections are referred to as generally related and directly _____.

46A. True

47Q. There are many problems in human relations as well as job techniques that the _____ must know from experience.

56A. non-worker

57Q. As a result of the need for both individual and general instruction, vocational classes are divided into two sections, _____ related and _____ related.

7A. no answer

8Q. But, I do not know _____ how to time the motor.

17A. performance

18Q. If this _____ is not present, the validity of the instruction is not checked.

27A. workers

28Q. And, consequently, if income tax was not taught in other classes, it would be a legitimate subject for _____ education.

37A. related

38Q. Generally related instruction refers to information _____ useful to all workers in this area.

47A. instructor

48Q. There is a great difference between doing a task and talking about it. Therefore, the _____ should have done the job.

57A. generally directly

58Q. In order that the student's performance on the job may be properly judged, the coordinator should have work experience. True or False.

8A. specifically

9Q. Therefore, my _____ knowledge is useless in terms of work.

18A. coordination

19Q. Therefore, it is important that the coordinator base his courses and observations on the _____ of the student.

28A. vocational

29Q. However, life insurance is useful for all people and is probably general rather than education.

38A. generally

39Q. Directly related _____ refers to the specific knowledge and skill used on the student's individual job.

48A. instructor

49Q. If the instructor has not worked, he may not realize all the problems of a _____.

58A. True

- 9A. general 10Q. Consequently, I cannot work as a mechanic because I do not have the _____ knowledge.
- 19A. performance 20Q. As a further result of the work orientation of vocational education, instruction must be more individualized than in _____ or liberal education.
- 29A. vocational 30Q. Typing, which was once obviously a vocational subject, may be becoming general education. True or False.
- 39A. instruction 40Q. The two sections in vocational classes are generally related and _____ related.
- 49A. worker 50Q. If he has not worked, the _____ may talk about the job and not about the performance.

CHAPTER SEVEN

- 1Q. The breakdown of areas or _____ was quite satisfactory in simpler times.
- 8A. World War
- 9Q. Also, the real effects of scientific management were not really felt until after the _____.
- 16A. machine
- 17Q. Consequently, the training time for the traditional _____ has been greatly reduced.
- 24A. vocational education
- 25Q. This tremendous growth in knowledge has resulted in workers who need a higher degree of _____ than was previously needed.
- 32A. skill
- 33Q. For example, it is easier to learn to _____ a fairly nice looking letter than to write the old copper plate written letter of the business world of 1890.
- 40A. occupation
- 41Q. In conclusion, then, we still have broad service areas such as _____, trade and industrial education, and distributive education. We have also added _____ and _____ areas.

1A. services

2Q. The Vocational Education Act of _____ represents the change in education required by the change in the world of work.

9A. World War

10Q. Not only were these effects to develop rather slowly in industry, but the effect of scientific management was also developed much more slowly in _____.

17A. machinist

18Q. However, while the skills of the machinist have declined, the skills of the business factory organizer have increased; and consequently, we have a greater degree of knowledge required of _____.

25A. knowledge

26Q. A sample of the new types of _____ in business education would be knowledge associated with the computer.

33A. type

34Q. Also, it is highly probable from the standpoint of skill that it is easier to punch a posting machine than to write beautifully hand-written entries in the records of _____.

41A. agriculture
technical
health

42Q. We must expect, however, that the further development in vocational education at the thirteenth and fourteenth year will be more oriented toward _____.

2A. 1963

3Q. At the time of the passage of the Morrill Act in _____, the primary occupation of the majority of the people in the United States was either in a _____ or closely related to a _____.

10A. vocational education

11Q. However, _____ management was to have a revolutionary effect upon occupations in the United States.

18A. skills

19Q. To a certain degree, this same thing is true in the field of office or _____ education.

26A. knowledge

27Q. While there has been a tremendous increase of _____ in the business field, there has also been a decline in the degree of skill.

34A. accounts

35Q. While the need for s _____ then have been declining, the knowledges required to replace skills have been growing.

42A. occupation

43Q. For example, in distributive _____ today, we see area vocational schools training in petroleum marketing, fashion merchandising, and hardware stores.

3A. 1862

4Q. And, consequently, _____ itself was rather simple compared to modern technical _____.

11A. scientific

12Q. The business of _____ is a logical development of the division of labor mentioned by Adam Smith.

19A. business

20Q. There are many clerical workers who neither _____ nor take _____.

27A. knowledge

28Q. For example, the advent of dictating machines has tended to reduce the number of people who would otherwise use shorthand, which is a high _____.

35A. skills

36Q. This was recognized in the Vocational Act of 1963, in that it was decided to put an emphasis on the occupation rather than on the area or _____.

43A. education

44Q. In the field of business or office education, we will expect to see thirteenth and fourteenth year programs specializing in medical secretary, legal secretary, etc. True or False.

- 4A. agriculture
agriculture
- 5Q. With the Smith-Hughes Act of _____, we can see that already the need for workers in areas other than _____ was being recognized.
- 12A. scientific
management
- 13Q. And it has been the effect of the division of labor as well as _____ which has resulted in the great changes in _____.
- 20A. type
shorthand
- 21Q. While the number of these people has increased appreciably, their percentage as a part of the office or _____ labor force has declined.
- 28A. skill
- 29Q. It is quite probable that the keypunch is an operation requiring less real _____ than does the operation of a calculating machine.
- 36A. service
- 37Q. Agriculture, for example, is a field that is too wide and diversified to be treated as a single _____.
- 44A. True

- 5A. 1917
agriculture
- 6Q. However, it was also in this period of World War I industrial expansion that many new techniques in the organization and management of _____ were becoming most effective.
- 13A. scientific
management
vocational
education
- 14Q. In the past it was customary for a worker to learn a considerable number of skills involved in a single occupation, now the number of _____ has declined.
- 21A. business
