The Patuxent River is one of the few rivers entering Chesapeake Bay that presently is more or less free from cultural influences. In the near future rapid change is expected to result from urbanization in the upper basin and operation of a large generating plant at Chalk Point, which will significantly alter the temperature of the water in that vicinity. At times the heated water released into the estuary will be equal to or greater than the fresh water inflow.

The objective of this project is to understand the effects of such release in the physical, chemical, and biological character of a tidal river by studying the yearly and seasonal attachment, rates of growth and mortality of attached organisms, and associated physical factors, including salinity. Interrelations between the environment and aquatic biota will be determined for the normal hydrologic condition and the heated condition over a period of about two years for each.

### 6.0146, DEMONSTRATION OF THE LIMITATIONS AND EFFECTS OF WASTE DISPOSAL ON AN OCEAN SHELF

*R.F. MCALLISTER*, Florida Atlantic University, Graduate School, Boca Raton, Florida

The purpose of this project is to learn the existing ecological regimen of an area subject to waste injection, and the effect of waste injection on an ocean shelf through a combined oceanographic and biological survey. It is further intended to learn how, by knowledge of local currents, to optimize the location of sewage outfalls. Studies will include the analysis of water and bottom samples and classification of the fauna and flora.

### 6.0147, PESTICIDE MONITORING PROGRAM

*P.A. BUTLER*, U.S. Dept. of Interior, Biological Laboratory, Sabine Island - Gulf Breeze, Florida

Cooperative program involving 15 private, state and federal laboratories who collect duplicate samples of mollusks from approximately 175 estuarine stations on Atlantic, Gulf and Pacific coasts at monthly intervals. Program initiated 1965, proposed to continue until 1969; 1500 analyses completed September 1965. Samples are sent to the Gulf Breeze Laboratory for pesticide residue analysis. Eastern oyster is chief bioassay animal, also used *Mya arenaria*, *Mercenaria mercenaria*, *Ostrea luria*, *Crassostrea gigas* and some fish species. Each sample is screened for Aldrin, BHC, Dieldrin, DDD, DDE, DDT, Endrin, Heptachlor, Heptachlor epoxide, Lindane and Methoxychlor. Analyses are made with electron capture gas-liquid chromatography techniques.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 6.0148, PESTICIDE KINETICS

*C.W. MILLER*, U.S. Dept. of Interior, Biological Laboratory, Sabine Island - Gulf Breeze, Florida

Investigate, under field conditions, the occurrence and distribution of insecticides in tidal areas associated with an estuary. Samples of water, soil and selected biota will be collected immediately prior to application of the test material to establish a base line indicative of previous commercial treatments. The persistence, localization and possible degradation of the test chemicals will be followed.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 6.0149, CHEMICAL ANALYSES

*A.J. WILSON*, U.S. Dept. of Interior, Biological Laboratory, Sabine Island - Gulf Breeze, Florida

In order to evaluate data now being obtained by a nationwide surveillance of organochlorine pesticide pollution in estuaries, studies are in progress to determine rates of uptake and the metabolism of these pollutants in marine species.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 6.0150, BACTERIOLOGICAL STUDY OF THE POLLUTION OF KANEHOE BAY, OAHU

*K.R. GUNDERSEN*, Univ. of Hawaii, Water Resources Research Ctr., Honolulu, Hawaii 96822

A comprehensive study of coliform distribution and other indicator bacteria of sewage origin will be made of the water in Kaneohe Bay, Oahu, Hawaii including hydrological and meteorological observations.

Six sites near sewage outfalls and in the Bay will be sampled at two water depths and of the bottom deposit. Sewage just prior to disposal will also be sampled. All liquid samples will be collected at least weekly and with aseptic technique. Liquid bottom samples will be analyzed for coliforms 35 degrees C, thermostable 45 degrees C, enterococci 35 degrees C and total count 25 degrees C. Prior to sampling, air and water temperatures, wind direction and speed, cloudiness, rainfall, water turbidity will be measured.

This study is expected to provide the much needed data for determining the degree of sewage treatment required and for a planned study of the bacterial involvement in the transformations of inorganic nitrogen and sulfur compounds in the Bay.

Technological Objectives - The hydrogen ion activity (ph) is an important parameter in chemical and biological processes. Over the years a pH scale in water has been developed at the National Bureau of Standards augmented by a series of standard reference materials. As work is extended to other systems (deuterium oxide, sea water, non-aqueous solvents) a parallel activity scale and a series of standard

oceanography has made the development of a pH scale in sea water most pressing. The present work at NBS to define a pH scale in sea water and develop standard reference materials will fill the need in this area.

Approach - A 'standard' sea water for this work is being developed and a pH scale is being defined in this medium. Accompanying this is a study of the deviations in pH with changes in salinity. Once the of defining standard reference materials.

**6.0151, ECONOMIC ANALYSIS OF THE MARKET STRUCTURE OF THE COMMERCIAL FISHING INDUSTRY IN THE NORTHEAST**

*C. YEH*, Univ. of Maine, Agricultural Experiment Sta., Orono, Maine 04473

Objectives: 1) To determine the product flow and existing characteristics of the commercial fishing industry and its relative importance in the Northeast, 2) To analyze the dynamic aspects of the supply and demand situation for the major species of finned fish and shellfish of the Northeast, and 3) To assess implication of potential changes in the market structure and its performance on the fishing industry, poultry and livestock producers and consumers.

Description: The Delaware station will concentrate primarily on studying menhaden and other fish used in animal feeds. The first procedural step will require the compilation of data related to the distribution of menhaden fish including the primary markets, marketing channels and product use by poultry and livestock.

Estimates of supply and demand parameters for menhaden fish will be obtained. Statistical procedures including linear programming and single equation regression models will be used to evaluate the relationship of fish meal to poultry and livestock production.

**6.0152, EFFECTS OF THERMAL POLLUTION ON PRODUCTIVITY AND STABILITY OF ESTUARINE COMMUNITIES**

*J.A. MIHURSKY*, Univ. of Maryland, Natural Resources Institute, College Park, Maryland

A multidisciplinary investigation is proposed to study thermal pollution of an estuarine community. Laboratory studies of behavioral, metabolic and growth responses to heat stress will be integrated with field experiments to evaluate the overall impact of thermal pollution on an estuarine ecosystem.

Specifically, the laboratory phase will study representative species from the phytoplankton and planktonic herbivores. Growth of algae and intrinsic rates of increase of copepod populations will be used to evaluate thermal stress separately and when other environmental components are varied. At the same time, survival, behavior and metabolism of vertebrates and macro-invertebrates will be measured in gradients of temperature and salinity.

Field experiments will determine the influence of heat pollution on several trophic levels. Rates of mortality, biomass turnover or production and energy flow will be used to evaluate the impact of pollution. An ideal field situation has been provided by the newly constructed electrical generating plant at Chalk Point on the Patuxent river estuary.

The field experiments may be divided into those which test the direct effect of the passage of a part of the estuary through the power plant. The indirect effect of effluent water on the planktonic community adjacent to the power plant may be determined by correlation and comparison with pre-existing patterns of biomass, production and species structure of the plankton. Similarly, pre-pollution-phase measurements of vertebrate and macro-invertebrate standing stocks may be correlated and compared with those existing under thermal pollution.

**6. PUBLIC HEALTH AND SAFETY**

**6.0153, IMPACT AND FATE OF POLLUTION IN ESTUARIAL WATERS**

*C.F. COLE*, Univ. of Massachusetts, School of Agriculture, Amherst, Massachusetts 01003

The project is a comprehensive, long-range study of Massachusetts estuaries to determine the origin, character, distribution, influence and fate of ionic, molecular, colloidal and suspended pollutants reaching the estuary and to examine ways in which natural tidal flushing action may be improved. The initial phase of this broad program involves the effects and ultimate fate of pesticides used for cranberry culture on land draining into the Wewantic estuary on the southern shore of Cape Cod. These studies are directed to the following: 1. Bio-degradability of selected pesticides. 2. Influence of pesticides and other environmental variables on the fish population of Wewantic estuary. 3. Adsorption of pesticides on representative soils and the ultimate fate of these adsorbed pesticides reaching the water resource on silt particles.

**6.0154, RATES OF PESTICIDE BUILDUP IN SALMONIDS RECENTLY INTRODUCED IN THE GREAT LAKES**

*R. REINERT*, U.S. Dept. of Interior, Biological Laboratory, Ann Arbor, Michigan

A program to follow the buildup of insecticides in lake trout and coho salmon that have recently been introduced into Lakes Michigan and Superior. The eggs and fry will be studied before the fishes are introduced into the lakes and then as these populations develop they will be sampled periodically. When the fishes reach maturity their eggs and progeny will be examined for insecticide levels.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

**6.0155, MECHANISMS OF PESTICIDE ACCUMULATION IN AQUATIC ORGANISMS**

*R. REINERT*, U.S. Dept. of Interior, Biological Laboratory, Ann Arbor, Michigan

A laboratory program designed to compare the relative importance which direct uptake of insecticides from water and biological magnification via the food chain have on the buildup of chlorinated hydrocarbon insecticides in aquatic communities.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

**6.0156, COMPOSITION OF LEAD HALIDE POLLUTION AEROSOLS**

*J.W. WINCHESTER*, Univ. of Michigan, School of Engineering, Ann Arbor, Michigan

It is proposed to determine the relative composition of aerosol particles over the range of radius 0.2 to 10 microns with respect to lead, chlorine, bromine, and iodine. In urban areas pollution sources are probably significant for all these elements, but in the natural atmosphere substantial amounts of chlorine, bromine, and iodine come from the sea. Sampling of atmospheric particles is done by means of a cascade impactor, and analysis for these elements is carried out using anodic stripping voltammetry for lead and neutron activation for the halogens. Initial results have indicated distinctive particle size distribution patterns for each of the four elements, and these patterns are interpreted in terms of the source of the particles and chemical reactions in the atmosphere involving oxidation, volatilization, and condensation. Sampling and analysis are planned to reveal the details of the interrelationships among these processes.

**6.0157, GREAT LAKES RESEARCH - SPOIL DISPOSAL EFFECTS**

*A.P. PINSACK*, U.S. Army, Lake Survey, Detroit, Michigan 48226

Physical, chemical and biological factors within the water mass and associated solid material which can be related to dredging and disposal of spoil material are being investigated in

## 6. PUBLIC HEALTH AND SAFETY

order to determine effects of this material on characteristics of the lakes. The study will examine changes in water characteristics, dispersion rates, and areal extent; changes in nature of bottom sediments from dumping and dredging and degree to which characteristics of these sediments are improved; and different effects of various dredging techniques on pollution.

Field investigations during 1967 centered on eleven selected rivers, harbors, and open water and diked disposal areas of different basic types in Lakes Erie, Huron, and Michigan. Inasmuch as data on actual levels of pollution which can be traced to various kinds of dredging is lacking, each area was studied before, during, and for a significant period after dredging and disposal of spoil material.

Interim reports for each study area are being prepared and a comprehensive report is scheduled for completion in 1968.

### 6.0158, LAKE MICHIGAN CHEMICAL CONTROL OF SEA LAMPREY

*W.E. GAYLORD*, U.S. Dept. of Interior, Biological Station, *Lundington, Michigan*

The Bureau of Commercial Fisheries, under the direction of the Great Lakes Fishery Commission, is using selective larvicides as an experimental method of control for sea lampreys in Lake Michigan. The study is designed to eliminate all generations present in the streams tributary to the lake by treatment of these streams with chemical, and to determine if such action will control effectively the parasitism on lake trout and other fish.

The control method requires a thorough knowledge of: the presence and distribution of ammocete populations in tributaries; physical characteristics and flow data of infected streams, accurate bioassays and chemical analyses of the water; precise metering of the chemicals; and posttreatment surveys to measure and analyze the effectiveness of individual treatments.

A total of 99 Lake Michigan streams contain sea lampreys. All streams were treated by July 1966. Treatments since then have been repeated at approximately 4-year intervals or at intervals determined from observations on the rate of reestablishment and growth of sea lampreys.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 6.0159, LAKE HURON CHEMICAL CONTROL

*B.R. SMITH*, U.S. Dept. of Interior, Biological Station, *Marquette, Michigan*

The Bureau of Commercial Fisheries, under the direction of the Great Lakes Fishery Commission, is using selective larvicides as an experimental method of control for sea lampreys in Lake Huron. The study is designed to eliminate all generations present in the streams tributary to the lake by treatment of these streams with chemical, and to determine if such action will control effectively the parasitism on lake trout and other fish.

The control method requires a thorough knowledge of; the presence and distribution of ammocete populations in tributaries; physical characteristics and flow data of infected streams, accurate bioassays and chemical analyses of the water; precise metering of the chemicals; and posttreatment surveys to measure and analyze the effectiveness of individual treatment.

There are 48 tributaries along the U. S. shore of Lake Huron known to contain sea lampreys. Three of these were treated in 1962. Treatments in this area were resumed in 1966 and 18 streams were treated.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 6.0160, A STUDY OF THE OPEN WATER DISTRIBUTION AND ABUNDANCE OF NET-PLANKTON AS AN INDEX OF EUTROPHICATION IN LAKE SUPERIOR

*T.A. OLSON*, Univ. of Minnesota, School of Public Health, *Minneapolis, Minnesota 55455*

This research is aimed at applying the Continuous Plankton Recorder Techniques of Hardy to non-oceanic situation, namely Lake Superior. Hardy recorders were designed for marine work and can be towed behind merchant vessels and other commercial

craft proceeding at their normal cruising speeds. During these tows, a band of silk bolting cloth is automatically fed across a tunnel-opening to collect organisms from the water. Under highly efficient filtering conditions, three cubic meters or 3000 liters of water are strained over each ten-mile section of the course and organisms in the catch are deposited in a chronological order on the moving band. After exposure the band is covered by another layer of silk to hold the organisms in place and the two bands are then tightly rolled up in a small tank of formalin preservative. At the end of each 500-mile run the roll is removed from its chamber and shipped to the laboratory where a count is made of the organisms. The zooplankters (herbivores) which make up the second trophic level of the ecological pyramid can be accepted as a reflection of the primary production and therefore as an expression of the state of fertility or quality of the water being studied.

Because such large areas can be covered and each mile traversed can be associated with a definite point on the bolting cloth band one can detect variations which occur over the entire lake and can readily locate such areas of variance accurately on a geographical basis. The method is envisioned as a practical parameter of water quality which will be of distinct value in studies of any of the Great Lakes.

### 6.0161, BRACKISH WATER PURIFICATION BY BIOLOGICAL FUEL CELL POWERED ELECTRODIALYSIS

*W.A. SCHELLER*, Univ. of Nebraska, School of Engineering, *Lincoln, Nebraska 68508*

Purification of brackish water containing 1000-5000 ppm of salts by electrodialysis appears to be more economical than any of the present day distillation techniques, but it is still expensive. A reduction in the water costs might be realized if a useful byproduct were produced in the water purification process.

The primary objective of the proposed research is to investigate the possibility of using an electrodialysis cell for brackish water purification in conjunction with a biological fuel cell powered by microorganisms capable of living in the brine effluent from the electrodialysis unit, feeding on cellulose containing materials such as hay, corn stalks, etc. and suitable for processing into cattle feed or feed supplement. Furthermore it is planned to investigate the effect of operating variables on the performance of the electrodialysis unit within the range of voltage-current-power capabilities of a battery of biological fuel cells. Finally, using the experimental results as a basis, economic evaluations will be made in order to determine the economic optimum arrangement of electrodialysis units and biological fuel cells. This is a five year program from fiscal 1966 through fiscal 1970.

### 6.0164, RADIOACTIVE AEROSOL SCAVENGING BY OCEAN SPRAY

E. HARDY, U.S. Atomic Energy Commission, Operations Office, New York, New York

The possibility that more fallout occurs per unit area onto the ocean than onto land has encouraged speculation that the spray produced from breaking waves may be an effective scavenger of nuclear debris from the lower troposphere. Scavenging action of spray will be examined both in the laboratory and at sea, and the total amount of Sr-90 deposited into the North Atlantic Ocean due to spray action will be estimated. Attachment of radionuclides onto salt or spray drops over the ocean should cause the size spectrum of nuclear debris particles to be shifted to larger sizes than observed over land. A high volume aerosol classifier consisting of cyclone precipitators followed by a pack of filters of graded porosity has been designed to measure the size distribution of radioactive aerosols. It will be operated both at sea and over land during several different wind and spray conditions. Air concentrations of fission products are being determined by high volume air filter sampling at four North Atlantic Ocean weather stations. A monthly estimate of spray over blocks of the ocean will be made from synoptic weather charts, and by integrating observed air concentrations, the deposition of Sr-90 due to spray will be estimated.

No systematic difference has been found between air concentrations of fission products at the ocean weather stations and at land stations at equivalent latitudes, although final conclusions await additional data collection. Several cyclone precipitators have been evaluated, and a radioactive particle classifier has been designed.

SUPPORTED BY U.S. Atomic Energy Commission

### 6.0165, RADIOSTRONTIUM DEPOSITION OVER THE OCEAN

E.P. HARDY, U.S. Atomic Energy Commission, Operations Office, New York, New York

Samples of ocean water collected by the Woods Hole Oceanographic Institution are analyzed for Sr-90 under AEC contracts administered by HASL. Most of the samples are collected at four Coast Guard Weather Stations in the North Atlantic. Other samples are taken at available locations for ocean circulation studies. The Coast Guard stations are also equipped to sample air particulates and fallout over three-week periods. The data are used to estimate the total fallout delivery to the sea surface and to trace the source of seawater at specific locations. A stationary platform has been erected 25 miles northwest of Andros Island on the Great Bahama Banks. Fallout collectors and rain gauges have been mounted on the platform to measure monthly concentrations of radiostrontium in precipitation. Seawater samples and sediment cores will also be collected for Sr-90 and C-14 analyses. From the C-14 analyses, to be performed by the Lamont Geological Observatory, the age of the water can be estimated to correct the Sr-90 seawater measurements for dilution by deep ocean water. The Sr-90 data will be compared with deposition data obtained at land stations in the same latitudinal region to determine whether the fallout rate in an oceanic environment is significantly different than fallout onto a land surface.

From measurements made so far it appears that oceanic rainfall is less than on adjacent land bodies while fallout rates are

comparable. Fallout in the oceans, by the mechanisms which cause deposition on land, has therefore probably been overestimated and additional depositional forces must be invoked to account for the observed Sr-90 in the seas.

### 6.0166, QUALITY STANDARDS TO DETERMINE RELEASE OF SHELLFISH FOR MARKETING PURPOSES

G. STROBEL, State Div. of Fish & Game, Oakdale - Long Island, New York 11769

Initially it will be necessary to hold the clams pending the results of bacteriological tests before they can be released for distribution. The holding time required will depend on correlating process time required with certain specific groups that can be determined within the time period available. If these correlations do not prove feasible, it will necessitate the design of a holding system so that the shellfish will not be released until their sanitary quality can be determined. A wet-storage system seems a reasonable approach to this problem, but dry-storage will also be investigated. This work will be done concurrently with the other phases of this sub-project. Various storage conditions will be investigated from the start of the project and will continue until an optimum condition is reached or bacterial studies prove storage unnecessary. The work will be under the direction of G. Strobale, Assistant Sanitary Engineer and J. Redman, Bacteriologist. Additional personnel include: 1 Technician.

The work will be located at the plant site in West Sayville, N.Y. with bacteriological tests performed at the laboratory in Oakdale, N.Y. All testing procedures will follow Standard Methods. Part 4 of 5

### 6.0167, THE ACCUMULATION OF FISSION PRODUCTS BY MARINE FISH AND SHELLFISH

T.R. RICE, U.S. Dept. of Interior, Radiobiological Lab., Beaufort, North Carolina 28516 (AT(49-7)-5)

The cycling of elements in the estuarine environment is being followed by observing the movement of radioisotopes in the water, biota, and sediments. Quantitative data on the cycling of radioactive elements are important since effluents containing radioactive elements often flow into estuarine waters. With such data, it should be possible to predict the pathways taken by the radioactive elements.

The potential importance of cord grass, *Spartina alterniflora*, in conveying radioisotopes of zinc, manganese, and iron into estuarine food chains was evaluated on the basis of its annual production, its content of the three elements, and its annual cycle of growth and decay. An environmental tracer experiment was carried out in which naturally-occurring fallout radioactivity in the estuary served as the tracer isotopes. In the laboratory, the influence of certain environmental factors on the concentrations of zinc 65 accumulated by an experimental community was tested. Finally, the interactions of radiation, salinity, and temperature on the physiology of the estuarine fish, the mummichog, was observed.

*Spartina* production was found to approach one-third the total phytoplankton net production of adjacent estuaries and is thus potentially important in estuarine food chains. The unusually high iron content of the dead material suggested that *Spartina* may be especially important in the movement of radioisotopes of iron from water and sediment into estuarine animal populations. Concentrations of gamma-emitting fallout radioisotopes were monitored in *Rangia* over a 30-mile stretch of river and a salinity range of less than 0.1 to greater than 15 parts/thousands. Ruthenium 106 and ruthenium 103 were concentrated more in *Rangia* from downstream stations (salinity range 6-15 parts/thousand), whereas cesium 137 was more abundant in the same species from fresher water (salinity range 0-8 parts/thousand). It was found that a high salinity and zinc concentration suppressed the concentration of zinc 65 in animals and sediment, while high temperature and pH had the opposite effect. In experiments testing the interaction of salinity, temperature, and radiation, it was observed that both salinity and temperature changed the LD-50. Above 20

## 6. PUBLIC HEALTH AND SAFETY

degrees C. fish were more sensitive to radiation at high salinities, while below 20 degrees C. fish were more sensitive to radiation at low salinities.

SUPPORTED BY U.S. Atomic Energy Commission

### 6.0168, SALT-WATER ENCROACHMENT IN NORTH CAROLINA ESTUARIES

H.B. WILDER, U.S. Dept. of Interior, Water Resources Division, Raleigh, North Carolina 27607

This research is part of the program of water resources investigations conducted by the U. S. Geological Survey in cooperation with the State of North Carolina.

Purpose: To determine the variations in flow and chemical quality of water in North Carolina sounds and estuaries so that decisions may be made regarding industrial utilization of the water.

Methods: Collect and analyze water samples, plot dispersion pattern compile and collate hydrologic information from various sources and prepare an interpretive report on the estuaries.

North Carolina State Government

### 6.0169, INFLUENCE OF SUSPENDED MICROSCOPIC SUBSTANCES ON THE METABOLISM OF MICROORGANISMS RESPONSIBLE FOR BIOLOGICAL ENRICHMENT OF WATER

R.M. PFISTER, Ohio State University, Graduate School, Columbus, Ohio 43210

The proposed investigation is to study the interaction of environmental contaminants (defined as substance not formed biologically or naturally, and which are not normally indigenous to the water) on the microbial portion of the ecosystem. The particulate materials (detritus) will be examined on a physical, chemical, and biological basis, and the materials will be characterized using differential and gradient centrifugation in conjunction with electron microscopy. The characteristic fractions of suspended particulate material will ultimately be examined for ability to influence biological reactions. This particulate fraction of water is important to microbial relationships in the area of interfaces and biological activity. It is known that particles and molecules in solution accumulate at interfaces (this includes chemicals which can either act favorably (e.g., nutrients) or unfavorably (e.g., pesticides) to organisms) and that enzymatic reactions are concentrated at membranous surfaces. Therefore, it is of significant importance to study the capabilities of non-biologicals that commonly end up in the waters on such colloidal or molecular interfacial systems.

The investigation will be confined to a small river or creek basin which enters into Lake Erie, and to the lake itself.

Ohio State University

### 6.0170, CLADOPHORA AS RELATED TO POLLUTION IN WESTERN LAKE ERIE

C.E. TAFT, Ohio State University, Graduate School, Columbus, Ohio 43210

The proposed research involves mapping and quantitative studies of attached Cladophora along the shorelines and on shoals adjacent to the Lake Erie Islands, and of the detached Cladophora beds that drift across the lake bottom. The approach will determine the quantity of Cladophora on the basis of dry weight, its periodicity, the chemical composition relative to that of the lake water, and the relationship of Cladophora to oxygen concentrations over the beds. Studies to evaluate harvested Cladophora as special products such as fibrous filter material, food, and/or as a mulch will be initiated.

Field investigations include: 1) Aerial mapping of Cladophora beds. 2) Observations of periodic growth on the beds. 3) Quantitative measurements of Cladophora on attached and drifting beds. Laboratory investigations include: 1) Chemical analyses of Cladophora. 2) Chemical analysis of lake water. 3) Culture of Cladophora. 4) Suitability of Cladophora as a special

filter medium. 5) Suitability of Cladophora as an animal food supplement. 6) Suitability of Cladophora as a speciality mulch.

### 6.0171, MICROFLORA OF RADIATION PASTEURIZED SEAFOODS

A.W. ANDERSON, Oregon State University, Agricultural Experiment Sta., Corvallis, Oregon 97331

1. Determine the numbers and the radiation resistance of microorganisms surviving radiation pasteurization. 2. Determine whether those surviving microorganisms constitute a health hazard. 3. Determine the shelf life of such radiation pasteurized seafoods under various temperatures of storage. 4. Establish D or comparable values for radiation destruction rates of selected pathogens.

This investigation was concerned with the effects of pasteurization irradiation on the flavor and extension of storage life of shrimp and crabmeat held at 38 degrees F. The pasteurization levels selected on the basis of the flavor threshold values were 0.50 and 0.75 megarads for shrimp and 0.25 and 0.50 for crabmeat.

Chemical and bacteriological analyses were conducted on the non-irradiated and irradiated samples held at 38 degrees F. These included trimethylamine nitrogen, total volatile bases, total volatile acids, pH, and total plate counts on various selective media. Flavor evaluations were made by a trained panel for the presence and intensity of irradiated taste and odor.

SUPPORTED BY Oregon State Government

### 6.0172, ECOLOGICAL STUDIES OF RADIOACTIVITY IN THE COLUMBIA RIVER ESTUARY AND ADJACENT PACIFIC OCEAN

W.V. BURT, Oregon State University, Graduate School, Corvallis, Oregon 97331 (AT(45-1)-1750)

PEARCY

Neutron-induced radionuclides, originating primarily from the nuclear reactors at Hanford, Washington, are continually introduced into the Columbia River estuary and adjacent Pacific Ocean. The presence of Zn65, Cr51, Sc46, Mn54, Co60, and several other radionuclides in dilute, but often measurable concentrations, permits studies of the cycling of these elements.

Studies in the estuary which have already been defined show that the levels of radioactivity and distribution of radionuclides in water, sediment, and biota will concentrate on specific activities (activity of radionuclide per gram of total element) in various components of the ecosystem to determine reservoirs, routes, and rates of transfer.

In offshore areas, planktonic and nektonic organisms will be collected from discrete depths using electrical cable to monitor depth and actuate opening and closing devices. A special study will be made of vertical migrations of euphausiids. Radioanalysis and stable element analysis of midwater and benthic animals from various depths will enable estimates of vertical changes in radionuclide levels and vertical transport rates. Comparisons between specific activities of zinc in animals and water will be attempted in the plume region. Study of seasonal and regional variations of gamma emitters in albacore, tuna and salmon, which have provided insight into the migratory behavior of these species will be completed.

The radioecology of benthic organisms on the continental shelf and slope is being studied along the northern Oregon coast. Stomach contents will be analyzed and food webs will be delineated and related to radionuclide distribution. A deep-sea camera linked to a sediment sampler will help relate bottom topography to the sediment and infauna. Animal-sediment relationships, which have already been shown to be important aspects of benthic radioecology, will become more meaningful when viewed in terms of specific activities.

## 6. PUBLIC HEALTH AND SAFETY

### 6.0173, AN ECONOMIC EVALUATION OF WATER POLLUTION CONTROL, YAQUINA BAY, ORE

*E.N. CASTEL*, Oregon State University, Agricultural Experiment Sta., *Corvallis, Oregon 97331*

OBJECTIVE: (1) Identify the items of economic value that will be sacrificed if pollution is not controlled in a particular case study situation. (2) Insofar as possible, determine the unit prices and physical quantities of those items of economic value identified in (1) above. (3) Determine the cost of alternative engineering plans designed to provide for varying degrees of pollution control. (4) Relate the above variables in a mathematical model that will permit the unknown physical, biological and economic data to be isolated. (5) Relate the unknown variables in (4) above to needed research in the physical, biological and economic fields. This work will involve the establishment of a complete mathematical model which will relate all monetary elements of benefits and costs. It will be necessary to make quantitative determination of so many of the benefits and cost items as possible. It will then be necessary to solve for the crucial range of values for the unknown variables. The results of this case study will then be related to the more general problem of benefit-cost analysis in water pollution control.

SUPPORTED BY Oregon State Government

### 6.0174, COASTAL DIFFUSION OF POLLUTANTS

*D.J. BAUMGARTNER*, U.S. Dept. of Interior, Pacific Nw. Water Laboratory, *Corvallis, Oregon 97330*

The Georgia-Pacific Corporation, Toledo, Oregon currently discharges its kraft process pulp mill wastes to an ocean outfall which discharges approximately 6 million gallons per day through a diffuser section at a depth of 40 feet at a distance of 3000 feet off the Oregon Coast at Newport. The dilution achieved by the diffuser process and by the horizontally flowing field under the influence of natural forces will be investigated by frequent sampling of the near coastal waters, plus continuous monitoring of wind direction and speed. Current meters will be installed at various depths and at three locations in the near shore area to determine the relationship between the dilution of the field and the current structure. Additional surface current measurements may have to be made on the basis of drift cards or dye fields. Model tests will be performed in an 8-foot diameter, 3-foot deep tank to reproduce the hydrodynamic characteristics of the diffuser port and the density structure or the wind stress. This should, in addition to improving the methodology for describing jet diffusion, provide a method for estimating the influence of the non-steady current structure in the receiving fluid by comparing the observed performance in the prototype with the observed performance in the controlled model.

SUPPORTED BY U.S. Dept. of Interior - F. Water Pol. Ctl

### 6.0175, ESTUARINE DIFFUSION OF POLLUTANTS

*D.J. BAUMGARTNER*, U.S. Dept. of Interior, Pacific Nw. Water Laboratory, *Corvallis, Oregon 97330*

The most general characteristic of pollutants which plays a part in the assessment of their fate is concentration. Since the concentration is a function of its dilution in the environment as a result of mixing and diffusion, as well as decay of the component, it is of considerable importance to be able to determine how the concentration of a pollutant will vary in the receiving water at various locations and perhaps at various times if the pollutant or the environment is not in steady state.

Uncertainty exists with regard to the value of the turbulent diffusion coefficient to be used in problem analysis. To provide a means of determining this value at points in time and space, as well as providing additional understanding of the forces which influence estuarine diffusion, a predictive model of salinity will be constructed on the basis of time series analysis of observations in Yaquina Bay, Oregon.

Continuous recording salinometers will be installed approximately every five miles along Yaquina Bay to obtain the record of the time variation of salinity at the surface. Once a week, vertical traverses of salinity will be obtained to provide information on the vertical stratification in the estuary. If necessary, additional salinometers will be placed near the bottom to obtain information

on the vertical distribution. Fresh water inflow will be estimated by stream gauging of the three principal surface streams in the area. Direct runoff and direct rainfall can be estimated. Information on tide height and frequency will be obtained from three tide gauges, while continuous information on wind speed and direction will be obtained at the entrance to the bay and other locations if necessary.

SUPPORTED BY U.S. Dept. of Interior - F. Water Pol. Ctl

### 6.0176, MARINE BIOLOGICAL ASSESSMENT OF POLLUTIONAL FATE

*D.J. BAUMGARTNER*, U.S. Dept. of Interior, Pacific Nw. Water Laboratory, *Corvallis, Oregon 97330*

In almost every pollution situation, a major consideration is the impact of the degraded water quality on the organism. This is especially true where it is suspected that the pollutant will harm aquatic organisms of primary importance to man. Interpretation of bioassay tests is complicated by the fact that there has been very little information obtained to relate the controlled observations in the laboratory experiments to the actual conditions existing in the environment in the absence of pollution. Attempting to overcome some of these difficulties, investigators have begun to consider and apply in situ bioassay procedures.

The difficulties associated with this approach are related to selection and maintenance of the test animals, knowledge of their population dynamics in the natural unpolluted environment, and determination that the observations obtained under the test conditions are due to a pollutional stress rather than artifacts of the experimentation.

The first step in developing a series of procedures for analysis of problem areas is determining the amount and type of information necessary to describe the natural environmental populations. This developmental work is being tried on Yaquina Bay, Oregon, along two approaches.

Information on fish usually associated with bottom or mid-water habitat will be obtained at each of ten sampling stations every two weeks by means of a trawl. Continuous recording of salinities on the surface at six stations covering the trawl areas will also be provided. In addition, weekly profiles of dissolved oxygen, temperature and salinity will be provided. Samples will be obtained for organic carbon analysis or PBI's or other appropriate analyses to determine possible pollutants. It will be possible to test some of the methods of analysis after collection of data for one year. The second method of observation pertains to collection of crustacea in standardized substrate boxes and on substrate media suspended in the water column. These samples are analyzed after exposure to the environment for five weeks. Sub-samples of the organisms obtained in both methods will be analyzed for maturity, weight distribution, and stomach contents.

SUPPORTED BY U.S. Dept. of Interior - F. Water Pol. Ctl

### 6.0177, DISPOSAL TO MARINE WATERS

*R.J. CALLAWAY*, U.S. Dept. of Interior, Pacific Nw. Water Laboratory, *Corvallis, Oregon 97330*

This project is concerned with oceanography of coastal waters and estuaries necessary to protect them from the disposal of municipal, industrial, and vessel wastes. Coastal work will consider the diffusion and advection of wastes discharged from outfalls, the accumulation of wastes on the bottom near outfall, and eventually, the effect of various wastes on marine organisms. A project on the effect of wastes discharged from vessels will be initiated in 1966. Estuarine work will consider saltwater penetration, continuous monitoring of parameters, statistical and dynamical models of the environment.

SUPPORTED BY U.S. Dept. of Interior - F. Water Pol. Ctl

### 6.0178, MOVEMENT OF RADIONUCLIDES IN THE LOWER COLUMBIA RIVER

*W.L. HAUSHILD*, U.S. Dept. of Interior, Water Resources Division, *Portland, Oregon 97208*

The objective of this project is to quantitatively determine the concentrations and loads of specific radionuclides that are

## 6. PUBLIC HEALTH AND SAFETY

solutes and sorbed on sediments in the Columbia River from Hanford, Washington to the estuary. The spatial and temporal variation and distribution of the radionuclide concentration and loads are to be studied, and an approximate budget of the radionuclides is to be determined.

The physical, chemical and mineral properties of the suspended and streambed sediments are being studied; and these properties, insofar as is possible, will be related to sediment transport, sorbed radionuclides, and the equilibrium balance between the solute and sorbed radionuclide phases.

The extent and characteristics of sediments deposited on the streambed and sorption of radionuclides by these sediments in the natural channel, reservoir, and tidal-affected reaches are being surveyed.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 6.0179, MOVEMENT OF RADIONUCLIDES IN THE COLUMBIA RIVER ESTUARY

*D. HUBBEL*, U.S. Dept. of Interior, Geological Survey, Portland, Oregon 97208

Two reaches of the estuary have been instrumented for discharge determination. These will be calibrated by direct measurement of flow from a boat at different stages and through several tidal cycles during the coming year. The data will then be fitted to a one dimensional mathematical model that has already been developed. If the mathematical model is determined to be reasonably accurate, two other reaches will be instrumented similarly. In addition, water samples for salinity and other chemical characteristics and sediment content will be taken during all direct discharge measurements. Gross description of radioactivity in the estuary will be obtained by a sled-mounted in situ radiation detector as well as from analyses of water and sediment samples. Data compilation and integration will be augmented by a study of typical environments such as islands, tidal flats and shorelines, which can be mapped fairly easily. The mechanics of sediment transport and deposition particularly under the influence of salinity changes and flow reversal will be studied to define empirical relations to be used in calculating sediment loads.

SUPPORTED BY U.S. Atomic Energy Commission

### 6.0180, THE MOVEMENT OF RADIONUCLIDES IN THE COLUMBIA RIVER ESTUARY

*D.W. HUBBELL*, U.S. Dept. of Interior, Water Resources Division, Portland, Oregon 97208

Certain radionuclides enter the Columbia River from the Hanford installation of the U. S. Atomic Energy Commission. Part of the radionuclides remain in solution in the water, part are sorbed on the fluvial sediment, and part are taken up by the biota. As a result, each medium, by virtue of its motion, affects the distribution of the radionuclides.

Objectives of this project are to define the disposition and movement of radionuclides in the Columbia River estuary; to study the processes that influence the movement of radionuclides, particularly the sedimentation, flow and chemical processes; and to contribute to estuarine technology.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 6.0181, DETERMINATION OF SAFE LEVELS OF POLLUTION IN PUERTO RICO

*A.S. VAZQUEZ*, Univ. of Puerto Rico, Water Resources Research Inst., Mayaguez, Puerto Rico

Some Puerto Rico Bays are receiving raw sewage and other organic pollution in high concentrations. Damage has been done to the fish population and to the recreational use of surrounding beaches, the best example being the Bay of Mayaguez just near the Campus of the College of Agriculture and Mechanic Arts where the Institute will have its headquarters.

It is proposed to investigate the degree of contamination of the bay to evaluate the proportional effect of the different factors which contribute directly to its actual and future sanitary conditions and its effects on the fish, ecology and the recreational aspect of the bay and surroundings.

This study will be carried on through the systematic measurement of parameters such as BOD, dissolved oxygen, solids, coliform group, biota, etc. Similarly, physical, chemical, and meteorological factors affecting the locality of the Mayaguez Bay will also be determined inside the bay. The goal will be to establish the relationships among the most important of the factors that enter into the problem, with the purpose of establishing criteria for prediction for similar situation in tropical bays.

SUPPORTED BY U.S. Dept. of Interior - O. Water Res. Res. University of Puerto Rico

### 6.0182, ASPECTS OF RELATIONSHIPS BETWEEN MARINE ECOLOGY AND HUMAN HEALTH

*C.N. SHUSTER*, U.S. Dept. of Hlth. Ed. & Wel., P.H.S. Nat. Mar. Hlth. Sc. Lab., Narragansett, Rhode Island

Continuing independent and collaborative studies in marine health science upon aspects of the marine environment and biota which have a bearing upon human health. Emphasis is upon biological, particularly ecological, observations upon toxins and other harmful chemicals, beneficial substances, disease-transport mechanisms, etc.

SUPPORTED BY U.S. Dept. of Hlth. Ed. & Wel. - P.H.S.

### 6.0183, USE OF MARINE PLANKTONIC ORGANISMS FOR EVALUATING THE QUALITY OF MARINE AND ESTUARINE WATERS

*T.E. MALONEY*, U.S. Dept. of Interior, Natl. Marine Water Qual. Lab., Wakefield - Kingston, Rhode Island 02881

This study is concerned with the development of bioassay methods and techniques, employing marine planktonic organisms, or determining the identity and of pollutants in the marine environment and for determining and predicting the short and long-term effects of lethal and sublethal concentrations of pollutants upon other organisms found in the the marine environment. This includes the development of methods for determining and measuring the effects of pollutants upon sensitive metabolic responses and enzymatic reactions both at the cellular and subcellular levels and devising methods for accomplishing such bioassays accurately and routinely.

SUPPORTED BY U.S. Dept. of Interior - F. Water Pol. Ctl

### 6.0184, COMPARATIVE TOXICITIES OF METALS TO ESTUARINE FISHES

*R. EISLER*, U.S. Dept. of Interior, Natl. Marine Water Qual. Lab., West Kingston, Rhode Island 02892

Disposal of solid wastes at sea is being practiced by an increasing number of municipalities. Preliminary analysis of incompletely-ashed incinerator wastes by atomic adsorption indicates that aluminum, iron, calcium, zinc, sodium, potassium, and lead--in that order--are most abundant. Short-term bioassays with inorganic salts of these and other metals to the mummichog, *Fundulus heteroclitus*, are being conducted under controlled environmental conditions. Relationships between mortality, physical-chemical environment, and concentration of test metal in solution is being investigated.

SUPPORTED BY U.S. Dept. of Interior - F. Water Pol. Ctl

### 6.0185, RADIONUCLIDES IN THE SAVANNAH RIVER ESTUARY AND ADJACENT COASTAL WATERS

*C.M. PATTERSON*, U.S. Atomic Energy Commission, Savannah River Plant & Labs., Aiken, South Carolina

Small amounts of radionuclides are released to the Savannah River by the Savannah River Plant 170 miles from the Atlantic Ocean. The distribution of radionuclides in the river's estuary and in adjacent coastal waters is being determined. Effects of water exchange between the estuary and ocean, sedimentation and other physical and chemical factors influencing dilution and distribution will be studied.

SUPPORTED BY U.S. Atomic Energy Commission

## 7. MARINE GEOLOGY

### 6.0186, STEROIDS AND LIPIDS IN WATER POLLUTION L.L. SMITH, Univ. of Texas, School of Medicine, Galveston, Texas

The presently proposed work considers the examination of natural waters for their lipid content, particularly their sterol content (including cholesterol and the fecal sterol coprosterol). It is hoped that a full knowledge of the sterol content of natural waters will permit the use of such analyses for sterols for recognition of pollution from domestic sewage, animal and plant wastes, etc. as these might be encountered in natural water supplies. Both animal and plant material contains sterols, and by detecting a given key sterol in excess in a water sample it should prove possible to identify the probable origin of the sterol. Furthermore, knowledge of the sterol content should offer a fundamental basis for our improved understanding of the means by which lipids and sterols are disposed of in natural waters. Water samples have been taken from open surf, quiet bay, running tidal, and domestic sewage treatment effluents and the sterols therein analyzed by chromatographic means. In open uncontaminated waters certain phytosterols have been found but no evidences of domestic sewage contamination were obtained. Domestic sewage does contain cholesterol and coprosterol, even in fully treated sewage. The fate of these sterols as they are diluted in water sources is under study.

SUPPORTED BY U.S. Dept. of Interior - F. Water Pol. Ctl

### 6.0187, EFFECTS OF RIVERS ON THE METABOLISM OF TEXAS BAYS B.J. COPELAND, Univ. of Texas, Graduate School, Port Aransas, Texas 78373

The overall objective of the research proposal is to seek ways to distinguish the degree to which a body of water is polluted, ascertain the contribution of rivers to the bay, and to discover quantitative and qualitative differences between polluted and unpolluted coastal waters. Comparisons of concentrations of various nutrient compounds to primary productivity and various animal and plant assemblages will be made and the river's contribution to the bay will be evaluated.

SUPPORTED BY U.S. Dept. of Interior - F. Water Pol. Ctl

### 6.0188, A STOCHASTIC MODEL FOR POLLUTION IN ESTUARIES R.G. KRUTCHKOFF, Virginia Polytechnic Institute, Research Division, Blacksburg, Virginia 24061

The purpose of this investigation is to find a stochastic model for pollution and dissolved oxygen in estuaries. With this model it will be possible to predict the proportion of time that pollution will be above any given concentration or that dissolved oxygen will be below any given level. It is hoped that this information will result in better management of water resource systems and aid in forming more realistic restrictions on the use of estuaries for disposal of pollutants.

SUPPORTED BY U.S. Dept. of Interior - F. Water Pol. Ctl

### 6.0189, FALLOUT INVENTORY OF THE OCEANS AND RELATED MECHANISMS J.J. FUGUAY, Battelle Memorial Institute, Richland, Washington 99352

This study is to provide information to assess the inventory of fallout radionuclides in the several spheres of the Earth. At present, a mass balance of material released against the inventory in the atmosphere, on the land surfaces and in the sea cannot be made to the accuracy desired. Measurements of the history and distribution of radionuclides produced in weapons testing residing in the atmosphere plus those depositing on terrestrial surfaces have permitted tentative calculations of the inventory in the sea by assigning there all unmeasured inventory. From such a calculation, the rate of deposition over the ocean must be about 50% greater than over the land, but the required mechanisms are unclear. Recently, we have developed methods to establish the inventory in the sea through analysis of the water; this will contribute to the knowledge of the distribution of fallout on Earth. In-

vestigation of the exchange processes between air and sea, and air and land, and using knowledge of debris transport and the atmospheric and terrestrial inventory of fallout, the difference in rates will be measured and the mechanisms defined.

This is a new program but applicable progress was made here under other AEC studies. Methods were developed and used for ten trace elements in sea water by neutron activation and counting on multidimensional and Ge(Li) diode gamma-ray spectrometers. Research continued on the behavior of airborne radionuclides and was expanded to include sampling at Pt. Barrow, Alaska, and Rio de Janeiro.

The behavior of  $^{55}\text{Fe}$  in the ocean was clarified. Tuna from the northern hemisphere were about 20 times as active as those from the southern. New techniques used cosmic-ray-produced radionuclides as tracers of the normal atmospheric aerosols. Aircraft sampling was integrated into the work.

SUPPORTED BY U.S. Atomic Energy Commission

### 6.0190, COLUMBIA RIVER SEDIMENT STUDIES

J. NIELSEN, Battelle Memorial Institute, Richland, Washington 99352

PNL provides analytical services for the Columbia River and estuary studies being conducted by the USGS for the AEC, aids in the evaluation of the fate of the radionuclides, especially in the area of effect of retention by sediments, and conducts geochemical studies involving mechanisms of radioactivity uptake by the sediments.

SUPPORTED BY U.S. Atomic Energy Commission

### 6.0191, BACTERIOLOGICAL AND ESTHETIC OF PLEASURE BOAT WASTE DISCHARGE ON SMALL HARBORS R.W. SEABLOOM, Univ. of Washington, School of Engineering, Seattle, Washington 98122

The proposed research will involve field studies to determine and document the bacteriological pollution caused by the waste discharge from small pleasure craft in small harbors. Both fresh water and salt water harbors will be studied. The possible esthetic degradation of water quality will also be determined by visual surveillance of the water during periods of maximum boat activity. The bacteriological analysis will be initiated in the field and will be by the membrane filter technique.

SUPPORTED BY U.S. Dept. of Interior - O. Water Res. Rch University of Washington

### 6.0192, INFLUENCE OF INDUSTRIAL AND MUNICIPAL WASTES ON ESTUARINE AND OFF SHORE WATER QUALITY

J.F. SANTOS, U.S. Dept. of Interior, Geological Survey, Tacoma, Washington

This project is being carried on in cooperation with the Municipality of Metropolitan Seattle.

A major objective is to study the influence of industrial and municipal waste disposal on all phases of water quality, chemical, physical, ecological, and sanitary in fresh, brackish, and saline environments. Measurements made with multiple parameter water quality recorders at four sites on the Duamish River estuary are the basis for the attempted correlations. Parameters recorded include dissolved oxygen, specific conductance, water temperature, pH, turbidity and solar radiation index. Computer programs will be written to analyze these data and to detect significant relations.

### 7.0001, AN APPROACH TO MARINE RESOURCE DEVELOPMENT IN ALASKA

*D.W. HOOD*, Univ. of Alaska, Inst. of Marine Sciences, College, Alaska 99735

The marine resources of the State of Alaska are considered to be of great value. While some exploration and development of seafood, petroleum and minerals has occurred, little in the way of planning for such activities has been done. This project consists of a study which will provide: a basis for curriculum planning for education, an appraisal of Alaskan marine resources, establishment of priorities for research and identification of the most useful areas for early development.

A committee of ten experts, five from Alaska and five from other states, will prepare a report which is to serve as a guideline for marine resource development in Alaska. The committee members will compile existing information on Alaskan marine resources, visit specific areas of such activity and prepare the report.

SUPPORTED BY U.S. National Science Foundation

### 7.0002, A UNIFIED APPROACH TO WATER, FOOD AND POWER IN A COASTAL DESERT COMMUNITY

*C.M. HODGES*, Univ. of Arizona, Inst. of Atmospheric Physics, Tucson, Arizona 85721

The University of Arizona is developing a combination system for providing power, water and food. The system is designed for use, initially at least, in a coastal desert area.

Power is generated by a diesel-electric set. Waste energy from the diesel engine is utilized to heat seawater for a humidification desalination plant. The waste seawater from the desalination plant is used to provide the temperature and humidity control for a closed-environment greenhouse. Carbon dioxide from the diesel engine exhaust is used in the closed greenhouse to accelerate plant growth.

Various experimental components of the system have been constructed and tested at the Environmental Research Laboratory, Tucson, Arizona. A pilot facility is being developed at Puerto Penasco, Sonora, Mexico, in cooperation with the University of Sonora.

SUPPORTED BY Rockefeller Foundation

### 7.0003, SAMPLING CAMPAIGN ON CORONADO BANK, OFF SOUTHERN CALIFORNIA

*B.B. BARNES*, U.S. Dept. of Interior, Marine Min. Technol. Ctr., Belvedere - Tiburon, California 94920

DAVIS

The project commenced field operations in May 1968 with a comprehensive survey involving seismic, magnetic, surficial dredge and grab sampling and underwater photography of the Coronado Bank above the 100 fathom contour. The shallowest water depth encountered in this preliminary work was approximately 57 fathoms (342'). Thus far, the deepest penetration of bottom sediments on the bank has been mostly surficial, measuring less than 2 feet, and recovery of an undisturbed core has not been attempted.

The anticipated sampling campaign on Coronado Bank will provide the first truly three-dimensional measurement of sediments overlying the bedrock surface and hopefully the first undisturbed core sample. The purpose of this project is not only to measure and evaluate the phosphate content and target reserves, but also provide the opportunity to test systems for deep water drilling capability. The surficial sampling just completed (as outlined in Project VIII-C-1) has not been analyzed as of this writing, and therefore results regarding P<sub>2</sub>O<sub>5</sub> content are not available to report. However, photographic recovery via underwater television indicates large areas of unobstructed sand bottom with occasional boulder-sized nodules. Several smaller areas indicated a relatively high density of phosphate nodules. Seafloor bathymetry, bottom characteristics and depth of overburden to the bedrock are presently being determined.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 7.0004, ANALYSIS AND INTERPRETATION OF DATA FROM GEOPHYSICAL AND PHOTOGRAB SURVEY OF CORONADO BANK, OFF SOUTHERN CALIFORNIA

*H.D. HESS*, U.S. Dept. of Interior, Marine Min. Technol. Ctr., Belvedere - Tiburon, California 94920

MCFADDEN

Background information regarding potential southern California offshore phosphorite target areas has been provided in a two-volume portfolio of technical papers concerning the subject. This compilation has been circulated to all Team members. The collection contains 46 papers, as well as a selected bibliography of 40 additional references.

The target selection was made on the basis of several factors. First, previous work done by Drs. K.O. Emery, R.S. Dietz, F.P. Shepherd, and others indicated that Coronado Bank has potential as a prime phosphorite area. The second basis for target selection was related to water depth and size of the target area. Coronado Bank above the 100 fathom line represents an area of approximately 18 square miles, most of which is relatively flat and unobstructed. Also, visibility for underwater photography and videotape television work was considered to be very good. The third basis for selection concerned the logistics: The Coronado Bank target area is in close proximity to San Diego which offers harbor protection for craft the size of the R/V CRIPPLE CREEK.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 7.0005, GEOLOGICAL, GEOPHYSICAL, OCEANOGRAPHIC, AND ECOLOGICAL DATA ON WORLDWIDE BASIS, ON AREAS OF HEAVY METALS POTENTIAL

*H.D. HESS*, U.S. Dept. of Interior, Marine Min. Technol. Ctr., Belvedere - Tiburon, California 94920

A survey of existing mineral resource and sampling data has been in progress to establish the location and general character of known and potential areas of seafloor mineralization on the Pacific Coast continental shelf. During the past year, major emphasis has been placed on nearshore precious-metal placers in the northern California-Oregon heavy-metal placer areas. Based on collected data, several potential offshore target areas for each of these were selected for field studies involving both drilling and deposit characterization.

Results of USGS reconnaissance missions and data from other sources have pointed up five nearshore heavy-metal target areas off the Oregon coast and two areas off northern California. Climatological data for these areas have been reviewed and analyzed with the selection of August and September for drilling operation which are to be conducted from the R/V VIRGINIA CITY.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 7.0006, MARINE HEAVY-METALS PRODUCTION INFORMATION, ON WORLDWIDE BASIS

*H.D. HESS*, U.S. Dept. of Interior, Marine Min. Technol. Ctr., Belvedere - Tiburon, California 94920

Information on worldwide offshore minerals production has heretofore been collected and disseminated on an informal basis or as an incidental part of other MMTCA data collection efforts. With inception of this project, heavy-metals production information will now be collected, analyzed and disseminated on a formal project basis, with a view to worldwide coverage. Major emphasis will be placed on the characteristics of the deposits, mining history and recorded production, mining and sample processing systems employed, the recoverability factor, operating costs, and a number of other technological aspects of the operations.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 7.0007, EVALUATION OF CONTEMPORARY ACOUSTIC, MAGNETIC AND GRAVIMETRIC METHODS FOR DETERMINING SIZE AND SHAPE OF DEPOSITS

*H.D. HESS*, U.S. Dept. of Interior, Marine Min. Technol. Ctr., Belvedere - Tiburon, California 94920

Study and analysis of available marine geophysical instrumentation and techniques to date at this Center have been largely

## 7. MARINE GEOLOGY

concentrated on acoustic subbottom profiling and marine magnetometer systems as related to the previous broad geophysical project and development of the Center's inhouse capability with respect to geophysical instrumentation. Under this current project, a detailed study and analysis of all present state-of-the-art acoustic, magnetic, gravimetric, as well as related bore-hole logging instrumentation and techniques having possible application to detailed deposit characterization activities in the marine environment will be conducted on a formal project basis.

Included in this effort will be appraisal of contemporary bottom and subbottom profiling, magnetometer/gradiometer, gravimetric systems, and down-hole geophysical logging techniques applicable or adaptable to the marine environment. Detailed comparisons will be made of each suite of systems with a view to definition of their performance capabilities for characterizing placer deposits of variable thickness, composition, and environment.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 7.0008, FEASIBILITY STUDY OF THE USE OF ELECTRICAL METHODS FOR DETERMINING SIZE AND SHAPE OF DEPOSITS

*H.D. HESS*, U.S. Dept. of Interior, Marine Min. Technol. Ctr., *Belvedere - Tiburon, California 94920*

Preliminary investigative work on a towed electrical self-potential system for delineating oxidized mineral deposits or ore bodies at the seafloor was initiated at this Center during FY 68 during which time the Project Leader was employed on the Center's geophysical staff. Following recent modifications to the original prototype system and development of more sensitive electrodes, the system has shown promise of becoming a useful tool for delineating self-potential anomalies in mineral deposits at sea. Self-potential or spontaneous potential technique for many years has been successfully used on land for logging oil wells and mapping sulfide deposits. Although the anomalies in the ocean and the techniques to be employed are not the same as those on land, a marine version of the self-potential system applied on land now appears to be feasible. The marine aqueous environment has a tendency to somewhat mask reduced mineral bodies, but this is not considered to be a problem. Further, the aqueous environment allows for continuous traversing and recording in contrast to land deposits, where the technique involves the laborious task of emplacing and wetting each electrode for sufficient contact. Contact on land is difficult due to the insulating properties of dry earth and clays, whereas, contact with the highly conductive sea water is relatively easy.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 7.0009, OREGON-NORTHERN CALIFORNIA PLACER DEPOSITS

*R.D. OBRIEN*, U.S. Dept. of Interior, Marine Min. Technol. Ctr., *Belvedere - Tiburon, California 94920*

Reconnaissance surveys by the USGS and the Department of Oceanography of Oregon State College have outlined five areas off the southern Oregon coast and two areas off the northern California coast which indicate zones of concentrations of heavy minerals. Preliminary plans were started in the second quarter of FY 1968 in cooperation with USGS for testing these promising zones by drilling. The team concept of project coordination and management was initiated with the appointment of a team-coordinator-manager and members of the team representing all components of MMTC.

Meetings of the team members have been held to acquaint each member with the problems of the other members, to keep avenues of liaison open, and to coordinate the various efforts towards a preparation completion date of July 1, 1968.

Close liaison with the USGS Office of Marine Geology and Hydrology at Menlo Park has been maintained to exchange technical data and coordinate the planning activities. Drilling sites as planned by the USGS have been transferred to navigation charts to aid in closer ship's positioning.

A review of data received from the U.S. Naval Oceanographic Office in Washington, D.C. concerning wind, sea, and swell conditions in the coastal areas concerned, indicates that ap-

proximately 50 per cent of July and August will be suitable for drilling operations. The remainder of the year would provide less than 50 per cent available drilling time.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 7.0010, MARINE GEOLOGY OF THE CALIFORNIA CONTINENTAL BORDERLAND WITH EMPHASIS ON FUTURE ECONOMIC DEVELOPMENT AND GENERAL RESOURCE VALUE

*D.S. GORSLINE*, Univ. of Southern California, Graduate School, *Los Angeles, California 90007*

Presently includes studies of the heavy metal and heavy mineral content of coastal beaches and the shelf off southern California, clay mineral contribution from principal streams, general sediment mineralogy in river bottoms and beaches, sedimentary characteristics of marine basins in the Borderland, phosphorite distribution and internal structures, and special projects covered in part by contract funds including geology and sediment distribution of Lake Tahoe and clay mineralogy of shelf sediments off the northwestern Alaska coast.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0011, THE ECONOMIC POTENTIAL OF THE MINERAL AND BOTANICAL RESOURCES OF THE U.S. CONTINENTAL SHELF AND SLOPE

*L. FISCHMAN*, Economic Associates Inc., *Washington, District of Columbia*

The study is designed to provide an initial survey of the mineral and botanical resources of the United States' continental margins, along with a preliminary appraisal of their potential economic value and the status of their development. The goal is to furnish data upon which analytical evaluation of Federal policies and programs can be based.

The most significant materials potentially producible from the marine environment will be covered with the choices based upon occurrence, apparent public interest, and relative importance in the total U.S. economy. Materials which will receive the greatest attention include: oil and gas; manganese; phosphorus and phosphates; sulfur; aggregates; calcium carbonate; gold; titanium; thorium; and fresh water.

Demands as well as estimated supplies over the next 25 years will be projected based upon review of existing studies and source data. Production from existing potential non-oceanic sources will be considered for purposes of these projections. Also, the state-of-the-art and costs of extraction will be described along with potential impact of Federal research and development, or conservation programs upon the development of these marine materials. Means of Federal encouragement of the creation of the needed equipment and institutions will be explored.

SUPPORTED BY Natl. Council on Marine Res. & Engin. Dev.

### 7.0012, DEVELOPMENT OF OFFSHORE SOURCES OF SAND SUITABLE FOR BEACH RESTORATION AND NOURISHMENT

*G.M. WATTS*, U.S. Army, Coastal Engin. Res. Center, *Washington, District of Columbia 20016*

This study is to locate and quantitatively assess those offshore deposits which contain sediments suitable for beach restoration and/or nourishment. The present geographical limits of the study are from New Hampshire to the Florida Keys along the Atlantic Coast in water depths of 15 to 100 feet below low water datum. The method of exploration is twofold: (1) Geophysical (acoustic) surveys of the bottom and shallow subsurface strata in selected areas; and (2) The extraction of short (10-15 feet) cores of the unconsolidated sediments. These data are analyzed to develop two and three dimensional maps delineating areas of usable sediments which may be exploited economically. Concurrent studies are in progress to develop and refine methods of offshore dredging and delivery of the material from the dredge to the shore.

SUPPORTED BY U.S. Dept. of Defense - Army

## 7. MARINE GEOLOGY

### 7.0013, DISTRIBUTION OF HEAVY METALS, WESTERN GULF OF MEXICO

*H.L. BERRYHILL*, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

Three-dimensional geologic-geophysical analysis of the western part of the Gulf of Mexico to appraise the mineral and energy resources on and beneath the sea floor, and to determine geologic processes operating in the Gulf. Work will primarily emphasize the geologic parameters that control distribution, geochemistry, and economic potential of heavy metals such as gold, platinum, chromium, tin, etc., but future work will be broadened to meet the needs of the total goals. This study is being performed in coordination with the Texas A & M University under a joint research contract.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0014, MISSISSIPPI DELTA

*H.L. BERRYHILL*, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

Determination of Pleistocene and Recent history of the Mississippi Delta, the geologic parameters that control distribution, geochemistry, and economic potential of heavy metals such as gold, platinum, chromium, tin, etc., during this history, and the diagenetic changes occurring in the submerged part of the Delta. This study is being performed in coordination with the Louisiana State University under a joint research contract.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0015, OREGON-CALIFORNIA BLACK SANDS

*H.E. CLIFTON*, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

The overall objective is to evaluate the potential for economic concentrations of heavy metals and heavy minerals in beach and offshore sands along the Pacific Coast from the mouth of the Coos River in Oregon southward to the mouth of the Klamath River in California, and the heavy metal transport of major streams supplying the area. This work is being performed in coordination with the Department of Oceanography, Oregon State University, and the Department of Geology, University of Oregon, under joint research contracts.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0016, RESOURCES OF THE BERING CONTINENTAL MARGIN

*D.M. HOPKINS*, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

Three-dimensional geologic-geophysical analysis of the Bering Shelf to appraise the mineral and energy resources on and beneath the sea floor, study of geologic processes operating in the Bering Sea that govern formation or concentration of mineral resources, collection of data essential to the wise utilization of these resources and the development of the geologic history of the region. Project covers USGS work in direct conjunction with the University of Washington contract.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0017, SEWARD PENINSULA NEARSHORE

*D.M. HOPKINS*, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

Objectives are to assess the heavy-metal potential of nearshore areas adjoining the Seward Peninsula and submerged areas adjoining Little Diomed Island, Fairway Rock, King Island, and Sledge Island with emphasis on a search for submerged gold and tin placers; to establish the geomorphic history of these submerged areas, with emphasis on the identification of former positions of the shoreline, former extensions of the subaerial drainage systems, and evidence of late Tertiary and Quaternary tectonic movements; and to establish the detailed history of the last rise in sea level.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0018, MARINE-FLUVIAL INTERFACE, COASTAL OREGON

*R.J. JANDA*, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

Objectives of this study are: (1) To determine age and origin of marine terraces and their relation to prominent fluvial terraces, including both those exposed and submerged, and to compare the style of terrace deformation relative to that of older structures; (2) to study weathering reactions to determine possible role of weathering in generating economically important heavy metal placer deposits and the possible stratigraphic significance of soils; and (3) to evaluate the heavy metal deposits in the area.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0019, NEARSHORE HEAVY METAL DEPOSITS OF THE GULF OF ALASKA

*E.H. LATHRAM*, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

Objectives of this study are to establish the abundance and distribution of heavy metals in nearshore marine deposits of the Gulf of Alaska, particularly in the known black sand areas of Kodiak Island, Yakutat Bay and Lituya Bay; to relate the concentration and distribution of heavy metals to the geologic history of the Tertiary and Quaternary periods; and to contribute to the understanding of principles of heavy metal concentration and nearshore depositional processes as they relate to glaciated terranes. To achieve these long-range goals, a coordinated five-year program between the University of Alaska and the USGS has been established under a joint research contract.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0020, NORTHERN CALIFORNIA OFFSHORE BLACK SANDS

*G.W. MOORE*, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

The primary objective is to establish the abundance and distribution of heavy metals in nearshore marine deposits along the coast of California north of latitude 38 degrees. This is a southern continuation of the southwest Oregon black sands area. This work is being performed in coordination with the Scripps Institution of Oceanography under a joint research contract.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0021, HEAVY METALS AND SEDIMENTATION PROCESS OF THE NORTH CAROLINA SHELF

*P.D. SNAVELY*, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

Heavy metal sampling on the North Carolina continental shelf south of Cape Hatteras is underway. In addition, sampling for heavy metals analysis will be carried out in Pamlico Sound on the barrier island beaches, and in estuaries and rivers. The sampling program will be coordinated with other projects concerned with interpretation of shelf history and sedimentation processes. Aspects to be investigated include heavy mineralogy, feldspar mineralogy, quartz grain morphology, grain staining, as well as more routine parameters such as size and percent CaCO<sub>3</sub>.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0022, OREGON-WASHINGTON NEARSHORE

*P.D. SNAVELY*, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

Primary objective is to evaluate the economic potential of heavy metals in submarine and subaerial deposits of Quaternary age along coastal Oregon north of latitude 44 degrees N and along coastal Washington; preparation of land-sea geologic transects for areas containing significant deposits of heavy metals (black sands) to show distribution and thickness of deposits and relation to geologic framework.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

## 7. MARINE GEOLOGY

### 7.0023, GEOPHYSICAL AND GEOCHEMICAL STUDY OF RED SEA MINERAL DEPOSITS

*J.M. HUNT*, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543

A six weeks cruise will be made in the central and southern part of the Red Sea into the Gulf of Aden - an area known for extensive vulcanism. Plans are to (1) Make in situ measurements of the suspended matter in the brines. (2) Determine if the three brine pools are cooling off with a decrease in brine, or are heating up, or are stable. (3) Determine the precise location of the hydrothermal vent through a combination of mineral analyses, and series of strategically located heat flow measurements. It also may be possible to determine the magnitude and time of the last hydrothermal from these data. (4) Determine the probable nature of fluids emanating from the vent by analyzing interstitial water in cores taken as close to the vent as possible. (5) Determine the size of the mineral deposits with more controlled seismic profiling plus long cores. (6) Determine the extent of vulcanism south of 27 degrees N into the Gulf of Aden and the possible presence of other mineral deposits in this southern area. (7) Extend our knowledge of the stratigraphy and micropaleontology of the Red Sea into older stages of the Pleistocene. (8) Make surface and subsurface plankton tows from the Red Sea into the Gulf of Aden to obtain the information needed for more precise paleoecological interpretation of the fossil distributions in the cores.

SUPPORTED BY U.S. National Science Foundation

### 7.0024, POTENTIALLY-ECONOMIC SAND AND SILT DEPOSITS IN LAKE ONTARIO, NEW YORK

*D.L. WOODROW*, Univ. of Rochester, Graduate School, Rochester, New York 14627

The geometry, thickness and regional extent of widely spaced submerged beaches in Lake Ontario between Rochester and Henderson Harbor, New York will be mapped. The offshore gravel, sand and silt deposits lying between 10 and 100 feet depths will be studied to determine their economic quality as well as that of the landward silt and sand deposits, and to demonstrate continuity of the beaches in space and time of formation.

A fourteen day cruise over the area to be studied will be made taking continuous recording fathometer traces and subbottom profiles. Cores, dredge samples and underwater television pictures will be taken at selected sites; cores will be split and photographed on board ship, and SCUBA divers will take still photographs of the bottom and collect samples of organic materials. Lithographic logs of the cores, and grain-size and mineralogic analyses of the sands will be made. Summary maps will be compiled from bathymetric data, subbottom profiles and sediment data.

SUPPORTED BY U.S. National Science Foundation

### 7.0025, FORMATION AND DEGRADATION OF MANGANESE NODULES BY MARINE BACTERIA

*H.L. EHRLICH*, Rensselaer Polytechnic Inst., Graduate School, Troy, New York 12181 (NONR)

This task is concerned with the role of the marine microbial flora in the formation and degradation of manganese nodules. The nodules, which occur abundantly on the ocean floor, contain a high percentage of manganese along with rare elements such as cobalt, nickel, titanium, and tellurium. The nodules constitute a potential source of these valuable elements.

The question of the origin of manganese nodules has intrigued oceanographers since the discovery of these nodules during the Challenger Expedition of 1873-1876. The mode of formation of the nodules, and the probable role of marine bacteria in their formation, is of direct interest to oceanographers.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0026, MARINE MINERAL RESOURCES OF THE NORTH CAROLINA CONTINENTAL MARGIN

*O.H. PILKEY*, Duke University, Graduate School, Beaufort, North Carolina 28516

00NO SUMMARY HAS BEEN PROVIDED TO THE SCIENCE INFORMATION EXCHANGE

SUPPORTED BY North Carolina State Government

### 7.0027, SYMPOSIUM ON THE MINERAL RESOURCES OF THE WORLD OCEAN

*J.A. KNAUSS*, Univ. of Rhode Island, Graduate School, Kingston, Rhode Island 02881

The purpose of this task is to conduct a symposium on the mineral resources of the world ocean. The symposium will be held at the Naval War College, Newport, Rhode Island, on 10-12 July 1968 to discuss the ocean in geologic time, its mineral resources, new technology and engineering in the ocean, and public policy positions concerning the oceans. The meetings will be co-sponsored by the Navy, the Geological Survey and the University of Rhode Island.

The present trend in marine sciences throughout the world is toward the exploration and exploitation of the oceans. The development of public policies, legal questions and the science and engineering involved in tapping the mineral resources of oceans are all of importance to future Naval operations.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0028, STRUCTURE, MINERALOGY, AND CHEMICAL COMPOSITION OF MARINE MANGANESE NODULES

*R.K. SOREM*, Washington State University, Graduate School, Pullman, Washington 99163

The fine details of structure, mineralogy, and chemical composition of marine manganese nodules will be studied. A suite of about fifty nodules representing nine ocean bottom stations off the coast of Baja, California, will be investigated. The fundamental approach involves the preparation of high-quality polished sections, the recognition and cataloging of microscopic textures, the identification of minerals present and their mode of occurrence, and determination of the chemical composition of different parts of each nodule and its relationship to textures and minerals. Those relationships which appear to be primary in any one part of a nodule may then be interpreted in terms of the probable environmental conditions at the time of formation of that part. All special features such as erosion zones, pockets of fossils and clastic grains, and cross-cutting veinlets will be interpreted in terms of nodule growth history. Finally, all of the data will be correlated and summaries of the relationships will be shown in graphic and tabular form and an attempt will be made to explain the origin of the nodules studied.

SUPPORTED BY U.S. National Science Foundation

## 7B. GENERAL GEOLOGICAL STUDIES

### 7.0029, MARINE GEOLOGY OF CONTINENTAL MARGINS

*J.R. CURRAY*, Univ. of California, Graduate School, San Diego - La Jolla, California 92038

This unrestricted grant was awarded and has been used as supplementary support for the geological and geophysical research work of the investigator on sediments, structure and history of continental margins. It has supported a variety of projects covered primarily by federal grants. It also enabled completion of a study of the Holocene history of a wide strand-plain, barrier-lagoon system in Nayarit, Mexico. Lateral stabilization of the shoreline following the Holocene transgression can be demonstrated at 4750 years B.P., with seaward progradation starting between 4500 and 3600 B.P. This progradation has been by successive addition of beach ridges built atop longshore bars. Coastal climatic changes occurred at 3600 and 1500 B.P., which resulted in changes in longshore drift direction.

SUPPORTED BY Chevron Research Company

### 7.0030, CONTINENTAL MARGIN GEOLOGY

*J.R. CURRAY*, Univ. of California, Scripps Inst. of Oceanography, San Diego - La Jolla, California 92038 (NONR)

The objective is to understand the structure, materials, and history of the continental margin. The deep structure of the bottom is explored by reflection profiling, and the information col-

## 7. MARINE GEOLOGY

lated with that from cores and the known geology of adjacent shores. Work in progress on a book on continental margins is continuing and the manuscripts should be largely completed in 1968. During this year also, it is proposed to study the deep sea fan of the Ganges River during an SIO cruise on R/V ARGO.

A predictive capability for extrapolation to unsurveyed areas requires an understanding of: (1) the acoustic and physical properties of marine sediments, and (2) the sedimentary processes which determine these properties. This program will help provide the necessary understanding particularly with regard to continental margin areas.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0031, TECTONIC AND GEOLOGICAL HISTORY OF THE SOUTHWEST PACIFIC REGION

*H.W. MENARD*, Univ. of California, Scripps Inst. of Oceanography, San Diego - La Jolla, California 92038

It is proposed to mount a major expedition to the Southwest Pacific during April-December, 1967 to study the tectonics, regional geologic history, oceanography and geochemistry of the general area bounded by Australia and the Kermadec-Tonga trench-New Zealand structural line. Associated studies will be made in the trench, and in the equatorial region to the north, on the initial and final expedition legs, and on the land masses adjoining the region.

The proposed expedition, the fifth in a series of Department of Earth Sciences combined summer research expeditions and graduate student field research programs, will follow the pattern of previous expeditions in attempting to integrate work at sea and on land to provide a comprehensive regional study, and in covering a broad spectrum of geological, geophysical, and geochemical studies by staff members and students. Geological and geophysical studies will include reconnaissance and detailed bathymetric surveys with precision depth recording, seismic profiles, sub-bottom sonic profiling, heat flow, magnetic, and gravity measurements, coring and dredging, and geological mapping and radiometric age determinations on associated continental and island areas within and around the region. Oceanographic and geochemical studies will be made on the water masses, their isotopic composition and dissolved gas concentrations, and on gases, water vapor, and dust transport in the marine atmosphere, sediment cores will be dated and subjected to mineralogical and chemical analysis.

SUPPORTED BY U.S. National Science Foundation

### 7.0032, DEEP FLOW, WATER CHARACTERISTICS, TOPOGRAPHY AND SEDIMENTS IN THE CENTRAL PACIFIC AREA

*J.L. REID*, Univ. of California, Graduate School, San Diego - La Jolla, California 92038

It is proposed to measure the currents, various water properties, and sediments at abyssal depths and in relation to sea-floor structure, in critical areas of the central Pacific Ocean. Recent evidence of abyssal flow in much of the ocean and particularly in the Pacific Ocean has suggested that abyssal velocities are strong enough to be measured with simple current meters placed on the bottom. It is planned to measure these currents and examine sediment distribution where the shape of the sea floor might be expected to confine bottom currents, or where geological evidence indicates scouring of the sea floor.

SUPPORTED BY U.S. National Science Foundation

### 7.0033, SEA FLOOR ROUGHNESS

*UNKNOWN*, Univ. of California, Graduate School, San Diego - La Jolla, California 92038 (N00014-67-A-0109-0009)

Investigation of near bottom sea water properties and crustal geophysical properties are of interest to determine what influence these parameters have on sound propagation.

The improved deep tow equipment will be used to study bottom properties with particular emphasis on roughness, sound absorption, slope and magnetic properties and their effects on acoustic transmission and propagation. Documentation studies of

crustal velocity anisotropy will be conducted. Observations and analyses of magnetic field anomalies near seamounts and major oceanic rises and ridges will continue.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0034, PUERTO RICO COOP - MONA PASSAGE

*H.L. BERRYHILL*, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

Three-dimensional geologic and geophysical analysis of the Puerto Rican shelf necessary for wise utilization of submerged land such as disposal areas for mine tailings, and assistance to the University of Puerto Rico in the development of course of training in marine geology. Evaluate oil and gas, sand and gravel, and mineral potential (including heavy metals). This study is being performed in cooperation with the Department of Industrial Research, Puerto Rico Economic Development Administration.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0035, MARINE GEOLOGY OF THE SAN FRANCISCO BAY

*D.S. MCCULLOCH*, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

The objectives of this project are: (1) to establish the geology of the fault-bounded bedrock basin, its structure and tectonic history, the genesis, areal distribution, thickness, composition, physical and chemical parameters, and geologic history of the unconsolidated sediments of the Bay and the bordering areas of present and former marshlands; (2) to determine the earthquake and other geologic hazards associated with the sediments; (3) to contribute to the geologic history of a significant segment of the San Andreas fault system in support of the earthquake program; (4) to determine the gold content of the fine and coarse Bay sediments derived by erosion and hydraulic mining of the Mother Lode area and deposited in the Bay; and (5) to contribute data basic to the better understanding of the hydrology of the San Francisco Bay.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0036, CENTRAL CALIFORNIA CONTINENTAL MARGIN

*G.A. RUSNAK*, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

The objectives of this study are: (1) to prepare intermediate-scale geologic maps of the Pacific Coast continental shelf and slope between Pt. Conception and San Francisco; (2) to obtain shallow subsurface detail relating to rocks and structures underlying the sea floor of the area; (3) to assess the geologic conditions in terms of resources that may exist within the area; and (4) to provide geologic knowledge that is needed to explore the resources of adjacent land areas, and to evaluate potential hazards related to geologic conditions within this segment of the San Andreas Fault system.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0037, SUBSURFACE GEOLOGY OF HOGSTY REEF, AN ATOLL IN THE SOUTHEASTERN BAHAMAS

*M.M. BALL*, Univ. of Miami, Graduate School, Miami - Coral Gables, Florida 33124

The subsurface geology of Hogsty Reef, an atoll in the southeastern Bahamas, will be studied in order to solve two specific problems: (1) To determine the relative stand of a small atoll with respect to sea level during the last Pleistocene glacial cycle; (2) To study the paleogeomorphology of a Bahamian atoll with a view toward substantiating the proposed atoll nature of the Bahamas and comparison with the subsurface geology of some classic atolls of the Marshall Islands.

Samples from three 70 meter drill holes on the atoll will be analyzed by petrographic and geochemical means to determine the nature of the underlying strata.

Hogsty Reef is a small atoll, the coral reefs on which were probably killed off by lowered water temperatures during the

## 7. MARINE GEOLOGY

SUPPORTED BY U.S. Dept. of Defense - Navy

Wurmian. If subaerial erosion was an important atoll process during the glacial epochs, its effects should be well shown on Hogsty. However, lines of evidence indicate that Hogsty may be underlain by Pleistocene aeolian dunes near the present reef surface. Determination of the basement rock will be of use in worldwide studies of atoll dynamics.

Several lines of evidence suggest that the Bahamas have been atolls during the Tertiary. The aeolian dunes, if present, should be of minimal thickness and the drill cores should penetrate the Pleistocene-Tertiary boundary. The nature of underlying biogenic deposits will indicate the past geological environment.

SUPPORTED BY U.S. National Science Foundation

### 7.0038, SUBMARINE GEOLOGY OF THE BAHAMAS AND THE WEST INDIAN ARC

R.J. HURLEY, Univ. of Miami, Institute of Marine Science, Miami - Coral Gables, Florida 33124

This grant is for continued support of geological studies in the Bahamas and West Indies that have been supported by NSF Grants GP-2750, GP-2452 and GP-4197.

Following two largely exploratory cruises in the Lesser Antilles, two particular problems will be investigated. The existence of the Barbados Ridge, consisting of flysch sediments, on the southern continuation of the axis of the negative gravity anomaly of the Puerto Rico Trench, suggests partial filling and then compression of the southern part of a once more extensive trench. Understanding the geologic history of these features should provide a valuable insight on the nature of deep sea trenches. The second problem entails the detailed geology of the island arc ridge near Guadalupe where the single arc bifurcates to a double arc. There is evidence that a second (recent) phase of volcanism in the island arc occurred to the west of the earlier activity in the northern Antilles, forming the double arc.

SUPPORTED BY U.S. National Science Foundation

### 7.0039, GEOLOGIC SURVEY OF MARTABAN CANYON, NORTHEASTERN INDIAN OCEAN

K.S. RODOLFO, Univ. of Illinois, Graduate School, Chicago, Illinois

Martaban Canyon is a large submarine valley and canyon system incised into the Irrawaddy Delta shelf and slope. The Irrawaddy Delta is one of the major river deltas of the world, yet is one of the least understood. Martaban Canyon indubitably influences sedimentation off the Irrawaddy, and affords many clues to the sedimentational and tectonic history of the delta. A geologic reconnaissance of the canyon system during the International Indian Ocean Expedition has been accomplished as part of a doctoral dissertation. With this reconnaissance as planning control, it is proposed that approximately 1000 nautical miles of detailed bathymetric, gravimetric and geomagnetic track be made across the valley and canyon system and approximately 10 piston cores be taken from valley and canyon axes during the 1967 global cruise of the USC&GSS Oceanographer and that these data be evaluated in the light of local sedimentation and tectonics.

SUPPORTED BY U.S. National Science Foundation

### 7.0040, SEA-FLOOR SEDIMENTS AND ROCK STUDIES

R.L. CHASE, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543 (N00014-66-C0241)

This task concerns obtaining cores and dredge samples of sedimentary and basaltic rock in the North Atlantic Ocean, particularly over the mid-Atlantic Ridge, and making examinations of the content of these cores and those previously obtained in the North Atlantic Ocean and the Mediterranean and Red Seas. Core analyses include determinations of petrology, sedimentology, thermal conductivity, micropaleontology, and paleomagnetic stratigraphy. Cores will be photographed to provide permanent records. Ages of the sediments will be determined from micropaleontological analyses of foraminifera and from the remanent magnetism in the rocks (indicative of reversals in the ancient geomagnetic field). Sedimentation rates can be calculated from these age determinations.

### 7.0041, MARINE GEOLOGY

H.H. HESS, Princeton University, Graduate School, Princeton, New Jersey 08540

This research is directed toward the analysis and interpretation of geological and geophysical data from selected oceanic areas including the Gulf of Guinea, the Beata and Aves Ridges in the Caribbean, and the Gorda Ridge off the west coast of the United States. In addition, magnetic data over various oceanic regions will be compiled and analyzed for their relation to the concept of sea-floor spreading. Construction of bathymetric charts will be continued.

The effectiveness of naval operations is strongly dependent upon the physiography of the ocean bottom and the acoustic properties of the sediments in the areas of operation. This research program will help provide not only basic bathymetric and magnetic data, but also a predictive capability for extending this information into unsurveyed areas.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0042, GEOLOGIC INVESTIGATIONS IN PUERTO RICO & THE CARIBBEAN

P.H. MATTSON, City University of New York, Graduate School, Flushing - Queens College, New York 11367

The general aims of the project are to elucidate problems of Puerto Rican and Caribbean geology, mainly in the fields of volcanic and plutonic petrology, and structural geology. Problems currently under consideration include (1) major- and trace-element distributions in volcanic and plutonic rocks, (2) geochemical definition of major rock-stratigraphic units; (3) ultramafic rocks: emplacement, petrography, mineral deposits; (4) structure and petrology of basement rocks; (5) carbonate petrology; (6) chert petrology; (7) petrology and petrography of basement rocks; (8) structural analysis.

SUPPORTED BY Puerto Rico Government

### 7.0043, COLLECTION, ANALYSIS, INTERPRETATION, AND PRESENTATION OF OCEANOGRAPHIC - GEOLOGIC DATA IN CONNECTION WITH SUBMARINE CABLE SYSTEM DEVELOPMENT

D. HAYES, Columbia University, Graduate School, New York, New York 10027

NO SUMMARY HAS BEEN PROVIDED TO THE SCIENCE INFORMATION EXCHANGE

SUPPORTED BY Bell Telephone Laboratories

### 7.0044, UNDERWATER GEOLOGY IN THE OSWEGO AREA OF LAKE ONTARIO

A. DELPRETE, State University of New York, Graduate School, Oswego, New York 13126

Project objective is to study the general underwater geology in the Oswego area. Research using underwater photography, both black and white and color, to obtain a permanent record of bottom conditions at selected locations along the shore thus sedimentary structures, rock outcrops, erosional features, and glacial features as preserved below surface can be recorded for study.

Detailed study of sand samples is necessary including examination by means of a petrographic microscope. Sand should be sub-divided so that heavy minerals can be separated and studied for different areas.

Further investigations are needed in regard to local currents and related to local winds.

SUPPORTED BY State University of New York

### 7.0045, GEOPHYSICAL INVESTIGATIONS OF THE SOUTHWEST MARGIN OF JAPAN

M. EWING, Columbia University, Graduate School, Palisades, New York 10964

The principal investigators will coordinate their work with that of Dr. Sadanori Murauchi, National Science Museum, Tokyo. They will conduct a two-ship marine geophysical survey

## 7. MARINE GEOLOGY

of the southwest margin of Japan. The main purpose of the survey is to study the sediment distribution and crustal structure of the Nankei trough which extends from the mouth of Suruga Bay, Honshu, along with the foot of the island margin of southwest Japan to the southeast of Kyushu. The geophysical measurements will provide knowledge of the regional structure and may yield important clues to its development and evolution.

SUPPORTED BY U.S. National Science Foundation

### 7.0046, JOINT STUDY OF THE CONTINENTAL MARGIN OFF OREGON BY OREGON STATE UNIVERSITY AND THE UNITED STATES GEOLOGICAL SURVEY

L.D. KULM, Oregon State University, Graduate School, Corvallis, Oregon 97331

The study of the continental margin off of Oregon includes a three-dimensional geologic-geophysical analysis of the margin. The major objectives of the program are to determine its geologic history and to appraise the mineral and energy resources on and beneath the sea floor.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0047, SEDIMENTATION, MORPHOLOGY, AND STRUCTURE--MID-ATLANTIC RIDGE

T.H. VANANDEL, Oregon State University, Graduate School, Corvallis, Oregon 97331

Since 1964, a small group of investigators, mostly affiliated with Scripps Institution of Oceanography and Woods Hole Oceanographic Institution, has carried out a program of detailed and integrated geological, geophysical, sedimentological, and stratigraphic studies of selected portions of the Mid-Atlantic Ridge. It is the purpose of these studies to establish in detail the structural configuration, sediment distribution, and geologic history of the Ridge, and to relate these to geotectonic concepts as, for example, sea-floor spreading. It is proposed to complete the analysis of all geophysical data, the study of the provenance of the sediments, and the geologic synthesis of information for the Vema Fracture area, and to undertake, in cooperation with scientists from Woods Hole Oceanographic Institution and the U. S. National Museum in Washington, D. C., a study of portions of the normal Ridge near 45 degrees North latitude, between 2 degrees and 15 degrees South latitude, and south of 29 degrees South latitude. Also a study will be made of a portion of the non-volcanic Walvis Ridge for comparison.

SUPPORTED BY U.S. National Science Foundation

### 7.0048, MARINE GEOLOGY AND GEOPHYSICS

D.C. KRAUSE, Univ. of Rhode Island, Graduate School, Kingston, Rhode Island 02881 (NONR)

In submarine geology the effort is directed toward an understanding of the processes affecting sedimentation on continental shelves. The approach involves detailed studies of topographic-structural sedimentation relationships in two shelf areas of the Atlantic. One of these is the area off southern New England which has the glaciated character typical of northern hemisphere shelves. The other, Northwest Africa, is uninfluenced by direct glacial action and lies adjacent to arid, semi-arid and humid coastal areas. The geophysical program involves the use of seismic profiling, magnetometer measurements, echo sounding, coring, bottom photography and dredging in an effort to understand structure and the processes involved in forming and modifying the earth's crust beneath the oceans.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0049, MARINE GEOLOGY OF THE SUB-ANTARCTIC PACIFIC REGION

Y.R. NAYUDU, Univ. of Washington, Graduate School, Seattle, Washington 98122

In January 1968, the Principal Investigator on NSF Grant GA-1248 moved from the University of Washington to the University of Alaska, Institute of Marine Science at Douglas, Alaska. At the time the Principal Investigator left the University

of Washington, GA-1248 was an active research grant with approximately \$30,000 in unexpended funds. This proposal represents a continuation of the previous grant, with the research to be carried out at the University of Alaska by Dr. Mayudu. The University of Alaska proposes to continue the petrographical and geochemical analyses of selected samples from deep-sea cores from the USNS Eltanin. The data will be used to help determine the lithology, origin, petrology, and distribution of the sediments on the floor of the sub-Antarctic southern Pacific Ocean in the area bounded by Latitudes 30 degrees and 60 degrees S and Longitudes 120 degrees and 180 degrees W. Preliminary studies on surface lithology and geochemistry have been completed and a surface-current distribution pattern prepared. These will allow the Principal Investigator to select areas that need concentrated research. The data obtained would be used to evaluate and locate past marine isotherms and paleocurrents, to study frigid-water diagenesis, and to determine the origins of sediments of the different sediment facies.

No out-of continent travel is planned.

SUPPORTED BY U.S. National Science Foundation

## 7C. GEOCHEMISTRY - PETROLOGY

(composition and Dating of Rocks, Sediments, and Fossils.)

### 7.0050, CLAY-INORGANIC AND ORGANIC-INORGANIC ASSOCIATIONS IN AQUATIC ENVIRONMENTS

D.W. HOCD, Univ. of Alaska, Inst. of Marine Sciences, College, Alaska 99735 (AT(04-3)-310-3)

The overall objective of this years proposed research is to further our understanding of the chemical processes that accompany passage of sediment systems from glaciers to form marine sediments and the ancillary chemical effects of such processes on the local oceanographic environments. As in the past, the prime emphasis will be on the trace metal associations both in organic and inorganic processes. This years emphasis is on studies of the trace metal exchange equilibrium between the various size fractions of the suspended minerals and the water. The effect of organic material on this exchange will also be investigated. Analysis will be made by neutron activation techniques. In addition, concerted effort is being made to fractionate the organic matter previously found to contain significant quantities of Cu and Zn. Reverse osmosis and sephedex techniques are being employed.

Mineralogical data for both suspended and deposited sediments are complete for Taku estuary and is in press in Marine Geology. No evidence for major diagenetic changes in the minerals was observed in the estuary. The exchangeable cations on suspended sediments after contact with sea water show markedly different composition. The significance of this to flocculation processes is under study. Organic association with copper in an extractable form has been found and reported in 'Nature'. Other associations with a non-dialyzable fraction have been found and are now being characterized.

SUPPORTED BY U.S. Atomic Energy Commission

### 7.0051, CARBON-14 AGE PROFILE OF A HAWAIIAN REEF

W.H. EASTON, Univ. of Southern California, Graduate School, Los Angeles, California 90007

It is proposed to continue a coring program on Hanauma reef, Oahu, by drilling four additional core holes. In the work now planned, samples at about two-foot intervals from these borings and from cores taken in 1964 will be dated by the C-14 method. A profile of the reef will then be made in which lines of equal age can be shown. The project will establish the age of the reef, the rate of rise of sea level during perhaps the past 10,000 years, the rate of vertical and horizontal growth, and the consistency of the C-14 method in dating coral reefs.

Hanauma reef offers a rare opportunity to establish rates of reef growth both vertically and horizontally. Not only is the reef isolated in a small bay, but it occupies a unique geologic position in which it apparently grew after an explosion crater was invaded by the sea. The age of samples from the bottom of the reef therefore will not only establish the age of the reef but also a time be-

## 7. MARINE GEOLOGY

fore which the explosion craters were formed. The C-14 profile would be, so far as known, the first one made of a coral reef. It not only would provide a new method of profiling a reef, but the coring would enable a check with lithologic details and a check on consistency of samples for age-dating in a reef.

### 7.0052, BIOLOGICAL FRACTIONATION OF STABLE ISOTOPES

*I.R. KAPLAN*, Univ. of California, Graduate School, Los Angeles — U.C.L.A., California 90024 (AT(11-1)34-134)

The overall objective of the study is to understand the distribution of certain trace elements in the marine environment. In particular, an attempt is being made to ascertain the role microorganisms and other biological systems play in controlling the distribution at the sediment-water interface. Two approaches are being taken, (1) analysis of trace elements in the interstitial water of sediments (2) investigation of the biological fractionation of stable isotopes of sulfur by microorganisms.

It has been found that the distribution of trace elements is controlled very much by the redox system of the sediment. In the presence of hydrogen sulfide, iron and nickel appear to become solubilized. Copper, Zinc, Cadmium are generally most concentrated near the surface, suggesting contribution from organic matter. Uranium is concentrated in marine phosphate, and values as high as 500 ppm have been measured.

Investigation of the process of isotope fractionation (S34/S32) during sulfate and sulfite reduction by yeast and bacteria, indicate that the process is closely linked with the physiology and metabolic pathway of the organism and is not a simple equilibrium reaction. Fractionation factors depend on the oxidation state of the substrate and whether the organism is in a growing or testing stage.

New techniques for removal and analysis of trace elements in the ppb range have been developed.

SUPPORTED BY U.S. Atomic Energy Commission

### 7.0053, UPPER MANTLE OF OCEAN REGIONS

*G.C. KENNEDY*, Univ. of California, Inst. of Geophys. & Pl. Phys., Los Angeles - U.C.L.A., California 90024 (N00014-67-A0111-0001)

This task is a continuation of a high-temperature high-pressure laboratory investigation of minerals and rocks that are characteristic of upper mantle materials in the earth. Previous laboratory analyses have been made on these materials to pressures of 45 kilobars, and new measurements are being made to pressures of 80 kilobars. Emphasis is on minerals that comprise tholeiitic basalt, the principal type of lava material in ocean basins and ridges. The study provides data on the distribution of melting temperatures of this rock with depth in the crust and mantle, and provides information relating to the origin of the rock in the upper mantle of the earth.

These studies are of interest to the Navy because they provide information bearing on where and by what processes rocks segregate in the upper mantle that result in the large outpouring of lava flows in the oceans, including seamounts, oceanic ridges, and oceanic islands.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0054, GEOCHEMISTRY OF NUCLEIC ACIDS

*E. ROSENBERG*, Univ. of California, Graduate School, Los Angeles - U.C.L.A., California 90024

Objective: a. Problem: To extract, isolate and identify Nucleic Acids from core samples of marine samples from Mohole Project varying in depth from 0-170 meters beneath ocean floor. (The 170 meter sample geologically dated by fossils to be 30 x 10 to the 6th power years old) b. Application: Ability to detect nucleic acids in samples would provide valuable clue to existence, type of life that is (or was) present since nucleic acids play a central role in known forms of life.

Approach: Using varying organic extractives, test radioactivity of extracts for maximum nucleic acid minimum contaminants. Identification by ion-exchange and paper chromatography.

a. Reporting interval - June 2, 1964 - July 13, 1965. January 13, 1966 - July 13, 1966; July 13, 1966 - December 31, 1966 semi annual reports missing. Notified by SB. b. Analysis purine and pyrimidine bases from experimental mohole drilling of 1961 by newly developed extraction methods applicable to inorganic core samples.

SUPPORTED BY U.S. Natl. Aero. & Space Adm.

### 7.0055, MARINE GEOCHEMISTRY RESEARCH

*E.D. GOLDBERG*, Univ. of California, Graduate School, San Diego - La Jolla, California 92038 (AT(11-1)-34-84)

1. Determination of solubilities of neon, krypton and xenon as a function of temperature and salinity of seawaters to utilize in our field analyses interpretations. We have measured all of the noble gases in seawaters from the world oceans and have concluded that the noble gases are generally not in concentrations expected from thermodynamic equilibrium but are altered by physical processes. Better solubility values will allow a more rigorous evaluation of our results, the mass spectrometric determinations in sea water. 2. Geochemistry of fluorine through studies of its concentration in materials involved in the major sedimentary cycle. The analytical method, involving the photoactivation of fluorine in a linear accelerator, allows analyses to be made down to the 10 p.p.m. range. Our initial results have indicated a concentration in calcium carbonates precipitating from the ocean to levels of 1000 p.p.m. in corals. The chemical behavior of this element in nature is being illuminated by this work and our present studies indicate involvement in mineral formation where calcium ions precipitate or where micas are formed. 3. Developments of new geochronologies for the marine sedimentary record. The high values of thorium (100 ppm) in barites may allow Th/He dating of these minerals.

Results to Date: 1. The analyses of the rare gases helium, neon, argon, krypton and xenon in depth profiles obtained from the Pacific, Atlantic and Antarctic oceans show departures from thermodynamic equilibrium. Methods of analyses is mass spectrometric. 2. Development of geochronological techniques for the marine sedimentary column: uranium/ionium; ionium/thorium; uranium-234/uranium 238; beryllium-10; potassium argon. 3. Formation of ferromanganese nodules. Minor element composition of the ferromanganese minerals is controlled by the mineralogy and the formation of the mineral phases is depth dependent.

SUPPORTED BY U.S. Atomic Energy Commission

### 7.0056, ALTERATION OF MINERALS

*M.N. PETERSON*, Univ. of California, Scripps Inst. of Oceanography, San Diego - La Jolla, California 92038 (NONR)

The objective is to investigate the origin and alteration of minerals in the sea as major processes in determining the composition of sea water and marine sediments. The approach is to expose geologically significant materials either to natural water bodies on long-life moorings, or to approximations of natural solutions under laboratory conditions. Measurements are planned on aragonite, amorphous silica, and certain phosphates and sulfates.

This research will contribute to an understanding of the geographic distribution of these minerals in the deep-ocean sediments. In addition, the results of this study will allow constraints to be placed on the use of inexpensive construction materials, such as concrete, in the deep ocean.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0057, GEOCHEMICAL STUDIES OF DEEP-SEA DEPOSITS - THEIR SOURCES AND MODES OF DEPOSITION

*K.K. TUREKIAN*, Yale University, Graduate School, New Haven, Connecticut 06520

During the past eight years significant advances have been made in the study of the geochemistry and mineralogy of deep-sea sediments primarily in the Atlantic Ocean. With a thorough and sound framework it is proposed to bring these studies to fruition by concentrating on the processes that might be responsible for

## 7. MARINE GEOLOGY

the observed patterns. This calls for work on strontium isotope studies in ancient deep-sea sediments, and weathering profiles; the composition of planktonic calcareous organisms found in tows; the variations of trace element composition of detrital material carried by streams; and systematic statistical analysis of the large amount of data on deep-sea sediments to extract additional information on regional effects in trace element (including Mn and Fe) distribution.

SUPPORTED BY U.S. National Science Foundation

### 7.0058, A STUDY OF THE LEAD OXYCHLORIDES AND RELATED SPECIES FOUND IN THE ANCIENT SLAGS OF LAURIUM, GREECE

*P.E. DESAUTELS*, Smithsonian Institution, Washington, District of Columbia 20560

The action of sea water on the ancient slags from the silver mines at Laurium, Greece has created a series of interesting compounds through the centuries. Two of these species were discovered in the slags before being found in natural deposits.

This slag suite has never been studied adequately as a related group and the few species described are not well done. It is also obvious that several other species are present but not described.

A large quantity of material is on hand and will be systematically examined. X-ray and other standard mineralogical techniques will be used.

SUPPORTED BY Smithsonian Institution

### 7.0059, ROCKS OF OCEANIC CRUST AND UPPER MANTLE EQUATORIAL ATLANTIC

*W.G. MELSON*, Smithsonian Institution, Washington, District of Columbia 20560

This investigation is part of program concerning the nature, origin, and development of the suboceanic mantle and deeper layers of the oceanic crust. This particular project concerns rocks dredged from the Mid-Atlantic Ridge in the equatorial Atlantic, and from the Romanche Trench. Determinations of mineralogy, bulk chemical composition, and petrography provide the basic data in this project. This investigation will also include experimental work on the probable stability fields of low grade metamorphic assemblages derived from basalts and peridotites, two common oceanic rocks.

SUPPORTED BY Smithsonian Institution

### 7.0060, CONTRACT FOR-PROCESSING OF USARP ROCK SAMPLES

*T.E. SIMKIN*, Smithsonian Institution, Washington, District of Columbia 20560

Since the beginning of the U.S. antarctic program, huge collections of rocks have been brought back to the United States by field collectors, and the volume of unstudied specimens increases significantly with each passing year. One major source of the continuous influx of new specimens is the Eltanin operations, during which large numbers of unconsigned rocks are collected by bottom trawling. At the same time, geologists have expressed the desire to obtain samples of specific groups of antarctic rocks, but most often have been unable to do so unless they do the collecting themselves. Similar situations prevailed in other fields until sorting and distribution centers were established at the Smithsonian Institution (biology) and Florida State University (sediments).

This project at the Smithsonian Oceanographic Sorting Center (SOSC) provides for the preliminary identification, inventorying, and distribution to specialists of antarctic rock samples under procedures similar to those governing the processing of biological specimens by SOSC. The identification will start with megascopic work and include petrology of thin-sections of appropriate specimens. Inventorying will be closely tied to the data system for USARP specimens already in operation at SOSC (NSF Contract C-494). It is expected that most of the effort under this contract will be devoted to ocean-bottom rocks.

SUPPORTED BY U.S. National Science Foundation

### 7.0061, ROCKS OF THE OCEANIC CRUST

*T.E. SIMKIN*, Smithsonian Institution, Washington, District of Columbia 20560

Petrological studies of rocks from the ocean floor. Use of data to draw conclusions with regard to the evolution of the ocean basins.

SUPPORTED BY Smithsonian Institution

### 7.0062, RESEARCH ON MINERAL STRUCTURE REVEALED BY AN ELECTRON MICROSCOPE

*K.M. TOWE*, Smithsonian Institution, Washington, District of Columbia 20560

Uses an electron microscope to carry on research on mineral specimens and skeletal structures of biological organisms from the ocean.

SUPPORTED BY Smithsonian Institution

### 7.0063, CLAY CHEMISTRY

*D. CARROLL*, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

A study of the nature and identity of clays in the marine environment, and their alteration.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0064, PETROLOGY AND GEOCHEMISTRY OF IGNEOUS ROCKS FROM THE OCEAN FLOOR

*E. BONATTI*, Univ. of Miami, Graduate School, Miami - Coral Gables, Florida 33124

Igneous rocks form the backbone of mid-oceanic ridges and are present in other regions of the sea floor below a layer of sediments. Collections of rocks were obtained in recent cruises of the Institute of Marine Sciences from the East Pacific Rise and the Equatorial portion of the Mid-Atlantic Ridge, as well as from sea mounts located at various distances from the ridges. The rocks recovered from the Pacific are mainly tholeiitic basalts while those from the Atlantic include peridotites and serpentinites, gabbros and basalt. Ultramafics appear to be dominant in the deeper part of tectonic fractures which displace the Ridge. A detailed petrographic and chemical study of these samples and others to be collected in forthcoming cruises will be made. Optical microscopy, X-ray diffraction, and electron microprobe will be employed for the mineralogy; X-ray fluorescence, optical spectroscopy, atomic adsorption, neutron activation, isotope dilution as well as classical gravimetric and colorimetric methods will be employed for the chemistry. In addition to the major oxides, elements will be determined: particularly, the transition metals, the rare earths; U, Th, Rb, Sr, and Sr 87/Sr 86. K/Ar age determinations will be carried out in all suitable samples

SUPPORTED BY U.S. National Science Foundation

### 7.0065, NEUTRON ACTIVATION ANALYSIS OF IRON METEORITES

*D.E. FISHER*, Univ. of Miami, Graduate School, Miami - Coral Gables, Florida 33124

Work will be continued on the nuclear analysis of meteorites and related materials. Studies on the K/Ar ages of iron meteorites will be continued, Al abundances in pelagic samples will be determined, and chemical analysis of microtektites will be carried out, all using activation analyses. Cosmogenic C-14 in stone meteorites and cosmogenic Al-26, K-40, and Co-60 in iron meteorites will be analyzed. Fission track determinations on crystals abstracted from meteorites will be hopefully carried out.

SUPPORTED BY U.S. Atomic Energy Commission

### 7.0066, POTASSIUM/ARGON DATING OF DEEP-SEA SAMPLES

*D.E. FISHER*, Univ. of Miami, Graduate School, Miami - Coral Gables, Florida 33124

The purpose of this program is the dating of marine rocks and sediments by the K/Ar method, combining this work with

## 7. MARINE GEOLOGY

other experiments currently in progress. First, the reliability of the K/Ar method for dating marine samples will be rigorously investigated. When particular mineral phases have been judged to be acceptable for dating, the technique will be applied to the following problems: 1) the dating of sediments in which low-level gamma-emitting radionuclides will have been measured, in an attempt to trace back through time the infall rate of extra-terrestrial dust and the history of the solar proton flux; 2) the K/Ar dating will be combined with geochemical, mineralogical and micropaleontological studies of pre-Pleistocene sediments to extend back through the Tertiary the chronology for the variations in time of the parameters already analyzed for the Pleistocene; 3) rocks dredged from the ocean floor in specific relation to the mid-ocean rises will be K/Ar dated to critically test the hypothesis of spreading ocean floors.

SUPPORTED BY U.S. National Science Foundation

### 7.0067, THE MARINE GEOLOGY OF THE SOUTHERN OCEAN

H.G. GOODELL, Florida State University, Graduate School, Tallahassee, Florida 32306

Florida State University will continue to assist in the collection of rock material and sediment cores from the Antarctic region aboard the USNS Eltanin. Geologists at FSU will be responsible for processing the cores, their storage and sampling, and the distribution of samples to research scientists. Individual research projects based on the core and dredge samples at the Antarctic Core Facility are underway for each of the geologists and graduate students supported under that project. These include investigations into: 1) geochemistry and mineralogy of surface sediments, 2) geochemistry and petrology of indigenous volcanics, 3) paleosediment distribution at the Brunhes Matuyama boundary, 4) stratigraphy and ecology of coccoliths, 5) ice-rafted sediments and Antarctic glaciation, 6) geochemistry of manganese nodules, 7) radioisotope geochemistry of carbonate and noncarbonate sediments, 8) thermoluminescence of carbonate oozes, 9) radioisotope geochemistry of surface sediments, 10) mineralogy and geochemistry of zeolites in sediments and volcanics.

SUPPORTED BY U.S. National Science Foundation

### 7.0068, STUDIES IN MARINE CHEMISTRY

R.C. HARRISS, Florida State University, Graduate School, Tallahassee, Florida 32306

1. Chemistry and mineralogy of marine vertebrate bone mineral - A study of factors controlling the ratio of amorphous to crystalline material and trace element uptake in bone mineral of marine fishes. Project duration 6/68 - 6/70.

2. Effect of trace elements on crystal structure and solubility of bone mineral - Hydroxylapatite is precipitated in laboratory experiments at various levels of fluoride, magnesium, and pesticide concentrations. X-ray diffraction and electron microscopy are used to determine the effect of coprecipitated trace constituents on the lattice parameters and crystal size of hydroxylapatite. Project duration 6/68-6/71.

3. Marine geochemistry of some precious metals - The sources and distribution of Pd, Ir, and Au in deep sea sediments and manganese nodules is being investigated using neutron activation analysis. Project duration 1/67 - 6/70.

4. Atmospheric chemistry of boron and fluoride - Specific ion electrode techniques are being developed to investigate the loss of boron and fluoride across the sea-air interface and the subsequent distribution of these elements in the atmosphere. Consideration is also being given to problems related to atmospheric pollution.

National Research Council of Canada

### 7.0069, GEOCHEMISTRY OF CARBONATE CYCLE IN THE MARINE ENVIRONMENT

K.E. CHAVE, Univ. of Hawaii, Graduate School, Honolulu, Hawaii 96822 (N00014-67-A-0387-0002)

Calcium carbonate in the surface layers of seawater tends to precipitate out spontaneously in orifices of various kinds, altering the flow patterns and affecting naval machinery. In addition, calcium carbonate particles affect light scattering and acoustical attenuation and scattering. This research is investigating the processes of carbonate precipitation and, in particular, the effect of organic chemicals in seawater on the precipitation, dissolution, dispersal and deposition of these carbonate particles.

The research involves a survey of suspended minerals in seawater in the South Atlantic and Caribbean and in the Hawaiian and Line Island areas of the Pacific using research vessels for the collection of samples; laboratory studies of the chemical interactions between carbonate minerals and surface active organic molecules; and a study of production, dispersal and deposition of carbonate minerals in the cold waters off the California Coast.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0070, MARINE HYDROLOGY AND GEOCHEMISTRY, ATLANTIC CONTINENTAL SHELF AND SLOPE

R.H. MEADE, U.S. Dept. of Interior, Water Resources Division, Woods Hole, Massachusetts

Objectives: (1) To determine the rates and loci of fresh water (both surface and ground waters) and salt water along the Atlantic Coast, and to determine the influences of different factors on mixing processes. (2) To determine the chemical compositions of surficial sediments and older sedimentary rocks of the Atlantic Continental Shelf and Slope -- including the composition of their interstitial waters -- and to understand their areal and stratigraphic variations. (3) To determine the amount of suspended matter and to understand the dispersal of sediments in coastal waters.

Approaches: (1) Information on salinity (the main index of mixing of fresh and salt waters) and its variations in coastal waters is being compiled in atlas form, largely from existing data. (2) Chemical analyses (major and selected minor elements) are being made of surficial bottom sediments from the continental shelf and slope, and of rocks and interstitial waters that lie below the shelf and slope. Concentrations of suspended matter have been measured gravimetrically, and suspended constituents have been identified microscopically.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0071, GEOCHEMISTRY OF MID-ATLANTIC RIDGE SEDIMENTS

J.L. BISCHOFF, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543

The purpose of this investigation is to study the mineralogy, interstitial water chemistry, and geochronology of series of closely spaced cores to be taken during the summer of 1968 in conjunction with a geophysical and paleontological survey of the mid-Atlantic ridge, primarily in the area from 35 degrees to 45 degrees North. Review of previous work indicates many gaps, particularly regarding detailed work, in the correlation of data from the above fields of study.

SUPPORTED BY U.S. National Science Foundation

### 7.0072, RADIOELEMENT STUDIES IN THE OCEANS - GEOLOGY AND GEOCHEMISTRY ABOUT THE MID-ATLANTIC RIDGE

V.T. BOWEN, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543 (AT(30-1))

To increase our understanding of the processes removing radioelements to the sediments, and producing special sediment conditions for such removal, as well as to improve our knowledge of the significance of bottom sources of supply to element geochemical cycles we have undertaken, often on samples collected for other purposes, studies of the geochemistry of the mid-Atlantic Province.

SUPPORTED BY U.S. Atomic Energy Commission

## 7. MARINE GEOLOGY

### 7.0073, ANALYSES OF ROCKS COLLECTED IN THE INDIAN AND ATLANTIC OCEANS

R.L. CHASE, Woods Hole Oceanographic Inst. , Woods Hole, Massachusetts 02543

The main objective of this study is to analyze igneous, sedimentary and metamorphic rocks dredged from the Indian Ocean during the IIOE as well as from the Puerto Rico Trench, the Baracuda Scarp, the Mid- Atlantic Ridge and the Mediterranean Sea. Petrologic, chemical, magnetic, x-ray and isotopic analysis will be performed on the samples. This will be evaluated with regard to seismic, magnetic, gravity and paleontological evidence to further define the composition, structure and history of the oceanic crust.

SUPPORTED BY U.S. National Science Foundation

### 7.0074, BIOGEOCHEMISTRY OF TERRESTRIAL & EXTRATERRESTRIAL ORGANIC MATTER

E.T. DEGENS, Woods Hole Oceanographic Inst. , Woods Hole, Massachusetts 02543

Objective: Purpose: To determine the diagenetic fate of organic matter in marine sediments. To synthesize primordial proteins on clays containing heavy metal ions. To determine the biochemistry (amino acid and purine/pyrimidine composition) of microorganisms in exotic environments.

Application: Origin of life; formation of oil.

Approach: The changes in fossil organic matter are followed by modern chemical analytical techniques.

Progress: October 1965 - April 1966. A rapid method for analysis of purines and pyrimidines in sediments has been developed. The biochemistry of some sulfur reducing bacteria that live at 90 degrees C (approximately) showed the presence of hypoxanthine in place of adenine in DNA.

SUPPORTED BY U.S. Natl. Aero. & Space Adm.

### 7.0075, ISOTOPIC AND TRACE ELEMENT STUDIES IN OCEANIC VOLCANIC ROCKS

P.W. GAST, Columbia University, Graduate School, Palisades, New York 10964

A program of combined trace element studies (Rare Earth Elements, alkali metals and U, Th, and Pb and isotope studies (Pb and Sr) in several volcanic areas in the Atlantic is proposed. The specific objectives of this study are: 1. To characterize the source or sources of volcanic liquids in a given region with respect to their Pb and Sr isotope composition. 2. To relate the source isotope compositions to U/Pb ratios of observed magmas. 3. To relate variations in Rare Earth Elements ratios, U/Pb, Th/U, K/Rb and Ra 226/U ratios to degree of partial melting and fractional crystallization that are involved in magma forming and transport processes.

SUPPORTED BY U.S. National Science Foundation

### 7.0076, URANIUM GEOCHEMISTRY IN (MODERN) CARBONATES USING THE FISSION TRACK METHOD

G.M. FRIEDMAN, Rensselaer Polytechnic Inst. , Graduate School, Troy, New York 12181

The purpose of the proposed research is to define the geochemical relationships between uranium and carbonate material from a spectrum of carbonate depositional environments. Sample suites consist of sediments and carbonate hard parts of living organisms from hypersaline, marine, brackish, and fresh water environments, and land dwelling organisms. The results of uranium analyses will be examined with respect to environment, mineralogy, stable isotope data, and other available trace element data. The effect of carbonate diagenesis on uranium content and distribution will be examined on samples of known history. Water samples from the above environments will be analyzed in order to relate uranium content of environment to uranium content of carbonate material.

All uranium analyses will be obtained by routine fission track techniques. The carbonate mineralogy will be determined by conventional X-ray methods.

SUPPORTED BY U.S. Atomic Energy Commission

### 7.0077, SEDIMENT MINERALOGY (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION)

D.A. WOLFE, U.S. Dept. of Interior, Radiobiological Lab. , Beaufort, North Carolina 28516

Sediments have the capacity to scavenge many radionuclides from sea water. There is, however, little agreement as to the effect of this phenomenon on the food web of the sea. Will this scavenging action enhance or reduce the uptake of radioactivity by the biota? If organisms have the capacity to utilize the organic matter in sediments as a source of nourishment, sediment-sorbed activity could be passed along the food web to eventually reach man. Conversely, by adsorbing radioactive materials from sea water, sediments could reduce the possibility of contamination in many pelagic animals.

In order to determine the role of sediments in the cycling of radionuclides in the estuarine environment and to gain some insight into sediment-animal relationships, experiments on sediment-sorption of radionuclides are being carried out in the laboratory and in the field. Observations are made on the capacity of natural sediments and selected clay minerals such as montmorillonite, to scavenge radionuclides (zinc-65, cesium-137, and chromium-51) from sea water of varying salinity. Also, the partition of these radionuclides between the sediments, and biota of outdoor ponds will be studied.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 7.0078, RELATIONSHIPS BETWEEN PHOSPHATE AND OTHER CHEMICALS AT THE WATERSUBSTRATE INTERFACE IN WESTERN LAKE ERIE

N.W. BRITT, Ohio State University, Graduate School, Columbus, Ohio 43210

This project is designed to determine the chemical and physical relationships between the water and sediment in western Lake Erie. Little is known about the seasonal or longterm changes which have occurred or are occurring at various depths in the sediment and the overlying water. The specific areas of investigation include chemical determinations of the total phosphate, organic content, iron, sulfate, and arsenic content of the sediment and overlying water throughout the year.

Determination of the physical composition of the sediment may give an indication of the rate and amount of siltation. Redox potential and pH determinations should give an indication of some of the chemical changes occurring in the sediments and overlying water.

SUPPORTED BY U.S. Dept. of Interior - O. Water Res. Rch  
Ohio State University

### 7.0079, CARBON ISOTOPE GEOTHERMOMETRY

W.M. SACKETT, Univ. of Tulsa, Graduate School, Tulsa, Oklahoma 74104

The isotopic composition of the organic carbon in a suite of oceanic plankton samples has shown an apparent temperature dependence. Substantiation of this dependence may lead to another isotope paleotemperature tool for marine sediments.

Development of the carbon isotope geothermometer will be attempted through detailed isotopic analyses of additional plankton samples, controlled growth of unicellular green algae at different temperature and comparison of the isotopic organic carbon composition of selected intervals of cores of deep-sea sediments with other paleo-temperature interpretations.

SUPPORTED BY U.S. National Science Foundation

### 7.0080, AGE RELATIONS OF IGNEOUS ROCKS FROM THE MID-ATLANTIC RIDGE

J.B. CORLISS, Oregon State University, Graduate School, Corvallis, Oregon 97331

The project has evolved into a study of rare earth and other trace element distributions in basalts and greenschists from selected portions of the Mid-Atlantic Ridge for which detailed morphological and structural information exists. The elemental abundances are determined by instrumental activation analysis. These results and the associated petrology of the rocks are to be

## 7. MARINE GEOLOGY

integrated with other knowledge to gain insight into (1) variations in upper mantle composition beneath the ridge, (2) genetic relations between common rock types of the Ridge, and (3) effects of the alteration of the rocks on the sea floor.

SUPPORTED BY Amer. Chemical Society

### 7.0081, RARE GAS STUDY OF INTERPLANETARY MATERIAL IN PELAGIC SEDIMENTS

*D. TILLES*, Oregon State University, Graduate School, *Corvallis, Oregon 97331*

A study of the amounts and isotopic ratios of rare gases in mineral concentrates from pelagic sediments will be conducted. Fractions which may contain detectable amounts of extraterrestrial components will be isolated via mineralogical separations. Mass spectrometric measurements of anomalous rare gas amounts and isotope ratios will be made in gas released at successively higher temperatures. Rare gas anomalies, already observed in gas released from concentrates of pelagic sediments and particulates from polar ice, give great promise of being unambiguous indicators of an extraterrestrial origin. An ultra-high vacuum mass spectrometer with low-background and high sensitivity is essential to the study. Also required and included in the equipment requested are necessary components for a rare gas extraction, purification, and separation system, as well as specialized mineral concentration equipment for separating pelagic sediments. The program will combine mineral and grain size separation and rare gas mass spectrometry with X-ray diffraction and chemical analyses to attempt to learn as much as possible about the anomalous rare gas bearing phases in sea sediments.

SUPPORTED BY U.S. National Science Foundation

### 7.0082, NUCLEAR CHEMISTRY AND GEOCHEMISTRY RESEARCH

*T.P. KOHMAN*, Carnegie Mellon University, School of Engineering, *Pittsburgh, Pennsylvania 15213*

Mossbauer spectrometric studies of natural iron-containing materials (coal, minerals, rocks, meteorites, tektites), to determine the distribution and chemical form of iron in these materials, will be continued and may be extended to other elements.

Rates of nuclear reactions produced by negative muons from accelerators and the cosmic radiation will be investigated through measurement of induced radioactivity, and dating methods based on these reactions will be investigated.

In work on dating of climate-correlated deep-sea sediments, attempts will be made to apply simultaneously or complementarily a variety of dating methods to the same core: C14, Pa231 plus Th230 plus U234, Al26 plus Be10, and fission tracks in volcanic glass and authigenic minerals.

Measurement of natural I129 in terrestrial materials by activation analysis will be continued, and may be extended to stone meteorites, in order to obtain information about the past history of the terrestrial and cosmic environments.

The content and distribution in various types and phases of meteorites of Hg, Tl, Pb, and Bi will be determined by slow- and fast- neutron activation analysis, to provide information on the early history of the solar system.

The search for extinct natural radioactivity of Pb205 through thallium isotope studies in meteorites will be continued, and similar work on Pd107 and Sm146 may be undertaken. Preparations will be made for similar studies of lunar materials.

Cosmic-ray-produced radionuclides in iron meteorites, especially Be10, C14, Al26, Cl36, Ar39, Mn53, and Ni59, will be measured to determine the variations with depth and meteoroid size, and the results compared with calculations based on radiochemical studies of nuclear reactions produced by accelerator beams in thick targets.

Search for natural beta activity of Ca48 by the active-daughter- extraction method will be continued and possibly extended to Zr96.

SUPPORTED BY U.S. Atomic Energy Commission

### 7.0083, IGNEOUS AND SEDIMENTARY ROCKS FROM THE NORTH WALL OF THE PUERTO RICO TRENCH

*A.J. NALWALK*, Univ. of Pittsburgh, Graduate School, *Pittsburgh, Pennsylvania 15213*

NO SUMMARY HAS BEEN PROVIDED TO THE SCIENCE INFORMATION EXCHANGE

SUPPORTED BY Society of The Sigma Xi

### 7.0084, ISOTOPIC AND CHEMICAL COMPOSITION OF ORGANIC CARBONATES

*M.L. KEITH*, Penn. State University, Graduate School, *University Park, Pennsylvania 16802*

It is proposed to investigate the variability and specific ranges of carbon and oxygen isotopic composition, and possible relationships to chemical composition of modern organic carbonates, with particular emphasis on suites of samples from marine biogenic communities. A principal objective is to develop an understanding of characteristic compositional variations which can be attributed to vital effects of carbonate-secreting organisms. Accordingly, it is proposed to expand the current investigation of coral and algal carbonates to encompass other organic carbonates which vary widely in isotopic or elemental composition or which differ in composition from one taxonomic group to another. It is hoped that systematic data on composition and ecology will provide an improved basis for interpreting the genesis of limestones.

It is proposed to investigate the variability of isotopic and elemental composition of organic carbonates by systematic analysis of the carbonates of co-habitant organisms, and to examine and interpret the relationships among isotopic and chemical parameters. Proposed stages of investigation include: (1) Chemical analysis of Jamaican reef samples on hand, mainly coral and algal carbonates, whose isotopic composition has already been measured. Some of these show systematic relationships between C13 and O18, as yet unexplained; (2) Collection and analysis of additional specimens from the Jamaican reefs, including asteroids, barnacles, crinoids, crustaceans, echninoids, and foraminifera, as well as additional specimens of calcareous algae; (3) Systematic study of organic carbonates from one or possibly two additional reef communities, for comparison with the Jamaican reef carbonates.

### 7.0085, STABLE ISOTOPE FRACTIONATION IN ECHINODERM CALCITE

*J.N. WEBER*, Penn. State University, Graduate School, *University Park, Pennsylvania 16802*

A recently reported study of the carbon and oxygen isotopic composition of calcite deposited by echinoderms (sea urchins and sand dollars) has shown that these marine organisms fractionate carbon and oxygen isotopes up to as much as 13 permil with respect to the calcium carbonate secreted by other animals such as molluscs under the same ambient conditions. Isotope fractionation was demonstrated to be largely genetically controlled and the influence of environmental conditions was shown to be relatively unimportant. A striking correlation between isotopic composition and taxonomy was evident, and the calcite from each of the 260 individuals from polar to tropical seas and from littoral to abyssal depths was clearly not in isotopic equilibrium with the seawater environment.

The proposed work would include analyses of recent sea urchins, namely the starfish, brittle stars, crenoids, and sea-cucumbers. Preliminary analyses have shown that calcites of these echinoderms are out of isotopic equilibrium with the external environment. One of the most important elements of this research will be to determine the mechanism involving the carbon and oxygen isotope fractionation by echinoderms. This will include studies of the variations in the amino acids, and kinetic isotope fractionation during decarboxylation as a function of metabolism rate. It is also proposed to compare isotopic distribution patterns in recent fossils. It is anticipated that the above studies should provide a new approach to echinoderm phylogeny using fossil skeletons as indices.

SUPPORTED BY U.S. National Science Foundation

## 7. MARINE GEOLOGY

### 7.0086, TRACE ELEMENT AND STABLE ISOTOPE STUDIES OF CORAL REEF CARBONATES

J.N. WEBER, Penn. State University, Graduate School, *University Park, Pennsylvania* 16802

This proposal is a continuation of NSF grant GA-290, and it is concerned with the distribution of trace elements and stable isotopes in coral reef carbonates. The main objective is to determine the past environmental conditions that existed when the ancient reefs were formed in the geologic column.

(1) It is proposed to determine the extent of carbon and oxygen stable isotope fractionation during calcification of the major carbonate contributing marine invertebrates.

(2) To determine trace and minor element distributions within the marine invertebrates.

(3) To understand the development and distribution of ancient reefs, and to understand the effects of diagenesis, tending to alter the chemical and/or isotopic composition of these reefs.

SUPPORTED BY U.S. National Science Foundation

### 7.0087, RADIOCARBON DATING OF A HAWAIIAN REEF PROFILE

E.A. OLSON, Whitworth College, Graduate School, *Spokane, Washington* 99218

The objective of this proposal is to elucidate the pattern and chronology of reef development in Hanauma Bay, Oahu, Hawaii through radiocarbon dating of four cores. For each of the four reef cores obtained, age measurements will be made of top and bottom material plus four samples spaced throughout each core. It is hoped to establish 1) the age of the reef, 2) the rate of rise of sea level during perhaps the past 10,000 years, 3) the rate of vertical and horizontal growth, and 4) the consistency of the C14 method in dating coral reefs.

SUPPORTED BY U.S. National Science Foundation

## 7D. GEOPHYSICS - STRUCTURAL GEOLOGY

(*origin and Evolution of Ocean Basin Structures; Geophysical Studies of Oceans; Seismic Propagation.*)

### 7.0088, STUDIES OF EARTHQUAKES IN THE CAPE MENDOCINE AREA

B.A. BOLT, Univ. of California, Graduate School, *Berkeley, California* 94720

This is a new task in partial support of telemetering local earthquakes recorded at two stations in northern California (Arcata and Mineral) to the main station at Berkeley, California, and in support of studies on earthquakes originating at sea near Cape Mendocino, California. Telemetering earthquake recordings at the Arcata and Mineral stations to the Berkeley station will permit more rapid and accurate determinations of earthquake origins and epicenters in the area off the coast of Cape Mendocino than is now possible with the existing station network tied in to Berkeley.

More earthquakes occur off the coast of Cape Mendocino than anywhere within California. These quakes are sometimes large enough to cause damage to harbor facilities and such naval installations as underwater cables. It is of interest to know about the occurrences of these earthquakes, particularly their epicenters and magnitudes, to determine whether they could have been the cause of observed damage. Telemetering data from Arcata and Mineral will increase the accuracy of presently located epicenters and origin times in this region.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0089, INELASTIC SEISMIC EFFECTS

P. LIEBER, Univ. of California, School of Engineering, *Berkeley, California* 94720 (N00014-67-A-0114-0003)

This research is directed towards determining the effects of earth inelasticity on seismic surface wave propagation and on earthquake mechanisms. The dispersion, selective absorption, and attenuation of seismic Love waves propagating in an inelastic model of the earth's crust and mantle are being quantitatively evaluated and compared with observed seismic surface-wave data. The comparison will then serve as a basis for refining the inelastic parameters used in the earth model.

The propagation of acoustic waves through the ocean and underlying rocks is important in certain Naval operations. This program should help provide a basic understanding of these propagation properties. In addition, the analytical capabilities being developed in this program may prove useful in studying hydrodynamic processes which, although acting deep within the earth, have a strong influence on surface features and properties.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0090, CONTINUITY OF CLIPPERTON AND CLARION FRACTURE ZONES

M.N. BASS, Univ. of California, Graduate School, *San Diego - La Jolla, California* 92038

A continuous reflection profile along 91 degree W longitude failed to confirm the continuity of structure between Clipperton fracture zone and the Santa Elena Peninsula, Costa Rica, which is suggested by the geology and structural trends and which has been proposed by other investigators. This raises a more general question about the continuity of fracture zones, particularly those like Clarion and Clipperton, whose topographic expression is, as now known, sporadic. It is proposed to run about ten reflection and gravity profiles across those segments of Clarion and Clipperton in which local topographic relief is subdued or wanting.

SUPPORTED BY U.S. National Science Foundation

### 7.0091, REFLECTION PROFILING OF THE SEA FLOOR

J.R. CURRAY, Univ. of California, Graduate School, *San Diego - La Jolla, California* 92038

This amendment is for supplemental funds and time to make it possible for completion of specific research projects already in progress. These projects include reflection profiling of the floor of the Pacific Ocean, continued studies of the continental margin off Western North America, studies of coral atolls in the southwest Pacific, and investigations of different parts of the Clipperton and Clarion Fracture zones.

SUPPORTED BY U.S. National Science Foundation

### 7.0092, STRUCTURE OF OCEAN BASINS

R.L. FISHER, Univ. of California, Graduate School, *San Diego - La Jolla, California* 92038 (NONR)

The objective is to interpret the topography and structure of the deep ocean floor in terms of the controlling processes. For several years, attention has been concentrated on the southwest Pacific and the Indian Ocean. This work entails preparation of very detailed bathymetric charts based on all available data and on new soundings made for the purpose. During the coming year, two segments of the Mid-Indian Ocean Ridge will be explored by geophysical and geological methods. Observations and samples made during 1967 on expedition NOVA will be analyzed.

Operations which utilize underwater sound are strongly dependent upon the physiography of the ocean bottom and upon the acoustic properties of the sediments in the areas of operation. In addition, naval operations such as magnetic navigation, can be made more effective if prior knowledge of the earth's magnetic field is available. This program will help provide not only basic bathymetric and magnetic data, but also a predictive capability for extending this information into unsurveyed areas.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0093, ROCK SAMPLING AND GEOPHYSICAL STUDIES IN THE TONGA KERMADEC TRENCH SOUTHWEST PACIFIC

R.L. FISHER, Univ. of California, Graduate School, *San Diego - La Jolla, California* 92038

This proposal is primarily to cover acquisition of a camera system to photograph the bottom and sides of the Tonga-Kermadec Trench prior to dredging these areas. Localities for photography and dredging will be based on reflection profiling carried out during a major expedition to the Southwest Pacific during April - December 1967.

SUPPORTED BY U.S. National Science Foundation

## 7. MARINE GEOLOGY

### 7.0094, STUDY OF EARTH NOISE ON LAND AND SEA BOTTOM

F. GILBERT, Univ. of California, Graduate School, San Diego - La Jolla, California 92038

Objective: This investigation is aimed at a description and understanding of the seismic background noise on land and the sea bottom. The research will investigate the use of large land arrays and ocean bottom seismographs to observe and record earthquakes explosions and seismic noise in wave number space. That portion of the program involving land arrays will utilize the Vela Uniform Programs, Tonto Forest Seismological Observatory at Payson, Arizona, to investigate the partition of energy in leaky and trapped modes in the continental wave, guide the scattering of energy between trapped and leaky modes and dissipation of seismic energy as a function of frequency and wave number and attempt to cross-correlate between the acoustic and seismic signals at ultra-low frequencies (1 to 3 cycles). The ocean bottom portion of this research will continue to use and further develop the ocean bottom seismograph system developed earlier in this program. In close conjunction with the land work definitive measurements of the propagation of seismic signals across the land ocean boundary will be made and thus study the transition zone which couples the oceanic wave guide to the continental guide.

SUPPORTED BY U.S. Dept. of Defense - Air Force

### 7.0095, DEEP OCEAN AS RECIPIENT OF VOLATILES AND SOLUTES

J.S. HANOR, Univ. of California, Graduate School, San Diego - La Jolla, California 92038

A detailed study will be made within a selected area in the East Central Pacific of the lateral and stratigraphic distribution of barium, manganese, iron and other elements indicative of hydrothermal activity. The purposes of this study are: 1) to locate and identify specific loci for the hydrothermal injection. 2) to determine whether there have been fluctuations in the intensity and extent of hydrothermal mineralization with time, and if so, to determine if these correlate with known periods of tectonism, volcanism, and mineralization on the continents. 3) to ascertain whether the distribution is consistent with ocean floor spreading from the East Pacific Rise.

SUPPORTED BY U.S. National Science Foundation

### 7.0096, RECENTLY PRECIPITATED DOLOMITES AND ASSOCIATED MINERALS

M.N. PETERSON, Univ. of California, Graduate School, San Diego - La Jolla, California 92038

Rates of crystal growth and sequences of formation of phases, of dolomite and associated Ca-Mg carbonates, with added emphasis on the formation of authigenic silicates, including clay minerals and inorganic chart.

SUPPORTED BY Amer. Chemical Society

### 7.0097, MOHOLE SITE STUDIES

G.G. SHOR, Univ. of California, Graduate School, San Diego - La Jolla, California 92038

The National Academy of Sciences Site Selection Committee, Advisory to the Mohole Project, recommended in September 1965 that detailed seismic surveying along the Hawaiian Arch in the vicinity of the Mohole site northeast of Maui is necessary prior to making further plans. It was also recommended that further reconnaissance geophysical surveying along the arch be conducted.

The problems connected with the Hawaiian Arch that need to be solved prior to mantle drilling in 1968 are: 1. to the mantle at the present site is required. 2. The possibility of even shallower sites along the Arch needs to be investigated. 3. The possibility of seismic anisotropy at the site needs to be solved. There is much indication that mantle seismic velocities may vary with azimuth. If so, depth calculations to the mantle could be affected. This possibility is slight but it requires checking. 4. Sediment cores from the Hawaiian site and along the Arch are required for bearing strength determinations. A 65,000 - 75,000 pound landing base must be supported on the bottom during drilling. The shear

strength of the sediments must be determined so that the landing base can be designed. 5. Gravity and magnetic observations need to be extended in the area both for background information and as a guide for seismic surveying.

The University of California at San Diego, Scripps Institution of Oceanography, will conduct the surveys in cooperation with the Universities of Hawaii and Wisconsin, to accomplish these objectives. Oregon State University has also agreed to provide a vessel, the R/V YAQUINA.

SUPPORTED BY U.S. National Science Foundation

### 7.0098, GRAVITY FIELD AT SEA

P.M. SPIESS, Univ. of California, Graduate School, San Diego - La Jolla, California 92038 (NONR)

This research is directed toward the measurements of the earth's gravity field over the oceans and the investigation and interpretation of the anomalous variations which we observed. During the coming year, gravity data taken on the recent NOVA expedition to the Southwest Pacific will be reduced and analyzed.

The accuracy of inertial navigation systems which are used extensively by the Navy is presently limited by insufficient knowledge about the earth's gravity field and deflections of the vertical. In support of efforts to remove this limitation, this program is (1) providing gravity data over the world's oceans and (2) contributing to the basic understanding of gravity variations which is necessary for the prediction of deflections of the vertical.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0099, DETECTION OF DEEP-SEATED ANOMALIES IN ELECTRICAL CONDUCTIVITY UNDER THE GULF OF CALIFORNIA

V. VACQUIER, Univ. of California, Graduate School, San Diego - La Jolla, California 92038

It is thought that the Gulf of California is part of the world ridge-rift system which intersects the North American continent via the East Pacific Rise and, as a consequence, may be an example of the earliest stage of continental drift. In searching for a plausible mechanism explaining the East Pacific Rise and the splitting of the Gulf of California--the high heat flow in both areas suggests that the ultimate source of energy is thermal. This proposal presents a program to investigate the depth of these sources of thermal energy beneath the Gulf of California. Magnetic time variations in three components will be measured across the Gulf of California making use of islands for station sites. The analysis of these variations should determine whether or not the Gulf is a rift caused by the rise of hot mantle material. A similar study made across the Rio Grande rift belt demonstrated a correlation between surface heat measurements and the geomagnetic time variations, and forms the basis for the present proposal. The personnel manning the astrometric observatory sites (GP-4639) will be used to man some of the three component magnetometer stations.

SUPPORTED BY U.S. National Science Foundation

### 7.0100, HEAT FLOW MEASUREMENTS

V. VACQUIER, Univ. of California, Graduate School, San Diego - La Jolla, California 92038

It is proposed to investigate the heat flow of the previously unstudied areas of the Melanesian subcontinent and of the Philippine Basin. The latter area will be investigated by S. Uyeda and his colleagues of the University of Tokyo under the U.S. Science Program. The measurements in the Melanesian subcontinent should determine whether or not this region is at the intersection of an ocean basin and a highly faulted oceanic rise. Following this is a proposed comparison of heat flow measurements and magnetic time variations across areas of known high heat flow off the coast of Central America. While detailed heat flow measurements investigate the size and depth to the near-surface igneous activity and analysis of the magnetic time variations should determine the spatial distribution of the source of this activity. It is also intended to study the significant difference discovered, during the AETES 1966 cruise of R/V ARGO, between the in situ method and the

## 7. MARINE GEOLOGY

normal indirect on-deck methods of measuring thermal conductivities of ocean bottom sediments. Finally, it is planned to analyze the absolute changes in bottom water temperature in the Pacific during the past four years to test the assumption that the bottom water temperature in the deep ocean is constant with time. This is the basic assumption governing the measurement of the outward flow of heat through the ocean floor.

SUPPORTED BY U.S. National Science Foundation

### 7.0101, GEOLOGICAL OCEANOGRAPHY - ACOUSTICAL PROPERTIES OF SEDIMENTS

J.J. GALLAGHER, U.S. Navy, Underwater Sound Lab., New London, Connecticut

Objective: To determine those environmental factors affecting acoustical uses of the ocean. To investigate and define the physical properties of the ocean bottom sediments and the statistical character of the bottom topography and relate to acoustical scattering and attenuation.

Approach: Using submersibles and surface vessels, make in situ measurements of sound velocity in sediments, obtain cores in both deep and shallow water and analyze for properties of interest. Develop and use in situ probes. Make photographic and echo-sounding records of bottom topography and roughness, both macro- and micro-relief. Make laboratory analyses and do routine core analysis under contract with the University of Rhode Island.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0102, HYDRAULICS AND DYNAMICS OF ESTUARIES

T. SAVILLE, U.S. Army, Coastal Engin. Res. Center, Washington, District of Columbia 20016

Hydraulics and dynamics of inlets and estuaries, including both flow and sedimentation and erosion processes will be studied in models and the field, with theoretical analysis. Estuarine erosion as a result of wave action and high water levels will be a specific part.

SUPPORTED BY U.S. Dept. of Defense - Army

### 7.0103, MARINE GEOLOGY STUDIES, GULF OF MEXICO-CARIBBEAN REGION

H.L. BERRYHILL, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

Long-range objectives are: (1) A systematic and coordinated study of the tectonic framework of the Gulf of Mexico-Caribbean region; as a means of determining how the geologic setting affects modern sediment patterns and how tectonic movements affected the accumulation of thick sequences of sedimentary rock in the past; and (2) an appraisal of the marine resources of the region and an understanding of the relation of occurrence and distribution of these resources to geologic processes.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0104, WESTERN PACIFIC ISLANDS

G. CORWIN, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

In the Hawaiian Island group the objective is to determine the submarine extent, sequences, and kinds of recent lava floors off Hawaii, thus supplementing the onshore studies of volcanism of the Hawaii Volcano Observatory. Investigations will continue off Island Territories including the Trust Territory of the Pacific. These are concerned with specific problems of structure and changing sea level that have come into focus as a result of the geologic mapping of these islands by the U. S. Geological Survey.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0105, ARCTIC BASIN HEAT FLOW

A. LACHENBRUCH, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

This task investigates the distribution of earth-heat flow throughout the Arctic Ocean Basin and, insofar as possible,

identifies the controlling factors. Field studies are conducted aboard drifting ice stations. Direct measurements are made of thermal gradients in bottom sediments by means of lowered thermal probes. Bottom cores are retrieved for subsequent laboratory analysis of thermal conductivity. Values of heat flow at each locality are calculated by multiplying temperature gradient by thermal conductivity and correlated with similar data derived in continental arctic regions to establish a world-wide pattern of heat flow.

Establishment of a heat flow pattern in the Arctic Basin is essential to understanding the region's crusted history and distribution of zones of volcanism and volcanic activity. Heat flow data in combination with other available geophysical evidence, further determine the nature of materials and processes in the earth's crust.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0106, GEOPHYSICAL SURVEYING AND CHARTING

A.J. HECKELMAN, U.S. Navy, Oceanographic Office, Washington, District of Columbia

Objective: Develop high speed survey techniques which will increase, by a factor of three or more, the rate of data acquisition for charting deflection of the vertical. Charting deflection of the vertical presently involves classical mathematical solutions to gravity survey data.

Present survey capabilities are not adequate to chart deflection of the vertical in the desired time frame. High speed platforms (40 knots or better) could operate in conjunction with these survey ships thereby increasing the volume of data available for the standard reduction technique and possibly a technique could be devised to determine directly the deflection of the vertical by passing the standard classic mathematical solution thereby reducing the amount of survey required for each area. Determine minimum repeat airborne survey effort required to correct world magnetic charts for secular variation in order to attain chart accuracy.

Approach: Participate in the DOD triservice helicopter gravity measuring system (HGMS) test. Evaluate test results and develop specifications and techniques for navy utilization of HGMS. Test gravity meters on board other types of high speed platforms and develop techniques for this utilization. Determine the feasibility of directly measuring deflection of vertical from a ship or aircraft. Prepare specifications for a deflection of vertical sensor. Procure, test and evaluate a deflection of vertical sensor. Determine a best mathematical model for the world magnetic field. Isolate harmonics which vary with secular variation. Determine relationship of secular isoporic foci with geologic zones. Delineate areas requiring repeat surveys.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0107, SEAMOUNT INVESTIGATION

P.T. TAYLOR, U.S. Navy, Oceanographic Office, Washington, District of Columbia

Objective: To complete the analysis of geophysical data obtained during FY 1968. Present these data in oral and written form. Schedule and participate in two cruises on a ship of opportunity basis.

Approach: After final data reduction the geophysical results obtained in FY 68 will be analyzed. These results will be illustrated and prepared for presentation at a scientific meeting. The results of last FY show that the seamount in question warrants further study. A small survey of this seamount by the USNS SHOUP is planned in FY 69 (2nd Quarter). This will enable gravity data to be collected which will greatly aid in further interpretations. Another cruise aboard the USNS COMPASS ISLAND is planned with Hudson Laboratories. This will enable the investigators to use the technique of acoustic signalling to detect seamounts. A geothermal probe plus thermal conductivity device will be obtained, and will aid in testing why the seamount under study has an uncommon magnetic anomaly pattern. These devices are scheduled for use in the first quarter - FY 1970.

SUPPORTED BY U.S. Dept. of Defense - Navy

## 7. MARINE GEOLOGY

### 7.0108, ACOUSTIC PROPERTIES OF SEDIMENTS

R.S. WINOKUR, U.S. Navy, Oceanographic Office, Washington, District of Columbia

Objective: To conduct basic research to investigate the acoustic properties of bottom sediments in order to provide a basic understanding of the interrelationships between the acoustic and physical properties of the sea floor and subbottom.

Approach: Investigations will be conducted in the field and laboratory to determine the acoustic properties, such as compressional and shear wave sound speed, and absorption, of sediments collected from a variety of physiographic provinces and to determine fundamental relationships with sediment physical properties. Statistical methods will be used to identify significant relationships in order to develop quantitative predictions of the acoustic properties of sediments. Shear and compressional wave sediment sound speed measurements will be made as a function of hydrostatic and overburden pressure, as well as temperature. In situ sound speed and absorption measurements will be made by seismic methods and by utilizing ocean bottom hydrophones and sediment probes. The acoustic properties of consolidated as well as unconsolidated sediments will be investigated by utilizing the long cores collected during the JOIDES program. Estimates of sediment elastic properties will be made from the acoustic and physical properties, and the acoustic properties will be compared to theoretical predictions. Whenever possible, correlations between time-stratigraphic surfaces and acoustic layering will be sought.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0109, OCEAN-SEDIMENTS AND CRUSTAL STRUCTURES IN THE BAHAMIAN-CARIBBEAN AREA

M. BALL, Univ. of Miami, Graduate School, Miami - Coral Gables, Florida 33124 (NONR)

Objective: Navy needs for deep-sea salvage and other operations and for installation of engineering structures in the Bahamian-Caribbean region require knowledge of ocean sediment and rock structures in that area. These activities are affected by variations in crustal structures, particularly those associated with the unusually steep continental slopes in the area. This research will provide knowledge on the structures and composition of sediment layers and crustal rocks in the Caribbean Sea, across continental slopes off eastern Florida and the Lesser Antilles Islands, and in the Bahamian region.

Approach: Seismic reflection and refraction measurements will be made from a ship to determine sediment thicknesses and structures, and crustal layering at selected sites in the Bahamian-Caribbean area. Emphasis will be on structures across the continental-oceanic transition zone. Sediment cores and bottom photographs will be obtained to determine sediment composition and evidence of bottom currents. Magnetic measurements will be made with a ship-towed magnetometer to determine structures beneath sedimentary rocks.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0110, GEOLOGICAL AND GEOPHYSICAL INVESTIGATION OF THE BAHAMA BANK

M.M. BALL, Univ. of Miami, Graduate School, Miami - Coral Gables, Florida 33124

A geophysical and geologic investigation of the continental to oceanic crustal transition zone at the eastern edge of the Great Bahama Bank will be carried out as a continuation of past research. Objectives during the two years period are to complete bathymetric mapping of the study area, construct networks of magnetic and reflection seismic profiles over the study area, and extend and cross tie existing gravity data to serve as a basis for constructing approximate crustal models. In connection with these aims it is hoped to define and interpret the shallow structures that reconnaissance measurements have revealed in Exuma Sound and in the Atlantic Ocean to the east, and identify the rock and sediment types and ages involved in these structures. Ultimately it is hoped to discern the nature and configuration of boundaries within the crustal transition zone above and including the Mohorovicic.

SUPPORTED BY U.S. National Science Foundation

### 7.0111, A STUDY OF THE STRUCTURAL RELATIONS BETWEEN THE MID-PACIFIC OCEANIC RIDGES AND FRACTURE ZONES

A. MALAHOFF, Univ. of Hawaii, Graduate School, Honolulu, Hawaii 96822

The structure and physiography of the fracture zones and ridges of the mid-Pacific have obvious bearing on the origin of the Pacific Ocean Basin and the stress patterns that gave rise to these mid-oceanic features. The mid-oceanic features have obvious tectonic and stress relations to the margins of the Pacific, where land located slip-strike faults and north-south aligned magnetic anomalies near the California coast contrast sharply with the largely east-west striking anomalies of the Molokai and Murray Fracture Zones near the Hawaiian Islands. Therefore a pilot geologic and geophysical study over the whole length of such a fracture zone as the Murray would do much to resolve where the north-south striking magnetic anomalies give way to the east-west striking ones and how the fracture zone is related to such prominent features as the Hawaiian Ridge, the Marcus-Necker Ridge, the Line Islands Ridge and other fracture zones, such as the Molokai. The Molokai Fracture Zone and its relationship to the Hawaiian Ridge has already been studied intensively in the neighborhood of the Hawaiian Islands. A pilot study as outlined above is proposed in the following program: (1) Total force magnetic surveys in a broad swath across the postulated strike of the Murray Fracture Zone (2) Seismic reflection studies to detect any vertical displacements in the sedimentary layers along the postulated strike of the Murray Fracture Zone (3) Precision echo-sounding surveys to accurately map the bathymetric features in the proposed area of survey (4) Selected gravimetric profiles across the Marcus-Necker Ridge (5) Dredging of hard rock samples along the Marcus-Necker Ridge and sedimentary coring in the basins adjacent to the ridge and (6) Bottom photography along the crest of the Marcus Necker Ridge.

SUPPORTED BY U.S. National Science Foundation

### 7.0112, GEOPHYSICAL AND GEOLOGICAL STUDY OF THE DARWIN RISE

G.P. WOOLLARD, Univ. of Hawaii, Graduate School, Honolulu, Hawaii 96822

Two two-month research cruises will be made to the area of the Darwin Rise in the western central Pacific. Observations will include bathymetry, seismic reflection, shallow refraction, gravity, magnetics, heat flow, bottom photography and sediment coring. The intent is to generate an adequate geophysical description of the area so that conflicting theories concerning the nature of the feature and its relationship to the evolution of the ocean basin can be examined. This one year program is in the nature of a reconnaissance to set the stage for more definitive studies which will include deep refraction measurements.

SUPPORTED BY U.S. National Science Foundation

### 7.0113, MARINE GEOPHYSICAL STUDIES IN THE PACIFIC OCEAN

G.P. WOOLLARD, Univ. of Hawaii, Hawaii Inst. of Geophysics, Honolulu, Hawaii 96822

The Navy must understand the physical properties of the oceanic environment and the processes affecting them in order to execute its missions effectively. Objectives of this task meet these Navy needs and in the study of the deflection of the vertical (local distortion of the earth's shape as determined by gravity and satellite data), the study of bottom roughness & biological distributions in the ocean depths, the development of an improved capacity for accurately charting ocean positions, and the development of technique for predicting gravity in unsurveyed areas.

The contractor will acquire data at sea generally in the vicinity of the Solomon Islands. Data will include bathymetric, heat-flow, gravity, seismic profiles, seismic refraction, magnetic, sediment-core and ocean current data. These data will be analyzed at the university and used to determine the structure of the earth's crust, to infer the processes which are responsible, and to obtain the critical qualities outlined above.

SUPPORTED BY U.S. Dept. of Defense - Navy

## 7. MARINE GEOLOGY

### 7.0114, SEARCH FOR FERROMAGNETICALLY TRAPPED MAGNETIC MONOPOLES OF COSMIC RAY ORIGIN

*B. LAX*, Mass. Inst. of Technology, Graduate School, Cambridge, Massachusetts 02139

The existence of elementary particles carrying magnetic charge was predicted by Dirac in 1931, and appears even more plausible in the light of current theory, despite the failure of several attempts to find them. Dirac 'monopoles' may be too massive to have been produced in three synchrotron experiments (Berkeley, CERN and Brookhaven), and too rare to have been observed directly among the cosmic radiation. However, incident monopoles may have been accumulating in ferromagnetic minerals, where they would remain permanently trapped with substantial binding energy. Incident monopoles, whether of primary origin or produced by energetic events in the atmosphere, should arrive with energies of 10 to the 16th power to 10 to the 20th power electron volts, enough to cause considerable penetration and dispersion in surface rock. A sufficient depth of ocean water, however, would decelerate monopoles without immobilizing them and allow them to follow lines of the Earth's magnetic field to the bottom, where they would be trapped and accumulate near the surface. Sediments from great ocean depth therefore represent the most promising terrestrial source of magnetic monopoles. Magnets generating very intense, continuous magnetic fields have been used to extract monopoles from a variety of materials, and detect them by scintillation counters and nuclear emulsions. Results are as yet inconclusive, and the method is being refined for application to quantities of sediment sufficient to represent a significant area-time product of total cosmic radiation flux. Magnetic monopoles might account for the high-energy component of cosmic radiation, for the observation of 'extensive air showers', for the energy emission of 'quasars', and for reversals of the Earth's magnetic field as deduced from paleomagnetic studies. They would also provide a theoretical basis for the quantization of electric charge.

SUPPORTED BY U.S. Atomic Energy Commission

### 7.0115, MARINE GEOPHYSICS

*F. PRESS*, Mass. Inst. of Technology, Graduate School, Cambridge, Massachusetts 02139 (NONR)

This task concerns (1) developing heat flow instruments and making heat flow measurements across the mid-Atlantic Ridge and the Caribbean, Mediterranean and Red Seas aboard various research vessels; (2) analyzing the heat flow data in these areas and correlating them with other recent geophysical data obtained by various organizations; and (3) compiling, reducing, and interpreting available geophysical data for the entire Caribbean area.

Accurate knowledge of the relation of sub-bottom ocean structures with such geophysical anomalies as gravity, heat-flow, magnetics, and estimated mantle temperatures, and the correlations of these features with sea floor topography are important to a variety of naval operations.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0116, ATLANTIC OCEAN CRUSTAL STUDIES

*C.O. BOWIN*, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543

A geophysical and geological investigation will be made of the area between latitudes 12 degrees and 22 degrees North and longitudes 45 degrees and 65 degrees West. The area contains the Lesser Antillean Island Arc, a portion of the Mid Atlantic Ridge, and the region between. The investigations will utilize the R/V. CHAIN and an aircraft. The techniques of seismic reflection, bathymetric, magnetic and gravity profiling, dredging, coring, bottom photography, and measurement of heat flow will be employed.

SUPPORTED BY U.S. National Science Foundation

### 7.0117, STRUCTURE OF CONTINENTAL RISE OFF EASTERN NORTH AMERICA

*K.O. EMERY*, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543

Work completed to-date by scientists of Woods Hole Oceanographic Institution and of other oceanographic organizations indicates that the continental rise off eastern North America is a large depositional feature formed mostly during the Cenozoic Epoch. It is planned to make continuous seismic profiles supported by magnetic and gravity measurements along about 7500 km of ship track arranged in ten profiles between Grand Banks and Florida during July and September 1967. Necessary techniques and equipment (except for replacement parts) are already in operation and can easily be applied to the proposed program. The results should provide useful information about the thickness, extent, volume and layering of the continental rise. Deductions about the rate of deposition of the sediments, the role of turbidity currents during the Cenozoic, and the best positions for Ocean Sediment Coring drill holes can be made from this geophysical field study.

SUPPORTED BY U.S. National Science Foundation

### 7.0118, WOODS HOLE ENVIRONMENTAL STUDIES OF SEA FLOOR PROPERTIES

*E.E. HAYS*, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543 (NONR)

**OBJECTIVE:** To acquire data on sea floor properties of structure and reflectivity, geomagnetics, and gravity. Gravity measurements are used to define the geoid, and thus are important in the making of accurate charts of the earth, and by helping to determine the inclination of a 'level' surface at any point bear on navigation techniques and systems.

**APPROACH:** Carry out a program of 'at sea' acoustic reflectivity measurements on the topography and materials of the sea floor and sub-bottom. Collect concurrent bathymetric, magnetic and gravimetric data to aid in characterizing the general acoustic properties of the sea floor. A major cruise to the Mid-Atlantic ridge area north of the Azores for the above purpose is planned. Cores, for direct acoustic analysis, and dredge samples, for geologic and magnetic typing will be collected. A new gyro-stabilized gravity meter will be evaluated at sea. The acquired data, of all types, will be analyzed to promote development of an overall consistent picture of the 'acoustic' sea floor.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0119, ANALYSIS OF SEISMIC DATA COLLECTED DURING THE INTERNATIONAL INDIAN OCEAN EXPEDITION AND IN THE CARIBBEAN SEA

*J.B. HERSEY*, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543

The purpose of this study is to analyze seismic reflection profiles and bathymetric data, to construct structural models where data warrant and to relate seismic results to the accompanying gravimetric and magnetic data as well as the analysis of rock samples.

A single major cruise to the Indian Ocean has enabled the recording of continuous seismic reflection profiles across the North Atlantic Ocean, in the Mediterranean Sea, and the Indian Ocean. In the Indian Ocean, the principal sedimentary structures of the Somali Basin and those of the Seychelles-Mauritius ridge have been explored by means of several long, crossing profiles. Red Sea criss-cross profiles define a central area of rift and bordering area of stratified rock (probably sediments). In the Mediterranean a detailed structural study of the Lebanese shelf was made followed by a criss-cross profile over the Nile Delta and central sedimentary basins of the eastern Mediterranean. Later a detailed survey of the Ligurian Sea was conducted followed by a single profile through the Balearic Basin and the Strait of Gibraltar, and thence northward to Plymouth, England. Over the outer ridge north of Puerto Rico a complex and detailed seismic refraction profile was recorded.

SUPPORTED BY U.S. National Science Foundation

### 7.0120, GEOMAGNETIC INVESTIGATIONS

*J.D. PHILLIPS*, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543 (N00014-66-C0241)

## 7. MARINE GEOLOGY

This task concerns measurement of the earth's magnetic field, using proton precision magnetometers towed from Woods Hole ships. Magnetic profiles will be interpreted in terms of sea floor spreading and other geologic structures; the magnetic data will be related to other parameters, as bottom topography, heat flow, gravity anomalies, and rock type. Detailed measurements are planned for parts of the mid-Atlantic Ridge.

The magnetic studies contribute to an understanding of rock types beneath the ocean floor, which affect deflections of the vertical, underwater sound propagation, salvage and rescue operations, and engineering structures.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0121, GEOTHERMAL INVESTIGATIONS IN OCEAN REGIONS

G. SIMMONS, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543

A two-year program to investigate geothermal problems in oceanic regions is proposed. Emphasis is placed on measurements of heat flow through the Atlantic Ocean floor, mainly utilizing WHOI research vessels. Instrumentation is requested to take advantage of research cruises proceeding to or crossing regions of interest, and new techniques will be developed to attack some of the outstanding problems in this field. Special studies and detailed surveys are planned to investigate sources of variability in heat-flow values in some regions, and models will be studied for comparison with results from these surveys.

In a broad sense, the principal goal of the proposed investigations is to improve our understanding of the dynamic processes within the earth as reflected in the geothermal flux. More specifically, it is planned to investigate (a) the significant regional heat-flow variations in the Atlantic, and their possible relationships with geological structure, and (b) the source of local variability in heat-flow values from the ocean floor, with the aim of improving the reliability of measurements in some regions.

SUPPORTED BY U.S. National Science Foundation

### 7.0122, GEOTHERMAL STUDIES IN DEEP-SEA DRILL HOLES

R.P. VONHERZEN, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543

It is proposed to measure the heat flux from the earth's interior on programs which drill and sample sediments from the deep ocean floors. Such measurements on the Deep Sea Drilling Program, for example, should establish 40 - 60 very reliable heat-flow values at sea, to which the 2000 oceanic measurements already obtained by conventional techniques may be compared. Furthermore, it may be possible to obtain reliable measurements from other research and commercial drillings on the continental shelves and slopes, areas which are not normally accessible to standard oceanic techniques. The proposed measurements will result in oceanic values by techniques which are more nearly similar to those made in continental bore holes, thereby allowing a more reliable comparison between these fundamentally different regions.

Initial efforts will involve development of suitable instruments and techniques.

SUPPORTED BY U.S. National Science Foundation

### 7.0123, GEOTHERMAL INVESTIGATIONS IN OCEAN REGIONS

R.P. VONHERZEN, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543 (N00014-66-C0241)

This task is a continuing investigation on the heat flux conducted through the earth's surface in selected regions of the Atlantic Ocean. Measurements of heat flow are made from ships with probes at various points on the ocean floor, particularly on the mid-Atlantic Ridge and the Vema Fracture Zone. Water temperature distribution near the bottom at station locations is also determined. Heat flow is analyzed in terms of the geologic province, bottom topography, sources of the heat, and depth of source. Instrumental developments are made to improve the measuring system.

This program attempts to improve the measurements of heat flow in oceanic areas and determine the relation of heat flow to bathymetry, sediment structures and thicknesses, and to crustal and subcrustal rocks. Heat flow studies thus improve our knowledge of the materials below the sea floor; these materials affect such Navy relevant problems as underwater sound propagation, gravity and magnetic fields of the earth, ocean engineering construction, and salvage and rescue operations.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0124, GREAT LAKES RESEARCH - COASTAL AREA SEDIMENTATION

J.H. SAYLOR, U.S. Army, Lake Survey, Detroit, Michigan 48226

Data on energy sources (waves, winds, currents) impinging on selected coastal reaches along the Great Lakes will be collected and studied to learn how environmental energy affects sediment movement, characteristics, and distribution in beach and nearshore areas. Results will be used to derive relationships and/or mathematical models. Investigations will devise methods of establishing rates of coastline change and how to forecast the future behavior of the coastline. Information is needed for the design and location of harbors, marinas, industrial plants, and recreational areas.

Data collection at Little Lake Harbor on Lake Superior was completed in 1964, and a report was presented at the Tenth Conference on Coastal Engineering held in Tokyo, Japan.

Data collection on Lower Lake Huron in the vicinity of Port Huron, Michigan and Sarnia, Ontario, was completed during 1965. Analysis of the data is in progress.

Preliminary investigations were conducted at Pentwater, Mich on the eastern shore of Lake Michigan during 1967. An intensive field program is planned at Pentwater during the spring and fall of 1969.

SUPPORTED BY U.S. Dept. of Defense - Army

### 7.0125, GENERAL COASTAL INLET STUDIES

J.B. TIFFANY, U.S. Army, Waterways Experiment Sta., Vicksburg, Mississippi

The objective of this research project is to develop means for computing discharge and velocity distribution through tidal inlets leading to determination of tidal prisms and water surface elevations in inner bay systems; and to determine the factors involved in both inner and outer bar formation, the shoaling of inlet channels, and the stability of inlet shape and location. The following four facilities are being used to conduct necessary investigations: 1. Facility A. This is a facility in which inlets of various shapes can be modeled to a relatively large scale, and tests conducted therein under varying tidal conditions to establish discharge coefficients, flow patterns, and other factors required to compute discharges over the range of head differentials. 2. Facility B. This facility consists of an 'ocean' in which tides of various amplitudes and periods could be generated, a lagoon which could be varied in areas and shapes, and a connecting section between the two in which inlets of various shape could be modeled to a small scale by standard fixed-bed model techniques. 3. Facility C. This facility consists of a movable-bed model ocean, equipped with appurtenances for reproducing tides, waves, littoral currents, and other significant forces; a fixed-bed lagoon which could be varied in area and shape; and provisions for connecting the two by means of a movable-bed inlet section in which inlets of various shape could be modeled by movable-bed model techniques. 4. Facility D. An existing 350-ft by 175-ft basin now in existence at the Coastal Engineering Research Center will be used to develop information on the distribution and quantity of along-shore littoral drift, as a function of wave height, wave length, and other significant factors.

SUPPORTED BY U.S. Dept. of Defense - Army

### 7.0126, EXPLOSIVE WAVE PROPAGATION

C.L. PEKERIS, Amer. Comm. For Weizmann Inst., New York, New York (N00014-67-C0146)

Theoretical studies will be conducted on (1) the propagation of explosive pulses in layered media by using new methods of in-

## 7. MARINE GEOLOGY

version of the Laplace integral equation; (2) the equation-of-state of matter in the interior of the earth. In addition, methods of digital analysis of seismic data will be extended in an attempt to better resolve closely spaced yet discrete frequency components. Work will continue on improving the seismic travel-time curves for P waves.

The analytical techniques developed for use in studies of explosive wave propagation and the results obtained from these studies will contribute to naval capabilities in the use and analysis of underwater sound signals, including the propagation in the layered sediments and rocks beneath the ocean.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0127, PARTIAL SUPPORT OF A PROGRAM OF EDUCATION & RESEARCH IN MARINE SEISMOLOGY AND GEOMAGNETICS

M. EWING, Columbia University, Graduate School, New York, New York 10027

NO SUMMARY HAS BEEN PROVIDED TO THE SCIENCE INFORMATION EXCHANGE

SUPPORTED BY New York State Science & Technology Found.

### 7.0128, MARINE GRAVITY

M. TALWANI, Columbia University, Graduate School, New York, New York 10027

Continuous surface ship gravity data will be acquired in part aboard R/V VEMA and in part aboard R/V ROBERT D. CONRAD. This work will include instrument development primarily aimed at decreasing the errors in gravity measurement. An accuracy of about 2 mgal is obtainable with present instrument and navigation techniques. By developing analog computers to correct for the off-levelling error associated with stabilized platforms, it is hoped to diminish the error below 1 mgal.

Navigation fixes are obtained by means of satellite navigation receivers that work with U.S. Navy's satellite navigation system. PDP-8/S computers aboard VEMA and CONRAD reduce these fixes. The computers do complete track adjustment on board ship.

SUPPORTED BY U.S. National Science Foundation

### 7.0129, GEOPHYSICAL INVESTIGATIONS IN THE TAIWAN-PHILIPPINE-NEW GUINEA REGION

M. EWING, Columbia University, Graduate School, Palisades, New York 10964

The purpose of the project is two-fold: (1) to continue the cooperative program with our Japanese colleagues to investigate geophysically unexplored regions of the oceans, (2) to help strengthen and promote new interest in the science cooperative program between the United States and Japan.

The main purpose of the work is to make seismic-refraction measurements of the following morphological units: (1) Taiwan-Luzon ridge, (2) Manila trench, (3) Celebes-Sulu Sea basins, including the Sulu archipelago, (4) West Caroline - East Caroline basins including the Caroline - New Guinea rise, and (5) Bismark Arch-New Britain trench system. Since the Snellius Expedition of 1929-1930, very little marine geological information has been collected in the proposed region of study; aside from the pendulum gravity measurements of Vening Meinesz no significant amount of marine geophysical data has been obtained. Therefore, the survey route is designed to provide data by seismic measurement, gravity, magnetics, coring, heat flow, etc., on a host of geophysical-geological problems.

SUPPORTED BY U.S. National Science Foundation

### 7.0130, GEOPHYSICAL INVESTIGATIONS IN THE CORAL SEA

M. EWING, Columbia University, Graduate School, Palisades, New York 10964

The proposed survey calls for a two-ship operation utilizing radio-sonobuoys for multiple receiving points in making seismic

refraction measurements at sea. This technique has the advantage of permitting the receiving ship to occupy a station amidst an array of buoys spaced in any pattern deemed suitable for the problem being studied. Multiple receiving points permit far more detail than is usually possible to obtain with the conventional two-ship technique; the ability of the mother ship to receive near its buoy spread (while the accompanying ship shoots the forward half of the profile, whence the procedure is reversed) removes the disadvantages associated with single-ship buoy seismology.

The Lamont vessel will also obtain continuous measurements of gravity, magnetics, bathymetry and sub-bottom sedimentary layering (seismic profiling). The purpose of the joint survey is to measure the crustal section from the Australian continental margin off Townsville across the Coral Sea Plateau, Coral Sea Basin to the Louisiade Arch of Southwestern New Guinea. The exact locations of seismic profiles and ship's tracks will be decided as the work progresses. The geophysical measurements will provide knowledge of the regional structure and may yield important clues as to its development and evolution.

SUPPORTED BY U.S. National Science Foundation

### 7.0131, MARINE SEISMOLOGY

W. EWING, Columbia University, Graduate School, Palisades, New York 10964 (N00014-67-A0108-0004)

Objectives of this research include: (a) the continuing investigation, on a world-wide basis of the distribution of unconsolidated sediments and the nature and origin of these sediments and their structural features; (b) determination of sound velocities in the sediments utilizing sonobuoys together with pneumatic and other sound sources in wide-angle reflection profiles; (c) studies of crustal and upper mantle structure using seismic refraction techniques; and (d) the continued development of improved hydrophone arrays and recording techniques for use in seismic reflection profiling.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0132, RESEARCH IN OCEAN PROPERTIES

W.M. EWING, Columbia University, Graduate School, Palisades, New York 10964

Objective: To determine those environmental factors affecting acoustical uses of the ocean; to observe and develop theory and model for predicting underwater sound propagation using deep ocean water paths including near bottom phenomena; to observe, define and obtain acoustical target strengths of volume scatters.

Approach: Data collection using ocean research vessels such as VEMA and CONRAD (AGOR-3). Make detailed surveys under precise navigational control in selected areas including continuous profiling of bottom and sub-bottom topography, reflectivity measurements, refraction measurements, bottom photography and deep sea cores as necessary. Monitor deep scattering layers qualitatively on the Precision Depth Recorder and obtain quantitative measurements of reverberation levels at selected times and places. Correlate these measurements with results of biological sampling programs supported by other agencies. This approach includes the development of instruments for determining ocean floor ambient noise, seismic characteristics of the immediate sub-bottom structure, bottom structure, bottom reflectivity and the small scale topography of the ocean floor.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0133, GEOPHYSICAL STUDIES FROM ELTANIN IN 1968

D.E. HAYES, Columbia University, Graduate School, Palisades, New York 10964

Lamont Geological Observatory of Columbia University has carried out geophysical oceanography research on the Antarctic Research Vessel U.S.N.S. Eltanin under GA-894 and earlier grants. Proposed research would include: (1) Seismic-reflection program to yield data on the boundaries between different sediment layers beneath the ocean floor and to indicate the thickness and attitude of the layers. (2) Gravity program, using a sea

## 7. MARINE GEOLOGY

gravimeter installed last year for the interpretation of the composition and structure of the Earth's crust beneath the areas surveyed. (3) Magnetic program to yield data to extend interpretation of sea-floor spreading and paleomagnetic epochs into the areas south of New Zealand and Australia. LGO proposes to continue data reduction and publication. It is proposed to include two Australian scientists in the research party on the *Eltanin* as a part of a cooperative program between LGO and the University of New South Wales. The cruises planned would reach into an area in which little geophysical oceanography data is now available and which is of great geophysical interest because it includes as junction of the Pacific-Antarctic and Indian Ocean Ridge Systems. These programs by LSO, coordinated with research done on the *Eltanin* by other institutions, constitute an interdisciplinary approach to the problems of measuring and understanding the ocean environment in one of its least explored regions.

Five shipboard technicians (2 from Australia) will be on the *Eltanin*.

SUPPORTED BY U.S. National Science Foundation

### 7.0134, GEOMAGNETIC STUDIES

*J.R. HEIRTZLER*, Columbia University, Graduate School, Palisades, New York 10964

This program is involved with studies of geomagnetic micropulsation phenomena in the frequency range from 0.1 to 0.0001 cps. During this extension, work will continue on determining the propagation characteristics of these relatively short period geomagnetic fluctuations including their group and phase velocities and their degree of continuity from one location to another. In addition, a small study will be carried out on the perturbation in the local geomagnetic field which is expected to occur during passage of a Saturn rocket through the earth's ionosphere.

Naval capabilities in magnetic navigation and other areas are affected by the time variations of the earth's magnetic field. A fuller understanding of these geomagnetic fluctuations should permit the development of adequate techniques for removing or minimizing their effects.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0135, MAGNETICS

*J.R. HEIRTZLER*, Columbia University, Graduate School, Palisades, New York 10964 (N00014-67-A0108-0004)

The objective of this program is to measure and interpret variations in the earth's magnetic field. Emphasis will be placed upon continuing efforts in the growing field of paleomagnetic stratigraphy and in magnetic studies which bear on the concept of ocean-floor spreading. Studies of magnetic anomalies in the following geographical areas should be completed: circum-Pacific trenches, Norwegian Sea, and a second study of the Reykjanes Ridge.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0136, GEOTHERMAL MEASUREMENTS

*M.G. LANGSETH*, Columbia University, Graduate School, Palisades, New York 10964

This program is directed toward determining the heat flow through the ocean floor and relating the observed variations to bottom topography, to properties of the underlying sediments, crust, and mantle, and to fluctuations in bottom water temperatures. In addition, measurements of the vertical temperature profile throughout the water column will continue to be made. A multiple instrument package which includes a new thermal probe will be used extensively to provide closely spaced sets of data on the water-sediment interface.

A knowledge of the ocean's temperature structure from top to bottom is important in many operations. Space and time variations in the flow of heat out of the ocean-bottom sediments affect the temperature structure. This research program will help provide, on a world-wide basis, an understanding of the heat flow variations as well as information on the thermal structure itself.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0137, HEAT FLOW AND MAGNETICS IN THE PHILIPPINE SEA

*M.G. LANGSETH*, Columbia University, Graduate School, Palisades, New York 10964

The Lamont investigators will work with Dr. Masashi Yasui, Oceanographic Section, Maizuru Marine Observatory, Japan Meteorological Agency and his associates. They will examine the magnetics and heat flow in the Philippine Sea, in and around the Bonin Trench and Mariana Arc Trench and over the inner arc ridges. The purpose is to study the magnetic lineation pattern, if any, and the heat flow to try to ascertain if this part of the ocean floor seems to be spreading as it is in the eastern Pacific.

SUPPORTED BY U.S. National Science Foundation

### 7.0138, HEAT FLOW MEASUREMENTS

*M.G. LANGSETH*, Columbia University, Graduate School, Palisades, New York 10964

Heat flow through the ocean bottom will be measured during the field program of the Lamont ships in conjunction with the sediment coring program. A new instrument will be developed and used to make closely spaced heat flow measurements along with water velocity and turbidity near bottom as well as bottom photography. The effect of small-scale topography on heat flow will be studied especially in the mid-ocean ridge province.

SUPPORTED BY U.S. National Science Foundation

### 7.0139, STUDY OF RELATIONSHIP BETWEEN EARTHQUAKES AND TECTONIC MOVEMENTS IN ALASKAN FAULT ZONE

*J. OLIVER*, Columbia University, Graduate School, Palisades, New York 10964

The technical objectives of this grant are to develop better understanding of the relationship between earthquakes and tectonic movement which is expected will lead to more accurate prediction of the occurrence of destructive earthquakes.

The proposal is to study recent and current tectonics and seismic activity associated with two or more major Alaskan faults. The study will emphasize the combined use of several geologic and geophysical techniques in a single program. Specifically, the program will include investigation of (1) the amount, sense and rate of displacement in past and present tectonic movements; (2) the recent and present seismicity; (3) the relationship between current tectonic movement and seismicity; (4) the possibility of the future occurrence of earthquakes and tectonic movement.

Some studies have provided evidence that a reversal in the direction of tectonic movement occurs at the time of an earthquake. The number of shallow microearthquakes recorded in the Denali fault valley indicates that the fault is currently active.

SUPPORTED BY U.S. Dept. of Commerce - E.S.S.A.

### 7.0140, DEEP EARTHQUAKES AND ISLAND-ARC TECTONICS AND STRUCTURE

*J. OLIVER*, Columbia University, Graduate School, Palisades, New York 10964

A three-year extension, including a small additional field program, of a study of deep earthquakes in the Fiji-Tonga region of the southwest Pacific (NSF GP-2539) is proposed. Discoveries of major importance have resulted from the current research and certain seismic phases have been found with special features which imply a major revision of conventional ideas of island-arc structure. Results to date include indication of anomalously low attenuation of seismic waves in or near the zone of deep earthquakes in the upper mantle and discovery of a number of systematic relationships between the configuration of seismic zones, focal mechanisms, and physiographic features of island arcs in the southwest Pacific. The proposed program calls for the continued maintenance of the network of five seismograph stations installed in the Fiji-Tonga region during the current project, operation of portable seismographs for special measurements, and the data analysis to investigate the following topics: mechanism of deep earthquakes as revealed by information in the wave form of the seismic signals and analysis of the sequence of

## 7. MARINE GEOLOGY

occurrences in time and space; variations of attenuation and velocity of seismic waves in the upper mantle near the zone of earthquakes; and further study of the relationships among focal mechanisms, the configuration of the seismic zones, and other island-arc features. The proposed research will continue to be a valuable contribution to the U. S. Upper Mantle Program.

SUPPORTED BY U.S. National Science Foundation

### 7.0141, SEISMOLOGICAL RESEARCH RELATED TO WORLD-WIDE SEISMIC DATA

*P.W. POMEROY*, Columbia University, Graduate School, Palisades, New York 10964

The purpose of the research will be to investigate the properties of seismic sources, the distribution of these sources in space and time, the structure and state of the earth and the phenomena of wave propagation; and to relate these phenomena and information to problems of earthquake prediction.

Using recordings of seismic waves available from the stations of the World-Wide Standardized Seismograph Network of ESSA, make analytical studies of body and surface waves, detailed investigations of regional seismicity, generate computer programs for the study of focal mechanisms, seismicity, spectral analysis, seismic wave propagation.

The comparison of precisely determined hypocenters with the distribution of large-scale geological and geophysical features such as deep-sea trenches, gravity anomalies, volcanoes, and fracture zones. Long-period seismograms were used successfully in determining the sense of strike-slip displacement on a number of major fault zones on the mid-oceanic ridge system.

SUPPORTED BY U.S. Dept. of Commerce - E.S.S.A.

### 7.0142, GRAVITY

*J.L. WORZEL*, Columbia University, Graduate School, Palisades, New York 10964 (N00014-67-A0108-0004)

This research is directed toward the measurement of the earth's gravity field over the oceans and the investigation and interpretation of the anomalous variations observed. Regional gravity anomaly maps will be extended and updated by the addition of newly obtained data. Studies of the anomalies over deep-sea trenches, island arcs, and mid-ocean ridges will continue. Investigations of the Caribbean area and the Philippines are expected to be completed. Further improvement in the accuracy of the gravity data is planned and two new gravity sensors are to be tested.

The accuracy of inertial navigation systems is presently limited by insufficient knowledge about the earth's gravity field and deflections of the vertical. This program is (1) providing gravity data over the world's oceans, (2) developing and evaluating new techniques and instruments for obtaining more accurate gravity measurements at sea, and (3) helping to provide the basic understanding of gravity variations which is necessary for the prediction of deflections of the vertical.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0143, ESTUARINE SEDIMENTARY MODELS

*G.S. VISHER*, Univ. of Tulsa, Graduate School, Tulsa, Oklahoma 74104

The primary aims are to provide information for a general process-response model for the tidal-estuary-distributary environmental association, and to test the hypothesis that texture may be used directly in the identification of specific sedimentary processes. Work on fluid flow in natural stream channels has demonstrated the association of textures with specific flow regimes. In addition, recent textural studies of clastic sediments suggest the possibility that texture may be used directly in determining ancient sedimentary processes in a more specific manner than previously possible. An observation program to test these hypotheses will be carried out in the estuary of the Altamaha River.

The data will be used to develop a statistical model of the area for comparison to ancient rocks, and to evaluate the effects of differing sedimentary processes on grain size distributions.

SUPPORTED BY U.S. National Science Foundation

### 7.0144, PACIFIC GRAVITY

*G. BODVARSSON*, Oregon State University, Graduate School, Corvallis, Oregon 97331 (NONR)

This task is a continuation of a marine gravity program in the Northeast Pacific Ocean. It concerns making gravity measurements aboard ship with an ONR-owned LaCoste and Romberg gravity meter S-9, determining gravity anomalies from these measurements, and determining crustal and mantle structures that are in agreement with these anomalies and other available geophysical data (particularly seismic refraction). The program also contributes to an evaluation of the accuracy of the meter under different sea conditions. New methods for machine handling and interpreting the gravity data will be investigated.

This program benefits the Navy in that gravity measurements at sea are of importance for local determination of the shape of the geoid and deflections of the vertical. The knowledge obtained on crustal structures has application to sound transmission in the oceans. Analysis of the reliability of the meter measurements is important for data evaluation with this and other meters of the same make.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0145, (U) OCEANIC CRUSTAL AND MANTLE STRUCTURE - ITS ORIGIN AND EFFECT ON EXTERNAL FIELDS

*G. BODVARSSON*, Oregon State University, Graduate School, Corvallis, Oregon 97331

**OBJECTIVE:** This research, which is directed toward determining the nature and origin of the oceanic sediments and crustal rocks in the NE Pacific, will provide (i) basic data on the earth's gravity and magnetic fields and on the acoustical properties of sediments, and (ii) increased capability for the prediction of these fields and properties in unsurveyed areas. Effective use of present and future sonar and magnetic detection systems in antisubmarine warfare requires an increased understanding of the acoustical properties of marine sediments and of the earth's magnetic field. In addition, future improvements in the accuracy of inertial navigation systems, which are extensively used in Naval ships and missiles, require an increased knowledge of the earth's gravity field.

**APPROACH:** Shipboard measurements of the gravity, magnetic and heat flow fields will be made in selected areas of the NE Pacific. Information on the thickness, structure and character of the ocean bottom sediments will be obtained by seismic reflection profiling, and by bottom sampling techniques. Using these combined data as a comparison standard, structural models of the oceanic crust and upper mantle will be generated and modified to agree with the field data. Satisfactory structural models will then be considered in terms of the forces and processes which could have led to their formation.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0146, MARINE GEOPHYSICS

*G. BODVARSSON*, Oregon State University, Graduate School, Corvallis, Oregon 97331

A seismic 'air gun' type of profiling unit will be purchased and used aboard The R/V YAQUINA to measure thicknesses and structures of sediments in areas off the coast of the northwestern part of North America. The particular areas include the continental shelves and slopes west of California, Oregon and Washington, and in deep water in the areas of the Mendocino Escarpment, the Gorda and Juan de Fuca ridges, the Cascadia and Tufts abyssal plains, the Gulf of Alaska, and the Cocos Ridge off South America. Many, but not all, of these seismic measurements will be made in conjunction with cruises scheduled for other purposes.

The seismic reflection measurements provide data on thickness, the layering and structures of sediments at many localities off the northwest coast of the U.S. These sediments greatly affect the long-range propagation of underwater sound, the installation of engineering structures and salvage and rescue operations.

SUPPORTED BY U.S. Dept. of Defense - Navy

## 7. MARINE GEOLOGY

### 7.0147, SUBSURFACE RESISTIVITY

*H.W. SMITH*, Univ. of Texas, School of Engineering, *Austin, Texas 78712* (NONR)

Magnetotelluric techniques will be used to provide information on the deep structure of the continental-oceanic transition zone. Measurements will be made along a line from central Texas to the Gulf Coast and at additional sites along the coast. The apparent resistivity curves determined from the data will be compared with theoretical curves from layered models extending to depths on the order of 100 km. The study will utilize improved magnetotelluric analysis procedures which were recently developed by the contractor under a previous contract.

The potential use of the earth's crust as a transmitting medium for communications purposes is presently being explored. Evaluation of this potential use requires information concerning the electrical properties of the earth's crust and upper mantle. This research will help provide such information.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0148, GEOPHYSICS, GULF OF MEXICO

*J. ANTOINE*, Texas A & M University System, Graduate School, *College Station, Texas 77843* (NONR)

The objective of this research is to investigate the geological and geophysical structure of the Gulf of Mexico, the Yucatan Basin, and the Cayman Trough. The extent of the fold system off the eastern coast of Mexico will be further delineated and an attempt will be made to correlate this structure with the onshore geology. Structural studies in the Gulf basin adjacent to the South Florida platform will be continued. Studies in the eastern end of the Cayman Trough will be initiated. Techniques to be employed will include seismic reflection profiling, wide-angle reflection and refraction, magnetics, precision depth sounding, and sediment sampling.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0149, MARINE GEOPHYSICS

*A.L. HALES*, Southwest Ctr. For Adv. Stud., *Dallas, Texas*

This research program is directed toward marine geophysical investigations of crustal structure in selected areas. Seismic field work will be conducted along the southern margin of the Gulf of Mexico and off the southeast coast of South Africa which will supplement data previously obtained in these areas. Analyses of geophysical data obtained in the Coral Sea and the Pacific Ocean off Panama will be completed.

The effectiveness of many naval systems is dependent on a knowledge of the acoustic properties of ocean-bottom sediments and on a knowledge of the earth's gravity field respectively. This program should increase effectiveness in these operational areas by: (1) providing information on the acoustic properties of marine sediments in selected areas, and (2) helping to develop an understanding of oceanic crustal structures, their history, and how they affect the local gravity field.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0150, SUBMARINE SEISMIC PROFILES OF THE WORLD'S OCEANS

*N.A. MOORE*, Teledyne Incorporated, *Houston, Texas 77036*

Record and interpret sub-bottom seismic profiles of the world's oceans using proprietary high-energy acoustic sources and low noise hydrophone streamer cables.

Profiles across the Atlantic from Trinidad to West Africa, around Africa, across the Indian Ocean and through Indonesia have been completed for approximately 35,000 miles. A crossing of the Pacific Ocean will begin in late 1968.

SUPPORTED BY Teledyne Exploration Company

### 7.0151, SEISMIC, MAGNETIC, AND ACOUSTIC STUDIES ON THE CONTINENTAL MARGIN OFF WASHINGTON

*L.C. BENNETT*, Univ. of Washington, Graduate School, *Seattle, Washington 98122* (NONR)

Objective: Naval operations along continental margins can be made considerably more efficient if the local variations in bottom sediment properties and in magnetic field strength are either known or predictable. This research will provide (1) basic bathymetric, geomagnetic, and sedimentary information on the continental margin off of Washington, and (2) a better understanding of the relations between the acoustic absorption in sediments and the mechanical properties and structures of the sediment.

Approach: A field observation program utilizing continuous seismic reflection and magnetic profiling, short-pulse echo sounding, bottom photography, and bottom sampling will be carried out. From these data, sediment properties, ages, and structures will be determined. Specific parts of the seismic reflection data will be analyzed for the reflectivities of particular subbottom reflecting horizons and for the acoustic absorption between selected horizons.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0152, DETAILED STUDY OF THE OCEANIC CRUST BY MEANS OF DEEP SEISMIC PROFILING

*C.R. LISTER*, Univ. of Washington, Graduate School, *Seattle, Washington 98122*

The purpose of this study is to initiate geophysical surveys on the continental shelf off Washington State. The scientific plan for geophysics at the University is to begin a detailed survey of a deep-ocean area reasonably close to home. This survey will be controlled by anchored navigation buoys and punctuated by a number of heat-flow core stations.

Detailed heat-flow surveys have always been difficult to interpret because of the bias that arises from the refraction of the heat flux by topographic features, both surface and sub-bottom. The Conductivity contrast between hard rock and pelagic sediment is five to one or more, with the result that measurements of heat flow in soft-bottomed valleys are systematically low, as would be any measurements in the thin sediment cover that sometimes tops a seamount or guyout (due in this latter case to the surface topographic refraction, with much of the heat lost on the sides of the seamount). The most useful supplementary geophysical tool is a sub-bottom profiler, powerful enough to penetrate 1 km of sediment but not necessarily needing to penetrate any of the hard rock. Such a device is requested as a part of the proposed research.

SUPPORTED BY U.S. National Science Foundation

### 7.0153, THE MAGNETIZATION OF SUBMARINE BASALTS AND ITS EFFECT ON MARINE MAGNETIC ANOMALIES

*R.T. MERRILL*, Univ. of Washington, Graduate School, *Seattle, Washington 98122* (NONR)

OBJECTIVE: An understanding of the origins of marine magnetic anomalies, which form a part of the noise environment, will allow more adequate predictions to be made of the magnetic field characteristics likely to be encountered in unsurveyed areas. This research is directed toward determining the relative importance of self-induced magnetic reversals in marine basalts and the effects of such self-reversals on the interpretation of marine magnetic anomalies.

APPROACH: Several rock samples, whose orientation with respect to the north-south and vertical directions is known, will be collected from Cobb Seamount off the Washington Coast. Laboratory tests on these samples will be carried out to determine the location of the north magnetic pole at the time the sampled rock was formed. Further testing will be done to determine whether magnetic self-reversals have occurred and to study the origin of remnant magnetization. Utilizing the results of these tests, analyses of magnetic, gravimetric and bathymetric data over Cobb Seamount will be made to determine the validity of assumptions on rock magnetization which are frequently used in such analyses.

SUPPORTED BY U.S. Dept. of Defense - Navy

## 7. MARINE GEOLOGY

### 7.0154, GRAVITY SURVEY ARCTIC OCEAN

R.J. WOLD, Univ. of Wisconsin, Graduate School, Milwaukee, Wisconsin

The Beaufort Sea overlays a broad continental shelf which comprises a significant portion of the Arctic Ocean Basin. Accordingly, this shelf is basic to any attempt to define and interpret geophysical structure of the Arctic Ocean. This task will enable the contractor to conduct studies in gravity, seismic refraction utilizing airlift capabilities and the ice cover as a convenient stable platform. Data thus obtained will contribute to knowledge of flattening of the geoid in Polar areas, bathymetry and geologic nature of the continental shelf.

These studies have important bearing on greater and more precise geodetic and navigational control in this region.

SUPPORTED BY U.S. Dept. of Defense - Navy

## 7E. HISTORICAL GEOLOGY

(interpretation of History of Oceans, Ocean Floor, and Coastal Areas. See Also Chapters 7f Paleontology and 7c Geochemistry.)

### 7.0155, GEOLOGIC HISTORY OF BERMUDA AND ITS RELATIONSHIP TO THE WORLD PLEISTOCENE

F.T. MACKENZIE, Bermuda Biolog. Sta. For Res., Saint George, Bermuda

An integrated stratigraphic, paleontological and bathymetric study of Bermuda is planned as a basis for interpreting sea level changes during the Pleistocene. Sea level changes have been important events in earth history and have exerted a strong influence on present-day sedimentation and coastal processes, as well as biogeography. An understanding of sea level fluctuations is best gained from investigations of tectonically stable areas, such as Bermuda was during Tertiary and Quaternary time.

Because the position of transition zones between marine limestones and eolianites give information concerning past sea levels, detailed stratigraphic study will be an integral part of the proposed work. Paleontological data will help define time-stratigraphic units, especially in terrestrial deposits. Bathymetric investigations will aid in recognizing submerged Pleistocene terraces.

The proposed coordinated study will hopefully lead to: 1) an interpretation of the geologic history of Bermuda, 2) the definition of a Pleistocene sequence uncomplicated by tectonic activity, and 3) the establishment of a 'tide gauge' with which other Pleistocene sequences on the continents and other areas may be compared.

SUPPORTED BY U.S. National Science Foundation

### 7.0156, GEOLOGIC HISTORY OF PACIFIC FAUNAS

E.C. ALLISON, San Diego State College, Graduate School, San Diego, California 92115

It is proposed to study fossiliferous rock samples obtained from dredge hauls taken from the Pacific sea floor. Immediate objectives of the research are to provide insights into certain fundamentally important paleobiological problems such as: 1) history of the East Pacific barrier, based in part on distribution patterns of tropical shallow marine organisms, 2) origin and evolution of the Galapagos Islands fauna, and 3) development and changes of isolated reef faunas. Long range objectives aim at providing information relative to such problems as: a) age and geologic history of sea floor structures, b) extent and chronology of sea level changes during recent geological history of ocean basins, c) history of marine faunas, especially insular marine forms, and d) distribution of past climatic belts.

SUPPORTED BY U.S. National Science Foundation

### 7.0157, QUATERNARY ENVIRONMENTS AND BIOTAS

C.L. HUBBS, Univ. of California, Graduate School, San Diego - La Jolla, California 92038

The project includes many disciplines and approaches such as: paleoclimatology, paleoecology, paleozoogeography, paleoceanography, paleohydrography, geology, and archeology, and involves the use of such tools as isotope analyses, past and

present temperature and faunal surveys, computer analyses, and collection and processing of material from kitchen middens.

The results of the study will have bearing on the distribution of littoral plants and animals, and constitutes one of the most basic parameters in the interpretation of past as well as present change in temperature and in the biota.

Further efforts are to be made to obtain measurements of paleotemperatures using a mass spectrometer. Geomorphic as well as faunal and climatologic data are to be collected for the Sangamon Interglacial fossil deposit on Isle Guadalupe to obtain information on the last Interglacial on the Pacific Coast. The investigation is to be extended to the isolated basin of Cuatro Ciénegas in northeastern Mexico, which exhibits an extraordinary incidence of endemism, and to collaborate with others on the study of the basin and its fauna. In cooperation with archeologists and geologists, further studies will be made of the Pluvial and Postpluvial history of the Ancient Lakes in western North America. Field work is to be completed on the correlated hydrographic and fish faunal history of the Great Basin. Finally, where possible, data on the history of California lagoons are to be obtained for the purpose of comparison with data already available on Batiquitos Lagoon, California.

SUPPORTED BY U.S. National Science Foundation

### 7.0158, THE POSTPLEISTOCENE OCEANOGRAPHY AND BIOLOGY OF THE EASTERN NORTH PACIFIC

J.D. ISAACS, Univ. of California, Graduate School, San Diego - La Jolla, California 92038

As a result of intense oceanographic and marine biological studies particularly in the last 15 years, the eastern North Pacific is one of the best known and best understood oceanic regions on earth. Knowledge and understanding of part of this region (the California Current System, per se), ranks as one of the most complete in the world. In a major part, this stems from some 22,000 oceanographic and biological stations occupied in the last 15 years by the California Cooperative Oceanic Fisheries Investigations of which the Marine Life Research Program of the Scripps Institution of Oceanography is a major component. Also, broader pertinent understanding has been derived from many other expeditions and studies in the Pacific. These studies are continuing.

The present understanding of the biology, oceanography, and climatology of the eastern North Pacific is of sufficient depth that it undoubtedly will be possible to reconstruct major events of eastern Pacific history in the last several millenia from documentary and sedimentary records. The proposed study will consist of an effort to reconstruct several thousand years of the recent oceanographic, climatological and biological history of the eastern North Pacific from all available records.

SUPPORTED BY U.S. National Science Foundation

### 7.0159, INVESTIGATION OF QUATERNARY SEA LEVEL CHANGES IN THE CAROLINE AND MARSHALL ISLANDS

W.A. NIERENBERG, Univ. of California, Graduate School, San Diego - La Jolla, California 92038

The object of this study is to investigate evidence for a post-glacial high sea level stand that is reported from the Southwest Pacific. This evidence conflicts with many investigations from both sides of the Atlantic where carbon-14 dates indicate rapid postglacial sea level rise followed by a gradual rise to the present level. The Caroline and Marshall Island areas have been chosen for the study because reports of their uniformly submerged 15-18 meter benches appear to indicate stability; borings in Eniwetok show recent coral growth above these platforms, probably extending slightly above present sea level; the reefs provide excellent material for dating; and there are many reports of plus 2 meter benches on the islands. The plan would involve two months of field investigation in the area on a Scripps Institution ship. The work would combine sounding lines, continuous reflection profiling, dredging, shallow drilling, measurement of distribution and standing crop of growing corals by Scuba-diving on submarine terraces, and subsequent analyses and dating of selected samples. It is hoped that the study will reveal (1) whether these island masses have actually been stable, (2) the age and origin of the

## 7. MARINE GEOLOGY

submerged platforms, and (3) will test the validity of the supposed postglacial coral growth above present sea level.

SUPPORTED BY U.S. National Science Foundation

### 7.0160, RADIOLARIA IN SEDIMENTS

*W.R. RIEDEL*, Univ. of California, Graduate School, *San Diego - La Jolla, California 92038*

The objective is to study the Tertiary history of the Radiolaria and apply the results to the interpretation of deep Pacific sediment cores. The paleo-distribution of fossil organisms in cores is compared with bathymetric, geological, and geophysical observations. The system of classification of the organisms is also continually modified to reflect the evolutionary relationships of the various species. During the coming year, attention will be concentrated on this aspect of the work. Cores from NOVA expedition now in progress will be studied.

This program will provide (1) supporting information for studies of the physical, chemical, and biological properties of ocean-bottom sediments and of the processes and factors which control them, and (2) supervision in the storage, description, record keeping, indexing, and distribution of the Scripps core collection.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0161, PALEOTEMPERATURE RESEARCH

*C. EMILIANI*, Univ. of Miami, Graduate School, *Miami - Coral Gables, Florida 33124*

Within the framework of oxygen isotope geochemistry, the proposed research program has four major goals: 1) to determine the depth habitats of Tertiary pelagic Foraminifera 2) to continue Paleotemperature analysis of JOIDES (Blake Plateau) drill cores J-3, J-Y, and J-6 3) to begin Paleotemperature analysis of Pleistocene cores from the southern hemisphere 4) to continue and extend spectral analysis to Tertiary sections of cores from Blake Plateau.

SUPPORTED BY U.S. National Science Foundation

### 7.0162, FLORIDA CORAL REEF STUDIES

*H.G. MULTER*, Univ. of Miami, Graduate School, *Miami - Coral Gables, Florida 33124*

The proposed research deals with certain Florida coral reefs, their biological make-up, areal extent, relationship to rocks on the mainland, and particularly their place in the geologic evolution of south Florida. This work is an extension of studies carried out under GP-5250. In order to better understand the sequence of events and environmental conditions that led to the formation of the Florida Keys, the Atlantic Coastal Ridge of the mainland of Florida, and the Everglades of south Florida, it is necessary to obtain additional information relating to the rock foundation underlying the living coral reef tract, the rock formation beneath Florida Bay, and the linear extent of the Key Largo limestone west of Key West.

It is therefore planned to drill several core holes to obtain subsurface information relative to these problems. One series of holes will be drilled from the outer edge of the living reef across the width of the reef-flat toward the keys in order to obtain information on the back-reef and fore-reef relationships. Drill cores will also be taken in the Florida Bay to determine the nature of the substrate on which the soft bottom sediments lie. These data should help bridge the gap between the keys and the mainland. Additional holes west of Key West will provide information relative to the base on which the line of keys west of Key West have formed.

The proposed study is expected to further our understanding of the arcuate Key Largo reef which was the major control for late Pleistocene sedimentation in south Florida. Of broader significance, the research will have a particular bearing on reconstruction of major events in the geologic history of the younger Pleistocene of south Florida.

SUPPORTED BY U.S. National Science Foundation

### 7.0163, THE SEDIMENTARY AND DIAGENETIC RECORD OF ENVIRONMENTAL PARAMETERS IN RECENT BAHAMIAN TIDAL FLATS

*R.N. GINSBURG*, Johns Hopkins University, Graduate School, *Baltimore, Maryland 21218*

In view of the importance of the sedimentary record to the interpretation of the past history of the earth's surface and the geochemical evolution of the atmosphere and oceans, it is of utmost importance to know which environmental parameters leave their record in sediments and how precisely variations in these parameters are reflected in sedimentary and diagenetic features. To determine what information about the activity of living organisms, water chemistry, tidal ranges, weather and climate are recorded in the sediments it is proposed to study the Recent tropical tidal flat environment. This environment was chosen for study because it has been established to be a major contributor to the sedimentary record throughout geologic time, especially in the Precambrian and lower Paleozoic eras. The same suite of sedimentary features (laminations, thin bedding, mud cracks, intraformational breccias, algal stromatolites, abundance of dolomite) that are so characteristic of the earliest carbonate rocks in the geologic record have recently been discovered in modern tropical tidal flats, making such tropical areas primary targets for this type of research. The proposed study will provide a calibration for more precise interpretation of environmental parameters operating during deposition of those vast thicknesses of ancient tidal flat deposits.

SUPPORTED BY U.S. National Science Foundation

### 7.0164, GEOLOGICAL STUDIES IN NORTHERN LAKE MICHIGAN

*J.L. HOUGH*, Univ. of Michigan, School of Engineering, *Ann Arbor, Michigan*

Northern Lake Michigan is the locale of several unsolved problems pertinent to the bedrock geology of the region and to the postglacial history of the lake. Most of the existing geological knowledge of the area stems from land-based exploration and drilling; most of the critical areas are offshore and, prior to the existence of properly equipped research vessels, could not be examined. Suitable research ships are now available and, aided by underwater photography, television and scuba diving, offer promise of solution of hitherto insoluble problems.

Two aspects of postglacial geology to which this research may make new contributions are (1) the altitudes and areal extent of submerged shorelines of old lake stages, in the area which has undergone postglacial upwarp, and (2) the depth and nature of sedimentary deposits now occupying depressions in the lake basin left at the recession of the last glaciation. Previous work in the southern and central parts of the lake, which have not undergone upwarp indicates that submerged shorelines can be traced and that seismic profiles and long core samples yield useful information of postglacial events.

SUPPORTED BY U.S. National Science Foundation

### 7.0165, PLEISTOCENE OCEANOGRAPHY AS RECORDED IN DEEP SEA SEDIMENT CORES

*D.B. ERICSON*, Columbia University, Graduate School, *Palisades, New York 10964*

The research to be accomplished is to confirm the reality of the faunal record from the Pacific by cross correlation, and to work out a chronology of climatic events in the Pacific region in order to establish the relationships between synchronous events in the Pacific and the Atlantic.

A better understanding of this difference between the temperature regimes of the two oceans during the Pleistocene may be expected to bring us closer to a real understanding of the causation of the ice ages.

Evidence in several cores from the equatorial and southern Pacific strongly suggests that the sequence of temperature changes of near surface waters of the Pacific during the late Pleistocene differ markedly from that of the North and equatorial Atlantic. The evidence as it now stands indicates that the temperature changes of the Atlantic as recorded in the sediments were brought about by the ice sheets on the adjacent continents,

## 7. MARINE GEOLOGY

whereas those of the Pacific were directly due to variations in radiant energy from the sun. It seems that the curve of temperature variation in the Pacific follows the pattern postulated by G.C. Simpson, who developed the hypothesis that ice ages were due to increased precipitation in high latitudes brought about by greater evaporation from the equatorial waters of the oceans, in consequence of larger output of radiant energy from the sun.

SUPPORTED BY U.S. National Science Foundation

### 7.0166, A PALEOMAGNETIC STUDY OF TERTIARY AND PLEISTOCENE OCEANIC CORES N.D. OPDYKE, Columbia University, Graduate School, Palisades, New York 10964

It has already been shown by the principal investigator that certain oceanic cores faithfully reflect the reversal history of the earth's magnetic field during the last 3.5 My. It is proposed to extend this work as far back in time as is feasible. In cores with low sedimentation rates it should be possible to extend this stratigraphy to the Miocene Pliocene boundary. In order to extend the study even further into the past it will be necessary to use cores which contain overlapping sections.

During the early months of 1966 research was begun at Lamont Geological Observatory on the paleomagnetism of deep-sea cores. Work has already been completed on cores from the circum-Antarctic region and from the North Pacific basin. We have found that unoriented piston cores from high and intermediate latitudes preserve a record of the changes in polarity of the earth's magnetic field. Previously reversals have been reported in short gravity cores from the Pacific Ocean and from the experimental Mohole core.

Because the time of these reversals of polarity is now known for the last 3.5 My. it is possible to use the magnetic stratigraphy to attack many problems in oceanography.

SUPPORTED BY U.S. National Science Foundation

## 7F. PALEONTOLOGY

### 7.0167, PALEONTOLOGICAL EVIDENCE OF CYCLES IN THE EARTH-MOON SYSTEM W.B. BERRY, Univ. of California, Graduate School, Berkeley, California 94720

Technical Objective. To study past history of the Moon through studies of the length of day and month compared with a year by relationship of marine invertebrate shell growth to environmental cycles; interpretations of growth layers in fossil shells.

Approach. Continuation growth experiments and study of fossil shells in thin section. Marked specimens observed in natural environment for 18 months; study of marginal increments and frequency distribution of naturally occurring 'wild' samples applied to interpretation of growth layering patterns seen in fossil shells.

Progress: Comparison of marginal shell increments with seasons of the year gave evidence of annual growth for several Venerid species in colder temperate waters. Annual layers are distinguishable from erratic growth rings reflecting disturbances such as temporary burial or removal from water; annual layers more distinct in shells of cold water species. Gain in evidence that shell growth reflects annual fortnightly and diurnal variations in environment.

SUPPORTED BY U.S. Natl. Aero. & Space Adm.

### 7.0168, TAXONOMY AND STRATIGRAPHY OF CALCAREOUS NANNOPLANKTON IN MARINE SEDIMENT SEQUENCES W.R. RIEDEL, Univ. of California, Graduate School, San Diego - La Jolla, California 92038

Calcareous nannoplankton (coccoliths, discoasters and similar forms) have been shown to be very useful for precise stratigraphic correlations of marine strata. There remain, however, considerable segments of geologic time, and large areas of the world, for which there is no published information on these

nannofossils. It is proposed to work on the calcareous nannoplankton in critical submarine and land-based sediment sequences with a competent (preferably foraminiferal) stratigrapher as a co-worker. In this manner, the stratigraphy of the nannoplankton can be related to results from the Radiolaria and Foraminifera, and a rather comprehensive interpretation of the stratigraphical paleontology of pelagic sediments will result.

SUPPORTED BY U.S. National Science Foundation

### 7.0169, STRATIGRAPHY AND PALEOECOLOGY OF FOSSIL SILICOFLAGELLATES FROM ANTARCTIC DEEP-SEA CORES Y.T. MANDRA, San Francisco State College, Graduate School, San Francisco, California 94132

Brief Description of Research Project: San Francisco State College proposes to carry out comprehensive research of fossil silicoflagellates from Antarctic deep-sea sediments. Silicoflagellates have been investigated in a very few marine sedimentary formations on land where their value for correlation and interpretation of paleo-ecology has been shown. Almost no research has been done on silicoflagellates from deep-sea sediments. The project would include a study of the tops and bottoms of approximately 70 selected cores collected during cruises of the USNS Eltanin. This would allow a determination of the age range of each core in relation to silicoflagellate stratigraphy. Approximately 300 selected samples from these cores, representing zones recorded as having a high content of silicious material, would be processed for the separation of their contained silicoflagellates from other silicious microfossils.

Two genera of silicoflagellates, *Dictyocha* and *Distephanus*, have been shown by the principal investigator to be temperature sensitive. He has developed a technique using the ratios of the frequencies of these two types to determine the temperatures of ancient seas. This project would apply this technique to deep-sea cores for the first time. The works of Watkins at Florida State University and Hayes at Lamont Geological Observatory have shown a positive correlation with other organisms and magnetic reversals. Of particular significance would be the correlation of extinction and appearance of genera and species of silicoflagellates in relation to magnetic reversals.

This program does not involve any work on the USNS Eltanin.

SUPPORTED BY U.S. National Science Foundation

### 7.0170, MIOCENE FISHES AND FISH FAUNAS AS DETERMINED FROM A STUDY OF FOSSIL OTOLITHS J.E. FITCH, State Dept. of Fish & Game, Terminal Island, California

The California Miocene is extremely rich in teleost (bony fish) remains, particularly otoliths, but to date the only faunas known are based upon skeletal material and upon scales embedded in Miocene diatomites and shales. A primary objective of this proposed study is to collect, identify, describe and illustrate the Miocene teleost fauna represented by otoliths. Secondary objectives would include: (i) determining palaeoecology by comparing Miocene faunal assemblages with those of today to see if logical conclusions can be reached, (ii) comparing Pacific coast Miocene families and genera with those from the Atlantic and Gulf coasts to see if deductions can be made regarding zoogeography, affinities, and migrations, and (iii) determining if fish faunas from various deposits represent normal seasonal mortalities or catastrophic die-offs. (These data can be obtained by examining otoliths for indications of digestive action resulting from ingestion by predator species, and by noting marginal zones in those otoliths which have retained annual growth characteristics.)

SUPPORTED BY U.S. National Science Foundation

### 7.0171, LIVING AND FOSSIL ZOOPLANKTON, AND RELATED PROBLEMS OF PALEOLIMNOLOGY E.S. DEEVEY, Yale University, Graduate School, New Haven, Connecticut 06520

## 7. MARINE GEOLOGY

The research will encompass the following: 1. Quantitative studies of fossil Cladocera, especially *Bosmina* species, are to be conducted in sediment cores from New England and New Zealand lakes in which living populations are also being studied. More than 14,000 years of quantitative record is available in Rogers Lake, Connecticut. The New Zealand sections provide various kinds of control, the climatic history having been similar while the biotic diversity is lower. The possibility is being tested that certain species-substitutions are related to size-specific predation. 2. Population studies of zooplankters are planned under controlled conditions of temperature and food supply. The chief item needed for interpretation of fossil assemblages is information on instar length and number in *Bosmina*, but the plan is to attack the more general problem of niche diversification via cyclomorphosis. 3. Ionic regulation is to be examined in entomostracans of inland waters, especially in the remarkable copepod family Centropagidae, which has important geochemical and zoogeographic implications. 4. Studies of meromictic (and sulfate-rich) Green Lake, New York, will be examined. Because of absence of benthic animals, this lake is suitable for analysis of stratigraphic smearing of microfossils below the mudwater interface. It is proposed to sample the lake and study the problem of smearing. 5. Finally, certain aspects of tropical paleoecology will receive continued attention.

SUPPORTED BY U.S. National Science Foundation

### 7.0172, INVESTIGATIONS ON THE CRUSTOSE CORALLINES OF THE NORTH ATLANTIC

W.H. ADEY, Smithsonian Institution, Washington, District of Columbia 20560

Collection of crustose corallines by SCUBA-diving and with an underwater research vehicle from the coasts of the entire North Atlantic, to study their systematics, biogeography, ecology and sedimentology, and to develop a North Atlantic monograph for the group.

SUPPORTED BY Smithsonian Institution

### 7.0173, EVOLUTION OF PROVINCIAL DISTRIBUTION PATTERNS IN CHEILOSTOME BRYOZOA

A.H. CHEETHAM, Smithsonian Institution, Washington, District of Columbia 20560

Seemingly high endemism at both generic and specific levels in Late Cretaceous and Tertiary cheilostome Bryozoa is being studied. Samples now on hand will be supplemented by collecting especially in areas bordering the North Atlantic. Interpretation of the response of benthic and epi-planktonic cheilostome groups to shifting barriers and corridors will be made.

SUPPORTED BY Smithsonian Institution

### 7.0174, LA JOLLA MARINE GEOLOGY LABORATORY

G.W. MOORE, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

Liaison with Bureau of Commercial Fisheries, Scripps Institution and other oceanographic agencies in the area. Electron and light microscope identification of micropaleontologic floras for age and ecologic determinations.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0175, BIOFACIES STUDY OF BENTHONIC FORAMINIFERA IN OCEAN SEDIMENT CORES

W.D. BOCK, Univ. of Miami, Graduate School, Miami - Coral Gables, Florida 33124

Benthonic species of Foraminifera from core material obtained during the 1968 JOIDES drilling program will be studied for morphological variation through time to determine the paleoecological conditions of the time sequence represented in each core. The ultimate goal of the study will be to establish a 3-dimensional distribution of single species in the geologic record. In addition, it may be possible to discern boundary conditions for reproductive rates at low temperatures.

SUPPORTED BY U.S. National Science Foundation

### 7.0176, CALCAREOUS NANNOFOSSILS FROM PALEOCENE - EOCENE DEPOSITS

S. GARTNER, Univ. of Miami, Graduate School, Miami - Coral Gables, Florida 33124

Paleocene - Eocene calcareous nannofossils have been intensively studied during the past decade, and several partial nannofossil zonations have been proposed for this stratigraphic interval. Most previous studies, however, have been on isolated samples or on sections covering limited intervals, so that the nearly complete Paleocene - Eocene interval penetrated by JOIDES coreholes 3, 4, and 6 offers a unique opportunity to test previous zonations, to modify and supplement them; and to establish a reference standard for this interval for future study of early Tertiary oceanic sediments. This opportunity will be exploited.

SUPPORTED BY U.S. National Science Foundation

### 7.0177, STUDY OF FOSSIL SEA TURTLE COLLECTION AT THE INSTITUT ROYAL DES SCIENCES NATURELLES, BRUSSELS, BELGIUM

R. ZANGERL, Field Museum of Nat. History, Chicago, Illinois 60605

The late Cretaceous and Tertiary strata of Belgium have produced what is thought to be one of the finest collections of fossil sea turtles in existence. Louis Dollo, the dean of vertebrate paleontologists of Belgium, is largely responsible for this collection, and he intended to work it up. But this never happened, and the collection has remained unstudied since early in the century. A few years ago, Dr. Casier (a paleoichthyologist) worked on some of the skull material but has not yet published. He will be coauthor of the present effort.

The Belgian material is most important because much of the material is very well preserved (whole skeletons). It is hoped that the Eocene specimens will shed light on the London Clay forms, well described by Richard Owen, but in need of revision. A correspondent in England is currently working on the British materials and an exchange of information is planned at the end of the principal investigator's stay in Brussels.

SUPPORTED BY U.S. National Science Foundation

### 7.0178, STRATIGRAPHIC STUDY OF RADIOLARIA IN DEEP SEA QUATERNARY SEDIMENTS

C. NIGRINI, Northwestern University, Graduate School, Evanston, Illinois 60201

Recent research has shown that it is possible to distinguish between low, middle and high latitude radiolarian assemblages. It is now proposed to use this knowledge in the interpretation of Quaternary stratigraphy, using deep-sea core material from selected localities in the three major ocean basins. Radiolarian sequences, correlated with similar foraminiferal series, would allow an extension of deep-sea Quaternary stratigraphy into non-calcareous sediments. The study will be based on cores already in the collections of Lamont Geological Observatory and Scripps Institution of Oceanography. Support is requested for the principal investigator, and for the purchase of some supplies and equipment.

SUPPORTED BY U.S. National Science Foundation

### 7.0179, NORTH AMERICAN POST-OLIGOCENE CYTHERID OSTRACODS

P.A. SANDBERG, Univ. of Illinois, Graduate School, Urbana, Illinois

This study is underway on the systematics, morphology, ontogeny, distribution, and ecology of North American Late Cenozoic and modern brackish water cytherid Ostracoda. Abundant preserved material collected from coastal waters is now available. Preliminary results indicate that along the Atlantic coast the ostracods of modern low salinity environments and ancient facies interpreted as deposited in low salinity environments are really much more like those of the Gulf Coast than was previously believed. Confusing phylogenetic and taxonomic problems involving morphologically very similar, congeneric species, particularly of the common genera *Cytherura* and *Porissocytheridea*,

## 7. MARINE GEOLOGY

have been worked out. Frequently, solution of the problems was facilitated by presence of differing modes of ontogenetic development in species with very similar adult forms.

The detailed information on morphology and ontogeny of the ostracods will be utilized in further recognition and elucidation of phylogenetic trends within and between the various genera.

SUPPORTED BY U.S. National Science Foundation

### 7.0180, MEASURING PAST OCEANOGRAPHIC CONDITIONS

J.R. DODD, Indiana University, Graduate School, Bloomington, Indiana 47405

Skeletal microstructure, trace chemistry, and mineral composition of some invertebrate skeletons are affected by the temperature and salinity of the sea water in which they grow. Work on some species indicates that from these relationships determination of temperatures and salinities of the geologic past is possible by analysis of fossils. More work needs to be done to make these techniques generally applicable.

A series of experiments utilizing radioactive tracers (especially Calcium-45 and Strontium-85) is underway. These experiments are designed to determine variation with environmental parameters of calcification rate in the total skeleton and in various parts, the relative rate of calcite to aragonite deposition in the skeleton, and the rate of uptake of various trace constituents (especially strontium). It is hoped to determine the variation in these rates with temperature and salinity and perhaps other parameters.

SUPPORTED BY Amer. Chemical Society

### 7.0181, COMPARATIVE STUDIES OF LATE MESOZOIC AND EARLY CENOZOIC HERPETOFAUNAS

R. ESTES, Boston University, Graduate School, Boston, Massachusetts 02215

This investigation is a continuation of the research initiated under NSF grants G-18905, GB-1683, and GB-4304.

The evolutionary and faunal history of the American herpetofauna is little known. Few useful fossils are available and many are unpublished. The work involves study of a series of geographically and temporally associated fossil samples in midcontinent North America. These samples come from similar depositional environments and span approximately 100 million years of geologic time. Preliminary studies indicate presence of a widely-distributed, coastal plain herpetofauna, which once lived on the shores of North American epicontinental seas. Strong resemblance to elements now South and Central American occurs in the lizards and other terrestrial forms, while the aquatic fish and amphibian fauna shows closest resemblances to the present-day coastal plain fauna of the Gulf Coast of North America. Comparisons of this fauna to similar forms in Europe has disclosed little similarity between the two continents during the period studied, mainly from Late Jurassic to Early Cenozoic time. Real similarities are perhaps more likely to emerge in comparison with South American fossils. After continued study of American, European, and South American materials is completed, a more consistent picture of the evolutionary and faunal changes involved will be available than exists at present.

SUPPORTED BY U.S. National Science Foundation

### 7.0182, STRATIGRAPHIC AND TAXONOMIC-PHYLOGENETIC STUDIES ON PLANKTONIC FORAMINIFERA

W.A. BERGGREN, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543

It is planned to investigate the planktonic foraminifera and their use in formulating a unified mondial biostratigraphic zonation for marine Cretaceous and Tertiary rock units. The framework for this investigation will be detailed analysis of the planktonic foraminifera of the type sections of the Cretaceous and Tertiary stages, which are located in western Europe. The program will involve several methods of study including: detailed

biostratigraphic investigations of selected stratigraphic sequences in North and South America, western Europe, eastern Europe, North Africa, Asia Minor and Oceania; and detailed structural analysis of the planktonic foraminifera using the electron microscope, x-rays, peel-replicas and similar methods. It is planned to integrate the program with the JOIDES deep sea coring program.

SUPPORTED BY U.S. National Science Foundation

### 7.0183, ELECTRON MICROSCOPY OF CALCAREOUS AND SILICEOUS PLANKTON FOR PALEOECOLOGIC AND PALEOCLIMATIC STUDIES

A.W. BE, Columbia University, Graduate School, Palisades, New York 10964

This is for the continuation and expansion of present work to include electron microscopic studies on the taxonomy, zoogeography and ecology-paleoecology of Bacillariophyta, Coccolithophoridae, and foraminiferal shell structure in ocean waters and marine sediments.

This work is a tripartite investigation using the facilities of the Lamont electron microscope laboratories.

SUPPORTED BY U.S. National Science Foundation

### 7.0184, A MICROPALAEONTOLOGICAL STUDY OF DEEP-SEA CRETACEOUS AND TERTIARY SEDIMENT

M. EWING, Columbia University, Graduate School, Palisades, New York 10964

The objectives of this study are: (1) to identify and describe Cretaceous and Tertiary microfossil assemblages (foraminifera, radiolaria, diatoms and coccoliths); (2) to investigate the past distribution and ranges of microfossil species; (3) to study the relation of the physical properties of the sediments to the flora and fauna; (4) to relate these cores to reflecting horizons on seismic profile records and to map the distribution of pre-Pleistocene sediments on portions of specific topographic highs (e.g. Mid-Atlantic Ridge, East Falkland Plateau and East Pacific Rise).

From a preliminary study of the pre-Pleistocene cores, it is evident that on certain areas of ocean floor pre-Pleistocene sediments are within reach of the corer. These localities are: (1) the northern scarp and crest of the Rio Grande Rise; (2) the top of the East Falkland Plateau; (3) the rugged crest and steep flanks of the Agulhas Plateau; (4) the top and flanks of the northeastern end of the Walvis Ridge; (5) the steep flanks of some equatorial fracture zones; (6) an outcrop area of the prominent seismic reflector layer A, northeast of the Bahamas.

SUPPORTED BY U.S. National Science Foundation

### 7.0185, PALEONTOLOGY OF LATE CENOZOIC ANTARCTIC RADIOLARIA AND DIATOMS

J.D. HAYS, Columbia University, Graduate School, Palisades, New York 10964

Several hundred deep-sea cores from the Southern Oceans, off Antarctica, have been studied by Lamont Geological Observatory for their contained radiolaria and diatoms. Systematic and stratigraphic studies of these planktonic, silica-covered protista, combined with radiometric dating and paleomagnetic polarity measurements, have led to the establishment of a precise stratigraphic sequence covering the last five-million years. Correlation of the radiolarian zones with radiometric dates and paleomagnetic-episode boundaries has shown that the faunal boundaries are isochronous in sediments covering large areas. This permits the detailed determination of rates of sedimentation and other aspects of the late geologic history for large areas of the Antarctic Ocean floor. Studies of recent and fossil diatoms have indicated cold-water and warm-water species, whose paleodistribution indicates the shifting position of the Antarctic Convergence and, indirectly climatic changes. The project will continue to examine the siliceous-microfossil content of cores taken by the Eltanin and the Glacier for continued refinement of the radiolarian and diatom zones and for the extension of these zones and related conclusions into the areas to be sampled during the next year.

## 7. MARINE GEOLOGY

No personnel from this project will be on the Eltanin or the Glacier.

SUPPORTED BY U.S. National Science Foundation

### 7.0186, MODERN FORAMINIFERA OFF OREGON

G.A. FOWLER, Oregon State University, Graduate School, Corvallis, Oregon 97331

The object of the proposed study is to make a detailed examination of the foraminifera from the sea floor off the coast of Oregon. This is an almost unexplored area from the standpoint of foraminiferal ecology. Findings are expanding and augmenting existing knowledge from this and other parts of the world. Results of current investigations demonstrate considerable variation in data from three discrete samples at each station and between closely spaced profiles in the shelf. It is important to determine to what extent the variance of faunal trends occurs. Sufficient samples for this have been obtained already and are partially processed. One year is needed to complete the study.

SUPPORTED BY U.S. National Science Foundation

### 7.0187, STUDY OF RADIOLARIA IN SURFACE SEDIMENTS OF THE NORTHEAST PACIFIC OCEAN

H. LING, Univ. of Washington, Graduate School, Seattle, Washington 98122

Literature related to or mentioning the occurrence of Radiolaria in the Northeast Pacific indicates that this micro-organism is one of the most abundant, widely distributed, and persistent biogenic elements in the surface sediments of the Northeast Pacific Ocean. Yet, no detailed study of Radiolaria from this area has previously been attempted.

The principle objective of this study will be to carry out a taxonomic study of Radiolaria in approximately 50 surface sediment samples from the Northeast Pacific Ocean that are part of the sediment collection of the Department of Oceanography, University of Washington. The taxonomic study is a necessary initial step in a more comprehensive study, to be attempted later, of the relative abundances of the defined taxa in assemblages and the distribution of the fauna in areas of warm mass properties, bathymetry, and nature of sediments.

SUPPORTED BY U.S. National Science Foundation

## 7G. SEDIMENTOLOGY - STRATIGRAPHY

(*origin, Deposition, and Properties of Ocean Sediments; Studies of Sub-bottom Sedimentary Rocks. See Also Chapters 7c and 8n.*)

### 7.0188, INTERSTITIAL WATER OF GLACIAL-MARINE SEDIMENT

C.M. HOSKIN, Univ. of Alaska, Graduate School, College, Alaska 99735

The problem to be investigated is concerned with (1) the amount and salinity of pore water in glacial-marine sediment, and (2) the nature of the transition from a fresh water environment at the glacier terminus through the estuarine conditions in glacier bays to a normal marine environment. The expected results will be quantitative data to be used for a first evaluation of any possible potential for production of subsurface water from these glacial-marine sediments. Gravity cores will be taken in the recent sediments of the glacier bay district of Southern Alaska. Coring will be done on traverses from glacier terminus through the estuary to the normal open marine. Research vessels and laboratory facilities of the Marine Institute of the University of Alaska at Douglas will be used for the field work. Laboratory work in College, Alaska, will be concerned with measurements of content and salinity of pore water, and porosity, permeability, and grain size of the sediment. Water content will be determined by centrifugation. Salinity of the pore water will be done by titration with silver nitrate using potassium dichromate as the end-point indicator. Porosity (pycnometer and calculation) and permeability (constant and variable head permeameters) determinations will be made with methods now in use by the Hydrologic Laboratory of the United States Geological Survey at Denver. Grain size analysis will be made by Tyler ro-tap for sand and by pipette for silt

and clay. Mineralogic composition of the sediment will be determined by standard petrographic techniques.

SUPPORTED BY U.S. Dept. of Interior - O. Water Res. Rch University of Alaska

### 7.0189, SEDIMENT AND VOLCANIC STUDIES

Y.R. NAYUDU, Univ. of Alaska, Inst. of Marine Sciences, College, Alaska 99735 (NONR)

The objective of this task is to determine distributions of sediments throughout the northeast Pacific Ocean as they were deposited during and since the Pleistocene ice ages. Core and dredge samples will be obtained on ships, and the samples will be analyzed in the laboratory to determine their stratigraphy, petrology, and origin. Methods of analysis include chemical, optical, x-ray diffraction, spectroscopic, trace-element, and conventional particle size distribution. Submarine volcanism is being studied by means of petrographic analyses of volcanic dredge samples. Leaching of submarine basalt flows has been shown to result in concentrations of manganese nodules. Studies are being continued on this formation of manganese nodules.

These investigations provide information on the distribution and rate of deposition of sediments deposited in the Northeast Pacific Ocean during Pleistocene and recent times. Determinations on the origins of these sediments makes possible reasonable estimations of sediment layering in portions of the northeast Pacific not yet surveyed.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0190, SEDIMENTARY GEOCHEMISTRY

G.D. SHARMA, Univ. of Alaska, Inst. of Marine Sciences, College, Alaska 99735

This investigation pertains to the study of authigenic minerals found in the sea water. Various chemical species when added to synthetic sea water precipitated amorphous minerals. The effects of relative concentrations of the species added and the nature of the precipitate is currently underway.

SUPPORTED BY Union Oil Company of California

### 7.0191, SUBMARINE GEOLOGY OF GASTINEAU CHANNEL JUNEAU, ALASKA

G.D. SHARMA, Univ. of Alaska, Inst. of Marine Sciences, College, Alaska 99735

The primary aim of this study was to determine the nature and thickness of sediment in the Gastineau Channel. A Bolt pneumatic continuous profiler was used to determine the sub-bottom structure in the channel. Three longitudinal and twelve traverse profiles were obtained. Nearly fifty bottom grabs and a few cores were obtained to determine the nature of sediments.

The size parameters of these bottom grab samples were computed from weight percentages determined by wet sieving and pipette analyses. The sediments in Gastineau Channel were predominantly silt with varying components of sand and clay. Near shore sediments were sand with minor fractions of pebble and cobbles. The thickness of sediments in the channel varied from zero to approximately 450 feet. The channel consisted of a shallow basin near Juneau bounded by a sill near Juneau Island. Southeast of the sill the channel deepened gradually and thickness of sediment increased more and there were no sediments on the sill.

SUPPORTED BY Global Marine Incorporated University of Alaska

### 7.0192, DIAGENESIS IN SEDIMENTS

G.D. SHARMA, Univ. of Alaska, Inst. of Marine Sciences, College, Alaska 99735

Diagenetic alterations were induced in sediments in a model representing shallow marine shelf deposits by injecting synthetic sea water under partial pressure of carbon dioxide. The sediments from the model were then removed and studied under a petrographic microscope. This study has included the interrelation of the chemistry of the interstitial fluid and the mineralogy of the

## 7. MARINE GEOLOGY

sediments, the factors controlling the formation of silica and calcite cements, the processes responsible for transforming sediments into hard rocks, and the sequence of these processes.

The petrographic analyses indicate that during early diagenesis cements form in the intergranular spaces only. The calcite cement crystallized as small fibrous crystals around the grains, and extends into the pore space subsequently resulting in rim cementation. Further studies to delineate the sources of the cements and the chemical environment of their precipitation are currently underway.

SUPPORTED BY Amer. Chemical Society

### 7.0193, SEDIMENTOLOGY AND GEOLOGIC HISTORY OF HUMBOLDT BAY, CALIFORNIA

R.W. THOMPSON, Humboldt State College, Graduate School, Arcata, California 95521

This is a basic research project with the following principal objectives: 1) To assess the physical characteristics of bottom sediments in the various morphologic environments of Humboldt Bay and the immediate surroundings; 2) To account for these characteristics in terms of physical, chemical and biological processes acting in the bay; 3) To apply the information gained in 1) and 2) toward interpretation of sediments encountered in borings beneath the bay and surrounding environs, and finally - 4) To work out the recent geological history of bay development.

SUPPORTED BY Amer. Chemical Society

### 7.0194, RADIOISOTOPIC SAND TRACER STUDY, POINT CONCEPTION, SANTA BARBARA COUNTY, CALIFORNIA

J.R. TEERINK, Univ. of California, Graduate School, Davis, California 95616

Problem: There is a need for an investigation of the littoral material movement around headlands along the California coastline in order to improve capabilities in the planning, design, construction and maintenance of coastal works.

Solution: The U. S. Atomic Energy Commission and all participating agencies, including the Department of Water Resources, accepted and approved a proposal to investigate the mechanics of littoral transport around Point Conception, California, by tracing sand grains tagged with radioisotopes.

Following site selection, preliminary tests were made of several isotopes and a tracer meeting engineering, scientific and health requirements was selected. Minor changes in instrumentation and improvements in the field techniques were developed. Results obtained from the first year's study were encouraging. The basic tools are now available to meet several of the study program objectives, i.e., tracing material around a headland and qualitative mechanics of transport.

U.S. Natl. Aero. & Space Adm.

### 7.0195, INDIAN OCEAN FORAMINIFERA AND SEDIMENTS

O.L. BANDY, Univ. of Southern California, Graduate School, Los Angeles, California 90007

Primary emphasis will be given to the completion and publication of the following studies: (1) sedimentology of the Andaman Sea by Kelvin S. Rodolfo, (2) foraminiferal biofacies of the Andaman Sea by William E. Frerichs, (3) sedimentology of a profile across the Mozambique Channel by Douglas Sherman and Donn Gorsline, (4) foraminiferal biofacies of the southwestern Indian Ocean by Edith Vincent, and (5) ecophenotypic studies of selected foraminiferal species by Orville L. Bandy, William E. Frerichs, and Edith Vincent. Sedimentology of the Andaman Sea will be completed by September, 1966; foraminiferal biofacies of the Andaman Sea could be completed by about March 1967; sedimentology of a profile across the Mozambique Channel will probably be completed by the end of September; foraminiferal biofacies of the southwestern Indian Ocean will be completed by

September, 1967; and a series of ecophenotypic investigations will be completed during the coming year.

During Cruise 17 of the R/V ANTON BRUUN in the summer of 1966, a valuable series of bottom samples were collected off South America in the region of the Nasca Ridge. It is planned to make comparisons of benthic zonation, species variation, and foraminiferal ecology between the Indian Ocean and those populations collected in the current Bruun program.

SUPPORTED BY U.S. National Science Foundation

### 7.0196, SAND RIPPLES

R.O. STONE, Univ. of Southern California, Graduate School, Los Angeles, California 90007

A study is being made of sand ripples, as a major form of sediment movement under both subaerial and subaqueous conditions. Using cameras and other equipment, measurements are being made of relevant properties, such as structure, size, shape, rate of movement, and ages; and forces, such as wind and current velocity, wave characteristics, and sediment abundance. Analyses are being made to identify significant variables, thresholds and mechanisms of movement, and the degree to which ripples are indicators of other beach and near-shore environmental conditions.

A better understanding of sediment movement in the near-shore and beach zones is directly applicable to naval problems. This study may also lead to ability to predict local environmental conditions through remotely sensed or otherwise acquired information on sand ripple characteristics.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0197, (U) THE EFFECTS OF OCEANIC PROCESSES ON THE DEPOSITION OF RIVER SEDIMENTS

R.J. GIBBS, Univ. of California, Graduate School, Los Angeles - U.C.L.A., California 90024

Objective: An increased ability of the Navy to plan and carry out the operations involving ocean-bottom engineering, subsurface search and rescue, and other bottom-influenced activities depends the area of operation. Those properties in turn depend largely upon the age and composition of the sediments and upon the processes by which they have been transported and deposited. This research should provide a comprehensive understanding of these sedimentary parameters on the continental margin off the mouth of the Amazon River and a better understanding of similar processes applicable to other large river systems.

Approach: Material from cores and dredges and samples of suspended sediment-in-transport have been obtained from previous field investigations in the area off the Amazon and will be analyzed in the laboratory for their composition, size distribution, and age. The analytical results will be mapped geographically and quantitatively related to similar results which already describe this sedimentary material at its source. From these relationships conclusions will be drawn concerning the rates and types of transportation, deposition, and alteration of the sediments as they move from the mouth of the Amazon River to the deep-sea floor.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0198, DEPOSITIONAL PROCESSES MARGINAL TO LARGE ANTARCTIC ICE SHELVES

C.A. NELSON, Univ. of California, Graduate School, Los Angeles - U.C.L.A., California 90024

UCLA will investigate the sedimentology, especially the depositional processes, of modern glacial marine sediments from the Antarctic Ocean near the margins of large ice shelves. Short phleger cores, long piston cores, and dredge samples are available from the Weddell Sea, Ross Sea, and other areas that can be compared in several parameters with extensively investigated glacial marine sediments of Paleozoic age from Antarctica, South America, South Africa, Australia, and India. Such comparisons will be significant in determining the environments of deposition of the ancient deposits about which there have been many theories.

SUPPORTED BY U.S. National Science Foundation

## 7. MARINE GEOLOGY

### 7.0199, QUATERNARY SEDIMENTATION AT MARINE-FLUVIAL INTERFACE, SW OREGON

R.J. JANDA, U.S. Dept. of Interior, Water Resources Division, Menlo Park, California

Purpose: To obtain data on the origin and geologic history of Quaternary sediments, including black sands known to contain economically significant heavy minerals.

Methods: Surficial deposits and soils will be mapped in detail and a petrographic study will be made of them. Available drillers' logs and geophysical information will be compiled and supplemented with test drilling where necessary to provide an understanding of the characteristics of the deposits and associated fluids at depth.

Stream gages and sediment sampling sites will be established to provide information for computation of sediment loads. Techniques and equipment for sampling the bed load of gravel bed streams will be developed.

Level surveys, fathometer surveys, and plane table mapping will be used to study changes in beach slope and volumetric changes in estuaries.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0200, SEA FLOOR STUDIES - DEPOSITIONAL AND EROSION PROCESSES

R.F. DILL, U.S. Navy, Undersea Warfare Center, San Diego, California 92140

Objective: To determine environmental factors affecting the acoustical uses of the oceans and the stability of structures and equipment emplacement on the sea floor.

Approach: Observe and determine the nature of depositional and erosional processes, especially: (1) those elements affecting the distribution of sediments their transport, accumulation, and lithification. (2) those elements affecting the stability of slopes and bearing capacity. (3) those features and relationships which prove the ability to predict sea floor sediment conditions in ocean areas not yet extensively studied (4) those aspects which affect basic sediment distribution patterns.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0201, DATING MARINE SEDIMENTS

E.D. GOLDBERG, Univ. of California, Scripps Inst. of Oceanography, San Diego - La Jolla, California 92038 (NONR)

Work continues on investigation of the kinetics of supply of terrigenous components to clastic deep ocean sediments. Aeolian materials in particular are being studied, using direct collection of wind-borne dust for periods of a few days, material trapped in glacier ice (whose geochronology is known) for periods of centuries and fractions, and oceanic cores (dated by Pb-210, K-Ar, and U disequilibrium techniques) for millennia. Wind-transported solids are identified by mineralogy, size analysis, and geometry of ore particles.

Visibility and optical resolution both in the atmosphere and in water bodies are critically dependent on the size and concentration of solid particles that can scatter light. Certain techniques for detection of underwater objects depend on contrast of the object against the background of scattered light. These basic studies will contribute to the knowledge of the character and distribution of light-scattering particles of non-biological origin in the atmosphere and in sea water.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0202, SAND TRANSPORT

D.L. INMAN, Univ. of California, Scripps Inst. of Oceanography, San Diego - La Jolla, California 92038 (NONR)

The objective is to understand the mechanics of sediment movements by waves, currents, and winds, and hence of formation of sedimentary structures such as beaches and bars. Studies are conducted in the intertidal zones at depths accessible to divers, and in deeper water, especially in submarine canyons, by various means, including deep-sea research vehicles. Studies of flow in submarine canyons continue, with plans for synoptic measurements of the wind field above the water and of currents and

pressure in the canyons and on the adjacent shelf. An array of digital wave staffs will measure the onshore flux of wave energy and detect the presence of edge wave modes. Nearshore circulation cells are being studied under controlled conditions in the laboratory and at selected beaches on the Pacific coast, and along the Gulf of California.

The character of nearshore and oceanic sediments and of the wave and current processes by which they are eroded, transported, and deposited is of considerable importance.

This program will contribute significantly to an understanding of nearshore sedimentary processes.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0203, MARINE SEDIMENTS

T.H. VANANDEL, Univ. of California, Scripps Inst. of Oceanography, San Diego - La Jolla, California 92038 (NONR)

The purpose is to relate ocean sediments to the bathymetry, structure and geological and geophysical properties of the sea floor and to understand the historical and physical processes which determine these relationships. During the coming year, as part of the R/V ARGO cruise around the world, a study will be conducted on the Mid-Atlantic Ridge at about 10 degrees South, using satellite navigation and the shipboard computer to permit planning a reasonable sampling program immediately following the geophysical survey. The work is planned in part to test the theory of seafloor spreading.

This program, in addition to providing much valuable bathymetric and magnetic information, will help provide a predictive capability for extending this information into unsurveyed areas.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0204, SEDIMENT STRUCTURE

E.L. WINTERER, Univ. of California, Scripps Inst. of Oceanography, San Diego - La Jolla, California 92038 (NONR)

This research is concerned with modern sediments and ancient sedimentary rocks in tectonically active regions such as the border zones between continents and oceans, and geosynclines, in order to understand the history and structure of these entities and the occurrence, composition, and mechanics of transport of the sediments. During the coming year, bathymetric, seismic and geomagnetic observations and dredge and core samples collected in the Coral Sea during expedition NOVA will be worked up.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0205, MEASUREMENT OF SURFACE CHARGE ON PARTICLES SUSPENDED IN SEA WATER

P.J. WANGERSKY, Dalhousie University, Graduate School, Halifax - Nova Scotia, Canada

The purpose of this research was to investigate the nature of the electrostatic surface charge on particulate material, living and dead, suspended in sea water, and to ascertain the effects of this surface charge on the formation of large aggregates from smaller suspended material. This electrostatic charge, expressed as the so-called 'zeta potential', is measured by impressing the rate of movement of particles in this field.

The zeta potentials of a number of living marine organisms largely diatoms, were studied. All of the living organisms displayed zeta potentials around -10 mv in sea water. When the organisms were killed by suspension in liquid nitrogen, their zeta potential went to zero.

Particles made by bubbling air or nitrogen through filtered sea water generally displayed zeta potentials around -30 mv when re-suspended in distilled water, and around -10 mv in sea water. As the zeta potential dropped below -15 mv, clumping of the small particles into larger particles could be seen. Particles formed by swirling or bubbling sea water displayed the same kinds of surface charges as the naturally occurring particles.

SUPPORTED BY U.S. National Science Foundation

## 7. MARINE GEOLOGY

### 7.0206, FEASIBILITY OF THE APPLICATION OF PALYNOLOGICAL INVESTIGATION OF DEEP-SEA SEDIMENTS TO MAJOR GEOLOGICAL PROBLEMS

J.J. GROOT, Univ. of Delaware, Graduate School, Newark, Delaware 19711

The distribution of pollen and spores in deep-sea sediments is mainly determined by distance from land. At a distance exceeding 350 miles from shore the number of non-reworked pollen is usually too small (less than 10 grains per gram of sediment) for effective palynological study, except where very favorable conditions for dispersal by oceanic circulation exist, as in the Argentine Basin, for instance. The windward or leeward position of sediment samples does not appear to have a significant influence on their pollen content, suggesting that atmospheric transportation is of small importance relative to transportation by currents. Most samples contain some reworked pollen; distinguishing the latter on the basis of stain acceptance cannot be done with certainty at present. The presence of reworked pollen is perhaps the greatest difficulty facing marine palynological research. In view of this difficulty, palynological study should be done in conjunction with other investigations pertaining to the stratigraphy of deep sea sediments. Spectra of non-reworked pollen in deep-sea sediments reflect the vegetation of the neighboring continent and the vertical distribution of these spectra are mainly determined by vegetational and climatic change.

SUPPORTED BY University of Delaware

### 7.0207, RECENT MARINE AND NONMARINE SEDIMENTS AND MICROFAUNA OF DELAWARE COASTAL AREAS

J.C. KRAFT, Univ. of Delaware, Graduate School, Newark, Delaware 19711

It is proposed to study recent sedimentary environments and their associated microfauna as a basis for interpreting the geographic and stratigraphic distribution of similar environments in the geologically recent past. The coastal area of southern Delaware has been selected for study because it contains highly varied shoreline transitional environments which should show distinctive microfaunas, sediments, and sedimentary structures. Knowledge of the interrelations of these modern environments will increase our capability to interpret paleoenvironments.

Specifically it is planned to 1) study the sediment and microfaunal distribution patterns of the shallow-water bays, bay mouth bar, inlet, marsh, and nearshore marine environments, 2) determine what combinations of sediment type, microfaunal occurrence, and sedimentary structures are characteristic of each environment, 3) relate microfaunal distribution to water salinity, temperature variation, and other physical and chemical aspects of the environment, 4) study the nature of the boundaries between the various environments of deposition, and, time permitting, map and interpret the areal distribution of recent sediments of the Delaware Coastal Plain.

SUPPORTED BY U.S. National Science Foundation

### 7.0208, CHANGES IN SEA LEVEL IN NORTHERN TUNESIA

R.H. BENSON, Smithsonian Institution, Washington, District of Columbia 20560

Examination of evidence of sea level in the last 3000 years in the vicinity of Carthage and Utique, Tunisia as shown by changes in coastal sedimentation in relation to archeological sites.

SUPPORTED BY Smithsonian Institution

### 7.0209, BIOSTRATIGRAPHY OF MID-ATLANTIC RIDGE SEDIMENTS

R. CIFELLI, Smithsonian Institution, Washington, District of Columbia 20560

The project involves the study of planktonic Foraminifera from the Mid-Atlantic Ridge. The purpose is to establish the stratigraphic relationships of sediments and other rock types on the Mid-Atlantic Ridge with the goal of determining the time sequence of events in the history of the Atlantic Ocean.

SUPPORTED BY Smithsonian Institution

### 7.0210, NATURE OF INTERTIDAL EROSION ON CORAL ATOLLS

F.R. FOSBERG, Smithsonian Institution, Washington, District of Columbia 20560

An attempt to determine the relative roles of biological agents as compared to such physical ones as abrasion, solution, temperature change, etc., in the intertidal erosion of coral limestone. Involves field studies in collecting of samples of surfaces, and the examination of these by optical microscopy and electron microscope replica photography to see if different surface features can be associated with different erosional agents.

SUPPORTED BY Smithsonian Institution

### 7.0211, GEOLOGICAL AND HYDROGRAPHIC STUDY OF THE WILMINGTON SUBMARINE CANYON AND ADJACENT AREAS

M. LIGHT, Smithsonian Institution, Washington, District of Columbia 20560

A program of investigation has been undertaken by the staff of the Division of Sedimentology, U.S. National Museum, Smithsonian Institution with active cooperation and support of the U.S. Coast Guard Oceanographic Unit, this program has as long-term objective, the detailing of the geometry and sedimentary processes associated with submarine canyons in general. One of the major purposes of this study is the formulation of a sedimentary model for modern canyons located on shelves off low coastal regions which are apparently tectonically stable. The selection of the Wilmington Submarine Canyon for this study was in part determined by logistics, i.e., its proximity to major ports which facilitates repetitive runs over the same area and ease of monitoring with various marine geological and oceanographic techniques.

Thus far four cruises, of 7 days each, have been made to the Wilmington Canyon and adjacent areas. Operations conducted during these cruises included bottom sampling with Boomerang corers and dredges, bottom observations with underwater camera and television instrumentation, sub-bottom seismic profiling, and XBT and STD casts. The next cruise scheduled during February 1969 will include bottom current measurements. Thus far, four papers have been published in various journals. CG Report 373-22, 'Photographic Investigation of Sediment Texture, Bottom Current Activity, and Benthonic Organisms in the Wilmington Submarine Canyon' is now in press.

SUPPORTED BY U.S. Dept. of Transportation - Coast Guard

### 7.0212, COASTAL AND CONTINENTAL SHELF SEDIMENTATION

J.W. PIERCE, Smithsonian Institution, Washington, District of Columbia 20560

To determine the distribution, source, dispersal patterns and transport processes of the sediments of a stable continental shelf and coast in the southern hemisphere.

SUPPORTED BY Smithsonian Institution

### 7.0213, INTERPRETING THE ORIGIN AND DISTRIBUTION OF COASTAL SEDIMENTS

D.J. STANLEY, Smithsonian Institution, Washington, District of Columbia 20560

a. Problems pertaining to distinguishing subtle differences of sands deposited on beaches, dunes, and tidal channels are being examined in the Sippewissett Marsh area, Cape Code, Massachusetts and Sable Island off Nova Scotia using sedimentary petrography, and primary structures. Data is being integrated for interpretation by using statistical methods. Mr. Buttner is processing data with computers. b. The dispersal patterns of sediments in a micro-fjord on the coast of Nova Scotia is also being interpreted using mineralogy, texture, seismic profiles, and analysis of Foraminifera (Dr. F. Medioli).

SUPPORTED BY Smithsonian Institution

## 7. MARINE GEOLOGY

### 7.0214, MODERN VERSUS RELICT SEDIMENT PATTERNS ON CONTINENTAL MARGINS

D.J. STANLEY, Smithsonian Institution, *Washington, District of Columbia* 20560

a. To map and evaluate the distribution of sediments and morphology on the Nova Scotian Shelf and to relate patterns to relict (pre-Holocene) and to modern processes. Problems of Pleistocene ice sheets, fluvial processes, tertiary outcrops, seasonal ice flow over the shelf and recent transgression of the sea must be evaluated. b. Effects of recent eustatic low stands of sea level have affected the morphology of the Bermuda platform. These are being interpreted with high resolution seismic profiles. c. An attempt to investigate sediment transport processes at continental shelf depth is being attempted by observations made in the Man-in-Sea project.

SUPPORTED BY Smithsonian Institution

### 7.0215, SEDIMENT DISPERSAL PATTERNS IN SUBMARINE CANYONS AND SUBSEA FANS

D.J. STANLEY, Smithsonian Institution, *Washington, District of Columbia* 20560

The purpose of this study is to compare and interpret sedimentation patterns in modern canyons and subsea fans and their probable counterparts in the fossil record. Seismic profiles, bottom current data, photographs, cores and grabs are collected in modern canyons off Nova Scotia, the eastern U. S., the West Coast, and possibly the Caribbean area. Direct observations are to be made in some of these with deep submersibles and via the Man-in-Sea project. Fossil canyon deposits in southern France, the Carpathians, and California are being mapped for a detailed comparison with modern canyon fills.

SUPPORTED BY Smithsonian Institution

### 7.0216, RADIOISOTOPIC TRACER STUDY TO INVESTIGATE THE MECHANICS OF LITTORAL TRANSPORT AROUND POINT CONCEPTION, CALIFORNIA

D. DWAYNE, U.S. Army, Coastal Engin. Res. Center, *Washington, District of Columbia* 20016

A study to develop techniques to measure sediment movement in the littoral zone is specifically designated for the Point Conception area of the Pacific coast. The basic development program includes a radiation monitoring system capable of deep water monitoring of radioisotopes tagged into sand, analysis of data obtained from measurement of the distribution of the radioisotope tagged sand that has been subjected to the normal effects of waves, tides, and along-shore currents; methods for tagging sand without altering its hydraulic properties and hazard evaluations of the entire transport measuring system. The system is adaptable to sediment transport in both fresh and salt water to depths of 175 fathoms.

The isotope used for sand tagging is  $^{133}\text{Xe}$ , thus providing no significant radiation hazard and no alteration of the hydraulic properties of sand indigenous to the test area.

The radiation detection system utilizes scintillation type detectors. Data collection is obtained on punched tape and digital readout from a 400-channel analyzer. Data may be simultaneously coordinated with depth, salinity, and temperature during the monitoring operation.

Cooperative program of federal and state agencies, including: U. S. Army, Corps of Engineers; U. S. Navy, Pacific Missile Range; U. S. Air Force, First Strategic Aerospace Division, SAC; National Aeronautics and Space Administration; U. S. AEC, Oak Ridge National Laboratory; State of California, Department of Water Resources.

SUPPORTED BY U.S. Atomic Energy Commission

### 7.0217, MECHANICS OF SAND MOVEMENT BY WAVES

T. SAVILLE, U.S. Army, Coastal Engin. Res. Center, *Washington, District of Columbia* 20016

Investigations will be made of the mechanics of sand movement by waves by studying experimental models in a laboratory, by making field measurements and observations, and by analytic

theoretical work. Laboratory tests will involve the basic mechanics of sand grain movement under wave action, studying individual grain stresses and movement; data will be obtained in both the field and laboratory on the quantitative movement of sand by waves for different shore configurations, and attempts will be made to relate these to incident wave and current conditions; field measurements will be made of the basic mechanics of sediment transport, particularly by the use of labeled sand grains which can be followed and identified over some distance of movement; the effect of various types of structures on sediment movement will also be examined.

SUPPORTED BY U.S. Dept. of Defense - Army

### 7.0218, UTILIZATION OF RADIOACTIVE TRACERS IN BEACH STUDIES

G.M. WATTS, U.S. Army, Coastal Engin. Res. Center, *Washington, District of Columbia* 20016

The feasibility of utilizing radioactive and fluorescent tracers in beach studies is being followed and investigated. Preliminary tests familiarizing staff personnel with such techniques are carried out. Study is made to utilize and alter laboratory techniques for field application.

SUPPORTED BY U.S. Dept. of Defense - Army

### 7.0219, COASTAL PROCESSES - SOUTH TEXAS

H.L. BERRYHILL, U.S. Dept. of Interior, Geological Survey, *Washington, District of Columbia* 20242

A topical study of coastline sediments of Padre Island and Laguna Madre to understand the processes involved in transport and deposition of large volumes of sediment along a coastline, the formation and migration of a barrier island, the rate of deposition and geochemistry of sediments in the adjacent lagoon, and the influence of source, sedimentary components and hydrography on the distribution and diagenesis of selected trace elements.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0220, SEDIMENT MOVEMENT AND BOTTOM CONDITIONS IN THE DELAWARE ESTUARY MOUTH AREA

E. BRADLEY, U.S. Dept. of Interior, Geological Survey, *Washington, District of Columbia* 20242

The main objectives of this project are to study the local movements of sand waves or ripples and to study bottom sediment transports generally. These will be correlated with tidal currents and quality of water changes. If feasible the effects of catastrophic events, such as floods, hurricanes, or prolonged strong winds, as well as the effects of biological activity on bottom sedimentation will be studied also.

Direct continuous observations of sediment movement utilizing underwater television equipment will be made at several locations. At one or more favorable sites, a screen will be fixed in the bottom and the progress of sand waves moving with tidal currents will be followed with the television camera using video tape equipment where practical. Bottom sediment sampling and quality-of-water measurements will be made periodically during the visual observations.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0221, DISTRIBUTION OF ELEMENTS IN FLUVIAL AND BRACKISH ENVIRONMENTS

V.C. KENNEDY, U.S. Dept. of Interior, Geological Survey, *Washington, District of Columbia* 20242

To determine the distribution of major and minor elements in solution, adsorbed, or in solid form in streams, to study the variation in mineralogy and exchange capacity of stream sediments, and their importance in transporting various elements, to investigate methods, such as fluorescent tracers, for following sediment movement into the marine environment and to determine changes in adsorbed ions as sediment moves into the ocean.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

## 7. MARINE GEOLOGY

### 7.0222, SUBAERIAL AND SUBAQUEOUS FLOW OF SLURRIES

P.D. SNAVELY, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

This study is determining the mechanical behavior of slurries and processes of slurry flow, in laboratory and field, to elucidate the control such processes exercise on the transportation and deposition of heavy minerals, and particularly heavy metals, in the marine environment. This work is being conducted by Stanford University under research contract.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0223, UNIVERSITY OF SOUTHERN CALIFORNIA CONTRACT - CHANNEL ISLANDS AND BASINS SOUTHERN CALIFORNIA CONTINENTAL MARGIN

J.G. VEDDER, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

Objectives of this study include: (1) Detailed identification of mineral components in sediments at the mouths of all active streams that flow into the Continental Borderland; (2) sampling selected representative major drainage systems and their offshore extensions; and (3) to obtain subbottom profiles of the shelf off the Point Conception-Gaviota region to provide information on relative ages of shelf facies and sediment thicknesses. This study is being performed in coordination with the University of Southern California under a joint research contract.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0224, TRANSVERSAL DRIFTS IN BOTTOM PROFILE

R.G. DEAN, Univ. of Florida, School of Engineering, Gainesville, Florida 32601

Physical relationships between changes in the transversal profile due to sediment transport and the physical mechanisms causing such transport are sought under field conditions in the surf zone of the ocean. Pertinent parameters to be measured are the quantity of sand transport, waves (height and direction), water particle velocities, wind, tide, bathymetry, and sediment characteristics. All instrumentation and experimental facilities have been completed on the previous project for which this renewal proposal is being written.

The method of approach is to measure the time histories of the pertinent parameters over half a tidal cycle, i.e., four to six hours. Since we are measuring over a relatively short time interval a stationary process can be assumed and the techniques of spectral analysis will be employed to correlate the various parameters. This correlation allows direct cause and effect relationships to be obtained. In this manner, insight into the sediment transport phenomenon and basic processes occurring in the littoral zone of the ocean can be found.

SUPPORTED BY U.S. Dept. of Interior - F. Water Pol. Ctl

### 7.0225, AN INVESTIGATION OF THE MASS PHYSICAL PROPERTIES OF CARBONATE MUD SEDIMENTS

J. MORELOCK, Florida Inst. of Technology, School of Engineering, Melbourne, Florida 32902

The prime objective of this study is to investigate the mass physical properties of (carbonate) mud sediments. The samples for this study will be collected during a field period of two weeks. Undisturbed samples of carbonate mud will be taken from the western side of Andros Bank in the Bahamas and from the bay area west of the Florida Keys. The Department of Oceanography at Texas A & M University will supply additional cores from Campeche Bank, Mexico. These are all sites of carbonate mud deposition.

Approximately six months will be devoted to the measurement of the physical properties of these sediments. The properties which will be investigated include grain-size analysis, water content, bulk density, void ratio and porosity, specific gravity of solids, shear strength, and consolidation characteristics.

The samples will be analyzed for sediment size distribution, organic content, specific gravity of solids, void ratio, porosity, bulk density, vane shear strength, direct shear strength, and consolidation characteristics. C-14 dates will also be determined.

SUPPORTED BY U.S. National Science Foundation

### 7.0226, DEEP-SEA SEDIMENTS AND VOLCANIC ROCKS OF MID-OCEAN RIDGES

E. BONATTI, Univ. of Miami, Graduate School, Miami - Coral Gables, Florida 33124 (NONR)

Objective: Navy needs for deep salvage and other operations require knowledge of sediment and rock structures of mid-ocean ridges. These structures and the compositions of the corresponding rocks are affected by the tectonic (structural) development of the ridges. This research will provide knowledge about the structures and compositions of sediment layers on or near the ridges, and on the composition and origin of volcanic rocks on ridges and seamounts.

Approach: Seismic cores and volcanic rock dredge samples will be obtained from selected sites over the Mid-Atlantic Ridge and East Pacific Rise. These samples will be analyzed in the laboratory for chemical composition, for mineralogical and altered mineralogical constituents, and for trace elements in the rocks and overlying water samples. The origins of these materials and their relation to the development of the ridges will be determined; this will provide knowledge on the origin and structural development of ocean ridges.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0227, THE GEOCHEMISTRY, MINERALOGY AND ORIGIN OF PELAGIC SEDIMENTS IN AREAS OF HIGH HEAT FLOW AND FRACTURE ZONES

K. BOSTROM, Univ. of Miami, Graduate School, Miami - Coral Gables, Florida 33124

It is proposed to study the effect of high heat flow on the geochemistry, mineralogy and origin of pelagic sediments. Sediment samples from a few selected crossings of fracture zones and high heat flow areas on rises in the Pacific, Indian and Atlantic Oceans will be studied. A geological and geophysical survey of the Easter Island fracture zone, parts of the East Pacific Rise and the Calapagos Rise, that are situated between these fracture zones will be made.

The investigations are expected to clarify: (1) the relations between heat flow and chemical composition of pelagic sediments on rises of various ages, (2) to what extent fracture zones are centers for mineralizing processes, (3) the rate of sedimentation of the sediments and their various constituents, (4) the rate at which various constituents are leached out of sediments during diagenesis and (5) whether leaching of deeply buried sediments may explain the origin of the abnormal crustal sediments, whether the sediments are too thin to account for this hypothesis, or whether the introduction of material from the lower crust and upper mantle must be invoked as an explanation of these sediments.

SUPPORTED BY U.S. National Science Foundation

### 7.0228, EFFECTS OF DEEP SEA SEDIMENTS ON SUDDEN IMPACT, AS FROM DISASTER VEHICLES

H. FROHLICH, Univ. of Miami, Graduate School, Miami - Coral Gables, Florida 33124 (NONR)

Objective: Navy needs for extricating disaster vehicles buried in deep-sea sediments requires knowledge of the physical properties of such sediments and their response to sudden impact. This research aims at developing such knowledge through laboratory measurements, theoretical analyses, and in situ measurements at sea of the penetration of different shaped free-falling probes into sediments.

Approach: Laboratory measurements will be made on the penetration of various shaped blunt probes, dropped from different heights into barrels filled with compacted ocean sediments. Field tests will be made in Florida lakes of free-falling probes to determine transient and terminal drag coefficients in the sediments. A theory of surface friction will be developed on the basis of the laboratory and field observations, which should be useful in the design of a deep-sea sediment shear testing device. This device will provide in situ measurements that should indicate rates of penetration of free-falling probes into sediments. Sediment cores will be obtained to determine shear strengths at the test sites.

## 7. MARINE GEOLOGY

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0229, OCEANOGRAPHY, PLEISTOCENE GEOLOGY AND SEDIMENTS OF LITTLE BAHAMA BANK

A.C. NEUMANN, Univ. of Miami, Graduate School, Miami - Coral Gables, Florida 33124

The proposed research includes continuation of the studies on biological erosion of the coasts and Pleistocene geology of the islands as subsidiary aims, the main emphasis being given to a study of the physical energy of carbonate environments. A wave, current, and tide recording tower has been constructed in the Bight of Abaco which is part of the study area. It is proposed to determine the concentration and size distribution of suspended sediment during normal and storm conditions and to relate these data to concurrently obtained wave and current data, to study the effect of oscillatory bottom currents on the natural baffle produced by turtle grass, and to compare the oscillatory bottom currents computed from surface wave characteristics to those measured directly by a Doppler current meter. By means of an energy frequency spectrum, an attempt will be made to summarize the nature and intensity of the physical energy at the bottom over seasonal intervals and to show the relative increment due to single storms.

SUPPORTED BY U.S. National Science Foundation

### 7.0230, ROLE OF WIND-BORNE CONTINENTAL DUST IN OCEAN SEDIMENTATION PROCESSES

J.M. PROSPERO, Univ. of Miami, Graduate School, Miami - Coral Gables, Florida 33124 (NONR)

Objective: Navy operations require knowledge of the distributions, sources and rates of deposition of sediment in the oceans. The aim of this research is to determine the significance of airborne material of continental origin to various oceanic processes.

Approach: Airborne material is being collected on Barbados following a trans-Atlantic trajectory from Africa. Other dust and ocean particle is being collected from research vessels in the Caribbean and Gulf of Mexico. The material is being analyzed to determine mineralogical and minor -- and trace -- element contents as signatures of source regions. In sea water, the masses and size distributions of suspended matter are being determined and related to the composition of the sea water and underlying sediments.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0231, A SEDIMENTOLOGIC STUDY OF MOBILE BAY AND PERDIDO BAY

H.G. GOODELL, Florida State University, Graduate School, Tallahassee, Florida 32306

This is an environmental study of Perdido and Mobile Bay estuaries in Mobile, Alabama, of the distribution of sediments and the three dimensional sedimentary stratigraphy of the deposits in this study in order to write the recent marine geological history of both areas and to predict future sedimentation rates based on past histories.

SUPPORTED BY Alabama State Government

### 7.0232, GEOMICROBIOLOGICAL WEATHERING PHENOMENA OFF ANVERS ISLAND

D.A. WARNKE, Florida State University, Graduate School, Tallahassee, Florida 32306

This award will permit completion of laboratory analysis of materials collected on Anvers Island, Antarctica, during two previous field seasons. The work includes differentiation and identification of bacterial populations, use of percolation columns for data on bio-weathering of different types of rocks, determination of particulate carbon from autoclaved Millipore filters and deep-frozen water samples and completion of determination of selected nutrients from interstitial water of sediment cores. Modal analyses of rock specimens are planned to furnish precise petrographic control of microhabitats. These methods are used to determine the participation of bacteria in the process of chemical weathering of different rock types in the various microenviron-

ments observed in the field; and of the methods by which these nutrients are introduced to the near shore environment.

This terminal year of research will be conducted at Florida State University; the work will complement investigations on filamentous fungi and marine yeasts carried out concurrently at the University of Miami.

SUPPORTED BY U.S. National Science Foundation

### 7.0233, MAGNETIC PROPERTIES OF ANTARCTIC MARINE SEDIMENTS AND ROCKS

N.D. WATKINS, Florida State University, Graduate School, Tallahassee, Florida 32306

Florida State University has, under NSF Grant GA-602 and GA-1123, made closely-spaced measurements on the submarine-sediment cores taken in the Antarctic regions where the Earth's magnetic field is very steep. FSU will continue to determine the vertical complement of the magnetic polarity on samples at 10-cm intervals on almost all cores recovered from the Eltanin. Selected specimens will be demagnetized and three components of natural remnant magnetism measured. These data are being and will continue to be coordinated with a number of other research projects at FSU in geological oceanography and geochronology. Research of particular significance being carried out under this project is the correlation of magnetic reversals with extinction and rapid evolution of fossil microfauna from the same cores.

No research on the USNS Eltanin is contemplated at this time.

SUPPORTED BY U.S. National Science Foundation

### 7.0234, COMPARISON OF ANCIENT AND MODERN COASTAL CLASTIC SEDIMENTARY ENVIRONMENTS

J.D. HOWARD, Univ. of Georgia, Marine Institute, Sapelo Island, Georgia 31327

Two classic regions, representing ancient and modern depositional environments, have been chosen as primary study areas in which a joint approach will be undertaken to establish the pertinent features common to both and to evaluate these parameters as environmental indicators. It is proposed to carry out detailed field investigations of the near-shore sedimentary record in the Upper Cretaceous inter-tonguing marine and nonmarine rocks of east-central Utah and the shallow shelf and coastal plain sediments of the Recent and Pleistocene of coastal Georgia. Secondary study areas are the Upper Cretaceous rocks of the Rock Springs Uplift, Wyoming, and the San Juan Basin, New Mexico, and the Recent and Pleistocene deposits of the Texas Gulf Coast.

The three principal objectives in the proposed study will be: (1) To determine physical and organic features in modern coastal clastic sedimentary environments which are likely to be preserved and which are applicable to the interpretation of similar ancient environments. Particular emphasis will be placed on the relationships between ancient trace fossils and their modern counterparts. (2) To investigate the patterns of shallow-marine paleocurrent systems. Although terrestrial paleocurrents are relatively well understood, shallow marine paleocurrent dispersal systems have not received due attention. (3) To determine effects of diagenesis on sedimentary textures and structures in selected Recent, Pleistocene, and Upper Cretaceous coastal clastic environments.

SUPPORTED BY U.S. National Science Foundation

### 7.0235, THE POTENTIAL SOURCE, TRANSPORT AND DEPOSITIONAL PATTERNS OF CLASTIC SEDIMENTS IN PORTIONS OF COASTAL GEORGIA

J.D. HOWARD, Univ. of Georgia, Marine Institute, Sapelo Island, Georgia 31327

The purpose of this study is to examine the qualitative and quantitative aspects of clastic sediments in the Sea Island Section of the Georgia Coast. Two levels of investigation are included. (1) A detailed study of representative beach (Sapelo Island). In this part of the study weekly beach profiles are made at variations of

## 7. MARINE GEOLOGY

the beach topography. At the time of profiling, sand samples are collected for grain-size and composition analysis and physical data as to sea state are recorded. (2) In the second part of the study, oriented and undisturbed sediment samples are taken, using an N.E.L. Spade Corer. These samples are analyzed for directional properties of sedimentary structures as well as for sediment grain-size and composition. Physical data include current strength and direction, temperature and turbidity are also collected at sampling stations. This portion of the study includes subtidal environments of the shelf and estuaries of the Georgia coast. An Arnham bed-load sampler is being used in an attempt to collect samples of the traction load on the shelf.

SUPPORTED BY U.S. Dept. of Defense - Army

### 7.0236, ALPINE LIMNOLOGY PROJECT

A.H. WOODCOCK, Univ. of Hawaii, Graduate School, Honolulu, Hawaii 96822

Studies of direct significance to marine science do not necessarily end when one moves from the sea to the shore, especially at an island location like Hawaii. The Institute of Geophysics of the University of Hawaii has encouraged and supported work on Lake Waiau, an alpine lake near the 4 km level and close to the summit of the volcano Mauna Kea, Hawaii.

Recent coring of lake bottom deposits has revealed, through carbon dating, sediment ages extending into the late Pleistocene. The lake, resting within the crater of Waiau Cone, is a natural trap for particles falling from the upper part of the atmosphere. Also, numerous coarse ash layers among the sediments tell a story of local ash eruptions. Oceanographers, concerned with understanding deep-sea cores in this region, are finding the lake deposits useful. The study of Lake Waiau and other bodies of perched water on Mauna Kea was started in 1965 and is continuing.

SUPPORTED BY University of Hawaii

### 7.0237, KINEMATICS OF SEDIMENTS IN BREAKERS

R.L. MILLER, Univ. of Chicago, Graduate School, Chicago, Illinois 60637

Laboratory and field studies are being conducted to determine the kinematics of sediment particles in breakers. Turbulence patterns, velocity fields, initial particle motion, accelerating and decelerating settling velocities, and sediments trajectories are being measured for various sizes and densities of beach sediments as related to beach profiles, bottom roughness conditions and breaker forms. Results of these studies will establish more accurate concepts of coastal dynamics.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0238, PALEOSALINITY DETERMINATION BY THE BORON IN ILLITE METHOD

B.F. BOHOR, State Geol. Survey, Urbana, Illinois

A direct relationship exists between the amount of boron in natural waters and their total salinity. The clay mineral illite takes up boron and fixes it into its lattice from natural waters in proportion to the amount of boron present in solution. Therefore, the paleosalinity of strata containing illite can be determined by measuring the amount of boron contained in purified illite from that strata.

Shales, clays, limestones, and coals from the Illinois Basin are being analyzed for boron in order to determine their relative paleosalinity and, by analogy, their inferred environments of deposition. The rocks and coal ashes first must be treated to obtain the pure illite clay mineral fraction -- this is done by centrifugation and differential solution. This technique eliminates most of the variables associated with using boron as a measure of paleosalinity. Then the pure illite residue is analyzed for parts per million boron by optical emission spectrography. Faster and more sensitive methods of colorimetric analysis also are being investigated for boron analysis. The project was initiated in 1965.

This technique should find application in stratigraphic problems, such as the paleosalinity of cyclothenic units, and for investigating facies changes involving salinity differences, such as occur laterally in coal swamps.

SUPPORTED BY Illinois State Government

### 7.0239, KAOLINITE AS RELATED TO ENVIRONMENT OF DEPOSITION

R.E. HUGHES, State Geol. Survey, Urbana, Illinois

Poorly crystallized detrital kaolinite occurs in all sedimentary environments. Generally, kaolinite is segregated within a particular facies and predominates in fresh and brackish water deposits. Superposed on the sedimentary distribution of kaolinite is a distribution of authigenic kaolinite which more accurately reflects the geochemical conditions and diagenetic changes at the site of deposition. Processes related to authigenic kaolinite formation are fundamental to the development of chamosite and glauconite.

Coal and related organic-rich environments are known to develop quantities of well-crystallized authigenic kaolinite. Salient variations in Eh, pH, and chemical equilibria are dominant in the development of this variety of kaolinite. Measures of the quantity and character of authigenic kaolinite are being made on coals of the Illinois Basin to reveal the distributional changes in an area where large quantities of information are available which pertain to environmental analysis.

Analytical methods include quantification and crystallinity determination by X-ray diffraction, scanning electron micrographs of textural relations, chemical and mechanical isolation of authigenic kaolinite from low-temperature ash samples, and gross observations of outcrop and core samples.

Considerable research is also being done on associated brackish and marine units to establish the mineralogic variations caused by changes in depositional environment in the Illinois Pennsylvanian sequences.

SUPPORTED BY Illinois State Government

### 7.0240, ENVIRONMENT OF DEPOSITION OF ARGILLACEOUS SEDIMENTS

N.F. SHIMP, State Geol. Survey, Urbana, Illinois

Our studies, just completed, indicate that boron is adsorbed on clays independent of composition so that for a given content of less than 2 microns of clay, marine muds have 30 to 45 ppm more boron than fresh-water muds. In addition, the total boron-clay pair are effective environment differentiators.

Comparison of boron in muds offshore of the Mississippi delta and in streams of its hinterland is currently in progress to evaluate many of the geologic controls that have been proposed for boron and test its efficiency as a discriminator. Cores through the modern delta are available to us, and some 200 mud samples from throughout the Mississippi hinterland, an area of well over a million square miles, have been collected. No one has ever before studied boron over an entire single drainage basin and its equivalent marine muds. The geologic and climatic contrast of the Mississippi's watershed permit an evaluation of the role they play in boron abundance in muds and in the weathering cycle. In addition, we shall determine whether boron can be used to determine shoreline position in a deltaic sequence.

SUPPORTED BY Illinois State Government  
Indiana University

### 7.0241, BIOGENESIS OF CARBONATE SEDIMENTS, BAHAMA ISLANDS

W.W. HAY, Univ. of Illinois, Graduate School, Urbana, Illinois

As an outgrowth of studies initiated under NSF grant GP-1991, the Principal Investigator plans to further study the biogenesis of carbonate sediments around Bimini and Turtle Rocks in the Bahama Islands. Field studies will be carried out to sample statistically the faunal communities and to determine what contribution to the sediments has been made by specific organisms. In addition to identification of macroscopic forms and animal remains, it is planned to carry out electron microscopic and chemical studies of skeletal materials to further quantify the contribution that specific animals may make to carbonate sediments.

It is already clear that study of skeletal ultraarchitecture by light or electron optical means will permit the identification of almost every kind of grain in a bioclastic deposit within the study area, at least to superfamily and often to a lower taxonomic level. Thus it will be possible to determine the relative contribution of

## 7. MARINE GEOLOGY

each taxonomic group to a calcarenite deposit and make a quantitative comparison with the living benthos. Chemical studies, which will be extended in this study, have already shown results that are strongly at variance with presently known data, suggesting that certain chemical components of skeletal remains may be controlled by phylectic rather than environmental factors.

The proposed study will also include the tracking of tidal currents by means of radiosonde buoys developed at the University of Illinois. Tidal currents are important with respect to the distribution of bottom communities and must be taken into account if meaningful information on biogenesis of sedimentary deposits is to be obtained.

SUPPORTED BY U.S. National Science Foundation

### 7.0242, FABRIC OF MARINE MUDS

*R.N. GINSBURG*, Johns Hopkins University, Graduate School, Baltimore, Maryland 21218 (NONR)

A detailed study is being continued on the structure and fabric of marine (and bay) muds to determine the extent to which they are made up of sand-sized aggregates of finer particles and of only finer particles. Initial work will be with shallow water muds, where it has been found that organically bound aggregates (including fecal pellets) are widespread. Subsequent work will be done with deep sea muds. A technique is being developed of sample preparation through freeze drying and fixing with resins that will permit analyses of mud fabrics to be made without the usual damage that occurs when muds dewater as a result of being exposed to the atmosphere.

This type of analyses is different from the conventional grain size analyses of sediments, in which aggregates are destroyed. A proper interpretation of the fabric of muds is needed to assess physical properties of marine sediment.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0243, EXPERIMENTAL AND THEORETICAL RESEARCH ON TURBIDITY CURRENTS

*M.P. TULIN*, Hydronautics Incorporated, Laurel, Maryland

Equipment will be designed and constructed with which laboratory experiments can be conducted on the nature of turbidity currents. Theoretical studies will be made on the growth, steady state flow, and the decay mechanisms of turbidity currents. Experimental verifications of the theoretical work will be made using the laboratory equipment. The role of turbidity currents in sediment erosion and deposition will be investigated.

Knowledge of the methods of sediment transport and of sediment erosion and deposition in the oceans are of importance to the Navy because these affect the structure and composition of the ocean floor and the sub-bottom.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0244, ESTUARINE SEDIMENTATION PROCESSES

*M.O. HAYES*, Univ. of Massachusetts, Graduate School, Amherst, Massachusetts 01003

Detailed studies are being made of sedimentary processes and resultant patterns in various New England estuaries selected as representative of different types of hydrographic conditions, all subject to a large tidal range. Field measurements are being obtained on tidal current velocities, temperature-salinity variations, sediment and sand-wave movement, channel shape and position changes, and other environmental factors for the three major estuarine zones: tidal channel and lower sand flats, intertidal sand flats, and salt marsh.

This study should contribute to an improved basis for the prediction of estuarine environmental conditions.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0245, SEDIMENT-FLUID INTERACTIONS

*J.B. SOUTHARD*, Mass. Inst. of Technology, Graduate School, Cambridge, Massachusetts 02139

The aim is better understanding of two problems of sediment-fluid interaction: dune mechanics and action of internal

waves on sediment beds. The experiments are designed to study the most fundamental aspects without destroying relevance to the oceans. The work will be in a combined flume and wave tank 45 feet long.

Work on bottom sediment movement and dune formation should provide better understanding of changes in bottom topography, perhaps leading to prediction of such changes. Enhanced understanding of fluid-sediment dynamics should aid in design of bottom-mounted structures and in understanding some of the bottom characteristics important to other operations.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0246, QUANTITATIVE AND QUALITATIVE CHARACTERISTICS OF MATERIALS CONTRIBUTING TO SEDIMENTATION IN LAKE ERIE

*J.F. CARR*, U.S. Dept. of Interior, Biological Laboratory, Ann Arbor, Michigan

Collecting devices are being used to obtain materials as they settle from the water column but before reaching the bottom. Measurements are made of the percentage of the various components (plankton, clay, detritus, etc.) making up the sediments. In addition, measurements are made of sedimentation rate, oxygen demand, percent organic matter, nutrient content, and (hopefully) geogenic origin of the material.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 7.0247, LAKE SUPERIOR CORING III

*W.R. FARRAND*, Univ. of Michigan, Graduate School, Ann Arbor, Michigan

The research herein proposed consists of two phases, (a) completion of studies begun in 1961 and 1962, and (b) continuation of the study of Lake Superior bottom sediments by means of a series of cores to be provided by the Carnegie Institution of Washington.

During 1961 and 1963 about 500 miles of continuous seismic profiler traverses were run in southern and western Lake Superior, and eleven cores were obtained by means of a shipboard drilling rig. The sediment study is nearly complete, but less than half of the seismic profiles have been reduced. In order to bring this project to completion, it is proposed to finish the sediment study (carbonate and humus analysis, heavy mineral study, varve stratigraphy), reduce the remaining seismic profiles, and to write the final report.

The second phase of this proposal is a sedimentological study of a series of cores, possibly as many as 100, which will be recovered during the 1966 heat flow study program of the Department of Terrestrial Magnetism Carnegie Institution of Washington. These cores will be 4 to 5 meters long and will provide a great increase in our knowledge of the floor of Lake Superior.

SUPPORTED BY U.S. National Science Foundation

### 7.0248, PRE-DELTA SEDIMENTATION IN THE ST. CLAIR RIVER DELTA AREA

*A.L. POPRIK*, Wayne State University, Graduate School, Detroit, Michigan 48202

NO SUMMARY HAS BEEN PROVIDED TO THE SCIENCE INFORMATION EXCHANGE

SUPPORTED BY Society of The Sigma Xi

*N.J. NORTON*, Hope College, Undergraduate School, Holland, Michigan 49422

NO SUMMARY HAS BEEN PROVIDED TO THE SCIENCE INFORMATION EXCHANGE

SUPPORTED BY Society of The Sigma Xi

### 7.0250, SHOALING PROCESSES

*J.B. TIFFANY*, U.S. Army, Waterways Experiment Sta., Vicksburg, Mississippi

## 7. MARINE GEOLOGY

The scope and objectives of this engineering study are as follows: (a) To determine the basic laws involving in the movement and disposition of muddy sediments; (b) to determine the effects of repetitive scour and deposition on sedimentation; (c) to develop techniques for radioisotope tracing of sediment movement and deposition; (d) to develop an in-place turbidity meter; (e) to determine the effects of stabilization of deposits on shoaling; (f) to determine the effects of flocculation on shoaling; (g) correlation of prototype data to determine the similarity, or lack thereof, of shoaling processes among estuaries or groups of estuaries; (h) classification of sediments which form shoals in estuaries or other tidal waterways improved for navigation; (i) to determine the facts which affect hydraulic and shoaling conditions in navigation slips and tributary channels which are improved for navigation; (j) to standardize sediment and soil sampling techniques in tidal waterways and to determine suitable methods for the packaging and transportation of samples; (k) to develop reliable methods for the predicting tides and currents in tidal waterways. Field investigations and laboratory studies are presently being conducted under the auspices of the Committee on Tidal Hydraulics to accomplish many of the objectives listed above. The lack of adequate space on this form prohibits discussion of each individual investigation under this project.

SUPPORTED BY U.S. Dept. of Defense - Army

### 7.0251, RADIATION, DOSIMETRY, CORRELATION AND DATING OF CALCAREOUS DEEP-SEA CORES N.M. JOHNSON, Dartmouth College, Graduate School, Hanover, New Hampshire 03755 (AT(30-1)3860)

The sequence and age of various pelagic carbonates will be analysed by modern methods of thermoluminescent dosimetry. Pliocene-to-Recent calcareous core sections will be correlated on the basis of their self-contained radiation dosimetry. The purpose of the study will be to extend the chronology of deep-sea sedimentation beyond the limit of carbon-14 and the isotopic disequilibrium methods.

SUPPORTED BY U.S. Atomic Energy Commission

### 7.0252, EARLY DIAGENESIS OF CARBONATE SEDIMENTS IN A SUPRATIDAL EVAPORITIC SETTING H.D. HOLLAND, Princeton University, Graduate School, Princeton, New Jersey 08540

A field and laboratory study is proposed, to determine the sedimentary and early diagenetic features of shelf carbonate sediments. The Persian Gulf has been selected for study. Early diagenetic processes affecting carbonate sediments under evaporitic supratidal conditions are to be examined. The role of fluids in the early diagenesis of mineral phases and of the non-carbonate organic fraction of the sediments is central to the study.

The data and processes found to be important will enable the history of ancient carbonates to be more readily understood and may indicate whether or not shelf carbonate sediments are likely petroleum source beds.

### 7.0254, STRATIGRAPHIC RELATIONS BETWEEN A COQUINA FACIES OF THE YORKTOWN FORMATION AND OVERLYING SEDIMENTS AT CHUCKATUCK, VIRGINIA N.K. COCH, City University of New York, Graduate School, Flushing - Queens College, New York 11367

During a geological investigation of southeastern Virginia from 1961 to 1965 a shoreline complex in the uppermost part of the Late Miocene Yorktown Formation was discovered and briefly studied by Coch (1965). This shoreline complex is composed of bars of biofragmental sand with intervening lagoonal muds. The present study is aimed at determining the Late Tertiary changes in sealevel and to try and account for the missing Late Tertiary-early Quaternary sediment record in the area.

SUPPORTED BY Society of The Sigma Xi

### 7.0255, CORRELATION OF SUBMARINE VOLCANIC ASH BY CATHODO-LUMINESCENCE J. DONAHUE, City University of New York, Graduate School, Flushing - Queens College, New York 11367

Volcanic ash layers in deep sea sediments are extremely valuable in correlation since they represent isochronous markers. Standard techniques for identifying the layers are however, laborious. Cathodo-luminescence offers a means of identifying layers quickly by means of their specific mineralogic composition.

My present work involves using identified mineral standards to determine the luminescent properties of the various mineral species. Preliminary work indicates that minerals have unique luminescent properties.

The second phase of work involves examination of volcanic ash layers to determine their mineralogy. Determinations made up to this point indicate that this method will allow rapid identification of individual ash layers for correlation.

SUPPORTED BY City University of New York

### 7.0256, QUATERNARY OF THE HUDSON RIVER ESTUARY W.S. NEWMAN, City University of New York, Graduate School, Flushing - Queens College, New York 11367

We are examining the form and sediments of the Hudson River Estuary from Kingston south to the Narrows. Both published and unpublished data find the valley's bedrock thalweg at inconsistently varying elevations: about -200 feet at Kingston, more than -200 feet near Marlboro, at almost -400 feet at Newburgh, more than -700 feet at Storm King, a similar depth at the Tappan Zee Bridge, at about -300 feet opposite Manhattan Island, but only about -200 feet near the Narrows. The bedrock valley form confirms its identity as a fiord. However, the valley cutting age remains uncertain.

The sediment in the valley consists of till, outwash, lacustrine silt, fluvial sand, estuarine organic silt and tidal marsh peat. Paleontological analyses of bore samples adjacent to Iona Island, just south of the Bear Mountain Bridge, suggest the estuary has been in existence for at least 12,000 radiocarbon years. Archeological shell middens at Croton and Montrose Points indicate the estuary achieved salinities of 8 o/oo or more 4-6,000 years B.P., more than twice those presently obtained at these localities. Decrease in salinity is probably due to estuarine clogging by sediments in the sense of Emery (1967).

A marine transgression curve constructed from the Iona Island data implies the locality suffered post-glacial isostatic rebound followed by subsidence during the past few thousand years.

SUPPORTED BY City University of New York

### 7.0257, LITHOLOGICAL AND MICROPALAEONTOLOGICAL INVESTIGATION OF OCEAN SEDIMENT CORES D.B. ERICSON, Columbia University, Graduate School, New York, New York 10027

Scientists at Lamont Geological Observation have reported the discovery of a sedimentary boundary between the Pliocene and the Pleistocene. Because core lengths available could reach this depth only where considerable overburden had been lost through slumping, there is a gap of unknown thickness representing about 200,000 years of deposition. By continued examination of the cores available at Lamont, it is hoped that other cores will

## 7. MARINE GEOLOGY

be found, in which the younger sections have been thinned by slumping and whose stratigraphy can be correlated to overlap with cores containing the late Pliocene and Pleistocene sections. There will then be available a complete record of Pleistocene climatic events and the means of estimating a complete Pleistocene chronology, as well as a better understanding of the conditions associated with the glaciation of that period.

SUPPORTED BY U.S. National Science Foundation

### 7.0258, GRANT FOR STUDY OF SEA FLOOR CORES AND PHOTOS

*M. EWING*, Columbia University, Graduate School, *New York, New York* 10027

NO SUMMARY HAS BEEN PROVIDED TO THE SCIENCE INFORMATION EXCHANGE

SUPPORTED BY Bear Creek Mining Company

### 7.0259, ANALYSIS OF PHYSICAL AND CHEMICAL PROPERTIES OF DEEP SEA CORES

*D. HORN*, Columbia University, Graduate School, *New York, New York* 10027

NO SUMMARY HAS BEEN PROVIDED TO THE SCIENCE INFORMATION EXCHANGE

SUPPORTED BY Texas Instruments Incorporated

### 7.0260, MARINE GEOLOGY

*G. NEUMANN*, New York University, Graduate School, *New York, New York* 10003 (NONR)

The objective of this research is to describe quantitatively the sediment transport mechanism active off the coast of California and to draw from this description general conclusions which are applicable to coastal regions around the world. During the contract year the current regimes in the San Pedro and the Santa Barbara Channels will be studied as they relate to suspended sediment load transportation. In addition work will continue in the Redondo submarine canyon, with emphasis on the bulk properties and strength of sediments in the canyon's head, axis, and fan.

The character of nearshore and oceanic sediments and of the wave and current processes by which they are eroded, transported, and deposited is of considerable importance to operations involving ocean-bottom and nearshore engineering and construction, and search and rescue. This program will contribute significantly to an understanding of nearshore sedimentary processes.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0261, FACTORS EFFECTING RATES OF ORGANIC DEPOSITION AND QUALITY OF WATER

*L.C. MARSH*, State University of New York, Graduate School, *Oswego, New York* 13126

This is exploratory research concentrating on the swamps at Port Bay, Beaver, and Sterling, all located rather close to Oswego. Both depth and aerial extensions of the swamps and related bogs are needed. It is hoped to identify the sources of bog vegetation and to relate the swamp to the underlying clay deposits. Such deposits appear important to water flow restrictions and subsequent internal chemistry. Extensive sampling will be followed by radiocarbon dating and pollen analysis.

SUPPORTED BY State University of New York

### 7.0262, COLLECTION, REDUCTION, AND INTERPRETATION OF SEISMOLOGIC AND PHOTOGRAPHIC DATA

*M. EWING*, Columbia University, Graduate School, *Palisades, New York* 10964

The study of sedimentation processes and distribution of sediments in the ocean basins will be continued, the ultimate purpose being to improve the knowledge of the history of the oceans and of the marine portion of the entire geologic record. Seismic profiles, bottom photographs, nephelometer, and current measurements incorporated with a sediment sampling program can be expected to answer many questions about the ages of the ocean

basins, the processes and rates of sediment accumulation, and about past environmental factors such as regional climatic variations and oceanic circulation.

SUPPORTED BY U.S. National Science Foundation

### 7.0263, RESEARCH IN CORE ANALYSIS

*W.M. EWING*, Columbia University, Graduate School, *Palisades, New York* 10964

Objective: To determine those environmental factors affecting acoustical uses of the ocean. To make acoustic models of the ocean bottom, conduct in-situ observations and experiments. Upgrade theory with advancing state-of-the-art.

Approach: Analyze bottom cores and measure parameters which determine the acoustic properties of sediments. Laboratory analysis will include such items as shear strengths, bulk properties, carbonate content, grain size analysis and computer runs to provide information on the relationship that exists between these properties. Comparison with cores from other surveys will be made.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0264, MARINE SEDIMENTS

*C. FRAY*, Columbia University, Graduate School, *Palisades, New York* 10964 (N00014-67-A0108-0004)

This program includes the systematic collection, preliminary description, and cataloging of sediment cores and dredge samples. Data are sent to the Oceanographic Data Center. The core collection will continue to be used in support of other researchers, both inside and outside the laboratory. The ship-board coring program will concentrate on the selective sampling of sediments and structures delineated by the sub-bottom reflection data.

A knowledge of the physical, chemical, and biological properties of ocean-bottom sediments is important to operations which involve the interaction of both acoustic waves and man-made structures with marine sediments. This program will provide (1) information on a number of these properties and the processes and factors which control them, and (2) a stock of cores which are available to and used by other investigators in their research programs.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0265, SEDIMENTS IN BAFFIN BAY AND THE EFFECTS OF AN ARCTIC ENVIRONMENT ON MARINE SEDIMENTATION

*G.M. FRIEDMAN*, Rensselaer Polytechnic Inst., Graduate School, *Troy, New York* 12181

OBJECTIVE: The Navy needs environmental data as they affect salvage and recovery, DRV and other operations. Such data are also needed because they affect engineering structures which in the future will probably be installed on the ocean floor. This research is specifically designed to provide a suite of data describing sedimentary properties on the floor of Baffin Bay. Such data will improve our knowledge of the sea floor and of sedimentation processes in the Arctic.

APPROACH: The contractor, jointly with the U. S. Naval Oceanographic Office in 1967 collected data and core samples in Baffin Bay. They are currently analyzing these data and materials to study the source of the sediments, their biological content and the water contained in their pore spaces. The results will be related to the physiographic province, ocean currents and ice-rafting which are thought to control sedimentation in Baffin Bay. The results will be extrapolated to predict sedimentary conditions in other Arctic regions.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0266, DIAGENESIS OF CARBONATE SEDIMENTS

*G.M. FRIEDMAN*, Rensselaer Polytechnic Inst., Graduate School, *Troy, New York* 12181

This study is concerned with the geochemistry of interstitial waters in shallow-water carbonate sediments.

## 7. MARINE GEOLOGY

Cores have been sampled and waters extracted from carbonate sediments off Bermuda and the Red Sea. Analyses for trace element concentration are underway. Florida Bay and Florida offshore cores will be sampled during the winter months.

SUPPORTED BY Amer. Chemical Society

### 7.0267, CARBONATE SEDIMENTATION IN THE TONGUE OF THE OCEAN, BAHAMAS

O.H. PILKEY, Duke University, Marine Laboratory, Beaufort, North Carolina 28516

This project is to study in detail carbonate sedimentation on the floor of the Tongue of the Ocean. The study will involve a general description and analysis of ten piston cores with particular emphasis on detection of the effects of lowered sea levels and the differentiation of glacial and interglacial sediments. A preliminary study of short cores from the Tongue of the Ocean has indicated that carbonate mineralogy may reflect sea level changes. Other sediment parameters may be likewise affected. The biostratigraphy, paleoecology and the influence of sea floor solution and early diagenesis on carbonate sedimentation in this area will also be studied.

SUPPORTED BY U.S. National Science Foundation

### 7.0268, A RECONNAISSANCE OF COASTAL EROSION IN NORTH CAROLINA

L.J. LANGFELDER, Univ. of North Carolina, School of Engineering, Raleigh, North Carolina 27600

Three different approaches are being used to delineate areas of erosion and accretion along the North Carolina Coast. These are (a) the use of aerial photography, (b) the use of wave refraction techniques, and (c) observations of the present configuration of the beaches.

The aerial photography portion is utilizing measurements from selected control points to the beach on aerial photographs made over the last 30 years. The wave refractions portion is utilizing existing swell data and wave refraction procedures using an existing computer program. The present configuration has been observed during the life of the project by multiple field surveys. The results of the three methods will be compared in the final report.

### 7.0270, DEPOSITION RATES BY THE PROTACTINIUM METHOD

W.M. SACKETT, Univ. of Tulsa, Graduate School, Tulsa, Oklahoma 74104 (AT(11-1)-1540)

This project will continue to study the behavior of uranium and thorium series nuclides in the ocean and sediments. The distribution of  $^{238}\text{U}$ ,  $^{230}\text{Th}$ , and  $^{231}\text{Pa}$  and total unsupported  $^{230}\text{Th}$  and  $^{231}\text{Pa}$  on cores taken on the crest of the East Pacific Rise will be determined in order to investigate the possibility that  $^{234}\text{U}$  and  $^{230}\text{Th}$  may be mobilized by sub-surface thermal activity and migrate to the sediment-water interface. The collection and sampling of the cores (aboard the Oceanographer) and the analyses will be performed by the principal investigator. Results show that manganese nodules are being deposited very slowly.  $^{230}\text{Th}$  and  $^{231}\text{Pa}$  are practically useless in determining rates as the unsupported activity decreases to zero a few mm from the nodule surface. The anomalously low  $^{230}\text{Th}/^{231}\text{Pa}$  activity ratios (less than the theoretical productive ratio of 10.8) have been substantiated. Fourteen elements were determined by atomic absorption photometry. The concentration of Sr and Co were found to

decrease with oceanic depth for both Atlantic and Pacific nodules whereas Fe, Pb, and Ti showed a depth dependence only in Pacific nodules. Uranium-thorium series nuclides are being determined in a suite of continental river and near shore marine sediments. For the samples analyzed to date, the  $^{234}\text{U}/^{231}\text{Pa}$  activity ratio is, within experimental error, the theoretical supported value of 21.6 for both types of sediments. The  $^{230}\text{Th}/^{234}\text{U}$  activity ratio is less than one for both river and near shore ocean sediments but has a value of 1.4 for an anaerobic mud in an Oklahoma lake. This study is continuing and should prove useful in understanding the geochemical cycle of uranium-thorium series nuclides.

SUPPORTED BY U.S. Atomic Energy Commission

### 7.0271, PROPERTIES AND ORIGIN OF SEDIMENTS ON THE CONTINENTAL MARGIN OFF WESTERN U. S.

J.V. BYRNE, Oregon State University, Graduate School, Corvallis, Oregon 97331

This research will provide (1) basic data on bathymetry, on ocean-bottom currents, and on the acoustical and physical properties of marine sediments and (2) an improved capability for predicting the interactions of sound energy and man-made objects with the ocean floor. The research is directed toward determining the nature and origin of the continental margin off the western United States, and toward evaluating the various processes by which sediment is eroded, transported, and deposited in this region.

APPROACH. Shipboard programs involving ocean-bottom current measurements, bottom photography, sediment sampling, and continuous sounding will be carried out. Bottom samples will be examined in the laboratory for their texture, mineralogical composition, and faunal content. From these combined laboratory and field data, inferences will be drawn concerning the present and past patterns and mechanism of sediment movement from the shoreline to the deep-sea floor.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0272, ABYSSAL PLAIN SEDIMENTATION AND STRATIGRAPHY OFF OREGON

L.D. KULM, Oregon State University, Graduate School, Corvallis, Oregon 97331

It is proposed to carry out research on sedimentation and faunal stratigraphy on Cascadia Abyssal Plain and its associated deep-sea channels. The area of investigation will include the eastern portion of Tufts Abyssal Plain, with primary emphasis on Cascadia Channel. Sedimentary and faunal data from piston cores, detailed bathymetric surveys of specific features, and geophysical data will be used to establish the basic framework of sedimentation on Cascadia and Tufts Abyssal Plains. A better understanding of the processes that are instrumental in the development of certain deep-sea plains should result from this work. The studies of the stratigraphic distribution of planktonic microorganisms in the deep-sea sediments will provide time lines for correlation of events between cores and information on past climatic conditions. These data will make it possible to examine the complex interrelationships between changing paleoclimatic conditions and sedimentation rates, sedimentary processes, and sediment texture and composition, which are known to have had a profound effect on the development of Cascadia Abyssal Plain. The influence of prominent deep-sea channels on the transportation and dispersal of shallow water terrigenous sediments into regions distant from the continent will be investigated. The turbidity current deposits of Cascadia Channel will be studied in detail for a distance of some 2000 km; an attempt will be made to reconstruct the flow regime of the channels. In addition, deep-sea channel and interchannel deposits will be compared. An attempt will be made to evaluate the relative importance of turbidity-current versus ocean-bottom current deposition in the area under investigation.

SUPPORTED BY U.S. National Science Foundation

## 7. MARINE GEOLOGY

### 7.0273, DEEP-SEA SEDIMENTS - THEIR PROPERTIES AND PROCESSES OF FORMATION

*T.H. VANANDEL*, Oregon State University, Graduate School, Corvallis, Oregon 97331

Objective: In support of present and future ocean-bottom engineering, search and rescue and other operations, this research provides (i) basic data on bathymetry, on ocean-bottom currents, and on the acoustical and physical properties of marine sediments, and (ii) an improved capability for predicting the interactions of sound energy and man-made objects with the ocean floor. The research is directed toward determining the three dimensional nature of the mechanisms and products of sedimentation in the Panama Basin. This sedimentation regime will then be related to the geologic and oceanographic settings of the basin.

Approach: A shipboard reconnaissance survey of the Panama Basin will be undertaken this year utilizing echo sounders, a seismic reflection profiler, bottom sediment samplers and current meters. The compositional and physical properties of the sediment samples will be analyzed in the laboratory. The preliminary knowledge of the distribution, nature and source of the sediments gained from these initial field and laboratory studies will be used to define the proper areas and most worthwhile approaches for making more detailed field examinations during the next three or four years.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0274, STRATIGRAPHY OF RECENT INTERTIDAL SEDIMENTARY DEPOSITS OF THE SHEEPSHEAD MUDFLAT, NEW JERSEY

*E.R. FORCE*, Lehigh University, Graduate School, Bethlehem, Pennsylvania 18015

No Summary has been provided for use of Science Information Exchange.

SUPPORTED BY Society of The Sigma Xi

### 7.0275, DELAWARE ESTUARY SEDIMENTATION STUDY

*D.W. MOODY*, U.S. Dept. of Interior, Geological Survey, Philadelphia, Pennsylvania

Sediment transport processes in the Delaware estuary are being studied to determine the rate of shoal development. Measured sediment loads delivered to the Delaware estuary by Coastal Plain streams are much less than the annual estimated volume of estuarine sedimentation. Therefore, other sources of sediment must be identified to balance the sediment budget.

Salinity, sediment concentration, turbulence, and many other parameters are known to affect the rate of sediment flocculation. However, little is known about the quantitative effects of the environment upon sedimentation rates. Through field and laboratory experiments the most significant parameters will be identified; these parameters will then be related to rates of sedimentation measured in the field. Results of this study will be used to estimate changes in the present shoaling pattern due to man-made modifications of water quality and the physical geometry of the estuary.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 7.0276, RELATION OF SEDIMENT STRUCTURES AND FLOW DIRECTIONS OF COASTAL CURRENTS

*G.D. KLEIN*, Univ. of Pennsylvania, Graduate School, Philadelphia, Pennsylvania 19104

The principal objectives of this research are to map the orientation of directional current structures in coastal sediments, relate their orientation to the flow directions of depositional currents, and determine the applicability of the flow regime concept to coastal current systems. The work will complete research recently carried out under NSF grant GA-407. The study is designed to strengthen the interpretive basis of paleocurrent analysis, which has been developed largely from the mapping of directional current structures of ancient sedimentary rocks, largely of fluvial origin. Very little substantiating data are available in which the orientation of directional current structures of recent

sediments are compared to the direction of flow of modern currents that formed them.

Concurrently with the field program it is planned to conduct a laboratory study of the directional properties as well as the texture and mineralogy of sediments to determine scalar properties of the structures and down-current changes in particle size and mineral composition. All these data will be used to establish a modern coastal sediment dispersal model for comparison to paleocurrent patterns of ancient coastal sediments. Particle size distributions, bedform geometry, and water temperature will be compared to current velocity data to determine the applicability of flow regime hydraulics to coastal sedimentation.

SUPPORTED BY U.S. National Science Foundation

### 7.0277, THE ORIGIN OF GRAVEL BARS IN THE INTERTIDAL ZONE, PARRSBORO HARBOUR, NOVA SCOTIA, CANADA

*M.G. LAUB*, Univ. of Pennsylvania, Graduate School, Philadelphia, Pennsylvania 19104

No Summary has been provided for use of Science Information Exchange.

SUPPORTED BY Society of The Sigma Xi

### 7.0278, ELECTRON MICROSCOPE AND ELECTRON DIFFRACTION STUDIES OF GEOLOGICAL SAMPLES

*G. SHIMAOKA*, Brown University, Graduate School, Providence, Rhode Island 02912 (SD-86)

Approach: In collaboration with the U.S. Air Force, several micrometeorite collectors are to be flown on rocket flights. The particles will be analyzed in this laboratory. In collaboration with the Narragansett Marine Laboratory, samples of ocean sediment are being analyzed by electron microscopy.

Progress: Efforts to obtain micrometeorite samples have to date been unsuccessful. Attempts are continuing. Ocean bottom sediment samples have been obtained and are now being analyzed.

SUPPORTED BY U.S. Dept. of Defense - A.R.P.A.

### 7.0279, CHEMICAL EXCHANGES ACROSS SEDIMENT-WATER INTERFACES

*B.W. NELSON*, Univ. of South Carolina, Graduate School, Columbia, South Carolina 29208

The chemical characteristics of bottom sediments along the salinity gradient of the Rappahannock River estuary, Virginia are being studied with particular reference to the influence of sediments on the chemical quality of the overlying waters. The distribution of gases, phosphate, nitrate, silica, pH, and redox potential are being determined. The exchange of dissolved substances between the sediments and the overlying waters is being measured. The reactions that take place between solids suspended in natural waters and the waters are being examined. Basic information on the activities of certain chemical species in natural aqueous environments is being obtained. The studies are being conducted in natural environments that are essentially free from the effects of pollution so that a suitable understanding of uncontaminated conditions may be available for comparative purposes.

SUPPORTED BY U.S. Dept. of Interior - F. Water Pol. Ctl

### 7.0280, SEDIMENTARY STRUCTURE

*A.M. BOUMA*, Texas A & M University System, Graduate School, College Station, Texas 77843 (NONR)

This research will involve studies of small-scale sedimentary structure. The character of this structure and lateral and vertical variation should reflect differing transport mechanism and depositional environments. Techniques to be used include X-ray radiography, thin sectioning, microscopy, and photography. Radiographic examination will also be used in conjunction with the geotechnical and sound speed measurements in sediment samples to determine (1) whether or not the samples are suitable for these measurements, (2) what distortions result from testing, (3) what relations exist between micro-sedimentary structure and the geotechnical and acoustic properties of the sediments.

## 7. MARINE GEOLOGY

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0281, SEDIMENTATION

*W.R. BRYANT*, Texas A & M University System, Graduate School, College Station, Texas 77843 (NONR)

This research is aimed at determining the characteristics of marine sediments in the Gulf of Mexico. The relationships between the acoustic and geotechnical properties of these sediments will be studied under closely controlled conditions of temperature, loading, and saturation. Investigations of submarine slope stability and the role which slumping plays in the modification of submarine slopes will be continued. In conjunction with the geophysics program, this research will also involve continuing studies of the regional geology along the eastern and western margins of the Gulf of Mexico.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0282, CORING OF THE VARVED SEDIMENTS IN SAANICH INLET

*A.W. FAIRHALL*, Univ. of Washington, Graduate School, Seattle, Washington 98122

Cores will be retrieved from the varved sediments of Saanich Inlet, Vancouver Island, to the depth of bed rock (150 feet below bottom) for study and dating of the sedimentary sequence.

SUPPORTED BY U.S. National Science Foundation

### 7.0283, THE FORMATION OF DOLOSTONE AND CHERT IN THE UPPER MIDDLE CAMBRIAN OF THE GREAT BASIN

*J.C. KEPPEL*, Univ. of Washington, Graduate School, Seattle, Washington 98122

The partial geographic distribution of the distinctive, regionally extensive limestone - dolostone - chert lithostromes in the upper Middle Cambrian of the Great Basin is known. I suggested, in a preliminary study, that much of the dolostone was formed on the sea floor and just below the depositional interface during early diagenesis.

In the present study I hope to establish further petrographic criteria for the time of formation of the different types of dolomite - sea floor, diagenetic, and post-diagenetic and of the associated laminated cherts. Etched and/or stained thin sections and slab are used.

The percentage of insoluble material with respect to rock type and the stratigraphic distribution of such material is under study. Optical and x-ray analysis of a few samples shows kaolinite and quartz to predominate. The synaeresis of the clay is considered important in the cracking of dolostone laminae prior to the formation of the associated intraformational breccias. The role of these clays in the chemical environment and their effect as stratigraphic permeability barriers is to be studied.

Stratigraphic sections have been sampled and measured in western Utah (Marjum Limestone of the Fish Springs Range), eastern Nevada (Highland Peak Formation), and eastern California (Bonanza King Formation). At least 15 sections will have been examined by September 1967.

Hypotheses regarding the physical - chemical conditions which produced these rocks will be developed from this study.

SUPPORTED BY U.S. National Science Foundation

### 7.0284, RADIOLARIA IN PACIFIC SEDIMENTS

*H. LING*, Univ. of Washington, Graduate School, Seattle, Washington 98122

Through previous studies of the detailed taxonomy and geographic occurrences of Radiolaria in the surface sediments of the eastern subarctic region of the North Pacific significant biogeographic differentiations have been established. The proposed study will be made to refine and extend the observed pattern of distribution into the central north Pacific.

SUPPORTED BY U.S. National Science Foundation

### 7.0285, DEEP SEA SEDIMENTS IN THE NORTH PACIFIC FROM STUDIES OF THEIR RADIOLARIAN CONTENT

*H.Y. LING*, Univ. of Washington, Graduate School, Seattle, Washington 98122 (NONR)

Objective: Effective naval operations require a knowledge of the acoustic properties of ocean-bottom sediments. These properties are strongly related to sediment composition and to the processes by which the sediment was deposited. This research, in addition to providing direct information on sediment types and their distribution within the North Pacific Basin, will lead to a better understanding of the sedimentary and oceanographic environments within which these sediments are being and have been deposited.

Approach: Deep-sea sediment cores obtained in the central North Pacific by University of Washington scientists together with samples from sediment cores taken by other research groups will be analyzed for their Radiolarian content. Variations in the number and type of Radiolaria with respect to depth in a core will be related to variations in the textural and compositional characteristics of the sediments and to their geologic age. Based on the observed variations, correlations between cores of clearly defined sedimentary layers will be attempted. The area of study will be extended to include the entire subarctic North Pacific and the distributional pattern of Radiolaria will be related to the oceanographic environment of this region.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0286, STRATIGRAPHY OF UNCONSOLIDATED SEDIMENTS ON THE CONTINENTAL SHELVES OF THE CHUKCHI AND NORTHERN BERING SEAS

*D.A. MCMANUS*, Univ. of Washington, Graduate School, Seattle, Washington 98122

The continental shelf in the Chukchi and Bering Seas is of particular geological significance because the sediment records a classical epicontinental sea sedimentary environment, including transgressive sequences. The area represents an excellent model for the study of transgressive sedimentary sequences because of its simplicity in sediment thickness, age, and marker horizons. A study of transgressive sedimentary sequences also must draw upon data on the water properties. Data upon the origin, distribution, and interaction of water masses of the Arctic Ocean and contiguous waters are available at the University, and will be augmented during the time of the proposed research by concurrent physical and chemical oceanographic studies in the area.

The proposed investigation has as its objectives: (1) the description of cores of the entire section of unconsolidated sediment on the continental shelves of the Chukchi and Bering Seas; (2) the interpretation of the subbottom profile records of the section between cores on the basis of analysis of the sediment in the cores; (3) the stratigraphic correlation of sedimentary units; and (4) extension of the knowledge of sedimentary environments down through the section from the well-documented modern environment. By realizing these objectives, a greater understanding can be expected of the nature of transgressive seas and their composite processes and of the control these processes have over the dispersal of sediment components and construction of the stratigraphic section.

SUPPORTED BY U.S. National Science Foundation

### 7.0287, PROPERTIES AND ORIGIN OF SEDIMENTS IN THE NORTHEAST PACIFIC OCEAN

*D.A. MCMANUS*, Univ. of Washington, Graduate School, Seattle, Washington 98122 (NONR)

OBJECTIVE: In support of present and future ocean-bottom engineering, and sub-surface search and rescue operations, this research will provide (1) basic data on the bathymetry, ocean-bottom currents, and the acoustical and physical properties of marine sediments in the Northeast Pacific and (2) an improved capability for predicting the interaction of sound energy and man-made objects with the ocean floor. The research is directed toward determining the nature and origin of the sediments which have been and are being deposited off the continental margin of Washington and Vancouver Island.

## 7. MARINE GEOLOGY

**APPROACH:** Exhaustive analyses of several sediment cores will be made to determine statistically, the variation of the following descriptive parameters both within and between the several cores: grain size distribution, microstructure, mineralogical and biological content, sound velocity, orientation of magnetic particles, and radiocarbon ages. The most significant of these parameters for use in determining the source, age and mode of deposition of these sediments will then be selected. Analyses of these selected parameters in sediment cores obtained subsequently will be used to reconstruct the geologic history of sedimentation off the Washington Coast.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7H. TOPOGRAPHY - GEOMORPHOLOGY

(*Identification and Interpretation of Bottom Surface Features Including Reefs, Seamounts, Etc.*)

#### 7.0288, CARIBBEAN GEOGRAPHY

**J.J. PARSONS**, Univ. of California, Graduate School, Berkeley, California 94720

Field investigations are being conducted to provide new and accurate scientific data on the environment, coastal topography and morphology, beach and reef features, climate and vegetation of little-known parts of the tropical islands and the lowlands of the Caribbean, Middle America, Northern South America. This program of coordinated studies is designed to fill the need for comprehensive and detailed geographic information on this important area.

SUPPORTED BY U.S. Dept. of Defense - Navy

#### 7.0289, LITTORAL ENVIRONMENT OBSERVATION PROGRAM

**J.R. TEERINK**, Univ. of California, Graduate School, Davis, California 95616

**Problem:** At many beaches in California data to document existing beach conditions is wholly lacking. This cooperative effort will provide a basis for evaluating our coastal erosion problems.

**Solution:** Initiation of a cooperative program to observe and document littoral forces, beach configuration and changes occurring at state beaches. Repetitive, systematic measurements collected on a twice-a-day basis for a minimum period of three years will provide a statistically significant volume of data. Hopefully, analysis of the data will result in meaningful correlations between the various recorded parameters and lead to a better understanding of the physical characteristics of the California shoreline and the littoral processes occurring along that shoreline.

SUPPORTED BY California State Government  
U.S. Dept. of Defense - Army

#### 7.0290, EFFECTS OF HURRICANE BETSY ON SOME BAHAMA CORAL REEFS

**W.H. EASTON**, Univ. of Southern California, Graduate School, Los Angeles, California 90007

It is proposed to complete a study of certain coral reefs in the Bahama Islands which have been subjected to forces of hurricane 'Betsy'. Several reefs have already been examined with the support of NSF grant GP-5206, but the area of maximum storm violence is yet to be studied. It is now planned to examine the area of maximum storm severity off Momma Rhoda Cay. No major storms have passed over the specific reefs under study for thirty five years prior to hurricane 'Betsy', and there is thus a unique opportunity to assess the effects of major storms on the growth of large coral colonies and on the kinds and amounts of debris transported across the reefs. It will therefore be possible to make an evaluation of the importance of the occasional severe storm as a factor affecting geological processes, such as sediment transport and deposition.

SUPPORTED BY U.S. National Science Foundation

#### 7.0291, DRAINAGE PATTERN DEVELOPMENT ON TIDAL MARSHES

**R.J. LYON**, Stanford University, Graduate School, Palo Alto - Stanford, California 94305

A study is being made of factors controlling origin of drainage channels in tidal marshes, and of processes by which these complex systems develop. The relationships of drainage pattern types to specific environmental variables are being identified. Multispectral air photography, combined with ground measurements of incident and reflected light, is being used as an additional research technique.

Operations in tidal marshes are handicapped because there is little knowledge of the fundamental mechanisms of these environments which are dominated and characterized by constantly reversing tidal flow. Tidal marshes are common coastal features throughout the world, and it is essential that these areas be understood so that operations can be properly planned, and equipment appropriately designed and utilized.

SUPPORTED BY U.S. Dept. of Defense - Navy

#### 7.0292, STUDY OF BEACH NOURISHMENT ALONG THE SOUTHERN CALIFORNIA COAST

**J.R. TEERINK**, State Dept. of Water Resources, Sacramento, California

**Problem:** Evaluate the full impact of the combined effects of coastal and tributary watershed development on shoreline changes and prepare a long-range plan for timely nourishment of eroding beaches from land and offshore sand sources.

**Solution:** Develop an effective and economically feasible plan for replenishing the beaches in Southern California in the following manner: 1. Review geological processes contributing to erosion and shoreline changes. 2. Determine need for beach nourishment. 3. Assess the effects of existing and proposed coastal and tributary watershed structures on the natural movement of sand. 4. Develop semiquantitative sediment delivery rates from coastal watersheds under present and anticipated future development. 5. Delineate sources and determine volumes and physical characteristics of suitable material for beach nourishment for inland sand sources. 6. Develop the economics of a comprehensive artificial beach nourishment program that would provide sufficient quantities of beach material of the proper size and weight to prevent erosion of the beaches.

SUPPORTED BY California State Government

#### 7.0293, SEA FLOOR STUDIES - TOPOGRAPHY AND SHAPE OF THE SEA FLOOR

**C.J. SHIPEK**, U.S. Navy, Undersea Warfare Center, San Diego, California 92140

**Objective:** To determine environmental factors affecting the acoustical uses of the ocean; determine the characteristics of the sea floor that affect propagation of acoustic energy and the stability of bottom structures useful in surface navigation.

**Approach:** Conduct investigations to determine: (1) the extent and nature and significance of micro-relief of sea floor (2) the genesis of topographic features (3) the topographic control of sedimentation. Systems for quantitatively assessing the roughness of sea floor microtopography in support of acoustic prediction will be utilized both in photogrammetric analysis of existing photographs and reduction of special continuous line optical profiling data which can be taken either from a submersible or a surface vessel.

SUPPORTED BY U.S. Dept. of Defense - Navy

#### 7.0294, SEA FLOOR TOPOGRAPHY

**H.W. MENARD**, Univ. of California, Graduate School, San Diego - La Jolla, California 92038

The objectives of this research in marine geology are to determine and study the physiography, nature, structure, and origin of the ocean bottom and of the materials composing it. In these studies use will be made of bathymetric data in conjunction with supplementary information from bottom photographs, cores, dredges, magnetic measurements, and reflection profiling

## 7. MARINE GEOLOGY

records. In the coming year, emphasis will be placed on investigations into the origin of abyssal hills.

The effectiveness of naval operations which utilize sound propagation is strongly dependent upon the physiography of the ocean bottom and the acoustic properties of the sediments in the areas of operation. The processes which determine the physiography of the sea floor also exert a strong influence on sediment properties including sound reflectivity. The bathymetric information and increased understanding of deep-ocean sedimentary processes which this program is providing should contribute significantly to the operational capabilities of the Navy.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0295, SUBMARINE CANYONS

*F.P. SHEPARD*, Univ. of California, Scripps Inst. of Oceanography, San Diego - La Jolla, California 92038 (NONR)

The objective is to understand the processes, past and present, forming or modifying subsurface features at moderate depths, especially submarine canyons. Most of the data is bathymetric, supplemented by bottom cores and other collections and direct observations by divers and deep research vehicles. Much of the coming year will be devoted to a study of coastal erosion and progradation based on a large collection of photographs made over many years. In addition, it is planned to bring much unpublished work to completion.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0296, EVOLUTIONARY DEVELOPMENT OF CUSPATE FORELANDS

*J.W. PIERCE*, Smithsonian Institution, Washington, District of Columbia 20560

To investigate the processes involved in and the natural development of a cusped foreland and associated continental shelf and coastal plain.

SUPPORTED BY Smithsonian Institution

### 7.0297, COASTAL MORPHOLOGY

*R.J. RUSSELL*, Louisiana State University, Coastal Studies Institute, Baton Rouge, Louisiana 70803 (NONR-1575(03))

Beaches and coastal areas are being studied in a wide variety of environmental regions throughout the world as a factual basis for formulating fundamental concepts on the physical processes, distribution and interrelations of coastal phenomena. Emphasis is currently placed on the study of alluvial coasts in the tropics and on the dynamics of shore processes. In addition, an investigation is being made of the availability of significant coastal data and systems of handling these data.

Many operations such as personnel survival and rescue, construction, and supply and communication activities, places heavy demands for detailed and accurate information on the coastal zones of the world. At present, while the store of such information is increasing, it still falls far short of the requirements. Data on the nature and characteristics of coastal features obtained, and the theories being developed, provide a basis for more reliable prediction of conditions in deltaic and tidal-flat areas.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0298, PHYSICAL GEOGRAPHY OF TROPICAL COASTAL LOWLANDS

*H.J. VANN*, State University of New York, Graduate School, Buffalo, New York 14214 (NONR-4501(00))

Field studies are being made of tropical coastal lowlands to determine their physical characteristics, distribution and relationships of landforms, waterways and vegetation, and rates and causes of change. Study areas are selected which exhibit differences in particular properties of the environment, such as tidal range, size and abundance of incoming sediments, rainfall amounts and periodicity, and flow rates of rivers. The studies seek to define and explain the influences such environmental differences have on the formation of features and on coastal processes. 129

These detailed studies of tropical coastal zones provide the Navy with data needed in establishing a more accurate basis for predicting environmental conditions likely to be encountered in poorly known tropical areas.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0299, SUBMARINE TOPOGRAPHY

*B.C. HEEZEN*, Columbia University, Graduate School, Palisades, New York 10964

The broad objectives of this research in marine geology are to study and determine the physiography, nature, structure, and origin of the ocean bottom and of the materials composing it. In these studies, use will be made of echo sounding data in conjunction with supplementary data from bottom photographs, cores, dredges, bottom current measurements, and reflection profiling records. The physiographic diagram of the southwest Pacific should be completed in the near future.

Many operations are related to the physiography of the ocean bottom and the properties of the sediments in the areas of operation. The processes which determine the physiography of the sea floor also exert a strong influence on sediment properties. The physiographic diagrams, echo soundings, and the increased understanding of sedimentary processes which this program is providing should contribute significantly to the capabilities of the Navy.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 7.0300, REDUCTION AND INTERPRETATION OF PHYSIOGRAPHIC DATA ACQUIRED ABOARD LAMONT RESEARCH VESSELS

*B.C. HEEZEN*, Columbia University, Graduate School, Palisades, New York 10964

The principal aims of the proposed submarine geological research are the delineation of submarine geological features and the explanation of these features and distributions in terms of processes, morphological evolution and history. The starting point of any study of the sea floor is the accumulation and analysis of topographic data. The continuously recorded precision echograms are studied directly for a detailed knowledge of local conditions but for regional studies data must be reduced to charts and profiles. Such profiles are then examined for systematic variations and for unique features and preliminary physiographic province maps are compiled.

The submarine topography program at Lamont has been directed towards: improving the precision and resolution of echo-sounding systems; developing rapid data processing and reduction techniques; reducing the data and plotting them as profiles as well as on charts; developing digital computer methods of topographic analysis; interpreting the morphologic data in conjunction with sediment data obtained through coring, bottom photography and seismic reflection and refraction measurement as well as in conjunction with gravity and magnetic data; the production of physiographic diagrams of oceanic regions; and the general synthesis of the submarine geology of entire oceans.

SUPPORTED BY U.S. National Science Foundation

### 7.0301, REGIONAL COASTAL CHANGE

*H.G. RICHARDS*, Acad. of Nat. Sci. of Phila., Philadelphia, Pennsylvania 19103 (NONR(C)00005-67)

Through the study of marine mollusks and other invertebrates of the coastal zones, interpretations are being made of pre-Recent climatic and ecologic conditions related to coastal deposition and erosion. Shorelines and coastal forms are being dated so that a reliable chronology of coastal events may be constructed and correlated with Pleistocene shoreline developments in various regions of the world.

Improved knowledge of the sequence, timing, and regionality of past coastal changes provides a rational framework against which to judge and interpret the magnitude, duration and causes of present coastal changes. Identification of the past regional geographic conditions that accompanied periods of coastal erosion or deposition should assist in improving long-term predictions of environments.

SUPPORTED BY U.S. Dept. of Defense - Navy

**7.0302, EXPERIMENTAL VERIFICATION OF WIDE SWATH OCEAN BOTTOM CONTOURING WITH SPLIT BEAM RECEIVERS**

**M.A. CHARMIEC**, Raytheon Company, Portsmouth, Rhode Island

Experiments attempting to verify the concept of using sonar split beam receivers (BDI's and SSI's) for wide swath ocean bottom contouring were carried out with the cooperation of the U.S.S. Hammerhead, SSN- 663, while this attack class submarine transited from Puerto Rico to St. Croix. Outputs from the top and bottom half split beams were recorded and concurrent pictures taken of the SSI display. The recorded outputs were later played back through a BDI receiver and further displayed on a 10' CRT and on a Sanborn Strip Chart recorder. Each sweep of the display represented an ocean bottom contour taken in an athwartship direction. Various depression angles were attempted which resulted in athwartship bottom contours of various lengths and orientations with respect to the ship. A map was prepared which stacked a sequence of consecutive profiles representing a three mile wide swath one mile long starting four miles away from the ship and extending to seven miles. Considerable information was contained in each trace, and trace to trace correlation was evident resulting in patterns which may represent bottom hills and valleys. No actual bottom model of this area is available so the validity of the map cannot be checked.

SUPPORTED BY Raytheon Company

**7.0303, SEA USE**

**C.R. ABBEY**, Honeywell Incorporated, Seattle, Washington

Project SEA USE is a comprehensive, multi-year scientific and engineering program utilizing Cobb Seamount. Cobb Seamount is 270 miles west of Grays Harbor, Washington, and rises from depths of 9000 feet to within 120 feet of the surface of the Pacific Ocean. Of the many seamounts in the Pacific, Cobb Seamount rises closest to the surface. Because of the location of the pinnacle in the photic zone and its basically undisturbed deep ocean environment, the seamount site is ideally suited for marine science and engineering activities.

The objectives of Project SEA USE are: to characterize the chemical, physical, geological and biological features of the seamount and its environs; to demonstrate that man can occupy, perform meaningful scientific work, and do underwater construction at a seamount far distant from land based support and facilities; and to apply presently available deep-ocean technology in integrated support of a scientific program.

An instrumented mast will be firmly anchored to Cobb Seamount and provide a stable platform for precise measurements of tides, currents, air-sea interactions and weather data.

Project SEA USE commenced in fiscal year 1968 and is anticipated to be a continuing multi-year program.

SUPPORTED BY Washington State Government

## 8. ENGINEERING AND TECHNOLOGY

### 8A. AQUACULTURE - FISH GUIDING

(*technology of Artificial Culturing of Seafood Organisms, Fish Ladders, Guiding Over Dams. See Also Chapter 5.*)

**8.0001, CONSTRUCTION OF A NEW SERIES OF SMALL REPLICATION PONDS AND RESEARCH ON THE FACTORS LIMITING FISH PRODUCTION IN IMPOUNDED WATERS**

**H.S. SWINGLE**, Auburn University, Graduate School, Auburn, Alabama 36830

NO SUMMARY HAS BEEN PROVIDED TO THE SCIENCE INFORMATION EXCHANGE

SUPPORTED BY Rockefeller Foundation

## 8. ENGINEERING AND TECHNOLOGY

**8.0002, SYSTEMS ENGINEERING AND DEVELOPMENT OF COMMERCIALY VALUABLE MARINE RESOURCES IN THE DELAWARE AREA**

**F.C. DAIBER**, Univ. of Delaware, Graduate School, Newark, Delaware 19711

The University of Delaware will conduct a project to develop methods of systems engineering for growing and marketing shellfish. The project will involve the culture and selective breeding of oysters under controlled conditions, including the biology of spawning, larval growth, setting of larvae, growth to harvestable size under economical and disease-free conditions, breeding for early maturity and good market qualities. Environmental control will be a key factor. In addition, the influence of climatic water balance on conditions in the estuary and their effects on shellfish will be investigated, and experiments will be conducted on potential means of opening live shellfish by mechanical, sonic, thermal or electrical methods. A program will be initiated for the training of extension agents to work with industry. Graduate students will participate in all aspects of the project, under the Departments of Biology, Agricultural Engineering, Civil Engineering and Geography, and under the Agriculture Extension Program.

SUPPORTED BY U.S. National Science Foundation

**8.0003, THE STATUS AND POTENTIAL OF AQUACULTURE**

**J.H. RYTHER**, Amer. Inst. of Biolog. Sci., Washington, District of Columbia

The project was undertaken to provide insight into such problems as: 'Should the Federal government initiate a substantial effort to develop aquaculture in the near future?'; 'What is the potential for aquaculture in the War on Hunger?'; and, 'What is the potential for selected aquaculture to improve U.S. fisheries?'

A survey of the current status of aquaculture in the world was conducted which included definitive studies of selected examples from various geographical areas. These studies described general biological characteristics; methods of cultivation and yields.

Part 1 of the study identified general principles; range of yields; position of aquaculture in the food economy of a country; projections for expansion; and constraints to development. Part 2 concerned invertebrate and algae culture as practiced in various countries and the last section dealt with the culture of marine flatfish in Great Britain; pelagic marine fishes; brackish water fish; trout and salmon in fresh, brackish, and salt waters; warmwater pond fish; and Soviet fish.

SUPPORTED BY Natl. Council on Marine Res. & Engin. Dev.

**8.0004, CULTURE OF POMPANO IN BRACKISH WATER PONDS**

**W.G. PERRY**, Rockefeller Wildlife Refuge, Grand Chenier, Louisiana 70643

Pompano, one of Louisiana's valued delicacies was considered for pond culture on Rockefeller Wildlife Refuge. The supply of pompano is limited seasonally and the cost of obtaining them is high. Raising pompano in ponds could result in a year round supply and a new fishery industry for the state.

The objectives of this study are: 1. Determine optimum stocking rates. 2. Determine optimum feeds and feeding rates. 3. Determine possible production per acre, survival, food conversion and susceptibility to diseases. 4. Develop methods of management and harvest to produce maximum yields per acre.

SUPPORTED BY Louisiana State Government

**8.0005, CULTURE OF ATLANTIC CROAKER IN BRACKISH WATER PONDS**

**W.G. PERRY**, Rockefeller Wildlife Refuge, Grand Chenier, Louisiana 70643

The objectives of this study are as follows: 1. To determine production per acre, food conversion, survival and general desirability as a food fish. 2. To develop methods of management for production of maximum yields in brackish water ponds.

## 8. ENGINEERING AND TECHNOLOGY

The young croakers were obtained in a natural canal, near the Gulf of Mexico and placed in six 0.1 acre ponds at known stocking rates. The ponds will be harvested in late October. Several ponds will be observed for another year in order to determine effects of winter temperatures and to gain information on second year growth.

SUPPORTED BY Louisiana State Government

### 8.0006, CULTURE OF BLUE, CHANNEL, AND WHITE CATFISH IN BRACKISH WATER PONDS

*W.G. PERRY*, Rockefeller Wildlife Refuge, *Grand Chenier, Louisiana 70643*

The rapid increase in catfish farms in Louisiana is a good indication that the demand for this freshwater fish is growing. Several large land owners had approached us asking about the possibilities of their raising catfish in coastal Louisiana. Until recently, we could advise them that the freshwater fish could not be grown in waters with salinities of over 1.5 ppt. This, as expected, cut the available acres down considerably.

Fish were stocked in 0.1 acre ponds to determine growth, survival, food conversion and to determine if the freshwater fish could be grown in brackish waters.

The project was initiated in 1967 and will end in 1969. A preliminary report was given at the 22nd Annual Meeting of the Southeastern Association of Game and Fish Commissioners, October 1968, Baltimore, Maryland.

SUPPORTED BY Louisiana State Government

### 8.0007, DEVELOPMENT OF TECHNIQUES FOR THE AQUACULTURE OF POMPAÑO

*R.E. HILLMAN*, William F. Clapp Laboratories, *Duxbury, Massachusetts 02323*

Pompano fry are collected from the surf in Daytona Beach, Florida and transported to the holding ponds on the grounds of the Florida Marine Research Laboratory of Battelle Memorial Institute in Daytona Beach. Fish are then cultured through the adult stage. It is the purpose of the project for developing the optimum conditions for artificial rearing of pompano and to identify the problems inherent in such a task. The effective salinity, temperature, feeding rate, crowded conditions, etc. on the fish are being studied; in addition, studies of the pathology of fish under these unusual parameters are being carried out, as are methods for laboratory spawning of the pompano.

SUPPORTED BY Battelle Memorial Institute

### 8.0008, PURCHASE OF MATERIALS FOR & CONSTRUCTION OF, FLOATS, RACKS, BAGS, AND TRAYS FOR THE SUSPENSION OF VARIOUS TYPES OF CULTCH

*W.S. MILLER*, State Conservation Department, *Oakdale - Long Island, New York*

Purchase necessary materials and construct floats and/or racks to suspend various types of cultch in bulk or as individually strung shell, plastics, ceramic or other fabricated materials which have proved or may prove to be successful in obtaining oyster set.

This will include the fabrication of wire mesh and/or plastic bags for bulk material and trays to suspend adult oysters as brood stock.

The work involved in this phase is to be begun immediately upon approval and will be completed prior to the initial time of spawning.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.  
New York State Government

### 8.0009, THE PURCHASE AND INTRODUCTION OF CULTCH MATERIALS

*W.S. MILLER*, State Div. of Fish & Game, *Oakdale - Long Island, New York 11769*

Purchase and introduce large quantities of natural shell cultch and experimental materials to rafts and on hard bottom areas of pond at optimum time, as determined by continual biological monitoring of spawning and larval development.

The handling and placement of cultch materials in Oyster Pond will involve the participation of: William S. Miller, Senior Aquatic Biologist, Pieter Van Volkenburgh, Conservation Biologist.

Part 3 of 4.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.  
New York State Government

### 8.0010, METHODS OF REARING EGGS AND LARVAE TO JUVENILE STAGES

*C.R. ARNOLD*, U.S. Dept. of Interior, Marine Game Fish Research Lab., *Narragansett, Rhode Island 02882*

This initial phase of a longer-term study to evaluate agricultural potential of selected game fish and associated organisms includes design and construction of a closed circulating sea water system with appropriate components for filtering waste metabolites and controlling bacteria. The system will be designed to allow determinations of water conditions including flow rate, turbidity, oxygen and salinity, for hatching eggs and rearing larvae of marine fishes to the juvenile stage. Optimal conditions will be evaluated on the basis of survival and development of eggs and larvae.

SUPPORTED BY U.S. Dept. of Interior - Bu. Sport Fish.

### 8.0011, CHARTING OF SUBTIDAL OYSTER BEDS AND EXPERIMENTAL TRANSPLANTING OF SEED OYSTERS FROM POLLUTED SEED OYSTER BEDS

*G.R. LUNZ*, State Div. of Comm. Fisheries, *Charleston, South Carolina 29401*

The South Carolina oyster industry is based almost entirely on intertidal oysters, yet subtidal beds do exist. Two such beds are known to produce more seed per unit of area than the famous James River, Virginia, seed beds. In the past, attempts to expand the growth of oysters subtidally have not been entirely successful. However, by locating areas with comparable environmental conditions to existing deep water beds, and by transplanting deep water seed to them, an attempt will be made to demonstrate a way to expand the industry.

Exploration for deep water growing sites in the more than 3200 miles of creeks and rivers within the State will begin as soon as the project can be activated. Several hundred bushels of seed oysters from the Wando and the Santee Rivers (existing deep water beds) will be moved to the new locations. Survival, growth, and quality of these transplanted oysters will be studied by regular sampling.

Continuing the program next fiscal year, larger amounts of oysters will be moved to test the possibility of introducing a system of oyster culture not now being practiced.

A two man team, yet to be employed, will conduct the survey. The entire project will be under the supervision of Bears Bluff Laboratories.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.  
South Carolina State Government

### 8.0012, OYSTER SEED PROPAGATION STUDY

*C.S. SAYCE*, State Dept. of Fisheries, *Olympia, Washington*

The objective of this phase is the development of an adequate supply of naturally-caught local Pacific oyster seed for industry. This is needed to replace dwindling supplies of imported oyster seed which have been necessary to maintain the Washington Pacific oyster industry at its present level. Field samples of plankton and water samples will be taken during July, August, and the first half of September to determine concentrations of and distributions of Pacific oyster larvae during their pelagic existence. Plankton observations will include the vertical distribution as well as horizontal distribution of oyster larvae. Time, distribution and intensity of oyster setting will be recorded by seven clutching stations located throughout the bay. Areas which appear to have had the best natural spatfalls in past seasons will be investigated to determine ways of utilizing their potential in producing more oyster seed. A study of antifouling chemicals to prevent settling of barnacles, Bryozoa, and Crepidula larvae on

## 8. ENGINEERING AND TECHNOLOGY

oyster clutch will be made. Field collections and observations will be conducted during July, August, and September while data tabulation and hydrographic observations will continue through winter months. The study will be conducted in Willapa Bay, Pacific County, Washington by the Willapa Shellfish Laboratory staff. Part 2 of 3.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.  
Washington State Government

### 8.0013, FISH TRANSPORTATION

*W.J. EBEL*, U.S. Dept. of Interior, Biological Laboratory, Seattle, Washington 98102

One of the important techniques of fisheries management is the transportation of living fishes, sometimes for long distances. The solution of fish-passage problems in Columbia River Basin may require that anadromous fish be carried around dams or other obstructions, either as downstream migrant young or as adults migrating upstream to spawn. In either case, they are subjected to various hazards which may cause serious mortality, immediate or delayed. The purpose of this investigation will be to develop safe and efficient short- and long-range methods of transporting wild anadromous fish and to improve on contemporary methods of transportation.

Current efforts are concentrated on developing a system to detect magnetically tagged adult salmon and to separate them from untagged fish in a fishway. These tags, which are placed in juvenile migrants, will provide information on the survival of transported fish and their ability to home to natal streams when they return as adults. Subsequent research will be directed to the problems of holding fish in collection facilities prior to transport, transferring fish from holding to transport facilities, and reducing mortalities during transport and release operations. Predation, disease, and physiological effects during the various phases of transportation are receiving special attention.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 8.0014, PROTECTION OF FINGERLING SALMON IN TURBINES

*C.W. LONG*, U.S. Dept. of Interior, Biological Laboratory, Seattle, Washington 98102

This project is directed toward the assessment of losses of young salmon during passage through Kaplan turbines and the development of methods to reduce these losses.

The passage of juvenile salmon at dams on the Columbia-Snake river watershed is a problem of attrition. When all low-head dams are completed, some stocks of fish may have to pass as many as 10 projects to reach the sea. Problems of passage will be further compounded in the near future when many more turbines will be installed and fish now enjoying relatively safe passage through the spillways will be forced to use the turbines as their only means of egress to downstream areas.

Equipment and techniques are being used to investigate the causes of loss of fish in prototype facilities at Ice Harbor Dam and elsewhere in the Columbia Basin. Fish protection methods fall into three general categories: (1) Operating turbines to minimize mortality, (2) Eliminating lethal agents in turbines, and (3) Bypassing fish around turbines.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 8.0015, FISH GUIDING

*J.R. PUGH*, U.S. Dept. of Interior, Biological Laboratory, Seattle, Washington 98102

Fish-guiding techniques examined by this project have included the use of electrical fields, louvers in combination with electricity, and large panel nets in conjunction with self-cleaning traps. Also studied was the distribution of fish in the natural environment as related to application of fish-guiding devices. Reports of these investigations are in final stages as project nears completion.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 8.0016, FISHWAY RESEARCH (BONNEVILLE LABORATORY)

*C.R. WEAVER*, U.S. Dept. of Interior, Biological Laboratory, Seattle, Washington 98102

These studies are designed to provide information applicable to the improved efficiency of fish facilities at Corps of Engineers projects in the Columbia Basin. The investigations are carried out in the Fisheries-Engineering Research Laboratory at Bonneville Dam. Financing is by the Corps and direction of research is under supervision of the Corps Technical Advisory Committee.

A large laboratory area permits construction of full-scale fish facilities for study of the performance and behavior of adult migrating salmon that can be diverted from an adjoining fishway at the dam. Current and proposed studies include examination of the responses of salmon to various jet velocities, submerged orifice flows, temperature conditions, and barrier facilities. Techniques for T.V. monitoring of fish passage are being explored and developed for use in remote control counting of fish at dams. Special aspects of the behavior of juvenile salmon in turbine intakes are also being examined.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

## 8B. BIOMEDICAL ENGINEERING-LIFE SUPPORT

### 8.0017, DIVING MEDICINE

*L.F. MILLER*, U.S. Navy, Bureau of Medicine & Surgery, Washington, District of Columbia 20390

Objective: Provide biomedical data in support of manned underwater operations in which personnel are exposed to increased pressures. Equipment now available and under development cannot be used with safety and efficiency at depth. Medical problems are presented by: increased pressures of respired gases, producing abnormal pressures and quantities of gases dissolved in the body; and hazards to personnel presented by the wet, cold, dark environment, and toxic, infectious, or predatory marine life.

Approach: Phase I: Data collection and analysis of factors limiting depth, time, and performance of personnel immersed in water and breathing gas under ambient pressure. Factors to be examined are: physical and physiological characteristics of breathing mixtures; nutrition, metabolism, energy requirements and thermal balance; comparisons of the pharmacological and toxicological actions of chemicals in the altered environment; studies of the interrelation of man, microorganisms, and marine life during prolonged underwater living. Phase II: Definition of the most limiting factor or factors. Phase III: Removal of limitations through modification of the environment or by protecting the individual. Effort is primarily split between the Naval Medical Research Institution, Bethesda, Md, and the Submarine Medical Center, New London, Conn.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0018, SUBMARINE MEDICINE

*J.P. POLLARD*, U.S. Navy, Bureau of Medicine & Surgery, Washington, District of Columbia 20390

Objective: support advanced underwater systems through the application of the results of biomedical research. Present life support systems, while workable, are short of the ideal for health, performance and safety of the crew. Further problems are anticipated with the entry into the fleet of small modules for prolonged habitation. The physiological, microbiological, pharmacological, and human performance standards will indicate the need for all indicate the need for and direction of medical and/or engineering solutions to biomedical problems.

Approach: Achievement of this objective involves the following phases: Simulation of the artificial environment under controlled conditions in the laboratory; study of laboratory animals and later of humans in the controlled environment; observation of the medical or engineering solutions to problems defined; biomedical monitoring of submarine personnel and operations to determine the success of solutions achieved, and to provide early detection of biomedical problems. Effort primarily at the Submarine Medical Center, New London, Conn.

SUPPORTED BY U.S. Dept. of Defense - Navy

## 8. ENGINEERING AND TECHNOLOGY

### 8.0019, SWIMMER HIGH DEFINITION SONAR

*F.J. ROMANO, U.S. Navy, Ship Systems Command, Washington, District of Columbia 20360*

Objective: Develop acoustic equipment to enhance a swimmer's underwater vision capability. In turbid waters and during night operations visibility is often limited to several inches and a swimmer is effectively blind if he must depend on his unaided vision. This equipment will sufficiently enhance a swimmer's underwater perceptive ability to facilitate underwater construction, maintenance and repairs, and search of ship hulls for foreign objects.

Approach: The approach through industry and Navy labs is divided into four phases: preliminary design, equipment development, field tests, and reporting. The preliminary design phase will delve into the areas of signal processing, miniaturization, and acoustical beam forming in order to obtain information on state-of-the-art.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0020, ONE ATMOSPHERE DIVERS SUIT

*F.J. ROMANO, U.S. Navy, Ship Systems Command, Washington, District of Columbia 20360*

Objective: Develop a hard, self-contained diving suit that will maintain the diver at atmospheric pressure (14.7 PSIA) within the suit. The suit will be operational to 600 feet (continental shelf) and will be capable of extended working period up to 6 hours. At the end of this 6 hour period the diver can be brought directly to the surface with no decompression required. Using present diving equipment, including both hard hat gear and the various self-contained equipment, working dives below 200 feet impose severe decompression penalties on the diver. As an example, a surface supplied hard hat diver working for 2 hours at 250 feet, is required to spend approximately 11.5 hours additional time in the water for the required decompression to bring him to the surface. For the diver using self-contained equipment and saturation diving techniques, this same decompression time could be spent in a dry compression chamber, but the personnel and equipment required to support this type diving is extensive and quite expensive. An atmospheric suit of this type will eliminate the decompression problems and physiological penalties associated with all of the present diving systems. This development effort will advance the state-of-the-art in deep diving technology and will greatly extend the Navy's deep diving capabilities. To meet fleet requirements the suit will conform to the US Navy diving manual, and be compatible with existing support equipment (diving tender, etc.) wherever possible.

Approach: The program will be executed in several phases with the majority of the effort contracted to private industry. The first phase of the program will involve a joint and seal feasibility study. The second phase will involve design, fabrication, and test of a complete arm assembly to 6000 feet. If the results of the first two phases are successful, one contract for the development of the complete suit, tested to 600 feet, will be recommended, since this approach will be the most expedient and economical for the Navy.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0021, ADVANCES HEAT SOURCES AND THERMAL INSULATION MATERIALS FOR SWIMMER HEATING

*F.J. ROMANO, U.S. Navy, Washington, District of Columbia*

Objective. Investigate and develop advanced heat sources and thermal insulation materials for cold water protection of swimmers. Present heating techniques are based on electric battery power sources, and are therefore severely limited by the size and weight of the batteries required. Due to the heat transfer characteristics of present suit materials 1000 watts of supplementary power are required to maintain a swimmer in 29 F water. For a typical 6-hour mission involving a swimmer, 120 pounds of batteries would be required. From the size and weight of the batteries involved it is safe to assume that the swimmer could not handle or swim with such a self-contained package. The present effort will be directed toward investigating and developing new and improved insulating materials, and demonstrating feasibility of advanced heat sources for underwater suit applications.

Approach. Investigation will be conducted to determine state-of-the-art and capabilities of heat sources and thermal insulation materials. Basic heat transfer data will be developed for many materials, since very little data is available for these materials at depth. As a result of the in-house study the materials and heat sources deemed promising will be further investigated and developed through industry based on advanced insulators, tradeoffs will be made between the insulators and heat source requirements. As a part of this basic work, heat requirements for various water depths and temperatures will be established.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0022, DEEP DIVING DECOMPRESSION EQUIPMENT AND TECHNIQUES

*F.J. ROMANO, U.S. Navy, Ship Systems Command, Washington, District of Columbia 20360*

Objective: Develop the equipment and techniques to safely and efficiently decompress divers, who are in either a saturated or unsaturated condition, from depths as great as 1000 feet. Diving tables have been developed from depths of 380 feet when using hard-hat equipment and an 84/16 percent ratio of helium/oxygen breathing gas. Saturation diving schedules to depths of 600 feet are being developed under engineering development system S46-19, deep submergence man-in-the-sea. The necessity of providing the capability to dive to even greater depths is stated and has been proclaimed by the President's Council on Marine Sciences as part of an effort to make more effective use of the sea: Equipment to deliver the diver to these greater depths, sustain his life, provide him with the capability to communicate, navigate, locate objects and propel him about at these depths are being developed under separate task areas. This task area objective is concerned with safety and efficiently returning him to surface atmospheric conditions upon completion of his job.

Approach: The achievement of this objective involves several distinct areas of work in industry and at Navy labs: development of decompression schedules (depth vs time); development of the pressure complexes and control equipment which will provide the required atmospheres; development of recompression schedules for treatment of decompression sickness; and the development of diver performance evaluators which can be used to determine precise adjustments required in the general schedules to fit different categories of divers physical makeup.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0023, SUBMERGED OPERATIONS COMMUNICATIONS (SUBCOM)

*F.J. ROMANO, U.S. Navy, Ship Systems Command, Washington, District of Columbia 20360*

Objective: To provide the swimmer with reliable, intelligible underwater communication. The equipment will satisfy present underwater communications demands, in particular: diver to diver, vehicle intercom, diver to surface craft or any related communication problem. The equipment must operate to depths of at least 1000 feet thus necessitating use of speech conversion equipment to eliminate effects due to high pressure, helium enriched breathing environments.

Approach: Achievement of the objective through industry and Navy labs involves: (a) Develop basic diver to diver communication equipment to satisfy present requirements, serve as an interim system, and provide a testing platform for future development. (b) Utilize basic unit for development of high power vehicle and submarine mounted units and use in helium speech conversion. (c) Investigate effects on speech waveforms from high pressure and helium enriched breathing gases. Electronic methods will be formulated for frequency dividing and formant shifting of these waveforms to improve intelligibility. (d) Design and build breadboard models of speech unscramblers and speech encoders, apply these breadboards to equipment for testing.

SUPPORTED BY U.S. Dept. of Defense - Navy

## 8. ENGINEERING AND TECHNOLOGY

### 8C. CARGO HANDLING

#### 8.0024, THERMALLY SUSTAINED PRESSURE OSCILLATIONS IN LIQUID HELIUM APPARATUS

R.J. HOWSON, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

The phenomenon of thermally sustained pressure oscillations which frequently occur over liquid helium and other liquified gases is modeled and analyzed. The model is a distributed system with a linear temperature gradient. The interaction between the vapor motion and heat transfer is analyzed to derive an expression for the time history of the pressure oscillations.

Cyclic interpretation of the pressure history results in a relationship between four parameters which control the behavior of the oscillations. The four parameters contain information on amplitude of motion, slenderness ratio of the tube, characteristic lengths of the tube, thermal conductivity, specific heat ratio and viscosity of the gas undergoing the oscillations and boundary layer decay.

The effect of changes within the parameters on the theoretical behavior of the oscillating system shows good agreement with the behavior of oscillations in previous experimental apparatus when similar changes are made.

#### 8.0025, THE THERMODYNAMIC PROPERTIES OF NITROGEN-OXYGEN MIXTURES

R.L. STEELE, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

This thesis includes a survey of the literature through 1967 on the methods of determination of the thermodynamic properties of nitrogen-oxygen mixtures in the two-phase, liquid-vapor region. The virial expansion, empirical equations of state, pseudocritical constants, excess functions, latent heats, and graphical methods are considered.

The methods just enumerated are evaluated for their simplicity, feasibility, and accuracy. On the basis of the state of the art and the availability of appropriate data, thermodynamic diagrams are constructed for 1, 5, 10 and 20 atmospheres of pressure in the two phase region. Diagram coordinates are enthalpy-composition and entropy-composition. The diagrams at atmospheric pressure show good correlation with known data, while those at higher pressures are best estimates using excess functions and idealizing assumptions.

SUPPORTED BY Massachusetts Institute of Technology

#### 8.0026, THE PURCHASE AND INTRODUCTION OF BROOD STOCK

W.S. MILLER, State Div. of Fish & Game, Oakdale - Long Island, New York 11769

Purchase and introduce substantial numbers of adult oysters on rafts and hard bottom prior to attaining ripeness as a spawning stock. Oysters will be used from a shoal, warm water environment early in the season and from a deep, cold water environment later in the season when the initial group has completed spawning.

This phase will be accomplished in accordance with the timing of natural and/or conditioned spawning of the oyster stocks involved and the conditions present in Oyster Pond.

Personnel Involved in this phase will be: William S. Miller, Senior Aquatic Biologist, Pieter Van Volkenburgh, Conservation Biologist.

Part 2 of 4.

New York State Government

#### 8.0027, LIFE SUPPORT RESEARCH

H.R. SCHREINER, Ocean Systems Incorporated, Tonawanda, New York 14150

The objectives of this research are concerned with the extension of human capabilities underwater; they are proprietary to Ocean Systems, Inc.

SUPPORTED BY Ocean Systems Incorporated

#### 8.0028, SURFACE EFFECT SHIP ECONOMIC OPPORTUNITY

UNKNOWN, Stanford Research Institute, Menlo Park, California

PURPOSE: To determine the operational and economic feasibility of future SES commercial operation and its national potential.

DESCRIPTION: This study will examine the economic opportunities that may await commercial surface effect ships providing technological problems are resolved. The first phase, Surface Effect Ship System Formulation and Trade Requirements Survey, will identify and describe future trade areas for potential SES application, and include cargo flow and area environmental data; possible competition; and auxiliary transportation systems within the study time frame. Three categories of operation will be examined; short range such as Great Lakes or coastal operations; medium range such as Canada, Mexico or off-shore islands; and transocean. The second and third phases will be devoted to more detailed studies of one or more specific trade areas in each range category, and cover such factors as trade area characteristics, i.e., cargo origin/destination, inland transportation facilities, etc., weather conditions, cargo handling, interchange facilities, etc; demand and shipping system analysis of potential Surface Effect Ship cargo flow; Surface Effect Ship Configurations and Operations; revenue and cost estimates; and overall U.S. surface effect ship potential.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

#### 8.0029, COMPETITIVE MERCHANT SHIP PROJECT (BULK) DRY BULK COMMODITY FORECASTS

UNKNOWN, Stanford Research Institute, Menlo Park, California

Purpose: To forecast the movement of dry bulk commodities in support of the preparation of a plan for developing advanced dry bulk shipping systems.

Description: A comprehensive and independent forecast of expected ocean borne movements of dry bulk commodities, and an assesment of the national need for a dry bulk fleet will be made. Emphasis will be on an investigation of the economic political and technical factors which are likely to effect the world demand for the commodities under study during the next 25 years.

Methods of defining and assessing the national need for dry bulk carriers will be developed by considering a range of possible national goals and estimating the impact that an American Flag dry bulk fleet would have on these goals.

The results will serve as input to the development of a Strategic Development Plan for producing competitive dry bulk carriers.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

#### 8.0030, TRANSOCEAN TUG-BARGE FEASIBILITY

UNKNOWN, Matson Research Corporation, San Francisco, California 94105

PURPOSE: To determine the technical and economic feasibility of utilizing separable cargo and propulsion vehicle units in the international transportation of bulk, break-bulk, and unitized cargoes.

DESCRIPTION: This study will examine closely the opportunities and problems of utilizing tug-barge systems in the open sea, and will compare these systems with other competing shipping modes. The first efforts will be a review of current practice and a parametric evaluation of speed, size, power, cubic capacity, etc. This first effort will include evaluation of devices that would be used to couple the cargo unit (or units) to the towing unit.

As broad system characteristics become available from the first parts of the study, engineering analyses will be undertaken in sufficient detail to establish a reasonable degree of certainty as to technical feasibility and component cost.

## 8. ENGINEERING AND TECHNOLOGY

Following this will be development of a conceptual design for three shipping systems based on the tug-barge concept - a bulk carrier, a break-bulk carrier, and a unitized cargo carrier, and economic analysis of the opportunities that may exist for the American Merchant Marine in 'tug-barge' shipping systems.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0031, MARINE TRANSPORTATION ANALYSIS MODEL P.B. MENTZ, U.S. Dept. of Commerce, Maritime Administration, Washington, District of Columbia 20235

The Marine Transportation Analysis Model is designed to examine the economic characteristics of various ship systems for a specified trade route. The model has been programmed in Fortran IV and is being run on a Honeywell 200 computer. Marine systems able to be accommodated include those with various cargo handling capabilities such as break-bulk ships, container ships, and barge carrying ships.

The trade route may contain up to 10 domestic and 30 foreign ports with service among any number of feeder loops in conjunction with the main ship route. Cargo flow data is accepted as input to the model in a portpair format. An operational analysis is carried out within the program for each subsystem so as to provide appropriate values for the parameters used in the simplified cost structure.

The results of the routine are in the form of annual net cash flow (after amortization) to the ship operator, and annual Government subsidy cost (construction and operating differential). Both are computed for 10 variations of ship sailing frequency; each of these variations considering 5 values of ship speed. The output can be used to measure relative marine transportation system performance.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0032, ANALYSIS OF INLAND CARGO CONSOLIDATION CENTERS

UNKNOWN, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia

Purpose: To develop a technique for determining the functions, locations, and sizes of optimum inland consolidation centers in selected cargo generating and/or receiving regions.

Description: A mathematical model and an algorithm were developed and programmed for a computer solution to the problem of determining optimum location of centers for the consolidation of less-than-carload lots of break-bulk general cargo into container loads for export, and for the handling and unloading of import containers for domestic cargo distribution. The model calculates the savings to the shipping community accrued by using consolidation centers and transporting cargo over land in full containers, rather than transporting the more costly less-than-carload lots.

Data from the Delaware River Port Authority on exporters and importers in Illinois, Indiana, Ohio, Michigan, and Wisconsin were used to exercise the computerized model. In addition, the data was geographically plotted manually by amount exported per day from all exporting cities in these states to provide guidance for computer runs, and insight into the data not readily attainable from formalized computer techniques.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0033, AN OPTIMUM LOADING SEQUENCE FOR CONTAINER SHIPS

A.E. IOANNIDES, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

A model is developed for the optimum loading sequence of containerized cargo of varying densities and destinations. The loading time and cost are taken as the measures of effectiveness and the loading process has to satisfy certain constraints resulting from trim, list, stability and strength considerations.

Table 3, 4, 5, 6, 7, and 8 show the computer programs used and some sample results.

SUPPORTED BY Massachusetts Institute of Technology

### 8.0034, OPERATION OF BARGE TRAINS IN A SEAWAY UNKNOWN, Stevens Institute of Technology, Graduate School, Hoboken, New Jersey 07030

PURPOSE: To investigate the relative resistance and controllability performance of a single line pushed barge trains versus pull tow barges, and the magnitude of connecting forces between pushed barges.

DESCRIPTION: This research is an integral part of an overall barge study being conducted both at M.I.T. and Stevens Institute. Preliminary resistance and controllability tests have been conducted for the first phase of this project, representing both push and pull barge fleets of one to three barges with towboat in single line formation; the dimensions of the barges being 195 ft. ft. draft and the towboat 112.5 ft.

A preliminary analytical study was carried out which indicated that stern skegs are a necessity for pull tows to achieve controllability. Investigation of variable angle skegs is under way.

In the second phase main emphasis will be on the measurement of barge connecting forces and the effect of changing the barge beam.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0035, THE FEASIBILITY OF REDUCED CARGO GEAR INSTALLATION ONBOARD BREAK-BULK CARGO SHIPS

UNKNOWN, Control Systems Research Inc., Arlington, Virginia

Using a representative voyage as a test case, this investigation found it feasible to use mobile, self-powered cranes, aboard break bulk cargo liners to replace at least part of the conventional cargo handling gear generally found onboard.

Ninety-three percent of all cargo drafts were found to be less than 2000 lbs. and 97% of all drafts were less than 3000 lbs. Hence, two or three rubber-tired 12.5 ton (commercial rating) hydraulic cranes could be utilized onboard a typical, Mariner type ship with a resultant reduced capital investment in conventional cargo gear of \$155,000 to \$290,000 per ship. Annual savings could range from \$13,000 to \$28,000, including both capital and operating expenses.

Other fringe benefits result from the clear deck space resulting from elimination of kingposts, which space can be utilized for carrying additional containers on deck; smaller ship service generator capacity; simpler hull construction; and the possibility of using the mobile cranes on the shore or pier, if needed. Such an arrangement also permits changes in cargo operations or future alteration for 'all container' cargo at a smaller loss to the operator in invested cargo gear.

The report PB No. 178-963 is available from the Federal Clearinghouse for Scientific and Technical Information, Springfield, Virginia, 22151.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

## 8D. COASTAL ENGINEERING

(see Also Sub-chapters E, M, and N of This Chapter.)

### 8.0036, CRITERIA FOR THE DESIGN OF SMALL CRAFT HARBORS

R.Y. HUDSON, Calif. Inst. of Technology, Graduate School, Pasadena, California 91109

The objective of this study is to develop design criteria for small-craft harbors by theoretical and experimental research on: (a) response of small vessels, moored to floating docks and piers, to the action of short-period wind waves and seiches; (b) response characteristics of various harbor shapes and dimensions relative to wave period and wave absorbing characteristics of the perimeter walls to waves entering the harbor; (c) the design of protective works (offshore and inshore breakwaters, overlapping jetties, wave resonators, wave traps, etc.) to reduce wave energy entering the harbor, and design criteria for selection of harbor-entrance plans for waves at start of storm.

## 8. ENGINEERING AND TECHNOLOGY

By contract with California Institute of Technology, a report, 'Wave-Induced Oscillations of Small Moored Vessels,' by F. Raichlen was completed. This report is concerned with the response of small vessels moored to fixed docks.

SUPPORTED BY U.S. Dept. of Defense - Army

### 8.0037, DESIGN OF RUBBLE WAVE-ABSORBER

A.M. KAMEL, Natl. Engineering Sci. Co., Pasadena, California 91105

The theoretical aspects of wave absorbers (natural sand beaches, wave traps, and resonators, and rubble-mound absorbers) were reviewed and the findings related to actual situations. A special theoretical investigation was conducted to determine the feasibility of using rubble mound or other construction materials for absorbing wave energy entering harbors. The scale effects related to wave absorbers were studied and solutions proposed to correct scale effects. Tests will be conducted in future years to develop a more accurate method of measuring the short period wave reflection -- absorption characteristics of rubble mounds. Tests of rubble-mound wave absorbers will also be conducted to determine the ratio of reflected to incident wave heights as a function of structure slope, porosity of cover layer, thickness of cover layer; weight and shape of armor unit, dimensions of waves and depth of water. Studies will be conducted to: (a) investigate the energy transmitted through and over rubble-mound structures to develop design criteria for protection of harbor areas; (b) determine the wave-absorbing characteristics of sand beaches, wave traps, and resonators.

SUPPORTED BY U.S. Dept. of Defense - Army

### 8.0038, ANALYSIS OF AN ATTEMPT TO CONTROL BEACH EROSION AT SCIENTISTS CLIFFS, MARYLAND

L.P. SCHULTZ, Smithsonian Institution, Washington, District of Columbia 20560

Our analysis shows that the height of sand accumulated next to a groin is proportional to the height of the groin; the width of the beach is proportional to the length of the groin out to the non-spill-over height during storms.

SUPPORTED BY Smithsonian Institution

### 8.0039, COASTAL WORKS EVALUATION FOR CHECKING, IMPROVING AND DEVELOPING DESIGN RELATIONSHIPS AND CONSTRUCTION TECHNIQUE

G.M. WATTS, U.S. Army, Coastal Engin. Res. Center, Washington, District of Columbia 20016

Data are obtained and studied on the behavior of shore improvement projects during and after their construction. The data are obtained in cooperation with appropriate field offices insofar as practicable. Protective works studied include beach fills which serve to rehabilitate and/or nourish shore segments, as well as gravity or cantilever type shore structures of both monolithic and rubble construction.

Projects currently being followed also involve sand bypassing at improved inlets, permeable and impermeable groins, jetties and breakwaters, and reconstruction of protective sand dunes. Utilizing the collected data, applicable design relationships, both functional and structural, are evaluated. Study objectives are improvement of existing design relationships and construction techniques, or development of new ones.

SUPPORTED BY U.S. Dept. of Defense - Army

### 8.0040, METHODS OF BYPASSING SAND PAST INLETS

G.M. WATTS, U.S. Army, Coastal Engin. Res. Center, Washington, District of Columbia 20016

Data are collected and compiled at all known places where by works of man, sand is passed across natural or improved inlets of the shoreline. Such works presently include: (a) offshore breakwater and lee sand-trap to be periodically emptied by floating hydraulic dredge plant; (b) fixed pumping plant and pipe line system at jettied inlet to provide continuous bypassing; (c) periodic dredging with floating hydraulic dredge plant in overly-

widened channel in a jettied inlet; (d) weir-type jetty and retention basin to be periodically emptied by floating hydraulic dredge plant; and (e) mechanical removal and transport by truck haul from updrift accumulation to downdrift eroded area at a fixed littoral barrier. Quantitative and qualitative data, both physical and economic, are to be compiled and analyzed with the view toward development of relationships which will serve as guide lines or criteria in the design of sand transfer systems.

SUPPORTED BY U.S. Dept. of Defense - Army

### 8.0041, DEVELOPMENT OF CRITERIA FOR ARTIFICIAL BEACHES

G.M. WATTS, U.S. Army, Coastal Engin. Res. Center, Washington, District of Columbia 20016

The study is to develop beach fill design criteria, and to establish a systematic procedure for the investigation of the characteristics of littoral material. Program involves 2 steps: (1) Develop design criteria for beach fill through application of statistical principles to special test data; (2) Reexamination studies of completed artificial fill projects to obtain data for comparative evaluation of developed design criteria. Data which have been derived under the functional study of fill projects are utilized in step 2 procedures of developing the criteria for artificial beaches. Studies through contracts with educational institutions are being carried out regarding the use of statistical principles by repetitive collection of field data at one location. High speed computers are utilized in the analysis of the field data.

SUPPORTED BY U.S. Dept. of Defense - Army

### 8.0042, RUBBLE-MOUND PROTOTYPE STUDIES

G.M. WATTS, U.S. Army, Coastal Engin. Res. Center, Washington, District of Columbia 20016

Prototype rubble-mound structures, including structures with pre-cast armor units, are subjected to programmed surveillance for damage or movement of armor units by wave action in order to correlate such data as are obtained with that previously obtained from hydraulic model and theoretical studies. Armor units at selected positions in the structure are permanently tagged, positioned by survey measurement, and subsequently checked semi-annually, or after each major storm, to determine the degree of movement of the units. Wave gaging instrumentation is installed to provide continuous sampling of incident wave action, and survey measurements of adjacent beach and bottom are also taken periodically. Data are currently being measured at three locations on the Pacific Coast which include a rubble-stone jetty; a jetty with pre-cast quadripod armor units, and a shore-connected breakwater constructed with a rubble-stone stem and monolithic concrete head.

SUPPORTED BY U.S. Dept. of Defense - Army

### 8.0043, LOCALIZED SCOUR AROUND PILING SUBJECTED TO FIRST-ORDER STOKIAN WAVES

M.R. CARSTENS, Georgia Inst. of Technology, School of Engineering, Atlanta, Georgia 30332

Scour around a single cylindrical vertical pile subjected to first-order Stokian waves has been studied experimentally on an oscillatory-flow water tunnel. The water moves over the bed with a period of about 3.5 seconds. From an initial flat-bed condition scour-hole depth as a function of time has been observed as a function of time. Two bed materials were 0.297 mm glass beads and 0.185 mm Ottawa sand. Pile diameters were as follows: 0.375 in., 0.751 in., 0.875 in., 1.244 in., 1.732 in., and 1.99 in. The majority of the runs were performed with a water-motion amplitude large enough to maintain a flat but moving bed during the run. A few runs with smallest pile were made with a water-motion amplitude small enough to maintain a flat immobile bed (except around the pile). Results have been analyzed by mass-transport concepts utilizing transport rate equations for inflow and outflow. Similarity relationships have been sought. Final report for Contract No. DACW72-67-C-0017 (Georgia Institute of Technology) will be issued in November 1968.

SUPPORTED BY U.S. Dept. of Defense - Army

## 8. ENGINEERING AND TECHNOLOGY

### 8.0044, WAVE FORCES ON BREAKWATERS

*V.T. CHOW*, Univ. of Illinois, School of Engineering, *Urbana, Illinois*

Shock pressures created by water waves breaking against vertical barriers are examined. These waves were studied in a laboratory using small-scale oscillatory waves in a flume fitted with a beach slope and test wall. The variation of pressure with both time and position on the wall was measured for several wave profiles with heights ranging from 1.11 inches to 3.29 inches with periods ranging from 1.38 seconds to 1.94 seconds, and two beach slopes, 1/25 and 1/10. The magnitude of the shock pressure was observed for each of the wave conditions tested. From analysis of the data, the shock pressure was found to decrease with both wave height and wave length and to be proportional to the cube root of the wave energy. With the cooperation of U.S. Army Corps of Engineers, the experimental work was conducted at the U.S. Army Waterways Experiment Station.

U.S. Dept. of Defense - Army

### 8.0045, STABILITY OF RUBBLE-MOUND BREAKWATERS

*R.Y. HUDSON*, U.S. Army, Waterways Experiment Sta., *Vicksburg, Mississippi*

The objective of this project is to develop formulas and design criteria from which the action of waves on rubble-mound breakwaters can be determined with sufficient accuracy to provide economical and safe designs of full-scale structures.

SUPPORTED BY U.S. Dept. of Defense - Army

### 8.0046, HARBOR DESIGN STUDIES

*R.Y. HUDSON*, U.S. Army, Waterways Experiment Sta., *Vicksburg, Mississippi*

The objective of this project is to determine criteria for designing harbors and harbor structures to obtain optimum wave protection for medium and large-size vessels. This will be accomplished by running tests to determine the optimum arrangement of breakwaters and navigation entrances to harbors to obtain the maximum wave reduction in the harbor, and to determine the effect of wave-front curvature on the amount of distribution of wave energy that enters a harbor through navigation openings of various dimensions and orientation with respect to the direction of wave approach. Additional tests will be run to determine effects of the so-called Mach stem phenomena on the optimum orientation of breakwater and vertical-wall piers; the relationship between the rate of wave attenuation in channels through shallow reef areas, and channel length, width, depth, and side slope; the effect of extending fill seaward along entrances of channels, through shallow reef areas, on wave pattern at the entrance of the channel and wave propagation through the channel; the relationship between harbor basin geometry and harbor response to wave energy reaching the basin via the entrance channel.

SUPPORTED BY U.S. Dept. of Defense - Army

### 8.0047, WAVE DAMPING SYSTEMS

*H.F. MILLER*, Uniroyal Incorporated, *Wayne, New Jersey*

Using corporate funds, Uniroyal, Inc. has been studying wave damping systems over the past five or six years. These portable mechanical devices will attenuate wave height when moored as breakwaters. Models have been constructed and evaluated at the laboratory scale. Prototypes of the more promising systems have been constructed and evaluated in small-scale field trials. New concepts are being tested as the project continues.

## 8E. GENERAL OCEAN ENGINEERING

### 8.0048, DEVELOPMENT OF AN ADVANCED MISSILE IMPACT LOCATING SYSTEM FOR THE EASTERN TEST RANGE

*C.D. LEEDHAM*, General Motors Corporation, *Goleta, California* 93017

Design, fabricate and install an improved, advanced missile water impact locating system for use down range from Cape Kennedy in the Eastern Test Range for evaluation of accuracy of certain ballistic missiles. This system will use underwater acoustics, telemetry and advanced signal processing techniques ashore.

SUPPORTED BY U.S. Dept. of Defense - Air Force

### 8.0049, DEEP OCEAN TECHNOLOGY

*R.J. KNIGHT*, North Amer. Rockwell Corp., *Long Beach, California* 90803

The Deep Ocean Technology Program is a long-term series of interrelated experimental hardware development projects whose objectives are to generate, expand, and exploit deep ocean technology to fulfill future military and non-military requirements. This study was undertaken to develop capability in all areas associated with the selection of a site for a manned bottom installation (MBI). In conduct of the study, the methodology associated with site selection was developed. The methodology defined the study approach and the requirements and operational considerations associated with the program objectives. The study was limited to sites on the continental shelf with a selected environment and overt operations. Site characteristics have been identified, categorized (chemical, physical, biological, geological) and tabulated. The parameters which must be measured to define the site characteristics have been established and the associated instrumentation to conduct the measurements have been identified. The instrumentation was limited to state-of-the-art or near term (under development). Technological voids in survey equipment have been noted. Correlation of the data have been provided by the establishment of a generalized site survey sequence.

SUPPORTED BY North American Rockwell Corporation

### 8.0050, OCEAN ENGINEERING RESEARCH

*J. GILHEANY*, Catholic University of America, Graduate School, *Washington, District of Columbia* 20017 (N00014-67-A-0377-0003)

Research is underway involving six faculty project directors and 21 graduate students in the areas of (1) Submersible and Ocean Cable Dynamics, (2) Metals and Alloy Marine Corrosion Studies, (3) Vibrational properties of transducers by optical homodyning and optical instrumentation, (4) Transition boiling and flow transients, (5) Wall effects on fluid flow, (6) Physical structure of sea water.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0051, DEEP SUBMERGENCE SYSTEMS

*G. SEGE*, Westinghouse Electric Corp., *Annapolis, Maryland* 21204

During the past year, research continued in areas of technology for 20,000 foot operating depth for application to advanced manned submersible survey vehicles applicable to OLSOR (object location, small object recovery) systems. Research was concentrated in materials and materials selection for personnel hulls, flotation and vehicle structures; recovery concepts; environmental analysis; emergency buoyancy systems and power conversion for propulsion.

System Analysis - Perform effective system integration for manned vehicle search and recovery missions. Complete the preliminary environmental survey and analysis in order to improve operational effectiveness of survey missions. The report will be updated as additional environmental data becomes available and new areas will be added as the need arises. Subjects of interest are bottom roughness and texture, topography, sediment characteristics, currents, object embedment and breakout and visibility.

SUPPORTED BY Westinghouse Electric Corporation

### 8.0052, OCEAN ENGINEERING STUDIES

*H. BECK*, Hudson Laboratories Inc., *Dobbs Ferry, New York* (NONR)

## 8. ENGINEERING AND TECHNOLOGY

This task provides a unified study of engineering problems (such as feasibility, optimum instrumentation and techniques) encountered in the various programs of the laboratory and the Navy research community. Examples are data processing techniques, data acquisition and transmission systems and displays. It also includes continuing work on development and handling of sound sources and receiver packages; underwater instruments and structures including arrays, cables, corers, explosives, side-looking sonars, etc., and studies of ships and shipboard equipment relating especially to the research needs of the laboratory.

### 8.0053, PSYCHOPHYSICAL EFFECTS OF XENON FLASHTUBES

J.T. MONTONYE, Univ. of Rochester, Graduate School, Rochester, New York 14627

The Coast Guard is seeking information on the psychophysical characteristics of flashtubes that can be of advantage in aids to navigation. The present research at the University of Rochester, which is being performed by a Coast Guard officer pursuing a Master of Science Degree in Optics, is directed toward an explanation of the physical characteristics of flashtubes that contribute to their conspicuousness above threshold. A special 'Visual Research Stroboscopic Unit' on which pulse repetition rate, flashlength and energy level are variable, has been built for the work. Externally triggered, the unit allows various scintillated flash characteristics.

Ironically, the work will basically use threshold observations to determine the physical characteristics of flashtubes that are responsible for their conspicuousness above threshold. It will essentially duplicate the Blackwell and Moldauer temporal forced-choice retinal locus work of 1958 (Detection Thresholds for Point Sources in the Near Periphery) at a background brightness of 10 to the minus 3 power Foot-Lamberts, but using flashtube rather than incandescent sources. By comparison with the Blackwell results, which showed uniform sensitivity across the central retina for a 10 to the minus 3 power F-L background, and the execution of some additional supra-threshold observations, it is expected that a determination of the relative effects of flashtube temporal, spectral and intensity characteristics on conspicuity will be achieved. A number of practical side-effects are anticipated from the work, some of which may be the following: (1) Distribution of energy for flash lengths probably less than the critical duration that will give optimum conspicuousness. (2) Conspicuousness as a function of supra-threshold level for each of six scintillation characteristics. (3) Measurement of the threshold and/or .2 microlux illumination level equivalent fixed intensity of each scintillation flash characteristic.

SUPPORTED BY U.S. Dept. of Transportation - Coast Guard

## 8F. INSTRUMENTATION

(measuring and Monitoring Devices. See Also Chapter 8g Equipment)

### 8.0054, ACOUSTIC LUNEBERG LENS

W.J. TAULIS, North Amer. Rockwell Corp., Anaheim, California

Objective: To develop a water inflatable acoustic lens.

Approach: Design, procure and test a breadboard model at sea.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0055, PRESSURE INSENSITIVE VELOCIMETER

H.T. PATTEN, Bunker Ramo Corporation, Canoga Park, California

The pressure insensitive velocimeter is an instrument to measure the speed of sound in water, or other fluid media, and is designed to be exposed directly to ambient pressures at great depths greater than 20,000 ft.) without benefit of a pressure vessel to house the electronics. The instrument uses the classic sing-around mode whereby the output frequency of the instrument is equal to the reciprocal of the transit time between transducer and target. Utilizing pressure insensitive electronic components

throughout allows a significant reduction in instrument size and weight and enhances the dimensional stability of the sound path. A precision tunnel diode-hybrid zero crossing detector to reduce electronic time delay errors and improve the input acoustic dynamic range was used. Compensation for changes in path length due to compressability of Invar standoffs was achieved by voiding the rear of the target, allowing simple and highly predictable diaphragm action to provide the necessary delta. Instabilities from all causes (electronic and mechanical) is less than plus or minus 1/50,000.

SUPPORTED BY Bunker Ramo Corporation

### 8.0056, MICROWAVE RADIOMETER DEVELOPMENT

C.V. FALCO, Aerojet General Corporation, El Monte, California 91734

TECHNICAL OBJECTIVE: The technical objective of this work unit is to develop new techniques for the measurement of thermal radiation intensity of the earth's surface and atmosphere. The distinguishable features are water, ice, dry land, swampland, dense vegetation, dense clouds, heavy rainfall, etc.

APPROACH: The initial work will be modifying and testing a microwave radiometer operating at 19.35 GHz which was delivered on a prior GSFC contract. An engineering model radiometer will be used for contract effort while 'in-house' work will be conducted with a breadboard model radiometer. The areas of development will include, but not be limited to antenna control, antenna beamwidth, antenna efficiency, phase shifting techniques, receiver noise figure, receiver bandwidth, calibration techniques.

PROGRESS: A breadboard model, an engineering model, and ground support equipment were delivered on Contract NAS 5-9680 with Job Order Number 622-160-44-03-84. The breadboard model is at GSFC for laboratory investigations. The engineering model with control and data recording equipment was installed on the NASA Convair 990 and flight tested for instrument evaluation.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0057, DEEP SUBMERGENCE DISSOLVED OXYGEN TRANSDUCER

M.W. GREENE, Beckman Instruments Inc., Fullerton, California 92634

Objective: To develop an instrument capable of in-situ measurement of dissolved oxygen in the ocean at depths down to 3000 meters.

SUPPORTED BY Beckman Instruments Incorporated

### 8.0058, CTFM SONAR

F.J. HESTER, U.S. Dept. of Interior, Fishery Oceanography Ctr., La Jolla, California

Development under a Bureau of Commercial Fisheries contract, this Continuous Transmission Frequency Modulated (CTFM) sonar was designed with a high-resolution frequency analyzer to detect Doppler shifts caused by motion and body flexure of target fish. The sonar scans at a speed fast enough to follow rapidly moving tuna schools which are difficult to follow with conventional pulsed sonar. On completion 2 years ago the CTFM sonar was installed on the small Bureau research vessel, Miss Behavior operated by the BCF La Jolla Laboratory.

It was found that tuna usually travel at 5-6 knots and change course frequently. Whenever their body orientation changes, their sonar echoes fade rapidly. Since there is about a 40 db difference in target strength between the presentation of a broadside aspect and a head or tail aspect on these fish, the spacing and orientation of the individuals in the school make it very difficult to maintain contact at ranges greater than 100 meters. Even these short ranges might work well in seining operations but the speed and rapid course changes necessary to stay with a school are such that often the school can out-manuever the vessel and contact is lost. The same problem does not apply to contact made with schools of clupeids at the same ranges, perhaps because of their small internal intervals. For such fish the rapid scan rate of the

## 8. ENGINEERING AND TECHNOLOGY

CTFM sonar made it possible to estimate school size and movement at any instant.

The sonar experiments were concluded at the close of FY 1968 and a final report is in preparation. In summary, it is not expected that the CTFM sonar will be applicable to commercial tuna operations as a tactical tool although it has a place in the sonar array of a fishery research vessel.

SUPPORTED BY U.S. Dept. of Interior - Biol. Comm. Fish.

### 8.0059, OPERATIONAL EVALUATION OF NSRT SYSTEM

J.F. SAUR, U.S. Dept. of Interior, Biological Laboratory, Palo Alto - Stanford, California

With increasing use of sea surface temperature information on both for research and synoptic forecasting in weather and fisheries, it is necessary that the quality of the sea temperature observations be improved. A suitable system which eliminates much of the instrumental and personnel errors must be developed and thoroughly tested before a large-scale program can be launched to install the systems on merchant ships, fishing vessels and other ships which report these observations. This program is designed to obtain the necessary test data and experience with such a system.

The general objective is to conduct a thorough field test of NSRT units like the two prototypes obtained from Yellow Springs Instrument Co. to: (a) Determine if such systems manufactured in larger quantities retain the quality and accuracy built into the two prototypes; (b) Establish a measure of the longevity and failure rate from a sample of at least 25 units; (c) Develop and test modifications to the instrument which may be deemed necessary in the course of these tests; (d) Obtain a large sample of reliable data as to what degree the temperature stratification causes temperatures accurately measured in the seawater intakes (near surface) to differ from conventional bucket (surface) temperatures; (d) Determine if the NSRT system would be useful as standard equipment for BCF research and exploratory ships and other oceanographic research vessels.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 8.0060, HOLOGRAPHIC STUDIES OF MARINE ORGANISMS

H.P. SILVERMAN, TRW Incorporated, Redondo Beach, California (N00014-67-C-0316)

The investigator proposes to demonstrate that holography, the use of lasers in the photographic recording of three dimensional images, can be used effectively in those biological study problems which require observation of dynamic activity throughout a volume of water without excessive loss of resolution. He suggests specifically, the application of the technique to studies of plankton productivity *in situ*, including enumeration and identification of organisms; locomotion with time lapses in nanoseconds; feeding; settling, and other activities of organisms in approximately the 0.5 to 3 millimeter range.

One of the major problems in biological oceanography research has been the lack of equipment permitting *in situ* observations. The so-called deep scattering layer which probably interferes with the transmission of acoustic energy underwater has never been clearly characterized because of this lack. The holograph, if it fulfills its promise, will permit direct observation of the density of the biological components of the water sample, measurement of particle size, and size range, and even identification of the organisms present. On this basis, it will be possible to determine the role of the 'layer' in acoustical, as well as optical, interference. The conditions under which fouling and boring by biological organisms occur will be determined, and a great many other mechanisms by which biological pests operate will be elucidated.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0061, INVESTIGATE METHODOLOGY FOR MEASURING OCEANIC PROPERTIES LEADING TO THE TOTAL

### ENVIRONMENTAL SURVEY OF A SELECTED OCEAN AREA

F.B. CHMELIK, Lockheed Aircraft Corporation, San Diego, California 92101

The initial work on this project pointed up the need for a variety of tools and sensors suitable for a deep submersible to use in measuring oceanic properties. Efforts were then directed toward the conceptual design of an *in-situ* filter/sampler, a deep submergence radiation detection device and a self-generating tube that could be inserted into the sea floor for obtaining core samples or directly measuring mass physical properties.

SUPPORTED BY Lockheed Aircraft Corporation

### 8.0062, MARINE RADIOLOGICAL INSTRUMENTATION

T.R. FOLSOM, Univ. of California, Graduate School, San Diego - La Jolla, California 92038 (NONR)

The purpose of this task is to develop and improve instrumentation and techniques for the measurement of very small amounts of radioactivity in the oceans, and to apply these measurements to studying oceanic circulation. The work involves special sampling equipment for use aboard 'Ships of Opportunity,' the laboratory analysis of the samples, and the instrumentation development.

This task has direct application to the measurement of the fate of radioactive material from waste disposal and other nuclear events. It is also contributing to our knowledge about mixing processes in the oceans which affect those parameters influencing sound characteristics of the oceans.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0063, COMPUTER PROCESSING OF MICROSCOPE IMAGERY

J.L. HARRIS, Univ. of California, Graduate School, San Diego - La Jolla, California 92038

This research is directed toward increasing the state-of-the-art of resolving power in optical microscopy. The approach involves utilizing a prior knowledge as to the maximum size of the object and employs computer processing of digitized image information. The initial funding for this research was received during FY66. The support is on a continuing basis and therefore no termination date has been set.

SUPPORTED BY Amer. Optical Company

### 8.0064, BIOLOGICAL INSTRUMENTATION

J.M. SNODGRASS, Univ. of California, Graduate School, San Diego - La Jolla, California 92038 (NONR)

The investigator advises and assists in bio-instrumentation research with hydrobiologists who require specialized equipment in their studies. Instrumentation for analysis of physiological or behavioral responses of organisms to natural or artificial stimuli will be especially considered. Methods for accurate measurements of environmental factors as they relate to or are perceived by biological organisms are investigated. Some pieces of equipment now in use are being studied in regard to adaptation to solid state sensors and microminiaturization.

Research in biological orientation and hydrobiology yield information of immediate and long range potential value to the Navy. The development of new concepts regarding information theory, biological transducers, environmental navigational clues, etc., represents a far-reaching and much needed change of viewpoint from which many new ideas for analogues may be expected to emerge.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0065, INSTRUMENT DEVELOPMENT

J.M. SNODGRASS, Univ. of California, Graduate School, San Diego - La Jolla, California 92038 (NONR)

The objective of this task is to develop new techniques and equipment which are reliable and suitable for supporting oceanographic research. During the coming year, emphasis is upon technical guidance for the development and production of satel-

## 8. ENGINEERING AND TECHNOLOGY

lite navigation receivers and the installation of computers on research ships. Efforts are being made to develop an in situ oxygen meter for use at sea. Consulting services on oceanographic telecommunications are being provided to the Navy and the U. S. Government.

The results from this task provide many instruments or concepts necessary for developing environmental data collection systems. Many of the instruments and techniques initially conceived and/or developed under this task, like the expendable bathythermograph, already have become part of standard usage.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0066, HOLOGRAPHIC INSTRUMENTATION FOR MARINE PLANKTON STUDIES

*J.D. STRICKLAND*, Univ. of California, Graduate School, San Diego - La Jolla, California 92038

The project is to design and fabricate an underwater laser-camera combination which will enable holograms to be taken of the plankton in about 100 liters of water in such a manner that the animals will be viewed in an undisturbed condition making it possible to document any small-scale patchiness and aggregations of ecological significance. We hope to make a preliminary evaluation of cinematic holography as a tool for studying the behavior (feeding, breeding and swimming, etc.) of zooplankton in a relatively undisturbed state.

SUPPORTED BY U.S. National Science Foundation

### 8.0067, NEW SEA GRAVITY METER

*N. BROWN*, Bissett Berman Corporation, Santa Monica, California 90404 (N00014-67-C-0430)

A new sea gravity meter has been designed and a prototype is now being constructed. The meter will be tested in the laboratory when completed. The meter consists of a quartz-cantilever beam with an ultra-sensitive capacitance transducer to measure changes in gravity as small as 0.1 mgal. The meter is expected to operate successfully on a stable platform for a large range of vertical ship accelerations, up to and exceeding 100,000 mgal. The cost of the meter is anticipated to be considerably less than U.S. made commercial meters now on the market. Sea tests of the meter are planned within a year if the laboratory performance and cost of construction prove to be satisfactory.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0068, FREQUENCY TIME RESEARCH ENGINEERING

*P.P. VIEZBICKE*, U.S. Dept. of Commerce, Time & Frequency Div., Boulder, Colorado 80302

Technical Objectives: To study the feasibility of worldwide time synchronization by means of multiple frequency VLF transmissions including systems engineering, design, and fabrication of component units.

Approach: Two or more closely spaced VLF frequencies, whose phase relationships are precisely specified and accurately controlled, are broadcast by means of time sharing from NBS Radio Station WWVL. Upon reception, if propagation fluctuation is not too severe, the relative phases of these signals with respect to local time signals permit establishment of time synchronization. Engineering parameters, such as optimum frequencies and necessary transmitter power, need to be determined.

Progress: WWVL power amplifier has been redesigned--eliminating the L-C tank circuit and reducing the number of electron tubes in the PA. The antenna feed system was redesigned and permits matched conditions into the 500 ohm open wire line. The design of the generation and control system to convert WWVL to three frequency operation is progressing. Preliminary design has been completed.

Two third-order servo frequency drift correctors have been built similar in design to one now in use in Section 253.04.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0069, UNDERWATER HOLOGRAPHIC IMAGING

*D. GABOR*, Columbia Broadcasting System, Stamford, Connecticut

Objective: To investigate the holographic imaging technique as an underwater sensor.

Approach: Conduct research, design and develop experimental equipment in support of further refinement of the holographic technique.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0070, BIOTELEMETRY

*J.R. OLIVE*, Amer. Inst. of Biolog. Sci., Washington, District of Columbia (NONR)

The AIBS has established, and now maintains, the Bio Instrumentation Advisory council, a clearing-house through which biologists avail themselves of advice and assistance from physicists and engineers on appropriate techniques, approaches, and instrumentation for biological research. The Council understands biological requirements for the development of improved equipment and technological advances, and keeps abreast of developments in electronics, electrical engineering, and telemetry as they relate to instrumentation. Support is provided from several sources, including ONR and NASA.

One phase of Oceanic Biology Programs has as an objective, understanding of reception and responses to environmental cues or stimuli by biological organisms. This knowledge applies to Navy operational requirements in such areas as: ship-ordnance navigation and guidance, target detection and discrimination, and survival. Instrumentation and operating techniques are necessary to identify and respond to these environmental cues for improved Naval operations.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0071, AUTOMATED FLOW SYSTEM CALIBRATION

*D.W. BAKER*, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia

Research and development to utilize small digital computers for the automatic readout of instrumentation, automatic control of fluid flow systems calibration, and calculation of performance data. Immediate application is for aircraft flow systems, with benefits anticipated for NBS flowmeter calibration work.

Evaluate and develop transducers and systems for the measurement and control of flow parameters, with signals suitable for input to computers which will be adapted or used to accomplish the automatic calibrations and automatic data processing.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0072, VISUAL RANGE METERS

*C.A. DOUGLAS*, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia

To provide a stable nucleus of specialists, operating in a technical environment, competent to apply the results of basic research and of lessons of the past and the resources of NBS to current aviation lighting and marking problems; to maintain and utilize a photometric and illuminating engineering laboratory competent to make and interpret the specialized measurements required in the development of aviation lighting equipment and systems; to make the required measurements and studies; to develop improved instrumentation for measuring the atmospheric factors affecting visual range; to provide a better knowledge of the threshold constants of the eye applicable to service conditions; to develop the application of these data to the control of the operation of aircraft landing and taking off in conditions of poor visibility (example: Fog Conditions). This is NBS Mission Component 1.6, Research and Development for another agency.

When we are advised of the needs of the sponsor, tasks are initiated to obtain the required data and recommendations formulated on these data are forwarded. Individual tasks usually require from 3 to 24 man-months. Current tasks are: 1. Development of a back scatter visibility meter suitable for use on aircraft carriers. 2. Development of an improved cable-fault locator. 3. Continuing development of the NBS transmissometer and related com-

## 8. ENGINEERING AND TECHNOLOGY

ponents. 4. Improvement of the performance of in-runway lights and of glide-slope indicators. 5. Preparation of specifications for air field lighting equipment. 6. Making of photometric and electrical measurements of air field lighting equipment and evaluating the results of these measurements.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0073, MECHANICAL TESTS AND FORCE CALIBRATIONS

*F.C. FALKINBURG*, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia

The prime objective is to calibrate transfer force measuring devices and systems submitted to NBS by industry, standards laboratories, and other governmental agencies. Subordinate objectives include further development of calibration techniques, adaptation of a digital computer to the calibration process and improvement of accuracies in force measurements. This calibration work is directly related to the Bureau's mission of making accurate calibrations of instruments to serve as reference standards for industry and government. Tests of materials, structures and special devices are made for other government agencies and industry when facilities and personnel are not available elsewhere.

Through the use of deadweight machines, highly precise forces from 5 lbf to 1,000,000 lbf are applied to devices submitted for calibration. The performance of each device is determined from operational and load tests, the data are analyzed and a report prepared for the user. The use of a digital computer permits comprehensive analyses and a standardized format for presenting the results. Special mechanical tests are made with testing machines and test facilities with force capacities up to 12,000,000 lbf.

Report interval -- March 1, 1967 through December 31, 1967. Calibrations of 462 force measuring devices were completed during the above period: 345 for private industry and 117 for governmental agencies. Force measuring devices included dynamometers, load cells, transducers, aircraft weighing kits, proving rings, and Amsler boxes. Mechanical tests were made on 26 items for other governmental agencies. These items included wire rope, sine measuring devices, acrylic compression-creep specimens, shackles, exothermic splices, sheet metal lap joints and padeyes for raising submerged ships.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0074, INTERCOMPARISON OF TOWING TANK AND WATER TUNNEL CALIBRATION OF CURRENT METERS

*J.L. FRENCH*, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia

To determine the effect of water-tunnel test-section size on the performance of small Price and Pygmy current meters, and to determine the effect of turbulence level on the registration of water-current meters. The results of these determinations will provide information helpful in the design of a water tunnel which will replace the existing towing-tank current-meter calibration facility. The calibration of current meters by NBS serves the needs of Federal, State and private agencies in this measurement field.

An apparatus has been assembled which simulates the contraction and working sections of a water tunnel. Price meters will be calibrated in 16 and 20-inch diameter tunnel sections and in the towing tank. Pygmy meters will be calibrated in 8, 16, 20-inch tunnel sections and in the towing tank. Towing-tank and water-tunnel results will be compared. The effect of turbulence on both meter types will be investigated by installation of various approach-channel grids to vary the turbulence level in the working section.

The presently available data on the performance of current meters in the simulated working section of the water tunnel, together with the data obtained in the pitot tube calibration of the working section suggest that a water tunnel facility can be designed which will yield current meter (or other velocity sensing device) calibrations fully equal or superior in quality to those now obtained in the present towing tank.

Repeated calibration of various types of current meters in the 20-inch diameter water tunnel section are continuing and will be compared with calibrations obtained in the towing tank.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0075, STRUCTURE OF TURBULENCE

*P.S. KLEBANOFF*, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia

To apply high-speed digital computing techniques to the measurement of the statistical properties of turbulence and thereby provide significantly new data which will extend our knowledge of turbulent processes. Using these techniques the nearly isotropic turbulence field produced by a grid and the shear turbulence in a boundary layer will be investigated. Special attention will be given to the measurement of higher-order correlations and joint probability density distributions of the velocity fluctuations and the fluctuating velocity gradients. The results obtained will have application to problems in aerodynamics, hydrodynamics, atmospheric turbulence, diffusion and mixing processes, etc. This project continues the NBS work on the development and application of various measurement techniques to the solution of important fluid dynamic problems.

The basic idea in applying high-speed digital computing techniques to the measurement of turbulence is to employ the digital computer together with hot-wire instrumentation to form a measurement system capable of performing the large number of complex operations that a detailed study of the statistical properties of turbulence requires. Hot-wire instrumentation converts the velocity fluctuations into voltage fluctuations which are recorded on multi-channel magnetic tape. The signals are then digitized and fed into a 7090 computer which when appropriately programmed provides a quantitative measure of the various statistical properties of turbulence. Apart from the interpretative analysis, the problems associated with programming, a number of technical aspects have to be investigated. These are appropriate instrumentation for obtaining high quality records, sampling procedures, digitizing procedures, noise and nonlinear behavior of the hot-wire.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0076, BASIC ACOUSTICAL STANDARDS AND MICROPHONE CALIBRATION

*W. KOIDAN*, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia

Technical Objective: (a) Development and improvement of methods for the measurement of sound pressure from infrasonic through low ultrasonic frequencies. Measurement methods at audio frequencies and low sound pressures are fairly well established; however, methods for calibration at infrasonic and ultrasonic frequencies and at high sound pressures are still being explored. (b) Maintenance of reference standard instruments (microphones) for sound pressure measurement. Improvement of the Sound Laboratory facilities for the calibration of microphones. (c) Studies of the properties of standard laboratory microphones relevant to their use in measuring sound pressure. (d) Studies of acoustical environments used in the calibration of microphones. (e) Participation in the work of USASI, IEC and ISO relevant to the calibration of microphones.

Approach: (a) Microphone pressure calibration at infrasonic and ultrasonic frequencies to be performed by carrier-frequency techniques or electrostatic actuator. Free-field calibration at infrasonic frequencies by plane-wave tube or small box. Free-field calibration at ultrasonic frequencies in a small anechoic chamber. High-intensity calibration in a special progressive-wave tube. (b) Perform periodic primary pressure calibrations at audio frequencies in small, closed couplers by reciprocity technique. Perform periodic primary free field calibrations by reciprocity in anechoic chamber. Microphones thus calibrated serve as reference standards. (c) Measure and calculate theoretically electrical and acoustical parameters and the electromechanical coupling factor of condenser microphones.

Above work relates to calibration and design of improved transducers and hydrophones for underwater acoustic measurement and communications.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

## 8. ENGINEERING AND TECHNOLOGY

### 8.0077, PHOTOGRAPHIC STANDARDS

*C.S. MCCAMY, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia*

Methods of measuring the characteristics of photographic systems are developed and interlaboratory comparison programs are arranged to validate procedures before they are standardized. The fundamental concepts, terminology, and notation for measures of optical characteristics are investigated theoretically and proposed for standardization.

The final draft of a USA standard method of measuring the resolving powers of photographic films, plates, and papers has been approved and the illustrations of test patterns on the 'borderline' of resolution have been re-evaluated. Two draft USA standards for optical density have been written. We are cooperating in the revision of existing national and international standards for films for permanent records and the storage conditions for the preservation of such film records and the preservation of colored photographs. A study of the theory of optical wedges has been completed and will be reported to the Optical Society of America in March. We sent a delegate to the meetings of the ISO committees on photography and cinematography in Moscow in June 1967. A paper 'A Half Century of Photographic Standardization in the United States' was presented at the annual meeting of the Society of Photographic Scientists and Engineers and is being prepared for publication.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0078, NUMERICAL CODE CONVERTER

*E.C. PALASKY, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia*

The main objective is to determine the feasibility of designing a practical field instrument for measuring humidity based on the adiabatic saturation equation. Such an instrument would be useful in meteorology, particularly when an accurate and portable instrument is needed. It has the potential of extending the accuracy of the psychrometric method by about one order of magnitude.

The plan is to fabricate a prototype instrument, using dewars to insure adiabatic conditions; resistance thermometers, thermocouples, thermopiles or thermistors for temperature measurement; continuous automatic water feed to the wicking; constant flow sampling; and heated-air techniques to prevent freezing of the wicking. Tests will be performed using the NBS two-pressure generator as a source of known humidity.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0079, WATER CURRENT METERS

*F.W. RUEGG, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia*

To provide calibration service for water current meters to the U.S. Geological Survey. The provision of this service is one way in which NBS meets its responsibility for providing the basis for accurate and uniform mechanical measurements throughout the Nation's scientific community, industry and commerce.

Water current meters are towed through still water at various constant speeds from 0.25 to 8.0 feet per second to determine the relationship between the speed and the revolutions per second of the meter turbine. The relationship is usually given by one or more straight line equations.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0080, NAVAL AIRCRAFT LIGHTING

*T.O. TWIST, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia*

Objectives: 1) The development of standards, instrumentation and measurement techniques in the field of photometry to satisfy the updating of Naval Aircraft lighting specifications, 2) The monitoring of such specifications to insure that they remain abreast of the state of the art techniques, 3) The development of specialized lighting equipment with responsibility up to installation and test on aircraft to demonstrate feasibility, 4) The establishment of and the monitoring of photometric test facilities in government and the aircraft industry to assure correlation of

measurements between laboratories, and 5) The technical monitoring of research, development, and human factors contracts as directed by the project sponsor. The functions of the project are germane to the NBS mission in that they closely parallel areas of photometry and colorimetry in which the Bureau has an interest, particularly in the development of low-level photometric reference standards, instruments, and measuring techniques used by industry. This is NBS Mission Component 1.6, Research and Development for another agency.

Approach: This is a continuing project and the approaches for solving the broad objectives outlined are varied. The problems can be classified as follows: 1) The development of standards, instruments and test methods and 2) Services provided the sponsoring agency. As for the standards, a continuing program is carried out for improving the source, instruments and methods employed in measuring the photometric characteristics of aircraft instruments and lighting equipment and the dissemination of this information through reports, specifications, and the participation in professional societies. The services accrue directly to the sponsor and the urgency for completion of any task undertaken is established by that agency. These services include the monitoring of specifications and technical aspects of contracts, as well as the development of prototype lighting equipment for exploring new concepts, and the furnishing of technical advisory services.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0081, HUMIDITY STANDARDS AND MEASUREMENTS

*A. WEXLER, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia*

The development of suitable primary and secondary standards for the calibration of humidity equipment; the development of calibration techniques; and the investigation of properties, constants and behavior of water vapor and water vapor-gas systems. This project falls within the National Bureau of Standards mission to develop and maintain the national standards for physical measurement, to develop transfer standards and standard instruments and to undertake research in support of the above.

(1) Research and development is being conducted toward developing and adiabatic psychrometer that could be used as a secondary or field standard. (2) An investigation is being made of the effect of pressure of air on the saturation mixing ratio and on using the results for computing f-factors and interaction virial coefficients. (3) Research is being undertaken to extend the range of the National Bureau of Standards gravimetric hygrometer.

Air water content affects evaporation from rivers, ice, oceans, etc. Need to know water content in pressure suits and sealed submersibles. Weather Modification forecasts radio propagation (i.e., Navigational need).

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0082, AEROLOGICAL INSTRUMENTS

*A. WEXLER, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia*

Development of improved instrumentation for measurement of such parameters as humidity and condensation nuclei for the study of weather modification and for cloud physics investigations. This project falls under the mission of the National Bureau of Standards to conduct research on basic measurement techniques and instrumentation. It should lead to improved instrumentation of increased accuracy for obtaining better weather forecasts, better understanding of cloud physics, and of the problems associated with atmospheric refractive index as it affects radio propagation.

A microwave hygrometer for field use consisting of two microwave cavities operating at 12 GHz, one cavity flushed with test gas and the other containing dry gas has been developed and is undergoing test. It will then be field tested.

Reporting Interval: March 16 to December 31, 1967.

Laboratory operational and electronic tests were completed on the microwave hygrometer. An electronic calibration was obtained of read-out vs. frequency. The instrument operates continuously and unattended. It has a total range of 100 N-units. The read-out, in the form of a trace on a strip-chart recorder, can be

## 8. ENGINEERING AND TECHNOLOGY

selected so that full scale corresponds to dewpoints of plus 40 degrees C to minus 50 degrees C, minus 5 degrees C to minus 50 degrees C or minus 30 degrees to minus 50 degrees C. Extensive humidity calibrations and field tests remain, to determine the operational characteristics of the instrument.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0083, HUMIDITY SENSORS

A. WEXLER, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia

Tests on the long-range stability of the barium fluoride element were performed over a nine-month period. During this time, the element maintained its calibration to plus or minus 10% RH. A method was developed of measuring the surface temperature of the element by means of a vacuum-deposited palladium film. This film has a resistance of 50 ohms, and a temperature coefficient of .0033 (compared to a bulk coefficient of .0038). The element was used in a cooperative field experiment at Davis, California, with the University of Wisconsin and University of Washington to measure water vapor flux. Comparisons with a lysimeter yielded agreements in flux of 25 to 50%. A paper entitled 'Study of the Storage Stability of the Barium Fluoride Film Electric Hygrometer Element' was published in the NBS J. Res., 71C, 199 (1967).

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0084, HUMIDITY CALIBRATION

A. WEXLER, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia

To provide calibration service for reference quality humidity instruments to the public and other Government agencies. The provision of this service is one way in which NBS meets its responsibility for providing the basis for accurate and uniform humidity measurements throughout the Nation's scientific community, industry and commerce.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0085, APPLICATION OF NUCLEAR TECHNIQUES TO MARINE MINERALS TECHNOLOGY

W. CAMPBELL, U.S. Dept. of Interior, Bureau of Mines, Washington, District of Columbia 20240

The Bureau of Mines marine minerals research program includes a study to determine the feasibility of nuclear and radioisotope techniques for both the delineation and characterization of marine mineral deposits, and the control of mining operations. Thus far, the effort has been concentrated on in situ activation analysis techniques. Elemental analyses were performed on four types of sea floor minerals of potentially commercial value: phosphorite, manganese nodules, sand (spiked with gold), and red clay. Elemental concentrations were determined by characteristic radiation emitted after irradiation by neutrons of different energies and at different flux levels.

The project was intended to serve as a start for a long-range program designed to produce, by about 1970, a Mineral Detection Probe. This instrument package will be built to probe, from sea floor to bedrock, the vertical dimension of an unconsolidated mineral deposit and provide at least semi-qualitative and, hopefully, quantitative analyses. The system will not require the drilling of a hole prior to its use; therefore, the speed of evaluating a submerged beach or stream placer mineral deposit will be greatly increased and the total exploration and evaluation cost considerably decreased. For this reason, the probe is thought to have eventual commercial possibilities.

SUPPORTED BY U.S. Atomic Energy Commission

### 8.0086, ULTRAVIOLET ABSORPTION AND LUMINESCENCE

W.R. HEMPHILL, U.S. Dept. of Interior, Geological Survey, Washington, District of Columbia 20242

Development and testing of the Fraunhofer Line Discriminator for marine geologic and hydrologic studies.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey

### 8.0087, NUCLEAR OCEANOGRAPHIC TECHNIQUES

N. ANDERSON, U.S. Navy, Research & Dev. Department, Washington, District of Columbia

This is a jointly sponsored program concerned with the evaluation of proposals and experimentation on various isotopic techniques for the measurement of oceanographic parameters. Previous unofficial cooperation led to the Deep Water Isotope Current Analyzer and the Nuclear Sediment Density Meter. The Naval Oceanographic Office will perform such tasks as: 1. Conduct studies and experiments on the applications of isotopic techniques to the measurement of oceanographic parameters. The studies and experimentation will be conducted both in the laboratory under controlled conditions and at sea under operating conditions. In addition, some isotopic techniques and systems from other DID contractors will be introduced into this joint program. 2. Conduct studies and experiments on the Nuclear Sediment Density Meter in order that it can be modified to best meet Navy requirements. 3. Re-analyze and evaluate the Deep Water Isotope Current Analyzer in order to determine its full potential in naval oceanographic applications. Comparisons with conventional current sensors will be made. 4. Assist DID in evaluating new oceanographic proposals. 5. Exchange information with DID in fostering new techniques. 6. Make recommendations for Navy utilization of isotopic techniques found to advance the state-of-the-art. 7. Assist DID in maintaining liaison with other branches of the Navy for planning conferences, etc., both classified and unclassified.

SUPPORTED BY U.S. Atomic Energy Commission

### 8.0088, VISIBLE REGION INSTRUMENTATION FOR OCEANOGRAPHIC SATELLITES

J.W. SHERMAN, U.S. Navy, Oceanographic Office, Washington, District of Columbia

Objectives: (1) To investigate and evaluate all visible region passive instruments for over-water surveying and (2) to delineate which oceanic features can be observed by visible region instrumentation and ascertain optimum specifications for films, filters, and instrumentation.

Approach: (1) A continuing review of the state-of-the-art for visible region instruments to observe ocean phenomena will be maintained. (2) Planned experiments over ocean test sites to test new instrumentation will be conducted. (3) Plan and execute experiments using airborne platforms to acquire and evaluate data for various ocean features (shoals, currents, bottom topography, sediment distribution, etc. a. Sensors - 1. Color and multiband cameras. b. Proposed Contractor - Experimental Astronomy Lab., Massachusetts Institute of Technology, c. Allocation of Resources - Manpower 50%, Overhead, 50%.

Problem Addressed: Controlled experiments over the ocean are difficult to achieve and information, at present, is minimal. Film-filter tests need to be expanded for environmental measurements (currents, temperature, water mass identification) and the use of targets and controls for resolution and contrast loss is needed. Test sites, transportation, and control of aerial and surface data require difficult planning and execution. MIT has a good start on resolving these problems.

SUPPORTED BY U.S. Natl. Aero. & Space Adm.

### 8.0089, HYDROGRAPHIC SURVEY TECHNIQUES

R.L. WHEATLEY, U.S. Navy, Oceanographic Office, Washington, District of Columbia

Objective: Develop improved techniques and equipment to accelerate the collection and improve the quality of hydrographic data to meet DOD needs for the production of hydrographic and amphibious combat charts for support of various naval weapons. Data acquisition will be accelerated by at least a factor of five. Scheduled development extends through FY 73. With present methods only 300 miles of survey lines can be accomplished in one day by one survey ship. The new surveying techniques and equipment will accomplish 1500 miles of survey lines per day per ship. This effort is directed toward solving problems within the scope of mapping, charting, and geodetic functions as defined in DOD studies and in the report, June 1966, published by the panel on oceanography of the President's Science Advisory Committee.

## 8. ENGINEERING AND TECHNOLOGY

Approach: Various sensors, techniques, and platforms for acquisition of hydrographic data will be investigated and tested. Sensors for both direct measurement and photogrammetric measurement of water depths will be investigated. The performance and suitability of the sensors when installed aboard high speed platforms will be determined. Sensor/platform utility will be determined for various applications and integrated with the optimum positioning system to upgrade the quality of hydrographic data. These investigations will lead to development of operational systems.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0090, DESIGN AND DEVELOPMENT OF OCEANOGRAPHIC INSTRUMENTATION

S.J. NISKIN, Univ. of Miami, Graduate School, Miami - Coral Gables, Florida 33124 (NONR)

Objective: To support oceanographic research relevant to Navy requirements a need exists for new and improved instrumentation for making measurements at sea. The aim of this research is to design, construct and test new devices for use in research and surveys.

Approach: A recently designed combination STD (Salinity, Temperature, Depth) and water sampling rosette is being constructed and field tested. A neutrally buoyant horizontal current-profile array of directional inclinometers also is being developed and tested to study water transport. Improvements are being made on a vertical current-profile array to permit recording of the array configuration for periods of at least 36 hours.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0091, DEVELOPMENT OF A SIMPLE UNATTENDED PYCNOCLINE FOLLOWER

W. DUING, Univ. of Hawaii, Graduate School, Honolulu, Hawaii 96822

It is planned to construct a simple unattended pycnocline follower which consists of an anchored neutrally balanced float. The first test of the equipment will be carried out in local Hawaiian waters. An observational program at the Line Islands region is designed to test the relationships between the depth of the pycnocline, solar radiation and wind stress.

SUPPORTED BY U.S. National Science Foundation

### 8.0092, DEVELOPMENT OF AN INSTRUMENT FOR MEASURING THE CONCENTRATION OF DISSOLVED OXYGEN IN SEA WATER IN SITU

V. GRAEFE, Univ. of Hawaii, Graduate School, Honolulu, Hawaii 96822

For the planned investigations of the interaction of water masses, of variations of the oxygen minimum layer, and of the oxygen concentration close to the bottom of the sea, an instrument is needed that will measure the oxygen concentration in situ in great depths. Such an instrument is not available, but the addition of telemetering equipment to an existing shallow water oxygenmeter that has been modified as required will result in an instrument that is capable of measuring O<sub>2</sub> concentrations well below the O<sub>2</sub> minimum layer. The resulting instrument will be tested and used in the ocean near Hawaii.

SUPPORTED BY U.S. National Science Foundation

### 8.0093, OIL MONITOR INSTRUMENTATION

UNKNOWN, Illinois Institute of Technol., Graduate School, Chicago, Illinois 60616

PURPOSE: To develop an instrument which will monitor and record the oil content in shipboard bilge and ballast water discharge to permit the enforcement of the International Convention for Prevention of Pollution of the Seas by Oil (IMCO).

DESCRIPTION: The instruments must be capable of consistently detecting oil or oily residue in shipboard discharge at concentrations of 100 parts of oil in a million parts of water. The investigation has explored detection methods, including those used in laboratories, to develop detection instruments capable of

functioning in the severe marine environment. The device now under development uses an infrared absorption technique to measure the difference between the input and output energy of the discharge. The difference is equivalent to the energy absorbed by the oil. Originally, research was aimed at the 3.4 micron energy region where hydrocarbons have a sharp absorption peak, but problems with opaqueness of water caused a change to the 1.6 micron region.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0094, X-RADIOGRAPHIC AND ELECTRONIC FLUOROSCOPIC EQUIPMENT

A.F. RICHARDS, Univ. of Illinois, Graduate School, Urbana, Illinois

This grant will provide toward the total estimated cost for a Norelco 150 MX x-ray machine with electronic fluoroscopic display apparatus and a specimen handling system. It is anticipated that the fluoroscopic display feature, which obviates the need of highly skilled radiologists, will pay for itself in the first three to five years of operation.

The first specific use of the equipment will be for the study of deep-sea sediment cores in which a Polaroid photograph of a lens magnified, image intensified display will record the optimum radiographic image for each portion of the sample tube x-rayed. The very slight degradation of picture quality by this method, compared to conventional film radiography, is not expected to be important.

The x-ray machine will feature simplified controls and an automatic tube load mechanism. The image intensification tube will have dual field feature giving a choice of nine inch field or electronic expansion of the central six inch field to nine inches. The system also has capabilities of stereo and color radiography.

SUPPORTED BY U.S. National Science Foundation

### 8.0095, TRANSDUCER RESEARCH

J.N. DAVIDSON, Westinghouse Electric Corp., Annapolis, Maryland 21204

The research and development of a deep submersion spherical transducer was initiated. It will be continued during 1968 because of its potential as a deep omnidirectional target or receiver over a broadband of frequencies. No other shape or configuration has this characteristic. The first sphere that was tested for verification of design, failed in dynamic stress. An analysis showed that the sphere was faulty in construction since failure occurred at a stress far below the allowable dynamic stress.

Objective: To further the state-of-the-art in the field of low frequency sources and receivers of acoustical radiation. Also, to extend the understanding of mutual coupling effects in multielement arrays.

Approach: Research work and testing will continue in the areas of improved underwater encapsulating materials and techniques, sealing techniques, absorbers, decoupling techniques, and other mechanisms applicable in general to underwater acoustic transducers.

The principal research effort for 1968 is in the area of low frequency, high power, high efficiency Tonpitz transducer elements. One phase will investigate an element suitable for use in a planar or conformal surface ship array and a second phase, an element suitable for use in a deep-diving submarine array. In conjunction with research projects carried on by other groups, it is hoped that these transducers can be wed to the amplifiers to obtain subsystem optimized for power handling, efficiency, bandwidth, and element interaction.

Studies will also be carried out on the Cassegrain principle as applied to small acoustic transducers for high frequency surveillance.

Work previously begun on the composite cylindrical transducer, the spring-mounted, free-flooded Tonpitz element, the disc bender transducer, and the planar array study will be continued and/or completed. It is also planned that a study be carried out in small tank calibration techniques and array mutual coupling effects. It is further hoped that the hybrid computer (Underseas) research into element design and analysis can be extended to

## 8. ENGINEERING AND TECHNOLOGY

cover arrays of elements with mutual coupling or interaction effects included.

SUPPORTED BY Westinghouse Electric Corporation

### 8.0096, ADVANCE SONAR SYSTEMS

T.G. DELL, Westinghouse Electric Corp., Annapolis, Maryland 21204

Objective: To further the state-of-the-art in high resolution and special purpose sonar. Also to extend the understanding of limited warfare sensor requirements.

Approach: Research work and testing will continue to provide improved special purpose and high resolution sonar equipment. Investigation will determine whether the hydrofoil sonar and the extended focal length transducers conceived in 1967, under UN-67-3R, have application to the special requirements of limited warfare.

The principal research in 1968 will be in three main tasks: namely, (1) completion of the feasibility model of the hydrofoil sonar initiated in 1967; (2) study and testing of new techniques leading to extended focal length high resolution sonar; and (3) study of existing devices and techniques that have application for display of high resolution sonar data.

The high resolution, high data rate hydrofoil sonar initiated in 1967 will be completed and testing will be conducted in the Acoustic Test Facility. If successful, a co-operative testing program on a hydrofoil will be pursued. The sonar technique also has application as obstacle avoidance sonar for manned submarines.

Investigation into several potential techniques to increase the focal length of focused transducers will continue. Solution of the problem is required for reconnaissance sonar applicable to swimmer delivery vehicles, and the riverine warfare.

Present devices used to display high resolution side looking sonar are either of extremely limited performance or extremely complex. A study will be made of state-of-the-art techniques and devices to determine if improvements can be devised to provide a quick access, high resolution, high contrast, and economically feasible device.

SUPPORTED BY Westinghouse Electric Corporation

### 8.0097, NOISE LIMITATION UPON AEROMAGNETIC MEASUREMENTS

S.J. BANK, Roff Analytic Study Assoc., Silver Spring, Maryland 20910

Objective: To acquire additional basic knowledge of the extent to which airborne magnetometers are physically limited by various forms of natural background noise.

Approach: Refine Methods for obtaining geologic noise spectra from the total magnetic field, and conduct detailed analyses of the effect of the ocean surface upon magnetic gradients.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0098, SUPERCONDUCTING MAGNETOMETER SYSTEMS EVALUATION

J. MICOL, Arthur D. Little Incorporated, Cambridge, Massachusetts

This task is to perform a Superconducting Magnetometer Systems Evaluation in order to determine whether the development of such devices will materially benefit the U.S. Navy. Several designs for these magnetometers are based upon phenomena occurring in thin superconductive films. This evaluation will combine (1) the operational usefulness of such very sensitive field and gradiometer magnetometers, (2) the limitations on performance of these devices, (3) realistic specifications which can be established for a new airborne operationally useful magnetometer and (4) based on the foregoing, the identification of areas in which research and development are required, the general nature of the program and their estimated costs and durations.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0099, INERTIAL TECHNIQUES

D.P. KELLY, Mass. Inst. of Technology, Graduate School, Cambridge, Massachusetts 02139 (NONR)

The goal is to apply modern inertial techniques to the measurement of the change in horizontal velocity with depth. Envisioned is a free-falling, recoverable, hydrodynamically-tuned vehicle which when acted upon by horizontal currents will be translated sideways without rotation. The horizontal displacements would be sensed by an inertial system and stored together with depth information. The coming year's work will consist of laboratory experiments and of design of an accelerometer system for a prototype field model. When the limit to which a free-fall probe can be tuned for vertical stability is discovered, the decision can be made as to the necessary requirements for additional internal gyroscopic stabilization of the accelerometer platform.

The development of a successful system would permit accurate measurement of vertical profiles of horizontal currents without mooring or accurate navigation. Such measurements would be useful in deep water engineering tasks, in ascertaining the mixing and dilution rates of adjacent layers, and in determining space distribution of time changes in the sound propagation field.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0100, AN INVESTIGATION OF THE S/N FATIGUE LIFE GAGE

G.F. LIVINGSTON, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

The S/N fatigue life gage is a small sensor which is similar in appearance to a foil strain gage. The S/N fatigue life gage is bonded to the surface of a mechanical structure using standard strain-gage techniques. The S/N gage changes resistance permanently as a continuous function of fatigue experience. This gage was developed by Mr. Darrell R. Harting of the Boeing Company, Seattle, Washington. The gage is produced commercially by Micro-Measurements, Inc. and distributed by W. T. Bean, Inc., Detroit, Michigan.

This investigation describes the results of a series of reverse bending tests on S/N fatigue life gages which were mounted on Ti-6Al-4V titanium specimens. Each S/N gage was subjected to various constant strain loadings for varying numbers of cycles.

The results of this investigation show that the performance of the S/N fatigue gage under random cyclic loading is predictable. Another result of the tests indicates that the S/N gage experiences an above normal increase in resistance well in advance of actual gage failure. Finally it was observed that a decrease in S/N gage resistance will occur immediately after the mean cyclic strain level is lowered; and whenever the gage is subjected to any substantial rest period.

SUPPORTED BY Massachusetts Institute of Technology

### 8.0101, MARINE GRAVITY

C.G. WING, Mass. Inst. of Technology, Graduate School, Cambridge, Massachusetts 02139 (NONR)

This task will continue the construction and development of a new shipborne gravity meter that is expected to have a higher operating accuracy and lower cost than do existing competitive meters. The system consists of a double vibrating string accelerometer, which is a modification of surplus accelerometers developed for the space program, mounted on a Sperry Mark 19 gyrocompass. Work this year will include improving the instrumentation and evaluating the meter at sea on different ships and in different sea states. Instrumental developments include finding the simplest solution to the Eotvos gravity errors associated with marine navigation.

Knowledge of the earth's gravity field is important for calculating the deflections of the vertical, needed for navigation. This task attempts to develop a meter that will provide more accurate gravity measurements at a lower cost.

SUPPORTED BY U.S. Dept. of Defense - Navy

## 8. ENGINEERING AND TECHNOLOGY

### 8.0102, DEVELOPMENT OF FISHNET BATHYKMOGRAPH

*J.E. CROSSEN*, U.S. Dept. of Interior, Biological Laboratory, Woods Hole, Massachusetts

Purposes: To develop an instrument system that can measure the time, duration, and depth of each haul made by New England Groundfish fishermen as a precise measure of fishing effort.

To provide acceptable hardware for a model of a standard system that will minimize the total cost of the complete operation from data collection to the printing of the final format. Specifically, to provide 20 fish-bathy-kymographs (FBK's) (DSE) for analogue readout including calibration equipment, and spare parts kits in accordance with contract 014-17-0007-820 and the assurance that the acceptance criteria have been met.

Approach: Contract development of the model system to a commercial contractor (Geodyne Corp.) with a Bureau coordinator and project leader (Mr. Crossen) in the Lead Laboratory (Woods Hole). Oceanographic Instrumentation will coordinate the efforts of the Branches concerned with this project. A reliability engineering support contractor (Arine Co.) will supply services at prescribed check points.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 8.0103, SHIPBOARD GRAVITY SENSOR AND GYROCOMPASS

*C.O. BOWIN*, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543

A Sperry Mark 19 gyrocompass will be modified into a Mark 19c configuration and a Bosch Arma vibrating-string accelerometer will be mounted aboard ship so as to function as a sea gravimeter similar to that developed by Von Arx and Wing.

SUPPORTED BY U.S. National Science Foundation

### 8.0104, INSTRUMENT STUDIES

*D.C. WEBB*, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543 (N00014-66-C0241)

The objective of this task is to provide advanced and comprehensive engineering support for a wide range of scientific and observational programs. This support will be achieved through the evaluation of promising but unproven techniques, acquisition and testing of new components, and investigation of causes of failure. Work will be done in the laboratory and in the field.

It is expected that this work will generally benefit the program at the institution by improving new instruments. This in turn will improve competence available to the Navy for general oceanographic efforts.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0105, INSTRUMENTATION FOR LAKE CAYUGA HEAT RELEASE STUDY

*D.H. BOCK*, Cornell Aeronautical Lab. Inc., Buffalo, New York 14221

Instrumentation has been designed, developed, calibrated, and installed for recording temperature profiles and flow rates at several points in Lake Cayuga in the vicinity of a fossil-fueled power plant. Four buoys and one rigid pole in the lake were used for the instrumentation installations, from which temperature and flow rate information is transmitted to shore via coaxial cable. (This cable also carries power for the instruments and low frequency command signals for sampling various instruments at the buoys and the pole.) The signals which measure the flow rate and temperature are frequency modulated with an analog of the variable being measured. Time division multiplex is used for sampling of up to 24 signals from each of the buoys and the pole and to permit transmission of the data via the one coaxial cable. At the shore, the data can be extracted and recorded in digital or analog format. A digital-to-analog converter is available to permit monitoring of signals on a paper chart recorder. The sampled signals are connected to a telephone line to permit access to the data at a central location where equipment maintenance can be initiated, when necessary.

SUPPORTED BY New York State Electric & Gas Corporation

### 8.0106, STUDY OF PROBABILITY OF DETECTION AND FALSE ALARM RATE OF FREQUENCY ACOUSTIC TELEMETERING SYSTEM

*R.A. HELTON*, Raytheon Company, Portsmouth, Rhode Island

The penalty for a false actuation by an acoustically-controlled underwater oil well may be drastic in terms of the human lives and capital resources which could be lost. A study of the effective false alarm rate that may be achieved with an acoustic frequency diversity telemetering system, consistent with a high detection probability, has been completed. An acoustic link must face hazards of high noise levels, multiple reflections, reverberation, and temperature inversions. Our study has evaluated these basic phenomena theoretically within the limits of our knowledge of the statistics of the noise field, of the variability of the medium, and the likelihood of particular forms of man-made interference. The system has been tested at sea, and data pertaining to the assembling of background statistics has been collected.

We have demonstrated that systems may be designed with an acceptably low risk of false actuations, while achieving positive detections reliably. The study indicates that only modest power would be required to achieve satisfactory operation at ranges which permit operation over the full extent of the Continental Shelf.

SUPPORTED BY Raytheon Company

### 8.0107, DEVELOPMENT OF A SENSOR, INSTRUMENTATION AND COMMUNICATION SYSTEM FOR A DEEP OCEAN MANNED HABITAT (ATLANTIS)

*O.H. JACKSON*, Raytheon Company, Portsmouth, Rhode Island

Technical Description: Conceptual development of electronic systems for a manned habitat for occupation of the ocean floor at 6,000 feet was initiated. Particular emphasis was directed to: communications between habitat and surface; communication between habitat and telechiric devices; communications between men in the hyperbaric environment and the habitat; fail-safe emergency communications on several levels; navigation systems for precise localization and elevator mating; remote positioning and control of telechiric devices; long range acoustic sensing systems; sensors for the acquisition of physical, chemical biological and geological data; data handling to ensure crew safety; data handling to process and analyze the sensor information.

This effort involved basically the evolution of the electronic systems necessary to support a long term manned mission on the edge of the shelf or on the mid-Atlantic ridge.

SUPPORTED BY Raytheon Company

### 8.0108, FEASIBILITY STUDY FOR A GATED-LASER, IMAGE-AMPLIFIER UNDERWATER VISION SYSTEM

*T.W. SMITH*, Raytheon Company, Portsmouth, Rhode Island

The growth in man's ability to exploit the oceans has made obvious the need for systems to identify underwater objects and to provide information for the direction of work. Underwater television provides a limited capability which must be extended for operation in turbid water. This program accomplishes a significant performance improvement through the application of a blue-green YAG laser for illumination, a Raytheon night vision image converter, a range gate for selecting the range of interest and a television system for delivery of the resulting image to a remote viewer. The program has included analytical study and experimental verification of results.

SUPPORTED BY Raytheon Company

### 8.0109, EXPERIMENTAL HIGH RESOLUTION SUB-BOTTOM PROFILING SYSTEM

*G.M. WALSH*, Raytheon Company, Portsmouth, Rhode Island

An experimental replica correlation echo sounder system is being developed, including transducer, power amplifier, receiver and signal processor. This system will experimentally verify performance of large time-bandwidth product (WT) signal processing for the measurement of depth and sub-bottom profiling, with potential signal processing gains of 23 db. The increased signal energy provided by the large WT signals will significantly improve measurement resolution and provide capability for

## 8. ENGINEERING AND TECHNOLOGY

penetrating into the ocean floor for examination of sub bottom layering. In addition, the constant false alarm rate (CFAR) receiver characteristics will improve the ability to automatically measure the depth for direct input to computer data processing, simplifying the data collection and reduction procedure.

SUPPORTED BY Raytheon Company

### 8.0110, MODIFY 19 OCEAN BOTTOM SEISMOGRAPHS AND CONDUCT TESTS WITH THE DEVICE

UNKNOWN, Texas Instruments Incorporated, Dallas, Texas (AF-19-628-05890)

Technical Objective: The contractor shall incorporate certain improvements and refinements in the design of the ocean bottom seismograph to increase its performance capabilities. In addition, a series of tests will be performed to evaluate the improved system.

SUPPORTED BY U.S. Dept. of Defense - Air Force

### 8.0111, ADULT SALMON BEHAVIOR STUDIES IN RIVERS AND AT DAMS (SONIC TRACKING)

J.H. JOHNSON, U.S. Dept. of Interior, Fish Passage Res. Program, Seattle, Washington

This project seeks information which will contribute to a sound assessment of the effect of reservoirs and dams on anadromous fish runs, specifically on adult salmonids returning to Columbia River system spawning areas. Such an assessment requires an accurate knowledge of migration timing and spawning area locations before dams are constructed, and of the amount and nature of mortality resulting directly from fish passage over dams.

The project's primary research tool at present is the sonic fish tag, a miniature high frequency sound transmitter attached directly to the fish. Sonic tagged fish can be tracked individually from boats, their continuous movements noted in precise detail, or their progress and dispersion upstream can be measured by means of automatic recording monitors placed at intervals along the shore above a tagging site. The latter system is being utilized to study migration timing and population distribution in the Snake River and its tributaries from its mouth to a point 200 miles upstream. Phases of this work relating to timing of adult migration are performed cooperatively with personnel of the program titled 'Adult Migration Rates'. A study of adult salmon mortality caused by fish being swept downstream through dam spillways is in progress at Ice Harbor Dam, employing both individual tracking and a system of monitoring receivers installed in each spillway gate opening.

A study of the freshwater homing behavior of migrating salmonids is planned, using sonic tracking techniques in the field in combination with laboratory studies, already in progress, of sensory response and sensory organ anatomy and physiology.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

## 8G. EQUIPMENT DESIGN AND STANDARDS

(includes Fishing Gear and Transducers. See Also Chapter 8f Instrumentation)

### 8.0112, COOK INLET ESCAPEMENT ENUMERATION STUDY

A.S. DAVIS, State Dept. of Fish & Game, Juneau, Alaska

Because of the silty or glacial conditions of the major sockeye salmon systems in Cook Inlet, it is necessary to obtain escapement information by other means than counting towers, aerial or foot surveys, or other visual methods.

Bendix Pacific Corporation with the financial assistance of the State of Alaska, has developed a sonar counter which will enumerate passing fish. The experimental model of the unit was tested by the corporation on the Kvichak River in the summer of 1965. Escapement estimates of red salmon by the machine matched the visual estimates in the same time period with a 3.1 percent error. The experimental sonar unit, which is the property of the State of Alaska will be utilized for escapement enumeration in 1966. A second unit will be purchased so that both the Kenai and Kasilof River escapements can be estimated.

During the first of June, a two-man crew will investigate possible sonar sites on the Kasilof River. with the sonar unit should have a steep, sloping bank directly in front of the transducers which levels off and slopes gently to the stream bank. Migrating salmon generally will pass close to the steep bank directly in front of the transducers, when the bottom contour is as mentioned above. A sonar site on the Kenai River was located during 1965. The sonar unit will be installed on the Kenai River June 1, and on the Kasilof River as soon as a suitable site can be located.

Each of these installations will be operated by one temporary employee. The assistant project leader and a third temporary employee will sample upstream migrants in the immediate area of the sonar counter. Sampling will be conducted on each stream every other day. Lengths and scale samples will be taken to establish life characteristics of the sockeye salmon runs. Sonar counting and sampling of the adults will cease August 15 or as close to that date as the escapement dwindles.

Part 1 of 3. Part 1 of 3.

Alaska State Government

### 8.0113, KING CRAB SAMPLING GEAR STUDY

G.C. POWELL, State Dept. of Fish & Game, Juneau, Alaska

The foremost objective of this phase of a long range study of the reproduction of king crab in the Kodiak Island area is to organize a sound program for sampling king crabs on the continental shelf. Assessing the capabilities of various types of capture gear is important to guarantee adequate sampling methods. Each of the various types of capture gear, e. g. tangle nets, pots, trawls, SCUBA diving, etc., will be investigated for their efficiency as sampling gear for all segments of the crab population in various environmental areas. The experimental fishing will be largely conducted from charter vessels using experienced fishermen as fishing crews.

Commencement of the actual determination of the offshore and inshore king crab spawning grounds off the east side of Kodiak Island will also be conducted utilizing the capture gear shown to be the most effective in capturing breeding crabs.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.  
Alaska State Government

### 8.0114, GEAR EVALUATION

J.R. HOLLOWAY, Amer. Samoa Dept. of Agric., Pago Pago - Tutuila, American Samoa

Objectives - Test various types of standard fishing gear such as handlines, fish traps, seines, etc. to determine their efficiency in American Samoa waters and what modifications if any are necessary.

Procedures - Test various standard gear aboard small sampan, evaluating by total catch and catch per unit effort. Record types of gear used, how manufactured and results of modifications. Pertinent data collected in Phase II will be applied in all evaluations.

Work Schedule - Initial period approximately February 1, 1967 to June 30, 1967 Phase to be extended for at least 1 year to properly evaluate effects of seasonal and areal variations of species and oceanographic conditions.

Location of Work: Major Islands of American Samoa

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.  
American Samoa Government

### 8.0115, TESTING AND EVALUATION OF HIGH-RESOLUTION ACOUSTIC SUBBOTTOM PROFILER THROUGH MODIFICATION OF OFF-THE-SHELF COMPONENT

H.D. HESS, U.S. Dept. of Interior, Marine Min. Technol. Ctr., Belvedere - Tiburon, California 94920

During FY 68, a suite of instruments and modular components for bottom and subbottom acoustic profiling were acquired and initial modifications made to develop an advanced-design, high-resolution acoustic subbottom profiling system applicable to detailed delineation of shallow water, heavy metal, placer type deposits. A new improved hydro-phone array has been designed and the electronic circuitry assembled. An ad-

## 8. ENGINEERING AND TECHNOLOGY

vanced programmable subbottom profiling amplifier has been designed and fabricated to provide for programmable time-gain control, automatic gain control, and variable gain control for increased range, accuracy, and broader operating capability.

The acoustic subbottom profiling system has now undergone the initial phase of conversion to a high-resolution acoustic subbottom profiler required for detailed characterization of shallow water placer deposits. Additional modifications will now be made to perfect the universal electronic amplifier with programmable gain and time circuits to drive the seismic records; also to the hydrophone arrays and sound sources. The outlook is for greater sensitivity, faster towing speeds, and higher quality records.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 8.0116, TESTING AND EVALUATION OF MAGNETOMETER/GRADIOMETER AND TOW VEHICLE SYSTEM

H.D. HESS, U.S. Dept. of Interior, Marine Min. Technol. Ctr., Belvedere - Tiburon, California 94920

This project involves field testing, evaluation and modifications of the Bureau owned magnetometer/gradiometer and specially designed underwater tow vehicle which was designed and fabricated during latter FY 68. The principle of the marine gradiometer system in operation involves towing of the sensor system and continuously recording the difference in the magnetic field intensity measured at the two rubidium magnetometer sensors which are separated a known distance in the towing vehicle.

Possible use of the system in the magnetometer configuration, with one of the sensors acting as a mobile magnetometer and the other as a base station transmitting the time variations in the earth's magnetic field to the mobile station by radio, will also be investigated.

Although present emphasis will be on heavy mineral placer deposits, possible application to heavy mineral lode deposits will not be overlooked. Other mineral deposits which may be associated with magnetic minerals will also be considered.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 8.0117, MOVABLE OCEAN MEASUREMENT SYSTEM

D.M. BUCK, General Motors Corporation, Goleta, California 93017 (NONR)

A special hydrophone array with associated electronics will be constructed and mounted on the Perpendicular Ocean Platform (PO). The system will be tested at the Santa Cruz Acoustic Range Facility (SCARF). In addition, a study will be made to determine the optimum spectrum analyzer configuration to be used with the system. A development breadboard model will be constructed based on the results of this study.

APPROACH: Collect geophysical and sub-bottom acoustic profiles;

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0118, ARCTIC SEISMIC TRANSDUCER EVALUATION

C.R. GREENE, General Motors Corporation, Goleta, California 93017 (NONR)

The U.S. Army Electronics Command has developed efficient seismic transducers which are used for various tasks where it is desirable to transmit signals using the ground as the conducting medium. The contractor will evaluate the effectiveness of these same transducers in transmitting, through Arctic ice, an acoustic signal to the ocean.

An efficient seismic transducer, capable of transmitting acoustic signals through an ice barrier to the sea water, would have Naval relevance in the areas of under-ice communications and navigation.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0119, TUNA PURSE SEINE NET

R.E. GREEN, U.S. Dept. of Interior, Fishery Oceanography Ctr., La Jolla, California

The objective of this project is to introduce to the fishery a more efficient type of gear than that which is currently in use. A

new design of fast-sinking tuna purse seine net, has been developed and is now being constructed. The net will be completed by the end of 1968 and during the subsequent years, operational experiments will be made with it at sea. If the tests on chartered commercial fishing vessels are successful, the net will subsequently be loaned to non-chartered tuna seiners for further tests and demonstration and acceptance by the existing fleet as an improvement over existing gear.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 8.0120, CONSTRUCTION SYSTEMS

UNKNOWN, U.S. Navy, Civil Engineering Lab., Port Hueneme - Point Mugu, California

Objective: Develop the technological data required for the selection of specialized work equipment and tools to perform construction operations on the sea floor. Present construction in the ocean has been largely restricted to relatively shallow depths (200 ft) with most of the work being done from the surface by lowering prefabricated components. There are limitations to this method due to the effects of surface environment on movement of the platform and due to the constraints imposed by current cable technology and weight handling devices. Under this task studies and experimental effort will be undertaken to identify the problems associated with ocean construction due to the above constraints and to investigate the feasibility of using subsurface and bottom construction systems such as a submarine work boat or a bottom crawler.

Work undertaken in this area will be used for support of advanced development in construction equipment and techniques.

Approach: Identify and analyze the construction functions required to develop a construction capability. Some of the major functions to be studied are weight handling, assembling methods and excavation and trenching. Having identified the restraints, the most optimum methods for performing these functions will then be formulated and analyzed. From this analysis candidate systems for performing the construction functions will be designed and evaluated to determine what further development is required.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0121, PRECISION QUARTZ CAPACITANCE PRESSURE TRANSDUCERS

N.L. BROWN, Bissett Berman Corporation, San Diego, California

The transducer being developed under this program is intended for numerous oceanographic applications where extremely high accuracy and sensitivity is required. This transducer takes advantage of the excellent elastic properties of quartz in conjunction with a technique for measuring capacitance which is extremely accurate and sensitive. This combination eliminates most of the sources of error common to other types of pressure transducers.

The transducer is in the form of two coaxial cylindrical elements fabricated in clear fused quartz. The diameter of the outer element is reduced slightly under the effect of pressure and the small deflection is detected by platinum electrodes deposited on the inside diameter of the outer piece and the outside diameter of the inner piece. The transducer capacitance is typically 75 picofarads at zero pressure and increases to 90 picofarads at rated pressure. This capacitance change can be utilized electronically in several ways which permit either a linear frequency change with pressure or a linear digital output. Existing prototypes exhibit accuracies of plus or minus .3 percent when utilized in oceanographic instruments and an accuracy of plus or minus .01 percent under laboratory conditions.

SUPPORTED BY Bissett Berman Corporation

### 8.0122, DEEP-SEA AUTONOMOUS VEHICLES, INSTRUMENTS, BASIC CONTROL DEVICES, AND SPECIAL COLLECTING GEAR

J.D. ISAACS, Univ. of California, Scripps Inst. of Oceanography, San Diego - La Jolla, California 92038

## 8. ENGINEERING AND TECHNOLOGY

This grant will provide for the continuation of work performed under NSF Grant GP-3349, The development and testing of deepsea autonomous vehicles, associated instruments, basic control devices, and special collecting gear. These together constitute a further development of this relatively new approach to the gathering of oceanographic data and specimens.

The autonomous or free vehicle is a versatile carrier that transports the instruments to depth and returns them to the surface for recovery. The control devices program the vehicle and control the instruments causing them to perform their required functions. Specific instruments that have been so far developed under this program include a bottom fish trap, current meter, vertical and sampling parachute net. Also, control, release and flotation devices have been developed. The following instruments are proposed for research and development: an instrument to measure the basic mechanical (engineering) properties of deep-sea sediments, a bottom camera, bottom detrital gauge, gas collector, event recorder (a device that waits for long periods to record a rare event), gentle corer, large water sampler, and deep life support fish trap. The program of development works closely with investigators in the various fields. Thus, the instruments are simultaneously developed, tested and used in the acquisition of meaningful data. Two recent cruises collected 17 near-bottom current measurements in 2,200 to 4,000 meters in three different periods for up to 3 days, and made 14 fish-trap drops.

SUPPORTED BY U.S. National Science Foundation

### 8.0123, DIGITAL OUTPUT SURVEY DEPTH SOUNDING

*E.C. BUTT, Raytheon Company, South San Francisco, California*

**Technical Description:** The purpose of this project is to develop a high precision survey depth sounder with a range of 2 to 250 feet and 2 to 250 fathoms with necessary signal processing so that the depth soundings can be read out in digital form as well as recorded on a conventional electro-sensitive paper. Logic circuitry is provided to give four bit parallel 1-2-4-8 BCD code output for recording on magnetic tape or feeding directly into a computer.

The equipment is designed in splash proof cast casings and suitable transducers are provided either for mounting in a small sounding launch or on a large survey type vessel.

The system is suitable for interfacing with such position finding systems as Decca Hi-Fix and Cubic Corporation Autotape.

SUPPORTED BY Raytheon Company

### 8.0124, OIL - WATER SEPARATOR

*UNKNOWN, Cuno Engineering Corporation, Meriden, Connecticut 06453*

**PURPOSE:** To develop an effective shipboard oil-water separation system as a means to prevent pollution of the seas by oil discharged with ballast water.

**DESCRIPTION:** A land-based pilot system has been built and tested at the contractor's seawater test laboratory. Results to date have been successful, but only at a significantly reduced throughput. The filters have since been further modified to increase separation efficiency at higher flow rates and additional tests will be conducted.

Further investigations and tests have examined effects of oil concentrations, oil viscosity, flow rates, differential pressure, temperature, and filter cleaning speed. It has been found that oil concentration, mixture, flow rate and differential pressure across the filters are the major considerations in the separator development. Tests are continuing to provide data for design of a practical shipboard separator.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0125, SELF-REGULATING STEAM GENERATOR

*UNKNOWN, Combustion Engineering Inc., Windsor, Connecticut*

**PURPOSE:** To develop an automatic Self-Regulating Marine Steam Generator having improved boiler control and performance characteristics and reduced complexity.

**DESCRIPTION:** The unit is an inherently self-regulating steam generator system with a series turbine mounted between the boiler drum and superheater providing combustion control based on steam demand. The boiler response time to meet changes in steam demand has been reduced by use of welded water-walls and minimization of heat absorbing boiler brickwork. The unit has feedwater control integrated as part of the self-regulating steam generation process and will provide complete automatic response to single lever propulsion control. It has capacity for a 20,000 SHP turbine propulsion ship. The unit is fully erected at NAVSEC, Philadelphia, and is undergoing a series of preliminary tests to determine operating characteristics.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0126, BIO-ACOUSTIC AND BIOLOGICAL SAMPLING GEAR STUDIES

*W.I. ARON, Smithsonian Institution, Washington, District of Columbia 20560*

This task covers the laboratory analysis of sixty collections taken with the Hardy Continuous Recorder, the International Indian Ocean Expedition plankton net and the International Cooperative Investigations of the Tropical Atlantic (ICITA) plankton nets. These samples were taken in the Indian Ocean during the round-the-world voyage of the USC&GSS Oceanographer. The catch data from the different samplers will be compared and related to acoustical data obtained from the ships EDO-PDR system and narrow-beam transducer sonar.

The volume reverberation of underwater sound in the oceans, caused by marine organisms, is of concern in marine operations. This study will provide new information on the sampling gear used to catch the organisms and will relate research equipment performance to the catches. Ultimately, this information is required for mapping or predicting areas of the oceans in terms of volume reverberation.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0127, STANDARDS FOR AUDIOMETRY

*P.G. WEISSLER, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia*

Maintenance and improvement of Sound Laboratory facilities for the calibration of audiometric devices, such as earphones, bone vibrators, artificial ears and artificial headbones. Measurement of stability, distortion, and sound attenuation properties of circumaural earphones, accuracy of commercially available audiometer calibrators, and properties of artificial ears proposed as standards. Establishment of a cheap, accurate and fast audiometric earphone calibration service. For new types of audiometric equipment, investigations of their properties and development of calibration procedures. Determination of the mechanical driving-point impedance and sensitivity of artificial headbones proposed as standard devices for storing bone-conduction threshold data and for calibrating audiometric bone-conduction receivers. Participation in the work of USASI, IEC and ISO.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0128, ENVIRONMENTAL TEST AND EVALUATION

*J.G. LARSON, U.S. Navy, Research Laboratory, Washington, District of Columbia*

**Objective:** 1. To perform acoustical and electrical tests, using pulse techniques, on transducer models. 2. To measure acoustic and electrical properties of transducers under hydrostatic pressure. 3. To determine the acoustic properties of acoustic linings for use in acoustic tank. 4. To determine effects on transducer materials under loaded and unloaded conditions.

**Approach:** The basic approach for all test work is to outline the program, provide necessary equipment, coordinate and perform the tests, and prepare and submit the required reports. The approach in providing facilities is to study and survey needs and requirements, formulate basic designs and specifications, initiate and coordinate design actions and construction and/or procurement.

SUPPORTED BY U.S. Dept. of Defense - Navy

## 8. ENGINEERING AND TECHNOLOGY

### 8.0129, DESIGN AND DEVELOPMENT OF NEKTON SAMPLER

J.F. HEBARD, U.S. Dept. of Interior, Trop. Atlantic Biolog. Lab., Miami, Florida

Objectives: To design optimum gear for sampling tuna forage nekton capable of: (a) capturing and retaining the desired components of the nekton community, (b) sensing environmental variables at the time of sampling, and 'reporting' to the observer certain data relating to the behavior of the device itself (e.g., speed through the water, changes in sampling depth, amount of water strained, etc.)

Through consultation with hydrodynamics design engineers, new approaches to nekton sampling equipment will be sought. If feasibility studies develop a promising design, a prototype will be constructed and tested under controlled and field conditions. Construction and further use of 'production models' will depend upon the outcome of the latter trials.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 8.0130, CHEMICAL EXPLOSIONS, PACKAGING AND HANDLING AT SEA

D.W. KOS, IIT Research Institute, Chicago, Illinois (DA49-083-05A-3198)

Technical Objective: To develop containers and techniques for detonation of underwater chemical explosions in the size range from 10-1000 tons. Provision to be made for controlled sink rate and capability to detonate to depths of 4000 feet.

Approach: Design modular containers in three size ranges; 10-40 tons; 50-200 tons; and 250-1000 tons. Conduct theoretical and laboratory studies to determine optimum explosive for use with containers considering cost, safety, ease of handling and minimum legal constraints, and compatibility with container material. Construct prototype containers and sea test including detonation.

Progress: Container design completed. Steel shell with diaphragm to allow for compressibility and buoyancy chambers with calibrated flooding to provide pre-determined sink rate. Pressure fused for detonation up to 4000 feet. Instrumented for explosion time and depth. Aluminized ammonium nitrate slurry selected as explosive. Two 10-ton prototypes successfully tested off California coast in February 1968. A 250-ton container built, sea tested, and detonated in deep water off Aleutians on 5 September 1968. The 250-ton container was 20 feet in diameter and 50 feet long, with a hemispherical nose and a skirted stern. It had forward and aft buoyancy chambers and a 5,000 cubic foot explosive chamber. Three 30-foot pontoons were located at equal distances around the body for towing stability with the bottom pontoon flooded for ballast. The explosive chamber contained 250 tons of a slurry which produced a seismic output equivalent to the underwater detonation of about 340 tons of TNT. Associated instrumentation obtained detonation time and depth and provided redundant systems for increased reliability of detonation.

SUPPORTED BY U.S. Dept. of Defense - A.R.P.A.

### 8.0131, INVESTIGATION OF METHODS TO REDUCE SUCTION AND DISCHARGE LOSSES OF A PERIPHERAL COMPRESSOR

F.D. DUFF, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

Information concerning the improvement of performance of peripheral compressors is very inadequate. The objectives of this study are as follows: (1) to evaluate certain methods of suction and discharge loss reduction in peripheral pumps; (2) to determine the streamline pattern from measurable machine parameters and; (3) to determine the effectiveness of the stripper section in controlling high pressure carry-over flow and its effect on the through-flow rate at high Mach numbers.

Losses in the inlet and exit sections are a significant portion of the overall compressor inefficiency and can be reduced by proper design of these openings to conform to the machine streamline pattern and thus offering resistance to the flow.

The loss-reduction methods are evaluated and found to increase maximum efficiency by as much as 6 per cent. Streamline directions can be calculated from specific machine variables and

conform closely with those observed. The stripper section becomes less effective at higher Mach numbers and as much as 14 per cent of the through-flow is lost through flow carry over.

SUPPORTED BY Massachusetts Institute of Technology

### 8.0132, A DESIGN PROGRAM FOR SUPERCONDUCTING ELECTRICAL MACHINES

D. GREENEISEN, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

This paper presents a procedure for the design of superconducting electrical machines. The magnetostatic field problem of a cylindrical superconducting machine is solved. Equations for the magnetic fields are developed, and from these, expressions for the various machine parameters are obtained. These expressions are adapted to a computer solution of the design problem. The computer program obtains the design parameters for a minimum volume machine design.

A design study for a typical marine electrical propulsion system is conducted. The results of this study indicate quantitatively the reduction in weight and space to be obtained in using superconducting electrical machines vice conventional electrical machinery. The study also presents some general characteristics of superconducting machines.

SUPPORTED BY Massachusetts Institute of Technology

### 8.0133, TRAWL DESIGN, MATERIALS AND METHODS

R.A. BRUCE, U.S. Dept. of Interior, Exptl. Fish & Gear Res. Base, Gloucester, Massachusetts 01930

The primary purpose of this project is the development, testing and introduction to industry of new and improved trawling equipment. In the past, industry has been aided in its investigation and trials of different types of trawl gear both by Base instigation and by industry-State-Federal cooperative activities under FL 88-309. Current development activities now emphasize improving the wing spread and headrope height for existing nets as well as developing, testing and introducing an improved type of bottom trawl net.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 8.0134, PELAGIC TRAWL

M.G. CORBETT, U.S. Dept. of Interior, Exptl. Fish & Gear Res. Base, Gloucester, Massachusetts 01930

Research and development is to be continued to design a trawl system capable of capturing fish at any desired depth independent of vessel speed and warp length/depth ratio. Efforts are to be directed toward mechanical control of trawl door attitude to effect depth changes and the development of an efficient high lift/drag ratio trawl door.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 8.0135, MECHANIZATION OF TRAWL GEAR

M.G. CORBETT, U.S. Dept. of Interior, Exptl. Fish & Gear Res. Base, Gloucester, Massachusetts 01930

Concurrent industry-Bureau interest in mechanization of trawling gear is implemented by activities programmed under this project. Basic objectives are improvement to the safety, economy and efficiency of existing older trawl vessels. The immediate objective of current activity is the development of a device to automatically couple and uncouple the trawl doors from the towing warps during the setout and haulback sequences of the trawl operation.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 8.0136, GREAT LAKES GEAR RESEARCH

J. ELLIS, U.S. Dept. of Interior, Exptl. Fish & Gear Res. Base, Ann Arbor, Michigan

The Region 4 Exploratory Fishing Base is responsible for the development of efficient and effective commercial fishing and research fishing techniques through virtually all of the freshwater commercial fish producing areas in the U.S. The fishing industry

## 8. ENGINEERING AND TECHNOLOGY

in this region is with few exceptions in an extremely depressed condition. A primary cause of this condition is the inadequacy of traditional fishing methods and equipment for meeting the present day situation from both resource and economic standpoints. Not only has the abundance of traditional commercial species changed markedly in most waters, but new outlets for low value species have been developing at a rapid pace in recent years. The paradox of having more fish than ever available for commercial use and an ailing fishing industry is explainable only the failure of the industry to progress technologically relative to the development and use of equipment, instruments, materials, and systems that are necessary to keep abreast of changes in fish populations and in potential uses of fish.

Objectives of the Great Lakes Gear Research Program are to improve fishing techniques, to develop more efficient harvesting devices, and to demonstrate the application of appropriate methods for meeting unique production conditions, often in waters supporting important sport fishing activities.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 8.0137, UNDERWATER ACOUSTIC HOLOGRAPHIC DISPLAY

R.K. MUELLER, Bendix Corporation, Southfield, Michigan (N00014-68-C-0338)

Objective: The Navy's interest in target classification, underwater object location, and the extension of underwater vision beyond the limits of range permitted by conventional light optics provides the incentive for this research. The application of lensless imaging (Holographic techniques) will be investigated using acoustic energy as the illuminant.

Approach: An investigation will be conducted in multiple element receiver arrays, multiplexing of signals electronically, and unique transduction techniques. Experimental hardware will be designed and constructed from which underwater acoustic holographic images will be obtained using photographic methods and a multi-element array.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0138, DEVELOPMENT OF UNDER-ICE HORIZONTAL SONAR SCANNING EQUIPMENT AND TECHNIQUES FOR LOCATING FISH SCHOOLS

C.R. BURROWS, State Dept. of Conserv., Saint Paul, Minnesota 55101

Objectives: 1. to adapt existing horizontal scanning sonar apparatus to under-the-ice commercial seining operations on inland lakes. 2. To demonstrate the gear and techniques to the local commercial roughfish seiners and promote its adoption in the industry.

Procedures: 1. Selection and acquisition of horizontal scanning sonar apparatus from among those currently offered to the industry by three different manufacturers. 2. Install this equipment on a sled or other snow vehicle for transportation to locations where fishing operations are being conducted. 3. Learn to interpret visual presentation of the equipment in terms of quantities of fish and species composition of the schools. This will be accomplished by scanning commercial haul areas before seine hauls are made, and comparing the actual catch of the seine with the prediction made from the equipment. 4. If and when results can be predicted with a high degree of reliability, a promotional program will be undertaken to establish this equipment in the industry. It will be demonstrated to all of the commercial seiners who may be in a financial position to afford this kind of refinement. It is expected that the first summer will be involved with the selection, acquisition and adaptation of the gear. The first winter will be involved with learning to use it and interpret the read-out. Further experimentation with gear and methods and promotional or extension work should occupy the second winter.

### 8.0139, DEPTH CONTROLLED STREAMER DEVELOPMENT

R.A. BRODING, Seismograph Service Corp., Tulsa, Oklahoma

NO SUMMARY HAS BEEN PROVIDED TO THE SCIENCE INFORMATION EXCHANGE

SUPPORTED BY Seismograph Service Corporation

### 8.0140, DEEP-SEA CORE MAGNETOMETER AND A CORE ORIENTATION SYSTEM

D.F. HEINRICHS, Oregon State University, Graduate School, Corvallis, Oregon 97331

A device will be obtained for determining the orientation of ocean sediment cores and a sensitive spinner magnetometer procured to study direction of remanent magnetization of core material. The equipment will be assembled from commercially available parts.

SUPPORTED BY U.S. National Science Foundation

### 8.0141, DEEP SEA PHOTOGRAPHIC SYSTEM AND A BOX CORER

L.D. KLUM, Oregon State University, Graduate School, Corvallis, Oregon 97331

Support is provided to construct a box corer and to purchase a stereo camera. The camera assembly and box corer may be used as separate systems or combined into a single camera corer. A mutual need for the gear has arisen among the marine geologists and the benthic ecologists at Oregon State University, Department of Oceanography. This equipment would augment and broaden the scope of present research programs.

SUPPORTED BY U.S. National Science Foundation

### 8.0142, MANAGEMENT OF THE OCEAN SALMON FISHERY WITH EMPHASIS ON THE BARBLESS HOOKS AS A MANAGEMENT TOOL

R. LOEFFEL, State Fish Commission, Portland, Oregon 97201

The hook and line (troll) fishery for chinook and coho salmon in the ocean uses gear that will catch salmon that for reasons of size limit and season cannot be kept. However, the effects of hooking results in mortalities to fish number into the hundreds of thousands annually. Part of this mortality is due to damage done when the barbed hook employed is removed from the fish. Such loss could be avoided if a 'barbless' hook were used. The objective of the program is to measure the difference in survival of fish released from each kind of gear and to obtain information on the efficiency of barbless hooks for catching legal-sized salmon. Further information on salmon origin and migration will also be obtained. The work will be done along the north Oregon coast. Barbless and barbed hooks will be fished in paired fashion. Data on hook efficiency will be collected immediately. Survival information will be gleaned from the returns of tagged fish. Field work will commence in April 1967 and continue through June 1967. A second year of field work is anticipated. Project conclusion will be in 1970.

Oregon State Government

### 8.0143, PRELIMINARY TESTING OF PELAGIC TRAWLS ON SMALL DRAGGERS

R.W. BURTON, State Dept. of Nat. Resources, Providence, Rhode Island

Initial testing of available trawls is necessary to determine the type of trawl best suited for small draggers and to learn the most efficient and effective methods of handling the gear. It is also more economical to eliminate one trawl appearing less efficient or more difficult to handle, concentrating on two appearing to be best. 1. A 220 HP vessel will test: the Boris trawl (British), Herman Engel trawl (German), and a Cobb trawl (American). 2. A 350 HP vessel will test: the Boris trawl, Herman Engle trawl, and the Cobb trawl. 3. Operating characteristics will be measured and recorded, including (but not limited to) the following: a. Opening at mouth of trawl: height and width, determined by transducers on headrope and trawl doors. b. Speed of towing (constant tide or current) during given rpm over a measured course. c. Characteristics of handling, operating gear, including ease and accuracy of depth adjustment.

Part 1 of 2.

Rhode Island State Government

### 8.0144, OPERATIONAL TESTING OF THE PELAGIC TRAWLS ON SMALL DRAGGERS

R.W. BURTON, State Dept. of Nat. Resources, Providence, Rhode Island

Detailed testing of the two best trawls, determined during Sub-Project 1 will be conducted to determine efficiency and feasibility of each for small dragged trawl performance, ease of handling and other characteristics will be recorded and evaluated. 1. Two 220 HP vessels will be used to fish the same grounds, exchanging trawls to minimize effect of vessel and personal ability of captain and crew. (a) Operating characteristics will be measured and recorded, including (but not limited to) the following: (1) Opening at mouth of trawl: height and width, determined by use of transducers on headrope and trawl doors. (2) Speed of towing (at constant tide or current) during given rpm over measured course. (3) Characteristics of handling, operating gear, including ease and accuracy of depth adjustment. (4) Catch characteristics of each trawl: a. total catch per unit of effort (time). b. Composition and value of total daily catch. c. Comparison of pelagic trawl catch with conventional otter trawl fishing in same area, including total weight, composition and value of catch, comparison of effort (dragging time, net size, horsepower, etc.). 2. Two 350 HP vessels will be used to fish the same grounds, exchanging trawls to minimize effect of vessel and personal ability of captain and crew. Same as in 1 above.

### 8.0145, LOW NOISE MULTI-CHANNEL HYDROPHONE CABLE

C. BEKGLUND, Teledyne Incorporated, Houston, Texas 77036

Design, construct and test a radical innovation in hydrophone cable construction for towing astern of a seismic profiling ship. In addition to depth and tension control, the low-noise specification requires physical isolation of the hydrophones from the major stress members of the cable. A 24-channel objective is specified with cable lengths exceeding 7500 feet.

SUPPORTED BY Teledyne Exploration Company

### 8.0146, LOOK-OUT ASSIST DEVICE

UNKNOWN, Sperry Rand Corporation, Charlottesville, Virginia

Purpose: To develop a Look-Out Assist Device which automatically and effectively warns the bridge watch of traffic hazards at night and in fog.

Description: Prototype equipment to provide 'see', 'hear', and 'talk' capability that will indicate proximity of other ships in poor visibility is being developed. The techniques used embody simple low cost radar that can see objects passing through two range rings, each one mile deep, gives an alarm and indicates the approximate bearing of such objects; a sensitive microphone array to hear sounds of whistles, bells, fog horns, etc., and indicate their bearing; and a system that records the sounds for playback identification, and will alert the conning officer of targets by a series of prerecorded announced statements, such as 'Mr. Mate, you have an object off your port bow'.

The composite device is being evaluated on the Great Lakes ship SS WILLIAM GREENE of the Cleveland-Cliffs Iron Company. It is anticipated that detection from this device will provide more reliable and accurate information to the navigation officer than can now be obtained by visual means.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0147, AN INVESTIGATION OF THE EQUIVALENT FIXED INTENSITY OF FLASHING LIGHT STIMULI

J.T. MONTONYE, Univ. of Virginia, Graduate School, Charlottesville, Virginia 22903

This work seeks measurement of the equivalent fixed intensities of incandescent flashing lights of various flash duration. Haploscopic cotermination brightness matching and/or magnitude estimation techniques will be used. With the former technique, a succession of reference flash lengths may be necessary at each supra-threshold level until a steady source is approximated.

The Coast Guard is primarily interested in a quantitative determination of the equivalent fixed intensities of flashing lights as a function of their intensity time distribution for each of the following observer conditions: When the equivalent fixed light illumination at the observer is 0.2, 2 or 20 microlux, then the Background Brightness is 0.1, 1.5, or 31 nits respectively. From this information, the validity of the Blondel-Rey absolute threshold relation for use at these levels will be studied.

The Coast Guard is secondarily interested in a quantitative determination of the supra-threshold advantages to be gained through the use of signal light flash lengths in the Broca-Sulzer region. Thirdly, it is interested in the variation of the equivalent fixed intensity of a signal light as a function of the supra-threshold level at which it is observed.

SUPPORTED BY U.S. Dept. of Transportation - Coast Guard

### 8.0148, TAG DETECTION

E.D. JEWELL, State Dept. of Fisheries, Olympia, Washington

Project staff will acquire tag detection equipment, using the same to detect tags in the Puget Sound coho fishery where fish with previously applied color coded, magnetic wire tags will be caught and landed. These field tests will reveal a range of short comings of the equipment as now constructed, as relates to the variety of conditions under which it will need to operate in order to be most useful in furthering fisheries research and management objectives. Equipment will undergo continual and necessary adjustments and adaptations of technique as experience in its use may direct. Several detectors and spares will be available for use at one time, to provide broadest coverage during the limited season when tagged fish will be present in the fishery for testing. Tests will be centered chiefly on coho in the Hood Canal and Admiralty Inlet areas, where tagged fish will occur in greatest density by reason of proximity to their home streams. Tests will cover the commercial coho fishery, as well as sports caught coho, and finally home streams of release at spawning time. The period for coverage of the commercial net catch will be restricted to the September-November fishing season as prescribed by law. The sports catch will be examined through the period when significant numbers of coho occur in this fishery. Stream coverage will extend from November through December.

Support vessels required for contacting the fishing fleet on the grounds will be supplied by the Department of Fisheries.

### 8.0149, TAG EXTRACTION

E.D. JEWELL, State Dept. of Fisheries, Olympia, Washington

Under this phase effort will be directed toward: (1) removal of portions of the head of coho salmon, detected as having been tagged, and the final removal and identification of the tag, (2) develop a tool and associated techniques for removing head portions with a minimum but acceptable level of damage to either the market value of the fish, or its trophy value if sports caught.

Further work under this phase will involve personnel training in the complete extraction, identification and recording of tags recovered. These procedures are presently in their infancy and will require considerable refinement as part of the total program of coded wire tag development, directed toward a full realization of the potential of the device. The laboratory site utilized for tag recovery work will be selected later. In addition to tag removal and identification, coming from Sub-project 1, prior training of tag removal personnel (June-August) will occur with the use of fish collected during 1965, and now in frozen storage at the Department's Minter Creek Hatchery. Prior training on stored fish, under the supervision of the project leader, will expedite tag removal during the season when fresh fish and fresh tissue will ar-

## 8. ENGINEERING AND TECHNOLOGY

rive, allowing also for concentrated efforts by other personnel on problems of field detection.

### 8.0150, UPGRADING CONVENTIONAL FISHING TECHNIQUES

*D.L. ALVERSON*, U.S. Dept. of Interior, Exptl. Fish & Gear Res. Base, *Seattle, Washington* 98102

A study of conventional methods of capturing marine animals is being conducted in an effort to apply the benefits of modern industrial technology to the commercial fishing industry of the Pacific Northwest.

Principal experiments include the application of electronics, instrumentation, telemetry, hydraulics, echo ranging, echo sounding, streamlining techniques, more efficient deck layout, modern shipboard machinery, improved geometry of fish nets, better ratio of horsepower to gear size, safety, and synthetic materials.

Initial experiments are concerned with determining the effectiveness of midwater trawling and its possible application in the commercial fisheries. As part of the midwater trawling investigations, experiments are also conducted utilizing electrical towing cables and remote instrumentation such as depth and temperature telemetry, catch indicators, bottom contact indicators, load indicators, underwater lighting, high frequency echo sounding, electrical shocking gear and remote actuation devices.

Improvements in the geometric configuration and general performance of midwater trawls are attempted through the use of sea sled mounted scuba divers who observe the gear in action and made recommendations for design changes. Current investigations involve use of internal fykes, intermediate and cod end liners, maximum efficiency of webbing, incremental hang-in techniques for better load distribution, and determination of minimal speed requirements.

Work schedules in the near future include: automation of trolling vessels, near bottom trawling over rough round, and deep-water demersal fish traps.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 8.0151, DEVELOPMENT OF NEW FISHING TECHNIQUES

*D.L. ALVERSON*, U.S. Dept. of Interior, Exptl. Fish & Gear Res. Base, *Seattle, Washington* 98102

Utilizing modern methods of underwater observations such as SCUBA, television, still and motion photography, and electronic and acoustic telemetry, information is collected on the behavior of fishes, performance characteristics of fishing gear, effect of bottom topography on active fishing gears, and other factors influencing the capture of marine animals.

Data is collected on the physical factors involved in the various parameters of fishing gear performance such as load shock, shear, stress, vibration, speed, drag and pressure.

Experiments are conducted utilizing light, sound, electricity and chemicals to determine their effectiveness in facilitating the capture of marine animals.

Information thus gained is used in the design, construction, test, and evaluation of experimental devices and methods which might be used by commercial fishermen to capture marine animals.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 8.0152, OCEAN ENGINEERING

*R.L. MCNEELY*, U.S. Dept. of Interior, Exptl. Fish & Gear Res. Base, *Seattle, Washington* 98102

The objective of this program is to upgrade commercial fishing techniques by incorporating modern engineering technology into new gear designs and methods.

Experiments will be conducted with a special polyurethane coating for nylon netting to reduce chafing during fishing operations.

Improvements will be made to an electrical depth telemetry system. A digital readout to improve accuracy and improved underwater connectors to improve reliability will be tested.

Electronic devices to monitor vertical and horizontal mouth opening and strains that develop in the trawl during fishing operations will be tested. Nylon rope with stretchable electrical conductors will be used to monitor devices placed on the trawl.

An electrical shocking system for improving the catching efficiency of trawls is being examined.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 8.0153, FISHING GEAR RESEARCH AND DEVELOPMENT

*R.L. MCNEELY*, U.S. Dept. of Interior, Exptl. Fish & Gear Res. Base, *Seattle, Washington* 98102

The objective of this program is to upgrade commercial fishing techniques by improving existing fishing methods and developing new gear designs.

Seminar for fishermen will be scheduled. New gear, construction techniques and handling methods will be presented and discussed. This will be supplemented with still and motion picture photography of operational fishing gear.

Tests and modification to the Universal trawl will be continued. The objective is to design a commercially acceptable trawl that can be fished at any level in the water column.

Design and construction of a trawl net to incorporate a third towing warp operated from the trawl net reel will be completed. Sea trials are scheduled for late FY 1969.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 8.0154, UNDERWATER CAMERA SYSTEM

*L.C. BENNETT*, Univ. of Washington, Graduate School, *Seattle, Washington* 98122

The purpose of the purchase of an underwater camera system is to replace a system lost during a recent oceanographic cruise. This camera system will permit the continuation of investigations in the Northeast Pacific Ocean and regional inshore waters, and will provide invaluable photographs of bottom sediments and structures to supplement data obtained by other geological and geophysical methods.

## 8H. POWER SYSTEMS

(boilers, Nuclear Power Sources, Fuel Cells)

### 8.0155, INVESTIGATION OF NUCLEAR THERMIONIC POWER FOR MARINE APPLICATIONS

*J.E. GINGRICH*, General Electric Company, *Pleasanton, California*

This project is investigating the application of nuclear thermionic power to the marine environment.

The utilization of nuclear reactors which can generate electricity directly is of interest to marine systems because of several attractive features; namely, compactness, long life, silence, reliability, etc. Major research programs are currently underway in this country and abroad to develop components for thermionic reactors which are intended primarily for space applications. While much of this technology is directly applicable to marine systems, there are also major differences that must be considered. This project is utilizing the results from other thermionic reactor R & D Programs and applying it to systems for the marine environment. The work is being accomplished primarily through the formulation of preliminary designs for thermionic reactors suitable for undersea power uses.

This work began in 1961 and will be continued indefinitely in pace with other thermionic power development programs.

SUPPORTED BY General Electric Company

### 8.0156, POWER SOURCES

*UNKNOWN*, U.S. Navy, Civil Engineering Lab., *Port Huene - Point Mugu, California*

## 8. ENGINEERING AND TECHNOLOGY

**Objective:** Adapt electronic power sources to ocean bottom and subbottom installations. Installations on or in the ocean floor will require electric power to perform missions and for station support. Power sources which are available for ocean application are conventional, nuclear reactor, isotope generator and storage battery. These sources with the exception of conventional can be either in-situ, surface tendered or shore based. However, each of these sources will require that their systems characteristics be matched to the operational requirements of the installation. Associated problems such as safety, waste heat removal, power transmission, and incompatibility of equipment to size of pressure hull exist and must be solved before placement of the power source can be completed. Information on submarine cables is available for use in power transmission systems, however, suitable power connectors have not been developed. The goal which will be achieved under this task area will be to develop the technology (excluding the development of power source) to adapt power sources in ocean areas.

**Approach:** Achievement of the objective involves work in the following areas: Area 1: Develop the safety criteria for use with ocean power sources. Results of current studies will indicate problem areas in safety design which must be solved. Area 2: Develop power connectors for use in power transmission systems for ocean installations down to 8000 feet. These power connectors will have to be compatible with existing submarine cables. Area 3: Investigate the problems encountered in incompatibility of equipment size to pressure hull feasibility in development of large power sources to pressure to 6000 feet. Area 4: Develop criteria to solve the waste heat problems encountered in placing power source in-situ.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0157, HYDROGEN PROPERTIES

**R.J. CORRUCINI**, U.S. Dept. of Commerce, Natl. Bureau of Standards, Boulder, Colorado

Measurements of the refractive index of fluid hydrogen and the dielectric constant of solid hydrogen have been completed. They have been analyzed in terms of the density and temperature dependence of the Lorentz-Lorenz functions and the Clausius-Mossotti function. The results find application in the densitometry of fluid and slush hydrogen by the aerospace industry. Their scientific value lies in providing new information on the interactions between molecules.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0158, UNDERSEA PROPULSION AND POWER SOURCES

**J.W. MURRIN**, U.S. Navy, Ordnance Systems Command, Washington, District of Columbia

**Objective:** Develop power sources for application to undersea propulsion. These sources, either as chemical heat generators or as electrical energy generators must provide power at rates significantly exceeding those of present sources.

**Approach:** The combustion of some metals or inorganic materials specific energies far greater than the combustion of the usual organic fuels. To develop superior high energy-density batteries, electrolytic systems based on liquids other than water are being explored.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0159, PROPULSION FOR SWIMMER VEHICLES

**F.J. ROMANO**, U.S. Navy, Ship Systems Command, Washington, District of Columbia 20360

**Objective:** To establish and demonstrate feasibility of closed cycle power systems for use in swimmer delivery vehicles (SDV).

The power system under investigation includes a closed exhaust heat engine, utilizing chemical fuels which will provide mechanical power for SDV propulsion, electrical power for vehicle electronic equipment, and heat energy for swimmer heating.

**Approach:** A contract was let to industry to establish state-of-the-art of the thermochemical power fuel and to establish the optimum type closed cycle power system to meet specific SDV propulsion requirements. Based on the results of this study an ex-

perimental model of the closed cycle propulsion system, as recommended by the study, will be developed. Development of the experimental model of the system will demonstrate feasibility of the closed cycle concept and will provide the design parameters and operating characteristics necessary for development of a developmental system.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0160, HYDROGEN-OXYGEN FUEL CELLS

**B.B. ROSENBAUM**, U.S. Navy, Ship Systems Command, Washington, District of Columbia 20360

**Objective:** Develop laboratory breadboard modules of fuel cells operating on hydrogen (H<sub>2</sub>) and liquid oxygen (LOX) for ultimate encapsulated advanced development of a family of 5 to 30 KW systems for undersea operation. Operational aims: power density (exclusive of fuel and oxidant), 50 lbs per KW; operating life, 5000 hrs (before 30% loss in power); electrode precious metal load, 20 GM per KW (max). Directed to use for both continental shelf (gaseous H<sub>2</sub> and LOX) and deep submergence (liquid H<sub>2</sub> and LOX) levels. Ancillary objectives include: generation of hydrogen from logistically feasible fuels (EG, JP5, methanol) for shallow operation; delivery and safe handling of liquid H<sub>2</sub> and LOX for deep submergence. Power plants of this type will permit a ten-fold increase in energy capability over secondary battery systems.

**Approach:** Development and evaluation through industry and Navy labs of a 5 KW cryogenic H<sub>2</sub>-O<sub>2</sub> fuel cell module designed, from the standpoint of heat rejection and purge gas handling; for encapsulation and testing under simulated ocean environment conditions. This approach will be closely integrated with a NASA procurement for a 5 KW encapsulated system to be operated in an outer space environment. Evaluation of latest state-of-the-art 2.5 KW circulating electrolyte H<sub>2</sub>-O<sub>2</sub> fuel cell module under submarine attitude conditions (pitch, roll, yaw, ascent, descent). Development of hydrogen generators operating on JP 5 or methanol for use in conjunction with 10 to 30 KW fuel cell system. Establishment of safe method of delivering and handling cryogens (H<sub>2</sub> and O<sub>2</sub>) for deep submergence fuel cell use. Solution of problems of voltage regulation, off-design performance, etc., fuel cells.

### 8.0161, COLLATION OF POWER PLANT STUDIES

**UNKNOWN**, Illinois Institute of Technol., Graduate School, Chicago, Illinois 60616

The five power plant studies sponsored by the Maritime Administration during the period 1961 through 1964 dealing with the design of economical integrated power plants for the propulsion of future American merchant ships were reviewed and combined.

The initial studies, which included two steam power plants, two gas turbines, and a diesel engine, were as follows: Allis-Chalmers Mfg. Co., 'Integrated Marine Steam Turbine Propulsion Plant'; Newport News Shipbuilding and Dry Dock Co., 'Integrated Steam Power Plant'; General Electric Co., 'Integrated Gas Turbine Power Plant Design Study'; Pratt and Whitney Aircraft Division of United Aircraft Corp., 'Integrated Marine Gas Turbine Powerplant'; and Fairbanks-Morse Power System Division of Colt Industries, 'Fairbanks-Morse Advanced Design Motor Ship Machinery Plant 20,000 SHP'.

IITRI extracted sufficient information from the above reports to permit a direct technical and economic comparison of the five power plants, with the information condensed into one concise volume. The report gives brief descriptions of the plants and their auxiliary systems, and compares the economic factors on a common basis with respect to estimated initial costs and operating costs.

The study concludes that the diesel powered ship seems to be the most economical, and steam powered vessels have an economic advantage over those powered by gas turbines. It also concluded that with anticipated improvement in construction materials the gas turbine power plants will show greater promise.

The report PB No. 175-612 is available from the Federal Clearinghouse for Scientific and Technical Information, Springfield, Virginia, 22151.

### 8.0162, THERMO-ELECTRIC GENERATORS

A.B. NEILD, U.S. Navy, Marine Engineering Lab., Annapolis, Maryland 21402

The work under this task is to complete the evaluation of a thermo-electric generator developed for use in the ONR/Convair oceanographic buoy. Bench tests will be completed, causes of observed failures will be studied, test installation will be disassembled and a final report submitted.

This effort was undertaken to produce a highly reliable electric power source for unattended operation at sea. The results will be beneficial to buoy development programs and to other similar requirements of the Navy's operations.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0163, LOADING CHARACTERISTICS OF A CHARGE-CONSTRAINED SYNCHRONOUS GENERATOR

J.P. REGAN, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

Previous electric-field-type electromechanical energy converters have relied on a variable capacitance, with terminal voltage constrained. An electrostatic generator is studied which employs a spatially varying charge distribution with the potential unconstrained. Energy is converted from mechanical to electrical form by means of a synchronous interaction between the excitation charge wave on the moving medium and the fixed load. Power output characteristics for both a continuum and discrete loading arrangements are derived and analyzed. A study of the effects of discrete loading is essential to understanding operation with a finite number of phases.

It is shown that such generators may be modeled by an equivalent circuit containing a current source in parallel with a characteristic internal capacitance and a load impedance. The values of these circuit elements are determined by the excitation charge wave and geometrical factors such as: load-to-charge wave spacing, charge-to-ground potential distance, and interelectrode spacing and number of phases in the discrete loading case.

For the discretely loaded generator, the output theory is derived by assuming the form of the potential distribution along the loading electrodes. The discreteness requires that Fourier techniques be used and that the distribution be treated as an infinite sum of spatial harmonics of the fundamental wavenumber of the exciting charge wave. A six-phase, discretely loaded generator with an electrode-to-interelectrode width ratio equal to 1.54 is analyzed in detail. It is shown that this generator can deliver 75% of the power available from a continuously loaded generator having the same excitation and physical parameters. Data are presented to predict output power for discrete loadings, with the number of phases varying from five to 42. A six-phase laboratory generator is used to determine the equivalent circuit element values.

The theory predicts the current source magnitude to within 6%. With the stray capacitance due to electrode structure quantified included, the characteristic internal capacitance is predicted to within 5% by the theory.

SUPPORTED BY Massachusetts Institute of Technology

### 8.0164, AUTOMATIC BOILER CONTROLS

UNKNOWN, Cleveland Cliffs Iron Co., Cleveland, Ohio

Purpose: To install, test and evaluate an automatic marine boiler control system capable of safe and economic operation without human manipulation over the entire range of ship operations.

Description: The system provides automatic start-up, purging, restarting, and operation of feedwater, fuel, and air control for a marine boiler to enable it to respond to turbine throttle steam demands for maneuvering and steady ship operations. As installed on a single boiler ship in Great Lakes service, the control operation is continuous from spring start-up until winter shutdown.

The Steamer WILLIAM G. MATHER is currently in its fifth operating season with these automatic boiler controls installed. The controls have required only normal routine maintenance and,

once the system was debugged, no operating casualties have occurred.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0165, HIGH-POWER HYDROACOUSTIC VIBRATOR DEVELOPMENT

R.A. BRODING, Seismograph Service Corp., Tulsa, Oklahoma

Summary: Previous hydroacoustic vibrators for marine 'VIBROSEIS' operation were power limited to approximately 94 db ref. 1 yard. An improved vibrator was evolved that was capable of 104 db output over a greater frequency spectrum. This vibrator made use of a hydraulic power source of over twice the power output in a prime mover, a hydraulic pump of twice the flow capability and a servo control valve of over six times the flow capability. The vibrator proper makes use of a four foot diameter water piston compared to a 30-inch piston previously used. The ram area and stroke were also increased to give essentially a full power capability from 10 to 120 Hz. Extensive testing of this vibrator has verified its power capability and reliability under extended operations with the vibrator under tow at 6 knots and at depths of 35-40 feet.

SUPPORTED BY Seismograph Service Corporation

### 8.0166, AN IMPROVED MARINE VIBROSEIS INSTALLATION

R.A. BRODING, Seismograph Service Corp., Tulsa, Oklahoma

Summary: Four high-powered hydroacoustic sources with four power units, hoists, hydraulic tow lines and tow arms were installed on the Motor Vessel King Tide. The 703 computer controlled data acquisition system was also installed, along with a 1 or 1-1/2 mile 24-channel streamer cable, streamer depth depressors and storage reel for the streamer. The system was designed for continuous tow at 6 knots with the vibrators and streamer depressed at 30-40 foot depth. In a typical working day 50 miles of data are collected. If navigation control permits, this coverage can be doubled with a second shift. Redundancy in equipment as well as alternate modes of operation permit little loss of time in case of any failures in the system. The greatest deterrent is the limitation in working in seas of not greater than sea state 4 due to noise on the cable and ability to work on deck.

SUPPORTED BY Seismograph Service Corporation

### 8.0167, MERCHANT SHIP REACTOR PRELIMINARY SAFETY ANALYSIS

UNKNOWN, Westinghouse Electric Corp., Pittsburgh, Pennsylvania

Purpose: To prepare a Preliminary Safety Analysis of the proposed Westinghouse Maritime Reactor Plant installed in a merchant ship to determine acceptability of the design from a safety viewpoint, and necessity for further related research and development work.

Description: The government and Westinghouse jointly funded for the preparation of a Preliminary Safety Analysis of the advanced Westinghouse maritime reactor design, installed in a representative ship. The special design safety features include omission of the secondary reactor space containment, and containment vessel blowdown to the innerbottom in case of primary system rupture. Compared to the SAVANNAH, the reactor features higher power density, smaller containment vessel with much higher design pressure, close coupled primary coolant system components, and a five year core requiring soluble neutron poison in the coolant at beginning of core life as well as burnable poison in the fuel.

The Safety analysis will be furnished to the Atomic Energy Commission for their review.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

## 8. ENGINEERING AND TECHNOLOGY

### 8.0168, A PILOT PLANT STUDY OF LOW EXCESS AIR COMBUSTION - ITS EFFECT ON FIRESIDE PROBLEMS IN OIL FIRED BOILERS

UNKNOWN, Babcock & Wilcox Co. , Lynchburg, Virginia 24505

High temperature ash deposition and fireside corrosion are considered the principle causes of decreased efficiency and availability of boilers, and often result in increased maintenance and repair costs. These problems are associated with increasing amounts of impurities, such as vanadium, sodium, and sulfur, which are present in the low cost residual oil that is used for marine fuel.

The report covers a review and technical evaluation of the information available on fuel oil combustion and allied fields to determine what benefits can be expected by operating marine boilers with controlled, low excess air combustion, and how such a combustion process can be designed and controlled. It also presents the results obtained from a pilot plant investigation of the effect of low excess air operation on the fireside problems in oil-fired boilers.

Among the significant conclusions reached as a result of this test program were the following: Low excess air combustion of residual fuels that contain sulfur is an effective method for controlling low temperature corrosion caused by condensed fuel trioxide. Much of the beneficial effect of low excess air combustion is lost if excess air at the burner fluctuates even for short periods of time to a level of about 5%. It appears that condensed SO<sub>3</sub> from the flue gases is the primary if not the sole cause of low temperature corrosion when firing residual oils containing sulfur. Low melting compounds associated with oil-ash deposition problems when operating with normal excess air are not formed in large amounts when operating with low excess air combustion. Deposits from normal excess air tests are about twice as dense as those formed during low excess air combustion. The report PB No. 175-805 is available from the Federal Clearinghouse for Scientific and Technical Information, Springfield, Virginia, 22151.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8I. HYDRODYNAMICS

(see Chapter 2 on Water Motion)

### 8.0169, PRELIMINARY STUDIES TO CORRELATE SELECTED MINERALOGIC AND GEOLOGIC PROPERTIES WITH ENGINEERING PROPERTIES

H.D. HESS, U.S. Dept. of Interior, Marine Min. Technol. Ctr. , Belvedere - Tiburon, California 94920

The practicality of a shipboard mineral identification and analysis laboratory for on-site placer deposit characterization and relation of generated physical/chemical data to drill performance and shipboard sample processing operations was clearly demonstrated during the 1967 Alaska field operations off Nome. During the two months on station, approximately 1200 mineralogic, petrologic, and qualitative chemical examinations were performed utilizing spectroscopic, mercury detection, ultra-violet, radiometric, and other laboratory equipment, including stereo and polarizing-petrographic microscopes. In short, the shipboard laboratory was demonstrated to have the same functional capability as similarly equipped laboratories on shore. Also, during the Alaska operations, original investigations were conducted on geochemical trace element correlations and development of an in situ pH/temperature measuring device.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 8.0170, HYDRODYNAMIC FLOW FIELD STUDY

J.R. RADBILL, North Amer. Rockwell Corp. , Long Beach, California 90803

Ocean Systems Operations adapted a computer program to calculate the flow and the associated pressure, viscous and wave drag, about advanced vehicle designs and stationery structures. The computer program (written for the IBM 360) calculated the inviscid flow field about a submerged body of arbitrary shape. It in-

corporated smoothing procedures which rendered computed flow velocities insensitive to small perturbations in the body coordinates. Computed velocities were compared with analytical results for an ellipsoid to assess the accuracy of the program. Computer programs were constructed for use in the study and design of subsurface manned and unmanned systems. The computer programs can calculate flow fields and dynamic coefficients for hulls of very general shape.

SUPPORTED BY North American Rockwell Corporation

### 8.0171, PARTIAL DIFFERENTIAL EQUATIONS AND CONTINUUM MECHANICS

G.B. WHITHAM, Calif. Inst. of Technology, Graduate School, Pasadena, California 91109

Research will be continued in the areas of continuum mechanics, partial differential equations, and related topics. Whitam will continue research on non-linear wave propagation using variational principles and perturbation methods. Work will be continued on the behavior of long water waves, applying analytic and numerical methods to integro-differential equations which include effects more general than those of the usual theory. Study of the non-linear boundary value problem whose differential equation is  $Lu = \lambda f(x,u)$ , where  $L$  is a Sturm-Liouville operator,  $f$  is monotone increasing in  $u$  with  $f(x,\phi)$  is not equal to  $\phi$  and the interval is finite. The stable solution will carry over to the case where  $L$  is uniformly elliptic.

Certain linear boundary value problems for partial differential equations will be considered. By making use of the spectral representations associated with the ordinary differential system arising from separation of variables, alternative representations of the solution of the original problem can be found. This technique will be used to investigate the formation of underwater acoustic wave guides when the velocity profile is not a constant function of ocean depth.

SUPPORTED BY U.S. National Science Foundation

### 8.0172, STUDY OF FISH MUCUS BIOCHEMISTRY

J.W. HOYT, U.S. Navy, Ordnance Test Station, Pasadena, California

The investigator will study the mucus produced by fishes to determine their chemical and physical properties and to determine how they operate to reduce frictional resistance in the water and to damp turbulence. These mucal secretions will then be compared for drag reduction efficiency. The demonstration of turbulence damping and friction reducing properties of linear, high molecular weight soluble polymers is a recent development in fluid mechanics and is not yet completely understood. Viscoelastic effects are probably involved and will be studied.

Locomotory mechanisms of animals in the sea are of interest on several counts. Most directly, it relates to the design of vehicles and equipment where speed or water resistance is important. The acoustics of movement is an area for study and one in which biological mechanisms may provide guidance. In addition, surface coverings of fishes may affect the echo characteristics of fishes and may serve as a stimulus to other animals which may be attracted or repelled by it. Such information could lead to knowledge about animal behavior, including pest repellents.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0173, REALISTIC FREE SURFACE BOUNDARY CONDITIONS IN NUMERICAL HYDRODYNAMICS COMPUTATIONS

F. MACINTYRE, Univ. of California, Graduate School, San Diego - La Jolla, California 92038

It is proposed to develop a general code for including realistic free-surface boundary conditions in numerical hydrodynamics. The programming necessary to produce such a code falls into three parts: (1) Orientation. The location, curvature, and orientation of the free surface must be sensed. The surface configuration may be approximated by a series of circular arcs passing through adjacent triples of points in the surface. (2) Surface metric. In general, in the surface coordinate system best

## 8. ENGINEERING AND TECHNOLOGY

suitable to a given problem will not match the coordinate system chosen for the bulk liquid. Thus, in a study of linear capillary waves on an otherwise flat surface, it is logical to cast the bulk liquid into Cartesian coordinates, yet the surface of the waves is best approximated by series of cylindrical segments. Similarly, in a study of an axisymmetric problem such as a breaking bubble, the bulk fluid wants cylindrical coordinates, but the surface itself is composed of toroidal segments. Aris 5 gives the fundamental tensorial hydrodynamic equations connecting a Riemannian surface to a Euclidean bulk fluid, complete with surface tension and the two surface viscosities. (3) Coupling. A prominent feature of the proposed approach is that the curved surface does not lie on the rectangular computation grid, so that it is necessary to treat the resulting odd-shaped grid-segments in a special manner.

SUPPORTED BY U.S. National Science Foundation

### 8.0174, OXYGEN PROPERTIES

R.D. GOODWIN, U.S. Dept. of Commerce, Natl. Bureau of Standards, Boulder, Colorado

Objective is to determine the equation-of-state and specific heat of liquid and gaseous oxygen and to calculate derived thermofunctions. Applications are to the use of liquid oxygen as a rocket propellant oxidizer. Work falls under data on the Properties of Matter.

Measurements of the specific heat of saturated liquid oxygen have been completed. Measurements of the specific heat at constant density on fluid oxygen are about 80% complete. The specific heat and fluid viscosity measurements are being checked for internal consistency. Methods have been developed for computing the derived thermodynamic functions. Applications are to the use of liquid oxygen as a rocket propellant oxidizer. The measurements provide new and/or more accurate properties data which are useful in designing more efficient missile propulsion systems.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0175, WAVE ACTION ON STRUCTURES

T. SAVILLE, U.S. Army, Coastal Engin. Res. Center, Washington, District of Columbia 20016

The action of all types of waves on various types of structures will be studied in the laboratory using experimental models, in the field making prototype measurements, and by analytic theoretical approach. In particular such things as wave run-up, wave overtopping, wave forces, and structure stability are planned for investigation.

SUPPORTED BY U.S. Dept. of Defense - Army

### 8.0176, FLUID MECHANICS RESEARCH

G. KULIN, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia

To conduct exploratory investigations into problems such as (1) Hydrodynamic effects of hydrophobic surfaces; (2) Effect of turbulence on damping of progressive water waves; and (3) Effect of compliant walls on turbulent shear flows. Problem (3) is related to drag reduction, which is a matter of considerable economic and technical potential. Problem (1) has important applications in industrial processes and in hydraulic model studies, while problem (2) is related to wave forecasting. This project continues NBS work on the development and application of various measurement techniques to the solution of important hydrodynamic problems.

All of these investigations are primarily experimental. In problem (1) wettable and non-wettable plates are oscillated vertically through an air-liquid interface and the damping was observed. In problem (2) measurements were made on heights of waves propagating through water made turbulent by a series of upward-directed water jets. In problem (3) the pressure drop was measured for turbulent flow of water and water-glycerol mixtures through tubes having compliant (soft rubber) walls. Experiments have been completed for all problems.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0177, HYDRAULIC BULLETIN

G. KULIN, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia

To collect information on current research projects in hydraulics, conducted at about 175 Federal, State and private laboratories in the United States and Canada; and to make these project summaries available in useful form to the scientific and engineering community. A similar publication, compiled by the International Association for Hydraulic Research (Delft, Netherlands) covers hydraulic research in all countries other than the United States and Canada. The NBS publication thus forms part of a team which provides world-wide coverage of current hydraulic research.

Through 1966, research summaries were annually solicited from appropriate laboratories and their contributions were edited and placed in a format suitable for publication. However, publication is now biennial, and the 1967 issue was omitted, with the next issue to appear in 1968.

Reporting interval - January 1 to December 31, 1967.

The 1967 'Hydraulic Research in the United States' was omitted primarily to allow time to review a potential duplication problem existing with respect to the new 'Water Resources Research Catalog' (Office of Water Resources Research, U. S. Department of the Interior). A detailed comparison of the most recent issues of each publication was made, and it was found that slightly less than 20 percent of the projects listed by NBS were also reported in the 'Water Resources Research Catalog.' This result suggested a continued need for publication devoted solely to hydraulic research. A decision was therefore made to proceed with a 1968 issue and continue biennially thereafter, while taking positive steps to minimize duplication.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0178, FLUID DYNAMICS CENTER

R.L. PFEFFER, Florida State University, Graduate School, Tallahassee, Florida 32306

A new university center in Geophysical Fluid Dynamics involving advanced graduate training and research in applied mathematics, continuum mechanics, fluid dynamics, meteorology and oceanography is to be initiated. Anticipated research activities include (a) laboratory simulation of the formation of offshore shoals and the transformation of shorelines, (b) theoretical and experimental simulation of convection and hurricane formation by latent heat release, (c) experimental and observational studies of ocean wave energy transformations, (d) cellular convection studies and interpretation of satellite photos, (e) theoretical, experimental and observational studies of the global atmospheric jet stream, (f) simulation of planetary atmospheric circulations and (g) application of applied mathematics and computer technology to hydrodynamical phenomena and solving the Navier Stokes equations of fluid dynamics.

Critical fleet requirements are not now adequately under study by the Naval scientific community. For example, optimal interpretation of satellite meteorological data is not possible nor will it be until basic processes of cloud formation are understood. Advanced techniques now under development at Florida State University will permit modelling of clouds in its entire complexity and acceleration of work in this area will lead to greater effectiveness in fleet meteorology.

### 8.0179, HYDRODYNAMIC EFFECTS OF SUBMERGED BODY

M.P. TULIN, Hydronautics Incorporated, Laurel, Maryland

Objective: To gain quantitative knowledge of the hydrodynamic effects generated by a submerged body.

Approach: Conduct theoretical analyses and model tank experiments to predict the hydrodynamic effects of submerged bodies, with emphasis on the micro-structure of the air-sea interface.

SUPPORTED BY U.S. Dept. of Defense - Navy

## 8. ENGINEERING AND TECHNOLOGY

### 8.0180, COMPUTATION OF PERIODIC PROPELLER FORCES IN NON-UNIFORM FLOWS USING A LIFTING SURFACE MODEL

*F.R. BJORKLUND*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

A computational method is presented based on theory of the lifting surface model of a propeller blade in non-uniform flow. Unsteady expressions, previously derived by Dr. Neal A Brown, are adapted to a numerical solution of the three-dimensional Biot-Savart integral equation for the vorticity distribution given the downwash boundary condition.

Since a computational method already exists for the solution using a lifting line representation of the blade, the analysis presented adds a correction to the results of that method. The correction is due to the effects of the radial and streamwise vorticity of the blade on itself. This has hereto been neglected in the lifting line model, but has been shown to be very significant, especially for the higher harmonics of the wake.

A computer program was developed and tested for correctness of results. Program listings and flow diagrams are included in the Appendices.

### 8.0181, AN ANALYSIS OF THE RESPONSE OF CYLINDRICAL DUCTS TO INTERNAL, ZERO MEAN FLOW, AIR-CARRIED ACOUSTIC EXCITATION

*W.T. ELLISON*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

Significant structural response of a cylindrical duct to an internal pure tone sound field resulting from an external pure tone source, located approximately on the duct centerline, will arise only when coincidence occurs between the natural modes of propagation of acoustic waves within the duct and the natural modes of structural vibration of the duct itself.

The coupling mechanism giving rise to such coincidence lies within an assumption of small variations of the source location from the duct centerline. This result which arose from a theoretical analysis based on a solution for the velocity potential within a semi-infinite cylinder in the presence of a non-axial incident plane wave and an equivalent modal resonator model of the cylinder undergoing principally radial vibrations in a lobar axially varying pattern was borne out by the experimental results.

SUPPORTED BY Massachusetts Institute of Technology

### 8.0182, MEASUREMENT OF WATER VELOCITY BY OPTICAL METHODS IN THE MIT PROPELLER TUNNEL

*G.W. FANG*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

An optical system to detect and measure the flow velocity in the MIT propeller tunnel was built, based on the theory proposed by M.J. Block and J.H. Milgram in a paper to the Optical Society of America. The method involved the detection of reflected light radiation off air bubbles in the water. This radiation, after being spatially filtered by a reticle, is collected by a photomultiplier and temporally filtered by a bandpass filter. The frequency of the resultant signal is a function of the flow velocity.

Results of the investigation show a general agreement to within 3% between the velocities obtained by this method and that obtained by means of the pitot-static tube. Difficulties encountered in the investigation are enumerated, and recommendations are made for possible future investigations.

SUPPORTED BY Massachusetts Institute of Technology

### 8.0183, VARIABLE PRESSURE WATER TUNNEL RESEARCH

*J.E. KERWIN*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

Funds from this grant will provide assistance in converting the MIT variable pressure water tunnel and in initiating a number of research problems. The MIT tunnel was originally constructed in 1938 - 39 and has not been modified since. The original design of the tunnel was to solve one type of problem - the steady-state

thrust and torque of a marine propeller under various flow conditions. Since this type of experiment has now become routine, the tunnel is not very useful for thesis research in its present form. Changes to the tunnel will include the removal of the present open-jet test section and replacement with a 20 inch diameter stainless steel closed-jet section. A storage tank will be added to facilitate rapid access to the test section, modern instrumentation and controls will be installed, and quieting measures will be applied to the tunnel. After the tunnel is converted to a more useful research tool, the following research problems will be pursued; propeller performance in irregular flow fields, cavitation noise; cavity dynamics, mechanisms of cavitation inception, hydroelasticity and singing, supercavitating hydrofoils and propellers, propeller induced vibration, hydrodynamic performance of various deep-sea devices, and experimental verification of propeller design theory.

SUPPORTED BY U.S. National Science Foundation

### 8.0184, INVESTIGATION OF THE NON-LINEAR CHARACTERISTICS OF FLUID-SUSPENDED VEHICLES

*R.J. KIESSEL*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

Using present linear results for a rigid simple plenum fluid-suspension system, it was possible to determine the accuracy of a non-linear model and of analog computer simulation when using small perturbation amplitudes.

By increasing the perturbation amplitudes it was possible to show that the range of validity of the linear theory solution increased as the lead time constant increased and also as the lead-to-tag time constant ratio increased.

Further increasing of the perturbation amplitude showed that the maximum allowable perturbation amplitude increased as the lead time constant increased and also as the lead-to-lag time constant ratio increased.

Increasing the perturbation amplitude beyond the range of validity of the linear theory showed that the peak dimensionless acceleration and the peak dimensionless change in vehicle-suspension-guideway clearance decreased.

SUPPORTED BY Massachusetts Institute of Technology

### 8.0185, EXPERIMENTAL INVESTIGATION OF VENTILATED CAVITIES

*R.J. KINNEAR*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

A wedge with a 3.5 inch chord and a half-angle of 4.1 degrees is tested in the MIT Propeller Tunnel. No pulsations were observed on the cavity. Thus, the attempt to verify the theory that pulsations are possible in an infinite medium (without a free surface) is inconclusive.

Although there exists a variance in the cavitation number between theory and experiment, the data plotted show that the general shape of the curve for a 4.1 degree wedge is correct. The primary discrepancy is in the pressure recording methods.

Visual observations become difficult when ventilated cavities are generated in the test section. It takes only about 5 to 10 seconds for the air introduced into the cavity to recirculate through the tunnel.

SUPPORTED BY Massachusetts Institute of Technology

### 8.0186, UNSTEADY TWO-DIMENSIONAL CAVITY FLOWS

*P.C. LEONE*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

A flow model for unsteady, two-dimensional cavity flows with finite cavities is established by examining the cases of finite aspect ratio foil and of a two-dimensional foil under a free surface in the limiting cases of high aspect ratio and large depth. Using the method of matched asymptotic expansions, the boundary conditions of the two-dimensional flow are determined and the perturbation pressure produced by the variations of cavity area is calculated as a function of aspect ratio or depth. The case of a flat plate foil with a natural cavity and executing harmonic oscillation

## 8. ENGINEERING AND TECHNOLOGY

tions of small amplitude is then considered, and within the framework of the linearized theory and unsteady perturbation potential is determined using the methods of the complex variable theory. Numerical results for life and movement coefficients are presented for a certain number of values of the cavitation index.

Experimental results for a two-dimensional foil performing simple pitching oscillations are presented. Those experiments cover a range of reduced frequencies (based on foil chord) of 0.2 to 0.95 and cavity lengths ranging from 2.5 to 7. The agreement between those experimental results and the theory seems to be fair.

SUPPORTED BY Massachusetts Institute of Technology

### 8.0187, DETERMINATION OF FLOW IN AN AXIAL-TO-RADIAL DIFFUSER WITH SWIRL

*R.A. MAJOR*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

The parameters affecting the efficient design of axial-to-radial diffusers are discussed and a selection made of those to be investigated. A model diffuser was constructed based on the geometry of a jet impinging on a flat plate without internal vanes. Various amounts of swirl were introduced on a constant flow rate and the recovery of the diffuser for these conditions noted. The internal flow was mapped photographically and with pressure probes.

The results are given in the form of static pressure plots along the diffuser walls, velocity profiles, and calculated diffuser efficiency. The maximum efficiency of 91.7% occurred at just under the maximum swirl used, based on a calculated inlet pressure.

A detailed program for additional testing is given.

SUPPORTED BY Massachusetts Institute of Technology

### 8.0188, VISCO-ELASTIC DYNAMIC VIBRATION ABSORBER

*G.L. MORROW*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

Objective. The objective of this thesis work was the design, construction, and instrumentation of an apparatus to determine the dynamic properties of visco-elastic fluids for application in damped dynamic vibration absorbers.

Method: The result of the design was a set of parallel plates tailored to fit a Calidyne 01500 shaker. The shaker was used to provide the driving force. The lower plate was held stationary and the upper plate constrained to move in one dimensional translation. The dynamic variables measured were the magnitude of the applied force and phase angle between force and displacement. The force was measured via a strain gauge transducer, constructed for the thesis, and phase angle was measured by a phase detector using displacement as a reference. Both force and phase were plotted automatically against frequency by an X-Y recorder. The viscosity and modulus of elasticity were then calculated from the measured quantities.

Results: The apparatus was shown to function satisfactorily and sufficient data was taken to check the performance with results obtained from the Caterpillar Tractor Company for the silicone fluid used in the test. Both sets of data were shown to be in close agreement and not to follow linear visco-elastic theory, over the range of variables of interest. Both shear modulus and viscosity were found to be functions of frequency.

Conclusions: It is the conclusion of the authors that this apparatus will perform satisfactorily for a wide range of fluids which may have damper application. The results will be improved, however, with implementation of the recommendations below.

### 8.0189, INVESTIGATION OF HEAT TRANSFER AUGMENTATION THROUGH USE OF INTERNALLY FINNED TUBES

*W.D. SNIDER*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

Experimental data were obtained on heat transfer and pressure drop for water flowing in internally finned tubes. The test

sections were steam heated copper tubes with integral internal fins ranging in size from 0.625 in. to 1.060 in. outside diameter with both straight and spiral fins. Heat-transfer coefficients and friction factors were determined for non-boiling forced convection heating.

Improvements in heat transfer for finned tubes compared to conventional tubes of the same internal diameter of up to 200 percent were found in some of the cases tested. The major portion of the improvement in heat transfer results from additional heat-transfer area added on the water side of the tube. Swirl flow was also found to contribute significantly to improved heat-transfer performance.

This investigation represents a start toward the development of a general prediction method for internally finned tubes. Further investigations are recommended to determine the effects of tightness of twist, number of fins, fin height, and fin profile on heat-transfer improvement and the value of internal fins as an augmentative technique.

### 8.0190, HETERODYNE MEASUREMENTS OF ATMOSPHERIC PHASE TURBULENCE AT 6328A

*M.A. TAMNY*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

This thesis investigates the effects of atmospheric turbulence on the spatial properties of the phase of transmitted beams. Experimental measurements in the form of a series of photographs of interference patterns between two beams were made using a modified optical heterodyne system. The two beams of the heterodyne system were mixed with a very small, controllable angular difference between their directions of approach to the detector. The resulting fringe patterns were affected by the atmosphere as differences between succeeding photographs show. The first order effect of the atmosphere was found to be a tilt relative to the direction of travel. Tilt differences as small as 5 seconds of an arc can be measured using this system with assurance; smaller values could be confused with systematic effects.

### 8.0191, VORTEX WAKE SHEDDING OF A HEAVING CIRCULAR CYLINDER

*R.G. WALSH*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

The periodic vortex wake shedding from a circular cylinder heaving perpendicular to the free-stream has been experimentally photographed in water using streaming air bubbles for flow visualization. The Reynolds number was greater than 10,000. The flow is a three dimensional stability problem with spanwise vortices being formed when the cylinder is stationary. For a specific range of heave amplitude and frequency, called the 'lock-in region', it is possible to have two-dimensional flow with spanwise correlation. There is an effect of free-stream turbulence and turbulence due to wake formation at high Reynolds number flow upon the 'lock-in region'. After a discussion of the past and present investigations of this flow phenomenon, it is modelled as a fluid oscillator. A discussion of the analogy between the flow and the oscillator characteristics is presented.

### 8.0192, EXPERIMENTAL HYDRODYNAMICS

*A.C. VASTANO*, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543 (N00014-66-C0241)

This study is a continuing attempt to elucidate details of the hydrodynamics of flow regimes on a rotating earth that are pertinent to the understanding of oceanic phenomena. Part of the work is theoretical but it is supplemented by fluid dynamics laboratory studies of flow regimes in realistic models and by field measurements from ALVIN. A numerical model of western boundary currents is being developed. Laboratory experiments study the physical processes occurring at density interfaces and measure the fluxes of heat and salt through them. Small scale structure in the oceans also is to be observed with the use of ALVIN in the region of the main thermocline.

Results from this task should further the development of numerical models of physical processes in the oceans from which operational prediction methodology may be developed to meet the Navy's broad needs for environmental forecasts of the oceans.

#### **8.0193, FLUIDIC CONTROL SYSTEM COMPENSATOR**

*C.K. TAFT*, Univ. of New Hampshire, Graduate School, *Durham, New Hampshire* 03824

Fluidics is the technology wherein sensing, logic manipulation, amplification, information processing, control and/or actuation functions are performed solely by controlling fluid dynamic phenomena with fluid inputs. Fluidic devices or systems can perform these functions using no-moving-part elements and appear to offer the advantages of reliability, low cost, and simplicity. These advantages are especially true in control strategies which utilize the unique properties of fluidic devices is being made at the University of New Hampshire.

It is the object of this research to investigate the following: 1. Periodic modulating signal waveform effects and frequency limitation on fluid components. 2. The number of delays that can be used in a compensator and their duration. 3. Fluidic switching device characteristics will affect pulse-width modulator performance. Hysteresis and non zero operating time will all contribute to the effective characteristics of this portion of the system. The effects of these nonideal characteristics will be described analytically. 4. The types of compensators which can be mechanized analytically. 5. The types of compensators which can be simplified. 5. An experimental model using fluidic elements will be used to demonstrate the feasibility of the approach and verify the design strategies developed.

#### **8.0194, MODEL STUDIES OF REFRACTION OF SHOALING OCEAN WAVES**

*W.J. PIERSON*, New York University, School of Engineering, *New York, New York* 10003 (NONR)

Objective: The laboratory wave-tank experiments on the behavior of refracted waves at caustics are to contribute to development and improvement of Navy wave forecasting methodology required to predict sea surface conditions in support of naval operations. Research on refraction effects particularly aids in the prediction of surf conditions.

Approach: A laboratory wave tank with various shaped, modeled shoals is being used to study the behavior of gravity waves at caustics produced by refraction effects as waves progress over these shoals. Emphasis is upon determining the transfer of energy at caustics.

SUPPORTED BY U.S. Dept. of Defense - Navy

#### **8.0195, AZORES VOLCANIC STUDY**

*G.M. BOONE*, Syracuse University, Graduate School, *Syracuse, New York* 13210 (NONR)

Investigations are made on the structure, sequence of eruptions, and chemical analyses of volcanic (basaltic) rocks that comprise the eastern part of San Miguel Island, Azores. Chemical analyses are made of the rock samples obtained during a field mapping program to determine the age of the rocks, the times of eruption, and magma depth from which the flows originated. As the Azores are along the Mid-Atlantic Ridge, this study bears on volcanic and tectonic problems associated with mid-ocean rises.

As the task concerns the volcanic and tectonic processes along one part of the Mid-Atlantic Ridge, it provides information that affects bottom topography, bottom roughness, and sedimentary layering associated with this mid-oceanic ridge.

SUPPORTED BY U.S. Dept. of Defense - Navy

#### **8.0196, MARINE HYDRODYNAMICS**

*M. RATTRAY*, Univ. of Washington, Graduate School, *Seattle, Washington* 98122

It is proposed to carry out the following studies: (1) Investigate a theoretical model for the combined wind-driven and

## **8. ENGINEERING AND TECHNOLOGY**

thermohaline circulation of a zonal ocean, which is expected to demonstrate the essential physics of the Antarctic Ocean circulation. Results of this investigation will lead to refined models for the Antarctic Ocean and serve also as a preliminary step in the investigation of the circulations in oceans with meridional boundaries. (2) Include the effects of friction and nonrectangular geometry in an extended theoretical model of internal wave generation. This work is based on our recent results for the internal waves generated in a continuously stratified ocean by bathymetric coupling, at a steep continental slope, to long surface waves. Laboratory experiments will be continued to test the above theoretical results. (3) Laboratory studies will be performed to investigate the generation of internal waves by free oscillations of neutrally buoyant bodies. (4) Laboratory experiments will be performed to test the range of validity of theoretical averaging techniques for the study of non-linear wave behavior. (5) Solutions will be sought for the quasigeostrophic free oscillations in a B-plane ocean that are intermediate in frequency range to those presently known. etc.

## 8. ENGINEERING AND TECHNOLOGY

### 8.0201, HELIUM - HEAT TRANSFER

V. ARP, U.S. Dept. of Commerce, Natl. Bureau of Standards, Boulder, Colorado

Data on heat transport and on properties directly related to heat transport (viscosity, conductivity, and specific heat) will be produced for liquid and supercritical helium, and for superfluid helium. The systems and properties data so obtained will contribute significantly to the use of superconductors and cooled high purity conductors in industry and research, e.g., power transmission and generation systems, superconducting magnets and superconducting particle accelerators all of which must be cooled by helium.

For both Helium I and Helium II studies, compilation and critical correlation of existing data will outline specific areas of subsequent experimental measurement. For Helium I studies much of these data have not been determined and those data which do exist are not sufficiently accurate to permit optimum system design. For Helium II the parameters which correctly characterize the heat transfer of superfluid helium in large engineering systems will have first to be identified.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0202, NEW APPROACHES TO BIOFOULING ASSAY

R.J. BENOIT, General Dynamics Corporation, Groton, Connecticut

A. Tests indicate that a simple, quick, laboratory bio-assay procedure can be developed for use in marine fouling research. B. The evaluation of anti-fouling coatings in granular form (a new approach) appears to be feasible. C. Three test organisms were evaluated as candidates for a laboratory bio-assay procedure. D. Leaching rates obtained in granular, copper base paints was in the order of 0.1 to 0.3 mg Cu per day from 0.5 gm of powder in 100 ml sea water. The rates were consistently higher in granular paints of small particle size, and increased slightly daily for three days. These leaching rates are comparable to about 100 micrograms Cu/cm<sup>2</sup>/day and are greater than rates reported in the literature for several copper paints evaluated as coated panels.

SUPPORTED BY General Dynamics Corporation

### 8.0203, MICROBIAL CORROSION AND DETERIORATION OF NAVAL MATERIALS

R.R. COLWELL, Georgetown University, Graduate School, Washington, District of Columbia 20007

Marine bacteria are being isolated from sea water to determine whether these microorganisms differ significantly from terrestrial forms. Electron microscopy and DNA base composition as well as conventional morphological and physiological characteristics are being determined. Computer analysis of the accumulated data will be employed to identify taxonomic groups.

The effective use of the ocean as a working environment requires thorough knowledge of its microbial activities. The role of marine microorganisms in corrosion and deterioration of materials, and as disease producing agents will contribute to this knowledge. Studies of the unique physiology of true marine microorganisms will provide basic information of effective use of the sea by other biological systems.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0204, CORRELATION OF BEACH PROPERTIES AND INCIDENT WAVES

T. SAVILLE, U.S. Army, Coastal Engin. Res. Center, Washington, District of Columbia 20016

Study is being made, in both field and laboratory, of the relationship between beach properties (including profile as well as sediment properties) with incident wave and water level conditions. Study also involves the effect of structures in affecting changes in these characteristics.

SUPPORTED BY U.S. Dept. of Defense - Army

### 8.0205, CORROSION MITIGATION

G.M. WATTS, U.S. Army, Coastal Engin. Res. Center, Washington, District of Columbia 20016

The investigation is to involve the collection and presentation of data showing the corrosion rate in sea water of various shapes of steel piling and of the stressing steel in pre-stressed and post stressed concrete piling. The corrosion rates are to be determined from piling installed at locations having various climatic, tidal and contamination conditions. The objective is to furnish information to aid in determining the life expectancy of steel used in piling installations.

SUPPORTED BY U.S. Dept. of Defense - Army

### 8.0206, STRENGTH OF GLASS

W. CAPPS, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia

Technical Objective: To develop improved methods for testing mechanical strength of glass and other brittle materials, to attempt to evaluate the influence of various types of defects on the strength of glass and to assist sponsor in developing specifications for strengthening glass for use in DSSV. (Deep Submergency Systems Vehicle).

Approach: Devise test fixtures and gather breaking strength data on commercially available and special composition glasses to modify modulus of rupture formulas to account for large deflections; to collect strength data on glass specimens containing various types and amounts of defects encountered in commercial products; to allow appraisal of the influence of the defects on the strength of the glass products, and to assist the sponsor in developing specifications for strengthened glass products for deep ocean use by means of consultation and testing.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0207, MICROBIAL CORROSION

W.P. IVERSON, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia

To investigate the role of microorganisms in the corrosion of metals in a marine environment. To perform basic studies on the mechanisms of microbial corrosion in the marine environment. To relate the results of these studies to current concepts on the significance of microorganisms in causing marine corrosion.

The corrosion rates of metals and alloys in sea water, natural and microorganism free, will be compared. In cases where the corrosion rates are greater in the presence of microorganisms, isolation of the microorganisms at the corroding surface will be undertaken. The effect of such microorganism (pure or mixed culture) to again produce corrosion will be studied. Identification of organisms found to be important in causing corrosion will be done, time permitting. Isolation of and study of previously known organisms (viz. sulfate reducers) reported to have been involved with corrosion will be studied to ascertain their importance in marine corrosion and to determine their mechanism of action.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0208, STEEL PILING

M. ROMANOFF, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia

Significance: To investigate the extent and causes of corrosion that occur on steel pillings in underground and marine environments and to determine the effectiveness of projective methods where corrosion is a problem. Results from this investigation are of benefit to all engineers in industry and government who are concerned with design, construction and maintenance of all types of structures using pillings.

Progress: Polarization and electrical measurements were made to determine the rate of corrosion on the pile specimens exposed in the extensive test sites at Dam Neck, Va (off-shore site) and Montreal, Quebec (underground site). Data obtained from previous inspections of steel pillings in underground service were evaluated.

Future Objectives: (1) Perform additional inspections at the offshore marine and underground test sites. (2) Evaluate data ac-

## 8. ENGINEERING AND TECHNOLOGY

cumulated over the past 7 years at 4 test sites in Mississippi and Louisiana, in cooperation with the U.S. Corps of continued investigation of (1) isolation, growth, and nutrition of blue-green algae, especially with marine forms. (2) Further investigation of phenomenon associated with single-cell growth of coccoid and filamentous blue-greens. (3) Investigation of induced mutation in blue-green algae; effective mutagens and optimum conditions for their use, possible development of selected auxotrophic or pigment mutants for approach to specific problems.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0209, METALS FOR DEFENSE

*M. ROMANOFF*, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia

Significance - (1) To obtain information on the performance of metals and other materials in underground, marine and fresh water environments and to investigate and develop methods to provide protection to such materials when required. (2) Provide consultation services to the sponsors (Prince Project) and investigate special problems, often of an emergency nature, involving the use of metals and other materials in various environments. Priority is given to these problems over other work.

Progress - A large amount of time has been devoted to special corrosion problems of a classified nature of long and short term investigations. Goals sought by the sponsors have been achieved with considerable benefit. Work has been continued on the evaluation of specimens of monel, Cupro-Nickel, ductile iron and titanium for exposures up to 8 years at 6 underground test sites. Reports for publication on these materials are in various stages of progress.

Future Objectives - Completion of the reports for publication mentioned above. Evaluation and preparation of reports on the corrosion behavior in soils of aluminum and aluminum alloys, and stainless steels. Annual inspections to be made at 6 soil sites and 2 water sites.

Papers - Results of NBS Corrosion Investigation in Disturbed and Undisturbed soils, Proc. of 12th Annual Appalachian Underground Corrosion Short Course, West Virginia University Tech. Bull. No. 86 (1967).

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0210, MECHANICAL PROPERTIES

*UNKNOWN*, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia

Work on the mechanical properties of matter and materials includes the development of methods of measurement applicable to liquids and solids under a variety of environmental conditions involving variations in method and rate of loading, the influence of temperature, pressure, etc. The work is important to extend our knowledge of the behavior of materials to cover new materials with unusual properties which characterize the material in a meaningful way, and to develop methods for evaluating the performance of important engineering combinations of materials ranging from composites of plastics and metals, to joints involving high strength aircraft fasteners, would include types required for undersea exploration vessels, to heavy built-up structural elements of buildings and bridges. Rate of change of load varies from zero for creep tests to ultrasonic frequencies. Temperatures of interest range from cryogenic nearly to the melting temperatures.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 8.0211, EFFECT OF PRESSURE ON MATERIALS

*C.E. WEIR*, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia

To develop and exploit techniques for determining crystal structures of high pressure (and simultaneously, if possible, high temperature) polymorphs in the range of 50 kb and 1000 degrees C. Structure data are needed for innumerable polymorphs for general understanding of properties of condensed phases.

The diamond anvil cell is being utilized in single crystal diffraction studies using precession techniques. At present a beryllium unit is in operation and has proved useful in unit cell and

space group determinations. Suitable absorption corrections have been worked out and the method is presently being applied to actual determination of atomic positions of a material stable only above 12 kb. The major problem arises from a high background on the films produced by incoherent scattering by the beryllium cell. The background limits the quantity of data obtainable.

### 8.0212, REINFORCED PLASTIC STRUCTURES

*E.A. BUKZIN*, U.S. Navy, Ship Systems Command, Washington, District of Columbia 20360

Objective: Develop high performance/high strength and modulus (lightweight) ship and submarine structures for advanced applications employing fiber reinforced plastics. Deck houses, masts, railings, etc for large ships where weight and microwave transmission problems are indicated; and deep submergence hull and appendage applications. Metallic materials are limited in depth capability unless augmented with considerable quantities of supplementary buoyancy.

Approach: While strength weight ratio of glass fiber and other fiber reinforced laminates are very attractive when small-scale tests are performed many problems such as fatigue, impact resistance, water absorption, long term stability, creep, closures, fabrication, etc need to be solved before their use can be specified for critical applications. These problems will be explored. For large boat hulls and structural components by tests of scale models. A survey of the state-of-the-art and latent progress will be made. Applicable design and production criteria will be assessed along with the cost effectiveness as compared with wood and aluminum. For deep submergence applications the approach will be as follows: Design, fabricate and test small-scale models including typical structural details to determine the material response to realistic loads and environment including short-term hydrostatic loading; creep, fatigue, aging, and dynamic loads. Compare results with those obtained in tests of models using other candidate materials and determine relative merit. If warranted, fabricate and test models of sufficient size to positively demonstrate potential of fiber-reinforced hulls for 20,000 ft operations. Effort is through industry and Navy Labs.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0213, STRUCTURAL PLASTICS-DEEP SUBMERGENCE

*E.A. BUKZIN*, U.S. Navy, Ship Systems Command, Washington, District of Columbia 20360

Objective: Develop fiber reinforced plastic composite materials, particularly glass reinforced plastics (GRP) and the fabrication technique quality assurance and inspection criteria to provide designers with reliable design data to employ such materials for deep submergence structures in vehicles for use where the weight displacement ratios of metals are unsuitable or less promising. The potential economic factors of cost, reliability and maintainability are additional stimulants for the use of the technology with these materials as compared to steel, titanium and aluminum alloys. The technology of GRP and the fundamental understanding of properties are further advanced than such materials as massive glass and ceramics which are competitors for such materials application.

Approach: The following efforts are underway and planned through industry and at Navy labs in conjunction with the studies on models and structures: interface problems of fiber, finish and matrix from the surface chemical, bonding and microstructure standpoint. Higher compressive strength, modulus and shear strength through the development of higher strength matrices. (i.e. new epoxy resins) and preregs. Microvoid minimization will achieve many if not all of the desired properties. Improved test assessment of cyclic fatigue and creep factors in the sea environment along with water permeation effects and methods to control same.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0214, BUOYANCY MATERIALS

*E.A. BUKZIN*, U.S. Navy, Ship Systems Command, Washington, District of Columbia 20360

## 8. ENGINEERING AND TECHNOLOGY

**Objective:** Low density materials with bulk modulus equivalent of higher than sea water is required for use in filling voids of today's submarines and surface ships to provide buoyancy for deep submergence vehicles, buoys and other structures whose weight displacement ratio is greater than water at the depth of interest and in addition, those materials provide shock protection for surface ships. Currently, syntactic foam (glass microspheres dispersed in a resin matrix) is available at a density of 43 to 44 L65/cu ft for use at 20,000 ft dept. Densities as low as 25 lbs/cu ft are required for future vehicles. It is planned to develop material system with the following densities: 30 and 25 PCF in the next five years, coordination will be maintained on these developments with those going in conjunction with the DSSP (PM 1) program for the development of the DSSV.

**Approach:** The development of lower density syntactic foam modules will involve the incorporation of larger glass ceramic spheres with the matrix in some predetermined mix. Improved resin matrices and spheres of varying diameters will be included in these studies. The major limitations involve reliability under cyclic loading sympathetic implosion of glass or ceramic spheres. Modular design and nondestructive test methods and standards which will be studied. Techniques of measuring and assuring uniformity of low density foam used in large voids of surface ships will be undertaken. This effort will be undertaken through industry & at Navy Labs.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0215, DIELECTRIC MATERIALS

**E.A. BUZKIN**, U.S. Navy, Ship Systems Command, Washington, District of Columbia 20360

**Objective:** With respect to dielectric materials, the task area will result in the following: develop a short term accurate method of classifying dielectric materials in terms of thermal endurance (time and temperature), 2 years and 300 deg C. Develop embedding compounds for deep submergence (23,000 ft) flooded electric motors; where high thermal conductivity is required and electronic packages resistant to deep submergence environments (20,000 ft). Update and develop specifications for dielectric materials particularly varnishes, sleeving, resistors and capacitors to reflect the current state-of-the-art and improve same as in the case of the studies related to the carborane polymer studies.

**Approach:** Temperature classification studies are being made employing thermal gravimetric analysis (TGA) and differential thermal analysis (DTA) studies and relating same to long term tests. Other methods to assess thermal endurance of dielectrics will be studied as well for specific materials such as diallyl phthalate (DAP) compounds. Navy developed embedding materials will be evaluated for induction motor stators for deep submergence. Designs and materials will be modified as test results dictate. Actual deep ocean exposures will be made on sample stators. Improved thermally conductive compounds will be employed using impregnating techniques developed by a Navy laboratory previously, with alumina in an epoxy matrix. Evaluate new and improved dielectric materials, including magnet wire and devise test methods as necessary to upgrade materials and specifications. Effort is through industry and at Navy labs.

### 8.0216, PRESERVATION OF WOODS IN THE MARINE ENVIRONMENT

**J.R. DEPALMN**, U.S. Navy, Oceanographic Office, Washington, District of Columbia

**Objective:** This effort will lead to a better understanding of fungal processes and wood boring animal action which each year account for approximately \$50,000,000 in wood destruction in the marine environment. Data are necessary to establish a baseline for understanding the composite ecology of wood surfaces and the interrelationships between wood destroying animals and associated microorganisms.

**Approach:** Six large and 36 small pine test blocks have been submerged at each of 20 worldwide test sites. These blocks will be periodically examined and estimations made of marine borer and fungal activity. Three of the test sites are in the United States territorial waters. Data from these test sites will be coordinated with data from the other test sites.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0217, SUPPORTING TECHNOLOGY AT NAVAL RESEARCH LABORATORY

**V.J. LINNENBOM**, U.S. Navy, Research Laboratory, Washington, District of Columbia

The development of improved techniques and instrumentation for work at great depths; and the development of an understanding of the part played by microorganisms in such Navy problems at marine fouling.

In deep ocean technology the approach is to develop reliable systems and components by acquiring off-the-shelf items for evaluation of by developing new instruments of high reliability. Microorganisms including single species of mixed systems are cultured in the laboratory and the systems are fractionated and the organic matter characterized biologically and biochemically. Field work evaluates the role of such organisms in producing peculiar distributions of matter.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0218, METAL ANALYSIS/TEST INSPECTION

**B.B. ROSENBAUM**, U.S. Navy, Ship Systems Command, Washington, District of Columbia 20360

**Objective:** Develop techniques and equipment for non-destruction testing (NDT) of ship hulls, frames, weldments, machinery and piping systems. There is a particular need for ultrasonic tests (UT) to inspect Tee welds in inaccessible locations. Inspection of all Tee welds of the hull integrity envelope of a modern submarine, using present procedures would require over 2500 man-days per ship for initial inspection only, with the ship in dry dock 5 to 6 months. The tests must be reliable, reasonably rapid, and quantitatively meaningful. Also, develop means for detecting crack initiation and growth after welding and for monitoring crack growth rate in-service e.g. while submerged.

**Approach:** (A) Develop and evaluate portable automated UT system for detecting and recording defect types, locations and sizes in hull weldments (1970); (B) Evaluate an acoustic spectrometer (Dickinson) system for remote UT of hull welds, Bu multiple transducers and computerized triangulation (1973); (C) Evaluate stress-wave analysis techniques (SWAT) for measuring fatigue crack growth in weldments to establish adequacy of nut accept-reject criteria and to monitor in-service crack growth in submarine hulls (1970); (D) Investigate fluoroscopy for inspection of castings and weldments (1970); (E) Investigate ultrasonimage systems to replace point-by-point scanning (1972); (F) Develop correlations between eddy current test (EC) indications for tubing and metallurgical defects, and establish acceptance criteria (1970); and (G) Develop and evaluate electronic UT calibration blocks to determine crack size and orientation, and effects of specimen finish and crack interfaces, on evaluation (1970).

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0219, STRUCTURAL TITANIUM ALLOYS -100 KSI YIELD STRENGTH

**B.B. ROSENBAUM**, U.S. Navy, Ship Systems Command, Washington, District of Columbia 20360

**Objective:** Develop a weldable titanium alloy of 100,000 psi (min) yield strength for deep submersibles but with further applications for weight critical high-speed surface craft such as hydrofoils and captured-air-bubble ships where high strength-weight ratio is required. The material must have adequate toughness, e.g., drop-weight-tear-test value of 2000 ft-lb (min) at 30 F transverse section; be homogeneous and weldable in sections up to 4 in thick; and not susceptible to stress-corrosion cracking in sea water. Calculations show that for a cylindrical 20,000 ft DSSV, a Hy 100 Ti is equivalent to a Hy 170 steel; for an 8 ft diameter sphere, to a Hy 225 steel. Such an alloy, including heavy section welding technology should be ready for prototype marine structural application by July 1968.

**Approach:** NSRDC (Annapolis) coordinates this task area and is responsible for alloy development and mechanical property and physical metallurgy investigation. NRL determines full thickness fracture toughness characteristics and toughness

## 8. ENGINEERING AND TECHNOLOGY

criteria; also stress-corrosion cracking susceptibility and fatigue crack growth characteristics. NASL is developing techniques for forming, welding, and nondestructive testing of heavy sections. Fabrication and quality control procedures developed in the laboratory will be applied in the construction of prototype structures and models which will be evaluated for marine use.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0220, STRUCTURAL TITANIUM ALLOYS -120/150 KSI YIELD STRENGTH

*B.B. ROSENBAUM, U.S. Navy, Ship Systems Command, Washington, District of Columbia 20360*

Objectives: Develop a titanium alloy of 120,000 to 150,000 PSI yield strength for deep submersibles and high speed surface craft such as hydrofoils where high strength-weight ratio is needed. It must have minimum drop-weight tear test toughness of 2000 ft lbs at 30F (transverse), be weldable in up to 4 in thicknesses, and resist stress-corrosion cracking in sea water. On a strength-to-weight basis, Hy 120 TI is equivalent to Hy 200 steel and Hy 150 TI corresponds to Hy 250 steel. For deep diving vehicles with hull weight/displacement ratios low enough for a useful payload, materials in this ranges are necessary. Titanium of 120 KSI has no real competition from steel in the near future. The TI-120 Y S should be ready for marine applications by September 1969; TI-15 Y S will take longer.

Approach: TI alloys of this strength are necessarily two-phase (alpha-beta) type. Extra-low interstitial (Eli) grade TI-6A-4V is being investigated as an Hy 120 alloy. NSRDC (Annapolis) coordinates this task area and is responsible for alloy development and mechanical property and physical metallurgy investigation. NRL determines full-thickness fracture toughness characteristics and toughness criteria; also, stress-corrosion cracking susceptibility and fatigue characteristics. NASL is developing techniques for forming, welding, and nondestructive testing of heavy sections. Fabrication and quality control procedures developed in the laboratory will be applied in the construction of prototype structures and models which will be evaluated for marine use.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0221, HY 130-150 STRUCTURAL STEELS

*B.B. ROSENBAUM, U.S. Navy, Ship Systems Command, Washington, District of Columbia 20360*

Objective: Develop and evaluate a structural steel in the 130,000 to 150,000 PSI yield strength range (HY 130/150), weldable under shipyard conditions in sections up to 4 in. thick. It must have adequate toughness (charpy v-notch, transverse of 50 ft.-lbs minimum at 0 degrees F), resistance to low-cycle, high-strath fatigue and minimum susceptibility to degradation under stress in sea water.

Approach: The major effort carried out by industry and Navy labs has resulted in the development of a family of Sr, Ni-Cr-Mo-V low carbon steels as optimum base metal compositions; the effect of residual elements (P, S, N, Al, O) have been established; weld wire compositions to permit weld metal properties equal or better than base metal are being developed; optimum melting, deoxidation practices are being established for producing commercial plates (up to 3 in.), forgings and castings. Full thickness fracture toughness criteria for base metal and weldments are being determined; also, crack propagation characteristics, service fatigue limits, service stress-corrosion behavior. The effects of thermal cycling during welding, of stress relief, and of weldment restraints on fatigue are being determined. Welding procedures are being evaluated by explosion bulge tests of heavy section weldments.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0222, HY 80-110 STRUCTURAL STEELS

*B.B. ROSENBAUM, U.S. Navy, Washington, District of Columbia*

Objective: Develop and fully evaluate structural steel in the 100,000 to 115,000 psi yield strength range (HY110), meeting the toughness requirements of current HY80 structural steel. The HY110 base metal will be an upgrading of the HY80 type alloy.

The pressin need is for welding wire to permit an over-matched weldment strength.

Approach: (A) Through industry and Navy labs develop and evaluate base plate to reduce weld heat affected zone (HAZ) cracking and lamination tendencies at HY100-110 levels--being performed under NavShips contract NOBS 94464. (B) Develop improved electrodes of 115 ksi y s, with consistently reproducible weldment properties. Greatest effort is required in covered electrodes: metal-inert gas (MIG) electrodes will probably result from existing contracts. (C) determine characteristics of new electrodes, and weldments therefrom, with regard to fracture toughness, fatigue, shock, and corrosion.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0223, ENERGY CONVERSION MATERIALS AND COMPONENTS

*B.B. ROSENBAUM, U.S. Navy, Washington, District of Columbia*

Objective. Develop materials for specialized application in direct energy conversion (DEC). Materials limitations are a major restriction to successful development of promising DEC technologies for Navy requirements. Major objective is development and evaluation of materials and components for fuel cell power plants: particularly for ambient pressure (free flooded) cells capable of operating for long periods under transient conditions, between sea level and 20,000 ft submergence. Components must be compatible with hydrazine fuel, hydrogen peroxide oxidant, and alkaline electrolytes (KOH) in anticipated ambient ocean environment. Also, the kinetics of reactions of various fuels with various electrode materials must be quantified. The developments are applicable to plants for deep submergence vehicles, swimmer delivery vehicles, and stationary underwater power plants. A long term objective is development of thin-film oxide (solid) electrolytes for ultimate use in high temperature direct hydrocarbon fuel cells.

Approach. Hydrazine-hydrogen peroxide fuel cells. Phase I--determine stability and electrochemical behavior of single cells and cell stacks in high pressure oxygen, hydrogen peroxide, hydrazine, potassium hydroxide seawater environment. Evaluate thermal and electrical insulating materials. Phase II--investigate long term effects of high pressure conditions on electrode kinetics and stability and on cell performance. Phase III--study nitrogen solubility in KOH electrolyte and effects of temperature and pressure changes on gas evolution (possibility of bonds during ascent from deep ocean). Phase IV--stability characteristics; handling and dissociating hydrogen peroxide under deep ocean conditions; Effect of impurities and friction on hydrogen peroxide dissociation. Thin film oxide electrolytes-phase I--develop acceptable techniques for producing thin film and single crystals of promising semiconductor electrolytes and quantitatively establishing their electrical and crystallographic properties. Phase II--study oxygen polarization, effects of field gradients on electrical and electronic properties, and effect of time and temperature on crystallography and properties. Phase III--construct and evaluate small experimental test cells. Effort is carried out through industry and at Navy labs.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0224, HY 180/210 STRUCTURAL STEELS

*B.B. ROSENBAUM, U.S. Navy, Ship Systems Command, Washington, District of Columbia 20360*

Objective: Develop and evaluate a structural steel in the 180,000 to 210,000 psi yield strength range (HY 180/210) with adequate notch toughness, fatigue strength, and general corrosion and stress-corrosion resistance.

Approach: Investigate work through industry and Navy labs includes concurrent efforts in base metal development, heat treatment, joining, and structural evaluation. Base metal and weld filler metal development includes precipitation hardening maragins steels, the proprietary Hp 9Ni-4Co family of quency-hardening steels, and most promising, a compositional dual-strengthened group combining both hardening phenomena. Heat treatment includes a consideration of the proprietary rapid multi-strengthening technique for grain refinement. Basic studies include strengthening mechanisms, embrittling phenomena, and effects of residual elements. Suitable weld filler metals which do not require

## 8. ENGINEERING AND TECHNOLOGY

post heat treatment must be developed and advanced joining techniques will be explored. Fracture toughness criteria will be established, and fatigue, corrosion, stress corrosion evaluated. Fabricated models will be tested under simulated service conditions in appropriate Navy facilities.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0225, MARINE FUNGI DEGRADATION

S.P. MEYERS, Univ. of Miami, Graduate School, Miami - Coral Gables, Florida 33124

The objectives of this research are (1) investigations of early fungal infestation to establish the significance of this population in wood degradation and its contribution to the biology of associated marine organisms, and (2) analysis of specific fungal destruction of cellulosic and other higher molecular weight substances.

Data are necessary to establish a baseline for understanding the composite ecology of wood surfaces and the interrelationships between wood destroying animals and associated microorganisms. This project will lead to a more accurate picture of fungal processes, and indirectly, to the mechanisms whereby wood boring animals benefit from activities of associated fungi. A clear understanding of the role of fungi in biodeterioration processes could lead to better methods for protecting pilings and other wooden objects placed in the sea. The yearly wood destruction loss in the United States marine environment is estimated at \$50,000,000.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0226, COMBUSTION OF RESIDUAL FUEL WITH MASSIVE RECIRCULATION

UNKNOWN, Illinois Institute of Technol., Graduate School, Chicago, Illinois 60616

This research provided quantitative data on the external recirculation rates required to reduce deposition and corrosion of metal exposed to combustion products from low grade residual fuel. Measurements of the effect of massive recirculation on combustion noise were made that showed that combustion noise was reduced to that of the background equipment, a reduction of 17 db. Conclusion was that massive recirculation of combustion gases back into the flame area produces: (1) substantial reductions in deposition and corrosion rate. With sufficient recirculation, the corrosion rate with residual fuels can be brought down to that of distillate fuel; (2) high vanadium accumulation in the recirculation line; (3) flame changes from an overventilated atomized flame to an underventilated, vaporized flame with very low flame luminosity; and (4) combustion noise reduction by a substantial amount - (15 db. in the tests).

The report PB-NO. 177-747 is available from the Federal Clearinghouse for Scientific and Technical Information, Springfield, Virginia 22151.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0227, FRICTIONAL RESISTANCE HULL SCALE AND COATINGS

UNKNOWN, U.S. Navy, Ship Research & Dev. Center, Caderock-washington, Maryland 20007

To determine the effect on frictional resistance from the normal build-up of paint, rust scale and localized peeling on a ship's hull, and the relative resistance characteristics of Maritime and Navy paints.

**DESCRIPTION:** In a joint project with SNAME Panel a 21-ft. friction plane first painted with Navy paints Mil-P-15929A Undercoat, Mil-P 159328B Primer, and then with the Navy primer and MarAd paints 52-MA-403C Topcoat, 52-MA-401B (3) Undercoats, has been run at 3 feet immersion in the towing tank. The results of these tests are being analyzed to determine the relative resistance of the coatings.

Tests are under way with the same friction plane covered with plastic molds made from master molds which were taken on a commercial vessel while in dry dock under the three following

conditions: a. Ship's bottom 'as is' when drydocked. b. After normal treatment for annual drydocking; i.e. hand wire brushing and scraping followed by application of one coat of anti-corrosive and one coat of anti-fouling paints. c. After blasting plate to clean metal and applying complete five coat anti-fouling system.

When completed, these tests will be analyzed to determine the relative effect of procedures a., b., and c. above, on ship resistance.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0228, MICHALES AND CORROSION

W.L. IVERSON, U.S. Dept. of Commerce, Natl. Bureau of Standards, Gaithersburg, Maryland (NAONR-14-67)

This research will consider anaerobic corrosion of metal and the part played by microorganisms in depolarizing cathodes. This includes the role of iron in metabolism of microorganisms, the role of substrate and electron donors in possible extracellular enzyme action in a corrosive environment, and the role of metal in the physiology of microorganisms.

Corrosion is a serious problem in sea structures exposed to the bottom mud zone. Very little is known about the fundamental biological, chemical, and physical processes whereby microorganisms contribute to corrosion. A combined biological metallurgical approach to the problem is essential.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0229, EFFECT OF INTERFIBER SPACING ON THE HIGH TEMPERATURE DEFORMATION OF Al-A13Ni COMPOSITES

H.C. LEWIS, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

To investigate the formability and high temperature tensile strength of Al-A13Ni fiber composites, directionally solidified tensile specimens were grown at four growth rates ranging from 3.5 to 9.4 cm/hr. and two nickel weight fractions, 6.13 and 6.2 wt. temperatures ranged from room temperature to 500 degrees Centigrade. The results showed a steep decrease in tensile strength with increasing temperature. Above 250 degrees Centigrade, however, the tensile strengths leveled off. The 6.2 wt % Ni composite showed better strength than the 6.13 wt % Ni composite. The tensile strengths increased with increasing growth rate from 3.5 to 5.2 cm/hr. At yet higher growth rates, it was found that microstructural defects were more prevalent than at the lower rates and the strengths decreased. The defects encountered were fiber depleted grain boundaries and banded areas of misaligned fibers. When both defects occurred simultaneously, the specimen failed in matrix shear with a low ultimate tensile strength. The percent elongation of the samples was generally from 1 to 2% before the ultimate strength was reached. For those samples that had a sufficiently defective microstructure, elongation was extensive after yield and occurred uniformly over the gage length. Multiple shear planes were aligned parallel to the eventual failure plane. Strain rate sensitivity tests on specimens that showed unusual elongation after yield resulted in a low strain rate sensitivity index that decreased with increasing % elongation.

### 8.0230, PRODUCTION OF PLATES OF FIBER COMPOSITES BY SOLIDIFICATION, FORMING AND A COMBINATION OF BOTH

W.L. MARSH, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

The purpose of this investigation was to determine the feasibility of unidirectionally solidifying the Al3Ni eutectic in plate form. The plates solidified displayed good fiber formation but poor fiber alignment. Tensile strengths achieved were nearly twice that of the as cast alloy but only half of strengths achieved in cylindrical specimens. Plates with thickness to width ratios of 2, 25, and 75 were grown and tested. The hot pressing of Al3Ni plates was found to increase the strength to more than twice that of the as cast alloy. However, it was found that the bond between

the plates was weak to the extent that the layers could be peeled apart.

SUPPORTED BY Massachusetts Institute of Technology

**8.0231, TEMPERATURE AND STRAIN RATE DEPENDENCE OF DEFORMATION IN AL-3NI-AL COMPOSITES**

**R.W. RENDER**, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

The intent of this investigation is to determine the elevated temperature properties of the Al3Ni-Al eutectic fiber composite. Specimens were grown from a 6.13 weight percent nickel eutectic alloy. Tensile tests were conducted over a temperature range from room temperature to ninety-seven percent of the absolute eutectic temperature. The maximum strength of the fiber composite decreased linearly from 44,000 psi at 25 degrees Centigrade to 5,500 psi at 600 degrees Centigrade. These strengths are superior to 2024 T6 and 7075 T6 high strength aluminum alloys at temperatures above 300 degree Centigrade. The room temperature strength of the as cast alloy is approximately 13,000 psi.

The fiber morphology remained stable and did not appear to coarsen throughout the range of test temperatures. Deformation of the composite showed a low dependence on temperature and strain rate.

SUPPORTED BY Massachusetts Institute of Technology

**8.0232, PILING PRESERVATIVES THRESHOLD STUDIES**

**B.R. RICHARDS**, William F. Clapp Laboratories, Duxbury, Massachusetts 02323

Objective: To determine what changes occur in woods (treated with various preservatives and exposed in coastal waters) to cause these treated woods to lose their resistance to attack by marine borers and fouling organisms.

Approach: Wood panels of several woods were treated with various preservatives and amounts of preservatives. Panels of 18 different treating systems were placed under exposure in Boston Harbor, Mass. in July 1964. In the same month 27 systems were exposed in the waters of Whightsville Beach, N. C. Sufficient samples were prepared to remove 3 samples of each treatment system plus one control panel from each location every 6 months for 5 years plus additional samples for subsequent removal annually. When removed the test panels are chemically and biologically analyzed for changes.

SUPPORTED BY U.S. Dept. of Defense - Navy

**8.0233, DEEP-WATER FOULING**

**H. TURNER**, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543 (NONR)

Analysis of data will be concluded on research undertaken to determine the quantity and kinds of sedentary marine organisms that attach and grow on installations set at a series of depths in the open ocean and form a fouling community that may affect the performance of instruments. Studies were also conducted to devise simple, reliable moorings that could be set from relatively small vessels at a reasonable cost. The phenomenon of damage to deep-water moorings and submerged installations by predaceous fishes was investigated.

As more activities are being planned for deep ocean localities, it is essential that the ecological characteristics of this environment be better understood. The little information available makes it clear that assumptions based on extrapolation from shallow water conditions are invalid in most cases. Whether or not biological fouling plays an important role at great depths and what its nature may be, needs to be determined. The nature and severity of attack by abyssal fishes on moorings and other artifacts in the deep ocean must be known as well as the identification of the animals involved.

SUPPORTED BY U.S. Dept. of Defense - Navy

**8.0234, WAVE FORCES ON BREAKWATERS**

**A.M. KAMEL**, U.S. Army, Waterways Experiment Sta., Vicksburg, Mississippi

## 8. ENGINEERING AND TECHNOLOGY

The objective of this project is to develop a theory and obtain experimental data on wave pressures from which the magnitude, duration, and location of wave pressures and impact forces on full-scale breakwaters of the vertical wall and composition types can be predicted.

SUPPORTED BY U.S. Dept. of Defense - Army

**8.0235, BIOLOGICAL OCEANOGRAPHY AND DETERIORATION, POLYMER STUDIES**

**E.C. FISCHER**, U.S. Navy, Applied Sciences Lab., Brooklyn, New York 11251

Objective: To identify the chemistry and biology of high molecular weight friction reducing bio-polymers.

Approach: Chemical and physical studies will be made on the isolated polymers followed by the characterization and correlation of polymeric substances with plankton species. A broad based theory of occurrence, use and importance will then be formulated.

SUPPORTED BY U.S. Dept. of Defense - Navy

**8.0236, BIOLOGICAL OCEANOGRAPHY AND DETERIORATION, DEEP OCEAN-HIGH PRESSURE BACTERIA**

**E.C. FISCHER**, U.S. Navy, Applied Sciences Lab., Brooklyn, New York 11251

Objective: To determine the role of deep sea microorganisms in the corrosion and deterioration of deep submergence structures and instruments placed on the ocean floor, and deep research vehicles. To develop suitable corrosion preventive methods and provide consultation on problems involving biological oceanography.

Approach: Obtain specimens of world wide ocean bottom sediments and determine chemical and biological content. Isolate, identify and determine corrosive influence of microorganisms in laboratory simulated deep sea environments. Determine the relation of ecology to the bottom zone influence in accelerating corrosion rates. Determine the mechanism of microorganism attack on metals and organic materials. Correlate lab results with natural deep sea immersions. Determine influence of galvanic metal couples and organic materials on microorganism activity, the effect of environment on this influence.

SUPPORTED BY U.S. Dept. of Defense - Navy

**8.0237, EVALUATION OF BOOTTOP PAINT SYSTEMS FOR OCEANGOING SHIPS IN A BOOTTOP PAINT TESTING MACHINE**

**UNKNOWN**, Battelle Memorial Institute, Columbus, Ohio 43201  
This project evaluated the use of ship bottom paints under conditions which partially simulated the water flow conditions to which a paint film is subjected on a ship at sea. Thirty-three coating systems were tested and evaluated by applying the paint films to a cylindrical surface which is rotated constantly in a water tank.

The studies showed the importance of proper application, surface preparation, and drying between coats. The paints were separated into groups rated as: best, intermediate, and poorest performance. Both conventional and high-build vinyls were included in the group, and all systems used a poly-vinyl butyral wash primer.

Excellent performance of high quality catalyzed epoxy coatings was noted. The report discusses this performance with respect to application over inorganic zinc silicate coatings. Factors which may have contributed to the various types of failures were noted in several of the films. One of these factors was that the lack of sandblasting contributed to poor paint performance.

Each film is identified by source, coating type and color, number of coats, method of application, drying time, and thickness. Certain of the test drums were photographed on black and white film to illustrate condition after certain numbers of days of continuous rotation in seawater at speeds simulating a ship moving within the range of 18.8 to 20 knots. The report PB No. is available at the Federal Clearinghouse for Scientific and Technical Information, Springfield, Virginia, 22151.

## 8. ENGINEERING AND TECHNOLOGY

### 8.0238, MOBILITY OF OIL-TYPE PRESERVATIVES IN IMMERSERD WOOD

*D.J. MILLER*, Oregon State University, Agricultural Experiment Sta., Corvallis, Oregon 97331

**Objectives:** To describe the movement of oil-type preservatives in treated wood immersed in water.

**Abstract of Procedures:** Laboratory tests will examine the effects of water temperature and flow on migration of creosote along radial and longitudinal axes of treated specimens of Douglas fir and southern pine sapwood. Marine exposure to induce and describe patterns of creosote migration in small piling immersed in marine waters.

SUPPORTED BY Oregon State Government

### 8.0239, FOULING OF SENSORS

*W.E. PEQUEGNAT*, Texas A & M University System, Graduate School, College Station, Texas 77843 (NOKR)

The principal objectives of this task are to discern the nature of the accumulation of fouling organisms upon artificial substrates, some of which are partially protected by equatorial attachment of a teflon band impregnated with organotin, to observe the impact of various parameters on the nature and rate of growth of the accumulation; to evaluate the effectiveness of organotin as an inhibitor; and to suggest means of providing functional integrity of sensors during relatively long periods of immersion in the sea.

This task is expected to provide a better understanding of the parameters affecting oceanographic sensors which might be employed by environmental systems implanted for prolonged periods.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0240, ANTI-FOULING MEANS FOR MARINE PROPELLERS

*S. HAWKINS*, Robert Taggart Incorporated, Fairfax, Virginia 22030

The serious effects upon ship performance of a fouled propeller have been substantiated and a means devised to prevent this fouling from occurring.

SUPPORTED BY Robert Taggart Incorporated

### 8.0241, THE ROLE OF MARINE ORGANISMS IN THE DEGRADATION OF NAVAL MATERIALS

*J. LISTON*, Univ. of Washington, Graduate School, Seattle, Washington 98122

This research within the Task Area of Marine Microbiology is concerned with rates and mechanisms of degradation, solubilization, and mineralization of organic residues from marine plants and animals by marine bacteria. Experiments are being conducted in a series of model sea bed systems which provide conditions similar to those actually occurring in the sea. These models are dynamic flowing sea water systems which permit observations to be made throughout a complete cycle of microbial enzyme-catalyzed transformations.

This investigation relates to microbial transformations as they effect functioning and maintenance of Navy hardware.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0242, MARINE PILING ANALYSIS

*T.C. SCHEFFER*, U.S. Dept. of Agriculture, Forest Service, Madison, Wisconsin

To evaluate wood treated with waterborne copper compounds; conduct follow-up studies on pilings that have given either unusually good or very poor service; and improve methods for assaying treated piling and analyzing for creosote. Samples of piling having authentic histories are obtained and analyzed in the laboratory. Short fence post sections of both Southern pine and Douglas fir were treated with a variety of preservatives using two treatment methods and were exposed at Key West and San Diego. Wood specimens examined in connection with this Work Unit also undergo a microbiological study.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0243, MICROBIOLOGICAL INVESTIGATIONS OF THRESHOLD PANELS

*R.L. YOUNGS*, U.S. Dept. of Agriculture, Forest Service, Madison, Wisconsin

To determine if marine fungi and bacteria are a significant factor in the degradation of marine timber preservatives or in the initiation of attack by marine borders.

Marine exposed panels used in connection with other existing investigations are being sent to the Forest Products Laboratory for examination. The examinations include identifications of the principal marine fungi and bacteria and determination of the relationship between species of micro-organisms and kind of preservative, kind of wood, or locality of exposure. Cultures of isolated organisms will be maintained for possible continuation of study in order to determine quantitatively the capacities of the organisms for degrading preservatives.

SUPPORTED BY U.S. Dept. of Defense - Navy

## 8K. MINERAL SAMPLING, EXTRACTION, AND PROCESSING

(see Also Chapter 7a on Economic Geology)

### 8.0244, LABORATORY STUDIES TO CORRELATE ENGINEERING PROPERTIES OF MARINE PLACER MATERIALS WITH SAMPLING TOOL PERFORMANCE

*E.L. CORP*, U.S. Dept. of Interior, Marine Min. Technol. Ctr., Belvedere - Tiburon, California 94920

Extensive background work has been done to become familiar with the current state-of-the-art in submarine geotechnique. Based on this work, a tentative classification system has been devised for marine placer deposit so that samples obtained at sea and soils used in MMTC laboratory can be adequately described. The test equipment required for measuring these classification parameters has been procured and is currently in storage awaiting completion of the environmental mechanics laboratory to house it. This laboratory will be set-up and placed in operation following the two summer offshore campaigns.

Initial utilization of the laboratory will be for additional engineering properties tests on the offshore samples and for conducting a series of tests to evaluate the effects of gold migration during sampling. In addition, engineering properties testing will be done to assist the work of other projects.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 8.0245, LABORATORY MODEL STUDIES OF PENETRATION INTO A SIMULATED COHESIONLESS DETRITUS

*M.J. CRUICKSHANK*, U.S. Dept. of Interior, Marine Min. Technol. Ctr., Belvedere - Tiburon, California 94920

Previous work by Colp (1965) on 'An experimental investigation of the continuous penetration of a blunt body into a simulated cohesionless soil' has shown the value of using a roller bearing matrix to simulate a detritus and photographing the pressure distributions and particle displacements resulting from penetration of the matrix by a solid body.

The results of such tests using shapes of varying geometry and using different methods of application of the penetrating force could be of significance in the development of undersea sampling and excavation techniques. The major part of the experimental setup necessary to conduct the tests has been obtained, but actual testing has been postponed until laboratory facilities are available.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 8.0246, ENGINEERING EVALUATION OF EXISTING DREDGE SYSTEMS AND OPERATIONS

*M.J. CRUICKSHANK*, U.S. Dept. of Interior, Marine Min. Technol. Ctr., Belvedere - Tiburon, California 94920

This is a continuing study of dredging operations which will allow maximum knowledge to be acquired of past and present systems in industrial use. Analysis of these systems will permit sound decisions to be made in planning future areas for research and development and will permit realistic projections to be made for proposed marine mining operations requiring dredging.

## 8. ENGINEERING AND TECHNOLOGY

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 8.0247, DEVELOPMENT OF AN ELECTRONIC METHOD FOR THE AUTOMATIC SHIPBOARD RECORDING OF DRILL PERFORMANCE DATA

R.L. JENKINS, U.S. Dept. of Interior, Marine Min. Technol. Ctr., *Belvedere - Tiburon, California 94920*

In order to be able to better analyze the performance of the delineation devices aboard the ship an electronic data acquisition system has been designed and assembled for recording on strip chart and magnetic tape, 15 parameters that affect the operation. The following data will be recorded: 1. Time 2. Drill operator's voice, giving depth of hole, sample interval, and any problems encountered. 3. Ship's roll and pitch. 4. Velocity and direction of ocean currents. 5. Velocity and direction of wind. 6. Speeds of electric motors driving hydraulic water pumps. 7. Hydraulic pressure (2). 8. Air or water pressure and flow to drill pipe. 9. Impact force applied to drill pipe. 10. Penetration rate of drill bit into sediment.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 8.0248, DEVELOPMENT OF DIAMOND DRILLING TECHNIQUES, FOR PHOSPHORITE DEPOSITS, USING STANDARD TOOLS PLUS BUOYANCY TANKS

A.H. LENSE, U.S. Dept. of Interior, Marine Min. Technol. Ctr., *Belvedere - Tiburon, California 94920*

Initial phases of drilling operations conducted by MMTC with rotary equipment have demonstrated poor capabilities for coring in anything but solid bedrock. Drilling operations in unconsolidated sediments utilizing percussion or vibratory driving and water or air flushing improved the volume of sample recovered but the sample poorly represented the physical nature of the sediment penetrated. Recent emphasis has been devoted to the development of equipment which will provide a relatively undisturbed core of even loosely consolidated sediments in shallow ocean depths. These parameters of research have not been expanded to include extremely broad ranges of sediment consolidation in relatively deeper waters.

Arrangements are proceeding with E. J. Longyear Company of Minneapolis to test their recently patented, rotary, controlled buoyancy drilling system.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 8.0249, DEVELOPMENT OF WIRE-LINE CORING TECHNIQUE FOR SAMPLING UNCONSOLIDATED DEPOSITS

A.H. LENSE, U.S. Dept. of Interior, Marine Min. Technol. Ctr., *Belvedere - Tiburon, California 94920*

During the summer of 1967, MMTC conducted an offshore heavy metals research project off the southern coast of Seward Peninsula in the vicinity of Nome, Alaska. Results indicated that relatively rapid penetrations of shallow ocean-floor sediments could be accomplished from surface craft but only inconsistently yielding characteristics samples of the quality and quantity necessary for accurate delineation studies.

Though the Becker Hammer drill had been successfully adapted to ship-board operation, it produced samples reliable only for mineral content and identification analyses, not for studies of engineering properties. Therefore, the Becker drill system is being adapted to a wire-line coring technique capable of producing an essentially undisturbed sample of ocean-floor sediments. Initial tests will be made on the Oregon-California Marine Heavy Metals Project.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 8.0250, DEVELOPMENT OF MARINE CHURN DRILL FOR SAMPLING UNCONSOLIDATED DEPOSITS

R.D. OBRIEN, U.S. Dept. of Interior, Marine Min. Technol. Ctr., *Belvedere - Tiburon, California 94920*

A single wall drill pipe that will take a wire-line core barrel, will be driven by a 1,000-pound hammer encircling the pipe. Other innovations will be a conical topped buoyancy tank to maintain verticality when drilling starts and to guide the core bar-

rel on re-entry to the device. The re-entering core barrel will be lowered on a sand line guided along the hammer hoist line by a small vaned trolley.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 8.0251, LITERATURE SEARCH AND PRELIMINARY ENGINEERING STUDIES OF ENVIRONMENTAL PROBLEMS ASSOCIATED WITH MARINE DEPOSIT DELINEATION TECHNIQUES

R.D. OBRIEN, U.S. Dept. of Interior, Marine Min. Technol. Ctr., *Belvedere - Tiburon, California 94920*

This will involve a search of the literature to acquire data generated by offshore oil drilling companies, JOIDES, or others regarding the effect on drill pipe of lateral loading caused by ocean currents as well as data on materials corrosion in sea water.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 8.0252, LABORATORY MODEL STUDIES ON DISTURBANCE OF DETRITUS BY PENETRATION

D.E. STEPHENSON, U.S. Dept. of Interior, Marine Min. Technol. Ctr., *Belvedere - Tiburon, California 94920*

One of the major problems of obtaining representative samples from marine deposits and meaningful data as to engineering properties is the amount of disturbance caused by the technique used. A quantitative study of this disturbance on a laboratory scale will give much insight into methods of penetration which can be used at sea to obtain a time representative sample.

The study will be done using a granular material submerged in hydro-carbon solution which will simulate water but will not disturb the material when it freezes. Models will be 6-inch diameter by 12-inch high cylinders of uniform sediments with known properties. The drill rod will be simulated by a 1-1/2' diameter pipe capable of being fitted with various bit configurations and capable of being driven by different method of energy application. After penetration is completed the model will be placed in a freezer until solid and then sectioned for study.

A three-dimensional observation of the disturbance in the core and surrounding sediments will be possible in the area of the drilled hole.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 8.0253, LABORATORY MODEL STUDIES ON PRESSURE DISTRIBUTION IN DETRITUS DURING PENETRATION

D.E. STEPHENSON, U.S. Dept. of Interior, Marine Min. Technol. Ctr., *Belvedere - Tiburon, California 94920*

Much work has been done on the response of soil and rock to large scale dynamic loading in the past few years, but as yet little is known of the behavior of marine material in dynamic loading. The work on this project is concerned with small scale loading and the effects it has on the placer-type deposits.

The project is designed around the use of unique pressure transducers and their ability to give meaningful results. If it is determined that useful data can be obtained with them several series of tests will be performed in the laboratory.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 8.0254, FINITE ELEMENT TECHNIQUES

D.E. STEPHENSON, U.S. Dept. of Interior, Marine Min. Technol. Ctr., *Belvedere - Tiburon, California 94920*

Mathematical models based on the finite element method of stress analysis is becoming one of the main tools in rock and soil mechanics for determining magnitude and direction of the stresses and displacements. In the finite element method of analysis, a continuous solid is modeled by an assemblage of a finite number of interconnected elements. The method's versatility is in the fact that each element can have completely different material properties and, in addition, linear relationships may be used. Any geometry or slope can be modeled for used in the method. The method will be applied to various problems of marine mining technology where it will be advantageous to know the response of the seafloor to load phenomena.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

## 8. ENGINEERING AND TECHNOLOGY

### 8.0255, ACOUSTIC HOLOGRAPHY

*D.E. STEPHENSON*, U.S. Dept. of Interior, Marine Min. Technol. Ctr., *Belvedere - Tiburon, California 94920*

Recently the principle of reconstructed wave fronts has been extended to the formation of visual pictures of acoustical waves. This method yields better results than conventional acoustical lens systems especially in the presence of turbidity thereby making it a useful method for control of systems underwater. The method is based on the process in which the diffraction patterns of an object irradiated by sound waves is biased by a coherent reference wave and recorded; the record is then the acoustical hologram. A three-dimensional visual image can be created when the acoustical hologram is interrogated with a suitable coherent light source.

This will allow for the inspection and control of mining operations at depth in the ocean without the need for direct observation by divers or persons in submersibles.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 8.0256, DEVELOPMENT, TESTING AND EVALUATION OF MODIFICATIONS REQUIRED TO ADAPT DRILLING SAMPLING SYSTEMS TO THE PLATFORM

*K.E. TAYLOR*, U.S. Dept. of Interior, Marine Min. Technol. Ctr., *Belvedere - Tiburon, California 94920*

To develop, design, test and evaluate the modifications and changes required to accommodate the various different types of drilling equipment presently planned for use on board the R/V VIRGINIA CITY, and any future requirements which might result from further research and development of drill systems.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 8.0257, LABORATORY MODEL STUDIES OF COMPARATIVE METHODS OF PENETRATION OF DETRITUS

*O. TERICHOW*, U.S. Dept. of Interior, Marine Min. Technol. Ctr., *Belvedere - Tiburon, California 94920*

A survey of mining fragmentation technology has disclosed the existence of various methods available for in situ disintegration of marine deposits. The methods of penetration are conveniently classified by the type of energy applied to the working tool.

Mechanical energy which was the first to be investigated showed certain interdependence between the rate of energy application and the resistance to penetration of granular media.

Static penetration tests of a tubular body into sand have yielded an understanding of the granular deposit response to static loading. Dynamic loading to determine the penetration characteristics, at high to very high velocities of the tube, are planned.

Sampling reliability has been tentatively evaluated in conjunction with information on relative disturbance of the sample, using data from the 1967 Alaskan field work.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 8.0258, BACKGROUND AND EXPLORATORY STUDIES OF MATERIALS HANDLING IN THE MARINE ENVIRONMENT

*O. TERICHOW*, U.S. Dept. of Interior, Marine Min. Technol. Ctr., *Belvedere - Tiburon, California 94920*

This project has multiple aspects which can be conveniently divided into 3 major areas:

(1) Investigation of the energy requirements to remove mineral particles hydraulically from an unconsolidated granular deposit. This requires study of kinetic energy distribution of a submerged water jet to disrupt cohesion of particles. Other methods will be tested. (2) The development of certain marine mining systems may depend upon excavating equipment operating remotely on the seafloor. The process of mechanical cutting of the seafloor deposit by rotary process is relatively complex. Its efficiency depends on many external and environmental conditions. Analytical work is scant, and sole dependence is on the experimental approach. The proposed investigation will provide information in the areas which are now entirely uninvestigated or are obscure. (3) Related to the above is the study of methods for

transporting materials from the seafloor. The transportation process is the continuation of the first step of underwater mining. The scope of the investigation will include determination of parameters which affect vertical or horizontal pipeline transportation of mineral particles or ore material to the surface for further processing.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 8.0259, DEEP SEA MINING PROJECT

*J.L. MERO*, Ocean Resources Incorporated, *San Diego, California 92121*

Ocean Resources, Inc., an ocean exploration and mining consulting firm, was engaged to design a mining system and to test the system in about 1,000 feet of water for the mining of mineral containing rocks from the ocean floor. The equipment was designed and tested on an industrial production scale with hundreds of tons of rock being successfully dredged from the design depth. The test was highly successful in that the rock was recovered at a production cost well within that to be considered economic for the commercial mining of this type of material. The test was carried out in the Pacific Ocean.

SUPPORTED BY No Formal Support Reported

### 8.0260, VISCOSITY AND VISCOELASTICITY OF LIQUIDS AND GLASSES

*J.E. MCKINNEY*, U.S. Dept. of Commerce, Natl. Bureau of Standards, *Washington, District of Columbia*

To develop and improve techniques for the measurement of rheological properties of liquids and glasses (both low molecular weight and polymeric as functions of temperature and pressure, in the pressure range from 1 to 2,000 atmospheres. Viscosities of liquids in this pressure range are needed for both technological and scientific purposes (design of hydraulic systems, checking concepts in theories of transport phenomena), but validity of usual measurements has not been established. In the glassy range, where the approach to equilibrium is slow, the manner in which properties depend on both thermal and mechanical histories is not established.

Increase the frequency range of our dynamic bulk modulus measurements of polymeric liquids and glasses, needed to check current theoretical concepts. Establish the limits of validity of the torsion crystal viscometer, which seems to offer the best prospects of increasing the accuracy of viscosity measurements in the above pressure range. Examine the influence of both thermal and mechanical histories of PVT relations in the glassy and transition regions.

Progress: March through December 1967. A digital phasometer, capable of measuring phase angles to 0.01 degrees from 10 kHz to arbitrarily low frequencies was completed and tested. This is a significant improvement over anything previously available. In addition to our use with the bulk modulus apparatus, it is likely to find other applications. (The Navy Underwater Sound Laboratory at New London is already using it to check the performance of special amplifiers in sonar systems.) A companion instrument to measure voltage ratios at low frequencies was designed and constructed, and is being tested. The other needed modifications to operate the bulk modulus apparatus down to well under 1 Hz have been planned and should be constructed and assembled within a few months.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

## 8L. PLATFORM DESIGN AND MAINTENANCE

(ships, Buoys, Rigs, Submersibles, and Other Platforms.)

### 8.0261, SHIP STRUCTURE LABORATORY TESTING AND ANALYSES

*UNKNOWN*, Univ. of California, Graduate School, *Berkeley, California 94720*

Purpose: To develop lower cost basic hull designs by structure simplification and by upgrading material/structural effectiveness.

## 8. ENGINEERING AND TECHNOLOGY

Description: Analytical studies have been performed in the following areas of interest: structural response to slamming (wave impact); effect of variations in framing on fabrication cost; application of high strength steel; and methods for determining strength of plating and hull structures. A special drop weight test facility has been developed for slamming studies which utilizes relatively large specimens to represent ship bottoms. Using this facility, an indication of the effect on the pressure time history is being achieved for the following variables: (1) amount of air trapped between the ship bottom and the water surface, (2) the inertia of the slamming ship, and (3) the stiffness of the bottom plating. Empirical evaluations are also being made using a 40-foot structural model of a ship midbody section to verify some of the analytical results and to determine the merits of longitudinal framing for double bottoms with variations in hatch sizes, pillars and bulkheads while under the influence of simulated static wave conditions.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0262, ECONOMIC ANALYSIS OF THE SHIP MAINTENANCE FUNCTION

UNKNOWN, Litton Industries Incorporated, Culver City, California

Purpose: To devise a method for determining the most cost effective ship maintenance policy, considering investment, ship-board maintenance and shore maintenance factors.

Description: Investigations are being undertaken to develop a method for determining the most economic means for performing ship maintenance regardless of operator, trade route or ship characteristics. The initial effort is directed toward a review of ship operator records to determine what data are available and current policies. Following this review a data plan will be prepared prescribing specific new basic data that will be needed, ships and voyages to be utilized in a survey to obtain these data, and the supplementary data to be collected in order to present a complete matrix on ship maintenance.

Once collected and analyzed, alternative maintenance policies will be investigated to determine where the greatest potential payoffs will be.

A more detailed analysis of specific 'policy sensitive maintenance' actions will follow serving as the basis for the development of a maintenance management system. The developed system will be tested and alternative maintenance policies re-evaluated. The study will conclude with a recommended maintenance management system to achieve a most cost-effective ship maintenance policy.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0263, PASSIVE BUOYANCY SYSTEMS

L.G. HALL, North Amer. Rockwell Corp., Long Beach, California 90803

Efficient buoyancy systems are being sought to fulfill the performance requirements of submerged manned and unmanned vehicles, structures, and equipment. Preliminary studies have indicated that buoyancy materials of 31 lbs. per cubic foot (pcf) are feasible. A research program conducted by Ocean Systems Operations of North American Rockwell was directed at achieving a development goal of a 34 pcf buoyancy material. The research effort determined that it was feasible to make syntactic foam of 40 pcf or less meeting preliminary test requirements for depths to 20,000 feet. The feasibility of casting multiple 3 inch O.D. pyrex spheres in an array with accurate juxtaposition in a syntactic foam matrix was also demonstrated. A hexagonal prism with a density of 34 pcf was achieved and survived tests at 17,000 psi. Accurate positioning of high-strength macrospheres encapsulated in syntactic foam required special manufacturing techniques. During the research program emphasis was placed on the process and producibility factors which would provide good quality control. The results of the research are presented in an internal technical report, 'Development of a Passive Buoyancy System for 20,000 Foot Depth,' T8-744/020, April 1968, prepared by L.G. Hall and A.R. Quinn.

SUPPORTED BY North American Rockwell Corporation

### 8.0264, DEEP SUBMERGENCE VEHICLES - DYNAMIC ANALYSES

A.D. NEWSHAM, North Amer. Rockwell Corp., Long Beach, California 90803

This research project concerned the definition and development of the testing and data acquisition techniques necessary to obtain accurate hydrodynamic data on marine class bodies -- as well as the subsequent incorporation of these results into dynamic analyses of vehicle motion. Experimental air/water tests were conducted to define hydrodynamic parameters, and the resulting data was combined with theoretical analysis to define vehicle characteristics. This data was prepared in format suitable for guide retrieval and use with analytical tools for vehicle and system design. Project milestones included vehicle mathematical models, synthesis of hydrodynamic data, rotation testing, superposition testing, free surface operation, added mass estimation and hull-interference on toil surfaces. A significant portion of relevant data was acquired from test programs concerning North American Rockwell's Beaver Mk IV submersible work/research boat.

SUPPORTED BY North American Rockwell Corporation

### 8.0265, RESEARCH SUBMARINE BEAVER MK IV

G. TUTTLE, North Amer. Rockwell Corp., Long Beach, California 90803

A program of applied research was conducted in support of the development of North American Rockwell's Beaver MK IV Submarine Work Boat. The research was directed at achieving advances in a number of specific technological and operational areas, which included: Integrated Control and Display System; Manipulator Systems; Underwater Construction Tools; Components and Subsystems.

The results of this research were directly applied to the development of advanced, high performance systems for utilization in a high pressure marine environment. Extensive laboratory and field tests were conducted on samples and prototypes of candidate units to establish high degrees of reliability and confidence in those systems and components being incorporated into the Beaver IV. Beaver MK IV, a manned work/research submarine is to be launched in September 1968. Beaver is an on-site vehicle designed to perform a wide variety of undersea work assignments. Vehicle capabilities include diver lock-out potential down to 1000 feet and dry test bed in undersea systems development experimental and test programs.

SUPPORTED BY North American Rockwell Corporation

### 8.0266, WAVE UPLIFT FORCES ON HORIZONTAL PLATFORMS

F. RAICHLEN, Calif. Inst. of Technology, Graduate School, Pasadena, California 91109

The underside of a platform intersecting the crests of a train of water waves is exposed to high transient pressures. The specific objective of this research is to study theoretically and experimentally the pressure distribution and resultant forces associated with these transient pressures.

A more detailed fundamental approach is necessary in order to gain a better understanding of the relationship between the characteristics of the incident wave and the resulting pressure distribution when a finite plane surface intersects the wave crests. It is the primary objective of this research to deal with this basic problem with attention being given to the relation between the detailed structure of the pressure distribution and the details of the causative waves.

SUPPORTED BY U.S. National Science Foundation

### 8.0267, DEEP RECOVERY SYSTEM

R.K. HELLER, U.S. Navy, Undersea Warfare Center, Pasadena, California 91107

Objective: Provide a capability for unmanned underwater location and recovery of objects from the sea floor. Recovery is important in studying performance and in the case of malfunction for determining requirements for design modifications and/or

## 8. ENGINEERING AND TECHNOLOGY

operational usage. This capability can have additional important uses such as inspection and surveys of underwater equipment. An ultimate operating depth capability of 20,000 ft is required. The immediate goal is a depth capability of 7000 ft to be achieved during the second quarter of FY 70.

**Approach:** The Naval Undersea Warfare Center has developed the cable-controlled underwater recovery vehicle (CURV), the present model of which has a depth capability of 2500 ft. This project provides for the development of the technology required for extending the depth capability of unmanned systems. The actual construction of such advanced equipment is funded by other sources. Achievement of increased operating depth requires development of improved television viewing systems, acoustic detection systems, remote handling equipment, and propulsion units capable of operating at the enormous pressures existing at the ocean depth. Noncollapsible buoyance materials are a special need. Transmission of electrical power, and command and control signals from the support ship, via the lengthy cable, to the under vehicle, for example, requires an advancement in technology. Specialized navigational devices are required to determine the CURV vehicle's position on the bottom with respect to the support ship. These technological problems must be solved to provide the design criteria for construction of advanced CURV vehicles.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0268, TELEMETERING BUOY SYSTEM FOR OCEANOGRAPHIC RESEARCH AND ENVIRONMENTAL PREDICTION

**R.F. DEVEREUX**, General Dynamics Corporation, San Diego, California (NONR)

This task covers the development and deployment of a long range telemetering oceanographic buoy system for use in the Navy's basic oceanographic research program. The development of this buoy is of great importance to the Navy for use in its programs of oceanographic research and in the development of future environmental prediction systems. It will undoubtedly influence the development of future detection and weapon systems and the design of a national buoy system.

This effort involves further engineering development and field operation of two long range telemetering ocean buoys for use in oceanographic research. Work includes continued evaluation of entire buoy system, including meteorological and oceanographic sensors, mooring lines, buoy electronics, mobile data center, and buoy-to-shore radio communication. Convair will coordinate with SIO in exploratory deployment of buoys in N. Pacific. This task will provide for buoy handling and servicing at sea. During the year's deployment, a mobile data center will be operated by Convair to receive data by telemetry from buoys, record and scale data, perform limited data processing and disseminate these data to agreed research and operational users.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0269, OCEANOGRAPHIC ENGINEERING

**J.D. FRAUTSCHY**, Univ. of California, Scripps Inst. of Oceanography, San Diego - La Jolla, California 92038 (NONR)

The objective is to develop designs as well as advise on and supervise construction and testing of oceanographic ships, devices and techniques to meet the advancing needs for oceanographic platforms and equipment. During the coming year, representation will be provided for the Navy during construction of AGOR-14 and AGOR-15. Studies on oceanographic vessel design will continue with emphasis upon the development of the boat truck concept.

Results from this task are expected to significantly contribute to the design of oceanographic research ships in the Navy Ship Construction Program, including those used by Navy in-house and contractor laboratories. The bathythermograph digitizer will accelerate the handling of BT slide and should reduce the backlog of unprocessed slides.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0270, DEEP OCEAN ENGINEERING TECHNOLOGY

**F.N. SPIESS**, Univ. of California, Graduate School, San Diego - La Jolla, California 92038 (N00014-67-A-0109-0008)

Increased national and Navy interest in the ocean from military scientific and economic considerations has stimulated investigations toward development of technological and engineering capabilities to work in the deep ocean environment. The objective of this work unit is to contribute toward development of such technology as it is applicable to Navy-oriented efforts.

The Benthic Laboratory will be installed in approximately 1200 feet of water 3 miles off-shore in La Jolla Canyon. It will be used in conjunction with precisely positioned sensor fields to be installed on the ocean floor. Development of the new high-dexterity tensor manipulator for use in Benthic Laboratory will continue. RUM experiments will be conducted from the new Ocean Research Buoy (ORB).

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0271, SHIPBUILDING COST ESTIMATING METHODOLOGY

**UNKNOWN**, Engineering & Mgt. Sci. Corp., Woodland Hills, California

**PURPOSE:** To develop techniques that will enable more accurate forecasts to be made of the economic effects of introducing innovations in shipyard facilities, ship design, and quantity procurement.

**DESCRIPTION:** This study will identify significant differences between past practice and improved shipbuilding methods, and their effect on shipbuilding costs. It will show where, and to what degree, conventional 'system oriented' cost estimating records and methods do not fully reflect these differences. A 'product oriented' method of recording costs and analyzing data will be developed to more effectively take into account the effect of innovations.

The approach treats all structure, piping, ducts, and wiring located in a given assembly module as a unified product, and makes specific allowance for the working environment. The innovations considered are the facilities, design techniques, etc., which permit fabrication and outfitting to be done under convenient and efficient shop conditions as contrasted to conditions on the ship.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0272, HUMAN FACTORS IN SHIP CONTROL

**UNKNOWN**, General Dynamics Corporation, Groton, Connecticut

**Purpose:** To develop guidelines for determining human factors involved in bridge control for use in improving bridge equipment and arrangement.

**Description:** Guidelines are being developed for use by ship bridge designers to achieve an effective application of space and equipment to the deck officer's tasks in ship conning and control. Emphasis is placed upon the frequency and criticality of tasks, information requirements, human capabilities and stresses encountered by the bridge watch in arriving at and executing decisions.

Controls, displays and layouts resulting from analysis of these factors have been described as a means of assisting human performance. Criteria for equipment and layout design which would minimize human error have been developed and demonstrated in three alternative bridge designs, two of which were selected for tests and evaluation. Full scale models of these designs are presently under construction after which measures of operational and cost effectiveness will be obtained.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0273, CATAMARAN CONTAINERSHIP FEASIBILITY

**UNKNOWN**, General Dynamics Corporation, Groton, Connecticut

**PURPOSE:** To determine the technical and economic feasibility of utilizing twin-hulled ships for transocean shipment of unitized cargo.

## 8. ENGINEERING AND TECHNOLOGY

**DESCRIPTION:** The general configuration of a twin-hulled vessel provides a large deck area for the stowage and rapid handling of containers. In addition, the catamaran offers much improved vessel stability in rough water, and an opportunity for higher overall ship speed.

Initial research included a literature search and state-of-the-art digest; and a parametric analysis that evaluated such items as speed, power, size, cargo carrying capability, and structural material. This analysis has been carried out with the use of a computer program for ships that range in speed from 18 - 28 knots and carrying capacity from 10,000-30,000 DWT, built of both steel and aluminum.

Economic trade offs are being made between steel and aluminum structural materials. Models are being towed in the test basin at MIT to determine the resistance and interaction of waves between the two hulls, and are being evaluated for their sea keeping capabilities.

The final element of the feasibility study will be three conceptual designs and an economic analysis.

### 8.0274, ADVANCED NUCLEAR CARGO SHIP

**UNKNOWN**, General Dynamics Corporation, Groton, Connecticut

**PURPOSE:** To develop a preliminary design, construction features and associated total cost analysis of a representative large, high speed advanced nuclear powered cargo ship which can accommodate the latest Maritime reactor systems presently offered.

**DESCRIPTION:** A single standard 100,000 SHP machinery plant has been designed which is adaptable to any of the 'loop type' or 'integral' reactor designs now offered on a fixed price, guaranteed performance basis.

The nuclear ship design reflects a high degree of reliability, maintainability and automation. All equipment is specified to function for a minimum of 5 years of continuous operation without repair. Machinery layout is such that all components are easily accessible for maintenance and testing. Advances in centralized control and automation have been included to make it possible to operate the ship with a crew of 40 as opposed to the 66 man crew presently required on the SAVANNAH.

Improvements have been made in shield design which utilize concrete to a large extent and reduce both shielding weight and cost.

The large 30 knot nuclear ship is being studied in an economic environment as a system of three containerhips operating between the U.S. East Coast and the Far East.

**SUPPORTED BY** U.S. Dept. of Commerce - Maritime Admin.

### 8.0275, DIGEST OF THE ADVANCED NUCLEAR CARGO SHIP STUDY

**UNKNOWN**, General Dynamics Corporation, Groton, Connecticut

Under this study a preliminary design, construction features and associated total cost analysis was prepared for a hypothetical, large, high speed, nuclear powered, high productivity container-ship operating on Trade Route 12.

The study is based on currently available proven technology and hardware that can be offered by United States industry on a fixed price/warranty basis, with particular emphasis on pre-assurance of operational dependability. The machinery space was arranged to accommodate all combinations of maritime reactors and propulsion machinery presently offered in the 100,000 SHP range. A single standard machinery plant was developed which is adaptable to either the 'loop type' or 'integral' reactor designs.

The ship design reflects a high degree of reliability, maintainability and automation. All equipment is designed for a minimum of 5 years continuous operation without repair. Machinery layout is such that all equipment is easily accessible for maintenance and testing. The report finds that advances in centralized control and automation make it possible to operate the advanced nuclear ship with a crew of 40 as opposed to the 66 man crew presently required on the N. S. SAVANNAH; and that

improvements have been made in shield design since SAVANNAH which utilize concrete to a large extent and reduce both shielding weight and cost.

The report PB No. 178-964 is available from the Federal Clearinghouse for Scientific and Technical Information, Springfield, Virginia, 22151.

### 8.0276, WATER-TO-AIR RETRIEVAL

**I.R. SMITH**, All American Engineering Co., Wilmington, Delaware

This project was a preliminary study of a method using fixed wing aircraft to recover packages from a water surface. It involved study of the design, analysis, fabrication, and testing of a balloon type water pick-up station for use with 1,000 pound recoverable objects.

As envisioned by All American, the pick-up station consisted of a recoverable package, floating on the surface of the water, connected by rope to a balloon. The aircraft was to fly by, engage the rope at a point just below the balloon, and winch the package aboard. The basic recovery system, including the winch, been developed and tested by All American, and could be adapted for over the water recovery.

A mathematical model was used to establish the basic parameters on the 1,000 pound recovery station. The input parameters included a load limit on the package, rate of climb of the package and speed of the aircraft. From the model, the minimum length and strength of the rope for the pick-up station were found.

In this type of recovery system it is important that the balloon keep the pick-up lines as nearly vertical as possible. Various balloon shapes were studied to determine the one which would function best in winds of 15 to 20 knots.

**SUPPORTED BY** All American Engineering Company

### 8.0277, A STUDY OF A TRANSITIONAL CONTAINER-SHIP CONCEPT

**A.R. GOOBECK**, U.S. Dept. of Commerce, Maritime Administration, Washington, District of Columbia 20235

This research study developed a ship design that features a hold module and cargo handling system arranged to facilitate ready changeover from a highly flexible (100%) breakbulk operation to efficient all container stowage via cellular stacking without the need for extensive structural modifications, guide installations, or additional handling equipment. Such ships can be used in the 'uncertain' trades to help smooth the transition from breakbulk cargos to containerized cargo.

**SUPPORTED BY** U.S. Dept. of Commerce - Maritime Admin.

### 8.0278, PRELIMINARY CALCULATION OF THE LIFT AND DRAG AND ANGLE OF ATTACK FOR SUBMERGED HYDROFOILS

**J.G. GROSS**, U.S. Dept. of Commerce, Maritime Administration, Washington, District of Columbia 20235

A hydrofoil lift and drag calculation procedure has been computerized in such a way as to minimize data input requirements. The goal was to develop a relatively simple method for determining hydrofoil lift, drag and foil angular motion at various speeds. The twenty-nine model input items include foil physical characteristics such as span, area, chord, dihedral, sweep, end plate height and distance, thickness, and camber; nacelle characteristics such as length, location on strut, diameter, projected area; and system characteristics such as craft weight, submergence, design speed, and flap or incidence control indicator. Model output includes downwash drag, included drag, parasite drag, total drag, foil angle, no lift angle and flap angle.

All of the output is varied from the take off speed (foilborne transition) to the maximum design speed in small speed increments.

The model is written in FORTRAN IV for H200. As yet, no model operating documentation exists.

## 8. ENGINEERING AND TECHNOLOGY

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0279, MODEL FOR THE PRELIMINARY DESIGN OF SURFACE EFFECT SHIPS

J.G. GROSS, U.S. Dept. of Commerce, Maritime Administration, Washington, District of Columbia 20235

This computerized model performs a preliminary analysis of surface effect ship types. The goal was to determine major characteristics of surface effect ships for further analysis in a commercial environment. The model input includes such variables as vehicle gross weight, vehicle surface clearance, cushion loading parameter, number of compressors, significant wave height in a seaway, vehicle design range, design speed, beam/length ratio, vehicle body aero lift coefficient, and body aero drag coefficient.

Consideration is given to the various drag components, propulsion efficiency by various devices, compressor requirements, sea wave height effects, and vehicle weight components.

Model output is presented as vehicle physical configuration, normalized drag components variation with vehicle speed, normalized propulsion and cushion fan power requirements with speed, cushion and propulsion power weight variations with speed, maximum power and design, structural weight, propulsion and cushion machinery weight, equipment weight, fuel requirements, and payload capacity.

The model is written in FORTRAN IV for H200. As yet, no model operating documentation exists.

### 8.0280, ADVANCED RESEARCH - SATELLITE INTERROGATED ENVIRONMENTAL BUOY

J. HUSON, U.S. Dept. of Commerce, Off. of Systems Engin., Washington, District of Columbia

Objective - Design, develop and test low cost buoy systems for sea keeping and satellite interrogation characteristics.

Approach - Test three buoys for: 1. Sea keeping characteristics 2. Communication with NASA ATS-C synchronous satellites.

Preliminary studies, designs, and testing of half scale models completed as in-house efforts. Three full scale buoys to be fabricated in accordance with detail design specifications. Tests to be conducted in coordination with interested ESSA divisions.

Progress (to June 30, 1967): Program funds became available in July 1966 and specifications for development of three prototype buoys were completed. The RFP was issued in December 1966 and proposals evaluated which resulted in selection of Ocean Research Equipment, Inc., of Falmouth, Massachusetts, as the contractor. The contract was signed in April 1967.

### 8.0281, NATIONAL DATA BUOY STUDY

R.W. GOEHRING, U.S. Dept. of Transportation, Coast Guard, Washington, District of Columbia 20591

This amount represents the National Science Foundation's portion for the support of the National Data Buoy Study conducted by the U. S. Coast Guard as per agreement between Dr. Leland J. Haworth, Director, National Science Foundation and Dr. Robert A. Frosch, Assistant Secretary of the Navy, dated August 17, 1967.

SUPPORTED BY U.S. National Science Foundation

### 8.0282, ADVANCED DEEP OCEAN TECHNOLOGY

G. SORKIN, U.S. Navy, Ship Systems Command, Washington, District of Columbia 20360

Objective: Ascertain through systems analysis, studies and testing the operational depth limitations of present systems and to develop realistic programs and plans for advancing these present systems to meet the ever increasing fleet demands.

Approach: Develop detailed working plans for the development of such deep submergence machinery and equipment as

speed reducers, submersible electric drive systems, hydraulic systems, high pressure sea water pump systems and tandem propulsion systems. To develop a detailed working plan requires: precise determination of the state-of-the-art of components which will be required to make up the system, analysis of the requirements of the system as compared to the state-of-the-art, identification of problems of potential problems, and the assembly of a program which includes the above.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0283, STRUCTURAL DESIGN CRITERIA

UNKNOWN, U.S. Ship Structure Committee, Washington, District of Columbia

Purpose: To develop means to obtain greater safety without adversely effecting economy.

Description: This program is a joint venture between the Maritime Administration, Navy, Coast Guard, and the American Bureau of shipping.

It has resulted in ship structure improvement which include: finding the cure for brittle fracture problems; elimination of the need for riveted crack arrestors; development of better welding techniques; a better understanding of notch effects; and development of improved radiographic and ultrasonic testing methods. Research is now being performed under the broad headings of Structural Response, Structural Design, and Materials which is expected to lead to further significant improvements by acquisition and analyses of new data; refinement of design and fabrication tools, and establishment of improved design criteria. Significant areas under these headings are: accumulation of data on ship response to seaway conditions (including slamming); statistical analyses of seaway and ship response data; expansion of the use of computers in design; development of hull girder models; determination of the characteristics of high strength steel structures in a marine environment; development of improved acceptance tests for joined materials, and improvement of fabrication methods.

### 8.0284, DESIGN AND CONSTRUCTION OF BARGE AND CLAM DREDGE FOR SURVEY OF FLORIDA'S COMMERCIAL CLAMS

H.W. SIMS, State Board of Conservation, Saint Petersburg, Florida

Phase 1. During phase one the principal investigator will work with a designer and boat builder to draw plans and construct the barge needed to begin the survey. The actual building of the barge will be done by the ship yard, but will require supervision and communication with the principal investigator. It will be the duty of the principal investigator to find and purchase equipment needed to outfit the boat and to see that this equipment is delivered to the builder in time to meet with the work schedule.

Phase 2. The deeper waters 5-10 feet, along the shore line will be surveyed for hard clam beds. Samples will be taken by running the shore line to the extreme depth, then parallel to the shore at this depth for approximately 100 feet, return to the shore (water depth 3-5 feet), run parallel for 100 feet, turn and run out to extreme depth. At the end of each run, before turning offshore again, measurements of the clams will be made and data recorded. In most cases the clams will be returned to the water in the same area where they were found. Certain areas may be re-sampled to gather growth information.

Phase 3. Past studies indicate that populations of the surf clam may be found in large numbers in the mouths of large inlets into the bays. The dredge will be run over these areas to learn the extent of these clam beds. If this clam appears to be available in sufficient numbers, samples collected will be passed on to interested persons in the hope that a market for them may be created. Data, similar to that collected for Mercenaria will be recorded.

Phase 4. Before dredging the area a check of the bottom will be made and data on the abundance, size and condition of both plant and animal species found will be recorded. Samples of the sediments will also be taken and separated for particle size. Upon

## 8. ENGINEERING AND TECHNOLOGY

dredging the area, data will be recorded on the species collected. At some locations checks of the bottom will be made monthly. In other locations checks will be made at 3, 6 and 12 month intervals. These subsequent checks will be made by hand, without the re-use of the dredge. Other areas will be redredged monthly for as long as it is convenient for the dredge to return to the site. Yearly checks will be made of all sites, with the dredge. The data collected should show the immediate effects of the dredge as well as the long range results.

### 8.0285, MARINE METEOROLOGY UNTENDED STATION DEVELOPMENT

*M. GARSTANG*, Florida State University, Graduate School, Tallahassee, Florida 32306

Development of a buoy stable enough to perform as a platform for measurements of wind profile in the open sea and development of an instrumentation system for five days of untended operation to measure, digitize and record wind and air temperature profiles, humidity, rainfall, and water temperature.

SUPPORTED BY U.S. Dept. of Commerce - E.S.S.A.

### 8.0286, EXPLORE FISHERY AND RESEARCH APPLICATIONS OF SUBMARINES

*R.S. SHOMURA*, U.S. Dept. of Interior, Biological Laboratory, Honolulu, Hawaii 96812

By correspondence, interviews, etc., the research applications of a submarine are being explored, and the several possible research missions are being related to a variety of broad design possibilities. With the submarine's missions clearly established and ranked in order of importance, a contract will be awarded for feasibility and conceptual design studies. These studies involve optimization of vessel design with respect to size, shape, power, speed and maneuverability; preparation of layout drawings; estimation of costs and schedules for ensuing design, construction, and operating phases; and a personnel analysis for the operating vessel.

### 8.0287, STABLE OCEANIC STATION

*R.J. PIERCE*, Hydro Space Systems Corp., Cedar Rapids, Iowa 52402

Theoretical and experimental work has been conducted for the past five years on a concept of a large stable submerged oceanic station (100-20,000 tons displacement). The concept under study is based on the principle that a high degree of pitch stability and heave stability can be achieved if the sea station is, for the most part, submerged unaffected by surface conditions of winds and waves. The buoyancy and mass of the submerged portion is made very large. The superstructure protruding above the surface is made very small so that it has minimum coupling to the forces of winds and waves. The magnitude of the lateral forces of winds and waves is very small compared to the vertical forces of the large submerged mass, thus achieving a high degree of pitch stability. Pitch stability is further enhanced concentrating the buoyancy and mass structures laterally and widely separating the center of buoyancy and the center of mass. The buoyancy chamber and mass chambers are disc-shaped to minimize drag due to ocean currents. Since dynamic station keeping is contemplated, low drag is important to minimize propulsion power. Analysis and scale model tests of large ocean stations of the order of 20,000 tons indicate that pitch stability of less than plus or minus 1 degree in 60-foot waves and 100-knot winds can be achieved. Analytical and scale model testing under simulated ocean conditions are being continued by Hydro-Space and the Hydraulics Institute of the University of Iowa. It is anticipated that when developed, the stations could be used for many applications, such as deep ocean radio data stations, deep ocean communication and navigation stations, offshore oil production rigs, and general sea bases for other applications. One specific application is shown in the SEACOM brochure attached.

### 8.0288, DESIGN STUDY - AN OPTIMUM FISHING VESSEL FOR THE GEORGES BANK GROUND FISH FISHERY

*C. HAMLIN*, Ocean Research Corporation, Kennebunk, Maine 04043

This study was initiated to devise a method of optimizing fishing vessel design and operation for any fishery. Optimality was defined as maximum Return on Investment (ROI), and the Boston, Mass., fishing fleet was selected as the foundation. A generalized functional model of fishery resource exploitation was constructed. From this, a mathematical model was prepared, based on the Georges Bank groundfish fishery, and programmed for an IBM 1130 computer, the output being ranked according to RIO. The model related vessel characteristics, crew size, and fishing operations, to the basic elements of the fish harvesting system, i.e. the net/engine/propeller subsystem. Descriptive plans were prepared for the resulting optimum vessel: LOA - 125', shaft HP - 1030, crew size - 16. Predicted maximum return on investment for the optimum vessel was 26.7%. The study demonstrates the feasibility of using a suitable computer program to examine the highly complex fishing operation, and to optimize any desired subsystem.

### 8.0289, PROPULSION EFFICIENCY 'U' VERSUS 'V' STERNS

*UNKNOWN*, U.S. Navy, Ship Research & Dev. Center, Caderock-washington, Maryland 20007

DESCRIPTION: Using a Series 60 - .60 block coefficient model with normal stern configuration as parent for the tests, two mathematical forms were derived maintaining the same sectional area curve as the parent, such that one was more 'V' and the other more 'U'

21.3' level keel design draft.

Wake survey tests were made with all three hulls at the 21.3' draft. In addition tests were made with the parent model at 80% design draft at both level keel and trim by the stern - the trim by the stern being such that propeller immersion was equal to that at design draft.

The tests were made at the equivalent full scale speed of 19.5 knots, 12.75 knots and 6.0 knots for the parent form and at 19.5 knots only for the other two.

The next stage will be to perform vibration tests and make comparison with existing NSRDC propulsive data to determine the relative roles of wake distribution and vibration on over-all propulsive efficiency.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0290, CONTRAROTATING PROPELLER IN JUMBOIZED MARINER

*UNKNOWN*, U.S. Navy, Ship Research & Dev. Center, Caderock-washington, Maryland 20007

Purpose: To investigate the feasibility of converting existing mariners into containerhips by jumboizing and in addition utilizing contrarotating propellers.

Description: An existing mariner model was lengthened by adding parallel midbody, representing 95 feet full scale, and fitted with a stock contrarotating propeller; in order to fit the propeller, the aft end of the existing shaft bossing was cut off an amount corresponding to two feet full scale.

The model was run for EHP and SHP at a displacement of 18,840 tons at 21.38 mean draft. These tests will be compared with tests of the original shorter model running at 18,610 tons at 29.96 feet draft with normal single screw propeller.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0291, SHIP DESIGN WAVE RESEARCH

*R. ZARNICK*, U.S. Navy, Ship Research & Dev. Center, Caderock-washington, Maryland 20007

Objective: To conduct oceanographic research in those areas specifically affecting the design, development and operations of ships. Provide a centralized source of oceanographic knowledge and improve existing oceanographic data used in ship design.

## 8. ENGINEERING AND TECHNOLOGY

Approach: To simulate true sea state in model hull test facilities. A continuing study will be made of oceanographic literature to keep abreast of the most recent theories as to the most suitable representation of the seaway and all significant advances will be immediately applied to the ship design problem. Techniques will be developed for the generation of directional wave spectra in the Model Basin's Seakeeping Facility (MASK) to provide for a more meaningful model of oceanographic environmental conditions. The Model Basin will use its technical abilities to assist the oceanographer in obtaining reliable measurements of ocean environmental conditions.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0292, DEEP SEA SUBMERSIBLES

*K.G. PICHA*, Univ. of Massachusetts, School of Engineering, Amherst, Massachusetts 01003 (N00014-67-A-0158-0005)

Objective: The objective of this program is to develop, through a center of excellence, a body of knowledge in the field of deep sea engineering, particularly for exploration and exploitation devices. The interdisciplinary research program is broken into the following areas of immediate technological concern; energy conversion, environment, guidance and control, hydrodynamics, materials, propulsion, and structures.

Approach: The investigators will continue theoretical and experimental work on (a) streaming of water by interaction with magnetically accelerated colloids, (b) composite materials (c) deep submergence vehicle system design (d) nonlinear behavior of hull structures (e) impact loading of submarine hulls (f) effects of pneumatic and hydraulic breakwater devices (g) design criteria for underwater anchorages (h) kinetics of ebullient bed catalytic reactions (i) aerodynamic simulation tests for marine vehicle components (j) propeller and wake noise in deep sea submersibles.

### 8.0294, A STUDY OF THE INTERFACE LOCATIONS BETWEEN DISSIMILAR MATERIALS AND OTHER ASPECTS OF A COMPOSITE MIDSHIP SECTION

*L. AFANASIEFF*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

The following aspects of midship section design, with employment of different component materials, are analysed: the stress schedule and optimum neutral axis position, the interface locations between dissimilar materials, the relation between frame and longitudinal spacing and their influence on the hull plating thickness, the ultimate strength of the composite hull girder and some aspects of a computer approach to composite midship section design.

SUPPORTED BY Massachusetts Institute of Technology

### 8.0295, WEIGHT ANALYSIS IN FISHING BOATS

*R.W. CANAR*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

The purpose of this study is to determine a method for estimating the hull steel weight in the early stages of the design.

Hull steel weight refers only to the underdeck weight less the weight of bulkheads, deckhouses, and foundations.

Since the hull steel weight is a direct function of the ship's full length scantlings and at the same time these are a direct function of the midship section scantlings, most of the work was devoted to find a relationship, if any, between the weight of the midship section and the hull steel weight.

The weight of the midship section used is the 'weight per foot' which is the weight per foot of the longitudinal members

plus the weight of the transverse members in one frame space divided by the frame spacing.

A dimensionless coefficient results from the relationship among the hull steel weight, the weight per foot of the midship section and the ship's length  $P$  equal  $W_{sub n}/W.L$  where  $W_{sub n}$  equals hull steel weight (lbs);  $W$  equals weight per foot of the midship section (lbs/ft);  $L$  equals length (ft).

To take care of the variation of scantlings toward the ends, this coefficient was related to the form prismatic coefficient  $C_{sub p}$ .

Since the scantlings are proportional to the local radius in each station, the value of the 'Weight prismatic coefficient'  $\alpha_{sub p}$  and  $C_{sub p}$  was expected to be the same. The results showed that it is not so for the following reasons: 1. There is much steel which is not shown in the midship section. 2. Both the block and prismatic coefficients used in this analysis were those calculated up to the design water line and these always less than the ones calculated up to the full depth.

The way chosen to include the effect of the vessel's size is the cubic number of times the block coefficient (I.B.D.C  $sub b/100$ ) which is a rough measure of the underdeck volume.

SUPPORTED BY Massachusetts Institute of Technology

### 8.0296, AN INVESTIGATION OF THE PERFORMANCE OF A COLUMN STABILIZED PLATFORM

*K.A. GUSTAFSON*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

The objective of this thesis is to obtain a comparative analysis of various combinations of column configurations for a mobile column stabilized platform. The platform is a deep draft vessel consisting of two longitudinally oriented, cylindrical hulls. To each hull two vertical columns are attached which pierce the surface of the water. The upper ends of the columns are attached to a platform well above the waterline. The platform may provide added performance capabilities in comparison with a standard displacement vessel. The mobile column stabilized platform is not without its problems, however, and this experimental and analytical study provides an analysis of some of these problems.

The resistance characteristics were studied with the use of a model in the M.I.T. Department of Naval Architecture and Marine Engineering Ship Model Towing Tank. A correlation of the data with theory was attempted to obtain interference resistance between the columns. The effect of transverse and longitudinal spacing of the columns, draft, and shape of the columns was investigated and correlation with theory was attempted. The results indicated the parameters of longitudinal spacing and velocity have the most significant effect on interference resistance.

The resistance characteristics of the model are compared with a standard hull form. The constraints imposed by stability and strength requirements on the column shape and size are theoretically calculated.

SUPPORTED BY Massachusetts Institute of Technology

### 8.0297, OPTIMIZATION METHODS APPLIED TO THE PRELIMINARY DESIGN OF A NAVAL AUXILIARY

*F.C. HOLMES*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

The technique for optimizing multidimensional functions developed in Refs. (7), (10), and (13) has been applied in this report to the preliminary design of a multimission naval auxiliary. The algorithm computes a number of effectiveness factors for each design which reflect the ship's ability to meet its specified mission requirements. Factors are then combined with the ship's twenty-five year life cycle costs in an optimization criterion which permits selection of an optimum design. Sample results obtained from the algorithm described in this report are tabulated in Tables III, IV, V, and VI.

Unfortunately, the optimization technique utilized in this report did not permit examination of results in terms of the effect on cost of each individual effectiveness factor. For this reason, the recommendation is made that for future studies of this kind, an entirely new approach should be taken as described in Section IV.

## 8. ENGINEERING AND TECHNOLOGY

### 8.0298, EFFECTS OF MATERIAL VARIATIONS IN THE COMPUTERIZED DESIGN OF PRIMARY HULL STRUCTURE

*J.F. INCE*, Mass. Inst. of Technology, Graduate School, Cambridge, Massachusetts 02139

The fifth of a series of computer programs has been developed to design the longitudinally continuous and primary transverse members of a ship's midship section. Any framing system and material distribution may be chosen for a given geometry and a normalized weight and cost will be determined. Using three types of steels, optimum combinations are found by a parametric study and a 'performance norm' solution of weight vs. cost obtained.

This curve is then used as a reference against which to test the suitability of other materials, such as titanium. Also, materials with hypothetical strength properties are investigated to show under what circumstances, i.e. for what unit weight and cost, they might excel the three commonly used steels used in optimum combinations.

SUPPORTED BY Massachusetts Institute of Technology

### 8.0299, THE INVERSE PROBLEM IN PROPELLER DESIGN

*P.C. MAKRIIS*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

A computational method is presented by which the performance of a propeller operating at conditions different than the design conditions, can be determined.

The analysis presented makes use of existing computational methods for the solution of the direct or design problem.

A computer program is developed and the results compared with experimental data. This comparison is considered favorable.

### 8.0301, CONTROL OF SUPERCONDUCTING MACHINES FOR SHIP PROPULSION

*L.S. MATJASKO*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

It is known that superconducting machines of capacity large enough to power ships of a destroyer's size are within the capability of present technology. Given this fact, the control of these machines must be examined to the extent of determining ship performance realizable with such a drive system.

A mathematical model for ship-propulsion plant performance is derived using the propeller characteristics of Nordstrom (14). From the model, a set of ideal performance characteristics in the form of plots of stop to full ahead and crash astern transients is obtained. These do not account for any equipment, prime mover, or machine limitations.

A conceptual design of a control system is presented. The system accounts for limitations on ideal performance that are discussed. Feasibility of the system is demonstrated.

Finally, incorporating the limitations to ideal performance, the model and control system are used to predict realistic ship performance characteristics, assuming power plants of gas turbines and conventional steam.

The principal results are that the gas turbine plant provides faster response to demands for increasing speed and that neither plant provides an advantage in a crash astern maneuver.

The characteristic plots for the transient maneuvers provide a basis of comparison for the observer familiar with capabilities of other power plant, control, and drive system combinations.

SUPPORTED BY Massachusetts Institute of Technology

### 8.0302, A DUAL MODE ROLE STABILIZATION SYSTEM

*F.J. RICHMOND*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

The Deep Submergence Rescue Vehicle is being built with an activated roll stabilization system. The effectiveness of this system is limited by pump saturation. This investigation is concerned with improving the roll stabilization of the DSRV through the use of a passive tank stabilizer. A mathematical model for the tank system is developed and adapted to the DSRV model. The passive system is extended to include two modes of operation, each representing a separate tank frequency, which may be selected by the operation of a valve. The passive system and the dual mode system are simulated on an analog computer to determine their response to transient disturbances.

The results show that a passive stabilizer of reasonable design could improve the roll stabilization of the vehicle. Furthermore, it is concluded that stabilization of transient disturbances can be improved by dual mode operation if a tank frequency at least three times greater than the natural frequency of the vehicle can be obtained for one of the two tank modes.

### 8.0303, ESTIMATION OF HULL STEEL WEIGHTS FROM MIDSHIP SECTION CHARACTERISTICS

*J.W. ROYLE*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

The purpose of this thesis is to develop a refined method of estimating the hull steel weights of naval auxiliaries. The approach utilized is based on the primary structure exhibited amidships, with modifications to account for partial substructures.

The primary structure includes the shell and framing, and decks, inner bottom, and longitudinal bulkheads whenever they are continuous for substantially the full length of the ship. Based on this primary structure at amidships, a 'normalized weight,' or weight per foot of longitudinally continuous material, plus the weight of transverse members divided by their spacings in feet is determined.

On the basis of the research discussed in Part II of this thesis, there is a strong indication that the normalized weight may be predicted by considering various properties of the midship section in longitudinal bending and specifying the allowable bending stress.

The normalized weight is used to predict a 'standardized underdeck weight' by means of an 'adjusted weight coefficient.' The standardized underdeck weight includes the weight of those items which are included in the normalized weight plus some smaller items (see Part I, section B) which are felt to be related to ship size. The adjusted weight coefficient relates the normalized and standardized underdeck weights.

Weights of partial substructures and special features must be added to the standardized underdeck weight to obtain the total underdeck weight. The special features are items which are not expected to show any trends in relation to ship parameters or which are unique to a particular design or ship class. These must be handled separately and individually. The partial substructures of greatest concern are transverse and local longitudinal bulkheads and platforms, flats, and discontinuous decks. Suggested approaches to developing estimation techniques for these items are discussed in Part III, sections A through D. The most interesting indication shown is probably that the curves of sectional areas between the design water line and the uppermost longitudinally continuous deck may be fairly well approximated by 3 straight lines for hulls with vertical sides above the DWL at amidships.

### 8.0304, STRESSES DEVELOPED ON THE SURFACE OF CYLINDRICAL JOINTS SUBJECTED TO MULTIPLE LOADS

*J.C. SCHAFF*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

This paper deals with the stresses developed at the intersection of two circular members of different diameters. Both members carried axial loads, with the larger member being continuous

## 8. ENGINEERING AND TECHNOLOGY

through the connection and the smaller terminating at the connection. The method for determination of the stress was by coating the larger member with photoelastic plastic and observing the stresses that developed at the connection. Stress concentration factors were determined by loading the larger member prior to the connecting of the smaller members.

Analytical results, obtained from attempting to predict the moment in the larger member generated by the load on the smaller member, were calculated by using Hovgaard's Continuous Ring Frame Analysis and Hardy Cross's Column Analogy. The circumferential stress from this moment was combined with the axial stress from the large member's end load, and the result modified by the stress concentration factor determined earlier. When the model tests were compared to the analytical results, it was found that the moment or stress predicted was 2.5 to 3.2 times higher than that which would be expected from the model tests. A great deal more investigation must be done with this type of joint before a clear understanding of what is happening within both members will be reached.

### 8.0305, AN EXPERIMENTAL INVESTIGATION OF PARTIALLY SHROUDED POPELLERS

*P.T. TARPGAARD*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

Results are reported for a series of experiments in which forces associated with a propeller fitted with a partial shroud are measured. The shroud is partial in the sense that it subtends only 180 degrees of the propeller circumference rather than the full circumference, as is commonly the case. S. J. Gordin in 1966 proposed that such a shroud could be used as a rudder if mounted so that it can be moved from one side to another on the propeller circumference. A difference in velocity between the water moving on each side of the shroud produces a radial force which can be directed to either side by moving the shroud.

The quantities measured were the radial and axial force on the shroud, termed 'lift' and 'drag', and the thrust and torque on the propeller. Measurements were made in a propeller tunnel using a series of four different half shrouds with a single propeller. Variations were made in the geometric properties of the shrouds and in the orientation of the shrouds to the incoming flow with the object of determining the effect of these properties on the behavior of the propeller-shroud combination. Graphs of shroud and propeller performance characteristics are presented and methods of interpreting and comparing them are suggested.

It is found that rather large radial forces can be obtained with partial shrouds while getting very little accompanying drag. Under many operating conditions a thrust will be developed for the shroud. The forces on the shroud were found to be very sensitive to the angle of attack of the shroud and to a lesser extent on the camber of the shroud cross-section. The shroud has a marked effect on the propeller characteristics and the results indicate that a higher pitch propeller than would be chosen otherwise might be desirable when using a partial shroud.

The partial shroud as a steering system seems to offer particularly good characteristics for applications where good maneuverability at low speeds is desired such as in tugs or salvage vessels. With more research and design development it might prove superior in a more general range of applications.

SUPPORTED BY Massachusetts Institute of Technology

### 8.0306, SEAKEEPING QUALITIES - MOTIONS AND POWERING PREDICTIONS

*UNKNOWN*, Mass. Inst. of Technology, Graduate School, Cambridge, Massachusetts 02139

Purpose: To devise means to predict the over-all seakeeping qualities of modern merchant vessels during the design stage in order to improve their performance in rough weather.

Description: Computer programs developed by M.I.T. for determining different displacement ship responses to wave actions (i.e., pitching, bending moment, added resistance in waves, etc.) have been consolidated into one master program. 'Still water' resistance data for the Taylor and Series 60 Families have been added to the program. The end product will be a design

manual that will enable the naval architect to base his design, not only on still water powering performance, but on powering in a seaway and seakeeping capabilities.

The research also includes a computer program to predict the motions of, and the vertical and horizontal forces in connections between, single line ahead push barge tows. Model tests in head seas with three barges have been made to check the barge computer program. This phase of research is an integral part of an overall barge investigation being conducted both at M.I.T. and Stevens Institute.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0307, OPTIMIZATION METHOD APPLIED TO THE PRELIMINARY DESIGN OF A NAVAL SALVAGE TUG

*G.F. WAGNER*, Mass. Inst. of Technology, School of Engineering, Cambridge, Massachusetts 02139

A non-economic optimization criterion is developed for a multi-mission naval salvage tug in this report. The optimization is carried out on a digital computer by the use of the exponential random search procedure in a multi-dimensional design space. The algorithm minimizes the quotient formed by dividing the life cycle cost of each design by the sum of a number of non-economic effectiveness measures of the design. The effectiveness measures chosen reflect the ability of the tug to meet its required towing mission and salvage mission. Sample results of the program are contained in section III of the paper.

The optimization criterion proved satisfactory, but, the method of computing individual requirement effectivenesses was not satisfactory in all cases. An improved method for computing the effectiveness of a design is recommended in Section V.

SUPPORTED BY Massachusetts Institute of Technology

### 8.0308, SATELLITE INTERROGATE ENVIRONMENTAL BUOY DEVELOPMENT

*D. FRANTZ*, Ocean Research Equipment Corp., Falmouth, Massachusetts

TECHNICAL OBJECTIVE: The ocean buoys to be fabricated under this contract are part of a system to measure oceanographic and meteorological parameters at remote sites and transmit the information to a central analysis location through satellite communication relay of data.

Approach: Develop and fabricate three prototype buoys. One buoy will be used to test long life mooring configurations and seakeeping characteristics. Two buoys will be used to test deep ocean moored characteristics, survivability and communication with satellites. The basic contract is amended to include emplacement and testing of Buoy 01.

SUPPORTED BY U.S. Dept. of Commerce - E.S.S.A.

### 8.0309, BUOY ENGINEERING

*R.G. WALDEN*, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543 (N00014-66-C0241)

The objective of this task is to improve the instrumentation necessary to the moored experiments being conducted at Woods Hole. These engineering efforts will include a theoretical and experimental study of the performance of deep ocean mooring lines in the ocean; comparative testing and evaluation of mooring materials, hardware, and fabrication techniques; design and development of surface and subsurface prototype buoys to meet the research requirements; and development and testing of special engineering telemetry system for use in the program.

This work is a necessary adjunct to the efforts of the WHOI scientists to determine the scales of oceanic motion using moored oceanographic buoys. The technology will benefit the Navy, both in its contributions to understanding the physics of motion in the sea and to other buoy systems required by the Navy.

SUPPORTED BY U.S. Dept. of Defense - Navy

## 8. ENGINEERING AND TECHNOLOGY

### 8.0310, RESISTANCE AND PROPULSION HULL CONFIGURATION

*UNKNOWN*, Univ. of Michigan, Graduate School, *Ann Arbor, Michigan*

**Purpose:** To investigate ways of improving the powering characteristics of U.S. merchant vessels, and solve ship powering problems as they may present themselves in specific ship design cases.

**Description:** Currently two projects are under way as set out below: Bulbous Bows Model tests with a 0.75 block coefficient form designed at the University of Michigan indicated that a reduction of 10 in power is possible, over a range of from light to full displacement conditions, with the addition of a surface piercing bulb. As a result of these findings investigations of the potential of these bulbs to reduce resistance over a wide range of ship block coefficients are underway.

Additional tests have been made with 0.65 and 0.55 block coefficient models, developed from the initial form by a geometrical method also developed at the University to determine the trend of bulbous bow performance with block coefficient change.

**Transom Sterns:** It is the objective of this study to carry out research that will provide design information which will allow transom sterns to be utilized by high-speed vessels without power loss.

Resistance and propulsion tests have been completed with seven after body variations, the fore end remaining the same in each case.

Parameters used in the test are: Length - 700', beam - 100', draft - 22'-35', block coefficient - 0.50. Stern width has varied from 75' to 45' and stern immersion from 1' to 11.5' over a speed range of 13 to 27 knots.

It is also intended to investigate stepped transom sterns for vessels that at times may have to operate at a much deeper draft than normal load draft.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0311, SATURATED DIVING FACILITIES FOR DIVER-SCIENTIST AND RELATED RESEARCH

*G.H. SAVAGE*, Univ. of New Hampshire, Graduate School, *Durham, New Hampshire* 03824 (N00014-67-A-0158-0005)

Currently, the feasibility study and model test program for the OSCILAB and SEADOPOD saturated diving facilities are being completed. The EDALHAB will be tested in a lake very soon. Work has started on a compact atmospheric monitoring and control system for saturated diving habitats. Investigation is proceeding of the feasibility of using fluidic controls in undersea vehicles, mobile habitats, and free operating oceanographic instruments.

The work under this contract is directly beneficial to Navy diving, salvage and underwater construction tasks which require saturated diving. Indirectly, it will provide marine scientists with new and improved techniques and tools to procure oceanographic and related data that is of direct Navy concern.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0312, FORCES AND MOTIONS INDUCED BY WAVES ON OCEAN PLATFORMS

*J.P. BRESLIN*, Stevens Institute of Technol, School of Engineering, *Hoboken, New Jersey* 07030

Stevens Institute of Technology will use the facilities of the Davidson Laboratory for research into the forces and motions induced by waves on ocean platforms with the objective of developing design criteria that will improve design and construction of exploration, trial drilling, and production drilling platforms. Research will be directed to three principal elements: (a) a more precise specification of wave-induced loads on both submerged and projecting surfaces; (b) means of reducing motions induced by the seaway for both moored and dynamically positioned platforms; and (c) determination of wind-induced loads for prediction of overturning moments. The project personnel will adapt to the case of ocean platforms the well-proved Davidson Laboratory program for computing ship motions, supplementing existing information through the use of model elements in the laboratory

research tank facilities. A wing tunnel will produce the necessary wind loadings on model elements. Configurations will then be studied to determine how motions can best be reduced at critical frequencies. Results will be presented in a form suitable for use by designers.

SUPPORTED BY U.S. National Science Foundation

### 8.0313, SHIP MANEUVERING AND CONTROL

*UNKNOWN*, Stevens Institute of Technol, Graduate School, *Hoboken, New Jersey* 07030

**Purpose:** To develop a design manual on ship controllability covering determination of rudder shape and area for efficient operation at sea, and improved control during docking and stopping.

**Description:** Straight run model tests have been made in the regular towing tank; and turning tests conducted under the rotating arm with three Series 60 models of block coefficients 0.60, 0.70 and 0.80, and one mariner model to obtain hull hydrodynamic forces and moments.

Similar tests were made using three different rudder areas. With the aid of the test data, formulae are being developed for estimating the directional stability and controllability of single-screw merchant vessels. Stopping performance tests have also been made and a mathematical model developed to simulate ship stopping maneuvers. This model was checked with available full scale data obtained for an Esso Suez Class tanker. These data will be useful for predicting ship stopping capabilities, and will be put in a form which is useable in ship design.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0314, 40,000 HORSEPOWER PLANETARY REDUCTION GEAR SYSTEM

*R. HETTENBACH*, Curtiss Wright Corporation, *Rutherford - Wood Ridge, New Jersey*

With the advent of hydrofoil craft and fast deployment logistic ships a need arose for a lightweight transmission system. In one such application, a 40,000 HP gear box was to be installed in a 34 inch pod diameter. Curtiss-Wright through its experience in aircraft planetaries designed, built and has been testing a 4 to 1 planetary system satisfying these requirements. The gear units have an outside diameter of 34 inches, are 5 feet long, weigh 4,000 lbs each and show an efficiency of 99.0 percent. The planetary gear box utilizes double helical gears, journal bearings, aircraft type materials with carburized and ground surfaces. The accuracy of the gear tooth elements falls within the precision classification.

A significant departure from normal planetary design has been in the load distribution among the planets. Here, material deflection characteristics and geometric shapes were calculated to arrive at a uniform load distribution.

The criterion for the gear box was to design for an unlimited life all the gear box elements at power ratings of 50,000 HP and 4,000 RPM input speed.

This program has been sponsored by the Navy since 1962. To date, over 300 hours of locked torque rig testing has been accumulated at powers ranging from 25,000 HP to 50,000 HP with an input speed of 4,000 RPM. Additional testing is planned at the higher HP ranges with lower input RPM to match the current high HP gas turbine engines. Final reports are issued at the completion of a given work statement phase.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0315, HIGH SPEED SHIP PROPULSION

*R.B. LEWIS*, Curtiss Wright Corporation, *Rutherford - Wood Ridge, New Jersey*

Study high speed ship propulsion. Compute the range performance and thrust power ratio for optimized propulsor configurations and show the sensitivity of installed performance to changes in the important component performance parameters for various propulsion system/high speed craft types.

## 8. ENGINEERING AND TECHNOLOGY

The equations for performance will be developed for all the various combinations from a common base with identification of terms to show the commonality. Types of craft will include hydrofoil, captured air bubble, planing hulls, and displacement hulls. Types of propulsors will include, propellers, waterjets, and mistjet.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0316, MOORING IMPROVEMENT SYSTEM

UNKNOWN, Frederick R. Harris Inc., New York, New York

PURPOSE: To develop an improved ship mooring system that will permit ships to be secured more rapidly, safely, and economically.

DESCRIPTION: An advanced mooring system is being developed which consists of two major parts; a set of constant tension mooring winches (with controls) and a telescopic mooring arm. The system is designed to permit two 120 foot mooring arms to place ship's hawsers on pier mooring bollards, and dock the ship alongside a pier from a distance off between two already moored ships, with only one man handling each mooring arm and without the assistance of tugs. The complete system will provide constant tension control, and simplified mooring and handling of lines. Construction of the constant tension mooring winches for the telescopic arm has been substantially completed. Fabrication of the mooring arm and assembly and shop test of the completed system are soon to be undertaken.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0317, TRANSITIONAL CONTAINERSHIP CONCEPT

UNKNOWN, George G. Sharp Incorporated, New York, New York

Purpose: To determine the means for ready changeover of a ship's cargo hold from a 100 percent break-bulk operation to an efficient all container handling operation as cargo demand dictates.

Description: This research study will examine the problems of designing a ship's cargo handling arrangements and equipment to permit 'instant' conversion from a 100 percent break-bulk cargo ship to a pallet carrier or to a cellular containership, without sacrifice in operating efficiency, and without the need for expensive structural modifications to the ship.

The ship selected for study and comparison is comparable to the 'standard' mariner that is in use for general cargo today - length-565 ft., beam-76 ft., break-bulk capacity - 812,000 cu. ft., speed - 20-22 knots.

A basic hold module was developed to satisfy all functional requirements, and from this three conceptual designs were prepared. The last of the three is being developed in more detail with emphasis given to special structural features for container operations. Cost estimates of the transitional ship will be included.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0318, HULL DESIGN - MODULAR DECKHOUSE

UNKNOWN, J.J. Henry Company Inc., New York, New York

Purpose: To develop means for reducing ship construction costs by applying modular concepts to the design, fabrication, and outfitting of deckhouses.

Description: The most suitable distribution and amount of space needed to accommodate a 35-man crew was investigated to determine the manner in which an efficient functional layout could be arranged that would be simple and inexpensive to install. The layout was required to be expandable or retractable to accommodate crew sizes at variance with the base number. A vertically oriented sub-division of the house separated into three major subassemblies around the machinery trunk, with the pilot house as a separate module on top, was selected as the best means to minimize field connections made aboard ship.

A fabrication concept was investigated in conjunction with a shipyard and a joiner contractor by which outfit could be preposi-

tioned at appropriate levels and in predetermined sequence for direct insertion into the open face of each structural subassembly.

Each fabrication and installation process was analyzed to determine the manhours which could be saved by permitting wider use of bench work in place of field work, reduction of trade interference, and maximum use of modular construction. Economic analysis included the cost of all special facilities materials and jigs.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0319, ROLL DISTRIBUTION OF A NUCLEAR CARGO SHIP WITH AND WITHOUT FLUME STABILIZATION

UNKNOWN, J.J. McMullen Associates Inc., New York, New York

Purpose: To determine the effects of flume stabilization on the motions of large nuclear powered cargo vessels under severe sea conditions and zero speed.

Description: Analysis was made of the predicted rolling motions of a large nuclear powered containership, at zero speed and lying in the trough of the waves, to provide design criteria for the reactor plant and to evaluate the effectiveness of the flume stabilization system in reducing rolling under these conditions. The probable sea states on Trade Route 12 were used in predicting rolling.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0320, FULL SCALE STRESS MEASUREMENT TESTS OF GREAT LAKES ORE CARRIER

UNKNOWN, Soc. of Nav. Arch. & Mar. Eng., New York, New York

Purpose: To obtain statistical data on wave induced stresses in a typical modern ore carrier operating on the Great Lakes, and to relate these stresses to measured wave and weather data, in order that design criteria appropriate to super size ore carriers of up to 1,000 feet in length can be developed.

Description: This project is a joint cooperative venture initially supported by the Maritime Administration, Lake Carriers Association, American Bureau of Shipping, and the Society of Naval Architects and Marine Engineers who are coordinating the project. Instrumentation to measure hull stresses consists of transducers located amidships on the underside of the port and starboard main deck plating of the RYERSON, and at the forward and aft quarter points.

Data is recorded periodically on tape which monitors all points simultaneously. The wave data is derived from the ship's log and from wave buoys launched from the RYERSON under storm and high wave periods.

The third season of data collection is under way. This third season is being devoted largely to evaluation of course changes as a means to minimize springing. Two instrumented ship models are being tested at Davidson Laboratory to provide a means to improve predicting capability. One model is of the 730 foot EDWARD L. RYERSON, and the other is of 1,000 foot future ore carrier. The results of these investigations will also generate useful information on techniques for developing more accurate scantling criteria for all types of supersize ships.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 8.0321, DYNAMICS OF MOORED BUOY SYSTEMS USED IN OCEANOGRAPHY R&D AND SURVEILLANCE

J.H. NATH, Oregon State University, Graduate School, Corvallis, Oregon 97331

Objective: Effective use of moored buoy systems for research or operations will require a knowledge of the noise generated in various buoy-mounted instruments by motions of the anchored buoy.

In support of this requirement, this research will develop a capability for predicting statistically the motion at any point on the anchored buoy system given information on the ocean currents, ocean waves, and wind force on the surface buoy.

## 8. ENGINEERING AND TECHNOLOGY

**Approach:** This is a laboratory effort involving the preparation of a computer program to simulate the motions of an anchored buoy, of medium size, along with its mooring cable. The complete set of dynamic equations, which relate this computer-simulated anchored buoy to the forces acting on it, will then be solved to give the motions resulting from any given set of forces.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0322, MARINE ATMOSPHERIC RESEARCH FACILITY S.J. NESHYBA, Oregon State University, Graduate School, Corvallis, Oregon 97331

Support is provided for the construction of a moored offshore, marine meteorological platform, including a basic set of sensors, a data telemetry system, and sufficient power and safety equipment. The platform will be used to support research in 1) marine meteorological phenomena, 2) coastal air processes as related to weather modification, 3) air-sea exchange processes, and 4) meteorological turbulence near the ocean interface.

SUPPORTED BY U.S. National Science Foundation

### 8.0323, SHAFT HORSEPOWER SERVICE ALLOWANCE FOR SHIPS G.H. LEVINE, Robert Taggart Incorporated, Fairfax, Virginia 22030

A study has been undertaken to establish a more rational method of determining the shaft horsepower service margins for ships. The end results are to be an analytical procedure for determining the service margin and a delineation of the types of data necessary to solve the problem and the methods necessary to obtain this data.

SUPPORTED BY Society of Naval Architects & Marine Engr.

### 8.0324, FUNCTIONAL AND ECONOMIC ANALYSIS OF SHIP MANEUVERING SYSTEMS

UNKNOWN, Robert Taggart Incorporated, Fairfax, Virginia 22030

**Purpose:** To devise modifications to merchant ship maneuvering and control systems which will upgrade operating efficiency and improve economy.

**Description:** This investigation includes analysis of maneuvering and control systems currently in use and the study of new concepts. A detailed analysis has been made of the effectiveness of rudder operation in the propeller race of a high-speed, single-screw merchant ship, and the analytical results confirmed by ship-board measurements and observations.

A new concept for steering configuration which shows great promise for improved performance both at low ship speeds and during ocean transit is under study. This steering unit is expected to require much less power and be less complex than existing steering machinery. Automatic steering control, which has been found to induce undesired ship motions, is being investigated more thoroughly.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

## 8M. SANITARY ENGINEERING

(see Chapter 6e on Water Quality and Pollution.)

### 8.0325, OCEANOGRAPHIC FACTORS IN THE FUNCTIONAL DESIGN OF WASTE DISPOSAL SYSTEMS

J.W. JOHNSON, Univ. of California, Water Resources Center, Los Angeles - U.C.L.A., California 90024

In the design of waste disposal systems, such as ocean sewer outfalls, cooling water waste lines from nuclear power plants, etc., a large variety of technical problems remain to be solved to place such sound design on a sound scientific basis. The three major areas of studies have been: 1. The mixing of a buoyant jet being discharged horizontally at the water surface. 2. The mixing of a series of buoyant jets being discharged horizontally from both sides of a manifold placed at the bottom of a tank. 3. The mixing

caused by the mass transport associated with surface waves having a circular normal directional spectra.

The laboratory work done previously at UCB in regard to Item 1 was re-examined, and compared with the results of work done subsequently by other institutions. These results were then compared with the two sets of prototype data with which the investigators were aware: The Pacific Gas & Electric Plant at Morro Bay, California, and the discharge of the Columbia River into the North Pacific Ocean. The data compared favorably, on a gross basis. It became evident that the laboratory work should be extended to much smaller values of Froude number and that the statistical fluctuations of temperature and salinity in the mixing jet should be studied in detail.

In regard to Item 2, the results of the studies of single jets by a number of investigators were compared, and a preliminary report written on the findings. It was evident that no additional work need be done on the portion of a single jet between the bottom and surface, but that there is essentially no information on the interaction of multiple jets from a manifold. The laboratory equipment has been designed, constructed and tested, with preliminary tests made.

The results of a theoretical study of Item 3 have been negative, in the sense that there appears to be no mixing caused by the mass transport of waves with a circular normal distribution. However, the theoretical study was linear, and there may be some non-linear mechanism that exists.

SUPPORTED BY University of California

### 8.0326, MODEL ADVANCED WASTE-TREATMENT PLANT

A. MACHIS, Washington Suburban San. Comm., Hyattsville, Maryland

The objective of this project is to design and construct a 5 mgd advanced waste treatment plant at the Commission's Piscataway Wastewater Treatment Plant to demonstrate the high efficiency removal of phosphorus, BOD, suspended solids and refractory organics. The AWT plant is planned to consist of lime precipitation, lime recovery, recarbonation, filtration, activated carbon adsorption, and activated carbon regeneration.

Research by the Federal Water Pollution Control Administration and others has shown the feasibility of attaining improved removals of carbon and phosphorus from municipal waste discharges. The work has been primarily in the laboratory and small pilot plants; now it is ready for larger pilot scale or full-scale operation. The Piscataway Plant is a particularly appropriate site because of joint FWPCA-WSSC cooperation in AWT and because of the interest in water pollution problems in the Potomac Estuary.

SUPPORTED BY U.S. Dept. of Interior - F. Water Pol. Ctl  
Washington Suburban Sanitary Commission

### 8.0327, SYSTEMS ANALYSIS FOR SHIPBORNE MUNICIPAL INCINERATION

M.W. FIRST, Harvard University, School of Public Health, Boston, Massachusetts

This work is concerned with: (1) fundamental studies of the atmosphere 10-30 miles off-shore and its capacity to absorb gaseous wastes without polluting the coastal areas; (2) analysis of the effects of large scale dumping of incinerator residues on the marine life in the vicinity and on the bottom; (3) an investigation of the deposition and distribution of solid residues on the ocean floor; (4) applications of the methods of systems analysis and high speed computers to optimize collection networks oriented towards waterfront ship loading points, location of dockside transfer stations, and scheduling of ship movements with respect to the distribution of loading and burning times, load size, crew shifts, etc. (5) use of operations research methods to investigate the relative merits of all applicable solid waste management systems on the basis of urban configuration, geographical location, pollution control practices, etc.

SUPPORTED BY U.S. Dept. of Hlth. Ed. & Wel. - P.H.S.

## 8. ENGINEERING AND TECHNOLOGY

### 8.0328, CONSTRUCTION OF A FACILITY TO DEMONSTRATE OFFSHORE UNDERWATER TEMPORARY STORAGE OF STORM OVERFLOW FROM A COMBINATION SEWER

W.J. BANDY, Karl R. Rohrer & Associates, Akron, Ohio 44311

Combined sewer storm overflows are a source of water pollution. The proposed work is to completely engineer a demonstration facility for temporary underwater storage of these overflows. The storage will be in large flexible (rubber) containers anchored underwater in a water body. The system will automatically fill during a storm event, and a pumped flush system will be used to empty the tanks into the interceptor sewer after storage.

The system capacity will be designed for a particular site after climatological, hydrological, and topographic studies are performed.

Instrumentation will include a recording rain gage, continuous flow recorders, and an automatic sampling device.

The site selected is an 18 acre drainage area located in Sandusky, Ohio. The existing leaping weir overflow structure is at the foot of McEwen Street. The tanks will be installed in Sandusky Bay of Lake Erie. The flexible tanks will be of rubber coated nylon construction, and 100,000 gallon capacity.

SUPPORTED BY U.S. Dept. of Interior - F. Water Pol. Ctl

### 8.0329, SALT WATER ENTRAINMENT FOR DILUTION IN SEWER OUTFALLS

R.E. NECE, Univ. of Washington, School of Engineering, Seattle, Washington 98122

This investigation is an experimental and analytical study of the mechanism of the entrainment of a fluid into a conduit passing through an infinite volume of this ambient fluid and through which flows a different fluid. The particular motivation is to obtain basic information which could be applied in the sanitary engineering design of sewer outfalls discharging into salt water. In this case, where density differentials exist, entrainment of salt water into the outfall prior to ultimate discharge would decrease the density differential between effluent and receiving water, thereby decreasing the amount of diffusion necessary to produce acceptable sewage concentrations at the water surface. Such entrainment could be accomplished by providing appropriate inlets through the wall at a reduced-pressure 'venturi' section in the outfall pipe.

This study is to treat a few relatively simple geometries in some detail. Attention is to be focused on those factors influencing entrainment rates, namely: density and pressure differentials between ambient and initial conduit fluids, velocity of approach in the conduit, and inlet geometry. Mixing patterns within the conduit are to be studied. It is planned to extend the tests to the case of an ambient fluid which is in motion.

## 8N. UNDERWATER CONSTRUCTION

(Soil and Rock Mechanics; Habitat Installation; Welding. See Chapter 8d on Coastal Engineering)

### 8.0330, LABORATORY STUDIES TO DETERMINE ROCK PROPERTIES UNDER HYDROSTATIC (SEA WATER) PRESSURE

S. CHI, U.S. Dept. of Interior, Marine Min. Technol. Ctr., Belvedere - Tiburon, California 94920

A literature search will be made on residual stresses occurring in rocks of the types to be tested. If equipment can be made available by Stanford, ore samples will be tested in a triaxial cell at various pressures corresponding to various depths of submergence. Physical properties of the rocks will then be measured in order to begin to understand the effects of sea water on seafloor rocks (such an understanding will lead to improved methods for seafloor rock penetration and fragmentation).

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 8.0331, SEA BED INSTALLATION

A.D. NEWSHAM, North Amer. Rockwell Corp., Long Beach, California 90803

This research program was undertaken to further develop the capabilities to support sea bottom installations and operations through the effective selection and preparation of ocean floor construction sites. Two primary areas were considered: (1) the foundation emplacement associated with the installation of an above-bottom habitat, and (2) the modification of the surrounding bottom terrain to enhance the capability for performing mission tasks. Foundations for manned habitats, such as stands, mats, piles and anchors, were assessed in terms of habitat configuration and bottom conditions. Site modification for the purposes of accommodating the foundations and structures encompassed such tasks as overburden removal, leveling, rock drilling/blasting, and soil stabilization. Thirty-three variations in bottom conditions were considered in the investigations. The experience and state-of-the-art of the offshore development industry (oil drilling and mining) was a factor in assessing currently available procedures and equipment. Two internal technical reports have been prepared documenting results of the study: 'Site Selection and Site Preparation Analysis for Manned Underwater Structures', T8-1219/020 May 1968; and 'Operational Considerations of Site Selection and Site Preparation for Manned Bottom Installation', T8-2247/020.

SUPPORTED BY North American Rockwell Corporation

### 8.0332, BOTTOM SOIL PROPERTIES AND FOUNDATIONS

UNKNOWN, U.S. Navy, Civil Engineering Lab., Port Hueneme - Point Mugu, California

Objective: Develop the methods and equipment to determine the engineering properties of bottom soils with sufficient accuracy to permit the design of structural foundations. Properties of interest are bearing capacity, shear strength, bulk density, consolidation rates, bottom stability and classification. Installations on the ocean floor will require foundations which will provide support without settlement or scour. Proper design of these foundations requires soil samples for laboratory tests in addition to in-situ tests. Most sea floor work done in the past has been that the oceanographers and marine geologists interested in generic classifications and chemical and physical composition of bottom materials. Consequently knowledge of engineering properties is comparatively limited.

Approach: Development of both laboratory and in-situ equipment and techniques for measuring pertinent properties of the sea floor materials. A coring tool that will be capable of obtaining a minimum disturbed core to a depth of about 30 feet below the sea floor in firm material will be developed. An in-situ plate bearing vane shear, and penetrometer device will be developed and tested. Studies will be conducted to determine the effect of the deep ocean environment on the engineering properties of sea floor sediments. Studies will also be made in areas such as sample handling and storage, laboratory testing techniques for very cohesive ocean sediments, and correlation between in-situ and laboratory results. Problems of submarine landsliding, slumping and turbidity currents must be investigated; however very limited data are available on mechanism and causes. As a consequence, the initial phase of these studies will be to review these actions from a theoretical soil mechanics aspect after which full scale field experimentation will be conducted. Study of scour and fill will be approached from direct experiments with objects placed in potentially unfavorable areas with periodic examination to observe the effects over an extended period of time.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0333, DESIGN AND CONSTRUCTION

UNKNOWN, U.S. Navy, Civil Engineering Lab., Port Hueneme - Point Mugu, California

Objective: To acquire engineering data on the behavior of materials used in ocean construction and to develop engineering criteria for the design of ocean structures. The effects of the ocean environment on ocean structures is one of the primary factors which must be considered before the design of an on- or in-bottom installation can be completed. Information is available on the behavior of materials at 2500 feet and 6000 feet. However, knowledge of the effects of protective coating, biological deterioration and shallow water corrosion is limited. Various structural

## 8. ENGINEERING AND TECHNOLOGY

SUPPORTED BY Lockheed Aircraft Corporation

### 8.0336, HIGH PRESSURE ROCK STUDIES

*R.B. GORLON*, Yale University, School of Engineering, *New Haven, Connecticut 06520 (NONR)*

This task is a continuing program on laboratory experiments to investigate the non-elastic properties of minerals and rocks at temperatures and pressures that occur in the earth's crust and upper mantle. Studies of internal friction in crystalline rocks with and without a fluid phase will continue. These experiments are being carried out at low frequencies, characteristic of seismic waves. Plastic deformation of single mineral crystals will be studied using etching techniques.

While this research is concerned primarily with these properties as they relate to the physical state of the earth's interior, the results obtained and experimental techniques developed will contribute to our knowledge of the behaviour under stress of rocks beneath the ocean floor.

SUPPORTED BY U.S. Dept. of Defense - Navy

shapes can be adapted to the ocean environment, however, at present detailed engineering criteria are only available for the design of cylinders and spheres. Other structural shapes must be investigated and data on the behavior of standard construction materials such as concrete must be obtained. Work undertaken in this task area will provide the technological foundation to accomplish future requirements in the design and construction of ocean installations.

Approach: Achievement of this objective involves work in the following areas: Area 1: Development of fundamental information on the effects of deep ocean environment on materials. This knowledge is essential in the determination of specialized design or materials to be used in fixed installations. Area 2: Development of engineering data on the structural behavior of materials and designs in the ocean environment. Area 3: Development of specialized safety techniques and warning devices to warn of impending structural and atmospheric failures in undersea construction.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0334, ANCHORS AND MOORINGS

*UNKOWN*, U.S. Navy, Civil Engineering Lab., *Port Hueneme - Point Mugu, California*

Objective: Develop the anchors and mooring systems required for surface, subbottom, and bottom installations in the oceans. The goals to be achieved under this task area are as follows: Maximum depth: 6,000 ft; holding power: 300,000 lb vertical and horizontal loads, performance: 5 years unattended. The requirement for structures and installations in ocean areas imposes new and stringent demands on anchors and mooring technology. The present state-of-the-art for deep ocean anchorage consists of dead-weight anchors and standard drag-type anchors. These anchors are massive, have low holding-power-to-weight ratio, require considerable horizontal distance to set and are difficult to handle and transport. Achievement of this task area objective will provide the capability to meet most anticipated future requirements in deep ocean anchorages.

Approach: Achievement of this objective involves the following three phases: Phase I: Development and testing of anchor designs and procedures for their rapid and efficient placement in the deep ocean. Embedment anchors offer a potentially fruitful avenue for investigation. However, drilled-in and driven type piles of various designs and configurations may well be adapted to deep ocean anchorage functions and will warrant investigations. Phase II: Development of anchor designs with the capability to resist not only uplift forces but also bearing loads. This work would fulfill the requirements of the bottom-rest type constructions required in the near future. Phase III: Development and testing of deep ocean mooring systems to meet most anticipated future needs. When Phase I and II are well underway, sufficient information will be available to proceed with mooring complexes. These complexes may involve multiple, taut line systems where packages will be anchored at depths down to 6,000 ft and they may involve combinations of systems for anchoring of large installations on the ocean floor.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0335, RELATIONSHIPS BETWEEN RATES OF SEDIMENT ACCUMULATION & CHANGES WITH DEPTH OF CERTAIN MASS PHYSICAL PROPERTIES IN MARINE SEDIMENTS

*A.L. INDERBITZEN*, Lockheed Aircraft Corporation, *San Diego, California 92101*

The purpose of the study is to determine the mathematical relationships between rates of sediment accumulation and changes in shear strength and water content with depth in marine sediments. Cores obtained from four geological provinces of Southern California are being utilized. The environments are: basin floors, basin slopes, insular shelves and San Diego Bay. Each core is analyzed for grain size, water content and shear strength at various depths in the core. Data is then processed through various statistical and curve fit programs to determine the relationships of these parameters to the different rates of accumulation for these environments.

### 8.0337, GEOLOGICAL OCEANOGRAPHY - PHYSICAL PROPERTIES

*J.J. GALLAGHER*, U.S. Navy, Underwater Sound Lab., *New London, Connecticut*

To determine those environmental factors affecting the undersea uses of the ocean; to investigate and define the physical properties of ocean sediments; determine the critical properties of sediments which affect the stability of structures and equipment placed on the sea floor.

Approach: Develop a shear strength and plate loading device for use of DRV's. Investigate the effects of chemical bonding on shear strength. Study bio-chemical properties of marine sediments and generally improve measurement and analysis techniques of the mass physical properties of sediments through a contract with the University of Rhode Island. Develop controlled photographic techniques for bottom roughness.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0338, SUPPORTING SYSTEMS

*P.H. CAVE*, U.S. Navy, Facilities Engin. Command, *Washington, District of Columbia 20390*

Objective: Provide, maintain and operate the supporting systems required for in-situ and laboratory tests of ocean soils, materials, components and models. All construction work in the ocean requires preliminary work or studies in a laboratory or in-situ to prevent costly failures of equipment in the ocean. For this purpose, simulated hydrospace facilities and in-situ testing equipment must be built, maintained and operated. By the end of FY 68 there will exist at NCEL a deep ocean simulation laboratory consisting of six 9-in vessels; and one 6-ft vessel. Also there will exist a 6000-ft deep ocean test, instrument, placement and observation system (OTIPOS) for making in-situ tests. During the past year the deep ocean simulation laboratory has been used extensively in support of in-house laboratory projects such as studying the spheres, and short and long term critical pressure test on acrylic windows. In addition, pressure testing of material and equipment for other naval activities such as the pressure testing of: buoyancy spheres for CURV; lights and cameras for Sealab; and proof testing of polaris junction box have been conducted. Achievement of the objective of this task will allow the navy to continue to meet requirements for: pressure and in-situ testing in support of research and development; and proof test required before equipment can be used in the ocean.

Approach: Achievement of this objective involves work at the Naval Civil Engineering Lab and in industry in the following areas: Area I: maintain and operate the deep ocean simulation laboratory and the deep ocean test instrument placement and observation system. Area II: improve existing systems and formulate the new systems so that the adequate facilities exists when the need for conducting studies in them arises.

SUPPORTED BY U.S. Dept. of Defense - Navy

## 8. ENGINEERING AND TECHNOLOGY

### 8.0339, DEEP OCEAN SYSTEMS

*D.C. PAULI*, U.S. Navy, Office of Naval Research, Washington, District of Columbia

Objective: To develop new techniques and equipments to enhance the performance of useful undersea work and the technology of undersea installations.

Three programs are being pursued, primarily through industry. Advanced diver equipment is being studied and developed to enable a free-swimmer to go much deeper and do much more work than is now possible. For utilization on DRV's, undersea robot mechanisms, etc., a new manipulator concept employing tensor elements is being pursued. This manipulator will be light, less bulky, and far more flexible than any equivalent equipment now in use. The problem of efficient measurement of ocean-floor programs are all aimed at improving navy capability of undersea construction, salvage, rescue, and recovery. Time-wise results from all three programs would be beneficial today and for many years to come. In respect to general objective (3) above, two programs are underway. Solutions are being sought for heating and breathing problems in the manned undersea installations which are currently required for the Navy man-in-the-sea effort.

Approach: All the above programs are proceeding in general through following phases (1) establish requirements; (2) study possible solutions; (3) select trial solutions; (4) design and analyze; (5) model and/or component parts fabricate and test; (6) prototype test and evaluation. The order can change and there are often overlaps or concurrent efforts in these phases, but each of the programs fits this general outline.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0340, CIVIL ENGINEERING STRUCTURES IN THE OCEANS

*P.G. MAYER*, Georgia Inst. of Technology, School of Engineering, Atlanta, Georgia 30332

Engineering structures in the ocean involve forces and constraints which demand attention to the interrelationships between the soil dynamics of the ocean floor, the hydrodynamics of wave action and of the viscous damping, and the structural response characteristics. These interrelationships must be understood as random phenomena and must be treated by probabilistic methods.

The present study involves the formulation of a structural model based on continuous mass distribution, an analysis of the wave force spectrum using the theory of random processes as applied to structure and the ocean, and an analysis of foundation conditions. The synthesis of the above will be attempted by numerical methods.

Ph.D. thesis on this project by Billy L. Edge completed in June 1968.

SUPPORTED BY Georgia Institute of Technology

### 8.0341, DEEP SEA SEDIMENT STUDIES

*A.F. RICHARDS*, Univ. of Illinois, Graduate School, Urbana, Illinois

Research on the mass physical and engineering properties of deep-sea sediments and development of instruments and techniques for measuring these properties will be continued. The vane shear and gamma-ray densitometer in situ probes will be modified for use in deep water and will be field tested. A laboratory study to determine means for obtaining valid shear strength data from sediment cores, will be undertaken. The development of a computer capability for reduction, analysis, and storage of soil-mechanical data will be initiated.

Information concerning the interaction of both acoustic waves and man-made structures with marine sediments is important in naval operations. Such information requires an understanding of the physical and acoustical properties of marine sediments, their interrelationships, and the techniques necessary for properly measuring them. This program will help provide the required understanding.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0342, ELECTROKINETIC SOIL STUDY

*M.I. ESRIG*, Cornell University, School of Engineering, Ithaca, New York (NONR)

This investigation, dealing with electrically induced relaxation of the breakout forces required to free metallic objects buried in soils, will be completed. The results of laboratory experiments will be analyzed and the theoretical basis for the observations will be considered.

Electrical techniques for the reduction of breakout forces and conversely for localized soil stabilization may have widespread applications in salvage operations and in ocean-bottom construction.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0343, OCEANOGRAPHIC RESEARCH

*R.F. HILL*, Univ. of Rhode Island, School of Engineering, Kingston, Rhode Island 02881

Objective: Identify those environmental parameters near the ocean/bottom interface that have engineering significance; develop a detailed technical description of these parameters as a function of global position, and document the detailed descriptions so as to be of maximum benefit to deep ocean system planners and designers. The pertinent parameters include current magnitude, turbidity, dissolved corrosive agents, bottom bearing strength, bottom roughness, soil adhesion, etc.

Approach: Develop a list of and describe the technical scope for those environmental parameters which are pertinent to the engineering of deep ocean systems. Conduct a survey of technical information resources, such as the published literature, unpublished reports, interrogation of experts, etc. Analyze and evaluate this information to determine the present state-of-knowledge of the pertinent oceanographic environment. Develop a detailed description of those environmental parameters that should be observed in situ to close the gap between the present state-of-knowledge and the desired understanding of the pertinent oceanographic parameters resulting in a detailed catalogue of the pertinent parameters, the necessary spatial and temporal sampling required to measure these parameters, the necessary accuracy of those parameters, and the preferable format of the data. A detailed technical report will result from this contract.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 8.0344, UNDERWATER WELDING

*F.J. PILIA*, Ocean Systems Incorporated, Reston, Virginia

Dry Welding - Experiments have been conducted and operational tests have proven techniques for Argon shielded TIG welding to depths down to 165 feet. Work is underway to perfect a Helium shielded TIG technique and to verify the technique at depths down to 600 feet. Helium must be employed as shield gas due to the narcotic effect of Argon under pressure.

Wet Welding - OSI is attempting to develop a wet welding machine employing the MIG process which will provide faster and cleaner welds than wet stick welding.

Dry MIG tests have been conducted at depths down to 100 feet. Dry tests will be continued down to 200 feet and then wet tests will be attempted.

SUPPORTED BY Ocean Systems Incorporated

## 9. COASTAL ZONE MANAGEMENT AND USE

(recreation, Conservation, Planning, and Management)

### 9.0001, ECONOMIC EVALUATION OF PRIMARY BENEFITS FOR FISHING AND HUNTING BASED ON THE NATIONAL SURVEYS OF FISHING AND HUNTING

*S.V. CIRIACYWANTRUP*, Univ. of California, Water Resources Center, Berkeley, California 94720

The primary objective is to appraise and analyze the data collected in the 1960 National Survey of Fishing and Hunting with a view to improving the projections of 'demand' for saltwater and freshwater fishing, small game, big game, and waterfowl hunting.

Relevant and reliable projections of the future consumption of fishing and hunting are valuable guides to future investment programs in land, water, and facilities development. Good projections constitute valuable checks as to the adequacy of water development programs, both at the activities and the regional level.

The nature and extent of the relationships between participation in the respective sports and other variables which might influence participation; for example, trip costs, distance of trip, expenditure on equipment, and the characteristics of the sportsman's family income, age, and profession are being ascertained by multiple regression analysis.

SUPPORTED BY University of California

**9.0002, EARTHQUAKE HAZARD - A PUBLIC POLICY PROBLEM IN THE SAN FRANCISCO BAY AREA**

*K. STEINBRUGGE*, Univ. of California, Inst. of Governmental Studies, Berkeley, California 94720

This will be a study covering the inevitability of future earthquakes, earthquake history in the Bay area and the significance of the public of the Bay area faults. The civil and structural engineering problems and the geological problems will be discussed; also such special problems as seismic sea waves and earthquake prediction. The governmental role and public policy will include relationships between federal, state, regional and local agencies involved, and will stress the great need for a planning agency to coordinate public action.

SUPPORTED BY University of California

**9.0003, A SURVEY OF THE MARINE ENVIRONMENT FROM FORT ROSS, SONOMA COUNTY, TO POINT LOBOS, MONTEREY COUNTY**

*M.W. ODEMAR*, State Dept. of Fish & Game, Sacramento, California

The primary purposes of the study were (1) determine whether there were any acceptable ocean areas which may receive wastes from the proposed California Central Valley Drain; and (2) determine areas (if any) where the least damage to the biota would result from the waste discharge.

Other purposes of the study were (1) to evaluate beneficial uses of the marine environment between Bodega Bay and Point Lobos; (2) collate biological data pertaining to organisms in the study area; (3) survey the benthic biota at each candidate discharge site; and (4) collect limited oceanographic data at each candidate discharge site. Data from the various sub-studies were used to develop the recommendations presented in the final report July, 1968.

SUPPORTED BY California State Government

**9.0004, USE OF THE COASTAL ZONE FOR THE U. S. COASTLINE OF LAKE ERIE AND LAKE SUPERIOR**

*A.B. BIGLER*, Natl. Planning Association, Washington, District of Columbia

The contractor will conduct investigations and analyses on the use of the coastal zone for the U. S. coastline of Lake Superior and Lake Erie intended to aid in future policy planning for these areas. Specific tasks include: (1) Review of background studies of factual data about the two lakes and their utilization and the economic and social ends served; (2) Analysis of the effectiveness of measures employed in the past for determining utilization of coastal zone resources, including case studies of selected conflicts; (3) Assessment of the potentials for applying marine science and technology to achieving greater multiple use, or more optimal use, of coastal zone resources; (4) Identification and evaluation of new or different measures to protect higher-level utilization of coastal zone resources; (5) Analysis of international problems and opportunities in achieving optimal use of lake waters and lake-bed resources, and recommendations of desirable new measures.

SUPPORTED BY Natl. Council on Marine Res. & Engin. Dev.

## 9. COASTAL ZONE MANAGEMENT AND USE

**9.0005, ISLAND STUDY**

*S. YOUNG*, U.S. Dept. of Interior, Bureau of Outdoor Recreation, Washington, District of Columbia 20240

This survey and planning study has three major objectives: (1) Inventory all 10-acre or larger islands in the U.S., Puerto Rico, and the Virgin Islands by size, ownership, and development status. (2) Identify and evaluate those islands which have significant wilderness, historical, or other recreational values. (3) Develop a program for island conservation.

The Island Study was started during fiscal year 1967. The inventory phase and the detailed studies of those islands with significant recreational values have been completed. The final report, outlining a program for island conservation, should be released during fiscal year 1969.

SUPPORTED BY U.S. Dept. of Interior - Bu. Outdoor Rec.

**9.0006, INVENTORY AND ATLAS OF GULF COAST SPORT FISHING FACILITIES**

*N.G. VICK*, U.S. Dept. of Interior, Bureau of Sport Fish. & Wlfe., Panama City, Florida 32401

A complete inventory of fishing facilities and fishing areas for the coast of the Gulf of Mexico from Brownsville, Texas to Key West, Florida will be made. All available reports and brochures on salt water sport fishing will be obtained through the circulation of a facilities checklist to recreational and fishing committees of chambers of commerce in coastal communities. Field trips will be made to confirm and add to the data obtained through correspondence. The results will be reviewed by State Conservation agencies for accuracy and completeness. The information will be published as a single atlas consisting of unit maps which together will cover the whole coast.

SUPPORTED BY U.S. Dept. of Interior - Bu. Sport Fish.

**9.0007, HYDROLOGY OF COASTAL AREA IN THE VICINITY OF RICEBORO, GEORGIA**

*A.N. CAMERON*, U.S. Dept. of Interior, Water Resources Division, Atlanta, Georgia

This research is part of the program of water resources investigations conducted by the U. S. Geological Survey in cooperation with the State of Georgia.

Purpose - To determine the hydraulic and chemical characteristics of surface waters in the North Newport River Drainage Basin and the piezometric surface and quality of water in the principal artesian aquifer in the vicinity of Riceboro prior to the beginning of operations of a large industry as well as after the plant is in operation.

Methods - The tidal behavior of the Newport River estuary will be studied and the amount of interchange between salt and fresh water, the time of travel through the estuary, and the dispersion patterns will be determined. Discharge measurements will be made. Chemical analyses will be made on water samples collected periodically and water quality monitors will be installed. Wind direction and velocity component data will be recorded at one station. Continuous water level recorders will be installed on four wells. Electric and gamma-radiation logs will be made of selected wells within 30 miles of Riceboro to determine the amount of casing and depth of the well and aid in interpretation of the geology and identification of the aquifer. Aquifer tests will be made at the plant site after completion of the plant wells.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey Georgia State Government

**9.0008, SEA SLED AND SCUBA RECONNAISSANCE OF INSHORE AND STUDIES ON EFFECT OF ARTIFICIAL SHELTERS ON STANDING CROP OF FISHES**

*H.M. SAKUDA*, State Dept. of Land. Nat. Res., Honolulu, Hawaii 96813

Objectives: 1. To compile a qualitative and quantitative inventory of physical and biological factors of the coastal waters of the State. 2. To evaluate the effectiveness of artificial shoals as a fishery management tool. 3. To compile fishery management data from marine sanctuaries. 4. To construct artificial shoals in areas selected for habitat improvement.

## 9. COASTAL ZONE MANAGEMENT AND USE

Procedure: 1. With the use of SCUBA gear, the standard underwater transecting procedure developed during previous segments will be utilized to gather information on bottom topography and estimates of standing crop of fish. Resulting information will be applied in the selection of sites for future construction of artificial shoals. 2. The shoals constructed during the past segments will be examined from time to time and transects will be made to evaluate the effectiveness of the shoals in increasing fish life. 3. In an attempt to gather information on the effects of fishing pressure on standing crops of fishes, selected areas will be set aside as sanctuaries. Transecting will be conducted prior to and during the use of such areas as sanctuaries for purposes of comparing standing crops of fishes. 4. Construction of artificial shoals will be continued, utilizing damaged concrete pipes or other suitable materials.

### 9.0009, HAWAII STATE COMPREHENSIVE OUTDOOR RECREATION PLAN

*S.M. MARK, State Dept. of Plan. & Econ., Honolulu, Hawaii*

This project will investigate all phases of existing and proposed outdoor recreation, both urban and non-urban, of the State, its political subdivisions, the federal government, and private interests, including but not limited to, forests, reservoirs, lakes, rivers, sea shorelines, multiple-use areas, farms, hunting preserves, refuges, parks, natural areas, historic and cultural sites, and other significant outdoor recreation areas. It will consider such activities as hunting, fishing, skiing, hiking, camping, picnicking, pleasure driving, boating, swimming, golfing, and other forms of outdoor recreation in which people of the State, including handicapped and underprivileged, may participate in. It will serve as a guide for enhancing and preserving the natural beauty of the islands and its recreational areas. It also will consider and take into account the coordination of the activities of all agencies of the State, federal, and county governments relating to outdoor recreation.

The Plan will attempt to project estimated general recreation information for the State to 1985, based both on an analysis of present use of areas and facilities and on trends in population, income, leisure time, mobility, recreation habits, and interests. More detailed and specific demand and programmed facilities data will be provided for the next five-year period. Assuming the Plan effectuation to begin in early 1968, this will cover the period to 1972.

In accomplishing the above efforts will be made towards investigating the feasibility and possible methodology for utilizing Automatic Data Processing system following or adapted to that utilized in the national survey in maintaining recreation inventory and investigating and analyzing methodologies, concepts and alternatives for accommodating and integrating national concerns in programs for highway beautification, preservation and enhancement of natural beauty, and the handicapped and underprivileged in Hawaii's outdoor recreation areas and facilities.

SUPPORTED BY U.S. Dept. of Interior - Bu. Outdoor Rec.

### 9.0010, BAYOU LAFOURCHE SEDIMENTATION STUDY, LOUISIANA

*W.H. BOYLE, U.S. Dept. of Interior, Water Resources Division, Baton Rouge, Louisiana*

This research is part of the program of water resources investigations conducted by the U. S. Geological Survey in cooperation with the State of Louisiana.

Purpose: To determine the rate of sedimentation and the resulting channel characteristics such as size, shape, and slope.

Methods: A quantitative analysis of data collected by the U. S. Geological Survey and other agencies since 1955 will be initiated so that an estimate of the amount of sediment coming into the bayou can be made. This estimate will be compared to an amount derived by gamma probe at 18 cross-sections within the study reach which the density of the sediment at each cross-section is known. Finally a prediction of the stabilized channel will be made for the bayou within the study reach.

SUPPORTED BY U.S. Dept. of Interior - Geological Survey  
Louisiana State Government

### 9.0011, 1965 SALT-WATER ANGLING SURVEY

*J. CLARK, U.S. Dept. of Interior, Sandy Hook Marine Lab., Highlands, New Jersey*

Description of Work: Supply information and plan layout for interview forms to be used by Bureau of Census for nationwide survey of information on species, numbers, weights, areas and methods of fishing for salt water game fishes. Provide a list of primary and secondary game species for each sampling area. Assist the Bureau of Census in solving taxonomic problems in field canvass data. From compilations furnished by the Bureau of Census, prepare a complete data report for publication. Discuss results with appropriate fish and game officials where necessary.

SUPPORTED BY U.S. Dept. of Interior - Bu. Sport Fish.

### 9.0012, INVENTORY AND ATLAS OF MARINE SPORT-FISHING FACILITIES

*B. FREEMAN, U.S. Dept. of Interior, Sandy Hook Marine Lab., Highlands, New Jersey*

A series of line maps will be prepared as an atlas and will summarize marine sportfishing facilities and fishing grounds of the Atlantic coast from Maine to Florida. Intended as both a comprehensive guide for sportsmen and an inventory of facilities, each map will show locations of boating facilities, supplies, and services, as well as principal roads and towns. Water depths, fishing grounds, and common game fish will be indicated to a distance of ca. 30 miles offshore. The atlas will include location of natural and artificial reefs as well as principal wrecks. Tabular summaries accompanying each map will list fishing piers and public shore fishing areas, State and Federal parks, wildlife areas and associated recreational facilities.

SUPPORTED BY U.S. Dept. of Interior - Bu. Sport Fish.

### 9.0013, DESIGN, CONSTRUCTION AND LONGEVITY OF ARTIFICIAL FISHING REEFS

*R.B. STONE, U.S. Dept. of Interior, Sandy Hook Marine Lab., Highlands, New Jersey*

Design and install artificial fishing reefs of junk cars, concrete materials and scrap tires on approved reef sites off Monmouth Beach, N. J., Atlantic Beach, N.Y., Charleston, S.C., Jacksonville, Fla., Palm Beach, Fla. and in Biscayne Bay, Miami, Fla. Arrange these to provide comparative data on the design and type of materials used in relation to the effectiveness and longevity of fishing reefs. Make periodic underwater observations on condition of materials, encrusting organisms and population of fish attracted to reefs. Conduct laboratory tests on reef models of the action of currents, tides and other environmental factors.

SUPPORTED BY U.S. Dept. of Interior - Bu. Sport Fish.

### 9.0014, SURFACE AND GROUND WATER POTENTIALITIES OF THE MULLICA RIVER BASIN

*M.L. GRANSTROM, Rutgers The State University, School of Engineering, New Brunswick, New Jersey 08903*

The proposed research project involves a systems analysis study and an ecological field investigation of aqueduct water transfer from the Mullica River Basin (containing a large state water reserve) to several New Jersey cities. This study will determine the: 1) cities which will have future demands for Mullica River water 2) optimum conjunctive surface and ground water development 3) economic effects of water withdrawal on shellfish, other biota, recreation, and waste assimilation capacity of the river and estuary.

The systems analysis approach will involve applications of extremal mathematics, such as linear programming, or simulation and stochastic processes. Fish spawning and nursery grounds studies and plankton dredging surveys will determine the distribution of these biota with respect to the existing and projected hydrography of the river-estuary system. Dissolved oxygen, salinity, and other water quality parameters will also be measured for the mathematical model. Project results will be applicable to other river basins which have conjunctive surface and ground water potentialities which affect the estuarine ecology.

**9.0015, CRITERIA FOR EVALUATING THE QUALITY OF WATER BASED RECREATION FACILITIES**

*C.C. STOTT*, Univ. of North Carolina, School of Education, Raleigh, North Carolina 27600

Statement of Problem - On the basis of opinions of users of water based recreation facilities and the opinions of professional recreation experts, rating standards will be established for quality of swimming, boating, and fishing. These standards will be used in evaluating the adequacy of facilities for at least one geographical area.

Objectives - To establish criteria of a practical nature that would aid in determining the quality of water based recreation facilities; to develop standards for evaluation purposes; to develop standards that would serve as guidelines for the operators of water based facilities.

Procedures - To determine existing practices relative to current standards; to determine from the user of water based recreation facilities data essential to the adoption of criteria; to determine acceptable practices as performed by practitioners of good professional reputation. Major Subjects - Marinas: boat docks, boat ramps, boat hoist, marine repair and services, boat mooring, boat anchoring, boat wet storage (boat slips), boat dry storage, floats, docks, piers, tackle shop and supplies, refreshment services, fishing bait, toilet, buoy safety markers. Swimming Areas: bathhouses, beaches, lifeguard staffing patterns, swimmer lifeguard ratio, swimmer loads. Fishing Facilities: fishing piers, boat rentals, rescue squads. The data will be collected over an area of several states in the East during June, July, and August, 1965. Such data will be processed at North Carolina State University at Raleigh.

**9.0016, PUBLIC INVESTMENT CRITERIA FOR WATER-ORIENTED RECREATION IN THE LAKE ERIE BASIN**

*R.A. TYBOUT*, Ohio State University, Graduate School, Columbus, Ohio 43210

The project has three parts: 1) The measurement of demand for water-oriented recreation at numerous sites. 2) Analysis of costs of pollution abatement and recreation facilities at the same sites. 3) Evaluation of the relative merits of alternative public investments for recreation enhancement and of selected financial policies.

Each part is assigned a year of research time. Demand will be measured by a simultaneous-origin adaptation of the Hotelling-Clawson method. Shifts in demand due to pollution and income changes will be measured and, in fact, play an important part in the determination of benefits from abatement. The analysis of costs of pollution will seek to relate marginal pollution contributions at recreation sites to costs of abatement. The third, or final part of the analysis will explore the implications of combining the results of the first two parts in a cost-benefit framework with various methods of financing, including pollution taxes, user charges and other revenue sources.

Ohio State University

**9.0017, TECHNIQUES OF PLANNING**

*B.A. TICHENOR*, U.S. Dept. of Interior, Pacific Nw. Water Laboratory, Corvallis, Oregon 97330

This project has two objectives: 1. To provide consultation and assistance to projects in the Research Branch of the Pacific Northwest Water Laboratory with respect to the design of experiments, setting up a mathematical models, statistical analysis of data, use of electronic computers for data processing, and application of engineering principles and techniques; 2. To apply the techniques of operations research and systems analysis to problems in water resources management and development, giving special emphasis to those problems occurring in the Pacific Northwest.

## 9. COASTAL ZONE MANAGEMENT AND USE

The Laboratory will be conducting research on a broad range of water oriented problems, utilizing personnel with experience in a myriad of scientific disciplines, including chemistry, biology, forestry, oceanography, etc. The application of sound mathematical, statistical and engineering principles by this project will complement the various research groups and will result in effective utilization of the full range of techniques which can be applied to the solution of problems in water resources.

SUPPORTED BY U.S. Dept. of Interior - F. Water Pol. Ctl

**9.0018, ECONOMICS OF WATER QUALITY FOR A REGIONAL SYSTEM**

*W. ISARD*, Regional Science Res. Inst., Philadelphia, Pennsylvania 19104

To develop workable methods for the integration of empirical materials on possible supply, demand and quality conditions for the development of an efficient water basin investment and management program. These methods would be generally applicable to water basin investment and management in various regions of the world. More specifically, our objective would be to interrelate (1) quality conditions simulated by the diffusion model for the Delaware estuary, (2) supply conditions as derived from the current simulation model for the Delaware River basin and (3) probable demand conditions projected with the use of Philadelphia Regional economic base studies, to guide investment and quality management policy on the Delaware estuary.

SUPPORTED BY U.S. Dept. of Interior - F. Water Pol. Ctl

**9.0019, SOCIO-ECONOMIC STUDY OF NARRAGANSETT BAY, RHODE ISLAND**

*I. RORHOLM*, Univ. of Rhode Island, Agricultural Experiment Sta., Kingston, Rhode Island 02881

To identify, measure and evaluate the economic and social values of the marine resources of the Bay to the State of Rhode Island. The project will be based on secondary source information currently available to the University of Rhode Island with additional surveys or interviews being made as necessary to supplement existing data. To identify, measure and analyze economic and social trends in Rhode Island which would be significant in terms of water pollution control or land use regulation of the Bay and that portion of the watershed which is significant in determining the quality of the estuarine water resources.

To explore how benefit cost analysis techniques may be best applied to determine the effects of various combinations of beneficial uses on the estuarine resources. To identify and recommend needs for future studies or basic data systems which would be useful in obtaining optimum public benefits from use of the Bay resources.

SUPPORTED BY Rhode Island State Government

**9.0020, EVALUATION OF ATLANTIC COAST ESTUARIES**

*G.P. SPINNER*, Univ. of South Carolina, Graduate School, Columbia, South Carolina 29208

The project is administered by the University of South Carolina but the technical aspects are under the direction of the Marine Resources Committee, a sub Committee of the Atlantic Waterfowl Council.

The purpose of the study is to determine which of the estuarine zone ecosystems are of high priority in the life cycle of waterfowl and other marine resources. This determination will be based on the mapping of marine resources based on data supplied by cooperating agencies and will also include ownership of salt marshes and associated shoal water by conservation agencies. The needs for the resources will be determined and a plan to preserve the essential habitat will be formulated based on present plans and programs of conservation and other land use agencies.

SUPPORTED BY Belle W. Baruch Foundation

## 9. COASTAL ZONE MANAGEMENT AND USE

### 9.0021, EVALUATION OF ENGINEERING PROJECTS AND ESTUARINE DATA (ESTUARINE PROGRAM)

*R.J. HOOGLAND*, U.S. Dept. of Interior, Biological Laboratory, Fort Crockett - Galveston, Texas

Estuarine-dependent species of the Gulf of Mexico coast comprise several of the nation's most valuable fishery resources. If the nursery grounds in the estuaries are to be preserved, it is essential that the estuarine habitat of these species be protected during and following construction of water development projects in upland basins, estuarine systems, and coastal marshes. The increasing number, as well as complexity, of construction projects require a detailed understanding of estuaries.

It is the purpose of this project to (1) assist the Branch of River Basin Studies (BSFW) by reviewing all proposed construction and water-development projects affecting western Gulf estuaries and, when warranted, recommend remedial measures to reduce adverse project effects; (2) where practical, recommend changes in water-development projects whereby the habitat would be enhanced for the fishery resources (3) inventory, organize, and keep current all published and unpublished data related to western Gulf estuaries, and (4) recommend basic research needed for protecting estuarine fishery resources.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

## 10. LEGAL STUDIES

### 10.0001, PRELIMINARY STUDIES OF INTERNATIONAL REGIMES FOR MARINE RESOURCES

*F.T. CHRISTY*, Resources For The Future Inc., Washington, District of Columbia

The basic objective is to make some preliminary analyses of the social science aspects of international marine resources and to identify and describe the kinds of problems facing ocean regimes and the kinds of research (economic, political science, and legal) that should be undertaken to help resolve the problems. The results are being used as a guide for the development of a program of studies by Resources for the Future, Inc.

SUPPORTED BY Resources For The Future Incorporated

### 10.0002, SURVEY OF MAINE LAW AFFECTING MARINE DEVELOPMENT

*D.J. HALPERIN*, Univ. of Maine, Graduate School, Orono, Maine 04473

The University of Maine Law School will make a complete survey of all statutes, court decisions, administrative regulations, and policies of the State of Maine which affect marine resource development, and will examine their scientific validity and economic impact. The study will be directed from the Law School, but will involve experts in the sciences and economics from other institutions, including the State Department of Sea and Shore Fisheries. The inter-disciplinary team will relate the laws and regulations to conservation, health, and the economic well-being of the state, will determine the extent to which the laws and regulations are observed, and will determine what major gaps exist in the legal structure insofar as the state's ability to utilize its resources is concerned. The initial step will be to survey the legal structure in detail. This is a prototype legal study which should produce a methodology as well as results useful in Maine.

SUPPORTED BY U.S. National Science Foundation

### 10.0003, AN ANALYSIS OF THE LAW OF THE CONTINENTAL SHELF AND OF THE RESOURCES OF THE DEEP SEA FLOOR

*L.F. GOLDIE*, Rutgers The State University, Graduate School, New Brunswick, New Jersey 08903

The law of the sea is undergoing increasingly intense scrutiny as a growing technology expands the possibility for developing undersea minerals. On the Continental Shelf, oil and gas exploitation is taking place in deeper and deeper waters. Beyond the edge of the Shelf, increasing attention is being paid to the possibilities for the commercial development of mineral resources of the sea floor. Current law, however, does not define the edge of the Con-

tinental Shelf nor the limits to which a coastal state can claim exclusive rights. Nor are there any rules at present that would govern the acquisition of exclusive rights to the sea floor and the exploitation of deep sea minerals. Considerable debate is underway in both national and international forums, but there has been extremely little scholarly study of alternative rules and legal regimes which might be adopted for the orderly development of marine resources.

The study will survey international law in the light of the emerging problems associated with the development of minerals in the continental shelf and deep seabed. The study will bring together the pertinent legal doctrines and concepts; analyze the economic, technological, and social changes that are occurring; and suggest and evaluate alternative regimes that can accommodate these changes within the framework of international law.

SUPPORTED BY Resources For The Future Incorporated

### 10.0004, LAW OF THE SEA

*L.M. ALEXANDER*, Univ. of Rhode Island, Graduate School, Kingston, Rhode Island 02881

Study conferences on the law of the sea are being held to clarify concepts underlying the national and international agreements, to identify problems which require scientific research, to explore relationships between existing or future laws and the development and use of ocean resources, and to examine the implications of various other aspects of the laws.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 10.0005, INSTITUTIONAL ARRANGEMENTS FOR THE MARINE SCIENCES

*A. BARBER*, Inst. For Politics & Planning, Arlington, Virginia 22209

The study will focus on the question of what changes or innovations in national and international institutions, public and private, are needed to conduct research; develop resources; promote investment; and manage the marine environment in the public interest. Specific tasks include (a) analysis of the effectiveness of existing institutional arrangements for financing and managing multi-national investments in oceanic endeavors; (b) development and analysis of alternative institutional arrangements which might evolve for further encouraging such investments during the 1970's; and (c) recommendation for practical steps for encouraging such investments in the near future to improve existing institutional arrangements, develop new institutions, and modify existing institutions in the context of U.S. national policy objectives.

Specific areas to be considered are fishing; environmental observation, prediction and reporting; and a conceptual basis for multi-national marine investment and management.

SUPPORTED BY Natl. Council on Marine Res. & Engin. Dev.

### 10.0006, PACIFIC SALMON FISHERIES - ECONOMICS OF MANAGEMENT

*J. CRUTCHFIELD*, Univ. of Washington, Graduate School, Seattle, Washington 98122

The law of the sea is undergoing increasingly intense scrutiny as a growing technology expands the possibility for developing undersea minerals. On the Continental Shelf, oil and gas exploitation is taking place in deeper and deeper waters. Beyond the edge of the shelf, increasing attention is being paid to the possibilities for the commercial development of mineral resources of the sea floor. Current law, however, does not define the edge of the continental shelf nor the limits to which a coastal state can claim exclusive rights. Nor are there any rules at present that would govern the acquisition of exclusive rights to the sea floor and the exploitation of deep sea minerals. Considerable debate is underway in both national and international forums, but there has been extremely little scholarly study of alternative rules and legal regimes which might be adopted for the orderly development of marine resources.

The specific aims of the proposed study are to survey international law in the light of emerging problems associated with the development of minerals in the continental shelf and deep seabed. The study will bring together the pertinent legal doctrines and concepts; analyze the economic, technological, and social changes that are occurring; and suggest and evaluate alternative regimes that can accommodate these changes within the framework of international law. The study will require library research, consultation with social scientists, and research on various international organizations, particularly the International Telecommunications Union and the International Atomic Energy Agency. The results of the study will be reported and published in a suitable form.

SUPPORTED BY Resources For The Future Incorporated

## 11. EDUCATION AND TRAINING

(educational Programs and Courses; Manpower Training; Committee Support; Publications)

### 11.0001, A SYMPOSIUM ENTITLED ORGANIC CHEMISTRY OF NATURAL WATERS

*D.W. HOOD*, Univ. of Alaska, Inst. of Marine Sciences, College, Alaska 99735

A symposium entitled 'Organic Chemistry of Natural Waters' was held at the University of Alaska in College, Alaska, September 4-6, 1967. The program included a keynote address by Dr. T. Parsons on Importance and General Implications of Organic Matter in Aquatic Environments; a session on Dissolved Organic Matter Distribution in Natural Waters and Sediments chaired by Dr. E. K. Duursma; a session on Biological Production and Utilization of Organic Matter in Natural Waters chaired by Dr. Mary Belle Allen; a session on Organic Matter and Water Quality chaired by Dr. Douglas Worf; a session on Inorganic-Organic Associations in Natural Waters chaired by Dr. Francis Richards; and a panel discussion on special problems with organic matter in Polar and Sub-Polar waters. In all, 27 of the world's outstanding experts on organic matter will present papers and a total of about 100 participants in the symposium are expected. The proceedings will be published as a monograph from the Institute of Marine Science, University of Alaska.

SUPPORTED BY U.S. National Science Foundation

### 11.0002, GRADUATE SUMMER RESEARCH PROGRAMS IN EXPERIMENTAL EMBRYOLOGY

*H.E. LEHMAN*, Bermuda Biolog. Sta. For Res., Saint George, Bermuda

The program is approximately seven weeks duration during the summer, beginning the second week of June and extending through the third week of July. The first four weeks are spent in the introduction of standard embryological methods for handling a wide variety of marine embryonic materials. Emphasis is upon experimental methods and techniques for the study of fertilization, hybridization, nucleo-cytoplasmic interactions, mechanics of cleavage, embryonic determination, chemo-differentiation, morphogenesis, regeneration and growth. The remaining weeks are spent in carrying out original research on problems of the participants' own choosing. In this period the student is given as complete freedom as possible to design experiments within the limitations of time, materials and equipment available at the laboratory.

The Bermuda Biological Station is exceptionally well situated for such a program since a large number of marine embryonic materials, some of which are not available elsewhere, may be collected readily in the surrounding waters. The program will be permitted to use one of the Station's boats and items of underwater swimming equipment in order to carry out its own collection activities. The students will, therefore, receive some additional experience in general marine biology via their observations of reef communities from which experimental materials will be derived.

SUPPORTED BY U.S. National Science Foundation

## 11. EDUCATION AND TRAINING

### 11.0003, RESEARCH TRAINING IN MARINE BIOLOGY, PALEONTOLOGY AND SYSTEMATIC ZOOLOGY

*E.H. SMITH*, Univ. of The Pacific, Graduate School, Dillon Beach, California 94929

For the past seventeen years, the University of the Pacific has conducted a summer program in marine biology at Dillon Beach, Tomales Bay, California. Although the kinds of courses offered over the years have included marine paleontology, oceanography, marine ecology, ichthyology, etc., the prime focus has been directed to invertebrate zoology. Of the 248 students who have participated in the invertebrate course since 1951, more than 55 are now in the advanced stages of their doctoral programs, and at least 15 hold academic appointments.

Courses now run for a seven-week period with the latter part of the program devoted to individual research projects. Grant provided ten predoctoral stipends for summer of 1968. The students selected came from widely separated geographical areas. The requirement for a summer of resident study or research at a marine station is being applied at many inland universities to candidates for advanced degrees in Biology, Paleontology, and Zoology.

SUPPORTED BY U.S. National Science Foundation

### 11.0004, SHIPBOARD WORK ABOARD THE OCEANOGRAPHER

*O.L. BANDY*, Univ. of Southern California, Graduate School, Los Angeles, California 90007

This support is for funds for travel from Los Angeles, California to Wellington, New Zealand, via Hong Kong, and from Valparaiso, Chile to Los Angeles. This funding is needed primarily for Robert L. Fleisher, graduate student in micropaleontology, to participate in the Wellington-Valparaiso leg of the current cruise of the OCEANOGRAPHER. By arranging to go to Wellington via Hong Kong, it will be possible for Mr. Fleisher, who is a graduate student of the principal investigator, to cooperate in some shipboard work with the staff of Dr. Eggleston of the Fisheries Research Station, Aberdeen, Hong Kong.

SUPPORTED BY U.S. National Science Foundation

### 11.0005, STANFORD BIOLOGICAL OCEANOGRAPHY

*M. GILMARTIN*, Stanford University, Hopkins Marine Laboratory, Pacific Grove, California 93950

The Stanford Program in Biological Oceanography represents an educational/research approach to: 2) the development of broadly trained biological oceanographers, and, b) the introduction of students in marine biology to biological oceanographic research and techniques; combined with an active research program in biological oceanography.

The program is based on four 12-week cruises per year, with the scientific party for each cruise composed of three senior scientists (faculty) and ten junior scientists (graduate students) from nationwide universities. The senior scientists give lectures, lead seminars, and supervise the field and laboratory activities of the junior scientists. Both the senior and junior scientists pursue their own research interests concurrently with the basic program. Student participation represents registration in Biology 222H, a 15-unit graduate level course offered by the Hopkins Marine Station.

During fiscal 1968, one cruise was conducted in the Gulf of California, two cruises in the equatorial current system and the Galapagos Islands, and one cruise in the in-shore waters of northern South America and Central America. During these cruises research was conducted on various aspects of the ecology of zooplankton and phytoplankton communities including primary productivity, the physiological ecology and distributional aspects of shallow water benthic communities, the physiology of deep water zooplankton, the community structure and distribution of certain mid-water fishes.

SUPPORTED BY U.S. National Science Foundation

## 11. EDUCATION AND TRAINING

### 11.0006, APPLIED MARINE ENGINEERING PROGRAM AT SCRIPPS INSTITUTION OF OCEANOGRAPHY W.A. NIERENBERG, Univ. of California, Graduate School, San Diego - La Jolla, California 92038

Scripps Institution of Oceanography will initiate a graduate research and education program in applied marine science and engineering. The new applied program will involve the Departments of Earth Sciences, Marine Biology and Oceanography, with engineering support from the Departments of Engineering, University of California at San Diego. The program will initiate activities in such fields as support of ocean industry in the concept, research and design of transport, harbors, mining production, recreational facilities, beach control, fisheries and disposal; and development of the technological base in delineation and appraisal of marine resources; analysis of limiting conditions, currents, effects of organisms on man-made structures, etc.

SUPPORTED BY U.S. National Science Foundation

### 11.0007, OCEANOGRAPHY STUDY ACTIVITIES F.N. SPIESS, Univ. of California, Graduate School, San Diego - La Jolla, California 92038 (N00014-67-A-0109-0009)

This work unit provides the scientific expertise of the Marine Physical Laboratory staff to various scientific and technical committees.

The aim of these activities is to make available to the Navy and other appropriate agencies the knowledge and imagination of the members of the MPL staff. This is done through membership on committees of various types. Actual work other than attendance at meetings includes writing of special studies and reports and occasional conduct of some initial probing experiments.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 11.0008, AMERICAN TABLES COMMITTEE FOR THE NAPLES ZOOLOGICAL STATION J.R. OLIVE, Amer. Inst. of Biolog. Sci., Washington, District of Columbia

The Naples Zoological Station, Naples, Italy, has a uniquely distinguished past in its contribution to the progress of the life sciences. To scientists from many lands, subsidized by their own countries, the Station has become a focus for the practice and display of an international cooperative spirit. Outstanding biologists are afforded a conducive climate in which the exchange of ideas and information may occur through unrestricted research in general and experimental biology. The program is administered through a series of 'working tables,' which is operationally defined as a working space for scientists from a given country for varying lengths of time; each table providing for all costs of actual research work at the Laboratory, including services and materials.

The American Tables Committee is now reviewing applicants for laboratory space at the Station. As it is supported in large measure by various institutions throughout the world, the United States (NSF) has supported the Station in recent years by buying these 'tables.' The Tables Committee of the American Institute of Biological Sciences, sponsored by a grant from the National Science Foundation, accepts and reviews applications and makes selections of scientists.

SUPPORTED BY U.S. National Science Foundation

### 11.0009, RESEARCH PANELS IN MARINE BIOLOGY J.R. OLIVE, Amer. Inst. of Biolog. Sci., Washington, District of Columbia (NONR)

The American Institute of Biological Sciences is providing the Navy with essential services.

A cadre of biologists has been developed over the years, who are not only experts in their own specialties, but who are knowledgeable in related matters of concern to the Navy. These biologists are providing information on the state-of-the-art of specific problem areas, pointing out gaps in our knowledge, and suggesting effective approaches to solutions.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 11.0010, ARCTIC FIELD RESEARCH R.A. FAYLOR, Arctic Inst of North America, Washington, District of Columbia

The contractor submits annually to the Office of Naval Research a broad, diverse program of scientific research to be carried out in the Arctic, especially at the Naval Arctic Research Laboratory, and is responsible for execution of such laboratory and field tasks as are approved by ONR. The contractor also organizes symposia, advisory panels and prepares necessary reference work such as the Arctic Bibliography. Invaluable liaison is maintained between the available pool of national and international scientific talent and the facilities and opportunities of the Naval Arctic Research Laboratory. The development and coordination of the research program provides basic information in the fields of glaciology, geomorphology, physiology, ecology, geology, oceanography, micrometeorology, geophysics, marine biology, botany and pedology within the arctic environment.

Investigations supported by this task provide the Navy with new and accurate information on arctic and subarctic environments and their effects on man, material and operations. It is clearly advantageous to the Navy and others to acquire all possible information on Arctic environment and its effect on physical and biological processes, especially on human activities.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 11.0011, ARCTIC FIELD RESEARCH R.C. FAYLOR, Arctic Inst of North America, Washington, District of Columbia (NONR-3996(01))

The contract will provide continued effort in research, advisory panels, reference work and publication of the Arctic Bibliography. This work commenced in 1947. Funding is provided by U.S., and Canadian government agencies and private sources.

This publication has provided abstracts of publications prior to 1964. In the last few volumes Russian publications are most numerous, amounting to about 40% of the material. A substantial amount of the material concerns oceanography and geophysics. The bibliography is one valuable source of Soviet research in The Arctic Ocean Basin. It is clearly advantageous to the Navy and other branches of DoD to acquire all possible information on the Arctic environment and its effect on physical and biological processes.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 11.0012, ARCTIC ADVISORY SERVICE R.C. FAYLOR, Arctic Inst of North America, Washington, District of Columbia (NONR)

Reference work, including compilation of special purpose bibliographies and literature reviews is being accomplished and the product combined with expert knowledge and advice of a large number of consultants, in furnished to NOL as background and guidance in arctic investigations and operations. In addition, NOL has subcontracted to the University of Kansas and McGill University for discrete studies in Sea Ice Physics and Thickness Measurements.

This Work Unit assists NOL with the planning of Arctic research and its applications. Through its available manpower and library resources the contractor is able to provide historical as well as current knowledge of considerable importance and relevance to the Navy with special reference to (a) sea ice physics, (b) sea ice thickness measurements and (c) safety of low-flying aircraft over snow and ice surfaces.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 11.0013, ARCTIC BIBLIOGRAPHY PROJECT M. MARTNA, Arctic Inst of North America, Washington, District of Columbia (AT(30-1)-2797) STANKA

The Arctic Bibliography provides a key to scientific publications available in the principal libraries throughout the world, relating to the Arctic and Subarctic and to low temperature conditions. Volume 14 assembles over 8,500 abstracts of scientific publications mostly of the period 1962 to 1965 and makes this

## 11. EDUCATION AND TRAINING

large compilation available to all who are concerned with the problems of northern research development. Subjects covered include geology meteorology, oceanography, geophysics, and the basic biological sciences, as well as the social sciences and humanities, engineering, mining, fisheries, etc. Administration, native populations, economic conditions, public health and welfare have special attention. All parts of northern Eurasia and North America are represented. Publications are listed by author, the foreign titles with an English translation; all abstracts are in English, and a detailed subject-geographic index is added. The Bibliography is compiled by the Arctic Institute of North America. Volumes 1-12 in this series were published by the United States Government Printing Office, Vol. 13-14 by the McGill University Press, Montreal.

The Arctic Bibliography has become over the years a standard reference work and continues to be required by major libraries and research institutions as well as individual scholars investigating in these and other underdeveloped areas.

SUPPORTED BY U.S. Atomic Energy Commission

### 11.0014, HANDBOOK OF MARINE TECHNOLOGY

UNKNOWN, Marine Technology Society Inc., Washington, District of Columbia (N00014-66-C0158)

The Editorial Board and Technical Review Teams are presently reviewing selected material for inclusion in the Handbook of Marine Technology. The handbook will include standardized reference tables, graphs, constants, monograms, etc. covering the fields of physical oceanography, chemical oceanography, biological oceanography, geological oceanography, marine meteorology, ocean engineering and diving.

This handbook will be pertinent to the design of oceanographic acquisition systems, deep submergence systems, and man-in-the-sea programs.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 11.0015, WORKSHOP ON EFFECTS OF ATOMIC RADIATION ON OCEANOGRAPHY

A.H. SEYMOUR, Natl. Academy of Sciences, Washington, District of Columbia

The purpose of the Workshop is to update NAS Pub. 551 concerning the effects of atomic radiation on oceanography and fisheries by bringing together approximately 35 scientists from many different fields to resolve apparent divergencies in the publication and identify and fill in missing elements.

Outline prepared. Participants selected and assignments made for preliminary work.

SUPPORTED BY U.S. Atomic Energy Commission

### 11.0016, COMMITTEE ON OCEANOGRAPHY

R.C. VETTER, Natl. Academy of Sciences, Washington, District of Columbia (NONR)

The Committee on Oceanography was organized in 1957 to assist government agencies on a multitude of problems, ranging from the effects of radioactivity on the marine environment to the planning of long range scientific studies of the oceans. The Committee has recently been reorganized under the chairmanship of Dr. John C. Calhoun, Jr. During the year ahead, the Committee expects to focus on the attack of scientific problems as well as management problems that effect our ability to conduct oceanographic research. The scientific problems to be emphasized are expected to include: scales of motion in the oceans, geotectonics, matter in the ocean, models of marine ecological systems, and air-sea interrelationships. Attention also will be given to development of the National Oceanographic Program.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 11.0017, UNDERGRADUATE RESEARCH PARTICIPATION

I.E. WALLEN, Smithsonian Institution, Washington, District of Columbia 20560

It is proposed that the Smithsonian Institution provide training in the biological sciences for 25 undergraduates from colleges

and universities in the United States during the summer of 1967 and the academic year 1967-68. Within the Institution's Museum of Natural History, Oceanographic Sorting Center, the National Zoological Park, Radiation Biology Laboratory, and Tropical Research Institute, students will spend either ten weeks during the summer or, in the case of students at colleges and universities having work-study programs or quarter systems, ten weeks during the academic year carrying out research projects under the supervision of senior scientific staff members.

SUPPORTED BY U.S. National Science Foundation

### 11.0018, MARINE SCIENCE STUDIES

I.E. WALLEN, Smithsonian Institution, Washington, District of Columbia 20560 (N00014-67-A-0399-0002)

The purpose of this task is to provide for the planning, organizing and conduct of scientific conferences as requested by the scientific officer. Written reports shall be furnished at the conclusion of each study.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 11.0019, SECOND AND FOURTH ANNUAL EDWIN A. LINK LECTURES

I.E. WALLEN, Smithsonian Institution, Washington, District of Columbia 20560

Funds were requested for the Second (1965), the Fourth (1967), and the Sixth (1969) Edwin A. Link Lectures. Alternately in Oceanography and in Space Sciences these lectures are given in honor of Mr. Link, Inventor, Industrialist, and Philanthropist.

SUPPORTED BY Link Foundation

### 11.0020, PUBLICATION OF OPPORTUNITIES IN OCEANOGRAPHY

I.E. WALLEN, Smithsonian Institution, Washington, District of Columbia 20560

Originally published with funds from the Link Foundation and the Naval Oceanographic Office, the money from sales of the booklet are retained for use in publishing revised manuscripts.

SUPPORTED BY Smithsonian Institution

### 11.0021, CONSULTATIVE AND ADVISORY SERVICES - BATTERY PROBLEMS

W.J. HAMER, U.S. Dept. of Commerce, Natl. Bureau of Standards, Washington, District of Columbia

Technical Objective: To provide authoritative advice.

February 1967 - December 1967: Advice on battery problems was given during the year to United Aircraft, USASI, International Nickel, General Services Administration, Battelle Memorial Institute, Federal Trade Commission, Union Carbide, Securities and Exchange Commission, K & W Batteries, Patent Office, Naval Research Laboratory, and Senator Hart. Advice on measurements and data related to standard cells was given during the year to the editor of Measurements and Data, to ITT of Florida, to Department of Chemistry of Purdue University, Industrial Research Institute, Irvin P. Stern Associates, BIPM, Dr. Froelich of PTB, L & N, Nortronics, Sandia, Lawrence Radiation Laboratory, Boston College, Dr. Hetzel of PTB. Lectures were given to various groups touring the standard cell laboratory.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

### 11.0022, INCREASE EFFICIENCY OF HAWAIIAN LONGLINE FISHERY

T.S. HIDA, U.S. Dept. of Interior, Bureau of Comm. Fisheries, Honolulu, Hawaii 96812

The Hawaiian longline fishery contributes a substantial part of the needs of the fresh fish market in Hawaii. Although the prices received at the wholesale and retail levels are one of the highest in the State, the fishery, in recent years, has declined in the number of boats active in the fishery and the total catch. Part of the decline is related to the labor-intensive nature of this

## 11. EDUCATION AND TRAINING

fishery. The relatively low efficiency of fishing, plus the need for long hours of 'soaking' the gear contributes to a long fishing day.

The present project is designed to seek means of increasing the efficiency of this method of fishing. The financial returns to the fishermen could be increased by (1) mechanizing parts of the longline fishing operation, thus permitting more units of gear to be fished, (2) locating new areas of good fishing, and (3) seeking alternate fishery resources to harvest during periods of low availability of the large -size tunas in Hawaiian waters. Much of the effort in this project would be devoted to keeping industry informed of foreign developments in gear research and fishing success in waters within range of the Hawaiian fishing fleet.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 11.0023, STATUS OF OCEANOGRAPHIC EDUCATION AT PRE-COLLEGE LEVEL

*R.H. CHARLIER*, Northeastern Ill. State Coll., Graduate School, Chicago, Illinois 60625

Follow-up Work: Prepare a 'unit' teacher and students manual for use in pre-college situations. Originally support interest was shown by National Youth Science Foundation but no further word received since March '68.

Study place of Marine Sciences in pre-college science curriculum. Prepare teachers, not planning to become oceanographers, to familiarize themselves with oceanology.

Investigate interest and reactions of students to marine sciences. Articulate a high school/college/graduate school program.

SUPPORTED BY No Formal Support Reported

### 11.0024, MARINE LABORATORY

*J.G. BROOM*, State Wildlife & Fish Comm., New Orleans, Louisiana

This project area incorporates all six of the previous described phase areas, namely coastal Louisiana. Here, the project leader will compile, analyze and interpret the data. It is proposed that different types of nets and sampling devices will be developed and evaluated for use in these situations as the need arises as determined by the project leader. Additionally methods and gear used successfully in other areas will be evaluated for application here.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.  
Louisiana State Government

### 11.0025, BIOLOGICAL INVESTIGATIONS WITH ISOTOPES

*J.A. HELLEBUST*, Harvard University, Graduate School, Cambridge, Massachusetts 02138

This grant will be used to maintain and improve the usefulness of the central isotope facilities shared by the faculty and students of the Biological Laboratories. The utilization of instruments and isotope facilities, under the direction of Mr. Edward Lenhoff, avoids unnecessary duplication of expensive equipment and provides greater safety.

A large number of current and proposed research projects of departmental professors and staff members vitally depend upon our centralized isotope facilities. These projects range from investigations in molecular biology to ecological studies on marine algae.

SUPPORTED BY U.S. Dept. of Hlth. Ed. & Wel. - P.H.S.

### 11.0026, TECHNICAL ASSISTANCE AND LIAISON WITH FISHING INDUSTRIES

*R.A. BRUCE*, U.S. Dept. of Interior, Exptl. Fish & Gear Res. Base, Gloucester, Massachusetts 01930

The primary purpose of this project is to benefit the fishing industry through increasing and maintaining Bureau-Industry contact. In part, to achieve this objective, Base personnel use specialized instrumentation devices aboard commercial fishing vessels to improve the effectiveness of fishing gear being used. Other commonly used devices to achieve this end are (1) Bureau super-

vision of the use of new or unfamiliar gear, (2) personal attention to inquiries on gear or fishing problems by the individual industry member, and (3) timely reporting and/or relay of useful information gathered from sources outside of the Bureau.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.

### 11.0027, INVESTIGATIONS IN MARINE BIOLOGY

*P.B. ARMSTRONG*, Marine Biolog. Laboratory, Woods Hole, Massachusetts 02543

This grant supported general research activities of the instructional associated with the summer courses in marine biology staff/at the Marine Biological Laboratory.

SUPPORTED BY U.S. National Science Foundation

### 11.0028, SUPPORT OF TRAINING PROGRAMS IN INVERTEBRATE ZOOLOGY AND MARINE BOTANY

*H.B. STEINBACH*, Marine Biolog. Laboratory, Woods Hole, Massachusetts 02543

The Marine Botany course, now designated Experimental Biology, has been reorganized to stimulate an informed interest in some of the most recent concepts and techniques in the botanical sciences and at the same time to direct that interest towards unsolved problems in the biology of marine plants. The Instructor-in-Charge, Dr. William S. Hillman, has four additional instructors to guide the students in Botany. The Invertebrate Zoology course is conducted by Dr. W. D. Russell Hunter aided by a staff of seven instructors. This permits each staff member to confine his attention to a single group of invertebrates and thus it provides a depth of experience and knowledge of that particular group. The purposes of these courses, as well as all research training courses at MBL, are to produce research investigators as well as initiate investigations into the marine environment.

The courses are made up of outstanding students from many universities. Opportunities are provided to meet active investigators in various fields of research from all parts of the country as well as participating in seminars, formal discussions and meetings. The number of highly qualified applicants has been nearly two to three times the available space for the students. First consideration has been given to persons who appear likely to contribute to the advancement of biology. Past experience has justified this mode of selection.

SUPPORTED BY U.S. National Science Foundation

### 11.0029, RADIOBIOLOGICAL RESEARCH ON MARINE ORGANISMS

*H.B. STEINBACH*, Marine Biolog. Laboratory, Woods Hole, Massachusetts 02543

This grant will provide support for the radiobiological facilities used by about one hundred and twenty investigators in the conduct of their research projects during the summer of 1968. These investigators will be selected on the basis of their projects and their requirements for the facilities and biological materials available at the Marine Biological Laboratory.

SUPPORTED BY U.S. Dept. of Hlth. Ed. & Wel. - P.H.S.

### 11.0030, SUPPORT FOR THE OPERATION OF OCEANOGRAPHIC RESEARCH VESSELS

*P.M. FYE*, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543

This project provides approximately 50% of the costs of operating the WHOI vessels ATLANTIS II, CHAIN, CRAWFORD AND GOSNOLD. Shiptime requirements for NSF supported research is thus provided in a ratio of 43% for biological work and 57% for physical sciences. The biological portion also includes \$51,242 for travel of biologists to and from research vessels. The total for DES is \$616,380 and for BMS \$522,600.

The above mentioned research vessels will be engaged in a broad multi-disciplinary program of oceanographic research during the fall of 1967 and during 1968. Programs include studies of the Gulf Stream: biological studies in the North Atlantic, the tropical Atlantic, and the South Atlantic; heat-flow, gravity and mag-

netic investigations in the Caribbean; sound transmission and geophysical studies in the northeastern Atlantic, and other programs.

SUPPORTED BY U.S. National Science Foundation

#### 11.0031, WOODS HOLE STUDY ACTIVITIES

*E.E. HAYS*, Woods Hole Oceanographic Inst., Woods Hole, Massachusetts 02543 (NONR)

Objective: Provide services on acoustic propagation and oceanography to Naval technical committees seeking answers to operational problems or attempting to define the state of the art of equipment design, and to provide similar services to the oceanographic scientific community by participating in meetings, symposia, and working groups.

Approach: Provide the Navy with specific answers from available oceanographic data in response to specific requests; serve on committees and working groups on oceanographic and marine engineering problems for the Navy; maintain a liaison between the oceanographic scientific community and the seagoing forces of the Navy so that full use can be made of the oceanographic information.

SUPPORTED BY U.S. Dept. of Defense - Navy

#### 11.0032, SPECTRAL ANALYSIS

*W. MARKS*, Oceanics Incorporated, Hicksville - Plainview, New York 11803 (NONR)

A handbook on the application of spectral techniques to the study of oceanographic and other geophysical phenomena is being developed. A series of prescribed spectra have been derived and are being analyzed to determine the effects of various analysis parameters, such as spectral windows, length of records, etc.

The results of this effort should contribute to the design of environmental data collection systems which may be used to provide information for operational oceanographic forecasts.

SUPPORTED BY U.S. Dept. of Defense - Navy

#### 11.0033, SUPPORT OF THE MARINE BIOLOGY PROGRAM AT THE LAMONT GEOLOGICAL OBSERVATORY

*P.R. BURKHOLDER*, Columbia University, Graduate School, New York, New York 10027

NO SUMMARY HAS BEEN PROVIDED TO THE SCIENCE INFORMATION EXCHANGE

SUPPORTED BY G. Unger Vetlesen Foundation

#### 11.0034, CONFERENCE REPORTS

*F. FREMONTSMITH*, New York Academy of Sciences, New York, New York

The New York Academy of Sciences will provide this Office with copies of the proceedings of the biology conferences which were held under Contract Nonr 4592(00), NR 104-838. The proceedings are in book form and are being distributed in accordance with the directives of this Office. These conferences are part of a series presented by the Academy and follow the pattern of the well-known interdisciplinary conferences sponsored by the Josiah Macy, Jr. Foundation. The volumes will consist of an approximately verbatim record of the discussions of a small selected group of recognized experts on the problem which is the topic of the conference - no formal papers are presented. The controversial tone and the informal expression of opinion are essential to the achievement of a thorough and well rounded review of the subject and usually brings out unorthodox insights and approaches. The use of this method has in the past been particularly effective in developing mutual understanding and basis for planned topics, which include ecological, as well as cellular studies.

The distribution of these proceedings, among current and potential ONR investigators and among program managers and scientists in ONR and the Navy bureaus, will aid tremendously in coordination of research and of research programs, especially where biological knowledge and viewpoints impinge on such others as engineering, physics, and geophysics.

SUPPORTED BY U.S. Dept. of Defense - Navy

## 11. EDUCATION AND TRAINING

#### 11.0035, BIOLOGY CONFERENCE SERIES

*F. FREMONTSMITH*, New York Academy of Sciences, New York, New York

The New York Academy of Sciences through its Interdisciplinary Communications Program, is conducting a series of conferences in a variety of biological disciplines of special interest to the Navy. The conferences will be devoted to subjects directly or indirectly contributing to the Hydrobiology, Ecology, and Biological Orientation Programs of this Office. A diversity of conference subjects has been selected for the series in order to focus attention on aspects of the various research studies where true advances are being made, where promising trends appear to be developing, and where disciplines of the Biological Sciences are involved.

During the proposed conferences, the state-of-the-art in a wide spectrum of biological research and Naval relevance will be discussed by a selected group of internationally prominent scientists. The resulting published proceedings of the conferences will be made available to appropriate addresses on the ONR distribution list and to appropriate program managers and scientists within and also outside the Department of the Navy. These publications will aid, not only the scientific community per se, but in addition will aid in the coordination of research and of research programs, especially where life sciences knowledge and viewpoints impinge on those of the physical sciences.

SUPPORTED BY U.S. Dept. of Defense - Navy

#### 11.0036, AN ENLARGED PROGRAM OF RESEARCH IN NEW LABORATORIES OF MAINE SCIENCES

*UNKNOWN*, New York Zoological Society, New York, New York

NO SUMMARY HAS BEEN PROVIDED TO THE SCIENCE INFORMATION EXCHANGE

SUPPORTED BY Rockefeller Foundation

#### 11.0037, COOPERATIVE RESEARCH AND TRAINING PROGRAM IN BIOLOGICAL OCEANOGRAPHY

*C.G. BOOKHOUT*, Duke University, Graduate School, Beaufort, North Carolina 28516

This grant will support a program of training and research in biological oceanography associated with the R/V EASTWARD at Duke University Marine Laboratory. Major aspects of this program include graduate traineeships and postdoctoral awards in biological oceanography, advanced seminars in oceanography, and training and research projects aboard the R/V EASTWARD. In March of each year a five-man Project and Program Review Committee composed of nationally recognized oceanographers meets to review research projects, and to select graduate trainees and post doctoral recipients.

This year the Committee approved a shipboard program of 279 days for the R/V EASTWARD. When these days were combined into programs of similar research, a schedule of 237 planned days at sea evolved. Twenty-three institutions are involved in the research and training programs during FY 69. Also included in the program is a 90-day cruise into the Caribbean Sea in which 11 institutions are participating.

The success of this program is measured not only by the improved caliber of applications and substantially increased requests for shiptime, but especially by the large number of resultant publications and the fine, well trained graduates.

SUPPORTED BY U.S. National Science Foundation

#### 11.0038, RESEARCH AND TRAINING IN MARINE BIOLOGY

*C.G. BOOKHOUT*, Duke University, Graduate School, Beaufort, North Carolina 28516

The grant provides support for predoctoral and postdoctoral awards in marine biology at the Duke University Marine Laboratory.

The purpose of the predoctoral award is to make it financially feasible for a qualified graduate student from any university in the U. S. to receive training and do research in marine biology at the Duke University Marine Laboratory. All applications for the award are reviewed independently by 5 referees, only on of

## 11. EDUCATION AND TRAINING

whom is from Duke University. Twenty-one awards are given to graduate students who received the highest ratings. The award is for a period of five weeks in the summer.

The program also includes two predoctoral awards. These are available on a competitive basis. A faculty member from any college or university, exclusive of Duke University, may apply. Selections are made on the basis of the quality of the research proposal and whether the facilities of a marine laboratory are actually needed to do the research. The award is for a period of 12 weeks, and can be held at any time during the year.

SUPPORTED BY U.S. National Science Foundation

### 11.0039, STUDENT RESEARCH AT THE MARINE SCIENCE CENTER

*J.W. HEDGPETH*, Oregon State University, Marine Science Center, Newport, Oregon 97365

This project provides for support of students primarily during the summer, but also during other times of the year to undertake small research projects as part of their training experience in marine biology. Emphasis in the individual projects is on ecology and physiology of intertidal and near shore invertebrates of the Oregon coast. Principal Investigator is Joel W. Hedgpeth assisted by resident and visiting staff.

SUPPORTED BY U.S. National Science Foundation

### 11.0040, SYMPOSIUM ON RESEARCH NEEDS AND PRIORITIES FOR MARINE GEOLOGY OF THE GULF OF MEXICO

*J.C. CALHOUN*, Gulf Universities Res. Corp., College Station, Texas

It is planned to hold a 3-1/2 day symposium to determine research needs and priorities for marine geology, with particular reference to the Gulf of Mexico. There is considerable need for analysis and program planning in marine geology not only with respect to geological research in general but also with respect to oceanographic research and to the development of marine resources. The Gulf of Mexico is one of the world's best examples of a nearshore oceanic environment wherein present-day events provide a model for past marine geologic events, and, in addition, is one of the more extensive shelf areas surrounding U. S. shores making it particularly attractive geologically because of its high potential mineral resource value. The Gulf therefore is an especially logical area of focus for the proposed symposium.

Suggested topics of symposium discussion include: sedimentation and sedimentation processes; relationships between marine geology and marine ecology; geophysics and geologic structure of the Gulf; facilities for serving marine geology research; engineering properties of ocean sediments; and instrumentation. Approximately 30 participants will be brought together for the planned symposium. It is expected that there will be a report of findings including the identification of key scientific efforts that are needed, the approach to achieving solutions to the problems identified, magnitudes of effort required, priorities, and identification of those efforts of current opportunity in the Gulf of Mexico.

SUPPORTED BY U.S. National Science Foundation

### 11.0041, REPORT DISTRIBUTION

*C.S. SAYCE*, State Dept. of Fisheries, Olympia, Washington

The objective of this phase is to record all data in usable form and distribute timely information about the time and intensities of impending oyster spatfalls to local members of the industry for their use in preparing to clutch for spatfalls. This will be done by means of a weekly bulletin distributed to industry and other interested laboratories. Results of research in oyster seed investigations and oyster fatness experiments will be reported to the contracting agency.

Part 3 of 3.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.  
Washington State Government

### 11.0042, A TRAINING PROGRAM FOR GRADUATE STUDENTS IN MARINE SCIENCES AT THE FRIDAY HARBOR LABORATORIES

*R.L. FERNALD*, Univ. of Washington, Friday Harbor Laboratories, Seattle, Washington 98105

The grants were requested and have been used to provide limited financial assistance to qualified graduate students for training in all areas of marine sciences represented by formal courses of instruction and by research activity and supervision at the Friday Harbor Laboratories, the marine biological laboratory of the University of Washington. Facilities for year round investigation and study have been developed at the Laboratories and efforts have been made to increase the use of these facilities at times other than summer. Advanced graduate students from a number of different universities have taken advantage of the opportunity to remove seasonal limitation from marine investigations and have been able to carry out year round studies. Formal courses offering research training are offered in the Spring and Summer Quarters of the year. No geographic restrictions have been imposed in the award of these grants-in-aid to qualified graduate students. The merit of their individual program has been the important criterion for determining the question of support.

SUPPORTED BY U.S. National Science Foundation

## 12. FACILITIES

(ship and Laboratory Support)

### 12.0001, RESEARCH-TRAINING COURSE IN OCEANOGRAPHY IN SOUTHEAST ALASKA

*D.W. HOOD*, Univ. of Alaska, Inst. of Marine Sciences, College, Alaska 99735

The course was divided into two sessions. The first included courses in General Oceanography (Geology 411, 3 credits) and Chemical Oceanography (Chemistry 641, 3 credits). The second session consisted of student research projects in Chemical Oceanography (Chemistry 642, 3 credits) or Marine Microbiology (Biology 641, 3 credits).

Students attended both courses during the first session, and each student completed a research project and attended conferences in his area of interest during the second. At the beginning of the program, each student selected a research project in conference with the appropriate staff member. During the first session, the student made a research plan, developed techniques, did preliminary field work and formulated plans for accomplishing his research project. The second session was spent gathering laboratory and field data to complete this project. A research report was prepared and presented to the entire group during the last week of the program.

SUPPORTED BY U.S. National Science Foundation

### 12.0002, LENGTHENING AND INCREASING OCEANOGRAPHIC CAPABILITIES OF R/V ACONA

*D.W. HOOD*, Univ. of Alaska, Inst. of Marine Sciences, College, Alaska 99735

The 80-foot R/V ACONA will be lengthened to 100 feet (l.o.a.) in order to (1) permit increase of her scientific complement from eight to eighteen; (2) increase deck working space and (3) more than double existing laboratory space. This modification will require addition of only one crew member and will increase operating costs by less than 10%. Concomitant modifications to improve the research capabilities of the vessel will include increase of power output capacity by replacement of two 15 kw generators with two 40 kw, replace existing winch with less than 2,000 meter-depth capability; installation of a 510 h.p. marine engine to replace the existing 300 h.p. engine; and installation of a ventilated hood in the dry laboratory. Lengthening will be achieved by cutting the vessel in half amidships and adding a 15-foot section and by extending the fantail five feet.

In its present configuration the R/V ACONA will not accommodate scientific parties of sufficient size to conduct 24-hour work on the continental shelf in Gulf of Alaska and along the Aleutian chain. Hence, its operations have been confined to inshore waters and inter-waterway work. Conversion will permit

## 12. FACILITIES

more extended operations during the non-winter months thus extending also the research and training capabilities of the Institute of Marine Science of University of Alaska, the only U. S. oceanographic institution now concerned entirely with the far northern waters of the west coast.

SUPPORTED BY U.S. National Science Foundation

### 12.0003, ARCTIC RESEARCH LABORATORY

*W.R. WOOD*, Univ. of Alaska, Graduate School, *College, Alaska* 99735 (NONR-4009(01))

Naval Arctic Research Laboratory (NARL), Barrow, Alaska, provides a base of operations, a laboratory and logistic support in the arctic environment for scientists of government, university and private institutions working under contracts with ONR and other government agencies. Basic research in physical and biological sciences, as well as naval sciences are conducted on the Arctic Slope and in the Arctic Seas through NARL and its 20 field stations, including drifting ice stations in the arctic pack.

Operations and investigations at NARL supply the Navy with new and accurate information on Arctic and sub-Arctic environments and their effects on human activities. Studies include arctic oceanography, geophysics, hydroacoustics and terrain analysis. Personnel trained provide the Navy a pool of manpower with first-hand experience in an area which is unique among oceans where the Navy must operate.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 12.0004, ACQUISITION OF A SUITABLE PROTOTYPE FISHING VESSEL AND GEAR

*J.R. HOLLOWAY*, Amer. Samoa Dept. of Agric., *Pago Pago - Tutuila, American Samoa*

Objectives: Obtain a fishing vessel of convenient size and maximum flexibility for utilization in exploratory fishing and initial fisheries development phases.

Procedures: The small Hawaiian sampan (40 degrees plus or minus) would seem the ideal vessel for the needs of American Samoa, since these boats are regularly used for bottom fishing, setting of crab and lobster nets and live-bait pole-and-line fishing for tunas.

A competent and experienced captain-fisherman will be recruited and with his aid a suitable second hand vessel will be purchased, or chartered in Hawaii readied, and shipped to American Samoa.

Additional gear such as seines, floats, line etc. not available with the vessel will be purchased and shipped with the vessel. Some gear such as fish traps and lobster pots will be fabricated in Samoa by fishery trainees.

SUPPORTED BY U.S. Dept. of Interior - Bu. Comm. Fish.  
American Samoa Government

### 12.0005, HUMAN PERFORMANCE IN UNUSUAL ENVIRONMENTS

*A.J. BACHRACH*, Arizona State University, Graduate School, *Tempe, Arizona* 85281

Objective: The objectives of this group are to establish and operate a facility to investigate man's performance in unusually stressful environments, with emphasis on the underwater environment. This is the environment in which the Navy is tending more and more to operate, with free swimmers and divers.

Approach: Contractor will design, construct, and operate a facility for studying man's performance in controlled underwater environment in which relevant variables are programmed and monitored by means of small computers. Variables to be controlled include depth (to 33 ft), composition of breathing mixture, complexity of work assignment, and degree of subjects isolation.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 12.0006, MARINE BIOLOGY RESEARCH AT THE BERMUDA BIOLOGICAL STATION

*W.H. SUTCLIFFE*, Bermuda Biolog. Sta. For Res., *Saint George, Bermuda*

The grant provides support for general research activities of visiting investigators at the Bermuda Biological Station.

SUPPORTED BY U.S. National Science Foundation

### 12.0007, FEASIBILITY STUDY ON HORIZONTAL TEST TANK FOR MODEL STUDIES AND COMPONENT TESTING

*M.J. CRUICKSHANK*, U.S. Dept. of Interior, Marine Min. Technol. Ctr., *Belvedere - Tiburon, California* 94920

The need for an experimental test facility for the investigation of mining problems has been shown during the analysis of dredge systems operations. A contract for an architectural and engineering study for such a facility has been let to Tetra Tech Inc., an ocean technology firm, of Pasadena.

The first phase of the program will be to determine configurations for the water tank, test carriage, instrumentation system and adjustable model of beaches and ocean bottoms. The planned facility will be used for a variety of tests including model testing of total systems for wire line dredging, towed hydraulic systems, submerged mining systems, problems related to surf and bottom currents and testing of diver and remote operated equipment.

SUPPORTED BY U.S. Dept. of Interior - Bureau of Mines

### 12.0008, SUPPORT OF THE RESEARCH VESSEL AHOYOHA III

*J. SAVAGE*, Univ. of Southern California, Graduate School, *Los Angeles, California* 90007

The R/V AHOYOHA III is a 30 ft. Drake style power cruiser constructed of wood with fiberglass coating. At the present time, she is powered with 221-cubic inch interceptor gasoline engines with twin

of Southern California plans to reengine with diesel engines. Navigational equipment includes a Bendix 42 radiotelephone and a Raytheon A-20 echo sounder.

The R/V AHOYOHA III is being used as a vehicle for the in situ measurements and observation of environmental factors by marine biologists and geologists. Because of the nature of this type of research work all investigators are qualified scuba divers. At the present time 14 geology graduate students and faculty, and 20 biological science graduate students and faculty are qualified divers.

The presently recommended grant provides for a year's support of the R/V AYOHOYA. The budget includes the cost of new diesel engines, installation costs of the engines will be borne by the University of Southern California

SUPPORTED BY U.S. National Science Foundation

### 12.0009, SUPPORT OF THE VERMILION SEA FIELD STATION AT BAHIA DE LOS ANGELES, BAJA CALIFORNIA

*R.P. PHILLIPS*, San Diego Natural History Mus., *San Diego, California* 92134

This modest biological field station is 340 miles southeast of San Diego, in one of the most remarkable desert environments of western America. It is on the west shore of the Gulf of California, in an exceptionally interesting marine area of islands and bays, with varied rocky and sandy habitats to depths of 600 fathoms. The surface waters are subject to great temperature range and tidal amplitude. The diversified flora and fauna are largely of tropical character and have prominent endemic elements. The surrounding terrain is an equally interesting desert, with unusual xerophytes and associated animals.

The station is a 9-room building, just above the high tide line. It has fresh water and electric power. An International Travelall and a 17-foot outboard motorboat are kept there; and other boats, up to an 85-foot motor vessel, are available locally for charter. Good food and accommodations are available at \$7.00 per day in the village.

The station is reached in two hours by scheduled flights from Tijuana (round trip approximately \$49). The overland route takes three days by truck.

Visiting investigators are invited to use the station. They should be qualified workers with legitimate research projects, and they should be provided with proper collecting permits and other credentials for work in Mexico. Formal request should be made to the Director.

## 12. FACILITIES

SUPPORTED BY U.S. National Science Foundation

### 12.0010, PARTIAL SUPPORT OF SHIP OPERATIONS FOR RESEARCH AT SEA ON OCEANOGRAPHY

*W.A. NIERENBERG*, Univ. of California, Scripps Inst. of Oceanography, San Diego - La Jolla, California 92038

This project will provide approximately 38% of the operating costs for the coming year of the following Scripps vessels: R/V AGASSIZ, ARGO, HORIZON, OCONOSTOTA, SCRIPPS, and WASHINGTON. It will also provide funds for purchase of a computer system to be installed aboard the R/V WASHINGTON. It will support virtually all the ship time for Foundation sponsored research. Research to be carried out will cover a wide range of scientific objectives, one-third biological and two-thirds in the other marine sciences. The geographical area covered will be between the North and South American continents and the central Pacific. The longest expedition will be a combination of physical, chemical, geological and biological oceanography. This cruise will center most of its activities between Hawaii, Samoa, and Kwajalein. Currents, various water properties and sediments at abyssal depths and in relation to sea-floor structure are to be collected. Also sampling of the fauna will be carried out throughout the cruise ranging from the near surface, to tops of seamounts and guyots and into the abyssal depths. Other cruises will study ocean currents at the sea floor and their spatial relation; marine biota of the California Peninsula and Gulf; Post-pleistocene oceanography and biology of the Eastern North Pacific; heat budget of the sea surface; taxonomy, zoogeography and ecology of Pacific zooplankton; tectonic and geological history of the Southwest Pacific Region; and development of deep-sea autonomous instruments.

SUPPORTED BY U.S. National Science Foundation

### 12.0011, SUPPORT FOR THE PHYSIOLOGICAL RESEARCH SHIP, R/V ALPHA HELIX

*P.F. SCHOLANDER*, Univ. of California, Graduate School, San Diego - La Jolla, California 92038

On July 1, 1967, the floating laboratory 'Alpha Helix' was anchored in Brazil's Rio Negro with Dr. Carroll Williams of Harvard as senior scientist. Fifteen scientific reports ensued. Striking findings were the high content of hormonal insecticides dissolved in the Rio Negro as a result of leaching from the vast, flooded rain forests. Hallucinogens were extracted and preserved from plant material of the genus *Virola*, used by Amazon Indians, which will form the basis for further studies of its chemical composition.

On August 15, 1967, Dr. Jacob Biale of UCLA took over as senior scientist, with an agronomically slanted program. Twenty reports ensued. Important studies were made on ripening of tropical fruits. It was discovered that root fungi (mycorrhizae) are a general occurrence in the jungle trees. This probably explains how such lush forests can thrive on such mineral-poor soil.

SUPPORTED BY U.S. National Science Foundation

### 12.0012, PARTICIPATION IN USARP EXPEDITIONS

*I.E. WALLEN*, Smithsonian Institution, Washington, District of Columbia 20560

A cooperative project to continue participation of biological workers from the Smithsonian Institution on Antarctic cruises and expeditions on an opportunity basis within existing logistic arrangements. Participants' salaries will be borne by the sponsoring institution. Transportation from the United States to the port of embarkation will be coordinated through the Smithsonian Institution from funds provided by this proposal. In this way, biological specialists with interests complementing United States Antarctic Research Programs aboard USNS Eltanin, R/V Hero and cruises conducted aboard USGGC ice breakers can assist in biological oceanology activities on a space available basis. To date 31 Smithsonian Institution scientists have taken part in five USNS Eltanin trans-Pacific and South Pacific cruises and the USGGC Eastwind Oceanographic Cruise to the Antarctic Peninsula, 1966. Professional personnel from the Smithsonian Oceanographic Sorting Center have helped in shipboard sorting, cataloging, and preservation of biological collections when University participation was lacking. The SOSOC has contributed to improvements in

handling of collections and data records aboard ship and in the development of techniques for processing microorganisms, fragile specimens and other biological materials requiring special handling. Support has also been possible for field work in unique areas where the logistic opportunity afforded an extension of biological research without the additional costs for analysis of data and specimens. The Juan Fernandex Island Expedition is a case in point. The plan presented by the Smithsonian Institution in this proposal includes only travel cost for five participants who will cooperate in research aboard USARP ships and on land expeditions.

SUPPORTED BY U.S. National Science Foundation

### 12.0013, METEOROLOGICAL SUPPORT OF DEEP-SEA DRILLING OPERATIONS

*V.D. ROCKNEY*, U.S. Dept. of Commerce, Weather Bureau, Washington, District of Columbia

The proposed work consists of the providing of meteorological advice in support of the Ocean Sediment Coring Program. In particular, the Proposal is to provide a meteorologist aboard the drilling vessel for which the University of California has planned under the terms of Contract NSF-C482. In drilling operations from a floating vessel in the deep oceans it is regarded as imperative that the master of the vessel and the drilling operations manager on board be provided with meteorological advice. The proposed work will assure both the safety of the vessel, which will operate at times in very remote areas, and wave-forecasting services in order to optimize the several aspects of the drilling operation which are limited by vessel motions. All communications and facsimile reception equipment will be supplied by the University, so the subject Proposal is only for the furnishing of the meteorological personnel.

SUPPORTED BY U.S. National Science Foundation

### 12.0014, RESEARCH ADVISORY SERVICES

*UNKNOWN*, U.S. Dept. of Commerce, Maritime Transp. Res. Board, Washington, District of Columbia

Description: The Board, and its predecessor, Maritime Cargo Transportation Conference, undertakes investigations of maritime problems in areas where the National Research Council can best provide guidance on means and techniques to improve maritime systems. Co-operative government-industry panel efforts are utilized where such advisory services can best serve the national interests of maritime transportation.

The Maritime Cargo Transportation Conference did extensive exploration and research of cargo handling in the port of San Francisco; unitized cargo techniques for inland and overseas transportation; cargo handling by cranes; burtoning gear, and roll-on roll-off, vessels; and origin to destination systems.

More recent work of the board has been a functional analysis of work performed aboard ship; development of a stepboard system to collect data for management information; and a statistical study of the U.S. Merchant Marine work force including employment qualifications, union-company affiliations, age, length of service, attrition work opportunity, and retirement trends.

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 12.0015, SYSTEMS ANALYSIS ASSISTANCE TO HEADQUARTERS U. S. COAST GUARD

*E.E. HOWE*, U.S. Dept. of Transportation, Coast Guard, Washington, District of Columbia 20591

The objective of this project is to provide a systems analysis capability for the Coast Guard Headquarters in establishing their position relative to icebreakers and their use in the decade ahead. The approach is to assist in problem structuring drawing on such techniques as cost-benefit analysis, mission definition and analysis, use of relevance tree and economic modelling.

SUPPORTED BY U.S. Dept. of Commerce - N.B.S.

## 12. FACILITIES

### 12.0016, SUPPORT OF THE NATIONAL OCEANOGRAPHIC DATA CENTER

L.E. DECAMP, U.S. Navy, Natl. Oceanographic Data Ctr. ,  
Washington, District of Columbia

Established by an Interagency Agreement dated 23 December 1960, the National Oceanographic Data Center is administered by the U. S. Naval Oceanographic Office and is jointly supported by the Navy, the Atomic Energy Commission, the U. S. Weather Bureau, the Coast and Geodetic Survey, the Bureau of Commercial Fisheries, the Geological Survey, the U. S. Coast Guard, and the National Science Foundation.

Its function is to collect, compile, store and disseminate oceanographic data, serving the entire scientific community. Its advisory board, composed of representatives from each of the sponsoring agencies, advises on plans and policies.

SUPPORTED BY U.S. National Science Foundation

### 12.0017, SUPPORT OF THE NATIONAL OCEANOGRAPHIC DATA CENTER

W.C. JACOBS, U.S. Navy, Hydrographic Office, Washington, District of Columbia

NO SUMMARY HAS BEEN PROVIDED TO THE SCIENCE INFORMATION EXCHANGE

SUPPORTED BY U.S. Atomic Energy Commission

### 12.0018, SUPPORT OF WORLD DATA CENTER - A (OCEANOGRAPHY)

W.C. JACOBS, U.S. Navy, Oceanographic Office, Washington, District of Columbia

This grant will support the administration and operation of World Data Center A, Oceanography, required by international commitments; which have not been provided for in the regular NODC budget or elsewhere. The functions of this center include: acquisition of data; exchange of data; compilation, preparation, printing and distribution of semiannual catalogues of data, track charts of catalogued cruises, bibliographies of publications, special data lists, related charts, information for international commissions, committees and expeditions and development of improved methods to prepare and issue up-to-date catalogues of data and related information.

SUPPORTED BY U.S. National Science Foundation

### 12.0019, UNDERWATER ACOUSTICS MEASUREMENTS FACILITY

J. KINGSBURY, U.S. Navy, Ship Systems Command, Washington, District of Columbia 20360

Objective: To develop a acoustic facility at USL for the purpose of performing underwater acoustic measurements under controlled conditions.

Approach: It is clear that certain aspects of acoustic propagation are not entirely understood. To aid in the construction of analytic models to completely represent propagation effect, it is necessary to perform definitive experiments under carefully controlled conditions. This is not always possible under actual at-sea conditions. It is necessary that a facility be developed at USL where key experiments can be performed which will go a long way to improving understanding of certain propagation phenomena. It is intended, also, that such a facility containing one or more carefully designed tanks, would support other investigative programs such as array configuration studies and system model studies. In the latter case, for instance, through direct linkage with USL's planned computer facility, various acoustic systems could be modeled and their performance could be evaluated.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 12.0020, SYSTEM OPERATIONS AND ACOUSTIC PHYSICS

J.C. MUNSON, U.S. Navy, Research Laboratory, Washington, District of Columbia

Conduct a program which will lead to the specifications for undersea systems. The spectrum of work will include theoretical acoustics, systems concepts, validation of operational concepts, and systems analysis. Attention will be given to the Navy needs for systems in deep ocean and in shallow water areas. The work will be carried through to the development of experimental research systems which will be used both for research and to demonstrate conceptual and operational feasibility.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 12.0021, HUDSON LABORATORIES SHIP SUPPORT

UNKNOWN, U.S. Navy, Military Sea Transp. Service, Washington, District of Columbia 20390

The emphasis on underwater sound propagation has necessitated an accelerated oceanographic research program. This effort together with the increasing use of larger and heavier research tools towed at greater depths has generated the requirements for an improved sea going research platform. At the request of ONR, the reserve fleet ship, USS SAN CARLOS was converted to meet these requirements and was recommissioned the USNS JOSIAH W. GIBBS (T-AGOR 1). It has been substantially modified in a progressive manner to continue to meet the ever changing requirements of the Hudson Laboratories at-sea phases.

MSTS will provide the services of USNS JOSIAH W. GIBBS (T-AGOR 1) to support the sea going phases of the research program of HUDSON LABORATORIES. MSTS will operate the GIBBS throughout FY 69. The ship will be under the operational control of MSTS and under the technical control of ONR. Detailed procedures are described in the joint memorandum of agreement between the Chief of Naval Research and Commander, Military Sea Transportation Service. The technical control will be transferred on 1 October 1968 to the Naval Research Laboratory under a new memorandum of agreement.

SUPPORTED BY U.S. Dept. of Defense - Navy

### 12.0022, SUPPORT OF THE COMMITTEE ON OCEANOGRAPHY OF THE NATIONAL ACADEMY OF SCIENCES

H.E. VANNESS, U.S. Navy, Office of Naval Research, Washington, District of Columbia

The Committee on Oceanography serves as advisor to the Federal Government on general as well as specific goals and problems associated with further development of national oceanographic programs. The Committee is sponsored jointly by the Office of Naval Research, the National Science Foundation, the Atomic Energy Commission, the Bureau of Commercial Fisheries, and the Environmental Science Service Administration.

The major accomplishment of the Committee on Oceanography during the past year was the completion of an extensive report, Oceanography 1966 - Achievements and Opportunities (NAS-NRC Publication 1492). The report contains a review of advances in oceanography during the past several years; a detailed analysis of the Committee's earlier report, Oceanography 1960 to 1970, that updates the Committee's previous recommendations and introduces some new topics; and a discussion of the problems of management, planning, and organization of the National Oceanographic Program.

During the year ahead, the Committee expects to focus its attention on several basic issues in ocean science. These will fall into two major categories: major scientific oceanographic problems and management problems affecting this nation's ability to conduct oceanographic research.

SUPPORTED BY U.S. National Science Foundation

### 12.0023, OPERATION OF THE R/V HERO AND PALMER STATION SUPPORT LABORATORY

S.T. CRAPO, Marine Acoustical Serv. Inc. , Miami, Florida 33135

This contract provides for the operation of the new 125 Ft. Antarctic Research Ship Hero and associated shore scientific laboratories in Antarctica. In addition to the actual operation of the ship, the contractor will be responsible for the management and support services necessary to enable scientific investigators

## 12. FACILITIES

and associated personnel to perform research aboard the Hero and at the biological laboratory located at Palmer Station, Antarctica.

SUPPORTED BY U.S. National Science Foundation

### 12.0024, SUPPORT OF RESEARCH VESSELS JOHN ELLIOTT PILLSBURY, GERDA, TURSIOPS

*F.G. SMITH*, Univ. of Miami, Graduate School, Miami - Coral Gables, Florida 33124

A. Geology and Geophysics: The oceanographic work in geology and geophysics at the Institute of Marine Sciences, University of Miami, covers a wide scope, including sedimentary petrology, mineralogy, micro-paleontology, paleotemperature determinations, absolute dating of sediments, and sedimentary ecology, as well as seismic reflection and gravity investigations. There were 18 professional geologists, geochemists, and geophysicists associated with the Institute involved in various aspects of the research. In addition, approximately 12 graduate students participated in the programs. B. Biological Oceanography: The biological program at the Institute of Marine Sciences encompassed investigations on the planktonic, nektonic and benthonic forms of coastal waters, the continental shelf and the deep ocean basins. Individual research efforts were directed toward understanding the systematics and distribution of fishes, crustaceans, echinoderms and cephalopods. Also studies on zooplankton and phytoplankton ecology, larval development, and marine bacteria and fungi were conducted. Approximately 20 scientists were associated with various phases of the work, and 28 graduate students also participated.

SUPPORTED BY U.S. National Science Foundation

### 12.0025, CURATING OF BLAKE PLATEAU CORES

*F.G. SMITH*, Univ. of Miami, Institute of Marine Science, Miami - Coral Gables, Florida 33124

This project will support a service function performed by the Institute of Marine Science, University of Miami, on behalf of all member institutions of the Ocean Sediment Coring Program and other appropriately qualified scientists. The work will consist of curatorial care and distribution of core samples. The University of Miami will provide storage space for the cores and office and laboratory space for visiting scientists who come to the Institute to study the cores.

SUPPORTED BY U.S. National Science Foundation

### 12.0026, SUPPORT OF UNIVERSITY OF GEORGIA MARINE INSTITUTE RESEARCH VESSEL OPERATION

*V.J. HENRY*, Univ. of Georgia Graduate School, Sapelo Island, Georgia 31327

This grant provides support of the R/V Kit Jones, a 65 foot diesel trawler outfitted with appropriate research equipment. The area of operation includes the estuaries, shelf and upper continental slope of coastal Georgia and southeastern United States. Cruises of several days duration can conveniently be made by 4 to 6 scientists and larger groups can be accommodated for one day. Shipboard equipment includes Decca radar, dual Loran units, ship-to-shore and CB radios, automatic pilot, recording fathometer, salinometer, transmissometer, winches, nets, dredges and corers.

The Kit Jones is used by the staff and visitors of the Marine Institute for research and instructional purposes. Research includes a large spectrum of biological and geological problems. Examples are pollution ecology, source and distribution of turbidity, and primary productivity of estuarine and coastal waters; and sediment distribution and structures, animal-sediment relationships, and topography and structure of the continental shelf and slope. A large number of training and collection cruises by Georgia and eastern universities and colleges are made each year and serve to introduce students from several disciplines and levels of instruction to the marine environment.

SUPPORTED BY U.S. National Science Foundation

### 12.0027, OPERATIONAL SUPPORT OF OCEANOGRAPHIC RESEARCH VESSELS

*R.G. BADER*, Univ. of Hawaii, Graduate School, Honolulu, Hawaii 96822

Support for approximately 60% of the operating cost for University of Hawaii's R/V TERITU and charter costs for 118 days of use of the R/V SITKIN will be provided for a one year period. This will amount to a total of 268 ship days. The requirement for the second vessel is due in part to the fact that several projects concerned with seismic refraction work involve the use of two vessels simultaneously. Also TERITU is a small vessel (90 ft. l.o.a.) carrying a scientific party of 6 and therefore capable of being scheduled only for single project cruises.

Projects to be carried out involving use of NSF supported ship time include: studies of dissolved oxygen in sea water in relationship to water masses around Hawaii; studies of ocean turbulence; seismic refraction studies of crustal and upper mantle structure in the vicinity of the Murray Fracture Zone and over selected volcanic submarine ridges and seamount chains; a comprehensive geologic and geophysical study of the structural relationships between mid-Pacific oceanic ridges and fracture zones involving magnetic surveys, seismic reflection studies, precision echo-sounding surveys, gravimetric profiles, bottom sampling and photography; studies of crystalline mineral colloids in marine sediments; and analyses of tropical zooplankton.

SUPPORTED BY U.S. National Science Foundation

### 12.0028, MANAGEMENT OF THE ENIWETOK MARINE BIOLOGICAL LABORATORY

*R.W. HIATT*, Univ. of Hawaii, Graduate School, Honolulu, Hawaii 96822

This grant is for the management of the Eniwetok Marine Biological Laboratory, a facility available to male citizens engaged in marine biological research. A good laboratory, reasonably equipped, and with good logistic support is located on an atoll lagoon containing excellent coral reefs and some relatively undisturbed terrestrial environment. Inquiries for working space and feasibility of research intended at Eniwetok are to be sent to Dr. Robert W. Hiatt, Laboratory Manager, University of Hawaii, 2444 Dole St., Honolulu, Hawaii 96822. Travel to and from Eniwetok, subsistence at the site and laboratory facilities are provided at no cost to investigators.

SUPPORTED BY U.S. Atomic Energy Commission

### 12.0029, LOGISTIC SUPPORT, MAINTENANCE AND RENOVATION OF FACILITIES

*C.E. WILDE*, Mount Desert Island Biol. Lab, Salsbury Cove, Maine

The Mount Desert Island Biological Laboratory is an independent institution providing research facilities to qualified investigators whose programs in marine biology or local fauna and flora can be accommodated. Approximately 30 research groups are present each season (June 15 - Sept. 15) with investigators from about two dozen institutions located in 14 - 18 states. Summaries of the programs are published in the Bulletin of the Laboratory issued annually. Applications for research space and housing facilities should be addressed to the Director.

SUPPORTED BY U.S. National Science Foundation

### 12.0030, LOGISTIC SUPPORT AND MAINTENANCE OF FACILITIES

*C.E. WILDE*, Mount Desert Island Biol. Lab, Salsbury Cove, Maine

The Mt. Desert Island Biological Laboratory is one of very few independent marine biological research stations in the United States. It was founded in 1898 at South Harpswell, Maine, incorporated in 1914, and has functioned as a seasonal field station at Salsbury Cove, Maine. The laboratory has operated uniquely by cooperative voluntary efforts of its investigators. At the present time the yearly paid employees are in full time maintenance men and part time assistant director. The officers serve without remuneration.

## 12. FACILITIES

Located on Frenchmen Bay, there is immediate access to organisms of the cold Atlantic waters as well as to environments of rocky shores, fresh water lakes, bogs, meadows and spruce forests. Acadia National Park is close by. The individual research programs carried out at the Laboratory represent a broad spectrum of marine biological research. The advantages of the later summer breeding seasons of certain invertebrates, the greater availability of other organisms throughout the season and special ecological aspects of the location have led to emphasis on certain kinds of research: comparative physiology of fish (especially renal and respiratory physiology); various aspects of development using marine eggs; problems of ion transport, cell division, regeneration, botanical ecology, fine structure, organ biochemistry, hemodynamics and general comparative physiology.

SUPPORTED BY U.S. National Science Foundation

### 12.0031, STUDIES ON THE PHYSIOLOGY OF MARINE ORGANISMS USING RADIOISOTOPES

H.B. STEINBACH, Marine Biolog. Laboratory, Woods Hole, Massachusetts 02543 (AT(30-1)1343)

This contract is in partial support of a continuing service facility maintained to provide a wide variety of requirements--isotopes, chemicals, equipment, research space--for the radiobiological research of about seventy-five senior scientists each summer. Assignments of space for next summer will be made early in 1967.

SUPPORTED BY U.S. Atomic Energy Commission

### 12.0032, RESEARCH TRAINING LABORATORY

H.B. STEINBACH, Marine Biolog. Laboratory, Woods Hole, Massachusetts 02543

The Research Training Building to be supported under this grant will consist of 4 floors and a basement totalling 65,000 gross feet (44,200 Net). The new building has been carefully designed to ensure that each course will be operated as an integrated physical unit and that a close working relationship will be maintained between the staff and the students. The basic plan focuses on a central trainee area surrounded by individual staff research space and specialized purpose rooms.

The basic objective of the Marine Biological Laboratory has been the development of young scientists well-trained in the biological marine sciences. Almost from the beginning of MBL a series of advanced research-training courses in several substantive areas of marine biology have been conducted at the Laboratory. All of the buildings in which these courses are now given are antiquated wooden structures erected during the late 1890's. The need for a modern facility is urgent. The increased sophistication of research techniques in experimental biology require adequate space to conduct the courses. The core of the research-training program is vested in five formal summer courses: Invertebrate Zoology, Marine Botany, Physiology, Experimental Embryology, and Marine Ecology. With a senior staff of 40 and 12 staff assistants, the new building will house more than 240 individuals in the research-training programs. In addition to the summer programs, the new laboratory will house the year-round research project: the Systematics-Ecology Program. This group has a senior staff of 25 investigators who will occupy all of the first floor and a portion of the basement. Other expanded activities are planned for spring and fall courses when the new laboratory is completed.

52

SUPPORTED BY U.S. National Science Foundation

### 12.0033, PROVIDE RESEARCH FACILITIES AND SERVICES

UNKNOWN, Marine Biolog. Laboratory, Woods Hole, Massachusetts 02543 (PH-43-67-1129)

Independently and not as an agent of the Government, the Contractor shall furnish approximately 1,422 square feet of space and supporting services to three groups of Government investigators (totaling approximately 28 individuals) for use in conducting research studies on various forms of living marine life. The fixed

rate for space, plus supporting services hereafter designated as a 'Research Fee' shall be charged in accordance with the following schedule: (1) NINDB Biophysics Branch has rooms 121, 122, 123, 113A, each of which has a basic occupancy of up to two persons each; research fee is \$1,560. (2) NINDB Ophthalmology Branch has room L315 (same basic occupancy); research fee is \$480. (3) NIMH has room 216 (same basic occupancy); research fee is \$2,160. (4) NIAMD has rooms L321-W221 (same basic occupancy); research fee is \$840. (5) Twelve extra persons (NINDB Biophysics, 3; NINDB Ophthalmology, 1; NIMH, 4; NIAMD, 4); research fee is \$1,440. Total research fee is \$6,480.

SUPPORTED BY U.S. Dept. of Hlth. Ed. & Wel. - P.H.S.

### 12.0034, SUPPORT OF TWO RESEARCH VESSELS

D.C. CHANDLER, Univ. of Michigan, Graduate School, Ann Arbor, Michigan

This project provides full support for the operation of two research vessels currently in use on the Great Lakes for program activities of the Great Lakes Research Division of University of Michigan's Institute of Science and Technology. Will provide funds for operating the 114-ft. INLAND SEAS and the 50-ft. MY-SIS. This project will be joint funded.

Research activities involving use of these vessels are concerned with emphasis on the Great Lakes and their tributaries, with emphasis on the physical, chemical and biological processes and phenomena of the waters within the lake basins and on the interactions between these waters and their atmospheric and geologic boundaries. In addition to being used to conduct the University of Michigan's research efforts, these vessels are made available to other midwestern universities for research and educational purposes.

SUPPORTED BY U.S. National Science Foundation

### 12.0035, EXPERIMENTAL COMMERCIAL OPERATION OF SAVANNAH

UNKNOWN, First Atomic Ship Transp. Inc., Hoboken, New Jersey

Purpose: To operate the SAVANNAH on an experimental commercial basis, and establish operational data as to the reliability, economics and safety of nuclear ships for use in future planning for advanced nuclear ship designs.

Description: The SAVANNAH has been operating in regularly scheduled commercial cargo liner service efficiently, reliably and on schedule for three years with no serious mechanical or operational problem. All safety requirements of the Atomic Energy Commission and the Coast Guard have been met. Records and analyses of operational cost factors have been prepared to provide basis for improved future designs.

During the past year, deck Officers were licensed as Reactor Operators for the first time, annual outage time was reduced from 30 to 12 days, and initial visits were made to the following countries: Yugoslavia, Tunisia, Greece, Israel, Cyprus, Okinawa, Lebanon, Korea, Phillipines, and Taiwan. The original reactor core is still intact; the SAVANNAH is due for a shuffle refueling outage of about 2-3 months beginning in August, 1968. 0113

SUPPORTED BY U.S. Dept. of Commerce - Maritime Admin.

### 12.0036, RESEARCH VESSEL U.S.N.S ELTANIN

W. SMOLEN, Alpine Geophysical Associates, Norwood, New Jersey

This contract provides for the field party technical support on board the Antarctic research ship Eltanin, for the procurement of specialized scientific and oceanographic equipment used in the research project, and for the cargo handling and logistic processing related to the Eltanin scientific activities. This amendment provides for additional equipment, supplies, and personnel changes necessary for carrying out these functions.

SUPPORTED BY U.S. National Science Foundation

## 12. FACILITIES

### 12.0037, SUPPORT OF RESEARCH VESSEL AT LAMONT GEOLOGICAL OBSERVATORY

*J.L. WORZEL*, Columbia University, Graduate School, *Palisades, New York 10964*

This project supports approximately half the operating costs of two research vessels, VEMA and CONRAD, operated by Lamont Geological Observatory of Columbia University. This amounts to about \$605,400 of which 15% or \$90,800 is related to biological research and the remaining 85% or \$514,600 for physical oceanography.

The main objective of oceanographic research to be carried out on R/V VEMA and CONRAD in the next year continues to be the assessment of the sedimentary distribution and the identification of three layers which are generally found in the oceans of the world. Another objective is the study of the magnetic seismic refraction program is presently underway with the Japanese and a similar one planned with the Australians. These cooperative programs have the advantage of providing a second ship for two-ship operations without additional ship operating costs for Lamont. In conjunction with these major objectives, an integrated program of geophysical-geological investigations is planned for the tracks en route and return from the main research areas.

SUPPORTED BY U.S. National Science Foundation

### 12.0038, TRANSPORTATION EXPENSES FOR PARTICIPATION IN USC&GSS OCEANOGRAPHER GLOBAL EXPEDITION

*P.K. WEYL*, State University of New York, Graduate School, *Stony Brook, New York 11790*

This grant is to cover travel expenses and shipment of equipment for personnel to join the USC & GSS OCEANOGRAPHER and carry out research in three projects to develop a research program in oceanography.

SUPPORTED BY U.S. National Science Foundation

### 12.0039, SUPPORT OF THE R/V EASTWARD

*C.G. BOOKHOUT*, Duke University, Graduate School, *Beaufort, North Carolina 28516*

This grant provides support for the operation of the R/V EASTWARD for approximately 11 months. The R/V EASTWARD is an 118-ft. steel hulled research vessel built with assistance from NSF for the purpose of furnishing an available facility for training, research and participation in international cooperative programs of biological oceanography. The program carried out by this research vessel includes both research and training projects.

Each year a National Project and Program Review committee reviews this program and upon their recommendation ship-time is made available. This year the Committee approved a total of 279 days of shiptime. By combining related research programs this was reduced to 237 days. Twenty-three institutions will participate in this Cooperative Program during 1968-69. Included in a 90 day cruise to the Caribbean in addition to her continuing program of research along the continental shelf of Cape Hatteras.

SUPPORTED BY U.S. National Science Foundation

### 12.0040, COOPERATIVE RESEARCH AND RESEARCH TRAINING PROGRAM IN BIOLOGICAL OCEANOGRAPHY

*R.J. MENZIES*, Duke University, Marine Laboratory, *Beaufort, North Carolina 28516*

This grant supported the operation of the Research Vessel EASTWARD and the cooperative research and research training program in biological oceanography. Participation in the program is open to all qualified individuals on a competitive basis.

SUPPORTED BY U.S. National Science Foundation

### 12.0041, RESEARCH VESSEL OPERATIONS

*W.V. BURT*, Oregon State University, Graduate School, *Corvallis, Oregon 97331*

These vessels will be used to conduct a wide spectrum of oceanographic research in the northwestern coastal waters and in

the Northeast Pacific. Most cruises are multidisciplinary. Graduate students presently numbering 102 participate extensively in shipboard activities. Visiting investigators are also accommodated whenever possible.

SUPPORTED BY U.S. National Science Foundation

### 12.0042, OPERATION AND MAINTENANCE OF THE OREGON STATE UNIVERSITY SEAFOODS LABORATORY

*D.L. CRAWFORD*, Oregon State University, Agricultural Experiment Sta., *Corvallis, Oregon 97331*

Objective: To provide for the operation and maintenance of the Oregon State University Seafoods Laboratory at Astoria, Oregon, which operates as an integral part of the Department of Food Science and Technology.

Description of Work: This laboratory provides a center at which applied basic research in the field of marine food science and technology can be conducted in close cooperation with and for the development of the fishing industry of Oregon. Its close proximity to the major fishing industry of Oregon facilitates and speeds the dissemination of knowledge obtained through research at the center and elsewhere necessary to bring about needed technological development.

SUPPORTED BY Oregon State Government

### 12.0043, THE INSTITUTE FOR THE DEVELOPMENT OF RIVERINE AND ESTUARINE SYSTEMS (IDRES)

*J.R. FELDMER*, Franklin Institute, *Philadelphia, Pennsylvania*

The Franklin Institute will establish, in cooperation with the Academy of Natural Sciences of the State of Pennsylvania, Lehigh University and Temple University, The Institute for the Development of Riverine and Estuarine Systems (IDRES). These institutions will conduct basic research programs focused on the long term objectives of better utilization resources of the Delaware riverine-estuarine complex including effects of thermal pollution in the Delaware River, effects of thermal effluent discharge, the mechanics and thermodynamics of the distribution and mixing of thermal effluence, and the development of a conceptual model of sedimentation of the Delaware riverine estuarine complex. In addition, an information center to serve the principal investigators conducting this research and as a focal point of coordination with other Federal and private information centers related to estuarine problems will be established by the Franklin Institute. Study and design of an industrial wasteline for the Delaware estuary with a view toward study of an alternative method to that now available for the disposal of waste will be begun.

SUPPORTED BY U.S. National Science Foundation

### 12.0044, LABORATORY OF NEUROBIOLOGY

*J. DELCASTILLO*, Univ. of Puerto Rico, School of Medicine, *San Juan - Rio Piedras, Puerto Rico 00931*

The purpose of this application is to set up a laboratory devoted to the investigation of neurobiological problems primarily through the use of invertebrate organisms, thus taking advantage of the rich fauna which inhabits the littoral waters of Puerto Rico. The University of Puerto Rico Medical School could make a significant contribution to biomedical research by introducing scientists to new organisms, cells and preparations which, due to the restricted geographical distribution of existing marine biological laboratories with adequate facilities, have so far been unavailable for biophysical and biochemical research. It could therefore, fill a national and even an international need. Initial work will probably deal with problems related to the conduction and spread of excitation within coral colonies; the chemistry and actions of neurotoxins and pharmacologically active compounds produced by tropical fishes and invertebrates; physiology and molluscan nerve cells; excitation-contraction and excitation-relaxation mechanisms in invertebrate muscles; induction, nature and mechanism of activation of chemoreceptors in nerve and muscle cells and the electrophysiology of neurosecretory cells. Actual results cannot be anticipated easily, since the immediate task of the laboratory will be an exploratory one. The laboratory

## 12. FACILITIES

envisaged in this application will be open to graduate students and visiting scientists. It may, therefore, play an important role both in the development of the graduate divisions of the U.P.R. and the establishment of closer academic ties between the countries of the two large American Continents.

SUPPORTED BY U.S. Dept. of Hlth. Ed. & Wel.- P.H.S.

### 12.0045, OPERATION OF R/V TRIDENT

*J.A. KNAUSS*, Univ. of Rhode Island, Graduate School, Kingston, Rhode Island 02881

Support for approximately half the cost of operating University of Rhode Island's research vessel TRIDENT will be provided for a one year period. R/V TRIDENT is a converted Army, FS freighter used to carry out a broad spectrum of scientific cruises in the Atlantic and Caribbean. Cruise participants include URI faculty and graduate students and guest investigators from other institutions. Cruises planned for the coming year will encompass the following areas of study: collection and analysis of rock samples from the Mid-Atlantic Ridge south of Iceland to test the seafloor spreading hypotheses; temporal aspects of vertical distribution of pelagic organisms; ecology and nutrient requirement of phytoplankton in the Gulf of Panama; bioacoustic investigation of cetacean and fish sounds; sub-bottom investigation of the post cretaceous drainage pattern in the approaches to Rhode Island and Block Island Sounds.

Total direct costs for the year beginning 9/1/67 for operation of R/V TRIDENT are \$501,935. This project will fund \$251,000 of which approximately 2/5 or \$100,400 is for biologically oriented shipboard work and 3/5 or 150,600 for shiptime related to physical, chemical and geological oceanographic research.

SUPPORTED BY U.S. National Science Foundation

### 12.0046, OPERATION OF R/V ALAMINOS

*R.A. GEYER*, Texas A & M University System, Graduate School, College Station, Texas 77843

This project provides a continuation of partial support of R/V ALAMINOS, which is operated by the Department of Oceanography of Texas A & M University. Total costs for operating this vessel for the coming year (1 October 1968 to 30 September 1969) are estimated to be \$461,400. The Foundation will contribute \$203,900 toward this total and the remaining funds will be derived from other sources. This project will be joint funded in the following manner: DES, \$148,500; BMS, \$55,400.

Research projects requiring use of the ALAMINOS represent a broad spectrum of oceanographic effort, most of

which is carried out in the Gulf of Mexico and the Caribbean. The coming year's schedule will also include work in the Eastern Equatorial Pacific in cooperation with another oceanographic institution. Examples of studies to be carried out in the coming year include the following: current measurements in the Gulf Loop and Yucatan Currents; characterization and distribution in space and time of particulate and soluble, inorganic and organic carbon species in sea water; geological and geophysical studies of sediment structures in various physiographic provinces of the Gulf and Caribbean; benthic collections and photographic observations in the western Gulf.

SUPPORTED BY U.S. National Science Foundation

### 12.0047, OCEANOGRAPHIC VESSEL OPERATIONS

*F. A. RICHARDS*, Univ. of Washington, Graduate School, Seattle, Washington 98122

This project provides approximately 41% of the total funds required for the coming year in support of ship operations at the University of Washington. The Oceanography Department operates the R/V THOMPSON, HOH and ONAR and supplements them with a charter vessel to be used for approximately 69 days. Total fleet funding also includes \$1,000 for charter of a small aircraft for making a variety of water surface observations from the air. Total costs for ship operations and charter purposes will be \$954,694, of which \$558,687 is available from other sources. Foundation support will total \$396,000, of which \$230,900 is for shiptime for physical, geological and chemical oceanographic studies and \$165,100 for biological oceanographic studies.

The oceanography program of the University of Washington is concerned primarily with the Northeast Pacific Ocean, Puget Sound and its approaches and the Arctic Sea; and secondarily with the eastern tropical Pacific Ocean and the Caribbean Sea. Current programs emphasize studies in: geology and geophysics dealing with analyses of sediments in the inshore regions and in the North Pacific Ocean; chemistry and geochemistry particularly concerned with nutrients and dissolved gases in the sea; physical oceanography concerned with the dynamics of discrete water parcels in the inshore regions and physical parameters of Arctic waters; biological oceanography dealing with plankton productivity studies in Puget Sound, off the Washington-Oregon coast, and in the Arctic.

ULTRASONICS ...Acoustical, Attenuation, Transmission, Velocity, ...1.0036

#### Instrumentation-other

SONIC UNDERWATER NAVIGATION FOR SHIPS ...Equipment, Navigation, Ranging, Sonar, Sound Gear, ...4.0100

### Intensity

MEASUREMENT OF UNDERWATER ACOUSTIC PROPAGATION ...Acoustical, Depth, Forecasting-prediction, Transmission, ...1.0014

### Interference

STUDY OF PROBABILITY OF DETECTION AND FALSE ALARM RATE OF FREQUENCY ACOUSTIC TELEMETERING SYSTEM ...Acoustical, Oil and Natural Gas - Sulfur, ...8.0106

### Media

#### Interfaces

HONEYWELL ACOUSTIC RESEARCH PROGRAM ...Acoustical, Data Acquisition, Data Analysis - General, Model Studies, Reverberation, Sonar, ...1.0071

ACOUSTIC SCATTERING ...Acoustical, Model Studies, Reflection, Scattering, Surface Environments, ...1.0069

OCEAN ACOUSTIC ENVIRONMENT ...Acoustical, Reverberation, Scattering, Transmission, ...1.0016

SOUND SCATTERING IN THE OCEAN ...Liquids, Scattering, ...1.0040

ACOUSTIC SCATTERING STUDIES ...Acoustical, Reflection, Scattering, ...1.0028

#### Liquids

HIGH-POWER HYDROACOUSTIC VIBRATOR DEVELOPMENT ...Generation, Seismic Studies, Sonar, ...8.0165

ACOUSTICS PHYSICS ...Acoustical, Transmission, ...1.0058

ACOUSTIC AMBIENT NOISE ...Acoustical, Arctic, Noise, Spectra, ...1.0053

BI-STATIC ECHO RANGING ...Acoustical, Reverberation, ...1.0067

ACOUSTIC LUNEBERG LENS ...Technique Development, ...8.0054

ENVIRONMENTAL REVERBERATION STUDIES ...Acoustical, Bubble, Electron, Reverberation, Scattering, ...1.0039

SHALLOW WATER ACOUSTIC PROPAGATION STUDIES (SWAPS) ...Acoustical, Geomorphology-topography, Subbottom, Thermal, Transmission, Turbulence - Sea Water, Water Motion, Waves, ...1.0065

SYSTEM OPERATIONS AND ACOUSTIC PHYSICS ...Acoustical, Economic Theory, Instrumentation-general, Standards, Specifications, Systems Analysis, ...12.0020

SOUND SCATTERING IN THE OCEAN ...Interfaces, Scattering, ...1.0040

UNDERWATER ACOUSTICS MEASUREMENTS FACILITY ...Acoustical, Facilities, Transmission, ...12.0019

REVERBERATION RESEARCH STUDIES ...Acoustical, Reverberation, Water Properties-general, ...1.0027

ENVIRONMENTAL SUPPORT OF SONAR DESIGN ...Acoustical, Model Studies, Ships and Cruises, Transmission, Water Properties-general, ...1.0015

UNDERWATER SOUND PROPAGATION STUDIES ...Acoustical, Attenuation, Transmission, Water Properties-general, ...1.0029

ACOUSTIC HOLOGRAPHY ...Acoustical, Diffraction, Holography, Ocean Mining, ...8.0255

### Noise

ACOUSTIC AMBIENT NOISE ...Acoustical, Arctic, Liquids, Spectra, ...1.0053

AMBIENT SEA NOISE ...Acoustical, Buoys, Sampling, Sound Production, ...1.0013

ARCTIC ACOUSTIC RESEARCH ...Applied Electronics, Arctic, Ice Acoustics, Transmission, ...1.0001

AMBIENT NOISE RESEARCH STUDIES ...Acoustical, Depth, Model Studies, Spectra, ...1.0023

### Nonlinear Acoustics

ULTRASONICS ...Acoustical, Surface Environments, Ultrasonic Frequency, ...1.0019

### Phase Relationships

UNDERWATER ACOUSTIC ANALYSIS ...Acoustical, Forecasting-prediction, Signal Analysis-other, Transmission, Water Properties-general, ...1.0038

### Ranging

RELIABLE ACOUSTIC PATH ...Acoustical, Attenuation, Bermuda, Reverberation, Transmission, ...1.0032

SONIC UNDERWATER NAVIGATION FOR SHIPS ...Equipment, Instrumentation-other, Navigation, Sonar, Sound Gear, ...4.0100

### Reflection

ACOUSTIC IMAGE INVESTIGATION ...Acoustical, Sonar, Technique Development, ...1.0018

ACOUSTIC SCATTERING ...Acoustical, Interfaces, Model Studies, Scattering, Surface Environments, ...1.0069

MICROACOUSTICS ...Acoustical, Scattering, Sound Gear, Water Tunnels Tables, ...1.0043

MEASUREMENT AND THEORY OF SCATTERED UNDERWATER SOUND ...Acoustical, Scattering, Transmission, ...1.0008

SIGNAL COHERENCE AND ARRAY DESIGN STUDIES ...Acoustical, Coherence, Signal Analysis-other, Spectra, Waveform, ...1.0024

ACOUSTIC SCATTERING STUDIES ...Acoustical, Interfaces, Scattering, ...1.0028

### Refraction

INTERNAL WAVE STUDIES ...Acoustical, Model Studies, Scattering, Surface Environments, Waves-internal, ...1.0021

### Reverberation

HONEYWELL ACOUSTIC RESEARCH PROGRAM ...Acoustical, Data Acquisition, Data Analysis - General, Interfaces, Model Studies, Sonar, ...1.0071

HF AUDIO ABSORPTION IN ICE ...Acoustical, Attenuation, Ice Acoustics, Salinity, Sea Ice, ...3.0073

BIOLOGIC SOUND SCATTERING ...Acoustical, Population Dynamics, Scattering, Vertical Distribution, Zooplankton, ...1.0060

OCEAN ACOUSTIC ENVIRONMENT ...Acoustical, Interfaces, Scattering, Transmission, ...1.0016

WOODS HOLE ENVIRONMENTAL STUDIES OCEANIC ACOUSTICS ...Acoustical, Atlantic Ocean-north, Benthic-bottom, Data Analysis - General, Scattering, ...1.0057

BI-STATIC ECHO RANGING ...Acoustical, Liquids, ...1.0067

RELIABLE ACOUSTIC PATH ...Acoustical, Attenuation, Bermuda, Ranging, Transmission, ...1.0032

ENVIRONMENTAL REVERBERATION STUDIES ...Acoustical, Bubble, Electron, Liquids, Scattering, ...1.0039

GLOBAL VOLUME REVERBERATION LIMITATION STUDIES ...Acoustical, Atlantic Ocean-north, Scattering, Sound Production, ...1.0037

## SUBJECT INDEX

## Acoustics

- SHALLOW WATER PROPAGATION ...Acoustical, Coherence, Shoals, Transmission, Water Properties-general, ...1.0035  
 MEASUREMENT AND PREDICTIVE STATISTICS OF REVERBERATION ...Acoustical, Geomorphology-topography, Scattering, Surface Environments, Textures-structures, Velocity, ...1.0007  
 REVERBERATION RESEARCH STUDIES ...Acoustical, Liquids, Water Properties-general, ...1.0027

### Scattering

- BIOLOGICAL ASPECTS OF MIDWATER SOUND SCATTERING ...Atlantic Ocean-north, Bioluminescence, Fish -non-specific, Range Or Territorial Distr. , Sound Production, Vertical Distribution, ...1.0054  
 BIOLOGIC SOUND SCATTERING ...Acoustical, Population Dynamics, Reverberation, Vertical Distribution, Zooplankton, ...1.0060  
 ACOUSTIC SCATTERING ...Acoustical, Interfaces, Model Studies, Reflection, Surface Environments, ...1.0069  
 OCEAN ACOUSTIC ENVIRONMENT ...Acoustical, Interfaces, Reverberation, Transmission, ...1.0016  
 WOODS HOLE ENVIRONMENTAL STUDIES OCEANIC ACOUSTICS ...Acoustical, Atlantic Ocean-north, Benthonic-bottom, Data Analysis - General, Reverberation, ...1.0057  
 MICROACOUSTICS ...Acoustical, Reflection, Sound Gear, Water Tunnels Tables, ...1.0043  
 ENVIRONMENTAL REVERBERATION STUDIES ...Acoustical, Bubble, Electron, Liquids, Reverberation, ...1.0039  
 INTERNAL WAVE STUDIES ...Acoustical, Model Studies, Refraction, Surface Environments, Waves-internal, ...1.0021  
 GEOLOGICAL OCEANOGRAPHY - ACOUSTICAL PROPERTIES OF SEDIMENTS ...Acoustical, Core Analysis, Geomorphology-topography, Mechanical Properties, Physical Properties, ...7.0101  
 GLOBAL VOLUME REVERBERATION LIMITATION STUDIES ...Acoustical, Atlantic Ocean-north, Reverberation, Sound Production, ...1.0037  
 SOUND SCATTERING IN THE OCEAN ...Interfaces, Liquids, ...1.0040  
 MEASUREMENT AND PREDICTIVE STATISTICS OF REVERBERATION ...Acoustical, Geomorphology-topography, Reverberation, Surface Environments, Textures-structures, Velocity, ...1.0007  
 MEASUREMENT AND THEORY OF SCATTERED UNDERWATER SOUND ...Acoustical, Reflection, Transmission, ...1.0008  
 BOTTOM-REFLECTED SONAR STUDIES ...Acoustical, Benthonic-bottom, Sonar, Surface Environments, Transmission, ...1.0025  
 ACOUSTIC SCATTERING STUDIES ...Acoustical, Interfaces, Reflection, ...1.0028

### Spectra

- ACOUSTIC AMBIENT NOISE ...Acoustical, Arctic, Liquids, Noise, ...1.0053  
 AMBIENT NOISE RESEARCH STUDIES ...Acoustical, Depth, Model Studies, Noise, ...1.0023  
 SIGNAL COHERENCE AND ARRAY DESIGN STUDIES ...Acoustical, Coherence, Reflection, Signal Analysis-other, Waveform, ...1.0024

### Transmission

- THE PROPAGATION OF ACOUSTIC WAVES IN THE STRATIFIED ATMOSPHERES ...Acoustics, Temperature, Waves, Wind-general, ...1.0059  
 CIRCULATION STUDIES ...Acoustical, Caribbean Sea, Dispersion, Ocean Currents-other, Water Properties-general, ...1.0046  
 ACOUSTICS PHYSICS ...Acoustical, Liquids, ...1.0058  
 SOUND TRANSMISSION IN THE SEA ...Acoustical, Signal Analysis-other, Sonar, ...1.0020  
 SHALLOW-WATER ACOUSTICS ...Acoustical, Survey Studies, ...1.0050  
 OCEAN ACOUSTIC ENVIRONMENT ...Acoustical, Interfaces, Reverberation, Scattering, ...1.0016  
 OCEAN SOUND TRANSMISSION ...Acoustical, ...1.0061  
 RELIABLE ACOUSTIC PATH ...Acoustical, Attenuation, Bermuda, Ranging, Reverberation, ...1.0032

- ULTRASONICS ...Acoustical, Attenuation, Instrumentation- Non-specific, Velocity, ...1.0036  
 SHALLOW WATER ACOUSTIC PROPAGATION STUDIES (SWAPS) ...Acoustical, Geomorphology-topography, Liquids, Subbottom, Thermal, Turbulence - Sea Water, Water Motion, Waves, ...1.0065  
 OCEANOGRAPHIC RESEARCH ...Acoustical, Anti-submarine-warfare, California, Military Aspects, Temperature, ...1.0005  
 OCEANOGRAPHIC RESEARCH - INVESTIGATIONS WITH THERMISTOR CHAIN ...Acoustical, Forecasting-prediction, Temperature, Thermal, Water Properties-general, Waves-internal, ...1.0143  
 PHYSICAL OCEANOGRAPHY ...Surface Environments, Temperature, Velocity, Waves, ...1.0026  
 OCEANOMETRICS ...Acoustical, Forecasting-prediction, Statistics-general, Velocity, ...1.0006  
 SHALLOW WATER OCEANOGRAPHY ...Acoustical, Continental Shelf, Hydrodynamics, Rhode Island, Surface Environments, ...1.0030  
 DEEP OCEAN ACOUSTIC RESEARCH ...Abyssal, Acoustical, Pressure, Submersibles, Textures-structures, Velocity, ...1.0010  
 PREDICTIVE OCEAN ACOUSTICS ...Acoustical, Environmental Effects-geologic, Forecasting-prediction, Velocity, ...1.0034  
 SHALLOW WATER PROPAGATION ...Acoustical, Coherence, Reverberation, Shoals, Water Properties-general, ...1.0035  
 UNDERWATER ACOUSTIC ANALYSIS ...Acoustical, Forecasting-prediction, Phase Relationships, Signal Analysis-other, Water Properties-general, ...1.0038  
 MEASUREMENT AND THEORY OF SCATTERED UNDERWATER SOUND ...Acoustical, Reflection, Scattering, ...1.0008  
 UNDERWATER ACOUSTIC SIGNAL COHERENCE ...Acoustical, Coherence, ...1.0012  
 MEASUREMENT OF UNDERWATER ACOUSTIC PROPAGATION ...Acoustical, Depth, Forecasting-prediction, Intensity, ...1.0014  
 PREDICTION OF SOUND FIELDS BY NORMAL MODE AND OTHER THEORY ...Acoustical, Attenuation, Computer Applications, ...1.0011  
 ACOUSTIC PROPAGATION STUDIES ...Acoustical, Instrumentation-general, Technique Development, ...1.0044  
 ARCTIC ACOUSTIC RESEARCH ...Applied Electronics, Arctic, Ice Acoustics, Noise, ...1.0001  
 UNDERWATER ACOUSTICS MEASUREMENTS FACILITY ...Acoustical, Facilities, Liquids, ...12.0019  
 SONAR ACCURACY ...Acoustic, Acoustical, Fire Control, Instrumental Services, Platforms, Sonar, ...1.0051  
 BOTTOM-REFLECTED SONAR STUDIES ...Acoustical, Benthonic-bottom, Scattering, Sonar, Surface Environments, ...1.0025  
 ENVIRONMENTAL SUPPORT OF SONAR DESIGN ...Acoustical, Liquids, Model Studies, Ships and Cruises, Water Properties-general, ...1.0015  
 UNDERWATER SOUND PROPAGATION STUDIES ...Acoustical, Attenuation, Liquids, Water Properties-general, ...1.0029

### Ultrasonic Frequency

- ULTRASONICS ...Acoustical, Nonlinear Acoustics, Surface Environments, ...1.0019  
 PHYSICAL ACOUSTICS AND THE PROPERTIES OF MATTER ...Acoustical, Cavitation, Constants, Velocimeter, Velocity, Water, ...1.0031

### Velocity

- PRESSURE INSENSITIVE VELOCIMETER ...Acoustical, Instrumental Services, Pressure, Transducers, Velocimeter, ...8.0055  
 WOODS HOLE ENVIRONMENTAL STUDIES IN PHYSICAL OCEANOGRAPHY ...Acoustical, Bathymographs, Oceanic Fronts, Salinity, Temperature, ...1.0056  
 PHYSICAL ACOUSTICS AND THE PROPERTIES OF MATTER ...Acoustical, Cavitation, Constants, Ultrasonic Frequency, Velocimeter, Water, ...1.0031  
 ULTRASONICS ...Acoustical, Attenuation, Instrumentation- Non-specific, Transmission, ...1.0036  
 PHYSICAL OCEANOGRAPHY ...Surface Environments, Temperature, Transmission, Waves, ...1.0026  
 OCEANOMETRICS ...Acoustical, Forecasting-prediction, Statistics-general, Transmission, ...1.0006

## Acoustics

- DEEP OCEAN ACOUSTIC RESEARCH ...Abyssal, Acoustical, Pressure, Submersibles, Textures-structures, Transmission, ...1.0010
- PREDICTIVE OCEAN ACOUSTICS ...Acoustical, Forecasting-prediction, ...1.0033
- PREDICTIVE OCEAN ACOUSTICS ...Acoustical, Environmental Effects-geologic, Forecasting-prediction, Transmission, ...1.0034

## Activation Analysis

- TRACE ELEMENTS IN SEA WATER ...Isotope Tracer-other, Long Island Sound, Radioactivity-general, Trace Element Analysis, ...1.0085
- NEUTRON ACTIVATION ANALYSIS OF IRON METEORITES ...Aluminum, Argon-potassium, Carbon, Cosmogenous, Iron, Neutron Activation, ...7.0065
- APPLICATION OF NUCLEAR TECHNIQUES TO MARINE MINERALS TECHNOLOGY ...Geological Exploration, Gold, Manganese, Ocean Mining, Physical Properties, ...8.0085
- FALLOUT INVENTORY OF THE OCEANS AND RELATED MECHANISMS ...Radioactivity, Radioactivity-general, Trace Elements, ...6.0189
- COMPOSITION OF LEAD HALIDE POLLUTION AEROSOLS ...Aerosols, Air Pollution Sampling, Air Pollution-chemistry, Condensation, Oxidation-general, ...6.0156

## Aero-space

### Lighting

- VISUAL LANDING AIDS FIELD ...Atmosphere Optical Phenomena, Detectors, Electric Lighting Systems, Fog-haze-mist, Infrared Radiation, ...4.0086
- NAVAL AIRCRAFT LIGHTING ...Aircraft, Colorimetry, Equipment-instruments, Standards, Specifications, ...8.0090

### Meteorological Conditions

- VISUAL RANGE METERS ...Distance-measuring-device, Fog-haze-mist, Guidance, Landing, Visibility, ...8.0072

### Space

- SECOND AND FOURTH ANNUAL EDWIN A. LINK LECTURES ...Lecture Grants, Oceanography-general, ...11.0019

## Africa

- MIGRATION OF ATLANTIC TUNAS ...Atlantic Ocean-general, Migration, Tags, Tuna, Mackerel, Albacore, ...5.0064

## Agglutination Tests

- IMMUNOLOGY AND SEROLOGY OF MARINE ANIMALS ...Biochemical Analysis, Blood Plasma and Serum, Immunology, Pathology, ...5.0977

## Aging

- AGING IN HYDROIDS ...Cell Injury and Autolysis, Developmental Physiology, Environmental Physiology, Hydra, Portuguese Man-of-war, Senescence, ...5.0597

## Agricultural Engineering

### Farm Structures & Design

#### Buildings

- PACIFIC BIOMEDICAL RESEARCH ...Mycobacterium Leprae, Pacific Ocean-general, Pharmacognosy, ...6.0112

## Air

- RESEARCH AND COMPUTATIONS ON THE THERMODYNAMIC PROPERTIES OF AIR AND RELATED GASES ...Critical, Free Energy, Hydrogen, Virial Coefficient, ...3.0014
- HELIUM - HEAT TRANSFER ...Diving and Scuba, Heat Transfer, Helium, Submersibles, Temperature Effects, ...8.0201

## SUBJECT INDEX

## Air Motion

### Advection

- DEVELOPMENT OF PHYSICAL-NUMERICAL MODELS FOR STUDIES OF THE ATMOSPHERE-OCEAN PLANETARY BOUNDARY LAYER ...Mixing, Simulation Theory, Thermal, Turbulence, Wind-water Interaction, ...3.0010

### Air Motion-general

- DYNAMIC STUDY OF THE TEMPORAL ...Meteorologic Model Studies, Satellites, Storms-general, Tropic, Tropical Cyclones, ...3.0051
- MESO AND CONVECTIVE SCALE SYSTEMS IN THE MARITIME TROPICAL ATMOSPHERE ...Convection, Heat Budget, Islands, Meteorologic Model Studies, Tropic, ...3.0062
- THREE-DIMENSIONAL GLOBAL CLIMATOLOGY ...Applied Climatology, General Movement, Patterns, Spectral Analysis, Tables, Compilations, Catalogs, ...3.0067

### Air Motion-other

- EXPERIMENTS IN AIR-SEA INTERACTION INVOLVING SURFACE PRESSURE MEASUREMENTS ...Pressure-density, Wind-other, Wind-water Interaction, ...3.0017

### Convection

- RESEARCH ON DYNAMICS OF LOW LATITUDE CIRCULATIONS ...Heat Exchange, Meteorological Studies, Patterns, Shear, Tropical Cyclones, ...3.0050
- ATMOSPHERIC CONDITIONS ASSOCIATED WITH CUMULUS CONVECTION ...Cumulus, Meteorologic Model Studies, Shear, Tropical Cyclones, Velocity, ...3.0045
- MESO AND CONVECTIVE SCALE SYSTEMS IN THE MARITIME TROPICAL ATMOSPHERE ...Air Motion-general, Heat Budget, Islands, Meteorologic Model Studies, Tropic, ...3.0062
- RESEARCH ON TURBULENT CONVECTION ...Forced Convection, Laboratory Analysis, Stratified, Turbulence, Turbulent, ...2.0058

### Diffusion

- HYDROSPHERE-ATMOSPHERE RADIOCHEMICAL MEASUREMENTS ...Carbon, Nuclear Explosions - Fallout, Particle-gas Transfer, Tracers, Velocity, ...3.0043
- STRUCTURE OF TURBULENCE ...Boundary Layer Studies, Turbulence, ...8.0075
- ARGONNE MICROMETEOROLOGICAL MODELING FACILITY PROPOSAL ...Meteorologic Model Studies, Micrometeorology, Public Health, Turbulence, Wind Tunnels, ...4.0071
- ANALYSIS OF THE MARINE LAYER - A MESO METEOROLOGICAL STUDY ...Air-sea Boundary-general, California, Heat Exchange, Orographic Effects, Turbulence, ...3.0001

### Patterns

- CLOUD PATTERNS RELATED TO SELECTED CIRCULATION SYSTEMS IN EASTERN PACIFIC ...Meteorological Studies, Photographic, Satellites, ...4.0138
- RESEARCH ON DYNAMICS OF LOW LATITUDE CIRCULATIONS ...Convection, Heat Exchange, Meteorological Studies, Shear, Tropical Cyclones, ...3.0059
- TROPOSPHERE METEOROLOGY IN THE TROPICAL ATLANTIC AREA ...Anticyclones-cyclones, Atlantic Ocean-general, Clouds-precipitation, Meteorological Studies, Tropic, ...3.0049
- APPLICATION OF METEOROLOGICAL SATELLITE SENSING TO GENERAL CIRCULATION MODELS ...Infrared Radiation, Meteorologic Model Studies, Particle-gas Transfer, Satellites, Thermodynamics, Weather Forecasting, ...4.0137
- EQUATORIAL CIRCULATIONS IN THE STRATOSPHERE ...Atmospheric Divisions, Mass Transport, Ocean-lakes, Tropic, ...3.0066
- WEATHER PROGRAM - STATION T-3 ...Arctic Ocean, Drift Stations, Energy Exchange Processes, Heat Budget, Physical Climatology, Weather Forecasting, ...3.0050
- LARGE-SCALE INERTIAL OCEAN-ATMOSPHERE RELATIONS: HIPS ...Air-sea Boundary-general, Greenland Sea, Jet

## SUBJECT INDEX

## Air Motion

Streams, Sea Ice, Sea of Okhotsk, Weather Forecasting, ...3.0024

PACIFIC OCEAN INFLUENCE UPON CALIFORNIA RAINFALL ...California, Forecasting, Pacific Ocean-general, Rain-other, Temperature, ...3.0057

THREE-DIMENSIONAL GLOBAL CLIMATOLOGY ...Air Motion-general, Applied Climatology, General Movement, Spectral Analysis, Tables, Compilations, Catalogs, ...3.0067

RELATION OF SATELLITE DATA TO LARGE SCALE ATMOSPHERIC CIRCULATION AND ENERGETICS ...Anticyclones-cyclones, General Movement, Radiation-general, Satellites, Weather Charts-maps, ...4.0143

MESOSCALE WIND SYSTEMS AROUND THE GREAT LAKES ...General Synoptic Observations, Lake Michigan, Land-sea Breezes, Meteorologic Model Studies, Pollution Behavior-general, ...3.0064

### Turbulence

DYNAMICS OF INTERNAL WAVES AND TURBULENCE IN THE THERMOCLINE ...Density, Salinity, Turbulent Flow, ...2.0093

DEVELOPMENT OF PHYSICAL-NUMERICAL MODELS FOR STUDIES OF THE ATMOSPHERE-OCEAN PLANETARY BOUNDARY LAYER ...Advection, Mixing, Simulation Theory, Thermal, Wind-water Interaction, ...3.0010

RESEARCH ON TURBULENT CONVECTION ...Convection, Forced Convection, Laboratory Analysis, Stratified, Turbulent, ...2.0058

ENERGY TRANSFER NEAR THE EARTH'S SURFACE ...Air Motion Instruments, Buoys, Heat and Radiation Transfer, Thermodynamics, ...3.0044

INTERACTIONS BETWEEN TURBULENCE, CLOUDS, SEA TEMPERATURE ...Data Analysis - General, Indian Ocean-general, Line Islands, Patterns, Temperature, ...3.0025

MARINE ATMOSPHERIC RESEARCH FACILITY ...Air-sea Boundary-general, Instrumental Services, Meteorological Studies, Platforms, Telemetry-other, Weather Modification-general, ...8.0322

WAVE GENERATION BY THE TURBULENT WIND FIELD OVER THE SEA ...Platforms, Pressure-density, Velocity, Waves, Wind-water Interaction, ...3.0008

TURBULENT PROCESSES AT AIR-SEA AND BOTTOM BOUNDARIES OF THE OCEAN ...Currents-bottom, Thermal, Waves, Wind-water Interaction, ...3.0033

TURBULENCE OVER WAVES ...Forecasting-prediction, Heat and Radiation Transfer, Heat Exchange, Meteorological Studies, Thermal, Waves, ...3.0027

HETERODYNE MEASUREMENTS OF ATMOSPHERIC PHASE TURBULENCE AT 6328 Å ...Heterodyne System, Other-design-and-construction, Phase, Transmission, ...8.0190

STRUCTURE OF TURBULENCE ...Boundary Layer Studies, Diffusion, ...8.0075

ATMOSPHERIC TURBULENCE FIELD STUDIES ...Air Motion Instruments, Air-sea Boundary-general, Boundary Layer Studies, Heat Exchange, Velocity, ...3.0020

ARGONNE MICROMETEOROLOGICAL MODELING FACILITY PROPOSAL ...Diffusion, Meteorologic Model Studies, Micrometeorology, Public Health, Wind Tunnels, ...4.0071

ANALYSIS OF THE MARINE LAYER - A MESO METEOROLOGICAL STUDY ...Air-sea Boundary-general, California, Diffusion, Heat Exchange, Orographic Effects, ...3.0001

### Vorticity

TROPICAL STORM INVESTIGATIONS IN THE ATLANTIC, CARIBBEAN, AND GULF OF MEXICO ...Meteorological Studies, Satellites, Tropic, Tropical Cyclones, Waves, ...3.0048

### Wind

#### Direction

LAKE EFFECT SNOWSTORM STUDY ...Great Lakes-general, Modification, Nucleation Physics, Orographic Effects, Patterns, ...3.0052

#### Land-sea Breezes

SEA BREEZE INVESTIGATION ...Data Analysis - General, Energy-general, Gulf of Mexico, Heat and Radiation Transfer, Texas, ...3.0040

MESO WIND PATTERNS IN THE CENTRAL CALIFORNIA VALLEY ...Atmospheric Pollution-general, California, Drift (pesticide), Herbicides -non-specific, Wind Erosion, ...3.0056

MESOSCALE WIND SYSTEMS AROUND THE GREAT LAKES ...General Synoptic Observations, Lake Michigan, Meteorologic Model Studies, Patterns, Pollution Behavior-general, ...3.0064

### Ocean-lakes

EQUATORIAL CIRCULATIONS IN THE STRATOSPHERE ...Atmospheric Divisions, Mass Transport, Patterns, Tropic, ...3.0066

STUDY ASSOCIATION BETWEEN TRADE WIND SYSTEM AND NORTH PACIFIC OCEANOGRAPHIC CLIMATE ...Hawaii, Meteorological Studies, Temperature, Waves, Wind-water Interaction, ...3.0019

SURVIVAL CRAFT DRIFT AND LEEWAY ...Air Motion Instruments, Buoys, Currents-ocean, Equipment, Operational Aspect, Tables, Compilations, Catalogs, ...6.0129

BARBADOS OCEANOGRAPHIC AND METEOROLOGICAL EXPERIMENT ...British West Indies, Depth, Salinity, Temperature, Wind-water Interaction, ...3.0015

### Orographic Effects

LAKE EFFECT SNOWSTORM STUDY ...Direction, Great Lakes-general, Modification, Nucleation Physics, Patterns, ...3.0052

ANALYSIS OF THE MARINE LAYER - A MESO METEOROLOGICAL STUDY ...Air-sea Boundary-general, California, Diffusion, Heat Exchange, Turbulence, ...3.0001

### Profiles

MARINE METEOROLOGY UNTENDED STATION DEVELOPMENT ...Air Motion Instruments, Automatic Stations, Buoys, Meteorological Studies, Platforms, ...8.0285

AIR-SEA INTERACTION PROCESS ...Boundary Layer Studies, Buoys, Circulation-general, Lakes, Wind-water Interaction, ...3.0028

AIR/SEA INTERACTION STUDY ...Convection, Mixing, Thermal, Thermocline, Waves, ...2.0114

OCEAN WAVES ...Model Studies, Temperature, Waves, Waves-internal, Wind-water Interaction, ...3.0004

DYNAMICS OF AIR-SEA INTERACTION ...Heat and Radiation Transfer, Meteorological Studies, Particle-gas Transfer, Surface Environments, Wind-water Interaction, ...3.0022

WAVE MEASUREMENT IN THE OPEN OCEAN ...Buoys, Data Acquisition, Oceanic - Pelagic, Water Motion Recorders, Waves, ...2.0109

WAVE GENERATION ...British West Indies, Shear, Towers, Waves, Wind-water Interaction, ...2.0103

### Shear

RESEARCH ON DYNAMICS OF LOW LATITUDE CIRCULATIONS ...Convection, Heat Exchange, Meteorological Studies, Patterns, Tropical Cyclones, ...3.0050

ATMOSPHERIC CONDITIONS ASSOCIATED WITH CUMULUS CONVECTION ...Convection, Cumulus, Meteorologic Model Studies, Tropical Cyclones, Velocity, ...3.0045

ATMOSPHERIC PROCESSES IN THE TROPICS ...Data Reduction and Analysis, Patterns, Statistics-general, Tropic, Tropical Cyclones, ...3.0059

(U) OCEAN CIRCULATION MODELS ...Circulation-general, Currents-ocean, Model Studies, Waves, Wind-water Interaction, ...2.0024

WAVE GENERATION ...British West Indies, Profiles, Towers, Waves, Wind-water Interaction, ...2.0103

GREAT LAKES RESEARCH - LAKE WAVES ...Great Lakes-general, Water Motion Recorders, Waves, Wind-water Interaction, ...2.0118

### Velocity

ATMOSPHERIC CONDITIONS ASSOCIATED WITH CUMULUS CONVECTION ...Convection, Cumulus, Meteorologic Model Studies, Shear, Tropical Cyclones, ...3.0045

UTILIZATION OF SYNCHRONOUS SATELLITE DATA ...Height - Ceiling, Patterns, Satellites, Technique Development, Weather Forecasting, ...4.0173

HYDROSPHERE-ATMOSPHERE RADIOCHEMICAL MEASUREMENTS ...Carbon, Diffusion, Nuclear Explosions - Fallout, Particle-gas Transfer, Tracers, ...3.0043

WHITECAPPING ...Meteorological Studies, Particle-gas Transfer, Temperature, Waves, Wind-water Interaction, ...2.0120

OCEAN WIND WAVE GENERATION AND DISSIPATION ...Buoys, General Synoptic Observations, North Sea, Waves, Wind-water Interaction, ...2.0105

## Air Motion

## SUBJECT INDEX

WAVE GENERATION BY THE TURBULENT WIND FIELD OVER THE SEA ...Platforms, Pressure-density, Turbulence, Waves, Wind-water Interaction, ...3.0008

ATMOSPHERIC TURBULENCE FIELD STUDIES ...Air Motion Instruments, Air-sea Boundary-general, Boundary Layer Studies, Heat Exchange, Turbulence, ...3.0020

MEASUREMENT AND PREDICTIVE STATISTICS OF REVERBERATION ...Acoustical, Geomorphology-topography, Reverberation, Scattering, Surface Environments, Textures-structures, ...1.0007

### Wind-general

PREDICTION OF EXTREME ENVIRONMENTAL FACTORS ...Forecasting-prediction, Meteorological Extremes, Statistics-general, Technique Development, Waves, ...4.0048

THE PROPAGATION OF ACOUSTIC WAVES IN THE STRATIFIED ATMOSPHERES ...Acoustics, Temperature, Transmission, Waves, ...1.0059

EASTERN BOUNDARY CURRENTS ...Mixing, Ocean Currents-other, Pressure-density, Wind-water Interaction, ...2.0026

THE NET EFFECT OF WIND ON RECREATIONAL TIDAL STREAMS IN FLORIDA ...Air-sea Boundary-other, Estuaries, Florida, Tides, Water Level Fluctuation, ...2.0082

OBJECTIVE WEATHER ANALYSIS ...Research - Development, Technique Development, Tropic, Weather Forecasting, ...4.0042

### Wind-other

EXPERIMENTS IN AIR-SEA INTERACTION INVOLVING SURFACE PRESSURE MEASUREMENTS ...Air Motion-other, Pressure-density, Wind-water Interaction, ...3.0017

## Air Motion Instruments

MARINE METEOROLOGY UNDATED STATION DEVELOPMENT ...Automatic Stations, Buoys, Meteorological Studies, Platforms, Profiles, ...8.0285

ENERGY TRANSFER NEAR THE EARTH'S SURFACE ...Buoys, Heat and Radiation Transfer, Thermodynamics, Turbulence, ...3.0044

ATMOSPHERIC TURBULENCE FIELD STUDIES ...Air-sea Boundary-general, Boundary Layer Studies, Heat Exchange, Turbulence, Velocity, ...3.0020

SURVIVAL CRAFT DRIFT AND LEEWAY ...Buoys, Currents-ocean, Equipment, Ocean-lakes, Operational Aspect, Tables, Compilations, Catalogs, ...6.0129

### Tracers

TRITIUM IN HURRICANES ...Aircraft, Heat and Radiation Transfer, Heat Exchange, Particle-gas Transfer, Tritium, Tropical Cyclones, ...3.0047

HYDROSPHERE-ATMOSPHERE RADIOCHEMICAL MEASUREMENTS ...Carbon, Diffusion, Nuclear Explosions - Fallout, Particle-gas Transfer, Velocity, ...3.0043

### Wind Tunnels

ARGONNE MICROMETEOROLOGICAL MODELING FACILITY PROPOSAL ...Diffusion, Meteorologic Model Studies, Micrometeorology, Public Health, Turbulence, ...4.0071

## Air Pollution-chemistry

COMPOSITION OF LEAD HALIDE POLLUTION AEROSOLS ...Activation Analysis, Aerosols, Air Pollution Sampling, Condensation, Oxidation-general, ...6.0156

## Air Temperature Instruments

NUMERICAL CODE CONVERTER ...Humidity Instruments, ...8.0078

## Air-earth Interface

### Boundary Layer Studies

AIR-SEA INTERACTION PROCESS ...Buoys, Circulation-general, Lakes, Profiles, Wind-water Interaction, ...3.0028

LINE ISLANDS EXPERIMENT ...General Synoptic Observations, Line Islands, Physical Climatology, Satellites, Wind-water Interaction, ...3.0063

ATMOSPHERIC-OCEANIC-GLACIOLOGIC INTERACTIONS IN THE ANTARCTIC ...Antarctica, Heat Budget, Heat Exchange, ...3.0009

STRUCTURE OF TURBULENCE ...Diffusion, Turbulence, ...8.0075

ATMOSPHERIC TURBULENCE FIELD STUDIES ...Air Motion Instruments, Air-sea Boundary-general, Heat Exchange, Turbulence, Velocity, ...3.0020

## Air-sea Boundary Studies

### Air-sea Boundary-general

DEVELOPMENT EXPERIMENTAL SYSTEM FOR AIR SEA INTERACTIONS ...British West Indies, Buoys, Meteorological Studies, ...4.0008

COMMITTEE ON OCEANOGRAPHY ...Committee-support, Marine Environments-general, Oceanography-general, Radioactivity-general, ...11.0016

AIR-SEA INTERACTION ...Currents-ocean, Gulf of Mexico, Thermal, Tropical Cyclones, Weather Forecasting, ...3.0042

OCEAN-ATMOSPHERE STUDIES WITH STABLE ISOTOPES AND DISSOLVED GASES ...Equilibrium - Chemical, Gases, Mixing, Oceanic Fronts, Particle-gas Transfer, Tracers, ...3.0005

LARGE-SCALE INERTIAL OCEAN-ATMOSPHERE RELATIONSHIPS ...Greenland Sea, Jet Streams, Patterns, Sea Ice, Sea of Okhotsk, Weather Forecasting, ...3.0024

EXCHANGE METEOROLOGIST WITH JAPANESE ANTARCTIC RESEARCH EXPEDITION ...Antarctic Ocean, General Synoptic Observations, Mixing, Radiosonde, Sea Ice, ...3.0017

SUPPORT OF TWO RESEARCH VESSELS ...General Sea Water Chemistry, Great Lakes-general, Marine Biology, Ships and Cruises, Water Properties-general, ...12.0034

TRANSPORT PROCESSES ACROSS AN AIR-WATER INTERFACE ...Model Studies, Statistics-general, Wind-water Interaction, ...3.0003

MARINE ATMOSPHERIC RESEARCH FACILITY ...Instrumental Services, Meteorological Studies, Platforms, Telemetry-other, Turbulence, Weather Modification-general, ...8.0322

THE OCCURRENCE AND EFFECTS OF PLANKTON IN THE SEA ...Marine Biology, Plankton (non-specific), ...5.0781

USE OF ON-LINE COMPUTERS FOR ENVIRONMENTAL RESEARCH ...Acoustical, Development of Models, Hybrid Computer Applications, Meteorological Studies, Water Motion, ...4.0081

AIR OCEANOGRAPHY ...Atlantic Ocean-north, Buoys, Gulf Stream, Satellites, Technique Development, ...4.0163

RADIANT ENERGY FLUX ACROSS THE AIR-SEA INTERFACE AND HEAT BUDGET OF THE OCEANS ...Forecasting-prediction, Heat and Radiation Transfer, Heat Exchange, Radiation-general, Thermal, ...3.0032

MARINE INTERFACE CHEMISTRY ...General Sea Water Chemistry, Organics, Sampling, ...1.0073

LARGE-SCALE INTERACTIONS ...Acoustical, Buoys, Pacific Ocean-north, Temperature, Thermal, ...3.0006

HYDRODYNAMIC EFFECTS OF SUBMERGED BODY ...Fluid Dynamics, Model Studies, Theoretical Analysis, Water Tunnels Tables, ...8.0179

MISCELLANEOUS SERVICES FOR FEDERAL AVIATION AGENCY (VISUAL RANGE) ...Distance-measuring-device, Fog-haze-mist, Visibility, ...3.0011

ATMOSPHERIC TURBULENCE FIELD STUDIES ...Air Motion Instruments, Boundary Layer Studies, Heat Exchange, Turbulence, Velocity, ...3.0020

OCEAN DYNAMICS - OCEANOGRAPHIC ANALYSES AND FORECASTING MODELS ...Acoustical, Hydrodynamics, Model Studies, Surface Environments, Temperature, ...1.0004

HISTORICAL CHARTS AND INTERPRETATION OF CHANGES IN SEA SURFACE TEMPERATURE IN THE NORTH PACIFIC OCEAN ...Atlases-maps, Circulation-general, Commercial Fishing, Pacific Ocean-north, Temperature, ...1.0179

ANALYSIS OF THE MARINE LAYER - A MESO METEOROLOGICAL STUDY ...California, Diffusion, Heat Exchange, Orographic Effects, Turbulence, ...3.0001

### Air-sea Boundary-other

THE NET EFFECT OF WIND ON RECREATIONAL TIDAL STREAMS IN FLORIDA ...Estuaries, Florida, Tides, Water Level Fluctuation, Wind-general, ...2.0082

**Heat and Radiation Transfer**

- TRITIUM IN HURRICANES ...Aircraft, Heat Exchange, Particle-gas Transfer, Tracers, Tritium, Tropical Cyclones, ...3.0047
- INFRARED RADIOMETRY FOR SURFACE HEAT FLOW ...Atmosphere Radiation, Heat Exchange, Infrared Radiation, Technique Development, Temperature, ...4.0153
- ARCTIC AIR, SEA AND ICE ...Arctic, Climatography, Heat Exchange, Micrometeorology, Sea Ice, Weather Forecasting, ...3.0088
- DELAY LINE COMPUTER ...Acoustical, Hybrid Computer Applications, Meteorological Studies, Model Studies, Water Motion, ...4.0080
- AIR-SEA INTERACTION ...Heat Exchange, Latent Heats, Temperature, ...3.0041
- HIGH FREQUENCY WAVES ...Forecasting-prediction, Hydrodynamics, Water Motion Recorders, Waves, ...2.0113
- PHYSICAL OCEANOGRAPHY ...Convection, Hawaii, Mixing, Thermal, Wind-water Interaction, ...3.0034
- THE CONTRIBUTION OF ADVECTION AND LOCAL HEATING TO THE MAINTENANCE OF THE THERMAL STRUCTURE IN THE NORTH PACIFIC OCEAN ...Circulation-general, Convection, Mixing, Pacific Ocean-north, Thermal, .. 1.0183
- RESEARCH IN AIR-ENERGY EXCHANGE ...Lasers and Masers, Optical, Thermal, Visible, ...3.0035
- ENERGY TRANSFER NEAR THE EARTH'S SURFACE ...Air Motion Instruments, Buoys, Thermodynamics, Turbulence, ...3.0044
- SEA BREEZE INVESTIGATION ...Data Analysis - General, Energy-general, Gulf of Mexico, Land-sea Breezes, Texas, ...3.0040
- CLIMATE CHANGE OVER THE POLAR OCEAN ...Arctic Ocean, Heat Budget, Numerical Analysis-other, Physical Climatology, ...3.0058
- DEVELOPMENT OF A SIMPLE UNATTENDED PYCNOCLINE FOLLOWER ...Density, Hawaii, Wind-water Interaction, ...8.0091
- DYNAMICS OF AIR-SEA INTERACTION ...Meteorological Studies, Particle-gas Transfer, Profiles, Surface Environments, Wind-water Interaction, ...3.0022
- TOTAL HEAT FLUX MEASUREMENT WITH A TWO-WAVELENGTH RADIOMETER ...Atmosphere Radiation, Meteorological Studies, ...3.0007
- AIR-SEA INTERACTION ...Forecasting-prediction, Meteorological Studies, Thermal, Wind-water Interaction, ...3.0023
- HEAT AND MOMENTUM EXCHANGE PROCESSES BETWEEN THE OCEAN AND THE ATMOSPHERE ...General Synoptic Observations, Meteorological Studies, Oregon, Pacific Ocean-east, Wind-water Interaction, ...3.0038
- AIR-SEA INTERACTION (WAVES) ...British West Indies, Forecasting-prediction, Surface Environments, Waves, Wind-water Interaction, ...3.0016
- EXPERIMENTAL HYDRODYNAMICS ...Fluid Dynamics, Hydrodynamics, Simulation Theory, Submersibles, Thermocline, ...8.0192
- DISTRIBUTIONS OF CURRENTS AND PHYSICAL PROPERTIES WITHIN THE ARCTIC OCEAN ...Acoustical, Arctic Ocean, Currents-ocean, Sea Ice, Temperature, ...4.0051
- AIR-SEA EXCHANGE ...Albedo, Infrared Radiation, Massachusetts, Temperature, Towers, ...3.0026
- MEDITERRANEAN OCEANOGRAPHY ...Convection, Data Analysis - General, Mediterranean Sea-general, Ships and Cruises, Surface Environments, ...4.0132
- RADIANT ENERGY FLUX ACROSS THE AIR-SEA INTERFACE AND HEAT BUDGET OF THE OCEANS ...Air-sea Boundary-general, Forecasting-prediction, Heat Exchange, Radiation-general, Thermal, ...3.0032
- TURBULENCE OVER WAVES ...Forecasting-prediction, Heat Exchange, Meteorological Studies, Thermal, Turbulence, Waves, ...3.0027
- LARGE-SCALE ATMOSPHERIC EVOLUTION ...Heat Budget, Heat Exchange, Meteorologic Model Studies, Meteorological Studies, Weather Forecasting, ...4.0043
- SEA-AIR INTERACTION RESEARCH ...Acoustical, Hydrodynamics, Salinity, Waves, ...3.0039
- ARCTIC UNDERSEAS RESEARCH, JOINT USA-CANADIAN HEAT BUDGET STUDY ...Arctic, Instrumentation-general, Physical Climatology, Sea Ice, ...3.0071

GREAT LAKES RESEARCH - ENERGY TRANSFER AT THE AIR-WATER INTERFACE ...Data Analysis - General, Heat-transfer-other, Lake Michigan, Mass Transfer, Towers, Wind-water Interaction, ...3.0029

INVESTIGATE SEASONAL VARIATIONS, SURFACE WATER TYPES, HAWAIIAN AREA (KOKO HEAD) ...Commercial Fishing, Hawaii, Oceanic Fronts, Salinity, Temperature, Tuna, Mackerel, Albacore... Water Salinity, Water Temperature-non-specific, ...1.0148

**Particle-gas Transfer**

- TRITIUM IN HURRICANES ...Aircraft, Heat and Radiation Transfer, Heat Exchange, Tracers, Tritium, Tropical Cyclones, ...3.0047
- APPLICATION OF METEOROLOGICAL SATELLITE SENSING TO GENERAL CIRCULATION MODELS ...Infrared Radiation, Meteorologic Model Studies, Patterns, Satellites, Thermodynamics, Weather Forecasting, ...4.0137
- AN INVESTIGATION OF TRITIUM IN RAIN WATER ...Atmosphere Composition, Humidity, Precipitation-other, Rain-other, Tritium, ...1.0130
- HYDROSPHERE-ATMOSPHERE RADIOCHEMICAL MEASUREMENTS ...Carbon, Diffusion, Nuclear Explosions - Fallout, Tracers, Velocity, ...3.0043
- WHITECAPPING ...Meteorological Studies, Temperature, Velocity, Waves, Wind-water Interaction, ...2.0120
- LIGHT ISOTOPE STUDIES ...Chemical Reactions, Circulation-general, Deuterium, Isotope Tracer-other, Mixing, Oxygen, ...1.0077
- FLUXES OF DISSOLVED GASES AND NUTRIENTS RELATING TO BIOCHEMICAL AND AERATION PROCESSES OFF THE OREGON COAST ...Chemical Analysis (water), Gases, Oregon, Organics, Phosphate, Phosphite, ...3.0037
- OCEAN-ATMOSPHERE STUDIES WITH STABLE ISOTOPES AND DISSOLVED GASES ...Air-sea Boundary-general, Equilibrium - Chemical, Gases, Mixing, Oceanic Fronts, Tracers, ...3.0005
- MASS SPECTROMETRIC AND MANOMETRIC STUDIES OF THE OCEANS AND THE ATMOSPHERE ...Chemical Analysis (water), Gases, Mass Spectroscopy, Ocean History, Solubility, ...1.0101
- STUDIES IN THE INDIAN OCEAN ...Circulation-general, Data Analysis - General, Indian Ocean-general, Storms-general, ...2.0073
- STUDY OF THE EXCHANGE OF CARBON DIOXIDE BETWEEN THE ATMOSPHERE AND THE OCEANS ...Carbon, Computer Applications, Gases, Meteorological Studies, ...1.0081
- TRITIUM IN HURRICANES ...Air Pollution Sampling, Atlantic Ocean-general, Sampling, Tritium, Tropical Cyclones, ...3.0018
- DYNAMICS OF AIR-SEA INTERACTION ...Heat and Radiation Transfer, Meteorological Studies, Profiles, Surface Environments, Wind-water Interaction, ...3.0022
- PRECISION MEASUREMENTS OF DISSOLVED OXYGEN, NITROGEN AND ARGON IN SEAWATER ...Argon, Gases, Nitrogen, Oxygen, Solubility, Special Mission Ships, ...1.0092
- PHYSICAL CHEMISTRY OF BUBBLES ...Bubble, Diffusion, Interface, Surface Energy, ...1.0082
- STUDIES IN MARINE CHEMISTRY ...Bone, Chemistry, Trace Elements, ...7.0068
- EVAPORATION OF WATER ...Evaporation, Humidity, Humidity Instruments, ...3.0012
- FALLOUT INVENTORY OF THE OCEANS AND RELATED MECHANISMS ...Activation Analysis, Radioactivity, Radioactivity-general, Trace Elements, ...6.0189

**Wind-water Interaction**

- DEVELOPMENT OF PHYSICAL-NUMERICAL MODELS FOR STUDIES OF THE ATMOSPHERE-OCEAN PLANETARY BOUNDARY LAYER ...Advection, Mixing, Simulation Theory, Thermal, Turbulence, ...3.0010
- AIR-SEA INTERACTION PROCESS ...Boundary Layer Studies, Buoys, Circulation-general, Lakes, Profiles, ...3.0028
- AMBIENT SEA NOISE INVESTIGATION ...Acoustic, Acoustical, Computer Applications, Noise, Waves, ...1.0048
- HIGH FREQUENCY OCEAN WAVES ...Aircraft, Forecasting-prediction, Photogrammetry, Radar, Waves, ...2.0121
- WHITECAPPING ...Meteorological Studies, Particle-gas Transfer, Temperature, Velocity, Waves, ...2.0120

## Air-sea Boundary Studies

## SUBJECT INDEX

PHYSICAL OCEANOGRAPHY ...Convection, Hawaii, Heat and Radiation Transfer, Mixing, Thermal, ...3.0034

OCEAN WAVES ...Model Studies, Profiles, Temperature, Waves, Waves-internal, ...3.0004

DESCRIPTIVE OCEANOGRAPHY ...Circulation-general, Currents-ocean, Data Analysis - General, Pacific Ocean-east, ...4.0116

A STUDY OF PROBLEMS RELATED TO WIND-GENERATED WAVES ...Free Surface Waves, Laminar - Turbulent, Theoretical Analysis, Waves, ...4.0088

WAVE, CURRENT AND STORM SURGE RESPONSE TO EXTREME WIND CONDITIONS ...Currents-ocean, Forecasting-prediction, Model Studies, Storms-general, Waves, ...2.0107

EXPERIMENTAL FLUID DYNAMICS ...Laminar - Turbulent, Model Studies, Rotating Fluids, Shear-flow, Thermodynamics, ...3.0021

EXPERIMENTS IN AIR-SEA INTERACTION INVOLVING SURFACE PRESSURE MEASUREMENTS ...Air Motion-other, Pressure-density, Wind-other, ...3.0017

DEVELOPMENT OF A SIMPLE UNATTENDED PYCNOCLINE FOLLOWER ...Density, Hawaii, Heat and Radiation Transfer, ...8.0091

CIRCULATION AROUND OCEANIC ISLANDS ...Circulation-general, Density, Islands, Mixing, Thermodynamics, Waves-internal, ...2.0010

OPTICAL OCEANOGRAPHY IN FLORIDA BAY, FLORIDA STRAITS AND BAHAMA BANK ...Distribution, Mixing, Optical, Optical Devices, Sedimentation, ...1.0163

EXPERIMENTAL STUDY OF THE INTERRELATIONS BETWEEN WIND-WAVE PROPERTIES ...Hydrodynamics, Mixing, Pressure, Turbulence - Sea Water, Waves, ...2.0123

RESEARCH IN OCEANIC PHYSICS ...Atlantic Ocean-south, Convection, Mixing, Oceanic Fronts, Thermodynamics, ...2.0039

LINE ISLANDS EXPERIMENT ...Boundary Layer Studies, General Synoptic Observations, Line Islands, Physical Climatology, Satellites, ...3.0063

DYNAMICS OF AIR-SEA INTERACTION ...Heat and Radiation Transfer, Meteorological Studies, Particle-gas Transfer, Profiles, Surface Environments, ...3.0022

TRANSPORT PROCESSES ACROSS AN AIR-WATER INTERFACE ...Air-sea Boundary-general, Model Studies, Statistics-general, ...3.0003

THEORY OF LARGE-SCALE ATMOSPHERIC AND OCEANIC PROCESSES ...Circulation-general, Currents-ocean, Model Studies, Tropic, Weather Forecasting, ...2.0070

(U) OCEAN CIRCULATION MODELS ...Circulation-general, Currents-ocean, Model Studies, Shear, Waves, ...2.0024

AIR-SEA INTERACTION ...Forecasting-prediction, Heat and Radiation Transfer, Meteorological Studies, Thermal, ...3.0023

HEAT AND MOMENTUM EXCHANGE PROCESSES BETWEEN THE OCEAN AND THE ATMOSPHERE ...General Synoptic Observations, Heat and Radiation Transfer, Meteorological Studies, Oregon, Pacific Ocean-east, ...3.0038

OCEAN WIND WAVE GENERATION AND DISSIPATION ...Boys, General Synoptic Observations, North Sea, Velocity, Waves, ...2.0105

WAVE GENERATION BY THE TURBULENT WIND FIELD OVER THE SEA ...Platforms, Pressure-density, Turbulence, Velocity, Waves, ...3.0008

AIR-SEA INTERACTION (WAVES) ...British West Indies, Forecasting-prediction, Heat and Radiation Transfer, Surface Environments, Waves, ...3.0016

TURBULENT PROCESSES AT AIR-SEA AND BOTTOM BOUNDARIES OF THE OCEAN ...Currents-bottom, Thermal, Turbulence, Waves, ...3.0033

DESCRIPTIVE OCEANOGRAPHY/PACIFIC ...Buoys, Circulation-general, Currents-ocean, Pacific Ocean-east, ...2.0009

EASTERN BOUNDARY CURRENTS ...Mixing, Ocean Currents-other, Pressure-density, Wind-general, ...2.0026

RESIDENCE TIMES OF WATERS BEHIND BARRIER ISLANDS ...Bays, Circulation-general, Simulation Theory, Tides, ...2.0018

VERTICAL CURRENT STRUCTURE IN THE GREAT LAKES ...Circulation-general, Great Lakes-general, Temperature, ...2.0033

WAVE GENERATION ...British West Indies, Profiles, Shear, Towers, Waves, ...2.0103

OCEAN DYNAMICS SEA AIR INTERACTION MODELS-MEDITERRANEAN ...Acoustical, Hydrodynamics, Mediterranean Sea-general, Model Studies, Surface Environments, ...3.0002

GREAT LAKES RESEARCH - ENERGY TRANSFER AT THE AIR-WATER INTERFACE ...Data Analysis - General, Heat and Radiation Transfer, Heat-transfer-other, Lake Michigan, Mass Transfer, Towers, ...3.0029

GREAT LAKES RESEARCH - LAKE WAVES ...Great Lakes-general, Shear, Water Motion Recorders, Waves, ...2.0118

GREAT LAKES RESEARCH - HARBOR CURRENTS ...Great Lakes-general, Harbors, Model Studies, Ocean Currents-other, Pressure-density, Water Level Fluctuation, ...2.0074

STUDY ASSOCIATION BETWEEN TRADE WIND SYSTEM AND NORTH PACIFIC OCEANOGRAPHIC CLIMATE ...Hawaii, Meteorological Studies, Ocean-lakes, Temperature, Waves, ...3.0019

BARBADOS OCEANOGRAPHIC AND METEOROLOGICAL EXPERIMENT ...British West Indies, Depth, Ocean-lakes, Salinity, Temperature, ...3.0015

## Aircraft

WATER-TO-AIR RETRIEVAL ...Mathematical Models, Recovery Operations, Suspension-release, ...8.0276

NAVAL AIRCRAFT LIGHTING ...Colorimetry, Equipment-instruments, Lighting, Standards, Specifications, ...8.0080

AUTOMATED FLOW SYSTEM CALIBRATION ...Controls, Digital Computer Applications, Fluids, Transducers, ...8.0071

## Airfield and Space Operations

### Equipment-instruments

NAVAL AIRCRAFT LIGHTING ...Aircraft, Colorimetry, Lighting, Standards, Specifications, ...8.0080

### Guidance

VISUAL RANGE METERS ...Distance-measuring-device, Fog-haze-mist, Landing, Meteorological Conditions, Visibility, ...8.0072

### Landing

VISUAL RANGE METERS ...Distance-measuring-device, Fog-haze-mist, Guidance, Meteorological Conditions, Visibility, ...8.0072

## Alabama

STOCKING AND SURVIVAL OF STRIPED BASS FINGERLINGS ...Basses -sea,white, White Perch, Commercial Fishing, Maturity & Growth Stages, Stocking of Fish & Shellfish, Streams, ...5.0001

A SEDIMENTOLOGIC STUDY OF MOBILE BAY AND PERDIDO BAY ...Bays, Distribution, Ocean History, Rate of Deposition, Stratigraphy-general, ...7.0231

## Alaska

SUBMARINE GEOLOGY OF GASTINEAU CHANNEL JUNEAU, ALASKA ...Basins, Distribution, Seismic Studies, Size, Subbottom, ...7.0191

STUDY OF RELATIONSHIP BETWEEN EARTHQUAKES AND TECTONIC MOVEMENTS IN ALASKAN FAULT ZONE ...Crustal Fracturing, Deformation, Earthquakes, Fault Complexes, Forecasting-prediction, ...7.0139

MARINE BIOLOGY IN ALASKA ...Amino Acids -non-specific, Polar, Porifera, Trenches, ...5.0854

A SYMPOSIUM ENTITLED ORGANIC CHEMISTRY OF NATURAL WATERS ...Chemical-general, Meetings, Organic, Organic Matter, Organic-general, Organics, Organics-general, Polar, Sediments, Water Analysis, Water Chemistry, ...11.0001

RESEARCH-TRAINING COURSE IN OCEANOGRAPHY IN SOUTHEAST ALASKA ...Oceanography-general, Teaching and Research, ...12.0001

AN APPROACH TO MARINE RESOURCE DEVELOPMENT IN ALASKA ...Marine Biology (non-specific), Planning, ...7.0001

ARCTIC RESEARCH LABORATORY ...Acoustical, Arctic Ocean, Drift Stations, Seismic Studies, Terrain Analysis, ...12.0003

SUBJECT INDEX

Alaska

- DRIFT-STATION BIOLOGY ...Animal Taxonomy, Arctic Ocean, Oceanic Fronts, Productivity - Food Chain, Sea Ice, ...5.0743
- FIORD OCEANOGRAPHY ...Estuaries, Fjords, Hydrodynamics, Model Studies, Simulation Theory, ...4.0040
- SEA OTTER ...Metamorphosis, Population Dynamics, Range Or Territorial Distr. , Sea Lions, Fur Seals, Stocking of Mammals, ...5.0528
- SEAL BIOLOGY AND HARVEST ...Environmental Ecology, Interbiotic Relat.(non-specif), Life History Studies, Reproduction Studies (general), Seals, ...5.0522
- ECOLOGICAL STUDIES OF THE COPPER RIVER DELTA ...Censusing, Maps-general, Spawning & Nesting Sites, Waterfowl -non-specific, ...5.0855
- POPULATION STUDIES OF ANADROMOUS FISH - UPPER COOK INLET DRAINAGES ...Captive Rearing, Censusing, Population Dynamics, Salmon -coho,chinook,sockeye..., Streams, ...5.0020
- SILVER SALMON STUDIES IN THE RESURRECTION BAY AREA ...Aquatic Ecology, Bays, Environmental Ecology, Management -other, Salmon -coho,chinook,sockeye..., ...5.0189
- INVESTIGATION OF ANADROMOUS DOLLY VARDEN POPULATIONS IN HOOD BAY DRAINAGES, SOUTHEASTERN ALASKA ...Lake Trout, Brood: Trout, Migration, Population Dynamics, Streams, ...5.0013
- FISH POPULATIONS IN THE CHENA RIVER ...Pikes, Pickerel, Muskellunge, Population Dynamics, Salmon & Trout - Non-specific, Streams, ...5.0029
- EXPANSION OF CURRENT AND DEVELOPMENT OF ADDITIONAL COMMERCIAL FISHERIES CATCH, PRODUCTION AND GEAR STATISTICS ...Censusing, Commercial Fishing, Fish -non-specific, Fish -other, Reliability Theory, ...5.0018
- PRE-EMERGENT FRY PINK SALMON FORECAST - SOUTHEASTERN ALASKA ...Aquatic Ecology, Censusing, Number Or Density, Salmon -coho,chinook,sockeye..., Spawning & Nesting Sites, ...5.0019
- KVICHAK RIVER TOTAL SMOLT ...Censusing, Fish -non-specific, Migration, Mortality Rates, Nets, Population Dynamics, ...5.0002
- KING CRAB SAMPLING GEAR STUDY ...Censusing, Crabs, Fishing Gear, Population Dynamics, Spawning & Nesting Sites, ...8.0113
- DUNGENESS CRAB POPULATION DYNAMICS STUDY ...Crabs, Life History Studies, Population Dynamics, Tags, ...5.0346
- INVESTIGATION OF SPAWNING GROUND POTENTIALS AND GROWTH AND SURVIVAL OF JUVENILE SOCKEYE SALMON IN FRAZER LAKE SYSTEM ...Censusing, Lakes, Nets, Salmon -coho,chinook,sockeye..., Spawning & Nesting Sites, Tags, ...5.0190
- MONITORING THE EFFECTS OF LAND USE ON SALMON PRODUCTION ...Environmental Ecology, Land Use, Pulp, Paper , and Logging, Salmon & Trout - Non-specific, Streams, ...5.0192
- INVESTIGATION OF ECOLOGICAL FACTORS LIMITING PRODUCTION OF THE ALASKAN PANDALID SHRIMP ...Commercial Fishing, Life History Studies, Nets, Shrimps - Common, Vertical Distribution, ...5.0345
- COOK INLET ESCAPEMENT ENUMERATION STUDY ...Censusing, Migration, Organism Sampling Devices, Salmon -coho,chinook,sockeye..., Sonar, Sonar and Echo Sounding, ...8.0112
- IDENTIFICATION OF RED SALMON STOCKS TAKEN IN THE CAPE KUMLIK-ANIACHAK BAY FISHERY (CHIGNIK AREA) ...Commercial Fishing, Salmon -coho,chinook,sockeye..., Spawning & Nesting Sites, Streams, Tags, ...5.0021
- ARCTIC-YUKON-KUSKOKWIM AREA ANADROMOUS FISH INVESTIGATIONS ...Commercial Fishing, Life History Studies, Population Dynamics, Salmon & Trout - Non-specific, Salmon -coho,chinook,sockeye..., ...5.0024
- RESTORATION AND REHABILITATION OF EARTHQUAKE DAMAGED PINK AND CHUM SALMON STUDIES IN PRINCE WILLIAM SOUND ...Earthquakes, Flow Characteristics -water, Salmon -coho,chinook,sockeye..., Spawning & Nesting Sites, Stream Rehabilitation, Tectonics-general, ...5.0191
- BRISTOL BAY INTERMEDIATE HIGH SEAS-INSHORE TEST FISHING ...Age, Bays, Commercial Fishing, Salmon -coho,chinook,sockeye..., ...5.0022
- SOCKEYE SALMON MIGRATORY BEHAVIOR AND BIOLOGICAL STATISTICS COLLECTION, SOUTHEASTERN ALASKA ...Behavioral Ecology, Censusing, Migration, Salmon -coho,chinook,sockeye..., Streams, ...5.0027
- OFFSHORE SALMON ABUNDANCE INDEX ...Commercial Fishing, Number Or Density, Salmon -coho,chinook,sockeye..., Streams, ...5.0028
- COPPER RIVER SOCKEYE SALMON INVESTIGATIONS ...Aquatic Ecology, Biological Rhythms, Migration, Population Dynamics, Salmon -coho,chinook,sockeye..., Stocking of Fish & Shellfish, ...5.0025
- COPPER RIVER SOCKEYE SALMON INVESTIGATIONS ...Commercial Fishing, Migration, Nets, Salmon -coho,chinook,sockeye..., Streams, ...5.0026
- BRISTOL BAY OFFSHORE TEST FISHING PROGRAM ...Age, Bays, Commercial Fishing, Nets, Salmon -coho,chinook,sockeye..., ...5.0023
- SOCKEYE SALMON MIGRATORY BEHAVIOR AND BIOLOGICAL STATISTICS COLLECTION, SOUTHEASTERN ALASKA ...Aquatic Ecology, Behavioral Ecology, Censusing, Migration, Salmon -coho,chinook,sockeye..., ...5.0016
- PRE-EMERGENT FRY PINK SALMON FORECAST (KODIAK, ALASKA) ...Maturity & Growth Stages, Number Or Density, Salmon -coho,chinook,sockeye..., Spawning & Nesting Sites, Streams, ...5.0017
- KVICHAK RIVER SMOLT STUDY LITERATURE SURVEY ...Censusing, Fish -non-specific, Migration, Number Or Density, Survey Studies, ...5.0003
- KODIAK KING CRAB ENVIRONMENTAL ZONE SURVEY ...Continental Shelf, Environmental Ecology, Horseshoe Or King Crabs, Reproductive System, ...5.0348
- COOK INLET CATCH AND ESCAPEMENT AGE AND SEX COMPOSITION STUDIES ...Age, Migration, Nets, Salmon -coho,chinook,sockeye..., Sex -non-specific, Spawning & Nesting Sites, ...5.0014
- COOK INLET SMOLT ENUMERATION STUDY ...Censusing, Productivity (agricultural), Salmon -coho,chinook,sockeye..., Spawning & Nesting Sites, ...5.0015
- INTERSTITIAL WATER OF GLACIAL-MARINE SEDIMENT ...Estuaries, Glacial Clastics, Interstitial - Connate Water, Water, Water Supply-general, ...7.0188
- FORECAST OF KODIAK ISLAND PINK SALMON RUNS FROM ABUNDANCE OF JUVENILES IN ESTUARIES ...Estuaries, Fishing Gear, Maturity & Growth Stages, Migration, Number Or Density, Salmon -coho,chinook,sockeye..., ...5.0179
- STUDIES OF SOCKEYE SALMON, ONCORHYNCHUS NERKA, IN THE NUSHAGAK DISTRICT, ALASKA ...Commercial Fishing, Interbiotic Relat.(non-specif), Lakes, Population Dynamics, Salmon -coho,chinook,sockeye..., Spawning & Nesting Sites, ...5.0228
- ECOLOGY OF EELGRASS ...Bering Sea, Food Webs, Phytoplankton, Potamogeton, Ruppia, Zostera..., Primary Productivity, ...5.0677
- DEVELOPMENT OF WIRE-LINE CORING TECHNIQUE FOR SAMPLING UNCONSOLIDATED DEPOSITS ...Bottom Sampling Device, Coring and Dredging, Mechanical Properties, Mineralogy, Technique Development, ...8.0249
- PRELIMINARY STUDIES TO CORRELATE SELECTED MINERALOGIC AND GEOLOGIC PROPERTIES WITH ENGINEERING PROPERTIES ...Engineering Geology, Mineralogy, Petrology, Ships and Cruises, Trace Element Analysis, ...8.0169
- BRISTOL BAY ESTUARINE ECOLOGY ...Estuaries, Fishing Gear, Life History Studies, Migration, Oceanic Fronts, Salmon -coho,chinook,sockeye..., ...5.0004
- NAKNEK SYSTEM RED SALMON STUDIES ...Growth Rate, Migration, Number Or Density, Salmon -coho,chinook,sockeye..., Streams, ...5.0005
- MARINE BIOLOGICAL INVESTIGATIONS - TAXONOMIC COLLECTION OF THE FRESH AND SALTWATER FISHES OF ALASKA ...Animal Taxonomy, Collections, Fish -non-specific, Fresh Water, ...5.0008
- MARINE BIOLOGICAL INVESTIGATIONS - NEKTON OF INSIDE WATERS OF SOUTHEASTERN ALASKA ...Plankton Sampling, Population Dynamics, Temporal Distribution, Zooplankton, ...5.0521
- MARINE BIOLOGICAL INVESTIGATIONS - ANALYSIS OF HERRING FISHERY DATA ...Age, Alewife, menhaden,shad,herring, Data Analysis - General, Dispersion -other, ...5.0010

- COASTAL AND INSHORE OCEANOGRAPHY ...Estuaries, Marine Biology, Shoreline - Coastline, Water Analysis-general, Water Properties-general, ...5.0851
- PINK SALMON INVESTIGATIONS - INTERTIDAL ECOLOGY ...Life History Studies, Salmon -coho, chinook, sockeye... Spawning & Nesting Sites, Tidal Streams, Water Salinity, ...5.0186
- PINK SALMON INVESTIGATIONS - FRESHWATER ECOLOGY ...Aquatic Ecology, Salmon -coho, chinook, sockeye... Spawning & Nesting Sites, Streams, Water Properties-general, ...5.0185
- MARINE BIOLOGICAL INVESTIGATIONS STUDIES PROJECT (FISHES) ...Aquatic Ecology, Bays, Fish -non-specific, Population Dynamics, ...5.0011
- MARINE BIOLOGICAL INVESTIGATIONS - SURFACE ZOOPLANKTON PROJECT ...Number Or Density, Plankton Sampling, Vertical Distribution, Zooplankton, ...5.0737
- TECHNICAL ASSISTANCE TO INDUSTRY ...Commercial Fishing, Diffusion of Information, Fishing Gear, General Information Services, ...5.0031
- OCEAN ENGINEERING ...Commercial Fishing, Design, Machinery, Equipment, Fishing Gear, Shrimp, ...5.0349
- ADULT SHRIMP STUDIES ...Bays, Biological Rhythms, Habitat Studies, Life History Studies, Shrimps - Common, ...5.0340
- ESTUARINE STUDIES OF SOUTHEASTERN ALASKA ...Benthic Fauna, Environmental Ecology, Estuaries, Number Or Density, Vertical Distribution, ...5.0852
- PINK SALMON INVESTIGATIONS - EARLY SEA LIFE OF SALMON ...Environmental Physiology, Life History Studies, Parasitology -other, Water Temperature-non-specific, ...5.0187
- RELATIONSHIP BETWEEN GLACIAL FLOUR POLLUTION AND POLLUTANTS FROM OTHER SOURCES ...Adsorption, Adsorption Capacity, Estuaries, Glacial Clastics, Pollution - Effects of , Pulp, Paper , and Logging, Size, ...6.0134
- ORGANISMS RESPONSIBLE FOR TOXICITY OF ALASKAN CLAMS ...Biological Pollutants -general, Clams, Food Spoilage Detection, Microbiological, Pollutants-general, ...5.0344

## Algae- Blue-green

### Aphanizomenon

- CHEMISTRY OF ALGAL TOXINS ...Algal Toxins, Bioassays, Biochemical Analysis, Gymnodinium, Microbiological Analysis, ...5.0709

### Cyanophyta (non-specific & Ot)

- NUTRIENT REQUIREMENTS OF ALGAE ...Algal Culture, Nitrate, Nitrite, Nutrition Studies, Phosphate, Phosphite, ...5.0706

## Algae- Brown

### Fucus

- DEVELOPMENT OF POLARITY IN THE FUCACEAN ZYGOTE ...Cellular Physiology, Differentiation Mechanism, Plant Developmental Biology, Polarity, Reproductive Physiology, ...5.0972

- DETERMINATION OF THOSE MARINE SPECIES HAVING THE GREATEST KNOWN POTENTIAL FOR THE COMMERCIAL FISHERY ...Ag Uses of Nat. resource-other, Alginates, Commercial Fishing, Food Supply, Phaeophyta (non-specific & Ot), ...5.0098

### Kelps

#### Laminariaceae (non-specif.&ot)

- ENVIRONMENTAL EFFECTS ON THE METABOLISM OF MARINE ALGAE ...Enzymes , Glycolic Acid, Light, Marine Plants, Phytoplankton, Responses to Growth, ...5.0702

- RESTORATION, PROPAGATION, AND MANAGEMENT OF MARINE ALGAE ...Applied Ecology, Growth and Differentiation, Habitat Studies, Marine Plants, Pacific Ocean-east, ...5.0680

- FILM PROJECT (KELP FORESTS) ...California, Cinematography, Fishery Development -other, Habitat Studies, ...5.0678

- ECOLOGY OF THE KELP FORESTS ...Behavioral Ecology, California, Environmental Ecology, Fish -non-specific, Habitat Studies, ...5.0194

## Phaeophyta (non-specific & Ot)

- EFFECTS OF DEPTH ON GROWTH AND REPRODUCTION OF BENTHIC MARINE ALGAE ...Algal Culture, Depth, Growth and Differentiation, Reproductive Physiology, Rhodophyta (non-specific & Ot), ...5.0684

- STUDIES OF THE PHAEOPHYCEAN ORDERS CHORDARIALES AND PUNCTARIALES ...Algal Culture, Atlantic Ocean-north, Range Or Territorial Distr. , Temporal Distribution, ...5.0715

- ALGAL SUBSTANCES IN THE MARINE FOOD WEB ...Food Chains, Food Webs, Humic Acid, Marine Plants, Phenols, Secretions and Products, ...5.0725

- DETERMINATION OF THOSE MARINE SPECIES HAVING THE GREATEST KNOWN POTENTIAL FOR THE COMMERCIAL FISHERY ...Ag Uses of Nat. resource-other, Alginates, Commercial Fishing, Food Supply, Fucus, ...5.0098

- PRIMARY PRODUCTION AND DECOMPOSITION IN ESTUARINE WATER ...Estuaries, Florida, Methane Bacteria (non-specif.), Primary Productivity, Rhodophyta (non-specific & Ot), Turnover (metabolic), ...5.0954

- PHYTOCHEMISTRY OF NARCOTIC PRINCIPLES IN CAULERPA. ...Caulerpa, Caulerpin, Rhodophyta (non-specific & Ot), Sterols, ...6.0111

## Sargassum

- RELATIONSHIPS BETWEEN PHYTOPLANKTON AND ZOOPLANKTON IN THE CARIBBEAN SEA ...Caribbean Sea, Interbiotic Relat.(non-specif), Phytoplankton, Vertical Distribution, Zooplankton, ...5.0779

## Algae- Cryptophyceae

### Zooxanthella

- SYMBIOSIS BETWEEN MARINE ALGAE AND INVERTEBRATES ...Gastropods -slugs, conch, snails, Photosynthetically Active, Symbiosis, ...5.0730

- SYMBIOSIS OF TROPICAL ZOANTHIDEA AND ZOOXANTHELLAE ...Anthozoa, Messenger RNA , Metabolism, Symbiosis, Tropic, ...5.0642

- FORMATION AND UTILIZATION OF TERPENES ...Anthozoa, Biosynthesis, Enzyme-substrate, Symbiosis, Terpenes, ...5.0957

## Algae- Diatoms

- MORPHOGENESIS OF THE DIATOM SHELL ...Cellular Membranes (non-spec.), Plant Developmental Biology, Silica, Structural Functions, ...5.0734

- MORPHOGENESIS OF THE DIATOM SHELL ...Cellular Membranes (non-spec.), Intracellular Localization, Organelle & Membrane Formation, Plant Developmental Biology, Silica, ...5.0712

- PHYSIOLOGY AND ECOLOGY OF MARINE DIATOMS ...Algal Culture, Habitat Studies, Marine Plants, Nutrition Studies, Physiological Ecology, Plant Taxonomy, ...5.0735

- BIOCHEMICAL STUDIES ON SILICEOUS SKELETAL FORMATION ...Cell Wall, Golgi Apparatus, Histochemistry - Cytochem, Plant Developmental Biology, Silicon, ...5.0750

## Algae- Dinoflagellates

### Algae- Dinoflagellates

- BIOLOGY AND PALEONTOLOGY OF MARINE DINOFLAGELLATES AND HYSTRICHOSPHERES ...Algal Culture, Cell Cycle, Plant Developmental Biology, Range Or Territorial Distr. , Spores, Vertical Distribution, ...5.0799

- COMPARATIVE STUDIES OF DINOFLAGELLATE TOXINS ...Algal Culture, Algal Toxins, Cellular Physiology, Toxicology, ...6.0121

### Gonyaulax

- CIRCADIAN RHYTHM IN PHOTOSYNTHESIS IN THE MARINE ALGAE GONYAULAX AND ACETABULARIA ...Acetabularia, Autotrophic, Biological Rhythms, Control and Regulation, Kinetics, ...5.0685

- MOLECULAR MECHANISMS IN BIOLOGICAL CLOCKS ...Control and Regulation, Marine Plants, ...5.0983

- LIGHT RECEPTOR CONTROL OF THE DIURNAL RHYTHM OF ENZYME SYNTHESIS IN THE BIOLUMINESCENT

## SUBJECT INDEX

## Algae- Grass-green

MARINE DINOFLAGELLATE GONYAULAX POLYEDRA ...Biological Rhythms, Biosynthesis, Control and Regulation, Photoreception, Plant Enzymes, ...5.0760

LABORATORY STUDIES OF TOXIC DINOFLAGELLATES ...Algal Culture, Algal Toxins, Gulf of Mexico, Gymnodinium, Plant Origin, ...5.0837

STUDY OF TOXIN SYNTHESIS IN PRYMNESIUM PARVUM ...Algal Toxins, Axenic Culture, Biosynthesis, Gymnodinium, Prymnesium, ...6.0124

### Gymnodinium

RED TIDE TOXICITY ...Algal Toxins, Biochemical Analysis, Gas Chromatography, Plant Developmental Biology, Pollution Sources-other, ...5.0780

LABORATORY STUDIES OF TOXIC DINOFLAGELLATES ...Algal Culture, Algal Toxins, Gonyaulax, Gulf of Mexico, Plant Origin, ...5.0837

STUDY OF TOXIN SYNTHESIS IN PRYMNESIUM PARVUM ...Algal Toxins, Axenic Culture, Biosynthesis, Gonyaulax, Prymnesium, ...6.0124

CHEMISTRY OF ALGAL TOXINS ...Algal Toxins, Aphanizomenon, Bioassays, Biochemical Analysis, Microbiological Analysis, ...5.0709

### Algae- General

THE MARINE ALGAE OF VIRGINIA ...Benthonic-bottom, Chesapeake Bay, Marine Plants, Plant Taxonomy, Virginia, ...5.0698

IMPROVEMENT AND APPLICATION OF BENTHIC ALGAL ISOTOPE PRODUCTIVITY MEASURING METHODS ...Benthonic-bottom, Caulerpa, Pacific Ocean-general, Physiological Ecology, Plant Prod. (non-specific), Rhodophyta (non-specific & Ot), ...5.0968

ECOLOGY OF TROPICAL DEEP WATER ALGAE ...Benthic Flora, Diving and Scuba, Plant Succession, Temporal Distribution, Tropic, Vertical Distribution, ...5.0722

MARINE ALGAE OF THE MANGROVE ROOT COMMUNITY ...Habitat Studies, Mangroves, Marine Plants, Puerto Rico, Roots, ...5.0723

SYSTEMATICS AND ECOLOGY OF SUBTIDAL BENTHIC MARINE ALGAE ...Benthic Flora, Benthonic-bottom, Habitat Studies, Marine Plants, Plant Taxonomy, Range Or Territorial Distr., ...5.0701

ECOLOGY OF MARINE ENDOLITHIC ALGAE ...Borings - Tracks - Trails, Calcium, Habitat Studies, Niches, Textures-structures, ...5.0690

ORGANIC INFLUENCES ON CALCIUM CARBONATE CEMENTATION ...Algal Culture, Biology, Cement Origin, Marine Plants, Secretions and Products, ...5.0729

LIGHT REQUIREMENTS FOR MARINE ALGAE ...Algal Culture, Autotrophic, Light, Marine Plants, Pigments, ...5.0703

TAXONOMY AND ECOLOGY OF INSHORE MARINE MICROBIOTA ...Animal Taxonomy, Aquatic Ecology, Plant Taxonomy, Protozoa -other, Range Or Territorial Distr., ...5.0768

DRAG-REDUCING ALGAE ...Coatings-general, Fouling, Marine Bacteria, Natural Occurring, Secretions and Products, Wear, Friction, ...5.0681

SYNCOLOGY OF CARIBBEAN SPONGES ...Caribbean Sea, Copepods, Porifera, Symbiosis, ...5.0580

ALGAL FOODS OF SHELLFISH (MICROORGANISMS AFFECTING SHELLFISH PROGRAM) ...Algal Culture, ...5.0759

PRODUCTIVITY OF ESTUARINE AND MARINE ECOSYSTEMS (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Estuaries, Marine Plants, Phytoplankton, Primary Productivity, Standing Crops, ...5.1010

SEASONAL VARIATIONS OF ALGAL POPULATIONS ...Algal Culture, Nutrition Studies, Temporal Distribution, ...5.0705

MEASUREMENT OF THE RATE OF CARBON DIOXIDE (C14) FIXATION INTO SUBCELLULAR FRACTIONS OF ALGAE ...Algal Culture, Bioindicators, Carbon, Carbon Dioxide Fixation, Growth Rate, Intracellular Localization, ...5.0728

SYMBIOSIS IN CONVOLUTA ...Eddyworms, Symbiosis, ...5.0713

CALCIFICATION MECHANISMS IN MARINE ORGANISMS ...Calcification, Marine Plants, Mollusks -non-specific & Other, ...5.1016

BIOLOGICAL INVESTIGATIONS WITH ISOTOPES ...Facilities, Isotopes -non-specific, Marine Plants, Radiation Effects-non-specific, Radioecology, ...11.0025

### Algae- Golden-brown

#### Coccoliths

PHYSIOLOGICAL STUDIES ON MARINE CHRYSOMONADS ...Autotrophic, Elect Trans and Redox, Photochemistry, Photosynthetically Active, ...5.0932

#### Ochromonas

VITAMIN A AND PROTEIN METABOLISM ...Cellular Membranes (non-spec.), Metabolism, Plasma Membrane, Vitamin A, ...5.1006

#### Prymnesium

MACROMOLECULAR BASIS FOR ADAPTATION TO SALINITY CHANGES IN PRYMNESIUM PARVUM ...Adaptation, Growth Rate, Ionic Effect, Permeability, Water Salinity, ...5.1012

STUDY OF TOXIN SYNTHESIS IN PRYMNESIUM PARVUM ...Algal Toxins, Axenic Culture, Biosynthesis, Gonyaulax, Gymnodinium, ...6.0124

### Algae- Grass-green

#### Acetabularia

CIRCADIAN RHYTHM IN PHOTOSYNTHESIS IN THE MARINE ALGAE GONYAULAX AND ACETABULARIA ...Autotrophic, Biological Rhythms, Control and Regulation, Gonyaulax, Kinetics, ...5.0685

EXPERIMENTAL MANIPULATION OF MECHANICAL AND PHYSIOLOGICAL RHYTHMS - A DUAL APPROACH TO THE BIOLOGICAL CLOCK PROBLEM ...Behavioral Ecology, Biological Rhythms, Crabs, Perching Birds - Songbirds, ...5.1002

GROWTH AND DIFFERENTIATION OF PLASTIDS ...Biosynthesis, Cytoplasmic Inheritance, DNA Other, Nucleus (non-specific & Ot.), Organelle Culture, Photosynthetically Active, ...5.0683

#### Caulerpa

IMPROVEMENT AND APPLICATION OF BENTHIC ALGAL ISOTOPE PRODUCTIVITY MEASURING METHODS ...Algae- General, Benthonic-bottom, Pacific Ocean-general, Physiological Ecology, Plant Prod. (non-specific), Rhodophyta (non-specific & Ot), ...5.0968

PRELIMINARY INVESTIGATION OF GROWTH AND DIFFERENTIATION IN MARINE COENOCYTIC ALGA, CAULERPA PROLIFERA ...Differentiation Mechanism, Growth and Differentiation, Growth Rate, Plant Developmental Biology, ...5.0711

PHYTOCHEMISTRY OF NARCOTIC PRINCIPLES IN CAULERPA. ...Caulerpin, Phaeophyta (non-specific & Ot), Rhodophyta (non-specific & Ot), Sterols, ...6.0111

#### Chlorophyceae (non-specif.&ot)

TAXONOMY OF CALCAREOUS GREEN ALGAE ...Indian Ocean-general, Plant Morphology, Plant Taxonomy, Range Or Territorial Distr., Reproductive Physiology, ...5.0718

EXPERIMENTAL CULTURE OF CALCAREOUS GREEN ALGAE OF CORAL REEFS ...Algal Culture, Biology, Calcium, Growth and Differentiation, Plant Taxonomy, Reefs, ...5.0719

BIOSYNTHESIS OF 3-HYDROXYTYRAMINE IN MONOSTROMA FUSCUM ...Biosynthesis, Dopa Decarboxylase, Marine Plants, Tyramine, Tyrosinase, ...5.0720

#### Cladophora

CLADOPHORA AS RELATED TO POLLUTION IN WESTERN LAKE ERIE ...Algal Pollutant Sources, Bioindicators, Chemical Analysis, Lake Erie, Mapping, ...6.0170

## SUBJECT INDEX

### Algae- Green (charophyceae)

#### Nitella

GROWTH AND CELLULAR MORPHOGENESIS IN NITELLA ...Elongation of Cell, Growth and Differentiation, Manometers, Plant Developmental Biology, Water Movement, ...5.0721

### Algae- Red

#### Chondrus

ECOLOGICAL STUDIES OF THE MARINE RED ALGAE CHONDRUS CRISPUS STACKHOUSE ...^ Nat. resource-other, Algal Culture, Growth and Reproductive Physiology, ...5.0710

#### Rhodophyta (non-specific & Ot)

IMPROVEMENT AND APPLICATION OF BENTHIC ALGAL ISOTOPE PRODUCTIVITY MEASURING METHODS ...Algae- General, Benthonic-bottom, Caulerpa, Pacific Ocean-general, Physiological Ecology, Plant Prod. (non-specific), ...5.0968

EFFECTS OF DEPTH ON GROWTH AND REPRODUCTION OF BENTHIC MARINE ALGAE ...Algal Culture, Depth, Growth and Differentiation, Phaeophyta (non-specific & Ot), Reproductive Physiology, ...5.0684

INDUCTION AND CONTROL OF DIFFERENTIATION IN ALGAE ...Control and Regulation, Differentiation Mechanism, Nutrition Studies, Photoperiodism, Plant Developmental Biology, ...5.0708

PRIMARY PRODUCTION AND DECOMPOSITION IN ESTUARINE WATER ...Estuaries, Florida, Methane Bacteria (non-specific), Phaeophyta (non-specific & Ot), Primary Productivity, Turnover (metabolic), ...5.0954

INVESTIGATIONS ON THE CRUSTOSE CORALLINES OF THE NORTH ATLANTIC ...Atlantic Ocean-north, Diving and Scuba, Marine Plants, Plant Taxonomy, Sedimentology-general, ...7.0172

PHYTOCHEMISTRY OF NARCOTIC PRINCIPLES IN CAULERPA. ...Caulerpa, Caulerpin, Phaeophyta (non-specific & Ot), Sterols, ...6.0111

### Algal Physiology

#### Biological Rhythms

EXPERIMENTAL MANIPULATION OF MECHANICAL AND PHYSIOLOGICAL RHYTHMS - A DUAL APPROACH TO THE BIOLOGICAL CLOCK PROBLEM ...Acetabularia, Behavioral Ecology, Crabs, Perching Birds - Songbirds, ...5.1002

#### Environment

##### Responses to Growth

BIOLUMINESCENCE ...Autotrophic, Bays, Bioluminescence, Jamaica, Phytoplankton, ...1.0165

ENVIRONMENTAL EFFECTS ON THE METABOLISM OF MARINE ALGAE ...Enzymes, Glycolic Acid, Laminariaceae (non-specific.&ot), Light, Marine Plants, Phytoplankton, ...5.0702

THE ECOLOGIC IMPACT OF THE INTERACTIONS AMONG MICROORGANISMS AND AQUATIC CONTAMINANTS IN LAKE ERIE ...Lake Erie, Pollution - Effects of , Primary Productivity, Sediments, Water Bacteria, ...5.0819

DETERMINATION OF SELECTED ENVIRONMENTAL REQUIREMENTS OF IMPORTANT MARINE PHYTOPLANKTON SPECIES ...Axenic Culture, Growth and Differentiation, Marine Biology, Marine Plants, Phytoplankton, ...5.0833

INTEGRATED FIELD AND LABORATORY SYSTEM FOR ASSAYING THE EFFECTS OF POLLUTANTS AND TOXICANTS UPON WATER QUALITY ...Algal Culture, Axenic Culture, Phytoplankton, Pollution - Effects of , ...5.0831

#### Growth and Differentiation

EFFECTS OF DEPTH ON GROWTH AND REPRODUCTION OF BENTHIC MARINE ALGAE ...Algal Culture, Depth, Phaeophyta (non-specific & Ot), Reproductive Physiology, Rhodophyta (non-specific & Ot), ...5.0684

GROWTH AND CELLULAR MORPHOGENESIS IN NITELLA ...Elongation of Cell, Manometers, Nitella, Plant Developmental Biology, Water Movement, ...5.0721

PRELIMINARY INVESTIGATION OF GROWTH AND DIFFERENTIATION IN MARINE COENOCYTTIC ALGA, CAULERPA PROLIFERA ...Caulerpa, Differentiation Mechanism, Growth Rate, Plant Developmental Biology, ...5.0711

ARCTIC BIOLOGICAL OCEANOGRAPHY ...Adaptation, Arctic Ocean, Phytoplankton, Potamogeton, Ruppia, Zostera, Water - Light Qual. & Quant. , Water Temperature -other, ...5.0853

RESTORATION, PROPAGATION, AND MANAGEMENT OF MARINE ALGAE ...Applied Ecology, Habitat Studies, Laminariaceae (non-specif.&ot), Marine Plants, Pacific Ocean-east, ...5.0680

ECOLOGICAL STUDIES OF THE MARINE RED ALGA CHONDRUS CRISPUS STACKHOUSE ...Ag Uses of Nat. resource-other, Algal Culture, Chondrus, Reproductive Physiology, ...5.0710

EXPERIMENTAL CULTURE OF CALCAREOUS GREEN ALGAE OF CORAL REEFS ...Algal Culture, Biology, Calcium, Chlorophyceae (non-specif.&ot), Plant Taxonomy, Reefs, ...5.0719

EUTROPHICATION OF TIDAL WATERS ...Eutrophication, Model Studies, Nutrients, Photosynthesis, Tidewater Areas, ...5.0909

DETERMINATION OF SELECTED ENVIRONMENTAL REQUIREMENTS OF IMPORTANT MARINE PHYTOPLANKTON SPECIES ...Axenic Culture, Marine Biology, Marine Plants, Phytoplankton, Responses to Growth, ...5.0833

### Metabolism

#### Algal Metab.(non-specific &ot)

MARINE TOXINS OF THE TROPICAL PACIFIC ...Fish -non-specific, Pacific Ocean-general, Polynesia, Toxicology, Toxins, ...6.0113

#### Chemicals (incl. algacides)

EFFECT OF NITRILOTRIACETIC ACID (NTA) UPON THE TOXICITY OF METALS TO SELECTED SPECIES OF ESTUARINE PHYTOPLANKTON ...Acids, Carbon, Estuaries, Isotope Tracer-other, Phytoplankton, ...5.0829

#### Enzymes

ENVIRONMENTAL EFFECTS ON THE METABOLISM OF MARINE ALGAE ...Glycolic Acid, Laminariaceae (non-specif.&ot), Light, Marine Plants, Phytoplankton, Responses to Growth, ...5.0702

STUDY OF NITROGEN METABOLISM IN MARINE ALGAE ...Bioindicators, Marine Plants, Microbiological Analysis, Pollution - Effects of , Quantitative & Qualitative, ...5.0727

#### Growth Substances

CONTROL OF PLANT PATHOGENS USING ACTIVE ANTIMICROBIAL SUBSTANCES ISOLATED FROM MARINE ALGAE ...Bacteria, Endogenous Biological Extracts, Fungi -non-specific, Marine Plants, Nutrition in Disease, ...6.0127

#### Nitrogen Fixation

NUTRIENT LIMITATION AND SOURCES OF NITROGEN FOR MARINE PRIMARY PRODUCTIO ...Marine Plants, Mathematical Biophysic, Other Models, Phytoplankton, Primary Productivity, ...5.0845

#### Nutrition Studies

MARINE PHYTOPLANKTON RESEARCH ...Algal Culture, Indian Ocean-general, Pacific Ocean-general, Phytoplankton, Symbiosis, ...5.0847

NUTRITIONAL STUDIES ON MARINE ORGANISMS ...Crustacea -non-specific, Invertebrate Nutrition, Organics, Phytoplankton, ...5.1001

PHYSIOLOGY AND ECOLOGY OF MARINE DIATOMS ...Algae- Diatoms, Algal Culture, Habitat Studies, Marine Plants, Physiological Ecology, Plant Taxonomy, ...5.0735

INDUCTION AND CONTROL OF DIFFERENTIATION IN ALGAE ...Control and Regulation, Differentiation Mechanism, Photoperiodism, Plant Developmental Biology, Rhodophyta (non-specific & Ot), ...5.0708

PHYSIOLOGICAL AND BIOCHEMICAL REQUIREMENTS OF PHYTOPLANKTON SPECIES ...Algal Culture, Marine Plants, Media, Phytoplankton, Planktonic - Floating, ...5.0995

SEASONAL VARIATIONS OF ALGAL POPULATIONS ...Algae- General, Algal Culture, Temporal Distribution, ...5.0705

## SUBJECT INDEX

## Ammonia

NUTRIENT REQUIREMENTS OF ALGAE ...Algal Culture, Cyanophyta (non-specific & Ot), Nitrate, Nitrite, Phosphate, Phosphite, ...5.0706

SYMBIOSIS IN CONVOLUTA ...Algae- General, Eddyworms, Symbiosis, ...5.0713

### Respiration

RELATIONSHIP OF PHOTOSYNTHESIS TO RESPIRATION OF OCEANIC MICROALGAE ...Light, Marine Plants, Mass Spectroscopy, Oxygen, Photosynthesis, ...5.0774

### Photoperiodism

INDUCTION AND CONTROL OF DIFFERENTIATION IN ALGAE ...Control and Regulation, Differentiation Mechanism, Nutrition Studies, Plant Developmental Biology, Rhodophyta (non-specific & Ot), ...5.0708

### Photosynthesis

RELATIONSHIP OF PHOTOSYNTHESIS TO RESPIRATION OF OCEANIC MICROALGAE ...Light, Marine Plants, Mass Spectroscopy, Oxygen, Respiration, ...5.0774

EUTROPHICATION OF TIDAL WATERS ...Eutrophication, Growth and Differentiation, Model Studies, Nutrients, Tide-water Areas, ...5.0909

### Reproductive Physiology

EFFECTS OF DEPTH ON GROWTH AND REPRODUCTION OF BENTHIC MARINE ALGAE ...Algal Culture, Depth, Growth and Differentiation, Phaeophyta (non-specific & Ot), Rhodophyta (non-specific & Ot), ...5.0684

TAXONOMY OF CALCAREOUS GREEN ALGAE ...Chlorophyceae (non-specif.&ot), Indian Ocean-general, Plant Morphology, Plant Taxonomy, Range Or Territorial Distr. , ...5.0718

DEVELOPMENT OF POLARITY IN THE FUCACEAN ZYGOTE ...Cellular Physiology, Differentiation Mechanism, Fucus, Plant Developmental Biology, Polarity, ...5.0972

ECOLOGICAL STUDIES OF THE MARINE RED ALGA CHONDRUS CRISPUS STACKHOUSE ...Ag Uses of Nat. resource-other, Algal Culture, Chondrus, Growth and Differentiation, ...5.0710

### Alginate

DETERMINATION OF THOSE MARINE SPECIES HAVING THE GREATEST KNOWN POTENTIAL FOR THE COMMERCIAL FISHERY ...Ag Uses of Nat. resource-other, Commercial Fishing, Food Supply, Fucus, Phaeophyta (non-specific & Ot), ...5.0098

### Alkali Metals

ELECTROLYTE-NON-ELECTROLYTE INTERACTIONS IN SEA WATER AND RELATED SOLUTIONS ...Alkaline Earths, Complexes, Electrolytes, Saline Water Systems, Thermal Properties-other, Water Analysis-general, ...1.0107

### Alkaline Earths

ELECTROLYTE-NON-ELECTROLYTE INTERACTIONS IN SEA WATER AND RELATED SOLUTIONS ...Alkali Metals, Complexes, Electrolytes, Saline Water Systems, Thermal Properties-other, Water Analysis-general, ...1.0107

### Alloys

COMBUSTION OF RESIDUAL FUEL WITH MASSIVE RECIRCULATION ...Atmospheric, Gases, Combustion Products, Fuels, ...8.0226

OCEAN ENGINEERING RESEARCH ...Engineering Studies-general, Materials Used Undersea, Moorings, Water, Water Properties-general, ...8.0050

METALS FOR DEFENSE ...Corrosion Prevention-other, Soils, Water, ...8.0209

MICROBIAL CORROSION ...Biological, Fouling, Marine Bacteria, Sulfur Bacteria, Water, ...8.0207

### Aluminum

#### Intermetallic Compound

EFFECT OF INTERFIBER SPACING ON THE HIGH TEMPERATURE DEFORMATION OF Al-A13NI COMPOSITES ...Aluminum, Metal Matrix, Nickel, Plasticity, Tensile, ...8.0229

PRODUCTION OF PLATES OF FIBER COMPOSITES BY SOLIDIFICATION, FORMING AND A COMBINATION OF BOTH ...Aluminum, Fiber, Filament, Metal Matrix, Nickel, Orientation, ...8.0230

TEMPERATURE AND STRAIN RATE DEPENDENCE OF DEFORMATION IN AL-3NI-AL COMPOSITES ...Aluminum, Deformation - General, Metal Matrix, Nickel, Strain Rate, ...8.0231

### Titanium

STRUCTURAL TITANIUM ALLOYS -100 KSI YIELD STRENGTH ...Materials Used Undersea, Strength - Weight Ratio, Stress Concentration-toughness, Submersibles, ...8.0219

STRUCTURAL TITANIUM ALLOYS -120/150 KSI YIELD STRENGTH ...Fatigue, Materials Used Undersea, Strength - Weight Ratio, Stress Concentration-toughness, Stress Corrosion, ...8.0220

### Alternative Planning

THE INSTITUTE FOR THE DEVELOPMENT OF RIVERINE AND ESTUARINE SYSTEMS (IDRES) ...Delaware River, Estuaries, Waste Disposal-general, ...12.0043

PUBLIC INVESTMENT CRITERIA FOR WATER-ORIENTED RECREATION IN THE LAKE ERIE BASIN ...Costs, Finance, Fiscal, Pollution Abatement, Projected Demand, Recreation Sites, ...9.0016

AN ECONOMIC EVALUATION OF WATER POLLUTION CONTROL, YAQUINA BAY, ORE ...Bays, Benefit-cost Analysis, Model Studies, Oregon, Systems Analysis, Water Quality Control-general, ...6.0173

### Aluminum

NEUTRON ACTIVATION ANALYSIS OF IRON METEORITES ...Activation Analysis, Argon-potassium, Carbon, Cosmogenous, Iron, Neutron Activation, ...7.0065

EFFECT OF INTERFIBER SPACING ON THE HIGH TEMPERATURE DEFORMATION OF Al-A13NI COMPOSITES ...Intermetallic Compound, Metal Matrix, Nickel, Plasticity, Tensile, ...8.0229

PRODUCTION OF PLATES OF FIBER COMPOSITES BY SOLIDIFICATION, FORMING AND A COMBINATION OF BOTH ...Fiber, Filament, Intermetallic Compound, Metal Matrix, Nickel, Orientation, ...8.0230

TEMPERATURE AND STRAIN RATE DEPENDENCE OF DEFORMATION IN AL-3NI-AL COMPOSITES ...Deformation - General, Intermetallic Compound, Metal Matrix, Nickel, Strain Rate, ...8.0231

### American Samoa

ROCK SAMPLING AND GEOPHYSICAL STUDIES IN THE TONGA KERMADEC TRENCH SOUTHWEST PACIFIC ...Coring and Dredging, Equipment Purchase Operation, Pacific Ocean-west, Photography, Seismic Reflection, Trenches, ...7.0093

DEEP EARTHQUAKES AND ISLAND-ARC TECTONICS AND STRUCTURE ...Attenuation, Earthquake Location, Earthquakes, Island-ares, Seismic Studies, Velocity Variations, ...7.0140

AQUISITION OF A SUITABLE PROTOTYPE FISHING VESSEL AND GEAR ...Commercial Fishing, Equipment Purchase Operation, Nets, Tuna, Mackerel, Albacore... , ...12.0004

FISH POPULATION OFF THE ISLAND OF TUTUILA, AMERICAN SAMOA ...Animal Taxonomy, Commercial Fishing, Fish -non-specific, Fishing Gear, Number Or Density, ...5.0032

FISH POPULATIONS OF AMERICAN SAMOA ...Crustacea - non-specific, Fish -non-specific, Fishing Gear, Number Or Density, ...5.0033

GEAR EVALUATION ...Fish -non-specific, Fishing Gear, Nets, ...8.0114

INVESTIGATE POPULATION DYNAMICS OF ALBACORE ...Commercial Fishing, Population Dynamics, Tuna, Mackerel, Albacore... , Water Environment -other, ...5.0081

### Ammonia

CHEMICAL EXPLOSIONS, PACKAGING AND HANDLING AT SEA ...Durability, Deterioration, Explosions, Detonation, Packaging, Safety, ...8.0130

## SUBJECT INDEX

### Ammonium

- REGULATION OF AMMONIA EXCRETION IN FISH AND AQUATIC AMPHIBIA ...Anura -other, Fish -other, Kidney and Urinary System, Metabolism, Water, ...5.0269
- INVESTIGATION OF DECOMPOSITION IN SHRIMP ...Food Spoilage Detection, Physical Decomposition, Shrimp, ...6.0011

### Amphibians

#### Amphibia -non-specific & Other

- MORPHOLOGIC REGULATORY MECHANISMS IN TERRESTRIAL AND MARINE ORGANISMS ...Collagen, Developmental Physiology, Fish -other, Metabolism, Porifera, .. 5.0982

#### Anura -other

- REGULATION OF AMMONIA EXCRETION IN FISH AND AQUATIC AMPHIBIA ...Ammonium, Fish -other, Kidney and Urinary System, Metabolism, Water, ...5.0269

### Frogs

- SONIC SENSITIVITY OF FISHES AND AMPHIBIA ...Auditory, Comparative Physiology, Fish -non-specific, Sensory Organs, ...5.0960
- CELLULAR DIFFERENTIATION ...Active Transport, Basic Embryology, Differentiation Mechanism, Ionic Effect, Skin Or Special Derivatives, ...5.0618

### Toads

- SUBCELLULAR REACTION TO INJURY IN THE KIDNEY ...Cell Injury and Autolysis, Cellular Membranes (non-spec.), Electron Microscopy, Kidney, Structural Functions, ...5.0297

### Andaman Sea

- GEOLOGIC SURVEY OF MARTABAN CANYON, NORTHEASTERN INDIAN OCEAN ...River Deltas, Sedimentary History, Submarine Canyons, Tectogenesis, Valleys, ...7.0039

### Animal Characteristics

#### Adaptation

- ZOOLOGY OF OCEANIC BENTHIC ANIMALS OFF THE NORTH CAROLINA COAST ...Atlantic Ocean-north, Benthic Fauna, Benthic-bottom, Environmental Physiology, Water Temperature-non-specific, ...5.1009
- SYSTEMATIC AND DISTRIBUTIONAL STUDY OF DEEP-SEA ECTOPROCTA (BRYOZOA) ...Animal Taxonomy, Bryozoa, Ecological, Vertical Distribution, ...5.0650
- PHYSIOLOGICAL STUDIES IN THE BOTTLENOSE DOLPHIN TURSIOPS TRUNCATUS ...Cardiovascular System, Central Nervous System, Mammals, ...5.0588
- PHYSIOLOGICAL STUDIES ON FISHES LACKING HEMOGLOBIN ...Cardiovascular System, Fish, Fish -other, Hemoglobin, Metabolism, Polar, ...5.0241
- DEEP DIVING ANTARCTIC BIRDS AND MAMMALS ...Antarctica, Locomotion -animal, Penguins, Seals, Water Pressure, ...5.0555
- LIGHT AND DARK ADAPTION IN THE RETINAE OF YOUNG BLUEFISH ...Bluefish, Photoperiod, Retina, Visual Organs, ...5.0283
- RHYTHMIC ACTIVITY OF BLUEFISH UNDER EXPERIMENTALLY VARIED LIGHT REGIMES ...Biological Rhythms, Bluefish, Environmental Physiology, Photoperiod, Water Light Quality & Quantity, ...5.0286
- GROWTH, CONDITION, AND SURVIVAL OF SHELLFISH ...Environmental Physiology, Maryland, Oysters, Water Quality-general, Water Salinity, ...5.0447
- THERMAL ACCLIMATION PATTERNS IN PARASITES AND HOSTS ...Host Resistance, Host Specificity, Life History Studies, Monogenea, Water Temperature-non-specific, ...5.0643
- CARDIOVASCULAR ADJUSTMENTS IN DIVING MAMMALS ...Cardiovascular System, Effects on Cardiovascular system, Locomotion -animal, Mammals, ...5.0674
- CARDIOVASCULAR STUDIES ON DIVING MAMMALS ...Basic Hemodynamics, Cardiovascular System, Control and Regulation, Heart, Locomotion -animal, Seals, ...5.0639

### Age

- CHONOTRICH CILIATE PROTOZOANS ...Animal Taxonomy, Ciliates, Invertebrate Anatomy, Life History Studies, Range Or Territorial Distr. , ...5.0742
- HAIR SEALS ...Dispersion -other, Metamorphosis, Population Dynamics, Seals, Spawning & Nesting Sites, ...5.0525
- ESTIMATION OF PARAMETERS OF STRIPED BASS POPULATION AND DESCRIPTION OF THE FISHERY OF LOWER CHESAPEAKE BAY ...Basses -sea,white, White Perch, Censusing, Chesapeake Bay, Fishing Gear, Population Dynamics, ...5.0151
- EVALUATE THE RESEARCH TECHNIQUES WHICH WILL BE EMPLOYED TO STUDY THE BASIC LIFE HISTORY OF THE RED CRAB (GERYON QUINQUEDENS) ...Crabs, Mark, Tag Or Capture -other, Maturity & Growth Stages, Size, ...5.0494
- BRISTOL BAY INTERMEDIATE HIGH SEAS-INSHORE TEST FISHING ...Alaska, Bays, Commercial Fishing, Salmon -coho,chinook,sockeye..., ...5.0022
- BRISTOL BAY OFFSHORE TEST FISHING PROGRAM ...Alaska, Bays, Commercial Fishing, Nets, Salmon -coho,chinook,sockeye..., ...5.0023
- COOK INLET CATCH AND ESCAPEMENT AGE AND SEX COMPOSITION STUDIES ...Alaska, Migration, Nets, Salmon -coho,chinook,sockeye..., Sex -non-specific, Spawning & Nesting Sites, ...5.0014
- DISTRIBUTION, AGE GROWTH, AND MORTALITY STUDIES OF SALT WATER FISHES OF IMPORTANCE TO SPORT FISHERMEN ...Chesapeake Bay, Drums, Growth Rate, Mortality Rates, Vertical Distribution, ...5.0155
- AGE DETERMINATION OF LARGE ATLANTIC SHARKS ...Atlantic Ocean-north, Growth Rate, ...5.1028
- THE BIOLOGY OF THE LAYSAN AND BLACK-FOOTED ALBATROSSES ...Albatrosses, Shearwaters..., Animal Distr. (non-specific), Control of Nuisance Species, Mark, Tag Or Capture -other, Spawning & Nesting Sites, ...5.0607
- EVALUATION OF THE ATLANTIC FLYWAY SEA DUCK KILL ...Anseriformes -other, Hunting, Mortality Rates, Sex -non-specific, Species, Comparison of , ...5.0606
- AGE AND GROWTH OF BLUEFISH ...Atlantic Ocean-north, Bluefish, Growth Rate, Population Dynamics, Scales, ...5.0287
- SURF CLAM POPULATION DYNAMICS ...Clams, Commercial Fishing, Continental Shelf, Population Dynamics, Size, ...5.0448
- MARINE BIOLOGICAL INVESTIGATIONS - ANALYSIS OF HERRING FISHERY DATA ...Alaska, Alewife,mehaden,shad,herring, Data Analysis - General, Dispersion -other, ...5.0010
- ADMINISTRATION OF WHALING ACT, COMMERCIALY UTILIZED WHALES ...Food Supply, Growth Rate, Mammals, Parasitology -other, Reproduction Studies (general), ...5.0668
- FUR SEAL RESEARCH, POPULATION DYNAMICS ...Growth Rate, Life History Studies, Mark, Tag Or Capture -other, Population Dynamics, Seals, ...5.0671
- ADMINISTRATION OF WHALING ACT - DEVELOPMENT OF RESEARCH TOOLS ...Management -other, Mark, Tag Or Capture -other, ...5.0670
- SURF CLAM BIOLOGY ...Clams, Growth Rate, Life History Studies, Reproductive System, Tags, ...5.0449
- FISH POPULATION PARAMETERS ...Biological Rhythms, Life History Studies, Population Dynamics, Size, ...5.0039

### Fertility

- CRYOGENIC PRESERVATION OF VIABLE FISH SPERM ...Fish -non-specific, Freezing Techniques, Male Gametes, Rapid Freeze, ...5.0310
- REPRODUCTION AND FECUNDITY OF TUNAS ...Behavior, Biological Rhythms, Female Gametes, Tuna, Mackerel, Albacore..., ...4.0159

### Growth Rate

- DYNAMICS OF OCEANIC PLANKTON ...Number Or Density, Productivity (agricultural), RNA, Zooplankton, ...5.0825
- MICROSTRATIFICATION OF MARINE ZOOPLANKTON ...Environmental Physiology, Thermal, Vertical Distribution, Zooplankton, ...5.0753
- POPULATION STUDIES ON INTERTIDAL INVERTEBRATES ...Australia, Gastropods -slugs,conch,snails, Longevity, Oregon, Starfishes, ...5.1021

## SUBJECT INDEX

## Animal Characteristics

GROWTH LAYERING IN BIVALVED MOLLUSKS - AN AID IN PALEOBIOGEOGRAPHIC INTERPRETATION ...Animal Taxonomy, Biological Rhythms, Environmental Physiology, Freshwater Mussels, Scallops, Invertebrate Physiology, ...5.0355

GROWTH, DIFFERENTIATION AND NERVE TRANSMISSION IN THE HYDROID, CAMPANULARIA ...Basic Embryology, Developmental Physiology, Hydra, Portuguese Man-of-war, Nervous System, ...5.0601

CARBON-14 AGE PROFILE OF A HAWAIIAN REEF ...Anthozoa, Carbon-14, Coring and Dredging, Hawaii, Reefs, Sea Level Variations, ...7.0051

OYSTER FATNESS STUDY ...Aquaculture & Fish-farming, Fats - Lipids & Oils, Food Supply, Invertebrate Nutrition, Oysters, ...5.0512

PRELIMINARY MODIFICATIONS AND CONTROL OF NATURAL GROWING AREA ENVIRONMENTS ...Captive Rearing, Clams, Mineral Content -water, Oysters, Predation, ...5.0495

COLLECTION OF MATERIALS AND DATA FOR AGE-GROWTH ANALYSIS ...Age, Commercial Fishing, Fish -other, ...5.0330

ANALYSIS OF SALMONID SCALES ...Age, Animal Taxonomy, Columbia River, Rainbow Trout, Steelhead Trout, Salmon -coho, chinook, sockeye..., Scales, ...5.0315

DISTRIBUTION, AGE GROWTH, AND MORTALITY STUDIES OF SALT WATER FISHES OF IMPORTANCE TO SPORT FISHERMEN ...Age, Chesapeake Bay, Drums, Mortality Rates, Vertical Distribution, ...5.0155

AGE DETERMINATION OF LARGE ATLANTIC SHARKS ...Age, Atlantic Ocean-north, ...5.1028

AGE AND GROWTH OF BLUEFISH ...Age, Atlantic Ocean-north, Bluefish, Population Dynamics, Scales, ...5.0287

CULTURE OF SHELLFISH IN ARTIFICIAL AND NATURAL SALT PONDS ...Captive Rearing, Oysters, Ponds, Stocking of Fish & Shellfish, Streams, ...5.0444

BIostatistics OF HERRING ...Age, Alewife, menhaden, shad, herring, Atlantic Ocean-north, Environmental Ecology, Population Dynamics, Proprioceptors, ...5.0099

NAKNEK SYSTEM RED SALMON STUDIES ...Alaska, Migration, Number Or Density, Salmon -coho, chinook, sockeye..., Streams, ...5.0005

CHUM SALMON INVESTIGATIONS ...Environmental Ecology, Estuaries, Food Supply, Life History Studies, Number Or Density, Salmon -coho, chinook, sockeye..., ...5.0007

ADMINISTRATION OF WHALING ACT, COMMERCIALY UTILIZED WHALES ...Age, Food Supply, Mammals, Parasitology -other, Reproduction Studies (general), ...5.0668

ADMINISTRATION OF WHALING ACT, PROTECTED AND NON-COMMERCIAL WHALES ...Censusing, Mammals, Migration, Reproduction Studies (general), Vertebrate Anatomy, ...5.0669

FUR SEAL RESEARCH, POPULATION DYNAMICS ...Age, Life History Studies, Mark, Tag Or Capture -other, Population Dynamics, Seals, ...5.0671

OCEAN GROWTH AND MORTALITY OF SALMON ...Mortality Rates, Salmon -coho, chinook, sockeye..., Scales, Tags, ...5.0170

JUVENILE AND ADULT CULTURE (SHRIMP AQUACULTURE PROGRAM) ...Aquaculture & Fish-farming, Captive Rearing, Ponds, Shrimps - Common, ...5.0504

SURF CLAM BIOLOGY ...Age, Clams, Life History Studies, Reproductive System, Tags, ...5.0449

COMPUTER SIMULATION OF HYDROID COLONIES ...Computer Applications, Hydra, Portuguese Man-of-war, ...5.0651

INITIATION OF METAMORPHOSIS IN AURELIA ...Biological Rhythms, Jelly Fish, Low Temp. -but Above 32f, Metabolism, Water Light Quality & Quantity, ...5.0599

### Hatchability

DEVELOPMENTAL STUDIES OF SELECTED INVERTEBRATES ...Basic Embryology, Developmental Physiology, Maturity & Growth Stages, Size, ...5.0958

### Longevity

POPULATION STUDIES ON INTERTIDAL INVERTEBRATES ...Australia, Gastropods -slugs, conch, snails, Growth Rate, Oregon, Starfishes, ...5.1021

ESTUARINE BIOLOGY--RESPONSE OF LARVAE TO TEMPERATURE AND SALINITY ...Alewife, menhaden, shad, herring, Captive Rearing, Estuaries, Low Temp. -but Above 32f, Maturity & Growth Stages, Water Salinity, ...5.0213

### Maturity & Growth Stages

DEVELOPMENT OF TECHNIQUES FOR THE AQUACULTURE OF POMPANO ...Aquaculture & Fish-farming, Environmental Physiology, Florida, Pathology, Tuna, Mackerel, Albacore..., ...8.0007

UTILIZATION OF ENVIRONMENTAL NUTRITIONAL RESOURCES BY STARFISH ...Digestive System, Environmental Physiology, Invertebrate Nutrition, Metabolism, Starfishes, ...5.0591

POPULATION GENETICS AND LARVAL ECOLOGY OF HAWAIIAN LITTORINA ...Derivatives, Gastropods -slugs, conch, snails, Hawaii, Polymorphism, ...5.0429

SEA LIONS ...Mammal Studies -other, Mark, Tag Or Capture -other, Metamorphosis, Seals, Spawning & Nesting Sites, ...5.0526

INVENTORY OF LARVAL FISH ...Aquatic Ecology, Brackish Water, Fish -non-specific, ...5.0071

CONTROLLED REARING OF DUNGENESS CRAB LARVAE ...Captive Rearing, Crabs, Developmental Physiology, Oregon, ...5.0486

LARVAL STUDY OF THE LOBSTER ...Atlantic Ocean-north, Habitat Studies, Lobsters, Long Island Sound, Mark, Tag Or Capture -other, Plankton Sampling, ...5.0371

EVALUATE THE RESEARCH TECHNIQUES WHICH WILL BE EMPLOYED TO STUDY THE BASIC LIFE HISTORY OF THE RED CRAB (GERYON QUINQUEDENS) ...Age, Crabs, Mark, Tag Or Capture -other, Size, ...5.0494

STOCKING AND SURVIVAL OF STRIPED BASS FINGERLINGS ...Alabama, Basses -sea, white, White Perch, Commercial Fishing, Stocking of Fish & Shellfish, Streams, ...5.0001

PRE-EMERGENT FRY PINK SALMON FORECAST (KODIAK, ALASKA) ...Alaska, Number Or Density, Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, Streams, ...5.0017

LAKE BORGNO - CHANDELEUR SOUND SYSTEM ...Data Acquisition, Gulf of Mexico, Nets, Plankton Sampling, Population Dynamics, Shrimps - Common, ...5.0434

FORECAST OF KODIAK ISLAND PINK SALMON RUNS FROM ABUNDANCE OF JUVENILES IN ESTUARIES ...Alaska, Estuaries, Fishing Gear, Migration, Number Or Density, Salmon -coho, chinook, sockeye..., ...5.0179

POPULATION ESTIMATES OF JUVENILE COHO SALMON IN SIX COASTAL STREAMS ...Environmental Ecology, Population Dynamics, Salmon -coho, chinook, sockeye..., Streams, ...5.0144

DISTRIBUTION OF YOUNG STAGES OF COASTAL FISHES ...Continental Shelf, Estuaries, Fish -non-specific, Number Or Density, Ships and Cruises, ...5.0119

INFLUENCE OF THE PHYSICAL ENVIRONMENT ON DISTRIBUTION OF YOUNG STAGES OF COASTAL GAME FISH ...Continental Shelf, Environmental Ecology, Fish -non-specific, Physical-general, Range Or Territorial Distr., ...5.0211

METHODS OF REARING EGGS AND LARVAE TO JUVENILE STAGES ...Aquaculture & Fish-farming, Captive Rearing, Environmental Physiology, Fish -non-specific, ...8.0010

PHYSIOLOGY AND BEHAVIOR OF LARVAE (PHYSIOECOLOGY OF SHELLFISH PROGRAM) ...Basic Embryology, Behavior, Clams, Oysters, Ph, Acidity, Water, ...5.0373

ECOLOGICAL FACTORS AFFECTING REPRODUCTION OF SHELLFISH (PHYSIOECOLOGY OF SHELLFISH PROGRAM) ...Animal Distr. (non-specific), New York, Oysters, Reproductive System, Spawning & Nesting Sites, ...5.0774

SURVIVAL REQUIREMENTS OF JUVENILE AND ADULT BLUE CRABS ...Biological Rhythms, Crabs, Environmental Physiology, Osmoregulation, Salinity, Size, ...5.0475

ESTIMATION OF JUVENILE ABUNDANCE IN ESTUARINE NURSERIES ...Alewife, menhaden, shad, herring, Aquatic Ecology, Estuaries, Gulf of Mexico, Number Or Density, ...5.0131

ESTUARINE BIOLOGY--RESPONSE OF LARVAE TO TEMPERATURE AND SALINITY ...Alewife, menhaden, shad, herring, Captive Rearing, Estuaries, Longevity, Low Temp. -but Above 32f, Water Salinity, ...5.0213

PINK SALMON INVESTIGATIONS - FRESHWATER ECOLOGY ...Aquatic Ecology, Environmental Ecology, Mortality Rates, Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, ...5.0188

EFFECTS OF CHEMICALS ON THE PHYSIOLOGY OF SEA LAMPREY AMMOCETES (PETROMYZON MARINUS)

## Animal Characteristics

## SUBJECT INDEX

- ...Contamination - Water, Control of Nuisance Species, Environmental Physiology, Lampreys, ...5.0631
- INVESTIGATE SYSTEMATICS AND ECOLOGY OF TUNA LARVAE AND JUVENILES ...Animal Taxonomy, Artificial Insemination, Spawning & Nesting Sites, Tuna, Mackerel, Albacore... , ...5.0079
- EARLY LIFE HISTORY OF COREGONIDS ...Cisco, Lake Herring, Environmental Ecology, Life History Studies, Technique Development, Water Environment -other, ...5.0110
- BEHAVIOR OF LARVAL FISHES ...Behavior, Captive Rearing, Commercial Fishing, Environmental Physiology, Fish -non-specific, ...5.0062
- CONTRIBUTIONS TO THE BIOLOGY OF THE ROYAL RED SHRIMP, HYMENOPENAEUS ROBUSTUS ...Atlantic Ocean-south, Number Or Density, Shrimps - Common, Vertical Distribution, ...5.0421
- PACIFIC FISH PHYSIOLOGY AND BIOCHEMISTRY (SALMON IMMUNOCHEMISTRY) ...Immunology, Salmon - coho, chinook, sockeye..., Stress, ...5.0332
- SYSTEMATICS OF CARANGID FISHES ...Animal Taxonomy, Collections, Handbooks, Pompanos, Scads, Jacks, Species, Comparison of , ...5.0061
- SPECIES LIFE HISTORY AND DISTRIBUTION ...California Current, Fish -non-specific, Life History Studies, Number Or Density, Oceanic Fronts, ...5.0037
- FISH FEEDING AND LIFE STAGE SENSITIVITY STUDIES ...Contamination - Water, Environmental Resistance, Fish, Fish -non-specific, Great Lakes-general, ...5.0276
- DEVELOPMENTAL STUDIES OF SELECTED INVERTEBRATES ...Basic Embryology, Developmental Physiology, Hatchability, Size, ...5.0958

### Mortality Rates

- SIMULATION STUDIES OF ECOLOGICAL COMMUNITIES ...Number Or Density, Population Dynamics, Predation, Productivity - Food Chain, ...5.0862
- MASS MORTALITY OF PACIFIC OYSTERS ALONG THE WASHINGTON COAST ...Bays, Environmental Ecology, Oysters, Pathology, Puget Sound, ...5.0510
- INVESTIGATE THE CAUSE OF MORTALITY OF PACIFIC OYSTERS ALONG THE CALIFORNIA COAST ...California, Environmental Ecology, Oysters, Pathology, Training Grants, Fellowships, ...5.0360
- MASS MORTALITY OF OYSTERS ALONG THE OREGON COAST ...Bays, Invertebrate Pathology, Oregon, Oysters, Pathology, ...5.0488
- STUDIES IN OYSTER PATHOLOGY ...Invertebrate Pathology, Oysters, Pathology, Tissues, ...5.0519
- KVICHAK RIVER TOTAL SMOLT ...Alaska, Censusing, Fish -non-specific, Migration, Nets, Population Dynamics, ...5.0002
- BIOLOGY OF ANADROMOUS ALOSIDS ...Alewife, menhaden, shad, herring, Spawning & Nesting Sites, Streams, Tidal Streams, Virginia, ...5.0150
- WATER QUALITY AS RELATED TO SURVIVAL OF SALMON EGGS AND LARVAE ...Environmental Ecology, Reproduction Studies (general), Salmon & Trout - Non-specific, Spawning & Nesting Sites, Water Quality-general, ...5.0227
- EARLY LIFE OF BOREAL FOOD FISH AND SHELLFISH ...Animal Taxonomy, Fish -non-specific, Life History Studies, Mollusks -non-specific & Other, ...5.0139
- DISTRIBUTION, AGE GROWTH, AND MORTALITY STUDIES OF SALT WATER FISHES OF IMPORTANCE TO SPORT FISHERMEN ...Age, Chesapeake Bay, Drums, Growth Rate, Vertical Distribution, ...5.0155
- TEMPERATURE TOLERANCE OF MARINE ANIMALS THROUGH BEHAVIORAL RESPONSES ...Behavior, Environmental Resistance, Thermal, Water Temperature-non-specific, ...5.0118
- EVALUATION OF THE ATLANTIC FLYWAY SEA DUCK KILL ...Age, Anseriformes -other, Hunting, Sex -non-specific, Species, Comparison of , ...5.0606
- KARLUK LAKE RESEARCH STATION ...Life History Studies, Population Dynamics, Productivity (agricultural), Salmon - coho, chinook, sockeye..., Spawning & Nesting Sites, ...5.0006
- PINK SALMON INVESTIGATIONS - FRESHWATER ECOLOGY ...Aquatic Ecology, Environmental Ecology, Maturity & Growth Stages, Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, ...5.0188

- FUR SEAL RESEARCH, ANATOMY-BEHAVIOR-MORTALITY ...Behavior, Hair, Nutrition -other, Seals, Vertebrate Anatomy, ...5.0672
- OCEAN GROWTH AND MORTALITY OF SALMON ...Growth Rate, Salmon -coho, chinook, sockeye..., Scales, Tags, ...5.0170
- DROPOUT OF SALMON FROM GILL NETS ...Commercial Fishing, Management -other, Nets, Salmon & Trout - Non-specific, Water Salinity, ...5.0177
- EFFECT OF SUPERSATURATION OF DISSOLVED NITROGEN ON MIGRATING SALMONIDS ...Aquatic Ecology, Columbia River, Gases, Dissolved -water, Migration, Nitrogen, Salmon & Trout - Non-specific, ...5.0221
- PROTECTION OF FINGERLING SALMON IN TURBINES ...Construction Land Use Effects, Engineering Structures-general, Migration, Salmon & Trout - Non-specific, Snake River, ...8.0014
- POPULATION DYNAMICS (SHRIMP DYNAMICS PROGRAM) ...Commercial Fishing, Gulf of Mexico, Nets, Population Dynamics, Shrimps - Common, ...5.0503
- PATHOLOGY - EPIZOOTIOLOGY ...Epizootiology, Oysters, Pathology, Protozoa, Protozoa -other, ...5.0441
- PACIFIC OYSTER MORTALITY STUDIES ...Invertebrate Pathology, Oysters, Pacific Ocean-general, Pathology, ...5.0442
- EPIZOOTICS IN EXPERIMENTAL MARINE SHELLFISH POPULATIONS ...Epizootic, Freshwater Mussels, Scallops, Oysters, Pathology, ...5.0520

### Number Or Density

- HYDROGRAPHIC AND BIOLOGICAL SURVEY OF MONT-SWEAG BAY AND VICINITY ...Bays, Maine, Organism Sampling Devices, Vertical Distribution, Zooplankton, ...5.0893
- RADIOELEMENT STUDIES IN THE OCEANS- PLANKTON DISTRIBUTION STUDIES ...Chemical Reactions, Foraminifera, Protozoa -other, Vertical Distribution, ...5.0795
- SEASONAL DISTRIBUTION AND ABUNDANCE OF DEMERSAL FISH AND INVERTEBRATES IN THE MARINE WATERS ADJACENT TO THE MOUTH OF THE COLUMBIA RIVER ...Benthic Fauna, Productivity - Food Chain, Radioactivity-general, Temporal Distribution, Vertical Distribution, ...5.0930
- RESEARCH ON INDO-WEST PACIFIC MARINE MOLLUSKS OF THE FAMILY CONIDAE ...Animal Taxonomy, Gastropods -slugs, conch, snails, Indian Ocean-general, Invertebrate Anatomy, ...5.0517
- DYNAMICS OF OCEANIC PLANKTON ...Growth Rate, Productivity (agricultural), RNA , Zooplankton, ...5.0825
- ICHTHYOFAUNA OF THE FLORIDA CURRENT ...Fish -non-specific, Florida, Temporal Distribution, Vertical Distribution, ...5.0066
- RESEARCH IN MARINE BENTHIC ECOLOGY OFF OREGON ...Benthic Fauna, Environmental Ecology, Oregon, Vertical Distribution, ...5.0916
- SIMULATION STUDIES OF ECOLOGICAL COMMUNITIES ...Mortality Rates, Population Dynamics, Predation, Productivity - Food Chain, ...5.0862
- BIOLOGY OF THE DEEP-SEA BENTHOS ...Atlantic Ocean-general, Benthic Fauna, Tropic, Vertical Distribution, ...5.0902
- AIR-SEA INTERACTION AND PLANKTON ECOLOGY ...Circulation-general, Environmental Ecology, Marine Biology (non-specific), Plankton (non-specific), ...4.0078
- BENTHIC BIOLOGY ...Benthic Organisms (non-specific), Environmental Ecology, Fouling, Marine Biology (non-specific), Temporal Distribution, ...5.0900
- PRELIMINARY STUDY TO DETERMINE ABUNDANCE AND RECRUITMENT OF BOTTOMFISH OFF OREGON ...Nets, Oregon, Pacific Ocean-general, Righteye Flounders, ...5.0136
- TAG DETECTION ...Commercial Fishing, Puget Sound, Salmon - coho, chinook, sockeye..., Streams, Tags, ...8.0148
- A STUDY OF THE SEASONAL ABUNDANCE, DISTRIBUTION AND SPECIES COMPOSITION, WITH DEPTH, OF NEKTON FAUNA, WITH PARTICULAR EMPHASIS ON FISHES ...Fish -non-specific, Life History Studies, Vertical Distribution, Zooplankton, ...5.0114
- SEASONAL ABUNDANCE AND BIOLOGICAL STABILITY OF THE COMMERCIAL SHRIMP OF GEORGIA ...Commercial Fishing, Shrimps - Common, ...5.0419
- PRE-EMERGENT FRY PINK SALMON FORECAST - SOUTHEASTERN ALASKA ...Alaska, Aquatic Ecology, Censusing, Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, ...5.0019

## SUBJECT INDEX

## Animal Characteristics

- OFFSHORE SALMON ABUNDANCE INDEX ...Alaska, Commercial Fishing, Salmon -coho, chinook, sockeye..., Streams, ...5.0028
- MEASUREMENT OF SPAWNING SUCCESS AND FRY QUALITY OF CHUM SALMON UTILIZING A SPAWNING CHANNEL AT BIG BEEF CREEK, WASHINGTON ...Management -other, Quality -non-specific, Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, Washington, ...5.0229
- FISH POPULATION OFF THE ISLAND OF TUTUILA, AMERICAN SAMOA ...American Samoa, Animal Taxonomy, Commercial Fishing, Fish -non-specific, Fishing Gear, ...5.0032
- FISH POPULATIONS OF AMERICAN SAMOA ...American Samoa, Crustacea -non-specific, Fish -non-specific, Fishing Gear, ...5.0033

- THE CEPHALOPODS OF THE CENTRAL PACIFIC ...Octopus, Squid, Cuttlefish..., Vertical Distribution, ...5.0399
- THE SYSTEMATICS AND DISTRIBUTION OF THE WORLD-WIDE SQUID FAMILY BATHYTEUTHIDAE ...Animal Taxonomy, Life History Studies, Octopus, Squid, Cuttlefish..., World Wide, ...5.0400
- DISTRIBUTION OF YOUNG STAGES OF COASTAL FISHES ...Continental Shelf, Estuaries, Fish -non-specific, Maturity & Growth Stages, Ships and Cruises, ...5.0119
- ABUNDANCE AND MIGRATION STUDIES OF THE WHITE SEAPERCH (P. FURCATUS), PILE PERCH (R. VACCA), STRIPED SEAPERCH (E. LATERALIS) AND STARRY FLOU ...Environmental Ecology, Fish -other, Migration, Oregon, Righteye Flounders, ...5.0934
- ABUNDANCE AND AVAILABILITY OF PRE-RECRUIT HERRING ...Alewife, menhaden, shad, herring, Aquatic Ecology, Environmental Ecology, Life History Studies, Vertical Distribution, ...5.0208
- EFFECT OF ENVIRONMENTAL CHANGES ON BLUE CRAB ABUNDANCE ...Crabs, Environmental Ecology, Life History Studies, Migration, Population Dynamics, ...5.0473
- ESTIMATION OF JUVENILE ABUNDANCE IN ESTUARINE NURSERIES ...Alewife, menhaden, shad, herring, Aquatic Ecology, Estuaries, Gulf of Mexico, Maturity & Growth Stages, ...5.0131
- SAMPLING OF THE ATLANTIC COMMERCIAL CATCH ...Alewife, menhaden, shad, herring, Atlantic Ocean-general, Commercial Fishing, Nets, ...5.0129
- NAKNEK SYSTEM RED SALMON STUDIES ...Alaska, Growth Rate, Migration, Salmon -coho, chinook, sockeye..., Streams, ...5.0005
- CHUM SALMON INVESTIGATIONS ...Environmental Ecology, Estuaries, Food Supply, Growth Rate, Life History Studies, Salmon -coho, chinook, sockeye..., ...5.0007
- INTERRELATIONS OF SMELT WITH NATIVE SPECIES ...Competition, Food Supply, Lake Superior, Life History Studies, Smelts, ...5.0182
- FISHES TAKEN INCIDENTAL TO SHRIMP TRAWLING ...Atlantic Ocean-south, Fish -non-specific, Nets, Shrimps - Common, ...5.0072
- MARINE BIOLOGICAL INVESTIGATIONS - SURFACE ZOOPLANKTON PROJECT ...Alaska, Plankton Sampling, Vertical Distribution, Zooplankton, ...5.0737
- ESTUARINE STUDIES OF SOUTHEASTERN ALASKA ...Alaska, Benthic Fauna, Environmental Ecology, Estuaries, Vertical Distribution, ...5.0852
- CONTRIBUTIONS TO THE BIOLOGY OF THE ROYAL RED SHRIMP, HYMENOPENAEUS ROBUSTUS ...Atlantic Ocean-south, Maturity & Growth Stages, Shrimps - Common, Vertical Distribution, ...5.0421
- GROUND FISH INVESTIGATIONS (POTENTIAL YIELD OF UNDERUTILIZED GROUND FISH STOCKS) ...Codfishes, Hake, Commercial Fishing, Legislation, Rockfish, Scorpionfish, ...5.0171
- ANALYSIS OF JAPANESE CATCH STATISTICS ...Commercial Fishing, Japan, Pacific Ocean-north, Salmon -coho, chinook, sockeye..., ...5.0166
- POPULATION DYNAMICS (BIOMETRICS) OF EXPLOITED FISH GROUPS OF THE NORTH PACIFIC OCEAN AND PACIFIC COAST ...Marine Biology, Meteorological Studies, Model Studies, Pacific Ocean-north, Population Dynamics, ...5.0167
- THE OCEANOGRAPHY OF NEW ENGLAND FISHING BANKS ...Continental Shelf, Fish -other, Vertical Distribution, Water Environment -other, ...5.0901
- PRODUCTIVITY MEASURES ...Ocean Currents-other Organism Sampling Devices, Pacific Ocean-east, Primary Productivity, Productivity - Food Chain, Zooplankton, ...5.0901
- SPECIES LIFE HISTORY AND DISTRIBUTION ...California Current, Fish -non-specific, Life History Studies, Maturity & Growth Stages, Oceanic Fronts, ...5.0037

### Productivity (agricultural)

- DYNAMICS OF OCEANIC PLANKTON ...Growth Rate, Number Or Density, RNA , Zooplankton, ...5.0825

## Animal Characteristics

## SUBJECT INDEX

- PRODUCTIVITY OF OCEANIC POPULATIONS OF VERTICALLY MIGRATING ANIMALS ...Migration, Plankton (non-specific), Population Dynamics, Vertical Distribution, ...5.1019
- COOK INLET SMOLT ENUMERATION STUDY ...Alaska, Censusing, Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, ...5.0015
- ECONOMIC ANALYSIS OF THE MARKET STRUCTURE OF THE COMMERCIAL FISHING INDUSTRY IN THE NORTHEAST ...Commercial Fishing, Fish & Shellfish, Market Structure, Marketing, Math Models, Northeast, ...6.0151
- CONSTRUCTION OF A NEW SERIES OF SMALL REPLICATION PONDS AND RESEARCH ON THE FACTORS LIMITING FISH PRODUCTION IN IMPOUNDED WATERS ...Aquaculture & Fish-farming, Ponds, ...8.0001
- CULTURE OF ATLANTIC CROAKER IN BRACKISH WATER PONDS ...Aquaculture & Fish-farming, Brackish Water, Captive Rearing, Drums, Management, Ponds, ...8.0005
- SPRING CHINOOK SALMON ECOLOGY STUDY ...Aquatic Ecology, Mark, Tag Or Capture -other, Oregon, Physical-general, Salmon -coho, chinook, sockeye..., Streams, ...5.0218
- KARLUK LAKE RESEARCH STATION ...Life History Studies, Mortality Rates, Population Dynamics, Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, ...5.0006
- GULF OF ALASKA DEMERSAL FISH INVESTIGATIONS ...Fish -non-specific, Gulf of Alaska, Population Dynamics, Vertical Distribution, ...5.0009

### Quality -non-specific

- SYSTEMS ENGINEERING AND DEVELOPMENT OF COMMERCIALLY VALUABLE MARINE RESOURCES IN THE DELAWARE AREA ...Aquaculture & Fish-farming, Commercial Fishing, Delaware, Fish & Shellfish, Oysters, ...8.0002
- MEASUREMENT OF SPAWNING SUCCESS AND FRY QUALITY OF CHUM SALMON UTILIZING A SPAWNING CHANNEL AT BIG BEEF CREEK, WASHINGTON ...Management -other, Number Or Density, Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, Washington, ...5.0229
- ESTIMATING THE VALUE ADDED TO SEAFOOD PRODUCTS LANDED IN GEORGIA AT THE VARIOUS STAGES OF THE MARKETING CHANNEL ...Fish -non-specific, Georgia, Processing, Shellfish -non-specific, ...6.0020

### Sex

#### Female

- METABOLIC ADAPTATION TO COLD ...Cold, Hypothermia, Korea, Metabolism in Disease, Regulation, ...6.0092
- EVOLUTION OF ALL-FEMALE FISHES ...Gambusia, Molly, Other, Reproduction Studies (general), ...5.0247
- ISOLATION AND FUNCTION OF OVARIAN EXTRACTS CAPABLE OF INDUCING COCYTE SHEDDING AND OOCYTE NUCLEAR MATURATION IN STARFISH ...Differentiation Mechanism, Hormones, Nucleic Acids, Reproductive System, Starfishes, ...5.0620

#### Sex -non-specific

- COOK INLET CATCH AND ESCAPEMENT AGE AND SEX COMPOSITION STUDIES ...Age, Alaska, Migration, Nets, Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, ...5.0014
- EVALUATION OF THE ATLANTIC FLYWAY SEA DUCK KILL ...Age, Anseriformes -other, Hunting, Mortality Rates, Species, Comparison of, ...5.0606

### Size

- EXPERIMENTAL STUDIES OF BEHAVIOR IN A CICHLID FISH ...Behavior, Parental Care, Sex, Tilapia, Cichlids, ...5.0232
- TAGGING ENGLISH SOLE, PETRALE SOLE, AND PACIFIC COD ...Codfishes, Hake, Commercial Fishing, Migration, Righteye Flounders, Tags, Washington, ...5.0158
- TAG LOSS ...Captive Rearing, Salmon -coho, chinook, sockeye..., Tags, Washington, Weight, ...5.0157
- EVALUATE THE RESEARCH TECHNIQUES WHICH WILL BE EMPLOYED TO STUDY THE BASIC LIFE HISTORY OF THE RED CRAB (GERYON QUINQUEDENS) ...Age, Crabs, Mark, Tag Or Capture -other, Maturity & Growth Stages, ...5.0494
- SAMPLING OF GROUND FISH STOCKS ...Age, Bone, Codfishes, Hake, Proprioceptors, Righteye Flounders, ...5.0160

- POPULATION STRUCTURE OF THE LOBSTER ...Commercial Fishing, Diving and Scuba, Lobsters, Long Island Sound, Population Dynamics, ...5.0688
- RELATIONSHIP BETWEEN WATER TEMPERATURE AND SIZE OF PARASITIC COPEPODS ...Collections, Copepods, Host Specificity, Temperature, Water Temperature-non-specific, ...5.0390
- SURF CLAM POPULATION DYNAMICS ...Age, Clams, Commercial Fishing, Continental Shelf, Population Dynamics, ...5.0448
- SURVIVAL REQUIREMENTS OF JUVENILE AND ADULT BLUE CRABS ...Biological Rhythms, Crabs, Environmental Physiology, Maturity & Growth Stages, Osmoregulation, Salinity, ...5.0475
- FLUCTUATIONS IN SPECIES COMPOSITION AND YEAR-CLASS STRENGTH OF COMMERCIAL LANDINGS ...Commercial Fishing, Lake Erie, Lakes, Scales, Species, Comparison of, ...5.0135
- YOUNG FISHES OF A TIDAL ZONE ...Estuaries, Fish -non-specific, Habitat Studies, Life History Studies, Temporal Distribution, ...5.0073
- ASSESSMENT OF CENTRAL PACIFIC TUNA RESOURCES ...Commercial Fishing, Pacific Ocean-general, Population Dynamics, Tuna, Mackerel, Albacore..., ...5.0082
- FISH POPULATION PARAMETERS ...Age, Biological Rhythms, Life History Studies, Population Dynamics, ...5.0039
- DEVELOPMENTAL STUDIES OF SELECTED INVERTEBRATES ...Basic Embryology, Developmental Physiology, Hatchability, Maturity & Growth Stages, ...5.0958

### Species, Comparison of

- EVALUATION OF THE ATLANTIC FLYWAY SEA DUCK KILL ...Age, Anseriformes -other, Hunting, Mortality Rates, Sex -non-specific, ...5.0606
- FLUCTUATIONS IN SPECIES COMPOSITION AND YEAR-CLASS STRENGTH OF COMMERCIAL LANDINGS ...Commercial Fishing, Lake Erie, Lakes, Scales, Size, ...5.0135
- SYSTEMATICS OF CARANGID FISHES ...Animal Taxonomy, Collections, Handbooks, Maturity & Growth Stages, Pompanos, Seads, Jacks, ...5.0061

### Stress

- ECOLOGICAL EFFECTS OF ENVIRONMENTAL & LOW LEVEL POLLUTION STRESSES ON METABOLIC REQUIREMENTS FOR GROWTH OF GULF COAST FISHES ...Environmental Ecology, Gulf of Mexico, Metabolism, Pollution - Effects of, Pollution Effects, Pollution Sources-general, ...5.0328
- MARINE ECOLOGICAL STUDIES ...Environmental Ecology, Habitat Studies, Intertidal Areas, Invertebrates -non-specific, ...5.0917
- PACIFIC FISH PHYSIOLOGY AND BIOCHEMISTRY (SALMON IMMUNOCHEMISTRY) ...Immunology, Maturity & Growth Stages, Salmon -coho, chinook, sockeye..., ...5.0332
- PHARMACOLOGY OF METAL POISONING IN ESTUARINE FISHES ...Contamination - Water, Estuaries, Killifishes - Cyprinodon, Metals -non-specific, ...5.0324

### Weight

- TAG LOSS ...Captive Rearing, Salmon -coho, chinook, sockeye..., Size, Tags, Washington, ...5.0157

## Animal Parasitology

### Ectoparasites

- PARASITIC COPEPODA %CRUSTACEA FROM INVERTEBRATES AND FISHES ...Animal Taxonomy, Copepods, Indian Ocean-general, Invertebrate Anatomy, ...5.0451
- COPEPOD CRUSTACEANS PARASITIC ON FISHES ...Collections, Copepods, Fish -non-specific, Indian Ocean-general, Ships and Cruises, Vertical Distribution, ...5.0368
- PARASITES OF ANTARCTIC VERTEBRATES AND INVERTEBRATES ...Animal Taxonomy, Antarctic Ocean, Collections, Endoparasites -other, ...5.0658
- COPEPODS PARASITIC ON NEEDLEFISHES ...Aquatic Ecology, Copepods, Fish -other, Nomenclature, Classification, Organic Evolution, ...5.0389
- COPEPODS PARASITIC ON SHARKS OF THE WEST COAST OF FLORIDA ...Animal Taxonomy, Copepods, Florida, Sharks, ...5.0391

SYSTEMATICS OF CALIGOID COPEPODS ...Animal Taxonomy, Copepods, Host Specificity, Nomenclature, Classification, ...5.0392

LIFE HISTORY OF THE SHARK COPEPOD, KROYERIA DISPAR ...Copepods, Developmental Physiology, Life History Studies, Whole Body Culture & Rearing, ...5.0393

THE ROLE OF THE SENORITA, OXYJULIS CALIFORNICA, AS A CLEANING ORGANISM ...California, Fish -other, Fishery Development -other, Interbiotic Relat.(non-specif), ...5.0193

LAKE HURON CHEMICAL CONTROL ...Bioindicators, Chemical-general, Flow Characteristics -water, Lake Huron, Selectivity, ...6.0159

**Endoparasites**

**Endoparasites -other**

PARASITES OF ANTARCTIC VERTEBRATES AND INVERTEBRATES ...Animal Taxonomy, Antarctic Ocean, Collections, Ectoparasites, ...5.0658

COMPARATIVE BIOCHEMICAL AND MORPHOLOGICAL CHARACTERISTICS OF MARINE FUNGI FROM SHELLFISH ...Fungal Culture, Histochemistry - Cytochem, Histology and Cytology, Marine Fungi (non-specific), Plant Taxonomy, ...5.0791

BIOLOGICAL ACTIVITIES OF MARINE FUNGI ...Host-parasite Interactions, Invertebrate Pathology, Marine Fungi (non-specific), Oysters, Pathological Physiology, Plant Developmental Biology, ...5.0699

**Helminths**

AMINO ACID & PROTEIN METABOLISM IN SCHISTOSOMES ...Amino Acids -non-specific, Flukes, Metabolism, Proteins -non-specific, ...5.0621

SYSTEMATICS OF DEEP SEA TREMATODES ...Animal Taxonomy, Organic Evolution, Trematoda -other, Vertical Distribution, ...5.0646

SYSTEMATIC STUDIES OF CERTAIN MARINE PARASITIC WORMS ...Animal Taxonomy, Life History Studies, Red Worms, Eye Works... , Trematoda -other, ...5.0541

PARASITISM IN DEEPSEA FISHES ...Fish -non-specific, Host Specificity, Protozoa, Vertical Distribution, ...5.0243

EPIDEMIOLOGY OF SALMON POISONING DISEASE ...Epizootic, Infectious Conditions and Dis, Pathology, Salmon & Trout - Non-specific, Water Salinity, ...5.0306

NATURAL HISTORY OF SALMON POISONING RICKETTSIAE ...Flukes, Invertebrates, Neorickettsiae Helmint, Reservoirs, ...5.0842

EPIDEMIOLOGY OF SALMON POISONING DISEASE ...Flukes, Neorickettsiae Helmint, Pathology, Salmon & Trout - Non-specific, Virulence and Pathogenicity, ...5.0307

PARASITES OF PHILIPPINE FISHES ...Animal Distr. (non-specific), Aquatic Ecology, Fish -non-specific, Philippines, ...5.0251

BLOOD PARASITES OF NORTHWEST FISHES ...Blood Plasma and Serum, Codfishes, Hake, Protozoa, Sculpins, Trematoda - other, ...5.0335

**Protozoa**

PARASITISM IN DEEPSEA FISHES ...Fish -non-specific, Helminths, Host Specificity, Vertical Distribution, ...5.0243

OCCURRENCE OF THE PROTOZOAN PARASITE CERATOMYXA IN ADULT PACIFIC SAIMON AND STEELHEAD TROUT ...Infectious Conditions and Dis, Pathology, Protozoa - other, Rainbow Trout, Steelhead Trout, Vertebrate Pathology, ...5.0308

ULTRASTRUCTURAL STUDIES OF PARASITIC AND SAPROPHYTIC FUNGI AND PROTOZOA ASSOCIATED WITH MARINE INVERTEBRATES ...Cell Cycle, Electron Microscopy, Host-parasite Interactions, Myxomycetes, ...5.0839

PROTOZOOLOGY ...Animal Taxonomy, Axenic Culture, Histology and Cytology, Invertebrate Nutrition, ...5.0443

PATHOLOGY - EPIZOOTIOLOGY ...Epizootiology, Mortality Rates, Oysters, Pathology, Protozoa -other, ...5.0441

PARASITOLOGY ...Ciliates, Crabs, Oysters, Pathology, Protozoa -other, ...5.0440

BLOOD PARASITES OF NORTHWEST FISHES ...Blood Plasma and Serum, Codfishes, Hake, Helminths, Sculpins, Trematoda - other, ...5.0335

**Host Resistance**

THERMAL ACCLIMATION PATTERNS IN PARASITES AND HOSTS ...Adaptation, Host Specificity, Life History Studies, Monogenea, Water Temperature-non-specific, ...5.0643

**Host Specificity**

PARASITISM IN DEEPSEA FISHES ...Fish -non-specific, Helminths, Protozoa, Vertical Distribution, ...5.0243

BIOLOGY, MORPHOLOGY, AND EVOLUTION OF THE DISK-FISHES OR SHARKSUCKERS ...Animal Taxonomy, Ethological, Fish -other, Vertebrate Anatomy, ...5.0250

RELATIONSHIP BETWEEN WATER TEMPERATURE AND SIZE OF PARASITIC COPEPODS ...Collections, Copepods, Size, Temperature, Water Temperature-non-specific, ...5.0390

SYSTEMATICS OF CALIGOID COPEPODS ...Animal Taxonomy, Copepods, Ectoparasites, Nomenclature, Classification, ...5.0392

THERMAL ACCLIMATION PATTERNS IN PARASITES AND HOSTS ...Adaptation, Host Resistance, Life History Studies, Monogenea, Water Temperature-non-specific, ...5.0643

**Parasitology -other**

ADMINISTRATION OF WHALING ACT, COMMERCIALY UTILIZED WHALFS ...Age, Food Supply, Growth Rate, Mammals, Reproduction Studies (general), ...5.0668

PINK SALMON INVESTIGATIONS - EARLY SEA LIFE OF SALMON ...Alaska, Environmental Physiology, Life History Studies, Water Temperature-non-specific, ...5.0187

**Reservoirs**

NATURAL HISTORY OF SALMON POISONING RICKETTSIAE ...Flukes, Helminths, Invertebrates, Neorickettsiae Helmint, ...5.0842

ELASMOBRANCH PHARMACOLOGY ...Drug Evaluation, Fish Repellents, Sharks, ...6.0119

MARINE ANIMAL TOXINS ...Fish Repellents, Sharks, Toxins, ...6.0116

**Toxins**

CHARACTERIZATION AND MODE OF ACTION OF PROTEIN VENOMS OF MARINE ANIMALS ...Lecithin, Mechanism of Action, Sea Urchins & Other Echinoderm, Toxicology, Venom, ...6.0102

MARINE ANIMAL TOXINS ...Fish Repellents, Mechanism of Action, Sharks, ...6.0116

MARINE TOXINS OF THE TROPICAL PACIFIC ...Algal Metab.(non-specific &ot), Fish -non-specific, Pacific Ocean-general, Polynesia, Toxicology, ...6.0113

**Plant Origin**

LABORATORY STUDIES OF TOXIC DINOFLAGELLATES ...Algal Culture, Algal Toxins, Gonyaulax, Gulf of Mexico, Gymnodinium, ...5.0837

**Toxins -non-specific**

BIOCHEMISTRY AND PHYSIOLOGICAL ECOLOGY OF POISONED FISH ...Enzymes -non-specific, Fish -non-specific, Metabolism, Muscle, Pathology, ...5.0305

**Toxins -other**

HEMATOLOGICAL CHANGES IN *F. HETEROCLITUS* UPON EXPOSURE TO TOXIC METALS ...Blood Cells, Blood Plasma and Serum, Cadmium, Killifishs - Cyprinodon, Lead, ...5.0325

COMPARATIVE TOXICITIES OF METALS TO ESTUARINE FISHES ...Bioassays, Estuaries, Industrial Wastes, Killifishs - Cyprinodon, Solid Waste, ...6.0184

## SUBJECT INDEX

### Animal Resistance to ....

#### Environment Resistance

- TEMPERATURE AND SALINITY TOLERANCE OF THE SAND SHRIMP, CRANGON SEPTEMPINOSA ...Environmental Physiology, Estuaries, Salinity, Shrimps - Common, Temperature, ...5.0437
- EVOLUTIONARY DIVERGENCE OF ONUPHID POLYCHAETES ...Comparative Physiology, Environmental Physiology, Invertebrate Nutrition, Lugworms, Marine Segmentedworm, Water Temperature-non-specific, ...5.0663
- ENDOCRINE REGULATED PROCESSES IN TELEOST FISHES ...Comparative Physiology, Fish -other, Hypophysectomy, Osmoregulation, Pituitary, ...5.0288
- MOVEMENTS OF FRESHWATER CATFISH IN THE ESTUARIES OF SOUTHWEST LOUISIANA ...Blue Catfish, White Catfish, Estuaries, Louisiana, Migration, Water Salinity, ...5.0090
- TEMPERATURE TOLERANCE OF MARINE ANIMALS THROUGH BEHAVIORIAL RESPONSES ...Behavior, Mortality Rates, Thermal, Water Temperature-non-specific, ...5.0118
- FISH HOLDING AND LIFE STAGE SENSITIVITY STUDIES ...Contamination - Water, Fish, Fish -non-specific, Great Lakes-general, Maturity & Growth Stages, ...5.0276
- OPERANT OSMOTIC REGULATION IN A MARINE ANIMAL ...Learning and Retention, Octopus, Squid, Cuttlefish... , Osmoregulation, Water Salinity, ...5.0664

#### Animal Taxonomy

- SYSTEMATICS OF THE ANTARCTIC AND SUBANTARCTIC GAMMARIDEAN AMPHIPODA ...Abyssal, Antarctic Ocean, Bathyal, Shrimp - Amphipods, Vertical Distribution, ...5.0359
- PARASITIC COPEPODA %CRUSTACEA FROM INVERTEBRATES AND FISHES ...Copepods, Ectoparasites, Indian Ocean-general, Invertebrate Anatomy, ...5.0451
- DISTRIBUTION AND BIOLOGY OF PACIFIC ZOOPLANKTON ...Pacific Ocean-general, Productivity - Food Chain, Range Or Territorial Distr. , Vertical Distribution, Zooplankton, ...5.0745
- RESEARCH ON INDO-WEST PACIFIC MARINE MOLLUSKS OF THE FAMILY CONIDAE ...Gastropods -slugs,conch,snails, Indian Ocean-general, Invertebrate Anatomy, Number Or Density, ...5.0517
- THE PORIFERA OF FANNING ISLAND, CENTRAL PACIFIC ...Dispersion -other, Environmental Effects-geologic, Line Islands, Porifera, ...5.0539
- CONTINUED STUDIES OF THE SYSTEMATICS AND ZOOGEOGRAPHY OF WESTERN ATLANTIC CAECIDAE ...Atlantic Ocean-general, Derivatives, Gastropods -slugs,conch,snails, Invertebrate Anatomy, Publications -other, ...5.0696
- THE ALPHEID SHRIMP OF AUSTRALIA ...Australia, Collections, Publications -other, Shrimps - Common, ...5.0425
- MONOGRAPH OF THE CEPHALOPODS OF THE NORTH ATLANTIC ...Atlantic Ocean-north, Depth, Nomenclature, Classification, Optical, Publications -other, Salinity, Temperature, ...5.0411
- CYTOLOGICAL CHARACTERISTIC ...Basic Embryology, Porifera, Speciation, Structural Functions, ...5.0557
- A SYSTEMATIC STUDY OF ENTOCYTHRID OSTRACODS ...Madagascar-malagasy Republic, New Zealand, Publications -other, Shrimps - Seed Or Mussel, South America, ...5.0492
- CHONOTRICH CILIATE PROTOZOANS ...Age, Ciliates, Invertebrate Anatomy, Life History Studies, Range Or Territorial Distr. , ...5.0742
- TAXONOMY AND ECOLOGY OF NEARSHORE MARINE OSTRACODA ...Biofacies, Class Ostracoda, Ecological, Environmental Ecology, Paleoenvironments, Shrimps - Seed Or Mussel, ...5.0707
- SYSTEMATIC STUDIES ON HERMIT CRABS AND OTHER DECAPOD CRUSTACEANS ...Atlantic Ocean-south, Crabs, Developmental Physiology, Life History Studies, ...5.0408
- A COMPARATIVE SYSTEMATIC INVESTIGATION OF MARINE CILIATES IN THE HOLOTRICHOUS PROTOZOAN ORDER HYMENOSTOMATIDA ...Cilia and Flagellae, Ciliates, Comparative Physiology, Invertebrate Anatomy, ...5.0840
- CYTOTAXONOMIC STUDIES OF TELEOST FISHES ...Abyssal, Blood Cells, Minnows, Sets of Chromosomes, ...5.0242

- ORGANIZATION OF THE ACADEMYS COLLECTION OF RECENT MARINE, TERRESTRIAL, AND FRESHWATER INVERTEBRATES ...Collections, Invertebrates -non-specific, ...5.0752
- YEAR-ROUND PROGRAM OF RESEARCH IN MARINE ECOLOGY ...Aquatic Ecology, Marine Biology (non-specific), Plant Ecology (non-specific), Plant Taxonomy, Training Grants, Fellowships, ...5.0899
- REVISION OF THE CLASSIFICATION AND PHYLOGENY OF THE SUBORDER BALANOMORPHA (CIRRIPEDIA - THORACICA) ...Barnacles, Collections, Handbooks, Nomenclature, Classification, Vertical Distribution, ...5.0704
- ECOLOGY OF SKELETAL PLANKTON ...Collections, Flagellates, Gastropods -slugs,conch,snails, Paleoenvironments, Temporal Distribution, Vertical Distribution, ...5.0997
- MARINE VERTEBRATES OF THE CALIFORNIA PENINSULA ...California, Environmental Ecology, Range Or Territorial Distr. , Temperature, ...5.0554
- RELATIONSHIPS AMONG POPULATIONS OF LIMNORIA TRIPUNCTATA ...Isopods, Population Dynamics, Reproductive System, ...5.0477
- RESEARCH TRAINING IN MARINE BIOLOGY, PALEONTOLOGY AND SYSTEMATIC ZOOLOGY ...Invertebrates -non-specific, Oceanography-general, Paleontology, Training Grants, Fellowships, ...11.0003
- THE SYSTEMATICS AND ZOOGEOGRAPHY OF THE BRYOZOAN FAUNA OF THE HAWAIIAN ISLANDS ...Australian, Bryozoa, Collections, Hawaii, Range Or Territorial Distr. , ...5.0542
- SYSTEMATICS OF DEEP SEA TREMATODES ...Helminths, Organic Evolution, Trematoda -other, Vertical Distribution, ...5.0646
- CYTOTAXONOMY OF SPECIES OF RELATED PELECYPOD MOLLUSKS ...Clams, Derivatives, Invertebrate Anatomy, Oysters, Selection & Breeding, ...5.0413
- LARVAL DEVELOPMENT OF SCYLLARIDEAN LOBSTERS ...Developmental Physiology, Environmental Physiology, Invertebrate Nutrition, Laboratory, Lobsters, ...5.0409
- NORTH AMERICAN POST-OLIGOCENE CYTHERID OSTRACODS ...Invertebrate Anatomy, Life History Studies, Nearctic, Phylogenies, Shrimps - Seed Or Mussel, ...7.0179
- REPRODUCTIVE RELATIONSHIPS AMONG POPULATIONS OF A MARINE WOOD-BORING ISOPOD ...Invertebrate Anatomy, Isopods, Population Dynamics, Reproductive System, ...5.0414
- SYSTEMATICS AND DISTRIBUTION OF WORMFISHES (MICRODESMIDAE) ...Bone, Collections, Fish -other, Vertebrate Anatomy, Vertical Distribution, ...5.0115
- MONOGRAPH OF THE FISHES OF THE ORDER PLECTOGNATHI ...Bone, Comparative Anatomy, Fish -other, Publications -other, Vertebrate Anatomy, ...5.0146
- ASCIDIAN SPECIES ON THE ATLANTIC CONTINENTAL SHELF ...Atlantic Ocean-north, Continental Shelf, Range Or Territorial Distr. , Sea Squirts - Tunicates, Vertical Distribution, ...5.0609
- SYSTEMATIC STUDIES OF CERTAIN MARINE PARASITIC WORMS ...Helminths. Life History Studies, Red Worms, Eye Worms... , Trematoda -other, ...5.0541
- SYSTEMATIC AND DISTRIBUTIONAL STUDY OF DEEP-SEA ECTOPROCTA (BRYOZOA) ...Adaptation, Bryozoa, Ecological, Vertical Distribution, ...5.0650
- SYSTEMATIC STUDIES OF SPONGES OF THE JAMAICAN FORE-REEF SLOPE ...Habitat Studies, Invertebrate Anatomy, Jamaica, Porifera, Reefs, ...5.0558
- FAMILIAL RELATIONSHIPS IN TELEOST FISHES ...Comparative Anatomy, Fish -other, Genetic, Karyotypes, Nomenclature, Classification, ...5.0148
- SYSTEMATICS OF MARINE SYMBIOTIC CRUSTACEA FROM INVERTEBRATES ...Barnacles, Copepods, Life History Studies, Symbiosis, ...5.0516
- REVISION OF GENERA AND SUBGENERA OF WATER MITES OF THE WORLD ...Growth, Moulting & Metamorph, Nomenclature, Classification, Publications -other, Ticks & Mites, World Wide, ...5.0627
- GENERAL SYSTEMATIC STUDIES OF THE OCTOCORALLIA OF THE TROPICAL ATLANTIC ...Anthozoa, Tropic, ...5.0589
- GROWTH LAYERING IN BIVALVED MOLLUSKS - AN AID IN PALEOBIOGEOGRAPHIC INTERPRETATION ...Biological Rhythms, Environmental Physiology, Freshwater Mussels, Scallops, Growth Rate, Invertebrate Physiology, ...5.0355

## SUBJECT INDEX

## Animal Taxonomy

- ECOLOGICAL INVESTIGATIONS OF MCMURDO SOUND ZOOPLANKTON ...Antarctica, Migration, Vertical Distribution, Zooplankton, ...5.0756
- STUDY OF RADIOLARIA IN SURFACE SEDIMENTS OF THE NORTHEAST PACIFIC OCEAN ...Biogenous, Pacific Ocean-north, Protozoa -other, Vertical Distribution, ...7.0187
- STABLE ISOTOPE FRACTIONATION IN ECHINODERM CALCITE ...Biogeochemical Process, Calcite, Carbon, Living Organisms, Marine Organisms, Oxygen, Sea Feathers, sea Lily... , Sea Urchins & Other Echinoderm, ...7.0085
- PYCNOGONIDA OF THE ANTARCTIC REGIONS ...Antarctica, Benthic Fauna, Collections, Sea Spiders, ...5.0647
- SYSTEMATIC STUDIES OF ANTARCTIC COPEPODS ...Antarctic Ocean, Copepods, Mixing, ...5.0461
- COOPERATIVE SYSTEMATICS STUDIES IN ANTARCTIC BIOLOGY ...Antarctica, Cooperative-studies, Equipment Purchase Operation, Invertebrates -non-specific, ...5.0581
- POLYCHAETES AND ECHINODERMS IN THE LABRADOR SEA ...Brittle Stars, Labrador Sea, Lugworms, Marine Segmentedworm, Reproductive System, Starfishes, ...5.0603
- SYSTEMATICS OF ANTARCTIC HYMENOSTOMATIDA (PROTOZOA) ...Antarctica, Aquatic Ecology, Ciliates, Habitat Studies, ...5.0815
- BIOLOGY OF THE ANTARCTIC BRACHIOPOD FAUNA ...Museum, Range Or Territorial Distr. , ...5.0454
- PARASITES OF ANTARCTIC VERTEBRATES AND INVERTEBRATES ...Antarctic Ocean, Collections, Ectoparasites, Endoparasites -other, ...5.0658
- SYSTEMATICS AND ZOOGEOGRAPHY OF ANTARCTIC CEPHALOPODS ...Antarctic Ocean, Australian, Octopus, Squid, Cuttlefish... , Publications -other, ...5.0412
- DRIFT-STATION BIOLOGY ...Alaska, Arctic Ocean, Oceanic Fronts, Productivity - Food Chain, Sea Ice, ...5.0743
- SYSTEMATICS, BIOLOGY, AND HYDROGRAPHIC RELATIONS OF SOME SPECIES OF CALANUS (CRUSTACEA, COPEPODA) ...Copepods, Invertebrate Anatomy, Oceanic Fronts, Vertical Distribution, ...5.0367
- TAXONOMY AND DISTRIBUTION OF CLUPEOIDS AND REVISION OF THE GENUS ILISHA OF THE FAMILY CLUPEIDAE ...Alewife, menhaden, shad, herring, Handbooks, Indian Ocean-general, Nomenclature, Classification, Range Or Territorial Distr. , ...5.0088
- ECOLOGICAL STUDIES OF ROCKY SUBTIDAL AREAS ...Habitat Studies, Marine Plants, Plant Taxonomy, ...5.0865
- FISH POPULATION OFF THE ISLAND OF TUTUILA, AMERICAN SAMOA ...American Samoa, Commercial Fishing, Fish -non-specific, Fishing Gear, Number Or Density, ...5.0032
- TAXONOMY AND ECOLOGY OF INSHORE MARINE MICROBIOTA ...Algac- General, Aquatic Ecology, Plant Taxonomy, Protozoa -other, Range Or Territorial Distr. , ...5.0768
- SYSTEMATICS, ZOOGEOGRAPHY, AND ECOLOGY OF ELASMOBRANCHS OF THE WESTERN ATLANTIC OCEAN ...Aquatic Ecology, Atlantic Ocean-general, Chondrichthyes -other, Nearctic, ...5.0132
- REFERENCE COLLECTION OF GULF MARINE ANIMALS ...Collections, Gulf of Mexico, Invertebrates -non-specific, Vertebrates -non-specific, ...5.0657
- SYSTEMATICS MORPHOLOGY AND ECOLOGY OF THE GENUS ERVILIA (MOLLUSCA: PELECYPODA) IN THE WESTERN ATLANTIC ...Atlantic Ocean-general, Ecology (animal), Freshwater Mussels, Scallops, Invertebrate Anatomy, ...5.0458
- THE EPICARIDEA OF THE EASTERN PACIFIC ...Isopods, Pacific Ocean-east, ...5.0353
- OREGON FISHES - THEIR CLASSIFICATIONS, DISTRIBUTIONS AND LIFE HISTORIES ...Fresh Water, Life History Studies, Oregon, Vertical Distribution, ...5.0137
- OREGON FISHES - THEIR CLASSIFICATION, DISTRIBUTION AND BIOLOGY ...Fish -non-specific, Fresh Water, Oregon, Vertical Distribution, ...5.0138
- EARLY LIFE OF BOREAL FOOD FISH AND SHELLFISH ...Fish -non-specific, Life History Studies, Mollusks -non-specific & Other, Mortality Rates, ...5.0139
- ANALYSIS OF SALMONID SCALES ...Age, Columbia River, Growth Rate, Rainbow Trout, Steelhead Trout, Salmon -coho, chinook, sockeye..., Scales, ...5.0315
- BENTHIC MARINE FAUNA OF THE UPPER SHELF OFF VIRGINIA ...Benthic Fauna, Benthic-bottom, Continental Shelf, Organism Sampling Devices, Virginia, ...5.0660
- SYSTEMATICS AND ZOOGEOGRAPHY OF THE BLENNIOID FISHES ...Bone, Fish -other, Nomenclature, Classification, World Wide, ...5.0051
- THE TAXONOMY AND ZOOGEOGRAPHY OF THE POLYCHAETOUS ANNELIDS OF THE GULF OF MEXICO AND THE CARIBBEAN SEA ...Caribbean Sea, Gulf of Mexico, Lugworms, Marine Segmentedworm, Neotropical, ...5.0569
- SYSTEMATIC REVISION OF THE FAMILY PERIPLOMATIDAE ...Freshwater Mussels, Scallops, Nomenclature, Classification, ...5.0401
- THE TAXONOMY AND ZOOGEOGRAPHY OF THE MAGELONIDAE OF THE WORLD ...Collections, Lugworms, Marine Segmentedworm, Nomenclature, Classification, World Wide, ...5.0570
- A SYSTEMATIC REVISION OF THE HOLOTHURIAN FAMILY PSOLIDAE - ECHINODERMATA - HOLOTHUROIDEA ...Classification - Taxonomy, Comparative Anatomy, Modern Organisms, Nomenclature, Classification, Sea Cucumber, ...5.0572
- MARINE POLYCHAETE WORMS OF THE NEW ENGLAND REGION (GULF OF ST. LAWRENCE TO CHESAPEAKE BAY) ...Lugworms, Marine Segmentedworm, Nomenclature, Classification, Northeast, Vertical Distribution, ...5.0574
- MARINE POLYCHAETE WORMS OFF THE COLUMBIA RIVER, OREGON ...Collections, Lugworms, Marine Segmentedworm, Marine Biology, ...5.0575
- SYSTEMATICS AND BIOLOGY OF EPIPELAGIC AND BATHYPELAGIC FISHES ...Atlantic Ocean-north, Fish -other, Indian Ocean-general, Vertebrate Anatomy, Vertical Distribution, ...5.0049
- MARINE NEMATODES OF THE CAPE COD AREA ...Collections, Habitat Studies, Nematoda -other, Northeast, ...5.0566
- A BIBLIOGRAPHY OF THE MARINE MOLLUSKS OF THE INDO-PACIFIC REGION ...Asia, Bibliography, Computer Methods -general, Mollusks -non-specific & Other, ...5.0398
- HYPERIID AMPHIPODS FROM THE GULF OF GUINEA ...Collections, Guinea, Oceanography-general, Shrimp - Amphipods, Vertical Distribution, ...5.0387
- SYSTEMATICS AND ECOLOGY OF MARINE BIRDS ...Handbooks, Range Or Territorial Distr. , Shorebirds-gulls, terns, skimmer, World Wide, ...5.0582
- BIOLOGY, MORPHOLOGY, AND EVOLUTION OF THE DISK-FISHES OR SHARKSUCKERS ...Ethological, Fish -other, Host Specificity, Vertebrate Anatomy, ...5.0250
- COPEPODS PARASITIC ON SHARKS OF THE WEST COAST OF FLORIDA ...Copepods, Ectoparasites, Florida, Sharks, ...5.0391
- SYSTEMATICS OF CALIGOID COPEPODS ...Copepods, Ectoparasites, Host Specificity, Nomenclature, Classification, ...5.0392
- CANADIAN ARCTIC AND SUBARCTIC POLYCHAETES COLLECTED BY E. H. GRAINGER ...Collections, Lugworms, Marine Segmentedworm, Polar, Sub - Polar, ...5.0576
- OSTRACODA OF THE INDIAN OCEAN ...Biogenous, Indian Ocean-general, Quaternary Period, Shrimps - Seed Or Mussel, ...5.0385
- SYSTEMATICS OF ANTARCTIC SIPUNCULIDS AND ECHIURIDS COLLECTED BY THE ELTANIN EXPEDITION ...Antarctica, Collections, Expeditions, Invertebrates -non-specific, ...5.0578
- REPRODUCTIVE BIOLOGY, DEVELOPMENT, AND SYSTEMATICS OF THE SIPUNCULIDS OF THE CARIBBEAN ...Caribbean Sea, Developmental Physiology, Invertebrates -non-specific, Range Or Territorial Distr. , Reproductive System, ...5.0579
- SYSTEMATIC STUDIES ON MOLLUSKS FROM WALTERS SHOALS, INDIAN OCEAN ...Collections, Ethiopian, Indian Ocean-general, Mollusks -non-specific & Other, ...5.0402
- SYSTEMATICS AND MORPHOLOGY OF THE SIPUNCULID LARVAE OF THE INDIAN OCEAN ...Developmental Physiology, Indian Ocean-general, Invertebrate Anatomy, Invertebrates -non-specific, ...5.0765
- STOMATOPOD CRUSTACEA FROM THE WESTERN ATLANTIC ...Atlantic Ocean-general, Shrimps - Mantis... , ...5.0395
- THE SYSTEMATICS AND DISTRIBUTION OF THE WORLD-WIDE SQUID FAMILY BATHYTEUTHIDAE ...Life History Studies, Number Or Density, Octopus, Squid, Cuttlefish... , World Wide, ...5.0400

## Animal Taxonomy

## SUBJECT INDEX

- ABYSSAL AND BATHYAL SYNOPIIDAE OF WORLD ... Abyssal, Bathyal, Crustacea -non-specific, Vertical Distribution, World Wide, ...5.0384
- SYSTEMATIC STUDY OF MYODOCOPID OSTRACODS OF THE INDIAN OCEAN ... Collections, Expeditions, Indian Ocean-general, Shrimps - Seed Or Mussel, ...5.0394
- NEPHROPID LOBSTERS OF THE WESTERN ATLANTIC ... Atlantic Ocean-north, Collections, Lobsters, ...5.0396
- STOMATOPOD CRUSTACEA OF THE EASTERN PACIFIC REGION ... Atlantic Ocean-general, Pacific Ocean-east, Shrimps - Mantis..., ...5.0397
- STUDIES OF FISH FAMILIES ARIIDAE AND ASPREDINIDAE ... Fish -other, Interbiotic Relat.(non-specif), Neotropical, Tropic, ...5.0052
- BIOLOGICAL FALSE TARGETS AND RELATED ACOUSTIC CHARACTERISTICS ... Behavioral Ecology, Fish -non-specific, Sound Production, ...1.0041
- HEMOGLOBIN VARIATIONS AS INDICATORS OF BLUEFISH RACES ... Bluefish, Hemoglobin, Polymorphism, Reproduction Studies (general), ...5.0320
- TAXONOMIC STUDIES ... Fish -other, Nomenclature, Classification, Pacific Ocean-east, ...5.0034
- 1965 SALT-WATER ANGLING SURVEY ... Censusing, Fish -non-specific, Fishing, ...9.0011
- RACIAL STUDIES OF HERRING ... Alewife,menhaden,shad,herring, Atlantic Ocean-north, Biochemical Analysis, Blood Typing Studies, Management -other, ...5.0265
- POPULATION STUDIES ... Alewife,menhaden,shad,herring, Animal Distr. (non-specific), Environmental Ecology, Population Dynamics, ...5.0130
- MARINE BIOLOGICAL INVESTIGATIONS - TAXONOMIC COLLECTION OF THE FRESH AND SALTWATER FISHES OF ALASKA ... Alaska, Collections, Fish -non-specific, Fresh Water, ...5.0008
- STUDIES ON OPHIDIID FISHES ... Abyssal, Benthic Fauna, Fish -other, Vertebrate Anatomy, Vertical Distribution, ...5.0054
- TAXONOMIC REVISION OF BATHYLAGIDAE ... Deepsea Smelts, Tables, Compilations, Catalogs, Temperate, Tropic, ...5.0055
- STUDIES ON ANACANTHINE FISHES ... Atlantic Ocean-north, Continental Shelf, Fish -other, Publications -other, ...5.0048
- SYSTEMATIC STUDIES ON THE FAMILY SCOMBRIDAE ... Indian Ocean-general, Nomenclature, Classification, Tuna, Mackerel, Albacore..., Vertebrate Anatomy, ...5.0056
- INVESTIGATE SYSTEMATICS AND ECOLOGY OF TUNA LARVAE AND JUVENILES ... Artificial Insemination, Maturity & Growth Stages, Spawning & Nesting Sites, Tuna, Mackerel, Albacore..., ...5.0079
- SYSTEMATIC STUDIES OF FISHES ... Developmental Physiology, Fish -non-specific, Life History Studies, Vertebrate Anatomy, ...5.0059
- IDENTIFICATION AND DESCRIPTION OF FISH LARVAE ... Atlantic Ocean-north, Fish -non-specific, Life History Studies, Southern, ...5.0074
- IDENTIFICATION OF SOCKEYE SALMON STOCKS BY BONE MINERALS ... Bone, Chemical Analysis, Pacific Ocean-general, Salmon -coho,chinook,sockeye..., ...5.0333
- GULF OF ALASKA SOCKEYE SALMON SCALES, PROTOCOL AREA SOCKEYE SALMON SCALES, AND GULF OF ALASKA PINK SALMON SCALES ... Gulf of Alaska, Life History Studies, Salmon -coho,chinook,sockeye..., Scales, ...5.0334
- DESCRIPTIONS OF NEW SHARKS ... Collections, Nomenclature, Classification, Publications -other, Sharks, ...5.0097
- A REVISION OF THE CAT SHARKS, SCYLORHINIDAE ... Nomenclature, Classification, Sharks, Vertebrate Anatomy, ...5.0058
- EASTERN PACIFIC SHRIMPS OF THE GENUS PENAEUS ... Life History Studies, Pacific Ocean-general, Range Or Territorial Distr., Shrimps - Common, Vertical Distribution, ...5.0403
- BENTHIC PENAEID SHRIMPS (OTHER THAN PENAEUS) FROM THE WESTERN ATLANTIC ... Atlantic Ocean-general, Collections, Continental Shelf, Shrimps - Common, Vertical Distribution, ...5.0404
- TAXONOMY AND BIOLOGY OF CLUPEOID FISHES ... Alewife,menhaden,shad,herring, Anchovies, Atlantic Ocean-general, Handbooks, ...5.0060

- SYSTEMATICS OF CARANGID FISHES ... Collections, Handbooks, Maturity & Growth Stages, Pompanos, Scads, Jacks, Species, Comparison of, ...5.0061
- ECOLOGY AND TAXONOMY OF TROPICAL ATLANTIC SCOMBRID EGGS AND LARVAE ... Animal Distr. (non-specific), Basic Embryology, Food Supply, Life History Studies, Tuna, Mackerel, Albacore..., ...5.0772
- PROTOZOOLOGY ... Axenic Culture, Histology and Cytology, Invertebrate Nutrition, Protozoa, ...5.0443
- ENZYME STRUCTURE AND ITS RELATION TO TAXONOMY ... Conformational Studies, Echinodermata -other, Enzymes -non-specific, Species, ...5.0654
- LARVAL DEVELOPMENT OF DECAPOD CRUSTACEA ... Basic Embryology, Bibliography, Crabs, Decapoda - Non-specific, Lobsters, ...5.0410

## Annelids

### Earthworms

- CHEMISTRY AND ENZYMOLOGY OF BIOLUMINESCENCE ... Anthozoa, Bioluminescence, Kinetics -other, Luminous Bacteria, Species, ...5.0962
- RESEARCH ON THE MACROBENTHOS OF THE GREAT LAKES ... Aquatic Ecology, Benthic Fauna, Food Supply, Great Lakes-general, Water Quality-general, ...5.0626

### Lugworms, Marine Segmentedworm

- WATER AND SALT REGULATION IN NEREID POLYCHAETES ... Active Transport, Comparative Physiology, Osmoregulation, Salt, ...5.0648
- EVOLUTIONARY DIVERGENCE OF DEEP WATER MARINE ANNELIDS ... Comparative Physiology, Digestive System, Environmental Physiology, Vertical Distribution, ...5.0662
- ENVIRONMENTAL SIGNIFICANCE OF SABELLARIID REEFS ... Biology, Habitat Studies, Reefs, ...5.0592
- EVOLUTIONARY DIVERGENCE OF ONUPHID POLYCHAETES ... Comparative Physiology, Environmental Resistance, Environmental Physiology, Invertebrate Nutrition, Water Temperature-non-specific, ...5.0663
- NUCLEIC ACID AND PROTEIN SYNTHESIS DURING OOGENESIS ... Autoradiography, Basic Embryology, Gastropods -slugs,conch,snails, Gene Action, Reproductive System, ...5.1024
- DEEP WATER BENTHIC POLYCHAETES ... Benthic Fauna, Biology, Photography, Vertical Distribution, ...5.0540
- LIFE HISTORY AND DEVELOPMENT OF POLYCHAETOUS ANNELID LARVAE ... Behavior, Developmental Physiology, Life History Studies, Reproductive System, Whole Body Culture & Rearing, ...5.0604
- POLYCHAETES AND ECHINODERMS IN THE LABRADOR SEA ... Animal Taxonomy, Brittle Stars, Labrador Sea, Reproductive System, Starfishes, ...5.0603
- ECOLOGY OF SABELLARIID REEFS IN DELAWARE BAY ... Aquatic Ecology, Delaware Bay, Environmental Ecology, Productivity - Food Chain, Vertical Distribution, ...5.0871
- STUDY OF LIFE HISTORY AND ECOLOGY OF SERPULIDAE IN TEXAS COASTAL WATERS ... Gulf of Mexico, Life History Studies, Texas, ...5.0656
- CILIA DIFFERENTIATION IN MARINE EMBRYOS ... Basic Embryology, Cilia and Flagella, Sea Urchins & Other Echinoderm, ...5.0617
- THE TAXONOMY AND ZOOGEOGRAPHY OF THE POLYCHAETOUS ANNELIDS OF THE GULF OF MEXICO AND THE CARIBBEAN SEA ... Animal Taxonomy, Caribbean Sea, Gulf of Mexico, Neotropical, ...5.0569
- THE TAXONOMY AND ZOOGEOGRAPHY OF THE MAGELONIDAE OF THE WORLD ... Animal Taxonomy, Collections, Nomenclature, Classification, World Wide, ...5.0570
- MARINE POLYCHAETE WORMS OF THE NEW ENGLAND REGION (GULF OF ST. LAWRENCE TO CHESAPEAKE BAY) ... Animal Taxonomy, Nomenclature, Classification, Northeast, Vertical Distribution, ...5.0574
- MARINE POLYCHAETE WORMS OFF THE COLUMBIA RIVER, OREGON ... Animal Taxonomy, Collections, Marine Biology, ...5.0575
- CANADIAN ARCTIC AND SUBARCTIC POLYCHAETES COLLECTED BY E. H. GRAINGER ... Animal Taxonomy, Collections, Polar, Sub - Polar, ...5.0576

## SUBJECT INDEX

## Anthozoa

PLANKTON AND BENTHOS COMMUNITIES OF THE GREAT LAKES ...Aquatic Ecology, Benthic Organisms (non-specific), Gastropods -slugs, conch, snails, Lake Erie, Plankton (non-specific), ...5.0801

### Antarctic Ocean

C-14 UPTAKE, LIMITING FACTORS AND EXCRETION PRODUCTS OF ANTARCTIC PHYTOPLANKTON ...Carbon, Phytoplankton, Primary Productivity, Secretions and Products, ...5.0813

SYSTEMATICS OF THE ANTARCTIC AND SUBANTARCTIC GAMMARIDEAN AMPHIPODA ...Abyssal, Animal Taxonomy, Bathyal, Shrimp - Amphipods, Vertical Distribution, ...5.0359

THE MARINE GEOLOGY OF THE SOUTHERN OCEAN ...Chemistry, Coring and Dredging, Distribution, Mineralogy, Petrology, ...7.0067

MARINE HYDRODYNAMICS ...Circulation-general, Laboratory Analysis, Model Studies, Waves, Waves-internal, ...8.0196

LIPID COMPOSITION OF ANTARCTIC MARINE ORGANISMS AND SEA WATER ...Fish -non-specific, Gulf of Mexico, Lipids, Low Temp. -but Above 32f, Phytoplankton, Productivity - Food Chain, Zooplankton, ...5.1031

MARINE GEOLOGY OF THE SUB-ANTARCTIC PACIFIC REGION ...Core Analysis, Diagenesis, Distribution, Origin, Petrology, Sedimentary History, ...7.0049

A PALEOMAGNETIC STUDY OF TERTIARY AND PLEISTOCENE OCEANIC CORES ...Core Analysis, Field Reversals, Pacific Ocean-north, Paleomagnetism, Quaternary Period, Tertiary Period, ...7.0166

EXCHANGE METEOROLOGIST WITH JAPANESE ANTARCTIC RESEARCH EXPEDITION ...Air-sea Boundary-general, General Synoptic Observations, Mixing, Radiosonde, Sea Ice, ...3.0013

ANTARCTIC PHYSICAL OCEANOGRAPHY ...Currents-ocean, Depth, Photography, Salinity, Temperature, ...4.0133

SYSTEMATIC STUDIES OF ANTARCTIC COPEPODS ...Animal Taxonomy, Copepods, Mixing, ...5.0461

HEAVY METAL GEOCHEMISTRY OF ANTARCTIC SEA WATER AND MARINE SEDIMENTS ...Chemistry, Circulation-general, Sedimentation, Water Analysis-general, ...1.0086

DEPOSITIONAL PROCESSES MARGINAL TO LARGE ANTARCTIC ICE SHELVES ...Core Analysis, Deposits, Environment, Sedimentary History, Sedimentation, ...7.0198

METABOLISM OF COMPLETE WATER COLUMNS ...Autotrophic, Energy Budgets, Metabolism, Respiration, ...5.0967

PARASITES OF ANTARCTIC VERTEBRATES AND INVERTEBRATES ...Animal Taxonomy, Collections, Ectoparasites, Endoparasites -other, ...5.0658

GEOPHYSICAL STUDIES FROM ELTANIN IN 1968 ...Gravity Surveys, Paleomagnetism, Sea Floor Spreading, Seismic Reflection, Textures-structures, ...7.0133

SYSTEMATICS AND ZOOGEOGRAPHY OF ANTARCTIC CEPHALOPODS ...Animal Taxonomy, Australian, Octopus, Squid, Cuttlefish... , Publications -other, ...5.0412

PALEONTOLOGY OF LATE CENOZIC ANTARCTIC RADIOLARIA AND DIATOMS ...Antarctica, Class Algae, Correlation, Ocean Basins, Order Radiolaria, Paleomagnetism, Paleontology, Rate of Deposition, ...7.0185

STRATIGRAPHY AND PALEOECOLOGY OF FOSSIL SILICOFLAGELLATES FROM ANTARCTIC DEEP-SEA CORES ...Core Analysis, Correlation, Field Reversals, Fossil Zones, Paleontology, Paleotemperature, Phylum Protozoa, ...7.0169

### Ross Sea

ANATOMICAL INVESTIGATIONS OF THE LOBODONTINAE ...Collections, Seals, Vertebrate Anatomy, ...5.0614

### Weddell Sea

ZONATION OF THE WEDDELL SEA BENTHOS ...Benthic Organisms (non-specific), Environmental Ecology, Marine Biology (non-specific), Temperature, ...5.0868

BIOLOGICAL PRODUCTIVITY INVESTIGATIONS OF THE WATERS SURROUNDING ANTARCTICA ...Optical, Organics, Phytoplankton, Primary Productivity, Standing Crops, ...5.1030

FORMATION OF ANTARCTIC BOTTOM WATERS ...Buoys, Hydrodynamics, Oceanic Fronts, Salinity, Temperature, ...1.0152

WATER MASSES, CURRENTS AND ORIGIN OF THE ATLANTIC BOTTOM WATER IN THE WEDDELL SEA, ANTARCTICA ...Currents-bottom, Depth, Oceanic Fronts, Salinity, Sampling, Temperature, ...4.0134

INTERNATIONAL WEDDELL SEA OCEANOGRAPHIC EXPEDITION ...Organics, Population Dynamics, Primary Productivity, Productivity - Food Chain, Seals, ...4.0121

### Antarctica

ECOLOGICAL INVESTIGATIONS OF MCMURDO SOUND ZOOPLANKTON ...Animal Taxonomy, Migration, Vertical Distribution, Zooplankton, ...5.0756

RESEARCH VESSEL U.S.N.S ELTANIN ...Equipment Purchase Operation, Geophysics-general, Scientific-service-support, Special Mission Ships, Teaching and Research, ...12.0036

THE EFFECTS OF SEAL AND FISH PREDATION ON CERTAIN ANTARCTIC BENTHIC COMMUNITIES ...Benthic Organisms (non-specific), Biology, Fish -non-specific, Predation, Productivity - Food Chain, Seals, ...5.1039

THERMALMETABOLIC RELATIONSHIPS OF STENOTHERMAL FISHES ...Environmental Physiology, Fish -non-specific, Proprioceptors, Thermoregulation, Water Pressure, Water Temperature-non-specific, ...5.0312

PHYCNOGONIDA OF THE ANTARCTIC REGIONS ...Animal Taxonomy, Benthic Fauna, Collections, Sea Spiders, ...5.0647

DISTRIBUTION OF ANTARCTIC MARINE FUNGI ...Marine Fungi (non-specific), Phycomycetes, Plant Taxonomy, Range Or Territorial Distr. , Ships and Cruises, Vertical Distribution, ...5.0694

POPULATION DYNAMICS OF ANTARCTIC SEALS ...Aerial Photography, Migration, Population Dynamics, Seals, ...5.0634

GEOMICROBIOLOGICAL WEATHERING PHENOMENA OFF ANVERS ISLAND ...Habitat Studies, Identification, Marine Bacteria, Petrography, Weathering, ...7.0232

COOPERATIVE SYSTEMATICS STUDIES IN ANTARCTIC BIOLOGY ...Animal Taxonomy, Cooperative-studies, Equipment Purchase Operation, Invertebrates -non-specific, ...5.0581

SYSTEMATICS OF ANTARCTIC HYMENOSTOMATIDA (PROTOZOA) ...Animal Taxonomy, Aquatic Ecology, Ciliates, Habitat Studies, ...5.0815

ATMOSPHERIC-OCEANIC-GLACIOLOGIC INTERACTIONS IN THE ANTARCTIC ...Boundary Layer Studies, Heat Budget, Heat Exchange, ...3.0009

DEEP DIVING ANTARCTIC BIRDS AND MAMMALS ...Adaptation, Locomotion -animal, Penguins, Seals, Water Pressure, ...5.0555

PARTICIPATION IN USARP EXPEDITIONS ...Data Acquisition, Data Analysis - General, Marine Biology, Ships and Cruises, Teaching and Research, ...12.0012

MAGNETIC PROPERTIES OF ANTARCTIC MARINE SEDIMENTS AND ROCKS ...Core Analysis, Extinction, Field Reversals, Rock & Mineral Magnetics, ...7.0233

CONTRACT FOR-PROCESSING OF USARP ROCK SAMPLES ...Classifications, Collections, Coring and Dredging, Petrology, Sampling, Ships and Cruises, Thin Sections, ...7.0060

OPERATION OF THE R/V HERO AND PALMER STATION SUPPORT LABORATORY ...Facilities, Marine Biology (non-specific), Ships and Cruises, ...12.0023

PALEONTOLOGY OF LATE CENOZIC ANTARCTIC RADIOLARIA AND DIATOMS ...Antarctic Ocean, Class Algae, Correlation, Ocean Basins, Order Radiolaria, Paleomagnetism, Paleontology, Rate of Deposition, ...7.0185

GRAVITY AND EARTH TIDES ...Earth Interior, Earth Tides, General Gravimeters, Propagation, Tides, ...2.0077

SYSTEMATICS OF ANTARCTIC SIPUNCULIDS AND ECHIURIDS COLLECTED BY THE ELTANIN EXPEDITION ...Animal Taxonomy, Collections, Expeditions, Invertebrates -non-specific, ...5.0578

### Anthozoa

CHEMISTRY AND ENZYMOLOGY OF BIOLUMINESCENCE ...Bioluminescence, Earthworms, Kinetics -other, Luminous Bacteria, Species, ...5.0962

ECOLOGY OF THE PORITES FURCATA REEF-FLAT COMMUNITY ...Panama, Productivity - Food Chain, Puerto Rico, Reefs, ...5.0867

GENERAL SYSTEMATIC STUDIES OF THE OCTOCORALLIA OF THE TROPICAL ATLANTIC ...Animal Taxonomy, Tropic, ...5.0589

## Anthozoa

- CARBON-14 AGE PROFILE OF A HAWAIIAN REEF ...Carbon-14, Coring and Dredging, Growth Rate, Hawaii, Reefs, Sea Level Variations, ...7.005
- CORAL ATOLL ECOLOGY ...Atolls, Bibliography, Data Analysis - General, Productivity - Food Chain, ...5.0872
- SYMBIOSIS OF TROPICAL ZOANTHIDEA AND ZOOANTHELLAE ...Messenger RNA, Metabolism, Symbiosis, Tropic, Zooxanthella, ...5.0642
- FORMATION AND UTILIZATION OF TERPENES ...Biosynthesis, Enzyme-substrate, Symbiosis, Terpenes, Zooxanthella, ...5.0957
- NATURAL COMPOUNDS WITH CARBON-PHOSPHORUS BONDS ...Bond Type, Decomposition-other, Natural Occurring, Phosphorous, ...5.1013

## Antibiotics

- NEW DRUGS FROM THE SEA, ESPECIALLY ANTIBIOTICS ...Caribbean Sea, Marine Plants, Pacific Ocean-general, ...6.0123

## Antimetabolites -non-specific

- GROWTH AND TOXICOGENESIS OF C. BOTULINUM IN FISHERY PRODUCTS ...Bacterial Exotoxins, Clostridium Botulinum, Fish -non-specific, Growth (non-specific & Ot.), Medical Studies, Microbiological, ...6.0043

## Appalachian Highlands

### New England Province

- ESTUARINE SEDIMENTATION PROCESSES ...Estuaries, General Deposition, Intertidal Areas, Morphology-general, Tidal Streams, Tides, ...7.0244
- A STUDY OF THE ECOLOGY OF THE MICROFAUNA LIVING BETWEEN INTERTIDAL MARINE SEDIMENTS ...Beach, Copepods, Crustacea -non-specific, Intertidal Areas, Salinity, ...5.0793
- TROPHIC RELATIONSHIPS IN SHOAL BENTHIC ENVIRONMENTS ...Benthic Flora, Biology, Estuaries, Habitat Studies, ...5.1027

## Applied Electronics

- DIGITIZING SYSTEM FOR OCEANOGRAPHIC DATA ...Analog-digital Converters, Bathymetry, Digital Computers, Instrumental Services, Seismic Studies, Spectral Analysis, ...4.0039
- STUDIES OF EARTHQUAKES IN THE CAPE MENDOCINE AREA ...Data Transmission Systems, Earthquake Location, Earthquakes, Seismic Studies, Telemetry-other, ...7.0088
- OCEAN SYSTEM TELEMETRY STUDY ...Buoys, Data Acquisition, Data Transmission Systems, Moorings, Telemetry-other, ...4.0002
- OCEAN ENGINEERING STUDIES ...Data Acquisition, Data Processing Services, Engineering Studies-general, Instrumental Services, Laboratory Analysis, Sonar, ...8.0052
- ARCTIC SEISMIC TRANSDUCER EVALUATION ...Arctic, Evaluation Other, Ice Acoustics, Propagation, Transducers, ...8.0118
- ARCTIC ACOUSTIC RESEARCH ...Arctic, Ice Acoustics, Noise, Transmission, ...1.0001

## Biological Sciences

- BIOLOGICAL INSTRUMENTATION ...Behavioral Ecology, Instrumental Services, Instrumentation-general, Navigation Systems-other, ...8.0064
- APPLICATION OF BIOTELEMETRY TO THE STUDY OF MARINE VERTEBRATES ...Central Nervous System, Fish -non-specific, Locomotion -animal, Telemeters, Telemetry, ...5.0637

## Aquaculture & Fish-farming

- DEVELOPMENT OF TECHNIQUES FOR THE AQUACULTURE OF POMPANO ...Environmental Physiology, Florida, Maturity & Growth Stages, Pathology, Tuna, Mackerel, Albacore... , ...8.0007
- SHRIMP PRODUCTION IN LOUISIANA SALT-MARSH IMPOUNDMENTS UNDER EXISTING AND MANAGED CONDITIONS ...Captive Rearing, Lagoons, Louisiana, Shrimps - Common, Water Movement, Currents,, ...5.0435

## SUBJECT INDEX

- SYSTEMS ENGINEERING AND DEVELOPMENT OF COMMERCIALLY VALUABLE MARINE RESOURCES IN THE DELAWARE AREA ...Commercial Fishing, Delaware, Fish & Shellfish, Oysters, Quality -non-specific, ...8.0002
- THE STATUS AND POTENTIAL OF AQUACULTURE ...Algal Culture, Fish -non-specific, Food Supply, Survey Studies, ...8.0003
- OYSTER FATNESS STUDY ...Fats - Lipids & Oils, Food Supply, Growth Rate, Invertebrate Nutrition, Oysters, ...5.0512
- BIONOMICS OF FISHES AND SHELLFISHES ...Bays, Economics-general, Environmental Ecology, Oregon, Productivity - Food Chain, ...5.0920
- CONSTRUCTION OF A NEW SERIES OF SMALL REPLICATION PONDS AND RESEARCH ON THE FACTORS LIMITING FISH PRODUCTION IN IMPOUNDED WATERS ...Ponds, Productivity (agricultural), ...8.0001
- CULTURE OF POMPANO IN BRACKISH WATER PONDS ...Brackish Water, Food Supply, Louisiana, Pompanos, Scads, Jacks, Stocking of Fish & Shellfish, ...8.0004
- CULTURE OF ATLANTIC CROAKER IN BRACKISH WATER PONDS ...Brackish Water, Captive Rearing, Drums, Management, Ponds, Productivity (agricultural), ...8.0005
- CULTURE OF RED SWAMP CRAWFISH, PROCAMBARUS CLARKI, IN BRACKISH WATER PONDS ...Aquatic Ecology, Brackish Water, Captive Rearing, Crayfish, ...5.0432
- CULTURE OF BLUE, CHANNEL, AND WHITE CATFISH IN BRACKISH WATER PONDS ...Blue Catfish, White Catfish, Brackish Water, Captive Rearing, Channel Catfish, Louisiana, ...8.0006
- THE DEVELOPMENT OF HATCHERY TECHNIQUES TO AID IN THE PRODUCTION OF ECONOMIC MOLLUSKS ...Captive Rearing, Clams, Food Supply, Oysters, Spawning & Nesting Sites, ...5.0483
- LIFE HISTORY OF CLUPEA HARENGUS PALLASI ...Alewife, menhaden, shad, herring, Artificial Insemination, Life History Studies, Water Salinity, Water Temperature-non-specific, ...5.0035
- METHODS OF REARING EGGS AND LARVAE TO JUVENILE STAGES ...Captive Rearing, Environmental Physiology, Fish -non-specific, Maturity & Growth Stages, ...8.0010
- 131.116B - LARVAL CULTURE (SHRIMP AQUACULTURE PROGRAM) ...Algal Culture, Captive Rearing, Environmental Physiology, Food Supply, Shrimps - Common, ...5.0500
- JUVENILE AND ADULT CULTURE (SHRIMP AQUACULTURE PROGRAM) ...Captive Rearing, Growth Rate, Ponds, Shrimps - Common, ...5.0504
- FOOD AND EXPERIMENTAL ENVIRONMENTS (SHRIMP AQUACULTURE PROGRAM) ...Captive Rearing, Digestive System, Food Supply, Shrimps - Common, Water Environment -other, ...5.0505

## Aquatic Or Soil-aquatic Cycles

- PESTICIDES ...Bioassay, Fish, Persistence of Residues, Pesticides -non-specific, Pollution Effects, ...5.0881
- PESTICIDE KINETICS ...Degradation, Estuaries, Insecticides -non-specific, Marine Biology (non-specific), Pollutants - Path of , ...6.0148

## Aquatic Soils

- BIOCHEMICAL EFFECTS OF MICROORGANISMS UPON THE SALT MARSH ENVIRONMENT ...Core Analysis, Identification, Marine Bacteria, Salinity, Swamps-marshes, Temperature, Water Level Fluctuation, ...5.0763
- RELATIONSHIPS BETWEEN PHOSPHATE AND OTHER CHEMICALS AT THE WATERSUBSTRATE INTERFACE IN WESTERN LAKE ERIE ...Chemical, Chemical-general, Lake Erie, Phosphate, Phosphite, Sediments, ...7.0078
- HYDROGRAPHY, SEDIMENTATION AND CHEMICAL ASPECTS OF THE REEF ENVIRONMENT ...Currents-ocean, Environmental Ecology, Fish -non-specific, Reefs, ...5.0212

## Aqueducts

- SURFACE AND GROUND WATER POTENTIALITIES OF THE MULLICA RIVER BASIN ...Conjunctive Use, Economic Impact, Estuaries, Systems Analysis, Water Quality-general, Water Transfer, ...9.0014

## SUBJECT INDEX

## Arctic Ocean

### Aquifers

- HYDROLOGY OF COASTAL AREA IN THE VICINITY OF RICEBORO, GEORGIA ...Artesian Flow, Dispersion -water, Estuaries, Georgia, Saline Water Intrusion, Water Quality-general, ...9.0007
- REMOTE SENSING, GULF COASTAL AREA, CENTRAL FLORIDA ...Aircraft, Fresh Water, Saline Water Systems, Temperature, Tides, ...4.0160

### Arachnids -spiders,ticks,mites

#### Horseshoe Or King Crabs

- NEUROPHYSIOLOGICAL INVESTIGATIONS OF LIMULUS CENTRAL NERVOUS SYSTEM ...Brain , Cardiovascular, Nervous System, ...5.0469
- THE EFFECT OF SOME NEUROTRANSMITTERS ON THE CENTRAL NERVOUS SYSTEM OF LIMULUS POLYPHEMUS ...Brain, Cardiovascular, Nerve Effects, Neuroeffective, ...5.0470
- KODIAK KING CRAB ENVIRONMENTAL ZONE SURVEY ...Alaska, Continental Shelf, Environmental Ecology, Reproductive System, ...5.0348
- A HISTOCHEMICAL STUDY OF THE CENTRAL NERVOUS SYSTEM OF LIMULUS POLYPHEMUS ...Cholinesterase, Histochemistry - Cytochem, Nervous System, Organelle-enzyme Assn, ...5.1000
- PHYSIOLOGY OF THE LIMULUS HEART ...Biological Rhythms, Cardiovascular, Heart, Nervous System, ...5.0463
- NEUROPHYSIOLOGICAL MECHANISMS IN BEHAVIOR ...Giant Water Bug, Water Strider, Locomotion, Proprioceptors, ...5.0490
- BIOCHEMICAL CHARACTERIZATION OF CHOLINESTERASES IN THE BLOOD AND CENTRAL NERVOUS SYSTEM OF LIMULUS POLYPHEMUS ...Blood and Lymph, Cholinesterase, Enzyme-substrate, Nervous System, Reaction Rates, ...5.0468

#### Sea Spiders

- PYCNOGONIDA OF THE ANTARCTIC REGIONS ...Animal Taxonomy, Antarctica, Benthic Fauna, Collections, ...5.0647

#### Ticks & Mites

- REVISION OF GENERA AND SUBGENERA OF WATER MITES OF THE WORLD ...Animal Taxonomy, Growth, Moulting & Metamorph, Nomenclature, Classification, Publications - other, World Wide, ...5.0627

### Arctic

- ARCTIC BIBLIOGRAPHY PROJECT ...Bibliography, Geophysics-general, Meteorological Studies-general, Oceanography-general, ...11.0013
- ARCTIC BASIN HEAT FLOW ...Coring and Dredging, Crust, Geothermal Gradient, Heat Flows, Physical Properties, ...7.0105
- ARCTIC AIR, SEA AND ICE ...Climatology, Heat and Radiation Transfer, Heat Exchange, Micrometeorology, Sea Ice, Weather Forecasting, ...3.0088
- ARCTIC FIELD RESEARCH ...Geology-general, Glaciology-general, Marine Biology, Micrometeorology, ...11.0010
- RADIOLARIA IN PACIFIC SEDIMENTS ...Biogenous, Classification - Taxonomy, Order Radiolaria, Pacific Ocean-north, Population - Distribution, ...7.0286
- CHEMICAL OCEANOGRAPHY ...Circulation-general, Isotope Tracer-other, Oceanic Fronts, Tracers, Water Analysis-general, ...1.0072
- ARCTIC PLANKTON ECOLOGY ...Acoustical, Marine Biology (non-specific), Oceanic Fronts, Plankton (non-specific), Population Dynamics, ...1.0017
- BIOLOGICAL OCEANOGRAPHY ...Organics, Phytoplankton, Temporal Distribution, ...5.1038
- ARCTIC SEISMIC TRANSDUCER EVALUATION ...Applied Electronics, Evaluation Other, Ice Acoustics, Propagation, Transducers, ...8.0118
- ACOUSTIC AMBIENT NOISE ...Acoustical, Liquids, Noise, Spectra, ...1.0053
- ARCTIC UNDERSEAS RESEARCH, JOINT USA-CANADIAN HEAT BUDGET STUDY ...Heat and Radiation Transfer, Instrumentation-general, Physical Climatology, Sea Ice, ...3.0071

- ARCTIC ACOUSTIC RESEARCH ...Applied Electronics, Ice Acoustics, Noise, Transmission, ...1.0001
- ARCTIC SUPPORT ...Remote Sensing-general, Scientific-service-support, Sea Ice, Submerged Ships, ...3.0080
- WESTERN ARCTIC OCEANOGRAPHIC INVESTIGATIONS ...Arctic Ocean, Basins, Circulation-general, Mixing, ...2.0014

### Arctic Ocean

- SATELLITE SEA ICE STUDIES USING HRIR ...Data Analysis - General, Infrared Radiation, Satellites, Sea Ice, Technique Development, ...3.0075
- WEATHER PROGRAM - STATION T-3 ...Drift Stations, Energy Exchange Processes, Heat Budget, Patterns, Physical Climatology, Weather Forecasting, ...3.0060
- ARCTIC RESEARCH ...Acoustical, Currents-ocean, Geomorphology-topography, Magnetic Studies, Sea Ice, ...4.0049
- ARCTIC BIOLOGICAL OCEANOGRAPHY ...Adaptation, Growth and Differentiation, Phytoplankton, Potamogeton, Ruppia, Zostera..., Water - Light Qual. & Quant., Water Temperature -other, ...5.0853
- CLIMATE CHANGE OVER THE POLAR OCEAN ...Heat and Radiation Transfer, Heat Budget, Numerical Analysis-other, Physical Climatology, ...3.0058
- DISTRIBUTIONS OF CURRENTS AND PHYSICAL PROPERTIES WITHIN THE ARCTIC OCEAN ...Acoustical, Currents-ocean, Heat and Radiation Transfer, Sea Ice, Temperature, ...4.0051
- ARCTIC SUB-ICE STUDY ...Acoustical, Marine Biology, Sea Ice, Submersibles, ...3.0074
- ARCTIC RESEARCH LABORATORY ...Acoustical, Alaska, Drift Stations, Seismic Studies, Terrain Analysis, ...12.0003
- DRIFT-STATION BIOLOGY ...Alaska, Animal Taxonomy, Oceanic Fronts, Productivity - Food Chain, Sea Ice, ...5.0743
- ARCTIC FIELD RESEARCH ...Bibliography, Environmental Effects-geologic, Geophysics-general, Russia, ...11.0011
- ARCTIC ADVISORY SERVICE ...Bibliography, Ice Properties-general, Library, Sea Ice, ...11.0012
- ARCTIC UNDERSEAS RESEARCH, PHYSICAL AND CHEMICAL PROPERTIES OF SEA ICE ...Environmental Effects-geologic, Ice Properties-general, Model Studies, Sea Ice, ...3.0070
- ISOTOPIC OCEANOGRAPHY ...Data Acquisition, Oceans - Sea Water, Radioactivity-general, Sampling, Trace Elements, ...1.0090
- PREDICTION OF POLAR ICE BEHAVIOR AND DISTRIBUTION ...Data Acquisition, Forecasting-prediction, Hydrodynamics, Ice-general, Sea Ice, Weather Forecasting, ...3.0078
- WESTERN ARCTIC OCEANOGRAPHIC INVESTIGATIONS ...Arctic, Basins, Circulation-general, Mixing, ...2.0014

### Baffin Bay

- SEDIMENTS IN BAFFIN BAY AND THE EFFECTS OF AN ARCTIC ENVIRONMENT ON MARINE SEDIMENTATION ...Benthic-bottom Origin, Physical Properties, Polar, Sedimentation, ...7.0265
- ARCTIC EAST OCEANOGRAPHIC PROJECT (OCEANOGRAPHY OF THE BAFFIN BAY REGION) ...Circulation-general, Marine Biology, Polar, Sea Water Chemistry-other, Water Properties-general, ...4.0125

### Beaufort Sea

- GRAVITY SURVEY ARCTIC OCEAN ...Bathymetry, Continental Shelf, Geodetic Surveys, Gravity Studies, Seismic Studies, Structural Studies, ...7.0154

### Chuckchi Sea

- STRATIGRAPHY OF UNCONSOLIDATED SEDIMENTS ON THE CONTINENTAL SHELVES OF THE CHUKCHI AND NORTHERN BERING SEAS ...Bering Sea, Continental Shelf, Core Analysis, Correlation, Oceanic Fronts, Sedimentary History, ...7.0286

### Greenland Sea

- LARGE-SCALE INERTIAL OCEAN-ATMOSPHERE RELATIONSHIPS ...Air-sea Boundary-general, Jet Streams, Patterns, Sea Ice, Sea of Okhotsk, Weather Forecasting, ...3.0024

## SUBJECT INDEX

### Argentina

COASTAL AND CONTINENTAL SHELF SEDIMENTATION  
...Continental Shelf, Distribution, Sediment Transport-other,  
Sedimentation, Shoreline - Coastline, ...7.0212

### Argon

PRECISION MEASUREMENTS OF DISSOLVED OXYGEN,  
NITROGEN AND ARGON IN SEAWATER ...Gases, Nitrogen,  
Oxygen, Particle-gas Transfer, Solubility, Special Mission Ships,  
...1.0092

### Asia

A BIBLIOGRAPHY OF THE MARINE MOLLUSKS OF THE  
INDO-PACIFIC REGION ...Animal Taxonomy, Bibliography,  
Computer Methods -general, Mollusks -non-specific & Other,  
...5.0398

### Astronomy

#### Lunar Studies

##### Origins

PALEONTOLOGICAL EVIDENCE OF CYCLES IN THE  
EARTH-MOON SYSTEM ...Comparative Studies-other, En-  
vironmental Changes, Invertebrates, Shells, Thin Sections,  
Tides, ...7.0167

### Atlantic Ocean-general

SUBMARINE SEISMIC PROFILES OF THE WORLD'S OCEANS  
...Cables and Transmission Lines, Data Analysis - General, In-  
dian Ocean-general, Seismic Studies, Subbottom, ...7.0150

TROPOSPHERE METEOROLOGY IN THE TROPICAL ATLANTIC  
AREA ...Anticyclones-cyclones, Clouds-precipitation,  
Meteorological Studies, Patterns, Tropic, ...3.0049

RADIOELEMENT STUDIES IN THE OCEANS - LANTHANIDES  
IN SEA WATER AND THEIR INTERACTIONS WITH  
MARINE SEDIMENTS AND SUSPENSIDS ...Lanthanide Series,  
Oceanic Fronts, Radiochemical Analysis, Trace Elements,  
Water Analysis, ...1.0104

AZORES VOLCANIC STUDY ...Azores, Element Ratios, Igneous  
Activity - Volcanism, Ridges, Volcanic, ...8.0195

ATLANTIC OCEANIC BIOLOGY ...Marine Biology, Ships and  
Cruises, ...4.0126

CONTINUED STUDIES OF THE SYSTEMATICS AND  
ZOOGEOGRAPHY OF WESTERN ATLANTIC CAECIDAE  
...Animal Taxonomy, Derivatives, Gastropods -  
slugs, conch, snails, Invertebrate Anatomy, Publications -other,  
...5.0696

THE ECOLOGY OF COCCOLITHOPHORIDACEAE IN THE  
ATLANTIC COASTAL WATERS OF THE UNITED STATES  
...Continental Shelf, Water Properties-general, ...5.0841

SHORE FISHES OF ANNOBON AND FERNANDO POO ...Art  
Work-illustrations-etc, Collections, Fish -non-specific, Museum,  
...5.0067

BIOLOGY OF THE DEEP-SEA BENTHOS ...Benthic Fauna,  
Number Or Density, Tropic, Vertical Distribution, ...5.0902

ANALYSES OF ROCKS COLLECTED IN THE INDIAN AND  
ATLANTIC OCEANS ...Crust, Indian Ocean-general, Ocean  
Basins, Petrology Structural Studies, ...7.0073

SEDIMENTATION, MORPHOLOGY, AND STRUCTURE--MID-  
ATLANTIC RIDGE ...Distribution, Ocean History, Provenance  
Studies-other, Ridges, Sea Floor Spreading, ...7.0047

ATLANTIC OCEAN CRUSTAL STUDIES ...Bathymetry, Coring  
and Dredging, Crust, Heat Flow Measurements, Seismic Reflec-  
tion, ...7.0116

INVESTIGATION OF SHALLOW CURRENT STRUCTURE IN  
THE WESTERN TROPICAL ATLANTIC OCEAN ...Circula-  
tion-general, Temperature, Tropic, ...2.0030

GEOHERMAL INVESTIGATIONS IN OCEAN REGIONS  
...Geothermal, Heat Flow Measurements, Model Studies, Re-  
gional Structure, Technique Development, ...7.0121

SIGNIFICANCE OF FLUORIDE VARIATIONS IN SEA WATER  
...Chloride, Element Ratios, Extrusives, Fluoride, Water Analy-  
sis-general, ...1.0105

TRITIUM IN HURRICANES ...Air Pollution Sampling, Particle-  
gas Transfer, Sampling, Tritium, Tropical Cyclones, ...3.0013

GEOCHEMICAL STUDIES OF DEEP-SEA DEPOSITS - THEIR  
SOURCES AND MODES OF DEPOSITION ...Abyssal,

Biogenous, Biogeochemical Process, Chemistry, Mineralogy,  
Ocean Bottom, ...7.0057

GEOCHEMISTRY OF MID-ATLANTIC RIDGE SEDIMENTS  
...Chemistry, Core Analysis, Correlation, Geochronology-  
general, Ridges, ...7.0071

HEAT FLOW MEASUREMENTS ...Geophysical Equipment,  
Heat Flow Measurements, Photography, Technique Develop-  
ment, Water Motion Recorders, ...7.0138

ORGANIC MATTER ...Mixing, Oceanic Fronts, Organics, Ox-  
ygen, Sampling, Ships and Cruises, ...1.0111

GEOHERMAL INVESTIGATIONS IN OCEAN REGIONS  
...Heat Flow Measurements, Oceanic - Pelagic, Ridges, Sedi-  
ments-other, Temperature, ...7.0123

STUDIES ON THE SPORT FISHERY FOR BILLFISHES AND  
TUNAS IN THE WESTERN ATLANTIC AND SOUTHEAST-  
ERN PACIFIC OCEAN. ...Fishing, Pacific Ocean-general,  
Swordfish, Tuna, Mackerel, Albacore... , ...5.0069

SYSTEMATICS, ZOOGEOGRAPHY, AND ECOLOGY OF  
ELASMOBRANCHS OF THE WESTERN ATLANTIC  
OCEAN ...Animal Taxonomy, Aquatic Ecology, Chon-  
drichthyes -other, Nearctic, ...5.0132

SYSTEMATICS MORPHOLOGY AND ECOLOGY OF THE  
GENUS ERVILIA (MOLLUSCA; PELECYPODA) IN THE  
WESTERN ATLANTIC ...Animal Taxonomy, Ecology  
(animal), Freshwater Mussels, Scallops, Invertebrate Anatomy,  
...5.0458

STOMATOPOD CRUSTACEA FROM THE WESTERN AT-  
LANTIC ...Animal Taxonomy, Shrimps - Mantis... , ...5.0395

STOMATOPOD CRUSTACEA OF THE EASTERN PACIFIC  
REGION ...Animal Taxonomy, Pacific Ocean-east, Shrimps -  
Mantis... , ...5.0397

ROCKS OF OCEANIC CRUST AND UPPER MANTLE EQUA-  
TORIAL ATLANTIC ...Crust, Earth Interior, Ocean Basins,  
Petrogenesis-general, Petrology, Stability Fields, ...7.0059

COORDINATION OF ESTUARINE REMOTE SENSING IN AT-  
LANTIC COAST REGION ...Aerial Photography, Estuaries,  
Satellites, ...4.0169

ECOLOGICAL STUDIES OF ATLANTIC AND GULF  
COASTAL ESTUARIES OF IMPORTANCE TO WATER-  
FOWL ...Agricultural Land Use Effects, Construction Land Use  
Effects, Estuaries, Gulf of Mexico, Habitat Studies, Waterfowl -  
non-specific, ...5.0896

HYPOTHETICAL DISTRIBUTION OF 14 SPECIES OF AT-  
LANTIC COASTAL GAME FISHES ...Aquatic Ecology, En-  
vironmental Ecology, Fish -other, Water Temperature-non-  
specific, ...5.0123

SAMPLING OF THE ATLANTIC COMMERCIAL CATCH  
...Alewife, menhaden, shad, herring, Commercial Fishing, Nets,  
Number Or Density, ...5.0129

DISTRIBUTION AND ECOLOGY OF ATLANTIC TUNAS  
...Environmental Ecology, Range Or Territorial Distr. , Tem-  
poral Distribution, Tuna, Mackerel, Albacore... , ...5.0063

MIGRATION OF ATLANTIC TUNAS ...Africa, Migration, Tags,  
Tuna, Mackerel, Albacore... , ...5.0064

FEEDING HABITS OF ATLANTIC TUNAS AND NEKTON  
ECOLOGY ...Food Supply, Plankton (non-specific), Productivi-  
ty - Food Chain, Tuna, Mackerel, Albacore... , ...5.0204

POPULATION DYNAMICS OF ATLANTIC TUNAS ...Censusing,  
Commercial Fishing, Population Dynamics, Tuna,  
Mackerel, Albacore... , ...5.0065

BENTHIC PENAEID SHRIMPS (OTHER THAN PENAEUS)  
FROM THE WESTERN ATLANTIC ...Animal Taxonomy, Col-  
lections, Continental Shelf, Shrimps - Common, Vertical Dis-  
tribution, ...5.0404

DIAGNOSTIC CHARACTERS & DEVELOPMENT OF EXTER-  
NAL GENITALIA IN JUVENILE GROOVED SHRIMPS OF  
GENUS PENAEUS FROM WESTERN ATLANTIC ...Develop-  
mental Physiology, Invertebrate Anatomy, Reproductive  
System, Shrimps - Common, ...5.0405

TAXONOMY AND BIOLOGY OF CLUPEOID FISHES  
...Alewife, menhaden, shad, herring, Anchovies, Animal Taxono-  
my, Handbooks, ...5.0060

ZOOPLANKTON DISTRIBUTION IN THE TROPICAL ATLANTIC  
...Plankton Sampling, Range Or Territorial Distr. , Tem-  
perature, Tropic, Vertical Distribution, Zooplankton, ...5.0771

STOCK IDENTIFICATION OF ATLANTIC TUNAS ...Caribbean  
Sea, Electrophoresis -non-specific, Tuna, Mackerel, Albacore...  
 , ...5.0252

DESCRIPTIVE PHYSICAL OCEANOGRAPHY OF THE EAST-  
ERN TROPICAL ATLANTIC ...Environmental Ecology, Fish -  
non-specific, Productivity - Food Chain, Tropic, ...4.0127

**SUBJECT INDEX**

**Atlantic Ocean-north**

EASTERN TROPICAL ATLANTIC COOPERATIVE SURVEY  
12 SEPTEMBER TO 20 DECEMBER 1968 ...Tropic, ...4.0120

**Atlantic Ocean-north**

OCEAN CIRCULATION STUDIES ...Acoustical, Currents-ocean, Hydrodynamics, Statistics-general, Water Motion Recorders, Waves-internal, ...2.0040

MAGNETICS ...Anomalies, Pacific Ocean-general, Ridges, Sea Floor Spreading, Trenches, ...7.0135

NORTH ATLANTIC CIRCULATION ...Circulation-general, Geomorphology-topography, Gulf Stream, Hydrodynamics, Oceanic Fronts, ...2.0031

VISUAL AND ACOUSTICAL COMMUNICATION IN CERTAIN MARINE CRUSTACEANS ...Auditory, Behavior, Crabs, Visual Organs, .. 5.0430

ECOLOGICAL SIGNIFICANCE OF PARTICULATE MATTER IN THE SEA ...Interbiotic Relat.(non-specif), Marine Bacteria, Organic Matter Content -water, Temporal Distribution, Vertical Distribution, Zooplankton, ...5.0754

MONOGRAPH OF THE CEPHALOPODS OF THE NORTH ATLANTIC ...Animal Taxonomy, Depth, Nomenclature, Classification, Optical, Publications -other, Salinity, Temperature, ...5.0411

BIOLOGICAL ASPECTS OF MIDWATER SOUND SCATTERING ...Bioluminescence, Fish -non-specific, Range Or Territorial Distr. , Scattering, Sound Production, Vertical Distribution, ...1.0054

STUDIES OF THE PHAEOPHYCEAN ORDERS CHORDARIALES AND PUNCTARIALES ...Algal Culture, Phaeophyta (non-specific & Ot), Range Or Territorial Distr. , Temporal Distribution, ...5.0715

ASCIDIAN SPECIES ON THE ATLANTIC CONTINENTAL SHELF ...Animal Taxonomy, Continental Shelf, Range Or Territorial Distr. , Sea Squirts - Tunicates, Vertical Distribution, ...5.0609

FACTORS AFFECTING HORIZONTAL DISTRIBUTION OF MESOPELAGIC FISHES ...Aquatic Ecology, Behavioral Ecology, Fish -non-specific, Range Or Territorial Distr. , Vertical Distribution, ...5.0105

ZOOLOGY OF OCEANIC BENTHIC ANIMALS OFF THE NORTH CAROLINA COAST ...Adaptation, Benthic Fauna, Benthonic-bottom, Environmental Physiology, Water Temperature-non-specific, ...5.1009

LOGISTIC SUPPORT AND MAINTENANCE OF FACILITIES ...Facilities, Lakes, Maine, Marine Biology, ...12.0030

PHYSICAL AND CHEMICAL PROPERTIES OF THE SHELF AND SLOPE WATERS OFF NORTH CAROLINA ...Continental Shelf, General Sea Water Chemistry, North Carolina, Oceanic Fronts, Water Properties-general, ...1.0156

AN INVESTIGATION OF THE OVERFLOW OF NORWEGIAN SEA WATER INTO THE NORTH ATLANTIC THROUGH DENMARK STRAIT ...Norwegian Sea, Ocean Currents-other, Oceanic Fronts, ...2.0032

ACOUSTIC RECORDING OF MARINE MAMMALS OF NOVA SCOTIA AND NEWFOUNDLAND ...Canada, Mammals, Seals, Sound Production, Tape Recording, Audio, ...5.0625

DEVELOPMENT OF AN ADVANCED MISSILE IMPACT LOCATING SYSTEM FOR THE EASTERN TEST RANGE ...Acoustical, Area, Missile & Rockets. Navigation, Sound Gear, ...8.0048

AIR OCEANOGRAPHY ...Air-sea Boundary-general, Buoys, Gulf Stream, Satellites, Technique Development, .. 4.0163

EASTERN ATLANTIC AND MEDITERRANEAN OCEANOGRAPHY ...Acoustical, Bathymetry, Data Analysis - General, Mediterranean Sea-general, Oceanography-general, ...1.0055

OCEAN DYNAMICS EXPERIMENTS ...Buoys, Currents-ocean, Operational Aspect, Thermal, Waves-internal, ...2.0071

STABLE ISOTOPES ...Atlantic Ocean-south, Carbon, Chemical Analysis (water), Sampling, Water Chemistry-other, ...1.0108

INTERNAL WAVE STUDY ...Acoustical, Continental Shelf, Thermal, Tides, Waves-internal, ...2.0099

SEA-FLOOR SEDIMENTS AND ROCK STUDIES ...Biogenous, Core Analysis, Microfossils, Paleomagnetism, Petrology, Ridges, Sedimentation, ...7.0040

WOODS HOLE ENVIRONMENTAL STUDIES OCEANIC ACOUSTICS ...Acoustical, Benthonic-bottom, Data Analysis - General, Reverberation, Scattering, ...1.0057

DESIGN STUDY - AN OPTIMUM FISHING VESSEL FOR THE GEORGES BANK GROUND FISH FISHERY ...Commercial Fishing, Computer Applications, Fishing Gear, Naval Architecture-general, Other-design-and-construction, ...8.0288

CONSUMER EDUCATION AND MARKET DEVELOPMENT ...Fish & Shellfish, Northeast, ...6.0032

LARVAL STUDY OF THE LOBSTER ...Habitat Studies, Lobsters, Long Island Sound, Mark, Tag Or Capture -other, Maturity & Growth Stages, Plankton Sampling, ...5.0371

CRUSTACEAN COLLECTION OF EAST COAST OF UNITED STATES ...Collections, Crustacea -non-specific, Estuaries, North Carolina, ...5.0481

FISH COLLECTION OF NORTH CAROLINA AND WESTERN ATLANTIC FISHES ...Collections, Fish -non-specific, Fresh Water, North Carolina, ...5.0133

EVALUATION OF ATLANTIC COAST ESTUARIES ...Estuaries, Game Reserves & Preserves, Habitat Studies, Life History Studies, Waterfowl -non-specific, ...9.0020

SYSTEMATICS AND BIOLOGY OF EPIPELAGIC AND BATHYPELAGIC FISHES ...Animal Taxonomy, Fish -other, Indian Ocean-general, Vertebrate Anatomy, Vertical Distribution, ...5.0049

NEPHROPID LOBSTERS OF THE WESTERN ATLANTIC ...Animal Taxonomy, Collections, Lobsters, ...5.0396

INVESTIGATIONS ON THE CRUSTOSE CORALLINES OF THE NORTH ATLANTIC ...Diving and Scuba, Marine Plants, Plant Taxonomy, Rhodophyta (non-specific & Ot), Sedimentology-general, ...7.0272

BIOLOGICAL OCEANOGRAPHY ...Acoustical, Marine biology, Sound Production, Submersibles, ...1.0022

GLOBAL VOLUME REVERBERATION LIMITATION STUDIES ...Acoustical, Reverberation, Scattering, Sound Production, ...1.0037

MARINE HYDROLOGY AND GEOCHEMISTRY, ATLANTIC CONTINENTAL SHELF AND SLOPE ...Chemistry, Continental Shelf, Continental Slope, Saline Water Intrusion, Sedimentation, ...7.0070

MIGRATORY HABITS OF LARGE SHARKS ...Fishing, Migration, Sharks, Tags, ...5.0147

AGE DETERMINATION OF LARGE ATLANTIC SHARKS ...Age, Growth Rate, ...5.1028

INVENTORY AND ATLAS OF MARINE SPORT-FISHING FACILITIES ...Eastern, Fishing, Handbooks, Recreation Sites, ...9.0012

EFFECTS OF HOT WATER MASSES ON MARINE FISHES ...Behavior, Fish -non-specific, High Temp. -85f Or Above, Oceanic Fronts, Thermal, ...5.0210

DESIGN, CONSTRUCTION AND LONGEVITY OF ARTIFICIAL FISHING REEFS ...Currents-ocean, Reefs, Tides, ...9.0013

TRACKING MIGRATIONS OF BLUEFISH POPULATIONS ALONG ATLANTIC COAST TO LEARN BIOLOGY OF THE SPECIES (MIGRATORY HABITS OF BLUEFISH) ...Bluefish, Migration, Population Dynamics, Tags, ...5.0120

AGE AND GROWTH OF BLUEFISH ...Age, Bluefish, Growth Rate, Population Dynamics, Scales, ...5.0287

ATLAS OF MARINE FAUNA ...Crustacea -non-specific, Fish -non-specific, Handbooks, Mollusks -non-specific & Other, ...5.0101

ZOOPLANKTON OF THE GULF OF MAINE ...Plankton Sampling, Population Dynamics, Vertical Distribution, Zooplankton, ...5.0782

RACIAL STUDIES OF HERRING ...Alewife,menhaden,shad,herring, Animal Taxonomy, Biochemical Analysis, Blood Typing Studies, Management -other, ...5.0265

BIostatistics OF HERRING ...Age, Alewife,menhaden,shad,herring, Environmental Ecology, Growth Rate, Population Dynamics, Proprioceptors, ...5.0099

STUDIES ON ANACANTHINE FISHES ...Animal Taxonomy, Continental Shelf, Fish -other, Publications -other, ...5.0048

POPULATION DYNAMICS OF NEW ENGLAND GROUND-FISH ...Codfishes, Hake, Lefteye Flounders, Population Dynamics, Rockfish, Scoraionfish, ...5.0103

IDENTIFICATION AND DESCRIPTION OF FISH LARVAE ...Animal Taxonomy, Fish -non-specific, Life History Studies, Southern, ...5.0074

BIOLOGICAL STUDIES OF NORTHWEST ATLANTIC GROUND FISH ...Codfishes, Hake, Freshwater Mussels, Scallops, Righteye Flounders, Rockfish, Scoraionfish, ...5.0104

EXPLORATION OF LATENT RESOURCES ON THE CONTINENTAL SHELF/SLOPE ...Commercial Fishing, Continental Shelf, Nets, Survey Studies, ...5.0102

SEA CLAM EXPLORATIONS ...Animal Distr. (non-specific), Clams, Commercial Fishing, Population Dynamics, ...5.0456

## Atlantic Ocean-north

## SUBJECT INDEX

- STUDIES OF THE BENTHIC INVERTEBRATES OF THE ATLANTIC CONTINENTAL SHELF ...Benthic Fauna, Continental Shelf, Population Dynamics, Productivity - Food Chain, ...5.0623
- NORTHERN SHRIMP EXPLORATIONS ...Censusing, Commercial Fishing, Fishing Gear, Shrimps - Common, ...5.0457
- TIME-SERIES OBSERVATIONS OF TEMPERATURE AND SALINITY (NORTH ATLANTIC AND NORTH PACIFIC OCEAN STATIONS) ...Depth, Pacific Ocean-north, Salinity, Sampling, Temperature, ...4.0005
- CIRCULATION ON THE CONTINENTAL SHELF ...Circulation-general, Continental Shelf, Eastern, Water Motion Records, ...2.0027

## Atlantic Ocean-south

- MARINE SEDIMENTS ...Bathymetry, Magnetic Studies, Ridges, Sea Floor Spreading, Textures-structures, ...7.0203
- SYSTEMATIC STUDIES ON HERMIT CRABS AND OTHER DECAPOD CRUSTACEANS ...Animal Taxonomy, Crabs, Developmental Physiology, Life History Studies, ...5.0408
- HETEROTROPHIC ACTIVITY AND PRIMARY REGENERATION IN THE OCEAN ...Biodegradation, Carbon, Gulf of Mexico, Organics, Organics-general, ...1.0114
- OCEANIC FISHES OF THE TROPICAL ATLANTIC ...Fish -non-specific, Survey Studies, Tropic, Vertical Distribution, ...5.0068
- RESEARCH IN OCEANIC PHYSICS ...Convection, Mixing, Oceanic Fronts, Thermodynamics, Wind-water Interaction, ...2.0059
- STABLE ISOTOPES ...Atlantic Ocean-north, Carbon, Chemical Analysis (water), Sampling, Water Chemistry-other, ...1.0108
- FISHES TAKEN INCIDENTAL TO SHRIMP TRAWLING ...Fish -non-specific, Nets, Number Or Density, Shrimps - Common, ...5.0072
- CONTRIBUTIONS TO THE BIOLOGY OF THE ROYAL RED SHRIMP, HYMENOPENAEUS ROBUSTUS ...Maturity & Growth Stages, Number Or Density, Shrimps - Common, Vertical Distribution, ...5.0421

## Atlantic Plain

### Continental Shelf

- STUDIES WITH TROPICAL AND SUBTROPICAL MICROALGAE ...Algal Culture, Benthic Flora, Primary Productivity, Sub - Tropic, Tropic, ...5.0693
- SUPPORT OF THE R/V EASTWARD ...Caribbean Sea, Cooperative-studies, Facilities, Marine Biology (non-specific), Ships and Cruises, Training Grants, Fellowships, ...12.0039
- INTERVIEW AND OBSERVATION ...Censusing, Commercial Fishing, Fish -non-specific, Range Or Territorial Distr. , ...5.0156
- DESIGN OF SAMPLING PLAN AND PROCUREMENT OF CHARTER VESSEL ...Commercial Fishing, Fish -non-specific, Nets, Number Or Density, Vertical Distribution, ...4.0014
- WINTER DISTRIBUTION OF FISHES ...Environmental Ecology, Fish -non-specific, Salinity, Temperature, Temporal Distribution, Winter, ...5.0153
- DISTRIBUTION OF YOUNG STAGES OF COASTAL FISHES ...Estuaries, Fish -non-specific, Maturity & Growth Stages, Number Or Density, Ships and Cruises, ...5.0119
- EFFECT OF TEMPERATURES AND CIRCULATION OF CONTINENTAL SHELF WATERS ON THE DISTRIBUTION OF FISHES ...Fish -non-specific, Surface Environments, Temperature, Water Movement, Currents,, Water Temperature-non-specific, ...4.0165
- SURF CLAM POPULATION DYNAMICS ...Age, Clams, Commercial Fishing, Population Dynamics, Size, ...5.0448
- STUDIES ON ANACANTHINE FISHES ...Animal Taxonomy, Atlantic Ocean-north, Fish -other, Publications -other, ...5.0048
- EXPLORATION OF LATENT RESOURCES ON THE CONTINENTAL SHELF/SLOPE ...Atlantic Ocean-north, Commercial Fishing, Nets, Survey Studies, ...5.0102
- STUDIES OF THE BENTHIC INVERTEBRATES OF THE ATLANTIC CONTINENTAL SHELF ...Atlantic Ocean-north, Benthic Fauna, Population Dynamics, Productivity - Food Chain, ...5.0623
- RECONNAISSANCE ECOLOGIC SURVEY OF THE CONTINENTAL SHELF AND UPPER SLOPE (GULF OCEANOGRAPHY PROGRAM) ...Behavioral Ecology, Biology, Environmental Ecology, Migration, Population Dynamics, Shrimps - Common, ...5.0502

- THE OCEANOGRAPHY OF NEW ENGLAND FISHING BANKS ...Fish -other, Number Or Density, Vertical Distribution, Water Environment -other, ...5.0901
- BIOGEOGRAPHY OF BENTHIC ORGANISMS ...Benthic Organisms (non-specif), Marine Biology (non-specific), Range Or Territorial Distr. , Vertical Distribution, ...5.0876

## Atlases-maps

- PHYSICAL AND CHEMICAL ATLAS ...Convection, General Sea Water Chemistry, Indian Ocean-general, Water Analysis-general, Water Properties-general, ...4.0026
- OCEANOGRAPHY ATLAS OF THE NORTH CAROLINA CONTINENTAL MARGIN ...Continental Shelf, Mapping, North Carolina, ...4.0059
- INVENTORY AND ATLAS OF GULF COAST SPORT FISHING FACILITIES ...Fishing, Gulf of Mexico, Handbooks, Management -other, ...9.0006
- HISTORICAL CHARTS AND INTERPRETATION OF CHANGES IN SEA SURFACE TEMPERATURE IN THE NORTH PACIFIC OCEAN ...Air-sea Boundary-general, Circulation-general, Commercial Fishing, Pacific Ocean-north, Temperature, ...1.0179

## Atmosphere Composition

- AN INVESTIGATION OF TRITIUM IN RAIN WATER ...Humidity, Particle-gas Transfer, Precipitation-other, Rain-other, Tritium, ...1.0130
- SEA WATER CHEMISTRY ...Gases, Industrial-general, Lead, Technique Development, Trace Elements, ...1.0076

## Atmosphere Disturbance

### Anticyclones-cyclones

- TROPOSPHERE METEOROLOGY IN THE TROPICAL ATLANTIC AREA ...Atlantic Ocean-general, Clouds-precipitation, Meteorological Studies, Patterns, Tropic, ...3.0049
- RELATION OF SATELLITE DATA TO LARGE SCALE ATMOSPHERIC CIRCULATION AND ENERGETICS ...General Movement, Patterns, Radiation-general, Satellites, Weather Charts-maps, ...4.0143

### Atmosphere Disturbance

- CLOUD PATTERNS RELATED TO SELECTED CIRCULATION SYSTEMS IN EASTERN PACIFIC ...Meteorological Studies, Patterns, Photographic, Satellites, ...4.0138

### Storms-general

- DYNAMIC STUDY OF THE TEMPORAL ...Air Motion-general, Meteorologic Model Studies Satellites, Tropic, Tropical Cyclones, ...3.0051
- WAVE, CURRENT AND STORM SURGE RESPONSE TO EXTREME WIND CONDITIONS ...Currents-ocean, Forecasting-prediction, Model Studies, Waves, Wind-water Interaction, ...2.0107
- STUDIES IN THE INDIAN OCEAN ...Circulation-general, Data Analysis - General, Indian Ocean-general, Particle-gas Transfer, ...2.0073

### Tropical Cyclones

- TROPICAL STORM INVESTIGATIONS IN THE ATLANTIC, CARIBBEAN, AND GULF OF MEXICO ...Meteorological Studies, Satellites, Tropic, Vorticity, Waves, ...3.0048
- RESEARCH ON DYNAMICS OF LOW LATITUDE CIRCULATIONS ...Convection, Heat Exchange, Meteorological Studies, Patterns, Shear, ...3.0050
- DYNAMIC STUDY OF THE TEMPORAL ...Air Motion-general, Meteorologic Model Studies, Satellites, Storms-general, Tropic, ...3.0051
- ATMOSPHERIC CONDITIONS ASSOCIATED WITH CUMULUS CONVECTION ...Convection, Cumulus, Meteorologic Model Studies, Shear, Velocity, ...3.0045
- TRITIUM IN HURRICANES ...Aircraft, Heat and Radiation Transfer, Heat Exchange, Particle-gas Transfer, Tracers, Tritium, ...3.0047

## SUBJECT INDEX

## Atolls

- AIR-SEA INTERACTION ...Air-sea Boundary-general, Currents-ocean, Gulf of Mexico, Thermal, Weather Forecasting, ...3.0042
- ATMOSPHERIC PROCESSES IN THE TROPICS ...Data Reduction and Analysis, Patterns, Shear, Statistics-general, Tropic, ...3.0059
- EFFECTS OF HURRICANE BETSY ON SOME BEHAMA CORAL REEFS ...British West Indies, General Deposition, Reefs, ...7.0290
- HURRICANE DYNAMICS FOR ARTIFICIAL MODIFICATION STUDY ...Meteorologic Model Studies, Storms, ...3.0053
- TRITIUM IN HURRICANES ...Air Pollution Sampling, Atlantic Ocean-general, Particle-gas Transfer, Sampling, Tritium, ...3.0018
- FLUID DYNAMICS CENTER ...Cloud Formation and Evolution, Cloud Physics, Coastlines-shorelines, Model Studies, Satellites, ...8.0178
- CIRCULATION STUDIES ...Circulation-general, Currents-ocean, Gulf of Mexico, Model Studies, Thermal, ...2.0044
- SEVERE STORM CLIMATOLOGY ...Patterns, ...3.0054
- RESEARCH FLIGHT FACILITY ...Aircraft, Equipment Purchase Operation, General Synoptic Observations, Technique Development, ...4.0158
- HURRICANES AND OTHER TROPICAL METEOROLOGICAL PROBLEMS ...Meteorologic Model Studies, Simulation Theory, Storms, Weather Forecasting, ...3.0046

### Atmosphere Optical Phenomena

- VISUAL LANDING AIDS FIELD ...Detectors, Electric Lighting Systems, Fog-haze-mist, Infrared Radiation, Lighting, ...4.0086

### Atmosphere Radiation

- INFRARED RADIOMETRY FOR SURFACE HEAT FLOW ...Heat and Radiation Transfer, Heat Exchange, Infrared Radiation, Technique Development, Temperature, ...4.0153
- EVALUATION OF LOW LEVEL TEMPERATURE GRADIENTS OVER THE LINE ISLANDS NEAR THE EQUATOR ...Line Islands, Radiation Balance, Temperature, ...1.0180
- TOTAL HEAT FLUX MEASUREMENT WITH A TWO-WAVELENGTH RADIOMETER ...Heat and Radiation Transfer, Meteorological Studies, ...3.0007
- REFLECTIVITY AND EMISSIVITY STANDARDS ...Infrared Radiation, Interferometry, Radiation, Radiation-general, Standards, Specifications, ...4.0142
- ANALYSIS AND INTERPRETATION OF SATELLITE RADIATION DATA ...Heat Budget, Meteorologic Model Studies, Radiation Balance, Radiation-general, Satellites, ...4.0009

### Atmospheric Pollution

#### Air Pollution Sampling

- TRITIUM IN HURRICANES ...Atlantic Ocean-general, Particle-gas Transfer, Sampling, Tritium, Tropical Cyclones, ...3.0018
- COMPOSITION OF LEAD HALIDE POLLUTION AEROSOLS ...Activation Analysis, Aerosols, Air Pollution-chemistry, Condensation, Oxidation-general, ...6.0156

#### Atmospheric Pollution-general

- MESO WIND PATTERNS IN THE CENTRAL CALIFORNIA VALLEY ...California, Drift (pesticide), Herbicides -non-specific, Land-sea Breezes, Wind Erosion, ...3.0056

#### Behavior

##### Dispersion - Transporation

- CARBON MONOXIDE CONTENT OF GLACIAL ICE AND THE NATURAL ATMOSPHERE ...Carbon, Composition, Gases, Mono-oxide, ...3.0068

##### Pollution Behavior-general

- MESOSCALE WIND SYSTEMS AROUND THE GREAT LAKES ...General Synoptic Observations, Lake Michigan, Land-sea Breezes, Meteorologic Model Studies, Patterns, ...3.0064

##### Washout

- RADIOACTIVE AEROSOL SCAVENGING BY OCEAN SPRAY ...Aerosols, Nuclear Explosions - Fallout, Radioactivity-general, Strontium, Waves, ...6.0164

### Sources

#### Incinerators

- SYSTEMS ANALYSIS FOR SHIPBORNE MUNICIPAL INCINERATION ...Distribution, Ocean, Pollution Sources-other, Smoke, Solid Waste, ...8.0327

#### Industrial-general

- SEA WATER CHEMISTRY ...Atmosphere Composition, Gases, Lead, Technique Development, Trace Elements, ...1.0076

#### Nuclear Explosions - Fallout

- HYDROSPHERE-ATMOSPHERE RADIOCHEMICAL MEASUREMENTS ...Carbon, Diffusion, Particle-gas Transfer, Tracers, Velocity, ...3.0043
- DETERMINATION OF TRITIUM IN NATURAL WATERS ...Radioactivity, Trace Elements, Tracers, Tritium, ...1.0083
- RADIOSTRONTIUM DEPOSITION OVER THE OCEAN ...Circulation-general, Precipitation-general, Radioactive Dating, Radioactivity, Strontium, ...6.0165
- RADIOACTIVE AEROSOL SCAVENGING BY OCEAN SPRAY ...Aerosols, Radioactivity-general, Strontium, Washout, Waves, ...6.0164

#### Other Sources

- MEASUREMENT OF COMMON LEAD IN THE EARTH'S HYDROSPHERE ...Atomic Absorption, Composition, Greenland, Isotope Dilution, Lead, ...3.0069

### Types

#### Aerosols

- RADIOACTIVE AEROSOL SCAVENGING BY OCEAN SPRAY ...Nuclear Explosions - Fallout, Radioactivity-general, Strontium, Washout, Waves, ...6.0164
- COMPOSITION OF LEAD HALIDE POLLUTION AEROSOLS ...Activation Analysis, Air Pollution Sampling, Air Pollution-chemistry, Condensation, Oxidation-general, ...6.0156

#### Dust - Particulate Matter

- ROLE OF WIND-BORNE CONTINENTAL DUST IN OCEAN SEDIMENTATION PROCESSES ...Distribution, Location, Rate of Deposition, Terrigenous, Trace Element Analysis, ...7.0230
- ALPINE LIMNOLOGY PROJECT ...Core Analysis, Extrusives, Hawaii, Lakes, Mountains-alpine, Volcanoes, ...7.0236

#### Gases

- SEA WATER CHEMISTRY ...Atmosphere Composition, Industrial-general, Lead, Technique Development, Trace Elements, ...1.0076
- CARBON MONOXIDE CONTENT OF GLACIAL ICE AND THE NATURAL ATMOSPHERE ...Carbon, Composition, Dispersion - Transporation, Mono-oxide, ...3.0068

#### Radioactivity

- DETERMINATION OF TRITIUM IN NATURAL WATERS ...Nuclear Explosions - Fallout, Trace Elements, Tracers, Tritium, ...1.0083
- FALLOUT INVENTORY OF THE OCEANS AND RELATED MECHANISMS ...Activation Analysis, Radioactivity-general, Trace Elements, ...6.0189

#### Smoke

- SYSTEMS ANALYSIS FOR SHIPBORNE MUNICIPAL INCINERATION ...Distribution, Incinerators, Ocean, Pollution Sources-other, Solid Waste, ...8.0327

### Atolls

- POPULATION STUDIES OF HAUSTORIIDAE AND GAMMARIDAE FROM NEW ENGLAND AND ON INFAUNAL AND EPIFAUNAL MARINE AMPHIPODS AT ENIWETOK ...Habitat Studies, Micronesia, Population Dynamics, Shrimp - Amphipods, ...5.0466
- MANAGEMENT OF THE ENIWETOK MARINE BIOLOGICAL LABORATORY ...Facilities, Lagoons, Marine Biology (non-specific), Reefs, ...12.0028
- CORAL ATOLL FLORA ...Floras, Plant Taxonomy, Range Or Territorial Distr., ...5.0692
- NATURE OF INTERTIDAL EROSION ON CORAL ATOLLS ...Erosion, Fossil Limestone, Intertidal Areas, Marine Biology (non-specific), ...7.0210
- CORAL ATOLL ECOLOGY ...Anthozoa, Bibliography, Data Analysis - General, Productivity - Food Chain, ...5.0872

## SUBJECT INDEX

### Atomic and Molecular Chemistry

#### Bond Type

NATURAL COMPOUNDS WITH CARBON-PHOSPHORUS BONDS ...Anthozoa, Decomposition-other, Natural Occurring, Phosphorous, ...5.1013

#### Chem Structure Determination

##### Organic

GEOCHEMICAL OCEANOGRAPHY ...Acids, Carbonaceous Substance, Organics, ...1.0102

CHEMISTRY AND PHARMACOLOGY OF TETRODOTOXIN ...Poisons-other, Toxicology, ...6.0105

#### Luminescence

CORRELATION OF SUBMARINE VOLCANIC ASH BY CATHODO-LUMINESCENCE ...Correlation, Extrusives, Geochronology-general, Qualitative, Size, ...7.0255

#### Chemiluminescence

EXCITED STATES MECHANISMS IN PHOTOBIOLOGY ...Bioluminescence, Energy Conversion, Photochemical-other, Polypeptides, ...4.0162

#### Thermoluminescence

RADIATION, DOSIMETRY, CORRELATION AND DATING OF CALCAREOUS DEEP-SEA CORES ...Carbonates-general, Core Analysis, Correlation, Radioactive Dating, Sedimentation, ...7.0251

### Atp X Adenosine Triphosphate

STANDING STOCK AND GROWTH OF BACTERIA IN THE SEA ...Carbohydrates, Growth (non-specific & Ot.), Marine Biology, Phytoplankton, Standing Crops, ...5.0749

### Australia

PORCELLANID CRABS OF AUSTRALIA ...Collections, Crabs, Museum, Nomenclature, Classification, ...5.0354

THE ALPHEID SHRIMP OF AUSTRALIA ...Animal Taxonomy, Collections, Publications -other, Shrimps - Common, ...5.0425

POPULATION STUDIES ON INTERTIDAL INVERTEBRATES ...Gastropods -slugs, conch, snails, Growth Rate, Longevity, Oregon, Starfishes, ...5.1021

MARINE BIOLOGY STUDIES ON FAIRFAX ISLAND ...Collections, Data Acquisition, Islands, Marine Biology, Reefs, ...5.0874

### Autoradiography

NUCLEIC ACID AND PROTEIN SYNTHESIS DURING OOGENESIS ...Basic Embryology, Gastropods - slugs, conch, snails, Gene Action, Lugworms, Marine Segmented-worm, Reproductive System, ...5.1024

### Auxiliary Chemical Materials

#### Pigments

APPLICATION OF ISCC-NBS CENTROID COLORS AND METHOD OF DESIGNATION COLORS ...Colorimetry, Dyes and Coloring, Paint - General, Photography-chemistry, Standards, Specifications, ...4.0097

#### Preservatives

PILING PRESERVATIVES THRESHOLD STUDIES ...Biological, Fouling, Massachusetts, North Carolina, Wood, ...8.0232

EVALUATION OF EFFECTS OF SATURATED HYDROCARBONS ON PRESERVATIVE QUALITY OF CREOSOTE ...Creosote, Fouling, Isopods, Petroleum Cpd. -non-specific, Wax, Paraffin, Wood Preservatives-non-specif, ...8.0198

PRESERVATION OF WOODS IN THE MARINE ENVIRONMENT ...Biological, Fouling, Habitat Studies, Marine Fungi (non-specific), Materials Used Undersea, Wood, ...8.0216

### Aviation - Air Transportation

#### Air Traffic Control

##### Air Traffic Control-other

DUPLICATE LIMIT STANDARDS FOR SIGNAL COLORS ...Colorimetry, Filter, Navigation Communication, Standards, Specifications, Traffic Control, ...4.0096

#### Azores

AZORES VOLCANIC STUDY ...Atlantic Ocean-general, Element Ratios, Igneous Activity - Volcanism, Ridges, Volcanic, ...8.0195

#### Bacteria

STUDY OF THE BASIC MICROBIOLOGICAL AND BIOCHEMICAL FACTORS IN THE IRRADIATION PRESERVATION OF MARINE PRODUCTS ...Fish -non-specific, Microbiological, Radiation, Refrigeration, Staphylococcus (non-spec.& Ot), ...6.0085

STUDIES ON VIBRIO FOOD POISONING ...Bacterial Endotoxins, Food (epidemiology), Microbiological, Toxicological and Allergy, Vasomotor, ...6.0114

#### Achromobacter Sp

SURVIVAL MECHANISM OF IRRADIATED BACTERIA IN FOODS ...Antibiotics, Cell Injury and Autolysis, Fish -non-specific, Mutagens, Radiation, ...6.0069

#### Anaerobic Bacteria

ANAEROBIC BACTERIA IN THE MARINE ENVIRONMENT ...Fish -non-specific, Food (epidemiology), Isolation From Nat. environ., Microbiological, ...5.0846

#### Bacteria (non-specific)

INFECTIOUS DISEASES OF SALMONID FISHES ...Infectious Conditions and Dis, Mode of Transmission, Pathology, Protozoa -other, Salmon & Trout - Non-specific, ...5.0302

TISSUE CULTURE - VIROLOGY ...Animal Viruses (non-specific), Cell Injury and Autolysis, Marine Biology, Monolayer Culture, Oysters, Tissues, ...5.0978

#### Clostridia (non-specific & Ot)

PROGRAM PROJECT - FOOD MICROBIOLOGY ...Food (epidemiology), Infection, Intoxication & Pois, Microbiological, Salmonella (non-specific & Ot), Toxicological and Allergy, ...6.0005

#### Clostridium Botulinum

OUTGROWTH OF CLOSTRIDIUM BOTULINUM TYPE E IN NONIRRADIATED AND IRRADIATED FISHERY PRODUCTS ...Fish -non-specific, Food (epidemiology), Microbiological, Radiation, Refrigeration, ...6.0081

GROWTH CHARACTERISTICS OF TYPE E CLOSTRIDIUM BOTULINUM IN THE TEMPERATURE RANGE 34 TO 50 F. ...Food (epidemiology), Haddock, Microbiological, Radiation, Temperature Control, ...6.0022

INOCULATED PACK STUDIES ON LOW-DOSE IRRADIATED MARINE PRODUCTS - SHRIMP ...Microbiological, Oysters, Radiation, Shrimp, ...6.0017

APPLICATION OF RADIATION PASTEURIZATION PROCESSES TO PACIFIC CRAB AND FLOUNDER ...Fish -non-specific, Microbiological, Processing, Radiation, Toxicological and Allergy, ...6.0083

BOTULINUM FOOD POISONING IN RELATION TO FISHERY PRODUCTS ...Antibiotics, Fish -non-specific, Great Lakes-general, Microbiological, Repression, ...6.0087

DISTRIBUTION OF CL. BOTULINUM E. IN FISH, SHELLFISH AND THE AQUATIC ENVIRONMENT IN OREGON ...Bacterial Culture, Oregon, Range Or Territorial Distr., Virulence and Pathogenicity, ...5.0822

DISTRIBUTION OF C. BOTULINUM IN COMMERCIAL SMOKED FISH ...Bacterial Pollutant Sources, Fish -non-specific, Food (epidemiology), Microbiological, Smoking, ...5.0337

GROWTH AND TOXICOGENESIS OF C. BOTULINUM IN FISHERY PRODUCTS ...Antimetabolites -non-specific, Bacterial Exotoxins, Fish -non-specific, Growth (non-specific & Ot.), Medical Studies, Microbiological, ...6.0043

## SUBJECT INDEX

## Bacteria

EFFECTS OF HANDLING AND PROCESSING PROCEDURES IN POTENTIAL PATHOGENUS ON FISH ...Fish -other, Legal Standards, Microbiological, Smoking, Toxicological and Allergy, ...6.0044

THERMAL DESTRUCTION OF TYPE E CLOSTRIDIUM BOTULINUM ...Differentiation Mechanism, Food (epidemiology), Heat Resistance, Microbiological, Spore Studies, ...6.0006

ECOLOGY OF CLOSTRIDIUM BOTULINUM TYPE E IN GREEN BAY ...Fish -non-specific, Great Lakes-general, Microbiological, ...5.0850

### Coliforms (non-specific)

A STUDY OF COLIFORM BACTERIA AND ESCHERICHIA COLI ON POLLUTED AND UNPOLLUTED OYSTER BOTTOMS OF MISSISSIPPI ...Identification, Mississippi River, Sampling, Sewage, Vertical Distribution, ...5.0465

ENTERIC BACTERIA AND VIRUSES IN SEWAGE, WATER, AND SHELLFISH ...Bacterial Pollutant Sources, Oysters, Pollution Effects, Sewage, Viral Pollutant Sources, ...6.0052

BACTERIOLOGICAL STUDY OF THE POLLUTION OF KANEOHE BAY, OAHU ...Bays, Bioindicators, Hawaii, Nitrogen, Sewage, Streptococcus Fecalis, ...6.0150

INCIDENCE OF BACTERIA OF PUBLIC HEALTH SIGNIFICANCE IN FRESH COMMERCIAL SHELLFISH ...Crabs, Microbiological, Oysters, Radiation, Salmonella (non-specific & Ot), Staphylococcus (non-spec.& Ot), ...6.0038

### Cryophilic Bacteria

LOW TEMPERATURE GROWTH OF BACTERIA ON FOODS ...Fish -non-specific, Growth (non-specific & Ot), Isoenzymes, Microbiological, Refrigeration, Temperature, ...6.0086

### Escherichia Coli

BACTERIOLOGICAL SURVEYS FOR MICROBIAL STANDARDS FOR FOOD ...Crabs, Food Spoilage Detection, Legal Standards, Microbiological, Staphylococcus (non-spec.& Ot), ...6.0010

### Food Bacteria

VITAMIN K5 AS A FOOD PRESERVATIVE ...Food Processing -other, Microbiological, Repression, Vitamin K, ...6.0075

SURVIVAL OF FOOD PATHOGENS IN RADIATION PASTEURIZATION SEAFOOD ...Cell. env.(non-specific & Ot), Cobalt, Crabs, Radiation, Radiation Sensitivity-, ...6.0063

### Fuel Bacteria

MICROBIAL ACTIVITY IN NON AQUEOUS SYSTEMS ...Growth Rate, Range Or Territorial Distr. , ...5.0782

### Halobacteria

STUDIES OF PROTEINS UNDER EXTREME ENVIRONMENTS ...Cellular Membranes (non-spec.), Cytochromes, Exobiology, Respiration, Salt, ...5.0941

### Halophilic Bacteria

DEGRADATION OF MARINE SURFACES BY SALT REQUIRING BACTERIA ...Control and Regulation, Dna-satellite, Fouling, Isolation From Nat. environ. , Metabolic-biochemical Genetics, ...5.0818

### Intestinal Bacteria

PURIFICATION OF HARD CLAMS FROM POLLUTED WATERS ...Animal Viruses (non-specific), Clams, Contamination - Water, Estuaries, New Jersey, ...5.0467

### Luminous Bacteria

CHEMISTRY AND ENZYMOLOGY OF BIOLUMINESCENCE ...Anthozoa, Bioluminescence, Earthworms, Kinetics -other, Species, ...5.0962

### Marine Bacteria

THE CYCLE OF ORGANIC MATTER IN THE DEEP SEA ...Abyssal, Adsorption, Biogenous, Distribution, Origin, ...1.0112

PHOTOSYNTHETIC BACTERIA ...Bacterial Culture, Classification Or Taxonomy, Isolation From Nat. environ. , Photosynthetic Bacteria, Sulfur Bacteria, ...5.0814

MICROBIAL CORROSION AND DETERIORATION OF NAVAL MATERIALS ...Biological, Classification Or Taxonomy, Fouling, Ionic Effect, Materials Used Undersea, ...8.0203

MICROBIOLOGICAL INVESTIGATIONS OF THRESHOLD PAUSELS ...Catabolism and Degradation, Degradation, Fresh-water Mussels, Scallops, Marine Fungi (non-specific), Wood, Wood Preservatives-non-specif, ...8.0243

THE ROLE OF MARINE ORGANISMS IN THE DEGRADATION OF NAVAL MATERIALS ...Biological, Materials Used Undersea, Model Studies, Reaction Rates, ...8.0241

ECOLOGICAL SIGNIFICANCE OF PARTICULATE MATTER IN THE SEA ...Atlantic Ocean-north, Interbiotic Relat.(non-specif), Organic Matter -water, Temporal Distribution, Vertical Distribution, Zooplankton, ...5.0754

PALEOBOTANICAL RESEARCH AT YALE UNIVERSITY ...Growth Rate, Isolation From Nat. environ. , Plant Succession, Plants, Sulfur Bacteria, ...5.0952

COMPARATIVE PHYSIOLOGY OF BAROPHILIC BACTERIA ...Ionic Effect, Isolation From Nat. environ. , Nutrition, Pressure & Mech Stress, Temperature, ...5.0751

MICROBIAL TRANSFORMATIONS IN SEA WATER ...Chemostat, Growth Rate, Isolation From Nat. environ. , Nutrition, Organics, ...5.0796

MARINE SULFUR OXIDIZING BACTERIA ...Habitat Studies, Ions (inorganic), Isolation From Nat. environ. , Range Or Territorial Distr. , Thiobacillus, ...5.0758

GEOMICROBIOLOGICAL WEATHERING PHENOMENA OFF ANVERS ISLAND ...Antarctica, Habitat Studies, Identification, Petrography, Weathering, ...7.0232

MARINE-BACTERIA CULTURE ...Bacterial Culture, Biological, Fouling, Isolation From Nat. environ. , Water Bacteria, ...5.0849

RESEARCH ON THE ROLE OF BACTERIA IN THE OCEAN ...Denitrification, Elect Trans and Redox, Microorganism Enzymes, Nitrogen Bacteria, Respiration, ...5.0783

THE ROLE OF SULFUR BACTERIA IN CORROSION AND DETERIORATION ...Autotrophic, Biological, Fouling, Plasma Membrane, Sulfur Bacteria, ...5.0805

MARINE BACTERIAL ENZYMES ...Cell. env.(non-specific & Ot.), Growth (non-specific & Ot.), Isolation From Nat. environ. , Plant Distr. (non-specific), Proteolytic Enzymes, ...5.0824

FORMATION AND DEGRADATION OF MANGANESE NODULES BY MARINE BACTERIA ...Cobalt, Manganese, Nickel, Ocean Mining, Titanium, ...7.0025

MECHANISMS OF ATTACHMENT OF MARINE BACTERIA TO SURFACES ...Adsorption & Interface, Biological, Corrosion Prevention-other, Fouling, ...5.0810

BIOCHEMICAL EFFECTS OF MICROORGANISMS UPON THE SALT MARSH ENVIRONMENT ...Identification, Microbiological Analysis, Salinity, Swamps-marshes, Temperature, ...5.0762

BIOCHEMICAL EFFECTS OF MICROORGANISMS UPON THE SALT MARSH ENVIRONMENT ...Aquatic Soils, Core Analysis, Identification, Salinity, Swamps-marshes, Temperature, Water Level Fluctuation, ...5.0763

PHYSIOLOGICAL CHARACTERIZATION OF CERTAIN MARINE BACTERIA ...Bact. morphology (general), Bacterial Culture, Biology, Isolation From Nat. environ. , Metabolism (intracellular), Tissue Techniques, ...5.0784

MICROBIAL CORROSION ...Alloys, Biological, Fouling, Sulfur Bacteria, Water, ...8.0207

DRAG-REDUCING ALGAE ...Algae- General, Coatings-general, Fouling, Natural Occurring, Secretions and Products, Wear, Friction, ...5.0681

BIOLOGICAL OCEANOGRAPHY & DETERIORATION - SHALLOW WATER MARINE SEDIMENTS & WATER COLUMN BACTERIA ...Biology, Continental Shelf, Instrumentation-general, Nephelometry, Vertical Distribution, ...5.0807

MICROBIOLOGY OF MARINE AND ESTUARINE INVERTEBRATES ...Estuaries, Microbiological Analysis, Oysters, ...5.0790

NITRIFICATION BY MARINE MICROORGANISMS ...Autotrophic, Bact. morphology (general), Bacterial Culture, Isolation From Nat. environ. , Nitrogen Bacteria, Range Or Territorial Distr. , ...5.0800

### Methane Bacteria (non-specif.)

PRIMARY PRODUCTION AND DECOMPOSITION IN ESTUARINE WATER ...Estuaries, Florida, Phaeophyta (non-specific & Ot), Primary Productivity, Rhodophyta (non-specific & Ot), Turnover (metabolic), ...5.0954

### Mycobacterium Leprae

PACIFIC BIOMEDICAL RESEARCH ...Buildings, Pacific Ocean-general, Pharmacognosy, ...6.0112

## Bacteria

## SUBJECT INDEX

### Myxobacteria

AQUATIC MYXOBACTERIA - CHONDROCOCCUS COLUMNARIS ...Atlantic Salmon, Sebago Salmon, Identification, Pathology, Warm Water, ...5.0848

### Nitrogen Bacteria

RESEARCH ON THE ROLE OF BACTERIA IN THE OCEAN ...Denitrification, Elect Trans and Redox, Marine Bacteria, Microorganism Enzymes, Respiration, ...5.0783

NITRIFICATION BY MARINE MICROORGANISMS ...Autotrophic, Bact. morphology (general), Bacterial Culture, Isolation From Nat. environ., Marine Bacteria, Range Or Territorial Distr., ...5.0800

### Pediococcus

STUDIES OF THE AEROCOCCUS-PEDIOCOCCUS BACTERIA ...Bioenergetics, Classification Or Taxonomy, Composition of Macromolecules, Detection, ...5.0817

### Photosynthetic Bacteria

PHOTOSYNTHETIC BACTERIA ...Bacterial Culture, Classification Or Taxonomy, Isolation From Nat. environ., Marine Bacteria, Sulfur Bacteria, ...5.0814

### Salmonella (non-specific & Ot)

INCIDENCE OF BACTERIA OF PUBLIC HEALTH SIGNIFICANCE IN FRESH COMMERCIAL SHELLFISH ...Coliforms (non-specific), Crabs, Microbiological, Oysters, Radiation, Staphylococcus (non-spec.& Ot), ...6.0038

SURVIVAL MECHANISM OF IRRADIATED MICROORGANISMS IN FOOD ...Antibiotics, Cell Injury and Autolysis, Preservatives, Radiation, Radiation Protectors, ...6.0070

PROGRAM PROJECT - FOOD MICROBIOLOGY ...Clostridia (non-specific & Ot), Food (epidemiology), Infection, Intoxication & Pois, Microbiological, Toxicological and Allergy, ...6.0005

### Staphylococcus (non-spec.& Ot)

STUDY OF THE BASIC MICROBIOLOGICAL AND BIOCHEMICAL FACTORS IN THE IRRADIATION PRESERVATION OF MARINE PRODUCTS ...Bacteria, Fish-non-specific, Microbiological, Radiation, Refrigeration, ...6.0085

INCIDENCE OF BACTERIA OF PUBLIC HEALTH SIGNIFICANCE IN FRESH COMMERCIAL SHELLFISH ...Coliforms (non-specific), Crabs, Microbiological, Oysters, Radiation, Salmonella (non-specific & Ot), ...6.0038

BACTERIOLOGICAL SURVEYS FOR MICROBIAL STANDARDS FOR FOOD ...Crabs, Escherichia Coli, Food Spoilage Detection, Legal Standards, Microbiological, ...6.0010

### Streptococcus Fecalis

BACTERIOLOGICAL STUDY OF THE POLLUTION OF KANEHOE BAY, OAHU ...Bays, Bioindicators, Coliforms (non-specific), Hawaii, Nitrogen, Sewage, ...6.0150

### Sulfur Bacteria

BIOGEOCHEMISTRY OF TERRESTRIAL & EXTRATERRESTRIAL ORGANIC MATTER ...Biochemical, Biogenous, Biogeochemical Process, Diagenesis, Exobiology, Organic, ...7.0074

PHOTOSYNTHETIC BACTERIA ...Bacterial Culture, Classification Or Taxonomy, Isolation From Nat. environ., Marine Bacteria, Photosynthetic Bacteria, ...5.0814

PALEOBOTANICAL RESEARCH AT YALE UNIVERSITY ...Growth Rate, Isolation From Nat. environ., Marine Bacteria, Plant Succession, Plants, ...5.0952

STUDIES ON MICROBIAL SULFATE REDUCTION AND SULFIDE OXIDATION IN MARINE ENVIRONMENTS ...Carbohydrates, Classification Or Taxonomy, Growth (non-specific & Ot.), Isolation From Nat. environ., Respiration, ...5.0797

THE ROLE OF SULFUR BACTERIA IN CORROSION AND DETERIORATION ...Autotrophic, Biological, Fouling, Marine Bacteria, Plasma Membrane, ...5.0805

MICROBIAL CORROSION ...Alloys, Biological, Fouling, Marine Bacteria, Water, ...8.0207

### Thiobacillus

MARINE SULFUR OXIDIZING BACTERIA ...Habitat Studies, Ions (inorganic), Isolation From Nat. environ., Marine Bacteria, Range Or Territorial Distr., ...5.0758

### Water Bacteria

MARINE-BACTERIA CULTURE ...Bacterial Culture, Biological, Fouling, Isolation From Nat. environ., Marine Bacteria, ...5.0849

THE ECOLOGIC IMPACT OF THE INTERACTIONS AMONG MICROORGANISMS AND AQUATIC CONTAMINANTS IN LAKE ERIE ...Lake Erie, Pollution - Effects of, Primary Productivity, Responses to Growth, Sediments, ...5.0819

## Bacterial Studies

### Classification Or Taxonomy

PHOTOSYNTHETIC BACTERIA ...Bacterial Culture, Isolation From Nat. environ., Marine Bacteria, Photosynthetic Bacteria, Sulfur Bacteria, ...5.0814

MICROBIAL CORROSION AND DETERIORATION OF NAVAL MATERIALS ...Biological, Fouling, Ionic Effect, Marine Bacteria, Materials Used Undersea, ...8.0203

STUDIES ON MICROBIAL SULFATE REDUCTION AND SULFIDE OXIDATION IN MARINE ENVIRONMENTS ...Carbohydrates, Growth (non-specific & Ot.), Isolation From Nat. environ., Respiration, Sulfur Bacteria, ...5.0797

STUDIES OF THE AEROCOCCUS-PEDIOCOCCUS BACTERIA ...Bioenergetics, Composition of Macromolecules, Detection, Pediococcus, ...5.0817

### Identification

AQUATIC MYXOBACTERIA - CHONDROCOCCUS COLUMNARIS ...Atlantic Salmon, Sebago Salmon, Myxobacteria, Pathology, Warm Water, ...5.0848

GEOMICROBIOLOGICAL WEATHERING PHENOMENA OFF ANVERS ISLAND ...Antarctica, Habitat Studies, Marine Bacteria, Petrography, Weathering, ...7.0232

BIOCHEMICAL EFFECTS OF MICROORGANISMS UPON THE SALT MARSH ENVIRONMENT ...Marine Bacteria, Microbiological Analysis, Salinity, Swamps-marshes, Temperature, ...5.0762

BIOCHEMICAL EFFECTS OF MICROORGANISMS UPON THE SALT MARSH ENVIRONMENT ...Aquatic Soils, Core Analysis, Marine Bacteria, Salinity, Swamps-marshes, Temperature, Water Level Fluctuation, ...5.0763

A STUDY OF COLIFORM BACTERIA AND ESCHERICHIA COLI ON POLLUTED AND UNPOLLUTED OYSTER BOTTOMS OF MISSISSIPPI ...Coliforms (non-specific), Mississippi River, Sampling, Sewage, Vertical Distribution, ...5.0465

ORGANIC DEBRIS ON CONNECTICUT BEACHES AND SHORES ...Catabolism and Degradation, Connecticut, Organic Matter, Physical-general, Shoreline - Coastline, ...6.0143

BIOLOGICAL OCEANOGRAPHY AND DETERIORATION, DEEP OCEAN-HIGH PRESSURE BACTERIA ...Biological, Biology, Chemistry, Microorganisms (non-specific), Submersibles, ...8.0236

### Isolation From Nat. environ.

PHOTOSYNTHETIC BACTERIA ...Bacterial Culture, Classification Or Taxonomy, Marine Bacteria, Photosynthetic Bacteria, Sulfur Bacteria, ...5.0814

PALEOBOTANICAL RESEARCH AT YALE UNIVERSITY ...Growth Rate, Marine Bacteria, Plant Succession, Plants, Sulfur Bacteria, ...5.0952

COMPARATIVE PHYSIOLOGY OF BAROPHILIC BACTERIA ...Ionic Effect, Marine Bacteria, Nutrition, Pressure & Mech Stress, Temperature, ...5.0751

MICROBIAL TRANSFORMATIONS IN SEA WATER ...Chemostat, Growth Rate, Marine Bacteria, Nutrition, Organics, ...5.0796

STUDIES ON MICROBIAL SULFATE REDUCTION AND SULFIDE OXIDATION IN MARINE ENVIRONMENTS ...Carbohydrates, Classification Or Taxonomy, Growth (non-specific & Ot.), Respiration, Sulfur Bacteria, ...5.0797

MARINE SULFUR OXIDIZING BACTERIA ...Habitat Studies, Ions (inorganic), Marine Bacteria, Range Or Territorial Distr., Thiobacillus, ...5.0758

MARINE-BACTERIA CULTURE ...Bacterial Culture, Biological, Fouling, Marine Bacteria, Water Bacteria, ...5.0849

MARINE BACTERIAL ENZYMES ...Cell. env.(non-specific & Ot.), Growth (non-specific & Ot.), Marine Bacteria, Plant Distr. (non-specific), Proteolytic Enzymes, ...5.0824

## SUBJECT INDEX

## Bayous

DEGRADATION OF MARINE SURFACES BY SALT REQUIRING BACTERIA ...Control and Regulation, Dna-satellite, Fouling, Halophilic Bacteria, Metabolic-biochemical Genetics, ...5.0818

PHYSIOLOGICAL CHARACTERIZATION OF CERTAIN MARINE BACTERIA ...Bact. morphology (general), Bacterial Culture, Biology, Marine Bacteria, Metabolism (intracellular), Tissue Techniques, ...5.0784

NITRIFICATION BY MARINE MICROORGANISMS ...Autotrophic, Bact. morphology (general), Bacterial Culture, Marine Bacteria, Nitrogen Bacteria, Range Or Territorial Distr., ...5.0800

ANAEROBIC BACTERIA IN THE MARINE ENVIRONMENT ...Fish -non-specific, Food (epidemiology), Microbiological, ...5.0846

### Morphology

#### Bact. morphology (general)

PHYSIOLOGICAL CHARACTERIZATION OF CERTAIN MARINE BACTERIA ...Bacterial Culture, Biology, Isolation From Nat. environ., Marine Bacteria, Metabolism (intracellular), Tissue Techniques, ...5.0784

NITRIFICATION BY MARINE MICROORGANISMS ...Autotrophic, Bacterial Culture, Isolation From Nat. environ., Marine Bacteria, Nitrogen Bacteria, Range Or Territorial Distr., ...5.0800

#### Spore Studies

THERMAL DESTRUCTION OF TYPE E CLOSTRIDIUM BOTULINUM ...Clostridium Botulinum, Differentiation Mechanism, Food (epidemiology), Heat Resistance, Microbiological, ...6.0006

### Bacteriophage

#### Escherichia Coli

MORPHOGENESIS OF THE BACTERIOPHAGE ...Composition, Electron Microscopy, Metabolic-biochemical Genetics, Microorganism Proteins, Morphological Action, ...5.0792

### Barium

HUMIDITY SENSORS ...Fluoride, Humidity Instruments, Stability, Transducers, ...8.0083

### Bathyal

SYSTEMATICS OF THE ANTARCTIC AND SUBANTARCTIC GAMMARIDEAN AMPHIPODA ...Abyssal, Animal Taxonomy, Antarctic Ocean, Shrimp - Amphipods, Vertical Distribution, ...5.0359

GEOHERMAL STUDIES IN DEEP-SEA DRILL HOLES ...Abyssal, Borehole Geophysics, Core Temperature, Earth Interior, Geothermal, Heat Flow Measurements, Heat Flows, Sediments-general, Technique Development, ...7.0122

ABYSSAL AND BATHYAL SYNOPIIDAE OF WORLD ...Abyssal, Animal Taxonomy, Crustacea -non-specific, Vertical Distribution, World Wide, ...5.0384

### Bathymetry

DIGITAL OUTPUT SURVEY DEPTH SOUNDING ...Coding, Digital Computer Applications, Readout Systems, Sonar, Sound Gear, ...8.0123

EXPERIMENTAL VERIFICATION OF WIDE SWATH OCEAN BOTTOM CONTOURING WITH SPLIT BEAM RECEIVERS ...Caribbean Sea, Receivers, Sonar, Technique Development, Topographic, ...7.0302

LOW NOISE MULTI-CHANNEL HYDROPHONE CABLE ...Amplifiers, Cables and Transmission Lines, Seismic Studies, Telephone, Transmission Lines, ...8.0145

RESEARCH IN MARINE GEOLOGY ...Data Analysis - General, Gravity Studies, Magnetic Studies, Seismic Studies, Ships and Cruises, ...4.0027

MARINE GEOLOGY ...Acoustical, Geomorphology-topography, Magnetic Studies, Mapping, Sea Floor Spreading, ...7.0041

SUBMARINE TOPOGRAPHY ...Origin, Pacific Ocean-south, Physiography-general, Sedimentation, Textures-structures, ...7.0299

STRUCTURE OF OCEAN BASINS ...Basins, Charts, Indian Ocean-general, Ridges, Structural Studies, ...7.0092

MARINE SEDIMENTS ...Atlantic Ocean-south, Magnetic Studies, Ridges, Sea Floor Spreading, Textures-structures, ...7.0203

ABYSSAL PLAIN SEDIMENTATION AND STRATIGRAPHY OFF OREGON ...Abyssal, Coring and Dredging, Paleoclimatology, Sedimentation, Turbidity Currents, ...7.0272

DIGITIZING SYSTEM FOR OCEANOGRAPHIC DATA ...Analog-digital Converters, Applied Electronics, Digital Computers, Instrumental Services, Seismic Studies, Spectral Analysis, ...4.0039

ATLANTIC OCEAN CRUSTAL STUDIES ...Atlantic Ocean-general Coring and Dredging, Crust, Heat Flow Measurements, Seismic Reflection, ...7.0116

GEOLOGICAL AND GEOPHYSICAL INVESTIGATION OF THE BAHAMA BANK ...Banks, British West Indies, Crust, Magnetic Studies, Seismic Studies, ...7.0110

GEOPHYSICAL AND GEOLOGICAL STUDY OF THE DARWIN RISE .. Coring and Dredging, Geophysics-general, Gravity Studies, Magnetic Studies, Ocean Basins, Pacific Ocean-west, Photography, Refraction, Ridges, Seamounts-guyots, ...7.0112

INDIAN OCEAN DATA REDUCTION ...Data Analysis - General, Geophysics-general, Indian Ocean-general, Ocean Basins, Sedimentology-general, ...4.0034

EASTERN ATLANTIC AND MEDITERRANEAN OCEANOGRAPHY ...Acoustical, Atlantic Ocean-north, Data Analysis - General, Mediterranean Sea-general, Oceanography-general, ...1.0055

GRAVITY SURVEY ARCTIC OCEAN ...Beaufort Sea, Continental Shelf, Geodetic Surveys, Gravity Studies, Seismic Studies, Structural Studies, ...7.0154

TRANSVERSAL DRIFTS IN BOTTOM PROFILE ...Benthonic-bottom, Intertidal Areas, Ocean Waves - Currents, Waves, ...7.0224

GLOBAL OCEAN FLOOR ANALYSIS ...Acoustical, Benthonic-bottom, Currents-bottom, Geomorphology-topography, Seismic Studies, Subbottom, ...4.0046

HYDROGRAPHIC SURVEY TECHNIQUES ...Hydrographic, Reproduction, Technique Development, ...8.0089

DIVER NAVIGATION DEVICE ...Diving and Scuba, Diving-system, Navigation, Technique Development, ...6.0131

EVALUATION OF CONTEMPORARY PRECISION NAVIGATION SYSTEMS ...Communication & Navigation, Navigation, Navigation Communication, Satellites, Technique Development, ...4.0087

OCEAN ENGINEERING ...Commercial Fishing, Fishing Gear, Instrumental Services, Telemetry-other, ...8.0152

### Bathythermographs

OCEANOGRAPHIC ENGINEERING ...Engineering Studies-other, Experiments and Tests, Other-design-and-construction, Platforms, Special Mission Ships, ...8.0269

BATHYTHERMOGRAPH ANALYSIS ...Critically Evaluated Data, Data Analysis - General, Model Studies, Salinity, Surface Environments, Temperature, ...1.0178

COLLECTION AND INTERPRETATION OF OCEANIC THERMAL GRADIENTS ...Gulf of Mexico, Heat Flow Measurements, Pacific Ocean-east, Temperature, ...1.0187

WOODS HOLE ENVIRONMENTAL STUDIES IN PHYSICAL OCEANOGRAPHY ...Acoustical, Oceanic Fronts, Salinity, Temperature, Velocity, ...1.0056

DIGITAL RECORDING AND PROCESSING OF IN SITU DEPTH-TEMPERATURE-SALINITY DATA ...Depth, Error Analysis, Research - Development, Salinity, Temperature, ...4.0025

EASTERN TROPICAL PACIFIC COOPERATIVE SURVEY ...Mapping, Pacific Ocean-east, Ships and Cruises, ...4.0122

### Bay of Bengal

CONTINENTAL MARGIN GEOLOGY ...Continental Shelves, Fans, Seismic Reflection, Subbottom, Textures-structures, ...7.0030

### Bayous

HEAVY MINERAL DISTRIBUTION OF THE WHITE OAK ESTUARY-BOGUE INLET AREA, NORTH CAROLINA ...Distribution, Estuaries, Heavy Minerals, North Carolina, ...7.0269

BAYOU LAFOURCHE SEDIMENTATION STUDY, LOUISIANA ...Channels, Louisiana, Morphology-general, Rate of Deposition, Sediment Yield, ...9.0010

## SUBJECT INDEX

### Bays

- ECOLOGICAL STUDY OF DUXBURY BAY** ...Aquatic Ecology, Habitat Studies, Massachusetts, Survey Studies, Tides, ...5.0898
- HYDROGRAPHIC AND BIOLOGICAL SURVEY OF MONT-SWEAG BAY AND VICINITY** ...Maine, Number Or Density, Organism Sampling Devices, Vertical Distribution, Zooplankton, ...5.0893
- PHYSICAL AND BIOLOGICAL OCEANOGRAPHY OF A LUMINOUS BAY** ...Bioluminescence, Circulation-general, Jamaica, Model Studies, Phytoplankton, ...5.0976
- AN ECOLOGICAL STUDY OF SOUTH BISCAYNE BAY IN THE VICINITY OF TURKEY POINT** ...Applied Ecology, Balance of Nature, Electric Power Plants, Environmental Ecology, Florida, Phytoplankton, Thermal Pollution, ...5.0877
- BIOLUMINESCENCE** ...Autotrophic, Bioluminescence, Jamaica, Phytoplankton, Responses to Growth, ...1.0165
- DIVERSITY, COMMUNITY STRUCTURE AND TROPHIC RELATIONS OF TROPICAL ZOOPLANKTON** ...Interbiotic Relat.(non-specif), Productivity - Food Chain, Tropic, Zooplankton, ...5.0785
- RECENT MARINE AND NONMARINE SEDIMENTS AND MICROFAUNA OF DELAWARE COASTAL AREAS** ...Delaware, Facies, Paleoenvironments, Quaternary Period, Sedimentary Structure-general, Shoreline - Coastline, ...7.0207
- MASS MORTALITY OF PACIFIC OYSTERS ALONG THE WASHINGTON COAST** ...Environmental Ecology, Mortality Rates, Oysters, Pathology, Puget Sound, ...5.0510
- MASS MORTALITY OF OYSTERS ALONG THE OREGON COAST** ...Invertebrate Pathology, Mortality Rates, Oregon, Oysters, Pathology, ...5.0488
- SILVER SALMON STUDIES IN THE RESURRECTION BAY AREA** ...Alaska, Aquatic Ecology, Environmental Ecology, Management -other, Salmon -coho, chinook, sockeye..., ...5.0189
- CREEL CENSUS OF SUMMER FLOUNDER SPORT FISHERY IN GREAT BAY, NEW JERSEY** ...Censusing, Lefteye Flounders, Legislation, Life History Studies, New Jersey, ...5.0124
- SPORTFISH YIELD OF NATURAL REEFS** ...California, Fishery Development -other, Habitat Studies, Population Dynamics, ...5.0199
- LOCATING AND MAPPING THE EXISTING SEED OYSTER BEDS IN DELAWARE BAY** ...Aquatic Ecology, Delaware Bay, Mapping, Oysters, Spawning & Nesting Sites, ...5.0381
- BRISTOL BAY INTERMEDIATE HIGH SEAS-INSHORE TEST FISHING** ...Age, Alaska, Commercial Fishing, Salmon -coho, chinook, sockeye..., ...5.0022
- BRISTOL BAY OFFSHORE TEST FISHING PROGRAM** ...Age, Alaska, Commercial Fishing, Nets, Salmon -coho, chinook, sockeye..., ...5.0023
- OYSTER SEED PROPAGATION STUDY** ...Aquatic Ecology, Commercial Fishing, Oysters, Pacific Ocean-east, Spawning & Nesting Sites, ...8.0012
- DETERMINATION OF SAFE LEVELS OF POLLUTION IN PUERTO RICO** ...Contamination - Water, Meteorological Studies-general, Pollution - Effects of , Puerto Rico, Recreation Sites, Water Properties-general, ...6.0181
- RESIDENCE TIMES OF WATERS BEHIND BARRIER ISLANDS** ...Circulation-general, Simulation Theory, Tides, Wind-water Interaction, ...2.0018
- EFFECTS OF RIVERS ON THE METABOLISM OF TEXAS BAYS** ...Nutrients, Pollutants-general, Primary Productivity, Streams, Texas, Water Quality-general, ...6.0187
- THE EFFECTS OF POLLUTION ON BENTHIC MARINE PLANT COMMUNITIES** ...Habitat Studies, Water Depth, Water Levels, ...5.0724
- ENVIRONMENTAL BIOLOGY OF TOMALES DAY** ...Aquatic Ecology, Benthic Fauna, California, Mans Activities, Pollution - Effects of , ...5.0850
- EFFECTS OF WATER POLLUTION IN SAN FRANCISCO BAY** ...Economic Impact, Pollution - Effects of , Recreation Sites, San Francisco Bay, Social Aspects, Water Utilization -domestic, Welfare Economics, ...6.0140
- BIONOMICS OF FISHES AND SHELLFISHES** ...Aquaculture & Fish-farming, Economics-general, Environmental Ecology, Oregon, Productivity - Food Chain, ...5.0920
- HYDROGRAPHY OF APPALACHEE BAY** ...Currents-ocean, Rain-general, Salinity, Sunshine, Temperature, ...1.0147
- BACTERIOLOGICAL STUDY OF THE POLLUTION OF KANEOHE BAY, OAHU** ...Bioindicators, Coliforms (non-specific), Hawaii, Nitrogen, Sewage, Streptococcus Fecalis, ...6.0150
- SEDIMENTOLOGY AND GEOLOGIC HISTORY OF HUMBOLDT BAY, CALIFORNIA** ...California, Coring and Dredging, Geologic History-general, Pacific Ocean-east, Physical Properties, ...7.0193
- PRIMARY PRODUCTIVITY IN PUERTO GALERA BAY, MINDORO, PHILIPPINES** ...Philippines, Primary Productivity, Productivity - Food Chain, ...5.1025
- A SEDIMENTOLOGIC STUDY OF MOBILE BAY AND PERDIDO BAY** ...Alabama, Distribution, Ocean History, Rate of Deposition, Stratigraphy-general, ...7.0231
- AN ECONOMIC EVALUATION OF WATER POLLUTION CONTROL, YAQUINA BAY, ORE** ...Alternative Planning, Benefit-cost Analysis, Model Studies, Oregon, Systems Analysis, Water Quality Control-general, ...6.0173
- SOCIO-ECONOMIC STUDY OF NARRAGANSETT BAY, RHODE ISLAND** ...Benefit-cost Analysis, Estuaries, Land Use, Rhode Island, Social Aspects, Water Quality Control-general, ...9.0019
- MARINE GEOLOGY OF THE SAN FRANCISCO BAY** ...Geology-general, Gold, Mechanical Properties, San Francisco Bay, Structural Studies, Tectogenesis, ...7.0035
- GEOCHEMISTRY OF SAN FRANCISCO BAY** ...Clays, Distribution, Mineral Associations, San Francisco Bay, Trace Element Analysis, ...1.0074
- HYDROLOGY OF UPPER OLD TAMPA BAY, FLORIDA** ...Groundwater Movement, Hydrology-general, Lakes, Permeability, Water Harvesting, Water Quality-general, ...2.0067
- INVENTORY OF THE GULF ESTUARY SYSTEM** ...Data Acquisition, Estuaries, Fishing, Gulf of Mexico, Sedimentology-general, ...4.0047
- SAN PABLO BAY STUDY** ...Benthic Fauna, Bottom Sampling Device, Excavation, Pollution - Effects of , Spoil Banks, ...6.0136
- MARINE BIOLOGICAL INVESTIGATIONS STUDIES PROJECT (FISHES)** ...Alaska, Aquatic Ecology, Fish -non-specific, Population Dynamics, ...5.0011
- ADULT SHRIMP STUDIES** ...Alaska, Biological Rhythms, Habitat Studies, Life History Studies, Shrimps - Common, ...5.0340
- PREDICTING COMMERCIAL SHRIMP ABUNDANCE (SHRIMP DYNAMICS PROGRAM)** ...Behavioral Ecology, Commercial Fishing, Environmental Ecology, Population Dynamics, Shrimps - Common, ...5.0499

### Beaches

- SAND RIPPLES** ...Distribution, Grain Size, Ocean Waves - Currents, Ripple Marks, Shape, ...7.0196
- MULTISPECTRAL SENSING OF COASTAL ENVIRONMENTS** ...Aerial Photography, Depth, E M Radiation-general, Geomorphology-topography, Photography, Shoreline - Coastline, ...4.0166
- ENVIRONMENTAL APPLICATIONS OF PASSIVE MICROWAVE SENSORS** ...Ice-general, Microwave Sensing, Sea Ice, Sedimentology-general, Snow-general, Soil Engineering Investigation, ...4.0136
- DESIGN OF RUBBLE WAVE-ABSORBER** ...Energy Dissipators, Harbors, Measuring Devices-other, Shoreline Structures, Waves, ...8.0037
- ANALYSIS OF AN ATTEMPT TO CONTROL BEACH EROSION AT SCIENTISTS CLIFFS, MARYLAND** ...Chesapeake Bay, Engineering Studies-other, Erosion, Groin, Maryland, ...8.0038
- DEVELOPMENT OF CRITERIA FOR ARTIFICIAL BEACHES** ...Beach, Coastal Engineering-other, Design Criteria, Shoreline Structures, Statistics-general, ...8.0041
- OREGON-CALIFORNIA BLACK SANDS** ...California, Heavy Mineral Analysis, Heavy Minerals, Mineralogy, Ocean Mining, Potential of Deposit, ...7.0015
- SAND DOLLAR COMMUNITIES** ...California, Habitat Studies, Productivity - Food Chain, Sea Urchins & Other Echinoderm, ...5.0533

### Bearing Capacity

- SEA FLOOR STUDIES - DEPOSITIONAL AND EROSION PROCESSES** ...Distribution, Erosion, Lithification-general, Sedimentation, Stability Analysis, ...7.0200
- GEOLOGICAL OCEANOGRAPHY - PHYSICAL PROPERTIES** ...Biology, Chemistry, Photography, Physical Properties, Shear Strength, ...8.0337

## SUBJECT INDEX

### Benthos

BOTTOM SOIL PROPERTIES AND FOUNDATIONS ...Consolidation, Foundationstgeneral, Mechanical Properties, Shear Strength, Soil Testing-general, ...8.0332

### Beef Husbandry

#### Management

THE EFFECT OF CONTROLLING SALT-MARSH MOSQUITOES ON BEEF CATTLE PRODUCTION, PLANT ECOLOGY, SOIL PRODUCTIVITY, AND ESTUARINE ANIMALS ...Cultural Control of Insects, Ectoparasitic Insects, Wetlands, ...5.0927

### Belgium

STUDY OF FOSSIL SEA TURTLE COLLECTION AT THE INSTITUT ROYAL DES SCIENCES NATURELLES, BRUSSELS, BELGIUM ...Collect'ons, Description of Fossils, Internal Structure, Reptiles, Tertiary Period, ...7.0177

### Beneficiation

MARINE HEAVY-METALS PRODUCTION INFORMATION, ON WORLDWIDE BASIS ...Appraisals-general, Deposits-ores, Documents & Literature, Heavy Elements, Ocean Mining, ...7.0006

### Benthonic-bottom

THE MARINE ALGAE OF VIRGINIA ...Algae- General, Chesapeake Bay, Marine Plants, Plant Taxonomy, Virginia, ...5.0698

SEA BED INSTALLATION ...Deep, Diving and Scuba, Stabilization, Submersibles, Underwater-construction, ...8.0331

IMPROVEMENT AND APPLICATION OF BENTHIC ALGAL ISOTOPE PRODUCTIVITY MEASURING METHODS ...Algae- General, Caulerpa, Pacific Ocean-general, Physiological Ecology, Plant Prod. (non-specific), Rhodophyta (non-specific & Ot), ...5.0968

COLUMBIA RIVER EFFECTS IN THE NORTHEAST PACIFIC ...Bed Load, Columbia River, Mixing, Ocean Waves - Currents, Oceanic Fronts, ...2.0065

MODIFY 19 OCEAN BOTTOM SEISMOGRAPHS AND CONDUCT TESTS WITH THE DEVICE ...Equipment, Geophysical Equipment, Seismographs, ...8.0110

OPTICAL MEASUREMENTS ...Currents-ocean, Optical, Photography, Subsurface Environments, ...1.0170

SYSTEMATICS AND ECOLOGY OF SUBTIDAL BENTHIC MARINE ALGAE ...Algae- General, Benthic Flora, Habitat Studies, Marine Plants, Plant Taxonomy, Range Or Territorial Distr. , ...5.0701

THE INFLUENCE OF DEPOSIT FEEDING BENTHOS ON THE STABILITY OF BOTTOM SEDIMENTS AND COMMUNITY TROPHIC STRUCTURE ...Benthic Fauna, Massachusetts, Productivity - Food Chain, Suspension, ...5.0559

ZOOLOGY OF OCEANIC BENTHIC ANIMALS OFF THE NORTH CAROLINA COAST ...Adaptation, Atlantic Ocean-north, Benthic Fauna, Environmental Physiology, Water Temperature-non-specific, ...5.1009

STUDY OF OCEAN CURRENTS AT SEA FLOOR AND THEIR SPATIAL CORRELATION ...Currents-bottom, Field Characteristics, Water Motion Recorders, ...2.0003

A STUDY OF THE TEMPERATURE MICROSTRUCTURE AND EDDY TRANSPORT IN THE OCEAN FLOOR BOUNDARY LAYER ...Geothermal, Heat Flow Measurements, Physical Analysis, Temperature, Thermodynamics, ...1.0189

OCEAN BOTTOM EMPLACED GEOPHYSICAL STATION ...Automatic Stations, Dynamic Gravimeters, Geophysical Equipment, Gravity Studies, Instrumental Services, Pacific Ocean-east, Temperature, Water Motion Recorders, ...4.0035

DEEP SEA PHOTOGRAPHIC SYSTEM AND A BOX CORER ...Abyssal, Coring and Dredging, Photography, ...8.0141

SEDIMENTS IN BAFFIN BAY AND THE EFFECTS OF AN ARCTIC ENVIRONMENT ON MARINE SEDIMENTATION ...Baffin Bay, Origin, Physical Properties, Polar, Sedimentation, ...7.0265

DEEP SEA BENTHOS IN THE GULF OF MEXICO ...Benthic Fauna, Biology, Gulf of Mexico, Population Dynamics, ...5.0655

OCEANOGRAPHIC RESEARCH ...Abyssal, Fouling, Geomorphology-topography, Marine Soils, Tables, Compilations, Catalogs, ...8.0343

BOTTOM CURRENTS AND DEEP SEA TIDES ...Abyssal, Acoustical, Currents-other, Finite Differences, Model Studies, Tides, ...2.0004

BOTTOM ENVIRONMENT--GULF OF MEXICO ...Biology, Chemistry, Gulf of Mexico, Ocean Currents-other, Physical Properties, ...2.0043

BIOGRAPHIC STUDY OF THE BENTHOS OF PUERTO RICO AND THE VIRGIN ISLANDS ...Benthic Fauna, Benthic Flora, Currents-ocean, Range Or Territorial Distr. , Temperature, Vertical Distribution, ...5.0652

SEA FLOOR ROUGHNESS ...Acoustical, Attenuation, Bottom Sampling Device, Magnetic Studies, Propagation, Transmission, ...7.0033

DEEP OCEAN ENGINEERING TECHNOLOGY ...Abyssal, Buoys, Experiments and Tests, Facilities, Platforms, Scientific-service-support, ...8.0270

WOODS HOLE ENVIRONMENTAL STUDIES OF SEA FLOOR PROPERTIES ...Acoustical, Data Acquisition, Geomorphology-topography, Gravity Studies, Subbottom, ...7.0118

WOODS HOLE ENVIRONMENTAL STUDIES OCEANIC ACOUSTICS ...Acoustical, Atlantic Ocean-north, Data Analysis - General, Reverberation, Scattering, ...1.0057

WATER QUALITY - BENTHIC INVERTEBRATE RELATIONSHIPS IN ESTUARIES ...Benthic Fauna, Estuaries, Maine, Pollution - Effects of , Pollution Effects, ...5.0894

TRANSVERSAL DRIFTS IN BOTTOM PROFILE ...Bathymetry, Intertidal Areas, Ocean Waves - Currents, Waves, ...7.0224

SHALLOW WATER MEIOBENTHOS OF THE BERMUDA PLATFORM ...Benthic Fauna, Bermuda, Continental Shelf, ...5.0649

BENTHIC MARINE FAUNA OF THE UPPER SHELF OFF VIRGINIA ...Animal Taxonomy, Benthic Fauna, Continental Shelf, Organism Sampling Devices, Virginia, ...5.0660

ECOLOGY OF ECHINODS ...Behavioral Ecology, Sea Urchins & Other Echinoderm, Vertical Distribution, Water Environment -other, ...5.0571

ELECTROMAGNETIC NOISE MEASUREMENTS IN THE SEA ...Depth, Electromagnetic, Submersibles, Surface Environments, ...1.0138

ADVANCED TECHNOLOGY AND BOTTOM PREDICTIONS ...Acoustical, Data Acquisition, Data Analysis - General, Forecasting-prediction, Model Studies, Seismic Studies, ...1.0045

GLOBAL OCEAN FLOOR ANALYSIS ...Acoustical, Bathymetry, Currents-bottom, Geomorphology-topography, Seismic Studies, Subbottom, ...4.0046

BOTTOM-REFLECTED SONAR STUDIES ...Acoustical, Scattering, Sonar, Surface Environments, Transmission, ...1.0025

DIVER-ASSISTED OCEANOGRAPHY ...Continental Shelf, Currents-bottom, Diving and Scuba, Geomorphology-topography, Mapping, Waves-internal, ...4.0098

POWER SOURCES ...Power Transmission Systems, Safety, Submerged Ships, Technique Development, Underwater-construction, ...8.0156

CONSTRUCTION SYSTEMS ...Engineering Studies-other, Equipment, Submerged Ships, Underwater-construction, ...8.0120

FIELD STUDY - CAPE COD, MASS. ...Animal Distr. (non-specific), Buoys, Environmental Ecology, Sediments-other, Temperature, ...5.0584

### Benthos

#### Benthic Fauna

SEASONAL DISTRIBUTION AND ABUNDANCE OF DEMERSAL FISH AND INVERTEBRATES IN THE MARINE WATERS ADJACENT TO THE MOUTH OF THE COLUMBIA RIVER ...Number Or Density, Productivity - Food Chain, Radioactivity-general, Temporal Distribution, Vertical Distribution, ...5.0930

RESEARCH IN MARINE BENTHIC ECOLOGY OFF OREGON ...Environmental Ecology, Number Or Density, Oregon, Vertical Distribution, ...5.0916

BIOLOGY OF THE DEEP-SEA BENTHOS ...Atlantic Ocean-general, Number Or Density, Tropic, Vertical Distribution, ...5.0902

THE INFLUENCE OF DEPOSIT FEEDING BENTHOS ON THE STABILITY OF BOTTOM SEDIMENTS AND COMMUNITY TROPHIC STRUCTURE ...Benthonic-bottom, Massachusetts, Productivity - Food Chain, Suspension, ...5.0559

## Benthos

## SUBJECT INDEX

- ZOOLOGY OF OCEANIC BENTHIC ANIMALS OFF THE NORTH CAROLINA COAST ...Adaptation, Atlantic Ocean-north, Benthonic-bottom, Environmental Physiology, Water Temperature-non-specific, ...5.1009
- DEEP WATER BENTHIC POLYCHAETES ...Biology, Lugworms, Marine Segmentedworm, Photography, Vertical Distribution, ...5.0540
- RECENT AND ANCIENT FAUNAS OF A DROWNED ISLAND CHAIN (MID-PACIFIC MOUNTAINS) ...Biofacies, Coring and Dredging, Hawaii, Seamounts-guyots, ...5.0863
- PHYCNOGONIDA OF THE ANTARCTIC REGIONS ...Animal Taxonomy, Antarctica, Collections, Sea Spiders, ...5.0647
- BENTHIC COMMUNITIES ...Behavioral Ecology, Bottom Sampling Device, Developmental Physiology, Fouling, Metabolism, Productivity - Food Chain, ...5.0561
- DEEP SEA BENTHOS IN THE GULF OF MEXICO ...Benthonic-bottom, Biology, Gulf of Mexico, Population Dynamics, ...5.0655
- BIOGRAPHIC STUDY OF THE BENTHOS OF PUERTO RICO AND THE VIRGIN ISLANDS ...Benthic Flora, Benthonic-bottom, Currents-ocean, Range Or Territorial Distr. , Temperature, Vertical Distribution, ...5.0652
- THE DETERMINATION OF THE AVAILABILITY OF SEA ROBINS ...Chesapeake Bay, Fish -other, Nets, Vertical Distribution, ...5.0152
- LAKE BORGNE-CHANDELEUR SOUND SYSTEM ...Louisiana, Number Or Density, Plankton Sampling, River Deltas, Vertical Distribution, ...5.0091
- TIMBALIER - TERREBONNE BAYS SYSTEM ...Louisiana, Number Or Density, Plankton Sampling, River Deltas, Vertical Distribution, ...5.0092
- BRETON SOUND - MOUTH OF MISSISSIPPI RIVER SYSTEM ...Louisiana, Number Or Density, Plankton Sampling, River Deltas, Vertical Distribution, ...5.0093
- VERMILION - CALCASIEU - SABINE SYSTEM ...Louisiana, Number Or Density, Plankton Sampling, Salinity, Tides, Vertical Distribution, ...5.0094
- ATCHAFALAYA RIVER - GAILOU LAKE SYSTEM ...Lakes, Louisiana, Number Or Density, Plankton Sampling, Vertical Distribution, ...5.0095
- WATER QUALITY - BENTHIC INVERTEBRATE RELATIONSHIPS IN ESTUARIES ...Benthonic-bottom, Estuaries, Maine, Pollution - Effects of , Pollution Effects, ...5.0894
- THE BIOLOGY OF THE INFAUNA OF A TROPICAL SOFT BOTTOM AREA ...Aquatic Ecology, Estuaries, Florida, Intertidal Areas, Pollution - Effects of , ...5.0879
- ENVIRONMENTAL BIOLOGY OF TOMALES BAY ...Aquatic Ecology, Bays, California, Man Activities, Pollution - Effects of , ...5.0860
- SHALLOW WATER MEIOBENTHOS OF THE BERMUDA PLATFORM ...Benthonic-bottom, Bermuda, Continental Shelf, ...5.0649
- BENTHIC MARINE FAUNA OF THE UPPER SHELF OFF VIRGINIA ...Animal Taxonomy, Benthonic-bottom, Continental Shelf, Organism Sampling Devices, Virginia, ...5.0660
- SAN PABLO BAY STUDY ...Bays, Bottom Sampling Device, Excavation, Pollution - Effects of , Spoil Banks, ...6.0136
- SUCCESSION, SPACIAL AND TEMPORAL DISTRIBUTION, AND BIOLOGY OF BENTHIC ORGANISMS ...Benthic Flora, Temporal Distribution, ...5.0638
- STUDIES ON OPHIDIID FISHES ...Abyssal, Animal Taxonomy, Fish -other, Vertebrate Anatomy, Vertical Distribution, ...5.0054
- RESEARCH ON THE MACROBENTHOS OF THE GREAT LAKES ...Aquatic Ecology, Earthworms, Food Supply, Great Lakes-general, Water Quality-general, ...5.0626
- SHELLFISH EXPLORATIONS ...Clams, Commercial Fishing, Mark, Tag Or Capture -other, Population Dynamics, ...5.0514
- STUDIES OF THE BENTHIC INVERTEBRATES OF THE ATLANTIC CONTINENTAL SHELF ...Atlantic Ocean-north, Continental Shelf, Population Dynamics, Productivity - Food Chain, ...5.0623
- ESTUARINE STUDIES OF SOUTHEASTERN ALASKA ...Alaska, Environmental Ecology, Estuaries, Number Or Density, Vertical Distribution, ...5.0852

### Benthic Flora

- STUDIES WITH TROPICAL AND SUBTROPICAL MICROALGAE ...Algal Culture, Continental Shelf, Primary Productivity, Sub - Tropic, Tropic, ...5.0693

- ECOLOGY OF TROPICAL DEEP WATER ALGAE ...Algae-General, Diving and Scuba, Plant Succession, Temporal Distribution, Tropic, Vertical Distribution, ...5.0722
- MEASUREMENTS OF OXYGEN CONSUMPTION BY THE SEA BED IN DEEP WATER OF PUGET SOUND ...Chemistry, Oxygen, Oxygen Content -water, Puget Sound, ...5.1036
- TROPHIC RELATIONSHIPS IN SHOAL BENTHIC ENVIRONMENTS ...Biology, Estuaries, Habitat Studies, New England Province, ...5.1027
- SYSTEMATICS AND ECOLOGY OF SUBTIDAL BENTHIC MARINE ALGAE ...Algae- General, Benthonic-bottom, Habitat Studies, Marine Plants, Plant Taxonomy, Range Or Territorial Distr. , ...5.0701
- MARINE BIOLOGY OF RED SEA AND EASTERN MEDITERRANEAN ...Mapping, Population Dynamics, Red Sea, ...5.0891
- BIOGRAPHIC STUDY OF THE BENTHOS OF PUERTO RICO AND THE VIRGIN ISLANDS ...Benthic Fauna, Benthonic-bottom, Currents-ocean, Range Or Territorial Distr. , Temperature, Vertical Distribution, ...5.0652
- SUCCESSION, SPACIAL AND TEMPORAL DISTRIBUTION, AND BIOLOGY OF BENTHIC ORGANISMS ...Benthic Fauna, Temporal Distribution, ...5.0638

### Benthic Organisms (non-specific)

- MARINE COMMUNITIES ...Environmental Ecology, Life History Studies, Model Studies, Plankton (non-specific), ...5.0861
- ZONATION OF THE WEDDELL SEA BENTHOS ...Environmental Ecology, Marine Biology (non-specific), Temperature, Weddell Sea, ...5.0868
- THE EFFECTS OF SEAL AND FISH PREDATION ON CERTAIN ANTARCTIC BENTHIC COMMUNITIES ...Antarctica, Biology, Fish -non-specific, Predation, Productivity - Food Chain, Seals, ...5.1039
- BENTHONIC BIOLOGY ...Environmental Ecology, Fouling, Marine Biology (non-specific), Number Or Density, Temporal Distribution, ...5.0900
- AEGEAN SEA BIOLOGY ...Aegean Sea, Currents-longshore, Plankton (non-specific), Range Or Territorial Distr. , Temporal Distribution, ...5.0887
- PHYSIOLOGY AND ECOLOGY OF THE ADRIATIC BENTHOS ...Adriatic Sea, Marine Biology (non-specific), Metabolism, Microclimate-general, Productivity - Food Chain, ...5.0873
- PLANKTON AND BENTHOS COMMUNITIES OF THE GREAT LAKES ...Aquatic Ecology, Gastropods - slugs, conch, snails, Lake Erie, Lugworms, Marine Segmented-worm, Plankton (non-specific), ...5.0801
- BIOGEOGRAPHY OF BENTHONIC ORGANISMS ...Continental Shelf, Marine Biology (non-specific), Range Or Territorial Distr. , Vertical Distribution, ...5.0876

### Bering Sea

- STRATIGRAPHY OF UNCONSOLIDATED SEDIMENTS ON THE CONTINENTAL SHELVES OF THE CHUKCHI AND NORTHERN BERING SEAS ...Chukchi Sea, Continental Shelf, Core Analysis, Correlation, Oceanic Fronts, Sedimentary History, ...7.0286
- ECOLOGY AND NITROGEN CYCLE IN A MARINE PLANT COMMUNITY ...Nitrogen, Physiological Ecology, Potamogeton, Ruppia, Zostera., Primary Productivity, Sewage, ...5.0676
- TAGGING SALMON IN THE OFFSHORE WATERS OF THE NORTH PACIFIC ...Gulf of Alaska, Migration, Number Or Density, Range Or Territorial Distr. , Salmon & Trout - Non-specific, Tags, ...5.0180
- ECOLOGY OF EELGRASS ...Alaska, Food Webs, Phytoplankton, Potamogeton, Ruppia, Zostera., Primary Productivity, ...5.0677
- RESOURCES OF THE BERING CONTINENTAL MARGIN ...Continental Shelf, Dimensions-distribution, Geology-general, Ocean History, Ocean Mining, ...7.0016
- SEWARD PENINSULA NEARSHORE ...Heavy Minerals, Potential of Deposit, Sea Level Changes, Submergent, Tectonics-general, ...7.0017
- BOTTOMFISH EXPLORATIONS ...Fish -other, Gulf of Alaska, Nets, Vertical Distribution, ...5.0030
- BERING SEA KING CRAB STUDIES ...Commercial Fishing, Crabs, Environmental Ecology, Migration, ...5.0341

**Bermuda**

MARINE BIOLOGY RESEARCH AT THE BERMUDA BIOLOGICAL STATION ...Ecology (animal), Marine Biology, Marine Biology (non-specific), Plant Ecology (non-specific), ...12.9066

GRADUATE SUMMER RESEARCH PROGRAMS IN EXPERIMENTAL EMBRYOLOGY ...Developmental Biology - Animal, Facilities, Marine Biology (non-specific), ...11.0002

DEEP-WATER ZOOPLANKTON OF THE SARGASSO SEA ...Abyssal, Sargasso Sea, Vertical Distribution, Zooplankton, ...5.0738

MORPHOLOGY AND PHYSIOLOGY OF THE HEART OF ECTEINASCIDIA TURBINATA ...Cardiovascular, Invertebrate Anatomy, Sea Squirts - Tunicates, ...5.0530

GEOLOGIC HISTORY OF BERMUDA AND ITS RELATIONSHIP TO THE WORLD PLEISTOCENE ...Correlation, Development, Local Stratigraphy, Quaternary Period, Sea Level Changes, ...7.0155

OCEANIC INTERNAL MOTIONS AFFECTING OPERATIONS ...Buoys, Military Aspects, Thermal, Water Motion Recorders, Waves-internal, ...2.0115

LONG-PERIOD WAVES ...Pressure, Sea Level Variations, Statistics-general, Waves, ...2.0085

SHALLOW WATER MEIOBENTHOS OF THE BERMUDA PLATFORM ...Benthic Fauna, Benthonic-bottom, Continental Shelf, ...5.0649

RELIABLE ACOUSTIC PATH ...Acoustical, Attenuation, Ranging, Reverberation, Transmission, ...1.0032

MODERN VERSUS RELICT SEDIMENT PATTERNS ON CONTINENTAL MARGINS ...Canada, Continental Shelf, Distribution, Quaternary Period, Sea Level Changes, ...7.0214

TELEMTRY STUDIES ON MARINE BIRDS ...Albatrosses, Shearwaters... , Mark, Tag Or Capture -other, Pelicans, Cormorants,darters..., Spawning & Nesting Sites, ...5.0531

**Bioassays**

NEW APPROACHES TO BIOFOULING ASSAY ...Corrosion Prevention-other, Fouling, Marine Biology (non-specific), Paint - General, Powder, ...5.0757

USE OF MARINE PLANKTONIC ORGANISMS FOR EVALUATING THE QUALITY OF MARINE AND ESTUARINE WATERS ...Chemical Identification, Marine Biology (non-specific), Plankton (non-specific), Pollution - Effects of , ...6.0183

COMPARATIVE TOXICITIES OF METALS TO ESTUARINE FISHES ...Estuaries, Industrial Wastes, Killifishs - Cyprinodon, Solid Waste, Toxins -other, ...6.0184

USE OF MARINE PLANKTONIC ORGANISMS FOR EVALUATING THE QUALITY OF MARINE AND ESTUARINE WATERS ...Estuaries, Phytoplankton, Pollution - Effects of , Pollution Effects, Zooplankton, ...5.0832

DEVELOPMENT OF A METHOD FOR CHRONIC TOXICITY BIOASSAY USING MARINE PLANKTONIC ALGAE ...Algal Culture, Marine Plants, Microbiological Analysis, Monitoring (long Term Studies), Phytoplankton, Technique Development, Toxicology, ...5.0726

PHYSIOLOGY AND ASSAY OF PROLACTIN IN FISH ...Biochemical, Gambusia, Molly, Immunology, Luteotrophic Hormone, Pituitary, ...5.0329

CHEMISTRY OF ALGAL TOXINS ...Algal Toxins, Aphanizomenon, Biochemical Analysis, Gymnodinium, Microbiological Analysis, ...5.0709

**Biochemical Analysis**

IMMUNOLOGY AND SEROLOGY OF MARINE ANIMALS ...Agglutination Tests, Blood Plasma and Serum, Immunology, Pathology, ...5.0977

RACIAL STUDIES OF HERRING ...Alewife,menhaden,shad,hering, Animal Taxonomy, Atlantic Ocean-north, Blood Typing Studies, Management -other, ...5.0265

RED TIDE TOXICITY ...Algal Toxins, Gas Chromatography, Gymnodinium, Plant Developmental Biology, Pollution Sources-other, ...5.0780

ORGANIC CHEMICAL STUDIES ON ANIMAL AND PLANT TOXIN ...Algal Toxins, Animal Toxins, Medicinal Plants, Plant Alkaloids, Plant Toxins, ...6.0115

CHEMISTRY OF ALGAL TOXINS ...Algal Toxins, Aphanizomenon, Bioassays, Gymnodinium, Microbiological Analysis, ...5.0709

**Fats**

DEVELOPMENTAL ANALYSIS OF FUNDULUS ...Basic Embryology, Central Nervous System, Killifishs - Cyprinodon, Phospholipids, Transplants, ...5.0316

**Hormones**

ISOLATION AND FUNCTION OF OVARIAN EXTRACTS CAPABLE OF INDUCING COCYTE SHEDDING AND CYCYTE NUCLEAR MATURATION IN STARFISH ...Differentiation Mechanism, Female, Nucleic Acids, Reproductive System, Starfishes, ...5.0620

MARINE ANIMAL USE IN THE STUDY OF HEALTH PROBLEMS ...Hormones - Other, Life History Studies, Metabolism, ...6.0126

NEUROSECRETION AND ENDOCRINE PHYSIOLOGY ...Configuration, Crustacea -non-specific, Diabetogenic, Ns, Endocrine System, Intermedin, ...5.1023

**Proteins and Amino Acids**

GRANT FOR RESEARCH IN ISOLATION OF MARINE PROTEINS ...Marine Biology (non-specific), Proteins -non-specific, ...5.0998

**Biomedical Engineering****Electronic****Sound Level Analyzers**

STANDARDS FOR AUDIOMETRY ...Acoustic, Calibration and Calibrators, Standards, Specifications, Transducers, ...8.0127

**Telemeters**

APPLICATION OF BIOTELEMETRY TO THE STUDY OF MARINE VERTEBRATES ...Biological Sciences, Central Nervous System, Fish -non-specific, Locomotion -animal, Telemetry, ...5.0637

**Transducers**

BASIC ACOUSTICAL STANDARDS AND MICROPHONE CALIBRATION ...Acoustic, Acoustical, Audio Frequency, Calibration and Calibrators, Standards, Specifications, ...8.0076

STANDARDS FOR AUDIOMETRY ...Acoustic, Calibration and Calibrators, Sound Level Analyzers, Standards, Specifications, ...8.0127

**Biophysics & Molec. biology****Elec Prop and Ion****Elect Trans and Redox**

PHOTOBIOLOGICAL STUDIES ON MARINE CHRYSOMONADS ...Autotrophic, Coccoliths, Photochemistry, Photosynthetically Active, ...5.0932

RESEARCH ON THE ROLE OF BACTERIA IN THE OCEAN ...Denitrification, Marine Bacteria, Microorganism Enzymes, Nitrogen Bacteria, Respiration, ...5.0783

**Energy Conversion**

EXCITED STATES MECHANISMS IN PHOTOBIOLOGY ...Bioluminescence, Chemiluminescence, Photochemical-other, Polypeptides, ...4.0162

MECHANISM STUDIES ON BIOLUMINESCENT REACTIONS WITH EMPHASIS ON ENERGY TRANSFER PROBLEMS ...Bioluminescence, Luciferase, Luciferin, ...1.0164

**Molecular Interaction****Struct Activity Relation**

STUDIES ON THE STRUCTURE OF HEMERYTHRIN ...Biochemical, Comparative Physiology, Configuration, Hemerythrin, Invertebrates -non-specific, ...5.0993

FILAMENTS, MORPHOGENESIS AND CONTRACTION OF MUSCLE ...Contraction and Relaxation, Fibrils and Filaments, Subunits, ...5.0986

MOLECULAR ASPECTS OF CELLULAR DIFFERENTIATION AND DIVISION ...Basic Embryology, Biosynthesis, Cell Cycle, Differentiation Mechanism, Proteins, Replication, Sea Urchins & Other Echinoderm, ...5.0985

STRUCTURE AND REACTIVITY OF PROTEINS AND LIPOPROTEINS ...Configuration, Hemoglobin, Physical State, ...5.0971

**Photochemistry**

- PHOTOBIOLOGICAL STUDIES ON MARINE CHRYSOMONADS ...Autotrophic, Coccoliths, Elect Trans and Redox, Photosynthetically Active, ...5.0932
- INTERACTION OF PROTEINS WITH METAL AND HYDROGEN IONS ...Globin -incl. myoglobin, Inhibitors, Metallic Ions, Neurophysin, Ribonuclease, ...5.0999
- PHOTOBIOLOGY OF MARINE ANIMALS ...Photoreception, Physical State, Visual, Visual Organs, ...5.0313

**Stability**

- EFFECT OF LIPIDS ON STABILITY OF BIOLOGICAL MEMBRANES ...Cellular Membranes (non-spec.), Coenzyme Q, Electron Microscopy, Tocopherol, Vitamin A, ...5.1007

**Structure****Bonding and Binding**

- RESEARCH STUDIES IN MOLECULAR PHARMACOLOGY ...Anesthetic, Diving and Scuba, Mechanism of Action, Permeability, Thermodynamics, ...6.0100

**Composition of Macromolecules**

- STUDIES OF THE AEROCOCCUS-PEDIOCOCCUS BACTERIA ...Bioenergetics, Classification Or Taxonomy, Detection, Pediococcus, ...5.0817

**Configuration**

- STUDIES ON THE STRUCTURE OF HEMERYTHRIN ...Biochemical, Comparative Physiology, Hemerythrin, Invertebrates -non-specific, ...5.0993

- CELL DIVISION, BIOENERGETICS, CHEMISTRY OF MUSCLE ...Bioenergetics, Cell Cycle, Glyoxal, Organic, ...5.0987

- STRUCTURE AND REACTIVITY OF PROTEINS AND LIPOPROTEINS ...Hemoglobin, Physical State, ...5.0971

- PRIMARY STRUCTURE OF INVERTEBRATE HEMOGLOBINS ...Biochemical, Chitons, Gastropods -slugs, conch, snails, Globin -incl. myoglobin, ...5.0610

- NEUROSECRETION AND ENDOCRINE PHYSIOLOGY ...Crustacea -non-specific, Diabetogenic, Ns, Endocrine System, Hormones, Intermedin, ...5.1023

**Molec. struct. (gen. & Other)**

- USEFUL BIOMEDICAL MATERIALS DERIVED FROM THE SEA - AN INTERDISCIPLINARY APPROACH ...Antibody Formation, Bioluminescence, Immunology, ...6.0106

- CHEMISTRY AND FUNCTION OF BRAIN PLASMOLOGENS ...Chem and Metab, Comparative Physiology, Phospholipids, Plasmalogen, ...5.1003

**Physical State**

- STRUCTURE AND REACTIVITY OF PROTEINS AND LIPOPROTEINS ...Configuration, Hemoglobin, ...5.0971

- PHOTOBIOLOGY OF MARINE ANIMALS ...Photochemistry, Photoreception, Visual, Visual Organs, ...5.0313

**Subunits**

- FILAMENTS, MORPHOGENESIS AND CONTRACTION OF MUSCLE ...Contraction and Relaxation, Fibrils and Filaments, ...5.0986

- CILIA DIFFERENTIATION IN THE SEA URCHIN EMBRYO ...Basic Embryology, Cilia and Flagella, Differentiation Mechanism, Proteins, Sea Urchins & Other Echinoderm, ...5.0616

**Thermodynamics****Kinetics**

- CIRCADIAN RHYTHM IN PHOTOSYNTHESIS IN THE MARINE ALGAE GONYAULAX AND ACETABULARIA ...Acetabularia, Autotrophic, Biological Rhythms, Control and Regulation, Gonyaulax, ...5.0685

- FACTORS INFLUENCING THE INTENSITY OF BIOLUMINESCENCE ...Bioluminescence, Cell. env.(non-specific & Ot.), Marine Biology, Optical, Trace Elements, ...1.0169

**Birds****Albatrosses, Shearwaters...**

- ECOLOGY OF STORM PETRELS ...California, Islands, Mark, Tag Or Capture -other, Spawning & Nesting Sites, Terrestrial Ecology, ...5.0532

- THE BIOLOGY OF THE LAYSAN AND BLACK-FOOTED ALBATROSSES ...Age, Animal Distr. (non-specific), Control of Nuisance Species, Mark, Tag Or Capture -other, Spawning & Nesting Sites, ...5.0607

- TELEMETRY STUDIES ON MARINE BIRDS ...Bermuda, Mark, Tag Or Capture -other, Pelicans, Cormorants, darters..., Spawning & Nesting Sites, ...5.0531

**Anseriformes -other**

- EVALUATION OF THE ATLANTIC FLYWAY SEA DUCK KILL ...Age, Hunting, Mortality Rates, Sex -non-specific, Species, Comparison of, ...5.0606

**Aves -other**

- MOVEMENTS OF SEABIRDS IN THE HUMBOLDT CURRENT ...Biological Rhythms, Humboldt Or Peru Current, Population Dynamics, Temporal Distribution, ...5.0583

**Birds -non-specific**

- DISTANT GOAL ORIENTATION ...Biological Rhythms, Locomotion -animal, Magnetic Impulses, Mark, Tag Or Capture -other, Orientation, ...4.0109

- AVIFAUNAL ECOLOGY OF LIMANTOUR ESTERO ...California, Food Supply, Game Reserves & Preserves, Habitat Studies, ...5.0534

- PACIFIC OCEAN BIOLOGICAL SURVEY PROGRAM ...Islands, Meteorological Studies, Pacific Ocean-general, Vertical Distribution, ...5.0568

- AUTOMATIC DATA PROCESSING - SEABIRD DISTRIBUTION ...Computer Methods -general, Nomenclature, Classification, Range Or Territorial Distr., World Wide, ...4.0020

**Chickens**

- STUDIES ON EMBRYONIC CELLS ...Basic Embryology, Reproductive System, Sea Squirts - Tunicates, Suspension Culture, ...5.0945

- BIOCHEMICAL BASIS OF SPECIFIC CELL ASSOCIATION ...Adhesion, Basic Embryology, Pacific Ocean-general, Porifera, ...5.0946

**Pelicans, Cormorants, darters..**

- TELEMETRY STUDIES ON MARINE BIRDS ...Albatrosses, Shearwaters..., Bermuda, Mark, Tag Or Capture -other, Spawning & Nesting Sites, ...5.0531

**Penguins**

- DEEP DIVING ANTARCTIC BIRDS AND MAMMALS ...Adaptation, Antarctica, Locomotion -animal, Seals, Water Pressure, ...5.0555

**Perching Birds - Songbirds**

- EXPERIMENTAL MANIPULATION OF MECHANICAL AND PHYSIOLOGICAL RHYTHMS - A DUAL APPROACH TO THE BIOLOGICAL CLOCK PROBLEM ...Acetabularia, Behavioral Ecology, Biological Rhythms, Crabs, ...5.1002

**Pigeon**

- SENSORY BASIS OF NAVIGATION IN HOMING PIGEONS ...Behavior, Biological Rhythms, Environmental Physiology, Locomotion -animal, Mark, Tag Or Capture -other, ...4.0108

**Shorebirds-gulls, terns, skimmer**

- RENAL SALT EXCRETION IN MARINE BIRDS ...Kidney and Urinary System, Osmoregulation, Urine, ...5.0562

- SYSTEMATICS AND ECOLOGY OF MARINE BIRDS ...Animal Taxonomy, Handbooks, Range Or Territorial Distr., World Wide, ...5.0582

**Waterfowl -non-specific**

- ECOLOGICAL STUDIES OF THE COPPER RIVER DELTA ...Alaska, Censusing, Maps-general, Spawning & Nesting Sites, ...5.0855

- EVALUATION OF ATLANTIC COAST ESTUARIES ...Atlantic Ocean-north, Estuaries, Game Reserves & Preserves, Habitat Studies, Life History Studies, ...9.0020

- WATERFOWL FOOD STUDIES ...Food Supply, Management, Plant Prod. (non-specific), South Carolina, ...5.0653

- OCEAN WATER INTRUSION INTO BACK BAY, VIRGINIA, & CURRITUCK SOUND, NORTH CAROLINA, ON THE

## SUBJECT INDEX

## Brackish Water

- WATERFOWL & FRESHWATER FISH HABITAT ...Habitat Studies, North Carolina, Virginia, Water Salinity, ...5.0897
- ECOLOGICAL STUDIES OF ATLANTIC AND GULF COASTAL ESTUARIES OF IMPORTANCE TO WATERFOWL ...Agricultural Land Use Effects, Atlantic Ocean-general, Construction Land Use Effects, Estuaries, Gulf of Mexico, Habitat Studies, ...5.0896

### Black Sea

- SUPPORT FOR THE OPERATION OF OCEANOGRAPHIC RESEARCH VESSELS ...Marine Biology, Mediterranean Sea-general, Sedimentation, Ships and Cruises, Water Analysis-general, ...11.0030

### Blood Plasma and Serum

- IONIC REGULATION IN THE QUEEN CONCH, STROMBUS GIGAS LINNAEUS ...Digestive System, Gastropods - slugs, conch, snails, Osmoregulation, ...5.0407
- BLOOD CHEMISTRY OF FISHES ...Bone, Sharks, Vertebrate Anatomy, Vertical Distribution, ...5.0239
- BLOOD TYPES AS INDICATORS OF BLUEFISH RACES ...Blood Cells, Blood Typing Studies, Bluefish, Immunology, Polymorphism, ...5.0319
- BLOOD TYPES AS INDICATORS OF WHITE MARLIN RACES ...Blood Typing Studies, Marlin, Billfishes, Sailfish., Polymorphism, Statistics-general, ...5.0321
- IMMUNOLOGY AND SEROLOGY OF MARINE ANIMALS ...Agglutination Tests, Biochemical Analysis, Immunology, Pathology, ...5.0977
- PROVIDE FOR ACTIVITIES OF TUNA BLOOD GROUP CENTER ...Blood Typing Studies, Hawaii, Immunology Methods, Tuna, Mackerel, Albacore... , ...5.0258
- HEMATOLOGICAL CHANGES IN F. HETEROCLITUS UPON EXPOSURE TO TOXIC METALS ...Blood Cells, Cadmium, Killifishes - Cyprinodon, Lead, Toxins -other, ...5.0325
- BLOOD PARASITES OF NORTHWEST FISHES ...Codfishes, Hake, Helminths, Protozoa, Sculpins, Trematoda -other, ...5.0335
- OSMOTIC COMPONENTS IN ELASMOBRANCH BLOOD ...Chondrichthyes -other, Environmental Physiology, Osmoregulation, Water Salinity, Water Temperature-non-specific, ...5.0249

### Body Temperature

#### Hypothermia

- METABOLIC ADAPTATION TO COLD ...Cold, Female, Korea, Metabolism in Disease, Regulation, ...6.0092

#### Regulation

- METABOLIC ADAPTATION TO COLD ...Cold, Female, Hypothermia, Korea, Metabolism in Disease, ...6.0092
- SUPPORT FOR THE PHYSIOLOGICAL RESEARCH SHIP, R/V ALPHA HELIX ...Insecticides -non-specific, Mycorrhiza, Nerve Effects, Rain Forests, Tropic, ...12.0011
- HUMAN TEMPERATURE REGULATION IN WATER ...Cardiac Output, Medical Studies, ...6.0094
- THERMAL REGULATION DURING WATER IMMERSION OF MAN ...Calorimetry, Effects on Cardiovasc. system, ...6.0095

### Borehole Geophysics

- GEOHERMAL STUDIES IN DEEP-SEA DRILL HOLES ...Abyssal, Bathyal, Core Temperature, Earth Interior, Geothermal, Heat Flow Measurements, Heat Flows, Sediments-general, Technique Development, ...7.0122

### Boron

- ENVIRONMENT OF DEPOSITION OF ARGILLACEOUS SEDIMENTS ...Adsorption Capacity, Chemistry, Clays, Deltas, Mississippi River, ...7.0240
- PALEOSALINITY DETERMINATION BY THE BORON IN ILLITE METHOD ...Illinois, Illite, Interstitial - Connate Water, Salinity, Swamps-marshes, ...7.0238

### Bottom Sampling

- FARMINGTON RIVER SHAD STUDIES ...Alewife, menhaden, shad, herring, Captive Rearing, Migration, Sampling, Streams, ...5.0203
- ROUTINE SAMPLING AT SEVEN INDEX STATIONS ...Data Acquisition, Fish -non-specific, Lake Erie, Plankton Sampling, Sampling, ...5.0214

### Bottom Sampling Device

- DESIGN AND DEVELOPMENT OF OCEANOGRAPHIC INSTRUMENTATION ...Physical Analysis, Technique Development, Water Motion Recorders, ...8.0090
- DEEP-SEA AUTONOMOUS VEHICLES, INSTRUMENTS, BASIC CONTROL DEVICES, AND SPECIAL COLLECTING GEAR ...Abyssal, Organism Sampling Devices, Photography, Sampling, Submersibles, Water Motion Recorders, ...8.0122
- BENTHIC COMMUNITIES ...Behavioral Ecology, Benthic Fauna, Developmental Physiology, Fouling, Metabolism, Productivity - Food Chain, ...5.0561
- SEA FLOOR ROUGHNESS ...Acoustical, Attenuation, Benthic-bottom, Magnetic Studies, Propagation, Transmission, ...7.0033
- LOCATING AND MAPPING HARD BOTTOM AREAS NEAR EXISTING NATURAL SEED OYSTER BEDS ...Oysters, Spawning & Nesting Sites, ...4.0052
- GEOLOGICAL AND HYDROGRAPHIC STUDY OF THE WILMINGTON SUBMARINE CANYON AND ADJACENT AREAS ...Geomorphology-topography, Model Studies, Photography, Submarine Canyons, Textures-structures, ...7.0211
- SEDIMENT MOVEMENT AND BOTTOM CONDITIONS IN THE DELAWARE ESTUARY MOUTH AREA ...Currents-other, Delaware Bay, Photography, Sedimentation, Tides, ...7.0220
- HEAVY METALS AND SEDIMENTATION PROCESS OF THE NORTH CAROLINA SHELF ...Continental Shelf, Heavy Minerals, Mineralogy, North Carolina, Sedimentation, ...7.0021
- DEVELOPMENT OF DIAMOND DRILLING TECHNIQUES, FOR PHOSPHORITE DEPOSITS, USING STANDARD TOOLS PLUS BUOYANCY TANKS ...Disturbed/undisturbed, Drilling and Coring, Phosphate, Soil Sampling, Technique Development, ...8.0248
- DEVELOPMENT OF WIRE-LINE CORING TECHNIQUE FOR SAMPLING UNCONSOLIDATED DEPOSITS ...Alaska, Coring and Dredging, Mechanical Properties, Mineralogy, Technique Development, ...8.0249
- DEVELOPMENT, TESTING AND EVALUATION OF MODIFICATIONS REQUIRED TO ADAPT DRILLING SAMPLING SYSTEMS TO THE PLATFORM ...Coring and Dredging, Drilling and Coring, Equipment, Platforms, Technique Development, ...8.0256
- DEVELOPMENT OF MARINE CHURN DRILL FOR SAMPLING UNCONSOLIDATED DEPOSITS ...Drilling and Coring, Soil Sampling, Technique Development, Unconsolidated Deposits, ...8.0250
- SAN PABLO BAY STUDY ...Bays, Benthic Fauna, Excavation, Pollution - Effects of , Spoil Banks, ...6.0136

### Brackish Water

- INVENTORY OF LARVAL FISH ...Aquatic Ecology, Fish -non-specific, Maturity & Growth Stages, ...5.0071
- BRACKISH WATER PURIFICATION BY BIOLOGICAL FUEL CELL POWERED ELECTRODIALYSIS ...Biological, Desalination, Desalination Wastes, Electrodialysis, Material Recovery Wastes, Water Costs, ...6.0161
- CULTURE OF POMPANO IN BRACKISH WATER PONDS ...Aquaculture & Fish-farming, Food Supply, Louisiana, Pompanos, Scads, Jacks, Stocking of Fish & Shellfish, ...8.0004
- CULTURE OF ATLANTIC CROAKER IN BRACKISH WATER PONDS ...Aquaculture & Fish-farming, Captive Rearing, Drums, Management, Ponds, Productivity (agricultural), ...8.0005
- CULTURE OF RED SWAMP CRAWFISH, PROCAMBARUS CLARKI, IN BRACKISH WATER PONDS ...Aquaculture & Fish-farming, Aquatic Ecology, Captive Rearing, Crayfish, ...5.0432
- CULTURE OF BLUE, CHANNEL, AND WHITE CATFISH IN BRACKISH WATER PONDS ...Aquaculture & Fish-farming, Blue Catfish, White Catfish, Captive Rearing, Channel Catfish, Louisiana, ...8.0006

## Brackish Water

- RELICT COPEPODS FROM LAKE TUBORG, ELLESMERE ISLAND ...Canada, Carbon-14, Copepods, Lakes, Plankton Sampling, ...5.0388
- DISTRIBUTION OF ELEMENTS IN FLUVIAL AND BRACKISH ENVIRONMENTS ...Adsorption, Adsorption Capacity, Chemical Reactions, Element Ratios, Exchange Capacity, Solution, ...7.0221
- EXTENT OF BRACKISH WATER IN TIDAL RIVERS, MARYLAND ...Runoff, Tides, Water Utilization -general, ...1.0100
- EXPLORATORY COLLECTION AND CARE OF AQUATIC INVERTEBRATES FOR TESTING AT TIBURON ...Bioassay, Captive Rearing, Invertebrates -non-specific, Pesticides -non-specific, ...5.0905

## British Isles

- MONTVILLE STATION TEMPERATURE SURVEY (THAMES RIVER) ...Electric Power Plants, Estuaries, Maps-other, Temperature, Thermal Pollution, ...1.0182

## British West Indies

- DEVELOPMENT EXPERIMENTAL SYSTEM FOR AIR SEA INTERACTIONS ...Air-sea Boundary-general, Buoys, Meteorological Studies, ...4.0008
- BIOGENESIS OF CARBONATE SEDIMENTS, BAHAMA ISLANDS ...Bioclastic Limestone, Biofacies, Biogeochemical Process, Classification - Taxonomy, Sedimentary Petrogenesis, ...7.0241
- EFFECTS OF HURRICANE BETSY ON SOME BAHAMA CORAL REEFS ...General Deposition, Reefs, Tropical Cyclones, ...7.0290
- SUBMARINE GEOLOGY OF THE BAHAMAS AND THE WEST INDIAN ARC ...Geology-general, Ocean Basins, Ridges, Ships and Cruises, Trenches, ...7.0038
- OCEANOGRAPHY, PLEISTOCENE GEOLOGY AND SEDIMENTS OF LITTLE BAHAMA BANK ...Carbonates-general, Currents-bottom, Energy, Quaternary Period, Water Motion Recorders, ...7.0229
- CARBONATE SEDIMENTATION IN THE TONGUE OF THE OCEAN, BAHAMAS ...Carbonates, Diagenesis, Paleoecology, Sea Level Variations, Sedimentation, ...7.0267
- SUBSURFACE GEOLOGY OF HOGSTY REEF, AN ATOLL IN THE SOUTHEASTERN BAHAMAS ...Atolls, Paleoenvironments, Physiographic History, Quaternary Period, Submergent, Subsurface, ...7.0037
- STUDIES OF THE TRANSPORT OF THE FLORIDA CURRENT ...Florida, Gulf Stream, Navigation, Ocean Currents-other, Water Motion Recorders, ...2.0017
- THE SEDIMENTARY AND DIAGENETIC RECORD OF ENVIRONMENTAL PARAMETERS IN RECENT BAHAMIAN TIDAL FLATS ...Diagenesis, Environmental Effects-geologic, Intertidal Areas, Local Stratigraphy, Paleoclimatology, ...7.0163
- GEOLOGICAL AND GEOPHYSICAL INVESTIGATION OF THE BAHAMA BANK ...Banks, Bathymetry, Crust, Magnetic Studies, Seismic Studies, ...7.0110
- ACOUSTIC-VIDEO SYSTEM FOR AQUATIC BIOACOUSTICAL AND ETHOLOGICAL RESEARCH ...Acoustical, Behavioral Ecology, Marine Biology, Marine Environments-general, ...1.0049
- AIR-SEA INTERACTION (WAVES) ...Forecasting-prediction, Heat and Radiation Transfer, Surface Environments, Waves, Wind-water Interaction, ...3.0016
- WAVE GENERATION ...Profiles, Shear, Towers, Waves, Wind-water Interaction, ...2.0103
- BARBADOS OCEANOGRAPHIC AND METEOROLOGICAL EXPERIMENT ...Depth, Ocean-lakes, Salinity, Temperature, Wind-water Interaction, ...3.0015

## Bryozoa

- PHYLOGENETIC RELATIONS OF FOSSIL AND LIVING GYMNOLEMMATES ...Fouling, Geologic, Other Bryozoa, Phylogenies, ...5.0665
- THE SYSTEMATICS AND ZOOGEOGRAPHY OF THE BRYOZOAN FAUNA OF THE HAWAIIAN ISLANDS ...Animal Taxonomy, Australian, Collections, Hawaii, Range Or Territorial Distr., ...5.0542
- SYSTEMATIC AND DISTRIBUTIONAL STUDY OF DEEP-SEA ECTOPROCTA (BRYOZOA) ...Adaptation, Animal Taxonomy, Ecological, Vertical Distribution, ...5.0650

## SUBJECT INDEX

- EVOLUTION OF PROVINCIAL DISTRIBUTION PATTERNS IN CHEILOSTOME BRYOZOA ...Geologic, Order Cheilostomata, Paleontology, Population - Distribution, Tertiary Period, ...7.0173

## Buildings and Land Development

### Construction

#### Equipment

- FEASIBILITY STUDY ON HORIZONTAL TEST TANK FOR MODEL STUDIES AND COMPONENT TESTING ...Consultants, Advisory Services, Dredging, Model Studies, Ocean Mining, Tanks, ...12.0007

#### Excavation

- HISTORICAL STUDY ON EFFECT OF HARBOR DREDGING ON THE ENVIRONMENT (ENVIRONMENTAL FACTORS PERTINENT TO EFFECTS ON MARINE ENVIRONMENTS) ...Dredging, Environmental Effects-geologic, Harbors, Marine Environments-general, Ocean Mining, ...6.0135
- ENGINEERING EVALUATION OF EXISTING DREDGE SYSTEMS AND OPERATIONS ...Dredging, Ocean Mining, ...8.0246
- SAN PABLO BAY STUDY ...Bays, Benthic Fauna, Bottom Sampling Device, Pollution - Effects of, Spoil Banks, ...8.0136

## Buoyant, Flotational

- PASSIVE BUOYANCY SYSTEMS ...Engineering Studies-general, Foam, Porous, Materials Used Undersea, Other-design-and-construction, Submersibles, ...8.0263
- DEEP SUBMERGENCE SYSTEMS ...Geomorphology-topography, Marine Propulsion, Navigation Communication, Physical Properties, Submersibles, Welding - Other, ...8.0051
- REINFORCED PLASTIC STRUCTURES ...Laminates, Materials Used Undersea, Plastic Matrix, Strength - Weight Ratio, ...8.0212
- BUOYANCY MATERIALS ...Materials Used Undersea, Microsphere, Microballoon, Plastic Matrix, Submerged Ships, ...8.0214

## Buoys

- SATELLITE INTERROGATE ENVIRONMENTAL BUOY DEVELOPMENT ...Navigation Communication, Satellites, ...8.0308
- DEVELOPMENT EXPERIMENTAL SYSTEM FOR AIR SEA INTERACTIONS ...Air-sea Boundary-general, British West Indies, Meteorological Studies, ...4.0008
- MARINE METEOROLOGY UNTENDED STATION DEVELOPMENT ...Air Motion Instruments, Automatic Stations, Meteorological Studies, Platforms, Profiles, ...8.0285
- AIR-SEA INTERACTION PROCESS ...Boundary Layer Studies, Circulation-general, Lakes, Profiles, Wind-water Interaction, ...3.0028
- BIOLOGY AND CHEMISTRY OF MARINE PLANKTON POPULATIONS ...Chlorophyll, Phytoplankton, Vertical Distribution, Zooplankton, ...5.0798
- WATER WAVE DOCUMENTATION ...California, Pacific Ocean-general, Water Motion Recorders, Waves, ...2.0094
- ENERGY TRANSFER NEAR THE EARTH'S SURFACE ...Air Motion Instruments, Heat and Radiation Transfer, Thermodynamics, Turbulence, ...3.0044
- FORMATION OF ANTARCTIC BOTTOM WATERS ...Hydrodynamics, Oceanic Fronts, Salinity, Temperature, Weddell Sea, ...1.0152
- NATIONAL DATA BUOY STUDY ...Data Acquisition, ...8.0281
- GEOPHYSICAL INVESTIGATIONS IN THE CORAL SEA ...Coral Sea, Crust, Regional Structure, Seismic Refraction, Structural Studies, ...7.0130
- DYNAMICS OF MOORED BUOY SYSTEMS USED IN OCEANOGRAPHY R&D AND SURVEILLANCE ...Currents-ocean, Laboratory Analysis, Model Studies, Moorings, Waves, ...8.0321
- DIRECT AND INDIRECT DETERMINATION OF OCEANIC WATER MASS MOTION ON ALL SCALES ...Currents-ocean, Oceanic Fronts, Pacific Ocean-east, Salinity, Temperature, ...2.0092

## SUBJECT INDEX

California

- OCEAN WIND WAVE GENERATION AND DISSIPATION ...General Synoptic Observations, North Sea, Velocity, Waves, Wind-water Interaction, ...2.0105
- OCEANIC INTERNAL MOTIONS AFFECTING OPERATIONS ...Bermuda, Military Aspects, Thermal, Water Motion Recorders, Waves-internal, ...2.0115
- AIR OCEANOGRAPHY ...Air-sea Boundary-general, Atlantic Ocean-north, Gulf Stream, Satellites, Technique Development, ...4.0163
- BUOY ENGINEERING ...Experiments and Tests, Moorings, Water Motion, ...8.0309
- SATELLITE COMMUNICATION TESTS ...Forecasting-prediction, Marine Environments-general, Satellites, Telemetry-other, Very High Frequency, ...4.0001
- TELEMETERING BUOY SYSTEM FOR OCEANOGRAPHIC RESEARCH AND ENVIRONMENTAL PREDICTION ...Data Acquisition Systems, Meteorological Studies, Moorings, Navigation Communication, Oceanography-general, Technique Development, Telemetry-other, ...8.0268
- OCEAN DYNAMICS EXPERIMENTS ...Atlantic Ocean-north, Currents-ocean. Operational Aspect, Thermal, Waves-internal, ...2.0071
- OCEAN DYNAMICS EXPERIMENTS ...Moorings, Other-design-and-construction, Submersibles, Technique Development, Temperature, Water Motion Recorders, ...2.0072
- OCEAN WAVES AND STRUCTURE ...Salinity, Thermocline, Tides, Water Motion Recorders, Waves, ...2.0106
- DESCRIPTIVE OCEANOGRAPHY/PACIFIC ...Circulation-general, Currents-ocean, Pacific Ocean-east, Wind-water Interaction, ...2.0009
- LARGE-SCALE INTERACTIONS ...Acoustical, Air-sea Boundary-general, Pacific Ocean-north, Temperature, Thermal, ...3.0006
- OCEAN SYSTEM TELEMETER STUDY ...Applied Electronics, Data Acquisition, Data Transmission Systems, Moorings, Telemetry-other, ...4.0002
- DEEP OCEAN ENGINEERING TECHNOLOGY ...Abyssal, Benthonic-bottom, Experiments and Tests, Facilities, Platforms, Scientific-service-support, ...8.0270
- VERTICAL CURRENT STRUCTURE IN THE GREAT LAKES ...Circulation-general, Great Lakes-general, Temperature, ...2.0033
- WAVE MEASUREMENT IN THE OPEN OCEAN ...Data Acquisition, Oceanic - Pelagic, Profiles, Water Motion Recorders, Waves, ...2.0109
- ADVANCED RESEARCH - SATELLITE INTERROGATED ENVIRONMENTAL BUOY ...Meteorological Studies, Navigation Communication, Satellites, Water Motion Recorders, ...8.0280
- THERMO-ELECTRIC GENERATORS ...Generators, Thermoelectric, ...8.0162
- OCEANOGRAPHIC RESEARCH ...Acoustical, Currents-ocean, Optical, Pressure, Seismic Studies, Sonar, ...1.0151
- AMBIENT SEA NOISE ...Acoustical, Noise, Sampling, Sound Production, ...1.0013
- PHYSICAL OCEANOGRAPHY ...Instrumentation-general, Model Studies, Pacific Ocean-north, ...1.0160
- FIELD STUDY - CAPE COD, MASS. ...Animal Distr. (non-specific), Benthonic-bottom, Environmental Ecology, Sediments-other, Temperature, ...5.0584
- SURVIVAL CRAFT DRIFT AND LEEWAY ...Air Motion Instruments, Currents-ocean, Equipment, Ocean-lakes, Operational Aspect, Tables, Compilations, Catalogs, ...6.0129
- COAST GUARDS COASTAL OCEANOGRAPHIC MONITORING NETWORK ...Automatic Stations, Instrumental Services, Recording Systems, Telemetry-other, Transducers, ...4.0006
- OCEANOGRAPHY OF THE GRAND BANKS AND LABRADOR SEA ...Circulation-general, Icebergs, Labrador Current, Labrador Sea, Meteorological Studies, ...4.0124

### Buried Structures

- ELECTROKINETIC SOIL STUDY ...Electro-osmosis, Electroosmosis, Electrophoresis, Laboratory Analysis, Marine Soils, Stabilization, ...8.0342

### Cadmium

- HEMATOLOGICAL CHANGES IN *F. HETEROCLITUS* UPON EXPOSURE TO TOXIC METALS ...Blood Cells, Blood Plasma and Serum, Killifishes - Cyprinodon, Lead, Toxins -other, ...5.0325

### Calcium

- ULTRASTRUCTURAL AND AUTORADIOGRAPHIC INVESTIGATION OF CALCIFICATION IN FORAMINIFERS ...Calcification, Cell Wall, Cell org.n. & Organoids -ot, Foraminifera, Histology and Cytology, Invertebrate Culture, ...5.0788
- ECOLOGICAL SURVEY OF MARINE ENDOLITHIC ALGAE ...Algae-General, Borings - Tracks - Trails, Habitat Studies, Niches, Textures-structures, ...5.0690
- GEOCHEMISTRY OF CARBONATE CYCLE IN THE MARINE ENVIRONMENT ...Carbonate, Bicarbonate, Chemical Reactions, Optical, Precipitation, Removal--inorganics, ...7.0069
- MECHANISMS OF CALCIUM CARBONATE DEPOSITION ...Barnacles, Biogeochemical Process, Chemical Reactions, Derivatives, Fouling, ...5.1015
- EXPERIMENTAL CULTURE OF CALCAREOUS GREEN ALGAE OF CORAL REEFS ...Algal Culture, Biology, Chlorophyceae (non-specif.&ot), Growth and Differentiation, Plant Taxonomy, Reefs, ...5.0719
- THE ROLE OF CALCIUM IONS IN THE MOTILITY OF SEA URCHIN AND OTHER SPERMATOOZOA ...Atpase, Male Gametes, Motility and Migration, Yellow Perch, Darters, ...5.0622
- STATOLITH DIFFERENTIATION IN *AURELIA* (JELLYFISH) ...Developmental Physiology, Differentiation Mechanism, Jelly Fish, Proprioceptors, ...5.0598

### Calibration and Calibrators

- BASIC ACOUSTICAL STANDARDS AND MICROPHONE CALIBRATION ...Acoustic, Acoustical, Audio Frequency, Standards, Specifications, Transducers, ...8.0076
- STANDARDS FOR AUDIOMETRY ...Acoustic, Sound Level Analyzers, Standards, Specifications, Transducers, ...8.0127

### California

- ECOLOGICAL SURVEY OF EFFLUENT DISCHARGE AT TWO PULP MILLS IN HUMBOLDT COUNTY, CALIFORNIA ...Chemical Analysis (water), Effluents-waste Water, Pollution - Effects of , Pollution Effects, Pulp, Paper , and Logging, ...5.0858
- RELATIONSHIPS BETWEEN RATES OF SEDIMENT ACCUMULATION & CHANGES WITH DEPTH OF CERTAIN MASS PHYSICAL PROPERTIES IN MARINE SEDIMENTS ...Coring and Dredging, Interstitial - Connate Water, Pacific Ocean-east, Rate of Deposition, Shear Strength, ...8.0335
- WATER WAVE DOCUMENTATION ...Buoys, Pacific Ocean-general, Water Motion Recorders, Waves, ...2.0094
- AN EXPERIMENTAL AND THEORETICAL STUDY OF THE MARINE AND CONTINENTAL CLIMATES OF POINT CONCEPTION TO THE MORRO BAY REGION OF CALIFORNIA ...General Synoptic Observations, Micrometeorology, Military Aspects, Shoreline - Coastline, ...3.0055
- MARINE GEOLOGY ...Continental Shelf, Distribution, Ocean Waves - Currents, Sedimentation, Submarine Canyons, ...7.0260
- SUBMARINE CANYONS ...Development, Erosional Features, Geomorphology-topography, Photography, Submarine Canyons, ...7.0295
- MARINE VERTEBRATES OF THE CALIFORNIA PENINSULA ...Animal Taxonomy, Environmental Ecology, Range Or Territorial Distr. , Temperature, ...5.0554
- SUPPORT OF RESEARCH VESSEL VELERO 4 ...Equipment Purchase Operation, Facilities, Geology-general, Instrumentation-general, Marine Biology, Training Grants, Fellowships, ...4.0115
- SUPPORT OF THE RESEARCH VESSEL AHOYOHAI III ...Diving and Scuba, Equipment Purchase Operation, Geology-general, Marine Biology, Ships and Cruises, ...12.0008
- MIOCENE FISHES AND FISH FAUNAS AS DETERMINED FROM A STUDY OF FOSSIL OTOLITHS ...Biofacies, Boney Fish, Description of Fossils, Paleocology, Tertiary Period, ...7.0170
- APPLIED MARINE ENGINEERING PROGRAM AT SCRIPPS INSTITUTION OF OCEANOGRAPHY ...Engineering Studies-general, Harbors, Marine Biology, Marine Biology (non-specific), Other-design-and-construction, Scientific-service-support, Teaching and Research, Training Grants, Fellowships, ...11.0006

## California

## SUBJECT INDEX

- WAVE AND SURGE ACTION STUDY FOR LOS ANGELES-LONG BEACH HARBORS ...Harbors, Models, Surface Ships, Wave Action, Waves, ...2.0098
- MARINE GEOLOGY OF THE CALIFORNIA CONTINENTAL BORDERLAND WITH EMPHASIS ON FUTURE ECONOMIC DEVELOPMENT AND GENERAL RESOURCE VALUE ...Clay Minerals-general, Continental Shelf, Heavy Elements, Mineralogy, Ocean Mining, ...7.0010
- INVESTIGATE THE CAUSE OF MORTALITY OF PACIFIC OYSTERS ALONG THE CALIFORNIA COAST ...Environmental Ecology, Mortality Rates, Oysters, Pathology, Training Grants, Fellowships, ...5.0360
- AVIFAUNAL ECOLOGY OF LIMANTOUR ESTERO ...Birds - non-specific, Food Supply, Game Reserves & Preserves, Habitat Studies, ...5.0534
- SPORTFISH YIELD OF NATURAL REEFS ...Bays, Fishery Development -other, Habitat Studies, Population Dynamics, ...5.0199
- FOOD HABITS STUDY OF ORGANISMS OF THE CALIFORNIA CURRENT SYSTEM ...Behavioral Ecology, California Current, Food Supply, Pacific Ocean-general, ...5.0044
- PACIFIC OCEAN INFLUENCE UPON CALIFORNIA RAINFALL ...Forecasting, Pacific Ocean-general, Patterns, Rain-other, Temperature, ...3.0057
- MARINE WASTE DISPOSAL AND SEA URCHIN ECOLOGY ...Pollution Effects, Productivity - Food Chain, Sea Urchins & Other Echinoderm, Sewage, ...5.0551
- ENVIRONMENTAL BIOLOGY OF TOMALES BAY ...Aquatic Ecology, Bays, Benthic Fauna, Man's Activities, Pollution - Effects of, ...5.0860
- EARTHQUAKE HAZARD - A PUBLIC POLICY PROBLEM IN THE SAN FRANCISCO BAY AREA ...Earthquakes, Faults, Forecasting-prediction, Intergovernmental Relations, Policy Making, San Francisco Bay, ...9.0002
- SEDIMENTOLOGY AND GEOLOGIC HISTORY OF HUMBOLDT BAY, CALIFORNIA ...Bays, Coring and Dredging, Geologic History-general, Pacific Ocean-east, Physical Properties, ...7.0193
- ECOLOGY OF STORM PETRELS ...Albatrosses, Shearwaters... , Islands, Mark, Tag Or Capture -other, Spawning & Nesting Sites, Terrestrial Ecology, ...5.0532
- ZOOPLANKTON STUDIES IN BIG LAGOON, CALIFORNIA ...Lagoons, Plankton Sampling, Temporal Distribution, Vertical Distribution, Zooplankton, ...5.0739
- POLLUTION STUDY OF THE VENICE DISTRICT CANAL ...Canals, Model Studies, Synthetic Hydrology, Water Quality-general, ...6.0141
- A SURVEY OF THE MARINE ENVIRONMENT FROM FORT ROSS, SONOMA COUNTY, TO POINT LOBOS, MONTEREY COUNTY ...Effluents-waste Water, Marine Environments-general, Pollution - Effects of, Pollution Effects, ...9.0003
- LITTORAL ENVIRONMENT OBSERVATION PROGRAM ...Development, Erosion, Intertidal Areas, ...7.0289
- RADIOISOTOPIC SAND TRACER STUDY, POINT CONCEPTION, SANTA BARBARA COUNTY, CALIFORNIA ...Ocean Waves - Currents, Other Sediment Type, Sediment Transport-general, Tracers, ...7.0194
- STUDY OF BEACH NOURISHMENT ALONG THE SOUTHERN CALIFORNIA COAST ...Beach, Erosional Features, Sediment Transport-general, Shoreline Structures, Supply Rate, ...7.0292
- OCEANOGRAPHIC RESEARCH ...Acoustical, Anti-submarine-warfare, Military Aspects, Temperature, Transmission, ...1.0005
- OREGON-CALIFORNIA BLACK SANDS ...Beaches, Heavy Mineral Analysis, Heavy Minerals, Mineralogy, Ocean Mining, Potential of Deposit, ...7.0015
- NORTHERN CALIFORNIA OFFSHORE BLACK SANDS ...Distribution, Heavy Minerals, Shoreline - Coastline, Size, Terrigenous, ...7.0020
- CENTRAL CALIFORNIA CONTINENTAL MARGIN ...Continental Shelf, Continental Slope, Geologic Maps, San Andreas Fault, Structural Studies, ...7.0036
- UNIVERSITY OF SOUTHERN CALIFORNIA CONTRACT - CHANNEL ISLANDS AND BASINS SOUTHERN CALIFORNIA CONTINENTAL MARGIN ...Continental Shelf, Continents, General Mineralogic Properties, Geochronology-general, Mineralogy, ...7.0223
- ANALYSIS AND INTERPRETATION OF DATA FROM GEOPHYSICAL AND PHOTOGRAB SURVEY OF

- CORONADO BANK, OFF SOUTHERN CALIFORNIA ...Ocean Mining, Phosphate, Photography, Potential of Deposit, ...7.0004
- GEOLOGICAL, GEOPHYSICAL, OCEANOGRAPHIC, AND ECOLOGICAL DATA ON WORLDWIDE BASIS, ON AREAS OF HEAVY METALS POTENTIAL ...Continental Shelf, Drilling and Coring, Oregon, Placer, Potential of Deposit, ...7.0005
- SAMPLING CAMPAIGN ON CORONADO BANK, OFF SOUTHERN CALIFORNIA ...Banks, Chemistry, Coring and Dredging, Distribution, Phosphate, Phosphite, ...7.0003
- OREGON-NORTHERN CALIFORNIA PLACER DEPOSITS ...Deposits-ores, Drilling and Coring, Oregon, Placer, Reconnaissance, ...7.0009
- EXPLORATORY COLLECTION AND CARE OF FISH FOR TESTING AT TIBURON ...Bioassay, Fish -non-specific, Laboratory Animals, San Francisco Bay, ...5.0116
- LIFE HISTORY OF BILLFISHES ...Censusing, Life History Studies, Marlin, Billfishes, Sailfish..., Mexico, ...5.0195
- TOXICANT TOLERANCE STUDIES-SCREENING OF PESTICIDES AND FISH AT TIBURON ...Fish -non-specific, Laboratory Animals, Pesticides -non-specific, Screening Potential Pesticides, ...5.0278
- TOXICANT TOLERANCE STUDIES - SCREENING OF PESTICIDES AND AQUATIC INVERTEBRATES AT TIBURON ...Herbicides -non-specific, Insecticides -non-specific, Laboratory Animals, Screening Potential Pesticides, ...5.0906
- FILM PROJECT (KELP FORESTS) ...Cinematography, Fishery Development -other, Habitat Studies, Laminariaceae (non-specif.&ot), ...5.0678
- THE ROLE OF THE SENORITA, OXYJULIS CALIFORNICA, AS A CLEANING ORGANISM ...Ectoparasites, Fish -other, Fishery Development -other, Interbiotic Relat.(non-specif), ...5.0193
- SAND DOLLAR COMMUNITIES ...Beaches, Habitat Studies, Productivity - Food Chain, Sea Urchins & Other Echinoderm, ...5.0533
- ECOLOGY OF THE KELP FORESTS ...Behavioral Ecology, Environmental Ecology, Fish -non-specific, Habitat Studies, Laminariaceae (non-specif.&ot), ...5.0194
- PACIFIC COASTAL ENVIRONMENT AS RELATED TO DISTRIBUTION AND ABUNDANCE OF GAME SPECIES -- SEA SURFACE TEMPERATURE MEASUREMENTS ...Aquatic Ecology, Spectral Reflectance, Temperature, ...1.0175
- LOCAL FISHERY SYSTEMS DEVELOPMENT ...Commercial Fishing, Sharks, Shrimps - Common, Swordfish, ...5.0198
- 149A FISHERY SYSTEMS ANALYSIS ...Commercial Fishing, Nets, Production & Processing, Simulation, Tuna, Mackerel, Albacore..., ...4.0175
- MULTISPECIES FISHERIES MODELS ...Commercial Fishing, Economics, Model Studies, Oceanic - Pelagic, Pacific Ocean-east, Production & Processing, ...4.0065
- MESO WIND PATTERNS IN THE CENTRAL CALIFORNIA VALLEY ...Atmospheric Pollution-general, Drift (pesticide), Herbicides -non-specific, Land-sea Breezes, Wind Erosion, ...3.0056
- ANALYSIS OF THE MARINE LAYER - A MESO METEOROLOGICAL STUDY ...Air-sea Boundary-general, Diffusion, Heat Exchange, Orographic Effects, Turbulence, ...3.0001

## Calorimetry

- CALORIC STUDIES OF SPARTINA AND THE MARSH CRAB SESARMA RETICULATUM ...Chlorideae (non-specific & Ot), Crabs, Energy Budgets, Swamps-marshes, ...5.0380
- THERMAL REGULATION DURING WATER IMMERSION OF MAN ...Effects on Cardiovasc. system, Regulation, ...6.0095

## Canada

- ACOUSTIC RECORDING OF MARINE MAMMALS OF NOVA SCOTIA AND NEWFOUNDLAND ...Atlantic Ocean-north, Mammals, Seals, Sound Production, Tape Recording, Audio, ...5.0625
- CORING OF THE VARVED SEDIMENTS IN SAANICH INLET ...Coring and Dredging, Geochronology-general, Local Stratigraphy, Pacific Ocean-east, Varves, ...7.0282
- COHO MARKING ...Oregon, ...5.0161
- THE ORIGIN OF GRAVEL BARS IN THE INTERTIDAL ZONE, PARRSBORO HARBOUR, NOVA SCOTIA, CANADA ...Intertidal Areas, Location, Origin, Sand Bars, Size, ...7.0277

## SUBJECT INDEX

## Cardiovascular Techniques

INTERPRETING THE ORIGIN AND DISTRIBUTION OF COASTAL SEDIMENTS ...Distribution, Massachusetts, Origin, Shoreline - Coastline, Size, ...7.0213

MODERN VERSUS RELICT SEDIMENT PATTERNS ON CONTINENTAL MARGINS ...Bermuda, Continental Shelf, Distribution, Quaternary Period, Sea Level Changes, ...7.0214

RELICT COPEPODS FROM LAKE TUBORG, ELLESMERE ISLAND ...Brackish Water, Carbon-14, Copepods, Lakes, Plankton Sampling, ...5.0388

### Canals

POLLUTION STUDY OF THE VENICE DISTRICT CANAL ...California, Model Studies, Synthetic Hydrology, Water Quality-general, ...6.0141

### Cancer

EPIDERMAL PAPILLOMAS IN PLEURONECTID FISHES ...Papillomas of Animals, Pathology, Puget Sound, Righteye Flounders, ...5.0314

### Carbohydrates

#### Cellulose

MARINE FUNGI DEGRADATION ...Fouling, Growth and Differentiation, Marine Fungi (non-specific), Nutrition Studies, ...8.0225

#### Glycogen

CARBON DIOXIDE FIXATION IN HETEROTROPHIC ORGANISMS III THE BREAKDOWN OF GLYCOGEN IN MARINE INVERTEBRATES ...Alanine, Carbon Dioxide Fixation, Catabolism and Degradation, Metabolism, Oxygen, ...5.1033

#### Mucopolysaccharides

HISTOCHEMICAL STUDIES OF MUCOSUBSTANCES IN THE MANTLE OF THE NORTHERN QUAHOG, MERCENARIA MERCENARIA ...Calcification, Clams, Derivatives, Histochemistry - Cytochem, Mucoproteins, ...5.0455

### Carbon

HYDROSPHERE-ATMOSPHERE RADIOCHEMICAL MEASUREMENTS ...Diffusion, Nuclear Explosions - Fallout, Particle-gas Transfer, Tracers, Velocity, ...3.0043

C-14 UPTAKE, LIMITING FACTORS AND EXCRETION PRODUCTS OF ANTARCTIC PHYTOPLANKTON ...Antarctic Ocean, Phytoplankton, Primary Productivity, Secretions and Products, ...5.0813

NEUTRON ACTIVATION ANALYSIS OF IRON METEORITES ...Activation Analysis, Aluminum, Argon-potassium, Cosmogenous, Iron, Neutron Activation, Carbon, ...7.0065

CHEMICAL OCEANOGRAPHY ...Carbon-14, Chemical Reactions, Gulf of Mexico, Organics, Reaction-general, ...1.0131

HETEROTROPHIC ACTIVITY AND PRIMARY REGENERATION IN THE OCEAN ...Atlantic Ocean-south, Biodegradation, Gulf of Mexico, Organisms, Organics-general, ...1.0114

CARBON ISOTOPE GEOTHERMOMETRY ...Carbonaceous Substance, Chemistry, Core Analysis, Geologic Thermometry, Paleotemperature, Plankton (non-specific), Temperature, ...7.0079

STABLE ISOTOPE FRACTIONATION IN ECHINODERM CALCITE ...Animal Taxonomy, Biogeochemical Process, Calcite, Living Organisms, Marine Organisms, Oxygen, Sea Feathers, Sea Lily, Sea Urchins & Other Echinoderm, ...7.0085

STABLE CARBON AND OXYGEN ISOTOPE RATIO VARIATIONS IN THE FLOW TO CARBON AND OXYGEN THROUGH NORMAL AND POLLUTED AQUATIC SYSTEMS ...Element Ratios, Organic-general, Oxygen, Pollutants - Path of, Sewerage Systems-other, Water Analysis, ...1.0132

OPERATION OF R/V ALAMINOS ...Caribbean Sea, Gulf of Mexico, Gulf Stream, Ships and Cruises, Textures-structures, ...12.0046

STUDY OF THE EXCHANGE OF CARBON DIOXIDE BETWEEN THE ATMOSPHERE AND THE OCEANS ...Computer Applications, Gases, Meteorological Studies, Particle-gas Transfer, ...1.0081

STUDY OF DEEP PACIFIC CIRCULATION USING SILICON-32 ...Circulation-general, General Sea Water Chemistry, Pacific Ocean-general, Silicon, Tracers, ...2.0006

DISTRIBUTION OF CARBON AND RADIUM IN THE ANTARCTIC WATERS ...Gases, Indian Ocean-general, Radium, Sampling, Trace Elements, ...1.0109

STABLE ISOTOPES ...Atlantic Ocean-north, Atlantic Ocean-south, Chemical Analysis (water), Sampling, Water Chemistry-other, ...1.0108

MICROBIAL CORROSION IN THE MARINE ENVIRONMENT ...Biodegradation, Biological, Fouling, Marine Fungi (non-specific), Water, ...5.0769

EFFECT OF NITRILOTRIACETIC ACID (NTA) UPON THE TOXICITY OF METALS TO SELECTED SPECIES OF ESTUARINE PHYTOPLANKTON ...Acids, Chemicals (incl. algacides), Estuaries, Isotope Tracer-other, Phytoplankton, ...5.0829

CARBON MONOXIDE CONTENT OF GLACIAL ICE AND THE NATURAL ATMOSPHERE ...Composition, Dispersion - Transpiration, Gases, Mono-oxide, ...3.0068

### Carbon Dioxide

CHEMICAL FEATURES OF THE SUBARCTIC BOUNDARY IN THE NORTHERN PACIFIC OCEAN ...Circulation-general, Gases, Mixing, Oceanic Fronts, Pacific Ocean-north, Sub - Polar, ...1.0125

BIOLOGICAL TRANSPORT OF GASES AND OTHER SUBSTANCES ...Active Transport, Carbonic Anhydrase, Fish, Gases, Kidney and Urinary System, ...5.0240

### Carbonate, Bicarbonate

PHASE RELATIONS OF THE HYDRATED CARBONATES OF CALCIUM AND MAGNESIUM ...Equilibrium - Chemical, Interfacial, Phase Relationships, Properties and Structure, Surface Chemistry, ...3.0085

RESEARCH ON THE PHYSICAL CHEMISTRY OF CHEMICAL REACTIONS IN SEA WATER ...Acids, Apatite-general, Chemical Reactions, Equilibrium - Chemical, High Pressure Research, Reaction-general, Solubility, Sulfate, Sulfite, ...1.0127

GEOCHEMISTRY OF CARBONATE CYCLE IN THE MARINE ENVIRONMENT ...Calcium, Chemical Reactions, Optical, Precipitation, Removal-inorganics, ...7.0069

### Cardiovascular System

#### Basic Hemodynamics

CARDIOVASCULAR STUDIES ON DIVING MAMMALS ...Adaptation, Cardiovascular System, Control and Regulation, Heart, Locomotion -animal, Seals, ...5.0639

#### Effects on Cardiovasc. system

CIRCULATORY REACTIONS TO ASPHYXIA ...Cardiovascular System, Mammals, Veterinary Science, ...5.0553

THERMAL REGULATION DURING WATER IMMERSION OF MAN ...Calorimetry, Regulation, ...6.0095

CARDIOVASCULAR ADJUSTMENTS IN DIVING MAMMALS ...Adaptation, Cardiovascular System, Locomotion -animal, Mammals, ...5.0674

#### Heart

PHYSIOLOGY OF THE LIMULUS HEART ...Biological Rhythms, Cardiovascular, Horseshoe Or King Crabs, Nervous System, ...5.0463

CARDIOVASCULAR STUDIES ON DIVING MAMMALS ...Adaptation, Basic Hemodynamics, Cardiovascular System, Control and Regulation, Locomotion -animal, Seals, ...5.0639

#### Regional Blood Flow & Volume

CARDIOVASCULAR ADJUSTMENT TO DIVING ASPHYXIA ...Cardiovascular System, Locomotion -animal, Medical Studies, Seals, ...5.0552

### Cardiovascular Techniques

#### Cardiac Output

HUMAN TEMPERATURE REGULATION IN WATER ...Medical Studies, Regulation, ...6.0094

## Cardiovascular Techniques

### Flow Metering Techniques

MECHANICAL PROPERTIES OF MAMMALIAN CELLS  
...Blood Cells, Cellular Membranes (non-spec.), Suspension Culture, Time-lapse Photography, ...5.0992

## Caribbean Sea

EXPERIMENTAL VERIFICATION OF WIDE SWATH OCEAN BOTTOM CONTOURING WITH SPLIT BEAM RECEIVERS  
...Bathymetry, Receivers, Sonar, Technique Development, Topographic, ...7.0302

MARINE GEOPHYSICS ...Geomorphology-topography, Geophysical Equipment, Heat Flow Measurements, Magnetic Studies, Structural Studies, ...7.0115

MARINE PHYSICAL GEODESY ...Aerospatial, Gravity Studies, Navigation, Sea Level Variations, Standard Geoid, ...4.0058

GRAVITY ...Anomalies, Geophysical Equipment, Gravity, Navigation, Pacific Ocean-west, ...7.0142

CIRCULATION STUDIES ...Acoustical, Dispersion, Ocean Currents-other, Transmission, Water Properties-general, ...1.0046

ECOLOGY OF PHYTOPLANKTON IN SEMI-TROPICAL ENVIRONMENTS ...Phytoplankton, Range Or Territorial Distr., Sub - Tropic, Temporal Distribution, Vertical Distribution, ...5.0778

RELATIONSHIPS BETWEEN PHYTOPLANKTON AND ZOOPLANKTON IN THE CARIBBEAN SEA ...Interbiotic Relat.(non-specif), Phytoplankton, Sargassum, Vertical Distribution, Zooplankton, ...5.0779

SUPPORT OF THE R/V EASTWARD ...Continental Shelf, Cooperative-studies, Facilities, Marine Biology (non-specific), Ships and Cruises, Training Grants, Fellowships, ...12.0039

COOPERATIVE RESEARCH AND TRAINING PROGRAM IN BIOLOGICAL OCEANOGRAPHY ...Facilities, Marine Biology (non-specific), Meetings, Ships and Cruises, Training Grants, Fellowships, ...11.0037

OPERATION OF R/V ALAMINOS ...Carbon, Gulf of Mexico, Gulf Stream, Ships and Cruises, Textures-structures, ...12.0046

OCEAN-SEDIMENTS AND CRUSTAL STRUCTURES IN THE BHAMIAN-CARIBBEAN AREA ...Continental Slope, Crust, Ocean Basins, Soil Properties - Other, Textures-structures, ...7.0109

CARIBBEAN GEOGRAPHY ...Beach, Central America, Shore Features-general, Shoreline - Coastline, South America, ...7.0288

DISTRIBUTION AND MIGRATION OF CENTRAL AMERICAN FRESHWATER ELASMOBRANCHIS ...Migration, Nicaragua, Osmoregulation, Rays, Skates, Mantas, Sawfish, Sharks, ...5.0117

GEOLOGIC INVESTIGATIONS IN PUERTO RICO & THE CARIBBEAN ...Element Ratios, Plutonic, Puerto Rico, Sedimentary Petrology, Volcanic, ...7.0042

SHIPBOARD METHODS OF CHEMICAL ANALYSIS ...Gases, Mass Spectroscopy, Solubility, Technique Development, Water Analysis-general, ...1.0091

THE TAXONOMY AND ZOOGEOGRAPHY OF THE POLYCHAETOUS ANNELIDS OF THE GULF OF MEXICO AND THE CARIBBEAN SEA ...Animal Taxonomy, Gulf of Mexico, Lugworms, Marine Segmentedworm, Neotropical, ...5.0569

THE BIOLOGY OF ROCK-BORING SIPUNCULIDS ...Invertebrate Nutrition, Invertebrate Physiology, Invertebrates -non-specific, Reefs, ...5.0577

REPRODUCTIVE BIOLOGY, DEVELOPMENT, AND SYSTEMATICS OF THE SIPUNCULIDS OF THE CARIBBEAN ...Animal Taxonomy, Developmental Physiology, Invertebrates -non-specific, Range Or Territorial Distr., Reproductive System, ...5.0579

SYNECOLOGY OF CARIBBEAN SPONGES ...Algae- General, Copepods, Porifera, Symbiosis, ...5.0580

SEA SURFACE SURVEILLANCE ...Circulation-general, Temporal Distribution, Tuna, Mackerel, Albacore... , Vertical Distribution, Water Properties-general, ...2.0019

STOCK IDENTIFICATION OF ATLANTIC TUNAS ...Atlantic Ocean-general, Electrophoresis -non-specific, Tuna, Mackerel, Albacore... , ...5.0252

NEW DRUGS FROM THE SEA, ESPECIALLY ANTIBIOTICS ...Antibiotics, Marine Plants, Pacific Ocean-general, ...6.0123

## SUBJECT INDEX

## Caroline Islands

MICRONESIAN NAVIGATION AND SAILING ...Anthropology -other, General Ethnology, Micronesia, Navigation, Navigation Communication, ...4.0094

INVESTIGATE TUNA RESOURCES OF THE TRUST TERRITORIES ...Commercial Fishing, Environmental Ecology, Population Dynamics, Tuna, Mackerel, Albacore... , ...5.0085

## Carotenoid Pigments

CAROTENOIDS, CAROTENOID CHROMOPROTEINS, AND ASSOCIATED LIPIDS IN ANIMALS ...Catabolism and Degradation, Metabolism, Pigments - Animal-non-specific, ...5.0944

PROCESSING ALASKA SHRIMP ...Design, Machinery, Equipment, Heat, Organoleptic Studies, Shrimp, Temperature Control, ...6.0002

## Caulerpin

PHYTOCHEMISTRY OF NARCOTIC PRINCIPLES IN CAULERPA. ...Caulerpa, Phaeophyta (non-specific & Ot), Rhodophyta (non-specific & Ot), Sterols, ...6.0111

## Cell Organelles & Organoids

### Acrosomes

STRUCTURE AND FUNCTION OF CELL ORGANELLES DURING GROWTH AND DEVELOPMENT ...Basic Embryology, Differentiation Mechanism, Nucleolus, Ribosomes, ...5.0935

### Cell Center & Mitot. apparatus

CELL DIVISION AND MITOTIC APPARATUS PROTEINS ...Biosynthesis, Cell Cycle, Centrioles, Proteins, Sea Urchins & Other Echinoderm, ...5.0666

### Centrioles

CELL DIVISION AND MITOTIC APPARATUS PROTEINS ...Biosynthesis, Cell Center & Mitot. apparatus, Cell Cycle, Proteins, Sea Urchins & Other Echinoderm, ...5.0666

### Cell Wall

ULTRASTRUCTURAL AND AUTORADIOGRAPHIC INVESTIGATION OF CALCIFICATION IN FORAMINIFERS ...Calcification, Calcium, Cell. organ. & Organoids -ot, Foraminifera, Histology and Cytology, Invertebrate Culture, ...5.0788

BIOCHEMICAL STUDIES ON SILICEOUS SKELETAL FORMATION ...Algae- Diatoms, Golgi Apparatus, Histochemistry - Cytochem, Plant Developmental Biology, Silicon, ...5.0750

### Cell. organ. & Organoids -ot

CHEMISTRY AND BIOLOGY OF SOME COELENTERATE NEMATOCYSTS ...Animal Toxins, Coelenterata -other, Invertebrate Physiology, Predation, ...5.0776

ULTRASTRUCTURAL AND AUTORADIOGRAPHIC INVESTIGATION OF CALCIFICATION IN FORAMINIFERS ...Calcification, Calcium, Cell Wall, Foraminifera, Histology and Cytology, Invertebrate Culture, ...5.0788

## Membrane- Cellular

### Cellular Membranes (non-spec.)

MECHANICAL PROPERTIES OF MAMMALIAN CELLS ...Blood Cells, Flow Metering Techniques, Suspension Culture, Time-lapse Photography, ...5.0992

STUDIES OF PROTEINS UNDER EXTREME ENVIRONMENTS ...Cytochromes, Exobiology, Halobacteria, Respiration, Salt, ...5.0941

MORPHOGENESIS OF THE DIATOM SHELL ...Algae- Diatoms, Plant Developmental Biology, Silica, Structural Functions, ...5.0734

MORPHOGENESIS OF THE DIATOM SHELL ...Algae- Diatoms, Intracellular Localization, Organelle & Membrane Formation, Plant Developmental Biology, Silica, ...5.0712

CELL CONTACT IN RELATION TO GROWTH AND MORPHOGENESIS ...Adhesion, Basic Embryology, Electron Microscopy, Porifera, ...5.0996

## SUBJECT INDEX

## Cells and Batteries

PHYSALIA TOXIN AND THE ACTIVITY OF BIOLOGICAL MEMBRANES ...Active Transport, Animal Toxins, Jelly Fish, Toxicology, ...6.0107

VITAMIN A AND PROTEIN METABOLISM ...Metabolism, Ochromonas, Plasma Membrane, Vitamin A, ...5.1006

SUBCELLULAR REACTION TO INJURY IN THE KIDNEY ...Cell Injury and Autolysis, Electron Microscopy, Kidney, Structural Functions, Toads, ...5.0297

EFFECT OF LIPIDS ON STABILITY OF BIOLOGICAL MEMBRANES ...Coenzyme Q, Electron Microscopy, Stability, Tocopherol, Vitamin A, ...5.1007

### Golgi Apparatus

BIOCHEMICAL STUDIES ON SILICEOUS SKELETAL FORMATION ...Algae- Diatoms, Cell Wall, Histochemistry - Cytochem, Plant Developmental Biology, Silicon, ...5.0750

### Mitochondrial Membranes

ULTRASTRUCTURE OF CELL ION TRANSPORT MECHANISMS ...Active Transport, Electron Microscopy, Nutrition and Metabolism, Osmoregulation, Respiratory System, ...5.0974

### Plasma Membrane

CONTINUED STUDIES ON THE INFLUENCE OF THE EGG CORTEX ON THE DEVELOPMENT OF THE MOLLUSCAN EMBRYO ...Basic Embryology, Differentiation Mechanism, Gastropods -slugs, conch, snails, Octopus, Squid, Cuttlefish... , Surface Properties -other, ...5.0423

THE ROLE OF SULFUR BACTERIA IN CORROSION AND DETERIORATION ...Autotrophic, Biological, Fouling, Marine Bacteria, Sulfur Bacteria, ...5.0805

VITAMIN A AND PROTEIN METABOLISM ...Cellular Membranes (non-spec.), Metabolism, Ochromonas, Vitamin A, ...5.1006

EXCITATION-CONTRACTION COUPLING IN MUSCLE ...Contraction and Relaxation, Crabs, Lobsters, Musculoskeletal System, ...5.0438

ION TRANSPORT MECHANISM IN GIANT AXON ...Active Transport, Atpase, Cell Free Metabolism, Nervous System, Octopus, Squid, Cuttlefish... , ...5.0369

ACTIONS OF BIO-TOXINS ON CELL MEMBRANES ...Muscle, Nervous System, Venom, ...6.0128

### Mitochondria

RNA SYNTHESIS DURING SEA URCHIN DEVELOPMENT ...Basic Embryology, Differentiation Mechanism, Metabolic-biochemical Genetics, Replication, Sea Urchins & Other Echinoderm, ...5.0611

### Nucleus

#### Nucleolus

STRUCTURE AND FUNCTION OF CELL ORGANELLES DURING GROWTH AND DEVELOPMENT ...Acrosomes, Basic Embryology, Differentiation Mechanism, Ribosomes, ...5.0935

STRUCTURAL ANALYSIS OF CELL DIVISION .. Basic Embryology, Cell Cycle, Histochemistry - Cytochem, Nucleus (non-specific & Ot.), Sea Urchins & Other Echinoderm, ...5.0645

#### Nucleus (non-specific & Ot.)

PHYSIOLOGY OF FERTILIZATION AND NUCLEO-CYTOPLASMIC INTERACTIONS IN SEA URCHIN DEVELOPMENT ...Basic Embryology, Messenger RNA , Reproductive System, Sea Urchins & Other Echinoderm, Selection & Breeding, ...5.0673

GROWTH AND DIFFERENTIATION OF PLASTIDS ...Acetabularia, Biosynthesis, Cytoplasmic Inheritance, DNA Other, Organelle Culture, Photosynthetically Active, ...5.0683

STRUCTURAL ANALYSIS OF CELL DIVISION ...Basic Embryology, Cell Cycle, Histochemistry - Cytochem, Nucleolus, Sea Urchins & Other Echinoderm, ...5.0645

### Plastids

#### Photosynthetically Active

GROWTH AND DIFFERENTIATION OF PLASTIDS ...Acetabularia, Biosynthesis, Cytoplasmic Inheritance, DNA Other, Nucleus (non-specific & Ot.), Organelle Culture, ...5.0683

PHOTOBIOLOGICAL STUDIES ON MARINE CHRYSOMONADS ...Autotrophic, Coccoliths, Elect Trans and Redox, Photochemistry, ...5.0932

SYMBIOSIS BETWEEN MARINE ALGAE AND INVERTEBRATES ...Gastropods -slugs, conch, snails, Symbiosis, Zooxanthella, ...5.0730

### Ribosomes

MACROMOLECULAR EVENTS OF FERTILIZATION AND EARLY EMBRYONIC DEVELOPMENT ...Basic Embryology, Biosynthesis, Reproductive System, Sea Urchins & Other Echinoderm, ...5.1011

STRUCTURE AND FUNCTION OF CELL ORGANELLES DURING GROWTH AND DEVELOPMENT ...Acrosomes, Basic Embryology, Differentiation Mechanism, Nucleolus, ...5.0935

PROTEIN SYNTHESIS DURING THE EARLY DEVELOPMENT OF THE SEA URCHIN EMBRYO ...Basic Embryology, Cell Injury and Autolysis, Proteins, Radiation Effects-non-specific, Sea Urchins & Other Echinoderm, ...5.0537

AN ANALYSIS OF DEVELOPMENT IN ARTEMIA SALINA EMBRYOS ...Basic Embryology, Biosynthesis, Nucleic Acids, Proteins, Shrimps - Brine Or Fairy, ...5.0406

### Specialized Structures

#### Cilia and Flagella

CILIA DIFFERENTIATION IN THE SEA URCHIN EMBRYO ...Basic Embryology, Differentiation Mechanism, Proteins, Sea Urchins & Other Echinoderm, Subunits, ...5.0616

CILIA DIFFERENTIATION IN MARINE EMBRYOS ...Basic Embryology, Lugworms, Marine Segmentedworm, Sea Urchins & Other Echinoderm, ...5.0617

#### Fibrils and Filaments

FILAMENTS, MORPHOGENESIS AND CONTRACTION OF MUSCLE ...Contraction and Relaxation, Subunits, ...5.0986

CYTOPLASMIC FILAMENTS AND CELL MOVEMENT IN DEVELOPMENT ...Basic Embryology, Growth (non-specific & Ot.), Motility and Migration, Proteins, Sea Squirts - Tunicates, ...5.1037

#### Microtubules

ULTRASTRUCTURE OF EARLY CLEAVAGE STAGES IN THE EGG OF LYMNAEA SP ...Basic Embryology, Cell Cycle, Electron Microscopy, Gastropods -slugs, conch, snails, Invertebrate Anatomy, ...5.0509

CELL TRANSFORMATIONS, DIVISION, AND MOTION ...Ameboid Movement, Basic Embryology, Cell Cycle, Nucleic Acids, ...5.0234

CEPHALOPOD LENS DEVELOPMENT ...Basic Embryology, Differentiation Mechanism, Lens Proteins, Octopus, Squid, Cuttlefish... , Visual Organs, ...5.0424

## Cells and Batteries

### Batteries

UNDERSEA PROPULSION AND POWER SOURCES ...Combustion-other, Generators, Marine Propulsion, ...8.0158

### Electrode

ENERGY CONVERSION MATERIALS AND COMPONENTS ...Durability, Deterioration, Fuel Cell-other, Hydrazine, Hydrocarbon, Pressure, ...8.0223

### Fuel Cells

#### Biological

BRACKISH WATER PURIFICATION BY BIOLOGICAL FUEL CELL POWERED ELECTRODIALYSIS ...Brackish Water, Desalination, Desalination Wastes, Electrodialysis, Material Recovery Wastes, Water Costs, ...6.0161

#### Fuel Cell-other

HYDROGEN PROPERTIES ...Density, Dielectric Properties, Hydrogen, Marine Propulsion, Refraction, ...8.0157

ENERGY CONVERSION MATERIALS AND COMPONENTS ...Durability, Deterioration, Electrode, Hydrazine, Hydrocarbon, Pressure, ...8.0223

HYDROGEN-OXYGEN FUEL CELLS ...Encapsulation, Gas Generator, Oxidants, Safety, Submersibles, ...8.0160

#### Hydrocarbon

ENERGY CONVERSION MATERIALS AND COMPONENTS ...Durability, Deterioration, Electrode, Fuel Cell-other, Hydrazine, Pressure, ...8.0223

## SUBJECT INDEX

### Cellular Physiology

- DEVELOPMENT OF POLARITY IN THE FUCACEAN ZYGOTE ...Differentiation Mechanism, Fucus, Plant Developmental Biology, Polarity, Reproductive Physiology, ...5.0972
- CRYOGENIC PRESERVATION OF VIABLE FISH SPERM ...Artificial Insemination, Fish -non-specific, Freezing Techniques, Male Gametes, ...5.0303
- IONIC PERMEABILITIES OF THE SQUID GIANT AXON. - EFFECTS OF CHEMICAL AGENTS ...Microelectrodes, Nervous System, Octopus, Squid, Cuttlefish... , Permeability, ...5.0979
- CONDUCTION AND INTEGRATION ...Behavior, Hydra, Portuguese Man-of-war, Katydid, Musculoskeletal System, Nervous System, ...5.1018
- COMPARATIVE STUDIES OF DINOFLAGELLATE TOXINS ...Algae- Dinoflagellates, Algal Culture, Algal Toxins, Toxicology, ...6.0121

### Activity and Specialization

#### Ameboid Movement

- CELL TRANSFORMATIONS, DIVISION, AND MOTION ...Basic Embryology, Cell Cycle, Microtubules, Nucleic Acids, ...5.0234

#### Contraction and Relaxation

- FILAMENTS, MORPHOGENESIS AND CONTRACTION OF MUSCLE ...Fibrils and Filaments, Subunits, ...5.0986
- FINE STRUCTURE OF JELLYFISH (CHRYSAORA QUINQUICERA) TENTACLE MUSCLE ...Invertebrate Physiology, Jelly Fish, Microscopy -other, Musculoskeletal System, Skin Or Ectoderm, ...5.0659
- STUDIES IN MICRONEUROPHYSIOLOGY ...Barnacles, Brain, Gastropods -slugs, conch, snails, Musculoskeletal System, ...5.0362
- EXCITATION-CONTRACTION COUPLING IN MUSCLE ...Crabs, Lobsters, Musculoskeletal System, Plasma Membrane, ...5.0438

#### Motility and Migration

- CYTOPLASMIC FILAMENTS AND CELL MOVEMENT IN DEVELOPMENT ...Basic Embryology, Fibrils and Filaments, Growth (non-specific & Ot.), Proteins, Sea Squirts - Tunicates, ...5.1037
- THE ROLE OF CALCIUM IONS IN THE MOTILITY OF SEA URCHIN AND OTHER SPERMATOOZOA ...Atpase, Calcium, Male Gametes, Yellow Perch, Darters, ...5.0622

#### Photoreception

- PHYSIOLOGY OF LUMINESCENT SIGNAL SYSTEMS ...Bioluminescence, Trace Elements, Visual Organs, ...5.0950
- LIGHT RECEPTOR CONTROL OF THE DIURNAL RHYTHM OF ENZYME SYNTHESIS IN THE BIOLUMINESCENT MARINE DINOFLAGELLATE GONYAULAX POLYEDRA ...Biological Rhythms, Biosynthesis, Control and Regulation, Gonyaulax, Plant Enzymes, ...5.0760
- PHOTOBIOLOGY OF MARINE ANIMALS ...Photochemistry, Physical State, Visual, Visual Organs, ...5.0313

#### Secretions and Products

- C-14 UPTAKE, LIMITING FACTORS AND EXCRETION PRODUCTS OF ANTARCTIC PHYTOPLANKTON ...Antarctic Ocean, Carbon, Phytoplankton, Primary Productivity, ...5.0813
- ALGAL SUBSTANCES IN THE MARINE FOOD WEB ...Food Chains, Food Webs, Humic Acid, Marine Plants, Phaeophyta (non-specific & Ot.), Phenols, ...5.0725
- ORGANIC INFLUENCES ON CALCIUM CARBONATE CEMENTATION ...Algae- General, Algal Culture, Biology, Cement Origin, Marine Plants, ...5.0729
- DRAG-REDUCING ALGAE ...Algae- General, Coatings-general, Fouling, Marine Bacteria, Natural Occurring, Wear, Friction, ...5.0681

### Biological Rhythms

- CIRCADIAN RHYTHM IN PHOTOSYNTHESIS IN THE MARINE ALGAE GONYAULAX AND ACETABULARIA ...Acetabularia, Autotrophic, Control and Regulation, Gonyaulax, Kinetics, ...5.0685
- LIGHT RECEPTOR CONTROL OF THE DIURNAL RHYTHM OF ENZYME SYNTHESIS IN THE BIOLUMINESCENT MARINE DINOFLAGELLATE GONYAULAX POLYEDRA ...Biosynthesis, Control and Regulation, Gonyaulax, Photoreception, Plant Enzymes, ...5.0760

### Bioluminescence

- EXCITED STATES MECHANISMS IN PHOTOBIOLOGY ...Chemiluminescence, Energy Conversion, Photochemical-other, Polypeptides, ...4.0162
- MECHANISM STUDIES ON BIOLUMINESCENT REACTIONS WITH EMPHASIS ON ENERGY TRANSFER PROBLEMS ...Energy Conversion, Luciferase, Luciferin, ...1.0164
- BIOLUMINESCENCE ...Autotrophic, Bays, Jamaica, Phytoplankton, Responses to Growth, ...1.0165
- MID-DEPTH BIOLUMINESCENCE ...Crustacea -non-specific, Vertical Distribution, ...1.0162
- CHEMISTRY AND ENZYMOLOGY OF BIOLUMINESCENCE ...Anthozoa, Earthworms, Kinetics -other, Luminous Bacteria, Species, ...5.0962
- BIOLOGICAL ASPECTS OF MIDWATER SOUND SCATTERING ...Atlantic Ocean-north, Fish -non-specific, Range Or Territorial Distr. , Scattering, Sound Production, Vertical Distribution, ...1.0054
- USEFUL BIOMEDICAL MATERIALS DERIVED FROM THE SEA - AN INTERDISCIPLINARY APPROACH ...Antibody Formation, Immunology, Molc. struct. (gen. & Other), ...6.0106
- FACTORS INFLUENCING THE INTENSITY OF BIOLUMINESCENCE ...Cell. env.(non-specific & Ot.), Kinetics, Marine Biology, Optical, Trace Elements, ...1.0169
- BIOCHEMISTRY OF MARINE ORGANISMS ...Adsorption & Interface, Fouling, Phytoplankton, Plant Succession, Spectroscopy, ...5.0766
- PHOTOBIOLOGY OF MARINE ANIMALS ...Fish -non-specific, Vertebrate Anatomy, Visual, Visual Organs, ...5.0327

### Cell Injury and Autolysis

- FREEZING AND DRYING OF LIVING CELLS ...Animal Nematodes -non-specific, Cell. env.(non-specific & Ot.), Freeze-dry Techniques, Mollusks -non-specific & Other, Tissue Techniques, ...5.0450
- AGING IN HYDROIDS ...Aging, Developmental Physiology, Environmental Physiology, Hydra, Portuguese Man-of-war, Senescence, ...5.0597
- DETERMINATION OF CHLOROPHYLL DERIVATIVES ...Catabolism and Degradation, Fluorometry, Marine Plants, Phytoplankton, ...5.0770
- SURVIVAL MECHANISM OF IRRADIATED BACTERIA IN FOODS ...Achromobacter Sp, Antibiotics, Fish -non-specific, Mutagens, Radiation, ...6.0069
- PROTEIN SYNTHESIS DURING THE EARLY DEVELOPMENT OF THE SEA URCHIN EMBRYO ...Basic Embryology, Proteins, Radiation Effects-non-specific, Ribosomes, Sea Urchins & Other Echinoderm, ...5.0537
- TISSUE CULTURE - VIROLOGY ...Animal Viruses (non-specific), Bacteria (non-specific), Marine Biology, Monolayer Culture, Oysters, Tissues, ...5.0978
- SUBCELLULAR REACTION TO INJURY IN THE KIDNEY ...Cellular Membranes (non-spec.), Electron Microscopy, Kidney, Structural Functions, Toads, ...5.0297
- SURVIVAL MECHANISM OF IRRADIATED MICROORGANISMS IN FOOD ...Antibiotics, Preservatives, Radiation, Radiation Protectors, Salmonella (non-specific & Ot.), ...6.0070

### Development and Propagation

- STUDIES IN MICRONEUROPHYSIOLOGY ...Barnacles, Brain, Contraction and Relaxation, Gastropods -slugs, conch, snails, Musculoskeletal System, ...5.0362
- EXCITATION-CONTRACTION COUPLING IN MUSCLE ...Contraction and Relaxation, Crabs, Lobsters, Musculoskeletal System, Plasma Membrane. ...5.0438

### Environment

#### Cell. env.(non-specific & Ot.)

- FREEZING AND DRYING OF LIVING CELLS ...Animal Nematodes -non-specific, Cell Injury and Autolysis, Freeze-dry Techniques, Mollusks -non-specific & Other, Tissue Techniques, ...5.0450
- FACTORS INFLUENCING THE INTENSITY OF BIOLUMINESCENCE ...Bioluminescence, Kinetics, Marine Biology, Optical, Trace Elements, ...1.0169
- MARINE BACTERIAL ENZYMES ...Growth (non-specific & Ot.), Isolation From Nat. environ. , Marine Bacteria, Plant Distr. (non-specific), Proteolytic Enzymes, ...5.0824

## SUBJECT INDEX

## Cellular Physiology

SURVIVAL OF FOOD PATHOGENS IN RADIATION PASTEURIZATION SEAFOOD ...Cobalt, Crabs, Food Bacteria, Radiation, Radiation Sensitivity-, ...6.0063

### Ionic Effect

MICROBIAL CORROSION AND DETERIORATION OF NAVAL MATERIALS ...Biological, Classification Or Taxonomy, Fouling, Marine Bacteria, Materials Used Undersea, ...8.0203

COMPARATIVE PHYSIOLOGY OF BAROPHILIC BACTERIA ...Isolation From Nat. environ. , Marine Bacteria, Nutrition, Pressure & Mech Stress, Temperature, ...5.0751

MACROMOLECULAR BASIS FOR ADAPTATION TO SALINITY CHANGES IN PRYMNESIUM PARVUM ...Adaptation, Growth Rate, Permeability, Prymnesium, Water Salinity, ...5.1012

CELLULAR DIFFERENTIATION ...Active Transport, Basic Embryology, Differentiation Mechanism, Frogs, Skin Or Special Derivatives, ...5.0618

### Light

RELATIONSHIP OF PHOTOSYNTHESIS TO RESPIRATION OF OCEANIC MICROALGAE ...Marine Plants, Mass Spectroscopy, Oxygen, Photosynthesis, Respiration, ...5.0774

ENVIRONMENTAL EFFECTS ON THE METABOLISM OF MARINE ALGAE ...Enzymes, Glycolic Acid, Laminariaceae (non-specific & Ot.), Marine Plants, Phytoplankton, Responses to Growth, ...5.0702

LIGHT REQUIREMENTS FOR MARINE ALGAE ...Algae-General, Algal Culture, Autotrophic, Marine Plants, Pigments, ...5.0703

### Temperature

HYDROSTATIC PRESSURE-TEMPERATURE, AS ENVIRONMENTAL PARAMETERS, ON GROWTH, BIOCHEMISTRY AND PHYSIOLOGY OF MICROORGANISMS ...Growth (non-specific & Ot.), Marine Biology (non-specific), Microorganisms (non-specific), Pressure & Mech Stress, ...5.0821

COMPARATIVE PHYSIOLOGY OF BAROPHILIC BACTERIA ...Ionic Effect, Isolation From Nat. environ. , Marine Bacteria, Nutrition, Pressure & Mech Stress, ...5.0751

CARBON ISOTOPE GEOTHERMOMETRY ...Carbon, Carbonaceous Substance, Chemistry, Core Analysis, Geologic Thermometry, Paleotemperature, Plankton (non-specific), ...7.0079

LOW TEMPERATURE GROWTH OF BACTERIA ON FOODS ...Cryophilic Bacteria, Fish -non-specific, Growth (non-specific & Ot.), Isoenzymes, Microbiological, Refrigeration, ...6.0086

## Growth and Differentiation

### Cell Cycle

CELL DIVISION, BIOENERGETICS, CHEMISTRY OF MUSCLE ...Bioenergetics, Configuration, Glyoxal, Organic, ...5.0987

BIOLOGY-MIDDLE EAST WATERS ...Marine Biology (non-specific), Middle-east-general, Phenology, Red Sea, Reproductive System, Synchronization, ...5.0929

BIOSYNTHETIC PROCESSES DURING DEVELOPMENT OF SEA URCHIN EGGS ...Basic Embryology, Messenger RNA , Nucleic Acids, Proteins, Sea Urchins & Other Echinoderm, ...5.0775

MOLECULAR ASPECTS OF CELLULAR DIFFERENTIATION AND DIVISION ...Basic Embryology, Biosynthesis, Differentiation Mechanism, Proteins, Replication, Sea Urchins & Other Echinoderm, ...5.0985

MECHANISMS OF CYTOKINESIS IN ANIMAL CELLS ...Basic Embryology, ...5.1008

BIOLOGY AND PALEONTOLOGY OF MARINE DINOFLAGELLATES AND HYSTRICHOSPHERES ...Algae-Dinoflagellates, Algal Culture, Plant Developmental Biology, Range Or Territorial Distr. , Spores, Vertical Distribution, ...5.0799

ULTRASTRUCTURAL STUDIES OF PARASITIC AND SAPROPHYTIC FUNGI AND PROTOZOA ASSOCIATED WITH MARINE INVERTEBRATES ...Electron Microscopy, Host-parasite Interactions, Myxomycetes, Protozoa, ...5.0839

ULTRASTRUCTURE OF EARLY CLEAVAGE STAGES IN THE EGG OF LYMNAEA SP ...Basic Embryology, Electron Microscopy, Gastropods -slugs, conch, snails, Invertebrate Anatomy, Microtubules, ...5.0509

CELL DIVISION AND MITOTIC APPARATUS PROTEINS ...Biosynthesis, Cell Center & Mitot. apparatus, Centrioles, Proteins, Sea Urchins & Other Echinoderm, ...5.0666

STRUCTURAL ANALYSIS OF CELL DIVISION ...Basic Embryology, Histochemistry - Cytochem, Nucleolus, Nucleus (non-specific & Ot.), Sea Urchins & Other Echinoderm, ...5.0645

CELL TRANSFORMATIONS, DIVISION, AND MOTION ...Ameboid Movement, Basic Embryology, Microtubules, Nucleic Acids, ...5.0234

STUDIES ON THE DEVELOPMENT OF DERMOCYSTIDIUM MARINUM ...Control and Prevention, Dermocystidium, Fungal Culture, Oysters, Pathology, ...5.0836

### Differentiation Mechanism

IONOCYTE FORMATION IN GILL EPITHELIUM OF FISHES ...Biosynthesis, Developmental Physiology, Fish, Fish -non-specific, Osmoregulation, ...5.0301

MOLECULAR ASPECTS OF CELLULAR DIFFERENTIATION AND DIVISION ...Basic Embryology, Biosynthesis, Cell Cycle, Proteins, Replication, Sea Urchins & Other Echinoderm, ...5.0985

STUDIES ON GAMETOGENESIS IN HYDROMEDUSAE ...Basic Embryology, Developmental Physiology, Hydra, Portuguese Man-of-war, Regeneration and Wound, Reproductive System, Testosterone, ...5.1040

PRELIMINARY INVESTIGATION OF GROWTH AND DIFFERENTIATION IN MARINE COENOCYtic ALGA, CAULERPA PROLIFERA ...Caulerpa, Growth and Differentiation, Growth Rate, Plant Developmental Biology, ...5.0711

STRUCTURE AND FUNCTION OF CELL ORGANELLES DURING GROWTH AND DEVELOPMENT ...Acrosomes, Basic Embryology, Nucleolus, Ribosomes, ...5.0935

DEVELOPMENT OF POLARITY IN THE FUCACEAN ZYGOTE ...Cellular Physiology, Fucus, Plant Developmental Biology, Polarity, Reproductive Physiology, ...5.0972

MOLECULAR STUDIES OF DIFFERENTIATING CELLS ...Basic Embryology, Biosynthesis, ...5.0984

RNA SYNTHESIS DURING SEA URCHIN DEVELOPMENT ...Basic Embryology, Metabolic-biochemical Genetics, Mitochondria, Replication, Sea Urchins & Other Echinoderm, ...5.0611

BIOCHEMISTRY OF DEVELOPMENT ...Basic Embryology, Control and Regulation, Messenger RNA , Sea Urchins & Other Echinoderm, Tryptophan Oxidase, ...5.0994

INDUCTION AND CONTROL OF DIFFERENTIATION IN ALGAE ...Control and Regulation, Nutrition Studies, Photoperiodism, Plant Developmental Biology, Rhodophyta (non-specific & Ot.), ...5.0708

CONTINUED STUDIES ON THE INFLUENCE OF THE EGG CORTEX ON THE DEVELOPMENT OF THE MOLLUSCAN EMBRYO ...Basic Embryology, Gastropods -slugs, conch, snails, Octopus, Squid, Cuttlefish... , Plasma Membrane, Surface Properties -other, ...5.0423

ULTRASTRUCTURE OF VARIOUS MARINE AND BRACKISH WATER ORGANISMS ...Developmental Biology - Animal, Electron Microscopy, Marine Biology (non-specific), Plant Developmental Biology, ...5.0640

CILIA DIFFERENTIATION IN THE SEA URCHIN EMBRYO ...Basic Embryology, Cilia and Flagella, Proteins, Sea Urchins & Other Echinoderm, Subunits, ...5.0616

ISOLATION AND FUNCTION OF OVARIAN EXTRACTS CAPABLE OF INDUCING COCYTE SHEDDING AND OCYTE NUCLEAR MATURATION IN STARFISH ...Female, Hormones, Nucleic Acids, Reproductive System, Starfishes, ...5.0620

STATOLITH DIFFERENTIATION IN AURELIA (JELLYFISH) ...Calcium, Developmental Physiology, Jelly Fish, Proprioceptors, ...5.0598

STRUCTURAL AND FUNCTIONAL ORGANELLE INTERACTIONS ...Marine Plants, Organelle & Membrane Formation, Plant Developmental Biology, Structural Functions, Tissue Techniques, ...5.0689

CELLULAR DIFFERENTIATION ...Active Transport, Basic Embryology, Frogs, Ionic Effect, Skin Or Special Derivatives, ...5.0618

CEPHALOPOD LENS DEVELOPMENT ...Basic Embryology, Lens Proteins, Microtubules, Octopus, Squid, Cuttlefish... , Visual Organs, ...5.0424

THERMAL DESTRUCTION OF TYPE E CLOSTRIDIUM BOTULINUM ...Clostridium Botulinum, Food (epidemiology), Heat Resistance, Microbiological, Spore Studies, ...6.0006

### Elongation of Cell

GROWTH AND CELLULAR MORPHOGENESIS IN NITELLA ...Growth and Differentiation, Manometers, Nitella, Plant Developmental Biology, Water Movement, ...5.0721

**Growth (non-specific & Ot.)**

HYDROSTATIC PRESSURE-TEMPERATURE, AS ENVIRONMENTAL PARAMETERS, ON GROWTH, BIOCHEMISTRY AND PHYSIOLOGY OF MICROORGANISMS ...Marine Biology (non-specific), Microorganisms (non-specific), Pressure & Mech Stress, Temperature, ...5.0821

CYTOPLASMIC FILAMENTS AND CELL MOVEMENT IN DEVELOPMENT ...Basic Embryology, Fibrils and Filaments, Motility and Migration, Proteins, Sea Squirts - Tunicates, ...5.1037

STUDIES ON MICROBIAL SULFATE REDUCTION AND SULFIDE OXIDATION IN MARINE ENVIRONMENTS ...Carbohydrates, Classification Or Taxonomy, Isolation From Nat. environ., Respiration, Sulfur Bacteria, ...5.0797

MARINE BACTERIAL ENZYMES ...Cell. env.(non-specific & Ot.), Isolation From Nat. environ., Marine Bacteria, Plant Distr. (non-specific), Proteolytic Enzymes, ...5.0824

GROWTH AND TOXICOGENESIS OF *C. BOTULINUM* IN FISHERY PRODUCTS ...Antimetabolites -non-specific, Bacterial Exotoxins, Clostridium Botulinum, Fish -non-specific, Medical Studies, Microbiological, ...6.0043

STANDING STOCK AND GROWTH OF BACTERIA IN THE SEA ...Atp X Adenosine Triphosphate, Carbohydrates, Marine Biology, Phytoplankton, Standing Crops, ...5.0749

LOW TEMPERATURE GROWTH OF BACTERIA ON FOODS ...Cryophilic Bacteria, Fish -non-specific, Isoenzymes, Microbiological, Refrigeration, Temperature, ...6.0086

**Growth Rate**

MICROBIAL ACTIVITY IN NON AQUEOUS SYSTEMS ...Range Or Territorial Distr., ...5.0782

PALEOBOTANICAL RESEARCH AT YALE UNIVERSITY ...Isolation From Nat. environ., Marine Bacteria, Plant Succession, Plants, Sulfur Bacteria, ...5.0952

MACROMOLECULAR BASIS FOR ADAPTATION TO SALINITY CHANGES IN *PRYMNESIUM PARVUM* ...Adaptation, Ionic Effect, Permeability, Prymnesium, Water Salinity, ...5.1012

MICROBIAL TRANSFORMATIONS IN SEA WATER ...Chemostat, Isolation From Nat. environ., Marine Bacteria, Nutrition, Organics, ...5.0796

STUDIES OF THE EFFECTS OF NUTRIENTS ON THE GROWTH OF PHYTOPLANKTON IN THE TROPICAL PACIFIC OCEAN ...Algal Culture, Nutrition, Pacific Ocean-general, Phytoplankton, Tropic, ...5.0948

PRELIMINARY INVESTIGATION OF GROWTH AND DIFFERENTIATION IN MARINE COENOCYtic ALGA, *CAULERPA PROLIFERA* ...Caulerpa, Differentiation Mechanism, Growth and Differentiation, Plant Developmental Biology, ...5.0711

MEASUREMENT OF THE RATE OF CARBON DIOXIDE (<sup>14</sup>C) FIXATION INTO SUBCELLULAR FRACTIONS OF ALGAE ...Algae- General, Algal Culture, Bioindicators, Carbon, Carbon Dioxide Fixation, Intracellular Localization, ...5.0728

**Polarity**

DEVELOPMENT OF POLARITY IN THE FUCACEAN ZYGOTE ...Cellular Physiology, Differentiation Mechanism, Fucus, Plant Developmental Biology, Reproductive Physiology, ...5.0972

**Repression**

BOTULINUM FOOD POISONING IN RELATION TO FISHERY PRODUCTS ...Antibiotics, Clostridium Botulinum, Fish -non-specific, Great Lakes-general, Microbiological, ...6.0087

VITAMIN K5 AS A FOOD PRESERVATIVE ...Food Bacteria, Food Processing -other, Microbiological, Vitamin K, ...6.0075

ECOLOGY OF CLOSTRIDIUM BOTULINUM TYPE E IN GREEN BAY ...Fish -non-specific, Great Lakes-general, Microbiological, ...5.0850

**Senescence**

AGING IN HYDROIDS ...Aging, Cell Injury and Autolysis, Developmental Physiology, Environmental Physiology, Hydra, Portuguese Man-of-war, ...5.0597

**Synchronization**

BIOLOGY-MIDDLE EAST WATERS ...Cell Cycle, Marine Biology (non-specific), Middle-east-general, Phenology, Red Sea, Reproductive System, ...5.0929

**Intracellular Localization**

MORPHOGENESIS OF THE DIATOM SHELL ...Algae-Diatoms, Cellular Membranes (non-spec.), Organelle & Membrane Formation, Plant Developmental Biology, Silica, ...5.0712

MEASUREMENT OF THE RATE OF CARBON DIOXIDE (<sup>14</sup>C) FIXATION INTO SUBCELLULAR FRACTIONS OF ALGAE ...Algae- General, Algal Culture, Bioindicators, Carbon, Carbon Dioxide Fixation, Growth Rate, ...5.0728

**Membrane Permeability & Exch.****Active Transport**

UPTAKE AND ASSIMILATION OF ORGANIC COMPOUNDS IN MARINE ORGANISMS ...Invertebrates -non-specific, Metabolism, Nutrition, Organics, Productivity - Food Chain, ...5.0937

WATER AND SALT REGULATION IN NEREID POLYCHAETES ...Comparative Physiology, Lugworms, Marine Segmentedworm, Osmoregulation, Salt, ...5.0648

INTESTINAL ADSORPTION AND TRANSPORT OF NUTRIENTS IN ECHINODERANS ...Cellular Or Intracellular, Echinodermata -other, Intestine, Metabolism, Sodium, ...5.0619

PHYSALIA TOXIN AND THE ACTIVITY OF BIOLOGICAL MEMBRANES ...Animal Toxins, Cellular Membranes (non-spec.), Jelly Fish, Toxicology, ...6.0107

ULTRASTRUCTURE OF CELL ION TRANSPORT MECHANISMS ...Electron Microscopy, Mitochondrial Membranes, Nutrition and Metabolism, Osmoregulation, Respiratory System, ...5.0974

REGULATION OF IONIC CONSTITUENTS OF PROTOPLASM ...Dermal, Ions (inorganic), Musculoskeletal System, Nervous System, Osmoregulation, ...5.0970

CELLULAR DIFFERENTIATION ...Basic Embryology, Differentiation Mechanism, Frogs, Ionic Effect, Skin Or Special Derivatives, ...5.0618

BIOLOGICAL TRANSPORT OF GASES AND OTHER SUBSTANCES ...Carbon Dioxide, Carbonic Anhydrase, Fish, Gases, Kidney and Urinary System, ...5.0240

ION TRANSPORT MECHANISM IN GIANT AXON ...Atpase, Cell Free Metabolism, Nervous System, Octopus, Squid, Cuttlefish... , Plasma Membrane, ...5.0369

**Gases**

BIOLOGICAL TRANSPORT OF GASES AND OTHER SUBSTANCES ...Active Transport, Carbon Dioxide, Carbonic Anhydrase, Fish, Kidney and Urinary System, ...5.0240

**Permeability**

MACROMOLECULAR BASIS FOR ADAPTATION TO SALINITY CHANGES IN *PRYMNESIUM PARVUM* ...Adaptation, Growth Rate, Ionic Effect, Prymnesium, Water Salinity, ...5.1012

IONIC PERMEABILITIES OF THE SQUID GIANT AXON. - EFFECTS OF CHEMICAL AGENTS ...Cellular Physiology, Microelectrodes, Nervous System, Octopus, Squid, Cuttlefish... , ...5.0979

RESEARCH STUDIES IN MOLECULAR PHARMACOLOGY ...Anesthetic, Bonding and Binding, Diving and Scuba, Mechanism of Action, Thermodynamics, ...6.0100

**Water Movement**

GROWTH AND CELLULAR MORPHOGENESIS IN NITELLA ...Elongation of Cell, Growth and Differentiation, Manometers, Nitella, Plant Developmental Biology, ...5.0721

**Metabolism (intracellular)**

PHYSIOLOGICAL CHARACTERIZATION OF CERTAIN MARINE BACTERIA ...Bact. morphology (general), Bacterial Culture, Biology, Isolation From Nat. environ., Marine Bacteria, Tissue Techniques, ...5.0784

ELUCIDATION OF THE METABOLIC PATHWAYS OF MARINE PLANKTONIC ORGANISMS ...Marine Biology (non-specific), Organelle-enzyme Assn, Plankton (non-specific), Purification & Isolate, Reaction Rates, ...5.0828

NITROGEN METABOLISM IN MOLLUSCS ...Biochemical, Evolutionary Studies-general, Gastropods -slugs, conch, snails, Metabolism, Nitrogen, ...5.0506

## SUBJECT INDEX

## Cellular Physiology

### Amino Acids

UPTAKE OF ORGANIC COMPOUNDS BY MARINE INVERTEBRATES ...Amino Acids -non-specific, Chemoreceptors, Invertebrate Nutrition, Invertebrates -non-specific, Marine Biology, Metabolism, Pulse-labelling, ...5.0938

### Autotrophic

BIOLUMINESCENCE ...Bays, Bioluminescence, Jamaica, Phytoplankton, Responses to Growth, ...1.0165

CIRCADIAN RHYTHM IN PHOTOSYNTHESIS IN THE MARINE ALGAE GONYAULAX AND ACETABULARIA ...Acetabularia, Biological Rhythms, Control and Regulation, Gonyaulax, Kinetics, ...5.0685

PHOTOBIOLOGICAL STUDIES ON MARINE CHRYSOMONADS ...Coccoliths, Elect Trans and Redox, Photochemistry, Photosynthetically Active, ...5.0932

METABOLISM OF COMPLETE WATER COLUMNS ...Antarctic Ocean, Energy Budgets, Metabolism, Respiration, ...5.0967

LIGHT REQUIREMENTS FOR MARINE ALGAE ...Algae-General, Algal Culture, Light, Marine Plants, Pigments, ...5.0703

THE ROLE OF SULFUR BACTERIA IN CORROSION AND DETERIORATION ...Biological, Fouling, Marine Bacteria, Plasma Membrane, Sulfur Bacteria, ...5.0805

OXYGEN RESOURCES OF TIDAL WATERS ...Marine Biology (non-specific), Oxygen, Oxygen Content -water, Pollution Sources-general, Tides, ...1.0119

NITRIFICATION BY MARINE MICROORGANISMS ...Bact. morphology (general), Bacterial Culture, Isolation From Nat. environ., Marine Bacteria, Nitrogen Bacteria, Range Or Territorial Distr., ...5.0800

### Bioenergetics

CELL DIVISION, BIOENERGETICS, CHEMISTRY OF MUSCLE ...Cell Cycle, Configuration, Glyoxal, Organic, ...5.0987

STUDIES OF THE AEROCOCCUS-PEDIOCOCCUS BACTERIA ...Classification Or Taxonomy, Composition of Macromolecules, Detection, Pediococcus, ...5.0817

### Biosynthesis

IONOCYTE FORMATION IN GILL EPITHELIUM OF FISHES ...Developmental Physiology, Differentiation Mechanism, Fish, Fish -non-specific, Osmoregulation, ...5.0301

MOLECULAR ASPECTS OF CELLULAR DIFFERENTIATION AND DIVISION ...Basic Embryology, Cell Cycle, Differentiation Mechanism, Proteins, Replication, Sea Urchins & Other Echinoderm, ...5.0985

MACROMOLECULAR EVENTS OF FERTILIZATION AND EARLY EMBRYONIC DEVELOPMENT ...Basic Embryology, Reproductive System, Ribosomes, Sea Urchins & Other Echinoderm, ...5.1011

GROWTH AND DIFFERENTIATION OF PLASTIDS ...Acetabularia, Cytoplasmic Inheritance, DNA Other, Nucleus (non-specific & Ot.), Organelle Culture, Photosynthetically Active, ...5.0683

AN EXPERIMENTAL APPROACH TO THE GENETIC CONTROL OF MORPHOGENESIS IN ECHINODERMS ...Developmental Physiology, Disease & Anomalies, Sea Urchins & Other Echinoderm, ...5.0608

MOLECULAR STUDIES OF DIFFERENTIATING CELLS ...Basic Embryology, Differentiation Mechanism, ...5.0984

LIGHT RECEPTOR CONTROL OF THE DIURNAL RHYTHM OF ENZYME SYNTHESIS IN THE BIOLUMINESCENT MARINE DINOFLAGELLATE GONYAULAX POLYEDRA ...Biological Rhythms, Control and Regulation, Gonyaulax, Photoreception, Plant Enzymes, ...5.0760

CELL DIVISION AND MITOTIC APPARATUS PROTEINS ...Cell Center & Mitot. apparatus, Cell Cycle, Centrioles, Proteins, Sea Urchins & Other Echinoderm, ...5.0666

FORMATION AND UTILIZATION OF TERPENES ...Anthozoa, Enzyme-substrate, Symbiosis, Terpenes, Zooxanthella, ...5.0957

PROTEIN SYNTHESIS ACTIVATION IN SEA URCHIN EGGS ...Basic Embryology, Metabolism, Proteins, Reproductive System, Sea Urchins & Other Echinoderm, ...5.0543

AN ANALYSIS OF DEVELOPMENT IN ARTEMIA SALINA EMBRYOS ...Basic Embryology, Nucleic Acids, Proteins, Ribosomes, Shrimps - Brine Or Fairy, ...5.0406

BIOSYNTHESIS OF 3-HYDROXYTYRAMINE IN MONOSTROMA FUSCUM ...Chlorophyceae (non-specif.&ot), Dopa Decarboxylase, Marine Plants, Tyramine, Tyrosinase, ...5.0720

STUDY OF TOXIN SYNTHESIS IN PRYMNESIUM PARVUM ...Algal Toxins, Axenic Culture, Gonyaulax, Gymnodinium, Prymnesium, ...6.0124

### Carbohydrates

STUDIES ON MICROBIAL SULFATE REDUCTION AND SULFIDE OXIDATION IN MARINE ENVIRONMENTS ...Classification Or Taxonomy, Growth (non-specific & Ot.), Isolation From Nat. environ., Respiration, Sulfur Bacteria, ...5.0797

STANDING STOCK AND GROWTH OF BACTERIA IN THE SEA ...Atp X Adenosine Triphosphate, Growth (non-specific & Ot.), Marine Biology, Phytoplankton, Standing Crops, ...5.0749

### Carbon Dioxide Fixation

CARBON DIOXIDE FIXATION IN HETEROTROPHIC ORGANISMS III THE BREAKDOWN OF GLYCOGEN IN MARINE INVERTEBRATES ...Alanine, Catabolism and Degradation, Glycogen, Metabolism, Oxygen, ...5.1033

MEASUREMENT OF THE RATE OF CARBON DIOXIDE (C14) FIXATION INTO SUBCELLULAR FRACTIONS OF ALGAE ...Algae-General, Algal Culture, Bioindicators, Carbon, Growth Rate, Intracellular Localization, ...5.0728

### Catabolism and Degradation

MICROBIOLOGICAL INVESTIGATIONS OF THRESHOLD PANELS ...Degradation, Freshwater Mussels, Scallops, Marine Bacteria, Marine Fungi (non-specific), Wood, Wood Preservatives-non-specif., ...8.0243

CAROTENOIDS, CAROTENOID CHROMOPROTEINS, AND ASSOCIATED LIPIDS IN ANIMALS ...Carotenoid Pigments, Metabolism, Pigments - Animal-non-specific, ...5.0944

DETERMINATION OF CHLOROPHYLL DERIVATIVES ...Cell Injury and Autolysis, Fluorometry, Marine Plants, Phytoplankton, ...5.0770

CARBON DIOXIDE FIXATION IN HETEROTROPHIC ORGANISMS III THE BREAKDOWN OF GLYCOGEN IN MARINE INVERTEBRATES ...Alanine, Carbon Dioxide Fixation, Glycogen, Metabolism, Oxygen, ...5.1033

ORGANIC DEBRIS ON CONNECTICUT BEACHES AND SHORES ...Connecticut, Identification, Organic Matter, Physical-general, Shoreline - Coastline, ...6.0143

### Cell Free Metabolism

ION TRANSPORT MECHANISM IN GIANT AXON ...Active Transport, Atpase, Nervous System, Octopus, Squid, Cuttlefish..., Plasma Membrane, ...5.0369

### Control and Regulation

CIRCADIAN RHYTHM IN PHOTOSYNTHESIS IN THE MARINE ALGAE GONYAULAX AND ACETABULARIA ...Acetabularia, Autotrophic, Biological Rhythms, Gonyaulax, Kinetics, ...5.0685

MOLECULAR MECHANISMS IN BIOLOGICAL CLOCKS ...Gonyaulax, Marine Plants, ...5.0983

BIOCHEMISTRY OF DEVELOPMENT ...Basic Embryology, Differentiation Mechanism, Messenger RNA, Sea Urchins & Other Echinoderm, Tryptophan Oxidase, ...5.0994

INDUCTION AND CONTROL OF DIFFERENTIATION IN ALGAE ...Differentiation Mechanism, Nutrition Studies, Photoperiodism, Plant Developmental Biology, Rhodophyta (non-specific & Ot.), ...5.0708

DEGRADATION OF MARINE SURFACES BY SALT REQUIRING BACTERIA ...Dna-satellite, Fouling, Halophilic Bacteria, Isolation From Nat. environ., Metabolic-biochemical Genetics, ...5.0818

LIGHT RECEPTOR CONTROL OF THE DIURNAL RHYTHM OF ENZYME SYNTHESIS IN THE BIOLUMINESCENT MARINE DINOFLAGELLATE GONYAULAX POLYEDRA ...Biological Rhythms, Biosynthesis, Gonyaulax, Photoreception, Plant Enzymes, ...5.0760

### Ions (inorganic)

MARINE SULFUR OXIDIZING BACTERIA ...Habitat Studies, Isolation From Nat. environ., Marine Bacteria, Range Or Territorial Distr., Thiobacillus, ...5.0758

REGULATION OF IONIC CONSTITUTENTS OF PROTOPLASM ...Active Transport, Dermal, Musculoskeletal System, Nervous System, Osmoregulation, ...5.0970

### Lipids

LIPID COMPOSITION OF ANTARCTIC MARINE ORGANISMS AND SEA WATER ...Antarctic Ocean, Fish -non-specific, Gulf of Mexico, Low Temp. -but Above 32f, Phytoplankton, Productivity - Food Chain, Zooplankton, ...5.1031

## Cellular Physiology

## SUBJECT INDEX

LIPASE RESISTANT GLYCERIDES ...Fats, Fats and Oils -other, Fish eother, Unsaturated Fats, ...5.1029

### Nitrogen Fixation

DYNAMICS OF THE NITROGEN CYCLE IN THE SEA ...General Sea Water Chemistry, Nitrate, Nitrite, Nitrogen, Tracers, ...5.0933

### Nucleic Acids

BIOSYNTHETIC PROCESSES DURING DEVELOPMENT OF SEA URCHIN EGGS ...Basic Embryology, Cell Cycle, Messenger RNA, Proteins, Sea Urchins & Other Echinoderm, ...5.0775

ISOLATION AND FUNCTION OF OVARIAN EXTRACTS CAPABLE OF INDUCING OOCYTE SHEDDING AND OOCYTE NUCLEAR MATURATION IN STARFISH ...Differentiation Mechanism, Female, Hormones, Reproductive System, Starfishes, ...5.0620

CELL TRANSFORMATIONS, DIVISION, AND MOTION ...Ameboid Movement, Basic Embryology, Cell Cycle, Microtubules, ...5.0234

AN ANALYSIS OF DEVELOPMENT IN ARTEMIA SALINA EMBRYOS ...Basic Embryology, Biosynthesis, Proteins, Ribosomes, Shrimps - Brine Or Fairy, ...5.0406

### Nutrition

UPTAKE AND ASSIMILATION OF ORGANIC COMPOUNDS IN MARINE ORGANISMS ...Active Transport, Invertebrates - non-specific, Metabolism, Organics, Productivity - Food Chain, ...5.0937

COMPARATIVE PHYSIOLOGY OF BAROPHILIC BACTERIA ...Ionic Effect, Isolation From Nat. environ., Marine Bacteria, Pressure & Mech Stress, Temperature, ...5.0751

MICROBIAL TRANSFORMATIONS IN SEA WATER ...Chemostat, Growth Rate, Isolation From Nat. environ., Marine Bacteria, Organics, ...5.0796

STUDIES OF THE EFFECTS OF NUTRIENTS ON THE GROWTH OF PHYTOPLANKTON IN THE TROPICAL PAC. OCEAN ...Algal Culture, Growth Rate, Pacific Ocean-general, Phytoplankton, Tropic, ...5.0948

### Pigments

LIGHT REQUIREMENTS FOR MARINE ALGAE ...Algae-General, Algal Culture, Autotrophic, Light, Marine Plants, ...5.0703

### Proteins

BIOLOGICAL PRODUCTIVITY IN THE SARGASSO SEA, THE GULF STREAM AND IN THE ATLANTIC COASTAL WATERS OFF CAPE HATTERAS ...Continental Shelf, Phytoplankton, Primary Productivity, Productivity - Food Chain, ...5.1005

BIOSYNTHETIC PROCESSES DURING DEVELOPMENT OF SEA URCHIN EGGS ...Basic Embryology, Cell Cycle, Messenger RNA, Nucleic Acids, Sea Urchins & Other Echinoderm, ...5.0775

MOLECULAR ASPECTS OF CELLULAR DIFFERENTIATION AND DIVISION ...Basic Embryology, Biosynthesis, Cell Cycle, Differentiation Mechanism, Replication, Sea Urchins & Other Echinoderm, ...5.0985

CYTOPLASMIC FILAMENTS AND CELL MOVEMENT IN DEVELOPMENT ...Basic Embryology, Fibrils and Filaments, Growth (non-specific & Ot.), Motility and Migration, Sea Squirts - Tunicates, ...5.1037

CILIA DIFFERENTIATION IN THE SEA URCHIN EMBRYO ...Basic Embryology, Cilia and Flagella, Differentiation Mechanism, Sea Urchins & Other Echinoderm, Subunits, ...5.0616

PROTEIN SYNTHESIS DURING THE EARLY DEVELOPMENT OF THE SEA URCHIN EMBRYO ...Basic Embryology, Cell Injury and Autolysis, Radiation Effects-non-specific, Ribosomes, Sea Urchins & Other Echinoderm, ...5.0537

CELL DIVISION AND MITOTIC APPARATUS PROTEINS ...Biosynthesis, Cell Center & Mitot. apparatus, Cell Cycle, Centrioles, Sea Urchins & Other Echinoderm, ...5.0666

PROTEIN SYNTHESIS ACTIVATION IN SEA URCHIN EGGS ...Basic Embryology, Biosynthesis, Metabolism, Reproductive System, Sea Urchins & Other Echinoderm, ...5.0543

AN ANALYSIS OF DEVELOPMENT IN ARTEMIA SALINA EMBRYOS ...Basic Embryology, Biosynthesis, Nucleic Acids, Ribosomes, Shrimps - Brine Or Fairy, ...5.0406

### Respiration

STUDIES OF PROTEINS UNDER EXTREME ENVIRONMENTS ...Cellular Membranes (non-spec.), Cytochromes, Exobiology, Halobacteria, Salt, ...5.0941

STUDIES ON MICROBIAL SULFATE REDUCTION AND SULFIDE OXIDATION IN MARINE ENVIRONMENTS ...Carbohydrates, Classification Or Taxonomy, Growth (non-specific & Ot.), Isolation From Nat. environ., Sulfur Bacteria, ...5.0797

METABOLISM OF COMPLETE WATER COLUMNS ...Antarctic Ocean, Autotrophic, Energy Budgets, Metabolism, ...5.0967

RESEARCH ON THE ROLE OF BACTERIA IN THE OCEAN ...Denitrification, Elect Trans and Redox, Marine Bacteria, Microorganism Enzymes, Nitrogen Bacteria, ...5.0783

MICROBES AND CORROSION ...Cathodic Protection, Extracellular-enzymes, Fouling, Iron, Metals -non-specific, Microorganisms (non-specific), ...8.0228

### Structural Functions

CYTOLOGICAL CHARACTERISTIC ...Animal Taxonomy, Basic Embryology, Porifera, Speciation, ...5.0557

MORPHOGENESIS OF THE DIATOM SHELL ...Algae-Diatoms, Cellular Membranes (non-spec.), Plant Developmental Biology, Silica, ...5.0734

GAMETOGENESIS AND FERTILIZATION IN THE BLUE CRAB, CALLINECTES RAPIDUS RATHBUN, AND OTHER CRABS ...Crabs, Electron Microscopy, Histochemistry - Cytochem, Reproductive System, ...5.0478

METABOLISM OF NEUROHUMORAL TRANSMITTER SUBSTANCES IN MARINE ANIMALS ...Animal Toxins, Basic Studies, Mech of Transmission, Metabolic Inhibitors, ...5.0981

SUBCELLULAR REACTION TO INJURY IN THE KIDNEY ...Cell Injury and Autolysis, Cellular Membranes (non-spec.), Electron Microscopy, Kidney, Toads, ...5.0297

STRUCTURAL AND FUNCTIONAL ORGANELLE INTERACTIONS ...Differentiation Mechanism, Marine Plants, Organelle & Membrane Formation, Plant Developmental Biology, Tissue Techniques, ...5.0689

### Turnover (metabolic)

PRIMARY PRODUCTION AND DECOMPOSITION IN ESTUARINE WATER ...Estuaries, Florida, Methane Bacteria (non-specif.), Phaeophyta (non-specific & Ot), Primary Productivity, Rhodophyta (non-specific & Ot), ...5.0954

### Organelle & Membrane Formation

MORPHOGENESIS OF THE DIATOM SHELL ...Algae-Diatoms, Cellular Membranes (non-spec.), Intracellular Localization, Plant Developmental Biology, Silica, ...5.0713

STRUCTURAL AND FUNCTIONAL ORGANELLE INTERACTIONS ...Differentiation Mechanism, Marine Plants, Plant Developmental Biology, Structural Functions, Tissue Techniques, ...5.0689

### Surface Properties

#### Adhesion

CELL CONTACT IN RELATION TO GROWTH AND MORPHOGENESIS ...Basic Embryology, Cellular Membranes (non-spec.), Electron Microscopy, Porifera, ...5.0996

BIOCHEMICAL BASIS OF SPECIFIC CELL ASSOCIATION ...Basic Embryology, Chickens, Pacific Ocean-general, Porifera, ...5.0946

#### Adsorption & Interface

MECHANISMS OF ATTACHMENT OF MARINE BACTERIA TO SURFACES ...Biological, Corrosion Prevention-other, Fouling, Marine Bacteria, ...5.0810

BIOCHEMISTRY OF MARINE ORGANISMS ...Bioluminescence, Fouling, Phytoplankton, Plant Succession, Spectroscopy, ...5.0766

#### Surface Properties -other

CONTINUED STUDIES ON THE INFLUENCE OF THE EGG CORTEX ON THE DEVELOPMENT OF THE MOLLUSCAN EMBRYO ...Basic Embryology, Differentiation Mechanism, Gastropods -slugs,conch,snails, Octopus, Squid, Cuttlefish... , Plasma Membrane, ...5.0423

### Central America

CARIBBEAN GEOGRAPHY ...Beach, Caribbean Sea, Shore Features-general, Shoreline - Coastline, South America, ...7.0288

**Ceramics**

**Glass**

VISCOSITY AND VISCOELASTICITY OF LIQUIDS AND GLASSES ...Instrumental Services, Liquid, Morphology, State Variables - Pvt, Viscoelasticity, Viscosity, ...8.0260  
 STRENGTH OF GLASS ...Strength, Cohesion, Stress Rupture, Submersibles, ...8.0206  
 STRUCTURAL PLASTICS-DEEP SUBMERGENCE ...Design Data, Epoxies, Fiber, Filament, Materials Used Undersea, Plastic Matrix, ...8.0213

**Cesium**

STUDY OF THE DISTRIBUTION OF RADIONUCLIDES IN THE OCEAN DETAILED EXPLORATION OF CS137 IN THE OCEAN ...Chemical Analysis (water), Circulation-general, Convection, Pacific Ocean-north, Radioactivity, ...1.0080

**Channels**

HARBOR DESIGN STUDIES ...Harbors, Navigation, Waves, ...8.0046  
 SHOALING PROCESSES ...Sand Bars, Scouring, Sediment Transport-other, Tidewater Areas, Turbulent Flow, ...7.0250  
 UNSTEADY FLOW AND SALINE INTRUSION IN ESTUARIES ...Computer Applications, Model Studies, Morphology-general, Saline Water Intrusion, Unsteady Flow, ...2.0066  
 BAYOU LAFOURCHE SEDIMENTATION STUDY, LOUISIANA ...Bayous, Louisiana, Morphology-general, Rate of Deposition, Sediment Yield, ...9.0010

**Chemical & Physical Properties**

**Concentration**

**Other**

SEDIMENTARY GEOCHEMISTRY ...Authigenesis, Precipitation, Removal-inorganics, Water Chemistry-other, ...7.0190

**pH**

PH STANDARD REFERENCE MATERIALS FOR USE IN SEA WATER ...Salinity, Standards, Specifications, Water Analysis, Water Chemistry-other, ...1.0087

**Density**

HYDROGEN PROPERTIES ...Dielectric Properties, Fuel Cell-other, Hydrogen, Marine Propulsion, Refraction, ...8.0157  
 OXYGEN PROPERTIES ...Liquid Propellant Rock, Oxidizers, Oxygen, Specific Heat, State Equations, Thermodynamic Relation, ...8.0174

**Diffusion**

PHYSICAL CHEMISTRY OF BUBBLES ...Bubble, Interface, Particle-gas Transfer, Surface Energy, ...1.0082

**Electrical**

**Conductivity**

PROPERTIES OF SEA WATER ...Compressibility--gas-liq, Density, Electrical Expansion, Physical Analysis, Thermal, ...1.0153  
 EFFECT OF PRESSURE ON CONDUCTIVITY OF SOLUTIONS ...Electrolytes, Pressure, Solution, Sulfate, Sulfite, Ultrasonic Spectroscopy, ...1.0079

**Electrochemical**

**Dielectric Properties**

HYDROGEN PROPERTIES ...Density, Fuel Cell-other, Hydrogen, Marine Propulsion, Refraction, ...8.0157

**Electrolytes**

ELECTROLYTE-NON-ELECTROLYTE INTERACTIONS IN SEA WATER AND RELATED SOLUTIONS ...Alkali Metals, Alkaline Earths, Complexes, Saline Water Systems, Thermal Properties-other, Water Analysis-general, ...1.0107  
 EFFECT OF PRESSURE ON CONDUCTIVITY OF SOLUTIONS ...Acoustical, Conductivity, Density, Electrical, Pressure, Sulfate, Sulfite, Viscosity, ...1.0078  
 EFFECT OF PRESSURE ON CONDUCTIVITY OF SOLUTIONS ...Conductivity, Pressure, Solution, Sulfate, Sulfite, Ultrasonic Spectroscopy, ...1.0079

**Polarization**

STEEL PILING ...Corrosion Prevention-other, Fouling, Low Alloy Steels, Soils, Water, ...8.0208

**Rheological**

**Viscosity**

EFFECT OF PRESSURE ON CONDUCTIVITY OF SOLUTIONS ...Acoustical, Conductivity, Density, Electrical, Electrolytes, Pressure, Sulfate, Sulfite, ...1.0078  
 CHEMICAL PROPERTIES OF SEA WATER AT PRESSURE ...Gases, General Sea Water Chemistry, Interstitial - Connate Water, Pressure, Solubility, ...1.0099

**Solution**

**Solubility**

MASS SPECTROMETRIC AND MANOMETRIC STUDIES OF THE OCEANS AND THE ATMOSPHERE ...Chemical Analysis (water), Gases, Mass Spectroscopy, Ocean History, Particle-gas Transfer, ...1.0101  
 RESEARCH ON THE PHYSICAL CHEMISTRY OF CHEMICAL REACTIONS IN SEA WATER ...Acids, Apatite-general, Carbonate, Bicarbonate. Chemical Reactions, Equilibrium - Chemical, High Pressure Research, Reaction-general, Sulfate, Sulfite, ...1.0127  
 PRECISION MEASUREMENTS OF DISSOLVED OXYGEN, NITROGEN AND ARGON IN SEAWATER ...Argon, Gases, Nitrogen, Oxygen, Particle-gas Transfer, Special Mission Ships, ...1.0092  
 SHIPBOARD METHODS OF CHEMICAL ANALYSIS ...Caribbean Sea, Gases-general, Spectroscopy, Technique Development, Water Analysis-general, ...1.0091  
 CHEMICAL PROPERTIES OF SEA WATER AT PRESSURE ...Gases, General Sea Water Chemistry, Interstitial - Connate Water, Pressure, Viscosity, ...1.0099

**Surface**

**Bubble**

PHYSICAL CHEMISTRY OF BUBBLES ...Diffusion, Interface, Particle-gas Transfer, Surface Energy, ...1.0082  
 ENVIRONMENTAL REVERBERATION STUDIES ...Acoustical, Electron, Liquids, Reverberation, Scattering, ...1.0039

**Monolayers**

PROJECT FOG DROPS ...Condensation, Fog-haze-mist, Fog-mist Dissipation, Surfactants, ...3.0090

**Surface Energy**

PHYSICAL CHEMISTRY OF BUBBLES ...Bubble, Diffusion, Interface, Particle-gas Transfer, ...1.0082

**Surfactants**

PROJECT FOG DROPS ...Condensation, Fog-haze-mist, Fog-mist Dissipation, Monolayers, ...3.0090

**Tension**

SURFACE TENSION ...Extraction, Wettability, ...3.0030

**Wettability**

SURFACE TENSION ...Extraction, Tension, ...3.0030

**Chemical Analysis (water)**

ECOLOGICAL SURVEY OF EFFLUENT DISCHARGE AT TWO PULP MILLS IN HUMBOLDT COUNTY, CALIFORNIA ...California, Effluents-waste Water, Pollution - Effects of, Pollution Effects, Pulp, Paper, and Logging, ...5.0858  
 OIL MONITOR INSTRUMENTATION ...Infrared Spectroscopy, Oil, ...8.0093  
 STUDY OF THE DISTRIBUTION OF RADIONUCLIDES IN THE OCEAN DETAILED EXPLORATION OF CS137 IN THE OCEAN ...Cesium, Circulation-general, Convection, Pacific Ocean-north, Radioactivity, ...1.0080  
 FLUXES OF DISSOLVED GASES AND NUTRIENTS RELATING TO BIOCHEMICAL AND AERATION PROCESSES OFF THE OREGON COAST ...Gases, Oregon, Organics, Particle-gas Transfer, Phosphate, Phosphite, ...3.0037  
 DEVELOPMENT OF AN INSTRUMENT FOR MEASURING THE CONCENTRATION OF DISSOLVED OXYGEN IN SEA WATER IN SITU ...Gases, Instrumental Services, Oxygen, Technique Development, Telemetry-other, ...8.0092

## Chemical Analysis (water)

MASS SPECTROMETRIC AND MANOMETRIC STUDIES OF THE OCEANS AND THE ATMOSPHERE ...Gases, Mass Spectroscopy, Ocean History, Particle-gas Transfer, Solubility, ...1.0101

DETERMINATION OF VOLATILE ORGANICS IN SEA WATER ...Gas Chromatography, Organics, Organics-general, Technique Development, Water Analysis, ...1.0094

STABLE ISOTOPES ...Atlantic Ocean-south, Atlantic Ocean-south, Carbon, Sampling, Water Chemistry-other, ...1.0108

MARINE RADIOLOGICAL INSTRUMENTATION ...Acoustical, Circulation-general, Laboratory Analysis, Mixing, Radioactivity-general, Sampling, ...8.0062

CHEMICAL CHARACTERISTICS OF THE GREAT LAKES ...Great Lakes-general, Nutrients, Productivity - Food Chain, Water Quality-general, ...1.0116

CHEMICAL ANALYSES ...Chlorinated Hydrocarbons, Estuaries, Substances Or Chemicals, ...6.0149

## Chemical Reactions

### Condensation

COMPOSITION OF LEAD HALIDE POLLUTION AEROSOLS ...Activation Analysis, Aerosols, Air Pollution Sampling, Air Pollution-chemistry, Oxidation-general, ...6.0156

### Decomposition

#### Biodegradation

HETEROTROPHIC ACTIVITY AND PRIMARY REGENERATION IN THE OCEAN ...Atlantic Ocean-south, Carbon, Gulf of Mexico, Organics, Organics-general, ...1.0114

MICROBIAL CORROSION IN THE MARINE ENVIRONMENT ...Biological, Carbon, Fouling, Marine Fungi (non-specific), Water, ...5.0769

#### Decomposition-other

NATURAL COMPOUNDS WITH CARBON-PHOSPHORUS BONDS ...Anthozoa, Bond Type, Natural Occurring, Phosphorous, ...5.1013

### Electrochemical

#### Electrode

CHEMICAL METHODOLOGY - APPLICATIONS OF NITRATE SPECIFIC ELECTRODE TO CHEMICAL OCEANOGRAPHY ...Water Analysis-general, ...1.0093

### Interfacial

PHASE RELATIONS OF THE HYDRATED CARBONATES OF CALCIUM AND MAGNESIUM ...Carbonate, Bicarbonate, Equilibrium - Chemical, Phase Relationships, Properties and Structure, Surface Chemistry, ...3.0085

### Oxidation

#### Oxidants

HYDROGEN-OXYGEN FUEL CELLS ...Encapsulation, Fuel Cell-other, Gas Generator, Safety, Submersibles, ...8.0160

#### Oxidation-general

COMPOSITION OF LEAD HALIDE POLLUTION AEROSOLS ...Activation Analysis, Aerosols, Air Pollution Sampling, Air Pollution-chemistry, Condensation, ...6.0156

#### Oxidation-other

CATALYSIS AND KINETICS OF MANGANOUS ION OXIDATION IN AQUEOUS SOLUTION AND ADSORBED ON THE SURFACES OF SOLID OXIDES ...Adsorption, Heterogeneous Catalysis, Manganese, Oxide, Precipitates, Solution, ...2.0063

### Photochemical

#### Light-catalyzed

POLYPEPTIDE INTERACTIONS ON A STERILE SEASHORE ...Biochemical, Melanin, Origin of Life, Polypeptides, ...5.0942

#### Photochemical-other

EXCITED STATES MECHANISMS IN PHOTOBIOLOGY ...Bioluminescence, Chemiluminescence, Energy Conversion, Polypeptides, ...4.0162

## SUBJECT INDEX

### Reaction-general

CHEMICAL OCEANOGRAPHY ...Carbon, Carbon-14, Chemical Reactions, Gulf of Mexico, Organics, ...1.0131

RESEARCH ON THE PHYSICAL CHEMISTRY OF CHEMICAL REACTIONS IN SEA WATER ...Acids, Apatite-general, Carbonate, Bicarbonate, Chemical Reactions, Equilibrium - Chemical, High Pressure Research, Solubility, Sulfate, Sulfite, ...1.0127

SOLUTION-SILICATE REACTIONS AND EQUILIBRIA ...Chemical Reactions, Chemistry, Equilibrium - Chemical, Groundwater, Silicate-general, Solution, Solution Chemistry, ...1.0097

### Synthesis

#### Organic

CELL DIVISION, BIOENERGETICS, CHEMISTRY OF MUSCLE ...Bioenergetics, Cell Cycle, Configuration, Glyoxal, ...5.0987

CHEMISTRY AND PHARMACOLOGY OF TETRODOTOXIN ...Poisons-other, Toxicology, ...6.0105

## Chemical Separation

### Filtration

OIL - WATER SEPARATOR ...Oil, Separation-flow-other, ...8.0124

### Isotope

GEOCHEMICAL STUDIES OF CONTINENTAL WATERS ...Authigenesis, Element Ratios, Geochemical Analysis, Isotope Tracer-other, Location, Pore Fluids, Radioisotopes, Water Analysis, ...1.0121

RADIOELEMENT STUDIES IN THE OCEANS - GEOLOGY AND GEOCHEMISTRY ABOUT THE MID-ATLANTIC RIDGE ...Adsorption Capacity, Chemistry, Removal--inorganics, Ridges, Water Analysis, ...7.0072

### Precipitation

SEDIMENTARY GEOCHEMISTRY ...Authigenesis, Other, Removal--inorganics, Water Chemistry-other, ...7.0190

GEOCHEMISTRY OF CARBONATE CYCLE IN THE MARINE ENVIRONMENT ...Calcium, Carbonate, Bicarbonate, Chemical Reactions, Optical, Removal--inorganics, ...7.0069

## Chemistry - Coordination

### Chelating Agents

TRACE ELEMENT EQUILIBRIUM STUDIES ...Adsorption, Ion Exchange, Material Recovery, Trace Elements, Tracers, ...1.0088

EFFECTS OF CRUDE OILS AND THEIR EMULSIONS TO MARINE ORGANISMS ...Emulsion, Oil, Oil and Natural Gas - Sulfur, Poisons-other, Removal--organics, ...5.0924

### Complexes

ELECTROLYTE-NON-ELECTROLYTE INTERACTIONS IN SEA WATER AND RELATED SOLUTIONS ...Alkali Metals, Alkaline Earths, Electrolytes, Saline Water Systems, Thermal Properties-other, Water Analysis-general, ...1.0107

## Chemistry - Effects

### Additives

TURBULENCE STRUCTURE AND NOISE STUDY ...Noise, Turbulent, ...1.0002

### Pressure

EFFECT OF PRESSURE ON CONDUCTIVITY OF SOLUTIONS ...Conductivity, Electrolytes, Solution, Sulfate, Sulfite, Ultrasonic Spectroscopy, ...1.0079

ENERGY CONVERSION MATERIALS AND COMPONENTS ...Durability, Deterioration, Electrode, Fuel Cell-other, Hydrazine, Hydrocarbon, ...8.0223

**Radiation**

STABILITY OF FOOD LIPIDS TO IONIZING RADIATION  
...Fats, ...6.0029

**Chemistry - Mechanisms****Reaction Media****Solution**

EFFECT OF PRESSURE ON CONDUCTIVITY OF SOLUTIONS  
...Conductivity, Electrolytes, Pressure, Sulfate, Sulfite, Ultrasonic Spectroscopy, ...1.0079

CATALYSIS AND KINETICS OF MANGANOUS ION OXIDATION IN AQUEOUS SOLUTION AND ADSORBED ON THE SURFACES OF SOLID OXIDES ...Adsorption, Heterogeneous Catalysis, Manganese, Oxidation-other, Oxide, Precipitates, ...0.063

SOLUTION-SILICATE REACTIONS AND EQUILIBRIA  
...Chemical Reactions, Chemistry, Equilibrium - Chemical, Groundwater, Reaction-general, Silicate-general, Solution Chemistry, ...1.0097

**Chemistry - Organic Compounds****Aliphatics****Acids**

GEOCHEMICAL OCEANOGRAPHY ...Carbonaceous Substance, Organic, Organics, ...1.0102

EFFECT OF NITRILOTRIACETIC ACID (NTA) UPON THE TOXICITY OF METALS TO SELECTED SPECIES OF ESTUARINE PHYTOPLANKTON ...Carbon, Chemicals (incl. acids), Estuaries, Isotope Tracer-other, Phytoplankton, ...5.0829

**Esters**

PROCESS ENGINEERING ...Design, Machinery, Equipment, Extraction, Fats and Oils -other, Fish Protein Concentrate, Industrial Operation, Legal Standards, Natural Occurring, ...6.0080

**Phosphorous**

NATURAL COMPOUNDS WITH CARBON-PHOSPHORUS BONDS ...Anthozoa, Bond Type, Decomposition-other, Natural Occurring, ...5.1013

**Dyes and Coloring**

APPLICATION OF ISCC-NBS CENTROID COLORS AND METHOD OF DESIGNATION COLORS ...Colorimetry, Paint - General, Photography-chemistry, Pigments, Standards, Specifications, ...4.0097

**Organics-general**

HETEROTROPHIC ACTIVITY AND PRIMARY REGENERATION IN THE OCEAN ...Atlantic Ocean-south, Biodegradation, Carbon, Gulf of Mexico, Organics, ...1.0114

A NATURAL WENTLED ENTITLED ORGANIC CHEMISTRY OF NATURAL WATERS ...Alaska, Chemical-general, Meetings, Organic, Organic Matter, Organic-general, Organics, Polar, Sediments, Water Analysis, Water Chemistry, ...11.0001

DETERMINATION OF VOLATILE ORGANICS IN SEA WATER ...Chemical Analysis (water), Gas Chromatography, Organics, Technique Development, Water Analysis, ...1.0094

**Organometallics**

FOULING OF SENSORS ...Fouling, Inhibitors, Instrumentation-general, Marine Biology, ...8.0239

**Poisons-other**

EFFECTS OF CRUDE OILS AND THEIR EMULSIONS TO MARINE ORGANISMS ...Chelating Agents, Emulsion, Oil, Oil and Natural Gas - Sulfur, Removal--organics, ...5.0924

CHEMISTRY AND PHARMACOLOGY OF TETRODOTOXIN ...Organic, Toxicology, ...6.0105

**Chemistry - Polymer****Morphology**

VISCOSITY AND VISCOELASTICITY OF LIQUIDS AND GLASSES ...Glass, Instrumental Services, Liquid, State Variables - Pvt, Viscoelasticity, Viscosity, ...8.0260

**Polymer Types****Natural Occurring**

DRAG-REDUCING ALGAE ...Algae- General, Coatings-general, Fouling, Marine Bacteria, Secretions and Products, Wear, Friction, ...5.0681

PROCESS ENGINEERING ...Design, Machinery, Equipment, Esters, Extraction, Fats and Oils -other, Fish Protein Concentrate, Industrial Operation, Legal Standards, ...6.0080

NATURAL COMPOUNDS WITH CARBON-PHOSPHORUS BONDS ...Anthozoa, Bond Type, Decomposition-other, Phosphorous, ...5.1013

**Organometallic**

DIELECTRIC MATERIALS ...Dielectric Materials, Submersibles, Thermal Properties, ...8.0215

**Chemistry - Surface & Colloid****Adsorption**

THE CYCLE OF ORGANIC MATTER IN THE DEEP SEA ...Abyssal, Biogenous, Distribution, Marine Bacteria, Origin, ...1.0112

CATALYSIS AND KINETICS OF MANGANOUS ION OXIDATION IN AQUEOUS SOLUTION AND ADSORBED ON THE SURFACES OF SOLID OXIDES ...Heterogeneous Catalysis, Manganese, Oxidation-other, Oxide, Precipitates, Solution, ...2.0063

TRACE ELEMENT EQUILIBRIUM STUDIES ...Chelating Agents, Ion Exchange, Material Recovery, Trace Elements, Tracers, ...1.0088

DISTRIBUTION OF ELEMENTS IN FLUVIAL AND BRACKISH ENVIRONMENTS ...Adsorption Capacity, Brackish Water, Chemical Reactions, Element Ratios, Exchange Capacity, Solution, ...7.0221

SEDIMENT MINERALOGY (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Chemistry, Food Webs, Productivity - Food Chain, Radioactivity, Radioactivity-general, ...7.0077

**Catalysts**

EVALUATION OF BOOTTOP PAINT SYSTEMS FOR OCEAN-GOING SHIPS IN A BOOTTOP PAINT TESTING MACHINE ...Paint - General, Primers, Surface Cleaning, Finishing, Test Methods, Water, ...8.0237

**Condensation**

PROJECT FOG DROPS ...Fog-haze-mist, Fog-mist Dissipation, Monolayers, Surfactants, ...3.0090

**Electrokinetics****Electroosmosis**

CRITICAL TABLES ON THE ELECTROCHEMICAL PROPERTIES OF INTERFACES ...Electrophoresis, Streaming Potential, Zeta Potential, ...1.0140

ELECTROKINETIC SOIL STUDY ...Buried Structures, Electroosmosis, Electroosmosis, Laboratory Analysis, Marine Soils, Stabilization, ...8.0342

**Electrophoresis**

CRITICAL TABLES ON THE ELECTROCHEMICAL PROPERTIES OF INTERFACES ...Electroosmosis, Streaming Potential, Zeta Potential, ...1.0140

ELECTROKINETIC SOIL STUDY ...Buried Structures, Electroosmosis, Electroosmosis, Laboratory Analysis, Marine Soils, Stabilization, ...8.0342

**Streaming Potential**

CRITICAL TABLES ON THE ELECTROCHEMICAL PROPERTIES OF INTERFACES ...Electroosmosis, Electrophoresis, Zeta Potential, ...1.0140

**Zeta Potential**

CRITICAL TABLES ON THE ELECTROCHEMICAL PROPERTIES OF INTERFACES ...Electroosmosis, Electrophoresis, Streaming Potential, ...1.0140

MEASUREMENT OF SURFACE CHARGE ON PARTICLES SUSPENDED IN SEA WATER ...Electrical, Suspension, Water Chemistry-other, ...7.0205

## Chemistry - Surface & Colloid

## SUBJECT INDEX

### Emulsion

EFFECTS OF CRUDE OILS AND THEIR EMULSIONS TO MARINE ORGANISMS ...Chelating Agents, Oil, Oil and Natural Gas - Sulfur, Poisons-other, Removal--organics, ...5.0924

### Heterogeneous Catalysis

CATALYSIS AND KINETICS OF MANGANOUS ION OXIDATION IN AQUEOUS SOLUTION AND ADSORBED ON THE SURFACES OF SOLID OXIDES ...Adsorption, Manganese, Oxidation-other, Oxide, Precipitates, Solution, ...2.0963

### Interface

PHYSICAL CHEMISTRY OF BUBBLES ...Bubble, Diffusion, Particle-gas Transfer, Surface Energy, ...1.0082

### Suspension

MEASUREMENT OF SURFACE CHARGE ON PARTICLES SUSPENDED IN SEA WATER ...Electrical, Water Chemistry-other, Zeta Potential, ...7.0205

## Chemostat

MICROBIAL TRANSFORMATIONS IN SEA WATER ...Growth Rate, Isolation From Nat. environ., Marine Bacteria, Nutrition, Organics, ...5.0796

## Chesapeake Bay

THE MARINE ALGAE OF VIRGINIA ...Algae- General, Benthonic-bottom, Marine Plants, Plant Taxonomy, Virginia, ...5.0698

THE BIOLOGY AND CHEMISTRY OF TRACE ELEMENTS IN MARINE AND ESTUARINE WATERS ...Estuaries, Phytoplankton, Productivity - Food Chain, Trace Element Analysis, Zooplankton, ...5.0975

OCEAN KINEMATICS DYNAMICS ...Circulation-general, Data Reduction and Analysis, Estuaries, Turbulent Flow, Water Motion, ...2.0069

TURBULENT DIFFUSION STUDY ...Dispersion -water, Estuaries, Tracers-general, Turbulent Flow, Water Motion, ...2.0056

ESTIMATION OF PARAMETERS OF STRIPED BASS POPULATION AND DESCRIPTION OF THE FISHERY OF LOWER CHESAPEAKE BAY ...Age, Basses -sea,white, White Perch, Censusing, Fishing Gear, Population Dynamics, ...5.0151

THE DETERMINATION OF THE AVAILABILITY OF SEA ROBINS ...Benthic Fauna, Fish -other, Nets, Vertical Distribution, ...5.0152

REGIONAL DEMAND IN THE U.S. AND TRENDS IN THE FISHING AND SEAFOOD PROCESSING INDUSTRIES OF THE CHESAPEAKE BAY AREA ...Commercial Fishing, Consumer Pref. & Consumption, Consumption, Fish & Shellfish, Fish -non-specific, Market Structure, ...6.0028

ENHANCEMENT OF RECREATIONAL USES OF ESTUARINE WATERS THROUGH STUDY OF POTENTIAL CONTROL METHODS FOR STINGING SEA NETTLES ...Biological Control, Estuaries, Jelly Fish, Recreation Sites, Water Quality-general, ...5.0605

ALGAE AS FOOD FOR MARINE INVERTEBRATE LARVAE HELD IN THE LABORATORY ...Algal Culture, Bulk Culture -other, Invertebrate Nutrition, Invertebrates -non-specific, ...5.0732

OCEANOGRAPHIC SURVEY OF CONTINENTAL SHELF WATERS OFF CHESAPEAKE BAY ...Continental Shelf, Marine Biology, Salinity, Temperature, ...4.0135

DISTRIBUTION, AGE GROWTH, AND MORTALITY STUDIES OF SALT WATER FISHES OF IMPORTANCE TO SPORT FISHERMEN ...Age, Drums, Growth Rate, Mortality Rates, Vertical Distribution, ...5.0155

INFAUNA OF LOWER CHESAPEAKE BAY ...Aquatic Ecology, Population Dynamics, Shrimp - Amphipods, Streams, Virginia, ...5.0661

ANALYSIS OF AN ATTEMPT TO CONTROL BEACH EROSION AT SCIENTISTS CLIFFS, MARYLAND ...Beaches, Engineering Studies-other, Erosion, Groin, Maryland, ...8.6038

EFFECTS OF HEATED WATER IN A TIDAL ESTUARY ...Electric Power Plants, Pollution - Effects of, Pollution Effects, Thermal Pollution, Tidal Streams, Water Properties-general, ...6.0145

PHYSICAL AND CHEMICAL CHARACTERISTICS OF THE UPPER CHESAPEAKE BAY ...Chemical-general, Crustacea -non-specific, Environmental Ecology, Mollusks -non-specific & Other, Physical-general, ...1.0150

POTENTIAL OYSTER SETTING CAPACITY - LOCAL AREAS ...Commercial Fishing, Mark, Tag Or Capture -other, Oysters, Spawning & Nesting Sites, Streams, ...5.0445

## Chile

A PROGRAM FOR THE TRAINING OF STAFF MEMBERS FROM THE SCHOOL OF FISHERIES OF THE CATHOLIC UNIVERSITY OF VALPARAISO CHILE ...Fish -non-specific, Food Processing Industry, Marine Biology, Teaching and Research, ...5.0181

## Chloride

SIGNIFICANCE OF FLUORIDE VARIATIONS IN SEA WATER ...Atlantic Ocean-general, Element Ratios, Extrusives, Fluoride, Water Analysis-general, ...1.0105

## Chlorophyll

BIOLOGY AND CHEMISTRY OF MARINE PLANKTON POPULATIONS ...Buoys, Phytoplankton, Vertical Distribution, Zooplankton, ...5.0798

## Chromatography

### Gas Chromatography

DETERMINATION OF VOLATILE ORGANICS IN SEA WATER ...Chemical Analysis (water), Organics, Organics-general, Technique Development, Water Analysis, ...1.0094

RED TIDE TOXICITY ...Algal Toxins, Biochemical Analysis, Gymnodinium, Plant Developmental Biology, Pollution Sources-other, ...5.0780

PESTICIDE MONITORING PROGRAM ...Bioindicators, Estuaries, Monitoring Systems, Oysters, Persistence of Residues, ...6.0147

### Ion Exchange

ANALYSIS OF SEA WATER BY DIFFERENCE CHROMATOGRAPHY ...Interstitial - Connate Water, Runoff, Salinity, Water Analysis-general, ...1.0110

### Paper Chromatography

NUTRITIVE VALUE OF FISH AND OTHER MARINE PRODUCTS ...Ascorbic Acid, Fish -non-specific, Nutritive Value, Proteins -non-specific, Thiamine, ...6.0054

## Circulation -water

FLUSHING PATTERN OF CERTAIN TIDAL STREAMS IN DELAWARE ...Aquatic Ecology, Delaware, Discharge, Industrial-general, Tidal Streams, ...2.0013

HORIZONTAL DISPERSION IN SHALLOW ESTUARIES OF IRREGULAR SHAPE ...Dispersion -water, Estuaries, Gulf of Mexico, Model Studies: Water Quality-general, ...2.0064

BIG EDDIES AND MIXING PROCESSES IN THE GREAT LAKES ...Dispersion -water, Effluents-waste Water, Great Lakes-general, Mixing, Water Motion, ...2.0052

AN ENVIRONMENTAL SURVEY OF THE DAMARISCOTTA RIVER ESTUARY, LINCOLN COUNTY, MAINE ...Estuaries, Nutrients, Pollution - Effects of, Salinity, Sedimentology-general, ...5.0895

## Circulation-general

AIR-SEA INTERACTION PROCESS ...Boundary Layer Studies, Buoys, Lakes, Profiles, Wind-water Interaction, ...3.0028

STUDY OF THE DISTRIBUTION OF RADIONUCLIDES IN THE OCEAN DETAILED EXPLORATION OF CS137 IN THE OCEAN ...Cesium, Chemical Analysis (water), Convection, Pacific Ocean-north, Radioactivity, ...1.0080

PHYSICAL AND BIOLOGICAL OCEANOGRAPHY OF A TUMINOUS BAY ...Bays, Bioluminescence, Jamaica, Model Studies, Phytoplankton, ...5.0976

TIME DEPENDENT VARIATIONS IN SURFACE OCEANIC CIRCULATION ...Ocean History, Pollution Sources-general, Sedimentary History, Temperature, Waste Disposal-general, ...2.0038

## SUBJECT INDEX

## Circulation-general

- OCEAN CIRCULATION AND CONTROLLING FACTORS FOR PREDICTION ...Meteorological Studies, Oceanic Fronts, Salinity, Temperature, ...2.0034
- HAWAIIAN OCEANOGRAPHY ...Environmental Effects-geologic, Hawaii, Hydrodynamics, Islands, Ocean Currents-other, ...2.0021
- CHEMICAL OCEANOGRAPHY ...Biogeochemical Process, Geologic, Organics, Rare Earth Studies, Trace Elements, ...1.0129
- OCEAN KINEMATICS DYNAMICS ...Chesapeake Bay, Data Reduction and Analysis, Estuaries, Turbulent Flow, Water Motion, ...2.0069
- CIRCULATION STUDIES ...Currents-ocean, Gulf of Mexico, Hydrodynamics, Mixing, Pacific Ocean-east, ...2.0042
- NORTH ATLANTIC CIRCULATION ...Atlantic Ocean-north, Geomorphology-topography, Gulf Stream, Hydrodynamics, Oceanic Fronts, ...2.0031
- LIGHT ISOTOPE STUDIES ...Chemical Reactions, Deuterium, Isotope Tracers-other, Mixing, Oxygen, Particle-gas Transfer, ...1.0077
- CIRCULATION OF THE PACIFIC ...Density, Oceanic Fronts, Pacific Ocean-general, Sampling, Subsurface Environments, ...2.0007
- DESCRIPTIVE OCEANOGRAPHY ...Currents-ocean, Data Analysis - General, Pacific Ocean-east, Wind-water Interaction, ...4.0116
- LANGMUIR CIRCULATION AND PLANKTON ECOLOGY ...Phytoplankton, Range Or Territorial Distr., Vertical Distribution, Water Movement, Currents,, Wind Or Air Movement, Zooplankton, ...5.0794
- AIR-SEA INTERACTION AND PLANKTON ECOLOGY ...Environmental Ecology, Marine Biology (non-specific), Number Or Density, Plankton (non-specific), ...4.0078
- THE CONTRIBUTION OF ADVECTION AND LOCAL HEATING TO THE MAINTENANCE OF THE THERMAL STRUCTURE IN THE NORTH PACIFIC OCEAN ...Convection, Heat and Radiation Transfer, Mixing, Pacific Ocean-north, Thermal, ...1.0183
- MARINE HYDRODYNAMICS ...Antarctic Ocean, Laboratory Analysis, Model Studies, Waves, Waves-internal, ...8.0196
- DYNAMICAL OCEANOGRAPHY AND GEOPHYSICAL FLUID DYNAMICS ...Acoustic Effects, Forced Convection, Theoretical Analysis, Thermal, Water Tunnels Tables, ...2.0012
- STUDIES IN THE INDIAN OCEAN ...Data Analysis - General, Indian Ocean-general, Particle-gas Transfer, Storms-general, ...2.0073
- CIRCULATION AROUND OCEANIC ISLANDS ...Density, Islands, Mixing, Thermodynamics, Waves-internal, Wind-water Interaction, ...2.0010
- INVESTIGATION OF SHALLOW CURRENT STRUCTURE IN THE WESTERN TROPICAL ATLANTIC OCEAN ...Atlantic Ocean-general, Temperature, Tropic, ...2.0030
- CHEMICAL FEATURES OF THE SUBARCTIC BOUNDARY IN THE NORTHERN PACIFIC OCEAN ...Carbon Dioxide, Gases, Mixing, Oceanic Fronts, Pacific Ocean-north, Sub-Polar, ...1.0125
- STUDY OF INFLUENCE OF STRATIFICATION ON CURRENT STRUCTURE ...Currents-other, Hydrodynamics, Lake Michigan, Stratified Flow, ...2.0035
- STUDY OF DEEP PACIFIC CIRCULATION USING SILICON-32 ...Carbon, General Sea Water Chemistry, Pacific Ocean-general, Silicon, Tracers, ...2.0006
- HEAVY METAL GEOCHEMISTRY OF ANTARCTIC SEA WATER AND MARINE SEDIMENTS ...Antarctic Ocean, Chemistry, Sedimentation, Water Analysis-general, ...1.0086
- THEORY OF LARGE-SCALE ATMOSPHERIC AND OCEANIC PROCESSES ...Currents-ocean, Model Studies, Tropic, Weather Forecasting, Wind-water Interaction, ...2.0070
- ESTUARINE SEDIMENTARY MODELS ...Distribution, Estuaries, Grain Size, Model Studies, Textures-structures, ...4.0079
- CURRENTS AND WATER MASSES IN THE SOUTHWEST ATLANTIC ...Currents-ocean, Oceanic Fronts, Subsurface Environments, ...2.0041
- (U) OCEAN CIRCULATION MODELS ...Currents-ocean, Model Studies, Shear, Waves, Wind-water Interaction, ...2.0024
- CIRCULATION IN THE GULF OF MEXICO ...Currents-ocean, Gulf of Mexico, Infrared Radiation, Mapping, Oceanic Fronts, ...2.0022
- THEORETICAL AND LABORATORY MODEL STUDIES OF LARGE-SCALE OCEANIC CIRCULATION ...Currents-ocean, Forecasting-prediction, Gulf Stream, Model Studies, Transducers, ...2.0023
- FINE STRUCTURE FEATURES OF TEMPERATURE AND SALINITY AT WATER MASS BOUNDARIES IN PACIFIC ...Mixing, Oceanic Fronts, Pacific Ocean-north, Salinity, Temperature, ...2.0046
- CHEMICAL OCEANOGRAPHY ...Arctic, Isotope Tracer-other, Oceanic Fronts, Tracers, Water Analysis-general, ...1.0072
- WATER MASS TRACERS ...Acoustical, Currents-ocean, Oceanic Fronts, Tracers, ...2.0020
- VERTICAL OCEAN CIRCULATION ...Convection, Model Studies, Oceanic Fronts, Subsurface Environments, ...2.0036
- DESCRIPTIVE OCEANOGRAPHY/PACIFIC ...Buoys, Currents-ocean, Pacific Ocean-east, Wind-water Interaction, ...2.0009
- CIRCULATION STUDIES ...Currents-ocean, Gulf of Mexico, Model Studies, Thermal, Tropical Cyclones, ...2.0044
- MARINE RADIOLOGICAL INSTRUMENTATION ...Acoustical, Chemical Analysis (water), Laboratory Analysis, Mixing, Radioactivity-general, Sampling, ...8.0062
- OCEAN CIRCULATION ...California Current, Forecasting-prediction, Hydrodynamics, Model Studies, Submarine Canyons, ...2.0002
- INVESTIGATION OF THE CIRCULATION OF LAKE SUPERIOR ...Lake Superior, Model Studies, Stratified Flow, Temperature, Thermodynamics, Water Motion, ...2.0048
- RESIDENCE TIMES OF WATERS BEHIND BARRIER ISLANDS ...Bays, Simulation Theory, Tides, Wind-water Interaction, ...2.0018
- VERTICAL CURRENT STRUCTURE IN THE GREAT LAKES ...Great Lakes-general, Temperature, ...2.0033
- FEASIBILITY OF THE APPLICATION OF PALYNOLOGICAL INVESTIGATION OF DEEP-SEA SEDIMENTS TO MAJOR GEOLOGICAL PROBLEMS ...Biology, Paleoclimatology, Pollen, Pollens, Spores, ...7.0206
- CHRONOLOGY OF MARINE SEDIMENTS, CIRCULATION OF WATER AND TRACE ELEMENTS, SEDIMENTARY RECORD AND EXTRATERRESTRIAL ACCRETION ...Cosmogenous, Pacific Ocean-general, Paleoclimatology, Sedimentary History, Trace Elements, ...1.0098
- RADIOSTRONTIUM DEPOSITION OVER THE OCEAN ...Nuclear Explosions - Fallout, Precipitation-general, Radioactive Dating, Radioactivity, Strontium, ...6.0165
- RADIOISOTOPE TRACERS IN OCEANOGRAPHIC RESEARCH ...Radioactivity-general, Sampling, Trace Elements, Tracers, ...2.0001
- OCEAN CURRENTS AND CIRCULATION ...Currents-ocean, Data Acquisition, Energy, Model Studies, Temperature, ...2.0015
- STUDY OF EFFECTS OF OFFSHORE DUMPING ...Dispersion - water, Engineering Studies-other, Pollution - Effects of, Pollution Sources-other, Shoreline - Coastline, ...6.0144
- HISTORICAL CHARTS AND INTERPRETATION OF CHANGES IN SEA SURFACE TEMPERATURE IN THE NORTH PACIFIC OCEAN ...Air-sea Boundary-general, Atlases-maps, Commercial Fishing, Pacific Ocean-north, Temperature, ...1.0179
- CHEMICAL OCEANOGRAPHY ...Aquatic Ecology, Convection, Technique Development, Trace Elements, ...1.0134
- CIRCULATION DYNAMICS (GULF OCEANOGRAPHY PROGRAM) ...Environmental Changes, Gulf of Mexico, Shrimps - Common, Thermodynamics, ...2.0045
- SEA SURFACE SURVEILLANCE ...Caribbean Sea, Temporal Distribution, Tuna, Mackerel, Albacore..., Vertical Distribution, Water Properties-general, ...2.0019
- FISHERY FORECASTING - TEMPERATE FISHERIES ...General Synoptic Observations, Low Temp. -but Above 32f, Pacific Ocean-east, Temperature, ...5.0197
- DISPOSAL TO MARINE WATERS ...Model Studies, Monitoring (long Term Studies), Pollution - Effects of, Pollution Sources-general, Shoreline - Coastline, ...6.0177
- WESTERN ARCTIC OCEANOGRAPHIC INVESTIGATIONS ...Arctic, Arctic Ocean, Basins, Mixing, ...2.0014
- ICEBERG DRIFT AND DETERIORATION ...Icebergs, Model Studies, Ocean Currents-other, ...3.0076
- OCEANOGRAPHY OF THE GRAND BANKS AND LABRADOR SEA ...Buoys, Icebergs, Labrador Current, Labrador Sea, Meteorological Studies, ...4.0124
- ARCTIC EAST OCEANOGRAPHIC PROJECT (OCEANOGRAPHY OF THE BAFFIN BAY REGION) ...Baffin Bay, Marine Biology, Polar, Sea Water Chemistry-other, Water Properties-general, ...4.0125

## Circulation-general

CIRCULATION ON THE CONTINENTAL SHELF ...Atlantic Ocean-north, Continental Shelf, Eastern, Water Motion Recorders, ...2.0027

## Classifications

CONTRACT FOR-PROCESSING OF USARP ROCK SAMPLES ...Antarctica, Collections, Coring and Dredging, Petrology, Sampling, Ships and Cruises, Thin Sections, ...7.0060

## Climatic Regions

### Arid and Desert

SUPPORT OF THE VERMILION SEA FIELD STATION AT BAHIA DE LOS ANGELES, BAJA CALIFORNIA ...Facilities, Gulf of California, Habitat Studies, Temperature, Tides, ...12.0009

GULF OF CALIFORNIA BIOLOGY ...Bioluminescence, Gulf of California, Intertidal Areas, Population Dynamics, Tropic, ...5.0856

A UNIFIED APPROACH TO WATER, FOOD AND POWER IN A COASTAL DESERT COMMUNITY ...Desalination, Deserts, Diesel, Distilling Units, Electric Power Plants, Greenhouse, Use of Impaired Water, ...7.0002

### Microclimate-general

PHYSIOLOGY AND ECOLOGY OF THE ADRIATIC BENTHOS ...Adriatic Sea, Benthic Organisms (non-specific), Marine Biology (non-specific), Metabolism, Productivity - Food Chain, ...5.0873

### Polar

MARINE BIOLOGY IN ALASKA ...Alaska, Amino Acids -non-specific, Porifera, Trenches, ...5.0854

A SYMPOSIUM ENTITLED ORGANIC CHEMISTRY OF NATURAL WATERS ...Alaska, Chemical-general, Meetings, Organic, Organic Matter, Organic-general, Organics, Organics-general, Sediments, Water Analysis, Water Chemistry, ...11.0001

PHYSIOLOGICAL STUDIES ON FISHES LACKING HEMOGLOBIN ...Adaptation, Cardiovascular System, Fish, Fish -other, Hemoglobin, Metabolism, ...5.0241

SEDIMENTS IN BAFFIN BAY AND THE EFFECTS OF AN ARCTIC ENVIRONMENT ON MARINE SEDIMENTATION ...Baffin Bay, Benthic-bottom, Origin, Physical Properties, Sedimentation, ...7.0265

SEA ICE MOVEMENT DYNAMICS ...Charts, Forecasting-prediction, Mapping, Model Studies, Sea Ice, ...3.0087

CANADIAN ARCTIC AND SUBARCTIC POLYCHAETES COLLECTED BY E. H. GRAINGER ...Animal Taxonomy, Collections, Lugworms, Marine Segmentedworm, Sub - Polar, ...5.0576

ENVIRONMENTAL MEASURING EQUIPMENT ...Meteorological Studies, Platforms, ...4.0007

ARCTIC EAST OCEANOGRAPHIC PROJECT (OCEANOGRAPHY OF THE BAFFIN BAY REGION) ...Baffin Bay, Circulation-general, Marine Biology, Sea Water Chemistry-other, Water Properties-general, ...4.0125

### Sub - Polar

CHEMICAL FEATURES OF THE SUBARCTIC BOUNDARY IN THE NORTHERN PACIFIC OCEAN ...Carbon Dioxide, Circulation-general, Gases, Mixing, Oceanic Fronts, Pacific Ocean-north, ...1.0125

CANADIAN ARCTIC AND SUBARCTIC POLYCHAETES COLLECTED BY E. H. GRAINGER ...Animal Taxonomy, Collections, Lugworms, Marine Segmentedworm, Polar, ...5.0576

### Sub - Tropic

STUDIES WITH TROPICAL AND SUBTROPICAL MICROALGAE ...Algal Culture, Benthic Flora, Continental Shelf, Primary Productivity, Tropic, ...5.0693

ECOLOGY OF PHYTOPLANKTON IN SEMI-TROPICAL ENVIRONMENTS ...Caribbean Sea, Phytoplankton, Range Or Territorial Distr., Temporal Distribution, Vertical Distribution, ...5.0778

MORPHOLOGY AND TAXONOMY OF MARINE FUNGI ...Habitat Studies, Mangroves, Marine Fungi (non-specific), Plant Morphology, Plant Taxonomy, Tropic, ...5.0716

## SUBJECT INDEX

CHANGES IN THE LIMITING NUTRIENT DUE TO TEMPORAL, GEOGRAPHIC, AND DEPTH VARIATIONS ...Depth, New York, Nutrients, Phytoplankton, Water Depth, Water Levels, ...5.1004

### Temperate

TAXONOMIC REVISION OF BATHYLAGIDAE ...Animal Taxonomy, Deepsea Smelts, Tables, Compilations, Catalogs, Tropic, ...5.0055

### Tropic

TROPICAL STORM INVESTIGATIONS IN THE ATLANTIC, CARIBBEAN, AND GULF OF MEXICO ...Meteorological Studies, Satellites, Tropical Cyclones, Vorticity, Waves, ...3.0048

DYNAMIC STUDY OF THE TEMPORAL ...Air Motion-general, Meteorologic Model Studies, Satellites, Storms-general, Tropical Cyclones, ...3.0051

TROPOSPHERE METEOROLOGY IN THE TROPICAL ATLANTIC AREA ...Anticyclones-cyclones, Atlantic Ocean-general, Clouds-precipitation, Meteorological Studies, Patterns, ...3.0049

MESO AND CONVECTIVE SCALE SYSTEMS IN THE MARITIME TROPICAL ATMOSPHERE ...Air Motion-general, Convection, Heat Budget, Islands, Meteorologic Model Studies, ...3.0062

EQUATORIAL CIRCULATIONS IN THE STRATOSPHERE ...Atmospheric Divisions, Mass Transport, Ocean-lakes, Patterns, ...3.0066

STUDIES WITH TROPICAL AND SUBTROPICAL MICROALGAE ...Algal Culture, Benthic Flora, Continental Shelf, Primary Productivity, Sub - Tropic, ...5.0693

ECOLOGY OF TROPICAL DEEP WATER ALGAE ...Algae-General, Benthic Flora, Diving and Scuba, Plant Succession, Temporal Distribution, Vertical Distribution, ...5.0722

SUPPORT FOR THE PHYSIOLOGICAL RESEARCH SHIP, R/V ALPHA HELIX ...Insecticides -non-specific, Mycorrhiza, Nerve Effects, Rain Forests, Regulation, ...12.0011

ECOLOGICAL STUDIES OF THE SOUTHEASTERN FLORIDA SEA GRASS COMMUNITY - PRIMARY PRODUCTION BY THALASSIA TESTUDINUM KONIG ...Elodea, Waterweed, Thalassia, Florida, Primary Productivity, Submerged Plants, Translocation, ...5.0695

STUDIES OF THE EFFECTS OF NUTRIENTS ON THE GROWTH OF PHYTOPLANKTON IN THE TROPICAL PACIFIC OCEAN ...Algal Culture, Growth Rate, Nutrition, Pacific Ocean-general, Phytoplankton, ...5.0948

MORPHOLOGY AND TAXONOMY OF MARINE FUNGI ...Habitat Studies, Mangroves, Marine Fungi (non-specific), Plant Morphology, Plant Taxonomy, Sub - Tropic, ...5.0716

BIOLOGY OF THE DEEP-SEA BENTHOS ...Atlantic Ocean-general, Benthic Fauna, Number Or Density, Vertical Distribution, ...5.0902

OCEANIC FISHES OF THE TROPICAL ATLANTIC ...Atlantic Ocean-south, Fish -non-specific, Survey Studies, Vertical Distribution, ...5.0068

DIVERSITY, COMMUNITY STRUCTURE AND TROPHIC RELATIONS OF TROPICAL ZOOPLANKTON ...Bays, Intertidal Relat.(non-specif), Productivity - Food Chain, Zooplankton, ...5.0785

GENERAL SYSTEMATIC STUDIES OF THE OCTOCORALLIA OF THE TROPICAL ATLANTIC ...Animal Taxonomy, Anthozoa, ...5.0589

ATMOSPHERIC PROCESSES IN THE TROPICS ...Data Reduction and Analysis, Patterns, Shear, Statistics-general, Tropical Cyclones, ...3.0059

INVESTIGATION OF SHALLOW CURRENT STRUCTURE IN THE WESTERN TROPICAL ATLANTIC OCEAN ...Atlantic Ocean-general, Circulation-general, Temperature, ...2.0030

THEORY OF LARGE-SCALE ATMOSPHERIC AND OCEANIC PROCESSES ...Circulation-general, Currents-ocean, Model Studies, Weather Forecasting, Wind-water Interaction, ...2.0070

ATMOSPHERIC EFFECTS ON INCOMING SOLAR RADIATION OVER TROPICAL OCEANS ...Cloud Cover, Development of Models, Humidity, Pacific Ocean-general, Sunshine, ...3.0036

PHYSICAL GEOGRAPHY OF TROPICAL COASTAL LOWLANDS ...Development, Geography-physical, Physical Features-general, Shore Features-general, ...7.0298

GULF OF CALIFORNIA BIOLOGY ...Arid and Desert, Bioluminescence, Gulf of California, Intertidal Areas, Population Dynamics, ...5.0856

## SUBJECT INDEX

## Coatings

- COASTAL MORPHOLOGY ..Beach, Deltas, Development, General Information Services, Shore Features-general, Shoreline - Coastline, ...7.0297
- ECOLOGICAL STUDIES ON TROPICAL INTERTIDAL BRITTLESTARS ...Brittle Stars, Habitat Studies, ...5.0615
- OBJECTIVE WEATHER ANALYSIS ...Research - Development, Technique Development, Weather Forecasting, Wind-general, ...4.0042
- TROPICAL ANALYSIS AND FORECASTING ...Filtering Theory, Mathematical Analysis, Meteorologic Model Studies, Pressure-density, Weather Forecasting, ...3.0061
- ECOLOGY OF PANAMANIAN REEF COMMUNITIES ...Behavioral Ecology, Invertebrates -non-specific, Panama, Productivity - Food Chain, Reefs, ...5.0866
- STUDIES OF FISH FAMILIES ARIIDAE AND ASPREDINIDAE ...Animal Taxonomy, Fish -other, Interbiotic Relat.(non-specif), Neotropical, ...5.0052
- TAXONOMIC REVISION OF BATHYLAGIDAE ...Animal Taxonomy, Deepsea Smelts, Tables, Compilations, Catalogs, Temperate, ...5.0055
- ZOOPLANKTON DISTRIBUTION IN THE TROPICAL ATLANTIC ...Atlantic Ocean-general, Plankton Sampling, Range Or Territorial Distr., Temperature, Vertical Distribution, Zooplankton, ...5.0771
- DESCRIPTIVE PHYSICAL OCEANOGRAPHY OF THE EASTERN TROPICAL ATLANTIC ...Atlantic Ocean-general, Environmental Ecology, Fish -non-specific, Productivity - Food Chain, ...4.0127
- DEVELOP HIGH-SEAS TUNA FISHERY ...Commercial Fishing, Fishing Gear, Pacific Ocean-general, Tuna, Mackerel, Albacore... , ...5.0084
- 146 D EASTROPAC ...Marine Biology, Meteorological Studies, Pacific Ocean-east, Tuna, Mackerel, Albacore... , Vertical Distribution, ...4.0113
- SCRIPPS TUNA OCEANOGRAPHY RESEARCH PROGRAM ...Food Supply, Pacific Ocean-east, Temperature, Tuna, Mackerel, Albacore... , Water Temperature-non-specific, ...5.0200
- EASTERN TROPICAL ATLANTIC COOPERATIVE SURVEY 12 SEPTEMBER TO 20 DECEMBER 1968 ...Atlantic Ocean-general, ...4.0120
- SYMBIOSIS OF TROPICAL ZOANTHIDEA AND ZOOXANTHELLAE ...Anthozoa, Messenger RNA , Metabolism, Symbiosis, Zooxanthella, ...5.0642

## Climatology

### Applied Climatology

- THREE-DIMENSIONAL GLOBAL CLIMATOLOGY ...Air Motion-general, General Movement, Patterns, Spectral Analysis, Tables, Compilations, Catalogs, ...3.0067

### Climatography

- ARCTIC AIR, SEA AND ICE ...Arctic, Heat and Radiation Transfer, Heat Exchange, Micrometeorology, Sea Ice, Weather Forecasting, ...3.0088
- THE POSTPLEISTOCENE OCEANOGRAPHY AND BIOLOGY OF THE EASTERN NORTH PACIFIC ...Marine Biology, Ocean History, Pacific Ocean-east, Pacific Ocean-north, ...7.0158

### Physical Climatology

- WEATHER PROGRAM - STATION T-3 ...Arctic Ocean, Drift Stations, Energy Exchange Processes, Heat Budget, Patterns, Weather Forecasting, ...3.0060
- CLIMATE CHANGE OVER THE POLAR OCEAN ...Arctic Ocean, Heat and Radiation Transfer, Heat Budget, Numerical Analysis-other, ...3.0058
- LINE ISLANDS EXPERIMENT ...Boundary Layer Studies, General Synoptic Observations, Line Islands, Satellites, Wind-water Interaction, ...3.0063
- ARCTIC UNDERSEAS RESEARCH, JOINT USA-CANADIAN HEAT BUDGET STUDY ...Arctic, Heat and Radiation Transfer, Instrumentation-general, Sea Ice, ...3.0071

## Clouds

### Cloud Cover

- ATMOSPHERIC EFFECTS ON INCOMING SOLAR RADIATION OVER TROPICAL OCEANS ...Development of Models, Humidity, Pacific Ocean-general, Sunshine, Tropic, ...3.0036

### Cloud Formation and Evolution

- FLUID DYNAMICS CENTER ...Cloud Physics, Coastlines-shorelines, Model Studies, Satellites, Tropical Cyclones, ...8.0178

### Cloud Physics

- FLUID DYNAMICS CENTER ...Cloud Formation and Evolution, Coastlines-shorelines, Model Studies, Satellites, Tropical Cyclones, ...8.0178

### Cloud Temperature

- REMOTE SENSOR OCEANOGRAPHY ...Aerial Photography, Gulf of Mexico, Infrared Radiation, Satellites, Surface Environments, Temperature, ...4.0170

### Cumulus

- ATMOSPHERIC CONDITIONS ASSOCIATED WITH CUMULUS CONVECTION ...Convection, Meteorologic Model Studies, Shear, Tropical Cyclones, Velocity, ...3.0045

### Height - Ceiling

- UTILIZATION OF SYNCHRONOUS SATELLITE DATA ...Patterns, Satellites, Technique Development, Velocity, Weather Forecasting, ...4.0173

### Patterns

- CLOUD PATTERNS RELATED TO SELECTED CIRCULATION SYSTEMS IN EASTERN PACIFIC ...Meteorological Studies, Photographic, Satellites, ...4.0138
- UTILIZATION OF SYNCHRONOUS SATELLITE DATA ...Height - Ceiling, Satellites, Technique Development, Velocity, Weather Forecasting, ...4.0173
- ATMOSPHERIC PROCESSES IN THE TROPICS ...Data Reduction and Analysis, Shear, Statistics-general, Tropic, Tropical Cyclones, ...3.0059
- INTERACTIONS BETWEEN TURBULENCE, CLOUDS, SEA TEMPERATURE ...Data Analysis - General, Indian Ocean-general, Line Islands, Temperature, Turbulence, ...3.0025
- SEVERE STORM CLIMATOLOGY ...Tropical Cyclones, ...3.0054

### Radiation Balance

- EVALUATION OF LOW LEVEL TEMPERATURE GRADIENTS OVER THE LINE ISLANDS NEAR THE EQUATOR ...Atmosphere Radiation, Line Islands, Temperature, ...1.0180
- ANALYSIS AND INTERPRETATION OF SATELLITE RADIATION DATA ...Atmosphere Radiation, Heat Budget, Meteorologic Model Studies, Radiation-general, Satellites, ...4.0009

## Cns and Peripheral Nerves

### Peripheral Nerves

#### Cranial and Nuclli

- VISUAL PROJECTION IN SUBMAMMALIAN VERTEBRATES ...Basic Studies, Fish -other, Retina, Visual Organs, ...5.0238

## Coatings

### Coatings-general

- DRAG-REDUCING ALGAE ...Algae- General, Fouling, Marine Bacteria, Natural Occurring, Secretions and Products, Wear, Friction, ...5.0681
- SUPPORTING SYSTEMS ...Facilities, Underwater-laboratory, ...8.0338
- DESIGN AND CONSTRUCTION ...Environmental Effects-geologic, Hydrodynamic Structures, Safety, Underwater-construction, Water, ...8.0333

## Coatings

## SUBJECT INDEX

### Paint and Organic

#### Paint - General

- NEW APPROACHES TO BIOFOULING ASSAY ...Bioassays, Corrosion Prevention-other, Fouling, Marine Biology (non-specific), Powder, ...5.0757
- FRICITIONAL RESISTANCE HULL SCALE AND COATINGS ...Corrosion General, Maintenance-system, Materials Used Undersea, Wear, Friction, ...8.0227
- EVALUATION OF BOOTTOP PAINT SYSTEMS FOR OCEAN-GOING SHIPS IN A BOOTTOP PAINT TESTING MACHINE ...Catalysts, Primers, Surface Cleaning, Finishing, Test Methods, Water, ...8.0237
- APPLICATION OF ISCC-NBS CENTROID COLORS AND METHOD OF DESIGNATION COLORS ...Colorimetry, Dyes and Coloring, Photography-chemistry, Pigments, Standards, Specifications, ...4.0097

#### Primers

- EVALUATION OF BOOTTOP PAINT SYSTEMS FOR OCEAN-GOING SHIPS IN A BOOTTOP PAINT TESTING MACHINE ...Catalysts, Paint - General, Surface Cleaning, Finishing, Test Methods, Water, ...8.0237

### Cobalt

- SURVIVAL OF FOOD PATHOGENS IN RADIATION PASTEURIZATION SEAFOOD ...Cell. env.(non-specific & Ot.), Crabs, Food Bacteria, Radiation, Radiation Sensitivity-, ...6.0063

### Coelenterata -other

- CHEMISTRY AND BIOLOGY OF SOME COELENTERATE NEMATOCYSTS ...Animal Toxins, Cell. organ. & Organoids -ot, Invertebrate Physiology, Predation, ...5.0776

### Collections

- PORCELLANID CRABS OF AUSTRALIA ...Australia, Crabs, Museum, Nomenclature, Classification, ...5.0354
- COPEPOD CRUSTACEANS PARASITIC ON FISHES ...Copepods, Ectoparasites, Fish -non-specific, Indian Ocean-general, Ships and Cruises, Vertical Distribution, ...5.0368
- THE ALPHEID SHRIMP OF AUSTRALIA ...Animal Taxonomy, Australia, Publications -other, Shrimps - Common, ...5.0425
- TREMATODES OF FISHES OCCURRING ON THE WEST COAST OF NORTH AMERICA. ...Comparative Physiology, Nearctic, Pacific Ocean-general, Trematoda -other, ...5.0636
- ORGANIZATION OF THE ACADEMYS COLLECTION OF RECENT MARINE TERRESTRIAL, AND FRESHWATER INVERTEBRATES ...Animal Taxonomy, Invertebrates -non-specific, ...5.0752
- REVISION OF THE CLASSIFICATION AND PHYLOGENY OF THE SUBORDER BALANOMORPHA (CIRRIPIEDIA - THORACICA) ...Animal Taxonomy, Barnacles, Handbooks, Nomenclature, Classification, Vertical Distribution, ...5.0704
- ECOLOGY OF SKELETAL PLANKTON ...Animal Taxonomy, Flagellates, Gastropods -slugs, conch, snails, Paleoenvironments, Temporal Distribution, Vertical Distribution, ...5.0997
- THE SYSTEMATICS AND ZOOGEOGRAPHY OF THE BRYOZOAN FAUNA OF THE HAWAIIAN ISLANDS ...Animal Taxonomy, Australian, Bryozoa, Hawaii, Range Or Territorial Distr. , ...5.0542
- SHORE FISHES OF ANNOBON AND FERNANDO POO ...Art Work-illustrations-etc, Atlantic Ocean-general, Fish -non-specific, Museum, ...5.0067
- STUDY OF FOSSIL SEA TURTLE COLLECTION AT THE INSTITUT ROYAL DES SCIENCES NATURELLES, BRUSSELS, BELGIUM ...Belgium, Description of Fossils, Internal Structure, Reptiles, Tertiary Period, ...7.0177
- SYSTEMATICS AND DISTRIBUTION OF WORMFISHES (MICRODESMIDAE) ...Animal Taxonomy, Bone, Fish -other, Vertebrate Anatomy, Vertical Distribution, ...5.0115
- STRATIGRAPHIC STUDY OF RADIOLARIA IN DEEP SEA QUATERNARY SEDIMENTS ...Core Analysis, Correlation, Geographical Relations, Order Radiolaria, Quaternary Period, ...7.0178
- ANATOMICAL INVESTIGATIONS OF THE LOBODONTINAE ...Ross Sea, Seals, Vertebrate Anatomy, ...5.0614
- CURATING OF BLAKE PLATEAU CORES ...Continental Shelf, Core Analysis, Florida, ...12.0025
- PYCNOGONIDA OF THE ANTARCTIC REGIONS ...Animal Taxonomy, Antarctica, Benthic Fauna, Sea Spiders, ...5.0647

- PARASITES OF ANTARCTIC VERTEBRATES AND INVERTEBRATES ...Animal Taxonomy, Antarctic Ocean, Ectoparasites, Endoparasites -other, ...5.0658
- CONTRACT FOR-PROCESSING OF USARP ROCK SAMPLES ...Antarctica, Classifications, Coring and Dredging, Petrology, Sampling, Ships and Cruises, Thin Sections, ...7.0060
- COLLECTION AND SURVEY OF NORTH CAROLINA MARINE AND ESTUARINE MOLLUSCA ...Estuaries, Mollusks -non-specific & Other, North Carolina, Survey Studies, ...5.0480
- CRUSTACEAN COLLECTION OF EAST COAST OF UNITED STATES ...Atlantic Ocean-north, Crustacea -non-specific, Estuaries, North Carolina, ...5.0481
- FISH COLLECTION OF NORTH CAROLINA AND WESTERN ATLANTIC FISHES ...Atlantic Ocean-north, Fish -non-specific, Fresh Water, North Carolina, ...5.0133
- REFERENCE COLLECTION OF GULF MARINE ANIMALS ...Animal Taxonomy, Gulf of Mexico. Invertebrates -non-specific, Vertebrates -non-specific, ...5.0657
- MARINE BIOLOGY STUDIES ON FAIRFAX ISLAND ...Australia, Data Acquisition, Islands, Marine Biology, Reefs, ...5.0874
- THE TAXONOMY AND ZOOGEOGRAPHY OF THE MAGELONIDAE OF THE WORLD ...Animal Taxonomy, Lugworms, Marine Segmentedworm, Nomenclature, Classification, World Wide, ...5.0570
- MARINE POLYCHAETE WORMS OFF THE COLUMBIA RIVER, OREGON ...Animal Taxonomy, Lugworms, Marine Segmentedworm, Marine Biology, ...5.0573
- MARINE NEMATODES OF THE CAPE COD AREA ...Animal Taxonomy, Habitat Studies, Nematoda -other, Northeast, ...5.0566
- HYPERIID AMPHIPODS FROM THE GULF OF GUINEA ...Animal Taxonomy, Guinea, Oceanography-general, Shrimp -Amphipods, Vertical Distribution, ...5.0387
- RELATIONSHIP BETWEEN WATER TEMPERATURE AND SIZE OF PARASITIC COPEPODS ...Copepods, Host Specificity, Size, Temperature, Water Temperature-non-specific, ...5.0390
- CANADIAN ARCTIC AND SUBARCTIC POLYCHAETES COLLECTED BY E. H. GRAINGER ...Animal Taxonomy, Lugworms, Marine Segmentedworm, Polar, Sub - Polar, ...5.0576
- SYSTEMATICS OF ANTARCTIC SIPUNCULIDS AND ECHIURIDS COLLECTED BY THE ELTANIN EXPEDITION ...Animal Taxonomy, Antarctica, Expeditions, Invertebrates -non-specific, ...5.0578
- SYSTEMATIC STUDIES ON MOLLUSKS FROM WALTERS SHOALS, INDIAN OCEAN ...Animal Taxonomy, Ethiopian, Indian Ocean-general, Mollusks -non-specific & Other, ...5.0402
- SYSTEMATIC STUDY OF MYODOCOPID OSTRACODS OF THE INDIAN OCEAN ...Animal Taxonomy, Expeditions, Indian Ocean-general, Shrimps - Seed Or Mussel, ...5.0394
- NEPHROPID LOBSTERS OF THE WESTERN ATLANTIC ...Animal Taxonomy, Atlantic Ocean-north, Lobsters, ...5.0396
- MARINE BIOLOGICAL INVESTIGATIONS - TAXONOMIC COLLECTION OF THE FRESH AND SALTWATER FISHES OF ALASKA ...Alaska, Animal Taxonomy, Fish -non-specific, Fresh Water, ...5.0008
- DESCRIPTIONS OF NEW SHARKS ...Animal Taxonomy, Nomenclature, Classification, Publications -other, Sharks, ...5.0057
- BENTHIC PENAEID SHRIMPS (OTHER THAN PENAEUS) FROM THE WESTERN ATLANTIC ...Animal Taxonomy, Atlantic Ocean-general, Continental Shelf, Shrimps - Common, Vertical Distribution, ...5.0404
- SYSTEMATICS OF CARANGID FISHES ...Animal Taxonomy, Handbooks, Maturity & Growth Stages, Pompanos, Scads, Jacks, Species, Comparison of , ...5.0061
- COLLECTION AND EXTRACTION OF MARINE INVERTEBRATES AND PLANTS ...Extracts, Lyophilization, Marine Plants, ...5.0697

### Columbia River

- ECOLOGICAL STUDIES OF RADIOACTIVITY IN THE COLUMBIA RIVER ESTUARY AND ADJACENT PACIFIC OCEAN ...Contamination - Water, Organism Sampling Devices, Pacific Ocean-north, Pollutants - Path of , Radioactivity-general, ...6.0172

## SUBJECT INDEX

## Communication Systems

**BOTTOM CURRENTS AND THE MOVEMENT OF SEDIMENT ACROSS THE CONTINENTAL SHELF** ...Bed Load, Continental Shelf, Puget Sound, Sediment Transport-general, Unsteady, ...2.0047

**COLUMBIA RIVER EFFECTS IN THE NORTHEAST PACIFIC** ...Bed Load, Benthonic-bottom, Mixing, Ocean Waves - Currents, Oceanic Fronts, ...2.0065

**COLUMBIA RIVER STUDIES** ...Contamination - Water, Invertebrates, Oysters, Pollution Effects, Radioactivity-general, Reproductive System, ...5.0518

**MOVEMENT OF RADIONUCLIDES IN THE COLUMBIA RIVER ESTUARY** ...Discharge, Estuaries, Radioactivity, Salinity, Sediment Transport-other, ...6.0179

**COLUMBIA RIVER SEDIMENT STUDIES** ...Geochemical Analysis, Radioactivity-general, Radiochemical Analysis, Sediments, Self-purification, ...6.0190

**SAMPLING OF MARKED COHO** ...Censusing, Mark, Tag Or Capture -other, Number Or Density, Salmon -coho, chinook, sockeye..., Stocking of Fish & Shellfish, ...5.0162

**MARKED COHO LIBERATION** ...Captive Rearing, Mark, Tag Or Capture -other, Puget Sound, Salmon -coho, chinook, sockeye..., ...5.0164

**ANALYSIS OF SALMONID SCALES** ...Age, Animal Taxonomy, Growth Rate, Rainbow Trout, Steelhead Trout, Salmon -coho, chinook, sockeye..., Scales, ...5.0315

**MANAGEMENT OF COLUMBIA RIVER COMMERCIAL FISHERY** ...Aquatic Ecology, Commercial Fishing, Legislation, Salmon -coho, chinook, sockeye..., ...5.0165

**MOVEMENT OF RADIONUCLIDES IN THE LOWER COLUMBIA RIVER** ...Absorbed Load, Adsorption Capacity, Estuaries, Pollutants - Path of, Radioactivity-general, ...6.0178

**THE MOVEMENT OF RADIONUCLIDES IN THE COLUMBIA RIVER ESTUARY** ...Absorbed Load, Adsorption Capacity, Estuaries, Pollutants - Path of, Radioactivity-general, ...6.0180

**JUVENILE MIGRATION RATES** ...Mark, Tag Or Capture -other, Migration, Salmon & Trout - Non-specific, Snake River, Water Environment -other, ...5.0223

**ADULT MIGRATION RATES** ...Environmental Ecology, Management -other, Migration, Pre-impoundment Sites, Salmon -coho, chinook, sockeye..., ...5.0173

**SALMON PRODUCTION IN AREAS MADE INACCESSIBLE BY DAMS** ...Aquatic Ecology, Engineering Structures-general, Environmental Ecology, Salmon & Trout - Non-specific, Spawning & Nesting Sites, ...5.0224

**ADULT SALMON BEHAVIOR STUDIES IN RIVERS AND AT DAMS %SONIC TRACKING** ...Construction Land Use Effects, Migration, Pre-impoundment Sites, Salmon & Trout - Non-specific, Telemetry, ...5.0169

**PREDICTION OF ENVIRONMENT** ...Biological-general, Environmental Ecology, Low Temp. -but Above 32f, Physical-general, Reservoirs and Impoundments, Salmon & Trout - Non-specific, Snake River, Temperature, Thermal Pollution, ...5.0225

**EFFECTS OF INDUSTRIAL EXPANSION ON THE AQUATIC ENVIRONMENT OF ESTUARINE AREAS** ...Estuaries, Salmon & Trout - Non-specific, ...5.0226

**EFFECT OF SUPERSATURATION OF DISSOLVED NITROGEN ON MIGRATING SALMONIDS** ...Aquatic Ecology, Gases, Dissolved -water, Migration, Mortality Rates, Nitrogen, Salmon & Trout - Non-specific, ...5.0221

### Committee-support

**COMMITTEE ON OCEANOGRAPHY** ...Air-sea Boundary-general, Marine Environments-general, Oceanography-general, Radioactivity-general, ...11.0016

**SUPPORT OF THE COMMITTEE ON OCEANOGRAPHY OF THE NATIONAL ACADEMY OF SCIENCES** ...Oceanography-general, Publications -other, ...12.0022

**RESEARCH NEEDS FOR REMOTE SENSING OF THE ENVIRONMENT** ...E M Radiation-general, Remote Sensing-general, ...4.0141

**RESEARCH PANELS IN MARINE BIOLOGY** ...Marine Biology (non-specific), ...11.0009

**OCEANOGRAPHY STUDY ACTIVITIES** ...Consultants, Advisory Services, Oceanography-general, ...11.0007

**TIDAL FLOWS IN RIVERS AND HARBORS** ...Harbors, Hydraulics-general, Streams, Tides, ...2.0087

## Commodity Development Research

### New Ag Uses of Natural Resource

#### Ag Uses of Nat. resource-other

**ECOLOGICAL STUDIES OF THE MARINE RED ALGA CHONDRUS CRISPUS STACKHOUSE** ...Algal Culture, Chondrus, Growth and Differentiation, Reproductive Physiology, ...5.0710

**THE ECONOMIC POTENTIAL OF THE MINERAL AND BOTANICAL RESOURCES OF THE U.S. CONTINENTAL SHELF AND SLOPE** ...Continental Shelf, Continental Slope, Estimates of Reserves, Ocean Mining, Potential of Deposit, ...7.0011

**DETERMINATION OF THOSE MARINE SPECIES HAVING THE GREATEST KNOWN POTENTIAL FOR THE COMMERCIAL FISHERY** ...Alginate, Commercial Fishing, Food Supply, Fucus, Phaeophyta (non-specific & Ot), ...5.0098

**NEW DRUGS FROM THE SEA, ESPECIALLY ANTIBIOTICS** ...Antibiotics, Caribbean Sea, Marine Plants, Pacific Ocean-general, ...6.0123

#### Fish & Shellfish

**DEVELOPMENT OF NEW HUMAN FOOD PRODUCTS FROM SHAD** ...Processing, Sausage and Variety Meats, Shad, Shelf Life & Storage, Smoking, ...6.0065

**CONSUMER EDUCATION AND MARKET DEVELOPMENT** ...Atlantic Ocean-north, Northeast, ...6.0032

**EFFECT OF STORAGE ON FISH MUSCLE PROTEINS** ...Fish -non-specific, Food Raw Quality, Muscle Proteins, Organoleptic Studies, Protein, ...6.0062

**OPERATION AND MAINTENANCE OF THE OREGON STATE UNIVERSITY SEAFOODS LABORATORY** ...Facilities, Fish -non-specific, Industry Land Use Effects, Oregon, ...12.0042

**UTILIZATION AND PREPARATION OF FISH PROTEIN CONCENTRATE** ...Chemical Analysis, Fish Protein Concentrate, Nutritive Value, Organoleptic Studies, Proteins, ...6.0125

**MARKETING EFFICIENCY IN A COOPERATIVE FOOD-FISH PROCESSING PLANT, A CASE STUDY** ...Design, Machinery, Equipment, Fish -non-specific, Freezing, Processing, Shelf Life & Storage, ...6.0079

**CHEMISTRY OF FISH OILS AND THEIR UTILIZATION** ...Fats, Fats and Oils -other, Fish -non-specific, Oilseed Processing Technology, ...6.0082

**PRESERVATION AND DEVELOPMENT OF FOOD PRODUCTS** ...Fish -non-specific, Food Raw Quality, Food Transport -other, Packaging, Processed Product Quality, ...6.0084

**PROCESSING KING CRAB** ...Commercial Fishing, Crabs, Fish Meals, Freezing, Organoleptic Studies, ...6.0003

**IRRADIATION SERVICES AND STUDIES** ...Fish -non-specific, Instrumental Services, Radiation, ...6.0036

**COMMERCIAL BENEFIT STUDIES** ...Commercial Fishing, ...6.0037

**PROCESSING AND PRODUCT DEVELOPMENT OF EDIBLE FISH AND SHELLFISH** ...Commercial Fishing, ...6.0047

**PRODUCT/PROCESSING DEVELOPMENT RESEARCH** ...Design, Machinery, Equipment, Fish -non-specific, Freezing, Radiation, Refrigeration, ...5.0988

**UTILIZATION OF FRESHWATER FISH FOR ANIMAL FOODS** ...Fish Meals, Heating, Steaming, Sea Lions, Fur Seals, Thiaminase, ...5.0989

## Communication Systems

### Radio

**NAVIGATION RECEIVER** ...Navigation, Navigation Systems-other, Sonar. Transducers, Transponders, ...4.0112

**WWVB-WWVL BROADCASTS** ...Frequency Standards, Low Frequency, Navigation, Signal Generators, Standards, Specifications, Time Measurements, Very Low Frequency, ...4.0090

### Sonar and Echo Sounding

**EXPERIMENTAL HIGH RESOLUTION SUB-BOTTOM PROFILING SYSTEM** ...Amplifiers, Receivers, Sonar, Subbottom, Transducers, ...8.0109

**ADVANCE SONAR SYSTEMS** ...Data Display, Instrumental Services, Sonar, Testing Facilities, Transducers, ...8.0096

## Communication Systems

- COOK INLET ESCAPEMENT ENUMERATION STUDY  
...Alaska, Censusing, Migration, Organism Sampling Devices,  
Salmon -coho, chinook, sockeye..., Sonar, ..8.0112
- CTFM SONAR ...Behavioral Ecology, Commercial Fishing,  
Locomotion -animal, Telemetry, Tuna, Mackerel, Albacore... ,  
...8.0058

### Telephone

- LOW NOISE MULTI-CHANNEL HYDROPHONE CABLE  
...Amplifiers, Bathymetry, Cables and Transmission Lines,  
Seismic Studies, Transmission Lines, ...8.0145

### Transponders

- NAVIGATION RECEIVER ...Navigation, Navigation  
other, Radio, Sonar, Transducers, ...4.0112

## Communication Theory

### Linguistics

- COMMUNICATIONS STUDIES ON TURSIOPS TRUNCATUS  
AND OTHER DELPHINIDS ...Central Nervous System, Mam-  
mals, Neuristors Neurol Nets, Sound Production, ...5.0587

### Man Machine Systems

#### Real Time Systems

- WOODS HOLE SHIPBOARD DATA PROCESSING ...Data  
Reduction and Analysis, Digital Computer Applications, Gravi-  
ty Studies, Magnetic Studies, Navigation, ...4.0031
- DEVELOPMENT OF ANALYSIS TECHNIQUES AND EQUIP-  
MENT FOR CLASSIFICATION OF TRANSIENT  
HYDROACOUSTIC SIGNALS ...Acoustical, Sonar, Technique  
Development, ...1.0070
- OCEANOGRAPHIC INFORMATION PROCESSING  
TECHNOLOGY ...Computer Applications, Data & Statistics  
Storage, Data Reduction and Analysis, Information Retrieval  
Methods, Information Storage and File, Oceanography-general,  
...4.0023

### Statistical Information Theory

- NATIONAL DATA PROGRAM FOR THE MARINE ENVIRON-  
MENT ...Oceanography-general, ...4.0003
- PHOTOGRAPHIC IMAGE EVALUATION ...Cybernetics, Imag-  
ing, Photography-chemistry, ...4.0053

### Coding

- DIGITAL OUTPUT SURVEY DEPTH SOUNDING  
...Bathymetry, Digital Computer Applications, Readout  
Systems, Sonar, Sound Gear, ...8.0123

### Signal Detection

- DEVELOPMENT OF ANALYSIS TECHNIQUES FOR CLASSI-  
FYING TRANSIENT HYDROACOUSTIC SIGNALS  
...Acoustical, Acoustics, Seismic Studies, Transient, ...1.0068

## Computer Electronics

### Analog-digital Converters

- DIGITIZING SYSTEM FOR OCEANOGRAPHIC DATA ...Ap-  
plied Electronics, Bathymetry, Digital Computers, Instrumental  
Services, Seismic Studies, Spectral Analysis, ...4.0039

### Data Acquisition Systems

- TELEMETERING BUOY SYSTEM FOR OCEANOGRAPHIC  
RESEARCH AND ENVIRONMENTAL PREDICTION  
...Buoys, Meteorological Studies, Moorings, Navigation Com-  
munication, Oceanography-general, Technique Development,  
Telemetry-other, ...8.0268
- DEVELOPMENT OF AN ELECTRONIC METHOD FOR THE  
AUTOMATIC SHIPBOARD RECORDING OF DRILL PER-  
FORMANCE DATA ...Data Acquisition, Drilling and Coring,  
Non-electrical Measurements, Recording Systems, Technique  
Development, ...8.0247

### Data Display

- ADVANCE SONAR SYSTEMS ...Instrumental Services, Sonar,  
Sonar and Echo Sounding, Testing Facilities, Transducers,  
...8.0096

## SUBJECT INDEX

### Data Transmission Systems

- STUDIES OF EARTHQUAKES IN THE CAPE MENDOCINE  
AREA ...Applied Electronics, Earthquake Location,  
Earthquakes, Seismic Studies, Telemetry-other, ...7.0088
- OCEAN SYSTEM TELEMETRY STUDY ...Applied Electronics,  
Buoys, Data Acquisition, Moorings, Telemetry-other, ...4.0002

### Digital Computers

- DIGITIZING SYSTEM FOR OCEANOGRAPHIC DATA  
...Analog-digital Converters, Applied Electronics, Bathymetry,  
Instrumental Services, Seismic Studies, Spectral Analysis,  
...4.0039

### Readout Systems

- DIGITAL OUTPUT SURVEY DEPTH SOUNDING  
...Bathymetry, Coding, Digital Computer Applications, Sonar,  
Sound Gear, ...8.0123
- DEVELOPMENT OF FISHNET BATHYKMOGRAPH ...Com-  
mercial Fishing, Fishing Gear, Instrumental Services, Nets,  
...8.0102

### Recording Systems

- FOSDIC APPLICATION TO CURRENT-METER RECORDS  
...Currents-ocean, Data & Statistics Storage, Research -  
Development, Technique Development, Water Motion Recor-  
ders, ...4.0021
- DEVELOPMENT OF AN ELECTRONIC METHOD FOR THE  
AUTOMATIC SHIPBOARD RECORDING OF DRILL PER-  
FORMANCE DATA ...Data Acquisition, Data Acquisition  
Systems, Drilling and Coring, Non-electrical Measurements,  
Technique Development, ...8.0247
- COAST GUARDS COASTAL OCEANOGRAPHIC MONI-  
TORING NETWORK ...Automatic Stations, Buoys, Instrumental  
Services, Telemetry-other, Transducers, ...4.0006

## Computer Methods -general

- ECOLOGICAL, EXPERIMENTAL AND COMPUTER STUDIES  
OF ENDOGENOUS RHYTHMICITY ...Biological Rhythms,  
Brain, Crustacea -non-specific, Locomotion, ...5.0361
- EXPERIMENTAL AND BIOMATHEMATICAL ANALYSIS OF  
THE PHENOMENON OF ATTACK ...Behavioral Ecology,  
Bluegills, Bream, Environmental Physiology, Largemouth Bass,  
Minnows, Predation, ...5.0535
- A BIBLIOGRAPHY OF THE MARINE MOLLUSKS OF THE  
INDO-PACIFIC REGION ...Animal Taxonomy, Asia, Bibliog-  
raphy, Mollusks -non-specific & Other, ...5.0398
- AUTOMATIC DATA PROCESSING - SEABIRD DISTRIBU-  
TION ...Birds -non-specific, Nomenclature, Classification,  
Range Or Territorial Distr. , World Wide, ...4.0020
- COLLECTION, COMPILATION, AND ANALYSIS OF GULF  
CATCH STATISTICS AND LOGBOOK DATA ...Alewife, men-  
haden, shad, herring, Commercial Fishing, Fish Studies -other,  
...5.0126

## Computers

### Analog Computer Applications

- ACQUISITION AND INTERPRETATION OF OCEANIC  
GRAVITY DATA ...Data Reduction and Analysis, Gravity Stu-  
dies, Ridges, Structural Analysis, Trenches, ...4.0033
- MARINE GRAVITY ...Geophysical Equipment, Gravity Studies,  
Navigation, Satellites, Ships and Cruises, Technique Develop-  
ment, ...7.0128
- FISH POPULATION STUDY ...Environmental Ecology, Fish -  
other, Killifishes - Cyprinodon, Population Dynamics, Tilapia,  
Cichlids, ...5.0175

### Computer Applications

- COMPUTER PROCESSING OF MICROSCOPE IMAGERY  
...Microscopy, Resolution, ...8.0063
- CATAMARAN CONTAINERSHIP FEASIBILITY ...Barges-tow-  
boats, Freight, Models, Storage, ...8.0273
- AMBIENT SEA NOISE INVESTIGATION ...Acoustic, Acousti-  
cal, Noise, Waves, Wind-water Interaction, ...1.0048
- SIMULATION MODELS OF SHALLOW-WATER AND  
COASTAL ENVIRONMENTS ...Gulf of Mexico, Hydrology-  
general, Model Studies, Sedimentation, Shoreline - Coastline,  
...4.0066

- STUDY OF THE EXCHANGE OF CARBON DIOXIDE BETWEEN THE ATMOSPHERE AND THE OCEANS ...Carbon, Gases, Meteorological Studies, Particle-gas Transfer, ...1.0081
- DESIGN STUDY - AN OPTIMUM FISHING VESSEL FOR THE GEORGES BANK GROUND FISH FISHERY ...Atlantic Ocean-north, Commercial Fishing, Fishing Gear, Naval Architecture-general, Other-design-and-construction, ...8.0288
- AN ANALYSIS OF PHOSPHORUS AND NITROGEN COMPOUNDS IN TIDAL MARSHLAND DRAINAGE - LABORATORY PROCEDURES ...Colorimetry, Conductrometry, Management, Nitrogen, Phosphate, Phosphite, Swamps-marshes, ...5.0761
- EFFECTS OF MATERIAL VARIATIONS IN THE COMPUTERIZED DESIGN OF PRIMARY HULL STRUCTURE ...Bulkheads, Engineering Studies-other, Low Alloy Steels, Materials Used Undersea, Strength, Cohesion, ...8.0298
- AN OPTIMUM LOADING SEQUENCE FOR CONTAINERSHIPS ...Engineering Studies-other, Freight, Loading/unloading, Model Studies, Packing, ...8.0033
- THE INVERSE PROBLEM IN PROPELLER DESIGN ...Marine Propulsion, Rotors-propellers, ...8.0299
- MODEL FOR PRELIMINARY EVALUATION OF TOTAL CARGO TRANSPORTATION TIME AND TRANSPORTATION COST FOR ADVANCED CARGO TRANSPORTATION SYSTEMS ...Costs, Freight, Transportation Systems, Yards-docks, ...4.0067
- PRELIMINARY CALCULATION OF THE LIFT AND DRAG AND ANGLE OF ATTACK FOR SUBMERGED HYDROFOILS ...Drag, Hydrofoils Crafts, Lift, .. 8.0278
- MODEL FOR THE PRELIMINARY DESIGN OF SURFACE EFFECT SHIPS ...Drag, Hydrofoils Crafts, Marine Propulsion, Other Models, Ships and Cruises, Waves, ...8.0279
- OCEAN DYNAMICS IN THE STRAITS OF GIBRALTAR AND ADJACENT AREAS ...Acoustical, Anti-submarine-warfare, Hydrodynamics, Model Studies, Strait of Gibraltar, Submerged Ships, ...1.0141
- OCEANOGRAPHIC INFORMATION PROCESSING TECHNOLOGY ...Data & Statistics Storage, Data Reduction and Analysis, Information Retrieval Methods, Information Storage and File, Oceanography-general, Real Time Systems, ...4.0023
- PREDICTION OF SOUND FIELDS BY NORMAL MODE AND OTHER THEORY ...Acoustical, Attenuation, Transmission, ...1.0011
- NUMERICAL PREDICTION ...Data Reduction and Analysis, Meteorological Studies, Prediction, Weather Display Systems, Weather Forecasting, ...4.0041
- UNSTEADY FLOW AND SALINE INTRUSION IN ESTUARIES ...Channels, Model Studies, Morphology-general, Saline Water Intrusion, Unsteady Flow, ...2.0066
- REMOTE SENSING, EVERGLADES AREA, FLORIDA ...Florida, Remote Areas, Swamps-marshes, Visible Light, Water Properties-general, ...4.0161
- DISTRIBUTION AND ABUNDANCE OF ZOOPLANKTON IN LAKE ERIE ...Aquatic Ecology, Environmental Ecology, Inter-biotic Relat.(non-specif), Lake Erie, Population Dynamics, ...5.0802
- SPACE APPLICATIONS TO FISHERIES OCEANOGRAPHY (GULF OCEANOGRAPHY PROGRAM) ...Commercial Fishing, Forecasting-prediction, Satellites, Water Environment - other, ...4.0172
- COMPUTOR SIMULATION OF HYDROID COLONIES ...Growth Rate, Hydra, Portuguese Man-of-war, ...5.0651

### Digital Computer Applications

- DIGITAL OUTPUT SURVEY DEPTH SOUNDING ...Bathymetry, Coding, Readout Systems, Sonar, Sound Gear, ...8.0123
- DECOMPRESSION TABLE DEVELOPMENT ...Decompression Sickness, Divers, Diving and Scuba, Mathematical Biophysic, Medical Studies, Tables, Compilations, Catalogs, ...6.0098
- MARINE DIGITAL GRAVITY PROFILING SYSTEM ...Field Characteristics-general, Gravity Studies, Navigation, Special Mission Ships, ...4.0038
- GRAVITY AND MAGNETIC DATA COLLECTED DURING THE INTERNATIONAL INDIAN OCEAN EXPEDITION AND IN THE CARIBBEAN SEA ...Data Analysis - General, Data Reduction and Analysis, Gravity Studies, Indian Ocean-general, Magnetic Studies, Research - Development, ...4.0030
- FIELD DETECTION AND MEASUREMENT OF INTERNAL WAVES ...Acoustical, Density, Temperature, Tides, Waves-internal, ...2.0125

- WOODS HOLE SHIPBOARD DATA PROCESSING ...Data Reduction and Analysis, Gravity Studies, Magnetic Studies, Navigation, Real Time Systems, ...4.0031
- AUTOMATED FLOW SYSTEM CALIBRATION ...Aircraft, Controls, Fluids, Transducers, ...8.0071

### Hybrid Computer Applications

- DELAY LINE COMPUTER ...Acoustical, Heat and Radiation Transfer, Meteorological Studies, Model Studies, Water Motion, ...4.0080
- USE OF ON-LINE COMPUTERS FOR ENVIRONMENTAL RESEARCH ...Acoustical, Air-sea Boundary-general, Development of Models, Meteorological Studies, Water Motion, ...4.0081

### Conductivity

- EFFECT OF PRESSURE ON CONDUCTIVITY OF SOLUTIONS ...Acoustical, Density, Electrical, Electrolytes, Pressure, Sulfate, Sulfite, Viscosity, ...1.0078

### Conjunctive Use

- SURFACE AND GROUND WATER POTENTIALITIES OF THE MULLICA RIVER BASIN ...Aqueducts, Economic Impact, Estuaries, Systems Analysis, Water Quality-general, Water Transfer, ...9.0014

### Connecticut

- MILLSTONE POINT TEMPERATURE SURVEY ...Atomic Plants, Electric Power Plants, Salinity, Temperature, ...1.0181
- ORGANIC DEBRIS ON CONNECTICUT BEACHES AND SHORES ...Catabolism and Degradation, Identification, Organic Matter, Physical-general, Shoreline - Coastline, ...6.0143

### Connecticut River

- POTENTIAL FISHERY FOR RIVER HERRINGS IN CONNECTICUT RIVER ...Alewife,menhaden,shad,herring, Data Acquisition, Life History Studies, Nets, Spawning & Nesting Sites, Survey Studies, ...5.0202
- A STUDY OF THE RATE AND PATTERN OF SHAD MIGRATION IN THE CONNECTICUT RIVER UTILIZING SONIC TRACKING APPARATUS ...Alewife,menhaden,shad,herring, Migration, Spawning & Nesting Sites, Tags, Telemetry, ...5.0046
- STUDY OF THE RIVER PHASE OF THE LIFE HISTORIES OF ALOSA PSEUDOHARENGUS AND AESTIVALIS ...Alewife,menhaden,shad,herring, Aquatic Ecology, Life History Studies, Spawning & Nesting Sites, ...5.0245

### Conservation-general

- ISLAND STUDY ...Islands, Land Economics, Recreation Sites, Types of Resources, United States-general, ...9.0005

### Consolidation

- BOTTOM SOIL PROPERTIES AND FOUNDATIONS ...Bearing Capacity, Foundations-general, Mechanical Properties, Shear Strength, Soil Testing-general, ...8.0332

### Construction Sites

- PRE-CONSTRUCTION ENVIRONMENTAL SURVEY ...Construction Land Use Effects, Continental Shelf, Environmental Ecology, Organism Sampling Devices, Reefs, ...5.0907

### Consultants, Advisory Services

- SEARCH AND RESCUE - U.S. COAST GUARD ...Economic Theory, Operational Aspect, Safety, ...6.0130
- OCEANOGRAPHY STUDY ACTIVITIES ...Committee-support, Oceanography-general, ...11.0007
- WOODS HOLE STUDY ACTIVITIES ...Acoustical, Engineering Studies-general, General Information Services, ...11.0031
- CONSULTATIVE AND ADVISORY SERVICES - BATTERY PROBLEMS ...Batteries, Instrumental Services, Standards, Specifications, ...11.0021
- FEASIBILITY STUDY ON HORIZONTAL TEST TANK FOR MODEL STUDIES AND COMPONENT TESTING ...Dredging, Equipment, Model Studies, Ocean Mining, Tanks, ...12.0007

## SUBJECT INDEX

### Continental Shelf

- DEVELOPMENT OF A SENSOR, INSTRUMENTATION AND COMMUNICATION SYSTEM FOR A DEEP OCEAN MANNED HABITAT (ATLANTIS) ...Navigation Communication, Ridges, Safety, Submersibles, Underwater-laboratory, ...8.0107
- DEEP OCEAN TECHNOLOGY ...Diving and Scuba, Survey Studies, Technique Development, ...8.0049
- THE EVALUATION AND USE OF SUBMERGED RESEARCH VESSELS IN STUDYING CONTINENTAL SHELF ENVIRONMENTS ...Experiments and Tests, Operational Aspect, Submerged Ships, Submersibles, ...4.0128
- BOTTOM CURRENTS AND THE MOVEMENT OF SEDIMENT ACROSS THE CONTINENTAL SHELF ...Bed Load, Columbia River, Puget Sound, Sediment Transport-general, Unsteady, ...2.0047
- BIOLOGICAL PRODUCTIVITY IN THE SARGASSO SEA, THE GULF STREAM AND IN THE ATLANTIC COASTAL WATERS OFF CAPE HATTERAS ...Phytoplankton, Primary Productivity, Productivity - Food Chain, Proteins, ...5.1005
- RADIOISOTOPIC TRACER STUDY TO INVESTIGATE THE MECHANICS OF LITTORAL TRANSPORT AROUND POINT CONCEPTION, CALIFORNIA ...Distribution, Ocean Waves - Currents, Sediment Transport-other, Tracers, Xenon, ...7.0216
- MARINE GEOLOGY ...California, Distribution, Ocean Waves - Currents Sedimentation, Submarine Canyons, ...7.0260
- MARINE GEOLOGY AND GEOPHYSICS ...Crust, Geophysics-general, Ocean Basins, Sedimentation, Textures-structures, ...7.0048
- THE ECOLOGY OF COCCOLITHOPHORIDACEAE IN THE ATLANTIC COASTAL WATERS OF THE UNITED STATES ...Atlantic Ocean-general, Water Properties-general, ...5.0841
- SUPPORT OF UNIVERSITY OF GEORGIA MARINE INSTITUTE RESEARCH VESSEL OPERATION ...Continental Slope, Distribution, Environmental Ecology, Estuaries, Geomorphology-topography, Marine Biology, Pollution Sources-general, Ships and Cruises, Textures-structures, ...12.0026
- ASCIDIAN SPECIES ON THE ATLANTIC CONTINENTAL SHELF ...Animal Taxonomy, Atlantic Ocean-north, Range Or Territorial Distr., Sea Squirts - Tunicates, Vertical Distribution, ...5.0609
- PHYSICAL AND CHEMICAL PROPERTIES OF THE SHELF AND SLOPE WATERS OFF NORTH CAROLINA ...Atlantic Ocean-north, General Sea Water Chemistry, North Carolina, Oceanic Fronts, Water Properties-general, ...1.0156
- MODERN FORAMINIFERA OFF OREGON ...Foraminifera, Oregon, Pacific Ocean-general, Vertical Distribution, ...5.0820
- EARLY DIAGENESIS OF CARBONATE SEDIMENTS IN A SUPRATIDAL EVAPORITIC SETTING ...Carbonates-general, Diagenesis, Origin, Persian Gulf, Sedimentary History, Sedimentation, ...7.0252
- CURATING OF BLAKE PLATEAU CORES ...Collections, Core Analysis, Florida, ...12.0025
- STRATIGRAPHY OF UNCONSOLIDATED SEDIMENTS ON THE CONTINENTAL SHELVES OF THE CHUKCHI AND NORTHERN BERING SEAS ...Bering Sea, Chuckchi Sea, Core Analysis, Correlation, Oceanic Fronts, Sedimentary History, ...7.0286
- SYMPOSIUM ON RESEARCH NEEDS AND PRIORITIES FOR MARINE GEOLOGY OF THE GULF OF MEXICO ...Gulf of Mexico, Instrumentation-general, Mechanical Properties, Meetings, Sedimentation, Structural Studies, ...11.0040
- STUDIES OF BAROCLINIC TIDAL MOTIONS ON THE CONTINENTAL SHELF OF THE EASTERN UNITED STATES ...Eastern, Meteorological Studies, Sea Level Variations, Tides, Water Motion, ...2.0081
- PHYSICAL OCEANOGRAPHY IN OREGON SHELF AND SLOPE WATERS ...Continental Slope, Hydrodynamics, Mixing, Oregon, Thermodynamics, ...2.0076
- THE ECONOMIC POTENTIAL OF THE MINERAL AND BOTANICAL RESOURCES OF THE U.S. CONTINENTAL SHELF AND SLOPE ...Ag Uses of Nat. resource-other, Continental Slope, Estimates of Reserves, Ocean Mining, Potential of Deposit, ...7.0011
- MARINE GEOPHYSICS ...Acoustical, Continental Slope, Mechanical Devices, Seismic Studies, Textures-structures, ...7.0146
- SEISMIC, MAGNETIC, AND ACOUSTIC STUDIES ON THE CONTINENTAL MARGIN OFF WASHINGTON ...Acoustical, Mechanical Properties, Subbottom, Textures-structures, Washington, ...7.0151
- GRAVITY SURVEY ARCTIC OCEAN ...Bathymetry, Beaufort Sea, Geodetic Surveys, Gravity Studies, Seismic Studies, Structural Studies, ...7.0154
- INTERNAL WAVE STUDY ...Acoustical, Atlantic Ocean-north, Thermal, Tides, Waves-internal, ...2.0099
- JOINT STUDY OF THE CONTINENTAL MARGIN OFF OREGON BY OREGON STATE UNIVERSITY AND THE UNITED STATES GEOLOGICAL SURVEY ...Geophysics-general, Mineralogy, Ocean Basins, Oregon, Potential of Deposit, ...7.0045
- MARINE GEOLOGY OF THE CALIFORNIA CONTINENTAL BORDERLAND WITH EMPHASIS ON FUTURE ECONOMIC DEVELOPMENT AND GENERAL RESOURCE VALUE ...California, Clay Minerals-general, Heavy Elements, Mineralogy, Ocean Mining, ...7.0010
- KODIAK KING CRAB ENVIRONMENTAL ZONE SURVEY ...Alaska, Environmental Ecology, Horseshoe Or King Crabs, Reproductive System, ...5.0348
- SPRING DISTRIBUTION OF FISHES ...Commercial Fishing, Data Acquisition, Environmental Ecology, Fish -non-specific, Spring, Temporal Distribution, ...5.0154
- DISTRIBUTION OF LIFE WITH DEPTH ...Motion Pictures - non-specific, North Carolina, Photography, Vertical Distribution, ...5.0885
- PACIFIC SALMON FISHERIES - ECONOMICS OF MANAGEMENT ...Appraisals-general, International, Legal Review, Legal Studies-general, Ocean Mining, Science & Technology, ...10.0006
- SHALLOW WATER MEIOBENTHOS OF THE BERMUDA PLATFORM ...Benthic Fauna, Benthonic-bottom, Bermuda, ...5.0649
- OCEANOGRAPHY ATLAS OF THE NORTH CAROLINA CONTINENTAL MARGIN ...Atlases-maps, Mapping, North Carolina, ...4.0059
- MARINE MINERAL RESOURCES OF THE NORTH CAROLINA CONTINENTAL MARGIN ...North Carolina, Resource Inventories, ...7.0026
- OCEANOGRAPHIC SURVEY OF CONTINENTAL SHELF WATERS OFF CHESAPEAKE BAY ...Chesapeake Bay, Marine Biology, Salinity, Temperature, ...4.0135
- BENTHIC MARINE FAUNA OF THE UPPER SHELF OFF VIRGINIA ...Animal Taxonomy, Benthic Fauna, Benthonic-bottom, Organism Sampling Devices, Virginia, ...5.0660
- EVOLUTIONARY DEVELOPMENT OF CUSPATE FORELANDS ...Beach, Depositional Features-other, Deposits-other, Development, North Carolina, Shoreline - Coastline, ...7.0296
- COASTAL AND CONTINENTAL SHELF SEDIMENTATION ...Argentina, Distribution, Sediment Transport-other, Sedimentation, Shoreline - Coastline, ...7.0212
- MODERN VERSUS RELICT SEDIMENT PATTERNS ON CONTINENTAL MARGINS ...Bermuda, Canada, Distribution, Quaternary Period, Sea Level Changes, ...7.0214
- BIOLOGICAL OCEANOGRAPHY & DETERIORATION - SHALLOW WATER MARINE SEDIMENTS & WATER COLUMN BACTERIA ...Biology, Instrumentation-general, Marine Bacteria, Nephelometry, Vertical Distribution, ...5.0807
- SHALLOW WATER OCEANOGRAPHY ...Acoustical, Hydrodynamics, Rhode Island, Surface Environments, Transmission, ...1.0030
- SHALLOW WATER OCEANOGRAPHY ...Environmental Effects-geologic, Forecasting-prediction, Pressure, Subsurface Environments, Waves, ...1.0172
- DIVER-ASSISTED OCEANOGRAPHY ...Benthonic-bottom, Currents-bottom, Diving and Scuba, Geomorphology-topography, Mapping, Waves-internal, ...4.0098
- MARINE HYDROLOGY AND GEOCHEMISTRY, ATLANTIC CONTINENTAL SHELF AND SLOPE ...Atlantic Ocean-north, Chemistry, Continental Slope, Saline Water Intrusion, Sedimentation, ...7.0070
- RESOURCES OF THE BERING CONTINENTAL MARGIN ...Bering Sea, Dimensions-distribution, Geology-general, Ocean History, Ocean Mining, ...7.0016
- CENTRAL CALIFORNIA CONTINENTAL MARGIN ...California, Continental Slope, Geologic Maps, San Andreas Fault, Structural Studies, ...7.0036
- HEAVY METALS AND SEDIMENTATION PROCESS OF THE NORTH CAROLINA SHELF ...Bottom Sampling Device, Heavy Minerals, Mineralogy, North Carolina, Sedimentation, ...7.0021
- UNIVERSITY OF SOUTHERN CALIFORNIA CONTRACT - CHANNEL ISLANDS AND BASINS SOUTHERN CALIFOR-

## SUBJECT INDEX

## Cooperative-studies

- NIA CONTINENTAL MARGIN ...California, Continents, General Mineralogic Properties, Geochronology-general, Mineralogy, ...7.0223
- EAST COAST CONTINENTAL MARGIN WOODS HOLE OCEANOGRAPHIC INSTITUTE CONTRACT ...Chemistry, Estuaries, Interstitial - Connate Water, Maine, ...4.0119
- WORLD WIDE MARINE MINERAL RESOURCES ...Continental Slope, Economics, Mapping, Potential of Deposit, Resource Inventories, ...4.0056
- GEOLOGICAL, GEOPHYSICAL, OCEANOGRAPHIC, AND ECOLOGICAL DATA ON WORLDWIDE BASIS. ON AREAS OF HEAVY METALS POTENTIAL ...California, Drilling and Coring, Oregon, Placer, Potential of Deposit, ...7.0005
- INFLUENCE OF THE PHYSICAL ENVIRONMENT ON DISTRIBUTION OF YOUNG STAGES OF COASTAL GAME FISH ...Environmental Ecology, Fish -non-specific, Maturity & Growth Stages, Physical-general, Range Or Territorial Distr. , ...5.0211
- PRE-CONSTRUCTION ENVIRONMENTAL SURVEY ...Construction Land Use Effects, Construction Sites, Environmental Ecology, Organism Sampling Devices, Reefs, ...5.0997
- BENTHIC PENAEID SHRIMPS (OTHER THAN PENAEUS) FROM THE WESTERN ATLANTIC ...Animal Taxonomy, Atlantic Ocean-general, Collections, Shrimps - Common, Vertical Distribution, ...5.0404
- BOTTOM TOPOGRAPHY AND SEDIMENTS--MIDDLE ATLANTIC SHELF ...Distribution, Geomorphology-topography, ...4.0055
- CIRCULATION ON THE CONTINENTAL SHELF ...Atlantic Ocean-north, Circulation-general, Eastern, Water Motion Recorders, ...2.0027

### Continental Slope

- SUPPORT OF UNIVERSITY OF GEORGIA MARINE INSTITUTE RESEARCH VESSEL OPERATION ...Continental Shelf, Distribution, Environmental Ecology, Estuaries, Geomorphology-topography, Marine Biology, Pollution Sources general, Ships and Cruises, Textures-structures, ...12.0026
- PHYSICAL OCEANOGRAPHY IN OREGON SHELF AND SLOPE WATERS ...Continental Shelf, Hydrodynamics, Mixing, Oregon, Thermodynamics, ...2.0076
- THE ECONOMIC POTENTIAL OF THE MINERAL AND BOTANICAL RESOURCES OF THE U.S. CONTINENTAL SHELF AND SLOPE ...Ag Uses of Nat. resource-other, Continental Shelf, Estimates of Reserves, Ocean Mining, Potential of Deposit, ...7.0011
- MARINE GEOPHYSICS ...Acoustical, Continental Shelf, Mechanical Devices, Seismic Studies, Textures-structures, ...7.0146
- OCEAN-SEDIMENTS AND CRUSTAL STRUCTURES IN THE BHAMIAN-CARIBBEAN AREA ...Caribbean Sea, Crust, Ocean Basins, Soil Properties - Other, Textures-structures, ...7.0109
- MARINE HYDROLOGY AND GEOCHEMISTRY, ATLANTIC CONTINENTAL SHELF AND SLOPE ...Atlantic Ocean-north, Chemistry, Continental Shelf, Saline Water Intrusion, Sedimentation, ...7.0070
- CENTRAL CALIFORNIA CONTINENTAL MARGIN ...California, Continental Shelf, Geologic Maps, San Andreas Fault, Structural Studies, ...7.0036
- WORLD WIDE MARINE MINERAL RESOURCES ...Continental Shelf, Economics, Mapping, Potential of Deposit, Resource Inventories, ...4.0056

### Control of . . .

#### Aquatic Plants

##### Aquatic Vegetation -ns

- ENERGETICS OF PALAEMONETES PUGIO AND THE WEEDBED COMMUNITY OF SOUTH CREEK ESTUARY ...Energy Budgets, Estuaries, Habitat Studies, North Carolina, Shrimps - Common, ...5.0482

#### Control Systems

- FLUIDIC CONTROL SYSTEM COMPENSATOR ...Control-systems, Controls, ...8.0193

- FISH GUIDING ...Animal Distr. (non-specific), Fish -non-specific, Instrumental Services, Management -other, Water Environment -other, ...8.0015
- TECHNIQUES OF PLANNING ...Application, Management, Mathematical Analysis, Operations Research, Planning, Southern, Systems Analysis, ...9.0017

### Filtering Theory

- TROPICAL ANALYSIS AND FORECASTING ...Mathematical Analysis, Meteorologic Model Studies, Pressure-density, Tropic, Weather Forecasting, ...3.0061

### Convection

- FISHERIES OCEANOGRAPHY AND ENVIRONMENTAL ASSESSMENT AND PREDICTION ...Commercial Fishing, Oceanography-general, Spacecraft Sensory Devices, Thermal, ...4.0150
- STUDY OF THE DISTRIBUTION OF RADIONUCLIDES IN THE OCEAN DETAILED EXPLORATION OF CS137 IN THE OCEAN ...Cesium, Chemical Analysis (water), Circulation-general, Pacific Ocean-north, Radioactivity, . . 1.0080
- AIR/SEA INTERACTION STUDY ...Mixing, Profiles, Thermal, Thermocline, Waves, ...2.0114
- CONVECTIVE STUDIES ...Pacific Ocean-north, Sonar, Thermal, ...2.0011
- PHYSICAL OCEANOGRAPHY ...Hawaii, Heat and Radiation Transfer, Mixing, Thermal, Wind-water Interaction, ...3.0034
- VERTICAL MOTIONS ...Gulf Stream, Hydrodynamics, Water Motion Recorders, ...2.0060
- THE CONTRIBUTION OF ADVECTION AND LOCAL HEATING TO THE MAINTENANCE OF THE THERMAL STRUCTURE IN THE NORTH PACIFIC OCEAN ...Circulation-general, Heat and Radiation Transfer, Mixing, Pacific Ocean-north, Thermal, ...1.0183
- NATURE AND VELOCITY OF CURRENTS AND OTHER FLOWS IN SUBMARINE CANYONS ...Fans, Ocean Waves - Currents, Sedimentation, Submarine Canyons, Turbidity Currents, Water Motion Recorders, ...2.0008
- PHYSICAL AND CHEMICAL ATLAS ...Atlases-maps, General Sea Water Chemistry, Indian Ocean-general, Water Analysis-general, Water Properties-general, ...4.0026
- RESEARCH IN OCEANIC PHYSICS ...Atlantic Ocean-south, Mixing, Oceanic Fronts, Thermodynamics, Wind-water Interaction, ...2.0059
- MEDITERRANEAN OCEANOGRAPHY ...Data Analysis - General, Heat and Radiation Transfer, Mediterranean Sea-general, Ships and Cruises, Surface Environments, ...4.0132
- VERTICAL OCEAN CIRCULATION ...Circulation-general, Model Studies, Oceanic Fronts, Subsurface Environments, ...2.0036
- FUNDAMENTAL PROBLEMS IN HYDRODYNAMICS ...Hydrodynamics, Ordnance, Survey Studies, Waves, Waves-internal, ...2.0102
- CHEMICAL OCEANOGRAPHY ...Aquatic Ecology, Circulation-general, Technique Development, Trace Elements, ...1.0134

### Cooperative-studies

- SUPPORT OF THE R/V EASTWARD ...Caribbean Sea, Continental Shelf, Facilities, Marine Biology (non-specific), Ships and Cruises, Training Grants, Fellowships, ...12.0039
- COOPERATIVE SYSTEMATICS STUDIES IN ANTARCTIC BIOLOGY ...Animal Taxonomy, Antarctica, Equipment Purchase Operation, Invertebrates -non-specific, ...5.0581
- ACCUMULATION OF RADIOACTIVITY BY INVERTEBRATES (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Contamination - Water, Diagnostic Procedures, Radioactivity-general, Reactor Sites & Rad Waste, ...5.0474
- ACCUMULATION OF RADIOACTIVITY BY ORGANISMS IN EXPERIMENTAL MARINE ENVIRONMENTS ...Contamination - Water, Estuaries, Laboratory, Radioactivity, ...5.0911
- THE EFFECTS OF RADIATION ON THE PHYSIOLOGY OF MARINE ORGANISMS (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Radioactive Fallout, ...5.0294
- THE EFFECTS OF RADIATION ON THE MORPHOLOGY OF MARINE ORGANISMS (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Fish -other, Radiation Sensitivity-, Vertebrate Anatomy, Vertebrates Excl. man. ...5.0295

## SUBJECT INDEX

### Coral Sea

- SEDIMENT STRUCTURE ...Distribution, Geosynclines, Sediment Transport-general, Shelf Areas, Textures-structures, ...7.0204  
 GEOPHYSICAL INVESTIGATIONS IN THE CORAL SEA ...Buoys, Crust, Regional Structure, Seismic Refraction, Structural Studies, ...7.0130

### Core Analysis

- GRANT FOR STUDY OF SEA FLOOR CORES AND PHOTOS ...Coring and Dredging, Photography, ...7.0258  
 RADIATION, DOSIMETRY, CORRELATION AND DATING OF CALCAREOUS DEEP-SEA CORES ...Carbonates-general, Correlation, Radioactive Dating, Sedimentation, Thermoluminescence, ...7.0251  
 MARINE SEDIMENTS ...Biology, Chemistry, Physical Properties, Subbottom, Textures-structures, ...7.0264  
 RADIOLARIA IN SEDIMENTS ...Biogenous, Order Radiolaria, Pacific Ocean-general, Population - Distribution, Tertiary Period, ...7.0160  
 X-RADIOGRAPHIC AND ELECTRONIC FLUOROSCOPIC EQUIPMENT ...Equipment Purchase Operation, Instrumental Services, Radiograph, Radiometer, X Ray Tubes, ...8.0094  
 MULTIVARIATE ANALYSIS OF MICROPALaeONTOLOGICAL DATA FROM DEEP-SEA CORES ...Data Reduction and Analysis, Development of Models, Multivariate Analysis, Order Foraminifera, Paleotemperature, Population - Distribution, ...5.0827  
 CARBON ISOTOPE GEOTHERMOMETRY ...Carbon, Carbonaceous Substance, Chemistry, Geologic Thermometry, Paleotemperature, Plankton (non-specific), Temperature, ...7.0079  
 LITHOLOGICAL AND MICROPALaeONTOLOGICAL INVESTIGATION OF OCEAN SEDIMENT CORES ...Correlation, Paleoclimatology, Quaternary Period, Sedimentary History, Tertiary Period, ...7.0257  
 STRATIGRAPHIC AND TAXONOMIC-PHYLOGENETIC STUDIES ON PLANKTONIC FORAMINIFERA ...Cretaceous Period, Intercontinental Stratigraphy, Order Foraminifera, Structure-general, Tertiary Period, ...7.0182  
 STRATIGRAPHIC STUDY OF RADIOLARIA IN DEEP SEA QUATERNARY SEDIMENTS ...Collections, Correlation, Geographical Relations, Order Radiolaria, Quaternary Period, ...7.0178  
 CURATING OF BLAKE PLATEAU CORES ...Collections, Continental Shelf, Florida, ...12.0025  
 MARINE GEOLOGY OF THE SUB-ANTARCTIC PACIFIC REGION ...Antarctic Ocean, Diagenesis, Distribution, Origin, Petrology, Sedimentary History, ...7.0049  
 BIOFACIES STUDY OF BENTHIC FORAMINIFERA IN OCEAN SEDIMENT CORES ...Biofacies, External Structure, Order Foraminifera, Paleontology, Population - Distribution, ...7.0175  
 STRATIGRAPHY OF UNCONSOLIDATED SEDIMENTS ON THE CONTINENTAL SHELVES OF THE CHUKCHI AND NORTHERN BERING SEAS ...Bering Sea, Sedimentary History, ...7.0286  
 A PALEOMAGNETIC STUDY OF TERTIARY AND PLEISTOCENE OCEANIC CORES ...Antarctic Ocean, Field Reversals, Pacific Ocean-north, Paleomagnetism, Quaternary Period, Tertiary Period, ...7.0166  
 PALEOTEMPERATURE RESEARCH ...Marine Organisms, Order Foraminifera, Paleotemperature, Quaternary Period, ...7.0161  
 GEOCHEMISTRY OF MID-ATLANTIC RIDGE SEDIMENTS ...Atlantic Ocean-general, Chemistry, Correlation, Geochronology-general, Ridges, ...7.0071  
 AN INVESTIGATION OF THE MASS PHYSICAL PROPERTIES OF CARBONATE MUD SEDIMENTS ...Carbon-14, Carbonates-other, Density, Physical Properties, Porosity, ...7.0225  
 DEPOSITIONAL PROCESSES MARGINAL TO LARGE ANTARCTIC ICE SHELVES ...Antarctic Ocean, Deposits, Environment, Sedimentary History, Sedimentation, ...7.0198  
 MAGNETIC PROPERTIES OF ANTARCTIC MARINE SEDIMENTS AND ROCKS ...Antarctica, Extinction, Field Reversals, Rock & Mineral Magnetism, ...7.0233  
 PLEISTOCENE OCEANOGRAPHY AS RECORDED IN DEEP SEA SEDIMENT CORES ...Correlation, Geographical Relations, Paleoclimatology, Paleotemperature, Quaternary Period, ...7.0165

- LAKE SUPERIOR CORING III ...Lake Superior, Sedimentology-general, Seismic Studies, Subsurface, Textures-structures, ...7.0247  
 STRATIGRAPHY AND PALEOECOLOGY OF FOSSIL SILICOFLAGELLATES FROM ANTARCTIC DEEP-SEA CORES ...Antarctic Ocean, Correlation, Field Reversals, Fossil Zones, Paleontology, Paleotemperature, Phylum Protozoa, ...7.0169  
 DEEP SEA SEDIMENTS IN THE NORTH PACIFIC FROM STUDIES OF THEIR RADIOLARIAN CONTENT ...Biogenous, Distribution, Pacific Ocean-north, Protozoa - other, Sedimentation, ...7.0285  
 PROPERTIES AND ORIGIN OF SEDIMENTS IN THE NORTHEAST PACIFIC OCEAN ...Carbon-14, Origin, Pacific Ocean-east, Physical Properties, Washington, ...7.0287  
 RESEARCH IN CORE ANALYSIS ...Acoustical, Coring and Dredging, Geomorphology-topography, Model Studies, Physical Properties, ...7.0263  
 SEA-FLOOR SEDIMENTS AND ROCK STUDIES ...Atlantic Ocean-north, Biogenous, Microfossils, Paleomagnetism, Petrology, Ridges, Sedimentation, ...7.0040  
 BIOCHEMICAL EFFECTS OF MICROORGANISMS UPON THE SALT MARSH ENVIRONMENT ...Aquatic Soils, Identification, Marine Bacteria, Salinity, Swamps-marshes, Temperature, Water Level Fluctuation, ...5.0763  
 ALPINE LIMNOLOGY PROJECT ...Dust - Particulate Matter, Extrusives, Hawaii, Lakes, Mountains-alpine, Volcanoes, ...7.0236  
 DIAGENESIS OF CARBONATE SEDIMENTS ...Carbonates-general, Diagenesis, Geochemistry-general, Pore Fluids, Trace Element Analysis, ...7.0266  
 ABYSSAL OSTRACODES OF THE WORLD ...Abyssal, Shrimps - Seed Or Mussel, Vertical Distribution, World Wide, ...5.0386  
 GEOLOGICAL OCEANOGRAPHY - ACOUSTICAL PROPERTIES OF SEDIMENTS ...Acoustical, Geomorphology-topography, Mechanical Properties, Physical Properties, Scattering, ...7.0101

### Coring and Dredging

- GRANT FOR STUDY OF SEA FLOOR CORES AND PHOTOS ...Core Analysis, Photography, ...7.0258  
 ANALYSIS OF PHYSICAL AND CHEMICAL PROPERTIES OF DEEP SEA CORES ...Chemistry, Physical Properties, ...7.0259  
 RELATIONSHIPS BETWEEN RATES OF SEDIMENT ACCUMULATION & CHANGES WITH DEPTH OF CERTAIN MASS PHYSICAL PROPERTIES IN MARINE SEDIMENTS ...California, Interstitial - Connate Water, Pacific Ocean-east, Rate of Deposition, Shear Strength, ...8.0335  
 INVESTIGATE METHODOLOGY FOR MEASURING OCEANIC PROPERTIES LEADING TO THE TOTAL ENVIRONMENTAL SURVEY OF A SELECTED OCEAN AREA ...Oceanic - Pelagic, Physical Properties, Radioactivity, Submersibles, Technique Development, ...8.0061  
 ARCTIC BASIN HEAT FLOW ...Arctic, Crust, Geothermal Gradient, Heat Flows, Physical Properties, ...7.0105  
 RECENT AND ANCIENT FAUNAS OF A DROWNED ISLAND CHAIN (MID-PACIFIC MOUNTAINS) ...Benthic Fauna, Biofacies, Hawaii, Seamounts-guyots, ...5.0863  
 MOHOLE SITE STUDIES ...Earth Interior, Hawaii, Pacific Ocean-north, Seismic Studies, Structure Location, ...7.0097  
 ABYSSAL PLAIN SEDIMENTATION AND STRATIGRAPHY OFF OREGON ...Abyssal, Bathymetry, Paleoclimatology, Sedimentation, Turbidity Currents, ...7.0272  
 THE MARINE GEOLOGY OF THE SOUTHERN OCEAN ...Antarctic Ocean, Chemistry, Distribution, Mineralogy, Petrology, ...7.0067  
 CARBON-14 AGE PROFILE OF A HAWAIIAN REEF ...Anthozoa, Carbon-14, Growth Rate, Hawaii, Reefs, Sea Level Variations, ...7.0051  
 ROCK SAMPLING AND GEOPHYSICAL STUDIES IN THE TONGA KERMADEC TRENCH SOUTHWEST PACIFIC ...American Samoa, Equipment Purchase Operation, Pacific Ocean-west, Photography, Seismic Reflection, Trenches, ...7.0093  
 ATLANTIC OCEAN CRUSTAL STUDIES ...Atlantic Ocean-general, Bathymetry, Crust, Heat Flow Measurements, Seismic Reflection, ...7.0116  
 STABLE ISOTOPE STUDIES ON COEXISTING MINERALS IN MARINE SEDIMENTS ...Diagenesis, Genetic Relationships, Mineralogy, Red Sea, Salinity, Thermal, ...1.0106

DEEP-SEA CORE MAGNETOMETER AND A CORE ORIENTATION SYSTEM ...Direction, Magnetometers, Rock & Mineral Magnetics, ...8.0140

METEOROLOGICAL SUPPORT OF DEEP-SEA DRILLING OPERATIONS ...Drilling and Coring, Meteorological Studies, Teaching and Research, Waves, Weather Forecasting, ...12.0013

CORING OF THE VARVED SEDIMENTS IN SAANICH INLET ...Canada, Geochronology-general, Local Stratigraphy, Pacific Ocean-east, Varves, ...7.0282

GEOPHYSICAL AND GEOLOGICAL STUDY OF THE DARWIN RISE ...Bathymetry, Geophysics-general, Gravity Studies, Magnetic Studies, Ocean Basins, Pacific Ocean-west, Photography, Refraction, Ridges, Seamounts-guyots, ...7.0112

CONTRACT FOR-PROCESSING OF USARP ROCK SAMPLES ...Antarctica, Classifications, Collections, Petrology, Sampling, Ships and Cruises, Thin Sections, ...7.0060

GEOPHYSICAL AND GEOCHEMICAL STUDY OF RED SEA MINERAL DEPOSITS ...Gulf of Aden, Igneous Activity - Volcanism, Mineralogy, Red Sea, Thermal, ...7.0023

DEEP SEA PHOTOGRAPHIC SYSTEM AND A BOX CORER ...Abyssal, Benthonic-bottom, Photography, ...8.0141

EFFECTS OF DEEP SEA SEDIMENTS ON SUDDEN IMPACT, AS FROM DISASTER VEHICLES ...Engineering Studies-other, Marine Soils, Mechanical Properties, Physical Properties, Shear Strength, ...7.0228

RESEARCH IN CORE ANALYSIS ...Acoustical, Core Analysis, Geomorphology-topography, Model Studies, Physical Properties, ...7.0263

ESTUARINE DREDGE HOLE INVESTIGATIONS ...Aquatic Ecology, Estuaries, Fish -non-specific, Habitat Studies, ...5.0908

SURVEY OF A POTENTIAL HARD CLAM FISHERY ...Clams, Commercial Fishing, Estuaries, Georgia, Spawning & Nesting Sites, ...5.0420

SEDIMENTOLOGY AND GEOLOGIC HISTORY OF HUMBOLDT BAY, CALIFORNIA ...Bays, California, Geologic History-general, Pacific Ocean-east, Physical Properties, ...7.0193

DEVELOPMENT OF OFFSHORE SOURCES OF SAND SUITABLE FOR BEACH RESTORATION AND NOURISHMENT ...Beach, Mapping, Ocean Mining, Shoreline Structures, Size, ...7.0012

DEVELOPMENT OF WIRE-LINE CORING TECHNIQUE FOR SAMPLING UNCONSOLIDATED DEPOSITS ...Alaska, Bottom Sampling Device, Mechanical Properties, Mineralogy, Technique Development, ...8.0249

SAMPLING CAMPAIGN ON CORONADO BANK, OFF SOUTHERN CALIFORNIA ...Banks, California, Chemistry, Distribution, Phosphate, Phosphite, ...7.0003

DEVELOPMENT, TESTING AND EVALUATION OF MODIFICATIONS REQUIRED TO ADAPT DRILLING SAMPLING SYSTEMS TO THE PLATFORM ...Bottom Sampling Device, Drilling and Coring, Equipment, Platforms, Technique Development, ...8.0256

LABORATORY MODEL STUDIES OF PENETRATION INTO A SIMULATED COHESIONLESS DETRITUS ...Gravel, Mechanical Properties, Model Studies, Soil Sampling, Technique Development, ...8.0245

LABORATORY MODEL STUDIES ON DISTURBANCE OF DETRITUS BY PENETRATION ...Disturbed/undisturbed, Model Studies, ...8.0252

LABORATORY STUDIES TO CORRELATE ENGINEERING PROPERTIES OF MARINE PLACER MATERIALS WITH SAMPLING TOOL PERFORMANCE ...Gold, Laboratory Analysis, Mechanical Properties, Placer, Scientific-service-support, ...8.0244

## Corrosion, Deterioration

### Agents

#### Atmospheric, Gases

COMBUSTION OF RESIDUAL FUEL WITH MASSIVE RECIRCULATION ...Alloys, Combustion Products, Fuels, ...8.0226

#### Biological

MICROBIAL CORROSION AND DETERIORATION OF NAVAL MATERIALS ...Classification Or Taxonomy, Fouling, Ionic Effect, Marine Bacteria, Materials Used Undersea, ...8.0203

PILING PRESERVATIVES THRESHOLD STUDIES ...Fouling, Massachusetts, North Carolina, Preservatives, Wood, ...8.0232

THE ROLE OF MARINE ORGANISMS IN THE DEGRADATION OF NAVAL MATERIALS ...Marine Bacteria, Materials Used Undersea, Model Studies, Reaction Rates, ...8.0241

MARINE-BACTERIA CULTURE ...Bacterial Culture, Fouling, Isolation From Nat. environ., Marine Bacteria, Water Bacteria, ...5.0849

THE ROLE OF SULFUR BACTERIA IN CORROSION AND DETERIORATION ...Autotrophic, Fouling, Marine Bacteria, Plasma Membrane, Sulfur Bacteria, ...5.0805

MICROBIAL CORROSION IN THE MARINE ENVIRONMENT ...Biodegradation, Carbon, Fouling, Marine Fungi (non-specific), Water, ...5.0769

MECHANISMS OF ATTACHMENT OF MARINE BACTERIA TO SURFACES ...Adsorption & Interface, Corrosion Prevention-other, Fouling, Marine Bacteria, ...5.0810

DEEP-WATER FOULING ...Fish -non-specific, Fouling, Predation, Vertical Distribution, ...8.0233

MICROBIAL CORROSION ...Alloys, Fouling, Marine Bacteria, Sulfur Bacteria, Water, ...8.0207

CHEMICAL WOOD PRESERVATIVE TREATMENTS ...Corrosion Prevention-other, Creosote, Fouling, Wood Preservatives-non-specif, ...8.0197

PRESERVATION OF WOODS IN THE MARINE ENVIRONMENT ...Fouling, Habitat Studies, Marine Fungi (non-specific), Materials Used Undersea, Preservatives, Wood, ...8.0216

BIOLOGICAL OCEANOGRAPHY AND DETERIORATION, DEEP OCEAN-HIGH PRESSURE BACTERIA ...Biology, Chemistry, Identification, Microorganisms (non-specific), Submersibles, ...8.0236

### Soils

STEEL PILING ...Corrosion Prevention-other, Fouling, Low Alloy Steels, Polarization, Water, ...8.0208

METALS FOR DEFENSE ...Alloys, Corrosion Prevention-other, Water, ...8.0209

### Water

CORROSION RESEARCH ...Cathodic Protection, Corrosion General, Fouling, Galvanic, ...8.0199

ANTI FOULING RESEARCH ...Corrosion Prevention-other, Fouling, Materials Used Undersea, ...8.0200

EVALUATION OF BOOTTOP PAINT SYSTEMS FOR OCEAN-GOING SHIPS IN A BOOTTOP PAINT TESTING MACHINE ...Catalysts, Paint - General, Primers, Surface Cleaning, Finishing, Test Methods, ...8.0237

OCEAN ENGINEERING RESEARCH ...Alloys, Engineering Studies-general, Materials Used Undersea, Moorings, Water Properties-general, ...8.0050

MICROBIAL CORROSION IN THE MARINE ENVIRONMENT ...Biodegradation, Biological, Carbon, Fouling, Marine Fungi (non-specific), ...5.0769

STEEL PILING ...Corrosion Prevention-other, Fouling, Low Alloy Steels, Polarization, Soils, ...8.0208

METALS FOR DEFENSE ...Alloys, Corrosion Prevention-other, Soils, ...8.0209

MICROBIAL CORROSION ...Alloys, Biological, Fouling, Marine Bacteria, Sulfur Bacteria, ...8.0207

DESIGN AND CONSTRUCTION ...Coatings-general, Environmental Effects-geologic, Hydrodynamic Structures, Safety, Underwater-construction, ...8.0333

CORROSION MITIGATION ...Corrosion Prevention-other, Deep, Fouling, Low Alloy Steels, Pre-stressed, ...8.0205

### Corrosion General

CORROSION RESEARCH ...Cathodic Protection, Fouling, Galvanic, Water, ...8.0199

FRictional RESISTANCE HULL SCALE AND COATINGS ...Maintenance-system, Materials Used Undersea, Paint - General, Wear, Friction, ...8.0227

BIOLOGICAL OCEANOGRAPHY AND DETERIORATION, POLYMER STUDIES ...Lubricants and Fluids, Marine Biology, Marine Biology (non-specific), Plankton (non-specific), Wear, Friction, ...8.0235

### Durability, Deterioration

CHEMICAL EXPLOSIONS, PACKAGING AND HANDLING AT SEA ...Ammonia, Explosions, Detonation, Packaging, Safety, ...8.0130

ENERGY CONVERSION MATERIALS AND COMPONENTS ...Electrode, Fuel Cell-other, Hydrazine, Hydrocarbon, Pressure, ...8.0223

# Corrosion, Deterioration

# SUBJECT INDEX

## Effects and Mechanisms

### Cavitation

PHYSICAL ACOUSTICS AND THE PROPERTIES OF MATTER ...Acoustical, Constants, Ultrasonic Frequency, Velocimeter, Velocity, Water, ...1.0031

### Galvanic

CORROSION RESEARCH ...Cathodic Protection, Corrosion General, Fouling, Water, ...8.0199

### Stress Corrosion

STRUCTURAL TITANIUM ALLOYS -120/150 KSI YIELD STRENGTH ...Fatigue, Materials Used Undersea, Strength - Weight Ratio, Stress Concentration-toughness, Titanium, ...8.0220

HY 130-150 STRUCTURAL STEELS ...High Yield, Low Alloy Steels - Other, Materials Used Undersea, Stress Concentration-toughness, Welding - Other, ...8.0221

## Prevention

### Cathodic Protection

CORROSION RESEARCH ...Corrosion General, Fouling, Galvanic, Water, ...8.0199

MICROBES AND CORROSION ...Extracellular-enzymes, Fouling, Iron, Metals -non-specific, Microorganisms (non-specific), Respiration, ...8.0228

### Corrosion Prevention-other

ANTI-FOULING MEANS FOR MARINE PROPELLERS ...Fouling, Marine Propulsion, Materials Used Undersea, ...8.0240

NEW APPROACHES TO BIOFOULING ASSAY ...Bioassays, Fouling, Marine Biology (non-specific), Paint - General, Powder, ...5.0757

ANTIFOULING RESEARCH ...Fouling, Materials Used Undersea, Water, ...8.0200

MECHANISMS OF ATTACHMENT OF MARINE BACTERIA TO SURFACES ...Adsorption & Interface, Biological, Fouling, Marine Bacteria, ...5.0810

STEEL PILING ...Fouling, Low Alloy Steels, Polarization, Soils, Water, ...8.0208

METALS FOR DEFENSE ...Alloys, Soils, Water, ...8.0209

CHEMICAL WOOD PRESERVATIVE TREATMENTS ...Biological, Creosote, Fouling, Wood Preservatives-non-specific, ...8.0197

CORROSION MITIGATION ...Deep, Fouling, Low Alloy Steels, Pre-stressed, Water, ...8.0205

### Inhibitors

FOULING OF SENSORS ...Fouling, Instrumentation-general, Marine Biology, Organometallics, ...8.0239

## Costa Rica

CONTINUITY OF CLIPPERTON AND CLARION FRACTURE ZONES ...Faults, Geomorphology-topography, Gravity Studies, Seismic Reflection, Structural Studies, ...7.0090

## Creosote

CHEMICAL WOOD PRESERVATIVE TREATMENTS ...Biological, Corrosion Prevention-other, Fouling, Wood Preservatives-non-specific, ...8.0197

## Crustacea

### Barnacles

REVISION OF THE CLASSIFICATION AND PHYLOGENY OF THE SUBORDER BALANOMORPHA (CIRRIPEDIA - THORACICA) ...Animal Taxonomy, Collections, Handbooks, Nomenclature, Classification, Vertical Distribution, ...5.0704

RESEARCH ON THE BIO-SYSTEMATICS OF THE CIRRIPEDIA ...Biological Rhythms, Developmental Physiology, Visual Organs, ...5.0364

BARNACLES OF THE EASTERN PACIFIC ...Life History Studies, Pacific Ocean-east, ...5.0515

SYSTEMATICS OF MARINE SYMBIOTIC CRUSTACEA FROM INVERTEBRATES ...Animal Taxonomy, Copepods, Life History Studies, Symbiosis, ...5.0516

STUDIES ON MOLTING, GROWTH, AND DEVELOPMENT IN ACORN BARNACLES AND LARVAL DECAPODS ...Biologi-

cal Rhythms, Developmental Physiology, Endocrine System, Fouling, ...5.0296

MECHANISMS OF CALCIUM CARBONATE DEPOSITION ...Biogeochemical Process, Calcium, Chemical Reactions, Derivatives, Fouling, ...5.1015

STUDIES IN MICRONEUROPHYSIOLOGY ...Brain, Contraction and Relaxation, Gastropods -slugs, conch, snails, Musculoskeletal System, ...5.0362

## Copepods

PARASITIC COPEPODA %CRUSTACEA FROM INVERTEBRATES AND FISHES ...Animal Taxonomy, Ectoparasites, Indian Ocean-general, Invertebrate Anatomy, ...5.0451

COPEPOD CRUSTACEANS PARASITIC ON FISHES ...Collections, Ectoparasites, Fish -non-specific, Indian Ocean-general, Ships and Cruises, Vertical Distribution, ...5.0368

A STUDY OF THE ECOLOGY OF THE MICROFAUNA LIVING BETWEEN INTERTIDAL MARINE SEDIMENTS ...Beach, Crustacea -non-specific, Intertidal Areas, New England Province, Salinity, ...5.0793

SYSTEMATICS OF MARINE SYMBIOTIC CRUSTACEA FROM INVERTEBRATES ...Animal Taxonomy, Barnacles, Life History Studies, Symbiosis, ...5.0516

SYSTEMATIC STUDIES OF ANTARCTIC COPEPODS ...Animal Taxonomy, Antarctic Ocean, Mixing, ...5.0461

PLANKTON ECOLOGY ...Aquatic Ecology, Lake Michigan, Plankton Sampling, Ships and Cruises, Zooplankton, ...5.0803

SYSTEMATICS, BIOLOGY, AND HYDROGRAPHIC RELATIONS OF SOME SPECIES OF CALANUS (CRUSTACEA, COPEPODA) ...Animal Taxonomy, Invertebrate Anatomy, Oceanic Fronts, Vertical Distribution, ...5.0367

ANNUAL PHYTOPLANKTON PRODUCTION IN PUGET SOUND WATERS ...Invertebrate Culture, Phytoplankton, Puget Sound, Standing Crops, Tides, ...5.0931

ENERGY AND ELEMENT TRANSFER IN LOWER MARINE TROPHIC LEVELS ...Energy Budgets, Oregon, Phytoplankton, ...5.0823

BIOCHEMICAL AND BIOPHYSICAL STUDIES OF THE MARINE ENVIRONMENT ...Energy, Energy Budgets, Organics, Productivity - Food Chain, ...5.0767

COPEPODS PARASITIC ON NEEDLEFISHES ...Aquatic Ecology, Ectoparasites, Fish -other, Nomenclature, Classification, Organic Evolution, ...5.0389

RELATIONSHIP BETWEEN WATER TEMPERATURE AND SIZE OF PARASITIC COPEPODS ...Collections, Host Specificity, Size, Temperature, Water Temperature-non-specific, ...5.0390

COPEPODS PARASITIC ON SHARKS OF THE WEST COAST OF FLORIDA ...Animal Taxonomy, Ectoparasites, Florida, Sharks, ...5.0391

SYSTEMATICS OF CALIGOID COPEPODS ...Animal Taxonomy, Ectoparasites, Host Specificity, Nomenclature, Classification, ...5.0392

SYNECOLOGY OF CARIBBEAN SPONGES ...Algae- General, Caribbean Sea, Porifera, Symbiosis, ...5.0580

RELICT COPEPODS FROM LAKE TUBORG, ELLESMERE ISLAND ...Brackish Water, Canada, Carbon-14, Lakes, Plankton Sampling, ...5.0388

LIFE HISTORY OF THE SHARK COPEPOD, KROYERIA DISPAR ...Developmental Physiology, Ectoparasites, Life History Studies, Whole Body Culture & Rearing, ...5.0393

DEVELOPMENT OF CULTURE METHODS FOR ECOLOGICALLY IMPORTANT MARINE ZOOPLANKTON SPECIES ...Aquatic Ecology, Environmental Physiology, Invertebrate Culture, Zooplankton, ...5.0834

DETERMINATION OF SELECTED ENVIRONMENTAL REQUIREMENTS OF IMPORTANT SPECIES OF MARINE ZOOPLANKTON ...Oxygen, Water Salinity, Water Temperature-non-specific, Zooplankton, ...5.0835

## Crabs

CONTROLLED ENVIRONMENTAL FACTORS ON THE DEVELOPMENT OF ESTUARINE AND OCEANIC CRUSTACEA ...Aquatic Ecology, Developmental Physiology, Estuaries, Salinity, Temperature, ...5.0476

PHYSIOLOGICAL MECHANISMS UNDERLYING THE BEHAVIOR OF MARINE CRUSTACEA ...Behavior, Behavioral Ecology, Shrimps - Common, ...5.0428

PORCELLANID CRABS OF AUSTRALIA ...Australia, Collections, Museum, Nomenclature, Classification, ...5.0354

## SUBJECT INDEX

## Crustacea

- VISUAL AND ACOUSTICAL COMMUNICATION IN CERTAIN MARINE CRUSTACEANS ...Atlantic Ocean-north, Auditory, Behavior, Visual Organs, ...5.0430
- SYSTEMATIC STUDIES ON HERMIT CRABS AND OTHER DECAPOD CRUSTACEANS ...Animal Taxonomy, Atlantic Ocean-south, Developmental Physiology, Life History Studies, ...5.0408
- EXPERIMENTAL MANIPULATION OF MECHANICAL AND PHYSIOLOGICAL RHYTHMS - A DUAL APPROACH TO THE BIOLOGICAL CLOCK PROBLEM ...Acetabularia, Behavioral Ecology, Biological Rhythms, Perching Birds - Songbirds, ...5.1002
- GAMETOGENESIS AND FERTILIZATION IN THE BLUE CRAB, CALLINECTES SAPIDUS RATHBUN, AND OTHER CRABS ...Electron Microscopy, Histochemistry - Cytochem, Reproductive System, Structural Functions, ...5.0478
- NEUROENDOCRINE PATHWAYS IN OSMOREGULATION IN CRUSTACEANS ...Aquatic Ecology, Endocrine System, Environmental Physiology, Osmoregulation, Shrimps - Common, ...5.0427
- CALORIC STUDIES OF SPARTINA AND THE MARSH CRAB SESARMA RETICULATUM ...Calorimetry, Chlorideae (non-specific & Ot), Energy Budgets, Swamps-marshes, ...5.0380
- CONTROLLED REARING OF DUNGENESS CRAB LARVAE ...Captive Rearing, Developmental Physiology, Maturity & Growth Stages, Oregon, ...5.0486
- PORT SAMPLING - CRESENT CITY, BROOKINGS, PORT ORFORD ...Fish -non-specific, Life History Studies, Nets, Shrimps - Common, ...5.0356
- KING CRAB SAMPLING GEAR STUDY ...Alaska, Censusing, Fishing Gear, Population Dynamics, Spawning & Nesting Sites, ...8.0113
- DUNGENESS CRAB POPULATION DYNAMICS STUDY ...Alaska, Life History Studies, Population Dynamics, Tags, ...5.0346
- SHELLFISH AND BOTTOMFISH DATA ...Commercial Fishing, Fish -other, Legislation, Shrimps - Common, ...5.0357
- EVALUATE THE RESEARCH TECHNIQUES WHICH WILL BE EMPLOYED TO GERYON THE BASIC LIFE HISTORY OF THE RED CRAB (GERYON QUINQUEDENS) ...Age, Mark, Tag Or Capture -other, Maturity & Growth Stages, Size, ...5.0494
- EFFECTS OF LOG RAFTING ON DUNGENESS CRAB ...Contamination - Water, Diving and Scuba, Forestry, Mans Activities, Pulp, Paper, and Logging, ...5.0347
- SHELLFISHERIES RESEARCH ...Clams, Commercial Fishing, Life History Studies, Number Or Density, Oysters, ...5.0383
- EFFECTS OF MARSH MANAGEMENT STRUCTURES UPON FISHES ...Alewife, menhaden, shad, herring, Engineering Structures-general, Land Use, Shrimps - Common, Spawning & Nesting Sites, Swamps-marshes, ...5.0206
- ECOLOGICAL STUDIES OF THE BLUE CRAB, CALLINECTES SAPIDUS ...Aquatic Ecology, Estuaries, Life History Studies, Louisiana, ...5.0433
- MANAGEMENT OF OREGON DUNGENESS CRAB RESOURCE ...Commercial Fishing, Legislation, Life History Studies, Oregon, Tags, ...5.0489
- EARLY LIFE REQUIREMENTS OF JUVENILE AND ADULT BLUE CRABS ...Biological Rhythms, Environmental Physiology, Maturity & Growth Stages, Osmoregulation, Salinity, Size, ...5.0475
- EFFECT OF ENVIRONMENTAL CHANGES ON BLUE CRAB ABUNDANCE ...Environmental Ecology, Life History Studies, Migration, Number Or Density, Population Dynamics, ...5.0473
- GULF-PENINSULA KING CRAB STUDIES ...Commercial Fishing, Gulf of Alaska, Habitat Studies, Population Dynamics, ...5.0342
- BERING SEA KING CRAB STUDIES ...Bering Sea, Commercial Fishing, Environmental Ecology, Migration, ...5.0341
- EARLY LIFE HISTORY DECAPOD CRUSTACEANS ...Animal Distr. (non-specific), Environmental Ecology, Life History Studies, Reproductive System, Shrimps - Common, ...5.0343
- PARASITOLOGY ...Ciliates, Oysters, Pathology, Protozoa, Protozoa -other, ...5.0440
- REARING AND SENSITIVITY STUDIES OF VARIOUS LIFE STAGES OF MARINE MACROINVERTEBRATES ...Bioindicators, Shrimps - Common, Whole Body Culture & Rearing, ...5.0496
- LARVAL DEVELOPMENT OF DECAPOD CRUSTACEA ...Animal Taxonomy, Basic Embryology, Bibliography, Decapoda - Non-specific, Lobsters, ...5.0410

- NUTRIENT STORES IN REPRODUCTION IN SEA INVERTEBRATES ...Decapoda -other, Invertebrate Nutrition, Reproductive System, Starfishes, ...5.0949
- MECHANISMS OF VENTILATORY CONTROL ...Invertebrate Physiology, Nervous System, Respiratory System, ...5.0471
- EXCITATION-CONTRACTION COUPLING IN MUSCLE ...Contraction and Relaxation, Lobsters, Musculoskeletal System, Plasma Membrane, ...5.0438

### Crayfish

- CULTURE OF RED SWAMP CRAWFISH, PROCAMBARUS CLARKI, IN BRACKISH WATER PONDS ...Aquaculture & Fish-farming, Aquatic Ecology, Brackish Water, Captive Rearing, ...5.0432

### Crustacea -non-specific

- MID-DEPTH BIOLUMINESCENCE ...Bioluminescence, Vertical Distribution, ...1.0162
- A STUDY OF THE ECOLOGY OF THE MICROFAUNA LIVING BETWEEN INTERTIDAL MARINE SEDIMENTS ...Beach, Copepods, Intertidal Areas, New England Province, Salinity, ...5.0793
- NUTRITIONAL STUDIES ON MARINE ORGANISMS ...Invertebrate Nutrition, Nutrition Studies, Organics, Phytoplankton, ...5.1001
- ECOLOGICAL, EXPERIMENTAL AND COMPUTER STUDIES OF ENDOGENOUS RHYTHMICITY ...Biological Rhythms, Brain, Computer Methods -general, Locomotion, ...5.0361
- NEUROENDOCRINE REGULATION ...Brain, Endocrine System, Osmoregulation, Sodium, Water, ...5.0426
- SHELLFISH EMBRYOLOGY AND LARVAE DEVELOPMENT STUDY ...Basic Embryology, Captive Rearing, Mollusks -non-specific & Other, Training Grants, Fellowships, ...5.0358
- FISH POPULATIONS OF AMERICAN SAMOA ...American Samoa, Fish -non-specific, Fishing Gear, Number Or Density, ...5.0033
- SHELLFISHERIES ...Censusing, Commercial Fishing, Legislation, Crustacea -non-specific & Other, ...4.0012
- MOLLUSCAN COLLECTION OF EAST COAST OF UNITED STATES ...Atlantic Ocean-north, Collections, Estuaries, North Carolina, ...5.0481
- ABYSSAL AND BATHYAL SYNOPIIDAE OF WORLD ...Abysal, Animal Taxonomy, Bathyal, Vertical Distribution, World Wide, ...5.0384
- ATLAS OF MARINE FAUNA ...Atlantic Ocean-north, Fish -non-specific, Handbooks, Mollusks -non-specific & Other, ...5.0101
- PHYSICAL AND CHEMICAL CHARACTERISTICS OF THE UPPER CHESAPEAKE BAY ...Chemical-general, Chesapeake Bay, Environmental Ecology, Mollusks -non-specific & Other, Physical-general, ...1.0150
- MARINE BIOLOGICAL ASSESSMENT OF POLLUTIONAL FATE ...Contamination - Water, Fish -non-specific, Nets, Pollution - Effects of, ...6.0176
- NEUROSECRETION AND ENDOCRINE PHYSIOLOGY ...Configuration, Diabetogenic, Ns, Endocrine System, Hormones, Intermedin, ...5.1023
- THE STRUCTURE AND FUNCTION OF CRUSTACEAN EYES ...Invertebrate Anatomy, Light -other, Oceanic - Pelagic, Vertical Distribution, Visual Organs, ...5.0363

### Decapoda - Non-specific

- LARVAL DEVELOPMENT OF DECAPOD CRUSTACEA ...Animal Taxonomy, Basic Embryology, Bibliography, Crabs, Lobsters, ...5.0410

### Decapoda -other

- NUTRIENT STORES IN REPRODUCTION IN SEA INVERTEBRATES ...Crabs, Invertebrate Nutrition, Reproductive System, Starfishes, ...5.0949

### Isopods

- ECOLOGICAL AND EVOLUTIONARY IMPLICATIONS OF THE ECOTYPES OF ESTUARINE CRUSTACEA ...Classical, Estuaries, Invertebrate Anatomy, Metabolism, Productivity - Food Chain, ...5.0418
- RELATIONSHIPS AMONG POPULATIONS OF LIMNORIA TRIPUNCTATA ...Animal Taxonomy, Population Dynamics, Reproductive System, ...5.0477
- REPRODUCTIVE RELATIONSHIPS AMONG POPULATIONS OF A MARINE WOOD-BORING ISOPOD ...Animal Taxono-

## Crustacea

## SUBJECT INDEX

my, Invertebrate Anatomy, Population Dynamics, Reproductive System, ...5.0414

THE EPICARIDEA OF THE EASTERN PACIFIC ...Animal Taxonomy, Pacific Ocean-east, ...5.0353

EVALUATION OF EFFECTS OF SATURATED HYDROCARBONS ON PRESERVATIVE QUALITY OF CREOSOTE ...Creosote, Fouling, Petroleum Cpd., -non-specific, Preservatives, Wax, Paraffin, Wood Preservatives-non-specif, ...8.0138

### Lobsters

LARVAL DEVELOPMENT OF SCYLLARIDEAN LOBSTERS ...Animal Taxonomy, Developmental Physiology, Environmental Physiology, Invertebrate Nutrition, Laboratory, ...5.0409

MANAGEMENT INVESTIGATIONS OF TWO SPECIES OF SPINY LOBSTERS PANULIRUS JAPONICUS AND P. PENICILLATUS ...Captive Rearing, Commercial Fishing, Management -other, Tags, ...5.0422

LARVAL STUDY OF THE LOBSTER ...Atlantic Ocean-north, Habitat Studies, Long Island Sound, Mark, Tag Or Capture -other, Maturity & Growth Stages, Plankton Sampling, ...5.0371

COASTAL LOBSTER FISHERY ...Censusing, Commercial Fishing, Legislation, Massachusetts, ...5.0452

OFFSHORE LOBSTER FISHERY ...Censusing, Commercial Fishing, Massachusetts, Nets, ...5.0453

POPULATION STRUCTURE OF THE LOBSTER ...Commercial Fishing, Diving and Scuba, Long Island Sound, Population Dynamics, Size, ...5.0688

TAGGING PROGRAM ...Long Island Sound, Number Or Density, Population Dynamics, Tags, Temporal Distribution, ...5.0372

NEPHROPID LOBSTERS OF THE WESTERN ATLANTIC ...Animal Taxonomy, Atlantic Ocean-north, Collections, ...5.0396

LOBSTER RESEARCH ...Commercial Fishing, Environmental Ecology, Habitat Studies, Population Dynamics, ...5.0436

LARVAL DEVELOPMENT OF DECAPOD CRUSTACEA ...Animal Taxonomy, Basic Embryology, Bibliography, Crabs, Decapoda - Non-specific, ...5.0410

EXCITATION-CONTRACTION COUPLING IN MUSCLE ...Contraction and Relaxation, Crabs, Musculoskeletal System, Plasma Membrane, ...5.0438

### Shrimp - Amphipods

POPULATION STUDIES OF HAUSTORIIDAE AND GAMMARIDAE FROM NEW ENGLAND AND ON INFAUNAL AND EPIFAUNAL MARINE AMPHIPODS AT ENIWETOK ...Atolls, Habitat Studies, Micronesia, Population Dynamics, ...5.0466

SYSTEMATICS OF THE ANTARCTIC AND SUBANTARCTIC GAMMARIDEAN AMPHIPODA ...Abyssal, Animal Taxonomy, Antarctic Ocean, Bathyal, Vertical Distribution, ...5.0359

INFAUNA OF LOWER CHESAPEAKE BAY ...Aquatic Ecology, Chesapeake Bay, Population Dynamics, Streams, Virginia, ...5.0661

HYPERIID AMPHIPODS FROM THE GULF OF GUINEA ...Animal Taxonomy, Collections, Guinea, Oceanography-general, Vertical Distribution, ...5.0387

### Shrimps - Brine Or Fairy

AN ANALYSIS OF DEVELOPMENT IN ARTEMIA SALINA EMBRYOS ...Basic Embryology, Biosynthesis, Nucleic Acids, Proteins, Ribosomes, ...5.0406

GENETIC REGULATION OF HEMOGLOBIN SYNTHESIS IN ARTEMIA ...Environmental Physiology, Hemoglobin, Marker, Mutagens, ...5.0365

### Shrimps - Common

PHYSIOLOGICAL MECHANISMS UNDERLYING THE BEHAVIOR OF MARINE CRUSTACEA ...Behavior, Behavioral Ecology, Crabs, ...5.0428

THE ALPHEID SHRIMP OF AUSTRALIA ...Animal Taxonomy, Australia, Collections, Publications -other, ...5.0425

TEMPERATURE AND SALINITY TOLERANCE OF THE SAND SHRIMP, CRANGON SEPTEMPINOSA ...Environment Resistance, Environmental Physiology, Estuaries, Salinity, Temperature, ...5.0437

NEUROENDOCRINE PATHWAYS IN OSMOREGULATION IN CRUSTACEANS ...Aquatic Ecology, Crabs, Endocrine System, Environmental Physiology, Osmoregulation, ...5.0427

SHRIMP PRODUCTION IN LOUISIANA SALT-MARSH IMPOUNDMENTS UNDER EXISTING AND MANAGED CONDITIONS ...Aquaculture & Fish-farming, Captive Rearing, Lagoons, Louisiana, Water Movement, Currents, ...5.0435

STUDY ON THE DISTRIBUTION AND ABUNDANCE OF PINK SHRIMP, PANDALUS JORDANI, IN THE PACIFIC OCEAN OFF OREGON ...Censusing, Fishing Gear, Life History Studies, Pacific Ocean-general, Population Dynamics, ...5.0487

SEASONAL ABUNDANCE AND BIOLOGICAL STABILITY OF THE COMMERCIAL SHRIMP OF GEORGIA ...Commercial Fishing, Number Or Density, ...5.0419

PORT SAMPLING - CRESENT CITY, BROOKINGS, PORT ORFORD ...Crabs, Fish -non-specific, Life History Studies, Nets, ...5.0356

INVESTIGATION OF ECOLOGICAL FACTORS LIMITING PRODUCTION OF THE ALASKAN PANDALID SHRIMP ...Alaska, Commercial Fishing, Life History Studies, Nets, Vertical Distribution, ...5.0345

SHELLFISH AND BOTTOMFISH DATA ...Commercial Fishing, Crabs, Fish -other, Legislation, ...5.0357

LAKE BORGNO - CHANDELEUR SOUND SYSTEM ...Data Acquisition, Gulf of Mexico, Maturity & Growth Stages, Nets, Plankton Sampling, Population Dynamics, ...5.0434

COMPARATIVE BIOCHEMISTRY OF PROTEINS FROM GULF FISH ...Blood Proteins -non-specific, Drums, Gel Electrophoresis, Hemoglobin, ...5.0326

ENERGETICS OF PALAEMONETES PUGIO AND THE WEEDBED COMMUNITY OF SOUTH CREEK ESTUARY ...Aquatic Vegetation -ns, Energy Budgets, Estuaries, Habitat Studies, North Carolina, ...5.0482

EFFECTS OF MARSH MANAGEMENT STRUCTURES UPON FISHES ...Alewife,menhaden,shad,herring, Crabs, Engineering Structures-general, Land Use, Spawning & Nesting Sites, Swamps-marshes, ...5.0206

MARINE INVERTEBRATE EXPLORATIONS ...Commercial Fishing, Freshwater Mussels, Scallops, Pacific Ocean-general, Temporal Distribution, Vertical Distribution, ...5.0733

FISHES TAKEN INCIDENTAL TO SHRIMP TRAWLING ...Atlantic Ocean-south, Fish -non-specific, Nets, Number Or Density, ...5.0072

ADULT SHRIMP STUDIES ...Alaska, Bays, Biological Rhythms, Habitat Studies, Life History Studies, ...5.0340

EARLY LIFE HISTORY DECAPOD CRUSTACEANS ...Animal Distr. (non-specific), Crabs, Environmental Ecology, Life History Studies, Reproductive System, ...5.0343

CONTRIBUTIONS TO THE BIOLOGY OF THE ROYAL RED SHRIMP, HYMENOPENAEUS ROBUSTUS ...Atlantic Ocean-south, Maturity & Growth Stages, Number Or Density, Vertical Distribution, ...5.0421

EASTERN PACIFIC SHRIMPS OF THE GENUS PENAEUS ...Animal Taxonomy, Life History Studies, Pacific Ocean-general, Range Or Territorial Distr. , Vertical Distribution, ...5.0403

BENTHIC PENAID SHRIMPS (OTHER THAN PENAEUS) FROM THE WESTERN ATLANTIC ...Animal Taxonomy, Atlantic Ocean-general, Collections, Continental Shelf, Vertical Distribution, ...5.0404

DIAGNOSTIC CHARACTERS & DEVELOPMENT OF EXTERNAL GENITALIA IN JUVENILE GROOVED SHRIMPS OF GENUS PENAEUS FROM WESTERN ATLANTIC ...Atlantic Ocean-general, Developmental Physiology, Invertebrate Anatomy, Reproductive System, ...5.0405

CIRCULATION DYNAMICS (GULF OCEANOGRAPHY PROGRAM) ...Circulation-general, Environmental Changes, Gulf of Mexico, Thermodynamics, ...2.0045

PREDICTING COMMERCIAL SHRIMP ABUNDANCE (SHRIMP DYNAMICS PROGRAM) ...Bays, Behavioral Ecology, Commercial Fishing, Environmental Ecology, Population Dynamics, ...5.0499

131.116B - LARVAL CULTURE (SHRIMP AQUACULTURE PROGRAM) ...Algal Culture, Aquaculture & Fish-farming, Captive Rearing, Environmental Physiology, Food Supply, ...5.0500

EXPERIMENTAL SEEDING (SHRIMP AQUACULTURE PROGRAM) ...Captive Rearing, Florida, Population Dynamics, Spawning & Nesting Sites, Stocking of Fish & Shellfish, ...5.0501

RECONNAISSANCE ECOLOGIC SURVEY OF THE CONTINENTAL SHELF AND UPPER SLOPE (GULF OCEANOGRAPHY PROGRAM) ...Behavioral Ecology, Biology, Continen-

tal Shelf, Environmental Ecology, Migration, Population Dynamics, ...5.0502

BIOLOGICAL OCEANOGRAPHY (GULF OCEANOGRAPHY PROGRAM) ...Environmental Ecology, Food Supply, Gulf of Mexico, Productivity - Food Chain, ...5.0838

POPULATION DYNAMICS (SHRIMP DYNAMICS PROGRAM) ...Commercial Fishing, Gulf of Mexico, Mortality Rates, Nets, Population Dynamics, ...5.0503

JUVENILE AND ADULT CULTURE (SHRIMP AQUACULTURE PROGRAM) ...Aquaculture & Fish-farming, Captive Rearing, Growth Rate, Ponds, ...5.0504

FOOD AND EXPERIMENTAL ENVIRONMENTS (SHRIMP AQUACULTURE PROGRAM) ...Aquaculture & Fish-farming, Captive Rearing, Digestive System, Food Supply, Water Environment -other, ...5.0505

LOCAL FISHERY SYSTEMS DEVELOPMENT ...California, Commercial Fishing, Sharks, Swordfish, ...5.0198

NORTHERN SHRIMP EXPLORATIONS ...Atlantic Ocean-north, Censusing, Commercial Fishing, Fishing Gear, ...5.0457

REARING AND SENSITIVITY STUDIES OF VARIOUS LIFE STAGES OF MARINE MACROINVERTEBRATES ...Bioindicators, Crabs, Whole Body Culture & Rearing, ...5.0496

### Shrimps - Mantis...

STOMATOPOD CRUSTACEA FROM THE WESTERN ATLANTIC ...Animal Taxonomy, Atlantic Ocean-general, ...5.0395

STOMATOPOD CRUSTACEA OF THE EASTERN PACIFIC REGION ...Animal Taxonomy, Atlantic Ocean-general, Pacific Ocean-east, ...5.0397

### Shrimps - Seed Or Mussel

THE OSTRACODA OF THE BAY OF NAPLES ...Environmental Ecology, Invertebrate Anatomy, Italy, Life History Studies, Nomenclature, Classification, ...5.0415

A SYSTEMATIC STUDY OF ENTOCYTHERID OSTRACODS ...Animal Taxonomy, Madagascar-malagasy Republic, New Zealand, Publications -other, South America, ...5.0492

TAXONOMY AND ECOLOGY OF NEARSHORE MARINE OSTRACODA ...Animal Taxonomy, Biofacies, Class Ostracoda, Ecological, Environmental Ecology, Paleoenvironments, ...5.0707

NORTH AMERICAN POST-OLIGOCENE CYTHERID OSTRACODS ...Animal Taxonomy, Invertebrate Anatomy, Life History Studies, Nearctic, Phylogenies, ...7.0179

OSTRACODA OF THE INDIAN OCEAN ...Animal Taxonomy, Biogenous, Indian Ocean-general, Quaternary Period, ...5.0385

ABYSSAL OSTRACODES OF THE WORLD ...Abyssal, Core Analysis, Vertical Distribution, World Wide, ...5.0386

SYSTEMATIC STUDY OF MYODOCOPID OSTRACODS OF THE INDIAN OCEAN ...Animal Taxonomy, Collections, Expeditions, Indian Ocean-general, ...5.0394

## Crystal Structure

### Non Specific

EFFECT OF PRESSURE ON MATERIALS ...High Pressure Research, High Temperature Research, ...8.0211

## Culture (methods & Techniques)

### Algal Culture

STUDIES WITH TROPICAL AND SUBTROPICAL MICROALGAE ...Benthic Flora, Continental Shelf, Primary Productivity, Sub - Tropic, Tropic, ...5.0693

EFFECTS OF DEPTH ON GROWTH AND REPRODUCTION OF BENTHIC MARINE ALGAE ...Depth, Growth and Differentiation, Phaeophyta (non-specific & Ot), Reproductive Physiology, Rhodophyta (non-specific & Ot), ...5.0684

MARINE PHYTOPLANKTON RESEARCH ...Indian Ocean-general, Nutrition Studies, Pacific Ocean-general, Phytoplankton, Symbiosis, ...5.0847

STUDIES OF THE EFFECTS OF NUTRIENTS ON THE GROWTH OF PHYTOPLANKTON IN THE TROPICAL PACIFIC OCEAN ...Growth Rate, Nutrition, Pacific Ocean-general, Phytoplankton, Tropic, ...5.0948

STUDIES OF THE PHAEOPHYCEAN ORDERS CHORDARIALES AND PUNCTARIALES ...Atlantic Ocean-north,

Phaeophyta (non-specific & Ot), Range Or Territorial Distr. , Temporal Distribution, ...5.0715

PHYSIOLOGY AND ECOLOGY OF MARINE DIATOMS ...Algae- Diatoms, Habitat Studies, Marine Plants, Nutrition Studies, Physiological Ecology, Plant Taxonomy, ...5.0735

BIOLOGY AND PALEONTOLOGY OF MARINE DINOFLAGELLATES AND HYSTRICHOSPHERES ...Algae- Dinoflagellates, Cell Cycle, Plant Developmental Biology, Range Or Territorial Distr. , Spores, Vertical Distribution, ...5.0799

ECOLOGICAL STUDIES OF THE MARINE RED ALGA CHONDRUS CRISPUS STACKHOUSE ...Ag Uses of Nat. resource-other, Chondrus, Growth and Differentiation, Reproductive Physiology, ...5.0710

ORGANIC INFLUENCES ON CALCIUM CARBONATE CEMENTATION ...Algae- General, Biology, Cement Origin, Marine Plants, Secretions and Products, ...5.0729

THE STATUS AND POTENTIAL OF AQUACULTURE ...Aquaculture & Fish-farming, Fish -non-specific, Food Supply, Survey Studies, ...8.0003

LIGHT REQUIREMENTS FOR MARINE ALGAE ...Algae- General, Autotrophic, Light, Marine Plants, Pigments, ...5.0703

EXPERIMENTAL CULTURE OF CALCAREOUS GREEN ALGAE OF CORAL REEFS ...Biology, Calcium, Chlorophyceae (non-specif.&ot), Growth and Differentiation, Plant Taxonomy, Reefs, ...5.0719

ALGAE AS FOOD FOR MARINE INVERTEBRATE LARVAE HELD IN THE LABORATORY ...Bulk Culture -other, Chesapeake Bay, Invertebrate Nutrition, Invertebrates -non-specific, ...5.0732

PHYSIOLOGICAL AND BIOCHEMICAL REQUIREMENTS OF PHYTOPLANKTON SPECIES ...Marine Plants, Media, Nutrition Studies, Phytoplankton, Planktonic - Floating, ...5.0995

ALGAL FOODS OF SHELLFISH (MICROORGANISMS AFFECTING SHELLFISH PROGRAM) ...Algae- General, ...5.0759

SEASONAL VARIATIONS OF ALGAL POPULATIONS ...Algae- General, Nutrition Studies, Temporal Distribution, ...5.0705

NUTRIENT REQUIREMENTS OF ALGAE ...Cyanophyta (non-specific & Ot), Nitrate, Nitrite, Nutrition Studies, Phosphate, Phosphite, ...5.0706

131.116B - LARVAL CULTURE (SHRIMP AQUACULTURE PROGRAM) ...Aquaculture & Fish-farming, Captive Rearing, Environmental Physiology, Food Supply, Shrimps - Common, ...5.0500

PLANKTON REARING, ENVIRONMENTAL REQUIREMENTS AND SENSITIVITY STUDIES ...Bioindicators, Great Lakes-general, Microbiological Analysis, Plankton (non-specific), Water Quality-general, ...5.0804

INTEGRATED FIELD AND LABORATORY SYSTEM FOR ASSESSING THE EFFECTS OF POLLUTANTS AND TOXICANTS UPON WATER QUALITY ...Axenic Culture, Phytoplankton, Pollution - Effects of , Responses to Growth, ...5.0831

DEVELOPMENT OF A METHOD FOR CHRONIC TOXICITY BIOASSAY USING MARINE PLANKTONIC ALGAE ...Bioassays, Marine Plants, Microbiological Analysis, Monitoring (long Term Studies), Phytoplankton, Technique Development, Toxicology, ...5.0726

MEASUREMENT OF THE RATE OF CARBON DIOXIDE (C14) FIXATION INTO SUBCELLULAR FRACTIONS OF ALGAE ...Algae- General, Bioindicators, Carbon, Carbon Dioxide Fixation, Growth Rate, Intracellular Localization, ...5.0728

LABORATORY STUDIES OF TOXIC DINOFLAGELLATES ...Algal Toxins, Gonyaulax, Gulf of Mexico, Gymnodinium, Plant Origin, ...5.0837

COMPARATIVE STUDIES OF DINOFLAGELLATE TOXINS ...Algae- Dinoflagellates, Algal Toxins, Cellular Physiology, Toxicology, ...6.0121

### Axenic Culture

A NEW APPROACH TO NUTRITION, PHYSIOLOGY, AND MINERAL CYCLING OF FORAMINIFERA ...Foraminifera, Invertebrate Nutrition, Metabolism, Productivity - Food Chain, ...5.0809

PROTOZOLOGY ...Animal Taxonomy, Histology and Cytology, Invertebrate Nutrition, Protozoa, ...5.0443

DETERMINATION OF SELECTED ENVIRONMENTAL REQUIREMENTS OF IMPORTANT MARINE

## Culture (methods & Techniques)

## SUBJECT INDEX

PHYTOPLANKTON SPECIES ...Growth and Differentiation, Marine Biology, Marine Plants, Phytoplankton, Responses to Growth, ...5.0833

INTEGRATED FIELD AND LABORATORY SYSTEM FOR ASSAYING THE EFFECTS OF POLLUTANTS AND TOXICANTS UPON WATER QUALITY ...Algal Culture, Phytoplankton, Pollution - Effects of, Responses to Growth, ...5.0831

STUDY OF TOXIN SYNTHESIS IN PRYMNESIUM PARVUM ...Algal Toxins, Biosynthesis, Gonyaulax, Gymnodinium, Prymnesium, ...6.0124

### Bacterial Culture

PHOTOSYNTHETIC BACTERIA ...Classification Or Taxonomy, Isolation From Nat. environ., Marine Bacteria, Photosynthetic Bacteria, Sulfur Bacteria, ...5.0814

MARINE-BACTERIA CULTURE ...Biological, Fouling, Isolation From Nat. environ., Marine Bacteria, Water Bacteria, ...5.0849

PHYSIOLOGICAL CHARACTERIZATION OF CERTAIN MARINE BACTERIA ...Bact. morphology (general), Biology, Isolation From Nat. environ., Marine Bacteria, Metabolism (intracellular), Tissue Techniques, ...5.0784

DISTRIBUTION OF CL. BOTULINUM E. IN FISH, SHELLFISH AND THE AQUATIC ENVIRONMENT IN OREGON ...Clostridium Botulinum, Oregon, Range Or Territorial Distr., Virulence and Pathogenicity, ...5.0822

NITRIFICATION BY MARINE MICROORGANISMS ...Autotrophic, Bact. morphology (general), Isolation From Nat. environ., Marine Bacteria, Nitrogen Bacteria, Range Or Territorial Distr., ...5.0800

### Bulk Culture -other

ALGAE AS FOOD FOR MARINE INVERTEBRATE LARVAE HELD IN THE LABORATORY ...Algal Culture, Chesapeake Bay, Invertebrate Nutrition, Invertebrates -non-specific, ...5.0732

THE ENVIRONMENTAL REQUIREMENTS OF MARINE PLANKTONIC ORGANISMS ...Marine Biology (non-specific), pH -water, Plankton (non-specific), Water Salinity, Water Temperature -other, ...5.0921

### Fungal Culture

COMPARATIVE BIOCHEMICAL AND MORPHOLOGICAL CHARACTERISTICS OF MARINE FUNGI FROM SHELLFISH ...Endoparasites -other, Histochemistry - Cytochem, Histology and Cytology, Marine Fungi (non-specific), Plant Taxonomy, ...5.0791

STUDIES ON THE DEVELOPMENT OF DERMOCYSTIDIUM MARINUM ...Cell Cycle, Control and Prevention, Dermocystidium, Oysters, Pathology, ...5.0836

### Invertebrate Culture

ULTRASTRUCTURAL AND AUTORADIOGRAPHIC INVESTIGATION OF CALCIFICATION IN FORAMINIFERS ...Calcification, Calcium, Cell Wall, Cell. organ. & Organoids -ot, Foraminifera, Histology and Cytology, ...5.0788

ANNUAL PHYTOPLANKTON PRODUCTION IN PUGET SOUND WATERS ...Copepods, Phytoplankton, Puget Sound, Standing Crops, Tides, ...5.0931

REAR AND DESCRIBE LARVAE OF BIVALVES ...Captive Rearing, Clams, Developmental Physiology, Freshwater Mussels, Scallops, ...5.0507

DEVELOPMENT OF CULTURE METHODS FOR ECOLOGICALLY IMPORTANT MARINE ZOOPLANKTON SPECIES ...Aquatic Ecology, Copepods, Environmental Physiology, Zooplankton, ...5.0834

### Monolayer Culture

TISSUE CULTURE - VIROLOGY ...Animal Viruses (non-specific), Bacteria (non-specific), Cell Injury and Autolysis, Marine Biology, Oysters, Tissues, ...5.0978

### Organelle Culture

GROWTH AND DIFFERENTIATION OF PLASTIDS ...Acetabularia, Biosynthesis, Cytoplasmic Inheritance, DNA Other, Nucleus (non-specific & Ot.), Photosynthetically Active, ...5.0683

### Suspension Culture

MECHANICAL PROPERTIES OF MAMMALIAN CELLS ...Blood Cells, Cellular Membranes (non-spec.), Flow Metering Techniques, Time-lapse Photography, ...5.0992

STUDIES ON EMBRYONIC CELLS ...Basic Embryology, Chickens, Reproductive System, Sea Squirts - Tunicates, ...5.0945

### Currents-bottom

STUDY OF OCEAN CURRENTS AT SEA FLOOR AND THEIR SPATIAL CORRELATION ...Benthonic-bottom, Field Characteristics, Water Motion Recorders, ...2.0003

OCEANOGRAPHY, PLEISTOCENE GEOLOGY AND SEDIMENTS OF LITTLE BAHAMA BANK ...British West Indies, Carbonates-general, Energy, Quaternary Period, Water Motion Recorders, ...7.0229

DEEP FLOW, WATER CHARACTERISTICS, TOPOGRAPHY AND SEDIMENTS IN THE CENTRAL PACIFIC AREA ...Abyssal, Distribution, Geomorphology-topography, Pacific Ocean-general, Structural Studies, Water Motion Recorders, ...7.0032

WATER MASSES, CURRENTS AND ORIGIN OF THE ATLANTIC BOTTOM WATER IN THE WEDDEL SEA, ANTARCTICA ...Depth, Oceanic Fronts, Salinity, Sampling, Temperature, Weddell Sea, ...4.0134

TURBULENT PROCESSES AT AIR-SEA AND BOTTOM BOUNDARIES OF THE OCEAN ...Thermal, Turbulence, Waves, Wind-water Interaction, ...3.0033

GLOBAL OCEAN FLOOR ANALYSIS ...Acoustical, Bathymetry, Benthonic-bottom, Geomorphology-topography, Seismic Studies, Subbottom, ...4.0046

DIVER-ASSISTED OCEANOGRAPHY ...Benthonic-bottom, Continental Shelf, Diving and Scuba, Geomorphology-topography, Mapping, Waves-internal, ...4.0098

### Currents-longshore

AEGEAN SEA BIOLOGY ...Aegean Sea, Benthic Organisms (non-specif), Plankton (non-specific), Range Or Territorial Distr., Temporal Distribution, ...5.0887

THE POTENTIAL SOURCE, TRANSPORT AND DEPOSITIONAL PATTERNS OF CLASTIC SEDIMENTS IN PORTIONS OF COASTAL GEORGIA ...Beach, General Mineralogic Properties, Georgia, Microstructure, Size, ...7.0235

RECENT SEDIMENTATION BY TIDAL AND LONGSHORE CURRENTS ON A CARBONATE BANK IN LOWER FLORIDA KEYS ...Banks, Florida, Quaternary Period, Sedimentation, Tides, ...7.0253

MECHANICS OF WAVE ACTION IN DEEP AND SHALLOW WATER ...Geomorphology-topography, Sand Bars, Tsunami, Waves, Waves-internal, ...2.0100

### Currents-ocean

VISIBLE REGION INSTRUMENTATION FOR OCEANOGRAPHIC SATELLITES ...Geomorphology-topography, Mapping, Photography, Satellites, Shoals, ...8.0088

A STUDY OF THE DEEP CIRCULATION AND DEEP FISH POPULATIONS IN THE PACIFIC OCEAN ...Fish -non-specific, Pacific Ocean-general, Tides, Vertical Distribution, ...2.0005

NUCLEAR OCEANOGRAPHIC TECHNIQUES ...Isotope Dilution, Physical Properties, Radioactivity, Water Analysis, Water Motion Recorders, ...8.0087

OCEAN CIRCULATION STUDIES ...Acoustical, Atlantic Ocean-north, Hydrodynamics, Statistics-general, Water Motion Recorders, Waves-internal, ...2.0040

OCEAN WAVES AND TIDES ...Subsurface Environments, Thermal, Tides, Water Motion Recorders, Waves, ...2.0080

CIRCULATION STUDIES ...Circulation-general, Gulf of Mexico, Hydrodynamics, Mixing, Pacific Ocean-east, ...2.0042

ARCTIC RESEARCH ...Acoustical, Arctic Ocean, Geomorphology-topography, Magnetic Studies, Sea Ice, ...4.0049

AIR-SEA INTERACTION ...Air-sea Boundary-general, Gulf of Mexico, Thermal, Tropical Cyclones, Weather Forecasting, ...3.0042

LONG RANGE SOFAR FLOATS ...Acoustical, Physical Analysis, Subsurface Environments, Water Motion, Water Motion Recorders, ...2.0025

INERTIAL TECHNIQUES ...Acoustical, Hydrodynamics, Physical Analysis, ...8.0099

OPTICAL MEASUREMENTS ...Benthonic-bottom, Optical, Photography, Subsurface Environments, ...1.0170

INDUCTION IN THE OCEAN ...Crust, Earth Interior, Fluctuations, Induction, Oceanic Fronts, ...1.0137

DESCRIPTIVE OCEANOGRAPHY ...Circulation-general, Data Analysis - General, Pacific Ocean-east, Wind-water Interaction, ...4.0116

WAVE, CURRENT AND STORM SURGE RESPONSE TO EXTREME WIND CONDITIONS ...Forecasting-prediction, Model Studies, Storms-general, Waves, Wind-water Interaction, ...2.0107

TRITIUM AS A TRACER FOR MIXING PROCESSES ...Mixing, Radioactivity-general, Salinity, Tracers, Tritium, ...2.0053

ANTARCTIC PHYSICAL OCEANOGRAPHY ...Antarctic Ocean, Depth, Photography, Salinity, Temperature, ...4.0133

TIME FLUCTUATIONS IN OCEAN CURRENTS ...Geomorphology-topography, Model Studies, Testing of Models, Waves, ...2.0039

THEORY OF LARGE-SCALE ATMOSPHERIC AND OCEANIC PROCESSES ...Circulation-general, Model Studies, Tropic, Weather Forecasting, Wind-water Interaction, ...2.0070

CURRENTS AND WATER MASSES IN THE SOUTHWEST ATLANTIC ...Circulation-general, Oceanic Fronts, Subsurface Environments, ...2.0041

(U) OCEAN CIRCULATION MODELS ...Circulation-general, Model Studies, Shear, Waves, Wind-water Interaction, ...2.0024

DYNAMICS OF MOORED BUOY SYSTEMS USED IN OCEANOGRAPHY R&D AND SURVEILLANCE ...Buoys, Laboratory Analysis, Model Studies, Moorings, Waves, ...8.0321

DIRECT AND INDIRECT DETERMINATION OF OCEANIC WATER MASS MOTION ON ALL SCALES ...Buoys, Oceanic Fronts, Pacific Ocean-east, Salinity, Temperature, ...2.0092

DEEP-SEA SEDIMENTS - THEIR PROPERTIES AND PROCESSES OF FORMATION ...Acoustical, Basins, Depth, Origin, Panama, Physical Properties, ...7.0273

CIRCULATION IN THE GULF OF MEXICO ...Circulation-general, Gulf of Mexico, Infrared Radiation, Mapping, Oceanic Fronts, ...2.0022

ISLAND-CURRENT INTERACTIONS ...Acoustical, Data Analysis - General, Geomorphology, Islands, Model Studies, ...2.0116

THEORETICAL AND LABORATORY MODEL STUDIES OF LARGE-SCALE OCEAN CIRCULATION ...Circulation-general, Forecasting-prediction, Gulf Stream, Model Studies, Transducers, ...2.0023

DISTRIBUTIONS OF CURRENTS AND PHYSICAL PROPERTIES WITHIN THE ARCTIC OCEAN ...Acoustical, Arctic Ocean, Heat and Radiation Transfer, Sea Ice, Temperature, ...4.0051

MIXING PROCESSES INFLUENCING THE OCEANIC ENVIRONMENT ...Density, Mixing, Model Studies, Moorings, Underwater-construction, ...2.0054

MEASUREMENT AND INTERPRETATION OF MOTIONALLY-INDUCED ELECTRIC FIELDS IN THE SEA ...Electrical, Forecasting-prediction, Marine Environments-general, Model Studies, Moorings, Water Motion Recorders, ...1.0139

OCEAN DYNAMICS EXPERIMENTS ...Atlantic Ocean-north, Buoys, Operational Aspect, Thermal, Waves-internal, ...2.0071

WATER MASS TRACERS ...Acoustical, Circulation-general, Oceanic Fronts, Tracers, ...2.0020

DESCRIPTIVE OCEANOGRAPHY/PACIFIC ...Buoys, Circulation-general, Pacific Ocean-east, Wind-water Interaction, ...2.0009

REMOTE SENSING ...Gases, Microwave Radiation, Mixing, Oil, Salinity, Temperature, ...4.0171

CIRCULATION STUDIES ...Circulation-general, Gulf of Mexico, Model Studies, Thermal, Tropical Cyclones, ...2.0044

BIOGRAPHIC STUDY OF THE BENTHOS OF PUERTO RICO AND THE VIRGIN ISLANDS ...Benthic Fauna, Benthic Flora, Benthonic-bottom, Range Or Territorial Distr. , Temperature, Vertical Distribution, ...5.0652

HYDROGRAPHY OF APPALACHEE BAY ...Bays, Rain-general, Salinity, Sunshine, Temperature, ...1.0147

FOSDIC APPLICATION TO CURRENT-METER RECORDS ...Data & Statistics Storage, Recording Systems, Research -

Development, Technique Development, Water Motion Recorders, ...4.0021

OCEANOGRAPHIC RESEARCH ...Acoustical, Buoys, Optical, Pressure, Seismic Studies, Sonar, ...1.0151

OCEAN CURRENTS AND CIRCULATION ...Circulation-general, Data Acquisition, Energy, Model Studies, Temperature, ...2.0015

LITERATURE SEARCH AND PRELIMINARY ENGINEERING STUDIES OF ENVIRONMENTAL PROBLEMS ASSOCIATED WITH MARINE DEPOSIT DELINEATION TECHNIQUES ...Drilling Operation, Oil and Natural Gas - Sulfur, Survey Studies, Wave Action, ...8.0251

HYDROGRAPHY, SEDIMENTATION AND CHEMICAL ASPECTS OF THE REEF ENVIRONMENT ...Aquatic Soils, Environmental Ecology, Fish -non-specific, Reefs, ...5.0212

DESIGN, CONSTRUCTION AND LONGEVITY OF ARTIFICIAL FISHING REEFS ...Atlantic Ocean-north, Reefs, Tides, ...9.0013

INVESTIGATE FACTORS DETERMINING DISTRIBUTION OF PHYSICAL AND CHEMICAL PROPERTIES OF THE PACIFIC OCEAN ...Hawaii, Mathematical Analysis, Model Studies, Oceanic Fronts, Pacific Ocean-general, ...5.0888

INTERNATIONAL NORTH PACIFIC FISHERIES COMMISSION SUBARTIC OCEANOGRAPHY ...Depth, Pacific Ocean-north, Range Or Territorial Distr. , Salinity, Salmon -coho, chinook, sockeye..., Temperature, ...1.0159

SURVIVAL CRAFT DRIFT AND LEEWAY ...Air Motion Instruments, Buoys, Equipment, Ocean-lakes, Operational Aspect, Tables, Compilations, Catalogs, ...6.0129

**California Current**

STUDY OF STABILITY AND SHEAR IN THE TOP 500 METERS OF THE OCEAN ...Density, Mixing, Water Motion, Water Motion Recorders, ...1.0171

OCEAN CIRCULATION ...Circulation-general, Forecasting-prediction, Hydrodynamics, Model Studies, Submarine Canyons, ...2.0002

SEA SURVEY INVESTIGATIONS ...Fish -non-specific, Population Dynamics, Survey Studies, Vertical Distribution, ...4.0117

FOOD HABITS STUDY OF ORGANISMS OF THE CALIFORNIA CURRENT SYSTEM ...Behavioral Ecology, California, Food Supply, Pacific Ocean-general, ...5.0044

CALIFORNIA CURRENT SURVEYS ...Environmental Ecology, Fish -non-specific, Pacific Ocean-east, Plankton (non-specific), ...4.0114

SPECIES LIFE HISTORY AND DISTRIBUTION ...Fish -non-specific, Life History Studies, Maturity & Growth Stages, Number Or Density, Oceanic Fronts, ...5.0037

STANDARD MONITORING SECTIONS (ATLANTIC AND PACIFIC OCEAN) ...Kuroshio Current, Labrador Current, Platforms, Salinity, Temperature, ...4.0004

**Gulf Stream**

GULF STREAM EDDIES ...Data Analysis - General, Data Reduction and Analysis, Hydrodynamics, Temperature, Water Motion, ...2.0028

ANALYTICAL OCEANOGRAPHY ...Data Analysis - General, Gases, Salinity, Temperature, ...4.0028

OCEAN CURRENT TRANSPORT ...Navigation, Ocean Waves - Currents, Water Motion Recorders, ...2.0016

VERTICAL MOTIONS ...Convection, Hydrodynamics, Water Motion Recorders, ...2.0060

NORTH ATLANTIC CIRCULATION ...Atlantic Ocean-north, Circulation-general, Geomorphology-topography, Hydrodynamics, Oceanic Fronts, ...2.0031

STUDIES OF THE TRANSPORT OF THE FLORIDA CURRENT ...British West Indies, Florida, Navigation, Ocean Currents-other, Water Motion Recorders, ...2.0017

OPERATION OF R/V ALAMINOS ...Carbon, Caribbean Sea, Gulf of Mexico, Ships and Cruises, Textures-structures, ...12.0046

GULF STREAM TRANSPORT ...Automatic Stations, Hydrodynamics, Ships and Cruises, Water Motion Recorders, ...2.0029

THEORETICAL AND LABORATORY MODEL STUDIES OF LARGE-SCALE OCEAN CIRCULATION ...Circulation-general, Currents-ocean, Forecasting-prediction, Model Studies, Transducers, ...2.0023

## Currents-ocean

AIR OCEANOGRAPHY ...Air-sea Boundary-general, Atlantic Ocean-north, Buoys, Satellites, Technique Development, ...4.0163

### Humboldt Or Peru Current

MOVEMENTS OF SEABIRDS IN THE HUMBOLDT CURRENT ...Aves -other, Biological Rhythms, Population Dynamics, Temporal Distribution, ...5.0583

### Kuroshio Current

STANDARD MONITORING SECTIONS (ATLANTIC AND PACIFIC OCEAN) ...California Current, Labrador Current, Platforms, Salinity, Temperature, ...4.0004

### Labrador Current

STANDARD MONITORING SECTIONS (ATLANTIC AND PACIFIC OCEAN) ...California Current, Kuroshio Current, Platforms, Salinity, Temperature, ...4.0004

OCEANOGRAPHY OF THE GRAND BANKS AND LABRADOR SEA ...Buoys, Circulation-general, Icebergs, Labrador Sea, Meteorological Studies, ...4.0124

### Ocean Currents-other

HAWAIIAN OCEANOGRAPHY ...Circulation-general, Environmental Effects-geologic, Hawaii, Hydrodynamics, Islands, ...2.0021

CIRCULATION STUDIES ...Acoustical, Caribbean Sea, Dispersion, Transmission, Water Properties-general, ...1.0046

RELATION OF SEDIMENT STRUCTURES AND FLOW DIRECTIONS OF COASTAL CURRENTS ...Coastlines-shorelines, Current Bedding, Paleocurrents, Sedimentation, Textures-structures, ...7.0276

AN INVESTIGATION OF THE OVERFLOW OF NORWEGIAN SEA WATER INTO THE NORTH ATLANTIC THROUGH DENMARK STRAIT ...Atlantic Ocean-north, Norwegian Sea, Oceanic Fronts, ...2.0032

STUDIES OF THE TRANSPORT OF THE FLORIDA CURRENT ...British West Indies, Florida, Gulf Stream, Navigation, Water Motion Recorders, ...2.0017

EASTERN BOUNDARY CURRENTS ...Mixing, Pressure-density, Wind-general, Wind-water Interaction, ...2.0026

BOTTOM ENVIRONMENT--GULF OF MEXICO ...Benthonic-bottom, Biology, Chemistry, Gulf of Mexico, Physical Properties, ...2.0043

SALINITY INTRUSION AND RELATED PHENOMENA ...General Deposition, Mixing, Open Channel Flow, Saline Water Intrusion, Sediment Transport-general, ...2.0061

GREAT LAKES RESEARCH - CHARACTERISTICS OF LAKE WATER ...Chemical-general, Great Lakes-general, Meteorological Studies, Physical-general, Water Quality-general, ...1.0154

GREAT LAKES RESEARCH - HARBOR CURRENTS ...Great Lakes-general, Harbors, Model Studies, Pressure-density, Water Level Fluctuation, Wind-water Interaction, ...2.0074

PRODUCTIVITY MEASURES ...Number Or Density, Organism Sampling Devices, Pacific Ocean-east, Primary Productivity, Productivity - Food Chain, Zooplankton, ...5.0940

ICEBERG DRIFT AND DETERIORATION ...Circulation-general, Icebergs, Model Studies, ...3.0076

### Currents-other

EFFECTS OF THERMAL MICROSTRUCTURE ON ACOUSTIC TELEMETRY ...Acoustical, Thermal, ...1.0066

STUDY OF INFLUENCE OF STRATIFICATION ON CURRENT STRUCTURE ...Circulation-general, Hydrodynamics, Lake Michigan, Stratified Flow, ...2.0035

DETERMINATION OF EQUATION OF STATE, VISCOSITY AND COMPRESSIBILITY OF SEA WATER ...Acoustical, Density, Instrumentation-general, Salinity, Temperature, Viscosity, ...1.0145

EXPERIMENTAL AND THEORETICAL RESEARCH ON TURBIDITY CURRENTS ...Hydraulic Structures, Laboratory Analysis, Sedimentation, ...7.0243

BOTTOM CURRENTS AND DEEP SEA TIDES ...Abyssal, Acoustical, Benthonic-bottom, Finite Differences, Model Studies, Tides, ...2.0004

SPECTRAL ANALYSIS OF TIDAL CURRENTS ...Hawaii, Integral Transforms, Prediction, Tides, Time Series Analysis, ...2.0083

## SUBJECT INDEX

SEDIMENT MOVEMENT AND BOTTOM CONDITIONS IN THE DELAWARE ESTUARY MOUTH AREA ...Bottom Sampling Device, Delaware Bay, Photography, Sedimentation, Tides, ...7.0220

COASTAL DIFFUSION OF POLLUTANTS ...Model Studies, Ocean, Oregon, Outlet, Pulp and Paper Wastes, ...6.0174

## Cybernetics

PHOTOGRAPHIC IMAGE EVALUATION ...Imaging, Photography-chemistry, Statistical Information Theory, ...4.0053

### Neuristors Neurol Nets

COMMUNICATIONS STUDIES ON TURSIOPS TRUNCATUS AND OTHER DELPHINIDS ...Central Nervous System, Linguistics, Mammals, Sound Production, ...5.0587

## Data Acquisition

HONEYWELL ACOUSTIC RESEARCH PROGRAM ...Acoustical, Data Analysis - General, Interfaces, Model Studies, Reverberation, Sonar, ...1.0071

AN IMPROVED MARINE VIBROSEOS INSTALLATION ...Hydrographic, Sonar, Special Mission Ships, ...8.0166

A SHIPBOARD DIGITAL DATA ACQUISITION SYSTEM ...Seismic Studies, Systems Analysis, Tape Storage, ...4.0036

DEEP SUBMERGENCE VEHICLES - DYNAMIC ANALYSES ...Experiments and Tests, Mathematical Analysis, Model Studies, Submersibles, Technique Development, Underwater-laboratory, ...8.0264

SEAWATER/SEDIMENT/BIOLOGY MONITORING PROGRAM ...Marine Biology, Sediments-other, Water Analysis-general, ...1.0144

DATA COLLECTION ...Charts, Data Analysis - General, Instrumentation-general, Sampling, ...4.0017

ACQUISITION, REDUCTION AND INTERPRETATION OF MARINE MAGNETIC DATA ...Anomalies, Data Reduction and Analysis, Magnetic Studies, Ridges, ...4.0032

NATIONAL DATA BUOY STUDY ...Buoys, ...8.0281

PARTICIPATION IN USARP EXPEDITIONS ...Antarctica, Data Analysis - General, Marine Biology, Ships and Cruises, Teaching and Research, ...12.0012

SATURATED DIVING FACILITIES FOR DIVER-SCIENTIST AND RELATED RESEARCH ...Controls, Marine Environments-general, Model Studies, Submersibles, Underwater-construction, Underwater-laboratory, ...8.0311

USES OF STATISTICAL INFERENCE AND EXPERIMENTAL DESIGN FOR EFFICIENT COLLECTION OF OCEAN DATA ...Data & Statistics Storage, Information Retrieval Methods, Sampling, ...4.0015

OCEAN SYSTEM TELEMETRY STUDY ...Applied Electronics, Buoys, Data Transmission Systems, Moorings, Telemetry-other, ...4.0002

OCEAN ENGINEERING STUDIES ...Applied Electronics, Data Processing Services, Engineering Studies-general, Instrumental Services, Laboratory Analysis, Sonar, ...8.0052

WOODS HOLE ENVIRONMENTAL STUDIES OF SEA FLOOR PROPERTIES ...Acoustical, Benthonic-bottom, Geomorphology-topography, Gravity Studies, Subbottom, ...7.0118

POTENTIAL FISHERY FOR RIVER HERRINGS IN CONNECTICUT RIVER ...Alewife,menhaden,shad,herring, Connecticut River, Life History Studies, Nets, Spawning & Nesting Sites, Survey Studies, ...5.0202

RECOVERY OF MARKED COHO ...Captive Rearing, Salmon -coho,chinook,sokeeye..., Tags, ...5.0163

SPRING DISTRIBUTION OF FISHES ...Commercial Fishing, Continental Shelf, Environmental Ecology, Fish -non-specific, Spring, Temporal Distribution, ...5.0154

LAKE BORGNO - CHANDELEUR SOUND SYSTEM ...Gulf of Mexico, Maturity & Growth Stages, Nets, Plankton Sampling, Population Dynamics, Shrimps - Common, ...5.0434

A STUDY OF THE OPEN WATER DISTRIBUTION AND ABUNDANCE OF NET-PLANKTON AS AN INDEX OF EUTROPHICATION IN LAKE SUPERIOR ...Bioindicators, Eutrophication, Lake Superior, Plankton Sampling, Zooplankton, ...6.0160

COLLECTION, ANALYSIS, INTERPRETATION, AND PRESENTATION OF OCEANOGRAPHIC - GEOLOGIC DATA IN CONNECTION WITH SUBMARINE CABLE SYSTEM DEVELOPMENT ...Cables and Transmission Lines, Data Analysis - General, Submerged Ships, Transmission Lines, ...7.0043

## SUBJECT INDEX

## Data Processing Services

- WAVE MEASUREMENT IN THE OPEN OCEAN ...Buoys, Oceanic - Pelagic, Profiles, Water Motion Recorders, Waves, ...2.0109
- MARINE BIOLOGY STUDIES ON FAIRFAX ISLAND ...Australia, Collections, Islands, Marine Biology, Reefs, ...5.0874
- ADVANCED TECHNOLOGY AND BOTTOM PREDICTIONS ...Acoustical, Benthonic-bottom, Data Analysis - General, Forecasting-prediction, Model Studies, Seismic Studies, ...1.0045
- OCEAN CURRENTS AND CIRCULATION ...Circulation-general, Currents-ocean, Energy, Model Studies, Temperature, ...2.0015
- ISOTOPIC OCEANOGRAPHY ...Arctic Ocean, Oceans - Sea Water, Radioactivity-general, Sampling, Trace Elements, ...1.0090
- AIRBORNE REMOTE SENSING OCEANOGRAPHY PROJECT ...Aircraft, Instrumental Services, Photography, Radar, Satellites, ...4.0155
- PREDICTION OF POLAR ICE BEHAVIOR AND DISTRIBUTION ...Arctic Ocean, Forecasting-prediction, Hydrodynamics, Ice-general, Sea Ice, Weather Forecasting, ...3.0078
- EXPERIMENTAL SEA ICE OBSERVATIONAL TECHNIQUES ...Imaging, Instrumental Services, Range and Tracking-other, Satellites, Sea Ice, ...4.0156
- GEOPHYSICAL SURVEYING AND CHARTING ...Airborne Gravimeters, Development of Models, Gravity Studies, Mapping, Platforms, ...7.0106
- GREAT LAKES RESEARCH - MONITORING OF WATER CHARACTERISTICS ...Forecasting-prediction, Geophysical Analysis, Great Lakes-general, Instrumentation-general, Temperature, ...1.0185
- TIDAL DISCHARGE RESEARCH, NEW JERSEY ...Data Reduction and Analysis, Discharge, Sediments, Tides, Water Quality-general, ...2.0088
- DEVELOPMENT OF AN ELECTRONIC METHOD FOR THE AUTOMATIC SHIPBOARD RECORDING OF DRILL PERFORMANCE DATA ...Data Acquisition Systems, Drilling and Coring, Non-electrical Measurements, Recording Systems, Technique Development, ...8.0247
- INVENTORY OF THE GULF ESTUARY SYSTEM ...Bays, Estuaries, Fishing, Gulf of Mexico, Sedimentology-general, ...4.0047
- ROUTINE SAMPLING AT SEVEN INDEX STATIONS ...Bottom Sampling, Fish -non-specific, Lake Erie, Plankton Sampling, Sampling, ...5.0214

### Data Analysis - General

- HONEYWELL ACOUSTIC RESEARCH PROGRAM ...Acoustical, Data Acquisition, Interfaces, Model Studies, Reverberation, Sonar, ...1.0071
- SUBMARINE SEISMIC PROFILES OF THE WORLDS OCEANS ...Atlantic Ocean-general, Cables and Transmission Lines, Indian Ocean-general, Seismic Studies, Subbottom, ...7.0150
- RESEARCH IN MARINE GEOLOGY ...Bathymetry, Gravity Studies, Magnetic Studies, Seismic Studies, Ships and Cruises, ...4.0027
- SATELLITE SEA ICE STUDIES USING HRIR ...Arctic Ocean, Infrared Radiation, Satellites, Sea Ice, Technique Development, ...3.0075
- GULF STREAM EDDIES ...Data Reduction and Analysis, Gulf Stream, Hydrodynamics, Temperature, Water Motion, ...2.0028
- ANALYTICAL OCEANOGRAPHY ...Gases, Gulf Stream, Salinity, Temperature, ...4.0028
- DATA COLLECTION ...Charts, Data Acquisition, Instrumentation-general, Sampling, ...4.0017
- BATHY THERMOGRAPH ANALYSIS ...Bathythermographs, Critically Evaluated Data, Model Studies, Salinity, Surface Environments, Temperature, ...1.0178
- DESCRIPTIVE OCEANOGRAPHY ...Circulation-general, Currents-ocean, Pacific Ocean-east, Wind-water Interaction, ...4.0116
- INTERNATIONAL INDIAN OCEAN EXPEDITION PHYSICAL AND CHEMICAL ATLAS ...Data & Statistics Storage, General Sea Water Chemistry, Indian Ocean-general, Tables, Compilations, Catalogs, Water Properties-general, ...4.0130
- ANALYSIS OF SEISMIC DATA COLLECTED DURING THE INTERNATIONAL INDIAN OCEAN EXPEDITION AND IN THE CARIBBEAN SEA ...Basins, Indian Ocean-general, Ridges, Seismic Reflection, Textures-structures, ...7.0119

- GRAVITY AND MAGNETIC DATA COLLECTED DURING THE INTERNATIONAL INDIAN OCEAN EXPEDITION AND IN THE CARIBBEAN SEA ...Data Reduction and Analysis, Digital Computer Applications, Gravity Studies, Indian Ocean-general, Magnetic Studies, Research - Development, ...4.0030
- SEA BREEZE INVESTIGATION ...Energy-general, Gulf of Mexico, Heat and Radiation Transfer, Land-sea Breezes, Texas, ...3.0040
- REDUCTION AND INTERPRETATION OF PHYSIOGRAPHIC DATA ACQUIRED ABOARD LAMONT RESEARCH VESSELS ...Data Reduction and Analysis, Geology-general, Geomorphology-topography, Ocean Basins, Physiography-general, ...7.0300
- STUDIES IN THE INDIAN OCEAN ...Circulation-general, Indian Ocean-general, Particle-gas Transfer, Storms-general, ...2.0073
- INTERACTIONS BETWEEN TURBULENCE, CLOUDS, SEA TEMPERATURE ...Indian Ocean-general, Line Islands, Patterns, Temperature, Turbulence, ...3.0025
- COLLECTION, REDUCTION, AND INTERPRETATION OF SEISMOLOGIC AND PHOTOGRAPHIC DATA ...Distribution, Environment, Ocean Basins, Photography, Sedimentary History, Sedimentation, Seismic Studies, ...7.0262
- PARTICIPATION IN USARP EXPEDITIONS ...Antarctica, Data Acquisition, Marine Biology, Ships and Cruises, Teaching and Research, ...12.0012
- INDIAN OCEAN DATA REDUCTION ...Bathymetry, Geophysics-general, Indian Ocean-general, Ocean Basins, Sedimentology-general, ...4.0034
- SYSTEM DESIGN STUDY FOR THE U.S. NAVAL OCEANOGRAPHIC OFFICE INTELLIGENCE DATA HANDLING SYSTEM ...Data Reduction and Analysis, Geophysics-general, Mapping, Optimization Technique, Systems Analysis, ...4.0016
- ISLAND-CURRENT INTERACTIONS ...Acoustical, Currents-ocean, Geomorphology, Islands, Model Studies, ...2.0116
- MEDITERRANEAN OCEANOGRAPHY ...Convection, Heat and Radiation Transfer, Mediterranean Sea-general, Ships and Cruises, Surface Environments, ...4.0132
- EASTERN ATLANTIC AND MEDITERRANEAN OCEANOGRAPHY ...Acoustical, Atlantic Ocean-north, Bathymetry, Mediterranean Sea-general, Oceanography-general, ...1.0055
- WOODS HOLE ENVIRONMENTAL STUDIES OCEANIC ACOUSTICS ...Acoustical, Atlantic Ocean-north, Benthonic-bottom, Reverberation, Scattering, ...1.0057
- PROJECT EVAPORATION ...Evaporation, Model Studies, Oklahoma, Waves, ...3.0031
- EVALUATION AND STATISTICAL ANALYSIS OF ALL DATA ...Geomorphology-topography, Mapping, Spawning & Nesting Sites, Statistics-general, ...4.0018
- DELAWARE ESTUARY AND BAY WATER QUALITY SAMPLING AND MATHEMATICAL MODELING PROJECT ...Delaware Bay, Mathematical Analysis, Model Studies, Pollution Abatement, Technique Development, ...6.0163
- COLLECTION, ANALYSIS, INTERPRETATION, AND PRESENTATION OF OCEANOGRAPHIC - GEOLOGIC DATA IN CONNECTION WITH SUBMARINE CABLE SYSTEM DEVELOPMENT ...Cables and Transmission Lines, Data Acquisition, Submerged Ships, Transmission Lines, ...7.0043
- CORAL ATOLL ECOLOGY ...Anthozoa, Atolls, Bibliography, Productivity - Food Chain, ...5.0872
- SEAMOUNT INVESTIGATION ...Anomalies, Geothermal, Magnetic Studies, Ocean Mining, Seamounts-guyots, Sonar, ...7.0107
- ADVANCED TECHNOLOGY AND BOTTOM PREDICTIONS ...Acoustical, Benthonic-bottom, Data Acquisition, Forecasting-prediction, Model Studies, Seismic Studies, ...1.0045
- GREAT LAKES RESEARCH - ENERGY TRANSFER AT THE AIR-WATER INTERFACE ...Heat and Radiation Transfer, Heat-transfer-other, Lake Michigan, Mass Transfer, Towers, Wind-water Interaction, ...3.0029
- MARINE BIOLOGICAL INVESTIGATIONS - ANALYSIS OF HERRING FISHERY DATA ...Age, Alaska, Alewife, menhaden, shad, herring, Dispersion -other, ...5.0010

### Data Processing Services

- OCEAN ENGINEERING STUDIES ...Applied Electronics, Data Acquisition, Engineering Studies-general, Instrumental Services, Laboratory Analysis, Sonar, ...8.0052

## SUBJECT INDEX

### Data Reduction and Analysis

- GULF STREAM EDDIES ...Data Analysis - General, Gulf Stream, Hydrodynamics, Temperature, Water Motion, ...2.0028
- OCEAN KINEMATICS DYNAMICS ...Chesapeake Bay, Circulation-general, Estuaries, Turbulent Flow, Water Motion, ...2.0069
- THERMAL STRUCTURE ...Salinity, Sea Level Variations, Tables, Compilations, Catalogs, ...1.0184
- ATMOSPHERIC PROCESSES IN THE TROPICS ...Patterns, Shear, Statistics-general, Tropic, Tropical Cyclones, ...3.0059
- ACQUISITION, REDUCTION AND INTERPRETATION OF MARINE MAGNETIC DATA ...Anomalies, Data Acquisition, Magnetic Studies, Ridges, ...4.0032
- ACQUISITION AND INTERPRETATION OF OCEANIC GRAVITY DATA ...Analog Computer Applications, Gravity Studies, Ridges, Structural Analysis, Trenches, ...4.0033
- MULTIVARIATE ANALYSIS OF MICROPALaeONTOLOGICAL DATA FROM DEEP-SEA CORES ...Core Analysis, Development of Models, Multivariate Analysis, Order Foraminifera, Paleotemperature, Population - Distribution, ...5.0827
- GRAVITY AND MAGNETIC DATA COLLECTED DURING THE INTERNATIONAL INDIAN OCEAN EXPEDITION AND IN THE CARIBBEAN SEA ...Data Analysis - General, Digital Computer Applications, Gravity Studies, Indian Ocean-general, Magnetic Research - Development, ...4.0030
- REDUCTION AND INTERPRETATION OF PHYSIOGRAPHIC DATA ACQUIRED ABOARD LAMONT RESEARCH VESSELS ...Data Analysis - General, Geology-general, Geomorphology-topography, Ocean Basins, Physiography-general, ...7.0300
- SUPPORT OF WORLD DATA CENTER - A (OCEANOGRAPHY) ...Data & Statistics Storage, Facilities, Oceanography-general, Writing & Editing, ...12.0018
- SYSTEM DESIGN STUDY FOR THE U.S. NAVAL OCEANOGRAPHIC OFFICE INTELLIGENCE DATA HANDLING SYSTEM ...Data Analysis - General, Geophysics-general, Mapping, Optimization Technique, Systems Analysis, ...4.0016
- SPECTRAL ANALYSIS ...Forecasting-prediction, Handbooks, Oceanography-general, Spectral Analysis, ...11.0032
- WOODS HOLE SHIPBOARD DATA PROCESSING ...Digital Computer Applications, Gravity Studies, Magnetic Studies, Navigation, Real Time Systems, ...4.0031
- ANALYSIS OF INLAND CARGO CONSOLIDATION CENTERS ...Development of Models, Freight, Loading/unloading, Mathematical Models, Warehouses, ...8.0032
- OCEANOGRAPHIC INFORMATION PROCESSING TECHNOLOGY ...Computer Applications, Data & Statistics Storage, Information Retrieval Methods, Information Storage and File, Oceanography-general, Real Time Systems, ...4.0023
- NUMERICAL PREDICTION ...Computer Applications, Meteorological Studies, Prediction, Weather Display Systems, Weather Forecasting, ...4.0041
- WAVE RECORDING AND ANALYSIS ...Lasers-masers, Pressure, Radar, Sonar, Statistics-general, Water Motion Recorders, Waves, ...2.0101
- TIDAL DISCHARGE RESEARCH, NEW JERSEY ...Data Acquisition, Discharge, Sediments, Tides, Water Quality-general, ...2.0088

### Degradation

- MICROBIOLOGICAL INVESTIGATIONS OF THRESHOLD PANELS ...Catabolism and Degradation, Freshwater Mussels, Scallops, Marine Bacteria, Marine Fungi (non-specific), Wood, Wood Preservatives-non-specif, ...8.0243
- IMPACT AND FATE OF POLLUTION IN ESTUARIAL WATERS ...Estuaries, Massachusetts, Pesticides -non-specific, Pollutants - Path of, Pollution Effects, ...6.0153
- PESTICIDE KINETICS ...Aquatic Or Soil-aquatic Cycles, Estuaries, Insecticides -non-specific, Marine Biology (non-specific), Pollutants - Path of, ...6.0148

### Delaware

- SYSTEMS ENGINEERING AND DEVELOPMENT OF COMMERCIALLY VALUABLE MARINE RESOURCES IN THE DELAWARE AREA ...Aquaculture & Fish-farming, Commercial Fishing, Fish & Shellfish, Oysters, Quality -non-specific, ...8.0002

- RECENT MARINE AND NONMARINE SEDIMENTS AND MICROFAUNA OF DELAWARE COASTAL AREAS ...Bays, Facies, Paleoenvironments, Quaternary Period, Sedimentary Structure-general, Shoreline - Coastline, ...7.0207
- FLUSHING PATTERN OF CERTAIN TIDAL STREAMS IN DELAWARE ...Aquatic Ecology, Circulation -water, Discharge, Industrial-general, Tidal Streams, ...2.0013
- REMOTE SENSING OF DELAWARE ESTUARY ...Aircraft, Estuaries, Pollutants-general, ...4.0168
- ESTUARINE ECOLOGY--INDIAN RIVER, DELAWARE ...Estuaries, Tidewater Areas, Water Environment -other, ...5.0875

### Delaware Bay

- LOCATING AND MAPPING THE EXISTING SEED OYSTER BEDS IN DELAWARE BAY ...Aquatic Ecology, Bays, Mapping, Oysters, Spawning & Nesting Sites, ...5.0381
- BIOLOGICAL EVALUATION OF EACH EXISTING SEED OYSTER BED IN DELAWARE BAY ...Fouling, Number Or Density, Oysters, Spawning & Nesting Sites, ...5.0382
- DELAWARE ESTUARY AND BAY WATER QUALITY SAMPLING AND MATHEMATICAL MODELING PROJECT ...Data Analysis - General, Mathematical Analysis, Model Studies, Pollution Abatement, Technique Development, ...6.0163
- ECOLOGY OF SABELLARIID REEFS IN DELAWARE BAY ...Aquatic Ecology, Environmental Ecology, Lugworms, Marine Segmentedworm, Productivity - Food Chain, Vertical Distribution, ...5.0871
- MARINE SPORTS FISHES RESEARCH ...Fish -other, Killifishes - Cyprinodon, Population Dynamics, Water Salinity, Water Temperature-non-specific, ...5.0248
- DELAWARE ESTUARY SEDIMENTATION STUDY ...Estuaries, Salinity, Sediment Yield, Sedimentation, Supply Rate, ...7.0275
- SEDIMENT MOVEMENT AND BOTTOM CONDITIONS IN THE DELAWARE ESTUARY MOUTH AREA ...Bottom Sampling Device, Currents-other, Photography, Sedimentation, Tides, ...7.0220

### Delaware River

- THE INSTITUTE FOR THE DEVELOPMENT OF RIVERINE AND ESTUARINE SYSTEMS (IDRES) ...Estuaries, Waste Disposal-general, ...12.0043
- ECONOMICS OF WATER QUALITY FOR A REGIONAL SYSTEM ...Economic Efficiency, Estuaries, Finance, Regional Areas, Water Demand, Water Quality-general, ...9.0018

### Deltas

- COASTAL MORPHOLOGY ...Beach, Development, General Information Services, Shore Features-general, Shoreline - Coastline, Tropic, ...7.0297
- PRE-DELTA SEDIMENTATION IN THE ST. CLAIR RIVER DELTA AREA ...Michigan, Sedimentary History, Sedimentology-general, ...7.0248
- ENVIRONMENT OF DEPOSITION OF ARGILLACEOUS SEDIMENTS ...Adsorption Capacity, Boron, Chemistry, Clays, Mississippi River, ...7.0240

### Deposits - Non-metallic

#### Oil - Petroleum

- PUERTO RICO COOP - MONA PASSAGE ...Continental Shelves, Land Economics, Mine Wastes, Potential of Deposit, Puerto Rico, Sands and Gravels, ...7.0034

#### Phosphate

- DEVELOPMENT OF DIAMOND DRILLING TECHNIQUES, FOR PHOSPHORITE DEPOSITS, USING STANDARD TOOLS PLUS BUOYANCY TANKS ...Bottom Sampling Device, Disturbed/undisturbed, Drilling and Coring, Soil Sampling, Technique Development, ...8.0248
- ANALYSIS AND INTERPRETATION OF DATA FROM GEOPHYSICAL AND PHOTOGRAPH SURVEY OF CORONADO BANK, OFF SOUTHERN CALIFORNIA ...California, Ocean Mining, Photography, Potential of Deposit, ...7.0004

**Sands and Gravels**

POTENTIALLY-ECONOMIC SAND AND SILT DEPOSITS IN LAKE ONTARIO, NEW YORK ...Geologic Maps, Lake Ontario, New York, Potential of Deposit, Submergent, ...7.0024  
 PUERTO RICO COOP - MONA PASSAGE ...Continental Shelves, Land Economics, Mine Wastes, Oil - Petroleum, Potential of Deposit, Puerto Rico, ...7.0034

**Deposits-ores**

MARINE HEAVY-METALS PRODUCTION INFORMATION, ON WORLDWIDE BASIS ...Appraisals-general, Beneficiation, Documents & Literature, Heavy Elements, Ocean Mining, ...7.0006  
 OREGON-NORTHERN CALIFORNIA PLACER DEPOSITS ...California, Drilling and Coring, Oregon, Placer, Reconnaissance, ...7.0009

**Cobalt**

FORMATION AND DEGRADATION OF MANGANESE NODULES BY MARINE BACTERIA ...Manganese, Marine Bacteria, Nickel, Ocean Mining, Titanium, ...7.0025

**Gold**

APPLICATION OF NUCLEAR TECHNIQUES TO MARINE MINERALS TECHNOLOGY ...Activation Analysis, Geological Exploration, Manganese, Ocean Mining, Physical Properties, ...8.0085  
 MARINE GEOLOGY OF THE SAN FRANCISCO BAY ...Bays, Geology-general, Mechanical Properties, San Francisco Bay, Structural Studies, Tectogenesis, ...7.0035  
 LABORATORY STUDIES TO CORRELATE ENGINEERING PROPERTIES OF MARINE PLACER MATERIALS WITH SAMPLING TOOL PERFORMANCE ...Coring and Dredging, Laboratory Analysis, Mechanical Properties, Placer, Scientific-service-support, ...8.0244

**Manganese**

APPLICATION OF NUCLEAR TECHNIQUES TO MARINE MINERALS TECHNOLOGY ...Activation Analysis, Geological Exploration, Gold, Ocean Mining, Physical Properties, ...8.0085  
 FORMATION AND DEGRADATION OF MANGANESE NODULES BY MARINE BACTERIA ...Cobalt, Marine Bacteria, Nickel, Ocean Mining, Titanium, ...7.0025

**Nickel**

FORMATION AND DEGRADATION OF MANGANESE NODULES BY MARINE BACTERIA ...Cobalt, Manganese, Marine Bacteria, Ocean Mining, Titanium, ...7.0025

**Silver**

A STUDY OF THE LEAD OXYCHLORIDES AND RELATED SPECIES FOUND IN THE ANCIENT SLAGS OF LAURIUM, GREECE ...Chemical Reactions, Dispositions of Minerals, Greece, Mine Wastes, Mineral Genesis, ...7.0058

**Titanium**

FORMATION AND DEGRADATION OF MANGANESE NODULES BY MARINE BACTERIA ...Cobalt, Manganese, Marine Bacteria, Nickel, Ocean Mining, ...7.0025

**Deserts**

A UNIFIED APPROACH TO WATER, FOOD AND POWER IN A COASTAL DESERT COMMUNITY ...Arid and Desert, Desalination, Diesel, Distilling Units, Electric Power Plants, Greenhouse, Use of Impaired Water, ...7.0002

**Detectors and Sensors**

OCEAN RADIOACTIVITY ...Depth, Neutron Detectors, Proportional Counters, Radioactivity, ...1.0089

**Deuterium**

LIGHT ISOTOPE STUDIES ...Chemical Reactions, Circulation-general, Isotope Tracer-other, Mixing, Oxygen, Particle-gas Transfer, ...1.0077

**Developmental Biology - Animal**

GRADUATE SUMMER RESEARCH PROGRAMS IN EXPERIMENTAL EMBRYOLOGY ...Bermuda, Facilities, Marine Biology (non-specific), ...11.0002  
 ULTRASTRUCTURE OF VARIOUS MARINE AND BRACKISH WATER ORGANISMS ...Differentiation Mechanism, Electron Microscopy, Marine Biology (non-specific), Plant Developmental Biology, ...5.0640

**Invertebrates**

**Basic Embryology**

BIOSYNTHETIC PROCESSES DURING DEVELOPMENT OF SEA URCHIN EGGS ...Cell Cycle, Messenger RNA, Nucleic Acids, Proteins, Sea Urchins & Other Echinoderm, ...5.0775  
 MOLECULAR ASPECTS OF CELLULAR DIFFERENTIATION AND DIVISION ...Biosynthesis, Cell Cycle, Differentiation Mechanism, Proteins, Replication, Sea Urchins & Other Echinoderm, ...5.0985  
 MECHANISMS OF CYTOKINESIS IN ANIMAL CELLS ...Cell Cycle, ...5.1008  
 DEVELOPMENT IN ILYANASSA ...Gastropods - slugs, conch, snails, Metabolic Inhibitors, Other, ...5.0594  
 CYTOLOGICAL CHARACTERISTIC ...Animal Taxonomy, Porifera, Speciation, Structural Functions, ...5.0557  
 BIOCHEMISTRY OF FERTILIZATION AND EARLY DEVELOPMENT ...Fertilization, Reproductive System, Sea Urchins & Other Echinoderm, Vertebrates -non-specific, ...5.0550  
 MACROMOLECULAR EVENTS OF FERTILIZATION AND EARLY EMBRYONIC DEVELOPMENT ...Biosynthesis, Reproductive System, Ribosomes, Sea Urchins & Other Echinoderm, ...5.1011  
 PHYSIOLOGY OF FERTILIZATION AND NUCLEO-CYTOPLASMIC INTERACTIONS IN SEA URCHIN DEVELOPMENT ...Messenger RNA, Nucleus (non-specific & Ot.), Reproductive System, Sea Urchins & Other Echinoderm, Selection & Breeding, ...5.0673  
 STUDIES ON GAMETOGENESIS IN HYDROMEDUSAE ...Developmental Physiology, Differentiation Mechanism, Hydra, Portuguese Man-of-war, Regeneration and Wound, Reproductive System, Testosterone, ...5.1040  
 CYTOPLASMIC FILAMENTS AND CELL MOVEMENT IN DEVELOPMENT ...Fibrils and Filaments, Growth (non-specific & Ot.), Motility and Migration, Proteins, Sea Squirts - Tunicates, ...5.1037  
 CELL CONTACT IN RELATION TO GROWTH AND MORPHOGENESIS ...Adhesion, Cellular Membranes (non-spec.), Electron Microscopy, Porifera, ...5.0996  
 FERTILIZATION MECHANISMS AND GAMETE PHYSIOLOGY IN MARINE INVERTEBRATES ...Male Gametes, Metabolism, Reproductive System, Sea Urchins & Other Echinoderm, ...5.0590  
 STRUCTURE AND FUNCTION OF CELL ORGANELLES DURING GROWTH AND DEVELOPMENT ...Acrosomes, Differentiation Mechanism, Nucleolus, Ribosomes, ...5.0935  
 STUDIES ON EMBRYONIC CELLS ...Chickens, Reproductive System, Sea Squirts - Tunicates, Suspension Culture, ...5.0945  
 REPRODUCTION AND EMBRYONIC SURVIVAL IN ASCIDIA NIGRA (SAVIGNY) ...Biological Rhythms, Laboratory, Reproductive System, Sea Squirts - Tunicates, Whole Body Culture & rearing, ...5.0600  
 MOLECULAR STUDIES OF DIFFERENTIATING CELLS ...Biosynthesis, Differentiation Mechanism, ...5.0984  
 NUCLEIC ACID AND PROTEIN SYNTHESIS DURING OOGENESIS ...Autoradiography, Gastropods - slugs, conch, snails, Gene Action, Lugworms, Marine Segmented-worm, Reproductive System, ...5.1024  
 RNA SYNTHESIS DURING SEA URCHIN DEVELOPMENT ...Differentiation Mechanism, Metabolic-biochemical Genetics, Mitochondria, Replication, Sea Urchins & Other Echinoderm, ...5.0611  
 GROWTH, DIFFERENTIATION AND NERVE TRANSMISSION IN THE HYDROID, CAMPANULARIA ...Developmental Physiology, Growth Rate, Hydra, Portuguese Man-of-war, Nervous System, ...5.0601  
 BIOCHEMISTRY OF DEVELOPMENT ...Control and Regulation, Differentiation Mechanism, Messenger RNA, Sea Urchins & Other Echinoderm, Tryptophan Oxidase, ...5.0994  
 PRESENCE OF ENZYMES RELATED TO DNA SYNTHESIS IN EGGS OF ECHINODERMS ...Developmental Stages, DNA

- Polymerase, Enzyme Formation, Nucleoside Kinase, Sea Urchins & Other Echinoderm, ...5.1034
- CONTINUED STUDIES ON THE INFLUENCE OF THE EGG CORTEX ON THE DEVELOPMENT OF THE MOLLUSCAN EMBRYO ...Differentiation Mechanism, Gastropods - slugs, conch, snails, Octopus, Squid, Cuttlefish... , Plasma Membrane, Surface Properties -other, ...5.0423
- SHELLFISH EMBRYOLOGY AND LARVAE DEVELOPMENT STUDY ...Captive Rearing, Crustacea -non-specific, Mollusks - non-specific & Other, Training Grants, Fellowships, ...5.0358
- MORPHOLOGY, PHYSIOLOGY AND ECOLOGY OF MARINE LAMELLIBRANCHS ...Aquatic Ecology, Behavior, Freshwater Mussels, Scallops, Invertebrate Anatomy, ...5.0479
- CILIA DIFFERENTIATION IN THE SEA URCHIN EMBRYO ...Cilia and Flagella, Differentiation Mechanism, Proteins, Sea Urchins & Other Echinoderm, Subunits, ...5.0616
- CILIA DIFFERENTIATION IN MARINE EMBRYOS ...Cilia and Flagella, Lugworms, Marine Segmentedworm, Sea Urchins & Other Echinoderm, ...5.0617
- ULTRASTRUCTURE OF EARLY CLEAVAGE STAGES IN THE EGG OF LYMNAEA SP ...Cell Cycle, Electron Microscopy, Gastropods -slugs, conch, snails, Invertebrate Anatomy, Microtubules, ...5.0509
- PROTEIN SYNTHESIS DURING THE EARLY DEVELOPMENT OF THE SEA URCHIN EMBRYO ...Cell Injury and Autolysis, Proteins, Radiation Effects-non-specific, Ribosomes, Sea Urchins & Other Echinoderm, ...5.0537
- PHYSIOLOGY AND BEHAVIOR OF LARVAE (PHYSIOECOLOGY OF SHELLFISH PROGRAM) ...Behavior, Clams, Maturity & Growth Stages, Oysters, Ph, Acidity -water, ...5.0373
- ANTIGEN DISTRIBUTION OF DEVELOPING SEA URCHIN EMBRYOS ...Antigen, Immunity, Interspecific Genetic Relat. , RNA , Sea Urchins & Other Echinoderm, ...5.0585
- LARVAL DEVELOPMENT OF DECAPOD CRUSTACEA ...Animal Taxonomy, Bibliography, Crabs, Decapoda - Non-specific, Lobsters, ...5.0410
- DEVELOPMENTAL STUDIES OF SELECTED INVERTEBRATES ...Developmental Physiology, Hatchability, Maturity & Growth Stages, Size, ...5.0958
- STRUCTURAL ANALYSIS OF CELL DIVISION ...Cell Cycle, Histochemistry - Cytochem, Nucleolus, Nucleus (non-specific & Ot. ), Sea Urchins & Other Echinoderm, ...5.0645
- CELL TRANSFORMATIONS, DIVISION, AND MOTION ...Ameboid Movement, Cell Cycle, Microtubules, Nucleic Acids, ...5.0234
- PROTEIN SYNTHESIS ACTIVATION IN SEA URCHIN EGGS ...Biosynthesis, Metabolism, Proteins, Reproductive System, Sea Urchins & Other Echinoderm, ...5.0543
- CEPHALOPOD LENS DEVELOPMENT ...Differentiation Mechanism, Lens Proteins, Microtubules, Octopus, Squid, Cuttlefish... , Visual Organs, ...5.0424
- AN ANALYSIS OF DEVELOPMENT IN ARTEMIA SALINA EMBRYOS ...Biosynthesis, Nucleic Acids, Proteins, Ribosomes, Shrimps - Brine Or Fairy, ...5.0406

**Developmental Physiology**

- AGING IN HYDROIDS ...Aging, Cell Injury and Autolysis, Environmental Physiology, Hydra, Portuguese Man-of-war, Senescence, ...5.0597
- CONTROLLED ENVIRONMENTAL FACTORS ON THE DEVELOPMENT OF ESTUARINE AND OCEANIC CRUSTACEA ...Aquatic Ecology, Crabs, Estuaries, Salinity, Temperature, ...5.0476
- SYSTEMATIC STUDIES ON HERMIT CRABS AND OTHER DECAPOD CRUSTACEANS ...Animal Taxonomy, Atlantic Ocean-south, Crabs, Life History Studies, ...5.0408
- MORPHOLOGIC REGULATORY MECHANISMS IN TERRESTRIAL AND MARINE ORGANISMS ...Amphibia -non-specific & Other, Collagen, Fish -other, Metabolism, Porifera, ...5.0982
- STUDIES ON GAMETOGENESIS IN HYDROMEDUSAE ...Basic Embryology, Differentiation Mechanism, Hydra, Portuguese Man-of-war, Regeneration and Wound, Reproductive System, Testosterone, ...5.1040
- RESEARCH ON THE BIO-SYSTEMATICS OF THE CIRRIPIEDIA ...Barnacles, Biological Rhythms, Visual Organs, ...5.0364
- LARVAL DEVELOPMENT OF SCYLLARIDEAN LOBSTERS ...Animal Taxonomy, Environmental Physiology, Invertebrate Nutrition, Laboratory, Lobsters, ...5.0409

- AN EXPERIMENTAL APPROACH TO THE GENETIC CONTROL OF MORPHOGENESIS IN ECHINODERMS ...Biosynthesis, Disease & Anomalies, Sea Urchins & Other Echinoderm, ...5.0608
- CORRELATION BETWEEN ELECTRICAL PATTERNS AND MORPHOGENETIC PATTERNS DURING REGENERATION ...Electrical Fields, Hydra, Portuguese Man-of-war, Regeneration and Wound, ...5.0602
- GROWTH, DIFFERENTIATION AND NERVE TRANSMISSION IN THE HYDROID, CAMPANULARIA ...Basic Embryology, Growth Rate, Hydra, Portuguese Man-of-war, Nervous System, ...5.0601
- LIFE HISTORY AND DEVELOPMENT OF POLYCHAETOUS ANNELID LARVAE ...Behavior, Life History Studies, Lugworms, Marine Segmentedworm, Reproductive System, Whole Body Culture & Rearing, ...5.0604
- BENTHIC COMMUNITIES ...Behavioral Ecology, Benthic Fauna, Bottom Sampling Device, Fouling, Metabolism, Productivity - Food Chain, ...5.0561
- STUDIES ON MOLTING, GROWTH, AND DEVELOPMENT IN ACORN BARNACLES AND LARVAL DECAPODS ...Barnacles, Biological Rhythms, Endocrine System, Fouling, ...5.0296
- CONTROLLED REARING OF DUNGENESS CRAB LARVAE ...Captive Rearing, Crabs, Maturity & Growth Stages, Oregon, ...5.0486
- THE PURCHASE AND INTRODUCTION OF CULTCH MATERIALS ...Oysters, Ponds, Spawning & Nesting Sites, Stocking of Fish & Shellfish, ...8.0009
- INVESTIGATIONS OF THE INDUCING CAPACITY OF THE POLAR LOBE IN THE DEVELOPMENT OF THE MARINE GASTROPOD ILYANASSA OBSOLETA ...Gastropods - slugs, conch, snails, Invertebrate Physiology, ...5.0417
- REAR AND DESCRIBE LARVAE OF BIVALVES ...Captive Rearing, Clams, Freshwater Mussels, Scallops, Invertebrate Culture, ...5.0507
- REPRODUCTIVE BIOLOGY, DEVELOPMENT, AND SYSTEMATICS OF THE SIPUNCULIDS OF THE CARIBBEAN ...Animal Taxonomy, Caribbean Sea, Invertebrates -non-specific, Range Or Territorial Distr. , Reproductive System, ...5.0579
- SYSTEMATICS AND MORPHOLOGY OF THE SIPUNCULID LARVAE OF THE INDIAN OCEAN ...Animal Taxonomy, Indian Ocean-general, Invertebrate Anatomy, Invertebrates -non-specific, ...5.0765
- LIFE HISTORY OF THE SHARK COPEPOD, KROYERIA DISPAR ...Copepods, Ectoparasites, Life History Studies, Whole Body Culture & Rearing, ...5.0393
- DIAGNOSTIC CHARACTERS & DEVELOPMENT OF EXTERNAL GENITALIA IN JUVENILE GROOVED SHRIMPS OF GENUS PENAEUS FROM WESTERN ATLANTIC ...Atlantic Ocean-general, Invertebrate Anatomy, Reproductive System, Shrimps - Common, ...5.0495
- THE DISEASES OF INVERTEBRATE ANIMALS ...Immunology, Invertebrate Pathology, Tumors, ...5.0536
- STATOLITH DIFFERENTIATION IN AURELIA (JELLYFISH) ...Calcium, Differentiation Mechanism, Jelly Fish, Proprioceptors, ...5.0598
- DEVELOPMENTAL STUDIES OF SELECTED INVERTEBRATES ...Basic Embryology, Hatchability, Maturity & Growth Stages, Size, ...5.0958

**Mammals**

**Developmental Physiology**

- BREEDING AND MATERNAL BEHAVIOR AMONG THE STELLER SEA LION ...Behavior, Parturition, Seals, Spawning & Nesting Sites, ...5.0524

**Vertebrates**

**Basic Embryology**

- EFFECTS OF IRRADIATION, TEMPERATURE AND OTHER ENVIRONMENTAL FACTORS ON SALMONID EMBRYOS ...Radiation Effects-non-specific, Salmon & Trout - Non-specific, Water Light Quality & Quantity, Water Temperature-non-specific, X and Gamma Rays, ...5.0336
- MECHANISMS OF CYTOKINESIS IN ANIMAL CELLS ...Cell Cycle, ...5.1008
- BIOCHEMISTRY OF FERTILIZATION AND EARLY DEVELOPMENT ...Fertilization, Reproductive System, Sea Urchins & Other Echinoderm, Vertebrates -non-specific, ...5.0550

## SUBJECT INDEX

## Discharge

CELL CONTACT IN RELATION TO GROWTH AND MORPHOGENESIS ...Adhesion, Cellular Membranes (non-spec.), Electron Microscopy, Porifera, ...5.0996

MORPHOGENETIC MOVEMENTS IN FISH EMBRYOS ...Fish - non-specific, Morphological Action, ...5.0281

DEVELOPMENTAL ANALYSIS OF FUNDULUS ...Central Nervous System, Fats, Killifishs - Cyprinodon, Phospholipids, Transplants, ...5.0316

STUDIES ON EMBRYONIC CELLS ...Chickens, Reproductive System, Sea Squirts - Tunicates, Suspension Culture, ...5.0945

BIOCHEMICAL BASIS OF SPECIFIC CELL ASSOCIATION ...Adhesion, Chickens, Pacific Ocean-general, Porifera, ...5.0946

MOLECULAR STUDIES OF DIFFERENTIATING CELLS ...Biosynthesis, Differentiation Mechanism, ...5.0984

THE INFLUENCE OF ENVIRONMENTAL FACTORS UPON DEVELOPING MERISTIC STRUCTURES IN THE MARINE FISH, FUNDULUS MAJALIS (WALBAUM) ...Developmental Physiology, Environmental Physiology, Killifishs - Cyprinodon, Water Temperature-non-specific, ...5.0298

ECOLOGY AND TAXONOMY OF TROPICAL ATLANTIC SCOMBRID EGGS AND LARVAE ...Animal Distr. (non-specific), Animal Taxonomy, Food Supply, Life History Studies, Tuna, Mackerel, Albacore... , ...5.0772

CELL TRANSFORMATIONS, DIVISION, AND MOTION ...Ameboid Movement, Cell Cycle, Microtubules, Nucleic Acids, ...5.0234

CELLULAR DIFFERENTIATION ...Active Transport, Differentiation Mechanism, Frogs, Ionic Effect, Skin Or Special Derivatives, ...5.0618

BEHAVIOR IN EMBRYOS AS IT RELATES TO ENCEPHALIZATION ...Behavior, Bullheads, Central Nervous System, Developmental Physiology, Visual Organs, ...5.0270

### Developmental Physiology

IONOCYTE FORMATION IN GILL EPITHELIUM OF FISHES ...Biosynthesis, Differentiation Mechanism, Fish - non-specific, Osmoregulation, ...5.0301

THE INFLUENCE OF ENVIRONMENTAL FACTORS UPON DEVELOPING MERISTIC STRUCTURES IN THE MARINE FISH, FUNDULUS MAJALIS (WALBAUM) ...Basic Embryology, Environmental Physiology, Killifishs - Cyprinodon, Water Temperature-non-specific, ...5.0298

BIOLOGY OF THE LARVAL SEA LAMPREY ...Control of Nuisance Species, Environmental Ecology, Great Lakes-general, Lampreys, Life History Studies, ...5.0633

DEVELOPMENTAL MORPHOLOGY OF COREGONIDS ...Aquatic Ecology, Bonneville Cisco, Cisco, Lake Herring, Great Lakes-general, Vertebrate Anatomy, ...5.0274

SYSTEMATIC STUDIES OF FISHES ...Animal Taxonomy, Fish - non-specific, Life History Studies, Vertebrate Anatomy, ...5.0059

STATOLITH DIFFERENTIATION IN AURELIA (JELLYFISH) ...Calcium, Differentiation Mechanism, Jelly Fish, Proprioceptors, ...5.0598

BEHAVIOR IN EMBRYOS AS IT RELATES TO ENCEPHALIZATION ...Basic Embryology, Behavior, Bullheads, Central Nervous System, Visual Organs, ...5.0270

## Developmental Psychology

### Social Behavior

WHISTLE CONTOURS IN ODONTOCETE CETACEANS ...Behavioral Ecology, Mammals, Sound Production, ...5.0538

## Diabetogenic, Ns

NEUROSECRETION AND ENDOCRINE PHYSIOLOGY ...Configuration, Crustacea -non-specific, Endocrine System, Hormones, Intermedin, ...5.1023

## Diagenesis

BIOGEOCHEMISTRY OF TERRESTRIAL & EXTRATERRESTRIAL ORGANIC MATTER ...Biochemical, Biogenous, Biogeochemical Process, Exobiology, Organic, Sulfur Bacteria, ...7.0074

URANIUM GEOCHEMISTRY IN (MODERN) CARBONATES USING THE FISSION TRACK METHOD ...Biogeochemical Process, Carbonates-general, Chemistry, Organism Sampling Devices, Uranium, ...7.0076

THE FORMATION OF DOLOSTONE AND CHERT IN THE UPPER MIDDLE CAMBRIAN OF THE GREAT BASIN ...Cambrian Period, Chert, Dolomite, Great Basin, Petrography, ...7.0283

EARLY DIAGENESIS OF CARBONATE SEDIMENTS IN A SUPRATIDAL EVAPORITIC SETTING ...Carbonates-general, Continental Shelf, Origin, Persian Gulf, Sedimentary History, Sedimentation, ...7.0252

MARINE GEOLOGY OF THE SUB-ANTARCTIC PACIFIC REGION ...Antarctic Ocean, Core Analysis, Distribution, Origin, Petrology, Sedimentary History, ...7.0049

CARBONATE SEDIMENTATION IN THE TONGUE OF THE OCEAN, BAHAMAS ...British West Indies, Carbonates, Paleocology, Sea Level Variations, Sedimentation, ...7.0267

THE SEDIMENTARY AND DIAGENETIC RECORD OF ENVIRONMENTAL PARAMETERS IN RECENT BAHAMIAN TIDAL FLATS ...British West Indies, Environmental Effects-geologic, Intertidal Areas, Local Stratigraphy, Paleoclimatology, ...7.0163

STABLE ISOTOPE STUDIES ON COEXISTING MINERALS IN MARINE SEDIMENTS ...Coring and Dredging, Genetic Relationships, Mineralogy, Red Sea, Salinity, Thermal, ...1.0106

THE GEOCHEMISTRY, MINERALOGY AND ORIGIN OF PELAGIC SEDIMENTS IN AREAS OF HIGH HEAT FLOW AND FRACTURE ZONES ...Chemistry, Geochemistry, Heat Flow Measurements, Mineralogy, Origin, Sedimentation, ...7.0227

TRACE ELEMENT AND STABLE ISOTOPE STUDIES OF CORAL REEF CARBONATES ...Element Ratios, Fossil Limestone, Paleoenvironments, Reefs, Trace Element Analysis, ...7.0086

DIAGENESIS OF CARBONATE SEDIMENTS ...Carbonates-general, Core Analysis, Geochemistry-general, Pore Fluids, Trace Element Analysis, ...7.0266

DIAGENESIS IN SEDIMENTS ...Cement Origin, Cementing Material, Model Studies, Pore Fluids, Textures-structures, ...7.0192

KAOLINITE AS RELATED TO ENVIRONMENT OF DEPOSITION ...Environment, Genetic Relationships, Kaolinite, Mineral Type, ...7.0239

## Dicots

### Mangroves

MARINE ALGAE OF THE MANGROVE ROOT COMMUNITY ...Algae- General, Habitat Studies, Marine Plants, Puerto Rico, Roots, ...5.0723

MORPHOLOGY AND TAXONOMY OF MARINE FUNGI ...Habitat Studies, Marine Fungi (non-specific), Plant Morphology, Plant Taxonomy, Sub - Tropic, Tropic, ...5.0716

### Water Milfoil, Waterweed...

EFFECT OF EURASIAN WATERMILFOIL CONTROL PROCEDURES ON WILDLIFE AND OTHER ORGANISMS IN AQUATIC ENVIRONMENTS ...Contamination - Water, Diquat, Evaluation, 2,4-d, ...5.0700

## Dielectric Materials

DIELECTRIC MATERIALS ...Organometallic, Submersibles, Thermal Properties, ...8.0215

## Diffraction

### Electron

ELECTRON MICROSCOPE AND ELECTRON DIFFRACTION STUDIES OF GEOLOGICAL SAMPLES ...Electron Microscopy, ...7.0278

## Discharge

MOVEMENT OF RADIONUCLIDES IN THE COLUMBIA RIVER ESTUARY ...Columbia River, Estuaries, Radioactivity, Salinity, Sediment Transport-other, ...6.0179

HYDROLOGIC SYSTEMS ANALYSIS OF THE GREAT LAKES ...Great Lakes-general, Inflow, Water Storage, ...4.0076

FLUSHING PATTERN OF CERTAIN TIDAL STREAMS IN DELAWARE ...Aquatic Ecology, Circulation -water, Delaware, Industrial-general, Tidal Streams, ...2.0013

## Discharge

- CURRENT STUDY ON THE NEUSE RIVER AND ESTUARY ...Dyes, Estuaries, North Carolina, Tracers, Water Motion, ...2.0037
- GENERAL COASTAL INLET STUDIES ...Coastal Engineering-other, Coastlines-shorelines, Model Studies, Synthetic Hydrology, Tides, Water Motion, ...7.0125
- TIDAL DISCHARGE RESEARCH, NEW JERSEY ...Data Acquisition, Data Reduction and Analysis, Sediments, Tides, Water Quality-general, ...2.0088

## Dispersion -water

- TURBULENT DIFFUSION STUDY ...Chesapeake Bay, Estuaries, Tracers-general, Turbulent Flow, Water Motion, ...2.0056
- HORIZONTAL DISPERSION IN SHALLOW ESTUARIES OF IRREGULAR SHAPE ...Circulation -water, Estuaries, Gulf of Mexico, Model Studies, Water Quality-general, ...2.0064
- EXPERIMENTAL AND THEORETICAL STUDY OF THE HYDRODYNAMICS OF DISPERSION IN RIVERS AND ESTUARIES ...Estuaries, Flow Characteristics -water, Model Studies, Streams, Water Motion, ...2.0057
- EDDY DIFFUSION AND BACTERIAL REDUCTION IN WASTE FIELDS ...Bacterial Pollutant Sources, Diffusion, Dyes, Mixing, Pollutants - Path of, Sewers, ...6.0137
- SALT WATER ENTRAINMENT FOR DILUTION IN SEWER OUTFALLS ...Conduit Flow-other, Fluid Flow-other, Fluid Mixing, Ocean, Outlet, Sewers, Two-phase-other, ...8.0329
- DISPERSION IN HYDROLOGIC AND COASTAL ENVIRONMENTS ...Groundwater Movement, Ocean, Shoreline - Coastline, Stratified Flow, Turbulent Flow, ...2.0051
- BIG EDDIES AND MIXING PROCESSES IN THE GREAT LAKES ...Circulation -water, Effluents-waste Water, Great Lakes-general, Mixing, Water Motion, ...2.0052
- GREAT LAKES RESEARCH - SPOIL DISPOSAL EFFECTS ...Great Lakes-general, Pollution - Effects of, Sediments, Spoil Banks, Suspension, Water Properties-general, ...6.0157
- STUDY OF EFFECTS OF OFFSHORE DUMPING ...Circulation-general, Engineering Studies-other, Pollution - Effects of, Pollution Sources-other, Shoreline - Coastline, ...6.0144
- HYDROLOGY OF COASTAL AREA IN THE VICINITY OF RICEBORO, GEORGIA ...Aquifers, Artesian Flow, Estuaries, Georgia, Saline Water Intrusion, Water Quality-general, ...9.0007
- DISPERSION PROCESSES IN ESTUARIES AND RIVERS ...Dyes, Estuaries, Streams, Synthetic Hydrology, ...2.0050

## Diving

- NITROGEN-OXYGEN DECOMPRESSION TABLES FOR ALTITUDE FLIGHT ...Decompression Sickness, Manned Satellite, Safety, Space Medicine, Tables, Compilations, Catalogs, ...6.0099

## Pressure

- HUMAN PERFORMANCE ...Divers, Diving and Scuba, Medical Studies, ...6.0097
- ENVIRONMENTAL PHYSIOLOGY ...Diving and Scuba, Life-support-system, Medical Studies, Submersibles, Underwater-laboratory, ...6.0093
- HUMAN PERFORMANCE IN UNUSUAL ENVIRONMENTS ...Divers, Diving and Scuba, Facilities, Medical Studies, ...12.0005
- DIVING MEDICINE ...Diffusion of Gases, Divers, Diving and Scuba, Occupational Hazards, ...8.0017

## Decompression Sickness

- MANNED DIVING RESEARCH ...Divers, Diving and Scuba, Liquid-breathing, Medical Studies, ...6.0096
- DECOMPRESSION TABLE DEVELOPMENT ...Digital Computer Applications, Divers, Diving and Scuba, Mathematical Biophysic, Medical Studies, Tables, Compilations, Catalogs, ...6.0098
- NITROGEN-OXYGEN DECOMPRESSION TABLES FOR ALTITUDE FLIGHT ...Diving, Manned Satellite, Safety, Space Medicine, Tables, Compilations, Catalogs, ...6.0099
- DEEP DIVING DECOMPRESSION EQUIPMENT AND TECHNIQUES ...Divers, Diving and Scuba, Medical Studies, Navigation Communication, Safety, ...8.0022

## SUBJECT INDEX

## Temperature and Humidity

### Cold

- METABOLIC ADAPTATION TO COLD ...Female, Hypothermia, Korea, Metabolism in Disease, Regulation, ...6.0092

## Diving and Scuba

- SEA BED INSTALLATION ...Benthonic-bottom, Deep, Stabilization, Submersibles, Underwater-construction, ...8.0331
- MAN IN THE SEA - VISUAL ACUITY RESEARCH ...Acuity, Divers, Experiments and Tests, Optical, Submersibles, ...6.0089
- RESEARCH SUBMARINE BEAVER MK IV ...Control-systems, Scientific-service-support, Submersibles, Technique Development, Underwater-laboratory, ...8.0265
- DEEP OCEAN TECHNOLOGY ...Continental Shelf, Survey Studies, Technique Development, ...8.0049
- MANNED DIVING RESEARCH ...Decompression Sickness, Divers, Liquid-breathing, Medical Studies, ...6.0096
- HUMAN PERFORMANCE ...Divers, Medical Studies, Pressure, ...6.0097
- LIFE SUPPORT RESEARCH ...Divers, Medical Studies, Subsurface Environments, Technique Development, ...8.0027
- DECOMPRESSION TABLE DEVELOPMENT ...Decompression Sickness, Digital Computer Applications, Divers, Mathematical Biophysic, Medical Studies, Tables, Compilations, Catalogs, ...6.0098
- SHARK ATTACKS ...Behavioral Ecology, Sharks, Water Environment -other, ...6.0090
- ECOLOGY OF TROPICAL DEEP WATER ALGAE ...Algae-General, Benthic Flora, Plant Succession, Temporal Distribution, Tropic, Vertical Distribution, ...5.0722
- SUPPORT OF THE RESEARCH VESSEL AHOYOHAI III ...California, Equipment Purchase Operation, Geology-general, Marine Biology, Ships and Cruises, ...12.0008
- ENVIRONMENTAL PHYSIOLOGY ...Life-support-system, Medical Studies, Pressure, Submersibles, Underwater-laboratory, ...6.0093
- HUMAN PERFORMANCE IN UNUSUAL ENVIRONMENTS ...Divers, Facilities, Medical Studies, Pressure, ...12.0005
- INTRODUCTION OF MARINE GAME FISHES FROM AREAS IN THE PACIFIC ...Hawaii, Pacific Ocean-north, Stocking of Fish & Shellfish, ...5.0075
- SEA SLED AND SCUBA RECONNAISSANCE OF INSHORE AND STUDIES ON EFFECT OF ARTIFICIAL SHELTERS ON STANDING CROP OF FISHES ...Coastlines-shorelines, Fish -non-specific, Geomorphology-topography, Hawaii, Management -other, ...9.0008
- LIFE-HISTORY AND BIOLOGICAL WORK IN THE RESTORATION AND MANAGEMENT OF SPECIES OF IMPORTANCE TO THE FISHERIES OF THE VIRGIN ISLANDS ...Commercial Fishing, Life History Studies, Management -other, Population Dynamics, Virgin Islands, ...5.0149
- EFFECTS OF LOG RAFTING ON DUNGENESS CRAB ...Contamination - Water, Crabs, Forestry, Mans Activities, Pulp, Paper, and Logging, ...5.0347
- POPULATION STRUCTURE OF THE LOBSTER ...Commercial Fishing, Lobsters, Long Island Sound, Population Dynamics, Size, ...5.0688
- HELIUM - HEAT TRANSFER ...Air, Heat Transfer, Helium, Submersibles, Temperature Effects, ...8.0201
- INVESTIGATIONS ON THE CRUSTOSE CORALLINES OF THE NORTH ATLANTIC ...Atlantic Ocean-north, Marine Plants, Plant Taxonomy, Rhodophyta (non-specific & Ot), Sedimentology-general, ...7.0172
- SHALLOW WATER OCEANOGRAPHY (SEALAB III) ...Diving-system, Environmental Effects-geologic, Instrumentation-general, Underwater-laboratory, ...1.0146
- DEEP OCEAN SYSTEMS ...Diving-system, Submersibles, Underwater-construction, ...8.0339
- SWIMMER HIGH DEFINITION SONAR ...Diving-system, Engineering Studies-other, Maintenance-system, Sonar, Underwater-construction, ...8.0019
- DIVER-ASSISTED OCEANOGRAPHY ...Benthonic-bottom, Continental Shelf, Currents-bottom, Geomorphology-topography, Mapping, Waves-internal, ...4.0098
- DIVING MEDICINE ...Diffusion of Gases, Divers, Occupational Hazards, Pressure, ...8.0017
- ONE ATMOSPHERE DIVERS SUIT ...Diving-system, Life-support-system, Technique Development, ...8.0020

## SUBJECT INDEX

## Earth Magnetism

ADVANCES HEAT SOURCES AND THERMAL INSULATION MATERIALS FOR SWIMMER HEATING ...Diving-system, Heat Transfer, Heating, Thermal, Thermal Insulators, ...8.0021

DEEP DIVING DECOMPRESSION EQUIPMENT AND TECHNIQUES ...Decompression Sickness, Divers, Medical Studies, Navigation Communication, Safety, ...8.0022

SUBMERGED OPERATIONS COMMUNICATIONS (SUBCOM) ...Converters - Coders, Waveform, ...8.0023

PROPULSION FOR SWIMMER VEHICLES ...Closed-cycle, Marine Propulsion, Submersibles, ...8.0159

DIVER NAVIGATION DEVICE ...Bathymetry, Diving-system, Navigation, Technique Development, ...6.0131

TEKTITE I ...Geologic Maps, Geology-general, Mapping, Submersibles, ...4.0054

DEVELOPMENT OF NEW FISHING TECHNIQUES ...Commercial Fishing, Fishing Gear, Geomorphology-topography, Mark, Tag Or Capture -other, Photography, Telemetry, ...8.0151

SEALAB III PARTICIPATION ...Behavioral Ecology, Bioluminescence, Divers, Medical Studies, Submersibles, ...6.0091

RESEARCH STUDIES IN MOLECULAR PHARMACOLOGY ...Anesthetic, Bonding and Binding, Mechanism of Action, Permeability, Thermodynamics, ...6.0100

## DNA

### DNA Other

GROWTH AND DIFFERENTIATION OF PLASTIDS ...Acetabularia, Biosynthesis, Cytoplasmic Inheritance, Nucleus (non-specific & Ot.), Organelle Culture, Photosynthetically Active, ...5.0683

FISH GENETICS AND ECOLOGY ...Estuaries, Fish -non-specific, Life History Studies, ...5.0309

### Dna-satellite

DEGRADATION OF MARINE SURFACES BY SALT REQUIRING BACTERIA ...Control and Regulation, Fouling, Halophilic Bacteria, Isolation From Nat. environ., Metabolic-biochemical Genetics, ...5.0818

## Drainage

DRAINAGE PATTERN DEVELOPMENT ON TIDAL MARSHES ...Aerial Photography, Swamps-marshes, Tides, ...7.0291

## Drift (pesticide)

MESO WIND PATTERNS IN THE CENTRAL CALIFORNIA VALLEY ...Atmospheric Pollution-general, California, Herbicides -non-specific, Land-sea Breezes, Wind Erosion, ...3.0056

## Drift Stations

WEATHER PROGRAM - STATION T-3 ...Arctic Ocean, Energy Exchange Processes, Heat Budget, Patterns, Physical Climatology, Weather Forecasting, ...3.0060

ARCTIC RESEARCH LABORATORY ...Acoustical, Alaska, Arctic Ocean, Seismic Studies, Terrain Analysis, ...12.0003

## Drilling and Coring

FLORIDA CORAL REEF STUDIES ...Environment, Florida, Geologic History-general, Quaternary Period, Reefs, ...7.0162

METEOROLOGICAL SUPPORT OF DEEP-SEA DRILLING OPERATIONS ...Coring and Dredging, Meteorological Studies, Teaching and Research, Waves, Weather Forecasting, ...12.0013

DEVELOPMENT OF DIAMOND DRILLING TECHNIQUES, FOR PHOSPHORITE DEPOSITS, USING STANDARD TOOLS PLUS BUOYANCY TANKS ...Bottom Sampling Device, Disturbed/undisturbed, Phosphate, Soil Sampling, Technique Development, ...8.0248

GEOLOGICAL, GEOPHYSICAL, OCEANOGRAPHIC, AND ECOLOGICAL DATA ON WORLDWIDE BASIS, ON AREAS OF HEAVY METALS POTENTIAL ...California, Continental Shelf, Oregon, Placer, Potential of Deposit, ...7.0005

DEVELOPMENT, TESTING AND EVALUATION OF MODIFICATIONS REQUIRED TO ADAPT DRILLING SAMPLING SYSTEMS TO THE PLATFORM ...Bottom Sampling Device, Coring and Dredging, Equipment, Platforms, Technique Development, ...8.0256

DEVELOPMENT OF MARINE CHURN DRILL FOR SAMPLING UNCONSOLIDATED DEPOSITS ...Bottom Sampling Device, Soil Sampling, Technique Development, Unconsolidated Deposits, ...8.0250

OREGON-NORTHERN CALIFORNIA PLACER DEPOSITS ...California, Deposits-ores, Oregon, Placer, Reconnaissance, ...7.0009

DEVELOPMENT OF AN ELECTRONIC METHOD FOR THE AUTOMATIC SHIPBOARD RECORDING OF DRILL PERFORMANCE DATA ...Data Acquisition, Data Acquisition Systems, Non-electrical Measurements, Recording Systems, Technique Development, ...8.0247

## Drying

### Freeze

FABRIC OF MARINE MUDS ...Fabric, Physical Properties, Size, Terrigenous, Textures-structures, ...7.0242

## Earth Electrical Properties

### Earth-telluric Current

EARTH CURRENT STUDIES ...Aurora, Magnetic Studies, ...4.0085

GEOMAGNETIC STUDIES ...Airborne Probing, Atmospheric Divisions, Fluctuations, ...7.0134

SUBSURFACE RESISTIVITY ...Crust, Magnetic Surveys, Ocean Basins, Resistance, Texas, ...7.0147

### Exploration Methods

#### Electric Logging

FEASIBILITY STUDY OF THE USE OF ELECTRICAL METHODS FOR DETERMINING SIZE AND SHAPE OF DEPOSITS ...Dimensions-distribution, Instrumental Services, Methodology, Ocean Mining, Technique Development, ...7.0008

### Field Characteristics

STUDY OF OCEAN CURRENTS AT SEA FLOOR AND THEIR SPATIAL CORRELATION ...Benthonic-bottom, Currents-bottom, Water Motion Recorders, ...2.0003

#### Conductivity

DETECTION OF DEEP-SEATED ANOMALIES IN ELECTRICAL CONDUCTIVITY UNDER THE GULF OF CALIFORNIA ...Anomalies, Continental Drift, Gulf of California, Heat Flows, Rift, ...7.0099

#### Induction

INDUCTION IN THE OCEAN ...Crust, Currents-ocean, Earth Interior, Fluctuations, Oceanic Fronts, ...1.0137

#### Resistance

SUBSURFACE RESISTIVITY ...Crust, Earth-telluric Current, Magnetic Surveys, Ocean Basins, Texas, ...7.0147

## Earth Magnetism

(U) OCEANIC CRUSTAL AND MANTLE STRUCTURE - ITS ORIGIN AND EFFECT ON EXTERNAL FIELDS ...Anti-submarine-warfare, Crust, Earth Interior, Ocean Basins, Origin, ...7.0145

### Anomalies

MAGNETICS ...Atlantic Ocean-north, Pacific Ocean-general, Ridges, Sea Floor Spreading, Trenches, ...7.0135

ACQUISITION, REDUCTION AND INTERPRETATION OF MARINE MAGNETIC DATA ...Data Acquisition, Data Reduction and Analysis, Magnetic Surveys, Ridges, ...4.0032

A STUDY OF THE STRUCTURAL RELATIONS BETWEEN THE MID-PACIFIC OCEANIC RIDGES AND FRACTURE ZONES ...Ocean History, Polynesia, Ridges, Structural Studies, Tectogenesis, ...7.0111

DETECTION OF DEEP-SEATED ANOMALIES IN ELECTRICAL CONDUCTIVITY UNDER THE GULF OF CALIFORNIA ...Conductivity, Continental Drift, Gulf of California, Heat Flows, Rift, ...7.0099

THE MAGNETIZATION OF SUBMARINE BASALTS AND ITS EFFECT ON MARINE MAGNETIC ANOMALIES ...Extru-

## Earth Magnetism

## SUBJECT INDEX

sives, Field Reversals, Magnetic Studies, Paleomagnetism, Seamounts-guyots, ...7.0153

SEAMOUNT INVESTIGATION ...Data Analysis - General, Geothermal, Magnetic Studies, Ocean Mining, Seamounts-guyots, Sonar, ...7.0107

### Applications

#### Ore Deposits

TESTING AND EVALUATION OF MAGNETOMETER/GRADIOMETER AND TOW VEHICLE SYSTEM ...Evaluation Other, Field Testing, Instrumental Services, Magnetic Studies, Placer, ...8.0116

### Exploration Methods

#### Magnetic Surveys

GEOLOGICAL INVESTIGATIONS IN THE TAIWAN-PHILIPPINE-NEW GUINEA REGION ...Basins, Gravity Surveys, Heat Flow Measurements, Seismic Refraction, Seismic Surveys, ...7.0129

SUBSURFACE RESISTIVITY ...Crust, Earth-telluric Current, Ocean Basins, Resistance, Texas, ...7.0147

### Paleo Field Character

#### Direction

DEEP-SEA CORE MAGNETOMETER AND A CORE ORIENTATION SYSTEM ...Coring and Dredging, Magnetometers, Rock & Mineral Magnetism, ...8.0140

#### Field Reversals

SEARCH FOR FERROMAGNETICALLY TRAPPED MAGNETIC MONOPOLES OF COSMIC RAY ORIGIN ...Magnetic Monopole, Magnetic Studies, Paleomagnetism, Physical Properties, ...7.0114

A PALEOMAGNETIC STUDY OF TERTIARY AND PLEISTOCENE OCEANIC CORES ...Antarctic Ocean, Core Analysis, Pacific Ocean-north, Paleomagnetism, Quaternary Period, Tertiary Period, ...7.0166

MAGNETIC PROPERTIES OF ANTARCTIC MARINE SEDIMENTS AND ROCKS ...Antarctica, Core Analysis, Extinction, Rock & Mineral Magnetism, ...7.0233

STRATIGRAPHY AND PALEOECOLOGY OF FOSSIL SILICOFLAGELLATES FROM ANTARCTIC DEEP-SEA CORES ...Antarctic Ocean, Core Analysis, Correlation, Fossil Zones, Paleontology, Paleotemperature, Phylum Protozoa, ...7.0169

THE MAGNETIZATION OF SUBMARINE BASALTS AND ITS EFFECT ON MARINE MAGNETIC ANOMALIES ...Anomalies, Extrusives, Magnetic Studies, Paleomagnetism, Seamounts-guyots, ...7.0153

#### Fluctuations

GEOMAGNETIC STUDIES ...Airborne Probing, Atmospheric Divisions, Earth-telluric Current, ...7.0134

INDUCTION IN THE OCEAN ...Crust, Currents-ocean, Earth Interior, Induction, Oceanic Fronts, ...1.0137

#### Patterns

SUPPORT OF RESEARCH VESSEL AT LAMONT GEOLOGICAL OBSERVATORY ...Distribution, Marine Biology, Ridges, Seismic Studies, Ships and Cruises, ...12.0037

### Paleomagnetism

SEARCH FOR FERROMAGNETICALLY TRAPPED MAGNETIC MONOPOLES OF COSMIC RAY ORIGIN ...Field Reversals, Magnetic Monopole, Magnetic Studies, Physical Properties, ...7.0114

A PALEOMAGNETIC STUDY OF TERTIARY AND PLEISTOCENE OCEANIC CORES ...Antarctic Ocean, Core Analysis, Field Reversals, Pacific Ocean-north, Quaternary Period, Tertiary Period, ...7.0166

GEOLOGICAL STUDIES FROM ELTANIN IN 1968 ...Antarctic Ocean, Gravity Surveys, Sea Floor Spreading, Seismic Reflection, Textures-structures, ...7.0133

PALEONTOLOGY OF LATE CENOZIC ANTARCTIC RADIOLARIA AND DIATOMS ...Antarctic Ocean, Antarctica, Class Algae, Correlation, Ocean Basins, Order Radiolaria, Paleontology, Rate of Deposition, ...7.0185

THE MAGNETIZATION OF SUBMARINE BASALTS AND ITS EFFECT ON MARINE MAGNETIC ANOMALIES ...Anomalies, Extrusives, Field Reversals, Magnetic Studies, Seamounts-guyots, ...7.0153

SEA-FLOOR SEDIMENTS AND ROCK STUDIES ...Atlantic Ocean-north, Biogenous, Core Analysis, Microfossils, Petrology, Ridges, Sedimentation, ...7.0040

### Rock & Mineral Magnetism

DEEP-SEA CORE MAGNETOMETER AND A CORE ORIENTATION SYSTEM ...Coring and Dredging, Direction, Magnetometers, ...8.0140

MAGNETIC PROPERTIES OF ANTARCTIC MARINE SEDIMENTS AND ROCKS ...Antarctica, Core Analysis, Extinction, Field Reversals, ...7.0233

## Earth Thermal Properties

### Core Temperature

GEOLOGICAL STUDIES IN DEEP-SEA DRILL HOLES ...Abyssal, Bathyal, Borehole Geophysics, Earth Interior, Geothermal, Heat Flow Measurements, Heat Flows, Sediments-general, Technique Development, ...7.0122

### Geothermal Gradient

ARCTIC BASIN HEAT FLOW ...Arctic, Coring and Dredging, Crust, Heat Flows, Physical Properties, ...7.0105

GEOLOGICAL MEASUREMENTS ...Geomorphology-topography, Heat Flow Measurements, Physical Analysis, Physical Properties, Temperature, ...7.0136

### Heat Flows

ARCTIC BASIN HEAT FLOW ...Arctic, Coring and Dredging, Crust, Geothermal Gradient, Physical Properties, ...7.0105

DETECTION OF DEEP-SEA ANOMALIES IN ELECTRICAL CONDUCTIVITY UNDER THE GULF OF CALIFORNIA ...Anomalies, Conductivity, Continental Drift, Gulf of California, Rift, ...7.0099

GEOLOGICAL STUDIES IN DEEP-SEA DRILL HOLES ...Abyssal, Bathyal, Borehole Geophysics, Core Temperature, Earth Interior, Geothermal, Heat Flow Measurements, Sediments-general, Technique Development, ...7.0122

## Echinodermata

### Brittle Stars

POLYCHAETES AND ECHINODERMS IN THE LABRADOR SEA ...Animal Taxonomy, Labrador Sea, Lugworms, Marine Segmentedworm, Reproductive System, Starfishes, ...5.0603

ECOLOGICAL STUDIES ON TROPICAL INTERTIDAL BRITTLESTARS ...Habitat Studies, Tropic, ...5.0615

### Echinodermata -other

INTESTINAL ADSORPTION AND TRANSPORT OF NUTRIENTS IN ECHINODERMS ...Active Transport, Cellular Or Intracellular, Intestine, Metabolism, Sodium, ...5.0619

ENZYME STRUCTURE AND ITS RELATION TO TAXONOMY ...Animal Taxonomy, Conformational Studies, Enzymes - non-specific, Species, ...5.0654

### Sea Cucumber

A SYSTEMATIC REVISION OF THE HOLOTHURIAN FAMILY PSOLIDAE - ECHINODERMATA - HOLOTHUROIDEA ...Animal Taxonomy, Classification - Taxonomy, Comparative Anatomy, Modern Organisms, Nomenclature, Classification, ...5.0572

DISTRIBUTION MAPS OF ANTARCTIC HOLOTHURIANS AND ECHINOIDS - ECHINODERMATA ...Charts, Environmental Ecology, Sea Urchins & Other Echinoderm, Vertical Distribution, ...5.0573

### Sea Feathers, sea Lily...

STABLE ISOTOPE FRACTIONATION IN ECHINODERM CALCITE ...Animal Taxonomy, Biogeochemical Process, Calcite, Carbon, Living Organisms, Marine Organisms, Oxygen, Sea Urchins & Other Echinoderm, ...7.0085

### Sea Urchins & Other Echinoderm

BIOSYNTHETIC PROCESSES DURING DEVELOPMENT OF SEA URCHIN EGGS ...Basic Embryology, Cell Cycle, Messenger RNA, Nucleic Acids, Proteins, ...5.0775

## SUBJECT INDEX

## Ecology (animal)

- MOLECULAR ASPECTS OF CELLULAR DIFFERENTIATION AND DIVISION ...Basic Embryology, Biosynthesis, Cell Cycle, Differentiation Mechanism, Proteins, Replication, ...5.0985
- BIOCHEMISTRY OF FERTILIZATION AND EARLY DEVELOPMENT ...Basic Embryology, Fertilization, Reproductive System, Vertebrates -non-specific, ...5.0550
- MACROMOLECULAR EVENTS OF FERTILIZATION AND EARLY EMBRYONIC DEVELOPMENT ...Basic Embryology, Biosynthesis, Reproductive System, Ribosomes, ...5.1011
- CHARACTERIZATION AND MODE OF ACTION OF PROTEIN VENOMS OF MARINE ANIMALS ...Lecithin, Mechanism of Action, Toxicology, Toxins, Venom, ...6.0102
- PHYSIOLOGY OF FERTILIZATION AND NUCLEO-CYTOPLASMIC INTERACTIONS IN SEA URCHIN DEVELOPMENT ...Basic Embryology, Messenger RNA, Nucleus (non-specific & Ot.), Reproductive System, Selection & Breeding, ...5.0673
- AN EXPERIMENTAL APPROACH TO THE GENETIC CONTROL OF MORPHOGENESIS IN ECHINODERMS ...Biosynthesis, Developmental Physiology, Disease & Anomalies, ...5.0608
- FERTILIZATION MECHANISMS AND GAMETE PHYSIOLOGY IN MARINE INVERTEBRATES ...Basic Embryology, Male Gametes, Metabolism, Reproductive System, ...5.0590
- RNA SYNTHESIS DURING SEA URCHIN DEVELOPMENT ...Basic Embryology, Differentiation Mechanism, Metabolic-biochemical Genetics, Mitochondria, Replication, ...5.0611
- BIOCHEMISTRY OF DEVELOPMENT ...Basic Embryology, Control and Regulation, Differentiation Mechanism, Messenger RNA, Tryptophan Oxidase, ...5.0994
- PRESENCE OF ENZYMES RELATED TO DNA SYNTHESIS IN EGGS OF ECHINODERMS ...Basic Embryology, Developmental Stages, DNA Polymerase, Enzyme Formation, Nucleoside Kinase, ...5.1034
- STABLE ISOTOPE FRACTIONATION IN ECHINODERM CALCITE ...Animal Taxonomy, Biogeochemical Process, Calcite, Carbon, Living Organisms, Marine Organisms, Oxygen, Sea Feathers, sea Lily... , ...7.0085
- MARINE WASTE DISPOSAL AND SEA URCHIN ECOLOGY ...California, Pollution Effects, Productivity - Food Chain, Sewage, ...5.0551
- CILIA DIFFERENTIATION IN THE SEA URCHIN EMBRYO ...Basic Embryology, Cilia and Flagella, Differentiation Mechanism, Proteins, Subunits, ...5.0616
- CILIA DIFFERENTIATION IN MARINE EMBRYOS ...Basic Embryology, Cilia and Flagella, Lugworms, Marine Segmented-worm, ...5.0617
- PROTEIN SYNTHESIS DURING THE EARLY DEVELOPMENT OF THE SEA URCHIN EMBRYO ...Basic Embryology, Cell Injury and Autolysis, Proteins, Radiation Effects-non-specific, Ribosomes, ...5.0537
- DISTRIBUTION MAPS OF ANTARCTIC HOLOTHURIANS AND ECHINOIDS - ECHINODERMAT ...Charts, Environmental Ecology, Sea Cucumber, Vertical Distribution, ...5.0573
- ECOLOGY OF ECHINOIDS ...Behavioral Ecology, Benthic-bottom, Vertical Distribution, Water Environment -other, ...5.0571
- SAND DOLLAR COMMUNITIES ...Beaches, California, Habitat Studies, Productivity - Food Chain, ...5.0533
- ANTIGEN DISTRIBUTION OF DEVELOPING SEA URCHIN EMBRYOS ...Antigen, Basic Embryology, Immunity, Inter-specific Genetic Relat., RNA, ...5.0585
- CELL DIVISION AND MITOTIC APPARATUS PROTEINS ...Biosynthesis, Cell Center & Mitot. apparatus, Cell Cycle, Centrioles, Proteins, ...5.0666
- STRUCTURAL ANALYSIS OF CELL DIVISION ...Basic Embryology, Cell Cycle, Histochemistry - Cytochem, Nucleolus, Nucleus (non-specific & Ot.), ...5.0645
- MODE OF ACTION OF MARINE TOXINS ...Animal Toxins, Antigen, Blood Globulins, Enzyme-substrate, ...6.0103
- PROTEIN SYNTHESIS ACTIVATION IN SEA URCHIN EGGS ...Basic Embryology, Biosynthesis, Metabolism, Proteins, Reproductive System, ...5.0543

### Starfishes

- UTILIZATION OF ENVIRONMENTAL NUTRITIONAL RESOURCES BY STARFISH ...Digestive System, Environmental Physiology, Invertebrate Nutrition, Maturity & Growth Stages, Metabolism, ...5.0591

- POPULATION STUDIES ON INTERTIDAL INVERTEBRATES ...Australia, Gastropods -slugs, conch, snails, Growth Rate, Longevity, Oregon, ...5.1021
- PREDATOR PREY RELATIONSHIPS BETWEEN ECHINODERMS AND MOLLUSCS ...Behavior, Behavioral Ecology, Gastropods -slugs, conch, snails, Predation, ...5.0351
- POLYCHAETES AND ECHINODERMS IN THE LABRADOR SEA ...Animal Taxonomy, Brittle Stars, Labrador Sea, Lugworms, Marine Segmentedworm, Reproductive System, ...5.0603
- ISOLATION AND FUNCTION OF OVARIAN EXTRACTS CAPABLE OF INDUCING COCYTE SHEDDING AND COCYTE NUCLEAR MATURATION IN STARFISH ...Differentiation Mechanism, Female, Hormones, Nucleic Acids, Reproductive System, ...5.0620
- NUTRIENT STORES IN REPRODUCTION IN SEA INVERTEBRATES ...Crabs, Decapoda -other, Invertebrate Nutrition, Reproductive System, ...5.0949

## Ecology (animal)

- BIOLOGY CONFERENCE SERIES ...Marine Biology, Meetings, Plant Ecology (non-specific), ...11.0035
- MARINE BIOLOGY RESEARCH AT THE BERMUDA BIOLOGICAL STATION ...Bermuda, Marine Biology, Marine Biology (non-specific), Plant Ecology (non-specific), ...12.0006
- SYSTEMATICS MORPHOLOGY AND ECOLOGY OF THE GENUS ERVILIA (MOLLUSCA: PELECYPODA) IN THE WESTERN ATLANTIC ...Animal Taxonomy, Atlantic Ocean-general, Freshwater Mussels, Scallops, Invertebrate Anatomy, ...5.0458

## Applied Ecology

### Biological Control

- ENHANCEMENT OF RECREATIONAL USES OF ESTUARINE WATERS THROUGH STUDY OF POTENTIAL CONTROL METHODS FOR STINGING SEA NETTLES ...Chesapeake Bay, Estuaries, Jelly Fish, Recreation Sites, Water Quality-general, ...5.0605

### Pollution Effects

- ECOLOGICAL SURVEY OF EFFLUENT DISCHARGE AT TWO PULP MILLS IN HUMBOLDT COUNTY, CALIFORNIA ...California, Chemical Analysis (water), Effluents-waste/Water, Pollution - Effects of, Pulp, Paper, and Logging, ...5.0858
- COLUMBIA RIVER STUDIES ...Columbia River, Contamination - Water, Invertebrates, Oysters, Radioactivity-general, Reproductive System, ...5.0518
- ECOLOGICAL EFFECTS OF ENVIRONMENTAL & LOW LEVEL POLLUTION STRESSES ON METABOLIC REQUIREMENTS FOR GROWTH OF GULF COAST FISHES ...Environmental Ecology, Gulf of Mexico, Metabolism, Pollution - Effects of, Pollution Sources-general, Stress, ...5.0328
- OPTIMUM ECOLOGICAL DESIGNS FOR ESTUARINE SYSTEMS OF NORTH CAROLINA ...Domestic Wastes-general, Estuaries, Marine Biology (non-specific), North Carolina, Pollution - Effects of, Productivity - Food Chain, ...5.0913
- ESTUARINE WATER QUALITY AND FISH DISTRIBUTION ...Contamination - Water, Environmental Physiology, Estuaries, Pulp, Paper, and Logging, Salmon & Trout - Non-specific, ...5.0178
- IMPACT AND FATE OF POLLUTION IN ESTUARIAL WATERS ...Degradation, Estuaries, Massachusetts, Pesticides - non-specific, Pollutants - Path of, ...6.0153
- WATER QUALITY - BENTHIC INVERTEBRATE RELATIONSHIPS IN ESTUARIES ...Benthic Fauna, Benthic-bottom, Estuaries, Maine, Pollution - Effects of, ...5.0894
- ENTERIC BACTERIA AND VIRUSES IN SEWAGE, WATER, AND SHELLFISH ...Bacterial Pollutant Sources, Coliforms (non-specific), Oysters, Sewage, Viral Pollutant Sources, ...6.0052
- MARINE WASTE DISPOSAL AND SEA URCHIN ECOLOGY ...California, Productivity - Food Chain, Sea Urchins & Other Echinoderm, Sewage, ...5.0551
- DEMONSTRATION OF THE LIMITATIONS AND EFFECTS OF WASTE DISPOSAL ON AN OCEAN SHELF ...Marine Plants, Ocean, Outlet, Pollution - Effects of, Sewers, ...6.0146

## Ecology (animal)

## SUBJECT INDEX

- A SURVEY OF THE MARINE ENVIRONMENT FROM FORT ROSS, SONOMA COUNTY, TO POINT LOBOS, MONTEREY COUNTY ...California, Effluents-waste Water, Marine Environments-general, Pollution - Effects of , ...9.0003
- ECOLOGY OF KRAFT PAPER MILL EFFLUENT IN SAPELO & ST. CATHERINES SOUNDS, GA ...Aquatic Ecology, Georgia, Pollution - Effects of , Pulp, Paper , and Logging, Streams, ...5.0886
- EFFECTS OF KRAFT PULP MILL EFFLUENTS ON THE GROWTH AND PRODUCTION OF FISH ...Contamination - Water, Industrial Wastes, Pollution - Effects of , Population Dynamics, Pulp, Paper , and Logging, Salmon & Trout - Non-specific, ...5.0311
- EFFECTS OF HEATED WATER IN A TIDAL ESTUARY ...Chesapeake Bay, Electric Power Plants, Pollution - Effects of , Thermal Pollution, Tidal Streams, Water Properties-general, ...6.0145
- MEASUREMENT OF RADIONUCLIDES IN ESTUARINE AND MARINE ENVIRONMENTS (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Estuaries, Marine Environments-general, Pollution - Effects of , Radioactivity-general, Reactor Sites & Rad Waste, ...5.0912
- PESTICIDES ...Aquatic Or Soil-aquatic Cycles, Bioassay, Fish, Persistence of Residues, Pesticides -non-specific, ...5.0881
- RATES OF PESTICIDE BUILDUP IN SALMONIDS RECENTLY INTRODUCED IN THE GREAT LAKES ...Fish, Insecticides -non-specific, Lake Michigan, Lake Superior, Lake Trout, Brook Trout, Salmon -coho, chinook, sockeye., ...6.0154
- MECHANISMS OF PESTICIDE ACCUMULATION IN AQUATIC ORGANISMS ...Chlorinated Hydrocarbons, Food Chains, Animal And/or Man, Insecticides -non-specific, Productivity - Food Chain, ...6.0155
- ESTUARINE ECOSYSTEMS ...Aquatic Ecology, Estuaries, Pesticides, Pollution - Effects of , Population Dynamics, ...5.0883
- HISTOPATHOLOGIC EFFECTS OF POLLUTANTS ON CELLS AND TISSUES OF MARINE FISHES ...Contamination - Water, Killifish - Cyprinodon, Pathology, Pollution - Effects of , ...5.0323
- HISTOPATHOLOGIC EFFECTS OF POLLUTANTS ON CELLS AND TISSUES OF MARINE INVERTEBRATES ...Clams, Contamination - Water, Invertebrate Pathology, Pathology, Pollution - Effects of , Pollution Sources-other, ...5.0497
- USE OF MARINE PLANKTONIC ORGANISMS FOR EVALUATING THE QUALITY OF MARINE AND ESTUARINE WATERS ...Bioassays, Estuaries, Phytoplankton, Pollution - Effects of , Zooplankton, ...5.0832
- PESTICIDE RESISTANT FISH IN NATURAL ECOSYSTEMS ...Animal Resistance -other, Endrin, Fish, Food Chains, Animal And/or Man, Rates, Doses, Concentrations, ...5.0277
- MICROBIOLOGY OF ESTUARINE AND SHELLFISH POLLUTION ...Bioindicators, Clams, Estuaries, Oysters, Sanitation, Waste Water Treatment-general, ...6.0162
- Public Health Ecology**
- ASPECTS OF RELATIONSHIPS BETWEEN MARINE ECOLOGY AND HUMAN HEALTH ...Environmental Ecology, Marine Biology (non-specific), Mechanism of Transmission, Toxic Substances -non-specific, ...6.0182
- Reactor Sites & Rad Waste**
- MEASUREMENT OF RADIONUCLIDES IN ESTUARINE AND MARINE ENVIRONMENTS (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Estuaries, Marine Environments-general, Pollution - Effects of , Pollution Effects, Radioactivity-general, ...5.0912
- ACCUMULATION OF RADIOACTIVITY BY INVERTEBRATES (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Contamination - Water, Cooperative-studies, Diagnostic Procedures, Radioactivity-general, ...5.0474
- Aquatic Ecology**
- ECOLOGICAL STUDY OF DUXBURY BAY ...Bays, Habitat Studies, Massachusetts, Survey Studies, Tides, ...5.0898
- MICROBIOLOGICAL ASSAYS OF SEAWATER USING RADIOISOTOPES ...Ciliates, Environmental Ecology, Environmental Physiology, Food Chains, Phytoplankton, Productivity - Food Chain, Thiamine, ...5.0811
- CONTROLLED ENVIRONMENTAL FACTORS ON THE DEVELOPMENT OF ESTUARINE AND OCEANIC CRUSTACEA ...Crabs, Developmental Physiology, Estuaries, Salinity, Temperature, ...5.0476
- YEAR-ROUND PROGRAM OF RESEARCH IN MARINE ECOLOGY ...Animal Taxonomy, Marine Biology (non-specific), Plant Ecology (non-specific), Plant Taxonomy, Training Grants, Fellowships, ...5.0899
- LIVING AND FOSSIL ZOOPLANKTON, AND RELATED PROBLEMS OF PALEOLIMNOLOGY ...Biology, Ecological, Microfossils, Paleoecology, Zooplankton, ...7.0171
- FACTORS AFFECTING HORIZONTAL DISTRIBUTION OF MESOPELAGIC FISHES ...Atlantic Ocean-north, Behavioral Ecology, Fish -non-specific, Range Or Territorial Distr. , Vertical Distribution, ...5.0105
- MECHANISMS OF HOMING AND ORIENTATION OF SALMO CLARKI IN YELLOWSTONE LAKE AND ITS TRIBUTARIES ...Behavior, Biological Rhythms, Cutthroat Trout, Wyoming, ...5.0279
- NEUROENDOCRINE PATHWAYS IN OSMOREGULATION IN CRUSTACEANS ...Crabs, Endocrine System, Environmental Physiology, Osmoregulation, Shrimps - Common, ...5.0427
- SYSTEMATICS OF ANTARCTIC HYMENOSTOMATIDA (PROTOZOA) ...Animal Taxonomy, Antarctica, Ciliates, Habitat Studies, ...5.0815
- PLANKTON ECOLOGY ...Copepods, Lake Michigan, Plankton Sampling, Ships and Cruises, Zooplankton, ...5.0803
- INVESTIGATE THE FEASIBILITY OF INTRODUCING SOCKEYE SALMON INTO RESERVOIRS ...Captive Rearing, Oregon, Reservoirs and Impoundments, Salmon -coho, chinook, sockeye., Stocking of Fish & Shellfish, ...5.0141
- EFFECTS OF PESTICIDES ON ESTUARINE PRODUCTIVITY ...Estuaries, Mans Activities, Persistence of Residues, Pesticides -non-specific, Pollution - Effects of , Population Dynamics, Standing Crops, ...5.0880
- LIFE HISTORY STUDY OF THE MOI, POLYDACTYLUS SEXFILIS ...Fish -other, Life History Studies, Management -other, Tags, ...5.0257
- ESTUARINE DREDGE HOLE INVESTIGATIONS ...Coring and Dredging, Estuaries, Fish -non-specific, Habitat Studies, ...5.0908
- SILVER SALMON STUDIES IN THE RESURRECTION BAY AREA ...Alaska, Bays, Environmental Ecology, Management -other, Salmon -coho, chinook, sockeye., ...5.0189
- INVENTORY OF LARVAL FISH ...Brackish Water, Fish -non-specific, Maturity & Growth Stages, ...5.0071
- PRE-EMERGENT FRY PINK SALMON FORECAST - SOUTHEASTERN ALASKA ...Alaska, Censusing, Number Or Density, Salmon -coho, chinook, sockeye., Spawning & Nesting Sites, ...5.0019
- LOCATING AND MAPPING THE EXISTING SEED OYSTER BEDS IN DELAWARE BAY ...Bays, Delaware Bay, Mapping, Oysters, Spawning & Nesting Sites, ...5.0381
- COPPER RIVER SOCKEYE SALMON INVESTIGATIONS ...Alaska, Biological Rhythms, Migration, Population Dynamics, Salmon -coho, chinook, sockeye., Stocking of Fish & Shellfish, ...5.0025
- SOCKEYE SALMON MIGRATORY BEHAVIOR AND BIOLOGICAL STATISTICS COLLECTION, SOUTHEASTERN ALASKA ...Alaska, Behavioral Ecology, Censusing, Migration, Salmon -coho, chinook, sockeye., ...5.0016
- STUDY OF THE RIVER PHASE OF THE LIFE HISTORIES OF ALOSA PSEUDOHARENGUS AND AESTIVALIS ...Alewife, menhaden, shad, herring, Connecticut River, Life History Studies, Spawning & Nesting Sites, ...5.0245
- OYSTER SEED PROPAGATION STUDY ...Bays, Commercial Fishing, Oysters, Pacific Ocean-east, Spawning & Nesting Sites, ...8.0012
- FLUSHING PATTERN OF CERTAIN TIDAL STREAMS IN DELAWARE ...Circulation -water, Delaware, Discharge, Industrial-general, Tidal Streams, ...2.0013
- EFFECTS OF THERMAL POLLUTION ON PRODUCTIVITY AND STABILITY OF ESTUARINE COMMUNITIES ...Environmental Ecology, Estuaries, Plant Prod. (non-specific), Pollution - Effects of , Thermal Pollution, ...6.0152
- THE BIOLOGY OF THE INFAUNA OF A TROPICAL SOFT BOTTOM AREA ...Benthic Fauna, Estuaries, Florida, Intertidal Areas, Pollution - Effects of , ...5.0879
- TAXONOMY AND ECOLOGY OF INSHORE MARINE MICROBIOTA ...Algae- General, Animal Taxonomy, Plant Taxonomy, Protozoa -other, Range Or Territorial Distr. , ...5.0768
- ENVIRONMENTAL BIOLOGY OF TOMALES BAY ...Bays, Benthic Fauna, California, Mans Activities, Pollution - Effects of , ...5.0860

## SUBJECT INDEX

## Ecology (animal)

- MORPHOLOGY, PHYSIOLOGY AND ECOLOGY OF MARINE LAMELLIBRANCHS ...Basic Embryology, Behavior, Freshwater Mussels, Scallops, Invertebrate Anatomy, ...5.0479
- SYSTEMATICS, ZOOGEOGRAPHY, AND ECOLOGY OF ELASMOBRANCHS OF THE WESTERN ATLANTIC OCEAN ...Animal Taxonomy, Atlantic Ocean-general, Chondrichthyes -other, Nearctic, ...5.0132
- ECOLOGY OF SABELLARIID REEFS IN DELAWARE BAY ...Delaware Bay, Environmental Ecology, Lugworms, Marine Segmentedworm, Productivity - Food Chain, Vertical Distribution, ...5.0871
- REPOPULATION OF DECIMATED SECTIONS OF WARM-WATER STREAMS BY LONGEAR SUNFISH, LEPOMIS MEGALOTIS (RAFINESQUE) ...Population Dynamics, Stocking of Fish & Shellfish, Streams, Sunfish, Rock & Roanoke Bass..., Warm Water, ...5.0097
- A NON-DESTRUCTIVE METHOD FOR ESTIMATING POPULATION DENSITY AND DISTANCE TO NEAREST NEIGHBOR FOR ESTUARINE MOLLUSCS ...Estuaries, Mollusks -non-specific & Other, Number Or Density, Population Dynamics, Range Or Territorial Distr., ...5.0439
- ECOLOGY OF KRAFT PAPER MILL EFFLUENT IN SAPELO & ST. CATHERINES SOUNDS, GA ...Georgia, Pollution - Effects of, Pollution Effects, Pulp, Paper, and Logging, Streams, ...5.0886
- CULTURE OF RED SWAMP CRAWFISH, PROCAMBARUS CLARKI, IN BRACKISH WATER PONDS ...Aquaculture & Fish-farming, Brackish Water, Captive Rearing, Crayfish, ...5.0432
- ECOLOGICAL STUDIES OF THE BLUE CRAB, CALINECTES SAPIDUS ...Crabs, Estuaries, Life History Studies, Louisiana, ...5.0433
- ECOLOGY OF RECREATIONALLY IMPORTANT ESTUARINE FISHES IN OREGON ...Environmental Ecology, Estuaries, Fishing, Migration, Oregon, Population Dynamics, ...5.0216
- SPRING CHINOOK SALMON ECOLOGY STUDY ...Mark, Tag Or Capture -other, Oregon, Physical-general, Productivity (agricultural), Salmon -coho, chinook, sockeye..., Streams, ...5.0218
- DISTRIBUTION AND ABUNDANCE OF OYSTER DRILLS (UROSALPINX CINEREA) IN THE JAMES RIVER, VIRGINIA ...Gastropods -slugs, conch, snails, Number Or Density, Streams, Vertical Distribution, Virginia, ...5.0508
- INFAUNA OF LOWER CHESAPEAKE BAY ...Chesapeake Bay, Population Dynamics, Shrimp - Amphipods, Streams, Virginia, ...5.0661
- MANAGEMENT OF COLUMBIA RIVER COMMERCIAL FISHERY ...Columbia River, Commercial Fishing, Legislation, Salmon -coho, chinook, sockeye..., ...5.0165
- COPEPODS PARASITIC ON NEEDLEFISHES ...Copepods, Ectoparasites, Fish -other, Nomenclature, Classification, Organic Evolution, ...5.0389
- DIURNAL-NOCTURNAL ACTIVITY OF THE QUEENFISH, SERIPHUS POLITUS ...Behavioral Ecology, Biological Rhythms, Drums, Fish -other, Other, Sound Production, ...5.0230
- PACIFIC COASTAL ENVIRONMENT AS RELATED TO DISTRIBUTION AND ABUNDANCE OF GAME SPECIES -- SEA SURFACE TEMPERATURE MEASUREMENTS ...California, Spectral Reflectance, Temperature, ...1.0175
- HYPOTHETICAL DISTRIBUTION OF 14 SPECIES OF ATLANTIC COASTAL GAME FISHES ...Atlantic Ocean-general, Environmental Ecology, Fish -other, Water Temperature-non-specific, ...5.0123
- DEVELOPMENTAL MORPHOLOGY OF COREGONIDS ...Bonneville Cisco, Cisco, Lake Herring, Developmental Physiology, Great Lakes-general, Vertebrate Anatomy, ...5.0274
- ABUNDANCE AND AVAILABILITY OF PRE-RECRUIT HERRING ...Alewife, menhaden, shad, herring, Environmental Ecology, Life History Studies, Number Or Density, Vertical Distribution, ...5.0208
- ESTIMATION OF JUVENILE ABUNDANCE IN ESTUARINE NURSERIES ...Alewife, menhaden, shad, herring, Estuaries, Gulf of Mexico, Maturity & Growth Stages, Number Or Density, ...5.0131
- PINK SALMON INVESTIGATIONS - FRESHWATER ECOLOGY ...Environmental Ecology, Maturity & Growth Stages, Mortality Rates, Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, ...5.0188
- POPULATION STRUCTURE OF THE ALEWIFE AND COREGONIDS ...Alewife, menhaden, shad, herring, Cisco, Lake Herring, Environmental Ecology, Lake Michigan, Population Dynamics, ...5.0106
- ENVIRONMENTAL CHANGES IN LAKE ERIE ...Environmental Changes, Environmental Ecology, Ions and Gases, Lake Erie, Nutrients, ...5.0903
- PLANKTON AND BENTHOS COMMUNITIES OF THE GREAT LAKES ...Benthic Organisms (non-specific), Gastropods -slugs, conch, snails, Lake Erie, Lugworms, Marine Segmentedworm, Plankton (non-specific), ...5.0801
- ASSESSMENT OF LAKE SUPERIOR LAKE TROUT ...Commercial Fishing, Lake Trout, Brook Trout, Lampreys, Life History Studies, ...5.0736
- LAKE SUPERIOR CHEMICAL CONTROL OF SEA LAMPREY ...Control of Nuisance Species, Lake Superior, Lampreys, Larvicides, Streams, ...5.0628
- SEA LAMPREY AMMOCETE REESTABLISHMENT STUDIES ...Control of Nuisance Species, Great Lakes-general, Lampreys, Larvicides, Life History Studies, Population Dynamics, ...5.0629
- RELATION OF ENVIRONMENTAL FACTORS TO THE PRODUCTIVITY OF ESTUARINE SEDENTARY FAUNA ...Environmental Ecology, Estuaries, Florida, Productivity - Food Chain, ...5.0959
- RESEARCH ON THE MACROBENTHOS OF THE GREAT LAKES ...Benthic Fauna, Earthworms, Food Supply, Great Lakes-general, Water Quality-general, ...5.0626
- DISTRIBUTION AND ABUNDANCE OF ZOOPLANKTON IN LAKE ERIE ...Computer Applications, Environmental Ecology, Interbiotic Relat.(non-specif), Lake Erie, Population Dynamics, ...5.0802
- RELATION OF RIVER-RUN IMPOUNDMENTS TO SALMON PRODUCTION ...Engineering Structures-general, Environmental Changes, Environmental Ecology, Mans Activities, Pollution - Effects of, Salmon & Trout - Non-specific, ...5.0222
- SALMON PRODUCTION IN AREAS MADE INACCESSIBLE BY DAMS ...Columbia River, Engineering Structures-general, Environmental Ecology, Salmon & Trout - Non-specific, Spawning & Nesting Sites, ...5.0224
- PINK SALMON INVESTIGATIONS - FRESHWATER ECOLOGY ...Alaska, Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, Streams, Water Properties-general, ...5.0185
- MARINE BIOLOGICAL INVESTIGATIONS STUDIES PROJECT (FISHES) ...Alaska, Bays, Fish -non-specific, Population Dynamics, ...5.0011
- ESTUARINE ECOSYSTEMS ...Estuaries, Pesticides, Pollution - Effects of, Pollution Effects, Population Dynamics, ...5.0883
- CHEMICAL OCEANOGRAPHY ...Circulation-general, Convection, Technique Development, Trace Elements, ...1.0134
- EFFECT OF SUPERSATURATION OF DISSOLVED NITROGEN ON MIGRATING SALMONIDS ...Columbia River, Gases, Dissolved -water, Migration, Mortality Rates, Nitrogen, Salmon & Trout - Non-specific, ...5.0221
- FISH TRANSPORTATION ...Management -other, Migration, Salmon & Trout - Non-specific, Streams, Tags, ...8.0013
- ENVIRONMENTAL CONDITIONS AND POPULATION DYNAMICS IN SELECTED UNPOLLUTED ESTUARIAL AND COASTAL AREAS ...Contamination - Water, Habitat Studies, Marine Biology (non-specific), Pollution - Effects of, Toxic Substances -non-specific, ...5.0922
- EFFECTS OF HIGH TEMPERATURE, LOW OXYGEN, AND PH EXTREMES ON THE SURVIVAL OF AQUATIC INSECTS AND CRUSTACEA IMPORTANT AS TROUT FOOD ...Food Supply, Gases, Dissolved -water, High Temp. -85f Or Above, Lake Superior, Ph, Acidity -water, ...5.0464
- DEVELOPMENT OF CULTURE METHODS FOR ECOLOGICALLY IMPORTANT MARINE ZOOPLANKTON SPECIES ...Copepods, Environmental Physiology, Invertebrate Culture, Zooplankton, ...5.0834
- PARASITES OF PHILIPPINE FISHES ...Animal Distr. (non-specific), Fish -non-specific, Helminths, Philippines, ...5.0251
- OSMOREGULATION ...Osmoregulation, Rays, Skates, Mantas, Sawfish, Sharks, Streams, ...5.0280
- ENERGY TRANSFER IN LOWER MARINE TROPHIC LEVELS ...Energy Budgets, Environmental Ecology, Productivity - Food Chain, Vertical Distribution, ...5.1020

## Ecology (animal)

## SUBJECT INDEX

### Dispersion -other

- THE PORIFERA OF FANNING ISLAND, CENTRAL PACIFIC ...Animal Taxonomy, Environmental Effects-geologic, Line Islands, Porifera, ...5.0539
- HAIR SEALS ...Age, Metamorphosis, Population Dynamics, Seals, Spawning & Nesting Sites, ...5.0525
- MARINE BIOLOGICAL INVESTIGATIONS - ANALYSIS OF HERRING FISHERY DATA ...Age, Alaska, Alewife,menhaden,shad,herring, Data Analysis - General, ...5.0010

### Distribution

#### Animal Distr. (non-specific)

- THE BIOLOGY OF THE LAYSAN AND BLACK-FOOTED ALBATROSSES ...Age, Albatrosses, Shearwaters... , Control of Nuisance Species, Mark, Tag Or Capture -other, Spawning & Nesting Sites, ...5.0607
- ECOLOGICAL FACTORS AFFECTING REPRODUCTION OF SHELLFISH (PHYSIOECOLOGY OF SHELLFISH PROGRAM) ...Maturity & Growth Stages, New York, Oysters, Reproductive System, Spawning & Nesting Sites, ...5.0374
- ECOLOGY AND DISTRIBUTION OF OYSTERS AND CLAMS ...Clams, Oysters, Ponds, Productivity - Food Chain, ...5.0446
- POPULATION STUDIES ...Alewife,menhaden,shad,herring, Animal Taxonomy, Environmental Ecology, Population Dynamics, ...5.0130
- SEA CLAM EXPLORATIONS ...Atlantic Ocean-north, Clams, Commercial Fishing, Population Dynamics, ...5.0456
- EARLY LIFE HISTORY DECAPOD CRUSTACEANS ...Crabs, Environmental Ecology, Life History Studies, Reproductive System, Shrimps - Common, ...5.0343
- FISH GUIDING ...Control Systems, Fish -non-specific, Instrumental Services, Management -other, Water Environment -other, ...8.0015
- ECOLOGY AND TAXONOMY OF TROPICAL ATLANTIC SCOMBRID EGGS AND LARVAE ...Animal Taxonomy, Basic Embryology, Food Supply, Life History Studies, Tuna, Mackerel, Albacore... , ...5.0772
- FIELD STUDY - CAPE COD, MASS. ...Benthonic-bottom, Buoys, Environmental Ecology, Sediments-other, Temperature, ...5.0584
- PARASITES OF PHILIPPINE FISHES ...Aquatic Ecology, Fish -non-specific, Helminths, Philippines, ...5.0251

#### Range Or Territorial Distr.

- DISTRIBUTION AND BIOLOGY OF PACIFIC ZOOPLANKTON ...Animal Taxonomy, Pacific Ocean-general, Productivity - Food Chain, Vertical Distribution, Zooplankton, ...5.0745
- CHONOTRICH CILIATE PROTOZOANS ...Age, Animal Taxonomy, Ciliates, Invertebrate Anatomy, Life History Studies, ...5.0742
- BIOLOGICAL ASPECTS OF MIDWATER SOUND SCATTERING ...Atlantic Ocean-north, Bioluminescence, Fish -non-specific, Scattering, Sound Production, Vertical Distribution, ...1.0054
- MARINE VERTEBRATES OF THE CALIFORNIA PENINSULA ...Animal Taxonomy, California, Environmental Ecology, Temperature, ...5.0554
- THE SYSTEMATICS AND ZOOGEOGRAPHY OF THE BRYOZOAN FAUNA OF THE HAWAIIAN ISLANDS ...Animal Taxonomy, Australian, Bryozoa, Collections, Hawaii, ...5.0542
- ASCIDIAN SPECIES ON THE ATLANTIC CONTINENTAL SHELF ...Animal Taxonomy, Atlantic Ocean-north, Continental Shelf, Sea Squirts - Tunicates, Vertical Distribution, ...5.0609
- FACTORS AFFECTING HORIZONTAL DISTRIBUTION OF MESOPELAGIC FISHES ...Aquatic Ecology, Atlantic Ocean-north, Behavioral Ecology, Fish -non-specific, Vertical Distribution, ...5.0105
- BIOLOGY OF THE ANTARCTIC BRACHIOPOD FAUNA ...Animal Taxonomy, Museum, ...5.0454
- ECOLOGICAL INVESTIGATIONS OF SOME COMMON MARINE FISHES OFF THE MEDITERRANEAN COAST OF ISRAEL ...Fish -non-specific, Mediterranean Sea-general, Population Dynamics, Productivity - Food Chain, ...5.0089
- TAXONOMY AND DISTRIBUTION OF CLUPEOIDS AND REVISION OF THE GENUS ILISHA OF THE FAMILY CLUPEIDAE ...Alewife,menhaden,shad,herring, Animal Taxonomy, Handbooks, Indian Ocean-general, Nomenclature, Classification, ...5.0088
- SEA OTTER ...Alaska, Metamorphosis, Population Dynamics, Sea Lions, Fur Seals, Stocking of Mammals, ...5.0528

INTERVIEW AND OBSERVATION ...Censusing, Commercial Fishing, Continental Shelf, Fish -non-specific, ...5.0156

TAGGING SALMON IN THE OFFSHORE WATERS OF THE NORTH PACIFIC ...Bering Sea, Gulf of Alaska, Migration, Number Or Density, Salmon & Trout - Non-specific, Tags, ...5.0180

A NON-DESTRUCTIVE METHOD FOR ESTIMATING POPULATION DENSITY AND DISTANCE TO NEAREST NEIGHBOR FOR ESTUARINE MOLLUSCS ...Aquatic Ecology, Estuaries, Mollusks -non-specific & Other, Number Or Density, Population Dynamics, ...5.0439

SYSTEMATICS AND ECOLOGY OF MARINE BIRDS ...Animal Taxonomy, Handbooks, Shorebirds-gulls,terns,skimmer, World Wide, .. 5.0582

AUTOMATIC DATA PROCESSING - SEABIRD DISTRIBUTION ...Birds -non-specific, Computer Methods -general, Nomenclature, Classification, World Wide, ...4.0020

REPRODUCTIVE BIOLOGY, DEVELOPMENT, AND SYSTEMATICS OF THE SIPUNCULIDS OF THE CARIBBEAN ...Animal Taxonomy, Caribbean Sea, Developmental Physiology, Invertebrates -non-specific, Reproductive System, ...5.0579

INFLUENCE OF THE PHYSICAL ENVIRONMENT ON DISTRIBUTION OF YOUNG STAGES OF COASTAL GAME FISH ...Continental Shelf, Environmental Ecology, Fish -non-specific, Maturity & Growth Stages, Physical-general, ...5.0211

DISTRIBUTION AND ECOLOGY OF ATLANTIC TUNAS ...Atlantic Ocean-general, Environmental Ecology, Temporal Distribution, Tuna, Mackerel, Albacore... , ...5.0063

INTERNATIONAL NORTH PACIFIC FISHERIES COMMISSION SUBARTIC OCEANOGRAPHY ...Currents-ocean, Depth, Pacific Ocean-north, Salinity, Salmon -coho,chinook,sockeye..., Temperature, ...1.0159

EASTERN PACIFIC SHRIMPS OF THE GENUS PENAEUS ...Animal Taxonomy, Life History Studies, Pacific Ocean-general, Shrimps - Common, Vertical Distribution, ...5.0403

ZOOPLANKTON DISTRIBUTION IN THE TROPICAL ATLANTIC ...Atlantic Ocean-general, Plankton Sampling, Temperature, Tropic, Vertical Distribution, Zooplankton, ...5.0771

#### Temporal Distribution

SEASONAL DISTRIBUTION AND ABUNDANCE OF DEMERSAL FISH AND INVERTEBRATES IN THE MARINE WATERS ADJACENT TO THE MOUTH OF THE COLUMBIA RIVER ...Benthic Fauna, Number Or Density, Productivity - Food Chain, Radioactivity-general, Vertical Distribution, ...5.0930

SHARK RESEARCH ...Control of Nuisance Species, Fish Repellents, Sharks, Tags, ...5.0047

ECOLOGICAL SIGNIFICANCE OF PARTICULATE MATTER IN THE SEA ...Atlantic Ocean-north, Interbiotic Relat.(non-specific), Marine Bacteria, Organic Matter Content -water, Vertical Distribution, Zooplankton, ...5.0754

ICHTHYOFAUNA OF THE FLORIDA CURRENT ...Fish -non-specific, Florida, Number Or Density, Vertical Distribution, ...5.0066

ECOLOGY OF SKELETAL PLANKTON ...Animal Taxonomy, Collections, Flagellates, Gastropods -slugs,conch,snails, Paleoenvironments, Vertical Distribution, ...5.0997

BENTHONIC BIOLOGY ...Benthic Organisms (non-specific), Environmental Ecology, Fouling, Marine Biology (non-specific), Number Or Density, ...5.0900

BIOMETRY ...Marine Biology, Navigation, Population Dynamics, Statistics-general, ...4.0019

TAGGING PROGRAM ...Lobsters, Long Island Sound, Number Or Density, Population Dynamics, Tags, ...5.0372

WINTER DISTRIBUTION OF FISHES ...Continental Shelf, Environmental Ecology, Fish -non-specific, Salinity, Temperature, Winter, ...5.0153

SPRING DISTRIBUTION OF FISHES ...Commercial Fishing, Continental Shelf, Data Acquisition, Environmental Ecology, Fish -non-specific, Spring, ...5.0154

ZOOPLANKTON STUDIES IN BIG LAGOON, CALIFORNIA ...California, Lagoons, Plankton Sampling, Vertical Distribution, Zooplankton, ...5.0739

MOVEMENTS OF SEABIRDS IN THE HUMBOLDT CURRENT ...Aves -other, Biological Rhythms, Humboldt Or Peru Current, Population Dynamics, ...5.0583

ENVIRONMENTAL EFFECTS ON ISTIOPHORID FISH DISTRIBUTION ...Environmental Ecology, Gulf of Mexico, Marlin, Billfishes, Sailfish..., Ships and Cruises, ...5.0070

SUCCESSION, SPACIAL AND TEMPORAL DISTRIBUTION, AND BIOLOGY OF BENTHIC ORGANISMS ...Benthic Fauna, Benthic Flora, ...5.0638

## SUBJECT INDEX

## Ecology (animal)

- MARINE INVERTEBRATE EXPLORATIONS ...Commercial Fishing, Freshwater Mussels, Scallops, Pacific Ocean-general, Shrimps - Common, Vertical Distribution, ...5.0733
- MARINE BIOLOGICAL INVESTIGATIONS - NEKTON OF INSIDE WATERS OF SOUTHEASTERN ALASKA ...Alaska, Plankton Sampling, Population Dynamics, Zooplankton, ...5.0521
- YOUNG FISHES OF A TIDAL ZONE ...Estuaries, Fish -non-specific, Habitat Studies, Life History Studies, Size, ...5.0073
- DISTRIBUTION AND ECOLOGY OF ATLANTIC TUNAS ...Atlantic Ocean-general, Environmental Ecology, Range Or Territorial Distr. , Tuna, Mackerel, Albacore... , ...5.0063
- INTERRELATIONS WITHIN THE PHYSICAL ENVIRONMENT ...Commercial Fishing, Density, Environmental Ecology, Sea Level Variations, ...2.0078
- INPEC BIOLOGICAL OCEANOGRAPHY - (PHYTOPLANKTON AND ZOOPLANKTON RESEARCH) ...Food Supply, Pacific Ocean-north, Phytoplankton, Primary Productivity, Zooplankton, ...5.0843
- SEA SURFACE SURVEILLANCE ...Caribbean Sea, Circulation-general, Tuna, Mackerel, Albacore... , Vertical Distribution, Water Properties-general, ...2.0019
- Vertical Distribution**
- HYDROGRAPHIC AND BIOLOGICAL SURVEY OF MONT-SWEAG BAY AND VICINITY ...Bays, Maine, Number Or Density, Organism Sampling Devices, Zooplankton, ...5.0893
- BIOLOGY AND CHEMISTRY OF MARINE PLANKTON POPULATIONS ...Buoys, Chlorophyll, Phytoplankton, Zooplankton, ...5.0798
- A STUDY OF THE DEEP CIRCULATION AND DEEP FISH POPULATIONS IN THE PACIFIC OCEAN ...Currents-ocean, Fish -non-specific, Pacific Ocean-general, Tides, ...2.0005
- RADIOELEMENT STUDIES IN THE OCEANS- PLANKTON DISTRIBUTION STUDIES ...Chemical Reactions, Foraminifera, Number Or Density, Protozoa -other, ...5.0795
- SEASONAL DISTRIBUTION AND ABUNDANCE OF DEMERSAL FISH AND INVERTEBRATES IN THE MARINE WATERS ADJACENT TO THE MOUTH OF THE COLUMBIA RIVER ...Benthic Fauna, Number Or Density, Productivity - Food Chain, Radioactivity-general, Temporal Distribution, ...5.0930
- MID-DEPTH BIOLUMINESCENCE ...Bioluminescence, Crustacea -non-specific, ...1.0162
- SYSTEMATICS OF THE ANTARCTIC AND SUBANTARCTIC GAMMARIDEAN AMPHIPODA ...Abyssal, Animal Taxonomy, Antarctic Ocean, Bathyal, Shrimp - Amphipods, ...5.0359
- DISTRIBUTION AND BIOLOGY OF PACIFIC ZOOPLANKTON ...Animal Taxonomy, Pacific Ocean-general, Productivity - Food Chain, Range Or Territorial Distr. , Zooplankton, ...5.0745
- COPEPOD CRUSTACEANS PARASITIC ON FISHES ...Collections, Copepods, Ectoparasites, Fish -non-specific, Indian Ocean-general, Ships and Cruises, ...5.0368
- STRUCTURE OF THE FISH FAUNA OF A FLORIDA CORAL REEF ...Ecological, Fish -non-specific, Reefs, ...5.0205
- STUDIES IN THE PHYSIOLOGY AND BIOCHEMISTRY OF DEEP-SEA FISHES ...Environmental Physiology, Fish -non-specific, Metabolism, Water Pressure, ...5.0237
- ECOLOGICAL SIGNIFICANCE OF PARTICULATE MATTER IN THE SEA ...Atlantic Ocean-north, Interbiotic Relat.(non-specific), Marine Bacteria, Organic Matter Content -water, Temporal Distribution, Zooplankton, ...5.0754
- ECOLOGY AND SEDIMENTARY PATTERNS OF FORAMINIFERA ...Chemistry, Environmental Ecology, Environmental Effects-geologic, Foraminifera, ...5.0746
- ICHTHYOFAUNA OF THE FLORIDA CURRENT ...Fish -non-specific, Florida, Number Or Density, Temporal Distribution, ...5.0066
- LANGMUIR CIRCULATION AND PLANKTON ECOLOGY ...Circulation-general, Phytoplankton, Range Or Territorial Distr. , Water Movement, Currents,, Wind Or Air Movement, Zooplankton, ...5.0794
- BIOLOGICAL ASPECTS OF MIDWATER SOUND SCATTERING ...Atlantic Ocean-north, Bioluminescence, Fish -non-specific, Range Or Territorial Distr. , Scattering, Sound Production, ...1.0054
- REVISION OF THE CLASSIFICATION AND PHYLOGENY OF THE SUBORDER BALANOMORPHA (CIRRIPIEDIA - THORACICA) ...Animal Taxonomy, Barnacles, Collections, Handbooks, Nomenclature, Classification, ...5.0704

- ECOLOGY OF SKELETAL PLANKTON ...Animal Taxonomy, Collections, Flagellates, Gastropods -slugs,conch,snails, Paleoenvironments, Temporal Distribution, ...5.0997
- RESEARCH IN MARINE BENTHIC ECOLOGY OFF OREGON ...Benthic Fauna, Environmental Ecology, Number Or Density, Oregon, ...5.0916
- MICROSTRATIFICATION OF MARINE ZOOPLANKTON ...Environmental Physiology, Growth Rate, Thermal, Zooplankton, ...5.0753
- SYSTEMATICS OF DEEP SEA TREMATODES ...Animal Taxonomy, Helminths, Organic Evolution, Trematoda -other, ...5.0646
- PRODUCTIVITY OF OCEANIC POPULATIONS OF VERTICALLY MIGRATING ANIMALS ...Migration, Plankton (non-specific), Population Dynamics, Productivity (agricultural), ...5.1019
- EVOLUTIONARY DIVERGENCE OF DEEP WATER MARINE ANNELIDS ...Comparative Physiology, Digestive System, Environmental Physiology, Lugworms, Marine Segmentedworm, ...5.0662
- DEVELOPMENT AND EVALUATION OF A NEW TECHNIQUE FOR SAMPLING ZOOPLANKTON ...Organism Sampling Devices, Population Dynamics, Productivity - Food Chain, Technique Development, Zooplankton, ...5.0786
- BIOLOGY OF THE DEEP-SEA BENTHOS ...Atlantic Ocean-general, Benthic Fauna, Number Or Density, Tropic, ...5.0902
- ECOLOGY OF PLANKTONIC FORAMINIFERA AND RELATED STUDIES ...Derivatives, Flagellates, Foraminifera, Gastropods -slugs,conch,snails, Plankton Sampling, ...5.0812
- OCEANIC FISHES OF THE TROPICAL ATLANTIC ...Atlantic Ocean-south, Fish -non-specific, Survey Studies, Tropic, ...5.0068
- SYSTEMATICS AND DISTRIBUTION OF WORMFISHES (MICRODESMIDAE) ...Animal Taxonomy, Bone, Collections, Fish -other, Vertebrate Anatomy, ...5.0115
- DEEP-WATER ZOOPLANKTON OF THE SARGASSO SEA ...Abyssal, Bermuda, Sargasso Sea, Zooplankton, ...5.0738
- ASCIDIAN SPECIES ON THE ATLANTIC CONTINENTAL SHELF ...Animal Taxonomy, Atlantic Ocean-north, Continental Shelf, Range Or Territorial Distr. , Sea Squirts - Tunicates, ...5.0609
- FACTORS AFFECTING HORIZONTAL DISTRIBUTION OF MESOPELAGIC FISHES ...Aquatic Ecology, Atlantic Ocean-north, Behavioral Ecology, Fish -non-specific, Range Or Territorial Distr. , ...5.0105
- SYSTEMATIC AND DISTRIBUTIONAL STUDY OF DEEP-SEA ECTOPROCTA (BRYOZOA) ...Adaptation, Animal Taxonomy, Bryozoa, Ecological, ...5.0650
- DEEP WATER BENTHIC POLYCHAETES ...Benthic Fauna, Biology, Lugworms, Marine Segmentedworm, Photography, ...5.0540
- MICROZOOPLANKTERS IN THE MARINE FOOD CHAIN ...Organism Sampling Devices, Population Dynamics, Productivity - Food Chain, Zooplankton, ...5.0748
- PARASITISM IN DEEPSEA FISHES ...Fish -non-specific, Helminths, Host Specificity, Protozoa, ...5.0243
- ECOLOGICAL INVESTIGATIONS OF MCMURDO SOUND ZOOPLANKTON ...Animal Taxonomy, Antarctica, Migration, Zooplankton, ...5.0756
- DISTRIBUTION OF THE MID-WATER FISHES OF THE GULF OF CALIFORNIA ...Environmental Ecology, Fish -non-specific, Gulf of California, Nets, Organism Sampling Devices, ...5.0043
- STUDY OF RADIOLARIA IN SURFACE SEDIMENTS OF THE NORTHEAST PACIFIC OCEAN ...Animal Taxonomy, Biogenous, Pacific Ocean-north, Protozoa -other, ...7.0187
- MODERN FORAMINIFERA OFF OREGON ...Continental Shelf, Foraminifera, Oregon, Pacific Ocean-general, ...5.0820
- OPERATION OF R/V TRIDENT ...Geomorphology-topography, Phytoplankton, Sea Floor Spreading, Ships and Cruises, Sound Production, Subbottom, ...12.0045
- PELAGIC SHARKS OFF SOUTHERN CALIFORNIA ...Environmental Ecology, Pacific Ocean-east, Population Dynamics, Sharks, ...5.0196
- ECOLOGY OF MARINE BIVALVE MOLLUSCAN LARVAE ...Behavioral Ecology, Clams, Fouling, Population Dynamics, Productivity - Food Chain, ...5.0370

- SUCCESSION, SPACIAL AND TEMPORAL DISTRIBUTION, AND BIOLOGY OF BENTHIC ORGANISMS ...Benthic Fauna, Benthic Flora, Temporal Distribution, ...5.0638
- PELAGIC FISH EXPLORATIONS ...Codfishes, Hake, Commercial Fishing, Fish -other, Nets, ...5.0172
- MARINE INVERTEBRATE EXPLORATIONS ...Commercial Fishing, Freshwater Mussels, Scallops, Pacific Ocean-general, Shrimps - Common, Temporal Distribution, ...5.0733
- BOTTOMFISH EXPLORATIONS ...Commercial Fishing, Fish -other, Nets, Pacific Ocean-east, ...5.0168
- ZOOPLANKTON OF THE GULF OF MAINE ...Atlantic Ocean-north, Plankton Sampling, Population Dynamics, Zooplankton, ...5.0789
- ABUNDANCE AND AVAILABILITY OF PRE-RECRUIT HERRING ...Alewife, menhaden, shad, herring, Aquatic Ecology, Environmental Ecology, Life History Studies, Number Or Density, ...5.0208
- GULF OF ALASKA DEMERSAL FISH INVESTIGATIONS ...Fish -non-specific, Gulf of Alaska, Population Dynamics, Productivity (agricultural), ...5.0009
- FUR SEAL RESEARCH, PELAGIC INVESTIGATIONS ...Behavioral Ecology, Food Supply, Seals, ...5.0667
- STUDIES ON OPHIDIID FISHES ...Abyssal, Animal Taxonomy, Benthic Fauna, Fish -other, Vertebrate Anatomy, ...5.0054
- MECHANISMS AFFECTING THE VERTICAL AND HORIZONTAL DISTRIBUTION OF TUNAS AND RELATED SPECIES ...Behavioral Ecology, Environmental Ecology, Mark, Tag Or Capture -other, Tuna, Mackerel, Albacore... , ...5.0087
- INTERRELATIONS OF ALEWIVES AND ASSOCIATED SPECIES ...Alewife, menhaden, shad, herring, Behavioral Ecology, Competition, Lake Michigan, Predation, ...5.0111
- MARINE BIOLOGICAL INVESTIGATIONS - SURFACE ZOOPLANKTON PROJECT ...Alaska, Number Or Density, Plankton Sampling, Zooplankton, ...5.0737
- BOTTOMFISH EXPLORATIONS ...Bering Sea, Fish -other, Gulf of Alaska, Nets, ...5.0030
- ESTUARINE STUDIES OF SOUTHEASTERN ALASKA ...Alaska, Benthic Fauna, Environmental Ecology, Estuaries, Number Or Density, ...5.0852
- CONTRIBUTIONS TO THE BIOLOGY OF THE ROYAL RED SHRIMP, HYMENOPENAEUS ROBUSTUS ...Atlantic Ocean-south, Maturity & Growth Stages, Number Or Density, Shrimps - Common, ...5.0421
- EASTERN PACIFIC SHRIMPS OF THE GENUS PENAEUS ...Animal Taxonomy, Life History Studies, Pacific Ocean-general, Range Or Territorial Distr. , Shrimps - Common, ...5.0403
- BENTHIC PENAEID SHRIMPS (OTHER THAN PENAEUS) FROM THE WESTERN ATLANTIC ...Animal Taxonomy, Atlantic Ocean-general, Collections, Continental Shelf, Shrimps - Common, ...5.0404
- SEA SURFACE SURVEILLANCE ...Caribbean Sea, Circulation-general, Temporal Distribution, Tuna, Mackerel, Albacore... , Water Properties-general, ...2.0019
- ZOOPLANKTON DISTRIBUTION IN THE TROPICAL ATLANTIC ...Atlantic Ocean-general, Plankton Sampling, Range Or Territorial Distr. , Temperature, Tropic, Zooplankton, ...5.0771

DEVELOP TECHNIQUES FOR CAPTURING JUVENILE TUNAS ...Blood Typing Studies, Nets, Population Dynamics, Tuna, Mackerel, Albacore... , ...5.0078

146 D EASTROPAC ...Marine Biology, Meteorological Studies, Pacific Ocean-east, Tropic, Tuna, Mackerel, Albacore... , ...4.0113

THE OCEANOGRAPHY OF NEW ENGLAND FISHING BANKS ...Continental Shelf, Fish -other, Number Or Density, Water Environment -other, ...5.0901

BIOGEOGRAPHY OF BENTHONIC ORGANISMS ...Benthic Organisms (non-specif), Continental Shelf, Marine Biology (non-specific), Range Or Territorial Distr. , ...5.0876

THE STRUCTURE AND FUNCTION OF CRUSTACEAN EYES ...Crustacea -non-specific, Invertebrate Anatomy, Light -other, Oceanic - Pelagic, Visual Organs, ...5.0363

ENERGY TRANSFER IN LOWER MARINE TROPHIC LEVELS ...Aquatic Ecology, Energy Budgets, Environmental Ecology, Productivity - Food Chain, ...5.1020

### Environmental Ecology

MICROBIOLOGICAL ASSAYS OF SEAWATER USING RADIOISOTOPES ...Aquatic Ecology, Ciliates, Environmental Physiology, Food Chains, Phytoplankton, Productivity - Food Chain, Thiamine, ...5.0811

AN ECOLOGICAL STUDY OF SOUTH BISCAYNE BAY IN THE VICINITY OF TURKEY POINT ...Applied Ecology, Balance of Nature, Bays, Electric Power Plants, Florida, Phytoplankton, Thermal Pollution, ...5.0877

MARINE COMMUNITIES ...Benthic Organisms (non-specif), Life History Studies, Model Studies, Plankton (non-specific), ...5.0861

THE OSTRACODA OF THE BAY OF NAPLES ...Invertebrate Anatomy, Italy, Life History Studies, Nomenclature, Classification, Shrimps - Seed Or Mussel, ...5.0415

ECOLOGY AND SEDIMENTARY PATTERNS OF FORAMINIFERA ...Chemistry, Environmental Effects-geologic, Foraminifera, Vertical Distribution, ...5.0746

TAXONOMY AND ECOLOGY OF NEARSHORE MARINE OSTRACODA ...Animal Taxonomy, Biofacies, Class Ostracoda, Ecological, Paleoenvironments, Shrimps - Seed Or Mussel, ...5.0707

RESEARCH IN MARINE BENTHIC ECOLOGY OFF OREGON ...Benthic Fauna, Number Or Density, Oregon, Vertical Distribution, ...5.0916

MARINE VERTEBRATES OF THE CALIFORNIA PENINSULA ...Animal Taxonomy, California, Range Or Territorial Distr. , Temperature, ...5.0554

SUPPORT OF UNIVERSITY OF GEORGIA MARINE INSTITUTE RESEARCH VESSEL OPERATION ...Continental Shelf, Continental Slope, Distribution, Estuaries, Geomorphology-topography, Marine Biology, Pollution Sources-general, Ships and Cruises, Textures-structures, ...12.0026

AIR-SEA INTERACTION AND PLANKTON ECOLOGY ...Circulation-general, Marine Biology (non-specific), Number Or Density, Plankton (non-specific), ...4.0078

ECOLOGICAL EFFECTS OF ENVIRONMENTAL & LOW LEVEL POLLUTION STRESSES ON METABOLIC REQUIREMENTS FOR GROWTH OF GULF COAST FISHES ...Gulf of Mexico, Metabolism, Pollution - Effects of , Pollution Effects, Pollution Sources-general, Stress, ...5.0328

DISTRIBUTION OF THE MID-WATER FISHES OF THE GULF OF CALIFORNIA ...Fish -non-specific, Gulf of California, Nets, Organism Sampling Devices, Vertical Distribution, ...5.0043

ZONATION OF THE WEDDELL SEA BENTHOS ...Benthic Organisms (non-specif), Marine Biology (non-specific), Temperature, Weddell Sea, ...5.0868

PELAGIC SHARKS OFF SOUTHERN CALIFORNIA ...Pacific Ocean-east, Population Dynamics, Sharks, Vertical Distribution, ...5.0196

MARINE ECOLOGICAL STUDIES ...Habitat Studies, Intertidal Areas, Invertebrates -non-specific, Stress, ...5.0917

BEHAVIOR AND SPECIFICITY IN MARINE SYMBIOSIS ...Behavioral Ecology, Fouling, Symbiosis, ...5.0951

BENTHONIC BIOLOGY ...Benthic Organisms (non-specif), Fouling, Marine Biology (non-specific), Number Or Density, Temporal Distribution, ...5.0900

MASS MORTALITY OF PACIFIC OYSTERS ALONG THE WASHINGTON COAST ...Bays, Mortality Rates, Oysters, Pathology, Puget Sound, ...5.0510

INVESTIGATE THE CAUSE OF MORTALITY OF PACIFIC OYSTERS ALONG THE CALIFORNIA COAST ...California, Mortality Rates, Oysters, Pathology, Training Grants, Fellowships, ...5.0360

SEAL BIOLOGY AND HARVEST ...Alaska, Intorbic Relat.(non-specif), Life History Studies, Reproduction Studies (general), Seals, ...5.0522

SILVER SALMON STUDIES IN THE RESURRECTION BAY AREA ...Alaska, Aquatic Ecology, Bays, Management -other, Salmon -coho, chinook, sockeye..., ...5.0189

MONITORING THE EFFECTS OF LAND USE ON SALMON PRODUCTION ...Alaska, Land Use, Pulp, Paper , and Logging, Salmon & Trout - Non-specific, Streams, ...5.0192

KODIAK KING CRAB ENVIRONMENTAL ZONE SURVEY ...Alaska, Continental Shelf, Horseshoe Or King Crabs, Reproductive System, ...5.0348

WINTER DISTRIBUTION OF FISHES ...Continental Shelf, Fish -non-specific, Salinity, Temperature, Temporal Distribution, Winter, ...5.0153

SPRING DISTRIBUTION OF FISHES ...Commercial Fishing, Continental Shelf, Data Acquisition, Fish -non-specific, Spring, Temporal Distribution, ...5.0154

WATER QUALITY AS RELATED TO SURVIVAL OF SALMON EGGS AND LARVAE ...Mortality Rates, Reproduction Studies (general), Salmon & Trout - Non-specific, Spawning & Nesting Sites, Water Quality-general, ...5.0227

EFFECTS OF THERMAL POLLUTION ON PRODUCTIVITY AND STABILITY OF ESTUARINE COMMUNITIES ...Aquatic Ecology, Estuaries, Plant Prod. (non-specific), Pollution - Effects of , Thermal Pollution, ...6.0152

CHEMICAL RESPONSES BY MARINE ORGANISMS TO STRESS ...Environmental Changes, Environmental Physiology, Protein, Salinity, Thermal, ...5.1026

BIONOMICS OF FISHES AND SHELLFISHES ...Aquaculture & Fish-farming, Bays, Economics-general, Oregon, Productivity - Food Chain, ...5.0920

ECOLOGY OF SABELLARIID REEFS IN DELAWARE BAY ...Aquatic Ecology, Delaware Bay, Lugworms, Marine Segmentedworm, Productivity - Food Chain, Vertical Distribution, ...5.0871

EVALUATION OF ESCAPEMENT OF ADULT SALMON TO OREGON COASTAL STREAMS ...Number Or Density, Oregon, Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, Streams, ...5.0215

ECOLOGY OF RECREATIONALLY IMPORTANT ESTUARINE FISHES IN OREGON ...Aquatic Ecology, Estuaries, Fishing, Migration, Oregon, Population Dynamics, ...5.0216

ALBACORE TUNA ...Behavioral Ecology, Life History Studies, Tags, Tuna, Mackerel, Albacore... , ...5.0143

POPULATION ESTIMATES OF JUVENILE COHO SALMON IN SIX COASTAL STREAMS ...Maturity & Growth Stages, Population Dynamics, Salmon -coho, chinook, sockeye..., Streams, ...5.0144

FORAMINIFERA FROM HEDLEY HARBOR, MASSACHUSETTS ...Foraminifera, Harbors, Massachusetts, Number Or Density, Vertical Distribution, ...5.0563

DISTRIBUTION MAPS OF ANTARCTIC HOLOTHURIANS AND ECHINOIDS - ECHINODERMAT ...Charts, Sea Cucumber, Sea Urchins & Other Echinoderm, Vertical Distribution, ...5.0573

WATER QUALITY AND NUTRIENTS, SACRAMENTO-SAN JOAQUIN RIVER SYSTEM ...Eutrophication, Fish -non-specific, Nutrients, Plankton (non-specific), Water Quality-general, ...6.0139

INFLUENCE OF THE PHYSICAL ENVIRONMENT ON DISTRIBUTION OF YOUNG STAGES OF COASTAL GAME FISH ...Continental Shelf, Fish -non-specific, Maturity & Growth Stages, Physical-general, Range Or Territorial Distr. , ...5.0211

ENVIRONMENTAL EFFECTS ON ISTIOPHORID FISH DISTRIBUTION ...Gulf of Mexico, Marlin, Billfishes, Sailfish..., Ships and Cruises, Temporal Distribution, ...5.0070

PRE-CONSTRUCTION ENVIRONMENTAL SURVEY ...Construction Land Use Effects, Construction Sites, Continental Shelf, Organism Sampling Devices, Reefs, ...5.0907

HYDROGRAPHY, SEDIMENTATION AND CHEMICAL ASPECTS OF THE REEF ENVIRONMENT ...Aquatic Soils, Currents-ocean, Fish -non-specific, Reefs, ...5.0212

ECOLOGY OF THE KELP FORESTS ...Behavioral Ecology, California, Fish -non-specific, Habitat Studies, Laminariaceae (non-specif.&ot), ...5.0194

- ABUNDANCE AND MIGRATION STUDIES OF THE WHITE SEAPERCH (*P. FURCATUS*), PILE PERCH (*R. VACCA*), STRIPED SEAPERCH (*E. LATERALIS*) AND STARRY FLOU ...Fish -other, Migration, Number Or Density, Oregon, Righteye Flounders, ...5.0934
- HYPOTHETICAL DISTRIBUTION OF 14 SPECIES OF ATLANTIC COASTAL GAME FISHES ...Aquatic Ecology, Atlantic Ocean-general, Fish -other, Water Temperature-non-specific, ...5.0123
- BIOLOGY OF THE LARVAL SEA LAMPREY ...Control of Nuisance Species, Developmental Physiology, Great Lakes-general, Lampreys, Life History Studies, ...5.0633
- NATURAL HISTORY OF PREDATORS AND COMPETITORS (PREDATOR CONTROL PROGRAM) ...Behavioral Ecology, Competition, Control of Nuisance Species, Oysters, Predation, ...5.0377
- PHYSICAL AND CHEMICAL CHARACTERISTICS OF THE UPPER CHESAPEAKE BAY ...Chemical-general, Chesapeake Bay, Crustacea -non-specific, Mollusks -non-specific & Other, Physical-general, ...1.0150
- ABUNDANCE AND AVAILABILITY OF PRE-RECRUIT HERRING ...Alewife,menhaden,shad,herring, Aquatic Ecology, Life History Studies, Number Or Density, Vertical Distribution, ...5.0208
- BIostatISTICS OF HERRING ...Age, Alewife,menhaden,shad,herring, Atlantic Ocean-north, Growth Rate, Population Dynamics, Proprioceptors, ...5.0099
- EFFECT OF ENVIRONMENTAL CHANGES ON BLUE CRAB ABUNDANCE ...Crabs, Life History Studies, Migration, Number Or Density, Population Dynamics, ...5.0473
- POPULATION STUDIES ...Alewife,menhaden,shad,herring, Animal Distr. (non-specific), Animal Taxonomy, Population Dynamics, ...5.0130
- CHUM SALMON INVESTIGATIONS ...Estuaries, Food Supply, Growth Rate, Life History Studies, Number Or Density, Salmon-coho,chinook,sockeye..., ...5.0007
- PINK SALMON INVESTIGATIONS - FRESHWATER ECOLOGY ...Aquatic Ecology, Maturity & Growth Stages, Mortality Rates, Salmon-coho,chinook,sockeye..., Spawning & Nesting Sites, ...5.0188
- ADULT MIGRATION RATES ...Columbia River, Management -other, Migration, Pre-impoundment Sites, Salmon-coho,chinook,sockeye..., ...5.0173
- POPULATION STRUCTURE OF THE ALEWIFE AND COREGONIDS ...Alewife,menhaden,shad,herring, Aquatic Ecology, Cisco, Lake Herring, Lake Michigan, Population Dynamics, ...5.0106
- EARLY LIFE HISTORY OF COREGONIDS ...Cisco, Lake Herring, Life History Studies, Maturity & Growth Stages, Technique Development, Water Environment -other, ...5.0110
- LAKE ERIE INVESTIGATIONS - LIFE HISTORY AND ABUNDANCE OF THE YELLOW PERC ...Commercial Fishing, Life History Studies, Nets, Population Dynamics, Yellow Perch, Darters, ...5.0134
- ENVIRONMENTAL CHANGES IN LAKE ERIE ...Aquatic Ecology, Environmental Changes, Ions and Gases, Lake Erie, Nutrients, ...5.0903
- DISTRIBUTION AND ECOLOGY OF ATLANTIC TUNAS ...Atlantic Ocean-general, Range Or Territorial Distr., Temporal Distribution, Tuna, Mackerel, Albacore..., ...5.0063
- RELATION OF ENVIRONMENTAL FACTORS TO THE PRODUCTIVITY OF ESTUARINE SEDENTARY FAUNA ...Aquatic Ecology, Estuaries, Florida, Productivity - Food Chain, ...5.0959
- INTERRELATIONS WITHIN THE PHYSICAL ENVIRONMENT ...Commercial Fishing, Density, Sea Level Variations, Temporal Distribution, ...2.0078
- MECHANISMS AFFECTING THE VERTICAL AND HORIZONTAL DISTRIBUTION OF TUNAS AND RELATED SPECIES ...Behavioral Ecology, Mark, Tag Or Capture -other, Tuna, Mackerel, Albacore..., Vertical Distribution, ...5.0087
- DISTRIBUTION AND ABUNDANCE OF ZOOPLANKTON IN LAKE ERIE ...Aquatic Ecology, Computer Applications, Interbiotic Relat.(non-specif), Lake Erie, Population Dynamics, ...5.0802
- ESTABLISHMENT AND PERPETUATION OF STOCKS OF EXPERIMENTAL FISH ...Behavior, Environmental Physiology, Fish-non-specific, Great Lakes-general, Life History Studies, ...5.0109
- RELATION OF RIVER-RUN IMPOUNDMENTS TO SALMON PRODUCTION ...Aquatic Ecology, Engineering Structures-general, Environmental Changes, Mans Activities, Pollution - Effects of, Salmon & Trout - Non-specific, ...5.0222
- SALMON PRODUCTION IN AREAS MADE INACCESSIBLE BY DAMS ...Aquatic Ecology, Columbia River, Engineering Structures-general, Salmon & Trout - Non-specific, Spawning & Nesting Sites, ...5.0224
- LOBSTER RESEARCH ...Commercial Fishing, Habitat Studies, Lobsters, Population Dynamics, ...5.0436
- BERING SEA KING CRAB STUDIES ...Bering Sea, Commercial Fishing, Crabs, Migration, ...5.0341
- EARLY LIFE HISTORY DECAPOD CRUSTACEANS ...Animal Distr. (non-specific), Crabs, Life History Studies, Reproductive System, Shrimps - Common, ...5.0343
- ESTUARINE STUDIES OF SOUTHEASTERN ALASKA ...Alaska, Benthic Fauna, Estuaries, Number Or Density, Vertical Distribution, ...5.0852
- FISH POPULATION STUDY ...Analog Computer Applications, Fish -other, Killifishes - Cyprinodon, Population Dynamics, Tilapia, Cichlids, ...5.0175
- PREDICTION OF ENVIRONMENT ...Biological-general, Columbia River, Low Temp. -but Above 32f, Physical-general, Reservoirs and Impoundments, Salmon & Trout - Non-specific, Snake River, Temperature, Thermal Pollution, ...5.0225
- FISHWAY RESEARCH (BONNEVILLE LABORATORY) ...Behavioral Ecology, Engineering Structures-general, Management -other, Migration, Salmon & Trout - Non-specific, ...8.0016
- PREDICTING COMMERCIAL SHRIMP ABUNDANCE (SHRIMP DYNAMICS PROGRAM) ...Bays, Behavioral Ecology, Commercial Fishing, Population Dynamics, Shrimps - Common, ...5.0499
- RECONNAISSANCE ECOLOGIC SURVEY OF THE CONTINENTAL SHELF AND UPPER SLOPE (GULF OCEANOGRAPHY PROGRAM) ...Behavioral Ecology, Biology, Continental Shelf, Migration, Population Dynamics, Shrimps - Common, ...5.0502
- BIOLOGICAL OCEANOGRAPHY (GULF OCEANOGRAPHY PROGRAM) ...Food Supply, Gulf of Mexico, Productivity - Food Chain, Shrimps - Common, ...5.0838
- DESCRIPTIVE PHYSICAL OCEANOGRAPHY OF THE EASTERN TROPICAL ATLANTIC ...Atlantic Ocean-general, Fish-non-specific, Productivity - Food Chain, Tropic, ...4.0127
- INVESTIGATE TUNA RESOURCES OF THE TRUST TERRITORIES ...Caroline Islands, Commercial Fishing, Population Dynamics, Tuna, Mackerel, Albacore..., ...5.0085
- SCHOOLING BEHAVIOR ...Alewife,menhaden,shad,herring, Anchovies, Behavioral Ecology, Tuna, Mackerel, Albacore..., ...5.0038
- INVESTIGATE POPULATION DYNAMICS OF SKIPJACK TUNA IN HAWAIIAN WATERS ...Commercial Fishing, Economics, Hawaii, Population Dynamics, Tuna, Mackerel, Albacore..., ...5.0083
- CALIFORNIA CURRENT SURVEYS ...California Current, Fish-non-specific, Pacific Ocean-east, Plankton (non-specific), ...4.0114
- FIELD STUDY - CAPE COD, MASS. ...Animal Distr. (non-specific), Benthonic-bottom, Buoys, Sediments-other, Temperature, ...5.0584
- ENERGY TRANSFER IN LOWER MARINE TROPHIC LEVELS ...Aquatic Ecology, Energy Budgets, Productivity - Food Chain, Vertical Distribution, ...5.1020
- ASPECTS OF RELATIONSHIPS BETWEEN MARINE ECOLOGY AND HUMAN HEALTH ...Marine Biology (non-specific), Mechanism of Transmission, Public Health Ecology, Toxic Substances -non-specific, ...6.0182

## Habitat Studies

- ECOLOGICAL STUDY OF DUXBURY BAY ...Aquatic Ecology, Bays, Massachusetts, Survey Studies, Tides, ...5.0898
- POPULATION STUDIES OF HAUSTORIIDAE AND GAMMARIDAE FROM NEW ENGLAND AND ON INFAUNAL AND EPIFAUNAL MARINE AMPHIPODS AT ENIWETOK ...Atolls, Micronesia, Population Dynamics, Shrimp - Amphipods, ...5.0466
- ENVIRONMENTAL SIGNIFICANCE OF SABELLARIID REEFS ...Biology, Lugworms, Marine Segmentedworm, Reefs, ...5.0592
- SYSTEMATIC STUDIES OF SPONGES OF THE JAMAICAN FORE-REEF SLOPE ...Animal Taxonomy, Invertebrate Anatomy, Jamaica, Porifera, Reefs, ...5.0558
- BIOLOGICAL COLONIZATION OF A RECENTLY FORMED ISLAND ...Iceland, Islands, Productivity - Food Chain, Succession, Volcanoes, ...5.0925

## SUBJECT INDEX

## Ecology (animal)

- SYSTEMATICS OF ANTARCTIC HYMENOSTOMATIDA (PROTOZOA) ...Animal Taxonomy, Antarctica, Aquatic Ecology, Ciliates, ...5.0815
- MARINE ECOLOGICAL STUDIES ...Environmental Ecology, Intertidal Areas, Invertebrates -non-specific, Stress, ...5.0917
- INTERACTIONS OF INTERTIDAL POPULATIONS ...Competition, Intertidal Areas, Population Dynamics, Predation, ...5.0864
- AVIFAUNAL ECOLOGY OF LIMANTOUR ESTERO ...Birds -non-specific, California, Food Supply, Game Reserves & Preserves, ...5.0534
- ECOLOGICAL STUDIES OF ROCKY SUBTIDAL AREAS ...Animal Taxonomy, Marine Plants, Plant Taxonomy, ...5.0865
- SPORT FISH BEHAVIORAL STUDIES ...Basses -sea,white, White Perch, Behavioral Ecology, Porgies, Rockfish, Scoraionfish, ...5.0045
- ESTUARINE DREDGE HOLE INVESTIGATIONS ...Aquatic Ecology, Coring and Dredging, Estuaries, Fish -non-specific, ...5.0908
- EVALUATION OF HABITAT ALTERATION, CURRITUCK SOUND ...Fish -non-specific, North Carolina, Turbidity & Suspended Matter, Water Salinity, ...5.0914
- SPORTFISH YIELD OF NATURAL REEFS ...Bays, California, Fishery Development -other, Population Dynamics, ...5.0199
- DESIGN AND CONSTRUCTION OF BARGE AND CLAM DREDGE FOR SURVEY OF FLORIDA'S COMMERCIAL CLAMS ...Clams, Commercial Fishing, Florida, Other-design-and-construction, ...8.0284
- LARVAL STUDY OF THE LOBSTER ...Atlantic Ocean-north, Lobsters, Long Island Sound, Mark, Tag Or Capture -other, Maturity & Growth Stages, Plankton Sampling, ...5.0371
- MEASUREMENT OF BIOLOGICAL FACTORS OF VARIOUS HABITATS, AND THEIR RELATION TO THE BIOLOGY OF THE COMMERCIALY IMPORTANT SPECIES ...Chemical Measurements -water, Physical Measurements -water, Plankton (non-specific), Population Dynamics, Productivity - Food Chain, ...5.0219
- EVALUATION OF ATLANTIC COAST ESTUARIES ...Atlantic Ocean-north, Estuaries, Game Reserves & Preserves, Life History Studies, Waterfowl -non-specific, ...9.0020
- ECOLOGICAL STUDIES ON TROPICAL INTERTIDAL BRITTLESTARS ...Brittle Stars, Tropic, ...5.0615
- PHYSIOLOGICAL VARIATION IN SUBTIDAL AND INTERTIDAL MARINE INVERTEBRATES ...Intertidal Areas, Invertebrates -non-specific, ...5.0548
- MARINE NEMATODES OF THE CAPE COD AREA ...Animal Taxonomy, Collections, Nematoda -other, Northeast, ...5.0566
- OCEAN WATER INTRUSION INTO BACK BAY, VIRGINIA, & CURRITUCK SOUND, NORTH CAROLINA, ON THE WATERFOWL & FRESHWATER FISH HABITAT ...North Carolina, Virginia, Water Salinity, Waterfowl -non-specific, ...5.0897
- ECOLOGICAL STUDIES OF ATLANTIC AND GULF COASTAL ESTUARIES OF IMPORTANCE TO WATERFOWL ...Agricultural Land Use Effects, Atlantic Ocean-general, Construction Land Use Effects, Estuaries, Gulf of Mexico, Waterfowl -non-specific, ...5.0896
- LIFE HISTORY AND BEHAVIOR OF FISHES ON ARTIFICIAL REEFS ...Behavioral Ecology, Fish -non-specific, Life History Studies, Population Dynamics, ...5.0121
- FILM PROJECT (KELP FORESTS) ...California, Cinematography, Fishery Development -other, Laminariaceae (non-specific.&ot), ...5.0678
- SAND DOLLAR COMMUNITIES ...Beaches, California, Productivity - Food Chain, Sea Urchins & Other Echinoderm, ...5.0533
- GULF-PENINSULA KING CRAB STUDIES ...Commercial Fishing, Crabs, Gulf of Alaska, Population Dynamics, ...5.0342
- YOUNG FISHES OF A TIDAL ZONE ...Estuaries, Fish -non-specific, Life History Studies, Size, Temporal Distribution, ...5.0073
- LOBSTER RESEARCH ...Commercial Fishing, Environmental Ecology, Lobsters, Population Dynamics, ...5.0436
- ADULT SHRIMP STUDIES ...Alaska, Bays, Biological Rhythms, Life History Studies, Shrimps - Common, ...5.0340
- EVALUATION OF ENGINEERING PROJECTS AND ESTUARINE DATA (ESTUARINE PROGRAM) ...Commercial Fishing, Engineering Structures-general, Estuaries, Gulf of Mexico, Swamps-marshes, ...9.0021
- ECOLOGY OF WESTERN GULF ESTUARIES (ESTUARINE PROGRAM) ...Coastal Engineering-other, Estuaries, Gulf of Mexico, Mans Activities, Pollution - Effects of , ...5.0928
- ### Interbiotic Relationship
- #### Behavioral Ecology
- FISHERIES RESOURCES IDENTIFICATION AND ASSESSMENT ...Aerial Photography, Commercial Fishing, Fish -non-specific, Optical, Spectral Reflectance, ...4.0149
- SHARK ATTACKS ...Diving and Scuba, Sharks, Water Environment -other, ...6.0090
- BIOLOGICAL INSTRUMENTATION ...Biological Sciences, Instrumental Services, Instrumentation-general, Navigation Systems-other, ...8.0064
- PHYSIOLOGICAL MECHANISMS UNDERLYING THE BEHAVIOR OF MARINE CRUSTACEA ...Behavior, Crabs, Shrimps - Common, ...5.0428
- THE ECOLOGY, MIGRATIONS AND BEHAVIOR OF MARINE TURTLES ...Migration, Reptile Studies -other, Spawning & Nesting Sites, Turtles, Terrapins, Tortoises, ...5.0586
- VISUAL CAPACITIES IN TELEOST FISHES ...Behavior, Fish -other, Vertebrate Anatomy, Vision, Visual Organs, ...5.0290
- PREDATOR PREY RELATIONSHIPS BETWEEN ECHINODERMS AND MOLLUSCS ...Behavior, Gastropods -slugs,conch,snails, Predation, Starfishes, ...5.0351
- EXPERIMENTAL MANIPULATION OF MECHANICAL AND PHYSIOLOGICAL RHYTHMS - A DUAL APPROACH TO THE BIOLOGICAL CLOCK PROBLEM ...Acetabularia, Biological Rhythms, Crabs, Perching Birds - Songbirds, ...5.1002
- EXPERIMENTAL AND BIOMATHEMATICAL ANALYSIS OF THE PHENOMENON OF ATTACK ...Bluegills, Bream, Computer Methods -general, Environmental Physiology, Largemouth Bass, Minnows, Predation, ...5.0535
- FACTORS AFFECTING HORIZONTAL DISTRIBUTION OF MESOPELAGIC FISHES ...Aquatic Ecology, Atlantic Ocean-north, Fish -non-specific, Range Or Territorial Distr. , Vertical Distribution, ...5.0105
- BENTHIC COMMUNITIES ...Benthic Fauna, Bottom Sampling Device, Developmental Physiology, Fouling, Metabolism, Productivity - Food Chain, ...5.0561
- BEHAVIOR AND SPECIFICITY IN MARINE SYMBIOSIS ...Environmental Ecology, Fouling, Symbiosis, ...5.0951
- ACOUSTIC-VIDEO SYSTEM FOR AQUATIC BIOACOUSTICAL AND ETHOLOGICAL RESEARCH ...Acoustical, British West Indies, Marine Biology, Marine Environments-general, ...1.0049
- BEHAVIORAL STUDIES OF CETACEANS ...Locomotion -animal, Mammals, Sound Production, ...5.0596
- ECOLOGY OF MARINE BIVALVE MOLLUSCAN LARVAE ...Clams, Fouling, Population Dynamics, Productivity - Food Chain, Vertical Distribution, ...5.0370
- BEHAVIOR AND SENSORY PHYSIOLOGY OF SHARKS ...Auditory, Fish Repellents, Sharks, Tape Recording, Audio, Visual Organs, ...5.0253
- BEHAVIOR AND SONIC ACTIVITY OF FISHES ...Environmental Physiology, Fish -other, Sonar, Sound Production, ...1.0047
- WHISTLE CONTOURS IN ODONTOCETE CETACEANS ...Mammals, Social Behavior, Sound Production, ...5.0538
- SPORT FISH BEHAVIORAL STUDIES ...Basses -sea,white, White Perch, Habitat Studies, Porgies, Rockfish, Scoraionfish, ...5.0045
- BELUGA WHALES ...Acoustical, Life History Studies, Mammals, Sound Production, Tape Recording, Audio, ...5.0527
- WALRUS BIOLOGY AND POPULATION ...Censusing, Migration, Population Dynamics, Reproduction Studies (general), Seals, ...5.0523
- DEVELOPMENT OF UNDER-ICE HORIZONTAL SONAR SCANNING EQUIPMENT AND TECHNIQUES FOR LOCATING FISH SCHOOLS ...Commercial Fishing, Fish -non-specific, Lakes, Nets, Sonar, ...8.0138
- FOOD HABITS STUDY OF ORGANISMS OF THE CALIFORNIA CURRENT SYSTEM ...California, California Current, Food Supply, Pacific Ocean-general, ...5.0044
- SOCKEYE SALMON MIGRATORY BEHAVIOR AND BIOLOGICAL STATISTICS COLLECTION, SOUTHEASTERN ALASKA ...Alaska, Censusing, Migration, Salmon -coho,chinook,sockeye..., Streams, ...5.0027

- SOCKEYE SALMON MIGRATORY BEHAVIOR AND BIOLOGICAL STATISTICS COLLECTION, SOUTHEASTERN ALASKA ...Alaska, Aquatic Ecology, Censusing, Migration, Salmon -coho, chinook, sockeye..., ...5.0016
- ALBACORE TUNA ...Environmental Ecology, Life History Studies, Tags, Tuna, Mackerel, Albacore... , ...5.0143
- ECOLOGY OF ECHINOIDS ...Benthonic-bottom, Sea Urchins & Other Echinoderm, Vertical Distribution, Water Environment - other, ...5.0571
- REPRODUCTIVE ISOLATING MECHANISMS IN PANAMANIAN INSHORE MARINE FISHES ...Comparative Physiology, Fish -non-specific, Panama, Reproduction Studies (general), ...5.0244
- ECOLOGY OF PANAMANIAN REEF COMMUNITIES ...Invertebrates -non-specific, Panama, Productivity - Food Chain, Reefs, Tropic, ...5.0866
- BIOLOGICAL FALSE TARGETS AND RELATED ACOUSTIC CHARACTERISTICS ...Animal Taxonomy, Fish -non-specific, Sound Production, ...1.0041
- LIFE HISTORY AND BEHAVIOR OF FISHES ON ARTIFICIAL REEFS ...Fish -non-specific, Habitat Studies, Life History Studies, Population Dynamics, ...5.0121
- DIURNAL-NOCTURNAL ACTIVITY OF THE QUEENFISH, SERIPHUS POLITUS ...Aquatic Ecology, Biological Rhythms, Drums, Fish -other, Other, Sound Production, ...5.0230
- ECOLOGY OF THE KELP FORESTS ...California, Environmental Ecology, Fish -non-specific, Habitat Studies, Laminariaceae (non-specif.&ot), ...5.0194
- NATURAL HISTORY OF PREDATORS AND COMPETITORS (PREDATOR CONTROL PROGRAM) ...Competition, Control of Nuisance Species, Environmental Ecology, Oysters, Predation, ...5.0377
- FUR SEAL RESEARCH, PELAGIC INVESTIGATIONS ...Food Supply, Seals, Vertical Distribution, ...5.0667
- ADULT SALMON BEHAVIOR STUDIES IN RIVERS AND AT DAMS (SONIC TRACKING) ...Engineering Structures-general, Salmon & Trout - Non-specific, Streams, Tags, Telemetry, ...8.0111
- MECHANISMS AFFECTING THE VERTICAL AND HORIZONTAL DISTRIBUTION OF TUNAS AND RELATED SPECIES ...Environmental Ecology, Mark, Tag Or Capture - other, Tuna, Mackerel, Albacore... , Vertical Distribution, ...5.0087
- INTERRELATIONS OF ALEWIVES AND ASSOCIATED SPECIES ...Alewife,menhaden,shad,herring, Competition, Lake Michigan, Predation, Vertical Distribution, ...5.0111
- MARINE FISH BEHAVIOR ...Commercial Fishing, Fish -non-specific, Fishing Gear, ...5.0176
- FISHWAY RESEARCH (BONNEVILLE LABORATORY) ...Engineering Structures-general, Environmental Ecology, Management -other, Migration, Salmon & Trout - Non-specific, ...8.0016
- PREDICTING COMMERCIAL SHRIMP ABUNDANCE (SHRIMP DYNAMICS PROGRAM) ...Bays, Commercial Fishing, Environmental Ecology, Population Dynamics, Shrimps - Common, ...5.0499
- RECONNAISSANCE ECOLOGIC SURVEY OF THE CONTINENTAL SHELF AND UPPER SLOPE (GULF OCEANOGRAPHY PROGRAM) ...Biology, Continental Shelf, Environmental Ecology, Migration, Population Dynamics, Shrimps - Common, ...5.0502
- SCHOOLING BEHAVIOR ...Alewife,menhaden,shad,herring, Anchovies, Environmental Ecology, Tuna, Mackerel, Albacore... , ...5.0028
- CTFM SONAR ...Commercial Fishing, Locomotion -animal, Sonar and Echo Sounding, Telemetry, Tuna, Mackerel, Albacore... , ...8.0058
- SEALAB III PARTICIPATION ...Bioluminescence, Divers, Diving and Scuba, Medical Studies, Submersibles, ...6.0091
- Competition**
- INTERACTIONS OF INTERTIDAL POPULATIONS ...Habitat Studies, Intertidal Areas, Population Dynamics, Predation, ...5.0864
- TRAMMEL NET SAMPLING IN ESTUARINE AREAS ...Estuaries, Fish -non-specific, Lakes, Nets, Population Dynamics, ...5.0096
- NATURAL HISTORY OF PREDATORS AND COMPETITORS (PREDATOR CONTROL PROGRAM) ...Behavioral Ecology, Control of Nuisance Species, Environmental Ecology, Oysters, Predation, ...5.0377
- METHODS OF CONTROL OF PREDATORS AND COMPETITORS (PREDATOR CONTROL PROGRAM) ...Control of Nuisance Species, Gastropods -slugs,conch,snails, Oysters, Predation, ...5.0378
- INTERRELATIONS OF SMELT WITH NATIVE SPECIES ...Food Supply, Lake Superior, Life History Studies, Number Or Density, Smelts, ...5.0182
- INTERRELATIONS OF ALEWIVES AND ASSOCIATED SPECIES ...Alewife,menhaden,shad,herring, Behavioral Ecology, Lake Michigan, Predation, Vertical Distribution, ...5.0111
- Intertibiotic Relat.(non-specif)**
- ECOLOGICAL SIGNIFICANCE OF PARTICULATE MATTER IN THE SEA ...Atlantic Ocean-north, Marine Bacteria, Organic Matter Content -water, Temporal Distribution, Vertical Distribution, Zooplankton, ...5.0754
- RELATIONSHIPS BETWEEN PHYTOPLANKTON AND ZOOPLANKTON IN THE CARIBBEAN SEA ...Caribbean Sea, Phytoplankton, Sargassum, Vertical Distribution, Zooplankton, ...5.0779
- DIVERSITY, COMMUNITY STRUCTURE AND TROPHIC RELATIONS OF TROPICAL ZOOPLANKTON ...Bays, Productivity - Food Chain, Tropic, Zooplankton, ...5.0785
- SEAL BIOLOGY AND HARVEST ...Alaska, Environmental Ecology, Life History Studies, Reproduction Studies (general), Seals, ...5.0522
- STUDIES OF SOCKEYE SALMON, ONCORHYNCHUS NERKA, IN THE NUSHAGAK DISTRICT, ALASKA ...Alaska, Commercial Fishing, Lakes, Population Dynamics, Salmon -coho,chinook,sockeye..., Spawning & Nesting Sites, ...5.0228
- STUDIES OF FISH FAMILIES ARIIDAE AND ASPREDINIDAE ...Animal Taxonomy, Fish -other, Neotropical, Tropic, ...5.0052
- THE ROLE OF THE SENORITA, OXYJULIS CALIFORNICA, AS A CLEANING ORGANISM ...California, Ectoparasites, Fish -other, Fishery Development -other, ...5.0193
- CHARACTERISTICS OF LAKE SUPERIOR WHITEFISH ...Commercial Fishing, Lake Superior, Life History Studies, Salmon & Trout - Non-specific, Tags, ...5.0183
- DISTRIBUTION AND ABUNDANCE OF ZOOPLANKTON IN LAKE ERIE ...Aquatic Ecology, Computer Applications, Environmental Ecology, Lake Erie, Population Dynamics, ...5.0802
- Predation**
- PREDATOR PREY RELATIONSHIPS BETWEEN ECHINODERMS AND MOLLUSCS ...Behavior, Behavioral Ecology, Gastropods -slugs,conch,snails, Starfishes, ...5.0351
- CHEMISTRY AND BIOLOGY OF SOME COELENTERATE NEMATOCYSTS ...Animal Toxins, Cell. organ. & Organoids -ot, Coelenterata -other, Invertebrate Physiology, ...5.0776
- SIMULATION STUDIES OF ECOLOGICAL COMMUNITIES ...Mortality Rates, Number Or Density, Population Dynamics, Productivity - Food Chain, ...5.0862
- EXPERIMENTAL AND BIOMATHEMATICAL ANALYSIS OF THE PHENOMENON OF ATTACK ...Behavioral Ecology, Bluegills, Bream, Computer Methods -general, Environmental Physiology, Largemouth Bass, Minnows, ...5.0535
- THE EFFECTS OF SEAL AND FISH PREDATION ON CERTAIN ANTARCTIC BENTHIC COMMUNITIES ...Antarctica, Benthic Organisms (non-specif), Biology, Fish -non-specific, Productivity - Food Chain, Seals, ...5.1039
- INTERACTIONS OF INTERTIDAL POPULATIONS ...Competition, Habitat Studies, Intertidal Areas, Population Dynamics, ...5.0864
- DEEP-WATER FOULING ...Biological, Fish -non-specific, Fouling, Vertical Distribution, ...8.0233
- ESTIMATE OF STANDING CROP OF OYSTERS AND SURVEY OF OYSTER PREDATORS IN GEORGIA ...Censusing, Georgia, Oysters, ...5.0416
- PRELIMINARY MODIFICATIONS AND CONTROL OF NATURAL GROWING AREA ENVIRONMENTS ...Captive Rearing, Clams, Growth Rate, Mineral Content -water, Oysters, ...5.0495
- INFLUENCE OF UNLIMITED FOOD SUPPLY ON RHYTHMIC ACTIVITY OF BLUEFISH ...Biological Rhythms, Bluefish, Food Supply, ...5.0122
- NATURAL HISTORY OF PREDATORS AND COMPETITORS (PREDATOR CONTROL PROGRAM) ...Behavioral Ecology, Competition, Control of Nuisance Species, Environmental Ecology, Oysters, ...5.0377

## SUBJECT INDEX

## Ecology (animal)

- METHODS OF CONTROL OF PREDATORS AND COMPETITORS (PREDATOR CONTROL PROGRAM) ...Competition, Control of Nuisance Species, Gastropods -slugs, conch, snails, Oysters, ...5.0378
- INTERRELATIONS OF ALEWIVES AND ASSOCIATED SPECIES ...Alewife, menhaden, shad, herring, Behavioral Ecology, Competition, Lake Michigan, Vertical Distribution, ...5.0111
- Symbiosis**
- SYSTEMATICS OF MARINE SYMBIOTIC CRUSTACEA FROM INVERTEBRATES ...Animal Taxonomy, Barnacles, Copepods, Life History Studies, ...5.0516
- SYMBIOSIS BETWEEN MARINE ALGAE AND INVERTEBRATES ...Gastropods -slugs, conch, snails, Photosynthetically Active, Zooxanthella, ...5.0730
- BEHAVIOR AND SPECIFICITY IN MARINE SYMBIOSIS ...Behavioral Ecology, Environmental Ecology, Fouling, ...5.0951
- SYNECOLOGY OF CARIBBEAN SPONGES ...Algae- General, Caribbean Sea, Copepods, Porifera, ...5.0580
- SYMBIOSIS OF TROPICAL ZOANTHIDEA AND ZOOXANTHELLAE ...Anthozoa, Messenger RNA, Metabolism, Tropic, Zooxanthella, ...5.0642
- SYMBIOSIS IN CONVOLUTA ...Algae- General, Eddyworms, ...5.0713
- FORMATION AND UTILIZATION OF TERPENES ...Anthozoa, Biosynthesis, Enzyme-substrate, Terpenes, Zooxanthella, ...5.0957
- Life History Studies**
- MARINE COMMUNITIES ...Benthic Organisms (non-specific), Environmental Ecology, Model Studies, Plankton (non-specific), ...5.0861
- THE OSTRACODA OF THE BAY OF NAPLES ...Environmental Ecology, Invertebrate Anatomy, Italy, Nomenclature, Classification, Shrimps - Seed Or Mussel, ...5.0415
- CHONOTRICH CILIATE PROTOZOANS ...Age, Animal Taxonomy, Ciliates, Invertebrate Anatomy, Range Or Territorial Distr., ...5.0742
- SYSTEMATIC STUDIES ON HERMIT CRABS AND OTHER DECAPOD CRUSTACEANS ...Animal Taxonomy, Atlantic Ocean-south, Crabs, Developmental Physiology, ...5.0408
- NORTH AMERICAN POST-OLIGOCENE CYTHERID OSTRACODS ...Animal Taxonomy, Invertebrate Anatomy, Nearctic, Phylogenies, Shrimps - Seed Or Mussel, ...7.0179
- SYSTEMATIC STUDIES OF CERTAIN MARINE PARASITIC WORMS ...Animal Taxonomy, Helminths, Red Worms, Eye Works..., Trematoda -other, ...5.0541
- BARNACLES OF THE EASTERN PACIFIC ...Barnacles, Pacific Ocean-east, ...5.0515
- SYSTEMATICS OF MARINE SYMBIOTIC CRUSTACEA FROM INVERTEBRATES ...Animal Taxonomy, Barnacles, Copepods, Symbiosis, ...5.0516
- LIFE HISTORY AND DEVELOPMENT OF POLYCHAETOUS ANNELID LARVAE ...Behavior, Developmental Physiology, Lugworms, Marine Segmentedworm, Reproductive System, Whole Body Culture & Rearing, ...5.0604
- LIFE HISTORY STUDY OF THE MOI, POLYDACTYLUS SEXFILIS ...Aquatic Ecology, Fish -other, Management -other, Tags, ...5.0257
- BELUGA WHALES ...Acoustical, Behavioral Ecology, Mammals, Sound Production, Tape Recording, Audio, ...5.0527
- SEAL BIOLOGY AND HARVEST ...Alaska, Environmental Ecology, Interbiotic Relat.(non-specific), Reproduction Studies (general), Seals, ...5.0522
- CREEL CENSUS OF SUMMER FLOUNDER SPORT FISHERY IN GREAT BAY, NEW JERSEY ...Bays, Censusing, Lefteye Flounders, Legislation, New Jersey, ...5.0124
- STUDY ON THE DISTRIBUTION AND ABUNDANCE OF PINK SHRIMP, PANDALUS JORDANI, IN THE PACIFIC OCEAN OFF OREGON ...Censusing, Fishing Gear, Pacific Ocean-general, Population Dynamics, Shrimps - Common, ...5.0487
- A STUDY OF THE SEASONAL ABUNDANCE, DISTRIBUTION AND SPECIES COMPOSITION, WITH DEPTH, OF NEKTON FAUNA, WITH PARTICULAR EMPHASIS ON FISHES ...Fish -non-specific, Number Or Density, Vertical Distribution, Zooplankton, ...5.0114
- PORT SAMPLING - CRESENT CITY, BROOKINGS, PORT ORFORD ...Crabs, Fish -non-specific, Nets, Shrimps - Common, ...5.0356
- DUNGENESS CRAB POPULATION DYNAMICS STUDY ...Alaska, Crabs, Population Dynamics, Tags, ...5.0346
- INVESTIGATION OF ECOLOGICAL FACTORS LIMITING PRODUCTION OF THE ALASKAN PANDALID SHRIMP ...Alaska, Commercial Fishing, Nets, Shrimps - Common, Vertical Distribution, ...5.0345
- POTENTIAL FISHERY FOR RIVER HERRINGS IN CONNECTICUT RIVER ...Alewife, menhaden, shad, herring, Connecticut River, Data Acquisition, Nets, Spawning & Nesting Sites, Survey Studies, ...5.0202
- ARCTIC-YUKON-KUSKOKWIM AREA ANADROMOUS FISH INVESTIGATIONS ...Alaska, Commercial Fishing, Population Dynamics, Salmon & Trout - Non-specific, Salmon -coho, chinook, sockeye..., ...5.0024
- LIFE-HISTORY AND BIOLOGICAL WORK IN THE RESTORATION AND MANAGEMENT OF SPECIES OF IMPORTANCE TO THE FISHERIES OF THE VIRGIN ISLANDS ...Commercial Fishing, Diving and Scuba, Management -other, Population Dynamics, Virgin Islands, ...5.0149
- STUDY OF THE RIVER PHASE OF THE LIFE HISTORIES OF ALOSA PSEUDOHARENGUS AND AESTIVALIS ...Alewife, menhaden, shad, herring, Aquatic Ecology, Connecticut River, Spawning & Nesting Sites, ...5.0245
- STUDY OF LIFE HISTORY AND ECOLOGY OF SERPULIDAE IN TEXAS COASTAL WATERS ...Gulf of Mexico, Lugworms, Marine Segmentedworm, Texas, ...5.0656
- EVALUATION OF ATLANTIC COAST ESTUARIES ...Atlantic Ocean-north, Estuaries, Game Reserves & Preserves, Habitat Studies, Waterfowl -non-specific, ...9.0020
- SHELLFISHERIES RESEARCH ...Clams, Commercial Fishing, Crabs, Number Or Density, Oysters, ...5.0383
- ECOLOGICAL STUDIES OF THE BLUE CRAB, CALINECTES SAPIDUS ...Aquatic Ecology, Crabs, Estuaries, Louisiana, ...5.0433
- OREGON FISHES - THEIR CLASSIFICATIONS, DISTRIBUTIONS AND LIFE HISTORIES ...Animal Taxonomy, Fresh Water, Oregon, Vertical Distribution, ...5.0137
- EARLY LIFE OF BOREAL FOOD FISH AND SHELLFISH ...Animal Taxonomy, Fish -non-specific, Mollusks -non-specific & Other, Mortality Rates, ...5.0139
- ALBACORE TUNA ...Behavioral Ecology, Environmental Ecology, Tags, Tuna, Mackerel, Albacore..., ...5.0143
- MANAGEMENT OF OREGON DUNGENESS CRAB RESOURCE ...Commercial Fishing, Crabs, Legislation, Oregon, Tags, ...5.0489
- FISH GENETICS AND ECOLOGY ...DNA Other, Estuaries, Fish -non-specific, ...5.0309
- THE SYSTEMATICS AND DISTRIBUTION OF THE WORLD-WIDE SQUID FAMILY BATHYTEUTHIDAE ...Animal Taxonomy, Number Or Density, Octopus, Squid, Cuttlefish..., World Wide, ...5.0400
- LIFE HISTORY OF THE SHARK COPEPOD, KROYERIA DISPAR ...Copepods, Developmental Physiology, Ectoparasites, Whole Body Culture & Rearing, ...5.0393
- LIFE HISTORY OF BILLFISHES ...California, Censusing, Marlin, Billfishes, Sailfish..., Mexico, ...5.0195
- LIFE HISTORY AND BEHAVIOR OF FISHES ON ARTIFICIAL REEFS ...Behavioral Ecology, Fish -non-specific, Habitat Studies, Population Dynamics, ...5.0121
- LIFE HISTORY OF CLUPEA HARENGUS PALLASI ...Alewife, menhaden, shad, herring, Aquaculture & Fish-farming, Artificial Insemination, Water Salinity, Water Temperature-non-specific, ...5.0035
- BIOLOGY OF THE LARVAL SEA LAMPREY ...Control of Nuisance Species, Developmental Physiology, Environmental Ecology, Great Lakes-general, Lampreys, ...5.0633
- ABUNDANCE AND AVAILABILITY OF PRE-RECRUIT HERRING ...Alewife, menhaden, shad, herring, Aquatic Ecology, Environmental Ecology, Number Or Density, Vertical Distribution, ...5.0208
- EFFECT OF ENVIRONMENTAL CHANGES ON BLUE CRAB ABUNDANCE ...Crabs, Environmental Ecology, Migration, Number Or Density, Population Dynamics, ...5.0473
- BRISTOL BAY ESTUARINE ECOLOGY ...Alaska, Estuaries, Fishing Gear, Migration, Oceanic Fronts, Salmon -coho, chinook, sockeye..., ...5.0004
- KARLUK LAKE RESEARCH STATION ...Mortality Rates, Population Dynamics, Productivity (agricultural), Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, ...5.0006
- CHUM SALMON INVESTIGATIONS ...Environmental Ecology, Estuaries, Food Supply, Growth Rate, Number Or Density, Salmon -coho, chinook, sockeye..., ...5.0007

## Ecology (animal)

## SUBJECT INDEX

- PINK SALMON INVESTIGATIONS - INTERTIDAL ECOLOGY** ...Alaska, Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, Tidal Streams, Water Salinity, ...5.0186
- FUR SEAL RESEARCH, POPULATION DYNAMICS** ...Age, Growth Rate, Mark, Tag Or Capture -other, Population Dynamics, Seals, ...5.0671
- EARLY LIFE HISTORY OF COREGONIDS** ...Cisco, Lake Herring, Environmental Ecology, Maturity & Growth Stages, Technique Development, Water Environment -other, ...5.0110
- LAKE ERIE INVESTIGATIONS - LIFE HISTORY AND ABUNDANCE OF THE YELLOW PERC** ...Commercial Fishing, Environmental Ecology, Nets, Population Dynamics, Yellow Perch, Darters, ...5.0134
- INTERRELATIONS OF SMELT WITH NATIVE SPECIES** ...Competition, Food Supply, Lake Superior, Number Or Density, Smelts, ...5.0182
- CHARACTERISTICS OF LAKE SUPERIOR WHITEFISH** ...Commercial Fishing, Interbiotic Relat.(non-specif), Lake Superior, Salmon & Trout - Non-specific, Tags, ...5.0183
- ASSESSMENT OF LAKE SUPERIOR LAKE TROUT** ...Aquatic Ecology, Commercial Fishing, Lake Trout, Brook Trout, Lampreys, ...5.0736
- SEA LAMPREY AMMOCETE REESTABLISHMENT STUDIES** ...Aquatic Ecology, Control of Nuisance Species, Great Lakes-general, Lampreys, Larvicides, Population Dynamics, ...5.0629
- YOUNG FISHES OF A TIDAL ZONE** ...Estuaries, Fish -non-specific, Habitat Studies, Size, Temporal Distribution, ...5.0073
- SYSTEMATIC STUDIES OF FISHES** ...Animal Taxonomy, Developmental Physiology, Fish -non-specific, Vertebrate Anatomy, ...5.0059
- IDENTIFICATION AND DESCRIPTION OF FISH LARVAE** ...Animal Taxonomy, Atlantic Ocean-north, Fish -non-specific, Southern, ...5.0074
- LIFE HISTORY OF THE BURBOT AND LONGNOSE SUCKER** ...Codfishes, Hake, Lake Superior, Lakes, Suckers, ...5.0184
- ESTABLISHMENT AND PERPETUATION OF STOCKS OF EXPERIMENTAL FISH** ...Behavior, Environmental Ecology, Environmental Physiology, Fish -non-specific, Great Lakes-general, ...5.0109
- ADULT SHRIMP STUDIES** ...Alaska, Bays, Biological Rhythms, Habitat Studies, Shrimps - Common, ...5.0340
- EARLY LIFE HISTORY DECAPOD CRUSTACEANS** ...Animal Distr. (non-specific), Crabs, Environmental Ecology, Reproductive System, Shrimps - Common, ...5.0343
- PINK SALMON INVESTIGATIONS - EARLY SEA LIFE OF SALMON** ...Alaska, Environmental Physiology, Parasitology - other, Water Temperature-non-specific, ...5.0187
- GULF OF ALASKA SOCKEYE SALMON SCALES, PROTOCOL AREA SOCKEYE SALMON SCALES, AND GULF OF ALASKA PINK SALMON SCALES** ...Animal Taxonomy, Gulf of Alaska, Salmon -coho, chinook, sockeye..., Scales, ...5.0334
- EASTERN PACIFIC SHRIMPS OF THE GENUS PENAEUS** ...Animal Taxonomy, Pacific Ocean-general, Range Or Territorial Distr. , Shrimps - Common, Vertical Distribution, ...5.0403
- ECOLOGY AND TAXONOMY OF TROPICAL ATLANTIC SCOMBRID EGGS AND LARVAE** ...Animal Distr. (non-specific), Animal Taxonomy, Basic Embryology, Food Supply, Tuna, Mackerel, Albacore..., ...5.0772
- SURF CLAM BIOLOGY** ...Age, Clams, Growth Rate, Reproductive System, Tags, ...5.0449
- FISH POPULATION PARAMETERS** ...Age, Biological Rhythms, Population Dynamics, Size, ...5.0039
- SPECIES LIFE HISTORY AND DISTRIBUTION** ...California Current, Fish -non-specific, Maturity & Growth Stages, Number Or Density, Oceanic Fronts, ...5.0037
- THERMAL ACCLIMATION PATTERNS IN PARASITES AND HOSTS** ...Adaptation, Host Resistance, Host Specificity, Monogenea, Water Temperature-non-specific, ...5.0643
- MARINE ANIMAL USE IN THE STUDY OF HEALTH PROBLEMS** ...Hormones, Hormones - Other, Metabolism, ...6.0126
- THE ECOLOGY, MIGRATIONS AND BEHAVIOR OF MARINE TURTLES** ...Behavioral Ecology, Reptile Studies - other, Spawning & Nesting Sites, Turtles, Terrapins, Tortoises, ...5.0586
- PRODUCTIVITY OF OCEANIC POPULATIONS OF VERTICALLY MIGRATING ANIMALS** ...Plankton (non-specific), Population Dynamics, Productivity (agricultural), Vertical Distribution, ...5.1019
- SPATIAL ORIENTATION OF FISHES AND ITS SENSORY BASES** ...Behavior, Olfactory, Salmon & Trout - Non-specific, Visual Organs, ...5.0339
- ECOLOGICAL INVESTIGATIONS OF MCMURDO SOUND ZOOPLANKTON** ...Animal Taxonomy, Antarctica, Vertical Distribution, Zooplankton, ...5.0756
- POPULATION DYNAMICS OF ANTARCTIC SEALS** ...Aerial Photography, Antarctica, Population Dynamics, Seals, ...5.0634
- ORIENTATION CUES AND PATTERNS OF LONG-DISTANCE TRAVEL OF MARINE TURTLES** ...Biological Rhythms, Environmental Physiology, Orientation, Turtles, Terrapins, Tortoises, ...4.0102
- DISTRIBUTION AND MIGRATION OF CENTRAL AMERICAN FRESHWATER ELASMOBRANCHS** ...Caribbean Sea, Nicaragua, Osmoregulation, Rays, Skates, Mantas, Sawfish, Sharks, ...5.0117
- WALRUS BIOLOGY AND POPULATION** ...Behavioral Ecology, Censusing, Population Dynamics, Reproduction Studies (general), Seals, ...5.0523
- INVESTIGATION OF ANADROMOUS DOLLY VARDEN POPULATIONS IN HOOD BAY DRAINAGES, SOUTHEASTERN ALASKA** ...Alaska, Lake Trout, Brook Trout, Population Dynamics, Streams, ...5.0013
- TAGGING ENGLISH SOLE, PETRALE SOLE, AND PACIFIC COD** ...Codfishes, Hake, Commercial Fishing, Righteye Flounders, Size, Tags, Washington, ...5.0158
- KVICHAK RIVER TOTAL SMOLT** ...Alaska, Censusing, Fish -non-specific, Mortality Rates, Nets, Population Dynamics, ...5.0002
- COOK INLET ESCAPEMENT ENUMERATION STUDY** ...Alaska, Censusing, Organism Sampling Devices, Salmon -coho, chinook, sockeye..., Sonar, Sonar and Echo Sounding, ...8.0112
- A STUDY OF THE RATE AND PATTERN OF SHAD MIGRATION IN THE CONNECTICUT RIVER UTILIZING SONIC TRACKING APPARATUS** ...Alewife, menhaden, shad, herring, Connecticut River, Spawning & Nesting Sites, Tags, Telemetry, ...5.0046
- SOCKEYE SALMON MIGRATORY BEHAVIOR AND BIOLOGICAL STATISTICS COLLECTION, SOUTHEASTERN ALASKA** ...Alaska, Behavioral Ecology, Censusing, Salmon -coho, chinook, sockeye..., Streams, ...5.0027
- COPPER RIVER SOCKEYE SALMON INVESTIGATIONS** ...Alaska, Aquatic Ecology, Biological Rhythms, Population Dynamics, Salmon -coho, chinook, sockeye..., Stocking of Fish & Shellfish, ...5.0025
- COPPER RIVER SOCKEYE SALMON INVESTIGATIONS** ...Alaska, Commercial Fishing, Nets, Salmon -coho, chinook, sockeye..., Streams, ...5.0026
- SOCKEYE SALMON MIGRATORY BEHAVIOR AND BIOLOGICAL STATISTICS COLLECTION, SOUTHEASTERN ALASKA** ...Alaska, Aquatic Ecology, Behavioral Ecology, Censusing, Salmon -coho, chinook, sockeye..., ...5.0016
- TAG RECOVERY, ENGLISH SOLE, PETRALE SOLE, AND PACIFIC COD** ...Codfishes, Hake, Population Dynamics, Righteye Flounders, Smolt, Washington, ...5.0159
- KVICHAK RIVER SMOLT STUDY LITERATURE SURVEY** ...Alaska, Censusing, Fish -non-specific, Number Or Density, Survey Studies, ...5.0003
- COOK INLET CATCH AND ESCAPEMENT AGE AND SEX COMPOSITION STUDIES** ...Age, Alaska, Nets, Salmon -coho, chinook, sockeye..., Sex -non-specific, Spawning & Nesting Sites, ...5.0014
- FORECAST OF KODIAK ISLAND PINK SALMON RUNS FROM ABUNDANCE OF JUVENILES IN ESTUARIES** ...Alaska, Estuaries, Fishing Gear, Maturity & Growth Stages, Number Or Density, Salmon -coho, chinook, sockeye..., ...5.0179
- TAGGING SALMON IN THE OFFSHORE WATERS OF THE NORTH PACIFIC** ...Bering Sea, Gulf of Alaska, Number Or Density, Range Or Territorial Distr. , Salmon & Trout - Non-specific, Tags, ...5.0180

## Migration

- BIOLOGICAL RESEARCH ON THE VOLCANIC ISLAND SURTSEY AND ENVIRON** ...Iceland, Volcanoes, ...5.0889
- SPATIAL ORIENTATION OF FISHES AND ITS SENSORY BASES** ...Behavior, Environmental Physiology, Fish -non-specific, Orientation, Sensory Organs, ...5.0338

## SUBJECT INDEX

## Ecology (animal)

FARMINGTON RIVER SHAD STUDIES ...Alewife,menhaden,shad,herring, Bottom Sampling, Captive Rearing, Sampling, Streams, ...5.0203

MOVEMENTS OF FRESHWATER CATFISH IN THE ESTUARIES OF SOUTHWEST LOUISIANA ...Blue Catfish, White Catfish, Environment Resistance, Estuaries, Louisiana, Water Salinity, ...5.0090

ECOLOGY OF RECREATIONALLY IMPORTANT ESTUARINE FISHES IN OREGON ...Aquatic Ecology, Environmental Ecology, Estuaries, Fishing, Oregon, Population Dynamics, ...5.0216

MIGRATORY HABITS OF LARGE SHARKS ...Atlantic Ocean-north, Fishing, Sharks, Tags, ...5.0147

ABUNDANCE AND MIGRATION STUDIES OF THE WHITE SEAPERCH (P. FURCATUS), PILE PERCH (R. VACCA), STRIPED SEAPERCH (E. LATERALIS) AND STARRY FLOU ...Environmental Ecology, Fish -other, Number Or Density, Oregon, Righteye Flounders, ...5.0934

TRACKING MIGRATIONS OF BLUEFISH POPULATIONS ALONG ATLANTIC COAST TO LEARN BIOLOGY OF THE SPECIES (MIGRATORY HABITS OF BLUEFISH) ...Atlantic Ocean-north, Bluefish, Population Dynamics, Tags, ...5.0120

TAGGING PROGRAM WITH WOODS HOLE AND INTERNATIONAL GAME FISH ASSOCIATION FOR MARLIN, SAILFISH AND OTHER GAME SPECIES MIGRATION STUDIES ...Marlin, Billfishes, Sailfish..., Pacific Ocean-general, Population Dynamics, Tags, ...5.0036

EFFECT OF ENVIRONMENTAL CHANGES ON BLUE CRAB ABUNDANCE ...Crabs, Environmental Ecology, Life History Studies, Number Or Density, Population Dynamics, ...5.0473

TAGGING ...Alewife,menhaden,shad,herring, Population Dynamics, Tags, Telemetry, Vertebrate Anatomy, ...5.0127

BRISTOL BAY ESTUARINE ECOLOGY ...Alaska, Estuaries, Fishing Gear, Life History Studies, Oceanic Fronts, Salmon-coho,chinook,sockeye..., ...5.0004

NAKNEK SYSTEM RED SALMON STUDIES ...Alaska, Growth Rate, Number Or Density, Salmon-coho,chinook,sockeye..., Streams, ...5.0005

ADMINISTRATION OF WHALING ACT, PROTECTED AND NON-COMMERCIAL WHALES ...Censusing, Growth Rate, Mammals, Reproduction Studies (general), Vertebrate Anatomy, ...5.0669

COLLECTION OF JUVENILE MIGRANTS FROM RIVERS AND STREAMS ...Electric Power Plants, Engineering Structures-general, Fish-non-specific, Management-other, Streams, ...5.0513

JUVENILE MIGRATION RATES ...Columbia River, Mark, Tag Or Capture -other, Salmon & Trout - Non-specific, Snake River, Water Environment -other, ...5.0223

ADULT MIGRATION RATES ...Columbia River, Environmental Ecology, Management -other, Pre-impoundment Sites, Salmon-coho,chinook,sockeye..., ...5.0173

ELECTRIC BARRIER OPERATIONS ...Control of Nuisance Species, Lake Michigan, Lake Superior, Lampreys, Population Dynamics, ...5.0630

MIGRATION OF ATLANTIC TUNAS ...Africa, Atlantic Ocean-general, Tags, Tuna, Mackerel, Albacore..., ...5.0064

BERING SEA KING CRAB STUDIES ...Bering Sea. Commercial Fishing, Crabs, Environmental Ecology, ...5.0341

ADULT SALMON BEHAVIOR STUDIES IN RIVERS AND AT DAMS %SONIC TRACKING40 ...Columbia River, Construction Land Use Effects, Pre-impoundment Sites, Salmon & Trout - Non-specific, Telemetry, ...5.0169

EFFECT OF SUPERSATURATION OF DISSOLVED NITROGEN ON MIGRATING SALMONIDS ...Aquatic Ecology, Columbia River, Gases, Dissolved -water, Mortality Rates, Nitrogen, Salmon & Trout - Non-specific, ...5.0221

FISH TRANSPORTATION ...Aquatic Ecology, Management -other, Salmon & Trout - Non-specific, Streams, Tags, ...8.0013

FISH BEHAVIOR AND PHYSIOLOGY ...Behavior, Engineering Structures-general, Environmental Physiology, Salmon & Trout - Non-specific, Thermal Pollution, ...5.0331

FISHWAY RESEARCH (BONNEVILLE LABORATORY) ...Behavioral Ecology, Engineering Structures-general, Environmental Ecology, Management -other, Salmon & Trout - Non-specific, ...8.0016

PROTECTION OF FINGERLING SALMON IN TURBINES ...Construction Land Use Effects, Engineering Structures-general, Mortality Rates, Salmon & Trout - Non-specific, Snake River, ...8.0014

RECONNAISSANCE ECOLOGIC SURVEY OF THE CONTINENTAL SHELF AND UPPER SLOPE (GULF OCEANOGRAPHY PROGRAM) ...Behavioral Ecology, Biology, Continental Shelf, Environmental Ecology, Population Dynamics, Shrimps - Common, ...5.0502

AERIAL SEA SURFACE TEMPERATURE SURVEYS OF U.S. COASTAL WATERS ...Aircraft, Infrared Radiation, Productivity - Food Chain, Temperature, Water Temperature-non-specific, ...4.0148

### Population Dynamics

POPULATION STUDIES OF HAUSTORIIDAE AND GAMMARIDAE FROM NEW ENGLAND AND ON FAUNAL AND EPIFAUNAL MARINE AMPHIPODS AT ENIWETOK ...Atolls, Habitat Studies, Micronesia, Shrimp - Amphipods, ...5.0466

RELATIONSHIPS AMONG POPULATIONS OF LIMNORIA TRIPUNCTATA ...Animal Taxonomy, Isopods, Reproductive System, ...5.0477

PRODUCTIVITY OF OCEANIC POPULATIONS OF VERTICALLY MIGRATING ANIMALS ...Migration, Plankton (non-specific), Productivity (agricultural), Vertical Distribution, ...5.1019

DEVELOPMENT AND EVALUATION OF A NEW TECHNIQUE FOR SAMPLING ZOOPLANKTON ...Organism Sampling Devices, Productivity - Food Chain, Technique Development, Vertical Distribution, Zooplankton, ...5.0786

SIMULATION STUDIES OF ECOLOGICAL COMMUNITIES ...Mortality Rates, Number Or Density, Predation, Productivity - Food Chain, ...5.0862

REPRODUCTIVE RELATIONSHIPS AMONG POPULATIONS OF A MARINE WOOD-BORING ISOPOD ...Animal Taxonomy, Invertebrate Anatomy, Isopods, Reproductive System, ...5.0414

MICROZOOPLANKTERS IN THE MARINE FOOD CHAIN ...Organism Sampling Devices, Productivity - Food Chain, Vertical Distribution, Zooplankton, ...5.0748

POPULATION DYNAMICS OF ANTARCTIC SEALS ...Aerial Photography, Antarctica, Migration, Seals, ...5.0634

PELAGIC SHARKS OFF SOUTHERN CALIFORNIA ...Environmental Ecology, Pacific Ocean-east, Sharks, Vertical Distribution, ...5.0196

ECOLOGY OF MARINE BIVALVE MOLLUSCAN LARVAE ...Behavioral Ecology, Clams, Fouling, Productivity - Food Chain, Vertical Distribution, ...5.0370

BIOMETRY ...Marine Biology, Navigation, Statistics-general, Temporal Distribution, ...4.0019

ARCTIC PLANKTON ECOLOGY ...Acoustical, Arctic, Marine Biology (non-specific), Oceanic Fronts, Plankton (non-specific), ...1.0017

DEEP SEA BENTHOS IN THE GULF OF MEXICO ...Benthic Fauna, Benthonic-bottom, Biology, Gulf of Mexico, ...5.0655

GULF OF CALIFORNIA BIOLOGY ...Arid and Desert, Bioluminescence, Gulf of California, Intertidal Areas, Tropic, ...5.0856

INTERACTIONS OF INTERTIDAL POPULATIONS ...Competition, Habitat Studies, Intertidal Areas, Predation, ...5.0864

BIOLOGIC SOUND SCATTERING ...Acoustical, Reverberation, Scattering, Vertical Distribution, Zooplankton, ...1.0060

MARINE BIOLOGY OF RED SEA AND EASTERN MEDITERRANEAN ...Benthic Flora, Mapping, Red Sea, ...5.0891

ECOLOGICAL INVESTIGATIONS OF SOME COMMON MARINE FISHES OFF THE MEDITERRANEAN COAST OF ISRAEL ...Fish-non-specific, Mediterranean Sea-general, Productivity - Food Chain, Range Or Territorial Distr., ...5.0089

EFFECTS OF PESTICIDES ON ESTUARINE PRODUCTIVITY ...Aquatic Ecology, Estuaries, Mans Activities, Persistence of Residues, Pesticides-non-specific, Pollution - Effects of, Standing Crops, ...5.0880

SEA OTTER ...Alaska, Metamorphosis, Range Or Territorial Distr., Sea Lions, Fur Seals, Stocking of Mammals, ...5.0528

WALRUS BIOLOGY AND POPULATION ...Behavioral Ecology, Censusing, Migration, Reproduction Studies (general), Seals, ...5.0523

POPULATION STUDIES OF ANADROMOUS FISH - UPPER COOK INLET DRAINAGES ...Alaska, Captive Rearing, Censusing, Salmon-coho,chinook,sockeye..., Streams, ...5.0020

CHEMICAL AND PHYSICAL DATA ...Fish-non-specific, Temperature, Turbidity & Suspended Matter, Water Movement,

## Ecology (animal)

## SUBJECT INDEX

- Currents,, Water Salinity, Water Temperature-non-specific, ...5.0207
- INVESTIGATION OF ANADROMOUS DOLLY VARDEN POPULATIONS IN HOOD BAY DRAINAGES, SOUTHEASTERN ALASKA ...Alaska, Lake Trout, Brook Trout, Migration, Streams, ...5.0013
- TRAMMEL NET SAMPLING IN ESTUARINE AREAS ...Competition, Estuaries, Fish -non-specific, Lakes, Nets, ...5.0096
- FISH POPULATIONS IN THE CHENA RIVER ...Alaska, Pikes, Pickeral, Muskellunge, Salmon & Trout - Non-specific, Streams, ...5.0029
- HAIR SEALS ...Age, Dispersion -other, Metamorphosis, Seals, Spawning & Nesting Sites, ...5.0525
- SPORTFISH YIELD OF NATURAL REEFS ...Bays, California, Fishery Development -other, Habitat Studies, ...5.0199
- ESTIMATION OF PARAMETERS OF STRIPED BASS POPULATION AND DESCRIPTION OF THE FISHERY OF LOWER CHESAPEAKE BAY ...Age, Basses -sea,white, White Perch, Censusing, Chesapeake Bay, Fishing Gear, ...5.0151
- STUDY ON THE DISTRIBUTION AND ABUNDANCE OF PINK SHRIMP, PANDALUS JORDANI, IN THE PACIFIC OCEAN OFF OREGON ...Censusing, Fishing Gear, Life History Studies, Pacific Ocean-general, Shrimps - Common, ...5.0487
- IDENTIFICATION OF WINTER FLOUNDER SUBPOPULATIONS ...Commercial Fishing, Legislation, Nets, Righteye Flounders, Tags, ...5.0100
- KVICHAK RIVER TOTAL SMOLT ...Alaska, Censusing, Fish -non-specific, Migration, Mortality Rates, Nets, ...5.0002
- SEA SURVEY INVESTIGATIONS ...California Current, Fish -non-specific, Survey Studies, Vertical Distribution, ...4.0117
- KING CRAB SAMPLING GEAR STUDY ...Alaska, Censusing, Crabs, Fishing Gear, Spawning & Nesting Sites, ...8.0113
- DUNGENESS CRAB POPULATION DYNAMICS STUDY ...Alaska, Crabs, Life History Studies, Tags, ...5.0346
- ARCTIC-YUKON-KUSKOKWIM AREA ANADROMOUS FISH INVESTIGATIONS ...Alaska, Commercial Fishing, Life History Studies, Salmon & Trout - Non-specific, Salmon -coho,chinook,sockeye..., ...5.0024
- MEASUREMENT OF BIOLOGICAL FACTORS OF VARIOUS HABITATS, AND THEIR RELATION TO THE BIOLOGY OF THE COMMERCIALY IMPORTANT SPECIES ...Chemical Measurements -water, Habitat Studies, Physical Measurements -water, Plankton (non-specific), Productivity - Food Chain, ...5.0219
- LIFE-HISTORY AND BIOLOGICAL WORK IN THE RESTORATION AND MANAGEMENT OD SPECIES OF IMPORTANCE TO THE FISHERIES OF THE VIRGIN ISLANDS ...Commercial Fishing, Diving and Scuba, Life History Studies, Management -other, Virgin Islands, ...5.0149
- COPPER RIVER SOCKEYE SALMON INVESTIGATIONS ...Alaska, Aquatic Ecology, Biological Rhythms, Migration, Salmon -coho,chinook,sockeye..., Stocking of Fish & Shellfish, ...5.0025
- TAG RECOVERY, ENGLISH SOLE, PETRALE SOLE, AND PACIFIC COD ...Codfishes, Hake, Migration, Righteye Flounders, Tags, Washington, ...5.0159
- POPULATION STRUCTURE OF THE LOBSTER ...Commercial Fishing, Diving and Scuba, Lobsters, Long Island Sound, Size, ...5.0688
- TAGGING PROGRAM ...Lobsters, Long Island Sound, Number Or Density, Tags, Temporal Distribution, ...5.0372
- LAKE BORGNO - CHANDELEUR SOUND SYSTEM ...Data Acquisition, Gulf of Mexico, Maturity & Growth Stages, Nets, Plankton Sampling, Shrimps - Common, ...5.0434
- BIOLOGICAL AND CHEMICAL STUDY OF VIRGINIA'S ESTUARIES ...Estuaries, Nitrogen, Phosphorus, Phytoplankton, Primary Productivity, Virginia, ...1.0158
- STUDIES OF SOCKEYE SALMON, ONCORHYNCHUS NERKA, IN THE NUSHAGAK DISTRICT, ALASKA ...Alaska, Commercial Fishing, Interbiotic Relat.(non-specif), Lakes, Salmon -coho,chinook,sockeye..., Spawning & Nesting Sites, ...5.0228
- REPOPULATION OF DECIMATED SECTIONS OF WARM-WATER STREAMS BY LONGEAR SUNFISH, LEPOMIS MEGALOTIS (RAFINESQUE) ...Aquatic Ecology, Stocking of Fish & Shellfish, Streams, Sunfish, Rock & Roanoke Bass..., Warm Water, ...5.0097
- A NON-DESTRUCTIVE METHOD FOR ESTIMATING POPULATION DENSITY AND DISTANCE TO NEAREST NEIGHBOR FOR ESTUARINE MOLLUSCS ...Aquatic Ecology, Estuaries, Mollusks -non-specific & Other, Number Or Density, Range Or Territorial Distr. , ...5.0439
- THE POPULATION ECOLOGY OF GEMMA GEMMA (PELECYPODA, VENERIDAE), A DOMINANT SPECIES IN BARNSTABLE HARBOR, MASS ...Clams, Harbors, Massachusetts, ...5.0460
- MARINE SPORTS FISHES RESEARCH ...Delaware Bay, Fish -other, Killifishes - Cyprinodon, Water Salinity, Water Temperature-non-specific, ...5.0248
- ECOLOGY OF COMMERCIAL FISH SPECIES IN NORTHERN LAKE MICHIGAN ...Commercial Fishing, Fish -non-specific, Lake Michigan, Number Or Density, Vertical Distribution, ...5.0112
- INVESTIGATION OF COMMERCIAL FISH POPULATIONS IN WESTERN LAKE SUPERIOR ...Alewife,menhaden,shad,herring, Commercial Fishing, Lake Superior, Lakes, Nets, ...5.0113
- ECOLOGY OF RECREATIONALLY IMPORTANT ESTUARINE FISHES IN OREGON ...Aquatic Ecology, Environmental Ecology, Estuaries, Fishing, Migration, Oregon, ...5.0216
- EFFECTS OF KRAFT PULP MILL EFFLUENTS ON THE GROWTH AND PRODUCTION OF FISH ...Contamination - Water, Industrial Wastes, Pollution - Effects of , Pollution Effects, Pulp, Paper , and Logging, Salmon & Trout - Non-specific, ...5.0311
- POPULATION ESTIMATES OF JUVENILE COHO SALMON IN SIX COASTAL STREAMS ...Environmental Ecology, Maturity & Growth Stages, Salmon -coho,chinook,sockeye..., Streams, ...5.0144
- INFAUNA OF LOWER CHESAPEAKE BAY ...Aquatic Ecology, Chesapeake Bay, Shrimps - Amphipods, Streams, Virginia, ...5.0661
- MOVEMENTS OF SEABIRDS IN THE HUMBOLDT CURRENT ...Aves -other, Biological Rhythms, Humboldt Or Peru Current, Temporal Distribution, ...5.0583
- LIFE HISTORY AND BEHAVIOR OF FISHES ON ARTIFICIAL REEFS ...Behavioral Ecology, Fish -non-specific, Habitat Studies, Life History Studies, ...5.0121
- TRACKING MIGRATIONS OF BLUEFISH POPULATIONS ALONG ATLANTIC COAST TO LEARN BIOLOGY OF THE SPECIES (MIGRATORY HABITS OF BLUEFISH) ...Atlantic Ocean-north, Bluefish, Migration, Tags, ...5.0120
- TAGGING PROGRAM WITH WOODS HOLE AND INTERNATIONAL GAME FISH ASSOCIATION FOR MARLIN, SAILFISH AND OTHER GAME SPECIES MIGRATION STUDIES ...Marlin, Billfishes, Sailfish..., Migration, Pacific Ocean-general, Tags, ...5.0036
- AGE AND GROWTH OF BLUEFISH ...Age, Atlantic Ocean-north, Bluefish, Growth Rate, Scales, ...5.0287
- SURF CLAM POPULATION DYNAMICS ...Age, Clams, Commercial Fishing, Continental Shelf, Size, ...5.0448
- FISH POPULATION STUDY ...Chemical Measurements -water, Commercial Fishing, Fish -non-specific, Food Supply, Water Temperature-non-specific, ...5.0174
- ZOOPLANKTON OF THE GULF OF MAINE ...Atlantic Ocean-north, Plankton Sampling, Vertical Distribution, Zooplankton, ...5.0789
- BIostatistics OF HERRING ...Age, Alewife,menhaden,shad,herring, Atlantic Ocean-north, Environmental Ecology, Growth Rate, Proprioceptors, ...5.0099
- EFFECT OF ENVIRONMENTAL CHANGES ON BLUE CRAB ABUNDANCE ...Crabs, Environmental Ecology, Life History Studies, Migration, Number Or Density, ...5.0473
- INVESTIGATION OF THE BIOLOGY AND POPULATION STRUCTURE OF GULF MENHADEN ...Alewife,menhaden,shad,herring, Bone, Gulf of Mexico, Handbooks, Vertebrate Anatomy, ...5.0128
- POPULATION STUDIES ...Alewife,menhaden,shad,herring, Animal Distr. (non-specific), Animal Taxonomy, Environmental Ecology, ...5.0130
- TAGGING ...Alewife,menhaden,shad,herring, Migration, Tags, Telemetry, Vertebrate Anatomy, ...5.0127
- KARLUK LAKE RESEARCH STATION ...Life History Studies, Mortality Rates, Productivity (agricultural), Salmon -coho,chinook,sockeye..., Spawning & Nesting Sites, ...5.0006
- GULF-PENINSULA KING CRAB STUDIES ...Commercial Fishing, Crabs, Gulf of Alaska, Habitat Studies, ...5.0342
- GULF OF ALASKA DEMERSAL FISH INVESTIGATIONS ...Fish -non-specific, Gulf of Alaska, Productivity (agricultural), Vertical Distribution, ...5.0009

## SUBJECT INDEX

## Ecology (animal)

MARINE BIOLOGICAL INVESTIGATIONS - NEKTON OF INSIDE WATERS OF SOUTHEASTERN ALASKA ...Alaska, Plankton Sampling, Temporal Distribution, Zooplankton, ...5.0521

FUR SEAL RESEARCH, POPULATION DYNAMICS ...Age, Growth Rate, Life History Studies, Mark, Tag Or Capture - other, Seals, ...5.0671

POPULATION DYNAMICS OF NEW ENGLAND GROUND-FISH ...Atlantic Ocean-north, Codfishes, Hake, Lefteye Flounders, Rockfish, Scoraionfish, ...5.0103

POPULATION STRUCTURE OF THE ALEWIFE AND COREGONIDS ...Alewife,menhaden,shad,herring, Aquatic Ecology, Cisco, Lake Herring, Environmental Ecology, Lake Michigan, ...5.0106

LAKE ERIE INVESTIGATIONS - LIFE HISTORY AND ABUNDANCE OF THE YELLOW PERC ...Commercial Fishing, Environmental Ecology, Life History Studies, Nets, Yellow Perch, Darters, ...5.0134

SEA LAMPREY AMMOCETE REESTABLISHMENT STUDIES ...Aquatic Ecology, Control of Nuisance Species, Great Lakes-general, Lampreys, Larvicides, Life History Studies, ...5.0629

ELECTRIC BARRIER OPERATIONS ...Control of Nuisance Species, Lake Michigan, Lake Superior, Lampreys, Migration, ...5.0630

POPULATION DYNAMICS OF ATLANTIC TUNAS ...Atlantic Ocean-general, Censusing, Commercial Fishing, Tuna, Mackerel, Albacore... , ...5.0065

GREAT LAKES GEAR RESEARCH ...Commercial Fishing, Fish -non-specific, Fishing Gear, Great Lakes-general, Lakes, ...8.0136

DISTRIBUTION AND ABUNDANCE OF ZOOPLANKTON IN LAKE ERIE ...Aquatic Ecology, Computer Applications, Environmental Ecology, Interbiotic Relat.(non-specif), Lake Erie, ...5.0802

SHELLFISH EXPLORATIONS ...Benthic Fauna, Clams, Commercial Fishing, Mark, Tag Or Capture -other, ...5.0514

SEA CLAM EXPLORATIONS ...Animal Distr. (non-specific), Atlantic Ocean-north, Clams, Commercial Fishing, ...5.0456

STUDIES OF THE BENTHIC INVERTEBRATES OF THE ATLANTIC CONTINENTAL SHELF ...Atlantic Ocean-north, Benthic Fauna, Continental Shelf, Productivity - Food Chain, ...5.0623

LOBSTER RESEARCH ...Commercial Fishing, Environmental Ecology, Habitat Studies, Lobsters, ...5.0436

MARINE BIOLOGICAL INVESTIGATIONS STUDIES PROJECT (FISHES) ...Alaska, Aquatic Ecology, Bays, Fish -non-specific, ...5.0011

ESTUARINE ECOSYSTEMS ...Aquatic Ecology, Estuaries, Pesticides, Pollution - Effects of, Pollution Effects, ...5.0883

FISH POPULATION STUDY ...Analog Computer Applications, Environmental Ecology, Fish -other, Killifishes - Cyprinodon, Tilapia, Cichlids, ...5.0175

POPULATION DYNAMICS (BIOMETRICS) OF EXPLOITED FISH GROUPS OF THE NORTH PACIFIC OCEAN AND PACIFIC COAST ...Marine Biology, Meteorological Studies, Model Studies, Number Or Density, Pacific Ocean-north, ...5.0167

GREAT LAKES EXPLORATIONS ...Commercial Fishing, Fish -non-specific, Fishing Gear, Great Lakes-general, ...5.0108

PREDICTING COMMERCIAL SHRIMP ABUNDANCE (SHRIMP DYNAMICS PROGRAM) ...Bays, Behavioral Ecology, Commercial Fishing, Environmental Ecology, Shrimps - Common, ...5.0499

EXPERIMENTAL SEEDING (SHRIMP AQUACULTURE PROGRAM) ...Captive Rearing, Florida, Shrimps - Common, Spawning & Nesting Sites, Stocking of Fish & Shellfish, ...5.0501

RECONNAISSANCE ECOLOGIC SURVEY OF THE CONTINENTAL SHELF AND UPPER SLOPE (GULF OCEANOGRAPHY PROGRAM) ...Behavioral Ecology, Biology, Continental Shelf, Environmental Ecology, Migration, Shrimps - Common, ...5.0502

POPULATION DYNAMICS (SHRIMP DYNAMICS PROGRAM) ...Commercial Fishing, Gulf of Mexico, Mortality Rates, Nets, Shrimps - Common, ...5.0503

INVESTIGATE TUNA SUBPOPULATIONS THROUGH THE USE OF BLOOD GROUPS AND INHERITED PROTEINS ...Blood Proteins -non-specific, Blood Typing Studies, Pacific Ocean-general, Tuna, Mackerel, Albacore... , ...5.0076

DEVELOP TECHNIQUES FOR CAPTURING JUVENILE TUNAS ...Blood Typing Studies, Nets, Tuna, Mackerel, Albacore... , Vertical Distribution, ...5.0078

INVESTIGATE POPULATION DYNAMICS OF ALBACORE ...American Samoa, Commercial Fishing, Tuna, Mackerel, Albacore... , Water Environment -other, ...5.0081

ASSESSMENT OF CENTRAL PACIFIC TUNA RESOURCES ...Commercial Fishing, Pacific Ocean-general, Size, Tuna, Mackerel, Albacore... , ...5.0082

INVESTIGATE TUNA RESOURCES OF THE TRUST TERRITORIES ...Caroline Islands, Commercial Fishing, Environmental Ecology, Tuna, Mackerel, Albacore... , ...5.0085

INVESTIGATE POPULATION DYNAMICS OF SKIPJACK TUNA IN HAWAIIAN WATERS ...Commercial Fishing, Economics, Environmental Ecology, Hawaii, Tuna, Mackerel, Albacore... , ...5.0083

FISH POPULATION PARAMETERS ...Age, Biological Rhythms, Life History Studies, Size, ...5.0039

SUBPOPULATIONS ...Anchovies, Commercial Fishing, Pacific Ocean-general, ...5.0042

INTERNATIONAL WEDDELL SEA OCEANOGRAPHIC EXPEDITION ...Organics, Primary Productivity, Productivity - Food Chain, Seals, Weddell Sea, ...4.0121

PHYSIOLOGICAL VARIATION AND ECOLOGY OF MOLLUSCS ...Energy Budgets, Gastropods -slugs,conch,snails, Metabolism, Reproductive System, Respiratory System, ...5.0472

### Productivity - Food Chain

A NEW APPROACH TO NUTRITION, PHYSIOLOGY, AND MINERAL CYCLING OF FORAMINIFERA ...Axenic Culture, Foraminifera, Invertebrate Nutrition, Metabolism, ...5.0809

FIELD EXPERIMENTS ON THE FLUX OF RADIONUCLIDES THROUGH A SALT MARSH ECOSYSTEM ...Chlorideae (non-specific & Ot), Georgia, Model Studies, Swamps-marshes, Water Cycle, ...5.0965

MICROBIOLOGICAL ASSAYS OF SEAWATER USING RADIOISOTOPES ...Aquatic Ecology, Ciliates, Environmental Ecology, Environmental Physiology, Food Chains, Phytoplankton, Thiamine, ...5.0811

BIOLOGY AND CHEMISTRY OF MARINE PLANKTON POPULATIONS ...Buoys, Chlorophyll, Phytoplankton, Vertical Distribution, Zooplankton, ...5.0798

THE BIOLOGY AND CHEMISTRY OF TRACE ELEMENTS IN MARINE AND ESTUARINE WATERS ...Chesapeake Bay, Estuaries, Phytoplankton, Trace Element Analysis, Zooplankton, ...5.0975

BIOLOGICAL PRODUCTIVITY IN THE SARGASSO SEA, THE GULF STREAM AND IN THE ATLANTIC COASTAL WATERS OFF CAPE HATTERAS ...Continental Shelf, Phytoplankton, Primary Productivity, Proteins, ...5.1005

SEASONAL DISTRIBUTION AND ABUNDANCE OF DEMERSAL FISH AND INVERTEBRATES IN THE MARINE WATERS ADJACENT TO THE MOUTH OF THE COLUMBIA RIVER ...Benthic Fauna, Number Or Density, Radioactivity-general, Temporal Distribution, Vertical Distribution, ...5.0930

UPTAKE AND ASSIMILATION OF ORGANIC COMPOUNDS IN MARINE ORGANISMS ...Active Transport, Invertebrates -non-specific, Metabolism, Nutrition, Organics, ...5.0937

DISTRIBUTION AND BIOLOGY OF PACIFIC ZOOPLANKTON ...Animal Taxonomy, Pacific Ocean-general, Range Or Territorial Distr. , Vertical Distribution, Zooplankton, ...5.0745

ECOLOGICAL AND EVOLUTIONARY IMPLICATIONS OF THE ECOTYPES OF ESTUARINE CRUSTACEA ...Classical, Estuaries, Invertebrate Anatomy, Isopods, Metabolism, ...5.0418

ECOLOGY OF THE PORITES FURCATA REEF-FLAT COMMUNITY ...Anthozoa, Panama, Puerto Rico, Reefs, ...5.0867

DEVELOPMENT AND EVALUATION OF A NEW TECHNIQUE FOR SAMPLING ZOOPLANKTON ...Organism Sampling Devices, Population Dynamics, Technique Development, Vertical Distribution, Zooplankton, ...5.0786

SIMULATION STUDIES OF ECOLOGICAL COMMUNITIES ...Mortality Rates, Number Or Density, Population Dynamics, Predation, ...5.0862

EXPERIMENTAL STUDIES ON THE BIOLOGY AND FOOD CHAIN ECONOMICS OF THE CHAETOGNATHS ...Energy Budgets, Reproductive System, Whole Body Culture & Rearing, Zooplankton, ...5.0777

STANFORD BIOLOGICAL OCEANOGRAPHY ...Marine Biology, Phytoplankton, Primary Productivity, Ships and Cruises, Training Grants, Fellowships, Zooplankton, ...11.0005

## Ecology (animal)

## SUBJECT INDEX

- DIVERSITY, COMMUNITY STRUCTURE AND TROPHIC RELATIONS OF TROPICAL ZOOPLANKTON ...Bays, Inter-biotic Relat.(non,specif), Tropic, Zooplankton, ...5.0785
- THE INFLUENCE OF DEPOSIT FEEDING BENTHOS ON THE STABILITY OF BOTTOM SEDIMENTS AND COMMUNITY TROPHIC STRUCTURE ...Benthic Fauna, Benthonic-bottom, Massachusetts, Suspension, ...5.0559
- METABOLISM OF MARINE ECOSYSTEMS ...Energy Budgets, Food Webs, Metabolism, Other, Plankton (non-specific), ...5.0966
- THE ROLE OF COPROPHAGY IN MARINE FOOD CHAINS ...Feces, Invertebrate Nutrition, Nutrition -other, ...5.0963
- MICROZOOPLANKTERS IN THE MARINE FOOD CHAIN ...Organism Sampling Devices, Population Dynamics, Vertical Distribution, Zooplankton, ...5.0748
- BIOLOGICAL COLONIZATION OF A RECENTLY FORMED ISLAND ...Habitat Studies, Iceland, Islands, Succession, Volcanoes, ...5.0925
- OPTIMUM ECOLOGICAL DESIGNS FOR ESTUARINE SYSTEMS OF NORTH CAROLINA ...Domestic Wastes-general, Estuaries, Marine Biology (non-specific), North Carolina, Pollution - Effects of, Pollution Effects, ...5.0913
- LIPID COMPOSITION OF ANTARCTIC MARINE ORGANISMS AND SEA WATER ...Antarctic Ocean, Fish -non-specific, Gulf of Mexico, Lipids, Low Temp. -but Above 32f, Phytoplankton, Zooplankton, ...5.1031
- THE EFFECTS OF SEAL AND FISH PREDATION ON CERTAIN ANTARCTIC BENTHIC COMMUNITIES ...Antarctica, Benthic Organisms (non-specif), Biology, Fish -non-specific, Predation, Seals, ...5.1039
- BENTHIC COMMUNITIES ...Behavioral Ecology, Benthic Fauna, Bottom Sampling Device, Developmental Physiology, Fouling, Metabolism, ...5.0561
- ECOLOGY OF MARINE BIVALVE MOLLUSCAN LARVAE ...Behavioral Ecology, Clams, Fouling, Population Dynamics, Vertical Distribution, ...5.0370
- DRIFT-STATION BIOLOGY ...Alaska, Animal Taxonomy, Arctic Ocean, Oceanic Fronts, Sea Ice, ...5.0743
- ECOLOGICAL INVESTIGATIONS OF SOME COMMON MARINE FISHES OFF THE MEDITERRANEAN COAST OF ISRAEL ...Fish -non-specific, Mediterranean Sea-general, Population Dynamics, Range Or Territorial Distr. , ...5.0089
- MEASUREMENT OF BIOLOGICAL FACTORS OF VARIOUS HABITATS, AND THEIR RELATION TO THE BIOLOGY OF THE COMMERCIALY IMPORTANT SPECIES ...Chemical Measurements -water, Habitat Studies, Physical Measurements -water, Plankton (non-specific), Population Dynamics, ...5.0219
- PRODUCTIVITY STUDIES IN NORTH CAROLINA SALT MARSHES ...Aerial Photography, Mapping, North Carolina, Primary Productivity, Swamps-marshes, Tidewater Areas, ...5.1017
- MARINE WASTE DISPOSAL AND SEA URCHIN ECOLOGY ...California, Pollution Effects, Sea Urchins & Other Echinoderm, Sewage, ...5.0551
- BIONOMICS OF FISHES AND SHELLFISHES ...Aquaculture & Fish-farming, Bays, Economics-general, Environmental Ecology, Oregon, ...5.0920
- PLANKTON ECOLOGY OF BAR-BUILT ESTUARIES ...Estuaries, North Carolina, Phytoplankton, Primary Productivity, Zooplankton, ...5.0816
- ECOLOGY OF SABELLARIID REEFS IN DELAWARE BAY ...Aquatic Ecology, Delaware Bay, Environmental Ecology, Lugworms, Marine Segmentedworm, Vertical Distribution, ...5.0871
- ECOLOGY OF MARSH FORAMINIFERA ...Foraminifera, Lagoons, Rate of Deposition, Swamps-marshes, ...5.0747
- PRIMARY PRODUCTIVITY IN PUERTO GALERA BAY, MINDORO, PHILIPPINES ...Bays, Philippines, Primary Productivity, ...5.1025
- MARINE BIOLOGY PROGRAM ...Distribution, Puerto Rico, Radioecology, Rare Earths, Trace Elements, ...1.0128
- BIOCHEMICAL AND BIOPHYSICAL STUDIES OF THE MARINE ENVIRONMENT ...Copepods, Energy, Energy Budgets, Organics, ...5.0767
- ECOLOGY OF PANAMANIAN REEF COMMUNITIES ...Behavioral Ecology, Invertebrates -non-specific, Panama, Reefs, Tropic, ...5.0866
- CORAL ATOLL ECOLOGY ...Anthozoa, Atolls, Bibliography, Data Analysis - General, ...5.0872

- PHYSIOLOGY AND ECOLOGY OF THE ADRIATIC BENTHOS ...Adriatic Sea, Benthic Organisms (non-specif), Marine Biology (non-specific), Metabolism, Microclimate-general, ...5.0873
- SAND DOLLAR COMMUNITIES ...Beaches, California, Habitat Studies, Sea Urchins & Other Echinoderm, ...5.0533
- ECOLOGY AND DISTRIBUTION OF OYSTERS AND CLAMS ...Animal Distr. (non-specific), Clams, Oysters, Ponds, ...5.0446
- SEDIMENT MINERALOGY (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Adsorption, Chemistry, Food Webs, Radioactivity, Radioactivity-general, ...7.0077
- PHYSIOLOGY AND BEHAVIOR ...Behavior, Chemical Measurements -water, Environmental Physiology, Lake Michigan, Physical Measurements -water, ...5.0904
- CHEMICAL CHARACTERISTICS OF THE GREAT LAKES ...Chemical Analysis (water), Great Lakes-general, Nutrients, Water Quality-general, ...1.0116
- FEEDING HABITS OF ATLANTIC TUNAS AND NEKTON ECOLOGY ...Atlantic Ocean-general, Food Supply, Plankton (non-specific), Tuna, Mackerel, Albacore... , ...5.0204
- RELATION OF ENVIRONMENTAL FACTORS TO THE PRODUCTIVITY OF ESTUARINE SEDENTARY FAUNA ...Aquatic Ecology, Environmental Ecology, Estuaries, Florida, ...5.0959
- MECHANISMS OF PESTICIDE ACCUMULATION IN AQUATIC ORGANISMS ...Chlorinated Hydrocarbons, Food Chains, Animal And/or Man, Insecticides -non-specific, Pollution Effects, ...6.0155
- STUDIES OF THE BENTHIC INVERTEBRATES OF THE ATLANTIC CONTINENTAL SHELF ...Atlantic Ocean-north, Benthic Fauna, Continental Shelf, Population Dynamics, ...5.0623
- BIOLOGICAL OCEANOGRAPHY (GULF OCEANOGRAPHY PROGRAM) ...Environmental Ecology, Food Supply, Gulf of Mexico, Shrimps - Common, ...5.0838
- PRIMARY PRODUCTIVITY ...Marine Plants, Primary Productivity, Standing Crops, ...5.0955
- DESCRIPTIVE PHYSICAL OCEANOGRAPHY OF THE EASTERN TROPICAL ATLANTIC ...Atlantic Ocean-general, Environmental Ecology, Fish -non-specific, Tropic, ...4.0127
- PRODUCTIVITY MEASURES ...Number Or Density, Ocean Currents-other, Organism Sampling Devices, Pacific Ocean-east, Primary Productivity, Zooplankton, ...5.0940
- INTERNATIONAL WEDDELL SEA OCEANOGRAPHIC EXPEDITION ...Organics, Population Dynamics, Primary Productivity, Seals, Weddell Sea, ...4.0121
- AERIAL SEA SURFACE TEMPERATURE SURVEYS OF U.S. COASTAL WATERS ...Aircraft, Infrared Radiation, Migration, Temperature, Water Temperature-non-specific, ...4.0148
- ENERGY TRANSFER IN LOWER MARINE TROPHIC LEVELS ...Aquatic Ecology, Energy Budgets, Environmental Ecology, Vertical Distribution, ...5.1020

### Succession

- BIOLOGICAL RESEARCH ON THE VOLCANIC ISLAND SURTSEY AND ENVIRON ...Iceland, Migration, Volcanoes, ...5.0889
- BIOLOGICAL COLONIZATION OF A RECENTLY FORMED ISLAND ...Habitat Studies, Iceland, Islands, Productivity - Food Chain, Volcanoes, ...5.0925
- ECOLOGICAL SUCCESSION ON SURTSEY ...Fouling, Iceland, Plant Succession, Volcanoes, ...5.0890
- SUCCESSION, SPACIAL AND TEMPORAL DISTRIBUTION, AND BIOLOGY OF BENTHIC ORGANISMS ...Benthic Fauna, Benthic Flora, Temporal Distribution, ...5.0638

### Terrestrial Ecology

- ECOLOGY OF STORM PETRELS ...Albatrosses, Shearwaters... , California, Islands, Mark, Tag Or Capture -other, Spawning & Nesting Sites, ...5.0532

### Ecology (plant)

#### Applied Ecology

- AN ECOLOGICAL STUDY OF SOUTH BISCAYNE BAY IN THE VICINITY OF TURKEY POINT ...Balance of Nature, Bays, Electric Power Plants, Environmental Ecology, Florida, Phytoplankton, Thermal Pollution, ...5.0877

## SUBJECT INDEX

## Ecology (plant)

RESTORATION, PROPAGATION, AND MANAGEMENT OF MARINE ALGAE ...Growth and Differentiation, Habitat Studies, Laminariaceae (non-specif.&ot), Marine Plants, Pacific Ocean-east, ...5.0680

### Aquatic Plant Group

#### Aquatic Plants (non-specific)

QUANTITATIVE AND QUALITATIVE MEASUREMENT OF AQUATIC VEGETATION-CURRITUCK SOUND ...Estuaries, Range Or Territorial Distr. , Saline Water Intrusion, Salinity, Vertical Distribution, ...5.0717

#### Lower Plants

DISSOLVED ORGANIC PHOSPHORUS IN NATURAL WATERS ...Phosphorus, Phytoplankton, Water Analysis, ...1.0123

#### Submerged Plants

ECOLOGICAL STUDIES OF THE SOUTHEASTERN FLORIDA SEA GRASS COMMUNITY - PRIMARY PRODUCTION BY THALASSIA TESTUDINUM KONIG ...Elodea, Waterweed, Thalassia, Florida, Primary Productivity, Translocation, Tropic, ...5.0695

### Balance of Nature

AN ECOLOGICAL STUDY OF SOUTH BISCAYNE BAY IN THE VICINITY OF TURKEY POINT ...Applied Ecology, Bays, Electric Power Plants, Environmental Ecology, Florida, Phytoplankton, Thermal Pollution, ...5.0877

### Biomes

#### Rain Forests

SUPPORT FOR THE PHYSIOLOGICAL RESEARCH SHIP, R/V ALPHA HELIX ...Insecticides -non-specific, Mycorrhiza, Nerve Effects, Regulation, Tropic, ...12.0011

### Distribution

#### Plant Distr. (non-specific)

MARINE BACTERIAL ENZYMES ...Cell. env.(non-specific & Ot.), Growth (non-specific & Ot.), Isolation From Nat. environ. , Marine Bacteria, Proteolytic Enzymes, ...5.0824

#### Range Or Territorial Distr.

MICROBIAL ACTIVITY IN NON AQUEOUS SYSTEMS ...Growth Rate, ...5.0782

SYSTEMATICS, MORPHOLOGY, AND ECOLOGICAL DISTRIBUTION OF ALGO AND WOOD-INHABITING MARINE AND FRESHWATER FUNGI OF SURTSEY AND ICELAND ...Aquatic Fungi (non-specific), Iceland, Islands, Marine Fungi (non-specific), Plant Taxonomy, ...5.0714

TAXONOMY OF CALCAREOUS GREEN ALGAE ...Chlorophyceae (non-specif.&ot), Indian Ocean-general, Plant Morphology, Plant Taxonomy, Reproductive Physiology, ...5.0718

ECOLOGY OF PHYTOPLANKTON IN SEMI-TROPICAL ENVIRONMENTS ...Caribbean Sea, Phytoplankton, Sub - Tropic, Temporal Distribution, Vertical Distribution, .. 5.0778

LANGMUIR CIRCULATION AND PLANKTON ECOLOGY ...Circulation-general, Phytoplankton, Vertical Distribution, Water Movement, Currents,, Wind Or Air Movement, Zooplankton, ...5.0794

STUDIES OF THE PHAEOPHYCEAN ORDERS CHORDARIALES AND PUNCTARIALES ...Algal Culture, Atlantic Ocean-north, Phaeophyta (non-specific & Ot), Temporal Distribution, ...5.0715

SYSTEMATICS AND ECOLOGY OF SUBTIDAL BENTHIC MARINE ALGAE ...Algae- General, Benthic Flora, Benthonic-bottom, Habitat Studies, Marine Plants, Plant Taxonomy, ...5.0701

MARINE SULFUR OXIDIZING BACTERIA ...Habitat Studies, Ions (inorganic), Isolation From Nat. environ. , Marine Bacteria, Thiobacillus, ...5.0758

LACUSTRINE AND ESTUARINE FUNGI ...Aquatic Fungi (non-specific), Host-parasite Interactions, Marine Fungi (non-specific), Phytoplankton, Plant Morphology, Plant Taxonomy, ...5.0731

BIOLOGY AND PALEONTOLOGY OF MARINE DINOFLAGELLATES AND HYSTRICHOSPHERES ...Algae-Dinoflagellates, Algal Culture, Cell Cycle, Plant Developmental Biology, Spores, Vertical Distribution, ...5.0799

DISTRIBUTION OF ANTARCTIC MARINE FUNGI ...Antarctica, Marine Fungi (non-specific), Phycomycetes, Plant Taxonomy, Ships and Cruises, Vertical Distribution, ...5.0694

PREDICTION OF BIOLOGICAL POPULATIONS FROM THE PHYSICAL OCEANIC ENVIRONMENT ...Marine Environments-general, Phytoplankton, Ships and Cruises, Temporal Distribution, Vertical Distribution, ...5.0844

AEGEAN SEA BIOLOGY ...Aegean Sea, Benthic Organisms (non-specif), Currents-longshore, Plankton (non-specific), Temporal Distribution, ...5.0387

BIOGRAPHIC STUDY OF THE BENTHOS OF PUERTO RICO AND THE VIRGIN ISLANDS ...Benthic Fauna, Benthic Flora, Benthonic-bottom, Currents-ocean, Temperature, Vertical Distribution, ...5.0652

QUANTITATIVE AND QUALITATIVE MEASUREMENT OF AQUATIC VEGETATION-CURRITUCK SOUND ...Aquatic Plants (non-specific), Estuaries, Saline Water Intrusion, Salinity, Vertical Distribution, ...5.0717

TAXONOMY AND ECOLOGY OF INSHORE MARINE MICROBIOTA ...Algae- General, Animal Taxonomy, Aquatic Ecology, Plant Taxonomy, Protozoa -other, ...5.0768

DISTRIBUTION OF CL. BOTULINUM E. IN FISH, SHELLFISH AND THE AQUATIC ENVIRONMENT IN OREGON ...Bacterial Culture, Clostridium Botulinum, Oregon, Virulence and Pathogenicity, ...5.0822

CORAL ATOLL FLORA ...Atolls, Floras, Plant Taxonomy, ...5.0692

BIOGEOGRAPHY OF BENTHONIC ORGANISMS ...Benthic Organisms (non-specif), Continental Shelf, Marine Biology (non-specific), Vertical Distribution, ...5.0876

NITRIFICATION BY MARINE MICROORGANISMS ...Autotrophic, Bact. morphology (general), Bacterial Culture, Isolation From Nat. environ. , Marine Bacteria, Nitrogen Bacteria, ...5.0800

STUDIES ON THE PROTISTAN CAUSING MALPEQUE DISEASE ...Invertebrate Pathology, Myxomycetes, Oysters, Pathology, Plant Taxonomy, ...5.0498

### Temporal Distribution

ECOLOGY OF TROPICAL DEEP WATER ALGAE ...Algae-General, Benthic Flora, Diving and Scuba, Plant Succession, Tropic, Vertical Distribution, ...5.0722

ECOLOGY OF PHYTOPLANKTON IN SEMI-TROPICAL ENVIRONMENTS ...Caribbean Sea, Phytoplankton, Range Or Territorial Distr. , Sub - Tropic, Vertical Distribution, ...5.0778

STUDIES OF THE PHAEOPHYCEAN ORDERS CHORDARIALES AND PUNCTARIALES ...Algal Culture, Atlantic Ocean-north, Phaeophyta (non-specific & Ot), Range Or Territorial Distr. , ...5.0715

PREDICTION OF BIOLOGICAL POPULATIONS FROM THE PHYSICAL OCEANIC ENVIRONMENT ...Marine Environments-general, Phytoplankton, Range Or Territorial Distr. , Ships and Cruises, Vertical Distribution, ...5.0844

BIOLOGICAL OCEANOGRAPHY ...Arctic, Organics, Phytoplankton, ...5.1038

AEGEAN SEA BIOLOGY ...Aegean Sea, Benthic Organisms (non-specif), Currents-longshore, Plankton (non-specific), Range Or Territorial Distr. , ...5.0887

SUCCESSION, SPACIAL AND TEMPORAL DISTRIBUTION, AND BIOLOGY OF BENTHIC ORGANISMS ...Benthic Fauna, Benthic Flora, ...5.0638

SEASONAL VARIATIONS OF ALGAL POPULATIONS ...Algae- General, Algal Culture, Nutrition Studies, ...5.0705

### Vertical Distribution

BIOLOGY AND CHEMISTRY OF MARINE PLANKTON POPULATIONS ...Buoys, Chlorophyll, Phytoplankton, Zooplankton, ...5.0798

ECOLOGY OF TROPICAL DEEP WATER ALGAE ...Algae-General, Benthic Flora, Diving and Scuba, Plant Succession, Temporal Distribution, Tropic, ...5.0722

ECOLOGY OF PHYTOPLANKTON IN SEMI-TROPICAL ENVIRONMENTS ...Caribbean Sea, Phytoplankton, Range Or Territorial Distr. , Sub - Tropic, Temporal Distribution, ...5.0778

THE CHARACTERISTICS, MECHANISMS AND BIOGEOCHEMICAL CONSEQUENCES OF PHYTOPLANKTON FLOTATION ...Organics, Phytoplankton, Plant Lipids, Silicon, Size, ...5.0826

RELATIONSHIPS BETWEEN PHYTOPLANKTON AND ZOOPLANKTON IN THE CARIBBEAN SEA ...Caribbean Sea,

## Ecology (plant)

## SUBJECT INDEX

Interbiotic Relat.(non-specif), Phytoplankton, Sargassum, Zooplankton, ...5.0779

**BIOLOGY AND PALEONTOLOGY OF MARINE DINOFLAGELLATES AND HYSTRICHOSPHERES** ...Algae-Dinoflagellates, Algal Culture, Cell Cycle, Plant Developmental Biology, Range Or Territorial Distr., Spores, ...5.0799

**DISTRIBUTION OF ANTARCTIC MARINE FUNGI** ...Antarctica, Marine Fungi (non-specific), Phycomycetes, Plant Taxonomy, Range Or Territorial Distr., Ships and Cruises, ...5.0694

**PREDICTION OF BIOLOGICAL POPULATIONS FROM THE PHYSICAL OCEANIC ENVIRONMENT** ...Marine Environments-general, Phytoplankton, Range Or Territorial Distr., Ships and Cruises, Temporal Distribution, ...5.0844

**QUANTITATIVE AND QUALITATIVE MEASUREMENT OF AQUATIC VEGETATION-CURRITUCK SOUND** ...Aquatic Plants (non-specific), Estuaries, Range Or Territorial Distr., Saline Water Intrusion, Salinity, ...5.0717

**A STUDY OF COLIFORM BACTERIA AND ESCHERICHIA COLI ON POLLUTED AND UNPOLLUTED OYSTER BOTTOMS OF MISSISSIPPI** ...Coliforms (non-specific), Identification, Mississippi River, Sampling, Sewage, ...5.0465

**BIOLOGICAL OCEANOGRAPHY & DETERIORATION - SHALLOW WATER MARINE SEDIMENTS & WATER COLUMN BACTERIA** ...Biology, Continental Shelf, Instrumentation-general, Marine Bacteria, Nephelometry, ...5.0807

**ECOLOGY OF CLOSTRIDIUM BOTULINUM TYPE E IN GREEN BAY** ...Fish -non-specific, Great Lakes-general, Microbiological, ...5.0850

### Ecological Types -other

**ECOLOGICAL STUDIES OF THE MARINE RED ALGA CHONDRUS CRISPUS STACKHOUSE** ...Ag Uses of Nat. resource-other, Algal Culture, Chondrus, Growth and Differentiation, Reproductive Physiology, ...5.0710

**THE OCCURRENCE AND EFFECTS OF PLANKTON IN THE SEA** ...Air-sea Boundary-general, Marine Biology, Plankton (non-specific), ...5.0781

**THE ECOLOGICAL ARCHITECTURES OF THE MARINE BIOSPHERE** ...Marine Biology, Marine Biology (non-specific), ...5.0859

### Ecosystems

#### Plant Ecosystems(non-specific)

**ORGANIC PRODUCTION OF EPIFAUNAL ORGANISMS** ...Energy Budgets, Epiphytic Relationships, Marine Biology (non-specific), Organics, Primary Productivity, Reefs, ...5.1032

#### Plant Succession

**ECOLOGY OF TROPICAL DEEP WATER ALGAE** ...Algae-General, Benthic Flora, Diving and Scuba, Temporal Distribution, Tropic, Vertical Distribution, ...5.0722

**PALEOBOTANICAL RESEARCH AT YALE UNIVERSITY** ...Growth Rate, Isolation From Nat. environ., Marine Bacteria, Plants, Sulfur Bacteria, ...5.0952

**ECOLOGICAL SUCCESSION ON SURTSEY** ...Fouling, Iceland, Succession, Volcanoes, ...5.0890

**BIOCHEMISTRY OF MARINE ORGANISMS** ...Adsorption & Interface, Bioluminescence, Fouling, Phytoplankton, Spectroscopy, ...5.0766

### Epiphytic Relationships

**ORGANIC PRODUCTION OF EPIFAUNAL ORGANISMS** ...Energy Budgets, Marine Biology (non-specific), Organics, Plant Ecosystems(non-specific), Primary Productivity, Reefs, ...5.1032

### Floras

**CORAL ATOLL FLORA** ...Atolls, Plant Taxonomy, Range Or Territorial Distr., ...5.0692

### Food Chains

**THE ACCUMULATION OF FISSION PRODUCTS BY MARINE FISH AND SHELLFISH** ...Chlorideae (non-specific & Ot), Contamination - Water, Estuaries, Radioactivity-general, Radioecology, ...6.0167

**EFFECTS OF INGESTION OF RADIOACTIVE FISH AND THE NATURE AND BIOLOGY OF TOXINS IN CERTAIN FISHES** ...Fish -non-specific, Food (epidemiology), Radioactive Isotopes, Toxicological and Allergy, ...6.0108

**MICROBIOLOGICAL ASSAYS OF SEAWATER USING RADIOISOTOPES** ...Aquatic Ecology, Ciliates, Environmental Ecology, Environmental Physiology, Phytoplankton, Productivity - Food Chain, Thiamine, ...5.0811

**ALGAL SUBSTANCES IN THE MARINE FOOD WEB** ...Food Webs, Humic Acid, Marine Plants, Phaeophyta (non-specific & Ot), Phenols, Secretions and Products, ...5.0725

### Food Webs

**METABOLISM OF MARINE ECOSYSTEMS** ...Energy Budgets, Metabolism, Other, Plankton (non-specific), Productivity - Food Chain, ...5.0966

**ALGAL SUBSTANCES IN THE MARINE FOOD WEB** ...Food Chains, Humic Acid, Marine Plants, Phaeophyta (non-specific & Ot), Phenols, Secretions and Products, ...5.0725

**ECOLOGY OF EELGRASS** ...Alaska, Bering Sea, Phytoplankton, Potamogeton, Ruppia, Zostera., Primary Productivity, ...5.0677

**SEDIMENT MINERALOGY (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION)** ...Adsorption, Chemistry, Productivity - Food Chain, Radioactivity, Radioactivity-general, ...7.0077

### Habitat Studies

**MARINE ALGAE OF THE MANGROVE ROOT COMMUNITY** ...Algae-General, Mangroves, Marine Plants, Puerto Rico, Roots, ...5.0723

**MORPHOLOGY AND TAXONOMY OF MARINE FUNGI** ...Mangroves, Marine Fungi (non-specific), Plant Morphology, Plant Taxonomy, Sub - Tropic, Tropic, ...5.0716

**TROPHIC RELATIONSHIPS IN SHOAL BENTHIC ENVIRONMENTS** ...Benthic Flora, Biology, Estuaries, New England Province, ...5.1027

**SYSTEMATICS AND ECOLOGY OF SUBTIDAL BENTHIC MARINE ALGAE** ...Algae-General, Benthic Flora, Benthic-bottom, Marine Plants, Plant Taxonomy, Range Or Territorial Distr., ...5.0701

**MARINE SULFUR OXIDIZING BACTERIA** ...Ions (inorganic), Isolation From Nat. environ., Marine Bacteria, Range Or Territorial Distr., Thiobacillus, ...5.0758

**PHYSIOLOGY AND ECOLOGY OF MARINE DIATOMS** ...Algae-Diatoms, Algal Culture, Marine Plants, Nutrition Studies, Physiological Ecology, Plant Taxonomy, ...5.0735

**ECOLOGY OF MARINE ENDOLITHIC ALGAE** ...Algae-General, Borings - Tracks - Trails, Calcium, Niches, Textures-structures, ...5.0690

**SUPPORT OF THE VERMILION SEA FIELD STATION AT BAHIA DE LOS ANGELES, BAJA CALIFORNIA** ...Arid and Desert, Facilities, Gulf of California, Temperature, Tides, ...12.0009

**RESTORATION, PROPAGATION, AND MANAGEMENT OF MARINE ALGAE** ...Applied Ecology, Growth and Differentiation, Laminariaceae (non-specif.&ot), Marine Plants, Pacific Ocean-east, ...5.0680

**GEOMICROBIOLOGICAL WEATHERING PHENOMENA OFF ANVERS ISLAND** ...Antarctica, Identification, Marine Bacteria, Petrography, Weathering, ...7.0232

**ECOLOGICAL STUDIES OF ROCKY SUBTIDAL AREAS** ...Animal Taxonomy, Marine Plants, Plant Taxonomy, ...5.0865

**THE EFFECTS OF POLLUTION ON BENTHIC MARINE PLANT COMMUNITIES** ...Bays, Water Depth, Water Levels, ...5.0724

**EXPERIMENTAL ECOLOGY OF LOWER MARINE FUNGI** ...Marine Fungi (non-specific), Phycomycetes, Plant Developmental Biology, ...5.0808

**ENERGETICS OF PALAEMONETES PUGIO AND THE WEEDBED COMMUNITY OF SOUTH CREEK ESTUARY** ...Aquatic Vegetation -ns, Energy Budgets, Estuaries, North Carolina, Shrimps - Common, ...5.0482

**PRESERVATION OF WOODS IN THE MARINE ENVIRONMENT** ...Biological, Fouling, Marine Fungi (non-specific), Materials Used Undersea, Preservatives, Wood, ...8.0216

**FILM PROJECT (KELP FORESTS)** ...California, Cinematography, Fishery Development -other, Laminariaceae (non-specif.&ot), ...5.0678

**ECOLOGY OF THE KELP FORESTS** ...Behavioral Ecology, California, Environmental Ecology, Fish -non-specific, Laminariaceae (non-specif.&ot), ...5.0194

**ENVIRONMENTAL CONDITIONS AND POPULATION DYNAMICS IN SELECTED UNPOLLUTED ESTUARIAL**

## SUBJECT INDEX

## Ecology (plant)

- AND COASTAL AREAS ...Aquatic Ecology, Contamination - Water, Marine Biology (non-specific), Pollution - Effects of , Toxic Substances -non-specific, ...5.0922
- WATER QUALITY AND FUNGI-NEMATODE-SEAGRASS RELATIONSHIPS ...Elodea, Waterweed, Thalassia, Florida, Marine Fungi (non-specific), Nematoda -other, ...5.0878

### Mapping

- BIOLOGICAL RESEARCH ON THE VOLCANIC ISLAND SURTSEY AND ENVIRON ...Iceland, Migration, Volcanoes, ...5.0889
- MARINE BIOLOGY OF RED SEA AND EASTERN MEDITERRANEAN ...Benthic Flora, Population Dynamics, Red Sea, ...5.0891
- PRODUCTIVITY STUDIES IN NORTH CAROLINA SALT MARSHES ...Aerial Photography, North Carolina, Primary Productivity, Productivity - Food Chain, Swamps-marshes, Tidewater Areas, ...5.1017
- CLADOPHORA AS RELATED TO POLLUTION IN WESTERN LAKE ERIE ...Algal Pollutant Sources, Bioindicators, Chemical Analysis, Cladophora, Lake Erie, ...6.0170

### Migration

- BIOLOGICAL RESEARCH ON THE VOLCANIC ISLAND SURTSEY AND ENVIRON ...Iceland, Volcanoes, ...5.0889
- BIOTA OF THE RED SEA AND EASTERN MEDITERRANEAN ...Marine Biology (non-specific), Red Sea, Survey Studies, ...5.0691

### Niches

- ECOLOGY OF MARINE ENDOLITHIC ALGAE ...Algae- General, Borings - Tracks - Trails, Calcium, Habitat Studies, Textures-structures, ...5.0690

### Phenology

- BIOLOGY-MIDDLE EAST WATERS ...Cell Cycle, Marine Biology (non-specific), Middle-east-general, Red Sea, Reproductive System, Synchronization, ...5.0929

### Physiological Ecology

- IMPROVEMENT AND APPLICATION OF BENTHIC ALGAL ISOTOPE PRODUCTIVITY MEASURING METHODS ...Algae- General, Benthonic-bottom, Caulerpa, Pacific Ocean-general, Plant Prod. (non-specific), Rhodophyta (non-specific & Ot), ...5.0968
- PHYSIOLOGY AND ECOLOGY OF MARINE DIATOMS ...Algae- Diatoms, Algal Culture, Habitat Studies, Marine Plants, Nutrition Studies, Plant Taxonomy, ...5.0735
- ECOLOGY AND NITROGEN CYCLE IN A MARINE PLANT COMMUNITY ...Bering Sea, Nitrogen, Potamogeton, Ruppia, Zostera..., Primary Productivity, Sewage, ...5.0676

### Plant Ecology (non-specific)

- BIOLOGY CONFERENCE SERIES ...Ecology (animal), Marine Biology, Meetings, ...11.0035
- MARINE BIOLOGY RESEARCH AT THE BERMUDA BIOLOGICAL STATION ...Bermuda, Ecology (animal), Marine Biology, Marine Biology (non-specific), ...12.0006
- YEAR-ROUND PROGRAM OF RESEARCH IN MARINE ECOLOGY ...Animal Taxonomy, Aquatic Ecology, Marine Biology (non-specific), Plant Taxonomy, Training Grants, Fellowships, ...5.0899

### Productivity

#### Plant Prod. (non-specific)

- IMPROVEMENT AND APPLICATION OF BENTHIC ALGAL ISOTOPE PRODUCTIVITY MEASURING METHODS ...Algae- General, Benthonic-bottom, Caulerpa, Pacific Ocean-general, Physiological Ecology, Rhodophyta (non-specific & Ot), ...5.0968
- OCEANOGRAPHIC VESSEL OPERATIONS ...Equipment Purchase Operation, Geology-general, Pacific Ocean-north, Plankton (non-specific), Ships and Cruises, ...12.0047
- HOLOGRAPHIC STUDIES OF MARINE ORGANISMS ...Acoustical, Holography, Lasers-masers, Plankton (non-specific), Sampling, ...8.0060
- EFFECTS OF THERMAL POLLUTION ON PRODUCTIVITY AND STABILITY OF ESTUARINE COMMUNITIES

- ...Aquatic Ecology, Environmental Ecology, Estuaries, Pollution - Effects of , Thermal Pollution, ...6.0152

- ULTRAVIOLET ABSORPTION IN COASTAL WATERS ...Biological, Marine Plants, Physical Parameters, Sewage, Total Organic Carbon, Ultra - Violet Radiation, ...6.0138

- WATERFOWL FOOD STUDIES ...Food Supply, Management, South Carolina, Waterfowl -non-specific, ...5.0653

### Primary Productivity

- BIOLOGICAL PRODUCTIVITY IN THE SARGASSO SEA, THE GULF STREAM AND IN THE ATLANTIC COASTAL WATERS OFF CAPE HATTERAS ...Continental Shelf, Phytoplankton, Productivity - Food Chain, Proteins, ...5.1005
- C-14 UPTAKE, LIMITING FACTORS AND EXCRETION PRODUCTS OF ANTARCTIC PHYTOPLANKTON ...Antarctic Ocean, Carbon, Phytoplankton, Secretions and Products, ...5.0813
- STUDIES WITH TROPICAL AND SUBTROPICAL MICROALGAE ...Algal Culture, Benthic Flora, Continental Shelf, Sub - Tropic, Tropic, ...5.0693
- ORGANIC PRODUCTION OF EPIFAUNAL ORGANISMS ...Energy Budgets, Epiphytic Relationships, Marine Biology (non-specific), Organics, Plant Ecosystems(non-specific), Reefs, ...5.1032
- ECOLOGICAL STUDIES OF THE SOUTHEASTERN FLORIDA SEA GRASS COMMUNITY - PRIMARY PRODUCTION BY THALASSIA TESTUDINUM KONIG ...Elodea, Waterweed, Thalassia, Florida, Submerged Plants, Translocation, Tropic, ...5.0695
- STANFORD BIOLOGICAL OCEANOGRAPHY ...Marine Biology, Phytoplankton, Productivity - Food Chain, Ships and Cruises, Training Grants, Fellowships, Zooplankton, ...11.0005
- NUTRIENT LIMITATION AND SOURCES OF NITROGEN FOR MARINE PRIMARY PRODUCTIO ...Marine Plants, Mathematical-Biophysic, Nitrogen Fixation, Other Models, Phytoplankton, ...5.0845
- BIOLOGICAL PRODUCTIVITY INVESTIGATIONS OF THE WATERS SURROUNDING ANTARCTICA ...Optical, Organics, Phytoplankton, Standing Crops, Weddell Sea, ...5.1030
- PRODUCTIVITY STUDIES IN NORTH CAROLINA SALT MARSHES ...Aerial Photography, Mapping, North Carolina, Productivity - Food Chain, Swamps-marshes, Tidewater Areas, ...5.1017
- BIOLOGICAL AND CHEMICAL STUDY OF VIRGINIA'S ESTUARIES ...Estuaries, Nitrogen, Phosphorus, Phytoplankton, Population Dynamics, Virginia, ...1.0158
- THE ECOLOGIC IMPACT OF THE INTERACTIONS AMONG MICROORGANISMS AND AQUATIC CONTAMINANTS IN LAKE ERIE ...Lake Erie, Pollution - Effects of , Responses to Growth, Sediments, Water Bacteria, ...5.0819
- EFFECTS OF RIVERS ON THE METABOLISM OF TEXAS BAYS ...Bays, Nutrients, Pollutants-general, Streams, Texas, Water Quality-general, ...6.0187
- PRIMARY PRODUCTION AND DECOMPOSITION IN ESTUARINE WATER ...Estuaries, Florida, Methane Bacteria (non-specif.), Phaeophyta (non-specific & Ct), Rhodophyta (non-specific & Ot), Turnover (metabolic), ...5.0954
- ECOLOGY AND NITROGEN CYCLE IN A MARINE PLANT COMMUNITY ...Bering Sea, Nitrogen, Physiological Ecology, Potamogeton, Ruppia, Zostera..., Sewage, ...5.0676
- PLANKTON ECOLOGY OF BAR-BUILT ESTUARIES ...Estuaries, North Carolina, Phytoplankton, Productivity - Food Chain, Zooplankton, ...5.0816
- PRIMARY PRODUCTIVITY IN PUERTO GALERA BAY, MINDORO, PHILIPPINES ...Bays, Philippines, Productivity - Food Chain, ...5.1025
- ECOLOGY OF EELGRASS ...Alaska, Bering Sea, Food Webs, Phytoplankton, Potamogeton, Ruppia, Zostera..., ...5.0677
- TIDE MARSH ECOLOGY AND WILDLIFE ...Management, Microorganisms (non-specific), Nitrogen Cycle, Nutrients, Phosphorus, Swamps-marshes, ...5.0870
- PRODUCTIVITY OF ESTUARINE AND MARINE ECOSYSTEMS (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Algae- General, Estuaries, Marine Plants, Phytoplankton, Standing Crops, ...5.1010
- INPEC BIOLOGICAL OCEANOGRAPHY - (PHYTOPLANKTON AND ZOOPLANKTON RESEARCH) ...Food Supply, Pacific Ocean-north, Phytoplankton, Temporal Distribution, Zooplankton, ...5.0843
- PRIMARY PRODUCTIVITY ...Marine Plants, Productivity - Food Chain, Standing Crops, ...5.0955

## Ecology (plant)

- PRODUCTIVITY MEASURES ...Number Or Density, Ocean Currents-other, Organism Sampling Devices, Pacific Ocean-east, Productivity - Food Chain, Zooplankton, ...5.0940
- INTERNATIONAL WEDDELL SEA OCEANOGRAPHIC EXPEDITION ...Organics, Population Dynamics, Productivity - Food Chain, Seas, Weddell Sea, ...4.0121

## Radioecology

- THE ACCUMULATION OF FISSION PRODUCTS BY MARINE FISH AND SHELLFISH ...Chlorideae (non-specific & Ot), Contamination - Water, Estuaries, Food Chains, Radioactivity-general, ...6.0167
- MARINE BIOLOGY PROGRAM ...Distribution, Productivity - Food Chain, Puerto Rico, Rare Earths, Trace Elements, ...1.0128
- BIOLOGICAL INVESTIGATIONS WITH ISOTOPES ...Algae-General, Facilities, Isotopes -non-specific, Marine Plants, Radiation Effects-non-specific, ...11.0025

## Standing Crops

- BIOLOGICAL PRODUCTIVITY INVESTIGATIONS OF THE WATERS SURROUNDING ANTARCTICA ...Optical, Organics, Phytoplankton, Primary Productivity, Weddell Sea, ...5.1030
- EFFECTS OF PESTICIDES ON ESTUARINE PRODUCTIVITY ...Aquatic Ecology, Estuaries, Mans Activities, Persistence of Residues, Pesticides -non-specific, Pollution - Effects of, Population Dynamics, ...5.0880
- ANNUAL PHYTOPLANKTON PRODUCTION IN PUGET SOUND WATERS ...Copepods, Invertebrate Culture, Phytoplankton, Puget Sound, Tides, ...5.0931
- PRODUCTIVITY OF ESTUARINE AND MARINE ECOSYSTEMS (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Algae- General, Estuaries, Marine Plants, Phytoplankton, Primary Productivity, ...5.1010
- PRIMARY PRODUCTIVITY ...Marine Plants, Primary Productivity, Productivity - Food Chain, ...5.0955
- STANDING STOCK AND GROWTH OF BACTERIA IN THE SEA ...Atp X Adenosine Triphosphate, Carbohydrates, Growth (non-specific & Ot.), Marine Biology, Phytoplankton, ...5.0749

## Symbiosis

- MARINE PHYTOPLANKTON RESEARCH ...Algal Culture, Indian Ocean-general, Nutrition Studies, Pacific Ocean-general, Phytoplankton, ...5.0847
- SYMBIOSIS BETWEEN MARINE ALGAE AND INVERTEBRATES ...Gastropods -slugs, conch, snails, Photosynthetically Active, Zooxanthella, ...5.0730
- SYNECOLOGY OF CARIBBEAN SPONGES ...Algae- General, Caribbean Sea, Copepods, Porifera, ...5.0580
- SYMBIOSIS IN CONVOLUTA ...Algae- General, Eddyworms, ...5.0713

## Economic Theory

- SEARCH AND RESCUE - U.S. COAST GUARD ...Consultants, Advisory Services, Operational Aspect, Safety, ...6.0130
- SYSTEM OPERATIONS AND ACOUSTIC PHYSICS ...Acoustical, Instrumentation-general, Liquids, Standards, Specifications, Systems Analysis, ...12.0020

## Application

- TECHNIQUES OF PLANNING ...Control Systems, Management, Mathematical Analysis, Operations Research, Planning, Southern, Systems Analysis, ...9.0917

## Cost Analysis

- OPTIMIZATION METHODS APPLIED TO THE PRELIMINARY DESIGN OF A NAVAL AUXILIARY ...Algorithms, Engineering Studies-other, Optimization Technique, Other-design-and-construction, Requirement, ...8.0297
- MARINE TRANSPORTATION ANALYSIS MODEL ...Input - Output Analysis, Models, Ports & Harbors, Water Vessel, ...8.0031
- NUCLEAR FUEL COST ANALYSIS MODEL ...Applications, Fuel, Nuclear Power, ...4.0070
- ADVANCED MARINE TRANSPORTATION SYSTEM/ANALYSIS MODEL ...Algorithms, Consumption, Input - Output Analysis, Merchant-ships, Models, Systems Analysis, ...4.0068

## SUBJECT INDEX

- ANALYSIS OF THE EFFECT ON OPERATING COSTS AND RETURN ON INVESTMENT OF VARIATIONS IN OPERATING PARAMETERS ...Costs, Economics, Ocean Mining, Systems Analysis, ...4.0174

## Design of Experiments

- OPTIMIZATION METHOD APPLIED TO THE PRELIMINARY DESIGN OF A NAVAL SALVAGE TUG . Algorithms, Operational Aspect, Optimization Technique, Other-design-and-construction, Random Variables, ...8.0307

## Management Science

- MARINE TRANSPORTATION ECONOMIC ANALYSIS ...Economic Analysis, Freight, Production & Processing, Water Transportation, ...4.0179

## Optimization Technique

- SYSTEM DESIGN STUDY FOR THE U.S. NAVAL OCEANOGRAPHIC OFFICE INTELLIGENCE DATA HANDLING SYSTEM ...Data Analysis - General, Data Reduction and Analysis, Geophysics-general, Mapping, Systems Analysis, ...4.0016

## Programming

- HYDRODYNAMIC FLOW FIELD STUDY ...Ship Resistance Stability, Viscous, Wave, ...8.0170

## Systems Analysis

- ERROR ANALYSIS OF SEVERAL BOTTOM REFERENCED NAVIGATION SYSTEMS FOR SMALL SUBMERSIBLES ...Error Analysis, Navigation, Operational Aspect, Sonar, Submersibles, Subsurface Environments, ...4.0111
- A SHIPBOARD DIGITAL DATA ACQUISITION SYSTEM ...Data Acquisition, Seismic Studies, Tape Storage, ...4.0036
- SYSTEM DESIGN STUDY FOR THE U.S. NAVAL OCEANOGRAPHIC OFFICE INTELLIGENCE DATA HANDLING SYSTEM ...Data Analysis - General, Data Reduction and Analysis, Geophysics-general, Mapping, Optimization Technique, ...4.0016
- AN ECONOMIC EVALUATION OF WATER POLLUTION CONTROL, YAQUINA BAY, ORE ...Alternative Planning, Bays, Benefit-cost Analysis, Model Studies, Oregon, Water Quality Control-general, ...6.0173
- ADVANCED MARINE TRANSPORTATION SYSTEM/ANALYSIS MODEL ...Algorithms, Consumption, Cost Analysis, Input - Output Analysis, Merchant-ships, Models, ...4.0068
- SYSTEM OPERATIONS AND ACOUSTIC PHYSICS ...Acoustical, Economic Theory, Instrumentation-general, Liquids, Standards, Specifications, ...12.0020
- ANALYSIS OF THE EFFECT ON OPERATING COSTS AND RETURN ON INVESTMENT OF VARIATIONS IN OPERATING PARAMETERS ...Cost Analysis, Costs, Economics, Ocean Mining, ...4.0174

## Economics

- STUDY OF OCEANOGRAPHIC MARKETS ...Consumption, Manufacturing, Oceanography-general, Trends, projections, ...4.0176
- SCIENCE AND ENGINEERING GOALS FOR THE INTERNATIONAL DECADE OF OCEAN EXPLORATION ...Oceanography-general, Planning, Project Review, Science & Technology, ...4.0118
- FISHING VESSEL CONSTRUCTION COSTS AND THE U.S. FISHING VESSEL CONSTRUCTION DIFFERENTIAL SUBSIDY ...Commercial Fishing, Costs, Fiscal, Other-design-and-construction, Surface Ships, ...4.0181
- SECOND HAND PRICES FOR TANKERS ...Model Studies, Price & Value, Tankers, Trends, projections, ...4.0184
- PRELIMINARY STUDIES OF INTERNATIONAL REGIMES FOR MARINE RESOURCES ...Legal Studies-general, Oceanography-general, Social Aspects, ...10.0001
- USE OF TIDAL POWER AND OTHER OCEAN ENERGY SOURCES ...Bibliography, Engineering Studies-other, Mechanical Power-other, Survey Studies, Tides, ...2.0084
- FINANCING OF FISHING VESSELS ...Commercial Fishing, Fish & Shellfish, Rhode Island, Savings and Investment, ...4.0185
- ECONOMIC IMPACT OF MARINE-ORIENTED ACTIVITIES IN THE SOUTHERN NEW ENGLAND MARINE REGION ...Northeast, Regional Economic Impact, ...4.0187

- WORLD WIDE MARINE MINERAL RESOURCES ...Continental Shelf, Continental Slope, Mapping, Potential of Deposit, Resource Inventories, ...4.0056
- ANALYSIS OF THE EFFECT ON OPERATING COSTS AND RETURN ON INVESTMENT OF VARIATIONS IN OPERATING PARAMETERS ...Cost Analysis, Costs, Ocean Mining, Systems Analysis, ...4.0174
- INVESTIGATE POPULATION DYNAMICS OF SKIPJACK TUNA IN HAWAIIAN WATERS ...Commercial Fishing, Environmental Ecology, Hawaii, Population Dynamics, Tuna, Mackerel, Albacore... , ...5.0083
- MULTISPECIES FISHERIES MODELS ...California, Commercial Fishing, Model Studies, Oceanic - Pelagic, Pacific Ocean-east, Production & Processing, ...4.0065

**Benefit-cost Analysis**

- SYSTEMS ANALYSIS ASSISTANCE TO HEADQUARTERS U. S. COAST GUARD ...Model Studies, Sea Ice, Ships and Cruises, Systems Analysis, ...12.0015
- STREAM IMPROVEMENT PLANNING ...Engineering Structures-general, Fish -non-specific, Management -other, Planning, Streams, ...5.0220
- AN ECONOMIC EVALUATION OF WATER POLLUTION CONTROL, YAQUINA BAY, ORE ...Alternative Planning, Bays, Model Studies, Oregon, Systems Analysis, Water Quality Control-general, ...6.0173
- SOCIO-ECONOMIC STUDY OF NARRAGANSETT BAY, RHODE ISLAND ...Bays, Estuaries, Land Use, Rhode Island, Social Aspects, Water Quality Control-general, ...9.0019

**Commodities**

**Fish & Shellfish**

- RADIATION PRESERVATION OF FISHERY PRODUCTS ...Commercial Fishing, Fish -non-specific, Organoleptic Studies, Radiation, Shelf Life & Storage, ...6.0034
- SYSTEMS ENGINEERING AND DEVELOPMENT OF COMMERCIALLY VALUABLE MARINE RESOURCES IN THE DELAWARE AREA ...Aquaculture & Fish-farming, Commercial Fishing, Delaware, Oysters, Quality -non-specific, ...8.0002
- DETERMINATION OF THE STRUCTURE & ECONOMIC IMPORTANCE OF THE VARIOUS SEGMENTS OF THE SEAFOOD INDUSTRY ...Commercial Fishing, Consumer Pref. & Consumption, Fish -non-specific, Georgia, Production & Processing, Regional Economic Impact, Shellfish -non-specific, ...4.0180
- CONSUMER EDUCATION AND MARKET DEVELOPMENT ...Atlantic Ocean-north, Northeast, ...6.0032
- REGIONAL DEMAND IN THE U.S. AND TRENDS IN THE FISHING AND SEAFOOD PROCESSING INDUSTRIES OF THE CHESAPEAKE BAY AREA ...Chesapeake Bay, Commercial Fishing, Consumer Pref. & Consumption, Consumption, Fish -non-specific, Market Structure, ...6.0028
- CONSUMER EVALUATION OF FISH PRODUCTS ...Consumer Pref. & Consumption, Fish -non-specific, Organoleptic Studies, Smoking, ...6.0004
- MARKET STRUCTURE OF THE COMMERCIAL FISHING INDUSTRY ...Cattle Rations -other, Commercial Fishing, Fish Meals, Market Structure, Marketing, Poultry Rations -other, ...4.0177
- ECONOMIC ANALYSIS OF THE MARKET STRUCTURE OF THE COMMERCIAL FISHING INDUSTRY IN THE NORTHEAST ...Commercial Fishing, Market Structure, Marketing, Math Models, Northeast, Productivity (agricultural), ...6.0151
- ECONOMIC ANALYSIS OF THE MARKET STRUCTURE OF THE COMMERCIAL FISHING INDUSTRY IN THE NORTHEAST ...Commercial Fishing, Market Structure, Maryland, Northeast, Processing, ...4.0182
- THE RHODE ISLAND HARD CLAM - QUAHAUG - INDUSTRY ...Clams, Costs, Production & Processing, Rhode Island, ...5.0493
- FINANCING OF FISHING VESSELS ...Commercial Fishing, Economics, Rhode Island, Savings and Investment, ...4.0185
- COMMERCIAL BENEFIT STUDIES ...Commercial Fishing, ...6.0037
- PROCESSING AND PRODUCT DEVELOPMENT OF EDIBLE FISH AND SHELLFISH ...Commercial Fishing, ...6.0047
- INCREASE EFFICIENCY OF HAWAIIAN LONGLINE FISHERY ...Commercial Fishing, Fishing Gear, Hawaii, Production & Processing, Technique Development, Technological Development, ...11.0022

**Economic Efficiency**

- ECONOMICS OF WATER QUALITY FOR A REGIONAL SYSTEM ...Delaware River, Estuaries, Finance, Regional Areas, Water Demand, Water Quality-general, ...9.0018

**Economic Impact**

- SURFACE AND GROUND WATER POTENTIALITIES OF THE MULLICA RIVER BASIN ...Aqueducts, Conjunctive Use, Estuaries, Systems Analysis, Water Quality-general, Water Transfer, ...9.0014
- EFFECTS OF WATER POLLUTION IN SAN FRANCISCO BAY ...Bays, Pollution - Effects of , Recreation Sites, San Francisco Bay, Social Aspects, Water Utilization -domestic, Welfare Economics, ...6.0140

**Economics-general**

- BIONOMICS OF FISHES AND SHELLFISHES ...Aquaculture & Fish-farming, Bays, Environmental Ecology, Oregon, Productivity - Food Chain, ...5.0920

**Finance**

- PUBLIC INVESTMENT CRITERIA FOR WATER-ORIENTED RECREATION IN THE LAKE ERIE BASIN ...Alternative Planning, Costs, Fiscal, Pollution Abatement, Projected Demand, Recreation Sites, ...9.0016
- ECONOMICS OF WATER QUALITY FOR A REGIONAL SYSTEM ...Delaware River, Economic Efficiency, Estuaries, Regional Areas, Water Demand, Water Quality-general, ...9.0018

**Income Analysis**

**Consumption**

- STUDY OF OCEANOGRAPHIC MARKETS ...Economics, Manufacturing, Oceanography-general, Trends, projections, ...4.0176
- COMPETITIVE MERCHANT SHIP PROJECT (BULK) DRY BULK COMMODITY FORECASTS ...Freight, Merchant-ships, Transportation Systems, ...8.0029
- REGIONAL DEMAND IN THE U.S. AND TRENDS IN THE FISHING AND SEAFOOD PROCESSING INDUSTRIES OF THE CHESAPEAKE BAY AREA ...Chesapeake Bay, Commercial Fishing, Consumer Pref. & Consumption, Fish & Shellfish, Fish -non-specific, Market Structure, ...6.0028
- MARKET STRUCTURE OF COMMERCIAL FISHING INDUSTRY IN THE NORTHEAST ...Commercial Fishing, Haddock, Market Structure, Northeast, Refrigeration, ...4.0186
- ADVANCED MARINE TRANSPORTATION SYSTEM/ANALYSIS MODEL ...Algorithms, Cost Analysis, Input - Output Analysis, Merchant-ships, Models, Systems Analysis, ...4.0068

**Fiscal**

- FISHING VESSEL CONSTRUCTION COSTS AND THE U.S. FISHING VESSEL CONSTRUCTION DIFFERENTIAL SUBSIDY ...Commercial Fishing, Costs, Economics, Other-design-and-construction, Surface Ships, ...4.0181
- PUBLIC INVESTMENT CRITERIA FOR WATER-ORIENTED RECREATION IN THE LAKE ERIE BASIN ...Alternative Planning, Costs, Finance, Pollution Abatement, Projected Demand, Recreation Sites, ...9.0016

**Savings and Investment**

- INSTITUTIONAL ARRANGEMENTS FOR THE MARINE SCIENCES ...International Affairs, Management, Management and Administration, Oceanography-general, ...10.0005
- FINANCING OF FISHING VESSELS ...Commercial Fishing, Economics, Fish & Shellfish, Rhode Island, ...4.0185

**Methods & Measures**

**Input - Output Analysis**

- MARINE TRANSPORTATION ANALYSIS MODEL ...Cost Analysis, Models, Ports & Harbors, Water Vessel, ...8.0031
- ADVANCED MARINE TRANSPORTATION SYSTEM/ANALYSIS MODEL ...Algorithms, Consumption, Cost Analysis, Merchant-ships, Models, Systems Analysis, ...4.0068

**Simulation**

- 149A FISHERY SYSTEMS ANALYSIS ...California, Commercial Fishing, Nets, Production & Processing, Tuna, Mackerel, Albacore... , ...4.0175

## Economics

## SUBJECT INDEX

### Trends, projections

- STUDY OF OCEANOGRAPHIC MARKETS ...Consumption, Economics, Manufacturing, Oceanography-general, ...4.0176
- ANALYZING THE FACTORS AFFECTING THE DEMAND FOR SEAFOOD AND TO PROJECT THIS DEMAND TO FUTURE TIME PERIODS ...Consumer Pref. & Consumption, Fish -non-specific, Food Needs and Demand, ...6.0021
- SECOND HAND PRICES FOR TANKERS ...Economics, Model Studies, Price & Value, Tankers, ...4.0184

### Microeconomics

#### Costs

- ECONOMICS OF NUCLEAR FUEL ...Fuel, Merchant-ships, Nuclear, ...4.0178
- FISHING VESSEL CONSTRUCTION COSTS AND THE U.S. FISHING VESSEL CONSTRUCTION DIFFERENTIAL SUBSIDY ...Commercial Fishing, Economics, Fiscal, Other-design-and-construction, Surface Ships, ...4.0181
- PUBLIC INVESTMENT CRITERIA FOR WATER-ORIENTED RECREATION IN THE LAKE ERIE BASIN ...Alternative Planning, Finance, Fiscal, Pollution Abatement, Projected Demand, Recreation Sites ...9.0016
- THE RHODE ISLAND HARD CLAM - QUAAHAUG - INDUSTRY ...Clams, Fish & Shellfish, Production & Processing, Rhode Island, ...5.0493
- MODEL FOR PRELIMINARY EVALUATION OF TOTAL CARGO TRANSPORTATION TIME AND TRANSPORTATION COST FOR ADVANCED CARGO TRANSPORTATION SYSTEMS ...Computer Applications, Freight, Transportation Systems, Yards-docks, ...4.0067
- ANALYSIS OF THE EFFECT ON OPERATING COSTS AND RETURN ON INVESTMENT OF VARIATIONS IN OPERATING PARAMETERS ...Cost Analysis, Economics, Ocean Mining, Systems Analysis, ...4.0174

#### Market Structure

- REGIONAL DEMAND IN THE U.S. AND TRENDS IN THE FISHING AND SEAFOOD PROCESSING INDUSTRIES OF THE CHESAPEAKE BAY AREA ...Chesapeake Bay, Commercial Fishing, Consumer Pref. & Consumption, Consumption, Fish & Shellfish, Fish -non-specific, ...6.0028
- MARKET STRUCTURE OF THE COMMERCIAL FISHING INDUSTRY ...Cattle Rations -other, Commercial Fishing, Fish & Shellfish, Fish Meals, Marketing, Poultry Rations -other, ...4.0177
- ECONOMIC ANALYSIS OF THE MARKET STRUCTURE OF THE COMMERCIAL FISHING INDUSTRY IN THE NORTHEAST ...Commercial Fishing, Fish & Shellfish, Marketing, Math Models, Northeast, Productivity (agricultural), ...6.0151
- ECONOMIC ANALYSIS OF THE MARKET STRUCTURE OF THE COMMERCIAL FISHING INDUSTRY IN THE NORTHEAST ...Commercial Fishing, Fish & Shellfish, Maryland, Northeast, Processing, ...4.0182
- ECONOMIC ANALYSIS OF THE MARKET STRUCTURE OF THE COMMERCIAL FISHING INDUSTRY IN THE NORTHEAST ...Commercial Fishing, Consumer Pref. & Consumption, Fish -non-specific, Northeast, ...4.0183
- MARKET STRUCTURE OF COMMERCIAL FISHING INDUSTRY IN THE NORTHEAST ...Commercial Fishing, Consumption, Haddock, Northeast, Refrigeration, ...4.0186

#### Marketing

- MARKET RESEARCH STUDIES ON THE EFFECTS OF THE FLORIDA MARKETING PROGRAM ON THE SALE OF FLORIDA SEAFOODS ...Fish -non-specific, Florida, Institutional Management, Retail, ...6.0018
- CONSUMER EDUCATION AND MARKET DEVELOPMENT ...Atlantic Ocean-north, Fish & Shellfish, Northeast, ...6.0032
- MARKET STRUCTURE OF THE COMMERCIAL FISHING INDUSTRY ...Cattle Rations -other, Commercial Fishing, Fish & Shellfish, Fish Meals, Market Structure, Poultry Rations -other, ...4.0177
- ECONOMIC ANALYSIS OF THE MARKET STRUCTURE OF THE COMMERCIAL FISHING INDUSTRY IN THE NORTHEAST ...Commercial Fishing, Fish & Shellfish, Market Structure, Math Models, Northeast, Productivity (agricultural), ...6.0151
- ECONOMICS OF MARKETING DUNGENES CRAB ...Crabs, Pacific Ocean-north, Price & Value, ...5.0484

THE STRUCTURE OF DECISION MAKING IN MAJOR MARKETING AGENCIES OF FOOD FISH IN THE N.E. UNITED STATES ...Fish -non-specific, Northeast, Price & Value, Production & Processing, Shelf Life & Storage, ...6.0078

#### Price & Value

- ANALYSIS OF THE DEMAND FOR RED MEAT, POULTRY, EGGS, SEAFOOD, AND MEAT MIXTURES ...Consumer Pref. & Consumption, Eggs, Fish -non-specific, Meat -non-specific, ...6.0019
- SECOND HAND PRICES FOR TANKERS ...Economics, Model Studies, Tankers, Trends, projections, ...4.0184
- ECONOMICS OF MARKETING DUNGENES CRAB ...Crabs, Marketing, Pacific Ocean-north, ...5.0484
- THE STRUCTURE OF DECISION MAKING IN MAJOR MARKETING AGENCIES OF FOOD FISH IN THE N.E. UNITED STATES ...Fish -non-specific, Marketing, Northeast, Production & Processing, Shelf Life & Storage, ...6.0078

#### Production & Processing

- DETERMINATION OF THE STRUCTURE & ECONOMIC IMPORTANCE OF THE VARIOUS SEGMENTS OF THE SEAFOOD INDUSTRY ...Commercial Fishing, Consumer Pref. & Consumption, Fish & Shellfish, Fish -non-specific, Georgia, Regional Economic Impact, Shellfish -non-specific, ...4.0180
- THE STRUCTURE OF DECISION MAKING IN MAJOR MARKETING AGENCIES OF FOOD FISH IN THE N.E. UNITED STATES ...Fish -non-specific, Marketing, Northeast, Price & Value, Shelf Life & Storage, ...6.0078
- THE RHODE ISLAND HARD CLAM - QUAAHAUG - INDUSTRY ...Clams, Costs, Fish & Shellfish, Rhode Island, ...5.0493
- MARINE TRANSPORTATION ECONOMIC ANALYSIS ...Economic Analysis, Freight, Management Science, Water Transportation, ...4.0179
- INCREASE EFFICIENCY OF HAWAIIAN LONGLINE FISHERY ...Commercial Fishing, Fish & Shellfish, Fishing Gear, Hawaii, Technique Development, Technological Development, ...11.0022
- 149A FISHERY SYSTEMS ANALYSIS ...California, Commercial Fishing, Nets, Simulation, Tuna, Mackerel, Albacore... , ...4.0175
- MULTISPECIES FISHERIES MODELS ...California, Commercial Fishing, Economics, Model Studies, Oceanic - Pelagic, Pacific Ocean-east, ...4.0065

#### Technological Development

- INCREASE EFFICIENCY OF HAWAIIAN LONGLINE FISHERY ...Commercial Fishing, Fish & Shellfish, Fishing Gear, Hawaii, Production & Processing, Technique Development, ...11.0022

#### Natural Resources

##### Land Economics

- PUERTO RICO COOP - MONA PASSAGE ...Continental Shelves, Mine Wastes, Oil - Petroleum, Potential of Deposit, Puerto Rico, Sands and Gravels, ...7.0034
- ISLAND STUDY ...Conservation-general, Islands, Recreation Sites, Types of Resources, United States-general, ...9.0005

#### Optimization

- GALVESTON BAY STUDY ...Estuaries, Numerical Analysis -other, Simulation, Tides, Waste Water Treatment-general, ...4.0062

#### Regional Economic Impact

- DETERMINATION OF THE STRUCTURE & ECONOMIC IMPORTANCE OF THE VARIOUS SEGMENTS OF THE SEAFOOD INDUSTRY ...Commercial Fishing, Consumer Pref. & Consumption, Fish & Shellfish, Fish -non-specific, Georgia, Production & Processing, Shellfish -non-specific, ...4.0180
- ECONOMIC IMPACT OF MARINE-ORIENTED ACTIVITIES IN THE SOUTHERN NEW ENGLAND MARINE REGION ...Economics, Northeast, ...4.0187

#### Types

##### Manufacturing

- STUDY OF OCEANOGRAPHIC MARKETS ...Consumption, Economics, Oceanography-general, Trends, projections, ...4.0176

## SUBJECT INDEX

## Electronic Components

### Processing

APPLICATION OF RADIATION PASTEURIZATION PROCESSES TO PACIFIC CRAB AND FLOUNDER ...Clostridium Botulinum, Fish -non-specific, Microbiological, Radiation, Toxicological and Allergy, ...6.0083

DEVELOPMENT OF NEW HUMAN FOOD PRODUCTS FROM SHAD ...Fish & Shellfish, Sausage and Variety Meats, Shad, Shelf Life & Storage, Smoking, ...6.0065

EFFECT OF PROCESS ON SHELLFISH ...Clams, Processed Product Quality, Sanitation, Shelf Life & Storage, Winter, ...6.0059

ESTIMATING THE VALUE ADDED TO SEAFOOD PRODUCTS LANDED IN GEORGIA AT THE VARIOUS STAGES OF THE MARKETING CHANNEL ...Fish -non-specific, Georgia, Quality -non-specific, Shellfish -non-specific, ...6.0020

ECONOMIC ANALYSIS OF THE MARKET STRUCTURE OF THE COMMERCIAL FISHING INDUSTRY IN THE NORTHEAST ...Commercial Fishing, Fish & Shellfish, Market Structure, Maryland, Northeast, ...4.0182

MARKETING EFFICIENCY IN A COOPERATIVE FOOD-FISH PROCESSING PLANT, A CASE STUDY ...Design, Machinery, Equipment, Fish & Shellfish, Fish -non-specific, Freezing, Shelf Life & Storage, ...6.0079

CONTAINERIZATION OF FISHERY PRODUCTS ...Commercial Fishing, Fish -other, Packaging, Shrimp, ...6.0049

### Retail

MARKET RESEARCH STUDIES ON THE EFFECTS OF THE FLORIDA MARKETING PROGRAM ON THE SALE OF FLORIDA SEAFOODS ...Fish -non-specific, Florida, Institutional Management, Marketing, ...6.0018

### Water Costs

BRACKISH WATER PURIFICATION BY BIOLOGICAL FUEL CELL POWERED ELECTRODIALYSIS ...Biological, Brackish Water, Desalination, Desalination Wastes, Electrodialysis, Material Recovery Wastes, ...6.0161

### Welfare Economics

USE OF THE COASTAL ZONE FOR THE U. S. COASTLINE OF LAKE ERIE AND LAKE SUPERIOR ...Lake Erie, Lake Superior, Lakeshores-inlets, Land Use, Social Aspects, ...9.0004

EFFECTS OF WATER POLLUTION IN SAN FRANCISCO BAY ...Bays, Economic Impact, Pollution - Effects of, Recreation Sites, San Francisco Bay, Social Aspects, Water Utilization - domestic, ...6.0140

### Eddyworms

SYMBIOSIS IN CONVOLUTA ...Algae- General, Symbiosis, ...5.0713

### Electric Lighting Systems

FEASIBILITY STUDY FOR A GATED-LASER, IMAGE-AMPLIFIER UNDERWATER VISION SYSTEM ...Image Converters, Lasers-masers, Optical Devices, Photography, Technique Development, ...8.0108

VISUAL LANDING AIDS FIELD ...Atmosphere Optical Phenomena, Detectors, Fog-haze-mist, Infrared Radiation, Lighting, ...4.0086

### Electric Power Generation

#### Batteries

CONSULTATIVE AND ADVISORY SERVICES - BATTERY PROBLEMS ...Consultants, Advisory Services, Instrumental Services, Standards, Specifications, ...11.0021

#### Thermoelectric

INVESTIGATION OF NUCLEAR THERMIONIC POWER FOR MARINE APPLICATIONS ...Electron Emission, Marine Environments-general, Nuclear Power, Power Conversion Systems, ...8.0155

THERMO-ELECTRIC GENERATORS ...Buoys, Generators, ...8.0162

### Electric Power Transmission

#### Power Transmission Systems

POWER SOURCES ...Benthonic-bottom, Safety, Submerged Ships, Technique Development, Underwater-construction, ...8.0156

#### Electro-osmosis

ELECTROKINETIC SOIL STUDY ...Buried Structures, Electroosmosis, Electrophoresis, Laboratory Analysis, Marine Soils, Stabilization, ...8.0342

#### Electroanalyses

##### Conductrometry

AN ANALYSIS OF PHOSPHORUS AND NITROGEN COMPOUNDS IN TIDAL MARSHLAND DRAINAGE - LABORATORY PROCEDURES ...Colorimetry, Computer Applications, Management, Nitrogen, Phosphate, Phosphite, Swamps-marshes, ...5.0761

#### Electrochemistry

##### Electrodialysis

BRACKISH WATER PURIFICATION BY BIOLOGICAL FUEL CELL POWERED ELECTRODIALYSIS ...Biological, Brackish Water, Desalination, Desalination Wastes, Material Recovery Wastes, Water Costs, ...6.0161

#### Electromechanical Design

A DESIGN PROGRAM FOR SUPERCONDUCTING ELECTRICAL MACHINES ...Electrical, Instrumental Services, Marine Propulsion, Superconductive Device, ...8.0132

#### Electron Emission

INVESTIGATION OF NUCLEAR THERMIONIC POWER FOR MARINE APPLICATIONS ...Marine Environments-general, Nuclear Power, Power Conversion Systems, Thermoelectric, ...8.0155

### Electronic Components

#### Cables and Transmission Lines

SUBMARINE SEISMIC PROFILES OF THE WORLDS OCEANS ...Atlantic Ocean-general, Data Analysis - General, Indian Ocean-general, Seismic Studies, Subbottom, ...7.0150

LOW NOISE MULTI-CHANNEL HYDROPHONE CABLE ...Amplifiers, Bathymetry, Seismic Studies, Telephone, Transmission Lines, ...8.0145

COLLECTION, ANALYSIS, INTERPRETATION, AND PRESENTATION OF OCEANOGRAPHIC - GEOLOGIC DATA IN CONNECTION WITH SUBMARINE CABLE SYSTEM DEVELOPMENT ...Data Acquisition, Data Analysis - General, Submerged Ships, Transmission Lines, ...7.0043

#### Electronic Components-other

INSTRUMENT STUDIES ...Evaluation Other, Instrumental Services, Testing Facilities, ...8.0104

#### Electronic Tubes

##### Image Converters

FEASIBILITY STUDY FOR A GATED-LASER, IMAGE-AMPLIFIER UNDERWATER VISION SYSTEM ...Electric Lighting Systems, Lasers-masers, Optical Devices, Photography, Technique Development, ...8.0108

##### X Ray Tubes

X-RADIOGRAPHIC AND ELECTRONIC FLUOROSCOPIC EQUIPMENT ...Core Analysis, Equipment Purchase Operation, Instrumental Services, Radiograph, Radiometer, ...8.0094

#### Electronic-flash-lights

PSYCHOPHYSICAL EFFECTS OF XENON FLASHTUBES ...Navigation Communication, Optical Sources, Lamps, Visible, Xenon, ...8.0053

## Electronic Components

## SUBJECT INDEX

### Transducers

- NAVIGATION RECEIVER ...Navigation, Navigation Systems-other, Radio, Sonar, Transponders, ...4.0112
- EXPERIMENTAL HIGH RESOLUTION SUB-BOTTOM PROFILING SYSTEM ...Amplifiers, Receivers, Sonar, Sonar and Echo Sounding, Subbottom, ...8.0109
- PRESSURE INSENSITIVE VELOCIMETER ...Acoustical, Instrumental Services, Pressure, Velocimeter, Velocity, ...8.0055
- TURBULENCE STRUCTURE AND NOISE STUDY ...Additives, Noise, Turbulent, ...1.0002
- PRECISION QUARTZ CAPACITANCE PRESSURE TRANSDUCERS ...Capacitance, Pressure, Quartz, Technique Development, ...8.0121
- ADVANCE SONAR SYSTEMS ...Data Display, Instrumental Services, Sonar, Sonar and Echo Sounding, Testing Facilities, ...8.0096
- TRANSDUCER RESEARCH ...Packaging, Sealant, Submersibles, ...8.0095
- NEW SEA GRAVITY METER ...Capacitance, Geophysical Equipment, Gravimetric, Gravity Studies, Instrumental Services, ...8.0067
- THEORETICAL AND LABORATORY MODEL STUDIES OF LARGE-SCALE OCEAN CIRCULATION ...Circulation-general, Currents-ocean, Forecasting-prediction, Gulf Stream, Model Studies, ...2.0023
- ARCTIC SEISMIC TRANSDUCER EVALUATION ...Applied Electronics, Arctic, Evaluation Other, Ice Acoustics, Propagation, ...8.0118
- DEEP SUBMERGENCE DISSOLVED OXYGEN TRANSDUCER ...Gases, Instrumental Services, Oxygen, Submersibles, ...8.0057
- HUMIDITY SENSORS ...Barium, Fluoride, Humidity Instruments, Stability, ...8.0083
- AUTOMATED FLOW SYSTEM CALIBRATION ...Aircraft, Controls, Digital Computer Applications, Fluids, ...8.0071
- ENVIRONMENTAL TEST AND EVALUATION ...Acoustic, Testing Facilities, Ultrasonic Technology, ...8.0128
- COAST GUARDS COASTAL OCEANOGRAPHIC MONITORING NETWORK ...Automatic Stations, Buoys, Instrumental Services, Recording Systems, Telemetry-other, ...4.0006

## Electronics

### Electric Circuits and Networks

- TESTING AND EVALUATION OF HIGH-RESOLUTION ACOUSTIC SUBBOTTOM PROFILER THROUGH MODIFICATION OF OFF-THE-SHELF COMPONENTS ...Distribution, Evaluation Other, Field Testing, Sonar, ...8.0115

### Microwave Techniques

- MICROWAVE RADIOMETER DEVELOPMENT ...Instrumental Services, Microwave Radiation, Radiation Detection, Radiation-terrestrial, Wave Form, ...8.0056
- AEROLOGICAL INSTRUMENTS ...Amplifiers, Field Testing, Humidity Instruments, Instrumental Services, Technique Development, ...8.0082

### Signal Analysis

#### Doppler

- INTEGRATION OF DOPPLER SATELLITE AND LORAN NAVIGATIONAL SERVICES ...Loran, Navigation, Satellites, ...4.0110

#### Interference

- STUDY OF PROBABILITY OF DETECTION AND FALSE ALARM RATE OF FREQUENCY ACOUSTIC TELEMETERING SYSTEM ...Acoustical, Oil and Natural Gas - Sulfur, ...8.0106
- AUDITORY DETECTION ...Fog-haze-mist, Spectral Distribution, Spectrum, Wave Analyzer, ...4.0095

#### Noise

- TURBULENCE STRUCTURE AND NOISE STUDY ...Additives, Turbulent, ...1.0002
- AMBIENT SEA NOISE INVESTIGATION ...Acoustic, Acoustical, Computer Applications, Waves, Wind-water Interaction, ...1.0048
- ARCTIC ACOUSTIC RESEARCH ...Applied Electronics, Arctic, Ice Acoustics, Transmission, ...1.0001

### Signal Analysis-other

- SOUND TRANSMISSION IN THE SEA ...Acoustical, Sonar, Transmission, ...1.0020
- UNDERWATER ACOUSTIC ANALYSIS ...Acoustical, Forecasting-prediction, Phase Relationships, Transmission, Water Properties-general, ...1.0038
- SIGNAL COHERENCE AND ARRAY DESIGN STUDIES ...Acoustical, Coherence, Reflection, Spectra, Waveform, ...1.0024

### Spectrum

- MOVABLE OCEAN MEASUREMENT SYSTEM ...Acoustical, Instrumental Services, Platforms, Spectral Distribution, ...8.0117
- AUDITORY DETECTION ...Fog-haze-mist, Interference, Spectral Distribution, Wave Analyzer, ...4.0095

### Transient

- DEVELOPMENT OF ANALYSIS TECHNIQUES FOR CLASSIFYING TRANSIENT HYDROACOUSTIC SIGNALS ...Acoustical, Acoustics, Seismic Studies, Signal Detection, ...1.0068

### Wave Analyzer

- AUDITORY DETECTION ...Fog-haze-mist, Interference, Spectral Distribution, Spectrum, ...4.0095

### Waveform

- SIGNAL COHERENCE AND ARRAY DESIGN STUDIES ...Acoustical, Coherence, Reflection, Signal Analysis-other, Spectra, ...1.0024
- SUBMERGED OPERATIONS COMMUNICATIONS (SUBCOM) ...Converters - Coders, Diving and Scuba, ...8.0023

## Solid State

### Amplifiers

- EXPERIMENTAL HIGH RESOLUTION SUB-BOTTOM PROFILING SYSTEM ...Receivers, Sonar, Sonar and Echo Sounding, Subbottom, Transducers, ...8.0109
- LOW NOISE MULTI-CHANNEL HYDROPHONE CABLE ...Bathymetry, Cables and Transmission Lines, Seismic Studies, Telephone, Transmission Lines, ...8.0145
- AEROLOGICAL INSTRUMENTS ...Field Testing, Humidity Instruments, Instrumental Services, Microwave Techniques, Technique Development, ...8.0082
- FREQUENCY TIME RESEARCH ENGINEERING ...Electromagnetic Transmission, Frequencies-other, Frequency Conversion, Time Measurements, Very Low Frequency, ...8.0068

### Detectors

- VISUAL LANDING AIDS FIELD ...Atmosphere Optical Phenomena, Electric Lighting Systems, Fog-haze-mist, Infrared Radiation, Lighting, ...4.0086

### Signal Generators

- WWV BROADCASTS ...Navigation, ...4.0089
- SATELLITE TIME DISSEMINATION ...Airborne Probing, Communication & Navigation, Doppler, Navigation, Standards, Specifications, Time Measurements, ...4.0091
- WWVB-WWVL BROADCASTS ...Frequency Standards, Low Frequency, Navigation, Radio, Standards, Specifications, Time Measurements, Very Low Frequency, ...4.0090

### Superconductive Device

- A DESIGN PROGRAM FOR SUPERCONDUCTING ELECTRICAL MACHINES ...Electrical, Electromechanical Design, Instrumental Services, Marine Propulsion, ...8.0132

## Transmission Lines

- LOW NOISE MULTI-CHANNEL HYDROPHONE CABLE ...Amplifiers, Bathymetry, Cables and Transmission Lines, Seismic Studies, Telephone, ...8.0145
- COLLECTION, ANALYSIS, INTERPRETATION, AND PRESENTATION OF OCEANOGRAPHIC - GEOLOGIC DATA IN CONNECTION WITH SUBMARINE CABLE SYSTEM DEVELOPMENT ...Cables and Transmission Lines, Data Acquisition, Data Analysis - General, Submerged Ships, ...7.0043

## Ultrasonic Technology

- ENVIRONMENTAL TEST AND EVALUATION ...Acoustic, Testing Facilities, Transducers, ...8.0128

**Electrophoresis****Disc Electrophoresis**

ELECTROPHORETIC PROFILES FOR THE IDENTIFICATION OF FISH SPECIES ...Fish -non-specific, Gel Electrophoresis, Infection, Intoxication & Pois, Legal Standards, ...6.0014

**Electrophoresis -non-specific**

STOCK IDENTIFICATION OF ATLANTIC TUNAS ...Atlantic Ocean-general, Caribbean Sea, Tuna, Mackerel, Albacore... , ...5.0252

**Gel Electrophoresis**

COMPARATIVE BIOCHEMISTRY OF PROTEINS FROM GULF FISH ...Blood Proteins -non-specific, Drums, Hemoglobin, Shrimps - Common, ...5.0326

ELECTROPHORETIC PROFILES FOR THE IDENTIFICATION OF FISH SPECIES ...Disc Electrophoresis, Fish -non-specific, Infection, Intoxication & Pois, Legal Standards, ...6.0014

**Elementary Particles****Magnetic Monopole**

SEARCH FOR FERROMAGNETICALLY TRAPPED MAGNETIC MONOPOLES OF COSMIC RAY ORIGIN ...Field Reversals, Magnetic Studies, Paleomagnetism, Physical Properties, ...7.0114

**Encapsulation**

HYDROGEN-OXYGEN FUEL CELLS ...Fuel Cell-other, Gas Generator, Oxidants, Safety, Submersibles, ...8.0160

**Endogenous Biological Extracts**

CONTROL OF PLANT PATHOGENS USING ACTIVE ANTIMICROBIAL SUBSTANCES ISOLATED FROM MARINE ALGAE ...Bacteria, Fungi -non-specific, Growth Substances, Marine Plants, Nutrition in Disease, ...6.0127

**Energy**

OCEANOGRAPHY, PLEISTOCENE GEOLOGY AND SEDIMENTS OF LITTLE BAHAMA BANK ...British West Indies, Carbonates-general, Currents-bottom, Quaternary Period, Water Motion Recorders, ...7.0229

STUDY OF OCEANIC TURBULENCE ...Hydrodynamics, Mixing, Subsurface Environments, Turbulence - Sea Water, Water Motion, ...2.0055

BIOCHEMICAL AND BIOPHYSICAL STUDIES OF THE MARINE ENVIRONMENT ...Copepods, Energy Budgets, Organics, Productivity - Food Chain, ...5.0767

OCEAN CURRENTS AND CIRCULATION ...Circulation-general, Currents-ocean, Data Acquisition, Model Studies, Temperature, ...2.0015

GREAT LAKES RESEARCH - COASTAL AREA SEDIMENTATION ...Beach, Development, General Transport Effects, Great Lakes-general, Model Studies, Sedimentation, ...7.0124

**Engineering Geology**

PRELIMINARY STUDIES TO CORRELATE SELECTED MINERALOGIC AND GEOLOGIC PROPERTIES WITH ENGINEERING PROPERTIES ...Alaska, Mineralogy, Petrology, Ships and Cruises, Trace Element Analysis, ...8.0169

**Engineering Mechanics****Analysis**

VISCO-ELASTIC DYNAMIC VIBRATION ABSORBER ...Close Channel, Drag, Energy Dissipators, Hydraulic Equipment, Vibrating Systems-other, Viscous, ...8.0188

**Forces and Loading****Random**

AN INVESTIGATION OF THE S/N FATIGUE LIFE GAGE ...Stress Recorders, ...8.0100

**Static**

DETERMINATION OF FLOW IN AN AXIAL-TO-RADIAL DIFFUSER WITH SWIRL ...Configuration of Body, Impinging Jets, Model Apparatus-other, Pressure Gradient, Rotors-propellers, ...8.0187

**Mechanical Vibrations****Non-linear**

INVESTIGATION OF THE NON-LINEAR CHARACTERISTICS OF FLUID-SUSPENDED VEHICLES ...Dimensionless-parameters-other, Hydrofoils Crafts, Non Linear, Simulation Theory, Stability, ...8.0184

**Response**

AN ANALYSIS OF THE RESPONSE OF CYLINDRICAL DUCTS TO INTERNAL, ZERO MEAN FLOW, AIR-CAVITY-INDUCED ACOUSTIC EXCITATION ...Acoustic Field, Close Channel, Geometric Configuration, ...8.0181

**Vibrating Systems-other**

VISCO-ELASTIC DYNAMIC VIBRATION ABSORBER ...Analysis, Close Channel, Drag, Energy Dissipators, Hydraulic Equipment, Viscous, ...8.0188

**Moments**

STRESSES DEVELOPED ON THE SURFACE OF CYLINDRICAL JOINTS SUBJECTED TO MULTIPLE LOADS ...Analysis Structural, Geometric Configuration, Joints, Stress Concentration, Stresses, ...8.0304

**Stability**

INVESTIGATION OF THE NON-LINEAR CHARACTERISTICS OF FLUID-SUSPENDED VEHICLES ...Dimensionless-parameters-other, Hydrofoils Crafts, Non Linear, Non-linear, Simulation Theory, ...8.0184

WAVE ACTION ON STRUCTURES ...Engineering Structures-general, Hydrodynamic Structures, Models, Shoreline Structures, Wave Action, Waves, ...8.0175

**Strength**

A STUDY OF THE INTERFACE LOCATIONS BETWEEN DIS-SIMILAR MATERIALS AND OTHER ASPECTS OF A COMPOSITE MIDSHIP SECTION ...Bulkheads, Hull, Hydrodynamic Structures, ...8.0294

**Stress Concentration**

STRESSES DEVELOPED ON THE SURFACE OF CYLINDRICAL JOINTS SUBJECTED TO MULTIPLE LOADS ...Analysis Structural, Geometric Configuration, Joints, Moments, Stresses, ...8.0304

**Stresses**

STRESSES DEVELOPED ON THE SURFACE OF CYLINDRICAL JOINTS SUBJECTED TO MULTIPLE LOADS ...Analysis Structural, Geometric Configuration, Joints, Moments, Stress Concentration, ...8.0304

**Engineering Structures-general**

STREAM IMPROVEMENT PLANNING ...Benefit-cost Analysis, Fish -non-specific, Management -other, Planning, Streams, ...5.0220

EFFECTS OF MARSH MANAGEMENT STRUCTURES UPON FISHES ...Alewife,menhaden,shad,herring, Crabs, Land Use, Shrimps - Common, Spawning & Nesting Sites, Swamps-marshes, ...5.0206

STABILITY OF RUBBLE-MOUND BREAKWATERS ...Breakwaters, Design Criteria, Hydrodynamics, Shoreline Structures, Wave Action, Waves, ...8.0045

WAVE ACTION ON STRUCTURES ...Hydrodynamic Structures, Models, Shoreline Structures, Stability, Wave Action, Waves, ...8.0175

CORRELATION OF BEACH PROPERTIES AND INCIDENT WAVES ...Beach, Development, General Transport Effects, Sea Level Variations, Shoreline Structures, Waves, ...8.0204

ADULT SALMON BEHAVIOR STUDIES IN RIVERS AND AT DAMS (SONIC TRACKING) ...Behavioral Ecology, Salmon & Trout - Non-specific, Streams, Tags, Telemetry, ...8.0111

COLLECTION OF JUVENILE MIGRANTS FROM RIVERS AND STREAMS ...Electric Power Plants, Fish -non-specific, Management -other, Migration, Streams, ...5.0513

## Engineering Structures-general

## SUBJECT INDEX

- RELATION OF RIVER-RUN IMPOUNDMENTS TO SALMON PRODUCTION ...Aquatic Ecology, Environmental Changes, Environmental Ecology, Mans Activities, Pollution - Effects of , Salmon & Trout - Non-specific, ...5.0222
- SALMON PRODUCTION IN AREAS MADE INACCESSIBLE BY DAMS ...Aquatic Ecology, Columbia River, Environmental Ecology, Salmon & Trout - Non-specific, Spawning & Nesting Sites, ...5.0224
- FISH BEHAVIOR AND PHYSIOLOGY ...Behavior, Environmental Physiology, Migration, Salmon & Trout - Non-specific, Thermal Pollution, ...5.0331
- FISHWAY RESEARCH (BONNEVILLE LABORATORY) ...Behavioral Ecology, Environmental Ecology, Management - other, Migration, Salmon & Trout - Non-specific, ...8.0016
- PROTECTION OF FINGERLING SALMON IN TURBINES ...Construction Land Use Effects, Migration, Mortality Rates, Salmon & Trout - Non-specific, Snake River, ...8.0014
- EVALUATION OF ENGINEERING PROJECTS AND ESTUARINE DATA (ESTUARINE PROGRAM) ...Commercial Fishing, Estuaries, Gulf of Mexico, Habitat Studies, Swamps-marshes, ...9.0021

## Engineering Studies-general

- PASSIVE BUOYANCY SYSTEMS ...Buoyant, Flotational, Foam, Porous, Materials Used Undersea, Other-design-and-construction, Submersibles, ...8.0263
- APPLIED MARINE ENGINEERING PROGRAM AT SCRIPPS INSTITUTION OF OCEANOGRAPHY ...California, Harbors, Marine Biology, Marine Biology (non-specific), Other-design-and-construction, Scientific-service-support, Teaching and Research, Training Grants, Fellowships, ...11.0006
- SYMPOSIUM ON THE MINERAL RESOURCES OF THE WORLD OCEAN ...Meetings, Ocean Mining, Policy Making, Rhode Island, ...7.0027
- OCEAN ENGINEERING RESEARCH ...Alloys, Materials Used Undersea, Moorings, Water, Water Properties-general, ...8.0050
- HANDBOOK OF MARINE TECHNOLOGY ...General Sea Water Chemistry, Geology-general, Handbooks, Marine Biology, Meteorological Studies, Submersibles, ...11.0014
- OCEAN ENGINEERING STUDIES ...Applied Electronics, Data Acquisition, Data Processing Services, Instrumental Services, Laboratory Analysis, Sonar, ...8.0052
- DEEP OCEAN RESEARCH AND DEEP OCEAN ENGINEERING ...Abyssal, Geophysics-general, Marine Biology, Structural Studies, Submersibles, Textures-structures, ...4.0131
- WOODS HOLE STUDY ACTIVITIES ...Acoustical, Consultants, Advisory Services, General Information Services, ...11.0031
- THERMALLY SUSTAINED PRESSURE OSCILLATIONS IN LIQUID HELIUM APPARATUS ...Boiling & Evaporation, Boundary-layer-other, Conduction, Heat-transfer-other, Model Apparatus-other, Pressure Gradient, ...8.0024
- CONTROL OF SUPERCONDUCTING MACHINES FOR SHIP PROPULSION ...Marine Propulsion, Mathematical Analysis, Model Studies, Operational Aspect, ...8.0301
- ADVANCED DEEP OCEAN TECHNOLOGY ...Life-support-system, Marine Propulsion, Submersibles, ...8.0282

## Engineering Studies-other

- STABLE OCEANIC STATION ...Floating Structure Stability, Platforms, Underwater-construction, ...8.0287
- OCEANOGRAPHIC DATA SYSTEMS ...Acoustical, Data & Statistics Storage, Hydrodynamics, Instrumentation-general, Pollution Sources-general, ...4.0013
- OCEANOGRAPHIC ENGINEERING ...Bathythermographs, Experiments and Tests, Other-design-and-construction, Platforms, Special Mission Ships, ...8.0269
- EFFECTS OF DEEP SEA SEDIMENTS ON SUDDEN IMPACT, AS FROM DISASTER VEHICLES ...Coring and Dredging, Marine Soils, Mechanical Properties, Physical Properties, Shear Strength, ...7.0228
- CIVIL ENGINEERING STRUCTURES IN THE OCEANS ...Coastal Engineering-other, Foundations-general, Model Studies, Soil Dynamics, Waves, ...8.0340
- INVESTIGATION OF NAVAL SHIP FORMS ...Bulkheads, Military Aspects, ...8.0300
- AN INVESTIGATION OF THE PERFORMANCE OF A COLUMN STABILIZED PLATFORM ...Experiments and Tests, Models, Platforms, Ship Resistance Stability, ...8.0296

- OPTIMIZATION METHODS APPLIED TO THE PRELIMINARY DESIGN OF A NAVAL AUXILIARY ...Algorithms, Cost Analysis, Optimization Technique, Other-design-and-construction, Requirement, ...8.0277
- EFFECTS OF MATERIAL VARIATIONS IN THE COMPUTERIZED DESIGN OF PRIMARY HULL STRUCTURE ...Bulkheads, Computer Applications, Low Alloy Steels, Materials Used Undersea, Strength, Cohesion, ...8.0298
- AN OPTIMUM LOADING SEQUENCE FOR CONTAINER-SHIPS ...Computer Applications, Freight, Loading/unloading, Model Studies, Packing, ...8.0033
- ESTIMATION OF HULL STEEL WEIGHTS FROM MIDSHIP SECTION CHARACTERISTICS ...Bulkheads, Measuring Devices-other, Naval Architecture-general, ...8.0303
- USE OF TIDAL POWER AND OTHER OCEAN ENERGY SOURCES ...Bibliography, Economics, Mechanical Power-other, Survey Studies, Tides, ...2.0084
- ANALYSIS OF AN ATTEMPT TO CONTROL BEACH EROSION AT SCIENTISTS CLIFFS, MARYLAND ...Beaches, Chesapeake Bay, Erosion, Groin, Maryland, ...8.0038
- SWIMMER HIGH DEFINITION SONAR ...Diving and Scuba, Diving-system, Maintenance-system, Sonar, Underwater-construction, ...8.0019
- CONSTRUCTION SYSTEMS ...Benthonic-bottom, Equipment, Submerged Ships, Underwater-construction, ...8.0170
- STUDY OF EFFECTS OF OFFSHORE DUMPING ...Circulation-general, Dispersion -water, Pollution - Effects of , Pollution Sources-other, Shoreline - Coastline, ...6.0144

## Entomology

### Cultural Control of Insects

- THE EFFECT OF CONTROLLING SALT-MARSH MOSQUITOES ON BEEF CATTLE PRODUCTION, PLANT ECOLOGY, SOIL PRODUCTIVITY, AND ESTUARINE ANIMALS ...Ectoparasitic Insects, Management, Wetlands, ...5.0927

### Growth, Moulting & Metamorph

- REVISION OF GENERA AND SUBGENERA OF WATER MITES OF THE WORLD ...Animal Taxonomy, Nomenclature, Classification, Publications -other, Ticks & Mites, World Wide, ...5.0627

### Locomotion

- NEUROPHYSIOLOGICAL MECHANISMS IN BEHAVIOR ...Giant Water Bug, Water Strider, Horseshoe Or King Crabs, Proprioceptors, ...5.0490

### Musculoskeletal System

- CONDUCTION AND INTEGRATION ...Behavior, Cellular Physiology, Hydra, Portuguese Man-of-war, Katydid, Nervous System, ...5.1018

### Nutrition and Metabolism

- ULTRASTRUCTURE OF CELL ION TRANSPORT MECHANISMS ...Active Transport, Electron Microscopy, Mitochondrial Membranes, Osmoregulation, Respiratory System, ...5.0974

### Tumors

- THE DISEASES OF INVERTEBRATE ANIMALS ...Developmental Physiology, Immunology, Invertebrate Pathology, ...5.0536

### Veterinary Entomology

#### Ectoparasitic Insects

- THE EFFECT OF CONTROLLING SALT-MARSH MOSQUITOES ON BEEF CATTLE PRODUCTION, PLANT ECOLOGY, SOIL PRODUCTIVITY, AND ESTUARINE ANIMALS ...Cultural Control of Insects, Management, Wetlands, ...5.0927

## Environmental Changes

- PALEONTOLOGICAL EVIDENCE OF CYCLES IN THE EARTH-MOON SYSTEM ...Comparative Studies-other, Invertebrates, Origins, Shells, Thin Sections, Tides, ...7.0167

- REGIONAL COASTAL CHANGE ...Development, Quaternary Period, Shoreline - Coastline, ...7.0301
- CHEMICAL RESPONSES BY MARINE ORGANISMS TO STRESS ...Environmental Ecology, Environmental Physiology, Protein, Salinity, Thermal, ...5.1026
- ENVIRONMENTAL CHANGES IN LAKE ERIE ...Aquatic Ecology, Environmental Ecology, Ions and Gases, Lake Erie, Nutrients, ...5.0903
- PILOT STUDY OF LIMITED PORTION OF TRADE WIND ZONE OCEANOGRAPHY (DATA AND DESCRIPTIVE REPORTS) ...Oceanic Fronts, Pacific Ocean-north, Technique Development, Water Properties-general, ...4.0129
- ANALYZE AND PUBLISH BASIC DATA FROM PILOT STUDY ...Oceanic Fronts, Pacific Ocean-general, Salinity, Technique Development, Thermal, ...4.0024
- RELATION OF RIVER-RUN IMPOUNDMENTS TO SALMON PRODUCTION ...Aquatic Ecology, Engineering Structures-general, Environmental Ecology, Maris Activities, Pollution - Effects of , Salmon & Trout - Non-specific, ...5.0222
- CIRCULATION DYNAMICS (GULF OCEANOGRAPHY PROGRAM) ...Circulation-general, Gulf of Mexico, Shrimps - Common, Thermodynamics, ...2.0045

**Environmental Effects-geologic**

- HAWAIIAN OCEANOGRAPHY ...Circulation-general , Hawaii, Hydrodynamics, Islands, Ocean Currents-other, ...2.0021
- THE PORIFERA OF FANNING ISLAND, CENTRAL PACIFIC ...Animal Taxonomy, Dispersion -other, Line Islands, Porifera, ...5.0539
- ECOLOGY AND SEDIMENTARY PATTERNS OF FORAMINIFERA ...Chemistry, Environmental Ecology, Foraminifera, Vertical Distribution, ...5.0746
- THE SEDIMENTARY AND DIAGENETIC RECORD OF ENVIRONMENTAL PARAMETERS IN RECENT BAHAMIAN TIDAL FLATS ...British West Indies, Diagenesis, Intertidal Areas, Local Stratigraphy, Paleoclimatology, ...7.0163
- THEORETICAL STUDIES OF TSUNAMI PROPAGATION ...Depth, Forecasting-prediction, Geomorphology-topography, Tsunami, Waves, ...2.0122
- ARCTIC FIELD RESEARCH ...Arctic Ocean, Bibliography, Geophysics-general, Russia, ...11.0011
- UTILIZATION OF PHYSICAL AND MATHEMATICAL MODELS IN MARINE WATER RESOURCES RESEARCH AND MANAGEMENT ...Estuaries, Management, Mathematical Analysis, Model Studies, Shoreline - Coastline, ...4.0084
- OCEANOGRAPHIC RESEARCH-INVESTIGATIONS IN SHALLOW WATER ...Acoustical, Model Studies, Salinity, Thermal, Water Motion, ...1.0009
- SHALLOW WATER OCEANOGRAPHY (SEALAB III) ...Diving and Scuba, Diving-system, Instrumentation-general, Underwater-laboratory, ...1.0146
- ARCTIC UNDERSEAS RESEARCH, PHYSICAL AND CHEMICAL PROPERTIES OF SEA ICE ...Arctic Ocean, Ice Properties-general, Model Studies, Sea Ice, ...3.0070
- SHALLOW WATER OCEANOGRAPHY ...Continental Shelf, Forecasting-prediction, Pressure, Subsurface Environment, Waves, ...1.0172
- PREDICTIVE OCEAN ACOUSTICS ...Acoustical, Forecasting-prediction, Transmission, Velocity, ...1.0034
- DESIGN AND CONSTRUCTION ...Coatings-general, Hydrodynamic Structures, Safety, Underwater-construction, Water, ...8.0333
- LABORATORY STUDIES TO DETERMINE ROCK PROPERTIES UNDER HYDROSTATIC (SEA WATER) PRESSURE ...Marine Environments-general, Physical Properties, Rock Mechanics, Survey Studies, ...8.0330
- HISTORICAL STUDY ON EFFECT OF HARBOR DREDGING ON THE ENVIRONMENT (ENVIRONMENTAL FACTORS PERTINENT TO EFFECTS ON MARINE ENVIRONMENTS) ...Dredging, Excavation, Harbors, Marine Environments-general, Ocean Mining, ...6.0135
- THE EFFECTS OF ENVIRONMENTAL CONDITIONS ON THE SPAWNING AND SURVIVAL OF FRY OF THE WALLEYE ...Eutrophication, Lake Erie, Pollution - Effects of , Temperature, Walleyes, ...5.0299
- SURVEY, EVALUATION & SUMMARIZATION OF LITERATURE ON ENVIRONMENTAL REQUIREMENTS OF MARINE ORGANISMS LEVELS OF POTENTIAL TOXICANTS (ABBREV ...Biology, Chemical, Geosciences, Library, Marine Biology, Marine Environments-general, Survey Studies, ...4.0037

**Environmental Factors-geologic**

**Chemical**

- SURVEY, EVALUATION & SUMMARIZATION OF LITERATURE ON ENVIRONMENTAL REQUIREMENTS OF MARINE ORGANISMS LEVELS OF POTENTIAL TOXICANTS (ABBREV ...Biology , Environmental Effects-geologic, Geosciences, Library, Marine Biology, Marine Environments-general, Survey Studies, ...4.0037

**Physical**

- PHYSICAL GEOGRAPHY OF TROPICAL COASTAL LOWLANDS ...Development, Geography-physical, Physical Features-general, Shore Features-general, Tropic, ...7.0298

**Geomorphology**

- ISLAND-CURRENT INTERACTIONS ...Acoustical, Currents-ocean, Data Analysis - General, Islands, Model Studies, ...2.0116

**Tides**

- PALEONTOLOGICAL EVIDENCE OF CYCLES IN THE EARTH-MOON SYSTEM ...Comparative Studies-other, Environmental Changes, Invertebrates, Origins, Shells, Thin Sections, ...7.0167

- DRAINAGE PATTERN DEVELOPMENT ON TIDAL MARSHES ...Aerial Photography, Drainage, Swamps-marshes, ...7.0291

**Environments - Animal**

**Chemical Measurements -water**

- MEASUREMENT OF BIOLOGICAL FACTORS OF VARIOUS HABITATS, AND THEIR RELATION TO THE BIOLOGY OF THE COMMERCIALY IMPORTANT SPECIES ...Habitat Studies, Physical Measurements -water, Plankton (non-specific), Population Dynamics, Productivity - Food Chain, ...5.0219
- FISH POPULATION STUDY ...Commercial Fishing, Fish -non-specific, Food Supply, Population Dynamics, Water Temperature-non-specific, ...5.0174
- PHYSIOLOGY AND BEHAVIOR ...Behavior, Environmental Physiology, Lake Michigan, Physical Measurements -water, Productivity - Food Chain, ...5.0904

**Contamination - Water**

- THE ACCUMULATION OF FISSION PRODUCTS BY MARINE FISH AND SHELLFISH ...Chlorideae (non-specific & Ot), Estuaries, Food Chains, Radioactivity-general, Radioecology, ...6.0167
- ECOLOGICAL STUDIES OF RADIOACTIVITY IN THE COLUMBIA RIVER ESTUARY AND ADJACENT PACIFIC OCEAN ...Columbia River, Organism Sampling Devices, Pacific Ocean-north, Pollutants - Path of , Radioactivity-general, ...6.0172
- COLUMBIA RIVER STUDIES ...Columbia River, Invertebrates, Oysters, Pollution Effects, Radioactivity-general, Reproductive System, ...5.0518
- EFFECTS OF LOG RAFTING ON DUNGENESS CRAB ...Crabs, Diving and Scuba, Forestry, Mans Activities, Pulp, Paper , and Logging, ...5.0347
- DETERMINATION OF SAFE LEVELS OF POLLUTION IN PUERTO RICO ...Bays, Meteorological Studies-general, Pollution - Effects of , Puerto Rico, Recreation Sites, Water Properties-general, ...6.0181
- ESTUARINE WATER QUALITY AND FISH DISTRIBUTION ...Environmental Physiology, Estuaries, Pollution Effects, Pulp, Paper , and Logging, Salmon & Trout - Non-specific, ...5.0178
- EFFECTS OF KRAFT PULP MILL EFFLUENTS ON THE GROWTH AND PRODUCTION OF FISH ...Industrial Wastes, Pollution - Effects of , Pollution Effects, Population Dynamics, Pulp, Paper , and Logging, Salmon & Trout - Non-specific, ...5.0311
- EFFECT OF EURASIAN WATERMILFOIL CONTROL PROCEDURES ON WILDLIFE AND OTHER ORGANISMS IN AQUATIC ENVIRONMENTS ...Diquat, Evaluation, Water Milfoil, Waterweed... , 2,4-d, ...5.0700
- ACCUMULATION OF RADIOACTIVITY BY INVERTEBRATES (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Cooperative-studies, Diagnostic Procedures, Radioactivity-general, Reactor Sites & Rad Waste, ...5.0474

## Environments - Animal

## SUBJECT INDEX

- ACCUMULATION OF RADIONUCLIDES BY VERTEBRATES (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Biological, Estuaries, Radioactivity-general, ...5.0293
- ACCUMULATION OF RADIOACTIVITY BY ORGANISMS IN EXPERIMENTAL MARINE ENVIRONMENTS ...Cooperative-studies, Estuaries, Laboratory, Radioactivity, ...5.0911
- EFFECTS OF CHEMICALS ON THE PHYSIOLOGY OF SEA LAMPREY AMMO CETES (PETROMYZON MARINUS) ...Control of Nuisance Species, Environmental Physiology, Lampreys, Maturity & Growth Stages, ...5.0631
- LABORATORY BIOASSAYS ...Fish, Laboratory Animals, Pollution - Effects of, Pollution - general, ...5.0882
- FISH HOLDING AND LIFE STAGE SENSITIVITY ...Environment Resistance, Fish, Fish -non-specific, Great Lakes-general, Maturity & Growth Stages, ...5.0276
- ENVIRONMENTAL CONDITIONS AND POPULATION DYNAMICS IN SELECTED UNPOLLUTED ESTUARIAL AND COASTAL AREAS ...Aquatic Ecology, Habitat Studies, Marine Biology (non-specific), Pollution - Effects of, Toxic Substances -non-specific, ...5.0922
- MARINE BIOLOGICAL ASSESSMENT OF POLLUTIONAL FATE ...Crustacea -non-specific, Fish -non-specific, Nets, Pollution - Effects of, ...6.0176
- HISTOPATHOLOGIC EFFECTS OF POLLUTANTS ON CELLS AND TISSUES OF MARINE FISHES ...Killifishes - Cyprinodon, Pathology, Pollution - Effects of, Pollution Effects, ...5.0323
- HISTOPATHOLOGIC EFFECTS OF POLLUTANTS ON CELLS AND TISSUES OF MARINE INVERTEBRATES ...Clams, Invertebrate Pathology, Pathology, Pollution - Effects of, Pollution Effects, Pollution Sources-other, ...5.0497
- PHARMACOLOGY OF METAL POISONING IN ESTUARINE FISHES ...Estuaries, Killifishes - Cyprinodon, Metals -non-specific, Stress, ...5.0324
- EFFECTS OF PETROLEUM AND PETROLEUM WASTES UPON IMPORTANT SPECIES OF ESTUARINE PHYTOPLANKTON AND ZOOPLANKTON ...Contamination, Pollution-water, Estuaries, Oil, Oil and Natural Gas - Sulfur, Phytoplankton, Zooplankton, ...5.0830
- PURIFICATION OF HARD CLAMS FROM POLLUTED WATERS ...Animal Viruses (non-specific), Clams, Estuaries, Intestinal Bacteria, New Jersey, ...5.0467

### Energy Budgets

- EXPERIMENTAL STUDIES ON THE BIOLOGY AND FOOD CHAIN ECONOMICS OF THE CHAETOGNATHS ...Productivity - Food Chain, Reproductive System, Whole Body Culture & Rearing, Zooplankton, ...5.0777
- METABOLISM OF MARINE ECOSYSTEMS ...Food Webs, Metabolism, Other, Plankton (non-specific), Productivity - Food Chain, ...5.0966
- METABOLISM OF COMPLETE WATER COLUMNS ...Antarctic Ocean, Autotrophic, Metabolism, Respiration, ...5.0967
- CALORIC STUDIES OF SPARTINA AND THE MARSH CRAB SESARMA RETICULATUM ...Calorimetry, Chlorideae (non-specific & Ot), Crabs, Swamps-marshes, ...5.0380
- ENERGY AND ELEMENT TRANSFER IN LOWER MARINE TROPHIC LEVELS ...Copepods, Oregon, Phytoplankton, ...5.0823
- BIOCHEMICAL AND BIOPHYSICAL STUDIES OF THE MARINE ENVIRONMENT ...Copepods, Energy, Organics, Productivity - Food Chain, ...5.0767
- PHYSIOLOGICAL VARIATION AND ECOLOGY OF MOLLUSCS ...Gastropods -slugs,conch,snails, Metabolism, Population Dynamics, Reproductive System, Respiratory System, ...5.0472
- ENERGY TRANSFER IN LOWER MARINE TROPHIC LEVELS ...Aquatic Ecology, Environmental Ecology, Productivity - Food Chain, Vertical Distribution, ...5.1020

### Gases, Dissolved -water

- EFFECT OF SUPERSATURATION OF DISSOLVED NITROGEN ON MIGRATING SALMONIDS ...Aquatic Ecology, Columbia River, Migration, Mortality Rates, Nitrogen, Salmon & Trout - Non-specific, ...5.0221
- EFFECTS OF HIGH TEMPERATURE, LOW OXYGEN, AND PH EXTREMES ON THE SURVIVAL OF AQUATIC INSECTS AND CRUSTACEA IMPORTANT AS TROUT FOOD ...Aquatic Ecology, Food Supply, High Temp. -85f Or Above, Lake Superior, Ph, Acidity -water, ...5.0464

### Gravity

- SIMULATED WEIGHTLESSNESS IN FISH ...Behavior, Cardiovascular System, Fish -non-specific, Gravitational Fields, Proprioceptors, ...5.0275

### Light -other

- CUES INVOLVED IN VERTICAL MOVEMENT AND STATIC ORIENTATION OF GASTROPODS ...Behavior, Gastropods -slugs,conch,snails, Invertebrate Physiology, Locomotion, ...5.0462
- THE STRUCTURE AND FUNCTION OF CRUSTACEAN EYES ...Crustacea -non-specific, Invertebrate Anatomy, Oceanic -Pelagic, Vertical Distribution, Visual Organs, ...5.0363

### Light Quality

#### Light Quality -non-specific

- THE SPECTRAL SENSITIVITY OF THE GREEN SEA TURTLE (CHELONIA MYDAS) ...Turtles, Terrapins, Tortoises, Visual Organs, ...5.0560

### Light Quantity Or Intensity

#### Darkness

- RETINAL RHYTHMS UNDER CONTROLLED LIGHT ...Blue-fish, Histology and Cytology, Light Quantity -non-specific, Visual, Visual Organs, ...5.0282

#### Light Quantity -non-specific

- RETINAL RHYTHMS UNDER CONTROLLED LIGHT ...Blue-fish, Darkness, Histology and Cytology, Visual, Visual Organs, ...5.0282

### Magnetic Impulses

- DISTANT GOAL ORIENTATION ...Biological Rhythms, Birds -non-specific, Locomotion -animal, Mark, Tag Or Capture -other, Orientation, ...4.0109

### Mineral Content -water

- PRELIMINARY MODIFICATIONS AND CONTROL OF NATURAL GROWING AREA ENVIRONMENTS ...Captive Rearing, Clams, Growth Rate, Oysters, Predation, ...5.0495

### Organic Matter Content -water

- ECOLOGICAL SIGNIFICANCE OF PARTICULATE MATTER IN THE SEA ...Atlantic Ocean-north, Interbiotic Relat.(non-specific), Marine Bacteria, Temporal Distribution, Vertical Distribution, Zooplankton, ...5.0754

### Ph, Acidity -water

- PHYSIOLOGY AND BEHAVIOR OF LARVAE (PHYSIOECOLOGY OF SHELLFISH PROGRAM) ...Basic Embryology, Behavior, Clams, Maturity & Growth Stages, Oysters, ...5.0373
- EFFECTS OF HIGH TEMPERATURE, LOW OXYGEN, AND PH EXTREMES ON THE SURVIVAL OF AQUATIC INSECTS AND CRUSTACEA IMPORTANT AS TROUT FOOD ...Aquatic Ecology, Food Supply, Gases, Dissolved -water, High Temp. -85f Or Above, Lake Superior, ...5.0464

### Photoperiod

- LIGHT AND DARK ADAPTION IN THE RETINAE OF YOUNG BLUEFISH ...Adaptation, Bluefish, Retina, Visual Organs, ...5.0283
- RHYTHMIC ACTIVITY OF BLUEFISH IN RELATION TO NORMAL LIGHT REGIME ...Biological Rhythms, Bluefish, Environmental Physiology, Locomotion -animal, ...5.0285
- RHYTHMIC ACTIVITY OF BLUEFISH UNDER EXPERIMENTALLY VARIED LIGHT REGIMES ...Adaptation, Biological Rhythms, Bluefish, Environmental Physiology, Water Light Quality & Quantity, ...5.0286

### Physical Measurements -water

- MEASUREMENT OF BIOLOGICAL FACTORS OF VARIOUS HABITATS, AND THEIR RELATION TO THE BIOLOGY OF THE COMMERCIALY IMPORTANT SPECIES ...Chemical Measurements -water, Habitat Studies, Plankton (non-specific), Population Dynamics, Productivity - Food Chain, ...5.0219
- PHYSIOLOGY AND BEHAVIOR ...Behavior, Chemical Measurements -water, Environmental Physiology, Lake Michigan, Productivity - Food Chain, ...5.0994

**Radioactive Fallout**

- PHYSICAL AND RADIOLOGICAL CHEMISTRY OF OCEAN SOLUTIONS ...Chemical Reactions, Octopus, Squid, Cuttlefish... , Pacific Ocean-north, Radioactivity-general, Tracers, ...1.0133
- THE EFFECTS OF RADIATION ON THE PHYSIOLOGY OF MARINE ORGANISMS (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Cooperative-studies, ...5.0294

**Seasonal**

**Spring**

- SPRING DISTRIBUTION OF FISHES ...Commercial Fishing, Continental Shelf, Data Acquisition, Environmental Ecology, Fish -non-specific, Temporal Distribution, ...5.0154

**Winter**

- EFFECT OF PROCESS ON SHELLFISH ...Clams, Processed Product Quality, Processing, Sanitation, Shelf Life & Storage, ...6.0059
- WINTER DISTRIBUTION OF FISHES ...Continental Shelf, Environmental Ecology, Fish -non-specific, Salinity, Temperature, Temporal Distribution, ...5.0153

**Temperature -water**

**High Temp. -85f Or Above**

- EFFECTS OF HOT WATER MASSES ON MARINE FISHES ...Atlantic Ocean-north, Behavior, Fish -non-specific, Oceanic Fronts, Thermal, ...5.0210
- EFFECTS OF HIGH TEMPERATURE, LOW OXYGEN, AND PH EXTREMES ON THE SURVIVAL OF AQUATIC INSECTS AND CRUSTACEA IMPORTANT AS TROUT FOOD ...Aquatic Ecology, Food Supply, Gases, Dissolved -water, Lake Superior, Ph, Acidity -water, ...5.0464

**Low Temp. -but Above 32f**

- LIPID COMPOSITION OF ANTARCTIC MARINE ORGANISMS AND SEA WATER ...Antarctic Ocean, Fish -non-specific, Gulf of Mexico, Lipids, Phytoplankton, Productivity - Food Chain, Zooplankton, ...5.1031
- THE PURCHASE AND INTRODUCTION OF BROOD STOCK ...Oysters, Ponds, Spawning & Nesting Sites, Stocking of Fish & Shellfish, Warm Water, ...8.0026
- RELATION OF TEMPERATURE TO RHYTHMIC BEHAVIOR ...Behavior, Biological Rhythms, Bluefish, Environmental Physiology, Locomotion -animal, ...5.0284
- ESTUARINE BIOLOGY--RESPONSE OF LARVAE TO TEMPERATURE AND SALINITY ...Alewife,menhaden,shad,herring, Captive Rearing, Estuaries, Longevity, Maturity & Growth Stages, Water Salinity, ...5.0213
- PREDICTION OF ENVIRONMENT ...Biological-general, Columbia River, Environmental Ecology, Physical-general, Reservoirs and Impoundments, Salmon & Trout - Non-specific, Snake River, Temperature, Thermal Pollution, ...5.0225
- FISHERY FORECASTING - TEMPERATE FISHERIES ...Circulation-general, General Synoptic Observations, Pacific Ocean-east, Temperature, ...5.0197
- INITIATION OF METAMORPHOSIS IN AURELIA ...Biological Rhythms, Growth Rate, Jelly Fish, Metabolism, Water Light Quality & Quantity, ...5.0599

**Warm Water**

- AQUATIC MYXOBACTERIA - CHONDROCOCCUS COLUMNARIS ...Atlantic Salmon, Sebago Salmon, Identification, Myxobacteria, Pathology, ...5.0848
- THE PURCHASE AND INTRODUCTION OF BROOD STOCK ...Low Temp. -but Above 32f, Oysters, Ponds, Spawning & Nesting Sites, Stocking of Fish & Shellfish, ...8.0026
- REPOPULATION OF DECIMATED SECTIONS OF WARM-WATER STREAMS BY LONGEAR SUNFISH, LEPOMIS MEGALOTIS (RAFINESQUE) ...Aquatic Ecology, Population Dynamics, Stocking of Fish & Shellfish, Streams, Sunfish, Rock & Roanoke Bass., ...5.0097

**Water Temperature-non-specific**

- EFFECTS OF IRRADIATION, TEMPERATURE AND OTHER ENVIRONMENTAL FACTORS ON SALMONID EMBRYOS ...Basic Embryology, Radiation Effects-non-specific, Salmon & Trout - Non-specific, Water Light Quality & Quantity, X and Gamma Rays, ...5.0336
- TEMPERATURE NEEDS FOR GONADAL DEVELOPMENT AND SPAWNING OF DIFFERENT PHYSIOLOGICAL

- RACES OF THE AMERICAN OYSTER, CRASSOSTREA VIRGINICA ...Behavior, Biological Rhythms, Environmental Physiology, Oysters, Reproductive System, ...5.0352
- EVOLUTIONARY DIVERGENCE OF ONUPHID POLYCHAETES ...Comparative Physiology, Environment Resistance, Environmental Physiology, Invertebrate Nutrition, Lugworms, Marine Segmentedworm, ...5.0663
- ZOOPTHOLOGY OF OCEANIC BENTHIC ANIMALS OFF THE NORTH CAROLINA COAST ...Adaptation, Atlantic Ocean-north, Benthic Fauna, Benthonic-bottom, Environmental Physiology, ...5.1009
- THERMALMETABOLIC RELATIONSHIPS OF STENOTHERMAL FISHES ...Antarctica, Environmental Physiology, Fish -non-specific, Proprioceptors, Thermoregulation, Water Pressure, ...5.0312
- LOCATION OF INSHORE SPAWNING AREAS ...Bluefish, Long Island Sound, Nets, Spawning & Nesting Sites, ...5.0201
- CHEMICAL AND PHYSICAL DATA ...Fish -non-specific, Population Dynamics, Temperature, Turbidity & Suspended Matter, Water Movement, Currents,, Water Salinity, ...5.0207
- A STUDY OF THE ICHTHYOPLANKTON ASSOCIATED WITH TWO OF NEW JERSEYS COASTAL INLETS ...Estuaries, Nets, Salinity, Thermal, Water Salinity, Zooplankton, ...5.0806
- THE INFLUENCE OF ENVIRONMENTAL FACTORS UPON DEVELOPING MERISTIC STRUCTURES IN THE MARINE FISH, FUNDULUS MAJALIS (WALBAUM) ...Basic Embryology, Developmental Physiology, Environmental Physiology, Killifishes - Cyprinodon, ...5.0298
- MARINE SPORTS FISHES RESEARCH ...Delaware Bay, Fish -other, Killifishes - Cyprinodon, Population Dynamics, Water Salinity, ...5.0248
- RELATIONSHIP BETWEEN WATER TEMPERATURE AND SIZE OF PARASITIC COPEPODS ...Collections, Copepods, Host Specificity, Size, Temperature, ...5.0390
- TEMPERATURE TOLERANCE OF MARINE ANIMALS THROUGH BEHAVIORIAL RESPONSES ...Behavior, Environment Resistance, Mortality Rates, Thermal, ...5.0118
- THERMAL PREFERENCES OF MARINE FISHES AND INVERTEBRATES ...Behavior, Fish -non-specific, Invertebrates -non-specific, Thermal, ...5.0209
- EFFECT OF TEMPERATURES AND CIRCULATION OF CONTINENTAL SHELF WATERS ON THE DISTRIBUTION OF FISHES ...Continental Shelf, Fish -non-specific, Surface Environments, Temperature, Water Movement, Currents,, ...4.0165
- LIFE HISTORY OF CLUPEA HARENGUS PALLASI ...Alewife,menhaden,shad,herring, Aquaculture & Fish-farming, Artificial Insemination, Life History Studies, Water Salinity, ...5.0035
- HYPOTHETICAL DISTRIBUTION OF 14 SPECIES OF ATLANTIC COASTAL GAME FISHES ...Aquatic Ecology, Atlantic Ocean-general, Environmental Ecology, Fish -other, ...5.0123
- FISH POPULATION STUDY ...Chemical Measurements -water, Commercial Fishing, Fish -non-specific, Food Supply, Population Dynamics, ...5.0174
- INVESTIGATE SEASONAL VARIATIONS, SURFACE WATER TYPES, HAWAIIAN AREA (KOKO HEAD) ...Commercial Fishing, Hawaii, Heat and Radiation Transfer, Oceanic Fronts, Salinity, Temperature, Tuna, Mackerel, Albacore... , Water Salinity, ...1.0148
- MONITORING SURVEY AND TIME-SERIES ANALYSIS OF SUBSURFACE TEMPERATURE IN THE NORTH PACIFIC OCEAN ...Pacific Ocean-north, Subsurface Environments, Temperature, Thermocline, ...1.0176
- PINK SALMON INVESTIGATIONS - EARLY SEA LIFE OF SALMON ...Alaska, Environmental Physiology, Life History Studies, Parasitology -other, ...5.0187
- SCRIPPS TUNA OCEANOGRAPHY RESEARCH PROGRAM ...Food Supply, Pacific Ocean-east, Temperature, Tropic, Tuna, Mackerel, Albacore... , ...5.0200
- DETERMINATION OF SELECTED ENVIRONMENTAL REQUIREMENTS OF IMPORTANT SPECIES OF MARINE ZOOPLANKTON ...Copepods, Oxygen, Water Salinity, Zooplankton, ...5.0835
- AERIAL SEA SURFACE TEMPERATURE SURVEYS OF U S. COASTAL WATERS ...Aircraft, Infrared Radiation, Migration, Productivity - Food Chain, Temperature, ...4.0148
- THERMAL ACCLIMATION PATTERNS IN PARASITES AND HOSTS ...Adaptation, Host Resistance, Host Specificity, Life History Studies, Monogenea, ...5.0643

## Environments - Animal

## SUBJECT INDEX

OSMOTIC COMPONENTS IN ELASMOBRANCH BLOOD  
...Blood Plasma and Serum, Chondrichthyes -other, Environmental Physiology, Osmoregulation, Water Salinity, ...5.0249

### Turbidity & Suspended Matter

CHEMICAL AND PHYSICAL DATA ...Fish -non-specific, Population Dynamics, Temperature, Water Movement, Currents,, Water Salinity, Water Temperature-non-specific, ...5.0207

EVALUATION OF HABITAT ALTERATION, CURRITUCK SOUND ...Fish -non-specific, Habitat Studies, North Carolina, Water Salinity, ...5.0914

### Types of Animal Environments

#### Islands

ECOLOGY OF STORM PETRELS ...Albatrosses, Shearwaters... , California, Mark, Tag Or Capture -other, Spawning & Nesting Sites, Terrestrial Ecology, ...5.0532

PACIFIC OCEAN BIOLOGICAL SURVEY PROGRAM ...Birds -non-specific, Meteorological Studies, Pacific Ocean-general, Vertical Distribution, ...5.0568

#### Laboratory

LARVAL DEVELOPMENT OF SCYLLARIDEAN LOBSTERS ...Animal Taxonomy, Developmental Physiology, Environmental Physiology, Invertebrate Nutrition, Lobsters, ...5.0409

REPRODUCTION AND EMBRYONIC SURVIVAL IN ASCIDIA NIGRA (SAVIGNY) ...Basic Embryology, Biological Rhythms, Reproductive System, Sea Squirts - Tunicates, Whole Body Culture & Rearing, ...5.0600

ACCUMULATION OF RADIOACTIVITY BY ORGANISMS IN EXPERIMENTAL MARINE ENVIRONMENTS ...Contamination - Water, Cooperative-studies, Estuaries, Radioactivity, ...5.0911

LABORATORY BIOASSAYS ...Contamination - Water, Fish, Laboratory Animals, Pollution - Effects of , Pollution Sources-general, ...5.0882

### Water Environment -other

SHARK ATTACKS ...Behavioral Ecology, Diving and Scuba, Sharks, ...6.0090

ECOLOGY OF ECHINOIDS ...Behavioral Ecology, Benthonic-bottom, Sea Urchins & Other Echinoderm, Vertical Distribution, ...5.0571

JUVENILE MIGRATION RATES ...Columbia River, Mark, Tag Or Capture -other, Migration, Salmon & Trout - Non-specific, Snake River, ...5.0223

EARLY LIFE HISTORY OF COREGONIDS ...Cisco, Lake Herring, Environmental Ecology, Life History Studies, Maturity & Growth Stages, Technique Development, ...5.0110

FISH GUIDING ...Animal Distr. (non-specific), Control Systems, Fish -non-specific, Instrumental Services, Management -other, ...8.0015

SPACE APPLICATIONS TO FISHERIES OCEANOGRAPHY (GULF OCEANOGRAPHY PROGRAM) ...Commercial Fishing, Computer Applications, Forecasting-prediction, Satellites, ...4.0172

FOOD AND EXPERIMENTAL ENVIRONMENTS (SHRIMP AQUACULTURE PROGRAM) ...Aquaculture & Fish-farming, Captive Rearing, Digestive System, Food Supply, Shrimps - Common, ...5.0505

INVESTIGATE POPULATION DYNAMICS OF ALBACORE ...American Samoa, Commercial Fishing, Population Dynamics, Tuna, Mackerel, Albacore... , ...5.0081

THE OCEANOGRAPHY OF NEW ENGLAND FISHING BANKS ...Continental Shelf, Fish -other, Number Or Density, Vertical Distribution, ...5.0901

ESTUARINE ECOLOGY--INDIAN RIVER, DELAWARE ...Delaware, Estuaries, Tidewater Areas, ...5.0875

### Water Light Quality & Quantity

EFFECTS OF IRRADIATION, TEMPERATURE AND OTHER ENVIRONMENTAL FACTORS ON SALMONID EMBRYOS ...Basic Embryology, Radiation Effects-non-specific, Salmon & Trout - Non-specific, Water Temperature-non-specific, X and Gamma Rays, ...5.0336

RHYTHMIC ACTIVITY OF BLUEFISH UNDER EXPERIMENTALLY VARIED LIGHT REGIMES ...Adaptation, Biological Rhythms, Bluefish, Environmental Physiology, Photoperiod, ...5.0286

INITIATION OF METAMORPHOSIS IN AURELIA ...Biological Rhythms, Growth Rate, Jelly Fish, Low Temp. -but Above 32f, Metabolism, ...5.0599

### Water Movement, Currents,

LANGMUIR CIRCULATION AND PLANKTON ECOLOGY ...Circulation-general, Phytoplankton, Range Or Territorial Distr. , Vertical Distribution, Wind Or Air Movement, Zooplankton, ...5.0794

SHRIMP PRODUCTION IN LOUISIANA SALT-MARSH IMPOUNDMENTS UNDER EXISTING AND MANAGED CONDITIONS ...Aquaculture & Fish-farming, Captive Rearing, Lagoons, Louisiana, Shrimps - Common, ...5.0435

CHEMICAL AND PHYSICAL DATA ...Fish -non-specific, Population Dynamics, Temperature, Turbidity & Suspended Matter, Water Salinity, Water Temperature-non-specific, ...5.0207

EFFECT OF TEMPERATURES AND CIRCULATION OF CONTINENTAL SHELF WATERS ON THE DISTRIBUTION OF FISHES ...Continental Shelf, Fish -non-specific, Surface Environments, Temperature, Water Temperature-non-specific, ...4.0165

### Water Pressure

STUDIES IN THE PHYSIOLOGY AND BIOCHEMISTRY OF DEEP-SEA FISHES ...Environmental Physiology, Fish -non-specific, Metabolism, Vertical Distribution, ...5.0237

ENERGY REQUIREMENTS OF MARINE ORGANISMS ...Energy, Sharks, Thermoregulation, Tuna, Mackerel, Albacore... , ...5.0273

THERMALMETABOLIC RELATIONSHIPS OF STENO-THERMAL FISHES ...Antarctica, Environmental Physiology, Fish -non-specific, Proprioceptors, Thermoregulation, Water Temperature-non-specific, ...5.0312

DEEP DIVING ANTARCTIC BIRDS AND MAMMALS ...Adaptation, Antarctica, Locomotion -animal, Penguins, Seals, ...5.0555

PRESSURE EFFECTS ON MARINE ORGANISMS ...Abyssal, Environmental Physiology, Pressure, Vertical Distribution, ...5.0943

MARINE PHYSIOLOGY ...Cardiovascular System, Fish, Osmoregulation, Thermoregulation, ...5.0947

### Water Salinity

CHEMICAL AND PHYSICAL DATA ...Fish -non-specific, Population Dynamics, Temperature, Turbidity & Suspended Matter, Water Movement, Currents,, Water Temperature-non-specific, ...5.0207

EVALUATION OF HABITAT ALTERATION, CURRITUCK SOUND ...Fish -non-specific, Habitat Studies, North Carolina, Turbidity & Suspended Matter, ...5.0914

A STUDY OF THE ICHTHYOPLANKTON ASSOCIATED WITH TWO OF NEW JERSEYS COASTAL INLETS ...Estuaries, Nets, Salinity, Thermal, Water Temperature-non-specific, Zooplankton, ...5.0806

MARINE SPORTS FISHES RESEARCH ...Delaware Bay, Fish -other, Killifishes - Cyprinodon, Population Dynamics, Water Temperature-non-specific, ...5.0248

MOVEMENTS OF FRESHWATER CATFISH IN THE ESTUARIES OF SOUTHWEST LOUISIANA ...Blue Catfish, White Catfish, Environment Resistance, Estuaries, Louisiana, Migration, ...5.0090

EPIDEMIOLOGY OF SALMON POISONING DISEASE ...Epizootic, Helminths, Infectious Conditions and Dis, Pathology, Salmon & Trout - Non-specific, ...5.0306

OCEAN WATER INTRUSION INTO BACK BAY, VIRGINIA, & CURRITUCK SOUND, NORTH CAROLINA, ON THE WATERFOWL & FRESHWATER FISH HABITAT ...Habitat Studies, North Carolina, Virginia, Waterfowl -non-specific, ...5.0897

LIFE HISTORY OF CLUPEA HARENGUS PALLASI ...Alewife,menhaden,shad,herring, Aquaculture & Fish-farming, Artificial Insemination, Life History Studies, Water Temperature-non-specific, ...5.0035

ESTUARINE BIOLOGY--RESPONSE OF LARVAE TO TEMPERATURE AND SALINITY ...Alewife,menhaden,shad,herring, Captive Rearing, Estuaries, Longevity, Low Temp. -but Above 32f, Maturity & Growth Stages, ...5.0213

PINK SALMON INVESTIGATIONS - INTERTIDAL ECOLOGY ...Alaska, Life History Studies, Salmon -coho,chinook,sockeye... , Spawning & Nesting Sites, Tidal Streams, ...5.0186

INVESTIGATE SEASONAL VARIATIONS, SURFACE WATER TYPES, HAWAIIAN AREA (KOKO HEAD) ...Commercial Fishing, Hawaii, Heat and Radiation Transfer, Oceanic Fronts, Salinity, Temperature, Tuna, Mackerel, Albacore... , Water Temperature-non-specific, ...1.0148

DROPOUT OF SALMON FROM GILL NETS ...Commercial Fishing, Management -other, Mortality Rates, Nets, Salmon & Trout - Non-specific, ...5.0177

GROWTH, CONDITION, AND SURVIVAL OF SHELLFISH ...Adaptation, Environmental Physiology, Maryland, Oysters, Water Quality-general, ...5.0447

DETERMINATION OF SELECTED ENVIRONMENTAL REQUIREMENTS OF IMPORTANT SPECIES OF MARINE ZOOPLANKTON ...Copepods, Oxygen, Water Temperature-non-specific, Zooplankton, ...5.0835

FUNCTION OF THE INTERRENAL GLAND IN TELEOST FISHES ...Blood Cells, Kidney and Urinary System, Osmoregulation, Pituitary, Tilapia, Cichlids, ...5.0233

OSMOTIC COMPONENTS IN ELASMOBRANCH BLOOD ...Blood Plasma and Serum, Chondrichthyes -other, Environmental Physiology, Osmoregulation, Water Temperature-non-specific, ...5.0249

OPERANT OSMOTIC REGULATION IN A MARINE ANIMAL ...Environment Resistance, Learning and Retention, Octopus, Squid, Cuttlefish... , Osmoregulation, ...5.0664

### Wind Or Air Movement

LANGMUIR CIRCULATION AND PLANKTON ECOLOGY ...Circulation-general, Phytoplankton, Range Or Territorial Distr. , Vertical Distribution, Water Movement, Currents,, Zooplankton, ...5.0794

### Environments - Plant

#### Contamination, Pollution-water

EFFECTS OF PETROLEUM AND PETROLEUM WASTES UPON IMPORTANT SPECIES OF ESTUARINE PHYTOPLANKTON AND ZOOPLANKTON ...Contamination - Water, Estuaries, Oil, Oil and Natural Gas - Sulfur, Phytoplankton, Zooplankton, ...5.0830

ISOLATION AND TAXONOMY OF YEASTS IN LAKES AND SEWAGE ...Bioindicators, Plant Taxonomy, Streams, Yeasts (non-specific), ...5.0787

#### Energy Budgets

ORGANIC PRODUCTION OF EPIFAUNAL ORGANISMS ...Epiphytic Relationships, Marine Biology (non-specific), Organics, Plant Ecosystems(non-specific), Primary Productivity, Reefs, ...5.1032

CALORIC STUDIES OF SPARTINA AND THE MARSH CRAB SESARMA RETICULATUM ...Calorimetry, Chlorideae (non-specific & Ot), Crabs, Swamps-marshes, ...5.0380

ENERGETICS OF PALAEMONETES PUGIO AND THE WEEDBED COMMUNITY OF SOUTH CREEK ESTUARY ...Aquatic Vegetation -ns, Estuaries, Habitat Studies, North Carolina, Shrimps - Common, ...5.0482

ENERGY AND ELEMENT TRANSFER IN LOWER MARINE TROPHIC LEVELS ...Copepods, Oregon, Phytoplankton, ...5.0823

#### Mineral Content -water

STUDIES ON INORGANIC NUTRIENT ASSIMILATION RATES IN ESTUARINE PONDS ...Estuaries, Nitrogen, Nutrients, Phosphorus, Self-purification, ...5.0991

#### Oxygen Content -water

MEASUREMENTS OF OXYGEN CONSUMPTION BY THE SEA BED IN DEEP WATER OF PUGET SOUND ...Benthic Flora, Chemistry, Oxygen, Puget Sound, ...5.1036

OXYGEN RESOURCES OF TIDAL WATERS ...Autotrophic, Marine Biology (non-specific), Oxygen, Pollution Sources-general, Tides, ...1.0119

#### pH -water

THE ENVIRONMENTAL REQUIREMENTS OF MARINE PLANKTONIC ORGANISMS ...Bulk Culture -other, Marine Biology (non-specific), Plankton (non-specific), Water Salinity, Water Temperature -other, ...5.0921

### Temperature -water

#### Water Temperature -other

ARCTIC BIOLOGICAL OCEANOGRAPHY ...Adaptation, Arctic Ocean, Growth and Differentiation, Phytoplankton, Potamogeton, Ruppia, Zostera... Water - Light Qual. & Quant. , ...5.0853

THE ENVIRONMENTAL REQUIREMENTS OF MARINE PLANKTONIC ORGANISMS ...Bulk Culture -other, Marine Biology (non-specific), pH -water, Plankton (non-specific), Water Salinity, ...5.0921

### Types of Plant Environments

#### Greenhouse

A UNIFIED APPROACH TO WATER, FOOD AND POWER IN A COASTAL DESERT COMMUNITY ...Arid and Desert, Desalination, Deserts, Diesel, Distilling Units, Electric Power Plants, Use of Impaired Water, ...7.0002

#### Water - Light Qual. & Quant.

ARCTIC BIOLOGICAL OCEANOGRAPHY ...Adaptation, Arctic Ocean, Growth and Differentiation, Phytoplankton, Potamogeton, Ruppia, Zostera... , Water Temperature -other, ...5.0853

### Water Depth, Water Levels

THE EFFECTS OF POLLUTION ON BENTHIC MARINE PLANT COMMUNITIES ...Bays, Habitat Studies, ...5.0724

CHANGES IN THE LIMITING NUTRIENT DUE TO TEMPORAL, GEOGRAPHIC, AND DEPTH VARIATIONS ...Depth, New York, Nutrients, Phytoplankton, Sub - Tropic, ...5.1004

### Water Salinity

MACROMOLECULAR BASIS FOR ADAPTATION TO SALINITY CHANGES IN PRYMNESIUM PARVUM ...Adaptation, Growth Rate, Ionic Effect, Permeability, Prymnesium, ...5.1012

THE ENVIRONMENTAL REQUIREMENTS OF MARINE PLANKTONIC ORGANISMS ...Bulk Culture -other, Marine Biology (non-specific), pH -water, Plankton (non-specific), Water Temperature -other, ...5.0921

### Enzyme Studies

#### Comparative Enzymology

##### Developmental Stages

PRESENCE OF ENZYMES RELATED TO DNA SYNTHESIS IN EGGS OF ECHINODERMS ...Basic Embryology, DNA Polymerase, Enzyme Formation, Nucleoside Kinase, Sea Urchins & Other Echinoderm, ...5.1034

FORMATION AND METABOLISM OF NEUROHUMORAL TRANSMITTER SUBSTANCES IN MARINE ANIMALS ...Basic Studies, Biochemical, Quantitative & Qualitative, Sharks, ...5.0980

##### Species

CHEMISTRY AND ENZYMOLOGY OF BIOLUMINESCENCE ...Anthozoa, Bioluminescence, Earthworms, Kinetics -other, Luminous Bacteria, ...5.0962

ENZYME STRUCTURE AND ITS RELATION TO TAXONOMY ...Animal Taxonomy, Conformational Studies, Echinodermata -other, Enzymes -non-specific, ...5.0654

#### Conformational Studies

ENZYME STRUCTURE AND ITS RELATION TO TAXONOMY ...Animal Taxonomy, Echinodermata -other, Enzymes -non-specific, Species, ...5.0654

#### Enzyme Formation

PRESENCE OF ENZYMES RELATED TO DNA SYNTHESIS IN EGGS OF ECHINODERMS ...Basic Embryology, Developmental Stages, DNA Polymerase, Nucleoside Kinase, Sea Urchins & Other Echinoderm, ...5.1034

## Enzyme Studies

## SUBJECT INDEX

### Interaction

#### Enzyme-substrate

MECHANISM STUDIES ON BIOLUMINESCENT REACTIONS WITH EMPHASIS ON ENERGY TRANSFER PROBLEMS ...Bioluminescence, Energy Conversion, Luciferase, Luciferin, ...1.0164

FORMATION AND UTILIZATION OF TERPENES ...Anthozoa, Biosynthesis, Symbiosis, Terpenes, Zooxanthella, ...5.0957

MODE OF ACTION OF MARINE TOXINS ...Animal Toxins, Antigen, Blood Globulins, Sea Urchins & Other Echinoderm, ...6.0103

BIOCHEMICAL CHARACTERIZATION OF CHOLINESTERASES IN THE BLOOD AND CENTRAL NERVOUS SYSTEM OF LIMULUS POLYPHEMUS ...Blood and Lymph, Cholinesterase, Horseshoe Or King Crabs, Nervous System, Reaction Rates, ...5.0468

#### Inhibitors

INTERACTION OF PROTEINS WITH METAL AND HYDROGEN IONS ...Globin -incl. myoglobin, Metallic Ions, Neurophysin, Photochemistry, Ribonuclease, ...5.0999

### Isoenzymes

LOW TEMPERATURE GROWTH OF BACTERIA ON FOODS ...Cryophilic Bacteria, Fish -non-specific, Growth (non-specific & Ot.), Microbiological, Refrigeration, Temperature, ...6.0086

### Kinetics - Mechanisms

#### Inactivation

INVESTIGATION OF FEASIBILITY OF STERILIZING FISH BY RADIATION ...Enzymatic, Fish -non-specific, Organoleptic Studies, Radiation, Shelf Life & Storage, ...6.0041

#### Kinetics -other

CHEMISTRY AND ENZYMOLOGY OF BIOLUMINESCENCE ...Anthozoa, Bioluminescence, Earthworms, Luminous Bacteria, Species, ...5.0962

#### Reaction Rates

THE ROLE OF MARINE ORGANISMS IN THE DEGRADATION OF NAVAL MATERIALS ...Biological, Marine Bacteria, Materials Used Undersea, Model Studies, ...8.0241

ELUCIDATION OF THE METABOLIC PATHWAYS OF MARINE PLANKTONIC ORGANISMS ...Marine Biology (non-specific), Metabolism (intracellular), Organelle-enzyme Assn, Plankton (non-specific), Purification & Isolate, ...5.0828

BIOCHEMICAL CHARACTERIZATION OF CHOLINESTERASES IN THE BLOOD AND CENTRAL NERVOUS SYSTEM OF LIMULUS POLYPHEMUS ...Blood and Lymph, Cholinesterase, Enzyme-substrate, Horseshoe Or King Crabs, Nervous System, ...5.0468

#### Thermodynamics

RESEARCH STUDIES IN MOLECULAR PHARMACOLOGY ...Anesthetic, Bonding and Binding, Diving and Scuba, Mechanism of Action, Permeability, ...6.0100

### Organelle-enzyme Assn

A HISTOCHEMICAL STUDY OF THE CENTRAL NERVOUS SYSTEM OF LIMULUS POLYPHEMUS ...Cholinesterase, Histochemistry - Cytochem, Horseshoe Or King Crabs, Nervous System, ...5.1000

ELUCIDATION OF THE METABOLIC PATHWAYS OF MARINE PLANKTONIC ORGANISMS ...Marine Biology (non-specific), Metabolism (intracellular), Plankton (non-specific), Purification & Isolate, Reaction Rates, ...5.0828

### Purification & Isolate

ELUCIDATION OF THE METABOLIC PATHWAYS OF MARINE PLANKTONIC ORGANISMS ...Marine Biology (non-specific), Metabolism (intracellular), Organelle-enzyme Assn, Plankton (non-specific), Reaction Rates, ...5.0828

### Quantitative & Qualitative

THE EVALUATION OF WHOLESOMENESS OF RADIATION SUB-STERILIZED FOOD PRODUCTS USING RATS ...Animal Protein, Clams, Laboratory Rat, Radiation, Thiaminase, ...6.0031

STUDY OF NITROGEN METABOLISM IN MARINE ALGAE ...Bioindicators, Enzymes, Marine Plants, Microbiological Analysis, Pollution - Effects of, ...5.0727

FORMATION AND METABOLISM OF NEUROHUMORAL TRANSMITTER SUBSTANCES IN MARINE ANIMALS ...Basic Studies, Biochemical, Developmental Stages, Sharks, ...5.0980

## Enzymes

### Atpase

THE ROLE OF CALCIUM IONS IN THE MOTILITY OF SEA URCHIN AND OTHER SPERMATOOZOA ...Calcium, Male Gametes, Motility and Migration, Yellow Perch, Darters, ...5.0622

ION TRANSPORT MECHANISM IN GIANT AXON ...Active Transport, Cell Free Metabolism, Nervous System, Octopus, Squid, Cuttlefish... , Plasma Membrane, ...5.0369

### Carbonic Anhydrase

BIOLOGICAL TRANSPORT OF GASES AND OTHER SUBSTANCES ...Active Transport, Carbon Dioxide, Fish, Gases, Kidney and Urinary System, ...5.0240

### Cholinesterase

A HISTOCHEMICAL STUDY OF THE CENTRAL NERVOUS SYSTEM OF LIMULUS POLYPHEMUS ...Histochemistry - Cytochem, Horseshoe Or King Crabs, Nervous System, Organelle-enzyme Assn, ...5.1000

BIOCHEMICAL CHARACTERIZATION OF CHOLINESTERASES IN THE BLOOD AND CENTRAL NERVOUS SYSTEM OF LIMULUS POLYPHEMUS ...Blood and Lymph, Enzyme-substrate, Horseshoe Or King Crabs, Nervous System, Reaction Rates, ...5.0468

### Coenzyme Q

EFFECT OF LIPIDS ON STABILITY OF BIOLOGICAL MEMBRANES ...Cellular Membranes (non-spec.), Electron Microscopy, Stability, Tocopherol, Vitamin A, ...5.1007

### Cytochromes

STUDIES OF PROTEINS UNDER EXTREME ENVIRONMENTS ...Cellular Membranes (non-spec.), Exobiology, Halobacteria, Respiration, Salt, ...5.0941

### DNA Polymerase

PRESENCE OF ENZYMES RELATED TO DNA SYNTHESIS IN EGGS OF ECHINODERMS ...Basic Embryology, Developmental Stages, Enzyme Formation, Nucleoside Kinase, Sea Urchins & Other Echinoderm, ...5.1034

### Dopa Decarboxylase

BIOSYNTHESIS OF 3-HYDROXYTYRAMINE IN MONOSTROMA FUSCUM ...Biosynthesis, Chlorophyceae (non-specif.&ot), Marine Plants, Tyramine, Tyrosinase, ...5.0720

### Enzyme Inhibitors

STUDY OF THIAMINASE IN HAWAII FISH ...Enzymatic, Fish -non-specific, Hawaii, Thiaminase, Toxicological and Allergy, ...5.0260

### Enzymes -non-specific

BIOCHEMISTRY AND PHYSIOLOGICAL ECOLOGY OF POISONED FISH ...Fish -non-specific, Metabolism, Muscle, Pathology, Toxins -non-specific, ...5.0305

ENZYME STRUCTURE AND ITS RELATION TO TAXONOMY ...Animal Taxonomy, Conformational Studies, Echinodermata -other, Species, ...5.0654

### Extracellular-enzymes

MICROBES AND CORROSION ...Cathodic Protection, Fouling, Iron, Metals -non-specific, Microorganisms (non-specific), Respiration, ...8.0228

### Luciferase

MECHANISM STUDIES ON BIOLUMINESCENT REACTIONS WITH EMPHASIS ON ENERGY TRANSFER PROBLEMS ...Bioluminescence, Energy Conversion, Luciferin, ...1.0164

## SUBJECT INDEX

## Equipment Purchase Operation

### Microorganism Enzymes

RESEARCH ON THE ROLE OF BACTERIA IN THE OCEAN  
...Denitrification, Elect Trans and Redox, Marine Bacteria,  
Nitrogen Bacteria, Respiration, ...5.0783

### Nucleoside Kinase

PRESENCE OF ENZYMES RELATED TO DNA SYNTHESIS  
IN EGGS OF ECHINODERMS ...Basic Embryology, Develop-  
mental Stages, DNA Polymerase, Enzyme Formation, Sea  
Urchins & Other Echinoderm, ...5.1034

### Plant Enzymes

LIGHT RECEPTOR CONTROL OF THE DIURNAL RHYTHM  
OF ENZYME SYNTHESIS IN THE BIOLUMINESCENT  
MARINE DINOFLLAGELLATE GONYAULAX POLYEDRA  
...Biological Rhythms, Biosynthesis, Control and Regulation,  
Gonyaulax, Photoreception, ...5.0760

### Proteolytic Enzymes

MARINE BACTERIAL ENZYMES ...Cell. env.(non-specific &  
Ot.), Growth (non-specific & Ot.), Isolation From Nat. environ.  
, Marine Bacteria, Plant Distr. (non-specific), ...5.0824

### Renin

RENIN AND EURYHALINITY ...Comparative Physiology,  
Histochemistry - Cytochem, Kidney and Urinary System,  
Osmoregulation, Vertebrates -non-specific, ...5.0973

### Ribonuclease

INTERACTION OF PROTEINS WITH METAL AND  
HYDROGEN IONS ...Globin -incl. myoglobin, Inhibitors,  
Metallic Ions, Neurophysin, Photochemistry, ...5.0999

### Thiaminase

THE EVALUATION OF WHOLESOMENESS OF RADIATION  
SUB-STERILIZED FOOD PRODUCTS USING RATS  
...Animal Protein, Clams, Laboratory Rat, Quantitative &  
Qualitative, Radiation, ...6.0031

STUDY OF THIAMINASE IN HAWAII FISH ...Enzymatic, En-  
zyme Inhibitors, Fish -non-specific, Hawaii, Toxicological and  
Allergy, ...5.0260

UTILIZATION OF FRESHWATER FISH FOR ANIMAL FOODS  
...Fish & Shellfish, Fish Meals, Heating, Steaming, Sea Lions,  
Fur Seals, ...5.0989

### Tryptophan Oxidase

BIOCHEMISTRY OF DEVELOPMENT ...Basic Embryology,  
Control and Regulation, Differentiation Mechanism, Messenger  
RNA, Sea Urchins & Other Echinoderm, ...5.0994

### Tyrosinase

BIOSYNTHESIS OF 3-HYDROXYTYRAMINE IN MONOS-  
TROMA FUSCUM ...Biosynthesis, Chlorophyceae (non-  
specif.&ot), Dopa Decarboxylase, Marine Plants, Tyramine,  
...5.0720

## Epidemiology of Disease

### Environmental Health

#### Food (epidemiology)

EFFECTS OF INGESTION OF RADIOACTIVE FISH AND THE  
NATURE AND BIOLOGY OF TOXINS IN CERTAIN FISHES  
...Fish -non-specific, Food Chains, Radioactive Isotopes, Tox-  
icological and Allergy, ...6.0108

OUTGROWTH OF CLOSTRIDIUM BOTULINUM TYPE E IN  
NONIRRADIATED AND IRRADIATED FISHERY  
PRODUCTS ...Clostridium Botulinum, Fish -non-specific,  
Microbiological, Radiation, Refrigeration, ...6.0081

GROWTH CHARACTERISTICS OF TYPE E CLOSTRIDIUM  
BOTULINUM IN THE TEMPERATURE RANGE 34 TO 50 F.  
...Clostridium Botulinum, Haddock, Microbiological, Radiation,  
Temperature Control, ...6.0022

DISTRIBUTION OF C. BOTULINUM IN COMMERCIAL  
SMOKED FISH ...Bacterial Pollutant Sources, Clostridium  
Botulinum, Fish -non-specific, Microbiological, Smoking,  
...5.0337

THERMAL DESTRUCTION OF TYPE E CLOSTRIDIUM  
BOTULINUM ...Clostridium Botulinum, Differentiation  
Mechanism, Heat Resistance, Microbiological, Spore Studies,  
...6.0006

PROGRAM PROJECT - FOOD MICROBIOLOGY ...Clostridia  
(non-specific & Ot), Infection, Intoxication & Pois,  
Microbiological, Salmonella (non-specific & Ot), Toxicological  
and Allergy, ...6.0005

ANAEROBIC BACTERIA IN THE MARINE ENVIRONMENT  
...Fish -non-specific, Isolation From Nat. environ.,  
Microbiological, ...5.0846

STUDIES ON VIBRIO FOOD POISONING ...Bacteria, Bacterial  
Endotoxins, Microbiological, Toxicological and Allergy,  
Vasomotor, ...6.0114

### Occupational Hazards

DIVING MEDICINE ...Diffusion of Gases, Divers, Diving and  
Scuba, Pressure, ...8.0017

SUBMARINE MEDICINE ...Life-support-system, Naval Person-  
nel, Ordnance, Safety, ...8.0018

### Mechanism of Transmission

ASPECTS OF RELATIONSHIPS BETWEEN MARINE ECOLO-  
GY AND HUMAN HEALTH ...Environmental Ecology,  
Marine Biology (non-specific), Public Health Ecology, Toxic  
Substances -non-specific, ...6.0182

### Epizootiology

PATHOLOGY - EPIZOOTIOLOGY ...Mortality Rates, Oysters,  
Pathology, Protozoa, Protozoa -other, ...5.0441

### Control and Prevention

STUDIES ON THE DEVELOPMENT OF DERMOCYSTIDIUM  
MARINUM ...Cell Cycle, Dermocystidium, Fungal Culture,  
Oysters, Pathology, ...5.0836

### Incidence and Prevalence

#### Epizootic

EPIDEMIOLOGY OF SALMON POISONING DISEASE ...Hel-  
minths, Infectious Conditions and Dis, Pathology, Salmon &  
Trout - Non-specific, Water Salinity, ...5.0306

EPIZOOTICS IN EXPERIMENTAL MARINE SHELLFISH  
POPULATIONS ...Freshwater Mussels, Scallops, Mortality  
Rates, Oysters, Pathology, ...5.0520

### Mode of Transmission

INFECTIOUS DISEASES OF SALMONID FISHES ...Bacteria  
(non-specific), Infectious Conditions and Dis, Pathology,  
Protozoa -other, Salmon & Trout - Non-specific, ...5.0302

#### Invertebrates

NATURAL HISTORY OF SALMON POISONING RICKETT-  
SIAE ...Flukes, Helminths, Neorickettsiae Helminth, Reservoirs,  
...5.0842

## Equipment Purchase Operation

STUDIES ON THE PHYSIOLOGY OF MARINE ORGANISMS  
USING RADIOISOTOPES ...Facilities, Marine Plants,  
Radioisotopes -non-specific, ...12.0031

SUPPORT OF RESEARCH VESSEL VELERO 4 ...California,  
Facilities, Geology-general, Instrumentation-general, Marine  
Biology, Training Grants, Fellowships, ...4.0115

SUPPORT OF THE RESEARCH VESSEL AHOYOHA III  
...California, Diving and Scuba, Geology-general, Marine Biolo-  
gy, Ships and Cruises, ...12.0008

X-RADIOGRAPHIC AND ELECTRONIC FLUOROSCOPIC  
EQUIPMENT ...Core Analysis, Instrumental Services, Radio-  
graph, Radiometer, X Ray Tubes, ...8.0094

LENGTHENING AND INCREASING OCEANOGRAPHIC  
CAPABILITIES OF R/V ACONA ...Modification-conversion,  
Oceanography-general, Pacific Ocean-north, Shoreline - Coast-  
line, Special Mission Ships, ...12.0002

RESEARCH VESSEL U.S.N.S. ELTANIN ...Antarctica,  
Geophysics-general, Scientific-service-support, Special Mission  
Ships, Teaching and Research, ...12.0036

ROCK SAMPLING AND GEOPHYSICAL STUDIES IN THE  
TONGA KERMADEC TRENCH SOUTHWEST PACIFIC  
...American Samoa, Coring and Dredging, Pacific Ocean-west,  
Photography, Seismic Reflection, Trenches, ...7.0093

## Equipment Purchase Operation

## SUBJECT INDEX

- RARE GAS STUDY OF INTERPLANETARY MATERIAL IN PELAGIC SEDIMENTS ...Chemistry, Cosmogenous, Element Ratios, Mass Spectroscopy, Mineralogy, X-ray, ...7.0081
- OCEANOGRAPHIC VESSEL OPERATIONS ...Geology-general, Pacific Ocean-north, Plankton (non-specific), Plant Prod. (non-specific), Ships and Cruises, ...12.0047
- COOPERATIVE SYSTEMATICS STUDIES IN ANTARCTIC BIOLOGY ...Animal Taxonomy, Antarctica, Cooperative-studies, Invertebrates -non-specific, ...5.0581
- SHIPBOARD GRAVITY SENSOR AND GYROCOMPASS ...Geophysical Equipment, Gryo, Scientific-service-support, ...8.0103
- SPECIALIZED RESEARCH EQUIPMENT FOR SEA ICE STUDIES ...Alteration, Sea Ice, ...3.0086
- UNDERWATER CAMERA SYSTEM ...Pacific Ocean-north, Photography, Sediments-general, Structural Studies, ...8.0154
- AQUISITION OF A SUITABLE PROTOTYPE FISHING VESSEL AND GEAR ...American Samoa, Commercial Fishing, Nets, Tuna, Mackerel, Albacore... , ...12.0004
- PURCHASE OF MATERIALS FOR & CONSTRUCTION OF, FLOATS, RACKS, BAGS, AND TRAYS FOR THE SUSPENSION OF VARIOUS TYPES OF CULTCH ...Biological Rhythms, Derivatives, Oysters, Spawning & Nesting Sites, Stocking of Fish & Shellfish, ...8.0008
- SUPPORT OF THE MARINE BIOLOGY PROGRAM AT THE LAMONT GEOLOGICAL OBSERVATORY ...Marine Biology, New York, ...11.0033
- RESEARCH FLIGHT FACILITY ...Aircraft, General Synoptic Observations, Technique Development, Tropical Cyclones, ...4.0158

## Erosion Control

### Wind Erosion

- MESO WIND PATTERNS IN THE CENTRAL CALIFORNIA VALLEY ...Atmospheric Pollution-general, California, Drift (pesticide), Herbicides -non-specific, Land-sea Breezes, ...3.0056

## Erosion-general

- HYDRAULICS AND DYNAMICS OF ESTUARIES ...Estuaries, Flow Characteristics -water, Sedimentation, Sedimentology-general, Water Level Fluctuation, Waves, ...7.0102

## Estuaries

- (A) ANNUAL SUPPLY OF PARTICULATE MATTER IN THE GREAT BAY ESTUARY (B) LATE PLEISTOCENE HISTORY OF THE GREAT ...New Hampshire, Organics, Quaternary Period, Sampling, Sedimentary History, ...1.0155
- APOLLO TEST SITE EXPERIMENT ...Aircraft, Hydraulics-general, Hydrology-general, Recognition Systems, Remote Sensing-general, ...4.0146
- THE ACCUMULATION OF FISSION PRODUCTS BY MARINE FISH AND SHELLFISH ...Chlorideae (non-specific & Ot), Contamination - Water, Food Chains, Radioactivity-general, Radioecology, ...6.0167
- THE BIOLOGY AND CHEMISTRY OF TRACE ELEMENTS IN MARINE AND ESTUARINE WATERS ...Chesapeake Bay, Phytoplankton, Productivity - Food Chain, Trace Element Analysis, Zooplankton, ...5.0975
- MOVEMENT OF RADIONUCLIDES IN THE COLUMBIA RIVER ESTUARY ...Columbia River, Discharge, Radioactivity, Salinity, Sediment Transport-other, ...6.0179
- OCEAN KINEMATICS DYNAMICS ...Chesapeake Bay, Circulation-general, Data Reduction and Analysis, Turbulent Flow, Water Motion, ...2.0069
- TURBULENT DIFFUSION STUDY ...Chesapeake Bay, Dispersion -water, Tracers-general, Turbulent Flow, Water Motion, ...2.0056
- ESTUARINE SEDIMENTATION PROCESSES ...General Deposition, Intertidal Areas, Morphology-general, New England Province, Tidal Streams, Tides, ...7.0244
- CONTROLLED ENVIRONMENTAL FACTORS ON THE DEVELOPMENT OF ESTUARINE AND OCEANIC CRUSTACEA ...Aquatic Ecology, Crabs, Developmental Physiology, Salinity, Temperature, ...5.0476
- ECOLOGICAL AND EVOLUTIONARY IMPLICATIONS OF THE ECOTYPES OF ESTUARINE CRUSTACEA ...Classical, Invertebrate Anatomy, Isopods, Metabolism, Productivity - Food Chain, ...5.0418

- TEMPERATURE AND SALINITY TOLERANCE OF THE SAND SHRIMP, CRANGON SEPTEMPINSOA ...Environment Resistance, Environmental Physiology, Salinity, Shrimps - Common, Temperature, ...5.0437
- SUPPORT OF UNIVERSITY OF GEORGIA MARINE INSTITUTE RESEARCH VESSEL OPERATION ...Continental Shelf, Continental Slope, Distribution, Environmental Ecology, Geomorphology-topography, Marine Biology, Pollution Sources-general, Ships and Cruises, Textures-structures, ...12.0026
- TROPHIC RELATIONSHIPS IN SHOAL BENTHIC ENVIRONMENTS ...Benthic Flora, Biology, Habitat Studies, New England Province, ...5.1027
- ECOLOGICAL STUDY OF CHARLOTTE HARBOR ESTUARY AND SHARK PROGRAM OF MOTE MARINE LAB ...Florida, Mans Activities, Sharks, ...5.0384
- OPTIMUM ECOLOGICAL DESIGNS FOR ESTUARINE SYSTEMS OF NORTH CAROLINA ...Domestic Wastes-general, Marine Biology (non-specific), North Carolina, Pollution - Effects of , Pollution Effects, Productivity - Food Chain, ...5.0913
- ESTUARINE SEDIMENTARY MODELS ...Circulation-general, Distribution, Grain Size, Model Studies, Textures-structures, ...4.0079
- THE INSTITUTE FOR THE DEVELOPMENT OF RIVERINE AND ESTUARINE SYSTEMS (IDRES) ...Delaware River, Waste Disposal-general, ...12.0043
- FIORD OCEANOGRAPHY ...Alaska, Fjords, Hydrodynamics, Model Studies, Simulation Theory, ...4.0040
- SEA WATER OPTICS STUDIES ...Optical, Size Frequency Distribution, Suspension, ...1.0166
- EFFECTS OF PESTICIDES ON ESTUARINE PRODUCTIVITY ...Aquatic Ecology, Mans Activities, Persistence of Residues, Pesticides -non-specific, Pollution - Effects of , Population Dynamics, Standing Crops, ...5.0880
- ESTUARINE DREDGE HOLE INVESTIGATIONS ...Aquatic Ecology, Coring and Dredging, Fish -non-specific, Habitat Studies, ...5.0908
- A STUDY OF THE ICHTHYOPLANKTON ASSOCIATED WITH TWO OF NEW JERSEYS COASTAL INLETS ...Nets, Salinity, Thermal, Water Salinity, Water Temperature-non-specific, Zooplankton, ...5.0806
- TRAMMEL NET SAMPLING IN ESTUARINE AREAS ...Competition, Fish -non-specific, Lakes, Nets, Population Dynamics, ...5.0096
- QUANTITATIVE AND QUALITATIVE MEASUREMENT OF AQUATIC VEGETATION-CURRITUCK SOUND ...Aquatic Plants (non-specific), Range Or Territorial Distr. , Saline Water Intrusion, Salinity, Vertical Distribution, ...5.0717
- CHARTING OF SUBTIDAL OYSTER BEDS AND EXPERIMENTAL TRANSPLANTING OF SEED OYSTERS FROM POLLUTED SEED OYSTER BEDS ...Captive Rearing, Commercial Fishing, Oysters, South Carolina, Stocking of Fish & Shellfish, ...8.0011
- SURVEY OF A POTENTIAL HARD CLAM FISHERY ...Clams, Commercial Fishing, Coring and Dredging, Georgia, Spawning & Nesting Sites, ...5.0420
- A STUDY OF SELECTED CHEMICAL AND BIOLOGICAL CONDITIONS OF THE LOWER TRINITY RIVER AND THE UPPER TRINITY BAY ...Commercial Fishing, Mans Activities, Pollution - Effects of , Spawning & Nesting Sites, Texas, ...5.0926
- CHANGES DURING EUTROPHICATION OF AN ESTUARY ...Eutrophication, North Carolina, Plankton (non-specific), Pollution - Effects of , ...5.0915
- ESTUARINE WATER QUALITY AND FISH DISTRIBUTION ...Contamination - Water, Environmental Physiology, Pollution Effects, Pulp, Paper , and Logging, Salmon & Trout - Non-specific, ...5.0178
- EFFECTS OF THERMAL POLLUTION ON PRODUCTIVITY AND STABILITY OF ESTUARINE COMMUNITIES ...Aquatic Ecology, Environmental Ecology, Plant Prod. (non-specific), Pollution - Effects of , Thermal Pollution, ...6.0152
- ENHANCEMENT OF RECREATIONAL USES OF ESTUARINE WATERS THROUGH STUDY OF POTENTIAL CONTROL METHODS FOR STINGING SEA NETTLES ...Biological Control, Chesapeake Bay, Jelly Fish, Recreation Sites, Water Quality-general, ...5.0605
- INTERSTITIAL WATER OF GLACIAL-MARINE SEDIMENT ...Alaska, Glacial Clastics, Interstitial - Connate Water, Water, Water Supply-general, ...7.0188

## SUBJECT INDEX

## Estuaries

- IMPACT AND FATE OF POLLUTION IN ESTUARIAL WATERS ...Degradation, Massachusetts, Pesticides -non-specific, Pollutants - Path of , Pollution Effects, ...6.0153
- THE NET EFFECT OF WIND ON RECREATIONAL TIDAL STREAMS IN FLORIDA ...Air-sea Boundary-other, Florida, Tides, Water Level Fluctuation, Wind-general, ...2.0082
- WATER QUALITY - BENTHIC INVERTEBRATE RELATIONSHIPS IN ESTUARIES ...Benthic Fauna, Benthonic-bottom, Maine, Pollution - Effects of , Pollution Effects, ...5.0894
- CURRENT STUDY ON THE NEUSE RIVER AND ESTUARY ...Discharge, Dyes, North Carolina, Tracers, Water Motion, ...2.0037
- BIOLOGICAL AND CHEMICAL STUDY OF VIRGINIA'S ESTUARIES ...Nitrogen, Phosphorus, Phytoplankton, Population Dynamics, Primary Productivity, Virginia, ...1.0158
- UTILIZATION OF PHYSICAL AND MATHEMATICAL MODELS IN MARINE WATER RESOURCES RESEARCH AND MANAGEMENT ...Environmental Effects-geologic, Management, Mathematical Analysis, Model Studies, Shoreline - Coastline, ...4.0084
- HORIZONTAL DISPERSION IN SHALLOW ESTUARIES OF IRREGULAR SHAPE ...Circulation -water, Dispersion -water, Gulf of Mexico, Model Studies, Water Quality-general, ...2.0064
- EXPERIMENTAL AND THEORETICAL STUDY OF THE HYDRODYNAMICS OF DISPERSION IN RIVERS AND ESTUARIES ...Dispersion -water, Flow Characteristics -water, Model Studies, Streams, Water Motion, ...2.0057
- SURFACE AND GROUND WATER POTENTIALITIES OF THE MULLICA RIVER BASIN ...Aqueducts, Conjunctive Use, Economic Impact, Systems Analysis, Water Quality-general, Water Transfer, ...9.0014
- ECONOMICS OF WATER QUALITY FOR A REGIONAL SYSTEM ...Delaware River, Economic Efficiency, Finance, Regional Areas, Water Demand, Water Quality-general, ...9.0018
- THE BIOLOGY OF THE INFAUNA OF A TROPICAL SOFT BOTTOM AREA ...Aquatic Ecology, Benthic Fauna, Florida, Intertidal Areas, Pollution - Effects of , ...5.0879
- CHEMICAL EXCHANGES ACROSS SEDIMENT-WATER INTERFACES ...Chemical, Chemical-general, Exchange Capacity, Salinity, Solution Chemistry, ...7.0279
- PRIMARY PRODUCTION AND DECOMPOSITION IN ESTUARINE WATER ...Florida, Methane Bacteria (non-specific), Phaeophyta (non-specific & Ot), Primary Productivity, Rhodophyta (non-specific & Ot), Turnover (metabolic), ...5.0554
- NUTRIENT ASSIMILATION RATES - FIELD STUDIES ...Nitrogen, Nitrogen Cycle, Nutrients, Phosphorus, Tracers-general, ...5.0990
- A STOCHASTIC MODEL FOR POLLUTION IN ESTUARIES ...Ions and Gases, Model Studies, Oxygen, Water Quality Control-general, Water Quality-general, ...6.0188
- MONTVILLE STATION TEMPERATURE SURVEY (THAMES RIVER) ...British Isles, Electric Power Plants, Maps-other, Temperature, Thermal Pollution, ...1.0182
- PLANKTON ECOLOGY OF BAR-BUILT ESTUARIES ...North Carolina, Phytoplankton, Primary Productivity, Productivity - Food Chain, Zooplankton, ...5.0816
- COLLECTION AND SURVEY OF NORTH CAROLINA MARINE AND ESTUARINE MOLLUSCA ...Collections, Mollusks -non-specific & Other, North Carolina, Survey Studies, ...5.0480
- CRUSTACEAN COLLECTION OF EAST COAST OF UNITED STATES ...Atlantic Ocean-north, Collections, Crustacea -non-specific, North Carolina, ...5.0481
- FORECAST OF KODIAK ISLAND PINK SALMON RUNS FROM ABUNDANCE OF JUVENILES IN ESTUARIES ...Alaska, Fishing Gear, Maturity & Growth Stages, Migration, Number Or Density, Salmon -coho, chinook, sockeye., ...5.0179
- QUATERNARY OF THE HUDSON RIVER ESTUARY ...Fjords, Hudson River, Paleoenvironments, Quaternary Period, Valleys and Canyons, ...7.0256
- EVALUATION OF ATLANTIC COAST ESTUARIES ...Atlantic Ocean-north, Game Reserves & Preserves, Habitat Studies, Life History Studies, Waterfowl -non-specific, ...9.0020
- ENERGETICS OF PALAEMONETES PUGIO AND THE WEEDBED COMMUNITY OF SOUTH CREEK ESTUARY ...Aquatic Vegetation -ns, Energy Budgets, Habitat Studies, North Carolina, Shrimps - Common, ...5.0482
- HEAVY MINERAL DISTRIBUTION OF THE WHITE OAK ESTUARY-BOGUE INLET AREA, NORTH CAROLINA ...Bayous, Distribution, Heavy Minerals, North Carolina, ...7.0269
- A NON-DESTRUCTIVE METHOD FOR ESTIMATING POPULATION DENSITY AND DISTANCE TO NEAREST NEIGHBOR FOR ESTUARINE MOLLUSCS ...Aquatic Ecology, Mollusks -non-specific & Other, Number Or Density, Population Dynamics, Range Or Territorial Distr. , ...5.0439
- STUDIES ON INORGANIC NUTRIENT ASSIMILATION RATES IN ESTUARINE PONDS ...Mineral Content -water, Nitrogen, Nutrients, Phosphorus, Self-purification, ...5.0991
- ECOLOGICAL STUDIES OF THE BLUE CRAB, CALINECTES SAPIDUS ...Aquatic Ecology, Crabs, Life History Studies, Louisiana, ...5.0433
- MOVEMENTS OF FRESHWATER CATFISH IN THE ESTUARIES OF SOUTHWEST LOUISIANA ...Blue Catfish, White Catfish, Environment Resistance, Louisiana, Migration, Water Salinity, ...5.0090
- AN ENVIRONMENTAL SURVEY OF THE DAMARISCOTTA RIVER ESTUARY, LINCOLN COUNTY, MAINE ...Circulation -water, Nutrients, Pollution - Effects of , Salinity, Sedimentology-general, ...5.0895
- EFFECTS OF PESTICIDES ON ESTUARINE ORGANISMS ...Bioassay, Persistence of Residues, Pollution - Effects of , Sevin, Swamps-marshes, ...5.0918
- ECOLOGY OF RECREATIONALLY IMPORTANT ESTUARINE FISHES IN OREGON ...Aquatic Ecology, Environmental Ecology, Fishing, Migration, Oregon, Population Dynamics, ...5.0216
- FISH GENETICS AND ECOLOGY ...DNA Other, Fish -non-specific, Life History Studies, ...5.0309
- SOCIO-ECONOMIC STUDY OF NARRAGANSETT BAY, RHODE ISLAND ...Bays, Benefit-cost Analysis, Land Use, Rhode Island, Social Aspects, Water Quality Control-general, ...9.0019
- GALVESTON BAY STUDY ...Numerical Analysis-other, Optimization, Simulation, Tides, Waste Water Treatment-general, ...4.0062
- HYDRAULICS AND DYNAMICS OF ESTUARIES ...Erosion-general, Flow Characteristics -water, Sedimentation, Sedimentology-general, Water Level Fluctuation, Waves, ...7.0102
- MOVEMENT OF RADIONUCLIDES IN THE LOWER COLUMBIA RIVER ...Absorbed Load, Adsorption Capacity, Columbia River, Pollutants - Path of , Radioactivity-general, ...6.0178
- THE MOVEMENT OF RADIONUCLIDES IN THE COLUMBIA RIVER ESTUARY ...Absorbed Load, Adsorption Capacity, Columbia River, Pollutants - Path of , Radioactivity-general, ...6.0180
- DELAWARE ESTUARY SEDIMENTATION STUDY ...Delaware Bay, Salinity, Sediment Yield, Sedimentation, Supply Rate, ...7.0275
- INFLUENCE OF INDUSTRIAL AND MUNICIPAL WASTES ON ESTUARINE AND OFF SHORE WATER QUALITY ...Domestic Wastes-general, Industrial Wastes, Pollution - Effects of , Washington, ...6.0192
- HYDROLOGY OF COASTAL AREA IN THE VICINITY OF RICEBORO, GEORGIA ...Aquifers, Artesian Flow, Dispersion -water, Georgia, Saline Water Intrusion, Water Quality-general, ...9.0007
- EAST COAST CONTINENTAL MARGIN WOODS HOLE OCEANOGRAPHIC INSTITUTE CONTRACT ...Chemistry, Continental Shelf, Interstitial - Connate Water, Maine, ...4.0119
- REMOTE SENSING OF ESTUARINE WATER AND VEGETATION, MARYLAND ...Aerial Photography, Bioindicators, Chemical-general, Physical-general, Remote Sensing -other, ...4.0144
- FLOW AND SALINITY IN THE HUDSON ESTUARY, NEW YORK ...Fresh Water, Inflow, Management, Salinity, Tides, ...2.0075
- DISPERSION PROCESSES IN ESTUARIES AND RIVERS ...Dispersion -water, Dyes, Streams, Synthetic Hydrology, ...2.0050
- REMOTE SENSING OF DELAWARE ESTUARY ...Aircraft, Delaware, Pollutants-general, ...4.0168
- COORDINATION OF ESTUARINE REMOTE SENSING IN ATLANTIC COAST REGION ...Aerial Photography, Atlantic Ocean-general, Satellites, ...4.0169
- SALT-WATER ENCROACHMENT IN NORTH CAROLINA ESTUARIES ...Chemical-general, Flow Characteristics -water, Industrial-general, Saline Water Intrusion, Sampling, ...6.0168

- ECOLOGICAL STUDIES OF ATLANTIC AND GULF COASTAL ESTUARIES OF IMPORTANCE TO WATERFOWL ...Agricultural Land Use Effects, Atlantic Ocean-general, Construction Land Use Effects, Gulf of Mexico, Habitat Studies, Waterfowl -non-specific, ...5.0896
- DISTRIBUTION OF YOUNG STAGES OF COASTAL FISHES ...Continental Shelf, Fish -non-specific, Maturity & Growth Stages, Number Or Density, Ships and Cruises, ...5.0119
- INVENTORY OF THE GULF ESTUARY SYSTEM ...Bays, Data Acquisition, Fishing, Gulf of Mexico, Sedimentology-general, ...4.0047
- ESTIMATION OF JUVENILE ABUNDANCE IN ESTUARINE NURSERIES ...Alewife,menhaden,shad,herring, Aquatic Ecology, Gulf of Mexico, Maturity & Growth Stages, Number Or Density, ...5.0131
- ESTUARINE BIOLOGY--RESPONSE OF LARVAE TO TEMPERATURE AND SALINITY ...Alewife,menhaden,shad,herring, Captive Rearing, Longevity, Low Temp. -but Above 32f, Maturity & Growth Stages, Water Salinity, ...5.0213
- PRODUCTIVITY OF ESTUARINE AND MARINE ECOSYSTEMS (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Algae- General, Marine Plants, Phytoplankton, Primary Productivity, Standing Crops, ...5.1010
- MEASUREMENT OF RADIONUCLIDES IN ESTUARINE AND MARINE ENVIRONMENTS (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Marine Environments-general, Pollution - Effects of , Pollution Effects, Radioactivity-general, Reactor Sites & Rad Waste, ...5.0912
- ACCUMULATION OF RADIONUCLIDES BY VERTEBRATES (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Biological, Contamination - Water, Radioactivity-general, ...5.0293
- ACCUMULATION OF RADIOACTIVITY BY ORGANISMS IN EXPERIMENTAL MARINE ENVIRONMENTS ...Contamination - Water, Cooperative-studies, Laboratory, Radioactivity, ...5.0911
- BRISTOL BAY ESTUARINE ECOLOGY ...Alaska, Fishing Gear, Life History Studies, Migration, Oceanic Fronts, Salmon -coho,chinook,sockeye..., ...5.0004
- CHUM SALMON INVESTIGATIONS ...Environmental Ecology, Food Supply, Growth Rate, Life History Studies, Number Or Density, Salmon -coho,chinook,sockeye..., ...5.0007
- COASTAL AND INSHORE OCEANOGRAPHY ...Alaska, Marine Biology, Shoreline - Coastline, Water Analysis-general, Water Properties-general, ...5.0851
- YOUNG FISHES OF A TIDAL ZONE ...Fish -non-specific, Habitat Studies, Life History Studies, Size, Temporal Distribution, ...5.0073
- PESTICIDE MONITORING PROGRAM ...Bioindicators, Gas Chromatography, Monitoring Systems, Oysters, Persistence of Residues, ...6.0147
- RELATION OF ENVIRONMENTAL FACTORS TO THE PRODUCTIVITY OF ESTUARINE SEDENTARY FAUNA ...Aquatic Ecology, Environmental Ecology, Florida, Productivity - Food Chain, ...5.0959
- CHEMICAL ANALYSES ...Chemical Analysis (water), Chlorinated Hydrocarbons, Substances Or Chemicals, ...6.0149
- ESTUARINE STUDIES OF SOUTHEASTERN ALASKA ...Alaska, Benthic Fauna, Environmental Ecology, Number Or Density, Vertical Distribution, ...5.0852
- ESTUARINE ECOSYSTEMS ...Aquatic Ecology, Pesticides, Pollution - Effects of , Pollution Effects, Population Dynamics, ...5.0883
- PESTICIDE KINETICS ...Aquatic Or Soil-aquatic Cycles, Degradation, Insecticides -non-specific, Marine Biology (non-specific), Pollutants - Path of , ...6.0148
- EFFECTS OF INDUSTRIAL EXPANSION ON THE AQUATIC ENVIRONMENT OF ESTUARINE AREAS ...Columbia River, Salmon & Trout - Non-specific, ...5.0226
- EVALUATION OF ENGINEERING PROJECTS AND ESTUARINE DATA (ESTUARINE PROGRAM) ...Commercial Fishing, Engineering Structures-general, Gulf of Mexico, Habitat Studies, Swamps-marshes, ...9.0021
- ECOLOGY OF WESTERN GULF ESTUARIES (ESTUARINE PROGRAM) ...Coastal Engineering-other, Gulf of Mexico, Habitat Studies, Mans Activities, Pollution - Effects of , ...5.0928
- MICROBIOLOGY OF MARINE AND ESTUARINE INVERTEBRATES ...Marine Bacteria, Microbiological Analysis, Oysters, ...5.0790
- ESTUARINE ECOLOGY--INDIAN RIVER, DELAWARE ...Delaware, Tidewater Areas, Water Environment -other, ...5.0875
- RELATIONSHIP BETWEEN GLACIAL FLOUR POLLUTION AND POLLUTANTS FROM OTHER SOURCES ...Adsorption, Adsorption Capacity, Alaska, Glacial Clastics, Pollution - Effects of , Pulp, Paper , and Logging, Size, ...6.0134
- TRACERS STUDIES IN ALASKAN HARBORS ...Flow Augmentation, Harbors, Industrial Wastes, Tides, Tracers-general, ...2.0049
- FATE OF INLAND DERIVED POLLUTANTS IN AN ESTUARY ...Pollutants - Path of , Pollution - Effects of , Pollution Abatement, Pollution Sources-general, Systems Analysis, ...6.0133
- ESTUARINE DIFFUSION OF POLLUTANTS ...Dilution-other, Oregon, Pollutants - Path of , Salinity, Stratification, ...6.0175
- PHARMACOLOGY OF METAL POISONING IN ESTUARINE FISHES ...Contamination - Water, Killifishes - Cyprinodon, Metals -non-specific, Stress, ...5.0324
- COMPARATIVE TOXICITIES OF METALS TO ESTUARINE FISHES ...Bioassays, Industrial Wastes, Killifishes - Cyprinodon, Solid Waste, Toxins -other, ...6.0184
- USE OF MARINE PLANKTONIC ORGANISMS FOR EVALUATING THE QUALITY OF MARINE AND ESTUARINE WATERS ...Bioassays, Phytoplankton, Pollution - Effects of , Pollution Effects, Zooplankton, ...5.0832
- EFFECTS OF PETROLEUM AND PETROLEUM WASTES UPON IMPORTANT SPECIES OF ESTUARINE PHYTOPLANKTON AND ZOOPLANKTON ...Contamination - Water, Contamination, Pollution-water, Oil, Oil and Natural Gas - Sulfur, Phytoplankton, Zooplankton, ...5.0830
- EFFECT OF NITRILOTRIACETIC ACID (NTA) UPON THE TOXICITY OF METALS TO SELECTED SPECIES OF ESTUARINE PHYTOPLANKTON ...Acids, Carbon, Chemicals (incl. algacides), Isotope Tracer-other, Phytoplankton, ...5.0829
- PURIFICATION OF HARD CLAMS FROM POLLUTED WATERS ...Animal Viruses (non-specific), Clams, Contamination - Water, Intestinal Bacteria, New Jersey, ...5.0467
- EFFECTS OF PESTICIDES ON ESTUARINE ORGANISMS ...Dursban, Mode of Action -animal, Model Studies, Pollution - Effects of , Sevin, ...5.0919
- MICROBIOLOGY OF ESTUARINE AND SHELLFISH POLLUTION ...Bioindicators, Clams, Oysters, Pollution Effects, Sanitation, Waste Water Treatment-general, ...6.0162

## Ethylene

- DIMETHYLNITROSAMINE IN CURED, SMOKED WHITE FISH AND FLOUR BLEACHED WITH OXIDES OF NITROGEN ...Fish -other, Fish Protein Concentrate, Flour, Nitroso Compounds, Nitrous Oxide, ...6.0007

## Eutrophication

- A STUDY OF THE OPEN WATER DISTRIBUTION AND ABUNDANCE OF NET-PLANKTON AS AN INDEX OF EUTROPHICATION IN LAKE SUPERIOR ...Bioindicators, Data Acquisition, Lake Superior, Plankton Sampling, Zooplankton, ...6.0160
- CHANGES DURING EUTROPHICATION OF AN ESTUARY ...Estuaries, North Carolina, Plankton (non-specific), Pollution - Effects of , ...5.0915
- INFLUENCE OF SUSPENDED MICROSCOPIC SUBSTANCES ON THE METABOLISM OF MICROORGANISMS RESPONSIBLE FOR BIOLOGICAL ENRICHMENT OF WATER ...Adsorption Capacity, Chemical, Lake Erie, Microorganisms (non-specific), Pollution - Effects of , Sediments, ...6.0169
- EUTROPHICATION OF TIDAL WATERS ...Growth and Differentiation, Model Studies, Nutrients, Photosynthesis, Tidewater Areas, ...5.0909
- WATER QUALITY AND NUTRIENTS, SACRAMENTO-SAN JOAQUIN RIVER SYSTEM ...Environmental Ecology, Fish -non-specific, Nutrients, Plankton (non-specific), Water Quality-general, ...6.0139
- THE EFFECTS OF ENVIRONMENTAL CONDITIONS ON THE SPAWNING AND SURVIVAL OF FRY OF THE WALLEYE ...Environmental Effects-geologic, Lake Erie, Pollution - Effects of , Temperature, Walleyes, ...5.0299

**Evaluation**

- MOBILITY OF OIL-TYPE PRESERVATIVES IN IMMERSSED WOOD ...Creosote, Forestry, Liquid - Solid Interactions, Marine Biology (non-specific), Wood Preservatives-non-specif, ...8.0238
- EFFECT OF EURASIAN WATERMILFOIL CONTROL PROCEDURES ON WILDLIFE AND OTHER ORGANISMS IN AQUATIC ENVIRONMENTS ...Contamination - Water, Diquat, Water Milfoil, Waterweed... , 2,4-d, ...5.0700
- LAKE MICHIGAN CHEMICAL CONTROL OF SEA LAMPREY ...Animal Pollutant Sources, Control of Nuisance Species, Lake Michigan, Lampreys, Larvicides, ...6.0158
- BIOASSAY ...Animal Pollutant Sources, Lampreys, Piscicides - non-specific, Streams, Water Properties-general, ...5.0632

**Evaluation Other**

- INSTRUMENT STUDIES ...Electronic Components-other, Instrumental Services, Testing Facilities, ...8.0104
- ARCTIC SEISMIC TRANSDUCER EVALUATION ...Applied Electronics, Arctic, Ice Acoustics, Propagation, Transducers, ...8.0118
- TESTING AND EVALUATION OF HIGH-RESOLUTION ACOUSTIC SUBBOTTOM PROFILER THROUGH MODIFICATION OF OFF-THE-SHELF COMPONENTS ...Distribution, Electric Circuits and Networks, Field Testing, Sonar, ...8.0115
- TESTING AND EVALUATION OF MAGNETOMETER/GRADIOMETER AND TOW VEHICLE SYSTEM ...Field Testing, Instrumental Services, Magnetic Studies, Ore Deposits, Placer, ...8.0116

**Field Testing**

- AEROLOGICAL INSTRUMENTS ...Amplifiers, Humidity Instruments, Instrumental Services, Microwave Techniques, Technique Development, ...8.0082
- TESTING AND EVALUATION OF HIGH-RESOLUTION ACOUSTIC SUBBOTTOM PROFILER THROUGH MODIFICATION OF OFF-THE-SHELF COMPONENTS ...Distribution, Electric Circuits and Networks, Evaluation Other, Sonar, ...8.0115
- TESTING AND EVALUATION OF MAGNETOMETER/GRADIOMETER AND TOW VEHICLE SYSTEM ...Evaluation Other, Instrumental Services, Magnetic Studies, Ore Deposits, Placer, ...8.0116

**Evaporation**

- PROJECT EVAPORATION ...Data Analysis - General, Model Studies, Oklahoma, Waves, ...3.0031
- HUMIDITY STANDARDS AND MEASUREMENTS ...Humidity, Humidity Instruments, Pressure-density, Standards, Specifications, Streams, ...8.0081
- EVAPORATION OF WATER ...Humidity, Humidity Instruments, Particle-gas Transfer, ...3.0012

**Expeditions**

- TRANSPORTATION EXPENSES FOR PARTICIPATION IN USC&GSS OCEANOGRAPHER GLOBAL EXPEDITION ...Oceanography-general, Ships and Cruises, Travel Grants, ...12.0038
- SYSTEMATICS OF ANTARCTIC SIPUNCULIDS AND ECHIURIDS COLLECTED BY THE ELTANIN EXPEDITION ...Animal Taxonomy, Antarctica, Collections, Invertebrates - non-specific, ...5.0578
- SYSTEMATIC STUDY OF MYODOCOPID OSTRACODS OF THE INDIAN OCEAN ...Animal Taxonomy, Collections, Indian Ocean-general, Shrimps - Seed Or Mussel, ...5.0394

**Explosions, Detonation**

- CHEMICAL EXPLOSIONS, PACKAGING AND HANDLING AT SEA ...Ammonia, Durability, Deterioration, Packaging, Safety, ...8.0130

**Extraction**

- SURFACE TENSION ...Tension, Wettability, ...3.0030
- THE EXTRACTION OF POTASSIUM FROM FRESH AND SALINE WATERS BY CLAY MINERALS ...Adsorption Capacity, Clay Minerals-general, Potassium, Water Analysis, ...1.0096

- PROCESS ENGINEERING ...Design, Machinery, Equipment, Esters, Fats and Oils -other, Fish Protein Concentrate, Industrial Operation, Legal Standards, Natural Occurring, ...6.0080

**Extracts**

- COLLECTION AND EXTRACTION OF MARINE INVERTEBRATES AND PLANTS ...Collections, Lyophilization, Marine Plants, ...5.0697

**Facilities**

- MANAGEMENT OF THE ENIWETOK MARINE BIOLOGICAL LABORATORY ...Atolls, Lagoons, Marine Biology (non-specific), Reefs, ...12.0028
- STUDIES ON THE PHYSIOLOGY OF MARINE ORGANISMS USING RADIOISOTOPES ...Equipment Purchase Operation, Marine Plants, Radioisotopes -non-specific, ...12.0031
- LOGISTIC SUPPORT, MAINTENANCE AND RENOVATION OF FACILITIES ...Maine, Marine Biology, Marine Plants, ...12.0029
- GRADUATE SUMMER RESEARCH PROGRAMS IN EXPERIMENTAL EMBRYOLOGY ...Bermuda, Developmental Biology - Animal, Marine Biology (non-specific), ...11.0002
- SUPPORT OF RESEARCH VESSEL VELERO 4 ...California, Equipment Purchase Operation, Geology-general, Instrumentation-general, Marine Biology, Training Grants, Fellowships, ...4.0115
- SUPPORT OF THE R/V EASTWARD ...Caribbean Sea, Continental Shelf, Cooperative-studies, Marine Biology (non-specific), Ships and Cruises, Training Grants, Fellowships, ...12.0039
- COOPERATIVE RESEARCH AND TRAINING PROGRAM IN BIOLOGICAL OCEANOGRAPHY ...Caribbean Sea, Marine Biology (non-specific), Meetings, Ships and Cruises, Training Grants, Fellowships, ...11.0037
- RESEARCH TRAINING LABORATORY ...Marine Biology, Massachusetts, ...12.0032
- STUDENT RESEARCH AT THE MARINE SCIENCE CENTER ...Intertidal Areas, Invertebrate Physiology, Invertebrates -non-specific, Oregon, Training Grants, Fellowships, ...11.0039
- AMERICAN TABLES COMMITTEE FOR THE NAPLES ZOOLOGICAL STATION ...Italy, ...11.0008
- SUPPORT OF THE VERMILION SEA FIELD STATION AT BAHIA DE LOS ANGELES, BAJA CALIFORNIA ...Arid and Desert, Gulf of California, Habitat Studies, Temperature, Tides, ...12.0009
- LOGISTIC SUPPORT AND MAINTENANCE OF FACILITIES ...Atlantic Ocean-north, Lakes, Maine, Marine Biology, ...12.0030
- VARIABLE PRESSURE WATER TUNNEL RESEARCH ...Cavity Flow, Hydrofoils Crafts, Marine Propulsion, Shock-vibration, Sound Field, Water Tunnels Tables, ...8.0183
- SUPPORT OF WORLD DATA CENTER - A (OCEANOGRAPHY) ...Data & Statistics Storage, Data Reduction and Analysis, Oceanography-general, Writing & Editing, ...12.0018
- OPERATIONAL SUPPORT OF OCEANOGRAPHIC RESEARCH VESSELS ...Geophysics-general, Hawaii, Sediments-general, Structural Studies, ...12.0027
- RESEARCH VESSEL OPERATIONS ...Continental Shelves, Oceanography-general, Oregon, Pacific Ocean-east, Ships and Cruises, ...12.0041
- CETACEA OF TIERRA DEL FUEGO ...Mammals, Survey Studies, Tierra Del Fuego, Travel Grants, ...5.0544
- OPERATION OF THE R/V HERO AND PALMER STATION SUPPORT LABORATORY ...Antarctica, Marine Biology (non-specific), Ships and Cruises, ...12.0023
- NATURAL RADIOCARBON MEASUREMENTS ...Carbon-14, Mixing, Oceanic Fronts, Pacific Ocean-general, Radioactivity, ...1.0084
- HUMAN PERFORMANCE IN UNUSUAL ENVIRONMENTS ...Divers, Diving and Scuba, Medical Studies, Pressure, ...12.0005
- HUDSON LABORATORIES SHIP SUPPORT ...Acoustical, Modification-conversion, Platforms, Scientific-service-support, Ships and Cruises, Special Mission Ships, ...12.0021
- OPERATION AND MAINTENANCE OF THE OREGON STATE UNIVERSITY SEAFOODS LABORATORY ...Fish & Shellfish, Fish -non-specific, Industry Land Use Effects, Oregon, ...12.0042
- UNDERWATER ACOUSTICS MEASUREMENTS FACILITY ...Acoustical, Liquids, Transmission, ...12.0019

## Facilities

- SUPPORTING SYSTEMS ...Underwater-laboratory, ...8.0338  
BIOLOGICAL INVESTIGATIONS WITH ISOTOPES ...Algae-General, Isotopes -non-specific, Marine Plants, Radiation Effects-non-specific, Radioecology. ...11.0025  
LABORATORY OF NEUROBIOLOGY ...Nervous System, Puerto Rico, ...12.0044  
PROVIDE RESEARCH FACILITIES AND SERVICES ...Marine Biology, ...12.0033  
RADIOBIOLOGICAL RESEARCH ON MARINE ORGANISMS ...Marine Biology, Marine Biology (non-specific), ...11.0029

## Fats

### Lecithin

- CHARACTERIZATION AND MODE OF ACTION OF PROTEIN VENOMS OF MARINE ANIMALS ...Mechanism of Action, Sea Urchins & Other Echinoderm, Toxicology, Toxins, Venom, ...6.0102

### Lipid Hydroperoxides

- STEROLS AND LIPIDS IN WATER POLLUTION ...Chemical Identification, Effluents-waste Water, Pollutants - Path of, Sewage, Sterols, ...6.0186

### Oils -fats

- SPECTRAL SIGNATURES OF FISH SCHOOL IDENTIFICATION ...Atomic Absorption, Fish -non-specific, Oil, Spectral Reflectance, ...4.0151  
DETECTION AND CLASSIFICATION OF FISH AND MINERAL OIL SLICKS BY REMOTE SENSING FROM ORBITAL ALTITUDE ...Fish -non-specific, Oil, Spectral Reflectance, Ultra - Violet Radiation, ...4.0140

### Phospholipids

- DEVELOPMENTAL ANALYSIS OF FUNDULUS ...Basic Embryology, Central Nervous System, Fats, Killifish - Cyprinodon, Transplants, ...5.0316  
CHEMISTRY AND FUNCTION OF BRAIN PLASMALOGENS ...Chem and Metab, Comparative Physiology, Molec. struct. (gen. & Other), Plasmalogen, ...5.1003

### Plant Lipids

- THE CHARACTERISTICS, MECHANISMS AND BIOCHEMICAL CONSEQUENCES OF PHYTOPLANKTON FLOTATION ...Organics, Phytoplankton, Silicon, Size, Vertical Distribution, ...5.0826

### Plasmalogen

- CHEMISTRY AND FUNCTION OF BRAIN PLASMALOGENS ...Chem and Metab, Comparative Physiology, Molec. struct. (gen. & Other), Phospholipids, ...5.1003

### Unsaturated Fats

- THE COMPOSITION, NUTRITIVE VALUE AND QUALITY OF FISHERY PRODUCTS WITH SPECIAL EMPHASIS ON LIPID AND ITS INTERACTION ...Anti-oxidants, Fats, Fats - Lipids, Fish -non-specific, Radiation, ...6.0076  
LIPASE RESISTANT GLYCERIDES ...Fats, Fats and Oils -other, Fish -other, Lipids, ...5.1029

## Fats - Lipids & Oils

- OYSTER FATNESS STUDY ...Aquaculture & Fish-farming, Food Supply, Growth Rate, Invertebrate Nutrition, Oysters, ...5.0512  
REPORT DISTRIBUTION ...Commercial Fishing, Oysters, Periodicals, Spawning & Nesting Sites, ...11.0041

## Feces

- THE ROLE OF COPROPHAGY IN MARINE FOOD CHAINS ...Invertebrate Nutrition, Nutrition -other, Productivity - Food Chain, ...5.0963

## SUBJECT INDEX

## Feed Science and Technology

### Fish Meals

- MARKET STRUCTURE OF THE COMMERCIAL FISHING INDUSTRY ...Cattle Rations -other, Commercial Fishing, Fish & Shellfish, Market Structure, Marketing, Poultry Rations -other, ...4.0177  
UTILIZATION OF LATENT MARINE RESOURCES AND WASTE PRODUCTS ...Fish -other, Fish Protein Concentrate, Proteins, Proteins and Amino Acids, Salmon & Trout - Non-specific, ...6.0068  
PROCESSING KING CRAB ...Commercial Fishing, Crabs, Fish & Shellfish, Freezing, Organoleptic Studies, ...6.0003  
DEVELOPMENT OF MECHANIZATION DEVICE PROTOTYPES ...Design, Machinery, Equipment, Fish Protein Concentrate, Shrimp, ...6.0051  
UTILIZATION OF FRESHWATER FISH FOR ANIMAL FOODS ...Fish & Shellfish, Heating, Steaming, Sea Lions, Fur Seals, Thiaminase, ...5.0989  
BOTTOM FISH, FISH WASTE, SCRAP FISH & OTHER SEA PRODUCTS FOR FUR ANIMAL DIETS ...Alewife, menhaden, shad, herring, Antioxidants, Chubs, Notropis, Management, Sea Lions, Fur Seals, ...6.0001

### Processing and Preservation

#### Heating, Steaming

- UTILIZATION OF FRESHWATER FISH FOR ANIMAL FOODS ...Fish & Shellfish, Fish Meals, Sea Lions, Fur Seals, Thiaminase, ...5.0989

### Purified Diets

- NUTRITION OF SALMONID FISHES ...Captive Rearing, Diet Or Ration -other, in Vivo--see Also Feed Rations, Salmon & Trout - Non-specific, ...5.0304

### Quality Evaluation of Feed

#### in Vivo--see Also Feed Rations

- NUTRITION OF SALMONID FISHES ...Captive Rearing, Diet Or Ration -other, Purified Diets, Salmon & Trout - Non-specific, ...5.0304

### Rations

#### Cattle Rations -other

- MARKET STRUCTURE OF THE COMMERCIAL FISHING INDUSTRY ...Commercial Fishing, Fish & Shellfish, Fish Meals, Market Structure, Marketing, Poultry Rations -other, ...4.0177

#### Poultry Rations -other

- MARKET STRUCTURE OF THE COMMERCIAL FISHING INDUSTRY ...Cattle Rations -other, Commercial Fishing, Fish & Shellfish, Fish Meals, Market Structure, Marketing, ...4.0177

### Supplements, Feed Additives

#### Antioxidants

- BOTTOM FISH, FISH WASTE, SCRAP FISH & OTHER SEA PRODUCTS FOR FUR ANIMAL DIETS ...Alewife, menhaden, shad, herring, Chubs, Notropis, Fish Meals, Management, Sea Lions, Fur Seals, ...6.0001

## Ferrous Alloys

### Low Alloy Steels

- EFFECTS OF MATERIAL VARIATIONS IN THE COMPUTERIZED DESIGN OF PRIMARY HULL STRUCTURE ...Bulkheads, Computer Applications, Engineering Studies -other, Materials Used Undersea, Strength, Cohesion, ...8.0298  
WEIGHT ANALYSIS IN FISHING BOATS ...Approximations, Hull, Measuring Devices -other, Pressure Effects, ...8.0295  
STEEL PILING ...Corrosion Prevention -other, Fouling, Polarization, Soils, Water, ...8.0208  
CORROSION MITIGATION ...Corrosion Prevention -other, Deep, Fouling, Pre-stressed, Water, ...8.0205

### High Yield

- HY 130-150 STRUCTURAL STEELS ...Low Alloy Steels - Other, Materials Used Undersea, Stress Concentration-toughness, Stress Corrosion, Welding - Other, ...8.0221

## SUBJECT INDEX

## Fish

HY 80-110 STRUCTURAL STEELS ...Materials Used Undersea, Stress Concentration-toughness, Welding - Other, ...8.0222

HY 180/210 STRUCTURAL STEELS ...Low Alloy Steels - Other, Maraging, Materials Used Undersea, Precipitation Hardening, Stress Concentration-toughness, Welding - Other, ...8.0224

### Low Alloy Steels - Other

HY 130-150 STRUCTURAL STEELS ...High Yield, Materials Used Undersea, Stress Concentration-toughness, Stress Corrosion, Welding - Other, ...8.0221

HY 180/210 STRUCTURAL STEELS ...High Yield, Maraging, Materials Used Undersea, Precipitation Hardening, Stress Concentration-toughness, Welding - Other, ...8.0224

### Stainless Steels

#### Maraging

HY 180/210 STRUCTURAL STEELS ...High Yield, Low Alloy Steels - Other, Materials Used Undersea, Precipitation Hardening, Stress Concentration-toughness, Welding - Other, ...8.0224

#### Precipitation Hardening

HY 180/210 STRUCTURAL STEELS ...High Yield, Low Alloy Steels - Other, Maraging, Materials Used Undersea, Stress Concentration-toughness, Welding - Other, ...8.0224

### Fiber, Filament

PRODUCTION OF PLATES OF FIBER COMPOSITES BY SOLIDIFICATION, FORMING AND A COMBINATION OF BOTH ...Aluminum, Intermetallic Compound, Metal Matrix, Nickel, Orientation, ...8.0230

STRUCTURAL PLASTICS-DEEP SUBMERGENCE ...Design Data, Epoxies, Glass, Materials Used Undersea, Plastic Matrix, ...8.0213

### Fire Control

SONAR ACCURACY ...Acoustic, Acoustical, Instrumental Services, Platforms, Sonar, Transmission, ...1.0051

## Fish

### Alewife, menhaden, shad, herring

TAXONOMY AND DISTRIBUTION OF CLUPEOIDS AND REVISION OF THE GENUS ILISHA OF THE FAMILY CLUPEIDAE ...Animal Taxonomy, Handbooks, Indian Ocean-general, Nomenclature, Classification, Range Or Territorial Distr., ...5.0088

POTENTIAL FISHERY FOR RIVER HERRINGS IN CONNECTICUT RIVER ...Connecticut River, Data Acquisition, Life History Studies, Nets, Spawning & Nesting Sites, Survey Studies, ...5.0202

BIOLOGY OF ANADROMOUS ALOSIDS ...Mortality Rates, Spawning & Nesting Sites, Streams, Tidal Streams, Virginia, ...5.0150

A STUDY OF THE RATE AND PATTERN OF SHAD MIGRATION IN THE CONNECTICUT RIVER UTILIZING SONIC TRACKING APPARATUS ...Connecticut River, Migration, Spawning & Nesting Sites, Tags, Telemetry, ...5.0046

ANADROMOUS FISHERY ...Censusing, Commercial Fishing, Massachusetts, ...4.0011

STUDY OF THE RIVER PHASE OF THE LIFE HISTORIES OF ALOSA PSEUDOHARENGUS AND AESTIVALIS ...Aquatic Ecology, Connecticut River, Life History Studies, Spawning & Nesting Sites, ...5.0245

FARMINGTON RIVER SHAD STUDIES ...Bottom Sampling, Captive Rearing, Migration, Sampling, Streams, ...5.0203

EFFECTS OF MARSH MANAGEMENT STRUCTURES UPON FISHES ...Crabs, Engineering Structures-general, Land Use, Shrimps - Common, Spawning & Nesting Sites, Swamps-marshes, ...5.0206

INVESTIGATION OF COMMERCIAL FISH POPULATIONS IN WESTERN LAKE SUPERIOR ...Commercial Fishing, Lake Superior, Lakes, Nets, Population Dynamics, ...5.0113

LIFE HISTORY OF CLUPEA HARENGUS PALLASI ...Aquaculture & Fish-farming, Artificial Insemination, Life History Studies, Water Salinity, Water Temperature-non-specific, ...5.0035

ABUNDANCE AND AVAILABILITY OF PRE-RECRUIT HERRING ...Aquatic Ecology, Environmental Ecology, Life History Studies, Number Or Density, Vertical Distribution, ...5.0208

RACIAL STUDIES OF HERRING ...Animal Taxonomy, Atlantic Ocean-north, Biochemical Analysis, Blood Typing Studies, Management -other, ...5.0265

BIOSTATISTICS OF HERRING ...Age, Atlantic Ocean-north, Environmental Ecology, Growth Rate, Population Dynamics, Proprioceptors, ...5.0099

COLLECTION, COMPILATION, AND ANALYSIS OF GULF CATCH STATISTICS AND LOGBOOK DATA ...Commercial Fishing, Computer Methods -general, Fish Studies -other, ...5.0126

INVESTIGATION OF THE BIOLOGY AND POPULATION STRUCTURE OF GULF MENHADEN ...Bone, Gulf of Mexico, Handbooks, Population Dynamics, Vertebrate Anatomy, ...5.0128

ESTIMATION OF JUVENILE ABUNDANCE IN ESTUARINE NURSERIES ...Aquatic Ecology, Estuaries, Gulf of Mexico, Maturity & Growth Stages, Number Or Density, ...5.0131

SAMPLING OF THE ATLANTIC COMMERCIAL CATCH ...Atlantic Ocean-general, Commercial Fishing, Nets, Number Or Density, ...5.0129

POPULATION STUDIES ...Animal Distr. (non-specific), Animal Taxonomy, Environmental Ecology, Population Dynamics, ...5.0130

ESTUARINE BIOLOGY--RESPONSE OF LARVAE TO TEMPERATURE AND SALINITY ...Captive Rearing, Estuaries, Longevity, Low Temp. -but Above 32f, Maturity & Growth Stages, Water Salinity, ...5.0213

TAGGING ...Migration, Population Dynamics, Tags, Telemetry, Vertebrate Anatomy, ...5.0127

MARINE BIOLOGICAL INVESTIGATIONS - ANALYSIS OF HERRING FISHERY DATA ...Age, Alaska, Data Analysis - General, Dispersion -other, ...5.0010

POPULATION STRUCTURE OF THE ALEWIFE AND COREGONIDS ...Aquatic Ecology, Cisco, Lake Herring, Environmental Ecology, Lake Michigan, Population Dynamics, ...5.0106

INTERRELATIONS OF ALEWIVES AND ASSOCIATED SPECIES ...Behavioral Ecology, Competition, Lake Michigan, Predation, Vertical Distribution, ...5.0111

TAXONOMY AND BIOLOGY OF CLUPEOID FISHES ...Anchovies, Animal Taxonomy, Atlantic Ocean-general, Handbooks, ...5.0060

SCHOOLING BEHAVIOR ...Anchovies, Behavioral Ecology, Environmental Ecology, Tuna, Mackerel, Albacore... , ...5.0038

FEEDING BEHAVIOR ...Anchovies, Behavior, Environmental Physiology, Food Supply, Sensory Organs, ...5.0040

REARING MARINE FISH ...Anchovies, Captive Rearing, Environmental Physiology, Tuna, Mackerel, Albacore... , ...5.0041

BOTTOM FISH, FISH WASTE, SCRAP FISH & OTHER SEA PRODUCTS FOR FUR ANIMAL DIETS ...Antioxidants, Chubs, Notropis, Fish Meals, Management, Sea Lions, Fur Seals, ...6.0001

### Anchovies

TAXONOMY AND BIOLOGY OF CLUPEOID FISHES ...Alewife,menhaden,shad,herring, Animal Taxonomy, Atlantic Ocean-general, Handbooks, ...5.0060

DETERMINE ALTERNATE LIVEBAIT SPECIES ...Captive Rearing, Commercial Fishing, Food Supply, Hawaii, Tuna, Mackerel, Albacore... , ...5.0080

SCHOOLING BEHAVIOR ...Alewife,menhaden,shad,herring, Behavioral Ecology, Environmental Ecology, Tuna, Mackerel, Albacore... , ...5.0038

FEEDING BEHAVIOR ...Alewife,menhaden,shad,herring, Behavior, Environmental Physiology, Food Supply, Sensory Organs, ...5.0040

REARING MARINE FISH ...Alewife,menhaden,shad,herring, Captive Rearing, Environmental Physiology, Tuna, Mackerel, Albacore... , ...5.0041

SUBPOPULATIONS ...Commercial Fishing, Pacific Ocean-general, Population Dynamics, ...5.0042

### Atlantic Salmon, Sebago Salmon

AQUATIC MYXOBACTERIA - CHONDROCOCCUS COLUMNARIS ...Identification , Myxobacteria, Pathology, Warm Water, ...5.0848

COMPARATIVE BEHAVIOR OF HATCHERY-REARED AND WILD SALMONIDS ...Behavior, Captive Rearing, Environmental Physiology, Lake Trout, Brook Trout, ...5.0264

## Fish

## SUBJECT INDEX

### Basses -sea,white, White Perch

- SPORT FISH BEHAVIORAL STUDIES ...Behavioral Ecology, Habitat Studies, Porgies, Rockfish, Scoraionfish, ...5.0045
- ESTIMATION OF PARAMETERS OF STRIPED BASS POPULATION AND DESCRIPTION OF THE FISHERY OF LOWER CHESAPEAKE BAY ...Age, Censusing, Chesapeake Bay, Fishing Gear, Population Dynamics, ...5.0151
- STOCKING AND SURVIVAL OF STRIPED BASS FINGERLINGS ...Alabama, Commercial Fishing, Maturity & Growth Stages, Stocking of Fish & Shellfish, Streams, ...5.0001

### Blue Catfish, White Catfish

- CULTURE OF BLUE, CHANNEL, AND WHITE CATFISH IN BRACKISH WATER PONDS ...Aquaculture & Fish-farming, Brackish Water, Captive Rearing, Channel Catfish, Louisiana, ...8.0006
- MOVEMENTS OF FRESHWATER CATFISH IN THE ESTUARIES OF SOUTHWEST LOUISIANA ...Environment Resistance, Estuaries, Louisiana, Migration, Water Salinity, ...5.0090

### Bluefish

- LOCATION OF INSHORE SPAWNING AREAS ...Long Island Sound, Nets, Spawning & Nesting Sites, Water Temperature-non-specific, ...5.0201
- BLOOD TYPES AS INDICATORS OF BLUEFISH RACES ...Blood Cells, Blood Plasma and Serum, Blood Typing Studies, Immunology, Polymorphism, ...5.0319
- HEMOGLOBIN VARIATIONS AS INDICATORS OF BLUEFISH RACES ...Animal Taxonomy, Hemoglobin, Polymorphism, Reproduction Studies (general), ...5.0320
- RETINAL RHYTHMS UNDER CONTROLLED LIGHT ...Darkness, Histology and Cytology, Light Quantity -non-specific, Visual, Visual Organs, ...5.0282
- LIGHT AND DARK ADAPTION IN THE RETINAE OF YOUNG BLUEFISH ...Adaptation, Photoperiod, Retina, Visual Organs, ...5.0283
- RELATION OF TEMPERATURE TO RHYTHMIC BEHAVIOR ...Behavior, Biological Rhythms, Environmental Physiology, Locomotion -animal, Low Temp. -but Above 32f, ...5.0284
- TRACKING MIGRATIONS OF BLUEFISH POPULATIONS ALONG ATLANTIC COAST TO LEARN BIOLOGY OF THE SPECIES (MIGRATORY HABITS OF BLUEFISH) ...Atlantic Ocean-north, Migration, Population Dynamics, Tags, ...5.0120
- INFLUENCE OF UNLIMITED FOOD SUPPLY ON RHYTHMIC ACTIVITY OF BLUEFISH ...Biological Rhythms, Food Supply, Predation, ...5.0122
- RHYTHMIC ACTIVITY OF BLUEFISH IN RELATION TO NORMAL LIGHT REGIME ...Biological Rhythms, Environmental Physiology, Locomotion -animal, Photoperiod, ...5.0285
- RHYTHMIC ACTIVITY OF BLUEFISH UNDER EXPERIMENTALLY VARIED LIGHT REGIMES ...Adaptation, Biological Rhythms, Environmental Physiology, Photoperiod, Water Light Quality & Quantity, ...5.0286
- AGE AND GROWTH OF BLUEFISH ...Age, Atlantic Ocean-north, Growth Rate, Population Dynamics, Scales, ...5.0287

### Bluegills, Bream

- EXPERIMENTAL AND BIOMATHEMATICAL ANALYSIS OF THE PHENOMENON OF ATTACK ...Behavioral Ecology, Computer Methods -general, Environmental Physiology, Largemouth Bass, Minnows, Predation, ...5.0535
- RATE OF ABSORPTION OF ENDRIN BY BLUEGILL SUNFISH ...Bioassay, DDT, Endrin, Metabolism, Mode of Action -animal, ...5.0263

### Bonneville Cisco

- DEVELOPMENTAL MORPHOLOGY OF COREGONIDS ...Aquatic Ecology, Cisco, Lake Herring, Developmental Physiology, Great Lakes-general, Vertebrate Anatomy, ...5.0274

### Bullheads

- BEHAVIOR IN EMBRYOS AS IT RELATES TO ENCEPHALIZATION ...Basic Embryology, Behavior, Central Nervous System, Developmental Physiology, Visual Organs, ...5.0270

### Channel Catfish

- CULTURE OF BLUE, CHANNEL, AND WHITE CATFISH IN BRACKISH WATER PONDS ...Aquaculture & Fish-farming, Blue Catfish, White Catfish, Brackish Water, Captive Rearing, Louisiana, ...8.0006

### Chondrichthyes -other

- SYSTEMATICS, ZOOGEOGRAPHY, AND ECOLOGY OF ELASMOBRANCHS OF THE WESTERN ATLANTIC OCEAN ...Animal Taxonomy, Aquatic Ecology, Atlantic Ocean-general, Nearctic, ...5.0132
- OSMOTIC COMPONENTS IN ELASMOBRANCH BLOOD ...Blood Plasma and Serum, Environmental Physiology, Osmoregulation, Water Salinity, Water Temperature-non-specific, ...5.0249

### Chubs, Notropis

- BOTTOM FISH, FISH WASTE, SCRAP FISH & OTHER SEA PRODUCTS FOR FUR ANIMAL DIETS ...Alewife,menhaden,shad,herring, Antioxidants, Fish Meals, Management, Sea Lions, Fur Seals, ...6.0001

### Cisco, Lake Herring

- DEVELOPMENTAL MORPHOLOGY OF COREGONIDS ...Aquatic Ecology, Bonneville Cisco, Developmental Physiology, Great Lakes-general, Vertebrate Anatomy, ...5.0274
- POPULATION STRUCTURE OF THE ALEWIFE AND COREGONIDS ...Alewife,menhaden,shad,herring, Aquatic Ecology, Environmental Ecology, Lake Michigan, Population Dynamics, ...5.0106
- EARLY LIFE HISTORY OF COREGONIDS ...Environmental Ecology, Life History Studies, Maturity & Growth Stages, Technique Development, Water Environment -other, ...5.0110

### Codfishes, Hake

- TAGGING ENGLISH SOLE, PETRALE SOLE, AND PACIFIC COD ...Commercial Fishing, Migration, Righteye Flounders, Size, Tags, Washington, ...5.0158
- TAG RECOVERY, ENGLISH SOLE, PETRALE SOLE, AND PACIFIC COD ...Migration, Population Dynamics, Righteye Flounders, Tags, Washington, ...5.0159
- SAMPLING OF GROUND FISH STOCKS ...Age, Bone, Proprioceptors, Righteye Flounders, Size, ...5.0160
- PELAGIC FISH EXPLORATIONS ...Commercial Fishing, Fish -other, Nets, Vertical Distribution, ...5.0172
- POPULATION DYNAMICS OF NEW ENGLAND GROUND FISH ...Atlantic Ocean-north, Lefteye Flounders, Population Dynamics, Rockfish, Scoraionfish, ...5.0103
- LIFE HISTORY OF THE BURBOT AND LONGNOSE SUCKER ...Lake Superior, Lakes, Life History Studies, Suckers, ...5.0184
- BIOLOGICAL STUDIES OF NORTHWEST ATLANTIC GROUND FISH ...Atlantic Ocean-north, Freshwater Mussels, Scallops, Righteye Flounders, Rockfish, Scoraionfish, ...5.0104
- GROUND FISH INVESTIGATIONS (POTENTIAL YIELD OF UNDERUTILIZED GROUND FISH STOCKS) ...Commercial Fishing, Legislation, Number Or Density, Rockfish, Scoraionfish, ...5.0171
- BLOOD PARASITES OF NORTHWEST FISHES ...Blood Plasma and Serum, Helminths, Protozoa, Sculpins, Trematoda -other, ...5.0335

### Cutthroat Trout

- MECHANISMS OF HOMING AND ORIENTATION OF SALMO CLARKI IN YELLOWSTONE LAKE AND ITS TRIBUTARIES ...Aquatic Ecology, Behavior, Biological Rhythms, Wyoming, ...5.0279

### Deepsea Smelts

- TAXONOMIC REVISION OF BATHYLAGIDAE ...Animal Taxonomy, Tables, Compilations, Catalogs, Temperate, Tropic, ...5.0055

### Drums

- COMPARATIVE BIOCHEMISTRY OF PROTEINS FROM GULF FISH ...Blood Proteins -non-specific, Gel Electrophoresis, Hemoglobin, Shrimps - Common, ...5.0326

## SUBJECT INDEX

## Fish

- CULTURE OF ATLANTIC CROAKER IN BRACKISH WATER PONDS ...Aquaculture & Fish-farming, Brackish Water, Captive Rearing, Management, Ponds, Productivity (agricultural), ...8.0005
- DISTRIBUTION, AGE GROWTH, AND MORTALITY STUDIES OF SALT WATER FISHES OF IMPORTANCE TO SPORT FISHERMEN ...Age, Chesapeake Bay, Growth Rate, Mortality Rates, Vertical Distribution, ...5.0155
- DIURNAL-NOCTURNAL ACTIVITY OF THE QUEENFISH, SERIPHUS POLITUS ...Aquatic Ecology, Behavioral Ecology, Biological Rhythms, Fish -other, Other, Sound Production, ...5.0230
- Fish -non-specific**
- FISHERIES RESOURCES IDENTIFICATION AND ASSESSMENT ...Aerial Photography, Behavioral Ecology, Commercial Fishing, Optical, Spectral Reflectance, ...4.0149
- SPECTRAL SIGNATURES OF FISH SCHOOL IDENTIFICATION ...Atomic Absorption, Oil, Oils -fats, Spectral Reflectance, ...4.0151
- REMOTE SENSOR SYSTEMS INTERGRATION AND PRESENT OPERATIONS DESCRIPTION ...Commercial Fishing, Remote Sensing -other, Spacecraft Sensory Devices, Spectral Reflectance, ...4.0154
- SIMULATED WEIGHTLESSNESS IN FISH ...Behavior, Cardiovascular System, Gravitational Fields, Gravity, Proprioceptors, ...5.0275
- DETECTION AND CLASSIFICATION OF FISH AND MINERAL OIL SLICKS BY REMOTE SENSING FROM ORBITAL ALTITUDE ...Oil, Oils -fats, Spectral Reflectance, Ultra - Violet Radiation, ...4.0140
- A STUDY OF THE DEEP CIRCULATION AND DEEP FISH POPULATIONS IN THE PACIFIC OCEAN ...Currents-ocean, Pacific Ocean-general, Tides, Vertical Distribution, ...2.0005
- IONOCYTE FORMATION IN GILL EPITHELIUM OF FISHES ...Biosynthesis, Developmental Physiology, Differentiation Mechanism, Fish, Osmoregulation, ...5.0301
- COMPARATIVE STUDY OF NITROGEN SECRETION IN FISHES ...Comparative Physiology, Fish, Metabolism, Nitrogen, Vertebrate Anatomy, ...5.1022
- SPATIAL ORIENTATION OF FISHES AND ITS SENSORY BASES ...Behavior, Environmental Physiology, Migration, Orientation, Sensory Organs, ...5.0338
- COPEPOD CRUSTACEANS PARASITIC ON FISHES ...Collections, Copepods, Ectoparasites, Indian Ocean-general, Ships and Cruises, Vertical Distribution, ...5.0368
- STRUCTURE OF THE FISH FAUNA OF A FLORIDA CORAL REEF ...Ecological, Reefs, Vertical Distribution, ...5.0205
- STUDIES IN THE PHYSIOLOGY AND BIOCHEMISTRY OF DEEP-SEA FISHES ...Environmental Physiology, Metabolism, Vertical Distribution, Water Pressure, ...5.0237
- MARINE ZOOGEOGRAPHY ...Tables, Compilations, Catalogs, ...5.0593
- ICHTHYOFAUNA OF THE FLORIDA CURRENT ...Florida, Number Or Density, Temporal Distribution, Vertical Distribution, ...5.0066
- BIOLOGICAL ASPECTS OF MIDWATER SOUND SCATTERING ...Atlantic Ocean-north, Bioluminescence, Range Or Territorial Distr. , Scattering, Sound Production, Vertical Distribution, ...1.0054
- SHORE FISHES OF ANNOBON AND FERNANDO POO ...Art Work-illustrations-etc, Atlantic Ocean-general, Collections, Museum, ...5.0067
- RENEWAL RESEARCH PROPOSAL FOR HEARING AND ALLIED SENSES IN FISHES ...Auditory, Behavior, Sound Production, ...5.0254
- MORPHOGENETIC MOVEMENTS IN FISH EMBRYOS ...Basic Embryology, Morphological Action, ...5.0281
- NUTRITION AND PHYSIOLOGY OF MARINE FISH IN CONTROLLED GNOTOBIOTIC ENVIRONMENTS ...Aquaria, Environmental Physiology, Germ Free Animal, Nutrition -other, ...5.0317
- OCEANIC FISHES OF THE TROPICAL ATLANTIC ...Atlantic Ocean-south, Survey Studies, Tropic, Vertical Distribution, ...5.0068
- FACTORS AFFECTING HORIZONTAL DISTRIBUTION OF MESOPELAGIC FISHES ...Aquatic Ecology, Atlantic Ocean-north, Behavioral Ecology, Range Or Territorial Distr. , Vertical Distribution, ...5.0105
- ACOUSTICO-LATERALS FUNCTION IN FISH ORIENTATION AND COMMUNICATION ...Auditory, Behavior, Orientation, Sensory Organs, Signal Detection, ...5.0289
- SCHOOLING BEHAVIOR IN FISHES ...Behavior, Sensory Organs, Social Behavior, Visual Organs, ...5.0125
- PARASITISM IN DEEPSEA FISHES ...Helminths, Host Specificity, Protozoa, Vertical Distribution, ...5.0243
- DISTRIBUTION OF THE MID-WATER FISHES OF THE GULF OF CALIFORNIA ...Environmental Ecology, Gulf of California, Nets, Organism Sampling Devices, Vertical Distribution, ...5.0043
- LIPID COMPOSITION OF ANTARCTIC MARINE ORGANISMS AND SEA WATER ...Antarctic Ocean, Gulf of Mexico, Lipids, Low Temp. -but Above 32f, Phytoplankton, Productivity - Food Chain, Zooplankton, ...5.1031
- THE EFFECTS OF SEAL AND FISH PREDATION ON CERTAIN ANTARCTIC BENTHIC COMMUNITIES ...Antarctica, Benthic Organisms (non-specif), Biology, Predation, Productivity - Food Chain, Seals, ...5.1039
- THERMALMETABOLIC RELATIONSHIPS OF STENOTHERMAL FISHES ...Antarctica, Environmental Physiology, Proprioceptors, Thermoregulation, Water Pressure, Water Temperature-non-specific, ...5.0312
- CONFERENCE ON THE FUTURE OF THE U.S. FISHING INDUSTRY ...Commercial Fishing, Meetings, ...4.0188
- THE STATUS AND POTENTIAL OF AQUACULTURE ...Algal Culture, Aquaculture & Fish-farming, Food Supply, Survey Studies, ...8.0043
- SONIC SENSITIVITY OF FISHES AND AMPHIBIA ...Auditory, Comparative Physiology, Frogs, Sensory Organs, ...5.0960
- DEEP-WATER FOULING ...Biological, Fouling, Predation, Vertical Distribution, ...8.0233
- VENOMOUS FISHES AND SEA SNAKES OF SOUTHEAST ASIA ...Behavior, Snakes, Southeast Asia, Venom, Vertebrate Anatomy, ...6.0101
- CRYOGENIC PRESERVATION OF VIABLE FISH SPERM ...Artificial Insemination, Cellular Physiology, Freezing Techniques, Male Gametes, ...5.0303
- ECOLOGICAL INVESTIGATIONS OF SOME COMMON MARINE FISHES OFF THE MEDITERRANEAN COAST OF ISRAEL ...Mediterranean Sea-general, Population Dynamics, Productivity - Food Chain, Range Or Territorial Distr. , ...5.0089
- SEA SLED AND SCUBA RECONNAISSANCE OF INSHORE AND STUDIES ON EFFECT OF ARTIFICIAL SHELTERS ON STANDING CROP OF FISHES ...Coastlines-shorelines, Diving and Scuba, Geomorphology-topography, Hawaii, Management -other, ...9.0008
- ESTUARINE DREDGE HOLE INVESTIGATIONS ...Aquatic Ecology, Coring and Dredging, Estuaries, Habitat Studies, ...5.0908
- CHEMICAL AND PHYSICAL DATA ...Population Dynamics, Temperature, Turbidity & Suspended Matter, Water Movement, Currents,, Water Salinity, Water Temperature-non-specific, ...5.0207
- INVENTORY OF LARVAL FISH ...Aquatic Ecology, Brackish Water, Maturity & Growth Stages, ...5.0071
- EVALUATION OF HABITAT ALTERATION, CURRITUCK SOUND ...Habitat Studies, North Carolina, Turbidity & Suspended Matter, Water Salinity, ...5.0914
- TRAMMEL NET SAMPLING IN ESTUARINE AREAS ...Competition, Estuaries, Lakes, Nets, Population Dynamics, ...5.0096
- A STUDY OF THE SEASONAL ABUNDANCE, DISTRIBUTION AND SPECIES COMPOSITION, WITH DEPTH, OF NEKTON FAUNA, WITH PARTICULAR EMPHASIS ON FISHES ...Life History Studies, Number Or Density, Vertical Distribution, Zooplankton, ...5.0114
- EXPANSION OF CURRENT AND DEVELOPMENT OF ADDITIONAL COMMERCIAL FISHERIES CATCH, PRODUCTION AND GEAR STATISTICS ...Alaska, Censusing, Commercial Fishing, Fish -other, Reliability Theory, ...5.0018
- KVICHAK RIVER TOTAL SMOLT ...Alaska, Censusing, Migration, Mortality Rates, Nets, Population Dynamics, ...5.0002
- PORT SAMPLING - CRESENT CITY, BROOKINGS, PORT FORD ...Crabs, Life History Studies, Nets, Shrimps - Common, ...5.0356
- SEA SURVEY INVESTIGATIONS ...California Current, Population Dynamics, Survey Studies, Vertical Distribution, ...4.0117

- DEVELOPMENT OF UNDER-ICE HORIZONTAL SONAR SCANNING EQUIPMENT AND TECHNIQUES FOR LOCATING FISH SCHOOLS ...Behavioral Ecology, Commercial Fishing, Lakes, Nets, Sonar, ...8.0138
- STREAM IMPROVEMENT PLANNING ...Benefit-cost Analysis, Engineering Structures-general, Management -other, Planning, Streams, ...5.0220
- FISH POPULATION OFF THE ISLAND OF TUTUILA, AMERICAN SAMOA ...American Samoa, Animal Taxonomy, Commercial Fishing, Fishing Gear, Number Or Density, ...5.0032
- FISH POPULATIONS OF AMERICAN SAMOA ...American Samoa, Crustacea -non-specific, Fishing Gear, Number Or Density, ...5.0033
- GEAR EVALUATION ...American Samoa, Fishing Gear, Nets, ...8.0114
- KVICHAK RIVER SMOLT STUDY LITERATURE SURVEY ...Alaska, Censusing, Migration, Number Or Density, Survey Studies, ...5.0003
- INTERVIEW AND OBSERVATION ...Censusing, Commercial Fishing, Continental Shelf, Range Or Territorial Distr., ...5.0156
- DESIGN OF SAMPLING PLAN AND PROCUREMENT OF CHARTER VESSEL ...Commercial Fishing, Continental Shelf, Nets, Number Or Density, Vertical Distribution, ...4.0014
- WINTER DISTRIBUTION OF FISHES ...Continental Shelf, Environmental Ecology, Salinity, Temperature, Temporal Distribution, Winter, ...5.0153
- SPRING DISTRIBUTION OF FISHES ...Commercial Fishing, Continental Shelf, Data Acquisition, Environmental Ecology, Spring, Temporal Distribution, ...5.0154
- FISH COLLECTION OF NORTH CAROLINA AND WESTERN ATLANTIC FISHES ...Atlantic Ocean-north, Collections, Fresh Water, North Carolina, ...5.0133
- ECOLOGY OF COMMERCIAL FISH SPECIES IN NORTHERN LAKE MICHIGAN ...Commercial Fishing, Lake Michigan, Number Or Density, Population Dynamics, Vertical Distribution, ...5.0112
- APPLICATION OF BIOTELEMETRY TO THE STUDY OF MARINE VERTEBRATES ...Biological Sciences, Central Nervous System, Locomotion -animal, Telemeters, Telemetry, ...5.0637
- BIOCHEMISTRY AND PHYSIOLOGICAL ECOLOGY OF POISONED FISH ...Enzymes -non-specific, Metabolism, Muscle, Pathology, Toxins -non-specific, ...5.0305
- OREGON FISHES - THEIR CLASSIFICATION, DISTRIBUTION AND BIOLOGY ...Animal Taxonomy, Fresh Water, Oregon, Vertical Distribution, ...5.0138
- CRYOGENIC PRESERVATION OF VIABLE FISH SPERM ...Fertility, Freezing Techniques, Male Gametes, Rapid Freeze, ...5.0310
- EARLY LIFE OF BOREAL FOOD FISH AND SHELLFISH ...Animal Taxonomy, Life History Studies, Mollusks -non-specific & Other, Mortality Rates, ...5.0139
- FISH GENETICS AND ECOLOGY ...DNA Other, Estuaries, Life History Studies, ...5.0309
- REPRODUCTIVE ISOLATING MECHANISMS IN PANAMANIAN INSHORE MARINE FISHES ...Behavioral Ecology, Comparative Physiology, Panama, Reproduction Studies (general), ...5.0244
- STUDY OF FISH MUCUS BIOCHEMISTRY ...Locomotion -animal, Mucus, ...8.0172
- BIOLOGICAL FALSE TARGETS AND RELATED ACOUSTIC CHARACTERISTICS ...Animal Taxonomy, Behavioral Ecology, Sound Production, ...1.0041
- WATER QUALITY AND NUTRIENTS, SACRAMENTO-SAN JOAQUIN RIVER SYSTEM ...Environmental Ecology, Eutrophication, Nutrients, Plankton (non-specific), Water Quality-general, ...6.0139
- DISTRIBUTION OF YOUNG STAGES OF COASTAL FISHES ...Continental Shelf, Estuaries, Maturity & Growth Stages, Number Or Density, Ships and Cruises, ...5.0119
- INFLUENCE OF THE PHYSICAL ENVIRONMENT ON DISTRIBUTION OF YOUNG STAGES OF COASTAL GAME FISH ...Continental Shelf, Environmental Ecology, Maturity & Growth Stages, Physical-general, Range Or Territorial Distr., ...5.0211
- EXPLORATORY COLLECTION AND CARE OF FISH FOR TESTING AT TIBURON ...Bioassay, California, Laboratory Animals, San Francisco Bay, ...5.0116
- THERMAL PREFERENCES OF MARINE FISHES AND INVERTEBRATES ...Behavior, Invertebrates -non-specific, Thermal, Water Temperature-non-specific, ...5.0209
- EFFECTS OF HOT WATER MASSES ON MARINE FISHES ...Atlantic Ocean-north, Behavior, High Temp. -85f Or Above, Oceanic Fronts, Thermal, ...5.0210
- TOXICANT TOLERANCE STUDIES-SCREENING OF PESTICIDES AND FISH AT TIBURON ...California, Laboratory Animals, Pesticides -non-specific, Screening Potential Pesticides, ...5.0278
- LIFE HISTORY AND BEHAVIOR OF FISHES ON ARTIFICIAL REEFS ...Behavioral Ecology, Habitat Studies, Life History Studies, Population Dynamics, ...5.0121
- HYDROGRAPHY, SEDIMENTATION AND CHEMICAL ASPECTS OF THE REEF ENVIRONMENT ...Aquatic Soils, Currents-ocean, Environmental Ecology, Reefs, ...5.0212
- ECOLOGY OF THE KELP FORESTS ...Behavioral Ecology, California, Environmental Ecology, Habitat Studies, Laminariaceae (non-specif.&ot), ...5.0194
- 1965 SALT-WATER ANGLING SURVEY ...Animal Taxonomy, Censusing, Fishing, ...9.0011
- EFFECT OF TEMPERATURES AND CIRCULATION OF CONTINENTAL SHELF WATERS ON THE DISTRIBUTION OF FISHES ...Continental Shelf, Surface Environments, Temperature, Water Movement, Currents,, Water Temperature-non-specific, ...4.0165
- METHODS OF REARING EGGS AND LARVAE TO JUVENILE STAGES ...Aquaculture & Fish-farming, Captive Rearing, Environmental Physiology, Maturity & Growth Stages, ...8.0010
- ATLAS OF MARINE FAUNA ...Atlantic Ocean-north, Crustacea -non-specific, Handbooks, Mollusks -non-specific & Other, ...5.0101
- FISH POPULATION STUDY ...Chemical Measurements -water, Commercial Fishing, Food Supply, Population Dynamics, Water Temperature-non-specific, ...5.0174
- MARINE BIOLOGICAL INVESTIGATIONS - TAXONOMIC COLLECTION OF THE FRESH AND SALTWATER FISHES OF ALASKA ...Alaska, Animal Taxonomy, Collections, Fresh Water, ...5.0008
- GULF OF ALASKA DEMERSAL FISH INVESTIGATIONS ...Gulf of Alaska, Population Dynamics, Productivity (agricultural), Vertical Distribution, ...5.0009
- COLLECTION OF JUVENILE MIGRANTS FROM RIVERS AND STREAMS ...Electric Power Plants, Engineering Structures-general, Management -other, Migration, Streams, ...5.0513
- ROUTINE SAMPLING AT SEVEN INDEX STATIONS ...Bottom Sampling, Data Acquisition, Lake Erie, Plankton Sampling, Sampling, ...5.0214
- YOUNG FISHES OF A TIDAL ZONE ...Estuaries, Habitat Studies, Life History Studies, Size, Temporal Distribution, ...5.0073
- FISHES TAKEN INCIDENTAL TO SHRIMP TRAWLING ...Atlantic Ocean-south, Nets, Number Or Density, Shrimps - Common, ...5.0072
- SYSTEMATIC STUDIES OF FISHES ...Animal Taxonomy, Developmental Physiology, Life History Studies, Vertebrate Anatomy, ...5.0059
- IDENTIFICATION AND DESCRIPTION OF FISH LARVAE ...Animal Taxonomy, Atlantic Ocean-north, Life History Studies, Southern, ...5.0074
- BEHAVIOR OF LARVAL FISHES ...Behavior, Captive Rearing, Commercial Fishing, Environmental Physiology, Maturity & Growth Stages, ...5.0062
- ARTIFICIAL SELECTION - FISH ...Female Gametes, Genetic Resistance, Pesticides -non-specific, Pollution - Effects of, Selection & Breeding, ...5.0256
- GREAT LAKES GEAR RESEARCH ...Commercial Fishing, Fishing Gear, Great Lakes-general, Lakes, Population Dynamics, ...8.0136
- MONITORING OF PESTICIDE LEVELS IN THE GREAT LAKES ...Great Lakes-general, Insecticides -non-specific, Monitoring Systems, Pollutants-general, Sampling, ...6.0120
- ESTABLISHMENT AND PERPETUATION OF STOCKS OF EXPERIMENTAL FISH ...Behavior, Environmental Ecology, Environmental Physiology, Great Lakes-general, Life History Studies, ...5.0109
- MARINE FISH BEHAVIOR ...Behavioral Ecology, Commercial Fishing, Fishing Gear, ...5.0176

## SUBJECT INDEX

## Fish

MARINE BIOLOGICAL INVESTIGATIONS STUDIES PROJECT (FISHES) ...Alaska, Aquatic Ecology, Bays, Population Dynamics, ...5.0011

FISH GUIDING ...Animal Distr. (non-specific), Control Systems, Instrumental Services, Management -other, Water Environment -other, ...8.0015

GREAT LAKES EXPLORATIONS ...Commercial Fishing, Fishing Gear, Great Lakes-general, Population Dynamics, ...5.0108

DESCRIPTIVE PHYSICAL OCEANOGRAPHY OF THE EASTERN TROPICAL ATLANTIC ...Atlantic Ocean-general, Environmental Ecology, Productivity - Food Chain, Tropic, ...4.0127

PHYSIOLOGY OF MARINE ORGANISMS ...Energy, Environmental Physiology, Food Supply, ...5.0939

CALIFORNIA CURRENT SURVEYS ...California Current, Environmental Ecology, Pacific Ocean-east, Plankton (non-specific), ...4.0114

SPECIES LIFE HISTORY AND DISTRIBUTION ...California Current, Life History Studies, Maturity & Growth Stages, Number Or Density, Oceanic Fronts, ...5.0037

FISH HOLDING AND LIFE STAGE SENSITIVITY STUDIES ...Contamination - Water, Environment Resistance, Fish, Great Lakes-general, Maturity & Growth Stages, ...5.0276

MARINE BIOLOGICAL ASSESSMENT OF POLLUTIONAL FATE ...Contamination - Water, Crustacea -non-specific, Nets, Pollution - Effects of, ...6.0176

PARASITES OF PHILIPPINE FISHES ...Animal Distr. (non-specific), Aquatic Ecology, Helminths, Philippines, ...5.0251

PHOTOBIOLOGY OF MARINE ANIMALS ...Bioluminescence, Vertebrate Anatomy, Visual, Visual Organs, ...5.0327

ECOLOGY OF CLOSTRIDIUM BOTULINUM TYPE E IN GREEN BAY ...Great Lakes-general, Microbiological, ...5.0850

ANAEROBIC BACTERIA IN THE MARINE ENVIRONMENT ...Food (epidemiology), Isolation From Nat. environ., Microbiological, ...5.0846

MARINE TOXINS OF THE TROPICAL PACIFIC ...Algal Metab.(non-specific & ot), Pacific Ocean-general, Polynesia, Toxicology, Toxins, ...6.0113

### Fish -other

COMPARATIVE STUDY OF NITROGEN SECRETION IN FISHES ...Comparative Physiology, Fish, Metabolism, Nitrogen, Vertebrate Anatomy, ...5.1022

VISUAL CAPACITIES IN TELEOST FISHES ...Behavior, Behavioral Ecology, Vertebrate Anatomy, Vision, Visual Organs, ...5.0290

MORPHOLOGIC REGULATORY MECHANISMS IN TERRESTRIAL AND MARINE ORGANISMS ...Amphibia -non-specific & Other, Collagen, Developmental Physiology, Metabolism, Porifera, ...5.0982

REGULATION OF AMMONIA EXCRETION IN FISH AND AQUATIC AMPHIBIA ...Ammonium, Anura -other, Kidney and Urinary System, Metabolism, Water, ...5.0269

SYSTEMATICS AND DISTRIBUTION OF WORMFISHES (MICRODESMIDAE) ...Animal Taxonomy, Bone, Collections, Vertebrate Anatomy, Vertical Distribution, ...5.0115

MONOGRAPH OF THE FISHES OF THE ORDER PLECTOGNATHI ...Animal Taxonomy, Bone, Comparative Anatomy, Publications -other, Vertebrate Anatomy, ...5.0146

ENDOCRINE REGULATED PROCESSES IN TELEOST FISHES ...Comparative Physiology, Environment Resistance, Hypophysectomy, Osmoregulation, Pituitary, ...5.0288

PHYLOGENETIC SIGNIFICANCE OF SOUND-PRODUCING MECHANISMS OF OPHIDIID AND RELATED FISHES ...Comparative Anatomy, Sound Production, Vertebrate Anatomy, ...5.0268

FAMILIAL RELATIONSHIPS IN TELEOST FISHES ...Animal Taxonomy, Comparative Anatomy, Genetic, Karyotypes, Nomenclature, Classification, ...5.0148

AUDITORY CAPACITIES OF TELEOST FISHES ...Audition, Auditory, Behavior, Vertebrate Anatomy, ...5.0291

THE EVOLUTION AND CAUSATION OF SOCIAL BEHAVIOR IN ANABANTOID FISHES ...Behavior, Ethological, Reproduction Studies (general), Social Behavior, ...5.0300

COMPARATIVE ETHOLOGY OF FISHES OF THE GENUS MACROPODUS ...Aggression, Behavior, Social Behavior, ...5.0266

PHYSIOLOGICAL STUDIES ON FISHES LACKING HEMOGLOBIN ...Adaptation, Cardiovascular System, Fish, Hemoglobin, Metabolism, Polar, ...5.0241

BEHAVIOR AND SONIC ACTIVITY OF FISHES ...Behavioral Ecology, Environmental Physiology, Sonar, Sound Production, ...1.0047

GERMFREE FISH ...Captive Rearing, Germ Free Animal, Immunology, Infectious Conditions and Dis, Vertebrate Anatomy, ...5.0236

LIFE HISTORY STUDY OF THE MOI, POLYDACTYLUS SEXFILIS ...Aquatic Ecology, Life History Studies, Management -other, Tags, ...5.0257

THE DETERMINATION OF THE AVAILABILITY OF SEA ROBINS ...Benthic Fauna, Chesapeake Bay, Nets, Vertical Distribution, ...5.0152

SHELLFISH AND BOTTOMFISH DATA ...Commercial Fishing, Crabs, Legislation, Shrimps - Common, ...5.0357

COLLECTION OF MATERIALS AND DATA FOR AGE-GROWTH ANALYSIS ...Age, Commercial Fishing, Growth Rate, ...5.0330

MARINE SPORTS FISHES RESEARCH ...Delaware Bay, Killifish - Cyprinodon, Population Dynamics, Water Salinity, Water Temperature-non-specific, ...5.0248

SYSTEMATICS AND ZOOGEOGRAPHY OF THE BLENNIOID FISHES ...Animal Taxonomy, Bone, Nomenclature, Classification, World Wide, ...5.0051

COPEPODS PARASITIC ON NEEDLEFISHES ...Aquatic Ecology, Copepods, Ectoparasites, Nomenclature, Classification, Organic Evolution, ...5.0389

SYSTEMATICS AND BIOLOGY OF EPIPELAGIC AND BATHYPELAGIC FISHES ...Animal Taxonomy, Atlantic Ocean-north, Indian Ocean-general, Vertebrate Anatomy, Vertical Distribution, ...5.0049

OSTEOLOGY AND EVOLUTION OF ISOSPONDYLOUS AND OSTARIOPHYSAN FISHES ...Bone, Organic Evolution, Vertebrate Anatomy, ...5.0053

BIOLOGY, MORPHOLOGY, AND EVOLUTION OF THE DISK-FISHES OR SHARKSUCKERS ...Animal Taxonomy, Ethological, Host Specificity, Vertebrate Anatomy, ...5.0250

SYSTEMATIC REVISION PLATYCEPHALIDAE (PISCES) ...Classical, Indian Ocean-general, Museum, Nomenclature, Classification, ...5.0050

STUDIES OF FISH FAMILIES ARIIDAE AND ASPREDINIDAE ...Animal Taxonomy, Interbiotic Relat.(non-specif), Neotropical, Tropic, ...5.0052

TAXONOMIC STUDIES ...Animal Taxonomy, Nomenclature, Classification, Pacific Ocean-east, ...5.0034

DIURNAL-NOCTURNAL ACTIVITY OF THE QUEENFISH, SERIPHUS POLITUS ...Aquatic Ecology, Behavioral Ecology, Biological Rhythms, Drums, Other, Sound Production, ...5.0230

THE ROLE OF THE SENORITA, OXYJULIS CALIFORNICA, AS A CLEANING ORGANISM ...California, Ectoparasites, Fishery Development -other, Interbiotic Relat.(non-specif), ...5.0193

ABUNDANCE AND MIGRATION STUDIES OF THE WHITE SEAPERCH (P. FURCATUS), PILE PERCH (R. VACCA), STRIPED SEAPERCH (E. LATERALIS) AND STARRY FLOU ...Environmental Ecology, Migration, Number Or Density, Oregon, Righteye Flounders, ...5.0934

HYPOTHETICAL DISTRIBUTION OF 14 SPECIES OF ATLANTIC COASTAL GAME FISHES ...Aquatic Ecology, Atlantic Ocean-general, Environmental Ecology, Water Temperature-non-specific, ...5.0123

PELAGIC FISH EXPLORATIONS ...Codfishes, Hake, Commercial Fishing, Nets, Vertical Distribution, ...5.0172

BOTTOMFISH EXPLORATIONS ...Commercial Fishing, Nets, Pacific Ocean-east, Vertical Distribution, ...5.0168

THE EFFECTS OF RADIATION ON THE PHYSIOLOGY OF MARINE ORGANISMS (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Cooperative-studies, Radioactive Fallout, ...5.0294

THE EFFECTS OF RADIATION ON THE MORPHOLOGY OF MARINE ORGANISMS (A COOPERATIVE AGREEMENT WITH THE ATOMIC ENERGY COMMISSION) ...Cooperative-studies, Radiation Sensitivity-, Vertebrate Anatomy, Vertebrates Excl. man, ...5.0295

STUDIES ON OPHIDIID FISHES ...Abyssal, Animal Taxonomy, Benthic Fauna, Vertebrate Anatomy, Vertical Distribution, ...5.0054

STUDIES ON ANACANTHINE FISHES ...Animal Taxonomy, Atlantic Ocean-north, Continental Shelf, Publications -other, ...5.0048

BOTTOMFISH EXPLORATIONS ...Bering Sea, Gulf of Alaska, Nets, Vertical Distribution, ...5.0030

## Fish

## SUBJECT INDEX

FISH POPULATION STUDY ...Analog Computer Applications, Environmental Ecology, Killifishes - Cyprinodon, Population Dynamics, Tilapia, Cichlids, ...5.0175

THE OCEANOGRAPHY OF NEW ENGLAND FISHING BANKS ...Continental Shelf, Number Or Density, Vertical Distribution, Water Environment -other, ...5.0901

IMMUNE MECHANISMS AND RESISTANCE FACTORS IN MARINE FISHES ...Antigen, Histochemical Test, Serology and Immunology, ...5.0255

VISUAL PROJECTION IN SUBMAMMALIAN VERTEBRATES ...Basic Studies, Cranial and Nuclei, Retina, Visual Organs, ...5.0238

### Gambusia, Molly

EVOLUTION OF ALL-FEMALE FISHES ...Female, Other, Reproduction Studies (general), ...5.0247

PHYSIOLOGY AND ASSAY OF PROLACTIN IN FISH ...Bioassays, Biochemical, Immunology, Luteotrophic Hormone, Pituitary, ...5.0329

### Killifishes - Cyprinodon

STUDIES OF FISH ENDOCRINOLOGY ...Environmental Physiology, Fresh Water, Hormone, Testes, Thyroid, ...5.0246

DEVELOPMENTAL ANALYSIS OF FUNDULUS ...Basic Embryology, Central Nervous System, Fats, Phospholipids, Transplants, ...5.0316

THE INFLUENCE OF ENVIRONMENTAL FACTORS UPON DEVELOPING MERISTIC STRUCTURES IN THE MARINE FISH, FUNDULUS MAJALIS (WALBAUM) ...Basic Embryology, Developmental Physiology, Environmental Physiology, Water Temperature-non-specific, ...5.0298

MARINE SPORTS FISHES RESEARCH ...Delaware Bay, Fish - other, Population Dynamics, Water Salinity, Water Temperature-non-specific, ...5.0248

FISH POPULATION STUDY ...Analog Computer Applications, Environmental Ecology, Fish -other, Population Dynamics, Tilapia, Cichlids, ...5.0175

HISTOPATHOLOGIC EFFECTS OF POLLUTANTS ON CELLS AND TISSUES OF MARINE FISHES ...Contamination - Water, Pathology, Pollution - Effects of, Pollution Effects, ...5.0323

HEMATOLOGICAL CHANGES IN F. HETEROCLITUS UPON EXPOSURE TO TOXIC METALS ...Blood Cells, Blood Plasma and Serum, Cadmium, Lead, Toxins -other, ...5.0325

PHARMACOLOGY OF METAL POISONING IN ESTUARINE FISHES ...Contamination - Water, Estuaries, Metals -non-specific, Stress, ...5.0324

COMPARATIVE TOXICITIES OF METALS TO ESTUARINE FISHES ...Bioassays, Estuaries, Industrial Wastes, Solid Waste, Toxins -other, ...6.0184

### Lake Trout, Brook Trout

COMPARATIVE BEHAVIOR OF HATCHERY-REARED AND WILD SALMONIDS ...Atlantic Salmon, Sebago Salmon, Behavior, Captive Rearing, Environmental Physiology, ...5.0264

INVESTIGATION OF ANADROMOUS DOLLY VARDEN POPULATIONS IN HOOD BAY DRAINAGES, SOUTHEASTERN ALASKA ...Alaska, Migration, Population Dynamics, Streams, ...5.0013

ASSESSMENT OF LAKE SUPERIOR LAKE TROUT ...Aquatic Ecology, Commercial Fishing, Lampreys, Life History Studies, ...5.0736

RATES OF PESTICIDE BUILDUP IN SALMONIDS RECENTLY INTRODUCED IN THE GREAT LAKES ...Fish, Insecticides -non-specific, Lake Michigan, Lake Superior, Pollution Effects, Salmon -coho, chinook, sockeye..., ...6.0154

### Lampreys

BIOLOGY OF THE LARVAL SEA LAMPREY ...Control of Nuisance Species, Developmental Physiology, Environmental Ecology, Great Lakes-general, Life History Studies, ...5.0633

EFFECTS OF CHEMICALS ON THE PHYSIOLOGY OF SEA LAMPREY AMMOCETES (PETROMYZON MARINUS) ...Contamination - Water, Control of Nuisance Species, Environmental Physiology, Maturity & Growth Stages, ...5.0631

ASSESSMENT OF LAKE SUPERIOR LAKE TROUT ...Aquatic Ecology, Commercial Fishing, Lake Trout, Brook Trout, Life History Studies, ...5.0736

LAKE SUPERIOR CHEMICAL CONTROL OF SEA LAMPREY ...Aquatic Ecology, Control of Nuisance Species, Lake Superior, Larvicides, Streams, ...5.0628

LAKE MICHIGAN CHEMICAL CONTROL OF SEA LAMPREY ...Animal Pollutant Sources, Control of Nuisance Species, Evaluation, Lake Michigan, Larvicides, ...6.0158

SEA LAMPREY AMMOCETE REESTABLISHMENT STUDIES ...Aquatic Ecology, Control of Nuisance Species, Great Lakes-general, Larvicides, Life History Studies, Population Dynamics, ...5.0629

ELECTRIC BARRIER OPERATIONS ...Control of Nuisance Species, Lake Michigan, Lake Superior, Migration, Population Dynamics, ...5.0630

BIOASSAY ...Animal Pollutant Sources, Evaluation, Piscicides -non-specific, Streams, Water Properties-general, ...5.0632

### Largemouth Bass

EXPERIMENTAL AND BIOMATHEMATICAL ANALYSIS OF THE PHENOMENON OF ATTACK ...Behavioral Ecology, Bluegills, Bream, Computer Methods -general, Environmental Physiology, Minnows, Predation, ...5.0535

### Lefteye Flounders

CREEL CENSUS OF SUMMER FLOUNDER SPORT FISHERY IN GREAT BAY, NEW JERSEY ...Bays, Censusing, Legislation, Life History Studies, New Jersey, ...5.0124

POPULATION DYNAMICS OF NEW ENGLAND GROUND-FISH ...Atlantic Ocean-north, Codfishes, Hake, Population Dynamics, Rockfish, Scraionfish, ...5.0103

### Marlin, Billfishes, Sailfish..

LIFE HISTORY OF BILLFISHES ...California, Censusing, Life History Studies, Mexico, ...5.0195

ENVIRONMENTAL EFFECTS ON ISTIOPHORID FISH DISTRIBUTION ...Environmental Ecology, Gulf of Mexico, Ships and Cruises, Temporal Distribution, ...5.0070

BLOOD TYPES AS INDICATORS OF WHITE MARLIN RACES ...Blood Plasma and Serum, Blood Typing Studies, Polymorphism, Statistics-general, ...5.0321

HEMOGLOBIN VARIATIONS AS INDICATORS OF WHITE MARLIN RACES ...Hemoglobin, Morphological Action, ...5.0322

TAGGING PROGRAM WITH WOODS HOLE AND INTERNATIONAL GAME FISH ASSOCIATION FOR MARLIN, SAILFISH AND OTHER GAME SPECIES MIGRATION STUDIES ...Migration, Pacific Ocean-general, Population Dynamics, Tags, ...5.0036

### Minnows

CYTOTAXONOMIC STUDIES OF TELEOST FISHES ...Abyssal, Animal Taxonomy, Blood Cells, Sets of Chromosomes, ...5.0242

EXPERIMENTAL AND BIOMATHEMATICAL ANALYSIS OF THE PHENOMENON OF ATTACK ...Behavioral Ecology, Bluegills, Bream, Computer Methods -general, Environmental Physiology, Largemouth Bass, Predation, ...5.0535

### Pikes, Pickerel, Muskellunge

FISH POPULATIONS IN THE CHENA RIVER ...Alaska, Population Dynamics, Salmon & Trout - Non-specific, Streams, ...5.0029

### Pompanos, Scads, Jacks

CULTURE OF POMPANO IN BRACKISH WATER PONDS ...Aquaculture & Fish-farming, Brackish Water, Food Supply, Louisiana, Stocking of Fish & Shellfish, ...8.0004

SYSTEMATICS OF CARANGID FISHES ...Animal Taxonomy, Collections, Handbooks, Maturity & Growth Stages, Species, Comparison of, ...5.0061

### Porgies

SPORT FISH BEHAVIORAL STUDIES ...Basses -sea, white, White Perch, Behavioral Ecology, Habitat Studies, Rockfish, Scraionfish, ...5.0045

### Rainbow Trout, Steelhead Trout

EVALUATION, COORDINATION, AND PLANNING OF PACIFIC SALMON AND STEELHEAD RESEARCH AND MANAGEMENT ACTIVITIES ...Commercial Fishing, Fishery

## SUBJECT INDEX

## Fish

Development -other, Management -other, Meetings, Salmon -coho, chinook, sockeye..., ...5.0140

OCCURRENCE OF THE PROTOZOAN PARASITE CERATOMYXA IN ADULT PACIFIC SALMON AND STEELHEAD TROUT ...Infectious Conditions and Dis, Pathology, Protozoa, Protozoa -other, Vertebrate Pathology, ...5.0308

INVENTORY SURVEYS OF OREGON COASTAL STREAMS ...Management -other, Oregon, Salmon & Trout - Non-specific, Spawning & Nesting Sites, Streams, ...5.0217

ANALYSIS OF SALMONID SCALES ...Age, Animal Taxonomy, Columbia River, Growth Rate, Salmon -coho, chinook, sockeye..., Scales, ...5.0315

### Rays, Skates, Mantas, Sawfish

DISTRIBUTION AND MIGRATION OF CENTRAL AMERICAN FRESHWATER ELASMOBRANCHS ...Caribbean Sea, Migration, Nicaragua, Osmoregulation, Sharks, ...5.0117

OSMOREGULATION ...Aquatic Ecology, Osmoregulation, Sharks, Streams, ...5.0280

### Righteye Flounders

PRELIMINARY STUDY TO DETERMINE ABUNDANCE AND RECRUITMENT OF BOTTOMFISH OFF OREGON ...Nets, Number Or Density, Oregon, Pacific Ocean-general, ...5.0136

TAGGING ENGLISH SOLE, PETRALE SOLE, AND PACIFIC COD ...Codfishes, Hake, Commercial Fishing, Migration, Size, Tags, Washington, ...5.0158

IDENTIFICATION OF WINTER FLOUNDER SUBPOPULATIONS ...Commercial Fishing, Legislation, Nets, Population Dynamics, Tags, ...5.0100

TAG RECOVERY, ENGLISH SOLE, PETRALE SOLE, AND PACIFIC COD ...Codfishes, Hake, Migration, Population Dynamics, Tags, Washington, ...5.0159

SAMPLING OF GROUND FISH STOCKS ...Age, Bone, Codfishes, Hake, Proprioceptors, Size, ...5.0160

ABUNDANCE AND MIGRATION STUDIES OF THE WHITE SEAPERCH (P. FURCATUS), PILE PERCH (R. VACCA), STRIPED SEAPERCH (E. LATERALIS) AND STARRY FLOU ...Environmental Ecology, Fish -other, Migration, Number Or Density, Oregon, ...5.0934

BIOLOGICAL STUDIES OF NORTHWEST ATLANTIC GROUND FISH ...Atlantic Ocean-north, Codfishes, Hake, Freshwater Mussels, Scallops, Rockfish, Scoraionfish, ...5.0104

MARINE BIOLOGICAL INVESTIGATIONS - JAPANESE FISHERY OBSERVERS PROJECT ...Commercial Fishing, Gulf of Alaska, Japan, Nets, ...5.0012

EPIDERMAL PAPILLOMAS IN PLEURONECTID FISHES ...Cancer, Papillomas of Animals, Pathology, Puget Sound, ...5.0314

### Rockfish, Scoraionfish

SPORT FISH BEHAVIORAL STUDIES ...Basses -sea, white, White Perch, Behavioral Ecology, Habitat Studies, Porgies, ...5.0045

MANAGEMENT OF THE OREGON TRAWL FISHERY ...Censusing, Commercial Fishing, Legislation, Nets, Oregon, ...5.0145

POPULATION DYNAMICS OF NEW ENGLAND GROUND FISH ...Atlantic Ocean-north, Codfishes, Hake, Lefteye Flounders, Population Dynamics, ...5.0103

BIOLOGICAL STUDIES OF NORTHWEST ATLANTIC GROUND FISH ...Atlantic Ocean-north, Codfishes, Hake, Freshwater Mussels, Scallops, Righteye Flounders, ...5.0104

GROUND FISH INVESTIGATIONS (POTENTIAL YIELD OF UNDERUTILIZED GROUND FISH STOCKS) ...Codfishes, Hake, Commercial Fishing, Legislation, Number Or Density, ...5.0171

### Salmon & Trout - Non-specific

EFFECTS OF IRRADIATION, TEMPERATURE AND OTHER ENVIRONMENTAL FACTORS ON SALMONID EMBRYOS ...Basic Embryology, Radiation Effects-non-specific, Water Light Quality & Quantity, Water Temperature-non-specific, X and Gamma Rays, ...5.0336

SPATIAL ORIENTATION OF FISHES AND ITS SENSORY BASES ...Behavior, Migration, Olfactory, Visual Organs, ...5.0339

FISH POPULATIONS IN THE CHENA RIVER ...Alaska, Pikes, Pickeral, Muskellunge, Population Dynamics, Streams, ...5.0029

MONITORING THE EFFECTS OF LAND USE ON SALMON PRODUCTION ...Alaska, Environmental Ecology, Land Use, Pulp, Paper, and Logging, Streams, ...5.0192

ARCTIC-YUKON-KUSKOKWIM AREA ANADROMOUS FISH INVESTIGATIONS ...Alaska, Commercial Fishing, Life History Studies, Population Dynamics, Salmon -coho, chinook, sockeye..., ...5.0024

WATER QUALITY AS RELATED TO SURVIVAL OF SALMON EGGS AND LARVAE ...Environmental Ecology, Mortality Rates, Reproduction Studies (general), Spawning & Nesting Sites, Water Quality-general, ...5.0227

ESTUARINE WATER QUALITY AND FISH DISTRIBUTION ...Contamination - Water, Environmental Physiology, Estuaries, Pollution Effects, Pulp, Paper, and Logging, ...5.0178

TAGGING SALMON IN THE OFFSHORE WATERS OF THE NORTH PACIFIC ...Bering Sea, Gulf of Alaska, Migration, Number Or Density, Range Or Territorial Distr., Tags, ...5.0180

EPIDEMIOLOGY OF SALMON POISONING DISEASE ...Epizootic, Helminths, Infectious Conditions and Dis, Pathology, Water Salinity, ...5.0306

INFECTIOUS DISEASES OF SALMONID FISHES ...Bacteria (non-specific), Infectious Conditions and Dis, Mode of Transmission, Pathology, Protozoa -other, ...5.0302

EFFECTS OF KRAFT PULP MILL EFFLUENTS ON THE GROWTH AND PRODUCTION OF FISH ...Contamination - Water, Industrial Wastes, Pollution - Effects of, Pollution Effects, Population Dynamics, Pulp, Paper, and Logging, ...5.0311

NUTRITION OF SALMONID FISHES ...Captive Rearing, Diet Or Ration -other, in Vivo--see Also Feed Rations, Purified Diets, ...5.0304

UTILIZATION OF LATENT MARINE RESOURCES AND WASTE PRODUCTS ...Fish -other, Fish Meals, Fish Protein Concentrate, Proteins, Proteins and Amino Acids, ...6.0068

SURVEYS OF SPAWNING SALMON ...Biological Rhythms, Censusing, Number Or Density, Oregon, Streams, ...5.0142

INVENTORY SURVEYS OF OREGON COASTAL STREAMS ...Management -other, Oregon, Rainbow Trout, Steelhead Trout, Spawning & Nesting Sites, Streams, ...5.0217

ADULT SALMON BEHAVIOR STUDIES IN RIVERS AND AT DAMS (SONIC TRACKING) ...Behavioral Ecology, Engineering Structures-general, Streams, Tags, Telemetry, ...8.0111

JUVENILE MIGRATION RATES ...Columbia River, Mark, Tag Or Capture -other, Migration, Snake River, Water Environment -other, ...5.0223

CHARACTERISTICS OF LAKE SUPERIOR WHITEFISH ...Commercial Fishing, Interbiotic Relat.(non-specif), Lake Superior, Life History Studies, Tags, ...5.0183

RELATION OF RIVER-RUN IMPOUNDMENTS TO SALMON PRODUCTION ...Aquatic Ecology, Engineering Structures-general, Environmental Changes, Environmental Ecology, Mans Activities, Pollution - Effects of, ...5.0222

SALMON PRODUCTION IN AREAS MADE INACCESSIBLE BY DAMS ...Aquatic Ecology, Columbia River, Engineering Structures-general, Environmental Ecology, Spawning & Nesting Sites, ...5.0224

ADULT SALMON BEHAVIOR STUDIES IN RIVERS AND AT DAMS %SONIC TRACKING40 ...Columbia River, Construction Land Use Effects, Migration, Pre-impoundment Sites, Telemetry, ...5.0169

DROPOUT OF SALMON FROM GILL NETS ...Commercial Fishing, Management -other, Mortality Rates, Nets, Water Salinity, ...5.0177

PREDICTION OF ENVIRONMENT ...Biological-general, Columbia River, Environmental Ecology, Low Temp. -but Above 32f, Physical-general, Reservoirs and Impoundments, Snake River, Temperature, Thermal Pollution, ...5.0225

EFFECTS OF INDUSTRIAL EXPANSION ON THE AQUATIC ENVIRONMENT OF ESTUARINE AREAS ...Columbia River, Estuaries, ...5.0226

EFFECT OF SUPERSATURATION OF DISSOLVED NITROGEN ON MIGRATING SALMONIDS ...Aquatic Ecology, Columbia River, Gases, Dissolved -water, Migration, Mortality Rates, Nitrogen, ...5.0221

FISH TRANSPORTATION ...Aquatic Ecology, Management -other, Migration, Streams, Tags, ...8.0013

FISH BEHAVIOR AND PHYSIOLOGY ...Behavior, Engineering Structures-general, Environmental Physiology, Migration, Thermal Pollution, ...5.0331

FISHWAY RESEARCH (BONNEVILLE LABORATORY) ...Behavioral Ecology, Engineering Structures-general, Environmental Ecology, Management -other, Migration, ...8.0016

## Fish

## SUBJECT INDEX

PROTECTION OF FINGERLING SALMON IN TURBINES  
...Construction Land Use Effects, Engineering Structures-  
general, Migration, Mortality Rates, Snake River, ...8.0014

EPIDEMIOLOGY OF SALMON POISONING DISEASE  
...Flukes, Helminths, Neorickettsiae Helminth, Pathology, Viru-  
lence and Pathogenicity, ...5.0307

### Salmon -coho, chinook, sockeye..

INVESTIGATE THE FEASIBILITY OF INTRODUCING SOCKEYE SALMON INTO RESERVOIRS ...Aquatic Ecology, Captive Rearing, Oregon, Reservoirs and Impoundments, Stocking of Fish & Shellfish, ...5.0141

POPULATION STUDIES OF ANADROMOUS FISH - UPPER COOK INLET DRAINAGES ...Alaska, Captive Rearing, Censusing, Population Dynamics, Streams, ...5.0020

SILVER SALMON STUDIES IN THE RESURRECTION BAY AREA ...Alaska, Aquatic Ecology, Bays, Environmental Ecology, Management -other, ...5.0189

TAG DETECTION ...Commercial Fishing, Number Or Density, Puget Sound, Streams, Tags, ...8.0148

TAG LOSS ...Captive Rearing, Size, Tags, Washington, Weight, ...5.0157

PRE-EMERGENT FRY PINK SALMON FORECAST - SOUTHEASTERN ALASKA ...Alaska, Aquatic Ecology, Censusing, Number Or Density, Spawning & Nesting Sites, ...5.0019

INVESTIGATION OF SPAWNING GROUND POTENTIALS AND GROWTH AND SURVIVAL OF JUVENILE SOCKEYE SALMON IN FRAZER LAKE SYSTEM ...Alaska, Censusing, Lakes, Nets, Spawning & Nesting Sites, Tags, ...5.0190

COOK INLET ESCAPEMENT ENUMERATION STUDY ...Alaska, Censusing, Migration, Organism Sampling Devices, Sonar, Sonar and Echo Sounding, ...8.0112

IDENTIFICATION OF RED SALMON STOCKS TAKEN IN THE CAPE KUMLIK-ANIACHAK BAY FISHERY (CHIGNIK AREA) ...Alaska, Commercial Fishing, Spawning & Nesting Sites, Streams, Tags, ...5.0021

MANAGEMENT OF THE OCEAN SALMON FISHERY WITH EMPHASIS ON THE BARBLESS HOOKS AS A MANAGEMENT TOOL ...Commercial Fishing, Fishing Gear, ...8.0142

ARCTIC-YUKON-KUSKOKWIM AREA ANADROMOUS FISH INVESTIGATIONS ...Alaska, Commercial Fishing, Life History Studies, Population Dynamics, Salmon & Trout - Non-specific, ...5.0024

RESTORATION AND REHABILITATION OF EARTHQUAKE DAMAGED PINK AND CHUM SALMON STUDIES IN PRINCE WILLIAM SOUND ...Alaska, Earthquakes, Flow Characteristics -water, Spawning & Nesting Sites, Stream Rehabilitation, Tectonics-general, ...5.0191

BRISTOL BAY INTERMEDIATE HIGH SEAS-INSHORE TEST FISHING ...Age, Alaska, Bays, Commercial Fishing, ...5.0022

SOCKEYE SALMON MIGRATORY BEHAVIOR AND BIOLOGICAL STATISTICS COLLECTION, SOUTHEASTERN ALASKA ...Alaska, Behavioral Ecology, Censusing, Migration, Streams, ...5.0027

OFFSHORE SALMON ABUNDANCE INDEX ...Alaska, Commercial Fishing, Number Or Density, Streams, ...5.0028

EVALUATION, COORDINATION, AND PLANNING OF PACIFIC SALMON AND STEELHEAD RESEARCH AND MANAGEMENT ACTIVITIES ...Commercial Fishing, Fishery Development -other, Management -other, Meetings, Rainbow Trout, Steelhead Trout, ...5.0140

MEASUREMENT OF SPAWNING SUCCESS AND FRY QUALITY OF CHUM SALMON UTILIZING A SPAWNING CHANNEL AT BIG BEEF CREEK, WASHINGTON ...Management -other, Number Or Density, Quality -non-specific, Spawning & Nesting Sites, Washington, ...5.0229

COPPER RIVER SOCKEYE SALMON INVESTIGATIONS ...Alaska, Aquatic Ecology, Biological Rhythms, Migration, Population Dynamics, Stocking of Fish & Shellfish, ...5.0025

COPPER RIVER SOCKEYE SALMON INVESTIGATIONS ...Alaska, Commercial Fishing, Migration, Nets, Streams, ...5.0026

BRISTOL BAY OFFSHORE TEST FISHING PROGRAM ...Age, Alaska, Bays, Commercial Fishing, Nets, ...5.0023

SOCKEYE SALMON MIGRATORY BEHAVIOR AND BIOLOGICAL STATISTICS COLLECTION, SOUTHEASTERN ALASKA ...Alaska, Aquatic Ecology, Behavioral Ecology, Censusing, Migration, ...5.0016

PRE-EMERGENT FRY PINK SALMON FORECAST (KODIAK, ALASKA) ...Alaska, Maturity & Growth Stages, Number Or Density, Spawning & Nesting Sites, Streams, ...5.0017

COOK INLET CATCH AND ESCAPEMENT AGE AND SEX COMPOSITION STUDIES ...Age, Alaska, Migration, Nets, Sex -non-specific, Spawning & Nesting Sites, ...5.0014

COOK INLET SMOLT ENUMERATION STUDY ...Alaska, Censusing, Productivity (agricultural), Spawning & Nesting Sites, ...5.0015

TAG EXTRACTION ...Tags, ...8.0149

SAMPLING OF MARKED COHO ...Censusing, Columbia River, Mark, Tag Or Capture -other, Number Or Density, Stocking of Fish & Shellfish, ...5.0162

RECOVERY OF MARKED COHO ...Captive Rearing, Data Acquisition, Tags, ...5.0163

MARKED COHO LIBERATION ...Captive Rearing, Columbia River, Mark, Tag Or Capture -other, Puget Sound, ...5.0164

FORECAST OF KODIAK ISLAND PINK SALMON RUNS FROM ABUNDANCE OF JUVENILES IN ESTUARIES ...Alaska, Estuaries, Fishing Gear, Maturity & Growth Stages, Migration, Number Or Density, ...5.0179

STUDIES OF SOCKEYE SALMON, ONCORHYNCHUS NERKA, IN THE NUSHAGAK DISTRICT, ALASKA ...Alaska, Commercial Fishing, Interbiotic Relat.(non-specif), Lakes, Population Dynamics, Spawning & Nesting Sites, ...5.0228

EVALUATION OF ESCAPEMENT OF ADULT SALMON TO OREGON COASTAL STREAMS ...Environmental Ecology, Number Or Density, Oregon, Spawning & Nesting Sites, Streams, ...5.0215

POPULATION ESTIMATES OF JUVENILE COHO SALMON IN SIX COASTAL STREAMS ...Environmental Ecology, Maturity & Growth Stages, Population Dynamics, Streams, ...5.0144

SPRING CHINOOK SALMON ECOLOGY STUDY ...Aquatic Ecology, Mark, Tag Or Capture -other, Oregon, Physical-general, Productivity (agricultural), Streams, ...5.0218

ANALYSIS OF SALMONID SCALES ...Age, Animal Taxonomy, Columbia River, Growth Rate, Rainbow Trout, Steelhead Trout, Scales, ...5.0315

MANAGEMENT OF COLUMBIA RIVER COMMERCIAL FISHERY ...Aquatic Ecology, Columbia River, Commercial Fishing, Legislation, ...5.0165

BRISTOL BAY ESTUARINE ECOLOGY ...Alaska, Estuaries, Fishing Gear, Life History Studies, Migration Oceanic Fronts, ...5.0004

NAKNEK SYSTEM RED SALMON STUDIES ...Alaska, Growth Rate, Migration, Number Or Density, Streams, ...5.0005

KARLUK LAKE RESEARCH STATION ...Life History Studies, Mortality Rates, Population Dynamics, Productivity (agricultural), Spawning & Nesting Sites, ...5.0006

CHUM SALMON INVESTIGATIONS ...Environmental Ecology, Estuaries, Food Supply, Growth Rate, Life History Studies, Number Or Density, ...5.0007

PINK SALMON INVESTIGATIONS - FRESHWATER ECOLOGY ...Aquatic Ecology, Environmental Ecology, Maturity & Growth Stages, Mortality Rates, Spawning & Nesting Sites, ...5.0188

PINK SALMON INVESTIGATIONS - INTERTIDAL ECOLOGY ...Alaska, Life History Studies, Spawning & Nesting Sites, Tidal Streams, Water Salinity, ...5.0186

ADULT MIGRATION RATES ...Columbia River, Environmental Ecology, Management -other, Migration, Pre-impoundment Sites, ...5.0173

RATES OF PESTICIDE BUILDUP IN SALMONIDS RECENTLY INTRODUCED IN THE GREAT LAKES ...Fish, Insecticides -non-specific, Lake Michigan, Lake Superior, Lake Trout, Brook Trout, Pollution Effects, ...6.0154

PINK SALMON INVESTIGATIONS - FRESHWATER ECOLOGY ...Alaska, Aquatic Ecology, Spawning & Nesting Sites, Streams, Water Properties-general, ...5.0185

INTERNATIONAL NORTH PACIFIC FISHERIES COMMISSION SUBARCTIC OCEANOGRAPHY ...Currents-ocean, Depth, Pacific Ocean-north, Range Or Territorial Distr. , Salinity, Temperature, ...1.0159

OCEAN GROWTH AND MORTALITY OF SALMON ...Growth Rate, Mortality Rates, Scales, Tags, ...5.0170

PACIFIC FISH PHYSIOLOGY AND BIOCHEMISTRY (SALMON IMMUNOCHEMISTRY) ...Immunology, Maturity & Growth Stages, Stress, ...5.0332

ANALYSIS OF JAPANESE CATCH STATISTICS ...Commercial Fishing, Japan, Number Or Density, Pacific Ocean-north ...5.0166

IDENTIFICATION OF SOCKEYE SALMON STOCKS BY BONE MINERALS ...Animal Taxonomy, Bone, Chemical Analysis, Pacific Ocean-general, ...5.0333

## SUBJECT INDEX

## Fish

GULF OF ALASKA SOCKEYE SALMON SCALES, PROTOCOL AREA SOCKEYE SALMON SCALES, AND GULF OF ALASKA PINK SALMON SCALES ...Animal Taxonomy, Gulf of Alaska, Life History Studies, Scales, ...5.0334

### Sculpins

PHARMACOLOGY AND CHEMISTRY OF TOXIC MARINE ANIMALS ...Animal Toxins, Female Gametes, Toxicology, ...6.0104

BLOOD PARASITES OF NORTHWEST FISHES ...Blood Plasma and Serum, Codfishes, Hake, Helminths, Protozoa, Trematoda - other, ...5.0335

### Sharks

FACTORS AFFECTING THE BEHAVIOR OF SHARKS ...Behavior, Sensory Organs, ...5.0262

SHARK ATTACKS ...Behavioral Ecology, Diving and Scuba, Water Environment -other, ...6.0090

SHARK RESEARCH ...Control of Nuisance Species, Fish Repellents, Tags, Temporal Distribution, ...5.0047

ENERGY REQUIREMENTS OF MARINE ORGANISMS ...Energy, Thermoregulation, Tuna, Mackerel, Albacore... , Water Pressure, ...5.0273

ECOLOGICAL STUDY OF CHARLOTTE HARBOR ESTUARY AND SHARK PROGRAM OF MOTE MARINE LAB ...Estuaries, Florida, Mans Activities, ...5.0884

PELAGIC SHARKS OFF SOUTHERN CALIFORNIA ...Environmental Ecology, Pacific Ocean-east, Population Dynamics, Vertical Distribution, ...5.0196

EXPERIMENTAL ANALYSIS OF HEARING AND ACOUSTIC ORIENTATION IN SHARKS ...Auditory, Behavior, Shark Repellents, ...5.0235

BEHAVIOR AND SENSORY PHYSIOLOGY OF SHARKS ...Auditory, Behavioral Ecology, Fish Repellents, Tape Recording, Audio, Visual Organs, ...5.0253

BLOOD CHEMISTRY OF FISHES ...Blood Plasma and Serum, Bone, Vertebrate Anatomy, Vertical Distribution, ...5.0239

DISTRIBUTION AND MIGRATION OF CENTRAL AMERICAN FRESHWATER ELASMOBRANCHS ...Caribbean Sea, Migration, Nicaragua, Osmoregulation, Rays, Skates, Mantas, Sawfish, ...5.0117

FURTHER STUDIES ON A FLUORESCENT COMPOUND IN THE DOGFISH LENS ...Fluorescent, Visual, Visual Organs, ...5.0271

COPEPODS PARASITIC ON SHARKS OF THE WEST COAST OF FLORIDA ...Animal Taxonomy, Copepods, Ectoparasites, Florida, ...5.0391

ELASMOBRANCH PHARMACOLOGY ...Drug Evaluation, Mechanism of Action, Neuroeffective, ...6.0118

STUDIES OF SHARK REPELLENTS AND OTHER ANTI-SHARK MEASURES ...Fish Repellents, Shark Repellents, ...6.0132

ELASMOBRANCH PHARMACOLOGY ...Drug Evaluation, Fish Repellents, Mechanism of Action, ...6.0119

MARINE ANIMAL TOXINS ...Fish Repellents, Mechanism of Action, Toxins, ...6.0116

MIGRATORY HABITS OF LARGE SHARKS ...Atlantic Ocean-north, Fishing, Migration, Tags, ...5.0147

AGE DETERMINATION OF LARGE ATLANTIC SHARKS ...Age, Atlantic Ocean-north, Growth Rate, ...5.1028

DESCRIPTIONS OF NEW SHARKS ...Animal Taxonomy, Collections, Nomenclature, Classification, Publications -other, ...5.0057

A REVISION OF THE CAT SHARKS, SCYLORHINIDAE ...Animal Taxonomy, Nomenclature, Classification, Vertebrate Anatomy, ...5.0058

LOCAL FISHERY SYSTEMS DEVELOPMENT ...California, Commercial Fishing, Shrimps - Common, Swordfish, ...5.0198

FORMATION AND METABOLISM OF NEUROHUMORAL TRANSMITTER SUBSTANCES IN MARINE ANIMALS ...Basic Studies, Biochemical, Developmental Stages, Quantitative & Qualitative, ...5.0980

THE PHYSIOLOGY OF TUNA AND OTHER PELAGIC FISH ...Blood -other, Environmental Physiology, Thermoregulation, Tuna, Mackerel, Albacore... , ...5.0272

OSMOREGULATION ...Aquatic Ecology, Osmoregulation, Rays, Skates, Mantas, Sawfish, Streams, ...5.0280

### Smelts

INTERRELATIONS OF SMELT WITH NATIVE SPECIES ...Competition, Food Supply, Lake Superior, Life History Studies, Number Or Density, ...5.0182

LAKE SUPERIOR EXPLORATIONS ..Commercial Fishing, Lake Superior, Management -other, Nets, Suckers, ...5.0107

### Snappers

DEVELOP FISHERIES FOR NON-TUNA RESOURCES ...Commercial Fishing, Fishing Gear, Hawaii, Pacific Ocean-general, ...5.0086

### Suckers

LAKE SUPERIOR EXPLORATIONS ...Commercial Fishing, Lake Superior, Management -other, Nets, Smelts, ...5.0107

LIFE HISTORY OF THE BURBOT AND LONGNOSE SUCKER ...Codfishes, Hake, Lake Superior, Lakes, Life History Studies, ...5.0184

### Sunfish, Rock & Roanoke Bass..

REPOPULATION OF DECIMATED SECTIONS OF WARM-WATER STREAMS BY LONGEAR SUNFISH, LEPOMIS MEGALOTIS (RAFINESQUE) ...Aquatic Ecology, Population Dynamics, Stocking of Fish & Shellfish, Streams, Warm Water, ...5.0097

### Swordfish

STUDIES ON THE SPORT FISHERY FOR BILLFISHES AND TUNAS IN THE WESTERN ATLANTIC AND SOUTHEASTERN PACIFIC OCEAN. ...Atlantic Ocean-general, Fishing, Pacific Ocean-general, Tuna, Mackerel, Albacore... , ...5.0069

LOCAL FISHERY SYSTEMS DEVELOPMENT ...California, Commercial Fishing, Sharks, Shrimps - Common, ...5.0198

### Tilapia, Cichlids

MOTIVATIONAL ANALYSIS OF COURTSHIP BEHAVIOR ...Aggression, Behavior, Social Behavior, ...5.0231

EXPERIMENTAL STUDIES OF BEHAVIOR IN A CICHLID FISH ...Behavior, Parental Care, Sex, Size, ...5.0232

FISH POPULATION STUDY ...Analog Computer Applications, Environmental Ecology, Fish -other, Killifishes - Cyprinodon, Population Dynamics, ...5.0175

FUNCTION OF THE INTERRENAL GLAND IN TELEOST FISHES ...Blood Cells, Kidney and Urinary System, Osmoregulation, Pituitary, Water Salinity, ...5.0233

### Tuna, Mackerel, Albacore...

DEVELOPMENT OF TECHNIQUES FOR THE AQUACULTURE OF POMPANO ...Aquaculture & Fish-farming, Environmental Physiology, Florida, Maturity & Growth Stages, Pathology, ...8.0007

ENERGY REQUIREMENTS OF MARINE ORGANISMS ...Energy, Sharks, Thermoregulation, Water Pressure, ...5.0273

STUDIES ON THE SPORT FISHERY FOR BILLFISHES AND TUNAS IN THE WESTERN ATLANTIC AND SOUTHEASTERN PACIFIC OCEAN. ...Atlantic Ocean-general, Fishing, Pacific Ocean-general, Swordfish, ...5.0069

AQUISITION OF A SUITABLE PROTOTYPE FISHING VESSEL AND GEAR ...American Samoa, Commercial Fishing, Equipment Purchase Operation, Nets, ...12.0004

ALBACORE TUNA ...Behavioral Ecology, Environmental Ecology, Life History Studies, Tags, ...5.0143

SYSTEMATIC STUDIES ON THE FAMILY SCOMBRIDAE ...Animal Taxonomy, Indian Ocean-general, Nomenclature, Classification, Vertebrate Anatomy, ...5.0056

INVESTIGATE SYSTEMATICS AND ECOLOGY OF TUNA LARVAE AND JUVENILES ...Animal Taxonomy, Artificial Insemination, Maturity & Growth Stages, Spawning & Nesting Sites, ...5.0079

INVESTIGATE SEASONAL VARIATIONS, SURFACE WATER TYPES, HAWAIIAN AREA (KOKO HEAD) ...Commercial Fishing, Hawaii, Heat and Radiation Transfer, Oceanic Fronts, Salinity, Temperature, Water Salinity, Water Temperature-non-specific, ...1.0148

REPRODUCTION AND FECUNDITY OF TUNAS ...Behavior, Biological Rhythms, Female Gametes, Fertility, ...4.0159

DISTRIBUTION AND ECOLOGY OF ATLANTIC TUNAS ...Atlantic Ocean-general, Environmental Ecology, Range Or Territorial Distr. , Temporal Distribution, ...5.0063

## Fish

## SUBJECT INDEX

- MIGRATION OF ATLANTIC TUNAS ...Africa, Atlantic Ocean-general, Migration, Tags, ...5.0064
- FEEDING HABITS OF ATLANTIC TUNAS AND NEKTON ECOLOGY ...Atlantic Ocean-general, Food Supply, Plankton (non-specific), Productivity - Food Chain, ...5.0204
- POPULATION DYNAMICS OF ATLANTIC TUNAS ...Atlantic Ocean-general, Censusing, Commercial Fishing, Population Dynamics, ...5.0065
- MECHANISMS AFFECTING THE VERTICAL AND HORIZONTAL DISTRIBUTION OF TUNAS AND RELATED SPECIES ...Behavioral Ecology, Environmental Ecology, Mark, Tag Or Capture -other, Vertical Distribution, ...5.0087
- SEA SURFACE SURVEILLANCE ...Caribbean Sea, Circulation-general, Temporal Distribution, Vertical Distribution, Water Properties-general, ...2.0019
- DESIGN AND DEVELOPMENT OF NEKTON SAMPLER ...Food Supply, Nektonic - Swimming, Organism Sampling Devices, Plankton Sampling, ...8.0129
- ECOLOGY AND TAXONOMY OF TROPICAL ATLANTIC SCOMBRID EGGS AND LARVAE ...Animal Distr. (non-specific), Animal Taxonomy, Basic Embryology, Food Supply, Life History Studies, ...5.0772
- STOCK IDENTIFICATION OF ATLANTIC TUNAS ...Atlantic Ocean-general, Caribbean Sea, Electrophoresis -non-specific, ...5.0252
- INVESTIGATE TUNA SUBPOPULATIONS THROUGH THE USE OF BLOOD GROUPS AND INHERITED PROTEINS ...Blood Proteins -non-specific, Blood Typing Studies, Pacific Ocean-general, Population Dynamics, ...5.0076
- PROVIDE FOR ACTIVITIES OF TUNA BLOOD GROUP CENTER ...Blood Plasma and Serum, Blood Typing Studies, Hawaii, Immunology Methods, ...5.0258
- INCREASE EFFICIENCY OF HAWAIIAN SKIPJACK FISHERY ...Captive Rearing, Commercial Fishing, Food Supply, Hawaii, ...5.0077
- DEVELOP TECHNIQUES FOR CAPTURING JUVENILE TUNAS ...Blood Typing Studies, Nets, Population Dynamics, Vertical Distribution, ...5.0078
- INVESTIGATE PHYSIOLOGY OF TUNAS ...Behavior, Blood -other, Environmental Physiology, Muscle, Olfactory, ...5.0259
- DETERMINE ALTERNATE LIVEBAIT SPECIES ...Anchovies, Captive Rearing, Commercial Fishing, Food Supply, Hawaii, ...5.0080
- INVESTIGATE POPULATION DYNAMICS OF ALBACORE ...American Samoa, Commercial Fishing, Population Dynamics, Water Environment -other, ...5.0081
- ASSESSMENT OF CENTRAL PACIFIC TUNA RESOURCES ...Commercial Fishing, Pacific Ocean-general, Population Dynamics, Size, ...5.0082
- DEVELOP HIGH-SEAS TUNA FISHERY ...Commercial Fishing, Fishing Gear, Pacific Ocean-general, Tropic, ...5.0084
- INVESTIGATE TUNA RESOURCES OF THE TRUST TERRITORIES ...Caroline Islands, Commercial Fishing, Environmental Ecology, Population Dynamics, ...5.0085
- SCHOOLING BEHAVIOR ...Alewife,menhaden,shad,herring, Anchovies, Behavioral Ecology, Environmental Ecology, ...5.0038
- 146 D EASTROPAC ...Marine Biology, Meteorological Studies, Pacific Ocean-east, Tropic, Vertical Distribution, ...4.0113
- INVESTIGATE POPULATION DYNAMICS OF SKIPJACK TUNA IN HAWAIIAN WATERS ...Commercial Fishing, Economics, Environmental Ecology, Hawaii, Population Dynamics, ...5.0083
- 149A FISHERY SYSTEMS ANALYSIS ...California, Commercial Fishing, Nets, Production & Processing, Simulation, ...4.0175
- TUNA PURSE SEINE NET ...Commercial Fishing, Fishing Gear, Nets, ...8.0119
- REARING MARINE FISH ...Alewife,menhaden,shad,herring, Anchovies, Captive Rearing, Environmental Physiology, ...5.0041
- SCRIPPS TUNA OCEANOGRAPHY RESEARCH PROGRAM ...Food Supply, Pacific Ocean-east, Temperature, Tropic, Water Temperature-non-specific, ...5.0200
- CTFM SONAR ...Behavioral Ecology, Commercial Fishing, Locomotion -animal, Sonar and Echo Sounding, Telemetry, ...8.0058
- THE PHYSIOLOGY OF TUNA AND OTHER PELAGIC FISH ...Blood -other, Environmental Physiology, Sharks, Thermoregulation, ...5.0272

## Walleyes

- THE EFFECTS OF ENVIRONMENTAL CONDITIONS ON THE SPAWNING AND SURVIVAL OF FRY OF THE WALLEYE ...Environmental Effects-geologic, Eutrophication, Lake Erie, Pollution - Effects of, Temperature, ...5.0299

## Yellow Perch, Darters

- THE ROLE OF CALCIUM IONS IN THE MOTILITY OF SEA URCHIN AND OTHER SPERMATOOZA ...Atpase, Calcium, Male Gametes, Motility and Migration, ...5.0622
- LAKE ERIE INVESTIGATIONS - LIFE HISTORY AND ABUNDANCE OF THE YELLOW PERC ...Commercial Fishing, Environmental Ecology, Life History Studies, Nets, Population Dynamics, ...5.0134
- CYTOLOGY OF VIRAL NEOPLASMS OF FISH ...Dermal, Hypertrophy - Hyperplasia, Lymphocystis, Neoplasm, ...5.0292

## Fish & Wildlife Biology

### Birds

#### Censusing

- ECOLOGICAL STUDIES OF THE COPPER RIVER DELTA ...Alaska, Maps-general, Spawning & Nesting Sites, Waterfowl -non-specific, ...5.0855

#### Control of Nuisance Species

- THE BIOLOGY OF THE LAYSAN AND BLACK-FOOTED ALBATROSSES ...Age, Albatrosses, Shearwaters... , Animal Distr. (non-specific), Mark, Tag Or Capture -other, Spawning & Nesting Sites, ...5.0607

#### Food Supply

- AVIFAUNAL ECOLOGY OF LIMANTOUR ESTERO ...Birds -non-specific, California, Game Reserves & Preserves, Habitat Studies, ...5.0534
- WATERFOWL FOOD STUDIES ...Management, Plant Prod. (non-specific), South Carolina, Waterfowl -non-specific, ...5.0653

#### Game Reserves & Preserves

- AVIFAUNAL ECOLOGY OF LIMANTOUR ESTERO ...Birds -non-specific, California, Food Supply, Habitat Studies, ...5.0534
- EVALUATION OF ATLANTIC COAST ESTUARIES ...Atlantic Ocean-north, Estuaries, Habitat Studies, Life History Studies, Waterfowl -non-specific, ...9.0020

#### Mark, Tag Or Capture -other

- SENSORY BASIS OF NAVIGATION IN HOMING PIGEONS ...Behavior, Biological Rhythms, Environmental Physiology, Locomotion -animal, Pigeon, ...4.0108
- DISTANT GOAL ORIENTATION ...Biological Rhythms, Birds -non-specific, Locomotion -animal, Magnetic Impulses, Orientation, ...4.0109
- ECOLOGY OF STORM PETRELS ...Albatrosses, Shearwaters... , California, Islands, Spawning & Nesting Sites, Terrestrial Ecology, ...5.0532
- THE BIOLOGY OF THE LAYSAN AND BLACK-FOOTED ALBATROSSES ...Age, Albatrosses, Shearwaters... , Animal Distr. (non-specific), Control of Nuisance Species, Spawning & Nesting Sites, ...5.0607
- TELEMETRY STUDIES ON MARINE BIRDS ...Albatrosses, Shearwaters... , Bermuda, Pelicans, Cormorants,darters... , Spawning & Nesting Sites, ...5.0531

## Fish & Shellfish

### Aquaria

- NUTRITION AND PHYSIOLOGY OF MARINE FISH IN CONTROLLED GNOTOBIOTIC ENVIRONMENTS ...Environmental Physiology, Fish -non-specific, Germ Free Animal, Nutrition -other, ...5.0317

### Captive Rearing

- COMPARATIVE BEHAVIOR OF HATCHERY-REARED AND WILD SALMONIDS ...Atlantic Salmon, Sebago Salmon, Behavior, Environmental Physiology, Lake Trout, Brook Trout, ...5.0264
- SHRIMP PRODUCTION IN LOUISIANA SALT-MARSH IMPOUNDMENTS UNDER EXISTING AND MANAGED CON-

## SUBJECT INDEX

## Fish & Wildlife Biology

- DITIONS ...Aquaculture & Fish-farming, Lagoons, Louisiana, Shrimps - Common, Water Movement, Currents,, ...5.0435
- GERMFREE FISH ...Fish -other, Germ Free Animal, Immunology, Infectious Conditions and Dis, Vertebrate Anatomy, ...5.0236
- INVESTIGATE THE FEASIBILITY OF INTRODUCING SOCKEYE SALMON INTO RESERVOIRS ...Aquatic Ecology, Oregon, Reservoirs and Impoundments, Salmon -coho,chinook,sockeye..., Stocking of Fish & Shellfish, ...5.0141
- POPULATION STUDIES OF ANADROMOUS FISH - UPPER COOK INLET DRAINAGES ...Alaska, Censusing, Population Dynamics, Salmon -coho,chinook,sockeye..., Streams, ...5.0020
- CONTROLLED REARING OF DUNGENESS CRAB LARVAE ...Crabs, Developmental Physiology, Maturity & Growth Stages, Oregon, ...5.0486
- INSPECTION OF OYSTER SEED - NEW ASIATIC SOURCES ...Commercial Fishing, Germ Free Animal, Japan, Oysters, ...5.0511
- CHARTING OF SUBTIDAL OYSTER BEDS AND EXPERIMENTAL TRANSPLANTING OF SEED OYSTERS FROM POLLUTED SEED OYSTER BEDS ...Commercial Fishing, Estuaries, Oysters, South Carolina, Stocking of Fish & Shellfish, ...8.0011
- TAG LOSS ...Salmon -coho,chinook,sockeye..., Size, Tags, Washington, Weight, ...5.0157
- MANAGEMENT INVESTIGATIONS OF TWO SPECIES OF SPINY LOBSTERS PANULIRUS JAPONICUS AND P. PENICILLATUS ...Commercial Fishing, Lobsters, Management -other, Tags, ...5.0422
- SHELLFISH EMBRYOLOGY AND LARVAE DEVELOPMENT STUDY ...Basic Embryology, Crustacea -non-specific, Mollusks -non-specific & Other, Training Grants, Fellowships, ...5.0358

- INCREASE EFFICIENCY OF HAWAIIAN SKIPJACK FISHERY ...Commercial Fishing, Food Supply, Hawaii, Tuna, Mackerel, Albacore..., ...5.0077
- DETERMINE ALTERNATE LIVEBAIT SPECIES ...Anchovies, Commercial Fishing, Food Supply, Hawaii, Tuna, Mackerel, Albacore..., ...5.0080
- REARING MARINE FISH ...Alewife,menhaden,shad,herring, Anchovies, Environmental Physiology, Tuna, Mackerel, Albacore..., ...5.0041
- Censusing**
- POPULATION STUDIES OF ANADROMOUS FISH - UPPER COOK INLET DRAINAGES ...Alaska, Captive Rearing, Population Dynamics, Salmon -coho,chinook,sockeye..., Streams, ...5.0020
- CREEL CENSUS OF SUMMER FLOUNDER SPORT FISHERY IN GREAT BAY, NEW JERSEY ...Bays, Lefteye Flounders, Legislation, Life History Studies, New Jersey, ...5.0124
- ESTIMATION OF PARAMETERS OF STRIPED BASS POPULATION AND DESCRIPTION OF THE FISHERY OF LOWER CHESAPEAKE BAY ...Age, Basses -sea,white, White Perch, Chesapeake Bay, Fishing Gear, Population Dynamics, ...5.0151
- STUDY ON THE DISTRIBUTION AND ABUNDANCE OF PINK SHRIMP, PANDALUS JORDANI, IN THE PACIFIC OCEAN OFF OREGON ...Fishing Gear, Life History Studies, Pacific Ocean-general, Population Dynamics, Shrimps - Common, ...5.0487
- ESTIMATE OF STANDING CROP OF OYSTERS AND SURVEY OF OYSTER PREDATORS IN GEORGIA ...Georgia, Oysters, Predation, ...5.0416
- EXPANSION OF CURRENT AND DEVELOPMENT OF ADDITIONAL COMMERCIAL FISHERIES CATCH, PRODUCTION AND GEAR STATISTICS ...Alaska, Commercial Fishing, Fish -non-specific, Fish -other, Reliability Theory, ...5.0018
- PRE-EMERGENT FRY PINK SALMON FORECAST - SOUTHEASTERN ALASKA ...Alaska, Aquatic Ecology, Number Or Density, Salmon -coho,chinook,sockeye..., Spawning & Nesting Sites, ...5.0019
- KVICHAK RIVER TOTAL SMOLT ...Alaska, Fish -non-specific, Migration, Mortality Rates, Nets, Population Dynamics, ...5.0002
- KING CRAB SAMPLING GEAR STUDY ...Alaska, Crabs, Fishing Gear, Population Dynamics, Spawning & Nesting Sites, ...8.0113
- INVESTIGATION OF SPAWNING GROUND POTENTIALS AND GROWTH AND SURVIVAL OF JUVENILE SOCKEYE SALMON IN FRAZER LAKE SYSTEM ...Alaska, Lakes, Nets, Salmon -coho,chinook,sockeye..., Spawning & Nesting Sites, Tags, ...5.0190
- COASTAL LOBSTER FISHERY ...Commercial Fishing, Legislation, Lobsters, Massachusetts, ...5.0452
- COOK INLET ESCAPEMENT ENUMERATION STUDY ...Alaska, Migration, Organism Sampling Devices, Salmon -coho,chinook,sockeye..., Sonar, Sonar and Echo Sounding, ...8.0112
- SOCKEYE SALMON MIGRATORY BEHAVIOR AND BIOLOGICAL STATISTICS COLLECTION, SOUTHEASTERN ALASKA ...Alaska, Behavioral Ecology, Migration, Salmon -coho,chinook,sockeye..., Streams, ...5.0027
- SOCKEYE SALMON MIGRATORY BEHAVIOR AND BIOLOGICAL STATISTICS COLLECTION, SOUTHEASTERN ALASKA ...Alaska, Aquatic Ecology, Behavioral Ecology, Migration, Salmon -coho,chinook,sockeye..., ...5.0016
- OFFSHORE LOBSTER FISHERY ...Commercial Fishing, Lobsters, Massachusetts, Nets, ...5.0453

## Fish & Wildlife Biology

## SUBJECT INDEX

- WEIR, TRAP AND SEINE FISHERY ...Commercial Fishing, Fishing Gear, Massachusetts, Nets, ...4.0010
- ANADROMOUS FISHERY ...Alewife,menhaden,shad,herring, Commercial Fishing, Massachusetts, ...4.0011
- SHELLFISHERIES ...Commercial Fishing, Crustacea -non-specific, Legislation, Mollusks -non-specific & Other, ...4.0012
- KVICHAK RIVER SMOLT STUDY LITERATURE SURVEY ...Alaska, Fish -non-specific, Migration, Number Or Density, Survey Studies, ...5.0003
- COOK INLET SMOLT ENUMERATION STUDY ...Alaska, Productivity (agricultural), Salmon -coho,chinook,sockeye..., Spawning & Nesting Sites, ...5.0015
- SAMPLING OF MARKED COHO ...Columbia River, Mark, Tag Or Capture -other, Number Or Density, Salmon -coho,chinook,sockeye..., Stocking of Fish & Shellfish, ...5.0162
- INTERVIEW AND OBSERVATION ...Commercial Fishing, Continental Shelf, Fish -non-specific, Range Or Territorial Distr. , ...5.0156
- SURVEYS OF SPAWNING SALMON ...Biological Rhythms, Number Or Density, Oregon, Salmon & Trout - Non-specific, Streams, ...5.0142
- MANAGEMENT OF THE OREGON TRAWL FISHERY ...Commercial Fishing, Legislation, Nets, Oregon, Rockfish, Scoraionfish, ...5.0145
- LIFE HISTORY OF BILLFISHES ...California, Life History Studies, Marlin, Billfishes, Sailfish..., Mexico, ...5.0195
- 1965 SALT-WATER ANGLING SURVEY ...Animal Taxonomy, Fish -non-specific, Fishing, ...9.0011
- POPULATION DYNAMICS OF ATLANTIC TUNAS ...Atlantic Ocean-general, Commercial Fishing, Population Dynamics, Tuna, Mackerel, Albacore... , ...5.0065
- NORTHERN SHRIMP EXPLORATIONS ...Atlantic Ocean-north, Commercial Fishing, Fishing Gear, Shrimps - Common, ...5.0457
- Commercial Fishing**
- FISHERIES RESOURCES IDENTIFICATION AND ASSESSMENT ...Aerial Photography, Behavioral Ecology, Fish -non-specific, Optical, Spectral Reflectance, ...4.0149
- FISHERIES OCEANOGRAPHY AND ENVIRONMENTAL ASSESSMENT AND PREDICTION ...Convection, Oceanography-general, Spacecraft Sensory Devices, Thermal, ...4.0150
- REMOTE SENSOR SYSTEMS INTERGRATION AND PRESENT OPERATIONS DESCRIPTION ...Fish -non-specific, Remote Sensing -other, Spacecraft Sensory Devices, Spectral Reflectance, ...4.0154
- WORKSHOP ON EFFECTS OF ATOMIC RADIATION ON OCEANOGRAPHY ...Atomic Bomb, Meetings, Radiation Effects-non-specific, Radioactivity, ...11.0015
- RADIATION PRESERVATION OF FISHERY PRODUCTS ...Fish & Shellfish, Fish -non-specific, Organoleptic Studies, Radiation, Shelf Life & Storage, ...6.0034
- SYSTEMS ENGINEERING AND DEVELOPMENT OF COMMERCIALLY VALUABLE MARINE RESOURCES IN THE DELAWARE AREA ...Aquaculture & Fish-farming, Delaware, Fish & Shellfish, Oysters, Quality -non-specific, ...8.0002
- CONFERENCE ON THE FUTURE OF THE U.S. FISHERY INDUSTRY ...Fish -non-specific, Meetings, ...4.0188
- DESIGN STUDY - AN OPTIMUM FISHING VESSEL FOR THE GEORGES BANK GROUND FISH FISHERY ...Atlantic Ocean-north, Computer Applications, Fishing Gear, Naval Architecture-general, Other-design-and-construction, ...8.0288
- FISHING VESSEL CONSTRUCTION COSTS AND THE U.S. FISHERY VESSEL CONSTRUCTION DIFFERENTIAL SUBSIDY ...Costs, Economics, Fiscal, Other-design-and-construction, Surface Ships, ...4.0181
- INSPECTION OF OYSTER SEED - NEW ASIATIC SOURCES ...Captive Rearing, Germ Free Animal, Japan, Oysters, ...5.0511
- TAGGING ENGLISH SOLE, PETRALE SOLE, AND PACIFIC COD ...Codfishes, Hake, Migration, Righteye Flounders, Size, Tags, Washington, ...5.0158
- CHARTING OF SUBTIDAL OYSTER BEDS AND EXPERIMENTAL TRANSPLANTING OF SEED OYSTERS FROM POLLUTED SEED OYSTER BEDS ...Captive Rearing, Estuaries, Oysters, South Carolina, Stocking of Fish & Shellfish, ...8.0011
- TAG DETECTION ...Number Or Density, Puget Sound, Salmon -coho,chinook,sockeye..., Streams, Tags, ...8.0148
- OYSTER LEASE CONTROL MONUMENTS - BAY ADAM, BASTIAN BAY AND SANDY POINT BAY AREAS ...Gulf of Mexico, Louisiana, Oysters, Plane, Tides, ...4.0057
- DESIGN AND CONSTRUCTION OF BARGE AND CLAM DREDGE FOR SURVEY OF FLORIDA'S COMMERCIAL CLAMS ...Clams, Florida, Habitat Studies, Other-design-and-construction, ...8.0284
- DETERMINATION OF THE STRUCTURE & ECONOMIC IMPORTANCE OF THE VARIOUS SEGMENTS OF THE SEAFOOD INDUSTRY ...Consumer Pref. & Consumption, Fish & Shellfish, Fish -non-specific, Georgia, Production & Processing, Regional Economic Impact, Shellfish -non-specific, ...4.0180
- SEASONAL ABUNDANCE AND BIOLOGICAL STABILITY OF THE COMMERCIAL SHRIMP OF GEORGIA ...Number Or Density, Shrimps - Common, ...5.0419
- IDENTIFICATION OF WINTER FLOUNDER SUBPOPULATIONS ...Legislation, Nets, Population Dynamics, Righteye Flounders, Tags, ...5.0100
- EXPANSION OF CURRENT AND DEVELOPMENT OF ADDITIONAL COMMERCIAL FISHERIES CATCH, PRODUCTION AND GEAR STATISTICS ...Alaska, Censusing, Fish -non-specific, Fish -other, Reliability Theory, ...5.0018
- MANAGEMENT INVESTIGATIONS OF TWO SPECIES OF SPINY LOBSTERS PANULIRUS JAPONICUS AND P. PENICILLATUS ...Captive Rearing, Lobsters, Management -other, Tags, ...5.0422
- INVESTIGATION OF ECOLOGICAL FACTORS LIMITING PRODUCTION OF THE ALASKAN PANDALID SHRIMP ...Alaska, Life History Studies, Nets, Shrimps - Common, Vertical Distribution, ...5.0345
- REGIONAL DEMAND IN THE U.S. AND TRENDS IN THE FISHING AND SEAFOOD PROCESSING INDUSTRIES OF THE CHESAPEAKE BAY AREA ...Chesapeake Bay, Consumer Pref. & Consumption, Consumption, Fish & Shellfish, Fish -non-specific, Market Structure, ...6.0028
- DETERMINATION OF THOSE MARINE SPECIES HAVING THE GREATEST KNOWN POTENTIAL FOR THE COMMERCIAL FISHERY ...Ag Uses of Nat. resource-other, Algininate, Food Supply, Fucus, Phaeophyta (non-specific & Ot), ...5.0098
- SHELLFISH AND BOTTOMFISH DATA ...Crabs, Fish -other, Legislation, Shrimps - Common, ...5.0357
- AQUISITION OF A SUITABLE PROTOTYPE FISHING VESSEL AND GEAR ...American Samoa, Equipment Purchase Operator, Nets, Tuna, Mackerel, Albacore... , ...12.0004
- COASTAL LOBSTER FISHERY ...Censusing, Legislation, Lobsters, Massachusetts, ...5.0452
- DEVELOPMENT OF UNDER-ICE HORIZONTAL SONAR SCANNING EQUIPMENT AND TECHNIQUES FOR LOCATING FISH SCHOOLS ...Behavioral Ecology, Fish -non-specific, Lakes, Nets, Sonar, ...8.0138
- SURVEY OF A POTENTIAL HARD CLAM FISHERY ...Clams, Coring and Dredging, Estuaries, Georgia, Spawning & Nesting Sites, ...5.0420
- IDENTIFICATION OF RED SALMON STOCKS TAKEN IN THE CAPE KUMLIK-ANIACHAK BAY FISHERY (CHIGNIK AREA) ...Alaska, Salmon -coho,chinook,sockeye..., Spawning & Nesting Sites, Streams, Tags, ...5.0021
- MANAGEMENT OF THE OCEAN SALMON FISHERY WITH EMPHASIS ON THE BARBLESS HOOKS AS A MANAGEMENT TOOL ...Fishing Gear, Salmon -coho,chinook,sockeye..., ...8.0142
- ARCTIC-YUKON-KUSKOKWIM AREA ANADROMOUS FISH INVESTIGATIONS ...Alaska, Life History Studies, Population Dynamics, Salmon & Trout - Non-specific, Salmon -coho,chinook,sockeye..., ...5.0024
- STOCKING AND SURVIVAL OF STRIPED BASS FINGERLINGS ...Alabama, Basses -sea,white, White Perch, Maturity & Growth Stages, Stocking of Fish & Shellfish, Streams, ...5.0001
- BRISTOL BAY INTERMEDIATE HIGH SEAS-INSHORE TEST FISHING ...Age, Alaska, Bays, Salmon -coho,chinook,sockeye..., ...5.0022
- OFFSHORE SALMON ABUNDANCE INDEX ...Alaska, Number Or Density, Salmon -coho,chinook,sockeye..., Streams, ...5.0028
- LIFE-HISTORY AND BIOLOGICAL WORK IN THE RESTORATION AND MANAGEMENT OF SPECIES OF IMPORTANCE TO THE FISHERIES OF THE VIRGIN ISLANDS ...Diving and Scuba, Life History Studies, Management -other, Population Dynamics, Virgin Islands, ...5.0149

## SUBJECT INDEX

## Fish & Wildlife Biology

- EVALUATION, COORDINATION, AND PLANNING OF PACIFIC SALMON AND STEELHEAD RESEARCH AND MANAGEMENT ACTIVITIES ...Fishery Development -other, Management -other, Meetings, Rainbow Trout, Steelhead Trout, Salmon -coho, chinook, sockeye..., ...5.0140

- OCEAN ENGINEERING ...Bathymetry, Fishing Gear, Instrumental Services, Telemetry-other, ...8.0152
- FISHING GEAR RESEARCH AND DEVELOPMENT ...Fishing Gear, Meetings, Nets, ...8.0153
- SHELLFISH EXPLORATIONS ...Benthic Fauna, Clams, Mark, Tag Or Capture -other, Population Dynamics, ...5.0514

## Fish & Wildlife Biology

## SUBJECT INDEX

MARINE FISH BEHAVIOR ...Behavioral Ecology, Fish -non-specific, Fishing Gear, ...5.0176

EXPLORATION OF LATENT RESOURCES ON THE CONTINENTAL SHELF/SLOPE ...Atlantic Ocean-north, Continental Shelf, Nets, Survey Studies, ...5.0102

TECHNICAL ASSISTANCE AND LIAISON WITH FISHING INDUSTRIES ...Fishing Gear, Management -other, Mark, Tag Or Capture -other, ...11.0026

TRAWL DESIGN, MATERIALS AND METHODS ...Fishing Gear, Nets, ...8.0133

MECHANIZATION OF TRAWL GEAR ...Fishing Gear, Safety, ...8.0135

SEA CLAM EXPLORATIONS ...Animal Distr. (non-specific), Atlantic Ocean-north, Clams, Population Dynamics, ...5.0456

PROCESSING KING CRAB ...Crabs, Fish & Shellfish, Fish Meals, Freezing, Organoleptic Studies, ...6.0003

LOBSTER RESEARCH ...Environmental Ecology, Habitat Studies, Lobsters, Population Dynamics, ...5.0436

MARINE BIOLOGICAL INVESTIGATIONS - JAPANESE FISHERY OBSERVERS PROJECT ...Gulf of Alaska, Japan, Nets, Righteye Flounders, ...5.0012

TECHNICAL ASSISTANCE TO INDUSTRY ...Alaska, Diffusion of Information, Fishing Gear, General Information Services, ...5.0031

OCEAN ENGINEERING ...Alaska, Design, Machinery, Equipment, Fishing Gear, Shrimp, ...5.0349

BERING SEA KING CRAB STUDIES ...Bering Sea, Crabs, Environmental Ecology, Migration, ...5.0341

COMMERCIAL BENEFIT STUDIES ...Fish & Shellfish, ...6.0037

GROUND FISH INVESTIGATIONS (POTENTIAL YIELD OF UNDERUTILIZED GROUND FISH STOCKS) ...Codfishes, Hake, Legislation, Number Or Density, Rockfish, Scoraionfish, ...5.0171

ANALYSIS OF JAPANESE CATCH STATISTICS ...Japan, Number Or Density, Pacific Ocean-north, Salmon -coho, chinook, sockeye..., ...5.0166

DROPOUT OF SALMON FROM GILL NETS ...Management -other, Mortality Rates, Nets, Salmon & Trout - Non-specific, Water Salinity, ...5.0177

CONTAINERIZATION OF FISHERY PRODUCTS ...Fish -other, Packaging, Processing, Shrimp, ...6.0049

PROCESSING AND PRODUCT DEVELOPMENT OF EDIBLE FISH AND SHELLFISH ...Fish & Shellfish, ...6.0047

GREAT LAKES EXPLORATIONS ...Fish -non-specific, Fishing Gear, Great Lakes-general, Population Dynamics, ...5.0108

SPACE APPLICATIONS TO FISHERIES OCEANOGRAPHY (GULF OCEANOGRAPHY PROGRAM) ...Computer Applications, Forecasting-prediction, Satellites, Water Environment -other, ...4.0172

PREDICTING COMMERCIAL SHRIMP ABUNDANCE (SHRIMP DYNAMICS PROGRAM) ...Bays, Behavioral Ecology, Environmental Ecology, Population Dynamics, Shrimps - Common, ...5.0499

EVALUATION OF ENGINEERING PROJECTS AND ESTUARINE DATA (ESTUARINE PROGRAM) ...Engineering Structures-general, Estuaries, Gulf of Mexico, Habitat Studies, Swamps-marshes, ...9.0021

POPULATION DYNAMICS (SHRIMP DYNAMICS PROGRAM) ...Gulf of Mexico, Mortality Rates, Nets, Population Dynamics, Shrimps - Common, ...5.0503

INCREASE EFFICIENCY OF HAWAIIAN SKIPJACK FISHERY ...Captive Rearing, Food Supply, Hawaii, Tuna, Mackerel, Albacore..., ...5.0077

DETERMINE ALTERNATE LIVEBAIT SPECIES ...Anchovies, Captive Rearing, Food Supply, Hawaii, Tuna, Mackerel, Albacore..., ...5.0080

INVESTIGATE POPULATION DYNAMICS OF ALBACORE ...American Samoa, Population Dynamics, Tuna, Mackerel, Albacore..., Water Environment -other, ...5.0081

ASSESSMENT OF CENTRAL PACIFIC TUNA RESOURCES ...Pacific Ocean-general, Population Dynamics, Size, Tuna, Mackerel, Albacore..., ...5.0082

DEVELOP HIGH-SEAS TUNA FISHERY ...Fishing Gear, Pacific Ocean-general, Tropic, Tuna, Mackerel, Albacore..., ...5.0084

INVESTIGATE TUNA RESOURCES OF THE TRUST TERRITORIES ...Caroline Islands, Environmental Ecology, Population Dynamics, Tuna, Mackerel, Albacore..., ...5.0085

DEVELOP FISHERIES FOR NON-TUNA RESOURCES ...Fishing Gear, Hawaii, Pacific Ocean-general, Snappers, ...5.0086

INCREASE EFFICIENCY OF HAWAIIAN LONGLINE FISHERY ...Fish & Shellfish, Fishing Gear, Hawaii, Production & Processing, Technique Development, Technological Development, ...11.0022

LOCAL FISHERY SYSTEMS DEVELOPMENT ...California, Sharks, Shrimps - Common, Swordfish, ...5.0198

INVESTIGATE POPULATION DYNAMICS OF SKIPJACK TUNA IN HAWAIIAN WATERS ...Economics, Environmental Ecology, Hawaii, Population Dynamics, Tuna, Mackerel, Albacore..., ...5.0083

NORTHERN SHRIMP EXPLORATIONS ...Atlantic Ocean-north, Censusing, Fishing Gear, Shrimps - Common, ...5.0457

149A FISHERY SYSTEMS ANALYSIS ...California, Nets, Production & Processing, Simulation, Tuna, Mackerel, Albacore..., ...4.0175

TUNA PURSE SEINE NET ...Fishing Gear, Nets, Tuna, Mackerel, Albacore..., ...8.0119

SUBPOPULATIONS ...Anchovies, Pacific Ocean-general, Population Dynamics, ...5.0042

DEVELOPMENT OF FISHNET BATHYKMOGRAPH ...Fishing Gear, Instrumental Services, Nets, Readout Systems, ...8.0102

CTFM SONAR ...Behavioral Ecology, Locomotion -animal, Sonar and Echo Sounding, Telemetry, Tuna, Mackerel, Albacore..., ...8.0058

MULTISPECIES FISHERIES MODELS ...California, Economics, Model Studies, Oceanic - Pelagic, Pacific Ocean-east, Production & Processing, ...4.0065

OCEANOGRAPHIC STUDY OF NORTHEASTERN U. S. COASTAL WATERS FOR INTERNATIONAL COMMISSION FOR NORTHWEST ATLANTIC FISHERIES ...Gases, Salinity, Ships and Cruises, Temperature, ...4.0123

### Control of Nuisance Species

SHARK RESEARCH ...Fish Repellents, Sharks, Tags, Temporal Distribution, ...5.0047

BIOLOGY OF THE LARVAL SEA LAMPREY ...Developmental Physiology, Environmental Ecology, Great Lakes-general, Lampreys, Life History Studies, ...5.0633

NATURAL HISTORY OF PREDATORS AND COMPETITORS (PREDATOR CONTROL PROGRAM) ...Behavioral Ecology, Competition, Environmental Ecology, Oysters, Predation, ...5.0377

METHODS OF CONTROL OF PREDATORS AND COMPETITORS (PREDATOR CONTROL PROGRAM) ...Competition, Gastropods -slugs, conch, snails, Oysters, Predation, ...5.0378

EFFECTS OF CHEMICALS ON THE PHYSIOLOGY OF SEA LAMPREY AMMOCETES (PETROMYZON MARINUS) ...Contamination - Water, Environmental Physiology, Lampreys, Maturity & Growth Stages, ...5.0631

LAKE SUPERIOR CHEMICAL CONTROL OF SEA LAMPREY ...Aquatic Ecology, Lake Superior, Lampreys, Larvicides, Streams, ...5.0628

LAKE MICHIGAN CHEMICAL CONTROL OF SEA LAMPREY ...Animal Pollutant Sources, Evaluation, Lake Michigan, Lampreys, Larvicides, ...6.0158

SEA LAMPREY AMMOCETE REESTABLISHMENT STUDIES ...Aquatic Ecology, Great Lakes-general, Lampreys, Larvicides, Life History Studies, Population Dynamics, ...5.0629

ELECTRIC BARRIER OPERATIONS ...Lake Michigan, Lake Superior, Lampreys, Migration, Population Dynamics, ...5.0630

### Fish Studies -other

COLLECTION, COMPILATION, AND ANALYSIS OF GULF CATCH STATISTICS AND LOGBOOK DATA ...Alewife, menhaden, shad, herring, Commercial Fishing, Computer Methods -general, ...5.0126

### Fishery Development -other

SPORTFISH YIELD OF NATURAL REEFS ...Bays, California, Habitat Studies, Population Dynamics, ...5.0199

EVALUATION, COORDINATION, AND PLANNING OF PACIFIC SALMON AND STEELHEAD RESEARCH AND MANAGEMENT ACTIVITIES ...Commercial Fishing, Management -other, Meetings, Rainbow Trout, Steelhead Trout, Salmon -coho, chinook, sockeye..., ...5.0140

FILM PROJECT (KELP FORESTS) ...California, Cinematography, Habitat Studies, Laminariaceae (non-specif.&ot), ...5.0678

THE ROLE OF THE SENORITA, OXYJULIS CALIFORNICA, AS A CLEANING ORGANISM ...California, Ectoparasites, Fish -other, Interbiotic Relat.(non-specif), ...5.0193

## Food Supply

- THE STATUS AND POTENTIAL OF AQUACULTURE ...Algal Culture, Aquaculture & Fish-farming, Fish -non-specific, Survey Studies, ...8.0003
- OYSTER FATNESS STUDY ...Aquaculture & Fish-farming, Fats - Lipids & Oils, Growth Rate, Invertebrate Nutrition, Oysters, ...5.0512
- DETERMINATION OF THOSE MARINE SPECIES HAVING THE GREATEST KNOWN POTENTIAL FOR THE COMMERCIAL FISHERY ...Ag Uses of Nat. resource-other, Alginates, Commercial Fishing, Fucus, Phaeophyta (non-specific & Ot), ...5.0098
- FOOD HABITS STUDY OF ORGANISMS OF THE CALIFORNIA CURRENT SYSTEM ...Behavioral Ecology, California, California Current, Pacific Ocean-general, ...5.0044
- CULTURE OF POMPANO IN BRACKISH WATER PONDS ...Aquaculture & Fish-farming, Brackish Water, Louisiana, Pompanos, Scads, Jacks, Stocking of Fish & Shellfish, ...8.0004
- THE DEVELOPMENT OF HATCHERY TECHNIQUES TO AID IN THE PRODUCTION OF ECONOMIC MOLLUSKS ...Aquaculture & Fish-farming, Captive Rearing, Clams, Oysters, Spawning & Nesting Sites, ...5.0483
- INFLUENCE OF UNLIMITED FOOD SUPPLY ON RHYTHMIC ACTIVITY OF BLUEFISH ...Biological Rhythms, Bluefish, Predation, ...5.0122
- FISH POPULATION STUDY ...Chemical Measurements -water, Commercial Fishing, Fish -non-specific, Population Dynamics, Water Temperature-non-specific, ...5.0174
- CHUM SALMON INVESTIGATIONS ...Environmental Ecology, Estuaries, Growth Rate, Life History Studies, Number Or Density, Salmon -coho, chinook, sockeye..., ...5.0007
- INTERRELATIONS OF SMELT WITH NATIVE SPECIES ...Competition, Lake Superior, Life History Studies, Number Or Density, Smelts, ...5.0182
- FEEDING HABITS OF ATLANTIC TUNAS AND NEKTON ECOLOGY ...Atlantic Ocean-general, Plankton (non-specific), Productivity - Food Chain, Tuna, Mackerel, Albacore..., ...5.0204
- RESEARCH ON THE MACROBENTHOS OF THE GREAT LAKES ...Aquatic Ecology, Benthic Fauna, Earthworms, Great Lakes-general, Water Quality-general, ...5.0626
- INPEC BIOLOGICAL OCEANOGRAPHY - (PHYTOPLANKTON AND ZOOPLANKTON RESEARCH) ...Pacific Ocean-north, Phytoplankton, Primary Productivity, Temporal Distribution, Zooplankton, ...5.0843
- 131.116B - LARVAL CULTURE (SHRIMP AQUACULTURE PROGRAM) ...Algal Culture, Aquaculture & Fish-farming, Captive Rearing, Environmental Physiology, Shrimps - Common, ...5.0500
- BIOLOGICAL OCEANOGRAPHY (GULF OCEANOGRAPHY PROGRAM) ...Environmental Ecology, Gulf of Mexico, Productivity - Food Chain, Shrimps - Common, ...5.0838
- FOOD AND EXPERIMENTAL ENVIRONMENTS (SHRIMP AQUACULTURE PROGRAM) ...Aquaculture & Fish-farming, Captive Rearing, Digestive System, Shrimps - Common, Water Environment -other, ...5.0505
- DESIGN AND DEVELOPMENT OF NEKTON SAMPLER ...Nektonic - Swimming, Organism Sampling Devices, Plankton Sampling, Tuna, Mackerel, Albacore..., ...8.0129
- ECOLOGY AND TAXONOMY OF TROPICAL ATLANTIC SCOMBRID EGGS AND LARVAE ...Animal Distr. (non-specific), Animal Taxonomy, Basic Embryology, Life History Studies, Tuna, Mackerel, Albacore..., ...5.0772
- INCREASE EFFICIENCY OF HAWAIIAN SKIPJACK FISHERY ...Captive Rearing, Commercial Fishing, Hawaii, Tuna, Mackerel, Albacore..., ...5.0077
- DETERMINE ALTERNATE LIVEBAIT SPECIES ...Anchovies, Captive Rearing, Commercial Fishing, Hawaii, Tuna, Mackerel, Albacore..., ...5.0080
- PHYSIOLOGY OF MARINE ORGANISMS ...Energy, Environmental Physiology, Fish -non-specific, ...5.0939
- FEEDING BEHAVIOR ...Alewife, menhaden, shad, herring, Anchovies, Behavior, Environmental Physiology, Sensory Organs, ...5.0040
- SCRIPPS TUNA OCEANOGRAPHY RESEARCH PROGRAM ...Pacific Ocean-east, Temperature, Tropic, Tuna, Mackerel, Albacore..., Water Temperature-non-specific, ...5.0200
- EFFECTS OF HIGH TEMPERATURE, LOW OXYGEN, AND PH EXTREMES ON THE SURVIVAL OF AQUATIC INSECTS AND CRUSTACEA IMPORTANT AS TROUT FOOD ...Aquatic Ecology, Gases, Dissolved -water, High Temp. -85F Or Above, Lake Superior, Ph, Acidity -water, ...5.0464

## Legislation

- CREEL CENSUS OF SUMMER FLOUNDER SPORT FISHERY IN GREAT BAY, NEW JERSEY ...Bays, Censusing, Lefteye Flounders, Life History Studies, New Jersey, ...5.0124
- IDENTIFICATION OF WINTER FLOUNDER SUBPOPULATIONS ...Commercial Fishing, Nets, Population Dynamics, Righteye Flounders, Tags, ...5.0100
- SHELLFISH AND BOTTOMFISH DATA ...Commercial Fishing, Crabs, Fish -other, Shrimps - Common, ...5.0357
- COASTAL LOBSTER FISHERY ...Censusing, Commercial Fishing, Lobsters, Massachusetts, ...5.0452
- SHELLFISHERIES ...Censusing, Commercial Fishing, Crustacea -non-specific, Mollusks -non-specific & Other, ...4.0012
- MANAGEMENT OF THE OREGON TRAWL FISHERY ...Censusing, Commercial Fishing, Nets, Oregon, Rockfish, Scoraionfish, ...5.0145
- MANAGEMENT OF OREGON DUNGENESS CRAB RESOURCE ...Commercial Fishing, Crabs, Life History Studies, Oregon, Tags, ...5.0489
- MANAGEMENT OF COLUMBIA RIVER COMMERCIAL FISHERY ...Aquatic Ecology, Columbia River, Commercial Fishing, Salmon -coho, chinook, sockeye..., ...5.0165
- GROUND FISH INVESTIGATIONS (POTENTIAL YIELD OF UNDERUTILIZED GROUND FISH STOCKS) ...Codfishes, Hake, Commercial Fishing, Number Or Density, Rockfish, Scoraionfish, ...5.0171

## Management -other

- LIFE HISTORY STUDY OF THE MOI, POLYDACTYLUS SEXFILIS ...Aquatic Ecology, Fish -other, Life History Studies, Tags, ...5.0257
- SEA SLED AND SCUBA RECONNAISSANCE OF INSHORE AND STUDIES ON EFFECT OF ARTIFICIAL SHELTERS ON STANDING CROP OF FISHES ...Coastlines-shorelines, Diving and Scuba, Fish -non-specific, Geomorphology-topography, Hawaii, ...9.0008
- SILVER SALMON STUDIES IN THE RESURRECTION BAY AREA ...Alaska, Aquatic Ecology, Bays, Environmental Ecology, Salmon -coho, chinook, sockeye..., ...5.0189
- MANAGEMENT INVESTIGATIONS OF TWO SPECIES OF SPINY LOBSTERS PANULIRUS JAPONICUS AND P. PENICILLATUS ...Captive Rearing, Commercial Fishing, Lobsters, Tags, ...5.0422
- LIFE-HISTORY AND BIOLOGICAL WORK IN THE RESTORATION AND MANAGEMENT OD SPECIES OF IMPORTANCE TO THE FISHERIES OF THE VIRGIN ISLANDS ...Commercial Fishing, Diving and Scuba, Life History Studies, Population Dynamics, Virgin Islands, ...5.0149
- STREAM IMPROVEMENT PLANNING ...Benefit-cost Analysis, Engineering Structures-general, Fish -non-specific, Planning, Streams, ...5.0220
- EVALUATION, COORDINATION, AND PLANNING OF PACIFIC SALMON AND STEELHEAD RESEARCH AND MANAGEMENT ACTIVITIES ...Commercial Fishing, Fishery Development -other, Meetings, Rainbow Trout, Steelhead Trout, Salmon -coho, chinook, sockeye..., ...5.0140
- MEASUREMENT OF SPAWNING SUCCESS AND FRY QUALITY OF CHUM SALMON UTILIZING A SPAWNING CHANNEL AT BIG BEEF CREEK, WASHINGTON ...Number Or Density, Quality -non-specific, Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, Washington, ...5.0229
- INVENTORY SURVEYS OF OREGON COASTAL STREAMS ...Oregon, Rainbow Trout, Steelhead Trout, Salmon & Trout -Non-specific, Spawning & Nesting Sites, Streams, ...5.0217

- RACIAL STUDIES OF HERRING ...Alewife, menhaden, shad, herring, Animal Taxonomy, Atlantic Ocean-north, Biochemical Analysis, Blood Typing Studies, ...5.0265
- COLLECTION OF JUVENILE MIGRANTS FROM RIVERS AND STREAMS ...Electric Power Plants, Engineering Structures-general, Fish -non-specific, Migration, Streams, ...5.0513
- ADULT MIGRATION RATES ...Columbia River, Environmental Ecology, Migration, Pre-impoundment Sites, Salmon -coho, chinook, sockeye..., ...5.0173
- LAKE SUPERIOR EXPLORATIONS ...Commercial Fishing, Lake Superior, Nets, Smelts, Suckers, ...5.0107
- TECHNICAL ASSISTANCE AND LIAISON WITH FISHING INDUSTRIES ...Commercial Fishing, Fishing Gear, Mark, Tag Or Capture -other, ...11.0026

- DROPOUT OF SALMON FROM GILL NETS** ...Commercial Fishing, Mortality Rates, Nets, Salmon & Trout - Non-specific, Water Salinity, ...5.0177
- FISH TRANSPORTATION** ...Aquatic Ecology, Migration, Salmon & Trout - Non-specific, Streams, Tags, ...8.0013
- FISH GUIDING** ...Animal Distr. (non-specific), Control Systems, Fish -non-specific, Instrumental Services, Water Environment - other, ...8.0015
- FISHWAY RESEARCH (BONNEVILLE LABORATORY)** ...Behavioral Ecology, Engineering Structures-general, Environmental Ecology, Migration, Salmon & Trout - Non-specific, ...8.0016
- Mark, Tag Or Capture -other**
- LARVAL STUDY OF THE LOBSTER** ...Atlantic Ocean-north, Habitat Studies, Lobsters, Long Island Sound, Maturity & Growth Stages, Plankton Sampling, ...5.0371
- EVALUATE THE RESEARCH TECHNIQUES WHICH WILL BE EMPLOYED TO STUDY THE BASIC LIFE HISTORY OF THE RED CRAB (GERYON QUINQUEDENS)** ...Age, Crabs, Maturity & Growth Stages, Size, ...5.0494
- SAMPLING OF MARKED COHO** ...Censusing, Columbia River, Number Or Density, Salmon -coho, chinook, sockeye..., Stocking of Fish & Shellfish, ...5.0162
- MARKED COHO LIBERATION** ...Captive Rearing, Columbia River, Puget Sound, Salmon -coho, chinook, sockeye..., ...5.0164
- SPRING CHINOOK SALMON ECOLOGY STUDY** ...Aquatic Ecology, Oregon, Physical-general, Productivity (agricultural), Salmon -coho, chinook, sockeye..., Streams, ...5.0218
- DEVELOPMENT OF NEW FISHING TECHNIQUES** ...Commercial Fishing, Diving and Scuba, Fishing Gear, Geomorphology-topography, Photography, Telemetry, ...8.0151
- POTENTIAL OYSTER SETTING CAPACITY - LOCAL AREAS** ...Chesapeake Bay, Commercial Fishing, Oysters, Spawning & Nesting Sites, Streams, ...5.0445
- JUVENILE MIGRATION RATES** ...Columbia River, Migration, Salmon & Trout - Non-specific, Snake River, Water Environment -other, ...5.0223
- MECHANISMS AFFECTING THE VERTICAL AND HORIZONTAL DISTRIBUTION OF TUNAS AND RELATED SPECIES** ...Behavioral Ecology, Environmental Ecology, Tuna, Mackerel, Albacore..., Vertical Distribution, ...5.0087
- SHELLFISH EXPLORATIONS** ...Benthic Fauna, Clams, Commercial Fishing, Population Dynamics, ...5.0514
- TECHNICAL ASSISTANCE AND LIAISON WITH FISHING INDUSTRIES** ...Commercial Fishing, Fishing Gear, Management - other, ...11.0026
- Nets**
- DISTRIBUTION OF THE MID-WATER FISHES OF THE GULF OF CALIFORNIA** ...Environmental Ecology, Fish -non-specific, Gulf of California, Organism Sampling Devices, Vertical Distribution, ...5.0043
- LOCATION OF INSHORE SPAWNING AREAS** ...Bluefish, Long Island Sound, Spawning & Nesting Sites, Water Temperature-non-specific, ...5.0201
- A STUDY OF THE ICHTHYOPLANKTON ASSOCIATED WITH TWO OF NEW JERSEYS COASTAL INLETS** ...Estuaries, Salinity, Thermal, Water Salinity, Water Temperature-non-specific, Zooplankton, ...5.0806
- TRAMMEL NET SAMPLING IN ESTUARINE AREAS** ...Competition, Estuaries, Fish -non-specific, Lakes, Population Dynamics, ...5.0096
- PRELIMINARY STUDY TO DETERMINE ABUNDANCE AND RECRUITMENT OF BOTTOMFISH OFF OREGON** ...Number Or Density, Oregon, Pacific Ocean-general, Righteye Flounders, ...5.0136
- MARINE LABORATORY** ...Fishing Gear, Laboratory Analysis, Louisiana, Organism Sampling Devices, Technique Development, ...11.0024
- THE DETERMINATION OF THE AVAILABILITY OF SEA ROBINS** ...Benthic Fauna, Chesapeake Bay, Fish -other, Vertical Distribution, ...5.0152
- IDENTIFICATION OF WINTER FLOUNDER SUBPOPULATIONS** ...Commercial Fishing, Legislation, Population Dynamics, Righteye Flounders, Tags, ...5.0100
- PRELIMINARY TESTING OF PELAGIC TRAWLS ON SMALL DRAGGERS** ...Barges-towboats, Fishing Gear, Oceanic - Pelagic, ...8.0143
- KVICHAK RIVER TOTAL SMOLT** ...Alaska, Censusing, Fish -non-specific, Migration, Mortality Rates, Population Dynamics, ...5.0002
- PORT SAMPLING - CRESENT CITY, BROOKINGS, PORT ORFORD** ...Crabs, Fish -non-specific, Life History Studies, Shrimps - Common, ...5.0356
- INVESTIGATION OF SPAWNING GROUND POTENTIALS AND GROWTH AND SURVIVAL OF JUVENILE SOCKEYE SALMON IN FRAZER LAKE SYSTEM** ...Alaska, Censusing, Lakes, Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, Tags, ...5.0190
- INVESTIGATION OF ECOLOGICAL FACTORS LIMITING PRODUCTION OF THE ALASKAN PANDALID SHRIMP** ...Alaska, Commercial Fishing, Life History Studies, Shrimps - Common, Vertical Distribution, ...5.0345
- AQUISITION OF A SUITABLE PROTOTYPE FISHING VESSEL AND GEAR** ...American Samoa, Commercial Fishing, Equipment Purchase Operation, Tuna, Mackerel, Albacore..., ...12.0904
- DEVELOPMENT OF UNDER-ICE HORIZONTAL SONAR SCANNING EQUIPMENT AND TECHNIQUES FOR LOCATING FISH SCHOOLS** ...Behavioral Ecology, Commercial Fishing, Fish -non-specific, Lakes, Sonar, ...8.0138
- POTENTIAL FISHERY FOR RIVER HERRINGS IN CONNECTICUT RIVER** ...Alewife, menhaden, shad, herring, Connecticut River, Data Acquisition, Life History Studies, Spawning & Nesting Sites, Survey Studies, ...5.0202
- COPPER RIVER SOCKEYE SALMON INVESTIGATIONS** ...Alaska, Commercial Fishing, Migration, Salmon -coho, chinook, sockeye..., Streams, ...5.0026
- BRISTOL BAY OFFSHORE TEST FISHING PROGRAM** ...Age, Alaska, Bays, Commercial Fishing, Salmon -coho, chinook, sockeye..., ...5.0023
- OPERATIONAL TESTING OF THE PELAGIC TRAWLS ON SMALL DRAGGERS** ...Fishing Gear, ...8.0144
- GEAR EVALUATION** ...American Samoa, Fish -non-specific, Fishing Gear, ...8.0114
- OFFSHORE LOBSTER FISHERY** ...Censusing, Commercial Fishing, Lobsters, Massachusetts, ...5.0453
- WEIR, TRAP AND SEINE FISHERY** ...Censusing, Commercial Fishing, Fishing Gear, Massachusetts, ...4.0010
- COOK INLET CATCH AND ESCAPEMENT AGE AND SEX COMPOSITION STUDIES** ...Age, Alaska, Migration, Salmon -coho, chinook, sockeye..., Sex -non-specific, Spawning & Nesting Sites, ...5.0014
- DESIGN OF SAMPLING PLAN AND PROCUREMENT OF CHARTER VESSEL** ...Commercial Fishing, Continental Shelf, Fish -non-specific, Number Or Density, Vertical Distribution, ...4.0014
- LAKE BORGNO - CHANDELEUR SOUND SYSTEM** ...Data Acquisition, Gulf of Mexico, Maturity & Growth Stages, Plankton Sampling, Population Dynamics, Shrimps - Common, ...5.0434
- INVESTIGATION OF COMMERCIAL FISH POPULATIONS IN WESTERN LAKE SUPERIOR** ...Alewife, menhaden, shad, herring, Commercial Fishing, Lake Superior, Lakes, Population Dynamics, ...5.0113
- MANAGEMENT OF THE OREGON TRAWL FISHERY** ...Censusing, Commercial Fishing, Legislation, Oregon, Rockfish, Scorpionfish, ...5.0145
- UPGRADING CONVENTIONAL FISHING TECHNIQUES** ...Commercial Fishing, Fishing Gear, Pacific Ocean-north, Sonar, Telemetry, ...8.0150
- PELAGIC TRAWL** ...Oceanic - Pelagic, Other-design-and-construction, Special Mission Ships, ...8.0134
- PELAGIC FISH EXPLORATIONS** ...Codfishes, Hake, Commercial Fishing, Fish -other, Vertical Distribution, ...5.0172
- BOTTOMFISH EXPLORATIONS** ...Commercial Fishing, Fish -other, Pacific Ocean-east, Vertical Distribution, ...5.0168
- SAMPLING OF THE ATLANTIC COMMERCIAL CATCH** ...Alewife, menhaden, shad, herring, Atlantic Ocean-general, Commercial Fishing, Number Or Density, ...5.0129
- LAKE ERIE INVESTIGATIONS - LIFE HISTORY AND ABUNDANCE OF THE YELLOW PERC** ...Commercial Fishing, Environmental Ecology, Life History Studies, Population Dynamics, Yellow Perch, Darters, ...5.0134
- FISHES TAKEN INCIDENTAL TO SHRIMP TRAWLING** ...Atlantic Ocean-south, Fish -non-specific, Number Or Density, Shrimps - Common, ...5.0072
- LAKE SUPERIOR EXPLORATIONS** ...Commercial Fishing, Lake Superior, Management -other, Smelts, Suckers, ...5.0107
- FISHING GEAR RESEARCH AND DEVELOPMENT** ...Commercial Fishing, Fishing Gear, Meetings, ...8.0153

## SUBJECT INDEX

## Fish & Wildlife Biology

- EXPLORATION OF LATENT RESOURCES ON THE CONTINENTAL SHELF/SLOPE ...Atlantic Ocean-north, Commercial Fishing, Continental Shelf, Survey Studies, ...5.0102
- TRAWL DESIGN, MATERIALS AND METHODS ...Commercial Fishing, Fishing Gear, ...8.0133
- MARINE BIOLOGICAL INVESTIGATIONS - JAPANESE FISHERY OBSERVERS PROJECT ...Commercial Fishing, Gulf of Alaska, Japan, Righteye Flounders, ...5.0012
- BOTTOMFISH EXPLORATIONS ...Bering Sea, Fish -other, Gulf of Alaska, Vertical Distribution, ...5.0030
- DROPOUT OF SALMON FROM GILL NETS ...Commercial Fishing, Management -other, Mortality Rates, Salmon & Trout - Non-specific, Water Salinity, ...5.0177
- POPULATION DYNAMICS (SHRIMP DYNAMICS PROGRAM) ...Commercial Fishing, Gulf of Mexico, Mortality Rates, Population Dynamics, Shrimps - Common, ...5.0503
- DEVELOP TECHNIQUES FOR CAPTURING JUVENILE TUNAS ...Blood Typing Studies, Population Dynamics, Tuna, Mackerel, Albacore... , Vertical Distribution, ...5.0078
- 149A FISHERY SYSTEMS ANALYSIS ...California, Commercial Fishing, Production & Processing, Simulation, Tuna, Mackerel, Albacore... , ...4.0175
- TUNA PURSE SEINE NET ...Commercial Fishing, Fishing Gear, Tuna, Mackerel, Albacore... , ...8.0119
- DEVELOPMENT OF FISHNET BATHYKMOGRAPH ...Commercial Fishing, Fishing Gear, Instrumental Services, Readout Systems, ...8.0102
- MARINE BIOLOGICAL ASSESSMENT OF POLLUTIONAL FATE ...Contamination - Water, Crustacea -non-specific, Fish -non-specific, Pollution - Effects of , ...6.0176
- Pathology**
- DEVELOPMENT OF TECHNIQUES FOR THE AQUACULTURE OF POMPANO ...Aquaculture & Fish-farming, Environmental Physiology, Florida, Maturity & Growth Stages, Tuna, Mackerel, Albacore... , ...8.0007
- AQUATIC MYXOBACTERIA - CHONDROCOCCUS COLUMNARIS ...Atlantic Salmon, Sebago Salmon, Identification, Myxobacteria, Warm Water, ...5.0848
- MASS MORTALITY OF PACIFIC OYSTERS ALONG THE WASHINGTON COAST ...Bays, Environmental Ecology, Mortality Rates, Oysters, Puget Sound, ...5.0510
- INVESTIGATE THE CAUSE OF MORTALITY OF PACIFIC OYSTERS ALONG THE CALIFORNIA COAST ...California, Environmental Ecology, Mortality Rates, Oysters, Training Grants, Fellowships, ...5.0360
- MASS MORTALITY OF OYSTERS ALONG THE OREGON COAST ...Bays, Invertebrate Pathology, Mortality Rates, Oregon, Oysters, ...5.0488
- STUDIES IN OYSTER PATHOLOGY ...Invertebrate Pathology, Mortality Rates, Oysters, Tissues, ...5.0519
- BIOCHEMISTRY AND PHYSIOLOGICAL ECOLOGY OF POISONED FISH ...Enzymes -non-specific, Fish -non-specific, Metabolism, Muscle, Toxins -non-specific, ...5.0305
- EPIDEMIOLOGY OF SALMON POISONING DISEASE ...Epizootic, Helminths, Infectious Conditions and Dis, Salmon & Trout - Non-specific, Water Salinity, ...5.0306
- OCCURRENCE OF THE PROTOZOAN PARASITE CERATOMYXA IN ADULT PACIFIC SALMON AND STEELHEAD TROUT ...Infectious Conditions and Dis, Protozoa, Protozoa -other, Rainbow Trout, Steelhead Trout, Vertebrate Pathology, ...5.0308
- INFECTIOUS DISEASES OF SALMONID FISHES ...Bacteria (non-specific), Infectious Conditions and Dis, Mode of Transmission, Protozoa -other, Salmon & Trout - Non-specific, ...5.0302
- IMMUNOLOGY AND SEROLOGY OF MARINE ANIMALS ...Agglutination Tests, Biochemical Analysis, Blood Plasma and Serum, Immunology, ...5.0977
- PATHOLOGY - EPIZOOTIOLOGY ...Epizootiology, Mortality Rates, Oysters, Protozoa, Protozoa -other, ...5.0441
- PARASITOLOGY ...Ciliates, Crabs, Oysters, Protozoa, Protozoa -other, ...5.0440
- PACIFIC OYSTER MORTALITY STUDIES ...Invertebrate Pathology, Mortality Rates, Oysters, Pacific Ocean-general, ...5.0442
- EPIDEMIOLOGY OF SALMON POISONING DISEASE ...Flukes, Helminths, Neorickettsiae Helmint, Salmon & Trout - Non-specific, Virulence and Pathogenicity, ...5.0307
- EPIDERMAL PAPILOMAS IN PLEURONECTID FISHES ...Cancer, Papillomas of Animals, Puget Sound, Righteye Flounders, ...5.0314
- EPIZOOTICS IN EXPERIMENTAL MARINE SHELLFISH POPULATIONS ...Epizootic, Freshwater Mussels, Scallops, Mortality Rates, Oysters, ...5.0520
- STUDIES ON THE PROTIST CAUSING MALPEQUE DISEASE ...Invertebrate Pathology, Myxomycetes, Oysters, Plant Taxonomy, Range Or Territorial Distr. , ...5.0498
- STUDIES ON THE DEVELOPMENT OF DERMOCYSTIDIUM MARINUM ...Cell Cycle, Control and Prevention, Dermocystidium, Fungal Culture, Oysters, ...5.0836
- Stocking of Fish & Shellfish**
- INVESTIGATE THE FEASIBILITY OF INTRODUCING SOCKEYE SALMON INTO RESERVOIRS ...Aquatic Ecology, Captive Rearing, Oregon, Reservoirs and Impoundments, Salmon -coho, chinook, sockeye... , ...5.0141
- INTRODUCTION OF MARINE GAME FISHES FROM AREAS IN THE PACIFIC ...Diving and Scuba, Hawaii, Pacific Ocean-north, ...5.0075
- CHARTING OF SUBTIDAL OYSTER BEDS AND EXPERIMENTAL TRANSPLANTING OF SEED OYSTERS FROM POLLUTED SEED OYSTER BEDS ...Captive Rearing, Commercial Fishing, Estuaries, Oysters, South Carolina, ...8.0011
- PURCHASE OF MATERIALS FOR & CONSTRUCTION OF, FLOATS, RACKS, BAGS, AND TRAYS FOR THE SUSPENSION OF VARIOUS TYPES OF CULTCH ...Biological Rhythms, Derivatives, Equipment Purchase Operation, Oysters, Spawning & Nesting Sites, ...8.0008
- STOCKING AND SURVIVAL OF STRIPED BASS FINGERLINGS ...Alabama, Basses -sea, white, White Perch, Commercial Fishing, Maturity & Growth Stages, Streams, ...5.0001
- COPPER RIVER SOCKEYE SALMON INVESTIGATIONS ...Alaska, Aquatic Ecology, Biological Rhythms, Migration, Population Dynamics, Salmon -coho, chinook, sockeye... , ...5.0025
- THE PURCHASE AND INTRODUCTION OF BROOD STOCK ...Low Temp. -but Above 32f, Oysters, Ponds, Spawning & Nesting Sites, Warm Water, ...8.0026
- THE PURCHASE AND INTRODUCTION OF CULTCH MATERIALS ...Developmental Physiology, Oysters, Ponds, Spawning & Nesting Sites, ...8.0009
- SAMPLING OF MARKED COHO ...Pen-using, Columbia River, Mark, Tag Or Capture -other, Number Or Density, Salmon -coho, chinook, sockeye... , ...5.0162
- REPOPULATION OF DECIMATED SECTIONS OF WARM-WATER STREAMS BY LONGEAR SUNFISH, LEPOMIS MEGALOTIS (RAFINESQUE) ...Aquatic Ecology, Population Dynamics, Streams, Sunfish, Rock & Roanoke Bass... , Warm Water, ...5.0097
- CULTURE OF POMPANO IN BRACKISH WATER PONDS ...Aquaculture & Fish-farming, Brackish Water, Food Supply, Louisiana, Pompanos, Scads, Jacks, ...8.0004
- CULTURE OF SHELLFISH IN ARTIFICIAL AND NATURAL SALT PONDS ...Captive Rearing, Growth Rate, Oysters, Ponds, Streams, ...5.0444
- EXPERIMENTAL SEEDING (SHRIMP AQUACULTURE PROGRAM) ...Captive Rearing, Florida, Population Dynamics, Shrimps - Common, Spawning & Nesting Sites, ...5.0501
- Tags**
- SHARK RESEARCH ...Control of Nuisance Species, Fish Repellents, Sharks, Temporal Distribution, ...5.0047
- LIFE HISTORY STUDY OF THE MOI, POLYDACTYLUS SEXFILIS ...Aquatic Ecology, Fish -other, Life History Studies, Management -other, ...5.0257
- TAGGING ENGLISH SOLE, PETRALE SOLE, AND PACIFIC COD ...Codfishes, Hake, Commercial Fishing, Migration, Righteye Flounders, Size, Washington, ...5.0158
- TAG DETECTION ...Commercial Fishing, Number Or Density, Puget Sound, Salmon -coho, chinook, sockeye... , Streams, ...8.0148
- TAG LOSS ...Captive Rearing, Salmon -coho, chinook, sockeye... , Size, Washington, Weight, ...5.0157
- IDENTIFICATION OF WINTER FLOUNDER SUBPOPULATIONS ...Commercial Fishing, Legislation, Nets, Population Dynamics, Righteye Flounders, ...5.0100
- MANAGEMENT INVESTIGATIONS OF TWO SPECIES OF SPINY LOBSTERS PANULIRUS JAPONICUS AND P. PENICILLATUS ...Captive Rearing, Commercial Fishing, Lobsters, Management -other, ...5.0422

## Fish & Wildlife Biology

## SUBJECT INDEX

- DUNGENESS CRAB POPULATION DYNAMICS STUDY ...Alaska, Crabs, Life History Studies, Population Dynamics, ...5.0346
- INVESTIGATION OF SPAWNING GROUND POTENTIALS AND GROWTH AND SURVIVAL OF JUVENILE SOCKEYE SALMON IN FRAZER LAKE SYSTEM ...Alaska, Censusing, Lakes, Nets, Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, ...5.0190
- A STUDY OF THE RATE AND PATTERN OF SHAD MIGRATION IN THE CONNECTICUT RIVER UTILIZING SONIC TRACKING APPARATUS ...Alewife, menhaden, shad, herring, Connecticut River, Migration, Spawning & Nesting Sites, Telemetry, ...5.0046
- IDENTIFICATION OF RED SALMON STOCKS TAKEN IN THE CAPE KUMLIK-ANIACHAK BAY FISHERY (CHIGNIK AREA) ...Alaska, Commercial Fishing, Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, Streams, ...5.0021
- TAG RECOVERY, ENGLISH SOLE, PETRALE SOLE, AND PACIFIC COD ...Codfishes, Hake, Migration, Population Dynamics, Righteye Flounders, Washington, ...5.0159
- TAGGING PROGRAM ...Lobsters, Long Island Sound, Number Or Density, Population Dynamics, Temporal Distribution, ...5.0372
- TAG EXTRACTION ...Salmon -coho, chinook, sockeye..., ...8.0149
- RECOVERY OF MARKED COHO ...Captive Rearing, Data Acquisition, Salmon -coho, chinook, sockeye..., ...5.0163
- TAGGING SALMON IN THE OFFSHORE WATERS OF THE NORTH PACIFIC ...Bering Sea, Gulf of Alaska, Migration, Number Or Density, Range Or Territorial Distr., Salmon & Trout - Non-specific, ...5.0180
- ALBACORE TUNA ...Behavioral Ecology, Environmental Ecology, Life History Studies, Tuna, Mackerel, Albacore..., ...5.0143
- MANAGEMENT OF OREGON DUNGENESS CRAB RESOURCE ...Commercial Fishing, Crabs, Legislation, Life History Studies, Oregon, ...5.0489
- MIGRATORY HABITS OF LARGE SHARKS ...Atlantic Ocean-north, Fishing, Migration, Sharks, ...5.0147
- TRACKING MIGRATIONS OF BLUEFISH POPULATIONS ALONG ATLANTIC COAST TO LEARN BIOLOGY OF THE SPECIES (MIGRATORY HABITS OF BLUEFISH) ...Atlantic Ocean-north, Bluefish, Migration, Population Dynamics, ...5.0120
- TAGGING PROGRAM WITH WOODS HOLE AND INTERNATIONAL GAME FISH ASSOCIATION FOR MARLIN, SAILFISH AND OTHER GAME SPECIES MIGRATION STUDIES ...Marlin, Billfishes, Sailfish..., Migration, Pacific Ocean-general, Population Dynamics, ...5.0036
- TAGGING ...Alewife, menhaden, shad, herring, Migration, Population Dynamics, Telemetry, Vertebrate Anatomy, ...5.0127
- ADULT SALMON BEHAVIOR STUDIES IN RIVERS AND AT DAMS (SONIC TRACKING) ...Behavioral Ecology, Engineering Structures-general, Salmon & Trout - Non-specific, Streams, Telemetry, ...8.0111
- CHARACTERISTICS OF LAKE SUPERIOR WHITEFISH ...Commercial Fishing, Interbiotic Relat.(non-specif), Lake Superior, Life History Studies, Salmon & Trout - Non-specific, ...5.0183
- MIGRATION OF ATLANTIC TUNAS ...Africa, Atlantic Ocean-general, Migration, Tuna, Mackerel, Albacore..., ...5.0064
- OCEAN GROWTH AND MORTALITY OF SALMON ...Growth Rate, Mortality Rates, Salmon -coho, chinook, sockeye..., Scales, ...5.0170
- FISH TRANSPORTATION ...Aquatic Ecology, Management -other, Migration, Salmon & Trout - Non-specific, Streams, ...8.0013
- SURF CLAM BIOLOGY ...Age, Clams, Growth Rate, Life History Studies, Reproductive System, ...5.0449

### Telemetry

- A STUDY OF THE RATE AND PATTERN OF SHAD MIGRATION IN THE CONNECTICUT RIVER UTILIZING SONIC TRACKING APPARATUS ...Alewife, menhaden, shad, herring, Connecticut River, Migration, Spawning & Nesting Sites, Tags, ...5.0046
- UPGRADING CONVENTIONAL FISHING TECHNIQUES ...Commercial Fishing, Fishing Gear, Nets, Pacific Ocean-north, Sonar, ...8.0150
- DEVELOPMENT OF NEW FISHING TECHNIQUES ...Commercial Fishing, Diving and Scuba, Fishing Gear, Geomorphology-topography, Mark, Tag Or Capture -other, Photography, ...8.0151

- TAGGING ...Alewife, menhaden, shad, herring, Migration, Population Dynamics, Tags, Vertebrate Anatomy, ...5.0127
- ADULT SALMON BEHAVIOR STUDIES IN RIVERS AND AT DAMS (SONIC TRACKING) ...Behavioral Ecology, Engineering Structures-general, Salmon & Trout - Non-specific, Streams, Tags, ...8.0111
- ADULT SALMON BEHAVIOR STUDIES IN RIVERS AND AT DAMS %SONIC TRACKING40 ...Columbia River, Construction Land Use Effects, Migration, Pre-impoundment Sites, Salmon & Trout - Non-specific, ...5.0169
- CTFM SONAR ...Behavioral Ecology, Commercial Fishing, Locomotion -animal, Sonar and Echo Sounding, Tuna, Mackerel, Albacore..., ...8.0058

### Land Use Or Modification

#### Agricultural Land Use Effects

- ECOLOGICAL STUDIES OF ATLANTIC AND GULF COASTAL ESTUARIES OF IMPORTANCE TO WATERFOWL ...Atlantic Ocean-general, Construction Land Use Effects, Estuaries, Gulf of Mexico, Habitat Studies, Waterfowl -non-specific, ...5.0896

#### Construction Land Use Effects

- ECOLOGICAL STUDIES OF ATLANTIC AND GULF COASTAL ESTUARIES OF IMPORTANCE TO WATERFOWL ...Agricultural Land Use Effects, Atlantic Ocean-general, Estuaries, Gulf of Mexico, Habitat Studies, Waterfowl -non-specific, ...5.0896

- PRE-CONSTRUCTION ENVIRONMENTAL SURVEY ...Construction Sites, Continental Shelf, Environmental Ecology, Organism Sampling Devices, Reefs, ...5.0907

- ADULT SALMON BEHAVIOR STUDIES IN RIVERS AND AT DAMS %SONIC TRACKING40 ...Columbia River, Migration, Pre-impoundment Sites, Salmon & Trout - Non-specific, Telemetry, ...5.0169

- PROTECTION OF FINGERLING SALMON IN TURBINES ...Engineering Structures-general, Migration, Mortality Rates, Salmon & Trout - Non-specific, Snake River, ...8.0014

#### Industry Land Use Effects

- OPERATION AND MAINTENANCE OF THE OREGON STATE UNIVERSITY SEAFOODS LABORATORY ...Facilities, Fish & Shellfish, Fish -non-specific, Oregon, ...12.0042

### Mammals

#### Captive Rearing

- ECHO RANGING SIGNALS ...Echolocation, Mark, Tag Or Capture -other, Seals, Sonar, Sound Production, ...5.0546

#### Censusing

- WALRUS BIOLOGY AND POPULATION ...Behavioral Ecology, Migration, Population Dynamics, Reproduction Studies (general), Seals, ...5.0523

- ADMINISTRATION OF WHALING ACT, PROTECTED AND NON-COMMERCIAL WHALES ...Growth Rate, Mammals, Migration, Reproduction Studies (general), Vertebrate Anatomy, ...5.0669

#### Food Supply

- ADMINISTRATION OF WHALING ACT, COMMERCIALY UTILIZED WHALES ...Age, Growth Rate, Mammals, Parasitology -other, Reproduction Studies (general), ...5.0668

- FUR SEAL RESEARCH, PELAGIC INVESTIGATIONS ...Behavioral Ecology, Seals, Vertical Distribution, ...5.0667

#### Mammal Studies -other

- SEA LIONS ...Mark, Tag Or Capture -other, Maturity & Growth Stages, Metamorphosis, Seals, Spawning & Nesting Sites, ...5.0526

#### Management -other

- ADMINISTRATION OF WHALING ACT - DEVELOPMENT OF RESEARCH TOOLS ...Age, Mark, Tag Or Capture -other, ...5.0670

#### Mark, Tag Or Capture -other

- SEA LIONS ...Mammal Studies -other, Maturity & Growth Stages, Metamorphosis, Seals, Spawning & Nesting Sites, ...5.0526

- FUR SEAL RESEARCH, POPULATION DYNAMICS ...Age, Growth Rate, Life History Studies, Population Dynamics, Seals, ...5.0671

- ADMINISTRATION OF WHALING ACT - DEVELOPMENT OF RESEARCH TOOLS ...Age, Management -other, ...5.0670

## SUBJECT INDEX

## Fish & Wildlife Biology

ECHO RANGING SIGNALS ...Captive Rearing, Echolocation, Seals, Sonar, Sound Production, ...5.0546

### Stocking of Mammals

SEA OTTER ...Alaska, Metamorphosis, Population Dynamics, Range Or Territorial Distr., Sea Lions, Fur Seals, ...5.0528

### Reptiles

#### Reptile Studies -other

THE ECOLOGY, MIGRATIONS AND BEHAVIOR OF MARINE TURTLES ...Behavioral Ecology, Migration, Spawning & Nesting Sites, Turtles, Terrapins, Tortoises, ...5.0586

### Spawning & Nesting Sites

THE ECOLOGY, MIGRATIONS AND BEHAVIOR OF MARINE TURTLES ...Behavioral Ecology, Migration, Reptile Studies -other, Turtles, Terrapins, Tortoises, ...5.0586

LOCATION OF INSHORE SPAWNING AREAS ...Bluefish, Long Island Sound, Nets, Water Temperature-non-specific, ...5.0201

SEA LIONS ...Mammal Studies -other, Mark, Tag Or Capture -other, Maturity & Growth Stages, Metamorphosis, Seals, ...5.0526

ECOLOGICAL STUDIES OF THE COPPER RIVER DELTA ...Alaska, Censusing, Maps-general, Waterfowl -non-specific, ...5.0855

BREEDING AND MATERNAL BEHAVIOR AMONG THE STELLER SEA LION ...Behavior, Developmental Physiology, Parturition, Seals, ...5.0524

HAIR SEALS ...Age, Dispersion -other, Metamorphosis, Population Dynamics, Seals, ...5.0525

PRE-EMERGENT FRY PINK SALMON FORECAST - SOUTHEASTERN ALASKA ...Alaska, Aquatic Ecology, Censusing, Number Or Density, Salmon -coho, chinook, sockeye..., ...5.0019

KING CRAB SAMPLING GEAR STUDY ...Alaska, Censusing, Crabs, Fishing Gear, Population Dynamics, ...8.0113

INVESTIGATION OF SPAWNING GROUND POTENTIALS AND GROWTH AND SURVIVAL OF JUVENILE SOCKEYE SALMON IN FRAZER LAKE SYSTEM ...Alaska, Censusing, Lakes, Nets, Salmon -coho, chinook, sockeye..., Tags, ...5.0190

LOCATING AND MAPPING THE EXISTING SEED OYSTER BEDS IN DELAWARE BAY ...Aquatic Ecology, Bays, Delaware Bay, Mapping, Oysters, ...5.0381

SURVEY OF A POTENTIAL HARD CLAM FISHERY ...Clams, Commercial Fishing, Coring and Dredging, Estuaries, Georgia, ...5.0420

POTENTIAL FISHERY FOR RIVER HERRINGS IN CONNECTICUT RIVER ...Alewife, menhaden, shad, herring, Connecticut River, Data Acquisition, Life History Studies, Nets, Survey Studies, ...5.0202

PURCHASE OF MATERIALS FOR & CONSTRUCTION OF, FLOATS, RACKS, BAGS, AND TRAYS FOR THE SUSPENSION OF VARIOUS TYPES OF CULTCH ...Biological Rhythms, Derivatives, Equipment Purchase Operation, Oysters, Stocking of Fish & Shellfish, ...8.0008

BIOLOGY OF ANADROMOUS ALOSIDS ...Alewife, menhaden, shad, herring, Mortality Rates, Streams, Tidal Streams, Virginia, ...5.0150

A STUDY OF THE RATE AND PATTERN OF SHAD MIGRATION IN THE CONNECTICUT RIVER UTILIZING SONIC TRACKING APPARATUS ...Alewife, menhaden, shad, herring, Connecticut River, Migration, Tags, Telemetry, ...5.0046

IDENTIFICATION OF RED SALMON STOCKS TAKEN IN THE CAPE KUMLIK-ANIACHAK BAY FISHERY (CHIGNIK AREA) ...Alaska, Commercial Fishing, Salmon -coho, chinook, sockeye..., Streams, Tags, ...5.0021

RESTORATION AND REHABILITATION OF EARTHQUAKE DAMAGED PINK AND CHUM SALMON STUDIES IN PRINCE WILLIAM SOUND ...Alaska, Earthquakes, Flow Characteristics -water, Salmon -coho, chinook, sockeye..., Stream Rehabilitation, Tectonics-general, ...5.0191

MEASUREMENT OF SPAWNING SUCCESS AND FRY QUALITY OF CHUM SALMON UTILIZING A SPAWNING CHANNEL AT BIG BEEF CREEK, WASHINGTON ...Management -other, Number Or Density, Quality -non-specific, Salmon -coho, chinook, sockeye..., Washington, ...5.0229

BIOLOGICAL EVALUATION OF EACH EXISTING SEED OYSTER BED IN DELAWARE BAY ...Delaware Bay, Fouling, Number Or Density, Oysters, ...5.0382

LOCATING AND MAPPING HARD BOTTOM AREAS NEAR EXISTING NATURAL SEED OYSTER BEDS ...Bottom Sampling Device, Oysters, ...4.0052

EVALUATION AND STATISTICAL ANALYSIS OF ALL DATA ...Data Analysis - General, Geomorphology-topography, Mapping, Statistics-general, ...4.0018

THE PURCHASE AND INTRODUCTION OF BROOD STOCK ...Low Temp. -but Above 32f, Oysters, Ponds, Stocking of Fish & Shellfish, Warm Water, ...8.0026

THE PURCHASE AND INTRODUCTION OF CULTCH MATERIALS ...Developmental Physiology, Oysters, Ponds, Stocking of Fish & Shellfish, ...8.0009

CONTINUAL MONITORING OF AREA THROUGHOUT SPAWNING, SETTING, AND GROWING PERIOD ...Monitoring (long Term Studies), Oysters, Ponds, ...5.0910

PRE-EMERGENT FRY PINK SALMON FORECAST (KODIAK, ALASKA) ...Alaska, Maturity & Growth Stages, Number Or Density, Salmon -coho, chinook, sockeye..., Streams, ...5.0017

STUDY OF THE RIVER PHASE OF THE LIFE HISTORIES OF ALOSA PSEUDOHARENGUS AND AESTIVALIS ...Alewife, menhaden, shad, herring, Aquatic Ecology, Connecticut River, Life History Studies, ...5.0245

COOK INLET CATCH AND ESCAPEMENT AGE AND SEX COMPOSITION STUDIES ...Age, Alaska, Migration, Nets, Salmon -coho, chinook, sockeye..., Sex -non-specific, ...5.0014

COOK INLET SMOLT ENUMERATION STUDY ...Aquatic Ecology, Censusing, Productivity (agricultural), Salmon -coho, chinook, sockeye..., ...5.0015

OYSTER SEED PROPAGATION STUDY ...Aquatic Ecology, Bays, Commercial Fishing, Oysters, Pacific Ocean-east, ...8.0012

REPORT DISTRIBUTION ...Commercial Fishing, Fats - Lipids & Oils, Oysters, Periodicals, ...11.0041

WATER QUALITY AS RELATED TO SURVIVAL OF SALMON EGGS AND LARVAE ...Environmental Ecology, Mortality Rates, Reproduction Studies (general), Salmon & Trout - Non-specific, Water Quality-general, ...5.0227

A STUDY OF SELECTED CHEMICAL AND BIOLOGICAL CONDITIONS OF THE LOWER TRINITY RIVER AND THE UPPER TRINITY BAY ...Commercial Fishing, Estuaries, Mans Activities, Pollution - Effects of, Texas, ...5.0926

STUDIES OF SOCKEYE SALMON, ONCORHYNCHUS NERKA, IN THE NUSHAGAK DISTRICT, ALASKA ...Alaska, Commercial Fishing, Interbiotic Relat.(non-specif), Lakes, Population Dynamics, Salmon -coho, chinook, sockeye..., ...5.0228

ECOLOGY OF STORM PETRELS ...Albatrosses, Shearwaters..., California, Islands, Mark, Tag Or Capture -other, Terrestrial Ecology, ...5.0532

EFFECTS OF MARSH MANAGEMENT STRUCTURES UPON FISHES ...Alewife, menhaden, shad, herring, Crabs, Engineering Structures-general, Land Use, Shrimps - Common, Swamps-marshes, ...5.0206

EVALUATION OF ESCAPEMENT OF ADULT SALMON TO OREGON COASTAL STREAMS ...Environmental Ecology, Number Or Density, Oregon, Salmon -coho, chinook, sockeye..., Streams, ...5.0215

THE DEVELOPMENT OF HATCHERY TECHNIQUES TO AID IN THE PRODUCTION OF ECONOMIC MOLLUSKS ...Aquaculture & Fish-farming, Captive Rearing, Clams, Food Supply, Oysters, ...5.0483

INVENTORY SURVEYS OF OREGON COASTAL STREAMS ...Management -other, Oregon, Rainbow Trout, Steelhead Trout, Salmon & Trout - Non-specific, Streams, ...5.0217

THE BIOLOGY OF THE LAYSAN AND BLACK-FOOTED ALBATROSSES ...Age, Albatrosses, Shearwaters..., Animal Distr. (non-specific), Control of Nuisance Species, Mark, Tag Or Capture -other, ...5.0607

ECOLOGICAL FACTORS AFFECTING REPRODUCTION OF SHELLFISH (PHYSIOECOLOGY OF SHELLFISH PROGRAM) ...Animal Distr. (non-specific), Maturity & Growth Stages, New York, Oysters, Reproductive System, ...5.0374

POTENTIAL OYSTER SETTING CAPACITY - LOCAL AREAS ...Chesapeake Bay, Commercial Fishing, Mark, Tag Or Capture -other, Oysters, Streams, ...5.0445

KARLUK LAKE RESEARCH STATION ...Life History Studies, Mortality Rates, Population Dynamics, Productivity (agricultural), Salmon -coho, chinook, sockeye..., ...5.0006

PINK SALMON INVESTIGATIONS - FRESHWATER ECOLOGY ...Aquatic Ecology, Environmental Ecology, Maturity & Growth Stages, Mortality Rates, Salmon -coho, chinook, sockeye..., ...5.0188

## Fish & Wildlife Biology

## SUBJECT INDEX

- PINK SALMON INVESTIGATIONS - INTERTIDAL ECOLOGY ...Alaska, Life History Studies, Salmon -coho, chinook, sockeye..., Tidal Streams, Water Salinity, ...5.0186
- INVESTIGATE SYSTEMATICS AND ECOLOGY OF TUNA LARVAE AND JUVENILES ...Animal Taxonomy, Artificial Insemination, Maturity & Growth Stages, Tuna, Mackerel, Albacore... , ...5.0079
- SALMON PRODUCTION IN AREAS MADE INACCESSIBLE BY DAMS ...Aquatic Ecology, Columbia River, Engineering Structures-general, Environmental Ecology, Salmon & Trout - Non-specific, ...5.0224
- PINK SALMON INVESTIGATIONS - FRESHWATER ECOLOGY ...Alaska, Aquatic Ecology, Salmon -coho, chinook, sockeye..., Streams, Water Properties-general, ...5.0185
- EXPERIMENTAL SEEDING (SHRIMP AQUACULTURE PROGRAM) ...Captive Rearing, Florida, Population Dynamics, Shrimps - Common, Stocking of Fish & Shellfish, ...5.0501
- TELEMETRY STUDIES ON MARINE BIRDS ...Albatrosses, Shearwaters... , Bermuda, Mark, Tag Or Capture -other, Pelicans, Cormorants, darters..., ...5.0531

## Fish Repellents

- SHARK RESEARCH ...Control of Nuisance Species, Sharks, Tags, Temporal Distribution, ...5.0047
- BEHAVIOR AND SENSORY PHYSIOLOGY OF SHARKS ...Auditory, Behavioral Ecology, Sharks, Tape Recording, Audio, Visual Organs, ...5.0253
- STUDIES OF SHARK REPELLENTS AND OTHER ANTI-SHARK MEASURES ...Shark Repellents, Sharks, ...6.0132
- ELASMOBRANCH PHARMACOLOGY ...Drug Evaluation, Mechanism of Action, Sharks, ...6.0119
- MARINE ANIMAL TOXINS ...Mechanism of Action, Sharks, Toxins, ...6.0116

## Fishing Gear

- DESIGN STUDY - AN OPTIMUM FISHING VESSEL FOR THE GEORGES BANK GROUND FISH FISHERY ...Atlantic Ocean-north, Commercial Fishing, Computer Applications, Naval Architecture-general, Other-design-and-construction, ...8.0288
- ESTIMATION OF PARAMETERS OF STRIPED BASS POPULATION AND DESCRIPTION OF THE FISHERY OF LOWER CHESAPEAKE BAY ...Age, Basses -sea, white, White Perch, Censusing, Chesapeake Bay, Population Dynamics, ...5.0151
- STUDY ON THE DISTRIBUTION AND ABUNDANCE OF PINK SHRIMP, PANDALUS JORDANI, IN THE PACIFIC OCEAN OFF OREGON ...Censusing, Life History Studies, Pacific Ocean-general, Population Dynamics, Shrimps - Common, ...5.0487
- MARINE LABORATORY ...Laboratory Analysis, Louisiana, Nets, Organism Sampling Devices, Technique Development, ...11.0024
- PRELIMINARY TESTING OF PELAGIC TRAWLS ON SMALL DRAGGERS ...Barges-towboats, Nets, Oceanic - Pelagic, ...8.0143
- KING CRAB SAMPLING GEAR STUDY ...Alaska, Censusing, Crabs, Population Dynamics, Spawning & Nesting Sites, ...8.0113
- MANAGEMENT OF THE OCEAN SALMON FISHERY WITH EMPHASIS ON THE BARBLESS HOOKS AS A MANAGEMENT TOOL ...Commercial Fishing, Salmon -coho, chinook, sockeye..., ...8.0142
- OPERATIONAL TESTING OF THE PELAGIC TRAWLS ON SMALL DRAGGERS ...Nets, ...8.0144
- FISH POPULATION OFF THE ISLAND OF TUTUILA, AMERICAN SAMOA ...American Samoa, Animal Taxonomy, Commercial Fishing, Fish -non-specific, Number Or Density, ...5.0032
- FISH POPULATIONS OF AMERICAN SAMOA ...American Samoa, Crustacea -non-specific, Fish -non-specific, Number Or Density, ...5.0033
- GEAR EVALUATION ...American Samoa, Fish -non-specific, Nets, ...8.0114
- WEIR, TRAP AND SEINE FISHERY ...Censusing, Commercial Fishing, Massachusetts, Nets, ...4.0010
- FORECAST OF KODIAK ISLAND PINK SALMON RUNS FROM ABUNDANCE OF JUVENILES IN ESTUARIES ...Alaska, Estuaries, Maturity & Growth Stages, Migration, Number Or Density, Salmon -coho, chinook, sockeye..., ...5.0179

- UPGRADING CONVENTIONAL FISHING TECHNIQUES ...Commercial Fishing, Nets, Pacific Ocean-north, Sonar, Telemetry, ...8.0150
- DEVELOPMENT OF NEW FISHING TECHNIQUES ...Commercial Fishing, Diving and Scuba, Geomorphology-topography, Mark, Tag Or Capture -other, Photography, Telemetry, ...8.0151
- BRISTOL BAY ESTUARINE ECOLOGY ...Alaska, Estuaries, Life History Studies, Migration, Oceanic Fronts, Salmon -coho, chinook, sockeye..., ...5.0004
- GREAT LAKES GEAR RESEARCH ...Commercial Fishing, Fish -non-specific, Great Lakes-general, Lakes, Population Dynamics, ...8.0136
- OCEAN ENGINEERING ...Bathymetry, Commercial Fishing, Instrumental Services, Telemetry-other, ...8.0152
- FISHING GEAR RESEARCH AND DEVELOPMENT ...Commercial Fishing, Meetings, Nets, ...8.0153
- MARINE FISH BEHAVIOR ...Behavioral Ecology, Commercial Fishing, Fish -non-specific, ...5.0176
- TECHNICAL ASSISTANCE AND LIAISON WITH FISHING INDUSTRIES ...Commercial Fishing, Management -other, Mark, Tag Or Capture -other, ...11.0026
- TRAWL DESIGN, MATERIALS AND METHODS ...Commercial Fishing, Nets, ...8.0133
- MECHANIZATION OF TRAWL GEAR ...Commercial Fishing, Safety, ...8.0135
- TECHNICAL ASSISTANCE TO INDUSTRY ...Alaska, Commercial Fishing, Diffusion of Information, General Information Services, ...5.0031
- OCEAN ENGINEERING ...Alaska, Commercial Fishing, Design, Machinery, Equipment, Shrimp, ...5.0349
- GREAT LAKES EXPLORATIONS ...Commercial Fishing, Fish -non-specific, Great Lakes-general, Population Dynamics, ...5.0108
- DEVELOP HIGH-SEAS TUNA FISHERY ...Commercial Fishing, Pacific Ocean-general, Tropic, Tuna, Mackerel, Albacore... , ...5.0084
- DEVELOP FISHERIES FOR NON-TUNA RESOURCES ...Commercial Fishing, Hawaii, Pacific Ocean-general, Snappers, ...5.0086
- INCREASE EFFICIENCY OF HAWAIIAN LONGLINE FISHERY ...Commercial Fishing, Fish & Shellfish, Hawaii, Production & Processing, Technique Development, Technological Development, ...11.0022
- NORTHERN SHRIMP EXPLORATIONS ...Atlantic Ocean-north, Censusing, Commercial Fishing, Shrimps - Common, ...5.0457
- TUNA FURSE SEINE NET ...Commercial Fishing, Nets, Tuna, Mackerel, Albacore... , ...8.0119
- DEVELOPMENT OF FISHNET BATHYMOGRAPH ...Commercial Fishing, Instrumental Services, Nets, Readout Systems, ...8.0102

## Flame Research

### Combustion

#### Combustion Products

- COMBUSTION OF RESIDUAL FUEL WITH MASSIVE RECIRCULATION ...Alloys, Atmospheric, Gases, Fuels, ...8.0226
- A PILOT PLANT STUDY OF LOW EXCESS AIR COMBUSTION - ITS EFFECT ON FIRESIDE PROBLEMS IN OIL FIRED BOILERS ...Boilers, Combustion-other, Fuels, Maintenance-system, ...8.0168

#### Combustion-other

- A PILOT PLANT STUDY OF LOW EXCESS AIR COMBUSTION - ITS EFFECT ON FIRESIDE PROBLEMS IN OIL FIRED BOILERS ...Boilers, Combustion Products, Fuels, Maintenance-system, ...8.0168
- UNDERSEA PROPULSION AND POWER SOURCES ...Batteries, Generators, Marine Propulsion, ...8.0158

## Florida

- DEVELOPMENT OF TECHNIQUES FOR THE AQUACULTURE OF POMPANO ...Aquaculture & Fish-farming, Environmental Physiology, Maturity & Growth Stages, Pathology, Tuna, Mackerel, Albacore... , ...8.0007
- AN ECOLOGICAL STUDY OF SOUTH BISCAYNE BAY IN THE VICINITY OF TURKEY POINT ...Applied Ecology,

- Balance of Nature, Bays, Electric Power Plants, Environmental Ecology, Phytoplankton, Thermal Pollution, ...5.0877
- ICHTHYOFAUNA OF THE FLORIDA CURRENT ...Fish -non-specific, Number Or Density, Temporal Distribution, Vertical Distribution, ...5.0066
- ECOLOGICAL STUDIES OF THE SOUTHEASTERN FLORIDA SEA GRASS COMMUNITY - PRIMARY PRODUCTION BY THALASSIA TESTUDINUM KONIG ...Elodea, Waterweed, Thalassia, Primary Productivity, Submerged Plants, Translocation, Tropic, ...5.0695
- ECOLOGICAL STUDY OF CHARLOTTE HARBOR ESTUARY AND SHARK PROGRAM OF MOTE MARINE LAB ...Estuaries, Mans Activities, Sharks, ...5.0884
- FLORIDA CORAL REEF STUDIES ...Drilling and Coring, Environment, Geologic History-general, Quaternary Period, Reefs, ...7.0162
- CURATING OF BLAKE PLATEAU CORES ...Collections, Continental Shelf, Core Analysis, ...12.0025
- STUDIES OF THE TRANSPORT OF THE FLORIDA CURRENT ...British West Indies, Gulf Stream, Navigation, Ocean Currents-other, Water Motion Recorders, ...2.0017
- MARKET RESEARCH STUDIES ON THE EFFECTS OF THE FLORIDA MARKETING PROGRAM ON THE SALE OF FLORIDA SEAFOODS ...Fish -non-specific, Institutional Management, Marketing, Retail, ...6.0018
- DESIGN AND CONSTRUCTION OF BARGE AND CLAM DREDGE FOR SURVEY OF FLORIDA'S COMMERCIAL CLAMS ...Clams, Commercial Fishing, Habitat Studies, Other-design-and-construction, ...8.0284
- THE NET EFFECT OF WIND ON RECREATIONAL TIDAL STREAMS IN FLORIDA ...Air-sea Boundary-other, Estuaries, Tides, Water Level Fluctuation, Wind-general, ...2.0082
- THE BIOLOGY OF THE INFAUNA OF A TROPICAL SOFT BOTTOM AREA ...Aquatic Ecology, Benthic Fauna, Estuaries, Intertidal Areas, Pollution - Effects of, ...5.0879
- PRIMARY PRODUCTION AND DECOMPOSITION IN ESTUARINE WATER ...Estuaries, Methane Bacteria (non-specific), Phaeophyta (non-specific & Ot), Primary Productivity, Rhodophyta (non-specific & Ot), Turnover (metabolic), ...5.0954
- RECENT SEDIMENTATION BY TIDAL AND LONGSHORE CURRENTS ON A CARBONATE BANK IN LOWER FLORIDA KEYS ...Banks, Currents-longshore, Quaternary Period, Sedimentation, Tides, ...7.0253
- COPEPODS PARASITIC ON SHARKS OF THE WEST COAST OF FLORIDA ...Animal Taxonomy, Copepods, Ectoparasites, Sharks, ...5.0391
- REMOTE SENSING, EVERGLADES AREA, FLORIDA ...Computer Applications, Remote Areas, Swamps-marshes, Visible Light, Water Properties-general, ...4.0161
- RELATION OF ENVIRONMENTAL FACTORS TO THE PRODUCTIVITY OF ESTUARINE SEDENTARY FAUNA ...Aquatic Ecology, Environmental Ecology, Estuaries, Productivity - Food Chain, ...5.0959
- EXPERIMENTAL SEEDING (SHRIMP AQUACULTURE PROGRAM) ...Captive Rearing, Population Dynamics, Shrimps - Common, Spawning & Nesting Sites, Stocking of Fish & Shellfish, ...5.0501
- WATER QUALITY AND FUNGI-NEMATODE-SEAGRASS RELATIONSHIPS ...Elodea, Waterweed, Thalassia, Habitat Studies, Marine Fungi (non-specific), Nematoda -other, ...5.0878

**Flow Characteristics -water**

- RESTORATION AND REHABILITATION OF EARTHQUAKE DAMAGED PINK AND CHUM SALMON STUDIES IN PRINCE WILLIAM SOUND ...Alaska, Earthquakes, Salmon -coho, chinook, sockeye..., Spawning & Nesting Sites, Stream Rehabilitation, Tectonics-general, ...5.0191
- EXPERIMENTAL AND THEORETICAL STUDY OF THE HYDRODYNAMICS OF DISPERSION IN RIVERS AND ESTUARIES ...Dispersion -water, Estuaries, Model Studies, Streams, Water Motion, ...2.0057
- HYDRAULICS AND DYNAMICS OF ESTUARIES ...Erosion-general, Estuaries, Sedimentation, Sedimentology-general, Water Level Fluctuation, Waves, ...7.0102
- SALT-WATER ENCROACHMENT IN NORTH CAROLINA ESTUARIES ...Chemical-general, Estuaries, Industrial-general, Saline Water Intrusion, Sampling, ...6.0168
- LAKE HURON CHEMICAL CONTROL ...Bioindicators, Chemical-general, Ectoparasites, Lake Huron, Selectivity, ...6.0159

**Flow Types - Natural Water**

**Artesian Flow**

- HYDROLOGY OF COASTAL AREA IN THE VICINITY OF RICEBORO, GEORGIA ...Aquifers, Dispersion -water, Estuaries, Georgia, Saline Water Intrusion, Water Quality-general, ...9.0007

**Open Channel Flow**

- SALINITY INTRUSION AND RELATED PHENOMENA ...General Deposition, Mixing, Ocean Currents-other, Saline Water Intrusion, Sediment Transport-general, ...2.0061
- NUMERICAL SIMULATION OF HYDRODYNAMIC PHENOMENA BY DIGITAL COMPUTER ...Groundwater, Model Studies, Porous Media - Flow Through, Subsurface Flow, Waves, ...4.0083

**Stratified Flow**

- STUDY OF INFLUENCE OF STRATIFICATION ON CURRENT STRUCTURE ...Circulation-general, Currents-other, Hydrodynamics, Lake Michigan, ...2.0035
- INVESTIGATION OF THE CIRCULATION OF LAKE SUPERIOR ...Circulation-general, Lake Superior, Model Studies, Temperature, Thermodynamics, Water Motion, ...2.0048
- DISPERSION IN HYDROLOGIC AND COASTAL ENVIRONMENTS ...Dispersion -water, Groundwater Movement, Ocean, Shoreline - Coastline, Turbulent Flow, ...2.0051

**Subsurface Flow**

- NUMERICAL SIMULATION OF HYDRODYNAMIC PHENOMENA BY DIGITAL COMPUTER ...Groundwater, Model Studies, Open Channel Flow, Porous Media - Flow Through, Waves, ...4.0083

**Turbulent Flow**

- DYNAMICS OF INTERNAL WAVES AND TURBULENCE IN THE THERMOCLINE ...Density, Salinity, Turbulence, ...2.0093
- OCEAN KINEMATICS DYNAMICS ...Chesapeake Bay, Circulation-general, Data Reduction and Analysis, Estuaries, Water Motion, ...2.0069
- TURBULENT DIFFUSION STUDY ...Chesapeake Bay, Dispersion -water, Estuaries, Tracers-general, Water Motion, ...2.0056
- DISPERSION IN HYDROLOGIC AND COASTAL ENVIRONMENTS ...Dispersion -water, Groundwater Movement, Ocean, Shoreline - Coastline, Stratified Flow, ...2.0051
- INTERCOMPARISON OF TOWING TANK AND WATER TUNNEL CALIBRATION OF CURRENT METERS ...Gaging, Tanks, Water Tunnels Tables, ...8.0074
- SHOALING PROCESSES ...Channels, Sand Bars, Scouring, Sediment Transport-other, Tidewater Areas, ...7.0250

**Unsteady Flow**

- UNSTEADY FLOW AND SALINE INTRUSION IN ESTUARIES ...Channels, Computer Applications, Model Studies, Morphology-general, Saline Water Intrusion, ...2.0066

**Fluid Flow**

**Fluid Flow-other**

- SALT WATER ENTRAINMENT FOR DILUTION IN SEWER OUTFALLS ...Conduit Flow-other, Dispersion -water, Fluid Mixing, Ocean, Outlet, Sewers, Two-phase-other, ...8.0329

**Fluid Mechanics**

**Acoustic Effects**

- DYNAMICAL OCEANOGRAPHY AND GEOPHYSICAL FLUID DYNAMICS ...Circulation-general, Forced Convection, Theoretical Analysis, Thermal, Water Tunnels Tables, ...2.0012

**Aerohydroelasticity**

**Fluid Dynamics**

- AN OPTICAL METHOD OF MEASURING THE FORM OF THE FREE SURFACE OF A FLUID ...Free Surface Waves,

## Fluid Mechanics

## SUBJECT INDEX

Models, Optical, Optical Systems, Watersheds, Waves, ...2.0124

EXPERIMENTAL HYDRODYNAMICS ...Heat and Radiation Transfer, Hydrodynamics, Simulation Theory, Submersibles, Thermocline, ...8.0192

HYDRODYNAMIC EFFECTS OF SUBMERGED BODY ...Air-sea Boundary-general, Model Studies, Theoretical Analysis, Water Tunnels Tables, ...8.0179

### Body Theory

#### Drag

VISCO-ELASTIC DYNAMIC VIBRATION ABSORBER ...Analysis, Close Channel, Energy Dissipators, Hydraulic Equipment, Vibrating Systems-other, Viscous, ...8.0188

AN EXPERIMENTAL INVESTIGATION OF PARTIALLY SHROUDED PROPELLERS ...Control-systems, Lift, Marine Propulsion, Rotors-propellers, ...8.0305

PRELIMINARY CALCULATION OF THE LIFT AND DRAG AND ANGLE OF ATTACK FOR SUBMERGED HYDROFOILS ...Computer Applications, Hydrofoils Crafts, Lift, ...8.0278

MODEL FOR THE PRELIMINARY DESIGN OF SURFACE EFFECT SHIPS ...Computer Applications, Hydrofoils Crafts, Marine Propulsion, Other Models, Ships and Cruises, Waves, ...8.0279

#### Lift

AN EXPERIMENTAL INVESTIGATION OF PARTIALLY SHROUDED PROPELLERS ...Control-systems, Drag, Marine Propulsion, Rotors-propellers, ...8.0305

PRELIMINARY CALCULATION OF THE LIFT AND DRAG AND ANGLE OF ATTACK FOR SUBMERGED HYDROFOILS ...Computer Applications, Drag, Hydrofoils Crafts, ...8.0278

### Boundary Layer

#### Boundary-layer-other

THERMALLY SUSTAINED PRESSURE OSCILLATIONS IN LIQUID HELIUM APPARATUS ...Boiling & Evaporation, Conduction, Engineering Studies-general, Heat-transfer-other, Model Apparatus-other, Pressure Gradient, ...8.0024

#### Laminar - Turbulent

A STUDY OF PROBLEMS RELATED TO WIND-GENERATED WAVES ...Free Surface Waves, Theoretical Analysis, Waves, Wind-water Interaction, ...4.0088

EXPERIMENTAL FLUID DYNAMICS ...Model Studies, Rotating Fluids, Shear-flow, Thermodynamics, Wind-water Interaction, ...3.0021

#### Noise

TURBULENCE STRUCTURE AND NOISE STUDY ...Additives, Turbulent, ...1.0002

#### Non-steady Flow

COMPUTATION OF PERIODIC PROPELLER FORCES IN NON-UNIFORM FLOWS USING A LIFTING SURFACE MODEL ...Dimension-three, Marine Propulsion, Models, Rotors-propellers, Turbulent, ...8.0180

#### Pressure Gradient

THERMALLY SUSTAINED PRESSURE OSCILLATIONS IN LIQUID HELIUM APPARATUS ...Boiling & Evaporation, Boundary-layer-other, Conduction, Engineering Studies-general, Heat-transfer-other, Model Apparatus-other, ...8.0024

DETERMINATION OF FLOW IN AN AXIAL-TO-RADIAL DIFFUSER WITH SWIRL ...Configuration of Body, Impinging Jets, Model Apparatus-other, Rotors-propellers, Static, ...8.0187

### Cavitation

#### Cavity Flow

VARIABLE PRESSURE WATER TUNNEL RESEARCH ...Facilities, Hydrofoils Crafts, Marine Propulsion, Shock-vibration, Sound Field, Water Tunnels Tables, ...8.0183

UNSTEADY TWO-DIMENSIONAL CAVITY FLOWS ...Boundary Problems, Concept, Dimension-two, Model Apparatus-other, Unsteady, ...8.0186

#### Sound Field

VARIABLE PRESSURE WATER TUNNEL RESEARCH ...Cavity Flow, Facilities, Hydrofoils Crafts, Marine Propulsion, Shock-vibration, Water Tunnels Tables, ...8.0183

### Ventilated Cavities

EXPERIMENTAL INVESTIGATION OF VENTILATED CAVITIES ...Facilities, Pulsating, Rotors-propellers, Ventilated Flow, ...8.0185

### Classification of Flow

#### Non Linear

INVESTIGATION OF THE NON-LINEAR CHARACTERISTICS OF FLUID-SUSPENDED VEHICLES ...Dimensionless-parameters-other, Hydrofoils Crafts, Non-linear, Simulation Theory, Stability, ...8.0184

#### Pulsating

EXPERIMENTAL INVESTIGATION OF VENTILATED CAVITIES ...Facilities, Rotors-propellers, Ventilated Cavities, Ventilated Flow, ...8.0185

#### Shear-flow

EXPERIMENTAL FLUID DYNAMICS ...Laminar - Turbulent, Model Studies, Rotating Fluids, Thermodynamics, Wind-water Interaction, ...3.0021

#### Stratified

RESEARCH ON TURBULENT CONVECTION ...Convection, Forced Convection, Laboratory Analysis, Turbulence, Turbulent, ...2.0058

#### Turbulent

TURBULENCE STRUCTURE AND NOISE STUDY ...Additives, Noise, ...1.0002

RESEARCH ON TURBULENT CONVECTION ...Convection, Forced Convection, Laboratory Analysis, Stratified, Turbulence, ...2.0058

COMPUTATION OF PERIODIC PROPELLER FORCES IN NON-UNIFORM FLOWS USING A LIFTING SURFACE MODEL ...Dimension-three, Marine Propulsion, Models, Non-steady Flow, Rotors-propellers, ...8.0180

#### Unsteady

BOTTOM CURRENTS AND THE MOVEMENT OF SEDIMENT ACROSS THE CONTINENTAL SHELF ...Bed Load, Columbia River, Continental Shelf, Puget Sound, Sediment Transport-general, ...2.0047

UNSTEADY TWO-DIMENSIONAL CAVITY FLOWS ...Boundary Problems, Cavity Flow, Concept, Dimension-two, Model Apparatus-other, ...8.0186

#### Viscous

HYDRODYNAMIC FLOW FIELD STUDY ...Programming, Ship Resistance Stability, Wave, ...8.0170

VISCO-ELASTIC DYNAMIC VIBRATION ABSORBER ...Analysis, Close Channel, Drag, Energy Dissipators, Hydraulic Equipment, Vibrating Systems-other, ...8.0188

#### Vortex

VORTEX WAKE SHEDDING OF A HEAVING CIRCULAR CYLINDER ...Configuration of Body, Dimension-two, Reynolds Number, Ship Resistance Stability, Wake, ...8.0191

### Conduit Flow

#### Close Channel

AN ANALYSIS OF THE RESPONSE OF CYLINDRICAL DUCTS TO INTERNAL, ZERO MEAN FLOW, AIR-CARRIED ACOUSTIC EXCITATION ...Acoustic Field, Geometric Configuration, Response, ...8.0181

VISCO-ELASTIC DYNAMIC VIBRATION ABSORBER ...Analysis, Drag, Energy Dissipators, Hydraulic Equipment, Vibrating Systems-other, Viscous, ...8.0188

#### Conduit Flow-other

SALT WATER ENTRAINMENT FOR DILUTION IN SEWER OUTFALLS ...Dispersion -water, Fluid Flow-other, Fluid Mixing, Ocean, Outlet, Sewers, Two-phase-other, ...8.0329

#### Flexible

INVESTIGATION OF HEAT TRANSFER AUGMENTATION THROUGH USE OF INTERNALLY FINNED TUBES ...Convection, Heat Trans Coefficient, Heat Transfer, Rotating Fluids, ...8.0189

### Configuration of Body

DETERMINATION OF FLOW IN AN AXIAL-TO-RADIAL DIFFUSER WITH SWIRL ...Impinging Jets, Model Apparatus-other, Pressure Gradient, Rotors-propellers, Static, ...8.0187

## SUBJECT INDEX

## Fluid Mechanics

VORTEX WAKE SHEDDING OF A HEAVING CIRCULAR CYLINDER ...Dimension-two, Reynolds Number, Ship Resistance Stability, Vortex, Wake, ...8.0191

### Dimensionless-parameters

#### Dimensionless-parameters-other

INVESTIGATION OF THE NON-LINEAR CHARACTERISTICS OF FLUID-SUSPENDED VEHICLES ...Hydrofoils Crafts, Non Linear, Non-linear, Simulation Theory, Stability, ...8.0184

#### Reynolds Number

VORTEX WAKE SHEDDING OF A HEAVING CIRCULAR CYLINDER ...Configuration of Body, Dimension-two, Ship Resistance Stability, Vortex, Wake, ...8.0191

### Environment of Fluids

#### High Pressure

INVESTIGATION OF METHODS TO REDUCE SUCTION AND DISCHARGE LOSSES OF A PERIPHERAL COMPRESSOR ...Compressors, Pumps, Resistance-other, ...8.0131

### Fluid Mixing

SALT WATER ENTRAINMENT FOR DILUTION IN SEWER OUTFALLS ...Conduit Flow-other, Dispersion -water, Fluid Flow-other, Ocean, Outlet, Sewers, Two-phase-other, ...8.0329

### Fluid Properties

#### Velocity

COMPUTER SIMULATION OF THE PROPAGATION OF SURFACE WAVES ...Channel Roughness, Models, Partial, Wave Motion in Fluids-other, Waves, ...4.0082

### Heat Transfer

#### Forced Convection

RESEARCH ON TURBULENT CONVECTION ...Convection, Laboratory Analysis, Stratified, Turbulence, Turbulent, ...2.0058

DYNAMICAL OCEANOGRAPHY AND GEOPHYSICAL FLUID DYNAMICS ...Acoustic Effects, Circulation-general, Theoretical Analysis, Thermal, Water Tunnels Tables, ...2.0012

#### Heat Transf. Coefficient

INVESTIGATION OF HEAT TRANSFER AUGMENTATION THROUGH USE OF INTERNALLY FINNED TUBES ...Convection, Flexible, Heat Transfer, Rotating Fluids, ...8.0189

#### Heat-transfer-other

THERMALLY SUSTAINED PRESSURE OSCILLATIONS IN LIQUID HELIUM APPARATUS ...Boiling & Evaporation, Boundary-layer-other, Conduction, Engineering Studies-general, Model Apparatus-other, Pressure Gradient, ...8.0024

GREAT LAKES RESEARCH - ENERGY TRANSFER AT THE AIR-WATER INTERFACE ...Data Analysis - General, Heat and Radiation Transfer, Lake Michigan, Mass Transfer, Towers, Wind-water Interaction, ...3.0029

### Jet Flow

#### Impinging Jets

DETERMINATION OF FLOW IN AN AXIAL-TO-RADIAL DIFFUSER WITH SWIRL ...Configuration of Body, Model Apparatus-other, Pressure Gradient, Rotors-propellers, Static, ...8.0187

#### Jet Flow-other

OCEANOGRAPHIC FACTORS IN THE FUNCTIONAL DESIGN OF WASTE DISPOSAL SYSTEMS ...Mixing, Nuclear Power, Outlet, Process Design, Sewers, ...8.0325

### Model Apparatus

#### Model Apparatus-other

MODEL STUDIES OF REFRACTION OF SHOALING OCEAN WAVES ...Forecasting-prediction, Model Studies, Shoals, Wave, Waves, ...8.0194

THERMALLY SUSTAINED PRESSURE OSCILLATIONS IN LIQUID HELIUM APPARATUS ...Boiling & Evaporation, Boundary-layer-other, Conduction, Engineering Studies-general, Heat-transfer-other, Pressure Gradient, ...8.0024

UNSTEADY TWO-DIMENSIONAL CAVITY FLOWS ...Boundary Problems, Cavity Flow, Concept, Dimension-two, Unsteady, ...8.0186

DETERMINATION OF FLOW IN AN AXIAL-TO-RADIAL DIFFUSER WITH SWIRL ...Configuration of Body, Impinging Jets, Pressure Gradient, Rotors-propellers, Static, ...8.0187

### Water Tunnels Tables

VARIABLE PRESSURE WATER TUNNEL RESEARCH ...Cavity Flow, Facilities, Hydrofoils Crafts, Marine Propulsion, Shock-vibration, Sound Field, ...8.0183

DYNAMICAL OCEANOGRAPHY AND GEOPHYSICAL FLUID DYNAMICS ...Acoustic Effects, Circulation-general, Forced Convection, Theoretical Analysis, Thermal, ...2.0012

HYDRODYNAMIC EFFECTS OF SUBMERGED BODY ...Air-sea Boundary-general, Fluid Dynamics, Model Studies, Theoretical Analysis, ...8.0179

LOCALIZED SCOUR AROUND PILING SUBJECTED TO FIRST-ORDER STOKIAN WAVES ...Erosion Control, Model Studies, Scouring, Wave Action, Waves in Liquids, ...8.0043

AN ANALYTICAL AND EXPERIMENTAL STUDY OF BED FORMS UNDER WATER WAVES ...Channel Roughness, Friction, Geomorphology-topography, Model Studies, Wave Action, Waves, ...2.0110

MEASUREMENT OF WATER VELOCITY BY OPTICAL METHODS IN THE MIT PROPELLER TUNNEL ...Rotors-propellers, Scattering, Velocimeter, ...8.0182

INTERCOMPARISON OF TOWING TANK AND WATER TUNNEL CALIBRATION OF CURRENT METERS ...Gaging, Tanks, Turbulent Flow, ...8.0074

MICROACOUSTICS ...Acoustical, Reflection, Scattering, Sound Gear, ...1.0043

### Porous Media - Flow Through

NUMERICAL SIMULATION OF HYDRODYNAMIC PHENOMENA BY DIGITAL COMPUTER ...Groundwater, Model Studies, Open Channel Flow, Subsurface Flow, Waves, ...4.0083

### Resistance

#### Resistance-other

INVESTIGATION OF METHODS TO REDUCE SUCTION AND DISCHARGE LOSSES OF A PERIPHERAL COMPRESSOR ...Compressors, High Pressure, Pumps, ...8.0131

#### Wake

VORTEX WAKE SHEDDING OF A HEAVING CIRCULAR CYLINDER ...Configuration of Body, Dimension-two, Reynolds Number, Ship Resistance Stability, Vortex, ...8.0191

#### Wave

HYDRODYNAMIC FLOW FIELD STUDY ...Programming, Ship Resistance Stability, Viscous, ...8.0170

MODEL STUDIES OF REFRACTION OF SHOALING OCEAN WAVES ...Forecasting-prediction, Model Apparatus-other, Model Studies, Shoals, Waves, ...8.0194

### Rotating Fluids

EXPERIMENTAL FLUID DYNAMICS ...Laminar - Turbulent, Model Studies, Shear-flow, Thermodynamics, Wind-water Interaction, ...3.0021

INVESTIGATION OF HEAT TRANSFER AUGMENTATION THROUGH USE OF INTERNALLY FINNED TUBES ...Convection, Flexible, Heat Trans Coefficient, Heat Transfer, ...8.0189

### Separation

#### Separation-flow-other

OIL - WATER SEPARATOR ...Filtration, Oil, ...8.0124

### Surface Phenomena

REALISTIC FREE SURFACE BOUNDARY CONDITIONS IN NUMERICAL HYDRODYNAMICS COMPUTATIONS ...Boundary Problems, Free Surface Waves, ...8.0173

### Transport

#### Diffusion

EDDY DIFFUSION AND BACTERIAL REDUCTION IN WASTE FIELDS ...Bacterial Pollutant Sources, Dispersion - water, Dyes, Mixing, Pollutants - Path of, Sewers, ...6.0137

## Fluid Mechanics

### Mass Transfer

GREAT LAKES RESEARCH - ENERGY TRANSFER AT THE AIR-WATER INTERFACE ...Data Analysis - General, Heat and Radiation Transfer, Heat-transfer-other, Lake Michigan, Towers, Wind-water Interaction, ...3.0029

### Two - Phase Flow

#### Flow of Dispersed Solids

SEDIMENT-FLUID INTERACTIONS ...Geomorphology-topography, Sedimentation, Textures-structures, Wave Action, Waves-internal, ...7.0245

#### Two-phase-other

SALT WATER ENTRAINMENT FOR DILUTION IN SEWER OUTFALLS ...Conduit Flow-other, Dispersion -water, Fluid Flow-other, Fluid Mixing, Ocean, Outlet, Sewers, ...8.0329

### Wave Motion in Fluids

#### Free Surface Waves

A STUDY OF PROBLEMS RELATED TO WIND-GENERATED WAVES ...Laminar - Turbulent, Theoretical Analysis, Waves, Wind-water Interaction, ...4.0088

AN OPTICAL METHOD OF MEASURING THE FORM OF THE FREE SURFACE OF A FLUID ...Fluid Dynamics, Models, Optical, Optical Systems, Watersheds, Waves, ...2.0124

REALISTIC FREE SURFACE BOUNDARY CONDITIONS IN NUMERICAL HYDRODYNAMICS COMPUTATIONS ...Boundary Problems, Surface Phenomena, ...8.0173

#### Wave Motion in Fluids-other

COMPUTER SIMULATION OF THE PROPAGATION OF SURFACE WAVES ...Channel Roughness, Models, Partial, Velocity, Waves, ...4.0082

MECHANICS OF SAND MOVEMENT BY WAVES ...Model Studies, Ocean Waves - Currents, Shoreline Structures, Size, Waves, ...7.0217

#### Waves in Liquids

LOCALIZED SCOUR AROUND PILING SUBJECTED TO FIRST-ORDER STOKIAN WAVES ...Erosion: Control, Model Studies, Scouring, Water Tunnels Tables, Wave Action, ...8.0043

## Flukes

AMINO ACID & PROTEIN METABOLISM IN SCHISTOSOMES ...Amino Acids -non-specific, Helminths, Metabolism, Proteins -non-specific, ...5.0621

NATURAL HISTORY OF SALMON POISONING RICKETT-SIAE ...Helminths, Invertebrates, Neorickettsiae Helminth, Reservoirs, ...5.0842

EPIDEMIOLOGY OF SALMON POISONING DISEASE ...Helminths, Neorickettsiae Helminth, Pathology, Salmon & Trout - Non-specific, Virulence and Pathogenicity, ...5.0307

## Monogenea

THERMAL ACCLIMATION PATTERNS IN PARASITES AND HOSTS ...Adaptation, Host Resistance, Host Specificity, Life History Studies, Water Temperature-non-specific, ...5.0643

## Trematoda -other

TREMATODES OF FISHES OCCURRING ON THE WEST COAST OF NORTH AMERICA. ...Collections, Comparative Physiology, Nearctic, Pacific Ocean-general, ...5.0636

SYSTEMATICS OF DEEP SEA TREMATODES ...Animal Taxonomy, Helminths, Organic Evolution, Vertical Distribution, ...5.0646

SYSTEMATIC STUDIES OF CERTAIN MARINE PARASITIC WORMS ...Animal Taxonomy, Helminths, Life History Studies, Red Worms, Eye Worms, ...5.0541

BLOOD PARASITES OF NORTHWEST FISHES ...Blood Plasma and Serum, Codfishes, Hake, Helminths, Protozoa, Sculpins, ...5.0335

## Fluorescent

FURTHER STUDIES ON A FLUORESCENT COMPOUND IN THE DOGFISH LENS ...Sharks, Visual, Visual Organs, ...5.0271

## SUBJECT INDEX

## Fluoride

SIGNIFICANCE OF FLUORIDE VARIATIONS IN SEA WATER ...Atlantic Ocean-general, Chloride, Element Ratios, Extrusives, Water Analysis-general, ...1.0105

HUMIDITY SENSORS ...Barium, Humidity Instruments, Stability, Transducers, ...8.0083

## Foam, Porous

PASSIVE BUOYANCY SYSTEMS ...Buoyant, Flotational, Engineering Studies-general, Materials Used Undersea, Other-design-and-construction, Submersibles, ...8.0263

## Fog-haze-mist

LOOK-OUT ASSIST DEVICE ...Navigation, Navigation Communication, Radar, Visibility, Warning-systems, ...8.0146

PROJECT FOG DROPS ...Condensation, Fog-mist Dissipation, Monolayers, Surfactants, ...3.0090

VISUAL LANDING AIDS FIELD ...Atmosphere Optical Phenomena, Detectors, Electric Lighting Systems, Infrared Radiation, Lighting, ...4.0086

VISUAL RANGE METERS ...Distance-measuring-device, Guidance, Landing, Meteorological Conditions, Visibility, ...8.0072

AUDITORY DETECTION ...Interference, Spectral Distribution, Spectrum, Wave Analyzer, ...4.0095

MISCELLANEOUS SERVICES FOR FEDERAL AVIATION AGENCY (VISUAL RANGE) ...Air-sea Boundary-general, Distance-measuring-device, Visibility, ...3.0011

## Food Chains, Animal And/or Man

MECHANISMS OF PESTICIDE ACCUMULATION IN AQUATIC ORGANISMS ...Chlorinated Hydrocarbons, Insecticides -non-specific, Pollution Effects, Productivity - Food Chain, ...6.0155

PESTICIDE RESISTANT FISH IN NATURAL ECOSYSTEMS ...Animal Resistance -other, Endrin, Fish, Pollution Effects, Rates, Doses, Concentrations, ...5.0277

## Food Science and Technology

### Cereal & Grains

#### Soybeans

ANTIOXIDANT AND NUTRITIONAL POTENTIAL OF FERMENTED AND UNFERMENTED SOYBEANS IN COMBINATION WITH FISH ...Fermentation, Malting, Fish -non-specific, Food Spoilage Detection, Proteins, Rancidity, ...6.0023

FERMENTED PROTEIN-RICH FOODS ...Fermentation, Malting, Fish -non-specific, Fungal Toxins, Milk, Peanuts, ...6.0055

#### Wheat

RADIOCHEMICAL TECHNIQUES ...Food Spoilage Detection, Mercury, Polonium, Radioactive Isotopes, Smoking, ...6.0008

### Cereal Products

#### Flour

DIMETHYLNITROSAMINE IN CURED, SMOKED WHITE FISH AND FLOUR BLEACHED WITH OXIDES OF NITROGEN ...Ethylene, Fish -other, Fish Protein Concentrate, Nitroso Compounds, Nitrous Oxide, ...6.0007

### Dairy Products

#### Milk

FERMENTED PROTEIN-RICH FOODS ...Fermentation, Malting, Fish -non-specific, Fungal Toxins, Peanuts, Soybeans, ...6.0055

### Eggs

ANALYSIS OF THE DEMAND FOR RED MEAT, POULTRY, EGGS, SEAFOOD, AND MEAT MIXTURES ...Consumer Pref. & Consumption, Fish -non-specific, Meat -non-specific, Price & Value, ...6.0019

**Fats & Oils**

**Animal Fats -non-specific**

EFFECTS OF IONIZING RADIATION ON FOOD LIPIDS  
...Fats, Fish -non-specific, Organoleptic Studies, Radiation,  
...6.0030

**Fats and Oils -other**

CHEMISTRY OF FISH OILS AND THEIR UTILIZATION  
...Fats, Fish & Shellfish, Fish -non-specific, Oilseed Processing  
Technology, ...6.0082

PROCESS ENGINEERING ...Design, Machinery, Equipment,  
Esters, Extraction, Fish Protein Concentrate, Industrial Opera-  
tion, Legal Standards, Natural Occurring, ...6.0080

LIPASE RESISTANT GLYCERIDES ...Fats, Fish -other, Lipids,  
Unsaturated Fats, ...5.1029

**Fish and Shellfish**

**Clams**

THE EVALUATION OF WHOLESOMENESS OF RADIATION  
SUB-STERILIZED FOOD PRODUCTS USING RATS  
...Animal Protein, Laboratory Rat, Quantitative & Qualitative,  
Radiation, Thiaminase, ...6.0031

BACTERIAL INDICATORS OF THE SANITARY QUALITY OF  
DEPURATED HARD CLAMS, MERCENARIA MER-  
CENARIA ...Food Spoilage Detection, Microbiological, Sanita-  
tion, ...6.0056

QUALITY STANDARDS TO DETERMINE RELEASE OF  
SHELLFISH FOR MARKETING PURPOSES ...Legal Stan-  
dards, Microbiological, Sanitation, Shelf Life & Storage,  
...6.0166

EFFECT OF PROCESS ON SHELLFISH ...Processed Product  
Quality, Processing, Sanitation, Shelf Life & Storage, Winter,  
...6.0059

THE RHODE ISLAND HARD CLAM - QUAHAUG - INDUS-  
TRY ...Costs, Fish & Shellfish, Production & Processing, Rhode  
Island, ...5.0493

ORGANISMS RESPONSIBLE FOR TOXICITY OF ALASKAN  
CLAMS ...Alaska, Biological Pollutants -general, Food Spoilage  
Detection, Microbiological, Pollutants-general, ...5.0344

**Crabs**

THE EFFECT OF PROCESSING VARIABLES ON THE QUALI-  
TY OF MEAT FROM THE BLUE CRAB - CALLINECTES  
SAPIDUS ...Food Additives -other, Heat, Organoleptic Studies,  
...6.0061

ECONOMICS OF MARKETING DUNGENES CRAB ...Market-  
ing, Pacific Ocean-north, Price & Value, ...5.0484

THE STORAGE LIFE OF ICED DEEP SEA RED CRABS -  
GERYON QUINQUEDENS ...Iced Cooling and Storage,  
Microbiological, Organoleptic Studies, Shelf Life & Storage,  
...6.0077

PROCESS-INDUCED CHANGES IN CRUSTACEAN MUSCLE  
TISSUE ...Heat, Nucleotides -non-specific, Organoleptic Stu-  
dies, ...5.0350

PROCESSING KING CRAB ...Commercial Fishing, Fish & Shell-  
fish, Fish Meals, Freezing, Organoleptic Studies, ...6.0003

COMPOSITION STUDIES OF FISH AND SHELLFISH AS RE-  
LATED TO STORAGE AND PROCESSING PROBLEMS  
...Fish -other, Freezing, Mackerel, Packaging, Rancidity,  
...6.0046

INCIDENCE OF BACTERIA OF PUBLIC HEALTH SIG-  
NIFICANCE IN FRESH COMMERCIAL SHELLFISH  
...Coliforms (non-specific), Microbiological, Oysters, Radiation,  
Salmonella (non-specific & Ot), Staphylococcus (non-spec.&  
Ot), ...6.0038

BACTERIOLOGICAL SURVEYS FOR MICROBIAL STAN-  
DARDS FOR FOOD ...Escherichia Coli, Food Spoilage Detec-  
tion, Legal Standards, Microbiological, Staphylococcus (non-  
spec.& Ot), ...6.0010

SURVIVAL OF FOOD PATHOGENS IN RADIATION  
PASTEURIZATION SEAFOOD ...Cell. env.(non-specific &  
Ot), Cobalt, Food Bacteria, Radiation, Radiation Sensitivity-  
...6.0063

**Fish -non-specific**

EFFECTS OF INGESTION OF RADIOACTIVE FISH AND THE  
NATURE AND BIOLOGY OF TOXINS IN CERTAIN FISHES  
...Food (epidemiology), Food Chains, Radioactive Isotopes,  
Toxicological and Allergy, ...6.0108

FUNDAMENTAL STUDIES IN THE FLAVOR AND ODOR  
CHEMISTRY OF FISH PRODUCTS ...Enzymes, Food Spoilage

Detection, Microbiological, Organoleptic Studies, Radiation,  
...6.0042

OUTGROWTH OF CLOSTRIDIUM BOTULINUM TYPE E IN  
NONIRRADIATED AND IRRADIATED FISHERY  
PRODUCTS ...Clostridium Botulinum, Food (epidemiology),  
Microbiological, Radiation, Refrigeration, ...6.0081

STABILITY OF FOOD LIPIDS TO IONIZING RADIATION  
...Fats, Radiation, ...6.0029

STUDY OF THE BASIC MICROBIOLOGICAL AND  
BIOCHEMICAL FACTORS IN THE IRRADIATION PRESER-  
VATION OF MARINE PRODUCTS ...Bacteria, Microbiologi-  
cal, Radiation, Refrigeration, Staphylococcus (non-spec.& Ot),  
...6.0085

RADIOPASTEURIZATION OF FISHERY PRODUCTS-OPERA-  
TION AND DEVELOPMENTAL INVESTIGATIONS ...Chemical  
Analysis, Microbiological, Organoleptic Studies, Radiation,  
Shelf Life & Storage, ...6.0033

APPLICATION OF RADIATION PASTEURIZATION  
PROCESSES TO PACIFIC CRAB AND FLOUNDER ...Clos-  
tridium Botulinum, Microbiological, Processing, Radiation, Tox-  
icological and Allergy, ...6.0083

RADIATION PRESERVATION OF FISHERY PRODUCTS  
...Commercial Fishing, Fish & Shellfish, Organoleptic Studies,  
Radiation, Shelf Life & Storage, ...6.0034

PREPARATION OF FISH PROTEIN HYDROLYSATES ...Anal-  
ysis of Foods, Chemical Analysis, Fish Protein Concentrate,  
Heat, Protein, ...6.0066

MARKET RESEARCH STUDIES ON THE EFFECTS OF THE  
FLORIDA MARKETING PROGRAM ON THE SALE OF  
FLORIDA SEAFOODS ...Florida, Institutional Management,  
Marketing, Retail, ...6.0018

DETERMINATION OF THE STRUCTURE & ECONOMIC IM-  
PORTANCE OF THE VARIOUS SEGMENTS OF THE  
SEAFOOD INDUSTRY ...Commercial Fishing, Consumer Pref.  
& Consumption, Fish & Shellfish, Georgia, Production &  
Processing, Regional Economic Impact, Shellfish -non-specific,  
...4.0180

CONSUMER EDUCATION AND MARKET DEVELOPMENT  
...Atlantic Ocean-north, Fish & Shellfish, Northeast, ...6.0032

REGIONAL DEMAND IN THE U.S. AND TRENDS IN THE  
FISHING AND SEAFOOD PROCESSING INDUSTRIES OF  
THE CHESAPEAKE BAY AREA ...Chesapeake Bay, Commer-  
cial Fishing, Consumer Pref. & Consumption, Consumption,  
Fish & Shellfish, Market Structure, ...6.0028

ESTIMATING THE VALUE ADDED TO SEAFOOD  
PRODUCTS LANDED IN GEORGIA AT THE VARIOUS  
STAGES OF THE MARKETING CHANNEL ...Georgia,  
Processing, Quality -non-specific, Shellfish -non-specific,  
...6.0020

ANALYZING THE FACTORS AFFECTING THE DEMAND  
FOR SEAFOOD AND TO PROJECT THIS DEMAND TO FU-  
TURE TIME PERIODS ...Consumer Pref. & Consumption,  
Food Needs and Demand, Trends, projections, ...6.0021

CONSUMER EVALUATION OF FISH PRODUCTS ...Consumer  
Pref. & Consumption, Fish & Shellfish, Organoleptic Studies,  
Smoking, ...6.0004

ANALYSIS OF THE DEMAND FOR RED MEAT, POULTRY,  
EGGS, SEAFOOD, AND MEAT MIXTURES ...Consumer Pref.  
& Consumption, Eggs, Meat -non-specific, Price & Value,  
...6.0019

ANTIOXIDANT AND NUTRITIONAL POTENTIAL OF FER-  
MENTED AND UNFERMENTED SOYBEANS IN COMBINA-  
TION WITH FISH ...Fermentation, Malting, Food Spoilage De-  
tection, Proteins, Rancidity, Soybeans, ...6.0023

ECONOMIC ANALYSIS OF THE MARKET STRUCTURE OF  
THE COMMERCIAL FISHING INDUSTRY IN THE  
NORTHEAST ...Commercial Fishing, Consumer Pref. & Con-  
sumption, Market Structure, Northeast, ...4.0183

BIOCHEMISTRY OF FISH AS RELATED TO HUMAN NUTRI-  
TION ...Amino Acids, Hypoxanthine, Northeast, ...6.0053

BOTULINUM FOOD POISONING IN RELATION TO FISHERY  
PRODUCTS ...Antibiotics, Clostridium Botulinum, Great  
Lakes-general, Microbiological, Repression, ...6.0087

A PROGRAM FOR THE TRAINING OF STAFF MEMBERS  
FROM THE SCHOOL OF FISHERIES OF THE CATHOLIC  
UNIVERSITY OF VALPARAISO CHILE ...Chile, Food  
Processing Industry, Marine Biology, Teaching and Research,  
...5.0181

STUDY OF THIAMINASE IN HAWAII FISH ...Enzymatic, En-  
zyme Inhibitors, Hawaii, Thiaminase, Toxicological and Allergy,  
...5.0260

- EFFECT OF STORAGE ON FISH MUSCLE PROTEINS ...Fish & Shellfish, Food Raw Quality, Muscle Proteins, Organoleptic Studies, Protein, ...6.0062
- NUTRITIVE VALUE OF FISH AND OTHER MARINE PRODUCTS ...Ascorbic Acid, Nutritive Value, Paper Chromatography, Proteins -non-specific, Thiamine, ...6.0054
- LIPID OXIDATION AND ASSOCIATED BIOCHEMICAL CHANGES OCCURRING DURING THE PROCESSING AND STORAGE OF FISHERY PRODUCTS ...Anti-oxidants, Chemical Analysis, Fats, Food Spoilage Detection, Rancidity, ...6.0071
- DEVELOPMENT OF RADIATION STERILIZED FISH ITEMS FOR ARMED FORCES FEEDING ...Anti-oxidants, Chemical Analysis, Consumer Pref. & Consumption, Military Rations, Radiation, ...6.0073
- THE COMPOSITION, NUTRITIVE VALUE AND QUALITY OF FISHERY PRODUCTS WITH SPECIAL EMPHASIS ON LIPID AND ITS INTERACTION ...Anti-oxidants, Fats, Fats - Lipids, Radiation, Unsaturated Fats, ...6.0076
- SURVIVAL MECHANISM OF IRRADIATED BACTERIA IN FOODS ...Aeromonas Sp, Antibiotics, Cell Injury and Autolysis, Mutagens, Radiation, ...6.0069
- STORAGE STABILITY STUDIES ON RADIATION STERILIZED FISH ITEMS ...Carbohydrates, Fats, Freezing, Protein, Radiation, ...6.0074
- OPERATION AND MAINTENANCE OF THE OREGON STATE UNIVERSITY SEAFOODS LABORATORY ...Facilities, Fish & Shellfish, Industry Land Use Effects, Oregon, ...12.0042
- THE STRUCTURE OF DECISION MAKING IN MAJOR MARKETING AGENCIES OF FOOD FISH IN THE N.E. UNITED STATES ...Marketing, Northeast, Price & Value, Production & Processing, Shelf Life & Storage, ...6.0078
- MARKETING EFFICIENCY IN A COOPERATIVE FOOD-FISH PROCESSING PLANT, A CASE STUDY ...Design, Machinery, Equipment, Fish & Shellfish, Freezing, Processing, Shelf Life & Storage, ...6.0079
- DISTRIBUTION OF C. BOTULINUM IN COMMERCIAL SMOKED FISH ...Bacterial Pollutant Sources, Clostridium Botulinum, Food (epidemiology), Microbiological, Smoking, ...5.0337
- CHEMISTRY OF FISH OILS AND THEIR UTILIZATION ...Fats, Fats and Oils -other, Fish & Shellfish, Oilseed Processing Technology, ...6.0082
- BIOCHEMISTRY OF FISH MUSCLE AND QUALITY CHANGES ...Enzymatic, Food Raw Quality, Muscle, Organoleptic Studies, ...5.1035
- PRESERVATION AND DEVELOPMENT OF FOOD PRODUCTS ...Fish & Shellfish, Food Raw Quality, Food Transport -other, Packaging, Processed Product Quality, ...6.0084
- IRRADIATION SERVICES AND STUDIES ...Fish & Shellfish, Instrumental Services, Radiation, ...6.0036
- COMMERCIAL BENEFIT STUDIES ...Commercial Fishing, Fish & Shellfish, ...6.0037
- SHIPBOARD IRRADIATION STUDIES ...Food Raw Quality, Medical Studies, Microbiological, Radiation, Shelf Life & Storage, ...6.0039
- FUNDAMENTAL RADIATION CHEMISTRY RESEARCH ...Antibiotics, Chemical Analysis, Packaging, Radiation, Radiochemical Analysis, ...6.0040
- INVESTIGATION OF FEASIBILITY OF STERILIZING FISH BY RADIATION ...Enzymatic, Inactivation, Organoleptic Studies, Radiation, Shelf Life & Storage, ...6.0041
- PROCESSING AND PRODUCT DEVELOPMENT OF EDIBLE FISH AND SHELLFISH ...Commercial Fishing, Fish & Shellfish, ...6.0047
- PRODUCT/PROCESSING DEVELOPMENT RESEARCH ...Design, Machinery, Equipment, Fish & Shellfish, Freezing, Radiation, Refrigeration, ...5.0988
- GROWTH AND TOXICOGENESIS OF C. BOTULINUM IN FISHERY PRODUCTS ...Antimetabolites -non-specific, Bacterial Exotoxins, Clostridium Botulinum, Growth (non-specific & Ot.), Medical Studies, Microbiological, ...6.0043
- CONTROL OF OXIDATIVE CHANGES IN FRESHWATER FISH ...Chemical Analysis, Freezing, Fresh Water, Organoleptic Studies, Rancidity, ...6.0045
- ELECTROPHORETIC PROFILES FOR THE IDENTIFICATION OF FISH SPECIES ...Disc Electrophoresis, Gel Electrophoresis, Infection, Intoxication & Pois, Legal Standards, ...6.0014
- COMPOSITION OF BREADED FISH PRODUCTS ...Food Preparation, Heat, Legal Standards, ...6.0015
- FERMENTED PROTEIN-RICH FOODS ...Fermentation, Malting, Fungal Toxins, Milk, Peanuts, Soybeans, ...6.0055
- EFFECTS OF IONIZING RADIATION ON FOOD LIPIDS ...Animal Fats -non-specific, Fats, Organoleptic Studies, Radiation, ...6.0030
- ECOLOGY OF CLOSTRIDIUM BOTULINUM TYPE E IN GREEN BAY ...Great Lakes-general, Microbiological, ...5.0850
- ANAEROBIC BACTERIA IN THE MARINE ENVIRONMENT ...Food (epidemiology), Isolation From Nat. environ., Microbiological, ...5.0846
- LOW TEMPERATURE GROWTH OF BACTERIA ON FOODS ...Cryophilic Bacteria, Growth (non-specific & Ot.), Isoenzymes, Microbiological, Refrigeration, Temperature, ...6.0086
- ISOLATION OF ANTI-THIAMINE FACTORS IN HAWAII FISH ...Food Spoilage Detection, Radiation, Thiamine, Thiamine Compounds, Vitamins, ...5.0261
- Fish -other**
- EXPANSION OF CURRENT AND DEVELOPMENT OF ADDITIONAL COMMERCIAL FISHERIES CATCH, PRODUCTION AND GEAR STATISTICS ...Alaska, Censusing, Commercial Fishing, Fish -non-specific, Reliability Theory, ...5.0018
- UTILIZATION OF HAKE, DOGFISH, AND BY-PRODUCTS OF THE FILLET INDUSTRY FOR PROTEIN SUPPLEMENTS ...Anti-oxidants, Chemical and Spices, Fish Protein Concentrate, Heat, Nutritive Value, Supplements, ...6.0067
- UTILIZATION OF LATENT MARINE RESOURCES AND WASTE PRODUCTS ...Fish Meals, Fish Protein Concentrate, Proteins, Proteins and Amino Acids, Salmon & Trout - Non-specific, ...6.0068
- COMPOSITION STUDIES OF FISH AND SHELLFISH AS RELATED TO STORAGE AND PROCESSING PROBLEMS ...Crabs, Freezing, Mackerel, Packaging, Rancidity, ...6.0046
- CONTAINERIZATION OF FISHERY PRODUCTS ...Commercial Fishing, Packaging, Processing, Shrimp, ...6.0049
- EFFECTS OF HANDLING AND PROCESSING PROCEDURES IN POTENTIAL PATHOGENUS ON FISH ...Clostridium Botulinum, Legal Standards, Microbiological, Smoking, Toxicological and Allergy, ...6.0044
- INVESTIGATION OF FOOD PRESERVATION METHODS ...Chemical Analysis, Food Processing -other, Food Spoilage -other, Organoleptic Studies, Physical and Chemical Change, ...6.0016
- DIMETHYLNITROSAMINE IN CURED, SMOKED WHITE FISH AND FLOUR BLEACHED WITH OXIDES OF NITROGEN ...Ethylene, Fish Protein Concentrate, Flour, Nitroso Compounds, Nitrous Oxide, ...6.0007
- LIPASE RESISTANT GLYCERIDES ...Fats, Fats and Oils -other, Lipids, Unsaturated Fats, ...5.1029
- Fish Protein Concentrate**
- RESEARCH AND GRADUATE TRAINING IN FOOD AND DRUGS FROM THE SEA, AND MARINE POLLUTION ...Antimicrobial, Carcinostatic, Chemistry, Pollution Sources-general, Training Grants, Fellowships, ...6.0060
- PREPARATION OF FISH PROTEIN HYDROLYSATES ...Analysis of Foods, Chemical Analysis, Fish -non-specific, Heat, Protein, ...6.0066
- UTILIZATION OF HAKE, DOGFISH, AND BY-PRODUCTS OF THE FILLET INDUSTRY FOR PROTEIN SUPPLEMENTS ...Anti-oxidants, Chemical and Spices, Fish -other, Heat, Nutritive Value, Supplements, ...6.0067
- UTILIZATION OF LATENT MARINE RESOURCES AND WASTE PRODUCTS ...Fish -other, Fish Meals, Proteins, Proteins and Amino Acids, Salmon & Trout - Non-specific, ...6.0068
- UTILIZATION AND PREPARATION OF FISH PROTEIN CONCENTRATE ...Chemical Analysis, Fish & Shellfish, Nutritive Value, Organoleptic Studies, Proteins, ...6.0125
- PROCESS ENGINEERING ...Design, Machinery, Equipment, Esters, Extraction, Fats and Oils -other, Industrial Operation, Legal Standards, Natural Occurring, ...6.0080
- DEVELOPMENT OF MECHANIZATION DEVICE PROTOTYPES ...Design, Machinery, Equipment, Fish Meals, Shrimp, ...6.0051
- DIMETHYLNITROSAMINE IN CURED, SMOKED WHITE FISH AND FLOUR BLEACHED WITH OXIDES OF NITROGEN ...Ethylene, Fish -other, Flour, Nitroso Compounds, Nitrous Oxide, ...6.0007

## SUBJECT INDEX

## Food Science and Technology

- TOXIC IMPURITIES IN MARINE PROTEIN CONCENTRATE**  
...Food Spoilage -other, Infection, Intoxication & Pois, Toxic Substances snon-specific, Toxicological and Allergy, ...6.0009
- Haddock**  
**GROWTH CHARACTERISTICS OF TYPE E CLOSTRIDIUM BOTULINUM IN THE TEMPERATURE RANGE 34 TO 50 F.**  
...Clostridium Botulinum, Food (epidemiology), Microbiological, Radiation, Temperature Control, ...6.0022  
**MARKET STRUCTURE OF COMMERCIAL FISHING INDUSTRY IN THE NORTHEAST** ...Commercial Fishing, Consumption, Market Structure, Northeast, Refrigeration, ...4.0186
- Mackerel**  
**COMPOSITION STUDIES OF FISH AND SHELLFISH AS RELATED TO STORAGE AND PROCESSING PROBLEMS**  
...Crabs, Fish -other, Freezing, Packaging, Rancidity, ...6.0046
- Oysters**  
**INOCULATED PACK STUDIES ON LOW-DOSE IRRADIATED MARINE PRODUCTS - SHRIMP** ...Clostridium Botulinum, Microbiological, Radiation, Shrimp, ...6.0017  
**RADIATION PASTEURIZATION OF SHRIMP AND OYSTERS**  
...Iced Cooling and Storage, Organoleptic Studies, Radiation, Residues in Foods, Shrimp, ...6.0024  
**EVALUATION OF PRESENT AND PROPOSED LAWS REGULATING THE PROCESSING AND PACKING OF OYSTERS**  
...Food Processing -other, Legal Standards, Louisiana, Packaging, ...6.0027  
**OIL CONTAMINATION OF OYSTERS FROM OIL WELL DRILLING MUDS** ...Fluid Properties, Infection, Intoxication & Pois, Oil, Oil and Natural Gas - Sulfur, Organoleptic Studies, ...5.6431  
**CHEMICAL AND MICROBIOLOGICAL APPLICATIONS TO PRODUCT ENGINEERING** ...Design, Machinery, Equipment, Freezing, Iced Cooling and Storage, Microbiological, Shrimp, ...6.0050  
**INCIDENCE OF BACTERIA OF PUBLIC HEALTH SIGNIFICANCE IN FRESH COMMERCIAL SHELLFISH**  
...Coliforms (non-specific), Crabs, Microbiological, Radiation, Salmonella (non-specific & Ot), Staphylococcus (non-spec.& Ot), ...6.0038
- Salmon**  
**CHARACTERISTICS OF CANNED SALMON** ...Legal Standards, Organoleptic Studies, ...6.0013
- Shad**  
**DEVELOPMENT OF NEW HUMAN FOOD PRODUCTS FROM SHAD** ...Fish & Shellfish, Processing, Sausage and Variety Meats, Shelf Life & Storage, Smoking, ...6.0065  
**DEVELOPMENT OF THE SHAD INDUSTRY** ...Fish & Shellfish, ...6.0064
- Shellfish -non-specific**  
**DETERMINATION OF THE STRUCTURE & ECONOMIC IMPORTANCE OF THE VARIOUS SEGMENTS OF THE SEAFOOD INDUSTRY** ...Commercial Fishing, Consumer Pref. & Consumption, Fish & Shellfish, Fish -non-specific, Georgia, Production & Processing, Regional Economic Impact, ...4.0180  
**ESTIMATING THE VALUE ADDED TO SEAFOOD PRODUCTS LANDED IN GEORGIA AT THE VARIOUS STAGES OF THE MARKETING CHANNEL** ...Fish -non-specific, Georgia, Processing, Quality -non-specific, ...6.0020  
**MICROFLORA OF RADIATION PASTEURIZED SEAFOODS**  
...Microbiological, Organoleptic Studies, Radiation, Radiation Sensitivity-, Refrigeration, ...6.0171  
**INVESTIGATE THE EFFECT OF IRRADIATION ON THE MICROBIAL FLORA SURVIVING IRRADIATION PASTEURIZATION OF SEAFOODS** ...Consumer Pref. & Consumption, Food Spoilage Detection, Microbiological, Radiation, Radiation Protectors, ...6.0072  
**LABORATORY SCALE INVESTIGATION INTO THE FEASIBILITY OF RADIOPASTEURIZING FISH PRODUCTS**  
...Chemical Analysis, Microbiological, Organoleptic Studies, Radiation, Shelf Life & Storage, ...6.0035
- Shrimp**  
**INOCULATED PACK STUDIES ON LOW-DOSE IRRADIATED MARINE PRODUCTS - SHRIMP** ...Clostridium Botulinum, Microbiological, Oysters, Radiation, ...6.0017  
**RADIATION PASTEURIZATION OF SHRIMP AND OYSTERS**  
...Iced Cooling and Storage, Organoleptic Studies, Oysters, Radiation, Residues in Foods, ...6.0024
- COMMERCIAL IRRADIATION OF SHELLFISH WITH A PORTABLE SHIPBOARD IRRADIATOR** ...Chemical Analysis, Microbiological, Organoleptic Studies, Radiation, Shelf Life & Storage, ...6.0025  
**CAUSES AND PREVENTION OF UNDESIRABLE CHANGES IN THE QUALITY OF FRESH AND FROZEN GULF SHRIMP IN REFRIGERATED STORAGE** ...Freezing, Radiation, Refrigeration, Shelf Life & Storage, ...6.0026  
**CHEMICAL REACTIONS IN PROCESSED SEAFOODS** ...Enzymatic, Iced Cooling and Storage, Organoleptic Studies, Protein, ...6.0048  
**PROCESSING ALASKA SHRIMP** ...Carotenoid Pigments, Design, Machinery, Equipment, Heat, Organoleptic Studies, Temperature Control, ...6.0002  
**OCEAN ENGINEERING** ...Alaska, Commercial Fishing, Design, Machinery, Equipment, Fishing Gear, ...5.0349  
**CHEMICAL AND MICROBIOLOGICAL APPLICATIONS TO PRODUCT ENGINEERING** ...Design, Machinery, Equipment, Freezing, Iced Cooling and Storage, Microbiological, Oysters, ...6.0050  
**CONTAINERIZATION OF FISHERY PRODUCTS** ...Commercial Fishing, Fish -other, Packaging, Processing, ...6.0049  
**DEVELOPMENT OF MECHANIZATION DEVICE PROTOTYPES** ...Design, Machinery, Equipment, Fish Meals, Fish Protein Concentrate, ...6.0051  
**INVESTIGATION OF DECOMPOSITION IN SHRIMP** ...Ammonium, Food Spoilage Detection, Physical Decomposition, ...6.0011  
**INVESTIGATION OF THE PRESERVATION OF FOODS BY FREEZE DRYING** ...Beef, Food Spoilage Detection, Freeze Drying, Legal Standards, Physical Decomposition, ...6.0012
- Food Additives**  
**Anti-oxidants**  
**LIPID OXIDATION AND ASSOCIATED BIOCHEMICAL CHANGES OCCURRING DURING THE PROCESSING AND STORAGE OF FISHERY PRODUCTS** ...Chemical Analysis, Fats, Fish -non-specific, Food Spoilage Detection, Rancidity, ...6.0071  
**DEVELOPMENT OF RADIATION STERILIZED FISH ITEMS FOR ARMED FORCES FEEDING** ...Chemical Analysis, Consumer Pref. & Consumption, Fish -non-specific, Military Rations, Radiation, ...6.0073  
**THE COMPOSITION, NUTRITIVE VALUE AND QUALITY OF FISHERY PRODUCTS WITH SPECIAL EMPHASIS ON LIPID AND ITS INTERACTION** ...Fats, Fats - Lipids, Fish -non-specific, Radiation, Unsaturated Fats, ...6.0076  
**UTILIZATION OF HAKE, DOGFISH, AND BY-PRODUCTS OF THE FILLET INDUSTRY FOR PROTEIN SUPPLEMENTS**  
...Chemical and Spices, Fish -other, Fish Protein Concentrate, Heat, Nutritive Value, Supplements, ...6.0067
- Food Additives -other**  
**THE EFFECT OF PROCESSING VARIABLES ON THE QUALITY OF MEAT FROM THE BLUE CRAB - CALLINECTES SAPIDUS** ...Crabs, Heat, Organoleptic Studies, ...6.0061  
**DEVELOPMENT OF THE SHAD INDUSTRY** ...Fish & Shellfish, ...6.0064
- Preservatives**  
**SURVIVAL MECHANISM OF IRRADIATED MICROORGANISMS IN FOOD** ...Antibiotics, Cell Injury and Autolysis, Radiation, Radiation Protectors, Salmonella (non-specific & Ot), ...6.0070
- Radiation Protectors**  
**INVESTIGATE THE EFFECT OF IRRADIATION ON THE MICROBIAL FLORA SURVIVING IRRADIATION PASTEURIZATION OF SEAFOODS** ...Consumer Pref. & Consumption, Food Spoilage Detection, Microbiological, Radiation, Shellfish -non-specific, ...6.0072  
**SURVIVAL MECHANISM OF IRRADIATED MICROORGANISMS IN FOOD** ...Antibiotics, Cell Injury and Autolysis, Preservatives, Radiation, Salmonella (non-specific & Ot), ...6.0070
- Food Chemistry**  
**Amino Acids**  
**BIOCHEMISTRY OF FISH AS RELATED TO HUMAN NUTRITION** ...Hypoxanthine, Northeast, ...6.0053

**Carbohydrates**

STORAGE STABILITY STUDIES ON RADIATION STERILIZED FISH ITEMS ...Fats, Fish -non-specific, Freezing, Protein, Radiation, ...6.0074

**Enzymes**

FUNDAMENTAL STUDIES IN THE FLAVOR AND ODOR CHEMISTRY OF FISH PRODUCTS ...Fish -non-specific, Food Spoilage Detection, Microbiological, Organoleptic Studies, Radiation, ...6.0042

**Fats**

STABILITY OF FOOD LIPIDS TO IONIZING RADIATION ...Radiation, ...6.0029

LIPID OXIDATION AND ASSOCIATED BIOCHEMICAL CHANGES OCCURRING DURING THE PROCESSING AND STORAGE OF FISHERY PRODUCTS ...Anti-oxidants, Chemical Analysis, Fish -non-specific, Food Spoilage Detection, Rancidity, ...6.0071

THE COMPOSITION, NUTRITIVE VALUE AND QUALITY OF FISHERY PRODUCTS WITH SPECIAL EMPHASIS ON LIPID AND ITS INTERACTION ...Anti-oxidants, Fats - Lipids, Fish -non-specific, Radiation, Unsaturated Fats, ...6.0076

STORAGE STABILITY STUDIES ON RADIATION STERILIZED FISH ITEMS ...Carbohydrates, Fish -non-specific, Freezing, Protein, Radiation, ...6.0074

CHEMISTRY OF FISH OILS AND THEIR UTILIZATION ...Fats and Oils -other, Fish & Shellfish, Fish -non-specific, Oilseed Processing Technology, ...6.0082

EFFECTS OF IONIZING RADIATION ON FOOD LIPIDS ...Animal Fats -non-specific, Fish -non-specific, Organoleptic Studies, Radiation, ...6.0030

**Physical and Chemical Change**

INVESTIGATION OF FOOD PRESERVATION METHODS ...Chemical Analysis, Fish -other, Food Processing -other, Food Spoilage -other, Organoleptic Studies, ...6.0016

**Protein**

PREPARATION OF FISH PROTEIN HYDROLYSATES ...Analysis of Foods, Chemical Analysis, Fish -non-specific, Fish Protein Concentrate, Heat, ...6.0066

EFFECT OF STORAGE ON FISH MUSCLE PROTEINS ...Fish & Shellfish, Fish -non-specific, Food Raw Quality, Muscle Proteins, Organoleptic Studies, ...6.0062

STORAGE STABILITY STUDIES ON RADIATION STERILIZED FISH ITEMS ...Carbohydrates, Fats, Fish -non-specific, Freezing, Radiation, ...6.0074

CHEMICAL REACTIONS IN PROCESSED SEAFOODS ...Enzymatic, Iced Cooling and Storage, Organoleptic Studies, Shrimp, ...6.0048

**Vitamins**

ISOLATION OF ANTI-THIAMINE FACTORS IN HAWAII FISH ...Fish -non-specific, Food Spoilage Detection, Radiation, Thiamine, Thiamine Compounds, ...5.0261

**Food Engineering & Technology****Design, Machinery, Equipment**

MARKETING EFFICIENCY IN A COOPERATIVE FOOD-FISH PROCESSING PLANT, A CASE STUDY ...Fish & Shellfish, Fish -non-specific, Freezing, Processing, Shelf Life & Storage, ...6.0079

PROCESS ENGINEERING ...Esters, Extraction, Fats and Oils -other, Fish Protein Concentrate, Industrial Operation, Legal Standards, Natural Occurring, ...6.0080

PROCESSING ALASKA SHRIMP ...Carotenoid Pigments, Heat, Organoleptic Studies, Shrimp, Temperature Control, ...6.0002

OCEAN ENGINEERING ...Alaska, Commercial Fishing, Fishing Gear, Shrimp, ...5.0349

CHEMICAL AND MICROBIOLOGICAL APPLICATIONS TO PRODUCT ENGINEERING ...Freezing, Iced Cooling and Storage, Microbiological, Oysters, Shrimp, ...6.0050

DEVELOPMENT OF MECHANIZATION DEVICE PROTOTYPES ...Fish Meals, Fish Protein Concentrate, Shrimp, ...6.0051

PRODUCT/PROCESSING DEVELOPMENT RESEARCH ...Fish & Shellfish, Fish -non-specific, Freezing, Radiation, Refrigeration, ...5.0988

**Packaging**

EVALUATION OF PRESENT AND PROPOSED LAWS REGULATING THE PROCESSING AND PACKING OF OYSTERS ...Food Processing -other, Legal Standards, Louisiana, Oysters, ...6.0027

PRESERVATION AND DEVELOPMENT OF FOOD PRODUCTS ...Fish & Shellfish, Fish -non-specific, Food Raw Quality, Food Transport -other, Processed Product Quality, ...6.0084

COMPOSITION STUDIES OF FISH AND SHELLFISH AS RELATED TO STORAGE AND PROCESSING PROBLEMS ...Crabs, Fish -other, Freezing, Mackerel, Rancidity, ...6.0046

FUNDAMENTAL RADIATION CHEMISTRY RESEARCH ...Antibiotics, Chemical Analysis, Fish -non-specific, Radiation, Radiochemical Analysis, ...6.0040

CONTAINERIZATION OF FISHERY PRODUCTS ...Commercial Fishing, Fish -other, Processing, Shrimp, ...6.0049

PROCESSING AND PRODUCT DEVELOPMENT OF EDIBLE FISH AND SHELLFISH ...Commercial Fishing, Fish & Shellfish, ...6.0047

**Food Needs and Demand**

ANALYZING THE FACTORS AFFECTING THE DEMAND FOR SEAFOOD AND TO PROJECT THIS DEMAND TO FUTURE TIME PERIODS ...Consumer Pref. & Consumption, Fish -non-specific, Trends, projections, ...6.0021

**Infection, Intoxication & Pois**

OIL CONTAMINATION OF OYSTERS FROM OIL WELL DRILLING MUDS ...Fluid Properties, Oil, Oil and Natural Gas - Sulfur, Organoleptic Studies, Oysters, ...5.0431

TOXIC IMPURITIES IN MARINE PROTEIN CONCENTRATE ...Fish Protein Concentrate, Food Spoilage -other, Toxic Substances -non-specific, Toxicological and Allergy, ...6.0009

ELECTROPHORETIC PROFILES FOR THE IDENTIFICATION OF FISH SPECIES ...Disc Electrophoresis, Fish -non-specific, Gel Electrophoresis, Legal Standards, ...6.0014

PROGRAM PROJECT - FOOD MICROBIOLOGY ...Clostridia (non-specific & Ot), Food (epidemiology), Microbiological, Salmonella (non-specific & Ot), Toxicological and Allergy, ...6.0005

**Meats and Meat Product****Beef**

INVESTIGATION OF THE PRESERVATION OF FOODS BY FREEZE DRYING ...Food Spoilage Detection, Freeze Drying, Legal Standards, Physical Decomposition, Shrimp, ...6.0012

**Meat -non-specific**

ANALYSIS OF THE DEMAND FOR RED MEAT, POULTRY, EGGS, SEAFOOD, AND MEAT MIXTURES ...Consumer Pref. & Consumption, Eggs, Fish -non-specific, Price & Value, ...6.0019

**Sausage and Variety Meats**

DEVELOPMENT OF NEW HUMAN FOOD PRODUCTS FROM SHAD ...Fish & Shellfish, Processing, Shad, Shelf Life & Storage, Smoking, ...6.0065

**Military Rations**

DEVELOPMENT OF RADIATION STERILIZED FISH ITEMS FOR ARMED FORCES FEEDING ...Anti-oxidants, Chemical Analysis, Consumer Pref. & Consumption, Fish -non-specific, Radiation, ...6.0073

**Nuts & Nutmeats****Peanuts**

FERMENTED PROTEIN-RICH FOODS ...Fermentation, Malting, Fish -non-specific, Fungal Toxins, Milk, Soybeans, ...6.0055

**Processing & Preservation****Antibiotics**

BOTULINUM FOOD POISONING IN RELATION TO FISHERY PRODUCTS ...Clostridium Botulinum, Fish -non-specific, Great Lakes-general, Microbiological, Repression, ...6.0087

SURVIVAL MECHANISM OF IRRADIATED BACTERIA IN FOODS ...Achromobacter Sp, Cell Injury and Autolysis, Fish -non-specific, Mutagens, Radiation, ...6.0069

- FUNDAMENTAL RADIATION CHEMISTRY RESEARCH ...Chemical Analysis, Fish -non-specific, Packaging, Radiation, Radiochemical Analysis, ...6.0040
- SURVIVAL MECHANISM OF IRRADIATED MICROORGANISMS IN FOOD ...Cell Injury and Autolysis, Preservatives, Radiation, Radiation Protectors, Salmonella (non-specific & Ot), ...6.0070
- Chemical and Spices**
- UTILIZATION OF HAKE, DOGFISH, AND BY-PRODUCTS OF THE FILLET INDUSTRY FOR PROTEIN SUPPLEMENTS ...Anti-oxidants, Fish -other, Fish Protein Concentrate, Heat, Nutritive Value, Supplements, ...6.0067
- Fermentation, Malting**
- ANTIOXIDANT AND NUTRITIONAL POTENTIAL OF FERMENTED AND UNFERMENTED SOYBEANS IN COMBINATION WITH FISH ...Fish -non-specific, Food Spoilage Detection, Proteins, Rancidity, Soybeans, ...6.0023
- FERMENTED PROTEIN-RICH FOODS ...Fish -non-specific, Fungal Toxins, Milk, Peanuts, Soybeans, ...6.0055
- Food Processing -other**
- EVALUATION OF PRESENT AND PROPOSED LAWS REGULATING THE PROCESSING AND PACKING OF OYSTERS ...Legal Standards, Louisiana, Oysters, Packaging, ...6.0027
- VITAMIN K5 AS A FOOD PRESERVATIVE ...Food Bacteria, Microbiological, Repression, Vitamin K, ...6.0075
- DEVELOPMENT OF THE SHAD INDUSTRY ...Fish & Shellfish, ...6.0064
- INVESTIGATION OF FOOD PRESERVATION METHODS ...Chemical Analysis, Fish -other, Food Spoilage -other, Organoleptic Studies, Physical and Chemical Change, ...6.0016
- Freeze Drying**
- INVESTIGATION OF THE PRESERVATION OF FOODS BY FREEZE DRYING ...Beef, Food Spoilage Detection, Legal Standards, Physical Decomposition, Shrimp, ...6.0012
- Freezing**
- CAUSES AND PREVENTION OF UNDESIRABLE CHANGES IN THE QUALITY OF FRESH AND FROZEN GULF SHRIMP IN REFRIGERATED STORAGE ...Radiation, Refrigeration, Shelf Life & Storage, Shrimp, ...6.0026
- STORAGE STABILITY STUDIES ON RADIATION STERILIZED FISH ITEMS ...Carbohydrates, Fats, Fish -non-specific, Protein, Radiation, ...6.0074
- MARKETING EFFICIENCY IN A COOPERATIVE FOOD-FISH PROCESSING PLANT, A CASE STUDY ...Design, Machinery, Equipment, Fish & Shellfish, Fish -non-specific, Processing, Shelf Life & Storage, ...6.0079
- PROCESSING KING CRAB ...Commercial Fishing, Crabs, Fish & Shellfish, Fish Meals, Organoleptic Studies, ...6.0003
- CHEMICAL AND MICROBIOLOGICAL APPLICATIONS TO PRODUCT ENGINEERING ...Design, Machinery, Equipment, Iced Cooling and Storage, Microbiological, Oysters, Shrimp, ...6.0050
- COMPOSITION STUDIES OF FISH AND SHELLFISH AS RELATED TO STORAGE AND PROCESSING PROBLEMS ...Crabs, Fish -other, Mackerel, Packaging, Rancidity, ...6.0046
- PRODUCT/PROCESSING DEVELOPMENT RESEARCH ...Design, Machinery, Equipment, Fish & Shellfish, Fish -non-specific, Radiation, Refrigeration, ...5.0988
- CONTROL OF OXIDATIVE CHANGES IN FRESHWATER FISH ...Chemical Analysis, Fish -non-specific, Fresh Water, Organoleptic Studies, Rancidity, ...6.0045
- Heat**
- PREPARATION OF FISH PROTEIN HYDROLYSATES ...Analysis of Foods, Chemical Analysis, Fish -non-specific, Fish Protein Concentrate, Protein, ...6.0066
- THE EFFECT OF PROCESSING VARIABLES ON THE QUALITY OF MEAT FROM THE BLUE CRAB - CALLINectes SAPIDUS ...Crabs, Food Additives -other, Organoleptic Studies, ...6.0061
- UTILIZATION OF HAKE, DOGFISH, AND BY-PRODUCTS OF THE FILLET INDUSTRY FOR PROTEIN SUPPLEMENTS ...Anti-oxidants, Chemical and Spices, Fish -other, Fish Protein Concentrate, Nutritive Value, Supplements, ...6.0067
- PROCESSING ALASKA SHRIMP ...Carotenoid Pigments, Design, Machinery, Equipment, Organoleptic Studies, Shrimp, Temperature Control, ...6.0002
- PROCESS-INDUCED CHANGES IN CRUSTACEAN MUSCLE TISSUE ...Crabs, Nucleotides -non-specific, Organoleptic Studies, ...5.0350
- COMPOSITION OF BREADED FISH PRODUCTS ...Fish -non-specific, Food Preparation, Legal Standards, ...6.0015
- Iced Cooling and Storage**
- RADIATION PASTEURIZATION OF SHRIMP AND OYSTERS ...Organoleptic Studies, Oysters, Radiation, Residues in Foods, Shrimp, ...6.0024
- THE STORAGE LIFE OF ICED DEEP SEA RED CRABS - GERYON QUINQUEDENS ...Crabs, Microbiological, Organoleptic Studies, Shelf Life & Storage, ...6.0077
- CHEMICAL REACTIONS IN PROCESSED SEAFOODS ...Enzymatic, Organoleptic Studies, Protein, Shrimp, ...6.0048
- CHEMICAL AND MICROBIOLOGICAL APPLICATIONS TO PRODUCT ENGINEERING ...Design, Machinery, Equipment, Freezing, Microbiological, Oysters, Shrimp, ...6.0050
- Oilseed Processing Technology**
- CHEMISTRY OF FISH OILS AND THEIR UTILIZATION ...Fats, Fats and Oils -other, Fish & Shellfish, Fish -non-specific, ...6.0082
- Radiation**
- FUNDAMENTAL STUDIES IN THE FLAVOR AND ODOR CHEMISTRY OF FISH PRODUCTS ...Enzymes, Fish -non-specific, Food Spoilage Detection, Microbiological, Organoleptic Studies, ...6.0042
- OUTGROWTH OF CLOSTRIDIUM BOTULINUM TYPE E IN NONIRRADIATED AND IRRADIATED FISHERY PRODUCTS ...Clostridium Botulinum, Fish -non-specific, Food (epidemiology), Microbiological, Refrigeration, ...6.0081
- THE EVALUATION OF WHOLESOMENESS OF RADIATION SUB-STERILIZED FOOD PRODUCTS USING RATS ...Animal Protein, Clams, Laboratory Rat, Quantitative & Qualitative, Thiaminase, ...6.0031
- GROWTH CHARACTERISTICS OF TYPE E CLOSTRIDIUM BOTULINUM IN THE TEMPERATURE RANGE 34 TO 50 F. ...Clostridium Botulinum, Food (epidemiology), Haddock, Microbiological, Temperature Control, ...6.0022
- STABILITY OF FOOD LIPIDS TO IONIZING RADIATION ...Fats, ...6.0029
- STUDY OF THE BASIC MICROBIOLOGICAL AND BIOCHEMICAL FACTORS IN THE IRRADIATION PRESERVATION OF MARINE PRODUCTS ...Bacteria, Fish -non-specific, Microbiological, Refrigeration, Staphylococcus (non-spec. & Ot), ...6.0085
- INOCULATED PACK STUDIES ON LOW-DOSE IRRADIATED MARINE PRODUCTS - SHRIMP ...Clostridium Botulinum, Microbiological, Oysters, Shrimp, ...6.0017
- RADIOPASTEURIZATION OF FISHERY PRODUCTS-OPERATION AND DEVELOPMENTAL INVESTIGATIONS ...Chemical Analysis, Fish -non-specific, Microbiological, Organoleptic Studies, Shelf Life & Storage, ...6.0033
- RADIATION PASTEURIZATION OF SHRIMP AND OYSTERS ...Iced Cooling and Storage, Organoleptic Studies, Oysters, Residues in Foods, Shrimp, ...6.0024
- COMMERCIAL IRRADIATION OF SHELLFISH WITH A PORTABLE SHIPBOARD IRRADIATOR ...Chemical Analysis, Microbiological, Organoleptic Studies, Shelf Life & Storage, Shrimp, ...6.0025
- APPLICATION OF RADIATION PASTEURIZATION PROCESSES TO PACIFIC CRAB AND FLOUNDER ...Clostridium Botulinum, Fish -non-specific, Microbiological, Processing, Toxicological and Allergy, ...6.0083
- RADIATION PRESERVATION OF FISHERY PRODUCTS ...Commercial Fishing, Fish & Shellfish, Fish -non-specific, Organoleptic Studies, Shelf Life & Storage, ...6.0034
- CAUSES AND PREVENTION OF UNDESIRABLE CHANGES IN THE QUALITY OF FRESH AND FROZEN GULF SHRIMP IN REFRIGERATED STORAGE ...Freezing, Refrigeration, Shelf Life & Storage, Shrimp, ...6.0026
- MICROFLORA OF RADIATION PASTEURIZED SEAFOODS ...Microbiological, Organoleptic Studies, Radiation Sensitivity-, Refrigeration, Shellfish -non-specific, ...6.0171
- INVESTIGATE THE EFFECT OF IRRADIATION ON THE MICROBIAL FLORA SURVIVING IRRADIATION PASTEURIZATION OF SEAFOODS ...Consumer Pref. & Consumption, Food Spoilage Detection, Microbiological, Radiation Protectors, Shellfish -non-specific, ...6.0072

DEVELOPMENT OF RADIATION STERILIZED FISH ITEMS FOR ARMED FORCES FEEDING ...Anti-oxidants, Chemical Analysis, Consumer Pref. & Consumption, Fish -non-specific, Military Rations, .. 6.0073

THE COMPOSITION, NUTRITIVE VALUE AND QUALITY OF FISHERY PRODUCTS WITH SPECIAL EMPHASIS ON LIPID AND ITS INTERACTION ...Anti-oxidants, Fats, Fats -Lipids, Fish -non-specific, Unsaturated Fats, ...6.0076

SURVIVAL MECHANISM OF IRRADIATED BACTERIA IN FOODS ...Achromobacter Sp, Antibiotics, Cell Injury and Autolysis, Fish -non-specific, Mutagens, ...6.0069

STORAGE STABILITY STUDIES ON RADIATION STERILIZED FISH ITEMS ...Carbohydrates, Fats, Fish -non-specific, Freezing, Protein, ...6.0074

LABORATORY SCALE INVESTIGATION INTO THE FEASIBILITY OF RADIOPASTEURIZING FISH PRODUCTS ...Chemical Analysis, Microbiological, Organoleptic Studies, Shelf Life & Storage, Shellfish -non-specific, ...6.0035

IRRADIATION SERVICES AND STUDIES ...Fish & Shellfish, Fish -non-specific, Instrumental Services, ...6.0036

COMMERCIAL BENEFIT STUDIES ...Commercial Fishing, Fish & Shellfish, ...6.0037

INCIDENCE OF BACTERIA OF PUBLIC HEALTH SIGNIFICANCE IN FRESH COMMERCIAL SHELLFISH ...Coliforms (non-specific), Crabs, Microbiological, Oysters, Salmonella (non-specific & Ot), Staphylococcus (non-spec.& Ot), ...6.0038

SHIPBOARD IRRADIATION STUDIES ...Fish -non-specific, Food Raw Quality, Medical Studies, Microbiological, Shelf Life & Storage, ...6.0039

FUNDAMENTAL RADIATION CHEMISTRY RESEARCH ...Antibiotics, Chemical Analysis, Fish -non-specific, Packaging, Radiochemical Analysis, ...6.0040

INVESTIGATION OF FEASIBILITY OF STERILIZING FISH BY RADIATION ...Enzymatic, Fish -non-specific, Inactivation, Organoleptic Studies, Shelf Life & Storage, ...6.0041

PROCESSING AND PRODUCT DEVELOPMENT OF EDIBLE FISH AND SHELLFISH ...Commercial Fishing, Fish & Shellfish, ...6.0047

PRODUCT/PROCESSING DEVELOPMENT RESEARCH ...Design, Machinery, Equipment, Fish & Shellfish, Fish -non-specific, Freezing, Refrigeration, ...5.0988

SURVIVAL OF FOOD PATHOGENS IN RADIATION PASTEURIZATION SEAFOOD ...Cell. env.(non-specific & Ot.), Cobalt, Crabs, Food Bacteria, Radiation Sensitivity-, ...6.0063

SURVIVAL MECHANISM OF IRRADIATED MICROORGANISMS IN FOOD ...Antibiotics, Cell Injury and Autolysis, Preservatives, Radiation Protectors, Salmonella (non-specific & Ot), ...6.0070

EFFECTS OF IONIZING RADIATION ON FOOD LIPIDS ...Animal Fats -non-specific, Fats, Fish -non-specific, Organoleptic Studies, ...6.0030

ISOLATION OF ANTI-THIAMINE FACTORS IN HAWAII FISH ...Fish -non-specific, Food Spoilage Detection, Thiamine, Thiamine Compounds, Vitamins, ...5.0261

#### Refrigeration

OUTGROWTH OF CLOSTRIDIUM BOTULINUM TYPE E IN NONIRRADIATED AND IRRADIATED FISHERY PRODUCTS ...Clostridium Botulinum, Fish -non-specific, Food (epidemiology), Microbiological, Radiation, ...6.0081

STUDY OF THE BASIC MICROBIOLOGICAL AND BIOCHEMICAL FACTORS IN THE IRRADIATION PRESERVATION OF MARINE PRODUCTS ...Bacteria, Fish -non-specific, Microbiological, Radiation, Staphylococcus (non-spec.& Ot), ...6.0085

MARKET STRUCTURE OF COMMERCIAL FISHING INDUSTRY IN THE NORTHEAST ...Commercial Fishing, Consumption, Haddock, Market Structure, Northeast, ...4.0186

CAUSES AND PREVENTION OF UNDESIRABLE CHANGES IN THE QUALITY OF FRESH AND FROZEN GULF SHRIMP IN REFRIGERATED STORAGE ...Freezing, Radiation, Shelf Life & Storage, Shrimp, ...6.0026

MICROFLORA OF RADIATION PASTEURIZED SEAFOODS ...Microbiological, Organoleptic Studies, Radiation, Radiation Sensitivity-, Shellfish -non-specific, ...6.0171

PRODUCT/PROCESSING DEVELOPMENT RESEARCH ...Design, Machinery, Equipment, Fish & Shellfish, Fish -non-specific, Freezing, Radiation, ...5.0988

LOW TEMPERATURE GROWTH OF BACTERIA ON FOODS ...Cryophilic Bacteria, Fish -non-specific, Growth (non-specific & Ot.), Isoenzymes, Microbiological, Temperature, ...6.0086

#### Smoking

DEVELOPMENT OF NEW HUMAN FOOD PRODUCTS FROM SHAD ...Fish & Shellfish, Processing, Sausage and Variety Meats, Shad, Shelf Life & Storage, ...6.0065

CONSUMER EVALUATION OF FISH PRODUCTS ...Consumer Pref. & Consumption, Fish & Shellfish, Fish -non-specific, Organoleptic Studies, ...6.0004

DISTRIBUTION OF C. BOTULINUM IN COMMERCIAL SMOKED FISH ...Bacterial Pollutant Sources, Clostridium Botulinum, Fish -non-specific, Food (epidemiology), Microbiological, ...5.0337

EFFECTS OF HANDLING AND PROCESSING PROCEDURES IN POTENTIAL PATHOGENUS ON FISH ...Clostridium Botulinum, Fish -other, Legal Standards, Microbiological, Toxicological and Allergy, ...6.0044

RADIOCHEMICAL TECHNIQUES ...Food Spoilage Detection, Mercury, Polonium, Radioactive Isotopes, Wheat, ...6.0008

#### Temperature Control

GROWTH CHARACTERISTICS OF TYPE E CLOSTRIDIUM BOTULINUM IN THE TEMPERATURE RANGE 34 TO 50 F. ...Clostridium Botulinum, Food (epidemiology), Haddock, Microbiological, Radiation, ...6.0022

PROCESSING ALASKA SHRIMP ...Carotenoid Pigments, Design, Machinery, Equipment, Heat, Organoleptic Studies, Shrimp, ...6.0002

#### Proteins

##### Animal Protein

THE EVALUATION OF WHOLESOMENESS OF RADIATION SUB-STERILIZED FOOD PRODUCTS USING RATS ...Clams, Laboratory Rat, Quantitative & Qualitative, Radiation, Thiaminase, ...6.0031

#### Quality Control and Standards

##### Food Raw Quality

EFFECT OF STORAGE ON FISH MUSCLE PROTEINS ...Fish & Shellfish, Fish -non-specific, Muscle Proteins, Organoleptic Studies, Protein, ...6.0062

BIOCHEMISTRY OF FISH MUSCLE AND QUALITY CHANGES ...Enzymatic, Fish -non-specific, Muscle, Organoleptic Studies, ...5.1035

PRESERVATION AND DEVELOPMENT OF FOOD PRODUCTS ...Fish & Shellfish, Fish -non-specific, Food Transport -other, Packaging, Processed Product Quality, ...6.0084

SHIPBOARD IRRADIATION STUDIES ...Fish -non-specific, Medical Studies, Microbiological, Radiation, Shelf Life & Storage, ...6.0039

##### Legal Standards

QUALITY STANDARDS TO DETERMINE RELEASE OF SHELLFISH FOR MARKETING PURPOSES ...Clams, Microbiological, Sanitation, Shelf Life & Storage, ...6.0166

EVALUATION OF PRESENT AND PROPOSED LAWS REGULATING THE PROCESSING AND PACKING OF OYSTERS ...Food Processing -other, Louisiana, Oysters, Packaging, ...6.0027

PROCESS ENGINEERING ...Design, Machinery, Equipment, Esters, Extraction, Fats and Oils -other, Fish Protein Concentrate, Industrial Operation, Natural Occurring, ...6.0080

EFFECTS OF HANDLING AND PROCESSING PROCEDURES IN POTENTIAL PATHOGENUS ON FISH ...Clostridium Botulinum, Fish -other, Microbiological, Smoking, Toxicological and Allergy, ...6.0044

CHARACTERISTICS OF CANNED SALMON ...Organoleptic Studies, Salmon, ...6.0013

ELECTROPHORETIC PROFILES FOR THE IDENTIFICATION OF FISH SPECIES ...Disc Electrophoresis, Fish -non-specific, Gel Electrophoresis, Infection, Intoxication & Pois, ...6.0014

COMPOSITION OF BREADED FISH PRODUCTS ...Fish -non-specific, Food Preparation, Heat, ...6.0015

BACTERIOLOGICAL SURVEYS FOR MICROBIAL STANDARDS FOR FOOD ...Crabs, Escherichia Coli, Food Spoilage Detection, Microbiological, Staphylococcus (non-spec.& Ot), ...6.0010

## SUBJECT INDEX

## Food Science and Technology

INVESTIGATION OF THE PRESERVATION OF FOODS BY FREEZE DRYING ...Beef, Food Spoilage Detection, Freeze Drying, Physical Decomposition, Shrimp, ...6.0012

### Nutritive Value

NUTRITIVE VALUE OF FISH AND OTHER MARINE PRODUCTS ...Ascorbic Acid, Fish -non-specific, Paper Chromatography, Proteins -non-specific, Thiamine, ...6.0054

UTILIZATION OF HAKE, DOGFISH, AND BY-PRODUCTS OF THE FILLET INDUSTRY FOR PROTEIN SUPPLEMENTS ...Anti-oxidants, Chemical and Spices, Fish -other, Fish Protein Concentrate, Heat, Supplements, ...6.0067

UTILIZATION AND PREPARATION OF FISH PROTEIN CONCENTRATE ...Chemical Analysis, Fish & Shellfish, Fish Protein Concentrate, Organoleptic Studies, Proteins, ...6.0125

### Organoleptic Studies

FUNDAMENTAL STUDIES IN THE FLAVOR AND ODOR CHEMISTRY OF FISH PRODUCTS ...Enzymes, Fish -non-specific, Food Spoilage Detection, Microbiological, Radiation, ...6.0042

STABILITY OF FOOD LIPIDS TO IONIZING RADIATION ...Fats, Radiation, ...6.0029

RADIOPASTEURIZATION OF FISHERY PRODUCTS-OPERATION AND DEVELOPMENTAL INVESTIGATIONS ...Chemical Analysis, Fish -non-specific, Microbiological, Radiation, Shelf Life & Storage, ...6.0033

RADIATION PASTEURIZATION OF SHRIMP AND OYSTERS ...Iced Cooling and Storage, Oysters, Radiation, Residues in Foods, Shrimp, ...6.0024

COMMERCIAL IRRADIATION OF SHELLFISH WITH A PORTABLE SHIPBOARD IRRADIATOR ...Chemical Analysis, Microbiological, Radiation, Shelf Life & Storage, Shrimp, ...6.0025

RADIATION PRESERVATION OF FISHERY PRODUCTS ...Commercial Fishing, Fish & Shellfish, Fish -non-specific, Radiation, Shelf Life & Storage, ...6.0034

CONSUMER EVALUATION OF FISH PRODUCTS ...Consumer Pref. & Consumption, Fish & Shellfish, Fish -non-specific, Smoking, ...6.0004

OIL CONTAMINATION OF OYSTERS FROM OIL WELL DRILLING MUDS ...Fluid Properties, Infection, Intoxication & Pois, Oil, Oil and Natural Gas - Sulfur, Oysters, ...5.0431

THE EFFECT OF PROCESSING VARIABLES ON THE QUALITY OF MEAT FROM THE BLUE CRAB - CALLINectes SAPIDUS ...Crabs, Food Additives -other, Heat, ...6.0061

EFFECT OF STORAGE ON FISH MUSCLE PROTEINS ...Fish & Shellfish, Fish -non-specific, Food Raw Quality, Muscle Proteins, Protein, ...6.0062

MICROFLORA OF RADIATION PASTEURIZED SEAFOODS ...Microbiological, Radiation, Radiation Sensitivity, Refrigeration, Shellfish -non-specific, ...6.0171

DEVELOPMENT OF THE SHAD INDUSTRY ...Fish & Shellfish, ...6.0064

UTILIZATION AND PREPARATION OF FISH PROTEIN CONCENTRATE ...Chemical Analysis, Fish & Shellfish, Fish Protein Concentrate, Nutritive Value, Proteins, ...6.0125

THE STORAGE LIFE OF ICED DEEP SEA RED CRABS - GERYON QUINQUEDENS ...Crabs, Iced Cooling and Storage, Microbiological, Shelf Life & Storage, ...6.0077

CHEMICAL REACTIONS IN PROCESSED SEAFOODS ...Enzymatic, Iced Cooling and Storage, Protein, Shrimp, ...6.0048

BIOCHEMISTRY OF FISH MUSCLE AND QUALITY CHANGES ...Enzymatic, Fish -non-specific, Food Raw Quality, Muscle, ...5.1035

PROCESSING ALASKA SHRIMP ...Carotenoid Pigments, Design, Machinery, Equipment, Heat, Shrimp, Temperature Control, ...6.0002

PROCESS-INDUCED CHANGES IN CRUSTACEAN MUSCLE TISSUE ...Crabs, Heat, Nucleotides -non-specific, ...5.0350

PROCESSING KING CRAB ...Commercial Fishing, Crabs, Fish & Shellfish, Fish Meals, Freezing, ...6.0003

LABORATORY SCALE INVESTIGATION INTO THE FEASIBILITY OF RADIOPASTEURIZING FISH PRODUCTS ...Chemical Analysis, Microbiological, Radiation, Shelf Life & Storage, Shellfish -non-specific, ...6.0035

INVESTIGATION OF FEASIBILITY OF STERILIZING FISH BY RADIATION ...Enzymatic, Fish -non-specific, Inactivation, Radiation, Shelf Life & Storage, ...6.0041

CONTROL OF OXIDATIVE CHANGES IN FRESHWATER FISH ...Chemical Analysis, Fish -non-specific, Freezing, Fresh Water, Rancidity, ...6.0045

INVESTIGATION OF FOOD PRESERVATION METHODS ...Chemical Analysis, Fish -other, Food Processing -other, Food Spoilage -other, Physical and Chemical Change, ...6.0016

CHARACTERISTICS OF CANNED SALMON ...Legal Standards, Salmon, ...6.0013

EFFECTS OF IONIZING RADIATION ON FOOD LIPIDS ...Animal Fats -non-specific, Fats, Fish -non-specific, Radiation, ...6.0030

### Processed Product Quality

EFFECT OF PROCESS ON SHELLFISH ...Clams, Processing, Sanitation, Shelf Life & Storage, Winter, ...6.0059

PRESERVATION AND DEVELOPMENT OF FOOD PRODUCTS ...Fish & Shellfish, Fish -non-specific, Food Raw Quality, Food Transport -other, Packaging, ...6.0084

### Shelf Life & Storage

RADIOPASTEURIZATION OF FISHERY PRODUCTS-OPERATION AND DEVELOPMENTAL INVESTIGATIONS ...Chemical Analysis, Fish -non-specific, Microbiological, Organoleptic Studies, Radiation, ...6.0033

COMMERCIAL IRRADIATION OF SHELLFISH WITH A PORTABLE SHIPBOARD IRRADIATOR ...Chemical Analysis, Microbiological, Organoleptic Studies, Radiation, Shrimp, ...6.0025

RADIATION PRESERVATION OF FISHERY PRODUCTS ...Commercial Fishing, Fish & Shellfish, Fish -non-specific, Organoleptic Studies, Radiation, ...6.0034

DEVELOPMENT OF NEW HUMAN FOOD PRODUCTS FROM SHAD ...Fish & Shellfish, Processing, Sausage and Variety Meats, Shad, Smoking, ...6.0065

QUALITY STANDARDS TO DETERMINE RELEASE OF SHELLFISH FOR MARKETING PURPOSES ...Clams, Legal Standards, Microbiological, Sanitation, ...6.0166

EFFECT OF PROCESS ON SHELLFISH ...Clams, Processed Product Quality, Processing, Sanitation, Winter, ...6.0059

CAUSES AND PREVENTION OF UNDESIRABLE CHANGES IN THE QUALITY OF FRESH AND FROZEN GULF SHRIMP IN REFRIGERATED STORAGE ...Freezing, Radiation, Refrigeration, Shrimp, ...6.0026

THE STRUCTURE OF DECISION MAKING IN MAJOR MARKETING AGENCIES OF FOOD FISH IN THE N.E. UNITED STATES ...Fish -non-specific, Marketing, Northeast, Price & Value, Production & Processing, ...6.0078

MARKETING EFFICIENCY IN A COOPERATIVE FOOD-FISH PROCESSING PLANT, A CASE STUDY ...Design, Machinery, Equipment, Fish & Shellfish, Fish -non-specific, Freezing, Processing, ...6.0079

THE STORAGE LIFE OF ICED DEEP SEA RED CRABS - GERYON QUINQUEDENS ...Crabs, Iced Cooling and Storage, Microbiological, Organoleptic Studies, ...6.0077

LABORATORY SCALE INVESTIGATION INTO THE FEASIBILITY OF RADIOPASTEURIZING FISH PRODUCTS ...Chemical Analysis, Microbiological, Organoleptic Studies, Radiation, Shellfish -non-specific, ...6.0035

COMMERCIAL BENEFIT STUDIES ...Commercial Fishing, Fish & Shellfish, ...6.0037

SHIPBOARD IRRADIATION STUDIES ...Fish -non-specific, Food Raw Quality, Medical Studies, Microbiological, Radiation, ...6.0039

INVESTIGATION OF FEASIBILITY OF STERILIZING FISH BY RADIATION ...Enzymatic, Fish -non-specific, Inactivation, Organoleptic Studies, Radiation, ...6.0041

### Spoilage

#### Enzymatic

STUDY OF THIAMINASE IN HAWAII FISH ...Enzyme Inhibitors, Fish -non-specific, Hawaii, Thiaminase, Toxicological and Allergy, ...5.0260

CHEMICAL REACTIONS IN PROCESSED SEAFOODS ...Iced Cooling and Storage, Organoleptic Studies, Protein, Shrimp, ...6.0048

BIOCHEMISTRY OF FISH MUSCLE AND QUALITY CHANGES ...Fish -non-specific, Food Raw Quality, Muscle, Organoleptic Studies, ...5.1035

INVESTIGATION OF FEASIBILITY OF STERILIZING FISH BY RADIATION ...Fish -non-specific, Inactivation, Organoleptic Studies, Radiation, Shelf Life & Storage, ...6.0041

#### Food Spoilage -other

INVESTIGATION OF FOOD PRESERVATION METHODS ...Chemical Analysis, Fish -other, Food Processing -other, Organoleptic Studies, Physical and Chemical Change, ...6.0016

TOXIC IMPURITIES IN MARINE PROTEIN CONCENTRATE  
...Fish Protein Concentrate, Infection, Intoxication & Pois,  
Toxic Substances -non-specific, Toxicological and Allergy,  
...6.0009

**Food Spoilage Detection**

FUNDAMENTAL STUDIES IN THE FLAVOR AND ODOR  
CHEMISTRY OF FISH PRODUCTS ...Enzymes, Fish -non-  
specific, Microbiological, Organoleptic Studies, Radiation,  
...6.0042

BACTERIAL INDICATORS OF THE SANITARY QUALITY OF  
DEPURATED HARD CLAMS, MERCENARIA MER-  
CENARIA ...Clams, Microbiological, Sanitation, ...6.0056

ANTIOXIDANT AND NUTRITIONAL POTENTIAL OF FER-  
MENTED AND UNFERMENTED SOYBEANS IN COMBINA-  
TION WITH FISH ...Fermentation, Maltng, Fish -non-specific,  
Proteins, Rancidity, Soybeans, ...6.0023

LIPID OXIDATION AND ASSOCIATED BIOCHEMICAL  
CHANGES OCCURRING DURING THE PROCESSING AND  
STORAGE OF FISHERY PRODUCTS ...Anti-oxidants, Chemi-  
cal Analysis, Fats, Fish -non-specific, Rancidity, ...6.0071

INVESTIGATE THE EFFECT OF IRRADIATION ON THE  
MICROBIAL FLORA SURVIVING IRRADIATION  
PASTEURIZATION OF SEAFOODS ...Consumer Pref. & Con-  
sumption, Microbiological, Radiation, Radiation Protectors,  
Shellfish -non-specific, ...6.0072

RADIOCHEMICAL TECHNIQUES ...Mercury, Polonium,  
Radioactive Isotopes, Smoking, ...6.0008

BACTERIOLOGICAL SURVEYS FOR MICROBIAL STAN-  
DARDS FOR FOOD ...Crabs, Escherichia Coli, Legal Stan-  
dards, Microbiological, Staphylococcus (non-spec.& Ot),  
...6.0010

INVESTIGATION OF DECOMPOSITION IN SHRIMP ...Am-  
monium, Physical Decomposition, Shrimp, ...6.0011

INVESTIGATION OF THE PRESERVATION OF FOODS BY  
FREEZE DRYING ...Beef, Freeze Drying, Legal Standards,  
Physical Decomposition, Shrimp, ...6.0012

ORGANISMS RESPONSIBLE FOR TOXICITY OF ALASKAN  
CLAMS ...Alaska, Biological Pollutants -general, Clams,  
Microbiological, Pollutants-general, ...5.0344

ISOLATION OF ANTI-THIAMINE FACTORS IN HAWAII FISH  
...Fish -non-specific, Radiation, Thiamine, Thiamine Com-  
pounds, Vitamins, ...5.0261

**Microbiological**

FUNDAMENTAL STUDIES IN THE FLAVOR AND ODOR  
CHEMISTRY OF FISH PRODUCTS ...Enzymes, Fish -non-  
specific, Food Spoilage Detection, Organoleptic Studies, Radia-  
tion, ...6.0042

OUTGROWTH OF CLOSTRIDIUM BOTULINUM TYPE E IN  
NONIRRADIATED AND IRRADIATED FISHERY  
PRODUCTS ...Clostridium Botulinum, Fish -non-specific, Food  
(epidemiology), Radiation, Refrigeration, ...6.0081

GROWTH CHARACTERISTICS OF TYPE E CLOSTRIDIUM  
BOTULINUM IN THE TEMPERATURE RANGE 34 TO 50 F.  
...Clostridium Botulinum, Food (epidemiology), Haddock,  
Radiation, Temperature Control, ...6.0022

STUDY OF THE BASIC MICROBIOLOGICAL AND  
BIOCHEMICAL FACTORS IN THE IRRADIATION PRESER-  
VATION OF MARINE PRODUCTS ...Bacteria, Fish -non-  
specific, Radiation, Refrigeration, Staphylococcus (non-spec.&  
Ot), ...6.0085

INOCULATED PACK STUDIES ON LOW-DOSE IRRADIATED  
MARINE PRODUCTS - SHRIMP ...Clostridium Botulinum,  
Oysters, Radiation, Shrimp, ...6.0017

RADIOPASTEURIZATION OF FISHERY PRODUCTS-OPER-  
ATION AND DEVELOPMENTAL INVESTIGATIONS ...Chemical  
Analysis, Fish -non-specific, Organoleptic Studies, Radia-  
tion, Shelf Life & Storage, ...6.0033

COMMERCIAL IRRADIATION OF SHELLFISH WITH A  
PORTABLE SHIPBOARD IRRADIATOR ...Chemical Analysis,  
Organoleptic Studies, Radiation, Shelf Life & Storage, Shrimp,  
...6.0025

APPLICATION OF RADIATION PASTEURIZATION  
PROCESSES TO PACIFIC CRAB AND FLOUNDER ...Clos-  
tridium Botulinum, Fish -non-specific, Processing, Radiation,  
Toxicological and Allergy, ...6.0083

BACTERIAL INDICATORS OF THE SANITARY QUALITY OF  
DEPURATED HARD CLAMS, MERCENARIA MER-  
CENARIA ...Clams, Food Spoilage Detection, Sanitation,  
...6.0056

QUALITY STANDARDS TO DETERMINE RELEASE OF  
SHELLFISH FOR MARKETING PURPOSES ...Clams, Legal  
Standards, Sanitation, Shelf Life & Storage, ...6.0166

BOTULINUM FOOD POISONING IN RELATION TO FISHERY  
PRODUCTS ...Antibiotics, Clostridium Botulinum, Fish -non-  
specific, Great Lakes-general, Repression, ...6.0087

MICROFLORA OF RADIATION PASTEURIZED SEAFOODS  
...Organoleptic Studies, Radiation, Radiation Sensitivity-  
Refrigeration, Shellfish -non-specific, ...6.0171

VITAMIN K5 AS A FOOD PRESERVATIVE ...Food Bacteria,  
Food Processing -other, Repression, Vitamin K, ...6.0075

INVESTIGATE THE EFFECT OF IRRADIATION ON THE  
MICROBIAL FLORA SURVIVING IRRADIATION  
PASTEURIZATION OF SEAFOODS ...Consumer Pref. & Con-  
sumption, Food Spoilage Detection, Radiation, Radiation Pro-  
tectors, Shellfish -non-specific, ...6.0072

THE STORAGE LIFE OF ICED DEEP SEA RED CRABS -  
GERYON QUINQUEDENS ...Crabs, Iced Cooling and Storage,  
Organoleptic Studies, Shelf Life & Storage, ...6.0077

DISTRIBUTION OF C. BOTULINUM IN COMMERCIAL  
SMOKED FISH ...Bacterial Pollutant Sources, Clostridium  
Botulinum, Fish -non-specific, Food (epidemiology), Smoking,  
...5.0337

CHEMICAL AND MICROBIOLOGICAL APPLICATIONS TO  
PRODUCT ENGINEERING ...Design, Machinery, Equipment,  
Freezing, Iced Cooling and Storage, Oysters, Shrimp, ...6.0050

LABORATORY SCALE INVESTIGATION INTO THE FEASI-  
BILITY OF RADIOPASTEURIZING FISH PRODUCTS  
...Chemical Analysis, Organoleptic Studies, Radiation, Shelf  
Life & Storage, Shellfish -non-specific, ...6.0035

INCIDENCE OF BACTERIA OF PUBLIC HEALTH SIG-  
NIFICANCE IN FRESH COMMERCIAL SHELLFISH  
...Coliforms (non-specific), Crabs, Oysters, Radiation, Sal-  
monella (non-specific & Ot), Staphylococcus (non-spec.& Ot),  
...6.0038

SHIPBOARD IRRADIATION STUDIES ...Fish -non-specific,  
Food Raw Quality, Medical Studies, Radiation, Shelf Life &  
Storage, ...6.0039

GROWTH AND TOXICOGENESIS OF C. BOTULINUM IN  
FISHERY PRODUCTS ...Antimetabolites -non-specific, Bac-  
terial Exotoxins, Clostridium Botulinum, Fish -non-specific,  
Growth (non-specific & Ot.), Medical Studies, ...6.0043

EFFECTS OF HANDLING AND PROCESSING PROCEDURES  
IN POTENTIAL PATHOGENUS ON FISH ...Clostridium Botu-  
linum, Fish -other, Legal Standards, Smoking, Toxicological  
and Allergy, ...6.0044

BACTERIOLOGICAL SURVEYS FOR MICROBIAL STAN-  
DARDS FOR FOOD ...Crabs, Escherichia Coli, Food Spoilage  
Detection, Legal Standards, Staphylococcus (non-spec.& Ot),  
...6.0010

THERMAL DESTRUCTION OF TYPE E CLOSTRIDIUM  
BOTULINUM ...Clostridium Botulinum, Differentiation  
Mechanism, Food (epidemiology), Heat Resistance, Spore Stu-  
dies, ...6.0006

ECOLOGY OF CLOSTRIDIUM BOTULINUM TYPE E IN  
GREEN BAY ...Fish -non-specific, Great Lakes-general,  
...5.0850

PROGRAM PROJECT - FOOD MICROBIOLOGY ...Clostridia  
(non-specific & Ot), Food (epidemiology), Infection, Intoxica-  
tion & Pois, Salmonella (non-specific & Ot), Toxicological and  
Allergy, ...6.0005

ANAEROBIC BACTERIA IN THE MARINE ENVIRONMENT  
...Fish -non-specific, Food (epidemiology), Isolation From Nat.  
environ. , ...5.0846

STUDIES ON VIBRIO FOOD POISONING ...Bacteria, Bacterial  
Endotoxins, Food (epidemiology), Toxicological and Allergy,  
Vasomotor, ...6.0114

LOW TEMPERATURE GROWTH OF BACTERIA ON FOODS  
...Cryophilic Bacteria, Fish -non-specific, Growth (non-specific  
& Ot.), Isoenzymes, Refrigeration, Temperature, ...6.0086

ORGANISMS RESPONSIBLE FOR TOXICITY OF ALASKAN  
CLAMS ...Alaska, Biological Pollutants -general, Clams, Food  
Spoilage Detection, Pollutants-general, ...5.0344

**Physical Decomposition**

INVESTIGATION OF DECOMPOSITION IN SHRIMP ...Am-  
monium, Food Spoilage Detection, Shrimp, ...6.0011

INVESTIGATION OF THE PRESERVATION OF FOODS BY  
FREEZE DRYING ...Beef, Food Spoilage Detection, Freeze  
Drying, Legal Standards, Shrimp, ...6.0012

**Radioactive Isotopes**

EFFECTS OF INGESTION OF RADIOACTIVE FISH AND THE  
NATURE AND BIOLOGY OF TOXINS IN CERTAIN FISHES  
...Fish -non-specific, Food (epidemiology), Food Chains, Tox-  
icological and Allergy, ...6.0108

## SUBJECT INDEX

## Fouling

RADIOCHEMICAL TECHNIQUES ...Food Spoilage Detection, Mercury, Polonium, Smoking, Wheat, ...6.0008

### Rancidity

ANTIOXIDANT AND NUTRITIONAL POTENTIAL OF FERMENTED AND UNFERMENTED SOYBEANS IN COMBINATION WITH FISH ...Fermentation, Malting, Fish -non-specific, Food Spoilage Detection, Proteins, Soybeans, ...6.0023

LIPID OXIDATION AND ASSOCIATED BIOCHEMICAL CHANGES OCCURRING DURING THE PROCESSING AND STORAGE OF FISHERY PRODUCTS ...Anti-oxidants, Chemical Analysis, Fats, Fish -non-specific, Food Spoilage Detection, ...6.0071

COMPOSITION STUDIES OF FISH AND SHELLFISH AS RELATED TO STORAGE AND PROCESSING PROBLEMS ...Crabs, Fish -other, Freezing, Mackerel, Packaging, ...6.0046

CONTROL OF OXIDATIVE CHANGES IN FRESHWATER FISH ...Chemical Analysis, Fish -non-specific, Freezing, Fresh Water, Organoleptic Studies, ...6.0045

### Supplements

UTILIZATION OF HAKE, DOGFISH, AND BY-PRODUCTS OF THE FILLET INDUSTRY FOR PROTEIN SUPPLEMENTS ...Anti-oxidants, Chemical and Spices, Fish -other, Fish Protein Concentrate, Heat, Nutritive Value, ...6.0067

### Transportation and Marketing

#### Food Transport -other

PRESERVATION AND DEVELOPMENT OF FOOD PRODUCTS ...Fish & Shellfish, Fish -non-specific, Food Raw Quality, Packaging, Processed Product Quality, ...6.0084

### Forecasting-prediction

PREDICTION OF EXTREME ENVIRONMENTAL FACTORS ...Meteorological Extremes, Statistics-general, Technique Development, Waves, Wind-general, ...4.0048

STUDY OF RELATIONSHIP BETWEEN EARTHQUAKES AND TECTONIC MOVEMENTS IN ALASKAN FAULT ZONE ...Alaska, Crustal Fracturing, Deformation, Earthquakes, Fault Complexes, ...7.0139

HIGH FREQUENCY OCEAN WAVES ...Aircraft, Photogrammetry, Radar, Waves, Wind-water Interaction, ...2.0121

HIGH FREQUENCY WAVES ...Heat and Radiation Transfer, Hydrodynamics, Water Motion Recorders, Waves, ...2.0113

TSUNAMI RUNUP EXPERIMENTS ON A SCALE MODEL OF OAHU ...Hawaii, Model Studies, Tsunami, ...2.0111

WAVE, CURRENT AND STORM SURGE RESPONSE TO EXTREME WIND CONDITIONS ...Currents-ocean, Model Studies, Storms-general, Waves, Wind-water Interaction, ...2.0107

DETERMINATION OF TIDES IN THE REAL OCEANS ...Numerical Analysis-other, Partial, Tides, ...2.0089

THEORETICAL STUDIES OF TSUNAMI PROPAGATION ...Depth, Environmental Effects-geologic, Geomorphology-topography, Tsunami, Waves, ...2.0122

AIR-SEA INTERACTION ...Heat and Radiation Transfer, Meteorological Studies, Thermal, Wind-water Interaction, ...3.0023

CHARACTERISTICS, CAUSES, AND PREDICTION OF UPWELLING WATER MASSES OFF OREGON ...Mixing, Oceanic Fronts, Oregon, Pacific Ocean-east, Water Motion Recorders, ...2.0062

THEORETICAL STUDY OF OCEAN TIDES FOR PURPOSES OF WORLDWIDE PREDICTION ...Earth Tides, Mediterranean Sea-other, Tides, Waves, ...2.0090

PROPAGATION AND REFRACTION OF OCEAN WAVES IN NEAR SHORE REGIONS ...Mathematical Analysis, Operational Aspect, Surface Environments, Waves, ...2.0117

AIR-SEA INTERACTION (WAVES) ...British West Indies, Heat and Radiation Transfer, Surface Environments, Waves, Wind-water Interaction, ...3.0016

THEORETICAL AND LABORATORY MODEL STUDIES OF LARGE-SCALE OCEAN CIRCULATION ...Circulation-general, Currents-ocean, Gulf Stream, Model Studies, Transducers, ...2.0023

SATELLITE COMMUNICATION TESTS ...Buoys, Marine Environments-general, Satellites, Telemetry-other, Very High Frequency, ...4.0001

MEASUREMENT AND INTERPRETATION OF MOTIONALLY-INDUCED ELECTRIC FIELDS IN THE SEA ...Currents-ocean, Electrical, Marine Environments-general, Model Studies, Moorings, Water Motion Recorders, ...1.0139

RADIANT ENERGY FLUX ACROSS THE AIR-SEA INTERFACE AND HEAT BUDGET OF THE OCEANS ...Air-sea Boundary-general, Heat and Radiation Transfer, Heat Exchange, Radiation-general, Thermal, ...3.0032

MODEL STUDIES OF REFRACTION OF SHOALING OCEAN WAVES ...Model Apparatus-other, Model Studies, Shoals, Wave, Waves, ...8.0194

NUMERICAL OCEANOGRAPHIC MODEL DEVELOPMENT FOR ENVIRONMENTAL PREDICTION ...Marine Environments-general, Meteorological Studies, Model Studies, Oceanic Fronts, Weather Forecasting, ...4.0077

SEA ICE MOVEMENT DYNAMICS ...Charts, Mapping, Model Studies, Polar, Sea Ice, ...3.0087

TURBULENCE OVER WAVES ...Heat and Radiation Transfer, Heat Exchange, Meteorological Studies, Thermal, Turbulence, Waves, ...3.0027

SPECTRAL ANALYSIS ...Data Reduction and Analysis, Handbooks, Oceanography-general, Spectral Analysis, ...11.0032

OCEANOGRAPHIC RESEARCH ...Acoustical, Submersibles, Temperature, ...1.0161

OCEAN CIRCULATION ...California Current, Circulation-general, Hydrodynamics, Model Studies, Submarine Canyons, ...2.0002

EARTHQUAKE HAZARD - A PUBLIC POLICY PROBLEM IN THE SAN FRANCISCO BAY AREA ...California, Earthquakes, Faults, Intergovernmental Relations, Policy Making, San Francisco Bay, ...9.0002

FLUID MECHANICS RESEARCH ...Hydrodynamics, Industrial Engineering, Ship Resistance Stability, Waves, ...8.0176

OCEANOGRAPHIC RESEARCH - INVESTIGATIONS WITH THERMISTOR CHAIN ...Acoustical, Temperature, Thermal, Transmission, Water Properties-general, Waves-internal, ...1.0143

OCEANOMETRICS ...Acoustical, Statistics-general, Transmission, Velocity, ...1.0006

SHALLOW WATER OCEANOGRAPHY ...Continental Shelf, Environmental Effects-geologic, Pressure, Subsurface Environments, Waves, ...1.0172

NUMERICAL WAVE PREDICTION ...Development of Models, Model Studies, Numerical Analysis-other, Waves, ...2.0104

ADVANCED TECHNOLOGY AND BOTTOM PREDICTIONS ...Acoustical, Benthonic-bottom, Data Acquisition, Data Analysis - General, Model Studies, Seismic Studies, ...1.0045

PREDICTION OF POLAR ICE BEHAVIOR AND DISTRIBUTION ...Arctic Ocean, Data Acquisition, Hydrodynamics, Ice-general, Sea Ice, Weather Forecasting, ...3.0078

PREDICTIVE OCEAN ACOUSTICS ...Acoustical, Velocity, ...1.0033

PREDICTIVE OCEAN ACOUSTICS ...Acoustical, Environmental Effects-geologic, Transmission, Velocity, ...1.0034

UNDERWATER ACOUSTIC ANALYSIS ...Acoustical, Phase Relationships, Signal Analysis-other, Transmission, Water Properties-general, ...1.0038

MEASUREMENT OF UNDERWATER ACOUSTIC PROPAGATION ...Acoustical, Depth, Intensity, Transmission, ...1.0014

GREAT LAKES RESEARCH - MONITORING OF WATER CHARACTERISTICS ...Data Acquisition, Geophysical Analysis, Great Lakes-general, Instrumentation-general, Temperature, ...1.0185

SPACE APPLICATIONS TO FISHERIES OCEANOGRAPHY (GULF OCEANOGRAPHY PROGRAM) ...Commercial Fishing, Computer Applications, Satellites, Water Environment - other, ...4.0172

### Forestry

EFFECTS OF LOG RAFTING ON DUNGENESS CRAB ...Contamination - Water, Crabs, Diving and Scuba, Mans Activities, Pulp, Paper, and Logging, ...5.0347

MOBILITY OF OIL-TYPE PRESERVATIVES IN IMMERSED WOOD ...Creosote, Evaluation, Liquid - Solid Interactions, Marine Biology (non-specific), Wood Preservatives-non-specific, ...8.0238

### Fouling

ANTI-FOULING MEANS FOR MARINE PROPELLERS ...Corrosion Prevention-other, Marine Propulsion, Materials Used Undersea, ...8.0240

NEW APPROACHES TO BIOFOULING ASSAY ...Bioassays, Corrosion Prevention-other, Marine Biology (non-specific), Paint - General, Powder, ...5.0757

## Fouling

## SUBJECT INDEX

- CORROSION RESEARCH ...Cathodic Protection, Corrosion General, Galvanic, Water, ...8.0199
- ANTIFOULING RESEARCH ...Corrosion Prevention-other, Materials Used Undersea, Water, ...8.0200
- MICROBIAL CORROSION AND DETERIORATION OF NAVAL MATERIALS ...Biological, Classification Or Taxonomy, Ionic Effect, Marine Bacteria, Materials Used Undersea, ...8.0203
- PILING PRESERVATIVES THRESHOLD STUDIES ...Biological, Massachusetts, North Carolina, Preservatives, Wood, ...8.0232
- PHYLOGENETIC RELATIONS OF FOSSIL AND LIVING GYMNOLEMMATES ...Bryozoa, Geologic, Other Bryozoa, Phylogenies, ...5.0665
- BENTHIC COMMUNITIES ...Behavioral Ecology, Benthic Fauna, Bottom Sampling Device, Developmental Physiology, Metabolism, Productivity - Food Chain, ...5.0561
- BEHAVIOR AND SPECIFICITY IN MARINE SYMBIOSIS ...Behavioral Ecology, Environmental Ecology, Symbiosis, ...5.0951
- ECOLOGICAL SUCCESSION ON SURTSEY ...Iceland, Plant Succession, Succession, Volcanoes, ...5.0890
- ECOLOGY OF MARINE BIVALVE MOLLUSCAN LARVAE ...Behavioral Ecology, Clams, Population Dynamics, Productivity - Food Chain, Vertical Distribution, ...5.0370
- BENTHIC BIOLOGY ...Benthic Organisms (non-specific), Environmental Ecology, Marine Biology (non-specific), Number Or Density, Temporal Distribution, ...5.0900
- STUDIES ON MOLTING, GROWTH, AND DEVELOPMENT IN ACORN BARNACLES AND LARVAL DECAPODS ...Barnacles, Biological Rhythms, Developmental Physiology, Endocrine System, ...5.0296
- MARINE-BACTERIA CULTURE ...Bacterial Culture, Biological, Isolation From Nat. environ., Marine Bacteria, Water Bacteria, ...5.0849
- THE ROLE OF SULFUR BACTERIA IN CORROSION AND DETERIORATION ...Autotrophic, Biological, Marine Bacteria, Plasma Membrane, Sulfur Bacteria, ...5.0805
- MICROBIAL CORROSION IN THE MARINE ENVIRONMENT ...Biodegradation, Biological, Carbon, Marine Fungi (non-specific), Water, ...5.0769
- MICROBIOLOGICAL CONTROL IN NAVY AND MARINE CORPS OPERATING ENVIRONMENTS ...Medical Studies, Microorganisms (non-specific), Oxygen, ...5.0740
- MECHANISMS OF CALCIUM CARBONATE DEPOSITION ...Barnacles, Biogeochemical Process, Calcium, Chemical Reactions, Derivatives, ...5.1015
- MARINE FUNGI DEGRADATION ...Cellulose, Growth and Differentiation, Marine Fungi (non-specific), Nutrition Studies, ...8.0225
- MICROBES AND CORROSION ...Cathodic Protection, Extracellular-enzymes, Iron, Metals -non-specific, Microorganisms (non-specific), Respiration, ...8.0228
- OCEANOGRAPHIC RESEARCH ...Abyssal, Benthic-bottom, Geomorphology-topography, Marine Soils, Tables, Compilations, Catalogs, ...8.0343
- DEGRADATION OF MARINE SURFACES BY SALT REQUIRING BACTERIA ...Control and Regulation, Dna-satellite, Halophilic Bacteria, Isolation From Nat. environ., Metabolic-biochemical Genetics, ...5.0818
- MECHANISMS OF ATTACHMENT OF MARINE BACTERIA TO SURFACES ...Adsorption & Interface, Biological, Corrosion Prevention-other, Marine Bacteria, ...5.0810
- FOULING OF SENSORS ...Inhibitors, Instrumentation-general, Marine Biology, Organometallics, ...8.0239
- DEEP-WATER FOULING ...Biological, Fish -non-specific, Predation, Vertical Distribution, ...8.0233
- BIOLOGICAL EVALUATION OF EACH EXISTING SEED OYSTER BED IN DELAWARE BAY ...Delaware Bay, Number Or Density, Oysters, Spawning & Nesting Sites, ...5.0382
- STEEL PILING ...Corrosion Prevention-other, Low Alloy Steels, Polarization, Soils, Water, ...8.0208
- MICROBIAL CORROSION ...Alloys, Biological, Marine Bacteria, Sulfur Bacteria, Water, ...8.0207
- CHEMICAL WOOD PRESERVATIVE TREATMENTS ...Biological, Corrosion Prevention-other, Creosote, Wood Preservatives-non-specific, ...8.0197
- DRAG-REDUCING ALGAE ...Algae- General, Coatings-general, Marine Bacteria, Natural Occurring, Secretions and Products, Wear, Friction, ...5.0681

- EVALUATION OF EFFECTS OF SATURATED HYDROCARBONS ON PRESERVATIVE QUALITY OF CREOSOTE ...Creosote, Isopods, Petroleum Cpds. -non-specific, Preservatives, Wax, Paraffin, Wood Preservatives-non-specific, ...8.0198
- BIOCHEMISTRY OF MARINE ORGANISMS ...Adsorption & Interface, Bioluminescence, Phytoplankton, Plant Succession, Spectroscopy, ...5.0766
- PRESERVATION OF WOODS IN THE MARINE ENVIRONMENT ...Biological, Habitat Studies, Marine Fungi (non-specific), Materials Used Undersea, Preservatives, Wood, ...8.0216
- SUPPORTING TECHNOLOGY AT NAVAL RESEARCH LABORATORY ...Abyssal, Microorganisms (non-specific), Organics, Submersibles, ...8.0217
- CORROSION MITIGATION ...Corrosion Prevention-other, Deep, Low Alloy Steels, Pre-stressed, Water, ...8.0205

## Foundations

### Deep

- SEA BED INSTALLATION ...Benthic-bottom, Diving and Scuba, Stabilization, Submersibles, Underwater-construction, ...8.0331
- CORROSION MITIGATION ...Corrosion Prevention-other, Fouling, Low Alloy Steels, Pre-stressed, Water, ...8.0205

### Foundations-general

- CIVIL ENGINEERING STRUCTURES IN THE OCEANS ...Coastal Engineering-other, Engineering Studies-other, Model Studies, Soil Dynamics, Waves, ...8.0340
- BOTTOM SOIL PROPERTIES AND FOUNDATIONS ...Bearing Capacity, Consolidation, Mechanical Properties, Shear Strength, Soil Testing-general, ...8.0332

## Freezing Techniques

- CRYOGENIC PRESERVATION OF VIABLE FISH SPERM ...Artificial Insemination, Cellular Physiology, Fish -non-specific, Male Gametes, ...5.0303
- CRYOGENIC PRESERVATION OF VIABLE FISH SPERM ...Fertility, Fish -non-specific, Male Gametes, Rapid Freeze, ...5.0310

### Freeze-dry Techniques

- FREEZING AND DRYING OF LIVING CELLS ...Animal Nematodes -non-specific, Cell Injury and Autolysis, Cell. env.(non-specific & Ot.), Mollusks -non-specific & Other, Tissue Techniques, ...5.0450

### Lyophilization

- COLLECTION AND EXTRACTION OF MARINE INVERTEBRATES AND PLANTS ...Collections, Extracts, Marine Plants, ...5.0697

### Rapid Freeze

- CRYOGENIC PRESERVATION OF VIABLE FISH SPERM ...Fertility, Fish -non-specific, Freezing Techniques, Male Gametes, ...5.0310

## Frequencies

### Audio Frequency

- ELECTRICAL PROPERTIES OF ICE ...Electrical, Phase Relationships, Sea Ice, ...3.0072
- BASIC ACOUSTICAL STANDARDS AND MICROPHONE CALIBRATION ...Acoustic, Acoustical, Calibration and Calibrators, Standards, Specifications, Transducers, ...8.0076

### Frequencies-other

- FREQUENCY TIME RESEARCH ENGINEERING ...Amplifiers, Electromagnetic Transmission, Frequency Conversion, Time Measurements, Very Low Frequency, ...8.0068

### Frequency Conversion

- FREQUENCY TIME RESEARCH ENGINEERING ...Amplifiers, Electromagnetic Transmission, Frequencies-other, Time Measurements, Very Low Frequency, ...8.0068

**Frequency Standards**

WWVB-WWVL BROADCASTS ...Low Frequency, Navigation, Radio, Signal Generators, Standards, Specifications, Time Measurements, Very Low Frequency, ...4.0090

**Radio Frequencies**

**Low Frequency**

WWVB-WWVL BROADCASTS ...Frequency Standards, Navigation, Radio, Signal Generators, Standards, Specifications, Time Measurements, Very Low Frequency, ...4.0090

**Very High Frequency**

VHF SATELLITE COMMUNICATIONS ...Navigation, Range and Tracking-other, Space Crafts, ...4.0105

SATELLITE COMMUNICATION TESTS ...Buoys, Forecasting-prediction, Marine Environments-general, Satellites, Telemetry-other, ...4.0001

**Very Low Frequency**

FREQUENCY TIME RESEARCH ENGINEERING ...Amplifiers, Electromagnetic Transmission, Frequencies-other, Frequency Conversion, Time Measurements, ...8.0068

WWVB-WWVL BROADCASTS ...Frequency Standards, Low Frequency, Navigation, Radio, Signal Generators, Standards, Specifications, Time Measurements, ...4.0090

VLF TIMING STUDIES ...Attenuation, Absorption, Electromagnetic Transmission, Navigation, Standards, Specifications, Time Measurements, ...4.0092

**Fresh Water**

STUDIES OF FISH ENDOCRINOLOGY ...Environmental Physiology, Hormone, Killifishes - Cyprinodon, Testes, Thyroid, ...5.0246

FISH COLLECTION OF NORTH CAROLINA AND WESTERN ATLANTIC FISHES ...Atlantic Ocean-north, Collections, Fish - non-specific, North Carolina, ...5.0133

OREGON FISHES - THEIR CLASSIFICATIONS, DISTRIBUTIONS AND LIFE HISTORIES ...Animal Taxonomy, Life History Studies, Oregon, Vertical Distribution, ...5.0137

OREGON FISHES - THEIR CLASSIFICATION, DISTRIBUTION AND BIOLOGY ...Animal Taxonomy, Fish -non-specific, Oregon, Vertical Distribution, ...5.0138

FLOW AND SALINITY IN THE HUDSON ESTUARY, NEW YORK ...Estuaries, Inflow, Management, Salinity, Tides, ...2.0075

REMOTE SENSING, GULF COASTAL AREA, CENTRAL FLORIDA ...Aircraft, Aquifers, Saline Water Systems, Temperature, Tides, ...4.0160

MARINE BIOLOGICAL INVESTIGATIONS - TAXONOMIC COLLECTION OF THE FRESH AND SALTWATER FISHES OF ALASKA ...Alaska, Animal Taxonomy, Collections, Fish - non-specific, ...5.0008

CONTROL OF OXIDATIVE CHANGES IN FRESHWATER FISH ...Chemical Analysis, Fish -non-specific, Freezing, Organoleptic Studies, Rancidity, ...6.0045

**Fuels**

COMBUSTION OF RESIDUAL FUEL WITH MASSIVE RECIRCULATION ...Alloys, Atmospheric, Gases, Combustion Products, ...8.0226

A PILOT PLANT STUDY OF LOW EXCESS AIR COMBUSTION - ITS EFFECT ON FIRESIDE PROBLEMS IN OIL FIRED BOILERS ...Boilers, Combustion Products, Combustion-other, Maintenance-system, ...8.0168

**Fungal Physiology**

**Growth and Differentiation**

MARINE FUNGI DEGRADATION ...Cellulose, Fouling, Marine Fungi (non-specific), Nutrition Studies, ...8.0225

**Metabolism**

**Nutrition Studies**

MARINE FUNGI DEGRADATION ...Cellulose, Fouling, Growth and Differentiation, Marine Fungi (non-specific), ...8.0225

**Pathological Physiology**

BIOLOGICAL ACTIVITIES OF MARINE FUNGI ...Endoparasites -other, Host-parasite Interactions, Invertebrate Pathology, Marine Fungi (non-specific), Oysters, Plant Developmental Biology, ...5.0699

**Fungi**

**Aquatic Fungi (non-specific)**

SYSTEMATICS, MORPHOLOGY, AND ECOLOGICAL DISTRIBUTION OF ALGO AND WOOD-INHABITING MARINE AND FRESHWATER FUNGI OF SURTSEY AND ICELAND ...Iceland, Islands, Marine Fungi (non-specific), Plant Taxonomy, Range Or Territorial Distr. , ...5.0714

LACUSTRINE AND ESTUARINE FUNGI ...Host-parasite Interactions, Marine Fungi (non-specific), Phytoplankton, Plant Morphology, Plant Taxonomy, Range Or Territorial Distr. , ...5.0731

**Dermocystidium**

STUDIES ON THE DEVELOPMENT OF DERMOCYSTIDIUM MARINUM ...Cell Cycle, Control and Prevention, Fungal Culture, Oysters, Pathology, ...5.0836

**Marine Fungi (non-specific)**

SYSTEMATICS, MORPHOLOGY, AND ECOLOGICAL DISTRIBUTION OF ALGO AND WOOD-INHABITING MARINE AND FRESHWATER FUNGI OF SURTSEY AND ICELAND ...Aquatic Fungi (non-specific), Iceland, Islands, Plant Taxonomy, Range Or Territorial Distr. , ...5.0714

MICROBIOLOGICAL INVESTIGATIONS OF THRESHOLD PANELS ...Catabolism and Degradation, Degradation, Freshwater Mussels, Scallops, Marine Bacteria, Wood, Wood Preservatives-non-specif, ...8.0243

MORPHOLOGY AND TAXONOMY OF MARINE FUNGI ...Habitat Studies, Mangroves, Plant Morphology, Plant Taxonomy, Sub - Tropic, Tropic, ...5.0716

LACUSTRINE AND ESTUARINE FUNGI ...Aquatic Fungi (non-specific), Host-parasite Interactions, Phytoplankton, Plant Morphology, Plant Taxonomy, Range Or Territorial Distr. , ...5.0731

DISTRIBUTION OF ANTARCTIC MARINE FUNGI ...Antarctica, Phycomycetes, Plant Taxonomy, Range Or Territorial Distr. , Ships and Cruises, Vertical Distribution, ...5.0694

MICROBIAL CORROSION IN THE MARINE ENVIRONMENT ...Biodegradation, Biological, Carbon, Fouling, Water, ...5.0769

MARINE FUNGI DEGRADATION ...Cellulose, Fouling, Growth and Differentiation, Nutrition Studies, ...8.0225

EXPERIMENTAL ECOLOGY OF LOWER MARINE FUNGI ...Habitat Studies, Phycomycetes, Plant Developmental Biology, ...5.0808

PRESERVATION OF WOODS IN THE MARINE ENVIRONMENT ...Biological, Fouling, Habitat Studies, Materials Used Undersea, Preservatives, Wood, ...8.0216

COMPARATIVE BIOCHEMICAL AND MORPHOLOGICAL CHARACTERISTICS OF MARINE FUNGI FROM SHELLFISH ...Endoparasites -other, Fungal Culture, Histochemistry - Cytochem, Histology and Cytology, Plant Taxonomy, ...5.0791

WATER QUALITY AND FUNGI-NEMATODE-SEAGRASS RELATIONSHIPS ...Elodea, Waterweed, Thalassia, Florida, Habitat Studies, Nematoda -other, ...5.0878

BIOLOGICAL ACTIVITIES OF MARINE FUNGI ...Endoparasites -other, Host-parasite Interactions, Invertebrate Pathology, Oysters, Pathological Physiology, Plant Developmental Biology, ...5.0699

**Mycorrhiza**

SUPPORT FOR THE PHYSIOLOGICAL RESEARCH SHIP, R/V ALPHA HELIX ...Insecticides -non-specific, Nerve Effects, Rain Forests, Regulation, Tropic, ...12.0011

**Myxomycetes**

ULTRASTRUCTURAL STUDIES OF PARASITIC AND SAPROPHYTIC FUNGI AND PROTOZOA ASSOCIATED WITH MARINE INVERTEBRATES ...Cell Cycle, Electron Microscopy, Host-parasite Interactions, Protozoa, ...5.0839

STUDIES ON THE PROTISTAN CAUSING MALPEQUE DISEASE ...Invertebrate Pathology, Oysters, Pathology, Plant Taxonomy, Range Or Territorial Distr. , ...5.0498

## Fungi

## SUBJECT INDEX

### Phycomycetes

DISTRIBUTION OF ANTARCTIC MARINE FUNGI ...Antarctica, Marine Fungi (non-specific), Plant Taxonomy, Range Or Territorial Distr., Ships and Cruises, Vertical Distribution, ...5.0694

EXPERIMENTAL ECOLOGY OF LOWER MARINE FUNGI ...Habitat Studies, Marine Fungi (non-specific), Plant Developmental Biology, ...5.0808

### Yeasts (non-specific)

ISOLATION AND TAXONOMY OF YEASTS IN LAKES AND SEWAGE ...Bioindicators, Contamination, Pollution-water, Plant Taxonomy, Streams, ...5.0787

## Fur-bearing Animals

### Management

BOTTOM FISH, FISH WASTE, SCRAP FISH & OTHER SEA PRODUCTS FOR FUR ANIMAL DIETS ...Alewife, menhaden, shad, herring, Antioxidants, Chubs, Notropis, Fish Meals, Sea Lions, Fur Seals, ...6.0001

## Gaging

MEASUREMENT OF SURGING IN KUHIO BAY, HILO HAWAII ...Harbors, Hawaii, Tsunami, Water Motion Recorders, Waves, ...2.0112

INTERCOMPARISON OF TOWING TANK AND WATER TUNNEL CALIBRATION OF CURRENT METERS ...Tanks, Turbulent Flow, Water Tunnels Tables, ...8.0074

## Gas Generator

HYDROGEN-OXYGEN FUEL CELLS ...Encapsulation, Fuel Cell-other, Oxidants, Safety, Submersibles, ...8.0160

## Generators

LOADING CHARACTERISTICS OF A CHARGE-CONSTRAINED SYNCHRONOUS GENERATOR ...Power Conversion Systems, ...8.0163

THERMO-ELECTRIC GENERATORS ...Buoys, Thermoelectric, ...8.0162

## Genetics

### Environment Effects on Genome

#### Mutagens

SURVIVAL MECHANISM OF IRRADIATED BACTERIA IN FOODS ...Achromobacter Sp, Antibiotics, Cell Injury and Autolysis, Fish -non-specific, Radiation, ...6.0069

SELECTIVE BREEDING OF THE AMERICAN OYSTER, CRASSOSTREA VIRGINICA (GENETICS OF SHELLFISH PROGRAM) ...Karyotypes, Morphological Action, Oysters, Reproductive System, Selection & Breeding, ...5.0376

GENETIC REGULATION OF HEMOGLOBIN SYNTHESIS IN ARTEMIA ...Environmental Physiology, Hemoglobin, Marker, Shrimps - Brine Or Fairy, ...5.0365

### Gene Action

NUCLEIC ACID AND PROTEIN SYNTHESIS DURING OOGENESIS ...Autoradiography, Basic Embryology, Gastropods -slugs, conch, snails, Lugworms, Marine Segmented-worm, Reproductive System, ...5.1024

### Disease & Anomalies

AN EXPERIMENTAL APPROACH TO THE GENETIC CONTROL OF MORPHOGENESIS IN ECHINODERMS ...Biosynthesis, Developmental Physiology, Sea Urchins & Other Echinoderm, ...5.0608

### Interspecific Genetic Relat.

ANTIGEN DISTRIBUTION OF DEVELOPING SEA URCHIN EMBRYOS ...Antigen, Basic Embryology, Immunity, RNA, Sea Urchins & Other Echinoderm, ...5.0585

### Marker

GENETIC REGULATION OF HEMOGLOBIN SYNTHESIS IN ARTEMIA ...Environmental Physiology, Hemoglobin, Mutagens, Shrimps - Brine Or Fairy, ...5.0365

### Metabolic-biochemical Genetics

RNA SYNTHESIS DURING SEA URCHIN DEVELOPMENT ...Basic Embryology, Differentiation Mechanism, Mitochondria, Replication, Sea Urchins & Other Echinoderm, ...5.0611

DEGRADATION OF MARINE SURFACES BY SALT REQUIRING BACTERIA ...Control and Regulation, Dna-satellite, Fouling, Halophilic Bacteria, Isolation From Nat. environ., ...5.0818

MORPHOGENESIS OF THE BACTERIOPHAGE ...Composition, Electron Microscopy, Escherichia Coli, Microorganism Proteins, Morphological Action, ...5.0792

### Morphological Action

MORPHOGENETIC MOVEMENTS IN FISH EMBRYOS ...Basic Embryology, Fish -non-specific, ...5.0281

HEMOGLOBIN VARIATIONS AS INDICATORS OF WHITE MARLIN RACES ...Hemoglobin, Marlin, Billfishes, Sailfish..., ...5.0322

SELECTIVE BREEDING OF THE AMERICAN OYSTER, CRASSOSTREA VIRGINICA (GENETICS OF SHELLFISH PROGRAM) ...Karyotypes, Mutagens, Oysters, Reproductive System, Selection & Breeding, ...5.0376

MORPHOGENESIS OF THE BACTERIOPHAGE ...Composition, Electron Microscopy, Escherichia Coli, Metabolic-biochemical Genetics, Microorganism Proteins, ...5.0792

### Genetic Mechanisms

#### Cytoplasmic Inheritance

GROWTH AND DIFFERENTIATION OF PLASTIDS ...Acetabularia, Biosynthesis, DNA Other, Nucleus (non-specific & Ot.), Organelle Culture, Photosynthetically Active, ...5.0683

#### Replication

MOLECULAR ASPECTS OF CELLULAR DIFFERENTIATION AND DIVISION ...Basic Embryology, Biosynthesis, Cell Cycle, Differentiation Mechanism, Proteins, Sea Urchins & Other Echinoderm, ...5.0985

RNA SYNTHESIS DURING SEA URCHIN DEVELOPMENT ...Basic Embryology, Differentiation Mechanism, Metabolic-biochemical Genetics, Mitochondria, Sea Urchins & Other Echinoderm, ...5.0611

### Karyotypes

FAMILIAL RELATIONSHIPS IN TELEOST FISHES ...Animal Taxonomy, Comparative Anatomy, Fish -other, Genetic, Nomenclature, Classification, ...5.0148

HYBRIDIZATION STUDIES ON THE AMERICAN OYSTER, CRASSOSTREA VIRGINICA (GENETICS OF SHELLFISH PROGRAM) ...Heterosis, Heterozygote, Inbreeding, Oysters, Selection & Breeding, ...5.0375

SELECTIVE BREEDING OF THE AMERICAN OYSTER, CRASSOSTREA VIRGINICA (GENETICS OF SHELLFISH PROGRAM) ...Morphological Action, Mutagens, Oysters, Reproductive System, Selection & Breeding, ...5.0376

#### Sets of Chromosomes

CYTOTAXONOMIC STUDIES OF TELEOST FISHES ...Abyssal, Animal Taxonomy, Blood Cells, Minnows, ...5.0242

### Population Studies (genetics)

#### Heterosis

HYBRIDIZATION STUDIES ON THE AMERICAN OYSTER, CRASSOSTREA VIRGINICA (GENETICS OF SHELLFISH PROGRAM) ...Heterozygote, Inbreeding, Karyotypes, Oysters, Selection & Breeding, ...5.0375

#### Heterozygote

HYBRIDIZATION STUDIES ON THE AMERICAN OYSTER, CRASSOSTREA VIRGINICA (GENETICS OF SHELLFISH PROGRAM) ...Heterosis, Inbreeding, Karyotypes, Oysters, Selection & Breeding, ...5.0375

#### Inbreeding

HYBRIDIZATION STUDIES ON THE AMERICAN OYSTER, CRASSOSTREA VIRGINICA (GENETICS OF SHELLFISH PROGRAM) ...Heterosis, Heterozygote, Karyotypes, Oysters, Selection & Breeding, ...5.0375

#### Polymorphism

POPULATION GENETICS AND LARVAL ECOLOGY OF HAWAIIAN LITTORINA ...Derivatives, Gastropods

## SUBJECT INDEX

## Geochemistry

slugs, conch, snails, Hawaii, Maturity & Growth Stages, ...5.0429

**BLOOD TYPES AS INDICATORS OF BLUEFISH RACES** ...Blood Cells, Blood Plasma and Serum, Blood Typing Studies, Bluefish, Immunology, ...5.0319

**HEMOGLOBIN VARIATIONS AS INDICATORS OF BLUEFISH RACES** ...Animal Taxonomy, Bluefish, Hemoglobin, Reproduction Studies (general), ...5.0320

**BLOOD TYPES AS INDICATORS OF WHITE MARLIN RACES** ...Blood Plasma and Serum, Blood Typing Studies, Marlin, Billfishes, Sailfish..., Statistics-general, ...5.0321

### Population -other

**RELATIONSHIPS AMONG POPULATIONS OF LIMNORIA TRIPUNCTATA** ...Animal Taxonomy, Isopods, Population Dynamics, Reproductive System, ...5.0477

**FISH GENETICS AND ECOLOGY** ...DNA Other, Estuaries, Fish -non-specific, Life History Studies, ...5.0309

**HEMOGLOBIN VARIATIONS AS INDICATORS OF BLUEFISH RACES** ...Animal Taxonomy, Bluefish, Hemoglobin, Polymorphism, Reproduction Studies (general), ...5.0320

**HEMOGLOBIN VARIATIONS AS INDICATORS OF WHITE MARLIN RACES** ...Hemoglobin, Marlin, Billfishes, Sailfish..., Morphological Action, ...5.0322

**RACIAL STUDIES OF HERRING** ...Alewife, menhaden, shad, hering, Animal Taxonomy Atlantic Ocean-north, Biochemical Analysis, Blood Typing Studies, Management -other, ...5.0265

**STOCK IDENTIFICATION OF ATLANTIC TUNAS** ...Atlantic Ocean-general, Caribbean Sea, Electrophoresis -non-specific, Tuna, Mackerel, Albacore..., ...5.0252

**PROVIDE FOR ACTIVITIES OF TUNA BLOOD GROUP CENTER** ...Blood Plasma and Serum, Blood Typing Studies, Hawaii, Immunology Methods, Tuna, Mackerel, Albacore..., ...5.0258

### Selection & Breeding

**PHYSIOLOGY OF FERTILIZATION AND NUCLEO-CYTOPLASMIC INTERACTIONS IN SEA URCHIN DEVELOPMENT** ...Basic Embryology, Messenger RNA, Nucleus (non-specific & Ot.), Reproductive System, Sea Urchins & Other Echinoderm, ...5.0673

**CYTOTAXONOMY OF SPECIES OF RELATED PELECYPOD MOLLUSKS** ...Animal Taxonomy, Clams, Derivatives, Invertebrate Anatomy, Oysters, ...5.0413

**ARTIFICIAL SELECTION - FISH** ...Female Gametes, Fish -non-specific, Genetic Resistance, Pesticides -non-specific, Pollution - Effects of, ...5.0256

**HYBRIDIZATION STUDIES ON THE AMERICAN OYSTER, CRASSOSTREA VIRGINICA (GENETICS OF SHELLFISH PROGRAM)** ...Heterosis, Heterozygote, Inbreeding, Karyotypes, Oysters, ...5.0375

**SELECTIVE BREEDING OF THE AMERICAN OYSTER, CRASSOSTREA VIRGINICA (GENETICS OF SHELLFISH PROGRAM)** ...Karyotypes, Morphological Action, Mutagens, Oysters, Reproductive System, ...5.0376

## Geochemical Analysis

**GEOCHEMICAL STUDIES OF CONTINENTAL WATERS** ...Authigenesis, Element Ratios, Isotope, Isotope Tracer-other, Location, Pore Fluids, Radioisotopes, Water Analysis, ...1.0121

**COLUMBIA RIVER SEDIMENT STUDIES** ...Columbia River, Radioactivity-general, Radiochemical Analysis, Sediments, Self-purification, ...6.0190

## Geochemistry

**THE GEOCHEMISTRY, MINERALOGY AND ORIGIN OF PELAGIC SEDIMENTS IN AREAS OF HIGH HEAT FLOW AND FRACTURE ZONES** ...Chemistry, Diagenesis, Heat Flow Measurements, Mineralogy, Origin, Sedimentation, ...7.0227

### Biosphere

#### Living Organisms

**STABLE ISOTOPE FRACTIONATION IN ECHINODERM CALCITE** ...Animal Taxonomy, Biogeochemical Process, Calcite, Carbon, Marine Organisms, Oxygen, Sea Feathers, sea Lily..., Sea Urchins & Other Echinoderm, ...7.0085

#### Marine Organisms

**STABLE ISOTOPE FRACTIONATION IN ECHINODERM CALCITE** ...Animal Taxonomy, Biogeochemical Process,

Calcite, Carbon, Living Organisms, Oxygen, Sea Feathers, sea Lily..., Sea Urchins & Other Echinoderm, ...7.0085

**PALEOTEMPERATURE RESEARCH** ...Core Analysis, Order Foraminifera, Paleotemperature, Quaternary Period, ...7.0161

## Crystal Chemistry

### Crystal Growth

**RECENTLY PRECIPITATED DOLOMITES AND ASSOCIATED MINERALS** ...Clay Minerals-general, Dolomite, Mineral Type, Phase Relationships, Precipitates, Silicate-general, ...7.0096

### Descriptions of Minerals

**MINERALOGICAL CONTROLS ON THE CHEMICAL COMPOSITION OF OCEAN WATER** ...Chemical Reactions, Clay Minerals-general, Mexico, Mineralogy, Silicate-general, ...1.0118

**A STUDY OF THE LEAD OXYCHLORIDES AND RELATED SPECIES FOUND IN THE ANCIENT SLAGS OF LAURIIUM, GREECE** ...Chemical Reactions, Greece, Mine Wastes, Mineral Genesis, Silver, ...7.0058

### Phase Relationships

**ELECTRICAL PROPERTIES OF ICE** ...Audio Frequency, Electrical, Sea Ice, ...3.0072

**PHASE RELATIONS OF THE HYDRATED CARBONATES OF CALCIUM AND MAGNESIUM** ...Carbonate, Bicarbonate, Equilibrium - Chemical, Interfacial, Properties and Structure, Surface Chemistry, ...3.0085

**RECENTLY PRECIPITATED DOLOMITES AND ASSOCIATED MINERALS** ...Clay Minerals-general, Crystal Growth, Dolomite, Mineral Type, Precipitates, Silicate-general, ...7.0096

### Properties and Structure

**PHASE RELATIONS OF THE HYDRATED CARBONATES OF CALCIUM AND MAGNESIUM** ...Carbonate, Bicarbonate, Equilibrium - Chemical, Interfacial, Phase Relationships, Surface Chemistry, ...3.0085

### Surface Chemistry

**PHASE RELATIONS OF THE HYDRATED CARBONATES OF CALCIUM AND MAGNESIUM** ...Carbonate, Bicarbonate, Equilibrium - Chemical, Interfacial, Phase Relationships, Properties and Structure, ...3.0085

## Experimental Geochemistry

### Geologic Thermometry

**CARBON ISOTOPE GEOTHERMOMETRY** ...Carbon, Carbonaceous Substance, Chemistry, Core Analysis, Paleotemperature, Plankton (non-specific), Temperature, ...7.0079

### High Pressure Research

**HIGH PRESSURE ROCK STUDIES** ...Attenuation, Crystalline, High Temperature Research, Rock Mechanics, ...8.0336

**RESEARCH ON THE PHYSICAL CHEMISTRY OF CHEMICAL REACTIONS IN SEA WATER** ...Acids, Apatite-general, Carbonate, Bicarbonate, Chemical Reactions, Equilibrium - Chemical, Reaction-general, Solubility, Sulfate, Sulfite, ...1.0127

**UPPER MANTLE OF OCEAN REGIONS** ...Earth Interior, Extrusives, High Temperature Research, Lava, Petrology, Ridges, ...7.0053

**EFFECT OF PRESSURE ON MATERIALS** ...High Temperature Research, Non Specific, ...8.0211

### High Temperature Research

**HIGH PRESSURE ROCK STUDIES** ...Attenuation, Crystalline, High Pressure Research, Rock Mechanics, ...8.0336

**UPPER MANTLE OF OCEAN REGIONS** ...Earth Interior, Extrusives, High Pressure Research, Lava, Petrology, Ridges, ...7.0053

**EFFECT OF PRESSURE ON MATERIALS** ...High Pressure Research, Non Specific, ...8.0211

### Hydrothermal Minerals

**DEEP OCEAN AS RECIPIENT OF VOLATILES AND SOLUTES** ...Igneous Activity - Volcanism, Lithology, Pacific Ocean-east, Ridges, Sea Floor Spreading, Thermal Features, Water Analysis-general, ...7.0095

## Geochemistry

## SUBJECT INDEX

### Mineral Equilibra

MINERAL-WATER CHEMISTRY, GREAT LAKES ...Chemical Reactions, Great Lakes-general, Mineral Equilibra, Model Studies, Phase Relationships, Solution Chemistry, ...1.0117

### Phase Relationships

MINERAL-WATER CHEMISTRY, GREAT LAKES ...Chemical Reactions, Great Lakes-general, Mineral Equilibra, Mineral Genesis, Model Studies, Solution Chemistry, ...1.0117

### Solution Chemistry

ALTERATION OF MINERALS ...Aragonite, Chemistry, Mineralogy, Saline Water Systems, Silicates, ...7

SOLUTION-SILICATE REACTIONS AND ...MINERAL EQUILIBRA ...Chemical Reactions, Chemistry, Equilibra, Groundwater, Reaction-general, Silicate-general, Solution, ...1.0097

CHEMICAL EXCHANGES ACROSS SEDIMENT-WATER INTERFACES ...Chemical, Chemical-general, Estuaries, Exchange Capacity, Salinity, ...7.0279

MINERAL-WATER CHEMISTRY, GREAT LAKES ...Chemical Reactions, Great Lakes-general, Mineral Equilibra, Mineral Genesis, Model Studies, Phase Relationships, ...1.0117

### Stability Fields

ROCKS OF OCEANIC CRUST AND UPPER MANTLE EQUATORIAL ATLANTIC ...Atlantic Ocean-general, Crust, Earth Interior, Ocean Basins, Petrogenesis-general, Petrology, ...7.0059

## Geochemical Investigations

### Element Ratios

THE GEOCHEMISTRY OF RADIOACTIVE ELEMENTS IN THE MARINE ENVIRONMENT - THE GEOCHEMISTRY OF LANDLOCKED SEAS ...Distribution, Oceans - Sea Water, Radioactive Dating, Sedimentation, Uranium, ...1.0095

GEOCHEMICAL STUDIES OF CONTINENTAL WATERS ...Authigenesis, Geochemical Analysis, Isotope, Isotope Tracer-other, Location, Pore Fluids, Radioisotopes, Water Analysis, ...1.0121

DEPOSITION RATES BY THE PROTACTINIUM METHOD ...Chemical, Distribution, Manganese, Sedimentary Petrogenesis, Thermal, Thorium, Uranium, ...7.0270

AZORES VOLCANIC STUDY ...Atlantic Ocean-general, Azores, Igneous Activity - Volcanism, Ridges, Volcanic, ...8.0195

STABLE CARBON AND OXYGEN ISOTOPE RATIO VARIATIONS IN THE FLOW TO CARBON AND OXYGEN THROUGH THE FLOW AND POLLUTED AQUATIC SYSTEMS ...Carbon, Organic-general, Oxygen, Pollutants - Path of, Sewerage Systems-other, Water Analysis, ...1.0132

RARE GAS STUDY OF INTERPLANETARY MATERIAL IN PELAGIC SEDIMENTS ...Chemistry, Cosmogenous, Equipment Purchase Operation, Mass Spectroscopy, Mineralogy, X-ray, ...7.0081

STABILITY OF FLUORIDE VARIATIONS IN SEA WATER ...Atlantic Ocean-general, Chloride, Extrusives, Fluoride, Water Analysis-general, ...1.0105

TRACE ELEMENT AND STABLE ISOTOPE STUDIES OF CORAL REEF CARBONATES ...Diagenesis, Fossil Limestone, Paleoenvironments, Reefs, Trace Element Analysis, ...7.0086

ELEMENT CHEMISTRY ...Atomic Absorption, Industrial Wastes, Oceanic Fronts, Water Chemistry-other, ...1.0113

GEOCHEMICAL INVESTIGATIONS IN PUERTO RICO & THE CARIBBEAN ...Caribbean Sea, Plutonic, Puerto Rico, Sedimentary Petrology, Volcanic, ...7.0042

DISTRIBUTION OF ELEMENTS IN FLUVIAL AND BRACKISH ENVIRONMENTS ...Adsorption, Adsorption Capacity, Brackish Water, Chemical Reactions, Exchange Capacity, Solution, ...7.0221

### Genetic Relationships

STABLE ISOTOPE STUDIES ON COEXISTING MINERALS IN MARINE SEDIMENTS ...Coring and Dredging, Diagenesis, Mineralogy, Red Sea, Salinity, Thermal, ...1.0106

KAOLINITE AS RELATED TO ENVIRONMENT OF DEPOSITION ...Diagenesis, Environment, Kaolinite, Mineral Type, ...7.0239

### Geologic Age Relations

POTASSIUM/ARGON DATING OF DEEP-SEA SAMPLES ...Abyssal, Argon-potassium, Microfossils, Radioactive Dating, Sea Floor Spreading, Tertiary Period, ...7.0066

AGE RELATIONS OF IGNEOUS ROCKS FROM THE MID-ATLANTIC RIDGE ...Extrusives, Foliated Rocks, Rare Earth Studies, Ridges, Trace Element Analysis, ...7.0080

### Mineral Associations

GEOCHEMISTRY OF SAN FRANCISCO BAY ...Bays, Clays, Distribution, San Francisco Bay, Trace Element Analysis, ...1.0074

### Mineral Genesis

MARINE GEOCHEMISTRY RESEARCH ...Depth, Gases, Mineralogy, Radioactive Dating, Sedimentation, Thermodynamics, ...7.0055

MINERAL-WATER CHEMISTRY, GREAT LAKES ...Chemical Reactions, Great Lakes-general, Mineral Equilibra, Model Studies, Phase Relationships, Solution Chemistry, ...1.0117

A STUDY OF THE LEAD OXYCHLORIDES AND RELATED SPECIES FOUND IN THE ANCIENT SLAGS OF LAURIUM, GREECE ...Chemical Reactions, Descriptions of Minerals, Greece, Mine Wastes, Silver, ...7.0058

### Nuclear - General

NUCLEAR CHEMISTRY AND GEOCHEMISTRY RESEARCH ...Iron, ...7.0082

### Rare Earth Studies

CIRCULATION-OCEANOGRAPHY ...Biogeochemical Process, Circulation-general, Geologic, Organics, Trace Elements, ...1.0129

ISOTOPIC AND TRACE ELEMENT STUDIES IN OCEANIC VOLCANIC ROCKS ...Igneous Rocks, Lead, Magma, Magmas, Petrology, Strontium, Trace Element Analysis, Volcanic, ...7.0075

AGE RELATIONS OF IGNEOUS ROCKS FROM THE MID-ATLANTIC RIDGE ...Extrusives, Foliated Rocks, Geologic Age Relations, Ridges, Trace Element Analysis, ...7.0080

### Trace Element Analysis

TRACE ELEMENTS IN SEA WATER ...Activation Analysis, Isotope Tracer-other, Long Island Sound, Radioactivity-general, ...1.0085

THE BIOLOGY AND CHEMISTRY OF TRACE ELEMENTS IN MARINE AND ESTUARINE WATERS ...Chesapeake Bay, Estuaries, Phytoplankton, Productivity - Food Chain, Zooplankton, ...5.0975

ISOTOPIC AND TRACE ELEMENT STUDIES IN OCEANIC VOLCANIC ROCKS ...Igneous Rocks, Lead, Magma, Magmas, Petrology, Rare Earth Studies, Strontium, Volcanic, ...7.0075

TRACE ELEMENT AND STABLE ISOTOPE STUDIES OF CORAL REEF CARBONATES ...Diagenesis, Element Ratios, Fossil Limestone, Paleoenvironments, Reefs, ...7.0086

ROLE OF WIND-BORNE CONTINENTAL DUST IN OCEAN SEDIMENTATION PROCESSES ...Distribution, Dust - Particulate Matter, Location, Rate of Deposition, Terrigenous, ...7.0230

STRONTIUM ISOTOPE COMPOSITION AND TRACE ELEMENT CONCENTRATIONS IN LAKE HURON AND ITS PRINCIPAL TRIBUTARIES ...Chemical, Ions and Gases, Lake Huron, Rocks - Bedrock, Strontium, ...1.0124

DIAGENESIS OF CARBONATE SEDIMENTS ...Carbonates-general, Core Analysis, Diagenesis, Geochemistry-general, Pore Fluids, ...7.0266

AGE RELATIONS OF IGNEOUS ROCKS FROM THE MID-ATLANTIC RIDGE ...Extrusives, Foliated Rocks, Geologic Age Relations, Rare Earth Studies, Ridges, ...7.0080

GEOCHEMISTRY OF SAN FRANCISCO BAY ...Bays, Clays, Distribution, Mineral Associations, San Francisco Bay, ...1.0074

PRELIMINARY STUDIES TO CORRELATE SELECTED MINERALOGIC AND GEOLOGIC PROPERTIES WITH ENGINEERING PROPERTIES ...Alaska, Engineering Geology, Mineralogy, Petrology, Ships and Cruises, ...8.0169

## Geochemistry-general

DIAGENESIS OF CARBONATE SEDIMENTS ...Carbonates-general, Core Analysis, Diagenesis, Pore Fluids, Trace Element Analysis, ...7.0266

## Hydrosphere

### Oceans - Sea Water

THE GEOCHEMISTRY OF RADIOACTIVE ELEMENTS IN THE MARINE ENVIRONMENT - THE GEOCHEMISTRY OF LANDLOCKED SEAS ...Distribution, Element Ratios, Radioactive Dating, Sedimentation, Uranium, ...1.0095

## SUBJECT INDEX

## Geodetic Instrumentation

TECTONIC AND GEOLOGICAL HISTORY OF THE SOUTHWEST PACIFIC REGION ...Gases, Geophysics-general, Island Arcs, Pacific Ocean-south, Structural Studies, Tectonics-general, ...7.0031

ISOTOPIC OCEANOGRAPHY ...Arctic Ocean, Data Acquisition, Radioactivity-general, Sampling, Trace Elements, ...1.0090

### Lithosphere

#### Magmas

ISOTOPIC AND TRACE ELEMENT STUDIES IN OCEANIC VOLCANIC ROCKS ...Igneous Rocks, Lead, Magma, Petrology, Rare Earth Studies, Strontium, Trace Element Analysis, Volcanic, ...7.0075

#### Ocean Bottom

GEOCHEMICAL STUDIES OF DEEP-SEA DEPOSITS - THEIR SOURCES AND MODES OF DEPOSITION ...Abyssal, Atlantic Ocean-general, Biogenous, Biogeochemical Process, Chemistry, Mineralogy, ...7.0057

### Meteorites

#### Iron

NUCLEAR CHEMISTRY AND GEOCHEMISTRY RESEARCH ...Nuclear - General, ...7.0082

NEUTRON ACTIVATION ANALYSIS OF IRON METEORITES ...Activation Analysis, Aluminum, Argon-potassium, Carbon, Cosmogenous, Neutron Activation, ...7.0065

#### Meteorites-general

ELECTRON MICROSCOPE AND ELECTRON DIFFRACTION STUDIES OF GEOLOGICAL SAMPLES ...Electron, Electron Microscopy, ...7.0278

### Organic Geochemistry

#### Biogeochemical Process

GEOCHEMISTRY OF NUCLEIC ACIDS ...Biochemical, Chemistry, Exobiology, Nucleic Acids -non-specific, Organic, ...7.0054

BIOGEOCHEMISTRY OF TERRESTRIAL & EXTRATERRESTRIAL ORGANIC MATTER ...Biochemical, Biogenous, Diagenesis, Exobiology, Organic, Sulfur Bacteria, ...7.0074

URANIUM GEOCHEMISTRY IN (MODERN) CARBONATES USING THE FISSION TRACK METHOD ...Carbonates-general, Chemistry, Diagenesis, Organism Sampling Devices, Uranium, ...7.0076

CHEMICAL OCEANOGRAPHY ...Circulation-general, Geologic, Organics, Rare Earth Studies, Trace Elements, ...1.0129

BIOGENESIS OF CARBONATE SEDIMENTS, BAHAMA ISLANDS ...Bioclastic Limestone, Biofacies, British West Indies, Classification - Taxonomy, Sedimentary Petrogenesis, ...7.0241

STABLE ISOTOPE FRACTIONATION IN ECHINODERM CALCITE ...Animal Taxonomy, Calcite, Carbon, Living Organisms, Marine Organisms, Oxygen, Sea Feathers, sea Lily... , Sea Urchins & Other Echinoderm, ...7.0085

GEOCHEMICAL STUDIES OF DEEP-SEA DEPOSITS - THEIR SOURCES AND MODES OF DEPOSITION ...Abyssal, Atlantic Ocean-general, Biogenous, Chemistry, Mineralogy, Ocean Bottom, ...7.0057

MECHANISMS OF CALCIUM CARBONATE DEPOSITION ...Barnacles, Calcium, Chemical Reactions, Derivatives, Fouling, ...5.1015

STUDIES IN MARINE CHEMISTRY ...Bone, Chemistry, Trace Elements, ...7.0068

#### Carbonaceous Substance

GEOCHEMICAL OCEANOGRAPHY ...Acids, Organic, Organics, ...1.0102

CARBON ISOTOPE GEOTHERMOMETRY ...Carbon, Chemistry, Core Analysis, Geologic Thermometry, Paleotemperature, Plankton (non-specific), Temperature, ...7.0079

### Geochronology

#### Geochronology-general

GEOLOGIC HISTORY OF PACIFIC FAUNAS ...Evolutionary Studies-general, Pacific Ocean-general, Paleocology, Paleontology, Sea Level Changes, ...7.0156

GEOCHEMISTRY OF MID-ATLANTIC RIDGE SEDIMENTS ...Atlantic Ocean-general, Chemistry, Core Analysis, Correlation, Ridges, ...7.0071

CORING OF THE VARVED SEDIMENTS IN SAANICH INLET ...Canada, Coring and Dredging, Local Stratigraphy, Pacific Ocean-east, Varves, ...7.0282

CORRELATION OF SUBMARINE VOLCANIC ASH BY CATHODO-LUMINESCENCE ...Correlation, Extrusives, Luminescence, Qualitative, Size, ...7.0255

UNIVERSITY OF SOUTHERN CALIFORNIA CONTRACT - CHANNEL ISLANDS AND BASINS SOUTHERN CALIFORNIA CONTINENTAL MARGIN ...California, Continental Shelf, Continents, General Mineralogic Properties, Mineralogy, ...7.0223

### Radioactivity Methods

#### Argon-potassium

NEUTRON ACTIVATION ANALYSIS OF IRON METEORITES ...Activation Analysis, Aluminum, Carbon, Cosmogenous, Iron, Neutron Activation, ...7.0065

DATING MARINE SEDIMENTS ...Loess, Optical, Origin, Radioactive Dating, Rate of Deposition, Terrigenous, ...7.0201

POTASSIUM/ARGON DATING OF DEEP-SEA SAMPLES ...Abyssal, Geologic Age Relations, Microfossils, Radioactive Dating, Sea Floor Spreading, Tertiary Period, ...7.0066

PETROLOGY AND GEOCHEMISTRY OF IGNEOUS ROCKS FROM THE OCEAN FLOOR ...Extrusives, Pacific Ocean-east, Petrography, Petrology, Ridges, Sima, ...7.0064

#### Carbon-14

CHEMICAL OCEANOGRAPHY ...Carbon, Chemical Reactions, Gulf of Mexico, Organics, Reaction-general, ...1.0131

CARBON-14 AGE PROFILE OF A HAWAIIAN REEF ...Anthozoa, Coring and Dredging, Growth Rate, Hawaii, Reefs, Sea Level Variations, ...7.0051

INVESTIGATION OF QUATERNARY SEA LEVEL CHANGES IN THE CAROLINE AND MARSHALL ISLANDS ...Emergent, Pacific Ocean-south, Quaternary Period, Reefs, Sea Level Variations, ...7.0159

RADIOCARBON DATING OF A HAWAIIAN REEF PROFILE ...Hawaii, Radioactive Dating, Reefs, Sea Level Variations, ...7.0087

AN INVESTIGATION OF THE MASS PHYSICAL PROPERTIES OF CARBONATE MUD SEDIMENTS ...Carbonates-other, Core Analysis, Density, Physical Properties, Porosity, ...7.0225

NATURAL RADIOCARBON MEASUREMENTS ...Facilities, Mixing, Oceanic Fronts, Pacific Ocean-general, Radioactivity, ...1.0084

PROPERTIES AND ORIGIN OF SEDIMENTS IN THE NORTHEAST PACIFIC OCEAN ...Core Analysis, Origin, Pacific Ocean-east, Physical Properties, Washington, ...7.0287

RELICT COPEPODS FROM LAKE TUBORG, ELLESMERE ISLAND ...Brackish Water, Canada, Copepods, Lakes, Plankton Sampling, ...5.0388

#### Uranium

INVESTIGATIONS OF URANIUM AND THORIUM SERIES ISOTOPE DISEQUILIBRIUM IN THE OCEAN AND IN PLEISTOCENE SEDIMENTS ...Chemistry, Glacial History, Quaternary Period, Radioactivity, Radium, Thorium, ...1.0120

THE GEOCHEMISTRY OF RADIOACTIVE ELEMENTS IN THE MARINE ENVIRONMENT - THE GEOCHEMISTRY OF LANDLOCKED SEAS ...Distribution, Element Ratios, Oceans - Sea Water, Radioactive Dating, Sedimentation, ...1.0095

### Geodesy

#### Geodetic Surveys

GRAVITY SURVEY ARCTIC OCEAN ...Bathymetry, Beaufort Sea, Continental Shelf, Gravity Studies, Seismic Studies, Structural Studies, ...7.0154

#### Standard Geoid

MARINE PHYSICAL GEODESY ...Aerospatial, Caribbean Sea, Gravity Studies, Navigation, Sea Level Variations, ...4.0058

### Geodetic Instrumentation

#### Gravimetric

NEW SEA GRAVITY METER ...Capacitance, Geophysical Equipment, Gravity Studies, Instrumental Services, Transducers, ...8.0067

## Geodetic Instrumentation

## SUBJECT INDEX

### Satellites

MARINE GRAVITY ...Gravity Studies, Gravity Surveys, Navigation, Variations, ...4.0107

### Geography-physical

PHYSICAL GEOGRAPHY OF TROPICAL COASTAL LOWLANDS ...Development, Physical, Physical Features-general, Shore Features-general, Tropic, ...7.0298

### Geologic History

#### Continents

UNIVERSITY OF SOUTHERN CALIFORNIA CONTRACT CHANNEL ISLANDS AND BASINS SOUTHERN CALIFORNIA CONTINENTAL MARGIN ...California, Continental Shelf, General Mineralogic Properties, Geochronology-general, Mineralogy, ...7.0223

#### Geologic History-general

FLORIDA CORAL REEF STUDIES ...Drilling and Coring, Environment, Florida, Quaternary Period, Reefs, ...7.0162

SEDIMENTOLOGY AND GEOLOGIC HISTORY OF HUMBOLDT BAY, CALIFORNIA ...Bays, California, Coring and Dredging, Pacific Ocean-east, Physical Properties, ...7.0193

#### Glacial History

INVESTIGATIONS OF URANIUM AND THORIUM SERIES ISOTOPE DISEQUILIBRIUM IN THE OCEAN AND IN PLEISTOCENE SEDIMENTS ...Chemistry, Quaternary Period, Radioactivity, Radium, Thorium, Uranium, ...1.0120

#### Island Arcs

TECTONIC AND GEOLOGICAL HISTORY OF THE SOUTHWEST PACIFIC REGION ...Gases, Geophysics-general, Tectonics - Sea Water, Pacific Ocean-south, Structural Studies, Tectonics-general, ...7.0031

#### Ocean Basins

REDUCTION AND INTERPRETATION OF PHYSIOGRAPHIC DATA ACQUIRED ABOARD LAMONT RESEARCH VESSELS ...Data Analysis - General, Data Reduction and Analysis, Geology-general, Geomorphology-topography, Physiography-general, ...7.0300

SUBMARINE GEOLOGY OF THE BAHAMAS AND THE WEST INDIAN ARC ...British West Indies, Geology-general, Ridges, Ships and Cruises, Trenches, ...7.0038

COLLECTION, REDUCTION, AND INTERPRETATION OF SEISMOLOGIC AND PHOTOGRAPHIC DATA ...Data Analysis - General, Distribution, Environment, Photography, Sedimentary History, Sedimentation, Seismic Studies, ...7.0262

GEOPHYSICAL AND GEOLOGICAL STUDY OF THE DARWIN RISE ...Bathymetry, Coring and Dredging, Geophysics-general, Gravity Studies, Magnetic Studies, Pacific Ocean-west, Photography, Refraction, Ridges, Seamounts-guyots, ...7.0112

PALaeONTOLOGY OF LATE CENOZOIC ANTARCTIC RADIOLARIA AND DIATOMS ...Antarctic Ocean, Antarctica, Class Algae, Correlation, Order Radiolaria, Paleomagnetism, Paleontology, Rate of Deposition, ...7.0185

JOINT STUDY OF THE CONTINENTAL MARGIN OFF OREGON BY OREGON STATE UNIVERSITY AND THE UNITED STATES GEOLOGICAL SURVEY ...Continental Shelf, Geophysics-general, Mineralogy, Oregon, Potential of Deposit, ...7.0046

ROCKS OF OCEANIC CRUST AND UPPER MANTLE EQUATORIAL ATLANTIC ...Atlantic Ocean-general, Crust, Earth Interior, Petrogenesis-general, Petrology, Stability Fields, ...7.0059

ROCKS OF THE OCEANIC CRUST ...Basins, Petrology, ...7.0061

#### Origin of Life

POLYPEPTIDE INTERACTIONS ON A STERILE SEASHORE ...Biochemical, Light-catalyzed, Melanin, Polypeptides, ...5.0942

#### Paleoclimatology

ABYSSAL SEDIMENTATION AND STRATIGRAPHY OFF OREGON ...Abyssal, Bathymetry, Coring and Dredging, Sedimentation, Turbidity Currents, ...7.0272

LITHOLOGICAL AND MICROPALaeONTOLOGICAL INVESTIGATION OF OCEAN SEDIMENT CORES ...Core Analysis, Correlation, Quaternary Period, Sedimentary History, Tertiary Period, ...7.0257

ELECTRON MICROSCOPY OF CALCAREOUS AND SILICEOUS PLANKTON FOR PALEOECOLOGIC AND PALEOCLIMATIC STUDIES ...Classification - Taxonomy, Electron, Order Foraminifera, Paleocology, Phylum Protozoa, Zoogeographic Environments, ...7.0183

THE SEDIMENTARY AND DIAGENETIC RECORD OF ENVIRONMENTAL PARAMETERS IN RECENT BAHAMIAN TIDAL FLATS ...British West Indies, Diagenesis, Environmental Effects-geologic, Intertidal Areas, Local Stratigraphy, ...7.0163

PLEISTOCENE OCEANOGRAPHY AS RECORDED IN DEEP SEA SEDIMENT CORES ...Core Analysis, Correlation, Geographical Relations, Paleotemperature, Quaternary Period, ...7.0165

FEASIBILITY OF THE APPLICATION OF PALYNOLOGICAL INVESTIGATION OF DEEP-SEA SEDIMENTS TO MAJOR GEOLOGICAL PROBLEMS ...Biology, Circulation-general, Pollen, Pollens, Spores, ...7.0206

CHRONOLOGY OF MARINE SEDIMENTS, CIRCULATION OF WATER AND TRACE ELEMENTS, SEDIMENTARY RECORD AND EXTRATERRESTRIAL ACCRETION ...Circulation-general, Cosmogenetic, Pacific Ocean-general, Sedimentary History, Trace Elements, ...1.0098

#### Paleotemperature

QUATERNARY ENVIRONMENTS AND BIOTAS ...Biofacies, Intertidal Areas, Population - Distribution, Quaternary Period, Western, ...7.0157

SUPPORT OF RESEARCH VESSELS JOHN ELLIOTT PILLSBURY, GERDA, TURSIOPS ...Microfossils, Mineralogy, Petrology, Seismic Studies, Ships and Cruises, ...12.0024

MULTIVARIATE ANALYSIS OF MICROPALaeONTOLOGICAL DATA FROM DEEP-SEA CORES ...Core Analysis, Data Reduction and Analysis, Development of Models, Multivariate Analysis, Order Foraminifera, Population - Distribution, ...5.0827

CARBON ISOTOPE GEOTHERMOMETRY ...Carbon, Carbonaceous Substance, Chemistry, Core Analysis, Geologic Thermometry, Plankton (non-specific), Temperature, ...7.0079

PALEOTEMPERATURE RESEARCH ...Core Analysis, Marine Organisms, Order Foraminifera, Quaternary Period, ...7.0161

PLEISTOCENE OCEANOGRAPHY AS RECORDED IN DEEP SEA SEDIMENT CORES ...Core Analysis, Correlation, Geographical Relations, Paleoclimatology, Quaternary Period, ...7.0165

STRATIGRAPHY AND PALEOECOLOGICAL OF FOSSIL SILICOFLAGELLATES FROM ANTARCTIC DEEP-SEA CORES ...Antarctic Ocean, Core Analysis, Correlation, Field Reversals, Fossil Zones, Paleontology, Phylum Protozoa, ...7.0169

#### Physiographic History

SUBSURFACE GEOLOGY OF HOGSTY REEF, AN ATOLL IN THE SOUTHEASTERN BAHAMAS ...Atolls, British West Indies, Paleoenvironments, Quaternary Period, Submergent, Subsurface, ...7.0037

#### Sea Level Changes

GEOLOGIC HISTORY OF BERMUDA AND ITS RELATIONSHIP TO THE WORLD PLEISTOCENE ...Bermuda, Correlation, Development, Local Stratigraphy, Quaternary Period, ...7.0155

GEOLOGIC HISTORY OF PACIFIC FAUNAS ...Evolutionary Studies-general, Geochronology-general, Pacific Ocean-general, Paleocology, Paleontology, ...7.0156

STRATIGRAPHIC RELATIONS BETWEEN A COQUINA FACIES OF THE YORKTOWN FORMATION AND OVERLYING SEDIMENTS AT CHUCKATUCK, VIRGINIA ...Fossil Limestone, Shore Features-general, Tertiary Period, Unconformities, Virginia, ...7.0254

MODERN VERSUS RELICT SEDIMENT PATTERNS ON CONTINENTAL MARGINS ...Bermuda, Canada, Continental Shelf, Distribution, Quaternary Period, ...7.0214

WESTERN PACIFIC ISLANDS ...Hawaii, Igneous Activity - Volcanism, Lava, Mapping, Petrology, ...7.0104

SEAWARD PENINSULA NEARSHORE ...Bering Sea, Heavy Minerals, Potential of Deposit, Submergent, Tectonics-general, ...7.0017

**Sedimentary History**

- (A) ANNUAL SUPPLY OF PARTICULATE MATTER IN THE GREAT BAY ESTUARY (B) LATE PLEISTOCENE HISTORY OF THE GREAT ...Estuaries, New Hampshire, Organics, Quaternary Period, Sampling, ...1.0155
- TIME DEPENDENT VARIATIONS IN SURFACE OCEANIC CIRCULATION ...Circulation-general, Ocean History, Pollution Sources-general, Temperature, Waste Disposal-general, ...2.0038
- LITHOLOGICAL AND MICROPALAEONTOLOGICAL INVESTIGATION OF OCEAN SEDIMENT CORES ...Core Analysis, Correlation, Paleoclimatology, Quaternary Period, Tertiary Period, ...7.0257
- EARLY DIAGENESIS OF CARBONATE SEDIMENTS IN A SUPRATIDAL EVAPORITIC SETTING ...Carbonates-general, Continental Shelf, Diagenesis, Origin, Persian Gulf, Sedimentation, ...7.0252
- MARINE GEOLOGY OF THE SUB-ANTARCTIC PACIFIC REGION ...Antarctic Ocean, Core Analysis, Diagenesis, Distribution, Origin, Petrology, ...7.0049
- STRATIGRAPHY OF UNCONSOLIDATED SEDIMENTS ON THE CONTINENTAL SHELVES OF THE CHUKCHI AND NORTHERN BERING SEAS ...Bering Sea, Chuckchi Sea, Continental Shelf, Core Analysis, Correlation, Oceanic Fronts, ...7.0286
- STRUCTURE OF CONTINENTAL RISE OFF EASTERN NORTH AMERICA ...Cenozoic Era-general, Continental Drift, Continental Slopes, Eastern, Sedimentation, ...7.0117
- GEOLOGIC SURVEY OF MARTABAN CANYON, NORTHEASTERN INDIAN OCEAN ...Andaman Sea, River Deltas, Submarine Canyons, Tectogenesis, Valleys, ...7.0039
- DEPOSITIONAL PROCESSES MARGINAL TO LARGE ANTARCTIC ICE SHELVES ...Antarctic Ocean, Core Analysis, Deposits, Environment, Sedimentation, ...7.0198
- COLLECTION, REDUCTION, AND INTERPRETATION OF SEISMOLOGIC AND PHOTOGRAPHIC DATA ...Data Analysis - General, Distribution, Environment, Ocean Basins, Photography, Sedimentation, Seismic Studies, ...7.0262
- CHRONOLOGY OF MARINE SEDIMENTS, CIRCULATION OF WATER AND TRACE ELEMENTS, SEDIMENTARY RECORD AND EXTRATERRESTRIAL ACCRETION ...Circulation-general, Cosmogenous, Pacific Ocean-general, Paleoclimatology, Trace Elements, ...1.0098
- PRE-DELTA SEDIMENTATION IN THE ST. CLAIR RIVER DELTA AREA ...Deltas, Michigan, Sedimentology-general, ...7.0248
- MISSISSIPPI DELTA ...Deltas, Distribution, Heavy Minerals, Mississippi, Ocean Mining, Potential of Deposit, ...7.0014

**Geologic Structures**

**Basins**

**Great Basin**

- THE FORMATION OF DOLOSTONE AND CHERT IN THE UPPER MIDDLE CAMBRIAN OF THE GREAT BASIN ...Cambrian Period, Chert, Diagenesis, Dolomite, Petrography, ...7.0283

**Illinois**

- PALEOSALINITY DETERMINATION BY THE BORON IN ILLITE METHOD ...Boron, Illite, Interstitial - Connate Water, Salinity, Swamps-marshes, ...7.0238

**Major Faults**

**San Andreas Fault**

- CENTRAL CALIFORNIA CONTINENTAL MARGIN ...California, Continental Shelf, Continental Slope, Geologic Maps, Structural Studies, ...7.0036

**Geologic Time**

**Cenozoic Era**

**Cenozoic Era-general**

- COMPARATIVE STUDIES OF LATE MESOZOIC AND EARLY CENOZOIC HERPETOFAUNAS ...Amphibians, Evolutionary Studies-general, Geologic, Lizards, Mesozoic Era-general, ...7.0181

- STRUCTURE OF CONTINENTAL RISE OFF EASTERN NORTH AMERICA ...Continental Drift, Continental Slopes, Eastern, Sedimentary History, Sedimentation, ...7.0117
- PATTERNS OF SPECIES DIVERSITY - TERTIARY-RECENT ...Foraminifera, Geographical Relations, Number Or Density, Population - Distribution, Speciation, ...5.0564

**Quaternary Period**

- (A) ANNUAL SUPPLY OF PARTICULATE MATTER IN THE GREAT BAY ESTUARY (B) LATE PLEISTOCENE HISTORY OF THE GREAT ...Estuaries, New Hampshire, Organics, Sampling, Sedimentary History, ...1.0155
- MARINE GEOLOGY OF CONTINENTAL MARGINS ...Continental Shelves, Emergent, Mexico, Regional Structure, Wave-built Terrace, ...7.0029
- INVESTIGATIONS OF URANIUM AND THORIUM SERIES ISOTOPE DISEQUILIBRIUM IN THE OCEAN AND IN PLEISTOCENE SEDIMENTS ...Chemistry, Glacial History, Radioactivity, Radium, Thorium, Uranium, ...1.0120
- QUATERNARY ENVIRONMENTS AND BIOTAS ...Biofacies, Intertidal Areas, Paleotemperature, Population - Distribution, Western, ...7.0157
- RECENT MARINE AND NONMARINE SEDIMENTS AND MICROFAUNA OF DELAWARE COASTAL AREAS ...Bays, Delaware, Facies, Paleoenvironments, Sedimentary Structure-general, Shoreline - Coastline, ...7.0207
- LITHOLOGICAL AND MICROPALAEONTOLOGICAL INVESTIGATION OF OCEAN SEDIMENT CORES ...Core Analysis, Correlation, Paleoclimatology, Sedimentary History, Tertiary Period, ...7.0257
- STRATIGRAPHIC STUDY OF RADIOLARIA IN DEEP SEA QUATERNARY SEDIMENTS ...Collections, Core Analysis, Correlation, Geographical Relations, Order Radiolaria, ...7.0178
- INVESTIGATION OF QUATERNARY SEA LEVEL CHANGES IN THE CAROLINE AND MARSHALL ISLANDS ...Carbon-14, Emergent, Pacific Ocean-south, Reefs, Sea Level Variations, ...7.0159
- FLORIDA CORAL REEF STUDIES ...Drilling and Coring, Environment, Florida, Geologic History-general, Reefs, ...7.0162
- COMPARISON OF ANCIENT AND MODERN COASTAL CLASTIC SEDIMENTARY ENVIRONMENTS ...Cretaceous Period, Environment, Shoreline - Coastline, Textures-structures, Water Deposited Clastics, ...7.0234
- OCEANOGRAPHY, PLEISTOCENE GEOLOGY AND SEDIMENTS OF LITTLE BAHAMA BANK ...British West Indies, Carbonates-general, Currents-bottom, Energy, Water Motion Recorders, ...7.0229
- SUBSURFACE GEOLOGY OF HOGSTY REEF, AN ATOLL IN THE SOUTHEASTERN BAHAMAS ...Atolls, British West Indies, Paleoenvironments, Physiographic History, Submergent, Subsurface, ...7.0037
- A PALEOMAGNETIC STUDY OF TERTIARY AND PLEISTOCENE OCEANIC CORES ...Antarctic Ocean, Core Analysis, Field Reversals, Pacific Ocean-north, Paleomagnetism, Tertiary Period, ...7.0166
- GEOLOGIC HISTORY OF BERMUDA AND ITS RELATIONSHIP TO THE WORLD PLEISTOCENE ...Bermuda, Correlation, Development, Local Stratigraphy, Sea Level Changes, ...7.0155
- PALEOTEMPERATURE RESEARCH ...Core Analysis, Marine Organisms, Order Foraminifera, Paleotemperature, ...7.0162
- PLEISTOCENE OCEANOGRAPHY AS RECORDED IN DEEP SEA SEDIMENT CORES ...Core Analysis, Correlation, Geographical Relations, Paleoclimatology, Paleotemperature, ...7.0165
- REGIONAL COASTAL CHANGE ...Development, Environmental Changes, Shoreline - Coastline, ...7.0301
- QUATERNARY OF THE HUDSON RIVER ESTUARY ...Estuaries, Fjords, Hudson River, Paleoenvironments, Valleys and Canyons, ...7.0256
- RECENT SEDIMENTATION BY TIDAL AND LONGSHORE CURRENTS ON A CARBONATE BANK IN LOWER FLORIDA KEYS ...Banks, Currents-longshore, Florida, Sedimentation, Tides, ...7.0253
- STRATIGRAPHY OF RECENT INTERTIDAL SEDIMENTARY DEPOSITS OF THE SHEEPSHEAD MUDFLAT, NEW JERSEY ...Intertidal Areas, New Jersey, Sediments-other, Stratigraphy-general, ...7.0274
- MODERN VERSUS RELICT SEDIMENT PATTERNS ON CONTINENTAL MARGINS ...Bermuda, Canada, Continental Shelf, Sedimentation, Sea Level Changes, ...7.0214

## Geologic Time

## SUBJECT INDEX

OSTRACODA OF THE INDIAN OCEAN ...Animal Taxonomy, Biogenous, Indian Ocean-general, Shrimps - Seed Or Mussel, ...5.0385

QUATERNARY SEDIMENTATION AT MARINE-FLUVIAL INTERFACE, SW OREGON ...Bed Load, Geological Exploration, Heavy Minerals, Mineralogy-petrology, Size, ...7.0199

### Tertiary Period

RADIOLARIA IN SEDIMENTS ...Biogenous, Core Analysis, Order Radiolaria, Pacific Ocean-general, Population - Distribution, ...7.0160

STUDY OF FOSSIL SEA TURTLE COLLECTION AT THE INSTITUT ROYAL DES SCIENCES NATURELLES, BRUSSELS, BELGIUM ...Belgium, Collections, Description of Fossils, Internal Structure, Reptiles, ...7.0177

MIOCENE FISHES AND FISH FAUNAS AS DETERMINED FROM A STUDY OF FOSSIL OTOLITHS ...Biofacies, Bony Fish, California, Description of Fossils, Paleocology, ...7.0170

LITHOLOGICAL AND MICROPALAEONTOLOGICAL INVESTIGATION OF OCEAN SEDIMENT CORES ...Core Analysis, Correlation, Paleoclimatology, Quaternary Period, Sedimentary History, ...7.0257

STRATIGRAPHIC AND TAXONOMIC-PHYLOGENETIC STUDIES ON PLANKTONIC FORAMINIFERA ...Core Analysis, Cretaceous Period, Intercontinental Stratigraphy, Order Foraminifera, Structure-general, ...7.0182

A MICROPALAEONTOLOGICAL STUDY OF DEEP-SEA CRETACEOUS AND TERTIARY SEDIMENT ...Biofacies, Distribution, Microfossils, Physical Properties, Population - Distribution, ...7.0184

A PALEOMAGNETIC STUDY OF TERTIARY AND PLEISTOCENE OCEANIC CORES ...Antarctic Ocean, Core Analysis, Field Reversals, Pacific Ocean-north, Paleomagnetism, Quaternary Period, ...7.0166

POTASSIUM/ARGON DATING OF DEEP-SEA SAMPLES ...Abyssal, Argon-potassium, Geologic Age Relations, Microfossils, Radioactive Dating, Sea Floor Spreading, ...7.0066

CALCAREOUS NANNOFOSSILS FROM PALEOCENE - EOCENE DEPOSITS ...Biogenous, Fossil Limestone, Fossil Zones, Microfossils, Standards, Specifications, ...7.0176

STRATIGRAPHIC RELATIONS BETWEEN A COQUINA FACIES OF THE YORKTOWN FORMATION AND OVERLYING SEDIMENTS AT CHUCKATUCK, VIRGINIA ...Fossil Limestone, Sea Level Changes, Shore Features-general, Unconformities, Virginia, ...7.0254

EVOLUTION OF PROVINCIAL DISTRIBUTION PATTERNS IN CHEILOSTOME BRYOZOA ...Bryozoa, Geologic, Order Cheilostomata, Paleontology, Population - Distribution, ...7.0173

## Mesozoic Era

### Cretaceous Period
