TITLE A Directory of Self-Instructional Materials Used in the Junior College.

INSTITUTION California Univ., Los Angeles. ERIC Clearinghouse for Junior Coll. Information.; California Univ., Los Angeles. School of Education.

SPONS AGENCY Danforth Foundation, St. Louis, Mo.

PUB DATE 71

NOTE 141p.

AVAILABLE FROM ERIC Clearinghouse for Junior Colleges, 96 Powell Library, University of California, Los Angeles 90024 (Limited supply available free of charge)

EDRS PRICE EDRS Price MF-\$0.65 HC-\$6.58

DESCRIPTORS *Autoinstructional Aids, Directories, *Independent Study, *Instructional Materials, *Junior Colleges, *Teaching Methods

IDENTIFIERS *Danforth Junior College Program

ABSTRACT

This directory is a compilation, by subject matter, of self-instructional materials prepared by instructors who are specialists in each field. Where possible, the listings include the author/instructor, the institution, the target population or specific course name, the package's availability, and its number and title. Listings are solicited from instructors who have prepared similar kits so that an up-dated edition can be published in 1972. (HH)

INFORMATION

DANFORTH DIRECTORY OF SELF-INSTRUCTIONAL MATERIALS

This publication is a small but important milestone in the development of more effective learning materials. Throughout the country, instructors in all subject-matter areas are using their skills to develop learning materials that will help the student learn at an individual pace and in an effective manner. It is somewhat surprising to find so many self-instructional materials in the field of English (often considered a subject beyond the scope of learning objectives and auto-tutorial materials) and the Social Sciences. It is an indication of the widespread use of self-instructional materials.

Some of the units cover an entire course, while others deal only with a particular segment of a course. Each learning segment is called a unit and each unit contains from one to fifty or more packages. The units of self-instructional material represent varied instructional modes, extending from paper and pencil to the computer, and an attempt has been made to indicate in this directory the method of instruction employed.

The listing in the Directory is by subject matter. Included on each page is the author, institution (including address and phone number where available), the target population or specific course in which the material is used, the availability of the material, and the number and titles of the individual packages. The information on each page is not always complete because the data received were not uniformly listed.

It is the hope of the UCLA Danforth group and the ERIC Clearinghouse that an up-dated edition will be available in January 1972. To make this possible, all interested persons should submit any information they have on self-instructional materials for inclusion in the 1972 edition. A form is included for this purpose.

Further information regarding the Directory should be directed to:

ERIC Clearinghouse for Junior Colleges
96 Powell Library
University of California
Los Angeles, California 90024

ACKNOWLEDGEMENTS

The following people were instrumental in collecting the data included in this Directory: Stuart R. Johnson of the National Laboratory for Higher Education and his consortium; B. Lamar Johnson of the UCLA Junior College Leadership Program and the League for Innovation in the Community College; Elsie Withey and Wanda Sterner of the Los Angeles Chapter of the National Association for Programmed Instruction (LANAPI). Rose Sloan did the compilation of data.

Special note should be taken of the efforts of M. Stephen Sheldon who carried on the tedious task of pulling together the loose ends and provided the moving spirit that such a project requires.

|---|---|
| 1. Density, Specific Gravity,
A Volume | 12. Oxidation Reduction Reaction |
| 2. Formula Weights, Molecular
Weights, and Moles | 13. Relationship of the Periodic
Classification to the Properties
of the Elements |
| 3. Structure of the Atom and the
Periodic Law | 14. Halogens and Their Compounds |
| 4. Chemical Bonding | 15. Chemical Equilibrium |
| 5. Oxygen and Ozone | 16. Carbon and Its Compounds |
| 6. Hydrogen | 17. Biochemistry |
| 7. The Gaseous State and the
Kinetic Molecular Theory | 18. The Halogens and Their
Compounds, and Electrochemistry |
| 8. Gram-Molecular Volume of
Gases and Molecular, Atomic
and Equivalent Wts. | 19. Identification of Lab Apparatus |
| 9. The Liquid and Solid States and
Water and Hydrogen Peroxide | 20. Lab Safety Rules |
| 10. Solutions | 21. Use of Balances, Measurement of
Mass, Volume, and Length |
| 11. Solutions of Electrolytes—
Electrolytes and non-Electrolytes
and Colloidal Matter | 22. Density and Specific Gravity |
| | 23. Use of the Gas Burner |
| | 24. Melting Points and Boiling Points |
| | 25. Conservation of Matter |
| | 26. Definite Composition |
