The selected bibliography of educational programs for the emotionally disturbed contains approximately 80 abstracts with indexing information explained to be drawn from the computer file of abstracts representing the Council for Exceptional Children Information Center's complete holdings as of July, 1972. Abstracts are said to be chosen using the criteria of availability of document to user, currency, information value, author's reputation, and classical content. Preliminary information explains how to read the abstract (a sample abstract is included which identifies the different parts of the abstract), how to use the author and subject indexes, how to purchase documents through the Educational Resources Information Center Document Reproduction Service (two order blanks are provided), an order blank for Exceptional Child Education Abstracts in which the abstracts are originally published, a list of indexing terms searched to compile the bibliography, and a list of journals from which articles are abstracted for the bibliography. Publication date of documents abstracted ranges from 1955 to 1971. (CB)

Exceptional Child Bibliography Series No. 617

The work presented or reported herein was performed pursuant to a grant from the Bureau of Education for the Handicapped, US Office of Education, Department of Health, Education, and Welfare. However, the opinions expressed herein do not necessarily reflect the position or policy of the US Office of Education and no official endorsement by the US Office of Education should be inferred.
The CEC Information Center on Exceptional Children

With a grant from the US Office of Education, the CEC Information Center was established at The Council for Exceptional Children to serve as a comprehensive source of information on research, instructional materials, programs, administration, teacher education, methods, curriculum, etc. for the field of special education. The Center functions as the Clearinghouse on Exceptional Children in the Educational Resources Information Centers (ERIC) program and also as a member center in the Special Education IMC/RMC Network. In addition, the CEC Center's program includes a commitment to a concentrated effort towards the development of products which will interpret research results into educational methods and practices.

How to Use This Bibliography

The Exceptional Child Bibliography Series was initiated by the CEC Information Center to answer the need for rapid responses to specific requests for information. The volume of information requests received by the Center is analyzed and used as a guide in preparing special topic bibliographies in the field of exceptional child education. Abstracts contained in the bibliographies are drawn from the computer file of abstracts which represents the CEC Information Center's complete holdings as of the date indicated on each bibliography.

Selective editing by Information Specialists is performed on each bibliography. From the total number of abstracts drawn from the file on a particular topic, selection is made of only those judged to best meet the following criteria: availability of the document to the user, currency, information value, author's reputation, and classical content. The number of abstracts selected to appear in a bibliography may vary from one to 100, depending on the amount of suitable information available. Updating of bibliographies as new material becomes available is accomplished when the volume of new material reaches 25 percent of presently available material on a given topic.

How to Use the Indexes

Some bibliographies in Exceptional Children Bibliography Series contain author and/or subject indexes. In these bibliographies, readers seeking work on a specific aspect of the general topic may consult the subject index to be referred to specific abstract numbers. Abstracts dealing with several topics may be identified by finding the same abstract number under two or more subjects in the subject index.

How to Purchase Documents

Documents with an ED number and EDRS availability indicated may be purchased from the ERIC Document Reproduction Service (EDRS). For your convenience an order form is provided on the back cover of this bibliography.

Abstracts appearing in the bibliographies have also been published in Exceptional Child Education Abstracts, the quarterly abstract publication of the Council for Exceptional Children. Approximately 750 abstracts covering the broad range of exceptionality appear in each issue. (Subscription order form below.)

ABSTRACT 10076
EC 01 0076 ED 012 528
Publ. Date 64 Smith, Bert Kruger
No Language but a Cry.
EDRS not available

Descriptors: exceptional child education; family (sociological unit); emotionally disturbed; residential centers; special schools; parent role; children; mental health; special classes; therapeutic environment; parent child relationship; rehabilitation; child development; etiology; program descriptions; prevention: medical treatment; special services: hospital schools; day care programs; League School; Sonia Shankman Orthogenic School; Hawthorne Center

Written for parents, this book is intended to provide the child's family with an understanding of the disturbed child. Symptoms of emotional disturbance are described. Recommendations about admission criteria, length of stay, referral procedures, facilities, costs and financing, needs for additional services, and project evaluation. Photographs of school activities and seven brief case histories are also included. (MY)

ABSTRACT 10270
EC 01 0270 ED 018 908

Retrieval from Limbo, the Intermediary Group Treatment of Inaccessible Children

EDRS not available

Descriptors: exceptional child research; emotionally disturbed; behavior; psychotherapy; play therapy; children; emotional maladjustment; program evaluation; program descriptions; psychoeducational clinics; clinics; behavior change; behavior problems; group therapy; special services; elementary school students; parent participation; self control; self expression; self concept; parent counseling

A clinic program was designed to provide emotionally disturbed children intermediary group treatment with the advantages of residential care while they remained at home. Of the 47 subjects selected (27 aged 6 to 9, 20 aged 9 to 13), 25 had been recommended, and nine considered, for residential treatment. All were judged inaccessible by the clinic staff and/or diagnostic group observations. The children were seen in eight groups by dual therapists twice a week for 3 hours over a 6-month period. Data were obtained through recorded observations of the therapists and staff interaction. Group treatment was structured (1) to increase the child's organizational unity through planned activities and intervention, (2) to develop the child's capacity for self observation through induction to verbal-conceptual expression and transference disruption, and (3) to create participation by parents through the treatment contract, group therapy, parent casework, and family contact. Of the 47 subjects, 39 completed the program and 31 continued in individual therapy. Of the children who entered individual therapy, 28 were regarded by their therapists as high on accessibility to treatment (roughly 60 percent of the original 47). Changes also occurred in school behavior (only two of 11 previously excluded remained not in attendance, and nine of nine once partially excluded were back in fulltime classes). Parental attitudes altered, as indicated by the fact that 31 families chose to pay for continuing service. Finally, the Draw-A-Group Test showed a change in the children's group perceptions (the children included more and excluded fewer group members, significant at the .007 and .003 levels of confidence respectively). After treatment, however, five children were recommended for residential placement and three remained inaccessible (one with brain damage, two with malfunctioning parents). With no contrast groups it was difficult to attribute the changes to the treatment, but the chief expectation without intervention was greater deterioration. The investigators were encouraged by the results. This document was published by the Child Welfare League of America, Inc., 44 East 23rd Street, New York, New York 10010, and is available for $3.25. Final Report of Day-Care Rehabilitation Center for Emotionally Disturbed Adults

Butler Hospital, Providence, Rhode Island
Rhode Island Div. of Vocational Rehabilitation, Providence
OVR-RD-550-60
EDRS mf,he

Descriptors: exceptional child research; emotionally disturbed; rehabilitation therapy; adolescents; day care programs; demonstration projects; inservice education; mental health programs; referral; rehabilitation programs; state programs; therapeutic environment; program descriptions; administration; group therapy; personnel; admission criteria; adults; case records; cooperative programs; Butler Hospital; Providence

In this 5-year demonstration project, emotionally disturbed adults and adolescents received treatment at a day care rehabilitation center sponsored by the Rhode Island Division of Vocational Rehabilitation (DVR) located in a private psychiatric hospital (Butler Hospital). The major treatment goals were preservation and restoration of interpersonal relationships in an environment of little structure, free choice, many activities, comfort, and security where individual and group therapy were available. Patient selection, admission criteria, and referral procedures are discussed. Day care staff descriptions include the hospital superintendent, director, assistant director, home economist, paint shop supervisor, bookbinder, woodworking instructor, school teacher, homeworker,
social worker, psychologist DVR coordinator, and counselors. The in-service training program for rehabilitation counselors is described. The philosophy of day care, the evolution of its theoretical framework, and the attitudes of the staff toward the program at this center are discussed. A typical day of a patient and brief case studies of 20 patients are presented. (JK)

ABSTRACT 10428
EC 01 0428
Pub. Date 67
Coffey, Herbert S.: Group Treatment of Autistic Children. Prentice-Hall Psychology Series. EDRS not available

Descriptors: exceptional child research; emotionally disturbed; psychotherapy; psychotic children; schizophrenia; psychosis; group therapy; autism; children; day care programs; case studies (education); behavior rating scales; play therapy; East Bay Activity Center (Berkeley); Berkeley

At the East Bay Activity Center in Berkeley, California, treatment involved the mixing of autistic children with less severely disturbed children. Non-autistic children in the group were expected to act as catalysts by trying to form some type of socially mature relationship with the autistic children while the therapist encouraged interaction. Hypothesis one stated that treatment employed at the center and particularly in the play activity group should aid the children, both autistic and non-autistic, in developing more socially mature types of interaction. Behavior ratings of the children were made by observers. The Wilcoxon Signed Ranks Test showed no significant improvement for the group during either year of the program. Measurement of individual children's changes by means of t-tests showed that of six children in the first year's group, two showed significant changes in levels of interaction at .005 and .001 levels. During the second year, of eight children, two showed significant changes in levels of interaction at .01 and .001 levels. None of the children was classified as autistic. Comparisons of monthly mean fluctuations of the autistic children with the catalysts by means of t-tests were not significant. Hypothesis two stated that the treatment program should result in the non-social autistic children's gradually diminishing their amount of dependent interactions with the therapist and beginning to interact with other children in the group. The Wilcoxon Signed Ranks Test revealed no significant differences for either year in proportion of interaction with other members of the group between the beginning and the end of the year. The bibliography lists 12 items. Descriptive accounts of the therapeutic methods used, anecdotal records of the children involved, the results of a follow-up study, a discussion of the nature of autism, and a brief summary of the philosophy of group therapy are included. This document is available from Prentice-Hall, Inc., Englewood Cliffs, New Jersey. (TM)

ABSTRACT 10540
EC 01 0540
Pub. Date 67

EDRS not available Syracuse University Press. Box 8, University Station, Syracuse, New York 13210 ($3.00)

Descriptors: exceptional child education; emotionally disturbed; learning; teaching methods; behavior; hyperactivity; teaching machines; programmed instruction; reading difficulty; identification; mathematics; educational research; educational needs; curriculum; critical diagnosis; interaction process analysis; conference reports; Syracuse Scholastic Rehabilitation Program

The teaching-learning process for emotionally disturbed children is explored by nine conference participants at Syracuse University. The interaction analysis system developed by Flanders and its adaptability to classroom situations faced by teachers of disturbed children are discussed; and comments on the applicability of this system are included. General research strategies for the teacher are described, and the research activity of the Syracuse Scholastic Rehabilitation Program in the Syracuse Public Schools is examined. A theoretical conception of hyperactivity and a curriculum for hyperactive children is presented; two papers provide comments. Diagnostic and programming problems of educators discussed include programming for disturbed children without a clear idea of who they are and a framework for discovering children's learning patterns in mathematics. EC 01 0672
Pub. Date 66

Descriptors: exceptional child education; emotionally disturbed; teaching methods; identification; psychotherapy; speech therapy; autism; clinical diagnosis; medical evaluation; behavior patterns; psychological patterns; cognitive development; speech; special services; psychological processes; psychotic children; case studies (education); psychopathology; educational programs

Early childhood autism is defined and discussed and the following clinical aspects of autism are treated: behavioral and cognitive characteristics, medical treatment, and prognosis. Speech in psychotic children, educational programs and problems, teaching, and psychological assessment and research are discussed in the sections on education and psychology. Social and administrative aspects presented include services for autistic children in Middlesex, counseling and the principles of management, and prescription of services. Photographic and case histories are included. A reference list contains 261 items. (LE)

Rubin, Eli Z. and Others: Emotionally Handicapped Children and the Elementary School. EDRS not available Wayne State University Press, Detroit, Michigan 48202 ($12.50)

Descriptors: exceptional child research; emotionally disturbed; behavior; grouping (instrumental purposes); adjustment (to environment); emotional adjustment; social adjustment; behavior change; behavior change;
Eighty-three children, from kindergarten to second grade, showing evidences of chronic social, emotional, and academic maladjustment, were placed in a program consisting of a control group in regular classrooms and an experimental group in one of two special classes with individualized instruction and therapeutic management. There was no significant difference between the experimental and control groups in classroom behavior, but the experimental group was significantly better in the following items on changes in classroom adjustment: mood, friendly approach, and daydreaming (p equals .05); and in the control group, immunity of overt anger, popularity, and quarrel-someness (p equals .01). The experimental group showed significant improvement in attitude toward school (p equals .05) and in perception of stress at school (p equals .05). In contrast to other research, there was no significant difference between groups in performance on the Metropolitan Achievement Test.

Results did not overwhelmingly confirm the hypothesis that special class programming is generally beneficial to emotionally handicapped children. The background of the study, the research design and methods, new hypotheses, and program changes are also described. (RP)
these patients are included. Art therapy, originally used only in the treatment of individual patients, is now being used as a supplementary technique in psychiatric group therapy. (A)

Miller, Rozelle J. and Others
Educational Programming in Simulated Environments for Seriously Emotionally Disturbed Junior High School Students. Final Report, Maryland State Department of Education, Baltimore Office of Education (DHEW), Washington, D. C. Bureau of Research EDRS m.hc OEG 0-8-070985-1794 BR-7-0985
Descriptors: exceptional child research; emotionally disturbed; teaching methods; junior high school students; simulated environment; regular class placement; behavior change; academic achievement; sex differences; behavior problems; resource teachers; simulation; group activities; social studies; interpersonal competence; staff role; role playing; teacher education; teacher role; behavior rating scales

A continuation of a 3-year elementary school study investigated the effectiveness of the various schedules of a simulated environment technique on emotionally handicapped junior high school adolescents. The 58 subjects, whose original evaluation had shown no evidence of neurophysiological dysfunction or subnormal intelligence, were randomly assigned to four schedules in regular classrooms for experimental and conventional treatment. The simulated environment technique consisted of teaching strategies and procedures which revolved around role playing and was implemented in the unit framework of the social studies. Significant differences were found in behavior improvement and interpersonal relationships, personal effectiveness in a social situation, and problem solving favoring the longer term treatment (p less than .001). No significant differences were found in academic achievement. Subjects with behavior patterns such as hyperactivity, perseveration, and a slower rate of learning needed a longer period of placement in a special class or resource room. Conclusions were that a differential program design might provide a better learning situation for emotionally handicapped students who exhibit characteristics of the minimally brain-damaged, and that a continuum of services such as special classes, resource rooms, and special placement in the regular class should be provided. (Author/RP)

The Emotionally Disturbed Child--Then and Now.
EDRS not available
Robert Bruner, Inc., 80 East 11th Street; New York, New York 10003 ($6.00).
Descriptors: exceptional child education; emotionally disturbed; child development; family (sociological unit); care studies (education); autism; emotional maladjustment; family relationship; parental role; social values; speech; language development; self concept; self actualization; historical reviews; psychiatry; attitudes

A historical review of attitudes toward children reveals emotional disturbances in biblical to recent times, concept of the emotionally healthy (normal) child is considered; aspects of speech, language, and ego development are traced from birth to age 18. The emotionally disturbed child is discussed, and autistic characteristics and other emotional disturbances are described for the following ages: 1 year to 3 years, 3 to 6, 6 to 12, and 12 to 18 years. A survey of family relationships, parent roles, and values currently held by society is presented. Case studies appear throughout the book, and 11 pages of notes and references are appended. (DP)

When We Deal with Children: Selected Writings.
EDRS not available
Descriptors: exceptional child education; delinquency; emotionally disturbed; psychotherapy; environmental influences; behavior problems; behavior change; reactive behavior; group dynamics; delinquent rehabilitation; self concept; leadership; discipline; sex education; group therapy; adolescents; children

Expounding an interdisciplinary approach, the book contains selected writings, lectures, and speeches concerning clinical work with disturbed children and adolescents in institutional settings. Editorial comment introduces each of the following sections: a survey of the current status of the children's field both clinically and educationally; a challenge to concepts and theories relating to the life-space interview, milieu therapy, improvement expectations, ego disturbances and support, and psychoanalysis and education; and a review of group therapy, including group confrontation, rebellion, contiguity, shock effect, resistance to therapy, gang formation, group composition, discipline in classroom practice, and psychoanalysis and group therapy. Also included are advice to staff on relationships to children in observation of a group, interference versus noninterference in different situations, punishment, and handling of sex incidents and anger; and general comments on preadolescent, deficient, hyper-aggressive, delinquent, and disadvantaged youth, as well as on camp life and sex education. Examples and recommendations are interspersed throughout the book and a list is provided of the author's publications from 1931 to 1965. (MK)

Dibs: In Search of Self: Personality Development in Play Therapy.
EDRS not available
Houghton Mifflin Company, 2 Park Street, Boston, Massachusetts 02107 ($3.75).

Descriptors: exceptional child services; psychotherapy; case studies (education); emotionally disturbed; parent child relationship; parent attitudes; play therapy; individual characteristics; individual development; personal growth

This case history reports the psychological development of Dibs, a 3-year-old boy, over a 4-month period involving 17 weekly 1-hour sessions of play therapy. The child's progress from an emotionally disturbed state is detailed: his continued well being and giftedness after therapy is outlined: and his previously untestable IQ is given as 116. Also, improvement of his parents' mental hygiene upon his effective treatment is described. Essentially verbatim reports are given of the dialogues between Dibs or his mother and his therapist. (LE)

Poetry Therapy: The Use of Poetry in the Treatment of Emotional Disorders.
EDRS not available

Descriptors: exceptional child services; emotionally disturbed; psychotherapy; poetry; bibliography; biblical literature; language rhythm; language maladjustment; adolescents; schizophrenia; mental health clinics; group therapy; mental illness; institutionalized (persons); self help programs

Twenty-two papers by different authors consider poetry therapy as treatment for persons with emotional disorders. Its use with the following is described: a psychotic patient; hospitalized schizophrenics; psychotic patients in a mental health center; and disturbed adolescents. Also discussed are poetry as therapy and as a therapeutic art; principles of poetry therapy; the validation of poetry as a group therapy technique; and poetry as communication in psychotherapy. The use of poetry in individual psychotherapy and in a private mental hospital is described: as is poetry therapy in a self help group; in a specialized school for the disturbed, and in a counseling center. Further topics include poetry as a way to fuller awareness, metamesages and self discovery; the Psalms as psychological and allegorical poems, the universal language of rhythm, the patient's sense of the poem, and a curriculum proposal for training poetry therapists. A tribute to Elf Greifer, a pioneer in therapeutic poetry, is included: and an appendix listing poems suitable for use in poetry therapy. (LE)

The report describes a 3-year project which utilized the techniques of experimental psychology and the principles of operant conditioning to gain in the understanding and treatment of autistic and schizophrenic children. Included are discussions of the autistic child, the project itself, arbitrary and natural reinforcement, the setting and therapeutic procedures, and training procedures and materials used in the clinical training program for staff. Courses in teaching principles of reinforcement and in principles of behavior, both by Fred S. Keller, are provided. The classification and description of the autistic child's behavior are considered: and a clinical, experimental, and behavioral description of a single child is provided. School room experiments are considered, and a clinical description is given of the population included in the study. included with an evaluation of the changes in the children in the program. (JD)

Evaluating the Communication of the Autistic Child.
EDRS not available

Descriptors: exceptional child services; emotionally disturbed: evaluation methods: tests: autism; communication (thought transfer): withdrawal tendencies (psychology); communication problems; speech; language handicapped; measurement instruments; language development; behavior rating scales; individual characteristics

Specific methods used for studying the areas of language and communication of the autistic child are presented. Autistic children are defined and described as are methods for evaluating communication. One of these methods, behavior-rating instrument for evaluating autistic children (BRIAC), is discussed, and various descriptive units from the BRIAC which the authors have found useful are presented. Discussed are the nature and degree of relationship to an adult as a person using ten levels of actions, and communication, vocalization and expressive speech development in autistic children by levels of development. A discussion of the clinical findings is included. The characteristic profiles depicted by the scales, as well as questions about speech and language apparently have differential diagnostic and prognostic importance which is reviewed. (GD)

Prevention and Reduction of Emotional Disorder in Pupils: A Theory and Its Immediate Application to Practices in the Columbus, Ohio Public Schools.
Columbus Public Schools, Ohio. Division of Special Services Ohio Department of Education, Columbus. Division Of Special Education

EDRS m/hc

Descriptors: exceptional child education; emotionally disturbed: program planning: prevention; educational needs; community responsibility: school responsibility; self concept: behavior problems: personality; emotional adjustment: positive reinforcement: remedial instruction: student placement: staff role: special services: identification: individual characteristics: negative reinforcement: parent school relationship: Columbus: Ohio

Intended to provide administrators with information valuable in planning school involvement with emotionally disturbed, the text presents suggestions to a variety of questions on this subject. Questions on the nature and importance of the problem focus on emotional disorder, its relationship to behavior and achievement, and incidence. Questions on theoretical orientations concern the value of theories, adaptation and coping, and...
learning processes. Aspects of prevention and reduction considered are the worth of success experiences, the effects of high anxiety punishment, and proper placement and remedial teaching. Descriptions of critical issues include the influence and number of school personnel, the school role in prevention, teacher training, educational programming, parent change, special classes and services, school and community responsibility, program evaluation, and remission. Recommendations are made for program development. Appendices include a description of project activities, a letter of confirmation, reports of field investigations, and advisory committee comments. *Educating the Emotionally Disturbed: A Book of Readings.*

EDRS not available

Thomas Y. Crowell Company. 201 Park Avenue South, New York, New York 10003 ($5.50).

Descriptors: Exceptional child education; emotionally disturbed; educational programs; teaching methods; teacher education; individual characteristics; instructional materials; student school relationship; special classes; special schools; residential schools; teacher qualifications; curriculum; identification; therapeutic environment; psychiatric hospitals; resource teachers; parent participation; community programs; case studies (education)

Selected readings treat education of the emotionally disturbed. Aspects considered include the problems the emotionally disturbed pose for the school (10 articles) and approaches to their education, including therapy, day classes in regular schools, special schools, and residential centers (three, eight, five, and six articles respectively). Discussing classroom problems are two papers on curriculum and seven on techniques: eight papers describe preparing to teach the emotionally disturbed child. (JD)

*An Introduction to Child Psychiatry.*

EDRS not available

Descriptors: Exceptional child education; psychotherapy; emotionally disturbed; behavior problems; clinical diagnosis; adolescents; learning disabilities; environmental influences; genetics; psychological evaluation; taxonomy; mentally handicapped; minimally brain injured; neuropsychiatric children; psychotic children; drug therapy; residential care; physically handicapped; stress variables; special health problems

The role of child psychiatry is discussed, and the child is described as a developing organism. Genetic factors in behavior are considered as are the presenting problems. Methods treated involve taking the history, conducting the diagnostic interview, using special diagnostic procedures, and applying diagnostic classification. Problem areas dealt with include the following: mental retardation; behavioral disorders due to cerebral dysfunction; behavior and character disorders; neuroses, and associated symptoms; childhood schizophrenia and psychosis. Specific learning disabilities: problems arising from specific stress situations; and adolescent behavior problems. Also reviewed are treatment approaches, including psychotherapy and related treatments, drug therapy, and inpatient and outpatient treatment. (J D)

Descriptors: Exceptional child education; emotionally disturbed; behavior change: attention span; academic achievement; reinforcement; student evaluation; arithmetic; testing: teaching methods: program evaluation: rewards; behavior rating scales; class size: teacher aides: classroom design: scheduling: reading instruction: teacher role

To evaluate the effectiveness of an engineered classroom design, 54 emotionally handicapped children were placed in six classrooms, each with a teacher and an aide. Each classroom was set up with three major centers: mastery-achievement, exploratory-social, and attention-response-order. Children were assigned tasks at centers in keeping with their individual problems and were awarded check marks every 15 minutes for behavior and work according to behavior modification principles. Achievement was tested three times over the year: daily task attention was recorded by two observers who clocked the number of seconds each child's eyes were on an assigned task during 5-minute samples taken five times daily. Children in the experimental classroom utilizing the engineered design enjoyed a 5 to 20% task attention above over children in the two control classrooms not using the check mark system and all aspects of the design. Experimental classes which abruptly withdrew the design at mid-year showed no decrease in task attention, in fact they improved. While reading and spelling gains were not significantly different between experimental and control conditions, gains in arithmetic fundamentals were significantly correlated with the presence of the engineered design. *Learning and Its Disorders: The Langley Porter Child Psychiatry Series: Clinical Approaches to Problems of Childhood, Volume I.*

EDRS not available

Science and Behavior Books, Inc., 577 College Avenue, Palo Alto, California 94306.

Descriptors: Exceptional child education; emotional disturbance; early childhood: creativity: teacher role; parent child relationship; teacher education: mental health: psychiatric services; teaching methods; sexuality: delinquency: delinquent rehabilitation: case studies (education); program evaluation: psychotherapy: interdisciplinary approach: professional personnel: staff role

Intended for professional persons dealing with emotionally disturbed children who
have clinical problems, a series of papers are presented concerning the following: learning and the distortion of learning in early childhood; the role of the teacher and his problems: the role of psychiatry in the community and in the schools; antisocial behavior as failure and distortion of the learning process: and therapeutic efforts in learning disturbances. Also included is a discussion of the use of learning theory as a therapeutic tool in a school anti-delinquency project. (EB)

ABSTRACT 20499
The Teaching-Learning Process in Educating Emotionally Disturbed Children
Syracuse University. New York. Division of Special Education and Rehabilitation
EDRS not available

The following articles on the emotionally disturbed are presented: an approach to the study of teaching by Edmund Amidon: comments on an approach to the study of teaching by David Hunt: approaches to evaluation by Maynard Reynolds: a research program in a public school setting by Rhoda Fisher: the needs and curriculum for hyperactive children by William Cruickshank: and comments on hyperactive children by Gayle Beck. Additional comments on hyperactive children are presented by Sheldon Cohen, while additional topics consider functional diagnostic dimensions and their application in the education of disturbed children by Ralph Rabinovitch, and diagnosis and treatment in mathematics—its progress, problems and potential role in educating emotionally disturbed children and youth by John Wilson. (I.I.)

ABSTRACT 20817

ABSTRACT 20839

A combination of photographs and commentary, the book illustrates the methods of a teacher of disturbed children. Background information is provided for some children: their comments and the responses of the teacher combine to demonstrate student-teacher interaction and to indicate ways of fostering self development. (RJ)

ABSTRACT 20001

The collection contains lectures and papers by various authors dealing with child psychology. Consideration of child psychiatry includes definition, personality development: factors in children's psychiatric disorders: clinical syndromes: childhood psychoses: and principles of psychotherapy. An overview of a philosophy of psychotherapy in child psychiatry is provided which treats procedures: problems: and experiences with psychopharmacologic drugs and presents a survey of child psychiatry. Also covered is the simultaneous psychotherapy of child and parents (both collaborative and parent therapy) with special attention given to the etiology of antisocial behavior in delinquents and psychopaths and to the elements of psychotherapeutics with the schizophrenic child and his parents. The section on developing a philosophy of training in child psychiatry focuses on outpatient clinics: training programs (including those in mental retardation): the supervisory process: teaching administration: and social work participation. Reference lists follow the individual chapters or selections. (TE)

ABSTRACT 20945

An introduction to children with emotional problems is followed by discussions of the non-directive play therapy situation and participants: the playroom and suggested materials. the child, the therapist: and the parent or parent-substitute as an indirect participant. The eight basic principles of non-directive therapy are considered along with problems in establishing rapport, accepting the child completely, establishing a feeling of permissiveness: recognizing and reflecting feelings: maintaining respect for the child: allowing the child to lead the way: not hurrying therapy: and knowing the value of limitations. Implications for education mentioned are practical schoolroom application of non-directive methods and application to parent-child relationships and to teacher-administrator relationships. Annotated therapy records from cases of children aged 4 to 12 years are presented. (LE)

ABSTRACT 20963

Descriptors: exceptional child services; emotionally disturbed; residential centers; therapeutic environment; interpersonal relationship; behavior patterns; observation; activities; case records; child care workers; behavior change.

Nine papers by Albert E. Trieschman, Larry K. Brendtro, and James K. Whittaker consider management of emotionally disturbed children in residential centers. Topics treated include understanding the nature of a therapeutic milieu, establishing relationships, understanding the stages of a typical temper tantrum, observing and recording children's behavior, and avoiding some of the roadblocks to therapeutic management. In addition, suggestions are made for program activities and for managing wake-ups, mealtimes, and bedtime behavior. (JH)

Descriptors: exceptional child research; behavior change; change agents; changing attitudes; consultation programs; educational experiments; emotionally disturbed; mental health programs; pilot project questionnaires; regular class placement; socially maladjusted; teacher education; disadvantaged youth; Pennsylvania; Philadelphia Public School System.

A pilot study exploring the use of mental health consultants to teachers of socially and emotionally maladjusted pupils in regular classes was conducted to help teachers cope with these children and facilitate successful learning experiences for them. enable teachers to be more effective with all children, understand effects of curriculum and teaching methods on children and develop further methods for understanding and teaching both the advantaged and the disadvantaged. Advantaged and disadvantaged schools were selected; one of each was a control school while the other six were experimental schools. Involved were 59 teachers and over 2,000 children. Six mental health consultants, assigned one to each experimental school, met with the same group of teachers weekly and were available for individual conferences. Pre- and postquestionnaires were administered to every teacher and child in the eight schools. Each consultant kept a log of the 15 weekly sessions, consultations, and classroom visits. Results indicated that in the control schools, where there were no consultants, only negative behavioral and attitudinal changes occurred, and that to the extent that consultants and teachers together clearly defined the goals of their meetings, there were positive changes in teacher and student behavior. Included are 26 recommendations and the questionnaires used. (Author/SG)

Office of Education (DHEW), Washington, D. C.
EDRS mf. hc
OEG-325-EDU-17
Paper Presented at the Indiana University Colloquium On Infantile Autism (Indiana University Medical Center, Indianapolis, Indiana, April, 1968).

Descriptors: exceptional child education; autism; behavior problems; child psychology; child rearing; emotionally disturbed children; interpersonal relationship; mental health; cognitive processes; sensory deprivation; parent education; parent influence; personality problems; preschool children; psychological patterns; psychotherapy; psychotic children; individual characteristics.

The following four clusters of symptoms are presented in characterizing preschool children who manifest autism: failure to establish human relatedness and meaningful social attachments; impairment of motivation to become competent; disturbances of perceptual integration; and impairment of the development of cognitive functions. One of the most important impairments of autistic children is stated to be perceptual inconstancy (irregularity in the processing of sensory data by the various receptor systems). The likely biological and biochemical changes under autistic conditions of sensory deprivation, and perceptual patterns promoted in the child as early as possible are emphasized. Recommendations for a program of treatment for the autistic child including parent participation and parent education, and the goal of reducing distortions in the parent-child relationship are provided. Treatment of the preschool autistic child is also recommended to establish perceptual organization and cortical control over his sensory experiences. The need for further research on the relationship between parental attitudes or child rearing practices and the existence of an autistic child is also included. (WD)

The Severely Disturbed Adolescent; Inpatient, Residential, and Hospital Treatment.
EDRS not available

Descriptors: exceptional child services; emotionally disturbed; residential care; psychotherapy; adolescents; neurotic children; drug therapy; staff role; emotional problems; family relationships; emotional adjustment; psychosis; emotional development.

The text is an attempt to clarify specific indications for hospital treatment and to highlight the type of adolescent disturbance that might be helped in an inpatient therapeutic environment. Chapters discuss the prescription of residential treatment, the therapeutic facilities of a residential unit for disturbed adolescents, the continued diagnostic process in residential treatment, the principles of residential treatment, and the prescription of psychotherapy for the disturbed adolescent. Also discussed are the use of medication, the neurotic adolescent in the inpatient setting, ego defects and developmental arrest, severe conscience defects, the psychotic adolescent, and the goals and results of residential treatment. To meet the needs of emotionally disturbed children, a residential program was planned to provide re-education for such children and training for the teaching staff. A model school served 40 children aged 6 through 12, in five groups, each having a team of two teacher counselors and a liaison teacher backed by consultants. Teacher and parent ratings 18 months after discharge indicated moderate to great improvement for 80% of the children; additional ratings also indicated improvement. The project process, experience, cost, and manpower development program were considered as well. (JD)

A discussion of group play therapy includes chapters on the school as a setting for treating emotionally disturbed children and focuses on suggestions for group workers. A synopsis of the play group treatment process precedes a description of considerations in organizing groups and methods for working with the children. Recommendations are made for furnishings and equipment in the play room. Also mentioned are problems in diagnosis, symptomatology, individual differences, treating unusual problems, and family influences. Clinical programs in schools, analysis of a play group in an elementary school, and a seminar in child psychology for teachers are discussed, and cases are cited throughout. (RJ)

The Therapeutic Nursery School: A Contribution To the Study and Treatment of Emotional Disurbances in Young Children

EDRS not available

Descriptors: exceptional child education; emotionally disturbed; nursery schools; therapeutic environment; parent counseling; administrative policy; educational programs; preschool programs; parent role; parent child relationship; case studies; educational diagnosis; psychosomatic diseases; school role; followup studies

The educational program of the Hanna Perkins School for emotionally disturbed preschool children is described in terms of its physical plant, administrative policies concerning staff, selection of cases, and application procedures, and the general objectives and structure of the overall program. The treatment and techniques of interaction with both the child and the mother are presented, and specific case reports are provided. Psychosomatic disorders are examined in the areas of diagnostic assessment, case evaluations, and individual cases. The role of the nursery school is explored in terms of the following relationships: with those children who are in preparation of or undergoing direct treatment, and in relation to the total child (analytic program). An appendix includes statistical information regarding these subjects. (RJ)

How to Live with Your Special Child:--A Handbook for Behavior Change.

EDRS not available

Descriptors: exceptional child education: emotionally disturbed; delinquents; behavior problems: behavior change; medical treatment: communication (thought transfer); tactual perception: perception: psychokinetics; Green Valley Residential School

The handbook presents techniques for behavior change in delinquent, emotionally disturbed, and non achieving adolescents. Written in a straightforward style, the text discusses physical and developmental needs, the importance of psychokinetics (including descriptions of a large number of exercises and countersuggestions), the integration of perception, motor, and communication, and words, reducing abstraction in language, learning and rehearsing. Self awareness through talking, techniques for controlling symptoms, elimination of fears, and tactics in operant conditioning. Appendices contain descriptions of the Green Valley institute, diagnostic categories, danger signs, materials sources, lesson plans, reading program descriptions, hints for volunteer workers, a test series, Green Valley medical procedures, and a history of Humanius. (JM)
The essay discusses the importance of heredity in mental illness, citing evidence to refute the belief that environment is the causative factor. It is concluded that mental illness is caused by one or several genetically controlled metabolic, enzymatic, neurological, or biochemical defects, which create chemical imbalances or neurological imperfections in the central nervous system and brain. However, it is admitted that a stressful environment can aggravate a mental condition in individuals made susceptible through genetic inheritance (the body does synthesize abnormal kinds and amounts of chemicals under stress, which can build up in the brain and cause mental disorders). Psychotherapy is suggested as an aid only for patients who are still capable of communicating with the analyst. But, especially in severe mental illness, cures by chemotherapy or surgery are foreseen. A shift in research from psychological to biochemical, neurological, and genetic studies is advocated. Until cures for severe mental illness can be found, provision of educational experiences is urged (through educational and behavioral techniques such as operant conditioning). (KW)

Designed for teachers and other professional school personnel, the text presents the characteristics of children with learning and behavioral handicaps accompanied with an illustrative case study. The three variables of teaching (instructional media, school environment and student behavior) are described in terms of effective manipulation of such variables. The acquisition and utilization of significant student data are explored in areas of academic skills, perceptual ability, behavior, and potential reinforcement techniques. Learning principles and theories are described, and specific teaching strategies and methods for academic and social instruction are provided. Detailed procedures for evaluating student performance are presented, followed by a glossary of related terms and phrases. (RD)
theories: psychoeducational processes: psychotherapy; behavior change; community resources: agency role; evaluation: research needs: teaching methods

Designed to introduce the classroom teacher to a clinical teaching approach with the emotionally disturbed child and to encourage critical discussion of current practices and theories, the collection of readings presents selected dimensions of emotional disturbance such as personality patterns, learning disabilities, and minimal brain damage. Techniques of psychotherapy and life space interviewing are described in seven papers, while theories of behavior modification are explored in eight writings. Also included are 10 articles treating the general processes of psychoeducational strategies including those relating to teaching and diagnostic methods, curriculum, and teacher characteristics. Ten papers discuss aspects of school and community resources and cooperation with specialized agencies, and five papers explore dimensions of evaluation and research. A list of recommended readings relating to the concepts represented in the text is provided. (RD)

Psychiatric disorders in children are conceptualized as products of a child's biologic nature interacting with his environment. The categories of the classification are defined in the discussions included, and the manifestations of each described in terms of observable school behavior. Maladaptive reactions derived from gross environmental stress, from cerebral disorders, or from unstructured interaction between the child and his emotional environment are some of the categories explored. Psychotic reactions and an absence of emotional maldevelopment are also categories in the author's classification. (CD)

Presented are the results of a national study of Canadian children with emotional and learning disorders, who number 12% of the Canadian population up to 19 years of age, or no less than 1,000,000 children who need attention, treatment, and care. The category includes children with neurotic or psychotic or behavior disorders, learning disabilities, mental retardation, sensory or physical handicaps likely to cause secondary emotional or learning problems, and cultural or emotional deprivation, and also delinquents. Studied were the needs of such children, the present patterns of care and services (including both education and social services) provided, the problems involved in establishing effective services, new approaches being used in Canada and elsewhere. Recommendations are made for more fully realizing the enumerated objectives. Field visits constituted the main source of data collected by the multi-disciplinary investigating committee. (KW)

Special Child Publications, Inc., 4535 Union Bay Place, N.E., Seattle, Washington 98105 ($15.65).

Designed for the teacher and the teacher educator, the text (volume two in the series) presents a collection of articles dealing with recent trends and approaches in therapeutic education. The role of the teacher in educational therapy is stressed. A blending of professional approaches (such as mental health and psycho-educational) rather than a fragmentation, and a tendency to involve developmental theory and consider the learning ability potential of the youngster are noted. The growth of Instructional Materials Centers and their importance as visible indicators of expanded Federal interest in educating handicapped children is discussed. (CD)

Summarized are the proceedings of the Special Study Institute, attended by directors of special education and of educational communications, and by teachers of emotionally handicapped children. Several projects in the fields of special education media were presented and reviewed, illustrating innovative approaches to teaching emotionally handicapped children. Presentations covered computer-based instructional units, use of media by teachers, the talking typewriter, computer-assisted instruction, analysis of student behavior via closed circuit television, and implications of educational television. Also included is the keynote address by Raymond Wyman and a discussion of the Special
Nursing Outlook; VI9 NI P50-3 Jan 1971

Two case observations of the room nurse. The role of the therapist and play therapy conducted by a psychiatric year-old emotionally disturbed girl who EDRS not available Debra Finds Herself. EC 03 1537 also presented. (CD)

Also presented. Emphasis from the child in his daily routine in a regular kindergarten group training program (for 5 to 8 year old children), outlining problems faced by their Characteristics needed to perform the liaison role; emotionally disturbed; psychotic children; interdisciplinary approach

Geared to parents and teachers, the guide deals with autistic children. Characteristics of the typical autistic child are discussed along with common problems faced by their parents. The confusing problems of diagnosis (labeling) are explored. A report of a summer prekindergarten group training program (for 5 to 8 year old children), outlining the thinking processes employed in setting up, is presented. Emphasis from the program is on changes made by the children, the therapists, and the parents. Two case observations of the autistic child in his daily routine in a regular kindergarten and in a day care center are also presented. (CD)

The text presents in some detail the development of a therapeutic environment for the education of socially maladjusted children. The role of the classroom teacher in the special school to provide support, interest, protection, and acceptance for the child is examined as well as some of the problems faced in the classroom, such as bizarre dress and appearance, contraband in school (weapons, excessive amounts of cash), fighting, lying, obstructing the learning process, profanity, sexual problems, smoking, stealing, truancy, vandalism, and parent child relationships. Supportive services to the program that are taken into account include the role of the guidance counselor, available clinical services, and other agencies. (CD)

ABSTRACT 31711
EC 03 1711 ED N.A. Publ. Date Mar 71 Peterson, Robert F. and Others Training Children to Work Productively in Classroom Groups. EDRS not available Exceptional Children; V37 N7 P491-500 Mar 1971 Descriptors: exceptional child education; behavior problem groups; instructional purposes; group behavior; average students; teaching methods; reinforcement; study habits

The problem of grouping children in the classroom for the purpose of improving teaching has been traditionally approached by homogeneous groups on the basis of age, intelligence test scores, achievement tests, or personality measures. Using an alternative approach, involving direct assessment of academic productivity and pretraining to work in groups, two studies are presented. Experiment 1 showed that through the management of reinforcement contingencies a teacher could develop and maintain a high rate of academic productivity in a group of two boys with school adjustment problems. Experiment 2, which applied similar techniques to a larger group, showed that high rates of work behavior could be maintained as the size of the group increased. It is suggested that the proximity of the teacher may be related to the amount of study behavior generated. (Author)

ABSTRACT 31906
EC 03 1906 ED N.A. Publ. Date 66 Henley, Arthur Demon in My View. EDRS not available Trident Press, 630 Fifth Avenue, New York, New York 10020. The text deals with the treatment of emotionally disturbed children at the Montanari Residential Treatment Center and Clinical School (Florida). Described in a narrative by the observing author, the book describes the personality traits of Montanari, his approach noted as unorthodox but successful, and characteristic behavior of the children who reside in the center. Montanari is presented as a man with no formal training who refuses to adhere to set rules, but whose warmth and understanding of children results in dramatic improvements. Case studies and anecdotes are used to relate the narrative. (RD)

ABSTRACT 31972

Descriptors: exceptional child education; emotionally disturbed; state legislature; teacher qualifications; administration; program descriptions; Michigan

The background and goals of Michigan's program for the emotionally disturbed are discussed prior to a listing of rules and regulations governing the program. Administrative guidelines concern minimum school services, size of school district, definition and certification of emotional disturbance, the emotional planning committee and procedures for program planning. Goals, types, and planning for educational programs are described, and the following general procedures are considered: organization and application for program approval, initiation of a program, personnel qualifications, state
aid and how to claim it. Transportation, tuition, and boarding care. Also provided are a paragraph on general supervision, a copy of the act authorizing programs for the emotionally disturbed, a copy of the rules and regulations, and requirements for teacher approval. (RJ)

The volume brings together 34 articles dealing with the identification, understanding and education of emotionally disturbed school children. General considerations discussed in the first section include a review of man's approach to defining emotional disturbance, the identification of children with emotional problems, and the dynamics of disturbance. A second section focuses upon curricular and facility adaptations involved in a therapeutic program. Included are discussions of several experimental techniques currently being suggested for use with disturbed students. The concluding sections concentrate upon management and discipline, behavior modification, the teacher of the disturbed child, and prevention of emotional disturbance. (CD)

Descriptors: exceptional child education; emotionally disturbed; psychotherapy; child abuse; case studies; biography: psychotic children

The case history of a 12 year old physically deformed. emotionally disturbed mute girl is recounted in a personal narrative by the psychoanalyst who treated her. The author describes the girl's background of severe abuse at the hands of alcoholic mentally ill parents. Investigations into the parents backgrounds and interviews with each helped in the understanding of the child's complete withdrawal from the world around her. Working in the institution (for abandoned children) setting in which the girl had spent her last 7 years. the author describes the child's gradual return to the world as a functioning human being. The text is the second volume of a planned series of three explaining the work of the Sonja Shankman Orthogenic School of the University of Chicago. The School is a residential treatment institution devoted to the rehabilitation of children with severe emotional disturbances. Research into the causation and treatment of primary behavior disorders of childhood. and to the training of persons who wish to specialize in the education and treatment of disturbed children. Four case histories comprise the volume in order to show how the rehabilitation of severely emotionally disturbed children proceeds at the School. and to illustrate the nature and scope of the work. The question of whether the children manage after they have left the School is also examined in the four case histories. (CD)

Children in Distress.
EDRS not available

Descriptors: exceptional child education; disadvantaged youth; emotionally disturbed; socially maladjusted; family problems; school role; prevention

The book concerns distressed children in England. who are defined as children who are often wretchedly unhappy because of the strain put on them by their home environment, and who, because of this, may exhibit emotional. behavior. or social maladjustment problems. Such children who need preventive help but who are not recognized or cannot be taken into care by the welfare department are considered from the point of view of the schools. The first half of the book examines the nature. variety of causes. extent and consequences of such child distress as seen by the schools. Including a look at how much the schools are aware of the problem and how some schools fail to offer compensation and help due to lack of sensitivity to distressed children. The second half of the book discusses attributes of schools which seem to do the most to help and relieve deprived and disturbed children. Topics covered include ways of helping such students in the classroom: guilt. blame. and punishment: how a school can change and fulfill its role of prevention: school welfare - and counseling: and school cooperation with other agencies. Descriptors: exceptional child education: emotionally disturbed; autism: biographies: family (sociological unit): parent child relationship

The biography of the first six years of an autistic boy's life is related by his mother. The parents' attempts to bring the child out of his world of disorientation. understand his needs. and deal with the child's effects on the day to day family relationships are brought out in the narrative. The author's contact with other parents of autistic children and how they have coped with the problems of raising such children is also included. (CD)

Sex Education for Emotionally Disturbed Children with Learning Disorders.
EDRS not available
Journal of Special Education; V4 N4 P445-50 Fall-Win 1970
Descriptors: exceptional child education; emotionally disturbed; learning disabilities; sex education; teaching methods

The article notes that there is apparently a connection between inhibitions related to learning the human body and learning inhibitions in general, and between inhibitions related to a child's exploration of his environment and inhibitions related to his exploration of his own body. Many children, it is stated, are placed in special education settings because of the inappropriateness of their sexual behavior. Also, sex and the human body are interesting subjects to children and teaching them in the classroom could lead to a generalization of interest in learning. Teaching materials and methods used by the authors are discussed. In general, a group discussion format was used, eliciting the children's questions, eliciting their fantasies regarding these questions, and correcting these fantasies. Children at different stages of psychosocial development tended to ask different questions. Well-known distortions and misconceptions about the structure and function of the human body emerged, as well as the students' individual concerns and problems. (Author/KW)

EC 03 2699 ED N.A. Publ. Date 71 4p. Haughton, Eric
Great Gains from Small Starts. EDRS not available Teaching Exceptional Children; V3 N3 P141-6 Spr 1971
Descriptors: exceptional child education; learning disabilities; behavior problems; behavior change; precision teaching; measurement techniques: charts

Summarized is a case in which precision teaching techniques were applied in planning and carrying out multiple projects with a 7-year-old child in a special class, who had disruptive behaviors, difficulties in schoolwork, and short spasms or epileptic-like starts. Behaviors worked on in the precision teaching projects were addition and subtraction facts, leaving gym without permission, and the starts. Behavior charts indicating daily frequency of target behaviors are presented, illustrating the success of the projects and of having students manage their own projects are pointed out. (KW)

ABSTRACT 32725

Descriptors: exceptional child education; emotionally disturbed; mental health; nonprofessional personnel; parent role; teacher role; psychotherapy: program descriptions

Remedial methods and procedures based on the strategy of using nonprofessionals as therapeutic agents in meeting mental health needs are detailed. Historical developments and factual considerations which underlie the strategy are presented. Emphasis is given throughout the book to programs designed to handle mental health problems of children. The readings cover topical areas dealing with mental health needs and new directions; selection, roles and methods in training nonprofessionals; varieties of programs using nonprofessionals; peers, teachers, and parents as therapeutic agents; and research on the use of nonprofessionals. Selections have been drawn from journals as well as from papers presented at scientific and professional meetings. (CD)

ABSTRACT 32763

Descriptors: exceptional child education; emotionally disturbed; special classes; educational programs; elementary school students; program design: program descriptions: administration: curriculum design

Provided for public school systems are educational guidelines for setting up special classes for emotionally disturbed elementary school students. Described is a preventive-developmental program, based on successful experiences in form school districts, which provides for a complete school team approach. Detailed are the steps involved in organizing and implementing such a Transition-Adjustment class program, beginning with a discussion of how to organize a district program and procedures for identifying, screening, and placing the disturbed child. Curriculum content and organization are discussed, as are materials and equipment. Also examined are effective teaching techniques and the characteristics and roles of Transition-Adjustment class teachers and principals. In addition, how to establish a special physical education program and how creative activities in art and other subjects can be important factors in overall growth, are explained. Procedures for gradually returning a child to regular classes and points to consider in planning a summer Transition-Adjustment class program are also covered. Appendixes contain sample budgets and forms. (KW)
three brief statements regarding the Joint Commission on Mental Health of Children. Following are the keynote address by Edwin W. Martin concerning the rhetoric and reality of the Federal response to the educational needs of handicapped children, and other addresses on the strengths and weaknesses of operant conditioning techniques for the treatment of autism (O. Ivar Lovaas), autism as a deficiency in context-dependent processes (Karl H. Pribram), the autistic child as teacher and learner (Frank M. Hewett), and the Institute for Child Behavior research study of high dosage vitamins as a method of treating severely mentally ill children (Bernard Rimland). Workshop presentations and parent panels included cover such topics as the Edison Responsive Environment (or talking typewriter) used with autistic children; problems of management, training, and education as discussed by parents of autistic children of various ages; federal resources; how to work with state legislatures; a public school program for autistic children; and the Irish Society for Autistic Children. A list of eight recommended films is included. (KW)

EC 03 2859 ED 052 401 Publ. Date Apr 71 105p.
Exceptional Children Conference Papers: Diagnostic and Resource Teaching.
Descriptors: exceptional child education; behavior problems; resource teachers; diagnostic teaching; educational diagnosis; discipline problems; crisis therapy; study habits; conference reports
Nine papers concerning various aspects of diagnostic and resource teaching deal with the impact of crisis-resource teaching in the Falls Church, Virginia public schools, the role and requirements of the diagnostic teacher, the effectiveness of resource rooms for children with specific learning disabilities, basic problems in diagnosis, an overview of school disruption, and the intervention teacher and aide as contemporary educators for resolving and preventing school disruption and violence. Also discussed is a thematic approach to include literary works by black writers into the regular English curriculum to make English material meaningful for high-potential youth, a psychoeducational approach to specifying and measuring the competencies of personnel working with disturbances in schools, and the use of peer attention to increase study behavior. (For other CEC convention papers, see EC 032 854-EC 032 858, EC 032 860-EC 032 861.) (KW)

**TERMS AND CONDITIONS**

1. **PRICE LIST**
   
The prices set forth above may be changed without notice; however, any price change will be subject to the approval of the U.S. Office of Education Contracting Officer.

2. **PAYMENT**
   
The prices set forth above do not include any sales, use, excise, or similar taxes which may apply to the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any, shall be borne by the Customer.

   Payment shall be made not later than thirty (30) days from date of invoice. Payment shall be net thirty (30) days from date of invoice. Payment shall be without expense to LIPCO.

3. **REPRODUCTION**
   
Materials supplied hereunder may only be reproduced by not-for-profit educational institutions and organizations; provided however, that express permission to reproduce a copyrighted document provided hereunder must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

4. **CONTINGENCIES**
   
LIPCO shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure of delay, (a) is due to events beyond the control of LIPCO including, but not limited to, fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortage, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments, (b) is due to failures of performance of subcontractors beyond LIPCO's control and without negligence on the part of LIPCO, or (c) is due to erroneous or incomplete information furnished by Customer.

5. **LIABILITY**
   
LIPCO's liability, if any, arising hereunder shall not exceed restitution of charges.

In no event shall LIPCO be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

6. **WARRANTY**
   
LIPCO MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

7. **CHANGES**
   
No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of LIPCO.

8. **DEFAULT AND WAIVER**
   
a. If Customer fails with respect to this or any other agreement with LIPCO to pay any invoice when due or to accept any shipment as ordered, LIPCO may without prejudice to other remedies defer any further shipments until the default is corrected, or cancel this Purchase Order.

b. No course of conduct nor any delay of LIPCO in exercising any right hereunder shall waive any rights of LIPCO or modify this Agreement.

9. **GOVERNING LAW**
   
This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.

2. The difference between Book Rate or Library Rate and first class or foreign postage (outside the continental United States) rate will be billed at cost.

TERMS AND CONDITIONS

1. PRICE LIST
   The prices set forth above may be changed without notice; however, any price change will be subject to the approval of the U.S. Office of Education Contracting Officer.

2. PAYMENT
   The prices set forth above do not include any sales, use, excise, or similar taxes which may apply to the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any, shall be borne by the Customer.
   Payment shall be made net thirty (30) days from date of Invoice. Payment shall be without expense to LIPCO.

3. REPRODUCTION
   Materials supplied hereunder may only be reproduced by not-for-profit educational institutions and organizations; provided however, that express permission to reproduce a copyrighted document provided hereunder must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

4. CONTINGENCIES
   LIPCO shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure of delay, (a) is due to events beyond the control of LIPCO including, but not limited to, fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortage, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments, (b) is due to failures of performance of subcontractors beyond LIPCO's control and without negligence on the part of LIPCO, or (c) is due to erroneous or incomplete information furnished by Customer.

5. LIABILITY
   LIPCO's liability, if any, arising hereunder shall not exceed restitution of charges.
   In no event shall LIPCO be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

6. WARRANTY
   LIPCO MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

7. CHANGES
   No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of LIPCO.

8. DEFAULT AND WAIVER
   a. If Customer fails with respect to this or any other agreement with LIPCO to pay any invoice when due or to accept any shipment as ordered, LIPCO may without prejudice to other remedies defer any further shipments until the default is corrected, or cancel this Purchase Order.
   b. No course of conduct nor any delay of LIPCO in exercising any right hereunder shall waive any rights of LIPCO or modify this Agreement.

9. GOVERNING LAW
   This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.
