ADMINISTRATION AND PLANNING IN HIGHER EDUCATION:

A BIBLIOGRAPHY OF BOOKS AND REPORTS

by

Milo C. Pierce
Assistant Professor
Department of Educational Administration
Southern Illinois University--Edwardsville

Introduction

Administration and leadership in higher education during the past two decades has witnessed a rapidly expanded growth of associated literature. In most colleges and universities planning and operation functions have risen from the personal and unilateral leadership of presidents and deans over compact residential campuses to embrace large staffs who undertake long-range planning involving multi-million dollar annual budgets and capital investments. Higher education now demands knowledgeable managerial specialists at all levels to insure efficient and effective support of the academic programs.

It is the purpose of this bibliography to organize and present an introductory selection of books and reports which may be of value to understand the growing complexities of leadership and planning in institutions of higher education. It is intended to be of benefit to the student of university administration as well as both the experienced or novice administrator and others concerned with higher education planning.
