## ABSTRACT

This document on course goals in art is one part of a critique series dealing with the development and evaluation of course goals in six subject matter areas for grades K-12. The series provides an initial pool of course-level goals that are expected to be of considerable value in assisting educators with goal definition related to curriculum planning and development, instruction, evaluation, and accountability. Course goals for art are arranged according to subject matter in five areas: developing and using awareness, history-culture orientation, composition and language, processes and products, and art and design in environments. The section on developing and using awareness further subdivides goals by sight, intuitive response, identification, and growth in understanding, appreciation, and judgment. Goals in art history and culture are organized by western vs. nonwestern culture and by period of time. Composition and language goals include elements, principles, and approaches goals. Processes and products goals include goals for drawing, painting, printmaking, lettering, sculpturing, ceramics and pottery, textiles and cloth, and photography. Art and design in environments goals are divided into nature design goals and man-made goals. Related documents are EA 004 941-EA 004 944, EA 004 946-948, and ED 061 043. (Author/DN)

# INTRODUCTION

A detailed description of the needs to which this collection of resources is responding, the background, the goal types, the goal codes, and the potential uses of this collection of course goals and their supporting materials are to be found in the accompanying booklet, Course Goals General Introduction. The aim of that booklet is to provide users of the course goal collections in Art, Biological and Physical Science, Health Education, Language Arts, Mathematics, Music, Physical Education, and Social Science with a comprehensive guide to the use, revision, and further development of these planning and evaluation resources.

This brief additional introduction has the more practical goals of: (a) presenting a brief orienting overview of the purposes, nature, and potential uses of the products of the Goal Development Project, and (b) demonstrating how to read and interpret the materials in this collection.

Following is a guide to the contents of the introduction:

Points of special interest about the course goal collection in Art . . . . .	19

The purposes, nature, and potential uses of this Course Goal collection.

Why do we need to state learning goals?

If the basic purpose of education is to help learners to grow and change, then educators and learners must decide and communicate to one another what directions that growth should take and what changes are possible and desirable. Parents, school boards, and the community also have a role to play in influencing educational growth and change. This responsibility can be exercised most rationally if the proposed directions of that growth and change are shared with them in clear and explicit goal statements.

This collection of program and course goals in Art is a nonprescriptive resource for educators and boards of education who wish to design and execute learning plans and policies more efficiently and effectively. It is envisioned that school systems will select from this collection those program goals they subscribe to; that schools within a system will select those course goals they believe appropriate to the needs of their communities and students; and that teachers will devise experiences and testing methodologies to meet these goals that are appropriate to the interests and abilities of their students.

What kind of goals are in this collection?

Two types of learning outcomes are included in this collection -- program goals and course goals. They differ in level of generality, with program goals describing broader outcomes and course goals the more specific outcomes relating to them. Also, they differ in the type of planning for which they are suited. Program goals usually serve as guides to planning and organizing programs at district and area levels. Course goals usually serve as guides to planning courses in schools, departments, and classrooms.

At the classroom teacher level the course goals must undergo a final translation into instructional goals and learning experiences. Relying upon the professionalism of teachers, the Goal Development Project has chosen not to intrude into this level, which is concerned with the professional assembling and adapting of resources and methodology needed to achieve the course goals.

How do program and course goals differ from behavioral and performance objectives?

Figure 1 is an illustration from the Art collection of four levels of goals. Examples of behavioral and performance objectives have also been added to show how they differ from the program and course goals defined in the Project.

Note that program and course goals clearly specify a desired learning outcome. But the "behavioral objective" specifies the method of measurement as well as the desired behavior, while "performance objective" adds prerequisites and proficiency level.

The Tri-county Goal Development Project has chosen to produce program and course goals which are suitable for instructional planning, without being constrained by the measurement demands of behavioral objectives or the prerequisites and proficiency levels of performance objectives. Thus, teachers and students are provided explicit statements of possible learnings for which they can accept accountability in ways most suitable to their instructional circumstances. The teacher and student are free to select those methods of achieving selected outcomes which seem most promising within the constraints of their resources and capabilities. This provides for more flexible teaching and learning than teaching machines and other teaching systems based on behavioral and performance objectives. Such an approach places greater demands on the

Figure 1

System Goal	[ The student understands and appreciates the value of the arts and possesses the knowledge and skills necessary to express himself in one or more of the creative arts.
Program Goal	[ K. The student knows the major principles of artistic composition and is able to apply this knowledge in the process of artistic creation.
Course Goal	[ K. The student knows the necessary steps in the care and preparation of clay for ceramics (e.g., wedging, reconstituting, drying).
Instructional Goal	[ P. The student is able to prepare stoneware clay for use in making a bowl.
Behavioral Objective (Method of Measurement Specified)	[ Given a pound of stoneware clay, the student will prepare it for use and make a bowl which will not crack in firing.
Performance Objective (Prerequisites and/or Proficiency Levels Specified)	[ Given a pound of stoneware clay and instructions to prepare the clay, make a bowl from it, and fire the bowl, 90% of the class will produce a bowl that does not crack in firing.

ingenuity and professionalism of teachers but has far greater potential because of its consistency with motivational principles and its reliance on the trained judgment of the professional on the scene.

Where did the program and course goals come from?

The program goals were prepared by the Portland School District Evaluation Department in consultation with administrators, teachers, and curriculum specialists throughout the metropolitan Portland area. The course goals were developed by outstanding teachers guided by such models and guides as were available, and supported by tri-county and Oregon State Board of Education curriculum and evaluation personnel.

More than 40 local school districts in the tri-county area of metropolitan Portland are active in the Project. This has been achieved through the leadership of the intermediate education districts of the three counties. Representatives from Oregon school districts outside the metropolitan Portland area, from Washington State, and from private school systems have also made valuable contributions.

Its broad base of participation strengthens the Project in a number of ways. First, it provides greater financial and personnel support than any single participant could provide. Second, it makes it possible to draw upon a large and nationally representative pool of teacher talent in organizing goal development committees. Third, it provides a widely representative testing ground for the theories and products of the Project. In less than two years there have already been substantial payoffs. Reports indicate that even the critique collections have been used extensively in curriculum development and evaluation the past year and summer.

School districts contribute services of teachers to the Project, using local curriculum funds. Other current sources of support are the Oregon Board of Education, the Small Grants Program of the Regional

Office of the U.S. Office of Education, and curriculum and evaluation funds of the Multnomah, Clackamas, and Washington County Intermediate Education Districts and the Portland Public Schools.

The contributions of the Oregon State Department of Education and USOE are small in terms of the total budget of the Project, but the involvement is significant. The Project's goals are consistent with the State's interests in better educational management practices and instructional improvement. State involvement has already proved important in disseminating products, and the Project has had an influence on state developments in PPBS and educational goals at the legislative and state board level. Finally, USOE involvement provides future potentials for national dissemination and involvement.

What can the goals in this collection be used for?

School systems may use the collections as a yardstick by which to measure the adequacy of goals and objectives already in use. Goals and objectives of local courses of study and textbooks can be contrasted with the goals in this collection to see how complete they are and how well they provide for different interests, abilities, and levels of achievement. They can also be evaluated for conciseness, clarity, and accuracy using these course goals as models.

These kinds of studies can be undertaken by teachers from all levels of a school system (to assure articulation and philosophic unity); across grade levels, divisions, or high school departments (to assure agreement as to goals and ways and means of attaining them) or by individual teachers.

A related use of the goals is as a starting point for reviewing what the schools should teach and the materials to be used to support teaching. The logical sequence of discussions about what is important to teach and learn is to move from broad policy goals to program goals to course goals,

with appropriate community-board-staff-teacher-student representations at each level. The taxonomic classifications of this collection can serve as a check on higher order goal formulations, and the goals themselves can function as generators of lower order objectives and instructional plans.

The project provides an important resource for improving the quality and extent of participation of students, parents, teachers, school boards, and other citizens in deciding the mission of the schools. An intensive look at the roles of each participating group in generating, reviewing, contributing to, and approving goals will be a future task of the Project.

Another use of the collection is to provide a basis for teaching-learning accountability. If a school approves all or part of the course goals for its students, grade level, divisional, or departmental representatives may choose from them those that are best suited to individual or group aptitudes and interests.

It is possible for teachers to review goals with each student and contract for their attainment if a completely individualized program is desired. Or, it is possible to stake out a set of goals for target groups (regular classes, special classes, mini-courses, etc.). In any event, the goals themselves are sufficiently explicit that means of teaching them and of evaluating their attainment can be devised and applied individually or to groups to suit the needs of teachers and management.

Another use of the collection is the rewriting and development of courses and curricula. By making curricular options explicit and sharable, the collection can help in the development of new or modified courses of instruction and the design or redesign of curricular experiences. One important example of curriculum development fostered by this collection is cross-disciplinary education. Probably no concept is currently more

abused than "interdisciplinary education." While the goals of subject matter learning are at least implicit in the textbooks and other materials used by teachers, the goals of interdisciplinary education do not have even that questionable point of tangible reference. The Tri-county Project, through its extensive coding and retrieval systems, permits selection of goals in terms of various combinations of subject matter, educational level, types of knowledge and process, career education program goals, concepts and values, and index words. This system provides important cues for interdisciplinary planning. The goals, although printed in subject collections such as science, social science, mathematics, music, etc., may be related and grouped in and across subjects through computer retrieval by requesting those goals bearing one or more of the seven code parameters. Thus, for example, a teacher interested in a unit on marine biology can request goals dealing with related concepts in science, social science, language, mathematics, or any other subject field.

A final use of this collection is for long-range planning and systematic control of educational development. The past few years in education have demonstrated that few results of experimentation and development are transportable. The inability of educators to define clear, unambiguous statements of desired learning outcomes is an important underlying cause. The Tri-county Project is establishing sets of goals that may be used consistently for instructional planning and evaluation. The sets are open and are added to each time teachers or curriculum planners specify appropriate learnings not represented in the original collections. However, any statement admitted to the collection undergoes a rigorous process of statement, definition, and coding to insure that its utility to teachers is equal to goals already in the collection.

These collections will support all curriculum development activities in the Portland School System within a year or two, and in many other school districts in the tri-county area as well. The stability this will provide educational experimentation and development is apparent. The power of the goal collections themselves in promoting good educational planning and the ease and convenience it affords teachers in that planning is equally evident.

Other uses can be cited, but districts will discover these. In all of the above activities, districts are invited and encouraged to use the collection selectively and to add their own goals wherever this collection is insufficient to their needs. We hope that where they do add and modify, they will use the feedback forms and contribute to the expansion and improvement of the original collection.

Will help be available for evaluating the attainment of the goals in this collection?

The principal measurement-related product sought by the project developers is a set of test items related to each course goal. This set is to be so comprehensive that any teacher who selects a course goal and translates it into one or more instructional goals will be able to retrieve items, or at least examples of items, appropriate to assess the attainment of his instructional goals.

The Project is beginning to define evaluation models appropriate for assessment of goals in each of the classes of knowledge and process. These models will be used to guide both psychometricians and teachers in the development of criterion referenced test items appropriate for measuring each type of knowledge and process. Teachers using the course goals during the period the items are being developed will be asked to supply copies of their periodic and final examinations to provide materials for a comprehensive set of test items. Teacher aids for test item development based on

the different goal types are being prepared to insure the quality of the item bank. As soon as theoretical formulations relating to values, generalizations, and concepts are refined and consistent, similar work will begin in developing evaluation models and items for those classes of learning. This work should take two to five years to complete, depending upon resources.

Is this the final version of the program and course goals?

No. In the development of both the program and the course goals, an effort was made to make them comprehensive, realistic, and immediately applicable to schools as they are currently organized. At the same time, these goals and the taxonomy are to be revised and improved as they are subjected to use and scrutiny by teachers and curriculum personnel. This is to be accomplished through the feedback instrument distributed with these goals.

As time passes, new goals will be called for. For this reason a provision is being made for the continual review and revision of the goals. This will be largely dependent on feedback from the field. Thus, what is being created is a complete, dynamic, open system for goal-based learning and evaluation. Such a system will be a useful resource to all those seeking to improve their understanding of what should be learned, how it should be learned, and how evaluated.

How to read and interpret the materials in this goal collection.

Following this introduction there are four sets of indexes for retrieving course goals (indicated) by four different colors: subject matter taxonomy, pink; knowledge and process classifications, yellow; subject area program goals, blue; and career education program goals, green.

Codes on the course goals refer to the materials on the colored pages. The colors are to help you find the meaning of a code found beside a course goal. Below is a description of how to read and interpret a page of course goals and its codes.

The bulk of the pages in this collection are taken up with the course goals themselves and their codes. Since our aim here is to learn how to read, interpret, and use these goals, let us look at and discuss a sample page of them from the art collection. (Please see the following page.)

The number headings of the left hand column (4. Processes and Products, 4.5 Sculpturing, and 4.52 Methods) are those sections and subsections of the subject matter taxonomy under which the goals on this page are classified. The subject matter taxonomy which is to be found on the pink pages in the front of the book serves as a table of contents for this collection.

By looking through the taxonomy, a user can find what topics are covered and can turn to those in which he is interested. Also, the headings may be used along with one or more of the other codes to retrieve subsets of goals from the computerized storage system. Finally, the taxonomies form a comprehensive but brief overview of the topics in each subject area judged important in K-12 curricula. As such they form a valuable and convenient tool for curriculum and materials review and planning.

The next thing we note in column (1) under the heading "4.521 Additive" are the Course Goals themselves. Some goals in this column have a bracket to their left. The goals inside the bracket are logically related and may be viewed as a unit.

ART

(1)

- 4. Processes and Products
- 4.5 Sculpturing
- 4.52. Methods

(2) (3) (4) (5) (6) (7)

COURSE GOALS

	Level P/I/U/H	Knowledge or Process Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (N1, V2) Value Words
<u>4.521 Additive</u>						
The student knows that the additive process in sculpture refers to building up materials into a form or adding materials to an armature.	P I U H	K2 K7	2a 4 5		3.14	(C) Form
The student knows the characteristics of the most commonly used additive materials (e.g., clay and plaster).	P I U H	K3	2a			
<u>4.5211 Modeling</u>						
The student is able to create a sculpture using a subtractive technique (e.g., carving wood, modeling clay).	P I U H	P63	2a 4 5	4a 4d 5a	3.14 3.2	(C) Form (VI) Self-expression
The student knows that modeling is done by manipulating plastic materials with the hands and tools in order to build up the form.	P I U H	K7	2a 4 5			(C) Composition (VI) Innovativeness
<u>4.5212 Construction</u>						
The student knows that construction in sculpture refers to assemblages of materials (e.g., welded metal sculpture, "pink" sculpture).	U H	K2	2a			(VI) Creativity
The student knows features and examples of the most common assemblage techniques (e.g., welding - Giacometti; junk - Watts Towers).	U H	K3	2a			
The student is able to assemble materials in various ways to create a sculptural statement.	U H	P76	2a 4 5	4a 4d 5a	3.14 3.2	(C) Form (VI) Creativity

The column (2) on the page as we move from left to right is headed "Level P/I/U/H" (primary, intermediate, upper, and higher). This code provides the teacher or curriculum planner an estimate of the level or levels at which the learning is appropriate. Many times the nature of the goal suggests continued learning over several levels, in which case all levels involved are coded. These indications of level are suggestive only, for it is evident that the appropriate time for learning varies with the interests and abilities of students.

The third column (3) is headed "Knowledge or Process Classifications." The classifications referred to are described at the front of the book on the yellow pages. All goals are roughly classified as knowledge or process depending upon whether they deal with something that is to be known or something the student is able to do. All goals, therefore, begin with the words, "The student knows..." or "The student is able to..."

The familiar knowledge/process distinction is further subdivided into twelve knowledge and seventy-nine process categories to which all course goals have been coded. It will be noted that these classifications owe a partial debt to earlier researchers; notably, Benjamin Bloom, David Krathwohl, Robert Glaser, Henry Walbesser, and Ralph Tyler in Education; Robert Gagné and Robert Miller in Psychology; Jean Piaget and Jerome Bruner in Child Development; and others.

At this point the reader may question the reason for the rather detailed and elaborate system of classifying educational outcomes that has evolved during the Project. We have found that providing teachers with these classification systems has resulted in a more critical approach to the writing of goals. A teacher in attempting to place a goal in its appropriate category may find that its intent is clearly related to one of the categories but its form of expression does not immediately identify it with that category. By rewording the goal, the teacher brings the true intent of the goal into sharper focus, and in almost every instance improves its meaning and clarity. We have also found that the

detailed classifying of knowledge and process goals provides insight into alternative ways of using them for teaching and evaluation. For example, the K2 and K7 beside the first goal on page 12 indicate that it may be taught and evaluated either as a definition or as a goal about the function and carrying out of the additive process in sculpture. Work has already begun in analyzing and suggesting to teachers the types of measurement appropriate for each type of knowledge goal. This work will be extended to process learning as rapidly as resources permit.

In addition to labeling process goals wherever they appear in the collection with the appropriate process classification, goals on the methods and processes of art have been collected in section 3.3 "Approaches" and section 4. "Processes and Products."

Column (4) on the page is headed "Subject Area Program Goals." In this column we find the number of one or more of the program goals found in the front of this book on the blue pages. The definition of this type of goal and its relation to course goals was discussed earlier. Here it is enough to recall that program goals are more general than course goals and that a set of program goals should constitute a description of the major overall learning outcomes expected from a program. Each course goal is cross coded to the program goal(s) to whose attainment it is most directly related.

Column (5) on the page is headed "Career Education Program Goals." In this column we may find the code of one or more of the Career Education program goals found in the front of the book on the green pages. Career education, as envisioned by the coders, concerns the total life of an individual, including day-to-day living, vocation, avocation, and leisure. Nearly every course goal bears at least an indirect relationship to career education viewed in that manner. Only those course goals, however, which have a "direct" relationship to a career education program goal have been coded to that program goal.

A "direct" relationship was interpreted to exist between a course goal and a career education program goal if a teacher could easily and naturally attach some career meaning to the instruction relating to that course goal and thus readily integrate the teaching of career education into teaching his subject. The restriction of the codings to direct relationships as just defined means that codings to career education program goals are relatively rare in the goals written under the more detailed and technical parts of a subject's taxonomy such as the composition and language of art sections of the art taxonomy.

A reader should not assume that because a course goal is cross coded to a career education program goal that he should make an effort to relate it to career education in every case. That is up to himself and the policies to which he is responsible. This coding provides suggestions, not prescriptions for curriculum planning and teaching.

A teacher may use this coding as a help in integrating a discipline and career education and vice versa, by asking himself the following question: "When I am teaching this goal, is there some aspect of career education that can usefully and naturally be brought to the attention of my students?" The cross coding, where it appears, suggests there may be and what the aspect is.

The career education code used with these goal collections makes them the first operational resource for "integrating career education and the rest of the curricula." Naturally a great deal of work has to be done to refine and extend the beginning which the present cross codings represent.

The relation of art and career education is dealt with somewhat differently and more directly in the goals found under the "3.33 Artist-Work of Art" and throughout 4. in goals relating processes and products to career and commercial possibilities. The project will continue to explore the validity and possible extensions of both the latter method of writing goals specifying the relation of a subject area and career education, and also the

former complementary approach of cross coding goals throughout the collection to their point of contact with career education.

The coding "Other Related Content Taxonomy Headings" under column (6) is provided since goals are often rightly classified under more than one subject heading. The numbers in this column refer to the taxonomy on the pink pages at the front of the book. For purposes of computer retrieval, it is possible to request all goals which deal with a particular subject heading, and to extract not only the goals placed under that heading, but also all other goals cross-referenced to it wherever they are located in the collection. While this capability presently exists only within a subject field, it later will be provided among subject fields.

Column (7) on this page is headed "(C) Concept/(V1, V2) Value Words." This form of code is one of the newest and potentially most useful ways to describe and retrieve sets of goals, especially for interdisciplinary learning. Although explicitly singling out the concepts and values dealt with in goals is theoretically very interesting and useful, in practice it is very difficult since no valid lists of such concepts and values exist in the various subject areas. Accordingly, the codings applied in this critique edition should be viewed as experimental attempts made to solicit constructive criticism.

The paragraphs below describe briefly the definitions and procedures used in applying this code.

Words chosen to characterize values and concepts represent residuals of experience that influence the way individuals perceive and behave. Thus, the word freedom connotes certain behaviors associated with the ideal state. Likewise, a word like honesty characterizes a set of behaviors which viewed from a societal perspective characterizes an individual as honest. From an educator's point of view, the only resources available to help students acquire the desired concepts and behavioral tendencies are the knowledge and process learnings planned for and with students.

The words designating the major concepts to which a goal relates are written beside that goal in this fifth column. Words identifying concepts are preceded by "(C)" to distinguish them from the value words found in the same column.

A glance through the subject matter taxonomy on the pink pages at the front of the book reveals many headings which themselves are concept words. These headings have not been repeated as concept words on every goal under that heading, but only on those which bear the most direct and general relationship to the concept designated.

Especially important in considering the nature of values is the distinction between the instrumental processes of clarifying and forming values (V2) and values as end products to be inculcated and strived toward (V1). The curricular and methodological implications of teaching toward values as end products are entirely different from those concerned with the processes of value clarification and formation.

In helping students acquire and strive to attain values (V1), the educator must rely upon teaching knowledge and skills that have a logical bearing upon these values. Where he is concerned with the teaching of value clarification and formation processes (V2), he must teach such conventional skills as verifying information, relating information to criteria, and other methods of clarifying personal and social values by which the clarification, interpretation, and internalization of information can be accomplished. These are the same processes found in the Inquiry and Problem Solving Processes Classification on the yellow pages at the front of the book and are coded in column (3).

The type of values coded in column (7) of this goal collection is type (V1). Where a goal may be used to inculcate or help a student attain a value, the value is named in this column and a "(V1)" is written in front of it. Where a process related to value formation is dealt with in a goal, it will

be a process goal. The process will be indicated by the process code in column (3). Values have also been dealt with explicitly in the several sections of the art taxonomy and the goals indexed by them -- notably sections "1.4 Growth in Understanding," "1.5 Growth in Appreciation," "1.6 Judgmental Growth (Evaluating)," "3.333 Attitude," and "5.1 Nature Design."

The attempt to deal with concepts and values provides another means (along with the treatment of process as well as knowledge) by which this collection can serve as a resource to those wishing to explore and respond to the full range of approaches and orientations being developed for teaching and learning art.

Another useful code is the Index Word. Although it does not appear on the printed page, it is keyed to each goal for retrieval in much the way documents are coded for retrieval in the familiar ERIC retrieval system. Users will have available lists of index words by discipline and across disciplines.

A most important set of materials in this manual is the Feedback Instrument. This instrument calls for the minimum information we need from you, the user, if we are to refine and expand the collection and improve its value to all users. Additional input is welcomed by phone, word of mouth, carrier pigeon, etc., after you have discussed and tried out this resource in your district. Ultimately, the success of the Project is dependent on this input.

Points of special interest about the course goal collection in Art.

Organization: The taxonomy and goals have been organized in a developmental sequence as much as possible, e.g., awareness and knowledge of the elements (3.1), principles (3.2), and approaches (3.3) of art support the products and processes (4.) which in turn are applied in the "design for living" section (5.). Within major sub-divisions attempts have been made to present the basic information at the beginning of the section.

Coding: The authors have attempted to make it possible when appropriate to integrate awareness, historical and cultural orientations, and art techniques into other areas by cross coding under "Other Related Content Taxonomy Headings." Time limitations, however, have made it impossible to completely cross code every goal as carefully as the authors would have liked. It was also not always possible to ideally indicate all the concepts and values dealt with in all the goals.

Goals: The goals in some areas are not as comprehensive as they could be (e.g., "1. Developing and Using Awareness"). The headings and some goals have been made available, however, and it is hoped that users will suggest additional goals via Feedback Instrument II. One of the uses of these collections is for teaching/learning planning. Teachers in art will find the goals especially helpful for:

- a. Organizing developmental sequences for overall curriculum or segments.
- b. Checking to make sure major points in each area are covered.
- c. Filling in specific areas in which their own knowledge is incomplete and directing them to information which is useful.

## SUBJECT MATTER TAXONOMY

## ART TAXONOMY

1. Developing and using awareness
  - 1.1 Sight (seeing)
    - 1.11 Vision (process of seeing)
      - 1.111 Contributions of other senses to vision
    - 1.12 Observational focus (what is seen)
      - 1.121 Natural and man-made environments
  - 1.2 Intuitive response
    - 1.21 Attending (looking)
    - 1.22 Physical and emotional reactions
  - 1.3 Identification (perceiving)
    - 1.31 Frame of reference
  - 1.4 Growth in understanding
    - 1.41 Interrelationships
      - 1.411 Cultural
      - 1.412 Environmental
      - 1.413 Psychological
      - 1.414 The artist/designer
    - 1.42 Information
      - 1.421 Media and education
      - 1.422 Experience
      - 1.423 Increased observation
  - 1.5 Growth in appreciation
    - 1.51 Rational
    - 1.52 Reactional (empathy)
  - 1.6 Judgmental growth (evaluating)

- 1. History - culture orientation
  - 2.1 Western culture
    - 2.11 Prehistoric
    - 2.12 Ancient
      - 2.121 Egyptian
      - 2.122 Mesopotamian
        - 2.1221 Babylonian
        - 2.1222 Assyrian
      - 2.123 Cretan
      - 2.124 Greek
      - 2.125 Roman
    - 2.13 Medieval
      - 2.131 Western Europe
        - 2.1311 Early Christian
        - 2.1312 Romanesque
        - 2.1313 Gothic
      - 2.132 Byzantine
    - 2.14 Renaissance
    - 2.15 Post-Renaissance
      - 2.151 Mannerism
      - 2.152 Baroque
      - 2.153 Rococo
    - 2.16 Modern (19th to 20th century)
      - 2.161 19th and early 20th century
      - 2.162 Mid-20th century
  - 2.2 Non-western cultures
    - 2.21 African

- 2.22 Asian
  - 2.221 Oriental
    - 2.2211 Japanese
    - 2.2212 Chinese
  - 2.222 Indian
  - 2.223 Near East
    - 2.2231 Islamic
    - 2.2232 Persian
- 2.23 Native American
  - 2.231 Central and South American Indian
  - 2.232 North American Indian
  - 2.233 Eskimo
  - 2.234 Polynesian

### 3. Composition and language

#### 3.1 Elements

- 3.11 Space
  - 3.111 Open
  - 3.112 Closed
- 3.12 Line
  - 3.121 Line direction
  - 3.122 Line quality
- 3.13 Shape 2-dimensional
  - 3.131 Geometric
  - 3.132 Free (amorphic)
  - 3.133 Positive
  - 3.134 Negative

- 3.14 Form 3-dimensional
  - 3.141 Geometric
  - 3.142 Free (amorphic)
  - 3.143 Mass
- 3.15 Texture
  - 3.151 Actual
  - 3.152 Visual
- 3.16 Color
  - 3.161 Hue
    - 3.1611 Primary
    - 3.1612 Secondary
    - 3.1613 Intermediate (tertiary)
  - 3.162 Value
    - 3.1621 Tints
    - 3.1622 Shades
    - 3.1623 Gradation
  - 3.163 Intensity
    - 3.1631 Bright
    - 3.1632 Dull
    - 3.1633 Neutral
  - 3.164 Schemes
    - 3.1641 Monochromatic
    - 3.1642 Analogous
    - 3.1643 Complementary
    - 3.1644 Triad
    - 3.1645 Split-complementary

3.165 Conventions

3.1651 Psychological

3.1652 Emotional

3.1653 Cultural

3.166 Science

3.1661 Light

3.1662 Pigment

### 3.2 Principles

3.21 Unity

3.22 Emphasis

3.221 Dominance

3.222 Sub-dominance

3.23 Balance

3.231 Symmetrical - perfect - formal

3.232 Asymmetrical - imperfect - informal

3.24 Movement

3.241 Rhythm

3.242 Harmony

3.243 Tension

3.244 Transition

3.25 Repetition

3.26 Radiation

3.27 Variety

3.28 Perspective

### 3.3 Approaches

3.31 Treatment of subject

3.311 Realistic

3.312 Abstract

- 3.313 Surrealistic
- 3.314 Non-objective
- 3.315 Composition forms
  - 3.3151 Landscape
  - 3.3152 Interior
  - 3.3153 Still-life
  - 3.3154 Figure study

3.32 Methods:

- 3.321 Massive
  - 3.322 Linear
  - 3.323 Collage-assemblage
  - 3.324 Mixed media
- 3.33 Artist - work of art
- 3.331 Technical consideration
  - 3.332 Preparation
  - 3.333 Attitude
  - 3.334 Life

4. Processes and products

4.1 Drawing

4.11 Media materials

- 4.111 Tools
- 4.112 Surfaces

4.12 Techniques

- 4.121 Linear
  - 4.1211 Continuous line
  - 4.1212 Gesture
  - 4.1213 Contour

4.122 Massive

4.1221 Cross-contour

4.1222 Weighted

4.123 Perspective

4.13 Function and composition

4.2 Painting

4.21 Materials

4.211 Paint

4.212 Tools

4.213 Surfaces

4.22 Techniques

4.221 Transparent

4.2211 Ink-wash

4.2212 Watercolor

4.222 Opaque

4.2221 Tempera

4.2222 Casein

4.2223 Oil

4.2224 Acrylic

4.223 Mixed media

4.224 Historical

4.2241 Encaustic

4.2242 Fresco

4.2243 Egg tempera

4.3 Printmaking

4.31 Monoprint

- 4.32 Relief
  - 4.321 Rubbing
  - 4.322 Subtractive
  - 4.323 Additive
- 4.33 Stencil
- 4.34 Planographic (lithography)
- 4.35 Intaglio
  - 4.351 Engraving
  - 4.352 Etching
- 4.4 Lettering
  - 4.41 Calligraphic
  - 4.42 Typeface
  - 4.43 Mechanical
- 4.5 Sculpturing
  - 4.51 Media
  - 4.52 Methods
    - 4.521 Additive
      - 4.5211 Modeling
      - 4.5212 Construction
    - 4.522 Subtractive
    - 4.523 Casting
      - 4.5231 Mold construction
      - 4.5232 Impressions
      - 4.5233 Lost wax
    - 4.524 Kinetic
      - 4.5241 Mobiles
      - 4.5242 Stables
      - 4.5243 Mechanical

- 4.6 Ceramics and pottery
  - 4.61 Clay
    - 4.611 Bodies and elements
    - 4.612 Preparation and phases of maturation
  - 4.62 Construction techniques
    - 4.621 Handbuilt
    - 4.622 Molded
    - 4.623 Thrown
  - 4.63 Surface treatments
    - 4.631 Texture
    - 4.632 Glazes
      - 4.6321 Composition
      - 4.6322 Application
  - 4.64 Kilns
    - 4.641 Materials
    - 4.642 Loading
  - 4.65 Firing
  - 4.66 Ceramics in life
- 4.7 Textiles and cloth
  - 4.71 Fibers
    - 4.711 Synthetic - natural
    - 4.712 Making cords and threads
    - 4.713 Dying
  - 4.72 Non-woven cloth
  - 4.73 Combining techniques
    - 4.731 Tying-binding
      - 4.7311 Twisting - wrapping
      - 4.7312 Macraméing

- 4.732 Interweaving
  - 4.7321 Weaving and looms
  - 4.7322 Braiding
- 4.733 Needlecraft
  - 4.7331 Knitting
  - 4.7332 Crocheting
- 4.734 Rug making
- 4.74 Decorative techniques
  - 4.741 Dying
    - 4.7411 Tie-dye
    - 4.7412 Batik
  - 4.742 Painting
  - 4.743 Needlework
    - 4.7431 Stitching
    - 4.7432 Applique
- 4.8 Photo - film
  - 4.81 History and relationships
  - 4.82 Light
  - 4.83 Visual media
    - 4.831 Still photography
      - 4.8311 Process
      - 4.8312 Film
      - 4.8313 Camera
      - 4.8314 Composition - control
      - 4.8315 Developing
      - 4.8316 Abstracting
      - 4.8317 Display

- 4.832 Projection
- 4.833 Motion picture photography
  - 4.8331 Persistence and vision
  - 4.8332 Film
  - 4.8333 Camera
  - 4.8334 Filming
  - 4.8335 Editing
  - 4.8336 Sound
- 4.834 Electronic visual media
  - 4.8341 Television
  - 4.8342 Video tape

5. Art and design in environments

5.1 Nature design

5.11 Ecology - man's role in the environment

5.12 Ecological controls (conservation)

5.2 Man-made

5.21 Environment

5.211 City planning

5.212 Landscape

5.213 Interiors

5.22 Architecture

5.221 Physical requirements

5.222 Types of architecture

5.2221 Historical

5.2222 Geographical

5.223 Functions

5.2231 Home

5.2232 Community

5.23 Objects

  - P77 Dramatizing
  - P78 Singing, playing instruments
  - P79 Dancing

SUBJECT AREA  
PROGRAM GOALS

### ART PROGRAM GOALS

1. The student is able to interpret the natural and man-made environment with perception and discrimination.
2.
  - a. The student knows and is able to select and use art materials that are specifically suited to requirements for art expression.
  - b. The student is able through art to interpret the life and values of his culture and that of others.
  - c. The student is able to value the ideas that inspire his own art expression and that of others.
3. The student understands the art of his own heritage, historical and cultural art forms, and the interaction of art and society.
4. The student knows the language of art and is able to use that language to express himself and to communicate.
5. The student knows the major principles of composition and is able to apply this knowledge to his work.
6. The student has the knowledge and skills needed to adapt to his visual environment.
7. The student is able to apply the language, disciplines, and processes of art to improve the quality of his personal life and that of society.

CAREER EDUCATION  
PROGRAM GOALS

## CAREER EDUCATION PROGRAM GOALS

	Awareness K-6	Exploration 7-10	Preparation 11-12
1. Attitudes and Values Toward Self and Others	X	X	X
2. Attitudes and Values Toward Work	X	X	X
3. Career Education and the Total Curriculum	X	X	X
4. Career Exploration		X	X
5. Career Preparation		X	X
6. Career Placement and Employment			X

Regardless of the instructional level at which each group of program goals is introduced, continuous development and reinforcement through the remaining years of education is expected.

## CAREER EDUCATION PROGRAM GOALS

1. Attitudes and Values Toward Self and Others
  - a. The student knows the physical and emotional benefits of understanding and respecting self and others throughout life.
  - b. The student knows that the major sources of understanding, acceptance, and respect of self are understanding, acceptance, and respect for others.
  - c. The student knows that success in his career is dependent on satisfactory interpersonal relationships with employers and fellow workers.
2. Attitudes and Values Toward Work
  - a. The student knows the personal, social, economic, and political reasons for work in our society.
  - b. The student knows that work is a dignified human activity which gives rights to and requires responsibilities from its participants.
  - c. The student knows that in our society he is dependent on the goods and services of others for his welfare and survival.
3. Career Education and the Total Curriculum
  - a. The student knows that skill in job exploration, selection, and preparation can lead to continuing career enhancement and personal fulfillment.
  - b. The student is able to identify career alternatives, select those consistent with his values and goals, and implement chosen courses of action.
  - c. The student knows the physical and psychological reasons for seeking a balance between work and leisure activities.
4. Career Exploration
  - a. The student is able to evaluate his aptitudes, interests, and abilities in exploring career opportunities.
  - b. The student knows the major factors that may affect his career opportunities and decisions (e.g., physical, social, economic, educational, cultural, and technological).
  - c. The student knows that individuals can learn to function effectively in a variety of occupations.

- d. The student knows that every career has entry, performance, physical, attitudinal, and educational requirements.
- e. The student knows that career choice may help determine friends, associates, and status in the community.
- f. The student is able to select a tentative career choice based upon exploration of a wide variety of occupations.
- g. The student knows that career choice affects the amount and type of leisure activity that may be pursued.

5. Career Preparation

- a. The student is able to develop and apply the basic skills and behaviors required to perform one or more entry level jobs.
- b. The student is able to employ the following organizational skills appropriate to the career of his choice:
  - 1. identify the objectives of a task
  - 2. specify the resources required
  - 3. outline the steps necessary for completion
  - 4. perform the actual operations
  - 5. evaluate the final product

6. Career Placement and Employment

- a. The student is able to make an assessment of the labor market to determine opportunities that will advance his career.
- b. The student knows the educational opportunities that exist beyond grade 12 for the enhancement of his career skills and his personal development.
- c. The student knows the advantages and responsibilities associated with working independently, as a member of a team, and under direct supervision.
- d. The student knows that the acceptance of a task requires the acceptance of responsibilities to himself and others.
- e. The student knows the opportunities for vertical and lateral mobility within his career cluster.

## COURSE GOALS

1. Developing and Using Awareness

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area Program Area	Career Goals Program Goals	Career Education Program Goals	Content Related Headings	(C) Concept/ (V1, V2) Value Words
<p><u>1. Developing and Using Awareness</u></p> <p>The student knows the location and use of print and non-print materials related to developing and using awareness in art (e.g., card catalog: "Art--Psychology," "Esthetics," "Art--Study and Teaching," "Art Criticism"; <u>Reader's Guide</u>: "Art--Appreciation," "Art, Exhibitions," "Eye in Art"; area and building audio-visual catalogs: "Art Appreciation"; Periodical: <u>Craft Horizon</u>; Book Resources: Learning to See Series).</p>	<p>I U H</p>	<p>K6</p>	<p>1 2b 2c</p>				<p>(C) Resources, art (V1) Inquiry</p>

## 1. Developing and Using Awareness

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>1.1 Sight (seeing)</u>						
The student knows that sight involves both the process of seeing and the segments of the environment that are seen.	P I U H	K1 K2 K3	1 6			
<u>1.11 Vision (process of seeing)</u>						
The student knows the basic elements involved in the process of seeing (e.g., light, the eye, sensations passed to the brain, the cortex).	P I U H	G1 K7	1 6	1b		
The student knows the effects on vision of amount of light and atmospheric conditions (e.g., misty dawn vs. clear afternoon).	P I U H	K8	1 6			
<u>1.111 Contributions of Other Senses to Vision</u>						
The student knows that all the senses can be used to receive impressions about the environment.	P I U H	K7	1 6	1b		(C) Environmen (V1)Aesthetic sensitivit
The student knows that impressions from other senses can affect the interpretation of vision (e.g., odors accompanying images intensify reality).	P I U H	K8	1 6	1b		(C) Environmen (V1)Aesthetic sensitivit

- 1. Developing and Using Awareness
- 1.1 Sight (seeing)
- 1.12 Observational focus (what is seen)

COURSE GOALS	Level P/I/U/H	Knowledge or Process Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>1.121 Natural and Man-made Environments</u></p> <p>The student knows the distinctions between natural and man-made elements in the environment (e.g., between unspoiled nature and nature altered and modified by man).</p>	P I U H	K5	1 5 7				(C) Awareness (V1)Aesthetic judgment (V1)Distrimination

1. Developing and Using Awareness  
 1.2 Intuitive Response

COURSE GOALS	Level P/I/U/H	Knowledge or Process Classifications	Subject Area Program Area	Career Goals Program Goals	Other Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>1.21 Attending (looking)</u></p> <p>The student knows ways a viewer intuitively selects and betters those parts of his environment which are seen and attends to selected parts for identification (e.g., loud noises, bright colors, movement, images which may be attractive or repulsive).</p>	P I U H	K8	1 6				(C) Environment
<p><u>1.22 Physical and Emotional Reactions</u></p> <p>The student knows that visual images can evoke both physical and emotional reactions (e.g., physical salivation in responses to pictures of food, emotional response to "warm" and "cool" colors).</p>	P I U H	K8	1 6	1a 1b			(C) Environment (V1) Pleasure

1. Developing and Using Awareness

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>1.3 Identification (perceiving)</u></p> <p>The student knows that identification and perception of an object is affected by the following: a) the viewer's frame of reference, b) the viewer's conscious or unconscious selection of images.</p>	I U H	K8	1 4				(C) Environment (V1)Aesthetic perception
<p><u>1.31 Frame of Reference</u></p> <p>The student knows that the viewer's "frame of reference" is the result of his: a) mental and physical attitude, b) cultural and educational background.</p>	P I U H	K3	1 6	1b			(V1)Aesthetic perception

1. Developing and Using Awareness  
 1.4 Growth in Understanding

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>1.41 Interrelationships</u></p> <p>The student knows that the elements which enter into understanding what is seen include: the culture, environment, and psychology of the viewer.</p>	P I U H	K8	2b	1a		
<p><u>1.411 Cultural</u></p> <p>The student knows that a person's response to visual stimuli is affected by his cultural biases.</p>	P I U H	K8	2b	1a	(C) Cultural values	
<p>The student knows the ways in which the art of a culture reflects its values, customs and environment.</p>	P I U H	K8	2b	1a	(C) Cultural values (V1) Beauty	
<p>The student knows ways that artists are directed and affected by their culture (e.g., conferring of status and monetary rewards for certain types and levels of creation).</p>	P I U H	K8	2b		(C) Cultural values (V1) Individuality	
<p><u>1.412 Environmental</u></p> <p>The student knows effects on the viewer of the type and arrangement of the visual elements in the environment (e.g., bright colors can create a feeling of excitement).</p>	P I U H	K8	1 6			

1. Developing and Using Awareness  
 1.4 Growth in Understanding  
 1.41 Interrelationships

COURSE GOALS	Level P/I/U/H	Knowledge or Process Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy/ Headings	(C) Concept/ (V1, V2) Value Words
<u>1.412 Environmental (Cont.)</u>							
The student knows ways in which artists and designers adapt to and use features of the natural environment (e.g., garments designed for weather conditions, Frank Lloyd Wright's Architecture).	P I U H	K8					(C) Adaptation (C) Environment
The student knows ways in which considerations of time and change can affect man's adaptation to and modifications of his environment (e.g., Alan Kaprow's "Happenings," lighting for streets).	P I U H	K8					(C) Adaptation (C) Environment
The student knows ways in which consideration of composition and design can affect man's adaptation and modifications of his environment (e.g., Noguchi's sculptures, Halprin's fountains).	P I U H	K8					(C) Adaptation (V1) Aesthetic perception
<u>1.413 Psychological</u>							
The student knows ways in which emotions and attitudes can affect the way individuals relate to and change their environment (e.g., Picasso's playfulness, Van Gogh's anger).	P I U H	K8					(C) Environment

1. Developing and Using Awareness

<u>2.21 African</u>							
The student knows that most African sculpture is a consciously abstracted form based upon man's interests, activities, and practical beliefs.	U H	K8	3		3. 4.5	(C) Cultural values (C) Utility	
The student knows that the lost wax process of casting has been used in African bronze sculpture for at least 10 centuries.	U H	K3	3		4.5233	(C) Culture	
The student knows the ways in which African art has influenced western design (e.g., influence on cubism).	U H	K6 K8	3		3.	(C) Culture	
The student knows that most African wood sculpture is intricately carved from a single log and retains the cylindrical essence of that log.	H	K3	3		4.5221	(V1) Respect for cultural heritage	
The student knows that "Ancestor Figures" were carved by Africans for protective reasons.	U H	K6 K7	3		4.5	(C) Cultural patterns (V1) Respect for cultural heritage	
The student knows materials used in African jewelry such as ivory, alligator teeth, quartz, gold.	H	K3	2b 2c 3				
The student knows the ways in which traditional African textiles can be identified: weaving techniques, dying, patterning.	H	K7	2b 2c 3				
The student knows that the African artist has reflected his culture through painting and sculpture, textiles and jewelry.	H	K6 K7	2b 2c 3			(C) Cultural history	
The student knows that much small African sculpture was done for utilitarian reasons (e.g., brass pulleys, huttles, ivory combs, quartz	U H	K7	2b 2c 3			(C) Utility	

2. History - Culture Orientation  
2.2 Non-western Cultures

## COURSE GOALS

	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>2.21 African (Cont.)</u>						
The student knows that the African Bushmen left a historical record of South Africa in their paintings on sandstone overhangs.	U H	G2 K7	2b 2c 3			(C) Culture
The student knows the characteristic art forms of the major African kingdoms: Nok, Ife, Benin.	U H	K3	2b 2c 3			(C) Cultural patterns
The student knows varieties of African architecture (e.g., mud and thatch tribal dwellings, Ethiopian solid rock churches, Zimbabwe's granite temples, Kilwo's mosques, Egyptian pyramids and temples).	U H	K3	2b 2c 3			
The student knows that many descriptive rock paintings and carvings done by African artists between 6000--1000 B.C. may be seen on North African rock faces today.	U H	G2 K3 K6	2b 2c 3			(C) Cultural history
The student knows that African abstract geometric designs had definite symbolic meanings.	U H	G2 K3	2b 2c 3			(C) Symbolism
The student knows many varieties of African art (e.g., Olduvai Gorge potteries, Ife sculptures, Congo masks, Bush paintings).	U H	K3	2b 2c 3			(C) Cultural patterns
The student knows ways in which African sculpture shows great tension and strength (e.g., cylindrical compressed form, erect head, feet on ground).	U H	K3	2b 2c 3			

2. History - Culture Orientation  
 2.2 Non-western Cultures  
 2.22 Asian  
 2.221 Oriental

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>2.2211 Japanese</u>						
The student knows that Japanese painting and architecture are characterized by the following: (a) an instinctive decorative design, (b) a sensitive understanding of harmonious relations between these designs and nature.	U H	K3	2b 2c 3			(C) Cultural patterns
The student knows that the organic feature of Japanese architecture is derived from the method of construction, emphasis on natural surfaces and incorporation of surrounding nature within the form.	U H	K3 K7 K8	2b 2c 3			(C) Cultural patterns (C) Environmen
The student knows that Japanese drawings have a definite line quality which is positive and concise.	U H	K3	2b 2c 3			(C) Cultural patterns (C) Line
The student knows that Japanese wood cuts were simple in form and used bold color.	U H	K3	1 2 3	3 4.3		
<u>2.2212 Chinese</u>						
The student knows the ways in which art was influenced by the religious belief that harmony exists between human beings and the cosmic powers (e.g., misty space in painting relates to the intangible aspect of living).	U H	K8	2b 2c 3			(C) Cultural patterns
The student knows that Chinese landscape painting was characterized by the following: (a) man's insignificant place in the order of nature, (b) landscape forms an ascending spiral.	I U H	K3	2b 2c 3			(C) Cultural patterns (V1) Belief

- 2. History - Culture Orientation
- 2.2 Non-western Cultures
- 2.22 Asian
- 2.221 Oriental

COURSE GOALS	Level P/I/U/H	Knowledge or Process Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>2.2212 Chinese (Cont.)</u>							
The student knows how the ancient Chinese decorated pottery and fabrics (i.e., paint forced through a mesh woven from human hair).	U H	K7	2b 2c 3				(C) Cultural patterns
The student knows relief printing was done in China in the first century A.D. by ink rubbings of inscriptions carved in stone.	U H	K4	2b 2c 3				(V1) Creativity
The student knows calligraphy is considered to be as important an art as painting in China.	U H	G2 K5	2b 2c 3				
The student knows that Chinese pottery had linear incised patterns ranging from pure geometric design to magical symbols done in a variety of colors and textures.	U H	K3	2b 2c 3				(C) Cultural patterns

2. History - Culture Orientation  
 2.1 Non-western Cultures  
 2.22 Asian

COURSE GOALS	Level P/U/H	Knowledge or Process Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V), (V2) Value Words
<u>2.222 Indian</u>						
The student knows ways in which the art of early India showed a highly developed Indian tradition as well as influences from Mesopotamia.	U H	K5 K8	2b 2c 3			(C) Cultural patterns
The student knows that the following features are characteristic of early Indian art: (1) architectural -- cave temples and stupas (e.g., Mohinjo Dara) were places of worship, symbols, and relic keepers; (2) sculptural -- swelling, flowing, entwined forms in relief and some free standing; (3) materials -- wood and sandstone.	U H	K3	2b 2c 3			(C) Cultural patterns
The student knows that the major source of knowledge about early Indian art is architecture and related sculpture since these forms have withstood erosion.	U H	K2	2b 2c 3			(C) Cultural patterns (C) Physical interaction
The student knows that painting was a well-developed art form in early India.	U H	G2 K6	2b 2c 3			(C) Cultural patterns
The student knows the ways in which Buddhism influenced sculptural and pictorial representation of early Indian art and the arts of Java, Burma, Siam, and Cambodia.	U H	K8	2b 2c 3			(C) Cultural patterns (C) Cultural conflict
The student knows ways in which Hindu art forms incorporate the style and characteristics of Buddhist art forms (e.g., entwined swelling forms, symbolism).	U H	K3 K8	2b 2c 3			(C) Cultural patterns (C) Cultural conflict
The student knows that the Hindu influence on India's art is generally characterized by a feeling for the pleasures of life as well as a reverence for the cyclic cosmic wholeness of the religious concept of Nirvana.	U H	K3 K8	2b 2c 3			(C) Cultural patterns

2. History - Culture Orientation  
 2.2 Non-western Cultures  
 2.22 Asian

## COURSE GOALS

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>2.222 Indian (Cont.)</u>							
The student knows features in Indian art which reflect the Hindu influence: (a) pictorial -- images showing the avatars of Vishnu (Krishna), Siva (land of dance), figures with many arms; and (b) temples as homes of the gods.	U H	K3 K5 K8	2b 2c 3				(C) Cultural patterns
The student knows that the artist of India developed miniatures and manuscripts under the influence of contact with Islam in the 17th century A.D.	U H	G2 K6	2b 2c 3				(C) Cultural patterns (C) Cultural conflict

2. History - Culture Orientation  
 2.2 Non-western Cultures  
 2.22 Asian  
 2.223 Near East

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V), (V2) Value Words
<u>2.2231 Islamic</u>							
The student knows that Islamic art was a vital force in countries ranging from Spain to India.	U H	K8	2b 2c 3				(C) Culture (C) Cultural conflict
The student knows that Islamic art had severe religious restrictions which limited its early development.	U H	K8	2b 2c 3				(C) Cultural patterns (VI) Belief
The student knows Islamic mosques show experiments with different arch forms (e.g., pointed arch, horseshoe arch).	U H	K3 K7	2b 2c 3				(C) Cultural patterns
The student knows that Islamic art used the following: (a) vividly painted stucco and wood carvings, (b) marble and glass inlays, (c) objects made of wrought copper and brass engraved and inlaid with silver, and (d) enameled glass.	U H	K3	2b 2c 3				(C) Cultural patterns
The student knows the following characteristics of repeated Moslem motifs: (a) the arabesque, (b) floral designs, (c) geometric designs, (d) calligraphic decoration.	U H	K3	2b 2c 3				(C) Cultural patterns
The student knows the ways in which calligraphy was integrated in Islamic art (e.g., designs covered entire surface of the object).	U H	K3	2b 2c 3		4.41		(C) Cultural patterns
<u>2.2232 Persian</u>							
The student knows characteristics of Persian art: (a) closely grouped figures, (b) unrealistic proportions, (c) decorative patterns, (d) bright colors, (e) texture, (f) symbolic representation.	U H	K3	2b 2c 3				(C) Cultural patterns

2. History - Culture Orientation  
 2.2 Non-western Cultures  
 2.22 Asian  
 2.223 Near East

COURSE GOALS	Level P/I/U/H	Knowledge of Pro- cess Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>2.2232 Persian (Cont.)</u>						
The student knows the characteristics of Persian carpets: bright colors, close knots, heraldic symmetrical designs.	I U H	K3	2b 2c 3			(C) Cultural patterns
The student knows the characteristics of Persian metal work (e.g., dynamic curves, counter curves, miniaturization).	U H	K3	2b 2c 3			(C) Cultural patterns
The student knows the ways Persian artists used glazed bricks and tiles (e.g., facing of buildings, ceramic decorations).	U H	K7	2b 2c 3			(C) Cultural patterns
The student knows that the Persians did manuscript illuminations (miniatures) that used brilliant colors and flat patterns.	U H	K3 K7	2b 2c 3			(C) Cultural patterns
The student knows the characteristics of Persian glazes (e.g., hard, opaque).	U H	K3	2b 2c 3			

2. History - Culture Orientation  
 2.2 Non-western Cultures  
 2.23 Native American

COURSE GOALS	Level P/U/N/H	Knowledge or Pro- cess Classifications	Subject Area Program Area	Career Goals	Program Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>2.231 Central and South American Indian</u>							
The student knows the major divisions of Central and South American Indian art are Mayan, Aztec, Mochica, Nasca, Tiahuanaco, Inca.	I U H	K2 K3	2b 2c 3			(C) Culture	
The student knows the characteristics of Mayan art (e.g., ornament, curving lines, movement).	I U H	K3	2b 2c 3			(C) Cultural patterns	
The student knows natural materials used by Mayan artists (e.g., stone, bone, wood).	I U H	K7	2b 2c 3			(C) Cultural patterns	
The student knows the characteristics of Mayan cities (e.g., secular buildings, pyramidal bases, ritual emphasis).	I U H	K3	2b 2c 3			(C) Cultural patterns	
The student knows features of Mayan paintings (e.g., done on plaster; recorded historical and religious codices)	I U H	K3	2b 2c 3			(C) Cultural patterns	
The student knows Mayan pottery techniques (e.g., hand shaping, coil, mold use, no wheel thrown, rubbing, incising).	I U H	K3 K7	2b 2c 3			(C) Cultural patterns	
The student knows the following features of Aztec art: (a) massive decoration, (b) free-standing stone sculpture, (c) pyramid temples.	I U H	K3	2b 2c 3			(C) Cultural patterns	
The student knows the following characteristics of Nasca art: (a) textiles consisted of fine woven fabrics, (b) embroidery done with bright colors, (c) pottery with twin spouts joined by a handle, (d) geometric designs, (e) stylized natural forms (plant, animal, human).	I U H	K3	2b 2c 3			(C) Cultural patterns	

- 2. History - Culture Orientation
- 2.2 Non-western Cultures
- 2.23 Native American

COURSE GOALS	Level P/I/U/H	Knowledge or Process Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V), (V2) Value Words
<u>2.231 Central and South American Indian (Cont.)</u>							
The student knows reasons for the prominence of Tiahuanaco's sculpture and architecture.	I U H	K7	2b 2c 3			(C) Cultural patterns	
The student knows that Inca art included the following: (a) stone work, (b) erecting fortifications, (c) temples, (d) palaces, (e) cut masonry, (f) interiors decorated with gold and jewels.	I U H	K5	2b 2c 3			(C) Cultural patterns	

2. History - Culture Orientation  
 2.2 Non-western Cultures  
 2.23 Native American

COURSE GOALS	Level P/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>2.232 North American Indian</u>							
The student knows that the North American Indian incorporated into arts and crafts the tools, plants, and animals introduced by European explorers and settlers.	I U H	K4 K8	2b 2c 3	1b			(C) Cultural patterns
The student knows the characteristics of Mochican art (e.g., stirrup-handled pottery, realistic representations of life, natural subjects).	I U H	K3	2b 2c 3				(C) Cultural patterns
The student knows characteristics of Pueblo baskets: (a) zig-zag designs, (b) terrace designs, (c) geometric designs, (d) use of red and black, (e) used for household and burial.	I U H	K3	2b 2c 3				(C) Cultural patterns
The student knows characteristics of Pueblo structures: (a) made of local sand stone, adobe, and timber; (b) multi-storied; (c) communal.	I U H	K3	2b 2c 3				(C) Cultural patterns
The student knows the ways Hopewell art was influenced by and reflects their way of life (e.g., mounds were made for defense, mounds were made for religious purposes, carved stone pipes with animal decorative forms, copper ornaments).	I U H	K3 K8	2b 2c 3				(C) Cultural patterns
The student knows that with steel tools the northwest coast Indian developed the art of wood carving (e.g., canoes, totem poles, and objects for everyday life).	I U H	K6 K7	2b 2c 3		4.5		(C) Cultural patterns
The student knows that the plains Indians developed an art of costume decoration using feathers, porcupine quills, and bead embroidery.	I U H	K3 K6	2b 2c 3				(C) Cultural patterns

- 2. History - Culture Orientation
- 2. Non-western Cultures
- 2.23 Native American

<p><u>3.11 Space</u></p> <p>The student knows that space in art is the area which material things displace.</p>	P I U H	G2 K2	1 6			(C) Space
<p>The student knows that art exists in space.</p>	P I U H	G2 K7	1 6			(C) Space
<p><u>3.111 Open</u></p> <p>The student knows that open space in art is the limitless area in which material things exist.</p>	P I U H	G2 K2	1 6			(C) Space
<p><u>3.112 Closed</u></p> <p>The student knows that closed space is limited (e.g., shapes made by closing space, forms made by filling space).</p>	I U H	G2 K3	1 6			(C) Space

## 3. Composition and Language

## 3.1 Elements

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>3.12 Line</u></p> <p>The student knows the following functions of line: a) define space, b) record an action, c) suggest movement, d) indicate direction.</p>	P I U H	K3	1 6			(C) Line (C) Space (C) Data repre- sentation	
<p>The student knows ways in which line can communicate the following: a) emotion, b) sensations, c) ideas.</p>	P I U H	K8	1 6			(C) Line (C) Communicat (V1) Emotion (V1) Education	
<p><u>3.121 Line Direction</u></p> <p>The student knows the ways in which line shows direction (e.g., horizontal, vertical, diagonal, or curved).</p>	P I U H	K3	1 6			(C) Line	
<p><u>3.122 Line Quality</u></p> <p>The student knows ways in which line can show quality (e.g., blurred-exact; thick-thin; static-dynamic, interrupted-continuous).</p>	P I U H	K3	1 6			(C) Line	

- 3. Composition and Language
- 3.1 Elements
- 3.13 Shape Two-Dimensional

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>3.133 Positive</u></p> <p>The student knows that positive shape is defined area.</p>	P I U H	K3	1 6				(C) shape
<p><u>3.134 Negative</u></p> <p>The student knows that negative shape is area that is undefined in relationship to defined area.</p>	P I U H	K3	1 6				(C) Shape

- 3. Composition and Language
- 3.1 Elements
- 3.11 Form Three-Dimensional

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>3.113 Mass (Cont.)</u></p> <p>The student knows that volume is the space within the defined mass.</p>	P I U H	K2 K3	1 6		4.2	(C) Form

3. Composition and Language  
3.1 Elements

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>3.15 Texture</u>						
The student knows that texture is the surface quality of anything touched and/or seen.	P I U H	K1 K2	4 5		4. 4.74	(C) Texture
The student knows the following are used to develop texture: a) line, b) shape, c) form, d) color.	P I U H	K7	1 4 5 6		3.12 3.13 3.14 3.162 3.163	(C) Texture
The student is able to develop texture for use in two- and three-dimensional composition.	P I U H	P76	4 5			(C) Texture
<u>3.151 Actual</u>						
The student knows that texture may be revealed through kinesthetic experiences.	P I U H	K7 K8	1 6			(C) Texture
The student knows that objects having various textures exist in the environment (e.g., leaves, brick walls, gravel paths).	P I U H	K3	1 6			(C) Texture
<u>3.152 Visual</u>						
The student knows ways in which the illusion of texture can be created.	P I U H	K7	1 4 5 6			(C) Texture (V1)Aesthetic sensitivity

3. Composition and Language  
 3.1 Elements

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area Program Area	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>3.16 Color</u></p> <p>The student knows that color is the character of a surface which is the result of the response of vision to the wave-length of light reflected from that surface.</p>	P I U H	G2 K2	4 5 6	4b		(C) Color
<p>The student knows the following characteristics of color: a) hue, b) value, c) intensity.</p>	P I U H	G2 K3	4 5 6			(C) Color
<p>The student knows that the use of color is affected by the following: a) schemes, b) conventions, c) science.</p>	P I U H	G2 K8	4 5 6			(C) Color

3. Composition and Language  
 3.1 Elements  
 3.16 Color

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>3.161 Hue</u>							
The student knows that hue is the name of a color or non-color (black, white) in the color spectrum.	P I U H	K1 K2	4 5				(C) Color
The student knows hues can be classified in the following way: a) primary, b) secondary, c) intermediate (tertiary), d) neutral.	P I U H	K5	4 5 6				(C) Color
<u>3.1611 Primary</u>							
The student knows that the primary pigment colors are red, yellow, and blue.	P I U H	K2 K5	4 5				(C) Color
The student knows that primary pigment hues are used to produce all secondary and intermediate (tertiary) colors.	P I U H	K7 K8	4 5				(C) Color
<u>3.1612 Secondary</u>							
The student knows that the secondary pigment colors are green, orange, and violet.	P I U H	K1 K5	4 5				(C) Color
<u>3.1613 Intermediate (tertiary)</u>							
The student knows that intermediate (tertiary) pigment colors are combinations of primary and secondary hues (e.g., red-orange, blue-green).	P I U H	K3 K8	4 5				(C) Color

3. Composition and Language  
 3.1 Elements  
 3.16 Color

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Context Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>3.162 Value</u>							
The student knows that value is the degree of lightness or darkness of a hue.	P I U H	K2 K2	4 5				(C) Color
The student knows the classifications of value: a) tint, b) shade, c) gradation.	P I U H	K5	4 5		4.12 4.22 4.8315 4.8341		(C) Color
The student knows that true colors may vary in value in relationship to one another (e.g., red is darker than yellow but lighter than blue).	P I U H	K3 K5	4 5		3.164 3.165 3.166 4.211 4.3 4.74		(C) Color (V1) Visual acuity
<u>3.1621 Tints</u>							
The student knows that tints are a light value of a color made by adding white.	P I U H	K2 K3 K8	4 5		4.22		(C) Color
<u>3.1622 Shades</u>							
The student knows that shades are a dark value of a color made by adding black.	P I U H	K2 K3 K8	4 5		4.22		(C) Color
<u>3.1623 Gradation</u>							
The student knows that gradation is the changing value of a hue from light to dark or dark to light.	P I U H	K2	4 5		4.12 4.22		(C) Color

3. Composition and Language  
 3.1 Elements  
 3.16 Color

## COURSE GOALS

3.163 Intensity

The student knows that intensity is described in the following ways:  
 a) bright, b) dull, c) neutral.

The student knows that bright colors appear to advance and dull colors appear to recede.

3.1631 Bright

The student knows that a bright hue refers to maximum intensity.

3.162 Dull

The student knows that dull refers to a hue at its minimum intensity.

The student knows that a hue is made dull by adding a complementary color to it.

3.1633 Neutral

The student knows that neutral hues are developed by reducing their intensity.

The student knows that neutral hues are white, brown, black, and their gradations.

	P I U H	K5	4 5	4.12 4.22	(C) Color

3. Composition and Language  
 3.1 Elements  
 3.16 Color

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>3.164 Schemes</u>							
The student knows that color schemes are ordered hue relationships.	P I U H	K2	4 5				(C) Color
The student knows the characteristics of the following color schemes: a) monochromatic (one hue), b) analogous (e.g., yellow-green, green, blue-green), c) complementary (e.g., green-red), d) triad (e.g., red, yellow, blue), e) split-complementary (e.g., yellow-orange, red-orange, blue).	P I U H	K2 K3	4 5		4.211 4.74 5.212 5.213 5.231 5.232		(C) Color (V1) Visual acuity
The student knows ways in which color relationships may be defined (e.g., primary families, position in the spectrum, variations in hue, cultural influences, emotional content).	P I U H	K5 K7	3 4		3.165 4.22 4.74		(C) Color
<u>3.1641 Monochromatic</u>							
The student knows that a monochromatic color scheme consists of gradations of one color.	P I U H	K2 K3	3 4				(C) Color
The student is able to use appropriately a monochromatic color scheme in an art process.	P I U H	P76	4 5		4.22 4.74 5.213 5.231 5.232		(C) Color
<u>3.1642 Analogous</u>							
The student knows that an analogous color scheme consists of three to seven continuous hues in a row on a color chart (e.g., yellow-green, green, blue-green).	P I U H	K3	4 5		4.22 4.74 5.213 5.231 5.232		(C) Color

- 3. Composition and Language
- 3.1 Elements
- 3.16 Color
- 3.164 Schemes

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>3.1642 Analogous (Cont.)</u></p> <p>The student is able to create an analogous color combination.</p>	P I U H	P76	4 5	4.22 4.74 5.213 5.231 5.232	(C) Color (C) Creativity	
<p><u>3.1643 Complementary</u></p> <p>The student knows that a complementary color scheme consists of two hues directly opposite each other on a color wheel (orange-blue).</p> <p>The student is able to use a complementary color scheme in an art experience.</p>	P I U H  P I U H	K2 K3  P76	4 5  4 5	4.22 4.74 5.213 5.231 5.232	(C) Color  (V1) Creativity	
<p><u>3.1644 Triad</u></p> <p>The student knows that a triad color scheme consists of three colors that form an equal angle triangle on a color wheel (e.g., red-orange, yellow-green, blue-purple).</p>	P I U H	K2 K3	4 5	4.22 4.74 5.213 5.231 5.232	(C) Color	
<p>The student is able to construct various triad color schemes.</p>	P I U H	P76	4 5	4.22 4.74 5.231 5.232	(C) Color (V1) Creativity	

- 3. Composition and Language
- 3.1 Elements
- 3.16 Color
- 3.164 Schemes

COURSE GOALS	Level P/H/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>3.1645 Split-Complementary</u></p> <p>The student knows that a split-complementary color scheme consists of a hue and the immediate hues on each side of its complement (e.g., yellow-orange, red-orange, blue).</p>	I U H	K2 K3	4 5		4.22 4.74 5.231 5.232	(C) Color	
<p>The student is able to construct and use a split-complementary color scheme.</p>	I U H	P76	4 5		4.22 4.74 5.231 5.232	(C) Color	

- 3. Composition and Language
- 3.1 Elements
- 3.16 Color

COURSE GOALS	Level P/I/U/H	Knowledge or Process Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V), (V2) Value Words
<p><u>3.165 Conventions</u></p> <p>The student knows that color conventions are classified as: a) psychological, b) emotional, c) cultural.</p>	I U H	G2 K5	4 5				(C) Color
<p><u>3.1651 Psychological</u></p> <p>The student knows the ways in which color is defined by psychological association (e.g., warm colors - red, yellow, orange; cool colors - blue, green, purple).</p>	U H	K2 K8	4 5				(C) Color
<p><u>3.1652 Emotional</u></p> <p>The student knows emotional connotations of color (e.g., green associated with envy, red with anger).</p>	P I U H	K3 K8	4 5	1a			(C) Color
<p><u>3.1653 Cultural</u></p> <p>The student knows that colors have different symbolic meaning to different cultures (e.g., national colors, colors associated with death).</p>	P I U H	K3 K8	3 4 5	1b			(C) Color (VI) Aesthetic sensitivity

3. Composition and Language  
 3.1 Elements  
 3.16 Color

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V), (V2) Value Words
<u>3.160 Science</u>						
The student knows that hue can be studied in terms of light or pigment.	I U H	G2 K7	4 5			(C) Color
The student is able to manipulate light and pigment colors in composition.	P I U H	P35 P66 P76	4 5 6 7		4.22 4.6322 4.82 5.	(C) Color
<u>3.1601 Light</u>						
The student knows that refraction occurs when light passes through a prism and separates into colors of the spectrum.	P I U H	G2 K2 K7 K8	4 5 6 7	4a 4d		(C) Optics
The student knows that white light is made up of the wave-lengths of every color in the spectrum.	P I U H	G2 K3	4 5 6 7		4.82	(C) Color (C) Optics
The student knows that the sensation of color is the response of the eye and nervous system to various wave-lengths of light.	I U H	K8	4 5		4.82	(C) Color (C) Optics
<u>3.1602 Pigment</u>						
The student knows that any coloring material is called pigment.	I U H	K2	4 5		4.211	(C) Color
The student knows that pigments may be obtained from organic (natural) or synthetic sources.	I U H	K10	4 5		4.211	(C) Color

- 3. Composition and Language
- 3.1 Elements
- 3.16 Color

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (N1, V2) Value Words
<p><u>3.1662 Pigment (Cont.)</u></p>							
<p>The student knows that the proportion of binder to pigment affects the value/intensity of the resulting color.</p>	P I U H	K8	4 5		4.22 3.161 3.162 3.163	(C) Color	
<p>The student knows that binders can be used to extend pure pigment.</p>	P I U H	K7 K8	4 5		4.211 4.632	(C) Color	
<p>The student knows the various binders with which pigment is mixed to make specific media (e.g., wax-crayons, linseed oil-oil paint, liquids-inks and dyes).</p>	P I U H	K7 K8	4 5			(C) Color	

3. Composition and Language

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>3.2 Principles</u></p> <p>The student knows the location and use of print and non-print materials related to principles of art (e.g., card catalog: "Design," "Design, Decorative"; <u>Reader's Guide</u>: "Design, Decorative"; area and building audio-visual catalogs: "Art, Balance," "Art, Movement," "Art, Proportion," "Art, Harmony").</p>	I U H	K6	4	3a 4a 4d		(C) Resources, art (V1) Inquiry
<p>The student knows that the principles of design include: a) unity, b) emphasis, c) balance, d) movement, e) repetition, f) radiation, g) variety, h) perspective.</p>	P I U H	G2 K3	4 5 6			(C) Composition: art (V1) Aesthetic sensitivity
<p>The student knows that the principles of design are the guidelines for arranging space.</p>	P I U H	K7	4 5		3.11	(C) Space (V1) Aesthetic perception

3. Composition and Language  
 3.2 Principles

COURSE GOALS	Level P/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>3.21 Unity</u></p> <p>The student knows ways in which unity can be achieved (e.g., use of color, repetition of shape, balance).</p> <p>The student knows that unity in a composition relates parts to the whole and results in a total visual statement.</p>	I U H	K5 K8	4 5 6 7		h.	(C) Composition art (V1) Imaginative-ness	
	I U H	K2 K3	4 5 6 7		h.	(C) Composition art (V1) Aesthetic perception	

3. Composition and Language  
 3.2 Principles

COURSE GOALS	Level P/U/H	Knowledge or Process Classifications	Subject Area	Program Area	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>3.22 Emphasis</u></p> <p>The student knows that emphasis in a composition indicates the artist's feelings and ideas through the relationship of parts.</p>	I U H	K3 K5 K7	4 5 6 7		4.12 4.22 4.3 4.52 4.62 4.63 4.73 4.83 5.	(C) Composition art (V1) Aesthetic sensitivity	
<p>The student knows that emphasis is defined in sub-dominance and dominance.</p>	I U H	K3	4 5 6				

4. Composition and Language  
 3.2 Principles  
 3.22 Emphasis

COURSE GOALS	Level P/U/H	Knowledge or Pro- cess Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>3.221 Dominance</u>						
The student knows ways in which design dominance is achieved (e.g., size, character, color, position, texture).	I U H	K5 K8	4 5			(C) Composition, art (V1) Innovative.
The student is able to achieve dominance in art compositions.	I U H	P76	4 5 6 7	4a 4d 5a	4.12 4.22 4.3 4.52 4.62 4.73 4.83 5.	(V1) Imaginative- ness

3. Composition and Language  
 3.2 Principles  
 3.22 Emphasis

COURSE GOALS	Level P/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concepts/ (V1, V2) Value Words
<u>3.222 Sub-Dominance</u>							
The student knows ways in which sub-dominance is achieved (e.g., small objects, lack of texture).	I U H	K5 K8	4 5				(C) Compositio art
The student is able to achieve sub-dominance in composition.	I U H	P67 P76	4 5 6 7	4a 4d 5a	4.		(C) Compositio art (V1) Imaginativ ness (V1) Innovative ness

3. Composition and Language  
 3.2 Principles

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>3.23 Balance</u></p> <p>The student knows that balance creates a feeling of stability in a composition.</p>	P I U H	K3	4 5 6				(C) Composition. art

- 3. Composition and Language
- 3.2 Principles
- 3.23 Balance

COURSE GOALS	Level P/I/U/H	Knowledge or Process Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Context Taxonomy Headings	(C) Concept/ (V), (V2) Value Words
<p><u>3.231 Symmetrical - perfect - formal</u></p> <p>The student knows that in symmetry (formal balance) there is exact correspondence of form and configuration on opposite sides of a control dividing line or axis.</p>	P I U H	K3	4 5				(C) Composition art
<p>The student is able to achieve symmetrical balance in composition.</p>	P I U H	P67 P76	4 5	4a 4d			

- 3. Composition and Language
- 3.2 Principles
- 3.23 Balance

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concepts/ (V1, V2) Values Words
<p><u>3.232 Asymmetrical - Imperfect - Informal</u></p> <p>The student knows that asymmetrical (imperfect, informal) balance is achieved through the use of unequal parts (e.g., large to several small, small textured area to large non-textured area).</p> <p>The student is able to achieve asymmetrical (imperfect, informal) balance in composition.</p>	<p>P I U H</p> <p>P I U H</p>	<p>K8</p> <p>P67 P76</p>	<p>4 5</p> <p>4 5</p>	<p></p> <p>ha hd</p>	<p></p>	<p></p>	<p>(C) Composition, art</p> <p>(C) Composition, art</p>

- 3. Composition and Language
- 3.2 Principles
- 3.21 Movement

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>3.211 Rhythm</u></p> <p>The student knows that rhythm in art is the regular recurrence of similarities and differences with accented motion.</p>	P I U H	K2 K5	4 5				(C) Rhythm
<p>The student is able to create rhythm in a composition.</p>	P I U H	P67 P76	4 5 6 7	4a 4d 5a	4.		(C) Rhythm

- 3. Composition and Language
- 3.2 Principles
- 3.24 Movement

COURSE GOALS	Level P/U/J/H	Knowledge or Pro- cess Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Context Related Headings	(C) Concept/ (N), (V2) Value Words
<p><u>3.243 Tension</u></p> <p>The student knows that tension in a design is achieved by use of a real or implied interaction of opposing elements.</p>	I U H	K3 K8	4 5			(C) Tension
<p>The student is able to create tension in a composition.</p>	I U H	P67 P76	4 5	4a 4d 5a	4.	(C) Composition, art (C) Tension

- 3. Composition and Language
- 3.2 Principles
- 3.24 Movement

COURSE GOALS	Level P/I/U/H	Knowledge or Process Classifications	Subject Area	Program Area	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>3.244 Transition</u></p> <p>The student knows that transition in a design ties two parts of a composition together creating unity.</p>	I U H	K7 K8	4 5		3.21	(C) Composition art	
<p>The student is able to use transition in composition.</p>	I U H	P67 P76	4 5 6 7	4a 4d 5a	4.	(C) Composition art	

3. Composition and Language  
3.2 Principles

COURSE GOALS

COURSE GOALS	Level P/U/H	Knowledge or Process Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>3.25 Repetition</u></p> <p>The student knows that repetition in art is the recurrent use of a motif in a composition.</p>	I U H	K2	4 5				(C) Motif
<p>The student is able to use repetition to create a composition.</p>	I U H	P67 P76	4 5 6 7	4a 4d 5a	4.		(C) Composition, art

3. Composition and Language  
 3.2 Principles

COURSE GOALS	Level P/I/U/H	Knowledge or Process Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (N), (V) Value Words
<p><u>3.26 Radiation</u></p> <p>The student knows that radiation in a design develops a circular visual movement which focuses the eye on a designated area.</p>	P I U H	K2 K7 K8	4 5				(C) Radiation (C) Movement
<p>The student is able to use radiation to create a composition.</p>	P I U H	P67 P76	4 5 6 7	4a 4d 5a	4.		(C) Compositi: art

3. Composition and Language  
 3.2 Principles

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>3.27 Variety</u></p> <p>The student knows ways in which variety is achieved in a composition (e.g., variation of line direction, texture, color, shape).</p>	P I U H	K7 K8	4 5				(C) Composition, art
<p>The student is able to use variety in a composition.</p>	P I U H	P67 P76	4 5 6 7	4a 4d 5a	4. 5.		(C) Composition, art

3. Composition and Language  
 3.2 Principles

COURSE GOALS	Level P/I/U/H	Knowledge or Process Classifications	Subject Area	Program Goals	Career Education	Other Related Content Taxonomy Headings	(C) Concept/ (N1, V2) Value Words
<p><u>3.28 Perspective</u></p>							
<p>The student knows that perspective is the way in which a three-dimensional subject is organized on a two-dimensional surface.</p>	I U H	G2 K2	4 5				(C) Composition art (C) Perspective
<p>The student knows the following qualities influence perspective: a) size, b) variety, c) purpose.</p>	I U H	K3	4 5				(C) Perspective
<p>The student knows that perspective is considered in achieving the following: a) scale, b) proportion, c) balance, d) rhythm, e) unity.</p>	I U H	K3	4 5				(C) Perspective
<p>The student knows the ways in which perspective is achieved (e.g., one point perspective, two point perspective, overlapping, position in composition, multiple point perspective, foreshortening, color, detail, diagonals).</p>	I U H	K7 K8	4 5 6 7		4. 5.		(C) Composition art

3. Composition and Language

COURSE GOALS	Level P/I/U/H	Knowledge or Process Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Context Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>3.3 Approaches</u></p> <p>The student knows the location and use of print and nonprint materials related to composition approaches in art (e.g., card catalog: "Art, Abstract," "Modernism (art)," "Futurism (art)," "Composition (art)"; <u>Reader's Guide</u>: "Cubism," "Realism in Art," "Symbolism in Art"; area and building audio-visual catalogs: "Art, Landscape," "Art, Abstract," "Art, Surrealism"; periodical: <u>Art in America</u>).</p>	I U H	K6	4	3a 4a 4d	(C) Resources, art (V1) Inquiry	
<p>The student is able to solve a visual problem considering the treatment of subject matter and method to be used.</p>	I U H	P45 P63	2a 4 5 6	4a 4d 5a	(C) Composition art	

3. Composition and Language  
 3.3 Approaches

COURSE GOALS	Level F/I/U/H	Knowledge or Process Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>3.31 Treatment of Subject</u></p>							
<p>The student knows that treatment of subject matter refers to the ways in which the artist translates images and ideas into visual statements (e.g., realistic, abstract, surrealistic, non-objective, composition forms).</p>	P I U H	K2 K7	4 5 6	1b 4a 4d		(C) Composition art	(C) Communication
<p>The student is able to distinguish between the following art forms: abstract, surrealistic, and non-objective.</p>	U H	P31 P33 P45 P62	4 5	4a 4d		(C) Composition art	

3. Composition and Language  
 3.3 Approaches  
 3.31 Treatment of Subject

COURSE GOALS	Level P/U/H	Knowledge or Process Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>3.311 Realistic</u></p> <p>The student knows that the realistic treatment of subject matter is an exact, literal art treatment of the subject (e.g., exactness of color, textured detail, definite forms, precise space relationships).</p>	I U H	K2 K3	4 5				(C) Compositior art (C) Form
<p>The student is able to produce a realistic composition.</p>	I U H	P67 P76	2a 4 5	4a 4d 5a			(C) Compositior art

3. Composition and Language  
 3.3 Approaches  
 3.31 Treatment of Subject

COURSE GOALS	Level P/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Context Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>3.312 Abstract</u>							
The student knows characteristics of abstract art: (a) not a life-like exactness, (b) simplification of subject matter, (c) distortion of subject, (d) exaggeration of subject, (e) repetition of subject.	I U H	K3	4 5	4a 4d			(C) Compositio art (C) Form
The student knows ways in which visual abstraction is achieved (e.g., cubism, positive-negative reversal, hightened contract, distortion, repetition).	I U H	K2 K8	4 5				(C) Compositio art
The student knows that symbols are abstractions evolved through simplification of visual forms for the purpose of communication.	U H	K2	4 5				(C) Compositio art
The student is able to perceive abstractions in natural and man-made forms (e.g., patchwork quilt, overlapping leaves, woven textiles, light and shadow patterns, space divisions).	I U H	P11 P37 P61	4 5 6				(C) Compositio art (C) Form

- 3. Composition and Language
- 3.3 Approaches
- 3.31 Treatment of Subject

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education	Other Related	Content Taxonomy	(C) Concept/ (V1, V2) Value Words
<u>3.313 Surrealistic</u>								
The student knows that surrealistic art is derived from images inspired by the artist's subconscious or fantasy.	I U H	K3 K8						(C) Composition, art
The student knows the work of major surrealistic artists (e.g., Miro, Dali, Chagall).	I U H	K2 K6						(C) Composition, art

- 3. Composition and Language
- 3.3 Approaches
- 3.31 Treatment of Subject

COURSE GOALS	Level P/U/H	Knowledge or Process Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>3.314 Non-objective</u></p>							
<p>The student knows that non-objective art is a statement that does not refer to material objects.</p>	I U H	K3	4 5				(C) Compositio art
<p>The student knows the work of major non-objective artists (e.g., Pollack, Kline).</p>	U H	K6	4 5				(C) Compositio art

3. Composition and Language  
 3.3 Approaches  
 3.31 Treatment of Subject

COURSE GOALS	Level P/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>3.315 Composition Forms</u>  The student knows the characteristics of the following composition forms: (a) landscape, (b) interior, (c) still-life, (d) figure study.	I U H	K5	4 5	4a 4d		(C) Composition art	
The student is able to produce a composition using the following forms: (a) landscape, (b) interior, (c) still-life, (d) figure study.	I U H	P67 P76	2a 4 5	4a 4d 5a			
<u>3.3151 Landscape</u>  The student knows that a landscape composition is composed of exterior scenes and usually natural scenery.	I U H	K3	4 5			(C) Composition art	
<u>3.3152 Interior</u>  The student knows that an interior composition defines the inside of a segment of a building or structure.	I U H	K3	4 5			(C) Composition art	
<u>3.3153 Still-life</u>  The student knows that a still-life composition is composed of non-living objects.	I U H	K2 K3	4 5			(C) Composition, art	
<u>3.3154 Figure Study</u>  The student knows that a figure study composition has a predominance of animate	I U H	K3	4 5			(C) Composition, art	

3. Composition and Language  
 3.3 Approaches  
 3.32 Methods

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (N1, V2) Value Words
<p><u>3.321 Massive</u></p> <p>The student knows the characteristics of massive visual representation (e.g., emphasis on shape and form, de-emphasis of line).</p>	<p>I U H</p>	<p>K3</p>	<p>4 5</p>				<p>(C) Composition art (C) Form</p>

- 3. Composition and Language
- 3.3 Approaches
- 3.32 Methods

<u>4.123 Perspective</u>						
The student knows ways in which highlight and shadow techniques develop three-dimensional and textural qualities.	I U H	K3 K7 K8	2a 4 5		3. 4.126	(C) Composition art
The student knows that perspective may be developed in drawing in the following ways: one, two, and multiple point perspective; foreshortening; overlapping; position in the composition; light and shadow; degree of detail; diagonals; contour drawing.	I U H	K2 K4	4 5		3.28	(C) Composition art (V1)Aesthetic perception
The student knows ways to change a shape into a form by adding the illusion of depth or volume (e.g., shadow-highlight, texture, diagonals).	P I U H	K4 K8	4 5		1. 3.	
The student is able to use perspective in drawing.	P I U H	P45 P67 P76	4 5	3b 4a 4d	1. 3.	(C) Perspective (V1)Aesthetic sensitivity

L. Processes and Products  
 L.1 Drawing

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>4.13 Function and Composition</u>							
The student knows that the composition and language of art are applied to drawing.	I U H	K2 K7	4 5 6				
The student knows the ways of treating subject matter in drawing: a) realistic, b) abstract, c) surrealist, d) non-objective, e) landscape, interior, still-life, and figure study.	I U H	K5 K7	4 5 6		3.31	(C) Composition art	
The student is able to incorporate perspective into the following kinds of drawings: realistic, landscape, interior, still-life, figure study.	I U H	P76	4 5 6		3.3	(C) Composition art (C) Problem solving	
The student is able to apply anatomical principles to figure drawing (e.g., foreshortening, musculature, bone structure proportion).	I U H	P37 P44 P45 P76	4 5 6	3b 4a 4d 5a	3.28	(C) Problem solving	
The student knows some of the uses of drawing (e.g., illustration, planning visual composition, drawing from memory or without looking at the paper to sharpen awareness, intensify observation, study the subject, express an understanding of the environment).	P I U H	K7	4 5 6				
The student knows that drawing is a skill which he can use to enrich his leisure.	P I U H	K7	1 2b 2c 4 5 7	3c	1. 3. 5.		

## 4. Processes and Products

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>4.2 Painting</u>							
The student knows the location and use of print and non-print materials related to painting processes and products in art (e.g., card catalog: "Painting," "Glass Painting and Staining," "Finger Painting," "Textile Painting"; <u>Reader's Guide</u> : "Painting--Study and Teaching," "Painting--Equipment and Supplies," "Artists--Materials"; area and building audio-visual catalogs: "Painting, Water-color," "Painting Technique," "Painting, Tempera," "Painting, Oil").	P I U H	K6	4 5				(C) Resources, art (V1) Inquiry
The student knows that painting is that area of art expression associated with the application of pigment to a two-dimensional surface by means of brush, knife, hand or other tool.	P I U H	K2	4 5 7		3.13 3.1662		(V1) Self-expres- sion
The student knows the following functions of painting: a) decoration, b) self-expression, c) color experimentation, d) communication.	P I U H	K3	4 5 7		3.33		(C) Communicatio- (V1) Self-expres- sion
The student knows that painting can have the following effects: a) sensory (tactile as well as visual), b) psychological, c) emotional.	I U H	K3	1 7				(V1) Self-under- standing
The student is able to apply the principles of design in his painting compositions.	I U H	P76	5	4a 4d 5a			
The student knows that drawing techniques are necessary in painting.	I U H	K7	5 6				

## 4. Processes and Products

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>4.2 Painting (Cont.)</u>						
The student knows the following treatment of subject matter can be applied to painting composition: a) realistic, b) abstract, c) surrealistic, d) non-objective.	U H	K6	3 5		3.31	
The student knows ways in which methods of approaching the subject affect the painting composition (e.g., linear, massive).	U H	K8	5			
The student knows ways in which depth is developed in painting (e.g., perspective, overlap, color variation, texture).	I U H	K7	5			
The student knows the following schools of art, the artists, and the works associated with them: a) Cubism, b) Dadaism, c) Surrealism, d) Fauvism, e) Impressionism, f) Expressionism, g) Romanticism, h) Realism, i) Classicism.	U H	K1 K3	1 3		2.1	(V1) Education
The student knows the evolution of styles, methods, and subject matter in paintings as well as the artists who promoted them: E. G. Giotto-Humanism; Leonardo-Landscape; Monet-Impressionism; Pollack-Action Painting.	U H	K4	3			
The student knows that painting skills and media can be used to influence the consumer.	P I U H	K7 K8	1 2b 3			(V1) Discriminative judgment
The student knows that painting skills can be used to enrich his leisure.	P I U H	K7 K8	7

<p><u>4.221 Historical</u></p> <p>The student knows that the historical techniques are: a) encaustic, b) fresco, c) egg tempera.</p>	U H	K3 K4	2a 3				
<p><u>4.2211 Encaustic</u></p> <p>The student knows the characteristics of encaustic painting (e.g., hot wax, Egyptian, impasto quality).</p>	U H	K3	2a 4				
<p><u>4.2212 Fresco</u></p> <p>The student knows the characteristics of the fresco technique (e.g., surface treatment, plaster usage, layout procedure, use of chipping).</p> <p>The student knows examples of fresco techniques (e.g., Michelangelo's "Sistine Chapel," da Vinci's "Last Supper").</p>	U H	K3	2a 4		2.11		
<p><u>4.2213 Egg Tempera</u></p> <p>The student knows the characteristics of egg tempera (e.g., dries creating cracking of paint, egg used as a binder).</p>	U H	K3	2a				

## 4. Processes and Products

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>4.3 Printmaking</u>							
The student knows the location and use of print and nonprint materials related to printmaking in art (e.g., card catalog: "Stencil Work," "Engraving," "Silk Screen Printing," "Etching"; <u>Reader's Guide</u> : "Art-Technique"; area and building audio-visual catalogs: "Print, Art," "Print, Woodblock," "Printing, Color Silkscreen," "Printing, Lithography").	I U H	K6	4 5				(C) Resources, Art (V1) Inquiry
The student knows that printmaking is the process of transferring an image from one surface to another.	P I U H	K2	2a 4				
The student is able to design an image for a print.	P I U H	P63 P66 P76	2a 4 5	3b 4a 4d 5a			
The student knows that most printmaking techniques make it possible for the artist to make many copies of a single image.	P I U H	K2 K7	2a 7		4.1		
The student knows the function of the following printmaking tools: (a) plate or stencil--the surface the image is put on for transfer, (b) surface--paper, fabric, or other material the print is transferred to, (c) colorant--ink or drawing medium.	I U H	K7	2a	4d			
The student knows that when more than two colors (background surface and colorant) are used in a print it is generally necessary to make a plate for each additional color used.	I U H	K2	2a				
The student knows some of the commercial uses of printmaking techniques (e.g., color litho in books and magazines, silk screen posters, textiles).	I U H	K7	6	3b 4a 4d	5.24		(C) Careers, e

<u>4.43 Mechanical</u>							
The student knows the uses of lettering in architectural and mechanical drawing.	I U H	K7 K8	2a 6 7				(C) Communicatio
The student knows that mechanical lettering skills are necessary for many drafting occupations.	U H	K7 K8	7	3b 4a 4b 4d			(C) Drafting (C) Careers, art

## 4. Processes and Products

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concepts/ (V1, V2) Value Words
<u>4.5 Sculpturing</u>							
The student knows the location and use of print and nonprint materials related to sculpturing in art (e.g., card catalog: "Sculpture," "Wood Carving," "Modeling," "Sculpture, American"; <u>Reader's Guide</u> : "Sculpture--Materials," "Sculpture, Ancient," "Carving").	I U H	K6	4 5				(C) Resources, Art (V1) Inquiry
The student knows the ways in which the following elements of artistic composition are treated in sculpture: (a) line, (b) related masses, (c) dark and light (e.g., surface color and the way the surfaces receive and reflect light), (d) use of materials, (e) surface treatment, (f) organization of three-dimensional space.	P I U H	K3 K8	2a 5				
The student knows that sculpture is a visual statement in three dimensional form.	P I U H	K2 K3	4				
The student knows characteristics of various types of sculpture (e.g., classical Greek sculpture, Egyptian sculpture, Assyrian bas-relief, African sculpture, totem poles, early American carving).	I U H	K3 K5 K6	3		2.		(C) Culture
The student knows examples of the work of history's best known sculptors (e.g., Rodin, Michelangelo, Henry Moore, Alexander Calder, Constantin Brancusi, Lipschitz).	I U H	K1	2b 3 7		2.		(C) Cultural patterns (V1) Creativity
The student is able to apply the principles and elements of art to plan positive and negative areas of a sculpture.	U H	P35 P45 P63 P76	2 4 5	3b 4a 4d 5a	3.13 3.14		(C) Space
The student knows ways that sculpture can be used to enrich his leisure (e.g., Christmas decorations, packaging, creative objects).	U H	K3 K7 K8	2 7	3c			(V1) Self-expre: sion

4. Processes and Products

<u>4.632 Glazes</u>												
The student knows that glaze is a thin glass-like coating that is fused to the surface of the clay form by high heat.	P I U H	K2 K8	2a 4						4.51			
The student knows the ways the following affect glaze: preparation of material, moisture, porosity (clay body), application, firing, composition.	I U H	K8	2a						4.51			
<u>4.6321 Composition</u>												
The student knows that chemical additives affect the flux, color, and texture of glaze.	I U H	K8	2a 4						4.51			
The student knows that frit is used in glazes to: (a) affect the firing temperature, (b) lower toxic level, (c) increase adherence to clay body.	I U H	K7 K8	2a 4						4.51			
The student is able to combine raw materials in appropriate proportions for glazes.	U H	P67 P76	2a	5a					4.51			
The student knows the characteristics of various kinds of glazes (e.g., high fire, low fire, crackle, matte, reduction, crystalline, Bristol, lustre, raku, salt slip).	I U H	K3	2a 4						4.51			
<u>4.6322 Application</u>												
The student knows the ways in which the following are used in adding surface decoration: (a) engobe, (b) underglaze, (c) wax resist, (d) oxides.	I U H	K7	2a						4.51			

4. Processes and Products  
 4.6 Ceramics and Pottery  
 4.63 Surface Treatments  
 4.632 Glazes

COURSE GOALS	Level P/I/U/H	Knowledge or Process Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concepts/ (V1, V2) Value Words
<u>4.6322 Application (Cont.)</u>							
The student is able to use the following for desired surface effects: engobe, underglaze, wax resist, oxides.	I U H	P67 P76	2a 4	5a	4.51		(C) Careers, art (V1) Creativity
The student knows the following techniques of glaze application: (a) brush, (b) dip, (c) pour, (d) spray, (e) drip.	I U H	K7	2a		4.51		(V1) Creativity
The student is able to develop surface decoration on bisque (e.g., scraping, planing, glazing).	P I U H	P67 P76	2a	5a	4.51		(C) Careers, art (V1) Creativity

4. Processes and Products

The student knows ways in which the camera, as an extension of the eye, can control what the viewer sees: (a) limits, (b) expands, (c) selects.	P I U H	K5 K8	4 7				
The student knows ways in which elements and principles of design are applied to the composition of a photograph.	I U H	K6	5 6		3.1 3.2	(C) Design (C) Composition	
The student knows the meaning of the following terms used in photography compositions: (a) close-up, (b) wide angle, (c) horizontal angle, (d) portrait, (e) landscape.	I U H	K3	2a 5		3.3	(C) Composition	
The student is able to apply the elements and principles of design to the selection of a photographic composition (e.g., framing).	I U H	P33 P67	5 6	3b 4a 4d 5a	3.1 3.2 3.3	(C) Composition	
The student is able to manipulate a camera appropriately.	I U H	P35 P67	2a 5 7	3b 4a 4d 5a		(C) Balance (C) Composition (V1) Creativity	
The student knows the effects of the following camera manipulations on the composition of a photograph: focus, settings, filters.	I U H	K3 K8	2a 5 7				
The student knows the effect of light on the composition of a photograph (relationship of subject to light source).	I U H	K2 K8	2a 5				
The student is able to manipulate artificial light on a subject for a desired effect in a photographic composition.	I U H	P35 P67	2a 5	5a		(C) Hue - value (C) Harmony (V1) Creativity (V1) Self-expression	

4. Processes and Products  
 4.8 Photo - Film  
 4.83 Visual Media  
 4.831 Still Photography

## COURSE GOALS

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>4.8315 Developing</u>						
The student knows the chemical processes used to develop a positive print from negative film.	U H	K7	2a	4d		
The student knows ways in which a photograph may be changed in the developing process by varying the following: (a) papers, (b) chemicals, (c) cropping, (d) masking, (e) enlarging.	U H	K8	2a 2c 7	4d		
The student is able to develop black and white or color film.	U H	P35	2a 7	3c 4d 5a	3.162 3.163 3.166	(C) Leisure
The student is able to alter a photograph in the developing process for a desired effect.	H	P35 P67	2a 2c	4d 5a		(V1) Innovative- ness
<u>4.8316 Abstracting</u>						
The student knows the ways in which abstract images can be made by manipulating the camera, light, film, and the developing process.	I U H	K8	2a 7			(V1) Innovative- ness
The student is able to make abstract images using still photographic processes	U H	P35 P67	2a 7	3b 4a 4d 5a		(V1) Innovative- ness
<u>4.8317 Display</u>						
The student knows the ways in which photographs can be mass produced (e.g., color litho).	I U H	K7	2a			

- 4. Processes and Products
- 4.8 Photo - Film
- 4.83 Visual Media
- 4.831 Still Photography

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>4.8317 Display (Cont.)</u>							
The student knows ways in which photography is used in printed media (e.g., magazines, books, advertising illustrations, billboards, posters).	P I U H	K6 K7	2a 4 5	3b 4a 4d			
The student knows the ways in which photographs can be displayed for viewing (e.g., album, montage, mounted, matted, framed).	P I U H	K8	6	3c 4d	3.323		
The student is able to prepare photographs for display in the following ways: montage, mounted, matted, framed.	I U H	P35 P45 P67	4 5	3c 4d 5a	3.323		
The student is able to apply the principles and elements of design in displaying photographs.	I U H	P67	5	3c 4d 5a	3.32		

- 4. Processes and Products
- 4.8 Photo - Film
- 4.81 Visual Media

COURSE GOALS	Level P/I/U/H	Knowledge or Process Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>4.832 Projection</u>						
The student knows that projection is the directing of a light beam through a transparent or translucent material onto a surface which stops and holds the light.	U H	K2 K7	2a			
The student knows that the projection of light can be used to accomplish various effects (e.g., image projection--communicate ideas, colored light--impart emotions).	P I U H	K8	2a		3.1661	
The student knows that an image on a transparent material can be projected onto another surface.	U H	K8	2a			
The student knows that photographic slides are positive prints made on film.	U H	K2 K3	2a			
The student knows that the color of light can be changed by projecting it through color gels (e.g., theatre gels).	I U H	K7 K8	2a		3.1661	
The student is able to make projected images in various ways: (a) slides--photograph, collage, colored cellophane; (b) transparencies--drawn, lifted from magazine, oil and water, colored cellophane.	I U H	P67 P76	2a	3b 4a 4d 5a		(V1) Creativity
The student knows the ways a projected image is enlarged and focused (e.g., changing the distance between the light source and the surface on which it is projected, using lenses to direct, focus, and enlarge the image).	U H	K7	2a			

- 4. Processes and Products
- 4.8 Photo - Film
- 4.83 Visual Media

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (N), (V2) Value Words
<p><u>4.833 Motion Picture Photography</u></p> <p>The student knows that motion picture projection creates an art form in which: a) the illusion of motion becomes an element of design, b) the visual experience occurs in time as well as space.</p>	U H	K3	1 4 7	3.1		(C) Movement (C) Space	
<p>The student knows differences in visual perception between still and moving photography.</p>	U H	K8	1 2a 6			(C) Movement	
<p><u>4.8331 Persistence and Vision</u></p> <p>The student knows the optical theory of the persistence of vision.</p>	I U H	G1 K2	1 2a			(C) Movement	
<p><u>4.8332 Film</u></p> <p>The student knows the function of the parts of the motion picture film including: frame, sprocket holes, sound track, flexible-base, emulsion.</p>	P I U H	K7	2a	4a 4d			
<p>The student knows the standard motion picture film widths (e.g., 35 mm, 16 mm, dual 8 mm, super 8 mm).</p>	P I U H	K2	2a				
<p>The student knows the basic motion picture film speeds measured in frames/second (e.g., filming speeds 24; projection speeds with sound 24; projection speeds--silent 16).</p>	I U H	K2 K3	2a

	P/I/U/H							
<u>h.8332 Film (Cont.)</u>								
The student knows how changes in the filming speed of a motion picture affect the pace of action (e.g., slow motion-time lapse).	I U H	K8	2a					
The student knows how changes in a motion picture projection speed affect the pace of the action.	U H	K8	2a					
<u>h.8333 Camera</u>								
The student knows the function of the following parts of a motion picture camera: lens settings, film magazine, trigger, film speed setting, footage, counter.	I U H	K7	2a	4d				
The student is able to effectively use a motion picture camera: load, focus, set, shoot.	I U H	P35 P67	2a	3b 4a 4d 5a				
<u>h.8334 Filming</u>								
The student knows that the elements and principles of design may be applied to the composition of a motion picture.	I U H	K6	2a		3. 3.1 3.2		(C) Motion	
The student knows that motion is an element of composition design in motion pictures (e.g., motion direction within a shot; relationship of motion between shots, patterns and rhythms created; mobility of camera).	U H	K3	2a		3.1 3.2		(C) Motion	

4. Processes and Products  
 4.8 Photo - Film  
 4.83 Visual Media  
 4.833 Motion Picture Photography

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concepts/ (V1, V2) Value Words
<u>4.8334 Filming (Cont.)</u>						
The student knows the following terms for manipulating the motion picture camera in relation to the subject: wide angle, telephoto, zoom, long shot, medium shot, close-up, horizontal angle, pan, dolly.	I U H	K1	2a		3.3	
The student is able to manipulate a motion picture camera for desired effects.	I U H	P35 P67 P76	6	3b 4a 4d 5a		
The student knows the difference between segments of a motion picture: shot, scene, sequence.	I U H	K5	4			
The student knows the effect of the following ways of changing from one motion picture shot to another (e.g., cut, fade in - fade out, dissolve or mix, wipe).	I U H	K8	2a	5a		
The student is able to change from one shot to another using the technique appropriate for desired effect.	I U H	P35 P67 P76	7	4d 5a		
The student knows that motion picture animation is done by combining a series of still pictures on movie film to be projected.	P I U H	K7	2a			
The student knows that animation is commonly used to make a motion picture in which inanimate things move.	P I U H	K7	2a			
The student is able to make an animated motion picture.	P I U H	P67 P76	2a 5	4a 4d 5a 6c

<u>4.8335 Editing</u>							
The student knows that editing is the process of arranging and eliminating segments of motion picture film to achieve desired order.	P I U H	K3	2a 4				(C) Harmony (V1) Innovative- ness
The student knows that the editor can control the viewers perception of a motion picture by arranging segments in the following ways: sequential relationships, flashbacks, fantasies, symbolic analogies, simultaneous events.	I U H	K7 K8	2a 3b 4a				(V1) Aesthetic perception
The student knows that the art of editing can control the effect of the finished motion picture.	I U H	K8	2a				
The student is able to edit motion pictures for a desired effect.	I U H	P35 P45 P67 P76	2a 5 7	5a			
<u>4.8336 Sound</u>							
The student knows that because motion pictures are movement in time, they can be combined with sound to create a more complete illusion of reality.	U H	K8	2b 3				(C) Movement (V1) Imagination
The student is able to combine sound and motion pictures.	U H	P67	2a 4 5	5a			(V1) Self-dis- cipline

4. Processes and Products  
 4.8 Photo - Film  
 4.83 Visual Media

<u>4.834 Electronic Visual Media</u>						
The student knows that mass visual media are ultimately influenced by the judgments of viewers, which may or may not be based upon a background in visual awareness.	P I U H	K8	1 5 6	2c 3c	1. 5.	(V1) Aesthetic perception
The student is able to care for and use the electronic visual media.	P I U H	P65 P76	7	4a 4d 5a		
The student knows ways that visual media can be combined with electronic devices for various effects (e.g., transmitting images, manipulation of media, image development).	I U H	K7 K8	2a 3			(V1) Innovative-ness
The student knows that computers can be programmed to produce or reproduce an image: a) typed, b) light movement on a screen.	H	K7	2a			(C) Technology
<u>4.8341 Television</u>						
The student knows that television images are motion picture images transmitted electronically to receivers using very and extra high frequency wave lengths and cables.	H	K2	3			
The student knows that the considerations which apply to the composition of motion pictures also apply to the composition of televised materials.	U H	K6	7		4.8314	(C) Composition art
The student knows that color value and intensity are important factors to be considered in planning images to be televised in black and white as well as color.	I U H	K3 K8	7		3.162 3.163	(C) Hue-value

<p><u>h.8341 Television (Cont.)</u></p> <p>The student is able to plan a television image using color value and intensity which will project in black and white as well as color.</p> <p>The student knows the difference in editing approach to a live broadcast and to video tape.</p>	<p>II</p> <p>H</p>	<p>P35 P45 P67 P76</p> <p>K7 K8</p>	<p>5 7</p> <p>7</p>		<p>4.8335</p>	<p>(C) Composition, art (VI) Imagination</p> <p>(C) Continuity (VI) Discriminative judgment</p>	
<p><u>4.8342 Video Tape</u></p> <p>The student knows that video-taping records moving images and sound simultaneously for viewing on a television receiver.</p>	<p>U H</p>	<p>K2 K7</p>	<p>3</p>				

## 5. Art and Design in Environments

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V), (V2) Value Words
<u>5.1 Nature Design</u>							
The student knows the location and use of print and nonprint materials related to the study of designs in nature (e.g., card catalog: "Natural History," "Nature Study," "Design, Decorative (Nature)"; <u>Reader's Guide</u> : "Nature (aesthetics)," "Nature in Art," "Nature Photography"; area and building audio-visual catalogs: "Nature Appreciation," "Nature," "Design, Environmental").	P I U H	K6	1				(C) Resources
The student knows that the elements and principles of design are illustrated in the natural environment (e.g., line of tree branches, shape of rock formations).	P I U H	K6	1		3.1 3.2		(C) Balance
The student knows ways in which physical change creates design in nature (e.g., erosive patterns; variations in light, growth and seismic changes; optical illusions -- mirage, rainbow, northern lights).	P I U H	K8	1				(C) Physical interaction
The student knows ways that the environment creates natural design relationships (e.g., color contrast in flora, dominance of rocks on beaches, line and shape patterns of leaves against the sky).	P I U H	K3 K6	1				
The student knows that various compositional forms may be seen in nature (e.g., realistic mountains, abstract wave patterns in water).	P I U H	K3 K6	1 5		3.3		(C) Composition art
The student knows ways in which man draws forms and ideas from nature for visual statements (e.g., historical and ethnic cultures - acanthus leaves in Greek architecture; flowers in Polynesian prints; symbolism - laurel leaf and dove; use of nature in textile design).	P I U H	K3 K6 K7	1 3		2. 3.312 4.41		(C) Symbols

5. Art and Design in Environments

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>5.1 Nature Design (Cont.)</u></p> <p>The student knows that many design elements in nature are functional (e.g., colors for camouflage or attraction of prey or mate).</p>	P I U H	K7	1				(C) Survival

5. Art and Design in Environments  
5.1 Nature Design

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Context Taxonomy Headings	(C) Concept/ (V), (V2) Value Words
<p><u>5.11 Ecology - Man's Role in the Environment</u></p>							
<p>The student knows ways in which man's activities change the appearance of natural environment (e.g., man uses natural resources, man returns synthetic materials to the natural environment).</p>	P I U H	K8	6				(C) Ecology
<p>The student knows ways in which cultural and psychological values affect the way individuals see their role in the natural environment (e.g., people who live in cities are often unaware of the fragility of natural beauty).</p>	P I U H	K8	1 6				
<p>The student knows ways in which the following ratios between man and the natural environment affect the way man sees his role in the environment: (a) size - man/mountain gives illusion that mountains never move; (b) numbers - man/trees give illusion that trees will always be plentiful; (c) angle - man/sky gives illusion that sky is solid dome.</p>	P I U H	K8	1 6				
<p>The student knows ways in which the development and use of awareness contribute to determining man's role in the natural environment (e.g., growth in understanding can make people more aware of visual changes caused by man in the environment).</p>	P I U H	K8	1 6				

5. Art and Design in Environments  
 5.1 Nature Design

COURSE GOALS	Level P/I/U/H	Knowledge or Pro- cess Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>5.12 Ecological Controls (Conservation)</u></p>							
<p>The student knows the location and use of print and nonprint materials related to conservation in art (e.g., card catalog: "Ecology," "Natural Resources," "Anthropography"; <u>Reader's Guide: "Ecology," "Environment," "Mountain Ecology," "Conservation of Resources"</u>; periodicals: <u>American Forests, National Wildlife</u>; area and building audio-visual catalogs: "Ecology," "Ecology, Conservation").</p>	P I U H	K6	1				(C) Resources, ar (V1) Inquiry
<p>The student knows ways in which awareness can enhance and control man's use of the natural environment: seeing those areas in which controls are needed; determining how the controls should be achieved.</p>	P I U H	K8	1 7				(C) Conservation (C) Ecology (V1) Aesthetic awareness
<p>The student knows ways in which the elements and principles of design can be used to enhance the visual ecology (e.g., building in harmony with nature, balancing open and closed space).</p>	P I U H	K6	1 7				(C) Ecology

5. Art and Design in Environments

COURSE GOALS	Level P/H/U/H	Knowledge or Pro- cess Classifications	Subject Area Program Area	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<p><u>5.2 Man-made</u></p> <p>The student knows career opportunities in the field of architecture (e.g., landscape architecture, city planning, architectural drafting and rendering, domestic and commercial designing).</p>	<p>U H</p>	<p>K6</p>	<p>1 7</p>	<p>3b 4a 4d</p>		<p>(C) Careers, ar</p>

5. Art and Design in Environments  
 5.2 Man-Made  
 5.21 Environment

COURSE GOALS	Level	Knowledge or Process Classifications	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
	P/I/U/H						
<u>5.211 City Planning</u>							
The student knows the location and use of print and nonprint materials related to art in city planning (e.g., card catalog: "City Planning," "Urban Renewal," "Housing"; <u>Reader's Guide: "City Planning," "Zoning," "Urban Renewal"</u> ; area and building audio-visual catalogs: "City Planning," "Urban Development"; periodicals: <u>Parks and Recreation, Architectural Forum, American City</u> ).	P I U H	K6	6				(C) Resources, a: (VI) Inquiry
The student knows ways the appearance of a city is affected by the following: (a) climate, (b) natural phenomena such as storms, earthquakes, (c) various human groups.	I U H	K8	1 7	2c 3a 4a 4d			(C) City
The student knows the ways in which city planning is affected by the following: (a) working measurements in relation to the scale of man (e.g., buildings, streets, blocks); (b) importance of legibility in city planning (e.g., identifiable land marks, movement patterns, boundaries); (c) life styles effect on the appearance of the environment (e.g., fishing village, automotive society, horse/buggy society, ship building); (d) geography (e.g., access, water, vegetation, topography, security, communality).	P I U H	K8	1 7	3a 3b 4a 4d			(C) City (VI) Aesthetic perception
The student knows that the principles of composition and the language of art can be applied in city planning.	P I U H	K6	1 7	3a 3b 4a 4d			(C) City (VI) Aesthetic perception
The student knows that man usually makes a conscious effort to make his environment more visually interesting (e.g., wood and brick ornaments, planting trees, fountains).	I U H	G2 K6 K7	1	3a 3b 4a 4d			

5. Art and Design in Environments  
 5.2 Man-Made  
 5.21 Environment

COURSE GOALS	Level P/I/U/H	Knowledge or Process Classification	Subject Area	Program Goals	Career Education Program Goals	Other Related Content Taxonomy Headings	(C) Concept/ (V1, V2) Value Words
<u>5.211 City Planning</u>							
The student knows characteristics of proposed plans for new cities (e.g., linear, underground, floating, climate controlled, multi-level).	I U H	K3 K4	7	3a 3b 4a 4d		(C) Expansion (V1) Innovative- ness	
The student knows ways in which modern city planning can preserve the traditional atmosphere of the city (e.g., new subway in Mexico City).	U H	K3 K8	7	3a		(C) Expansion (V1) Cooperation with others	
The student knows characteristics of historical city planning ideas (e.g., Paris; Washington, D.C.; da Vinci's ideal city; Brasilia; Machu Pichu, Peru).	U H	K3	7			(C) Expansion (V1) Creativity	
The student knows that complex problems are inherent in the growth and decay of cities (e.g., change in central city, urban renewal).	I U H	K3 K4	3 7	3a		(C) Social char	
The student knows that current considerations of city planning include: (a) eliminating visual blights (e.g., poles wires, signs); (b) community movement system (e.g., bridges, underpasses); (c) pedestrian movement systems (e.g., subway, people movers); (d) textural treatment to visual environment (e.g., diversity, create a mood, tactile response, visual enjoyment); (e) recreation use (e.g., creative playgrounds).	U H	K3	7	4a 4d		(C) City (C) Transporta- tion (C) Recreation	
The student knows that the visual experience of a city depends upon the individual's point of view (e.g., a seaman, an aviator, a poet, an industrialist).	U H	K8	1			(V1) Aesthetic perception

<u>5.213 Interiors</u>								
The student knows the location and use of print and nonprint materials related to interiors in the design for living in art (e.g., "Interior Decoration," "Furniture," "Design, Decorative," "Mirrors"; <u>Reader's Guide</u> : "Interior Decoration," "House Decoration," "Furniture, American," "Antiques"; area and building audio-visual catalogs: "Furnishings, Home," "Furniture, Colonial," "Interior Decoration," "Interior Design"; periodicals: <u>House &amp; Garden</u> , <u>Sunset</u> , <u>House Beautiful</u> ).	P I U H	K6	6					(C) Resources, art (V1) Inquiry
The student knows ways in which various cultures are reflected in interior design (e.g., Japanese simplicity, Baroque opulence, Shaker austerity).	I U H	K6 K8	2b 3					(C) Cultural patterns
The student knows the function of the following features of interiors: (a) ceilings, floors, walls; (b) windows, doors, and other openings; (c) built-ins and movable items.	P I U H	K3	6					
The student knows ways in which the following considerations apply to interior design: (a) floor plans and traffic patterns; (b) function of individual spaces (e.g., offices, reception rooms, cafeteria, living room); (c) scale and proportion (e.g., furniture, room size, counters, doorways).	P I U H	K3 K6	2a 4	4d				
The student knows psychological and physical effects of design arrangements in interiors (e.g., warm-cool colors, soft-hard textures, large-small spaces, use of plants for color, shape, and environmental refreshment).	P I U H	K8	1 7	3a				(C) Emotional health
