ABSTRACT

This quarterly publication announces the availability of instructional materials acquired and processed by the Educational Resources Information Center (ERIC) Clearinghouse on Vocational and Technical Education. It should be of particular interest to teachers, curriculum specialists, supervisors, and administrators involved in curriculum development or the use of instructional materials in the teaching-learning setting. Each abstract, a condensation of the report in about 200 words, usually includes the means used to develop the material, the setting for use of the material, and source of available copies. Author, subject, and document number indexes provide entry to the abstracts. Most of the documents which have not been announced in "Research in Education" are available as a separate microfiche set from the ERIC Document Reproduction Service (VT 017 801, announced in RIE, March 1973 as ED 016 919). Others are available from the source identified in the abstract. (CD)

PREFACE

Finding and using relevant information frequently is a major task for curriculum specialists, teachers, administrators, and students. The Center for Vocational and Technical Education is dedicated to making useful and vital information accessible so that educators may use it to improve school practice.

The Center quarterly assembles, under one cover, instructional materials relevant to the field of vocational-technical education. Abstracts of Instructional Materials in Vocational and Technical Education (AIM) is presented in the form of collections of abstracts of documents from all areas within this field.

AIM abstracts are designed especially for teacher or student classroom usage. The current information provided will also benefit educators directly related to classroom instruction and all who need access to contemporary instructional materials development.

We are indebted to our colleagues within the profession for providing us instructional materials as they become available. We also appreciate the contributions of instructional materials laboratories, local school systems and professional associations such as the Vocational Instructional Materials (VIM) section of the American Vocational Association. Members of the profession are continually encouraged to forward instructional materials for possible inclusion in future issues of AIM to the Acquisitions Specialist at The Center.

We hope that this publication will prove valuable to you in your particular educational endeavors.

HOW TO USE AIM

This volume of AIM (Abstracts of Instructional Materials in Vocational and Technical Education) has two major sections: resumes containing abstracts, and indexes.

Each abstract presents information about a document's content to help you to decide if you want to read the full text of the document. The abstract is part of the resume which provides information about the document, its source and availability. Abstracts are arranged in ascending VT-number order. A sample resume, preceding this Introduction, is explained in detail.

The indexes help you to locate the abstracts by page numbers and VT numbers. These indexes are: Subject Index, Author Index and Conversion of Document Number Index. Index terms used in the subject index are ERIC descriptors. Each document has been assigned several of these descriptors; therefore, each document title appears in the subject index several times.

The full texts of documents are available from the original sources or from the ERIC Document Reproduction Service (EDRS) as microfiche or Xerox reproductions. Ordering information for AIM and EDRS reproductions is provided in a following section.

NEW CAREER EDUCATION EMPHASIS

Recent emphasis on career education as a major focus in reforming and redirecting the American educational structure has produced a flurry of activity in conceptualizing and developing effective programs. This activity is evidenced by the four models sponsored by the U.S. Office of Education and numerous state and local career education efforts. This issue continues expanded announcement of career education materials in AIM. Intensified acquisition efforts in this area have identified career education instructional materials which should be of great value to educators developing and upgrading their programs. Many of these documents are listed under "career education" in the subject index.

ERRATA

Due to a computer error, the
page numbers given in the Author Index of
AIM Volume 5, Number 4 are incorrect.

DOCUMENT ORDERING INSTRUCTIONS

All documents cited in this publication are available in their full text. Availability is by one of the options listed below:

1. ORIGINAL COPY FROM PUBLISHER OR SUPPLIER

These documents have an availability listed in the resume. Often such documents are not available by any other means.

2. MICROFICHE AND HARD COPY REPRODUCTIONS

Documents with ED numbers are usually available individually on microfiche (\$0.65 a title) or paper copy (xerox - \$3.29 per 100 pages or fraction thereof) from:

ERIC Document Reproduction Service (EDRS)
P. O. Drawer O
Bethesda, Maryland 20014

Orders must specify ED number. A sample order form follows on page 117.

3. MICROFICHE SETS

Documents with VT numbers only are not available as individual microfiche, but most are part of VT-ERIC microfiche sets.

A microfiche set contains all the documents announced in a single issue of AIM which are not available by one of the options outlined above. These documents are filmed continuously in VT number order, and each set is assigned a single ED number.

VT-ERIC microfiche sets are available

- a. In any complete collection of ERIC microfiche.
- b. As VT-ERIC microfiche sets purchased individually. (See page 114 for price lists of these sets)
- c. From institutions (e.g., state research coordination units) which have the VT-ERIC microfiche sets and are willing to provide microfiche duplicates of individual VT numbered documents.

Since ED numbers are assigned after announcement in RIE, ED numbers for the microfiche set corresponding to this publication can be obtained from future issues of AIM and RIE.

PRICES OF VT-ERIC MICROFICHE SETS

Most documents announced in a single issue of AIM are available in a VT-ERIC Microfiche set. Documents which are available from the publisher or supplier, or which have individual ED numbers, are usually not included in these sets and should be ordered as outlined on page 113.
