              *Games; Game Theory; Resource Guides; *Simulation

ABSTRACT
         This partially annotated bibliography on simulation
and gaming contains over 1,000 citations arranged alphabetically by
author's last name. Types of sources included are books, periodical
articles, dissertations, and material in the ERIC system. Dates of
citations range from 1956-1971 with most in the mid to late 60's.
Also included is a list of four professional organizations concerned
with simulation/gaming, and a list of centers for the study of
simulation/gaming. (OPH)

            This paper asserts that educational games present
            the complex realities of simultaneous interactive
            processes more accurately and effectively than
            serial processes such as lecturing and reading.
