#### ABSTRACT

This content analysis schedule for the Bilingual Project of Rochester, New York presents information on the history, funding, and scope of the project. Included are sociolinguistic process variables such as the native and dominant languages of students and their interaction. Information is provided on staff selection and the linguistic background of project teachers. An assessment is made of the duration and extent of the bilingual component, and the methods of second language teaching in general. Included is an analysis of materials, student grouping, tutoring, curriculum patterns, and cognitive development. The report also discusses self-esteem, learning strategies, the bicultural and community components, and means of evaluation. Attached are several appendixes supplying additional information on material used in the program. (SK)

#### PART II. NARRATIVE

#### I. Abstract

The major objectives of this proposed program of Bilingual Education are:

- 1. to develop a competence in English in children whose home language is Spanish in order to allow continuous progress through school.
- 2. to develop competence in Spanish in order to enhance self-concept and learning ability through knowledge of history and culture associated with Spanish language.
- 3. to provide better educational opportunities for Spanishspeaking children and youth.
- 4. to develop competence in English and Spanish for a limited number of monolingual, native English-speaking children through participation in bilin wal and bicultural programs.
- 5. to establish closer parent-school communication.

The proposed program includes four components:

- 1. a pre-school component; primarily for four-year olds. For approximately 50% of the time, material and information will be presented in Spanish by a teacher who is a native speaker of Spanish; the other approximately 50% of the time, similar material and information will be presented in inglish to the same group of children by a teacher who is a native speaker of English. Both teachers will be fluent in the other's language in order to plan and correlate lessons, have parent conferences, etc. Time will be included in the day for these purposes. There should be no less than 15 native Spanish-speaking nor more than 5 native English-speaking children in each group of 20 children. A total of 80 children will be enrolled. It is planned that 40 children will be enrolled in morning and 40 children in afternoon sessions. In addition to the two teachers described above, one Spanishspeaking community school aide will be employed as part of the staff.
- 2. a primary elementary school component for kindergarten and first grade. The structure will be similar to the pre-school component. Kindergarten will be on half day sessions while first grade will meet all day. Approximately 80 children will be enrolled in kindergarten and 40 in first grade. A Spanish-speaking community-school aide will be assigned to this component also.

- 3. a secondary school component primarily for grades 7 10.

  Mathematics, Social Studies and Science will be taught in Spanish at the above-mentioned grade levels while each student is enrolled in an intensive English as a Second Language program.

  Approximately 50 students will be enrolled. A Spanish-speaking community-school aide will be assigned to this component.
- 4. an administrative pre-service orientation and plunning session and inservice training. Prior to September 1. 1969, the Project Supervisor will conduct a two week pre-service orientation and planning session for all personnel employed for bilingual education units. This session will provide orientation to City School District practices and procedures in addition to orientation to bilingual education program philosophy and design. psychological and sociological problems of the target population, and hispanic culture and history. Uses of curriculum materials and evaluative procedures will be presented at this time and continued in inservice training throughout the school year.

The intent of this design is to provide a model program that will grow in scope over a five-year period, adding elementary and secondary grades each year until a full pre-school through 12th grade bilingual program is developed.

The target population for bilingual education is Spanish-speaking (primarily Puerto Rican) children. A Puerto Rican Citizens' Advisory Committee on Bilingual Education has been established to aid in program planning, implementation, and evaluation. The committee is composed of parents. community leaders, community workers, and youth. The City School District is working closely with this committee.

The major objectives as previously stated should be met through the implementation of the proposed program.

The planning of this proposal was funded by a Title VII grant award. #OFG-0-9-420201-3444 (280). The project number is 42-0201-0.

N.B.	Extra help: After schoo		* Bil. Coun	2:20)	handle stude	ents' progra

The schedule above broken into eight periods daily consists of 45 minutes per period with, Science Lab twice a week for 90 minutes.

Since this is a modular schedule that should provide whenever necessary the flexibility to tutor individually one, two or three students in the various language and academic areas, the teachers in coordinated unism with the reading specialist and teacher aides should arrange and make provisions for tutorial and small groups instruction. Or the other hand, those students that are working above average expected performance level should be also given the time to do independent study in interest areas of the above academic program and/or take electives from the regular school program. Counselor, upon recommendations of teachers, will effect (placement, changes, referrals) and will inform the vice-principal at the secondary school and the Project Director.

#### IV. Program Procedures

Operational procedures will be organized in the following manner:

A. Component I - Pre-school unit.

Forty four-year old children will be enrolled in morning and 40 more in afternoon pre-school bilingual lenguage development programs. The two sections will be assigned one Spanish-speaking teacher aide who will assist with teacher assigned activities and other areas as prescribed in section VI of the narrative. The native Smanish section will provide a Spanish atmosphere. All written material in and around the room will be in Spanish. The teacher will use only Spanish as will the teacher aide. They will respond to questions spoken in English, but their answers will always be in Spanish. The narrative English section will provide a North American atmosphere. All written material in and around the room will be in English. The teacher will use only English as will the teacher-aide. They will occasionally respond to questions in Spanish, but their answers will be always in English. The establishment of a classroom atmosphere that is representative of the specific language and culture reflects part of the philosophy of The Coral Way project in Dade County, Florida. It is vital that children learn to associate the language they are learning at a given time with specific cultures as represented by specific classrooms and people. There must be as little confusion as possible. This philosophy and the following is a possible outline of the program organization:

8:30 - 9:00 Planning and lesson coordination time with each other and aide.

ERIC Full Text Provided by ERIC

9:00 - 10:00

Language instruction with 20 children, 15 of whom should be native speakers of Spanish and 5 of English. Language instruction with 20 children, 15 of whom should be native speakers of Spanish and 5 of English.

Bilingual Oral Language and Conceptual Development Program for Spanish-speaking Pre-school children will be used in conjunction with In- sections will include: troducing English by Lancaster and Peabody Language Development Program, Pre-school level.

Same materials will be used in English:

Teaching procedures and activities will be similar in both sections.

Teaching procedures in both

- 1. listening activities
- 2. pattern practices
- 3. vocabulary building
- 4. pronounciation practice

Activities for accomplishing the above will include:

stories

songs

games as suggested in Michigan, Lancaster, and Peabody Programs.

Physical activities Filmstrips Records **Puzzles** Blocks Paints Coloring activities

- Lavatory and Group Exchange (Aide will supervise this for 10:00 - 10:15 one section in the morning and the other in the afternoon in order to provide relief time for the teacher as per City School District - Rochester Teachers' Association contract.)
- 10:15 10:30 Mid-morning snack and relaxation. This activity should be alternated with the above, perhaps on a weekly basis, in order to provide the opportunity for each group to eat in the two cultural atmospheres - not always in one or the other.

10:30 - 11:30 Same as the 9:00 - 10:00 instruction with the exchanged group.

11:30 All children dismissed.

The afternoon groups would follow the same basic outline and structure.

Time is provided for preparation and coordination of program.

#### B. Component II - Primary Elementary Unit.

This component will enroll 40 children in the morning kindergarten and 40 other children in the afternoon kindergarten, and 40 children in the first grade. The ratio of Spanish-speaking children to English-speaking children will be the same as Component #1, 3-1.

The kindergarten structure will be identical in language philosophy and similar in content to Component I. The Peabody Language Development Program Level I will be included. The program will be compatible with the existing City School District kindergarten syllabus.

English-Spanish structure and language philosophy. All 40 children will experience half of the day in the Spanish section and half of the day in the English section. The children will be divided into groups of 20 children each for A.M. and P.M. instruction. English and Spanish reading programs will be introduced. The Miami Linguistic Readers will be used in the English section and Por el Mundo del Cuento y la Aventura will be used in the Spanish section. The Miami Linguistic series are specifically designed for Spanish-speaking children and are well structured. This approach is compatible with teaching reading in Spanish as well. The Por el Mundo del Cuento y la Aventura series appears to be the best Spanish reading series available at this time. It is especially appropriate for Rochester since it was developed in Puerto Rico and presents the culture

and background indigenous to Puerto Rico.

In addition, arithmetic and science will be added to the content.

The program will be compatible with existing City School District syllabus.

#### C. Component III - Secondary Unit - grades 7 - 10.

This component will provide the opportunity of studying social studies, mathematics and some sciences in Spanish. Much of the present English curriculum will have to be translated into Spanish since the curriculum must be compatible with existing New York State and local syllabi.

Spanish-speaking students will continue to enroll in two or more English as a Second Language classes for English instruction and credit. The subjects mentioned above can be structured for presentation in any language. This component will allow new entrants from Spanish speaking countries to pursue their education while learning English. In addition, this should make the adjustment to a different culture easier for them. This component will change yearly to meet the needs of newcomers to the United States and also to meet the needs of the children who move through the elementary bilingual unit to junior and eventually senior high school. The present procedure is designed to alleviate an immediate need of Spanish speaking secondary students.

11.13 1-Program is one-way - only non-English Nother Tongue students (including N-LIT-English dominant). English Nother tongue students do not receive instruction in a second language

O-no English Nother tongue students
2- two-way

pare 11 11.13 2

#### 12.0 HETHODS OF SECOND LANGUAGE TEACHING

(Hark all that apply, some projects may use a combination of methods)

12.0 1 \_2a\_\_\_\_

- 1-Audio-lingual habit skills or behavioral approach. Emphasis on communication. Includes contrastive analysis of sounds (units) in both languages by teacher and students, student repitition of tapes and/or fluent teachers' model sentence patterns until responses are automatic. Structural drills and dialogues are systematically presented. Includes direct association between object and word in second language in a sequence of patterns learned in complete sentences. Inductivegeneralizations drawn from examples.
- 2-Transformational-cognitive approach Acquiring an understanding of the structural patterns or grammatical rules of a language.

### : COMPOSEIT III SECOIDARY UNIT (GRADES 7 - 11)

This component will provide 75 - 80 students the opportunity to take a complete bilingual modular academic package or a partial bilingual program (consisting of Spanish and Social Studies).

The complete bilingual package will be scheduled by modules corresponding as closely as possibly f e a s i b l e to the Monroe High School time schedule. The courses will include the following offerings:

- 1. Spanish vernatular for Spanish speaking students. This course will follow closely the syllabus of Español Departamento de Instrucción Pública. It will stress reading and writing skills in accurate literate Spanish within the content of a native language area. It will further develop the correct usage of listening comprehension, understanding and speaking. Since the reading level of most youngsters in Spanish is below the average expected grade level, the Spanish instructor shall coordinate and plan with the Reading Spanish Specialist who will assist in correcting present reading deficiencies. It is advisable that these two teachers work and plan in conjunction with the Social Studies teacher so that an intensified reinforcement can be effected to gradually improve the language performance and academic achievement.
- 2. Social Studies in Spanish. This course will offer cross-cultural studies of North-American and Spanish American history. Stress will be particularly placed on Puerto Rican history and culture to initiate and develop self-identity. (see Addendum).
- 3. Mathematics. Mathematics shall be taught in Spanish and it will offer programmed instruction in accordance with the City School District and state syllabus. A diagnostic test in basic Mathematics skills will be given at the

- 4. Science. Science shall be taught in Spanish and the course will also be programmed to meet individual needs. The <u>I.S.C.S</u>. pilot program will be translated into Spanish. This series is based on students' inquiry and individual experimentation.
- 5. English as an : comired language. This course will use Fries American English series. The basal texts are books II, III, and IV with the corresponding tapes. Since this program developed by Puerto Rican specialists and used by Puerto Rican students, it will provide new entrents a familiar sequential to their previous language learning in linglish.
- 6. English for Spinish speakers. This course will also use the Fries American English series and without neglecting the aural-oral language skills, it will stress remedial and developmental reading and writing skills. The Reading English specialist will work closely with both English teachers. (See Addendum). The total bilingual package will be supplemented by the regular school program in the areas of English Education, Art, Music and other exploratory courses which are available at the secondary school.

English speaking students who after two or three years of successful achievement in Spanish as a foreign language and upon recommendation of the Spanish Department will be able to take the bilingual partial package (Spanish and Social Studies) will be encouraged and welcomed to either audit or take the course with full credit provided they can meet the requirements. The addition and exchange is not only desirable in promoting social interaction, but above all it is educationally most valuable to all the students concerned.

2a-inductive -generative approach: through listening to communication, perhaps of peers, and attempting the new language in situations which call for the student to generate sentences - test his understanding. (the way native language is acquired)

Includes direct association between object, picture or action and word in second language.

2b-deductive - the cognitive code approach: through initial formal study and analysis of grammatical structures, then applying them through examples, i.e. answering questions, or transforming affirmative sentences to negative, declarative to interrogative, active to passive.

5-Grammar - Translation Lethod
Formal study of rules of grammar and translation from first language
to second. Emphasis on reading in second language rather than using
it for oral communication.

### 19.0 CURRICULUM PATTERNS

19.0 3,4,5,10

The stated curriculum pattern of the bilingual project:

1-Except for inclusion of N-EMT instruction the curriculum is otherwise typical or regular, for this state. There are other modifications whithin the curriculum of the bilingual program which differ from traditional, typical curriculum such as: (mark all that apply)

2-a non-graded classroom: pupils of different ages are grouped together during part of the school day

3-flexible or modular scheduling

4-small group instruction

5-individualized learning

6-open classroom

7-guided discovery and inquiry

8-a curriculum which is both child and subject-centered

9-others (specify)

10-if the program includes activities which complement experiences children encounter in the home, community and through mass media i.e. TV, describe below:

#### 20.0 COGNITIVE DEVELOPMENT

20.1 Cognitive development in early childhood grades is fostered through: 1.2.5

0-method not mentioned 20.1

1-structured envirionment rich with materials child can manipulate order, compare, match for perceptual-motor development

2-non-verbal materials, such as Montessori materials from which

children can learn sensory discrimination, matching, seriation, counting, addition, subtraction

3-labeling and discussion of concepts related to time, space, distance, position

4-labeling and grouping actual objects to learn classification; grouping objects with common attributes and labeling their attributes (i.e. colors, sizes)

5-direct experience of processes of science through discovery, using materials rather than text; active experimentation by child with teacher's

guidance rather than teacher demonstration. 6-direct experience of math through discovery rather than instruction 7-other (specify or xerox) p. no. and document:

20.2 Cognitive development in later grades (grade 4 and above) 0-method not mentioned p.34 ('70) 1-specify or xerox p. no. and document n.a.-no grade 4 or later grades

page 17

#### 21.0 SELF-ESTEEN

21.0

Stated methods of project compenent expected to increase self-esteem: no-self-estecm not mentioned as an objective

0-self-esteem is an objective but methods not specified Teacher encourages pupil to verbally express his feelings:

1-through role-playing

2-puppetry

3-language-experience approach: students dictate stories from their own experience

4-teacher accepts, aclmowledges ideas and feelings

5-teacher encourages non-verbal expression of child's feelings through painting, music, dancing

6-teacher provides experiences in which the various ways that children act are accepted by the teacher; their actions are discussed and the children are encouraged not to make fun of "different" ways

7-teacher provides experiences leading to competency and success

8-teacher provides experiences where occasional failure is acknowledged as part of everyone's experience; second attempts are encouraged

9-other (specify) (xerox or summarize) document page #

Teacher provides experiences in pupil self-direction and acceptance of responsibility, such as:

10-pupils act as tutors for other pupils

11-puils have some options in choice of curriculum

12-pupils choose activities from a variety of interest centers

13-older puils participate in curriculum planning and/or development

14-pupils write a bilingual newspaper for dissemination to the community

15-other (specify 19 self-concept enhanced by cultural atmosphere of classroom 22.0

### 22.0 LEARNING STRATEGIES

1-The project mentions the following specific learning strategies as important for reaching a particular ethno-linguistic group: (specify or xerox) Document and Page no. Example: Navajo children resist participation in an authoritarian, traditional classroom. An open classroom where teacher participates rather than directs all activities and students or groups of students initiate activites, move about freely or sit in a circle or horseshee rather than sit in rows, has been found more effective. 0-none mentioned

4-teacher accepts, aclmowledges iteas and reclarge

5-teacher encourages non-verbal expression of child's feelings

through painting, music, dancing

6-teacher provides experiences in which the various ways that children act are accepted by the teacher; their actions are discussed and the children are encouraged not to make fun of "different" ways

7-teacher provider experiences leading to competency and success

8-teacher provides experiences where occasional failure is acknowledged as part of everyone's experience; second attempts are encouraged

9-other (specify) (xerox or summarize) document page  $\ddot{r}$ 

Teacher provides experiences in pupil self-direction and acceptance of responsibility, such as:

10-pupils act as tutors for other pupils

11-puils have some options in choice of curriculum

12-pupils choose activities from a variety of interest centers

13-older puils participate in curriculum planning and/or development

14-pupils write a bilingual newspaper for dissemination to the community

15-other (specify 19 self-concept enhanced by cultural atmosphere 22.0 0 of classroom

23.1 3,5,6

### 22.0 LEARNING STRATEGIES

1-The project mentions the following specific loarning strategies as important for reaching a particular ethno-linguistic group: Document and Page no. (specify or xerox) Example: Navajo children resist participation in an authoritarian, traditional classroom. An open classroom where teacher participates rather than directs all activities and students or groups of students initiate activites, move about freely or sit in a circle or horseshoe rather than sit in rows, has been found more effective. O-none mentioned

23.0 BICULTURAL COMPONENT

23.1 This program is:

1-bilingual alone

2-bilingual and bicultural

3-bilingual and multicultural

0-not specified as to which of the above

4-an ethnic studies program is included in the bilingual program

5-art, posters, realia, crafts of both cultures are exhibited in

the classroom

6-language and cultural content are integrated

7-other (specify)

page 18 23.2 Cross-cultural awareness: If project mentions specific values or modes of behavior of N-ER culture, please surrarize below: (or attach xerox) 0-not mentioned 23.3 1-if project mentions efforts to decrease ethnocentrism in 23.3\_. either or both groups, describe below: (or xerox-document page/#) O-none mentioned 23.4 In the bicultural compenent knowledge of the N-ER culture 23.4 1,2,4,7 involves (mark all that apply) 0-no bicultural component mentioned 1-Humanistic aspects of culture: ideals and values, literature (oral or written), achievement of particular people or political movements 2- Historical-cultural heritage of the past--contributions to art and science 3-'Deep' culture: family patterns and contemporary way of life. 4-Itemization of surface aspects of a country-geography, dates of holidays etc. 5-A specific culture only e.g. one Indian tribe 6-Various cultures of same ethnic/linguistic group (i.e. Spanishspeaking peoples) 7-A third culture different from NEAT or MAT 8-0ther (specify) 23.5\_\_2 23.5 American culture is defined: 0-not specified 1-narrowly: primarily Anglo-Saxon orientation 2-broadly: ethnic pluralism of America-multicultural contributions of various ethnic groups discussed

\*Full Text Provided by ERIC

The secondary school bilingual program will be the presentation of possibly mathematics, sciences and social studies in Spanish with multiple classes in English as a Second Language as the educational approach this year. This plan is being adopted to alleviate the immediate needs of Spanish-speaking secondary school students this year. This program should alter as needs change to include Spanish for Spanish-speaking students or Spanish as the vernacular.

The following are relevant bilingual educational materials which have been produced through other programs:

- 1. Miami Linguistic Readers, Dade County Public Schools. Miami, Florida.

  A structurally well-built, linguistically sound program for teaching reading to Spanish-speaking children. Has been well tested and evaluated Is an equally effective reading program for native speakers of English.
- 2. Course of study for Spanish. Dade County Public Schools. Miami. Florida. A program in Spanish vernacular designed to develop skills, abilities and attitudes in oral expression and reading. Relates well with the Laidlaw series, Por el Mundo del Cuento y la Aventura.
- 3. Southwestern Laboratory Materials, A bilingual, bicultural program, San Antonio, Texas. A science oriented program designed to develop oral skills and abilities in both Spanish and English. No structured approach to teaching reading.
- 4. A Bilingual Oral Language and Conceptual Development Program for Spanish-Speaking Pre-school Children. Michigan Department of Education. A well structured language development program designed for Spanish-speaking pre-schoolers based on linguistics. Can be applied to native speakers of both languages.
- 5. This American English Series, a program of English as a Second Language developed and used in Puerto Rico.
- 6. English This Way, MacMillan Company. A program of English as a Second Language. Good for upper elementary and secondary students.

The <u>Miami Linguistic Readers</u>, parts of the <u>Spanish S Program</u> and the parts of the <u>Bilingual Oral Language</u> and <u>Conceptual Development Program</u> will be used along with the <u>Peabody Language Development Program</u>, Levels P & I, <u>Introducing English</u>, and the <u>Laidlaw series</u>, <u>Por el Mundo del Cuento y la Aventura</u>.

These materials have been selected because they are linguistically oriented materials. They are geared to Spanish-speaking children, who will be in the majority in the program. The Spanish readers were developed in Puerto Rico and reflect the culture and background indigenous to Puerto Rico. They are well structured and compatible with existing City School District syllabi for primary grades. These materials will be supplemented by recordings, songs, art projects and books in both languages. The Southwestern materials were excluded because of the heavy science orientation, lack of structural reading program, and because the program originators must be responsible for teacher orientation and training. The Fries American English series and English This Way were also evaluated. The former did not meet our local needs: it seemed to lack relevancy to urban children. The latter was too difficult for young children. However, it will be used at secondary level in the program of English as a Second Language.

The secondary school content will be compatible with existing City School District syllabi for social studies, mathematics and science. grades 7 - 10. In order to follow the course content in Spanish, it may be necessary to translate existing curriculum into Spanish.

It is the intention of the pre-school and elementary proposal to follow basically the program at the Coral Way School in Dade County, Florida. The presentation and use of Spanish approximately 50% of the time by a teacher who is a native speaker of Spanish in a Spanish atmosphere and the presentation and use of English approximately the other 50% of the time by a teacher who is a native speaker of English appears to be a linguistically appropriate approach.

Comp. III Español A

### ADDENDUM (SECONDARY COMPONENT III)

### Español

The Spanish vernaular course will use Alonso and Hernánlez Ureña "Gramática Castellana" (editorial Lozada) Buenos Aires, Argentina. The primero y segundo curso contents will be taught as units for the various levels of Español. The literary genres to be studied in level of progressive difficulty at the various levels will be: Prosa: a) Cuento; b) Novela; c) Biografía; d) Ensayo; e) Artículos periodísticos. Poesía: a) Rimas; b) Poemas; c) Teatro. These techniques will be used progressively always after the teacher has modeled or given the student a sample to illustrate the process that he intents to receive back from the stulent. The teacher will also repeat two or three times the same process with more illustrations. The Spanish teacher and Reading Specialists will work closely together and use the following Spanish literary classics:

Level I	ı.	Carreras	Homores y Majeres de Puerto Rico
	2.	Loguerre	Antología de Cuentos Puertorriqueños
	3•	Marcón	El Final de Norma
	<u>1</u> .	Jasona	Flor de Leverdos
	5.	Coll y Toste	Leyendas Puertorriqueñas
	6.	Valera	Cuentos y Levendas
Level II	1.	Carreras	Hombres y Mujeres de Puerto Rico
	2.	Pérez Galdós	<u>Marienela</u>
	3•	Falecio Valdés	In Alemnia del Conto le Ribos
•	4.	Alvarez Quintero	La Eucla del rey Farfán - La Reja
		•	· ·

### ADDENDUM (SECONDARY COMPONENT III)

#### Social Studies

The Social Studies course shall be taught in Spanish and will consist of cross cultural studies of North-American and Spanish-American history. Stress will be particularly placed in the role of Puerto Rican history and culture, as it blends with Spanish-American, North-American and world history developments. The textbook to be used principally is Conociendo a Boringuen, Publicaciones Cultural, 1969

It is authored by Férez Martínez and Díaz de Villar - Nor Puerto Rican history.

The textbook to be used for Spanish-American culture will be Introducción a la Civilización Hispanosmericana, D. C. Heath, authored Ruttee. The textbook to be used for North-American history will be: Muzzey, Kidger y Colorado, Breve Histori.

de los Estados Unidos de Norteamérica, Ginn and Company. Documents of the Constitu ional History of Puerto Rico and the United States (available in both English and Spanish will also be used. Historia General del Mundo by Thoras Lawler (Ginn and Company) will cover the world history portion. Social Studies reference books for teacher and students to be obtained from the Editorial Departements de Instrucción Pública, Hatorey, Puerto Rico:

### ADDENDUM (SECONDARY COMPONENT III)

### English and E.S.O.L.

Both courses will use the Fries American English Series which was developed by specialists of Departmento de Instrucción to be used in Puerto Rico for Puerto Rican youngsters.

The ESOL and English course will seek to develop the student's ability to understand, speak, read and write in standard English. The ESOL class will continue to place the major emphasis in the aural-oral language skills development. The English course while continuing to develop the oral language skills will place the major emphasis in the reading and writing language skills. The English Reading Specialist will provide remedial/ and developmental reading techniques to intensify the concentrated effort needed to upgrade the students' below average reading level.

All three teachers will spend daily, weekly and monthly planning time throughout
the school year to coordinate and design new approaches to the successful implementation of this major thrust in the area of the English language.

The Fries textbooks and tapes to be used are: Books II, III and IV - (D. C. Heath)
Cther suggested readers from the Departmento de Instrucción Pública, Hato Rey.
Puerto Rico are:

### ADDENDUM (SECONDARY COMPONENT III)

#### Mathematics

Seeing Through Not comatics series (Scott Foresman Company) books I, II, III, and IV
This series authored by Van Engen and Hartung, will be adapted and translated into
Spanish curriculum units. Student work-book will be prepared to be used with the
series above and offer additional practice in Math skills. These other reference
books will be incorporated to the student Math work-book: Hartung and Knowles
Special Book B and Tareas de Matemáticas (7, 8, 9) and Tareas Algebra Moderna
(10, 11) from the Editorial Departemento de Instrucción, Hato Rey, Puerto Rico
The course will provide individual programmed instruction according to the stulent
ability and performance. The key will be mastery of basic fundamental Math skills
and relevance to its usage in life. A diagnostic Math skills test, will be given
at the beginning of the year to assess baseline. The first two weeks shall be
spent in reviewing the basic elements of Mathematics, in all levels.

- Level I Multiplication process, division, decimals, percentage, equations, geometrical forms (area, perimeter, volumen).
- <u>Level II</u> First grade simple equations and other numerical and verbal problems, basic geometrical concepts.
- Level III First and second grade equations, problems, basic geometrical concepts, trigonometry notions.

All levels will be initiated and exposed to general concepts of Mathematics as they apply in the business world (banking, insurance, etc.) as well as trends of the present American economy and simple lay understanding of the stock market.

Math reference books for teacher and students to be obtained from the Editorial Departmento de Instrucción Pública, Hato Rey, Puerto Rico.

Comp. III Science A

### ADDENDUM (SECOIDARY COMPONE T III)

#### Science

I. S. C. S. (Intermediate Science Curriculum Studies)

The I.S.C.S. Program is: a) aimed at general education, giving the student a sequential picture of the structure and process of science; b) laboratory centered; c) individualized to take care of the broad range of student ability; and d) self-pacing, so that the student travels through the activities at his own speed.

The I.S.C.S. Program consists of combined student texts and lab guiles, and the accompanyin laboratory apparatus. It is a sequential three-year program. Each year's activities have "story-lines" organized around science concepts and the processes of scientific inquiry.

A "story-line" of both science concepts and the processes c. science runs through the three grade levels. Thus, the seventh-grade course is concerned with energy, its forms and characteristics, and measurement and operational definition. The student investigates the conversion of energy from one form to another, making realistic measurements wherever possible. The eight-grade themes are matter and its composition and model building. The student develops the seventh-grade particle model and then applies it in interpreting physical, chemical, and biological situations in the laboratory and in nature. In the minth grade, the student uses the techniques of investigation and experimentation as well as the science concepts that he has learned to attack problems in a variety of situations in earth and biological science.

In order to teach the progress the school must provide a room in which students can do laboratory work that involves the use of chemicals in some cases.

The minimum requirement is a room that has flat-top tables, one electrical outlet, and a sink with running water and drain. There should be storage facilities for the laboratory equipment and supplies, arranged so that students can have ready access to these. In the event that a separate storeroom is used, it is recommended that an equipment table or laboratory cart be provided in the classroom so that the equipment can be made available without the necessity of students' leaving the room. Space for the storage of text materials is also desirable.

I.S.C.S. is designed for use with non-college bound students, as well as those students who will study biology, earth science, chemistry, or physics in high schools. Although I.S.C.S. encompasses materials that comprise a much needed background for success in modern high school science, it can serve as a terminal course. The format of the materials of the I.S.C.S. Program with the pictorial activity frames, seems to aid the poor reader a great deal. Because inability to read the English language will be a handicap for our Spanish speaking students, the teacher will be working in the translation and adaptation of these material before the school year 1970 - 71 begins.

Science reference books for teacher and students to be obtained from the Editorial Departmento de Instrucción Pública, Hato Rey, Poerto Rico.
