ABSTRACT

Presented in this teacher's guide for grades K-3 are lesson plans and ideas for integrating art and environmental education. Each lesson originates with a fundamental concept pertaining to the environment and states, in addition, its discipline area, subject area, and problem orientation. Following this, behavioral objectives and suggested learning experiences are outlined. Behavioral objectives include cognitive and affective objectives and skills to be learned, while learning experiences list student-centered in-class activities and outside resource and community activities. Space is provided for teachers to note resource and reference materials--publications, audio-visual aids, and community resources. The guides are supplementary in nature and the lessons or episodes are designed to be placed in existing course content at appropriate times. This work was prepared under an ESEA Title III contract for Project I-C-E (Instruction-Curriculum-Environment). (BL)

## PREFACE

"Oikus" for house is the Greek origin of the term "ecology". Envir studies our house--whatever or wherever it may be. Like an umbrella, expand or contract to fit many ranges--natural and man-made. We can environments, our many "houses" if we omit rancor and cite long range complexities. Our "oikus" uses the insights of all subjects. Thus, multidisciplinary program like ours necessarily results. Also, since a long time, our program ranges K thru 12. The environment mirrors o values. These values have their origin in the "oikus" of our collect minds. Let us become masters of our house by replacing the Greek ada with "Know thyself and thine house."

1. Written and designed by your fellow teachers, this guide is supple to fit appropriately into existing, logical course content.
2. Each page or episode offers suggestions. Knowing your students be to adapt or adopt. Limitless chances are here for your experiment Many episodes are self contained, some open-minded, still others c developed over a few days.
3. Try these episodes, but please pre-plan. Why? Simply, no guide h and no curriculum will work unless viewed in the context of your s
4. React to this guide with scratch ideas and notes on the episode pa
5. After using an episode, fill out the attached evaluation form in t duplicate, or request more of these forms. Send them singly or co We sincerely want your reactions or suggestions--negative and posi evaluations are the key in telling us "what works" and in aiding o the guides.

## TERMS AND ABBREVIATIONS

ICE RMC is Project ICE Resource Materials Center serving all public school districts in CESA 3, 8, and 9. Check the Project ICE Bibliogr resources. Our address and phone number is on this guide's cover. P or call us for any materials or help.

BAVI is Bureau of Audio Visual Instruction, 1327 University Avenue, Madison, Wisconsin 53701 (Phone: 608-262-1644).

Cognitive means a measurable mental skill, ability, or process base Affective refers to student attitudes, values, and feelings.

## PREFACE

the Greek origin of the term "ecology". Environmental education wherever or wherever it may be. Like an umbrella, our house can fit many ranges--natural and man-made. We can add quality to our "houses" if we omit rancor and cite long range gains, costs, and "oikos" uses the insights of all subjects. Thus, a rational, positive, program like ours necessarily results. Also, since attitudes grow over program ranges K thru 12. The environment mirrors our attitudes or have their origin in the "oikos" of our collective and individual masters of our house by replacing the Greek adage of "Know thyself" and thine house."

ed by your fellow teachers, this guide is supplementary in nature--ly into existing, logical course content.

#### SUGGESTED LEARNING EXPERIENCES

##### I. Student-Centered in class activity

- A. Ceramic plaque - child's imaginative idea of what the sun looks like.
- B. Mosaic - sun mosaic could be done with seeds or indian corn.
- C. Sun designs - plastacine modeling clay used as a stamp for printing.
- D. The feelings of the sun are illustrated by drawing what the sun looks like on a:
  1. Rainy day
  2. Foggy day
  3. Cloudy day
  4. Sunny day
  5. Snowy day
- E. Sun puppets
  1. Use stuffed paper bag to construct a talking sun.
  2. Show rays as arms, etc.
  3. Some students may want to make clouds, stars, moon, etc. to complete the "show".

Correlate with music activity.

##### II. Outside Resource and Community Activities.

- A. Students could write letters to their congressmen and influential community members about conservative use of the sun's energy and stamp the letter and envelope with their sun design.
- B. Students should have experienced a certain type of day on the way to school. Correlate this with the feelings of the sun on such days.
- C. Field trip to beach or extremely open area to observe the sky and its changes (clouds, sun, etc.).

ESEA Title III - 59-70-0135-2 Project I-C-E

C 1. Energy from the sun, the basic Discipline Area Art  
 O source of all energy, is converted Subject Drawin  
 N through plant photosynthesis into a Problem Orientation Sun  
 C form all living things can use for  
 E life processes.

**BEHAVIORAL OBJECTIVES**

**SUGGESTED LEARNING E**

Cognitive: The student will relate the principle, "the whole is equal to the sum of its parts", to the sun.

Affective: The student will comply with the principle, "the whole is equal to the sum of its parts".

Skills to be Learned  
Proportional enlargement  
 (through use of a grid)  
Drawing  
 1. Crayons  
 2. Oil pastels  
 (Water colors can be substituted)  
Fitting pieces together  
 (as a puzzle)

I. Student-Centered in class activity  
 A. Mural  
 1. Find a stylized and detailed picture of the sun in a magazine.  
 2. Divide into sections so each student will have a number.  
 a. Cut and distribute.  
 Example:  

1	2	3
4	5	6
7	8	9
10	11	12

  
 3. Each student must enlarge his portion of the picture on a sheet of paper that is in direct proportion to his picture segment.  
 4. Each enlargement is then brought to a reserved space on the wall and all the pieces are fit together as a puzzle to resemble the first picture.  
RESULT: Large mosaic mural of the sun.

the sun, the basic  
 energy, is converted  
 photosynthesis into a  
 things can use for

C 2. All living organisms interact among  
 O themselves and their environment,  
 N forming an intricate unit called an  
 C ecosystem.

Discipline Area  
 Subject  
 Problem Orientat

ESEA Title III - 59-70-0135-2 Project I-C-F

BEHAVIORAL OBJECTIVES

Cognitive: The student will learn to gather the necessary supplies which enable him to produce a painting and when questioned he will be able to say an ecosystem means "....."

Affective: The student will appreciate the fact that ecosystem implies a mutual dependency of objects on one another.

Skills to be Learned

Mixing of paint  
 Proper care of brush (cleansing, storage & use of it while painting)  
 Blending colors to achieve new ones.

SUGGESTED LEARNING

I. Student-Centered in class activity.

A. Discussion of art media how various media are made usable by mixing with other elements or conjunction with other media...thereby offering the young student a more practical and understandable explanation of what is meant by the term "ecosystem".

Examples:

- tempra is useless as a paint without adding water to it
- water is useless as a color agent until the paint mixed with it.
- tempra and water mixed are still useless without a surface to put it on (paper or an applicator - brush, finger, stick, sponge, etc.
- species variation can be represented by variation in color, thickness of paint, type of applicator, etc.
- colors combine to create new ones

Problem Orientation Land Use Grade K-3

SUGGESTED LEARNING EXPERIENCES

I. Student-Centered in class activity

- A. Go outside and collect materials you find in your environment such as woodscraps, cans, objects from a junk yard, rocks, leaves, etc.
- B. Create a sculpture from them. (Refer to Warren Scholat. Understanding Sculpture I and II or if not available resources on back). Have each piece of art show one of the following: (Student choice)
1. How ugly your environment is.
  2. How beautiful your environment is.
  3. How it makes you feel.
  4. The joy or sadness of it.
  5. How time changes your environment.

II. Outside Resource and Community Activities

- A. The student materials may be obtained at the following: (these are suggestions only)
1. Beach
  2. Woods
  3. Junk yard
  4. Junk from home
  5. Saw mill or lumber yard
  6. Anywhere the student may find them.
