ABSTRACT

This extensive bibliography (over 475 citations) provides references to programs and persons responsible for shaping ideas and practices relating to infant stimulation, education, and assessment of such efforts. The references are divided into six sections: (1) Curricula for Infant Education Programs, (2) Materials for the Education and Training of Caregivers and Teachers of Infants, (3) Descriptions and Research Reports of Infant Stimulation and Education Projects or Experiments, (4) Monitoring Infant Development and Education Projects: Testing and Evaluation, (5) Infant Care and Development References Useful for Background Knowledge on Infant Care and Education, and (6) Toys, Equipment, Health and Environmental Characteristics and Standards for Optimal Infant Care Settings.

TABLE OF CONTENTS

Introduction	1
I. Curricula for Infant Education Programs	5
II. Materials for the Education and Training of Caregivers and Teachers of Infants	10
III. Descriptions and Research Reports of Infant Stimulation and Education Projects or Experiments	15
IV. Monitoring Infant Development and Education Projects: Testing and Evaluation	31
V. Infant Care and Development References Useful for Background Knowledge on Infant Care and Education	39
VI. Toys, Equipment, Health, and Environmental Characteristics and Standards for Optimal Infant Care Settings	53

Infant Education and Stimulation: A Bibliography

Within the past decade there has been a growing interest in educational and developmental care facilities for infants. This focus on developmental care for children under 36 months of age has been the result of a variety of factors such as: an increase in pregnancies among teen-age students who need infant care because they still need to complete their high-school education; the needs of working mothers in general, and the failure of children to sustain often considerable gains achieved in preschool programs which have been initiated after the infancy period.

The present bibliography provides references to those programs and persons responsible for shaping ideas and practices with regard to infant stimulation, education, and assessment of such efforts. Although many of the references are concerned with quality care for infants, references specifically to maternal relations or practices with infants have been minimally included. Likewise, references giving general advice on child-rearing to parents have in general been excluded. However, some of these, such as the Children's Bureau publication No. 8, Infant Care, or Dr. Spock's Baby and Child Care, contain materials and advice on child growth and development and discipline which should be very useful in training infant caregivers. Additionally, day care references which cover the entire preschool-age span have been listed only when relevant as resources for infant education.

It should also be noted that this bibliography does not specifically reference project Newsletters per se--such as the Newsletter of the Rural Child Care Project in Kentucky, or the Parent Child Center Newsletter-which often carry news about infant education efforts in a particular project.

Finally, there are some projects which cannot be referenced for a variety of reasons:

(1) Some provide infant caregiving and education services but have neither a research nor dissemination component.

(2) Others are very new, such as the Brookline Early Education Project, or the Education Commission of the States in Denver, Colorado, which is preparing educational television modules to teach caregivers about infants and infant care. Consequently, as yet there are no reports or publications available on these projects.

This Bibliography does include the following six sections:

- I. Curricula for infant education programs.
- II. Materials for the education and training of caregivers and teachers of infants.
- III. Descriptions and research reports of infant stimulation and education projects or experiments.

These project descriptions, progress reports, and final summations of work accomplished, represent a wide variety of models and theoretical conceptualizations of infant development and learning. For example, one kind of model, Earl Schaefer's, refers to an infant stimulation project carried out individually by a tutor with an infant in the home setting. Another model, Ira Gordon's, focuses primarily on teaching mothers in a home visitation program how to facilitate infant education and development. Still another model, such as Earladeen Badger's, involves a parent educator teaching a group of mothers educational principles and practices which mothers can then apply in the home with their infants.

Some of these reports contain detailed descriptions of research designs and strategies. Some of the reports provide a good deal of background and rationale for the launching of infant education projects. Thus it must be noted that the Sections as constituted for this Bibliography are often not entirely mutually exclusive in their content.

IV. Monitoring infant development and education projects: Testing and evaluation.

No attempt has been made to create an exhaustive bibliography on infant assessment. Additionally, descriptions and analyses of evaluation techniques and data will be found within many of the Project Reports referenced in Section III.

Many of the instruments used in infant education projects have reflected concerns for cognitive, language, and sensorimotor development, while efforts to assess infant socio-emotional development have often been beset by difficulties in finding suitable instruments. Some programs have (1) created new, unstandardized instruments to measure non-cognitive aspects of functioning; or (2) have used non-cognitive instruments which were created originally to monitor programs for older preschoolers. For examples of both such efforts, see J. Ronald Lally's 1973 Progress Report on the Syracuse University Children's Center in Section III. The "CLOC" (Classroom Language Observation Checklist) was created to assess the naturalistic uses of language by 2- and 3-year-olds in open classrooms. Emmerich's Observation Rating Scale for personal social behaviors, designed initially for Head Start populations, was used to monitor socio-emotional behaviors of 36-month-olds in the program.

Some references have been included which pertain to questions of the reliability, validity and predictive status of infant assessments. Some references to neonatal assessment have also been included. Such measures may be useful for those whose interest is in establishing neonatal measures for comparison with later infant functioning after educational intervention has or has not been introduced.

V. Infant care and development references useful for background knowledge on infant care and education. y

References in Section V include data on the relations between infant development and learning and a variety of demographic and child-rearing variables. Such variables include:

Social class, ethnicity, and sex; parent-child interaction patterns; and biological and psycho-social characteristics of infants which are necessary to consider in creating infant educational environments.

VI. Toys, equipment, health and environmental characteristics and standards for optimal infant care settings.

Many excellent suggestions for toys, books and arrangements and use of physical space for infant education projects are also to be found within the references of the preceding sections. For example, Evans & Saia's Day Care for Infants (see Section V) has an excellent list of such suggestions for toys, art materials, and infant-toddler books in the Appendices.

Where an ERIC number is specified for a reference, the ERIC document number which follows should be used when ordering such materials from:

III. Descriptions and Research Reports of Infant Stimulation
and Education Projects or Experiments

Abt Associates, Inc.

A study in child care 1970-71.

Volume I: Findings
Volume II-A: Center case studies
Volume II-B: System case studies
Volume III: Cost and quality issues for operators
Volume IV: Technical

These volumes consist of detailed descriptions of twenty outstanding day care programs, many of which have infant care and education components. The reports were prepared for the Office of Economic Opportunity, Office of Program Development Evaluation Branch, OEO Contract No. B-005213, by Abt Associates, Inc., Cambridge, Mass., April 1, 1971.

Postscript

The Educational Resources Information Center/Early Childhood Education Clearinghouse (ERIC/ECE) is one of a system of 18 clearinghouses sponsored by the United States Office of Education to provide information about current research and developments in the field of education. The clearinghouses, each focusing on a specific area of education (such as early childhood, reading, linguistics, and exceptional children), are located at universities and institutions throughout the United States.

The clearinghouses search systematically to acquire current, significant documents relevant to education. These research studies, speeches, conference proceedings, curriculum guides, and other publications are abstracted, indexed and published in Research in Education (RIE), a monthly journal. RIE is available at libraries, or may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Another ERIC publication is Current Index to Journals in Education (CIJE), a monthly guide to periodical literature which cites articles in more than 560 journals and magazines in the field of education. Articles are indexed by subject, author, and journal contents. CIJE is available at libraries, or by subscription from CCM Information Corporation, 909 Third Avenue, New York, New York 10022.

The Early Childhood Education Clearinghouse (ERIC/ECE) distributes a free, current awareness newsletter which cites RIE and CIJE articles of special interest, and reports new books, articles, and conferences. The ERIC/ECE Newsletter also describes practical projects currently in progress, as reported by teachers and administrators. For more information, or to receive the Newsletter write: ERIC/ECE Clearinghouse, 805 W. Pennsylvania Avenue, Urbana, Illinois 61801.

ERIC CLEARINGHOUSES--CURRENT ADDRESSES

ADULT EDUCATION

107 Roney Lane
Syracuse, New York 13210

COUNSELING & PERSONNEL SERVICES

Room 2108
School of Education
University of Michigan
Ann Arbor, Michigan 48104

THE DISADVANTAGED

Teachers College, Box 40
Columbia University
525 West 120th Street
New York, New York 10027

*EARLY CHILDHOOD EDUCATION

University of Illinois
805 West Pennsylvania Avenue
Urbana, Illinois 61801
