## ABSTRACT

This report results from a comparison between two inventories of educational innovation mailed out to community colleges in the Pacific Northwest and Alaska. The first inventory was sent in July and August, 1968; the second was mailed in the late summer of 1973. The report has a two-fold purpose: (1) to determine changes in the use of educational innovations in the past five years; and (2) to compile a current list of colleges that are willing to share information regarding use of these innovations. Both inventories asked the chief instructional officers whether any of the listed innovations were presently in use or under study in their colleges. The officers were asked to add to the list any innovations their institutions used which were not noted in the inventory. Also, the officers described the extent to which each innovation was used within their colleges. (Author)

## FOREWORD

In an era of great change in postsecondary education, new programs and practices affecting the instructional mission of the community college are needed. Answers to questions about innovation are particularly important to community college faculty, administrators, and students. We need to know what is being adopted as well as the extent and impact of adoption.

This report should be of particular interest because it compares the 1973 status of more than eighty innovations with their 1968 status. One can, from looking at this report, get a quick impression of how the use of given item has changed during the five intervening years. For those persons interested in, or responsible for, planning instructional programs this study should have substantial value.

*Frederic T. Giles*

## PREFACE

This report results from a comparison between two inventories of educational innovation mailed out to community colleges in the Pacific Northwest and Alaska. The first inventory was sent in July and August, 1968; the second was mailed in the late summer of 1973.

This report has a two-fold purpose:

- 1- To determine changes in the use of educational innovations in the past five years.
- 2- To compile a current list of colleges that are willing to share information regarding use of these innovations.

Both inventories asked the chief instructional officers whether any of the listed innovations (totals of 82 in 1968, and 88 in 1973) were presently in use or under study in their colleges. The officers were asked to add to the list any innovations their institutions used which were not noted in the inventory. Also, the officers described the extent to which each innovation was used within their colleges.

The 1968 and 1973 inventories were quite similar, differing only in that the later one contained several new items (These items are labelled in the report as follows: NOT ASKED IN 1968).

The innovations are grouped arbitrarily in the nine categories listed in the Table of Contents and are also listed in the Index. Each innovation is reported by a separate table in the following format:

COLLEGES WILLING TO PROVIDE INFORMATION OR RESPOND TO INQUIRIES REGARDING INNOVATION:

(See Appendix I for addresses of colleges and names of officers with whom to get in touch)

We should note at this point that 45 colleges took part in the 1968 survey while 32 respondents were used in tabulating the 1973 results. Thus, readers should take care in interpretation of the "Net Change" percentage. Though we assume that the smaller number of institutions we used in the 1973 survey are representative of the whole, still, errors of unknown magnitude could be present.

Appendix I gives the name and address of colleges that offer information on specific innovations, along with the name of the officer to contact. Appendix II is an alphabetical list of all institutions that participated in both surveys.

#### ACKNOWLEDGMENTS

At least one person in each participating college gave his time to completing the questionnaire on which this report is based. Particular thanks to each of these people and to their colleges for prompt reporting and for making information available to the field.

PREFACE . . . . . ii - iv  
ACKNOWLEDGEMENTS . . . . . v  
INNOVATIONS IN USE . . . . . 1-97

Section A - Technological Aids to Learning (pp. 1-13)

- Open circuit television
- Closed circuit television
- Computerized instruction
- Other mechanically programmed instruction
- Audio-visual center
- Wired carrels, audio
- Printed instructional programs
- Wired carrels, video
- Tape storage, audio
- Tape storage, video
- Telelectures
- On-campus film library
- Language laboratories
- Other technological aids

Section B - Faculty Utilization Practices (pp. 14-25)

- Machine marking of tests
- Pooling of examination items
- Student tutors
- Adult paraprofessionals
- On-campus media production facilities
- Media specialist
- Officer for institutional research
- Funds for faculty involvement in summer curriculum development
- Released time for faculty involvement in curriculum development

Funds for faculty consultation with  
outside curriculum or instructional  
experts

Instructor exchange with (a) high school;  
(b) other community college; (c) senior  
college

Reflex or thermal process production of  
spirit masters

Other innovations affecting faculty  
utilization

Section C - Facilities Utilization Practices (pp. 27-35)

Joint use of facilities with other  
institutions

Off-campus center(s) for continuing  
education

On-campus center for continuing  
education

Weekend "regular" classes

Weekend short courses or seminars

Formal arrangement for exchange of  
materials with libraries of area

Outdoor educational facilities

Community use of library

Other innovations in facilities utilization

Section D - Course and Program Planning (pp. 36-45)

Program consortium with other community  
colleges, senior colleges, high schools

Joint program planning with government,  
industry, etc.

Counselor involvement in curriculum decisions

Community involvement in continuing education  
planning

Student involvement in curriculum decisions

Community involvement in general education  
planning

Library staff involvement in curriculum  
decisions

Adoption of a taxonomy of educational  
objectives

Adoption of instructional systems or other curriculum model

Other innovations in course or program planning

Section E - Instructional Patterns and Programs (pp. 46-58)

Non-disciplinary instruction in political social, and cultural concerns

"Teach-in" instruction in political, social, and cultural concerns

Group counselling coupled with subject instruction

Core curriculum, general education

"Non-traditional" offerings

Core curriculum, clusters of related technologies

"Ombudsman" for academic matters

Academic grievance committee

"Inquiry" or "problem-centered" instruction

Other newer instructional patterns and programs

Section F - Instructional Organizations (pp. 59-73)

Tutorial

Independent study

Inter-departmental study

Team teaching

Concurrent work-education programs

Student participation for credit in community activities or organizations

Shortening or lengthening daily student-teacher contact

Shortening or lengthening regular courses

Student-led instruction

Provision for individually paced student progress

Divisional or broad area rather than departmental organization

Section G - Scheduling, Course or Program Completion, and Calendar Arrangement (pp. 74-85)

Matching student and teacher personality at registration

Credit by "challenge" examination without course registration

Credit by examination at any point in course

Full-time early admittance from high school

Part-time early admittance with cooperation of high school

Dropping of traditional prerequisites in certain fields

Dropping of traditional courses

Grouping of students at registration by (a) interest; (b) achievement level

Graduation on basis of skills rather than credits

Scheduled inter-semester or inter-quarter involving both students and faculty

Other new scheduling, calendar, graduation, course completion practices

Section H - Evaluation of Student and Program (pp. 86-96)

Pass-fail

No marks or grades

Written evaluation other than grade

Joint evaluation of graduate with employer

Departmental or area examination

Evaluation of varying course approaches to same material

Evaluation of varying teacher approaches to same material

Assessment of course examination in terms of course objectives

Followup of former students by type:  
(a) general education; (b) other

Section I - Additional Educational Innovations (p.97)

I-1 Six additional innovations

## I-1. ADDITIONAL EDUCATIONAL INNOVATIONS

1. Bellevue Community CollegeDial Access Information System:

Instructional and informational retrieval systems for on and off-campus retrieval of preprogrammed lessons, lectures, current events and issues, and audio or video information. It is highly valuable to the College and is used by all or most of the College.

Non-Computerized Information Retrieval Systems:

A Termatrix system has been established for the retrieval of vertical file materials in the library. It is of some value and used by some faculty.

Audio-visual Tutorial (AVT) Laboratories:

AVT labs have been established in both the Science and Business Division areas. The Science lab uses the audio tape approach, the Business lab, the video-tape approach. They are highly valuable and are used by one or two departments.

2. Everett Community CollegeVideo Tape:

Used in secretarial classes. Student views instructional materials of his particular need. Frees instructor of repeated presentations.

English 90 (Writing Lab):

Assists students in writing problems. Concurrent enrollment is required in English 80 or 90 for individual program of work.

Summer Institute in Physical Sciences for Teachers:

Program is offered to give teachers an understanding of physics in relation to their areas of interest. Enrichment program.
