ABSTRACT

This paper reports the results of a survey undertaken to determine (1) the extent to which teacher competencies are utilized, and (2) when teachers should receive training in the sub-category or terminal tasks. The survey instrument, sent to 950 high school teachers, involved competencies recommended in the 10 U.S. Office of Education Model Training Programs, with each general competency including 7 to 28 terminal tasks or sub-competencies. Approximately one-third of the teachers sampled responded. Five general competencies were recommended for inclusion at the preservice level by more than 50 percent of the respondents. Five were recommended by less than half, with scores from 24 to 49 percent indicating a lack of certainty about training for every general competency. (Authors/PEB)

Paper presented to the National
Association for Research in Science
Teaching, Chicago, Illinois,
April 18, 1974.

Support for this study was provided by Grant GW 6703
from the National Science Foundation to the Del Mod System
and the University of Delaware and a grant from the
Sloan Foundation to the Secondary Science Education
Project.

SEA 17 787

- I. Rationale: Both initial training and continuing education of teachers should include development of the competencies currently used by teachers. Additional competencies should be added as they are identified as leading to improved teaching.
- II. Purpose : To determine (1) the extent to which competencies are utilized and (2) when teachers should receive training in the sub-competency or terminal tasks.
- III. Procedure: A fifty percent random sample of academic high school teachers (N = 950) were each sent a survey instrument that included one of the following general competencies recommended in the ten U.S. Office of Education Model Training Programs:

1. Specifying Learning Goals
2. Assessing the Student
3. Diagnosing Student Characteristics
4. Planning Long-Term and Short-Term Learning Programs
5. Guiding Students in their Learning Activity
6. Guiding Off-Task Student Behavior
7. Employing Teamwork with Colleagues
8. Enhancing Personal and Professional Development
9. Using Instructional Media and Laboratory Equipment
10. Relating to Local Conditions

Each general competency included 7 to 28 terminal tasks or sub-competencies.

Approximately one-third of the subjects responded, and 274 provided information about their characteristics, performance of the sub-competencies, and when teacher should be trained in each Table 1 includes data about the sample.

Survey responses were processed by the "Statistical Packages for the Social Sciences (SPSS) Version X, May 20, 1973. The following tables provide data about the questions regarding utilization and recommendations for initial and inservice training.

IV. Results : Scores were calculated as a percentage of a group who responded to each question for competencies, or terminal tasks and are listed in Tables 2 through 11.

Table 12 includes scores for general competencies used by teachers and their recommendations for placement in training programs.

Utilization scores ranged from 79% for enhancing their own personal and professional development to a low of 26% for "diagnosing student characteristics." "Guiding student learning activity" received a positive response from 78% while "employing teamwork" was reported by only 35%.

Five general competencies are recommended for inclusion at the pre-service level by more than 50% of the respondents and five were recommended by less than half. Scores from 24% to 49% indicate a lack of certainty about training for every general competency.

V. Discussion: Comments by these subjects indicate that the concept of teaching competency is not understood by many classroom teachers and is considered a mechanistic approach to describing teacher activities. The results indicate that teachers will be able to identify competencies and terminal tasks needed in their classrooms more precisely and will be able to recommend more appropriate training if enabling objectives are identified for each terminal task.

Table 2. Specifying Learning Goals

COMPETENCY	Perform			Training		
	Yes	No	?	IT	IS	Ø
1. Identify learning objectives which refer to cognitive, affective and psychomotor behavior.	97	0	3	63	6	31
2. Communicate to pupils, teachers, parents, and others, the reasons for establishing learning objectives.	86	11	3	41	20	39
3. Translate broad societal aims for schools into relevant learning goals.	79	14	7	52	13	35
4. Interpret learning outcomes in terms of written performance standards.	72	17	11	62	6	31
5. State in writing, learning objectives of each type, (cognitive, affective and psychomotor) in terms of student behaviors which are observable and measurable.	66	31	0	69	10	31
6. Specify in writing, any relationship among learning objectives from one curricular area to another.	45	52	3	41	21	38
7. Specify in writing any relationships among the cognitive, affective and psychomotor learning objectives	35	65	0	52	10	38

Training

- IT - Initial training prior to teaching
- IS - Inservice Training
- Ø - Not sure or no opinion about training

Table 3. Assessing the Students

COMPETENCY	Perform			Training		
	Yes	No	?	IT	IS	Ø
1. Determine evaluation techniques which are appropriate for the related learning objective.	85	8	4	66	20	14
2. Develop records regarding pupil achievement.	81	19	0	62	16	22
3. Maintain records regarding pupil achievement.	81	19	0	69	12	19
4. Utilize test results as one piece of information to identify a pupil's learning difficulties.	77	19	4	61	20	19
5. Evaluate the attending behavior of learners by observing posture, gaze level, and responses.	77	19	4	46	19	35
6. Observe informal learner reactions to your instruction.	73	15	12	51	12	37
7. Demonstrate competency in the use of observational methods to evaluate pupil's accomplishments of various learning objectives.	69	19	12	61	12	27
8. Demonstrate procedures which involve the learners in self-evaluation.	58	39	3	58	16	26
9. Demonstrate competency in the use of interview methods to evaluate pupils' accomplishments of various learning objectives.	58	27	15	47	19	34
10. Interpret posttest results for determining mastery of a given learning task.	58	38	4	58	12	30
11. Demonstrate competency in the use of rating methods to evaluate pupils' accomplishments of various learning objectives.	54	19	26	35	16	49
12. Administer and score appropriate posttests.	50	46	4	54	4	42
