ABSTRACT

The aim of the Regional Student Program is to assure access by qualified New England residents to academic programs not available in their own state that are offered at other New England public institutions of higher education. Students participating in the program are given preference in admissions and pay only the in-state tuition rate. The range of programs offered--455 undergraduate programs, 270 graduate programs--and the absence of burdensome administrative detail permit the New England resident an almost unlimited choice of academic offerings of high quality at low cost. Two disturbing aspects of the programs's development for 1974 are discussed in this annual report: (1) The increased popularity of some offerings in the program led some states to withdraw those programs so that more spaces would be available for their own residents. (2) Regional Student Program enrollment at four-year colleges is smaller than at universities and community colleges. Other parts of the program discussed include: the benefits, other 1974 developments, enrollment growth and program growth, and state participation. Appendixes include statistical tables that accompany the text. (Author/PG)

FOREWORD

This Annual Report represents a departure from the former practice of issuing an Enrollment Report which basically contained statistics on the program's enrollment. This year we have attempted to explain key developments of the Regional Student Program over the past year, as well as to summarize the statistics involved.

A breakdown of enrollment by degree programs and institutions may be obtained by writing to the New England Board of Higher Education (NEBHE), 40 Grove Street, Wellesley, Massachusetts 02181.

I would like to express my appreciation to the institutional representatives of the Regional Student Program who collected and transmitted the enrollment statistics to NEBHE.

My thanks, also, to NEBHE staff members Sally M. Kennedy and Jeanne Hunt for their assistance with the preparation of this report.

Rodney J. Hinkle
Program Director

THE PROGRAM

Begun in 1948 on an informal basis by a few states and formalized through a Compact in 1955 by all New England states, the New England Regional Student Program has grown from 302 students in its first year of operation (1958) to 2,950 in 1975.

The aim of the Regional Student Program is simple and commendable: to assure access by qualified New England residents to academic programs not available in their own state which are offered at other New England public institutions of higher education. Students participating in the program are given preference in admissions and pay only the in-state tuition rate. The range of programs offered — 455 undergraduate programs, 2,0 graduate programs — and the absence of burdensome administrative detail permit the New England resident an almost unlimited choice of academic offerings of high quality at low cost. The New England Board of Higher Education has also initiated contracts with several private and public universities to guarantee spaces for New England residents in such fields as optometry, dentistry, medicine, and physical and occupational therapy.

BENEFITS

As well as the cost savings to the participating student represented by the difference between the in-state and out-of-state tuition rate, there are cost benefits to states.

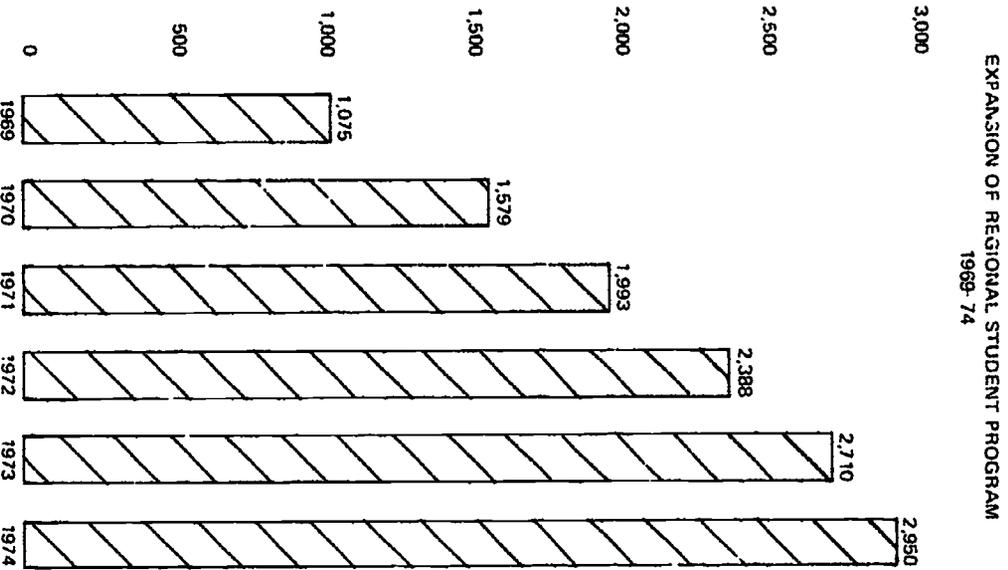

The exporting state (the student's state of residence) saves the costs which would be incurred if expensive programs were to be duplicated in every state.

The importing state (the state in which the student studies) benefits from lower costs of education per student when optimum enrollments can be assured in its expensive academic programs. The student, the institution and the state benefit from the increased diversity of student populations made possible by the interstate movement of people within the region.

1974 DEVELOPMENTS

Although the expansion of the Regional Student Program over the past five years (Fig. 1) has been consistent, there have been some disturbing aspects to the Program's development. Two of these concerns were addressed in 1974.

Figure 1

BEST COPY AVAILABLE

The increased popularity of some offerings in the Program led some states to withdraw those programs so that more spaces would be available for their own residents. Students of other New England states no longer had access to those degree programs at low in-state tuition rates. In response to that situation, the New England Governors' Conference in November 1973 requested that the New England Board of Higher Education study the "degree program withdrawal problem" and propose ways to ensure the continued and orderly expansion of the Regional Student Program.

After a one year study, the Advisory Committee to the Regional Student Program made the following recommendations to the New England Governors' Conference: that past degree program withdrawal decisions be re-examined; that two years advance notice be supplied for any future program withdrawal; and that participating institutions attempt to make available to qualified residents of eligible states at least 20 percent of all openings in academic programs currently offered under the Regional Student Program.

These recommendations were endorsed at the December 19, 1974 Governors' Conference in Newport, Rhode Island. In addition, the governors requested that NEBHE study and make recommendations on

the feasibility of a "balance of payments" plan, whereby any imbalance in the interstate flow of students would be offset by a transfer of money from the creditor state to the debtor state."

The second problem addressed during the year is illustrated in Figure 2. Regional Student Program enrollment at four year colleges is smaller than at universities and community colleges. Despite the fact that four year colleges joined the Program in 1972, regional students represent only 0.25 percent of all full time degree credit enrollment at four year colleges, the lowest percentage of participation of any sector. To increase the vitality of the Regional Student Program at four year colleges, the New England Board of Higher Education proposed to the states that a student's eligibility for study in a Regional Student program at a four year college be altered to conform with the enrollment requirements currently governing two year colleges. Because of this change, regional student enrollment at a four year college is available if the desired program is not available at a participating in-state institution or if the out-of-state school is located closer to the home of the student than any in-state four year college. To date, Connecticut, Massachusetts, and Rhode Island have adopted this more flexible eligibility standard.

The continued growth of the Regional Student Program will be assured by measures such as those outlined, so that high quality education at low cost will remain available to New England residents.

ENROLLMENT GROWTH

While the Regional Student Program continued its growth in 1974-75, its rate of expansion slowed somewhat from previous years. Since 1970, the annual average increase in enrollment has been 23 percent. The addition of 240 students brings the total enrollment in regional programs to 2,950 — an increase of nine percent over last year. Including 322 students enrolled under regional health science profession contracts in 1974-75,* total regional student enrollment experienced an 11 percent increase in 1974.

PROGRAM GROWTH

In 1974-75 students paid only the in-state tuition rate in 498 programs under the Regional Student Program. Of this number, 392 programs were at the undergraduate level compared to 337 undergraduate programs last year. Under health science profession contracts administered by NEBHE, programs were offered in medicine, dentistry, occupational and physical therapy and optometry, which was added to the program in 1974.

* See Appendix A

SECTORAL GROWTH

Enrollment in all sectors except graduate level programs grew in 1974-75. The greatest increase occurred in university undergraduate enrollment.

Figure 3

	REGIONAL STUDENT PROGRAM ENROLLMENT		
	By Sectors		
	1973-74	1974-75	Change
University Graduate	670	447	-228 ^a
University Undergraduate	960	1,191	+231
Four Year Colleges	190	301	+111
Two Year Colleges	890	1,016	+126
Sub Total	2,710	2,950	+240
Contracts	244	322	+78
TOTAL	2,954	3,272	+318

^aThe decrease in graduate level enrollment is partially explained by the inability of one state university last year to supply accurate figures and of another state university to identify regional graduate students for this year.

STATE PARTICIPATION

Figure 4 compares the ranking of New England states in terms of total enrollment in public institutions to their participation in the Regional Student Program.

Figure 4

	RANK ORDER COMPARISON BY STATES OF PUBLIC INSTITUTIONAL ENROLLMENT AND NEW ENGLAND REGIONAL STUDENT PROGRAM ENROLLMENT			
	1974-75		1973	
	INFLOW	OUTFLOW	Enrollment	Total Public Enrollment (1973)
	Number of residents of other N.E. states studying under NERSP in public institutions of state	Number of residents of state institutions studying at public other N.E. states under NERSP		
MA	1,031	883	139,469	
CT	524	734	83,910	
RI	415	465	29,989	
ME	413	409	27,703	
NH	290	252	18,788	
VT	277	207	16,157	
	2,950	2,950	316,016	

The net effects of student enrollment under the Regional Student Program can be determined from Figure 5. Two states, Connecticut and New Hampshire, are net exporters of regional students. Three states, Massachusetts, Vermont, and Maine, are net importers. Rhode Island is essentially in balance.

I. THE NEW ENGLAND GOVERNORS' CONFERENCE accepts with appreciation the interim report of the New England Board of Higher Education on the Regional Student Program and commends the Advisory Committee on the Regional Student Program whose efforts this past year are reflected in the report.

II. IN REGARD TO past withdrawals of popular regional programs which precipitated the request by this Conference last year for a one year study of the Regional Student Program, the New England Governors' Conference reiterates its concern that many students in the region continue to be without access to such popular and valuable programs as Occupational and Physical Therapy, and thus urges the New England Board of Higher Education, the appropriate state governing authorities and institutions of higher education to carefully examine these past decisions that have limited regional access to these critical academic programs.

III. MINDFUL OF BOTH the education and economic benefits derived by both New England states and their residents from the Regional Student Program, the New England Governors' Conference requests participating institutions to make available at least 20% of all openings in academic programs currently offered under the Regional Student Program to qualified residents of eligible states.

IV. THE NEW ENGLAND GOVERNORS' CONFERENCE also requests that educational governing boards that believe it necessary to withdraw academic programs under the Regional Student Program extend a two-year advance notice to affected states through the New England Board of Higher Education, and that the New England states have an opportunity to review and comment upon the regional implications of such planned withdrawals and to explore alternative solutions to the proposed withdrawal through a standing committee established by the New England Board of Higher Education.

V. THE NEW ENGLAND GOVERNORS' CONFERENCE requests that it receive, on or before July 31, 1975, a further report of the New England Board of Higher Education on the feasibility of establishing a balance of payments plan or other alternative mechanism to insure that the fiscal impact of the Regional Student Program is shared equitably by all states of the region.

VI. THE NEW ENGLAND GOVERNORS' CONFERENCE also requests that it receive, on or before November 30, 1975, a report from the New England Board of Higher Education on the feasibility of creating a regional manpower projecting capability that could assist states, educational governing boards and institutions of the region on questions of higher education program expansion or retrenchment.
