**ABSTRACT**

The bibliography presents approximately 650 references (1955-1975) on educational programs for the severely handicapped. Citations are listed alphabetically by author's name in the following areas: behavior management, curriculum guides, medico-prosthetic aids, motor development, parent training (including aspects of parent involvement in school programs, self help and speech and language intervention), physical education, preacademic and academic skills, prevocational and vocational training, recreation, self help (including dressing, independent living and toileting), sex education, social skills and speech and language programs. References usually include author, title, source, date and pagination information. Appended are complete addresses of publishers and distributors. It is explained that the bibliography forms the basis for a computerized program retrieval library system which is expected to be in operation by Fall, 1975. (CL)
Educational Technology for the Severely Handicapped
A Comprehensive Bibliography

Personnel Training Program for the Education of the Severely Handicapped
INTRODUCTION

This bibliography of educational programs for the severely handicapped was assembled by the staff of the Personnel Preparation Program for Education of the Severely Handicapped at Kansas Neurological Institute. The effort was completed entirely from funds made available from USOE/BEH, OEG-O-74-2766 to Doug Guess, Wayne Sailor and Leonard Lavis of KNI. This first printing of the bibliography represents the project's total knowledge of the existing "state of the art" of available educational technology. Any mistakes, omissions or inaccuracies are the responsibility of the authors. The authors would greatly appreciate hearing from readers who are aware of existing programs which are available to users and which have not been listed in this bibliography. Reader's suggestions will be incorporated into subsequent printings. The authors would also like to be made aware of instances where attempts have been made to procure programs listed in this bibliography and the attempts have failed, for any reason. The authors, of course, bear no responsibility for the success or failure of application of any of the listed program references, and the references should not be construed in any way as the authors' recommendations for meeting educational objectives.

The references contained in this bibliography form the basis for the computerized program-retrieval library system which is, in turn, a component of the TARC Assessment System (Sailor, W. S. The TARC System: Instructional Objectives for the Severely Handicapped. In: Norris Haring (Ed.), Proceedings: The First Annual Conference on Research for the Severely and Profoundly Handicapped; in press, 1975). The program-retrieval system is expected to be in operation by Fall, 1975. Users will be able to review abstracts of many of the programs listed in the bibliography as well as receive detailed information about each program (e.g., population parameters; research data; cost; training
needed to implement, etc.). For further information about either the TARC Assessment System or the computerized program-retrieval system, write to the authors at Kansas Neurological Institute, 3107 West 21 Street, Topeka, Kansas 66604.
