DESCRIPTORS *Costs; Enrollment; Expenditures; Federal Aid; Federal Programs; *Fees; *Financial Support; Graduate Students; *Higher Education; Operating Expenses; Statistical Data; Tables (Data); *Tuition; Veterans

IDENTIFIERS *Washington

ABSTRACT

This document is written in an attempt to clear up any confusion that exists concerning information presented on the question of tuition and fee increases. In conjunction with the certification of data, questions were asked concerning the following subjects: (1) The composition (makeup) of the total charges in terms of support for operating costs, capital expenditures, special student activities, and services fees; (2) the extent of any differential charged to graduate students; (3) whether or not lower fees are charged to graduate students; (4) whether or not lower fees are charged to resident Vietnam veterans; and (5) plans for increasing tuition and fees for 1976-77. This survey was as extensive as possible and in the authors' opinion reflected actual practice within the respective states. It was found worthwhile to follow-up on published sources when the State of Washington ranked either exceptionally high or exceptionally low in a particular category. The council staff checked both the aid amount information and the enrollment figures. In discussions with individuals who conducted the survey and with the National Center of Education Statistics, the U.S. Office of Education, it was determined that the dollars per student were based on an erroneous enrollment count for the State of Washington. Corrected tables along with the corrected enrollment information as published by the National Center of Education Statistics are attached to the document. (Author/KE)

2/3

This report was prepared in order to clear up any confusion which may exist concerning information presented on the question of tuition and fee increases.

The provision of accurate information to the Governor and the Legislature is of great importance to the Council on Higher Education in all areas of its responsibility. We recognize that published data sources used by Council staff may contain inaccuracies and it is our practice to check the information for reasonability prior to its use. We, therefore, cannot leave unchallenged broad statements that the Council based its report on tuition and fees on inaccurate information.

In the past two weeks, the Council staff has contacted each of the states, other than Alaska and Hawaii, by telephone to verify the university tuition and fee data. Related questions were also asked concerning graduate differentials, fee reductions for veterans and future plans for tuition and fee increases. The responses to these questions are contained in this report. Information is also provided concerning updated community college tuition and fee levels. Washington's rank in federal student aid programs is also reviewed.

We regret the necessity of conducting this extensive follow-up survey of tuition and fees which essentially confirms the information we originally presented. It is our hope that any future debate on the subject of tuition and fees will focus on the issue of whether increases are necessary and whether the proposed rates are reasonable, rather than the accuracy of the data.

Follow-up Study of Tuition and Fee Comparisons and
Washington's Ranking in Federal Student Financial Aid

In the preparation of background information and comparisons used in reports of the Council on Higher Education, it is the practice of the Council to use, whenever possible, surveys conducted by other agencies and national associations. Studies conducted by the Council have both referenced and contained published data from such sources as the Chronicle on Higher Education, American Association of University Professors (AAUP), National Association of State Universities and Land-Grant Colleges (NASULGC), and the American Association of State Colleges and Universities (AASCU). This approach is followed since the process of soliciting information from each state in the nation is extremely time consuming and costly and normally the information contained in these published sources is reasonably accurate.

It is also our practice to make telephone follow-ups in those cases where the information reported is inconsistent from patterns of previous years or where it appears an error might exist. For example, in reviewing tuition and fee information as published by the AASCU, it was apparent that questions existed in a significant number of cases. Through an extensive telephone survey, Council staff was able to both correct and verify the published tuition and fee data prior to the inclusion of the data in the Council report on tuition and fees. No such inconsistencies were evident in the report of the National Association of State Universities and Land-Grant Colleges concerning universities and this survey was used without a follow-up check.

In view of public statements that the Council on Higher Education has used inaccurate information in this area, we felt it necessary in this instance to recheck the tuition and fee study conducted by the NASULGC. In conjunction with the verification of this data, questions were also asked concerning the following subjects:

The composition (makeup) of the total student charges in terms of support for:

- Operating Costs
- Capital Expenditures
- Special Student Activities and Services Fees.

The extent of any differential charged to graduate students.

Whether or not lower fees are charged to resident Vietnam veterans.

Plans for increasing tuition and fees for 1976-77.

Since no regularly published information exists regarding community college tuition and fees, the data employed by the Council was based upon telephone inquiries to the respective western states, with the exception of Oregon.

Tuition and fee charges for Oregon community colleges were taken from the 1974-75 publication of Mapping Your Education.¹ The survey was as extensive as possible and in our opinion reflected actual practice within the respective states.

In addition to allegations that the information used by the Council on Higher Education in its report on tuition and fees was "inaccurate", persons testifying against HB 453 have cited published data from the Chronicle on

¹Mapping Your Education, 1974-75. Douglas McClane, Editor. Abbot, Kerns, & Bett Company, 1974.

Higher Education concerning the State of Washington's ranking in receipt of Federal funds for student financial aid. This study conducted by the Stanford Research Institute indicated that the State of Washington ranked among the lowest states in the nation in receipt of such payments. In view of the surprising nature of these statistics and since we have found it worthwhile to follow-up on published sources when the State of Washington ranks either exceptionally high or exceptionally low in a particular category, the Council staff checked both the aid amount information and the enrollment figures which were used as the divisor. In discussions with individuals who conducted the survey and with the National Center for Educational Statistics, the U. S. Office of Education, it was determined that the dollars per student were based upon an erroneous enrollment count for the State of Washington. Corrected tables, along with the correct enrollment information as published by the National Center for Educational Statistics, are attached to this report.

Verification of Undergraduate Tuition and Fee Charges

The student charges published by NASULGC were verified by telephone in all states with the exceptions of Alaska, Guam, Hawaii, Puerto Rico, and the Virgin Islands. The respective telephone interviews were with the budget and finance division of the individual statewide boards of higher education, and in a few instances, with the appropriate office of a specific university.

For the purposes of this survey, the stated student charges are those dollar amounts required of all full-time undergraduate students, resident and non-resident. Thus it is the full amount set by the institution for all undergraduates, or in the case of those institutions who charge on a straight "per credit hour" basis, the full-time student charges are for 30 semester hours or 45 quarter hours. This approach was used to provide information comparable with the State of Washington.

Corrections to the 1974-75 NASULGC survey of student tuition and required fees at state universities and land-grant colleges are shown in Table I.

The complete list of student charges at state universities and land-grant colleges is shown in Table II. One institution in each state has been historically considered a comparison institution by the Council on Higher Education and is designated with an asterisk. This is consistent with the practice used in salary comparisons involving the "seven comparison states" and is important in multi-state comparisons which include the University of California as one institution yet lists the seven small campuses of the University of Maine as separate schools. These institutions

were used in Table V. of Tuition and Fee Recommendations, Council on Higher Education, December 1974, in the development of national comparison information, and normally are the "university of" the respective states or represent the primary campus of multi-campus institutions. In reviewing the information, it was found that Clemson University had been used in South Carolina when the University of South Carolina is the largest institution in that state. Therefore, University of South Carolina figures have been used as the comparison institution. The effect of the corrected information on the published comparisons is as follows:

1974-75 University Resident Undergraduate
Tuition And/Or Required Fees

	<u>Reported</u>	<u>Corrected</u>
49 State Average	\$592	\$592
7 State Average	686	687

"Operating Fee" Portion

Table III on the following page separates out student tuition and fees allocated to operating expenses* in 35 of the 50 comparison universities. The remaining 15 did not respond to the question because they did not have the information, the categorical allocations changed every year, or the information was for internal use only. Of the 35 institutions responding, the average percentage of student fees used for institutional operations was 68 percent.

Only 12 of the 35 states could clearly identify that portion of student fees that were being allocated to debt service on instructional facilities. It was frequently stated that this was allocated from the state general funds only. The area of student activities and special fees covers a very wide range of expenditures, including debt service for dormitories, athletic complexes, convention centers, student union buildings, performance centers, health facilities, and parking facilities. There are also allocations to a wide range of "student activities", including athletics, intramurals, student union operations, health programs, alumni associations, artists series, creative arts, transportation, financial aids, and recreation. It should be noted that only those fees required of all full-time students have been included in the total student charges. Any optional fees such as health insurance or parking fees have not been included. At some institutions health programs and parking are included in their required fees, however, these are not optional programs and generally relate to facilities maintenance.

*This portion is normally termed "tuition" in most states. Washington's "tuition" is dedicated to capital construction.

TABLE III

PERCENTAGE OF STUDENT TOTAL TUITION AND FEES

Differential Tuition and Fee Charges to Graduate Students

Of the 48 states contacted, 22 had some form of differential tuition and fee structure between their undergraduate and graduate students.

Table IV on Page 19 is broken into seven sections and shows the various patterns of tuition differentials used by comparison institutions. The figures are for full academic year or in the case of per credit hour charges, a total of 20 semester or 30 quarter credit hours has been used.

Section A -- Universities which charge an equal dollar increase to both resident and nonresident graduate students.

Section B -- Universities which increase the charges to resident graduate students only.

Section C -- Universities which increase resident graduate charges and decrease nonresident tuition and fees relative to nonresident undergraduate charges.

Section D -- Universities which charge a greater differential to nonresident than to resident graduate students.

Section E -- New York which charges a greater differential to residents than to nonresident graduate students.

Section F -- Connecticut which charges less to all full-time graduate students than to full-time undergraduates.

Section G -- Louisiana which charges no increase to resident graduate students, and charges less to non-resident graduates.

In addition, the University of Florida charges a \$3.50 per credit hour difference to all graduate students; however, since they are taking fewer

credit hours, the actual dollar amount of total charges is less at the graduate level.

At the University of Indiana, University of Nevada-Reno, and University of Oklahoma, the credit hour charge is the same for undergraduate and graduate students, but again, the taking of fewer credit hours makes the dollar amount less at the graduate level.

TABLE IV

State Level Veterans' Educational Benefits

In view of the State of Washington policy of charging lower tuition and fees to Vietnam veterans, the question was asked of each state if they had a separate and lower tuition and fee schedule for veterans. The following information concerning state level benefits for veterans in public institutions of higher education came from several sources. Conversations with State Departments of Veterans' Affairs, Boards of Regents and Councils on Higher Education were cross-checked with state veterans' laws.¹ In a few cases, legislation is more recent than the federal information and therefore does not appear in the publication. In parenthesis is the current tuition (operating) portion that would be waived at the comparison university of that state.

California - After exhaustion of federal educational benefits, \$100 per month for a maximum of 12 months is available for full-time training at an accredited institution.

Colorado - One-half of the "weighted average tuition" may be waived with a maximum of \$181.50 per year to resident veterans.

Connecticut - Full "tuition" waiver to resident veterans (\$350 per year). Covers 209 veterans at University of Connecticut, all campuses.

Delaware - \$100 per year "scholarship" to each resident veteran.

Illinois - Full "tuition" waiver for resident veterans (\$574 per year). Covers 900 veterans at University of Illinois, Urbana campus.

¹House Committee on Veterans' Affairs, State Veterans: Laws, Digests of State Laws Regarding Rights, Benefits, and Privileges of Veterans and Their Dependents, Revised to January 1, 1974 (Washington D.C.: U.S. Government Printing Office, 1974).

Iowa - "Tuition" waived after age of 21 for as many months as were spent in the armed forces prior to age 21 (\$567 per year).

Massachusetts - Full "tuition" waiver to resident veterans (\$300).

Minnesota - "Tuition" waiver of up to \$250 per year for resident veterans who have exhausted their federal educational benefits.

Montana - "Tuition" waiver for resident veterans who have exhausted their federal educational benefits.

Oregon - State G.I. Bill program of \$50 per month undergraduate and \$35 per month graduate student for resident veterans holding Vietnam Service Medal or Armed Forces Expedition Medal.

South Dakota - "Tuition" waiver for resident veterans who have exhausted their federal educational benefits.

Texas - "Tuition" waiver for resident veterans who have exhausted their federal educational benefits.

Washington - Resident veterans exempt from tuition and fee increases after May, 1971 (\$132 per year).

Wisconsin - \$100 per year for single veteran or \$200 per year for married resident veteran is available based on need. Wisconsin uses a very liberal definition of need which does not include summer work or income of spouse.

While these are basic statewide benefits, it is possible that there are institutional policies of waivers that are not based on state legislation concerning veterans' educational benefits.

Plans For Increasing Tuition and Fees For 1976-77

The question of proposed or approved increases in tuition and fees for 1976-77 was discussed with each of the states. With their respective legislatures in session at this time, it was not possible to get a final picture of what will be happening in each state next year. In some cases, respective higher education governing boards have the final decision on the setting of tuition and fees and their decision is based on the budget which is approved by the legislature. Twenty-five of the forty-eight states indicated that increases were approved, planned or being considered for the 1975-76 academic year. An overview of those states which were able to provide information concerning increases is as follows:

- 1) Arizona - Will increase resident tuition and fees by \$30 and non-resident tuition and fees by \$310. This increase will become effective in 1976-77, although it was approved in September, 1974.
- 2) Colorado - Has indicated that there will be an increase, but it is not known how much. While the dollar amount is not yet available, resident students pay 25 percent, non-resident students pay 100 percent and community college students pay 20 percent of operating costs based on the previous year's total costs. Total cost excludes rentals, intercollegiate athletics, student financial aid, and capital expenditures. When the 1974-75 cost study is completed, the 1975-76 tuition and fees will be set.
- 3) Connecticut - Has proposed an increase in required student fees only. Amount unknown at this time.

- 4) Delaware - Has indicated an increase will be made, but it is not known how much.
- 5) Florida - Will be going to a lower division/upper division split on tuition and fees. For the undergraduate resident this will be a \$1 and \$2 increase per credit hour. The non-resident increase will be zero at the lower division and \$10 per credit hour at the upper division. Graduate increases will be \$3.50 per credit hour for residents and \$16.50 per credit hour for non-residents.
- 6) Georgia - Has approved increases to resident undergraduates ranging from \$51 to \$75, and increases to non-residents ranging from \$159 to \$246, dependent on the various institutions.
- 7) Idaho - Has approved at least a \$10 per year increase to both resident and non-resident students. Although the amount could be more, the exact increase will not be available until July.
- 8) Illinois - In 1976-77, undergraduate resident charges will be one-third of total cost, with graduate residents paying one-third above that. Non-resident undergraduates will be paying 100 percent of cost, and non-resident grads will pay one-third above that. The dollar amount of this increase is not yet available.
- 9) Iowa - Undergraduate increases for 1975-76 at the two universities will be resident (\$60 and \$62) and non-resident (\$96 and \$100). For graduate students, resident increases will be \$69 and \$70 and non-resident grads will be increased (\$66 and \$100).
- 10) Kansas - Resident undergraduates must pay 25 percent of the operating costs. Using this criteria as a basis, all charges

- will be appropriately increased based on 1974-75 cost analysis.
- 11) Maine - The Governor's budget is less than last year, and at this time it was only indicated that increased tuition and fees was "a possible alternative".
 - 12) Nevada - A change will be made in 1975-76 to the lower division/upper division split which will cause an increase in lower division to \$76 and \$84 and in upper division to \$140 and \$148. The increase will be the same for resident and non-resident undergraduates as the non-resident tuition of \$600 will remain the same.
 - 13) New Hampshire - Dependent on the Governor's budget, the Board of Trustees is anticipating the need for up to a 50 percent increase to residents, and a 14 percent increase to non-residents for tuition and fees.
 - 14) New Jersey - Possible increases are being discussed, with the proposed increases being assigned to non-resident and graduate students. No figures are available.
 - 15) North Carolina - Will be increasing fees by \$15 and \$37 per year.
 - 16) North Dakota - It appears there will be an increase of an average of \$48 per student. No figures were available on the proposed distribution of this increase.
 - 17) Oklahoma - Is considering an increase in student fees.
 - 18) Oregon - Dependent on the Governor's budget, it is anticipated that resident tuition and fees could increase as much as 17 percent in 1975-76 and an additional 7 percent in 1976-77. Non-resident students pay 100 percent of costs and are increased each year according to previous year's cost analysis.

- 19) Pennsylvania - Increases will be dependent on the Governor's budget, and it is possible that they will be about \$50 per year per full-time student.
- 20) Rhode Island - Undergraduate increases will approximate 15 percent and graduate increases are expected to be somewhat greater than 15 percent.
- 21) South Dakota - All categories of students will pay an increase of \$2.50 per credit hour. (This is just over a 17 percent increase for resident students.)
- 22) Tennessee - An increase of "10 percent or less" is being considered.
- 23) Utah - The legislature has put a ceiling of \$24 on resident increases and \$90 on non-resident increases. The proposed resident increase is \$48 per year. The actual increases have not been decided, however.
- 24) Vermont - Increases to resident students will be \$95 per year and to non-resident students will be \$215 per year.
- 25) West Virginia - A maximum of \$50 per year increase is being considered.
- 26) Wisconsin - No figures were available. Increases will be dependent on proposed salary increases.

Of those states indicating no proposed increases in tuition and fees in 1975-76, several stated that the 1974-75 rates represented increases over the 1973-74 charges.

Tuition and Fee Charges in Community Colleges

Table V is reprinted from Tuition and Fee Recommendations, Council on Higher Education, December 1974. Since no national published data are available on community colleges, this information was obtained by Council staff from telephone conversations with appropriate state agencies. The amounts in parentheses are those presented to the House Committee on Higher Education by the Council of Representatives and Presidents (CORP) to demonstrate that the Council on Higher Education table was inaccurate.

TABLE V
TUITION AND FEE VALUES IN COMMUNITY COLLEGES
(TWO-YEAR COLLEGES) FOR NINE WESTERN STATES

<u>State</u>	<u>Resident In-District</u>	<u>Tuition and Fees Out-of-District</u>	<u>Nonresident Tuition and Fees</u>
Arizona	\$119 ¹ (90)	\$1,007 (90)	\$1,212 (1250)
California	0	350 (0)	800-2000 ² (960)
Colorado	305	305	1,135
Idaho	311	311	873
Nevada	336	336	496
Oregon	307 (305)	479 (437.54)	1,089 (999.62)
Utah	333	333	794
Wyoming	260	274	630
Median	\$307	\$ 336	\$1,089
Washington	\$249	\$ 249	\$ 681
Rank of Nine	7	9	9

NOTE: The tuition and fee data were obtained via telephone interviews with the appropriate state agencies.

¹Tuition only -- other required student fees not available.

²Fees based on full costs two years prior to the year in question

It should be noted that even if the CORP figures were correct, they support the basic conclusion of the table; that Washington tuition and fees are lower than the majority of western states.

The following is the reconciliation of reporting differences between the Council on Higher Education and the Council of Representatives and Presidents:

Arizona - The in-district (\$90) CORP reports appears to be Maricopa County Junior College only. Maricopa has campuses at Glendale, Mesa, Phoenix, and Scottsdale. The Council on Higher Education survey includes eight additional institutions, thus the average of \$119.

The out-of-district fee (\$90) which CORP reports again appears to be the Maricopa County Junior College. Of the fourteen counties in Arizona, nine have community colleges. Students from the other five counties have their out-of-district tuition paid (by law) by the County Board of Supervisions of their home county regardless of what institution they attend in the community college system. Students in the nine community college counties have their out-of-district fees waived by reciprocal agreements in seven counties. In Maricopa and Pima counties, there is no such agreement and out-of-district fees are charged. The policies of these two counties is intended to discourage enrollments as they are the two largest districts in the state. The correct figures for Arizona out-of-district should show a range of \$90 (minimum fees not waived) to \$1020 (Pima out-of-district).

Arizona nonresident fees reported by CORP (\$1250) is again Maricopa County, however, this is inaccurate for Maricopa County itself. The Council on Higher Education report of \$1,212 is an average which includes Maricopa County campuses at \$1340 (\$1250 nonresident tuition plus \$90 in required fees).

California - The out-of-district (\$350) reported by the Council on Higher Education strikes the average cost to the student, whose county of residence refuses to pay his tuition. In California, the state pays a minimum basic aid charge of \$125 per student regardless of what district he attends. Regarding out-of-district students, their county of residence is billed by their county of attendance for tuition charges above the state basic aid. These charges vary with an average of \$350. In an attempt to equalize enrollments, some students are denied this payment by their county of residence. When this is the case, the student would then be required to pay the out-of-district tuition and fees. The range shown (\$800-\$2,000) for nonresident students is an accurate figure. Since this charge is set by the individual districts, and they are not required to report to the State Board, no accurate average was attempted. However, Mr. Earl Leight, California State Board for Community Colleges, stated he "felt it would be over \$1000 at this time".

The Community college systems of Arizona and California have inter-district agreements that make any average of out-of-district costs difficult. The average in these states is considered as pertaining to those students not covered by any county reciprocal agreement. The percentage of enrolled students paying the out-of-district charges was not available from the respective state agencies.

Oregon - Making follow-up calls to reconcile the reporting differences between CHE and CORP in Oregon demonstrated current tuition and fee trends. Council staff originally used data from Mapping Your Education, a widely used publication offering an overview of all Washington and

Oregon institutions of higher education, including 1974-75 student tuition and fees at all institutions. While these student charges were correct at the time of publication, they are not accurate at this time due to tuition increases in many of the Oregon community colleges. Therefore, it is necessary in this report to update the Council survey in Oregon as follows:

	<u>In-District</u>	<u>Out-of-District</u>	<u>Nonresident</u>
Oregon	\$309	\$484	\$1,102

The effect of the update of the information was to leave most items unchanged, to indicate that a range of charges exists for Arizona out-of-district fees, and to reflect higher than previously reported tuition and fees for all categories of students in Oregon.

In fairness, though not mentioned in the CORP testimony, the Washington ranking in the nonresident category should have been 7 instead of 9.

Student Financial Aid Programs

In the January 27, 1975 issue of the Chronicle of Higher Education, data were published on Growth of U.S. Student Aid Programs as compiled by the Stanford Research Institute. Based on this data, Washington ranked either 49th or 51st in dollars per full-time equivalent degree credit undergraduate student in each of the five federal student aid programs. This information was presented in testimony in opposition to House Bill 453 before the House Committee on Higher Education. In checking this data for accuracy with the Stanford Research Institute, it became apparent to Council staff that the wrong enrollment divisor had been used to compute the average dollars per student.

Table VI on the following page shows the state by state funds to the five programs as published by the Chronicle on Higher Education, January 27, 1975. Table VII lists the correct enrollments for each state as published in Fall Enrollment in Higher Education 1972 which were then used consistently by Council staff in computing the dollar per student totals in each of the various federal programs. Tables IX through XIII are the corrected ranking and dollars per student in each program, with Table VIII showing the composit ranking and dollars per student for all five programs.

Using corrected enrollment information, it is apparent that Washington ranks as the median state (25th) in total dollars per student as a composite of all five federally funded programs.

Growth of U.S. Student-Aid Programs

State-by-state funds for fiscal years 1968 and 1973

	Basic Educational Opportunity Grants		College Work Study		Guaranteed Student Loans	
	1968	1973 5-year change	1962	1973 5-year change	1968	1973 5-year change

CHE 3-3-75

In view of public statements that the Council on Higher Education has used inaccurate information in this area, we felt it necessary in this instance to recheck the tuition and fee study conducted by the NASULGC. In conjunction with the verification of this data, questions were also asked concerning the following subjects:

The composition (makeup) of the total student charges in terms of support for:

- Operating Costs
- Capital Expenditures
- Special Student Activities and Services Fees.

The extent of any differential charged to graduate students.

Whether or not lower fees are charged to resident Vietnam veterans.

Plans for increasing tuition and fees for 1976-77.

Since no regularly published information exists regarding community college tuition and fees, the data employed by the Council was based upon telephone inquiries to the respective western states, with the exception of Oregon. Tuition and fee charges for Oregon community colleges were taken from the 1974-75 publication of Mapping Your Education.¹ The survey was as extensive as possible and in our opinion reflected actual practice within the respective states.

In addition to allegations that the information used by the Council on Higher Education in its report on tuition and fees was "inaccurate", persons testifying against HB 453 have cited published data from the Chronicle on

¹ Mapping Your Education, 1974-75. Douglas McClane, Editor. Abbot, Kerns, & Bett Company, 1974.
