ABSTRACT

The tremendous growth of the food service industry has created a need for well-trained employees in the restaurant business. This manual provides material for waiter and waitress training in developing the overall required skills. The course is presented in four major sections: (1) relations-human and customer, (2) sanitation and food handling, (3) preparation and service, and (4) sequence of service and presenting the check. Each section consists of a three-hour session which can be expanded or shortened as required. Overhead masters, handouts, and sketches of needed materials are included at the end of each section. This manual is developed in sections that are important to the overall development of needed skills. Each section can be expanded or shortened depending upon the situation. It is very important, before putting on such a course, to find out which methods are used or preferred in the establishment.

At the end of each section will be the overhead masters, handouts, and sketches of needed materials for that section.

The outline is developed for four 3-hour sessions, and the sessions are indicated. But the course is broken into four general topics:

- I. Relations -- Human and Customer
- II. Sanitation and Food Handling
- III. Preparation and Service
- IV. Sequence of Service and Presenting the Check

INTRODUCTION

One of the foremost and one of the largest retail businesses in Ohio is the Food Service Industry.

In Ohio, food service is big business --- the fourth largest to be exact. It's a nine hundred million dollar business, bigger than furniture and appliances, gasoline, or even automobiles.

One-third of all the food eaten in Ohio is served in restaurants of one kind or another. And there are more than 36,000 of them --- all kinds.

Restaurants and other food service businesses is one of Ohio's biggest employers, too. Of all employees working in retail establishments, one in every six is in food service.

And they're *IMPORTANT* people. Anyone responsible for serving one-third of all the food eaten in Ohio every day plays a big part in the health and well-being of the public.

There are jobs to be filled in the restaurant industry --- a 43.8 billion dollar business in the United States last year (1971).

Unlike many businesses, which succeed only in times of prosperity, the restaurant field continues to expand in spite of the ups and downs of business. People always have to eat.

There is always a need for good employees anywhere you go. There will be a need of approximately 250,000 new workers in the restaurant business in the United States over the next ten years.

Rich in Tradition --- It seems historians can trace the beginning of restaurants back to 512 B.C.! These first restaurants were in Egypt; their menu consisted of cereal, wild fowl and onions. Ladies weren't even allowed! In 153 B.C. the Romans are said to have had "inns", and the "businessman's lunch" dates back to 40 B.C.

It seems as though coffee has been around forever! But it wasn't until 1554 that the first coffee house opened in Constantinople, Paris didn't get coffee until 1668, and England's first coffee house isn't supposed to have opened until 1650 in Oxford!

The primary function of supplying food, shelter, and comfort to persons away from home that caused the first of these coffee houses to open in the 16th Century still remains the primary function of today's industry.

The first real "restaurant" is said to have been in France. It was Monsieur Boulanger's Inn, opened in 1765. Over the door of his restaurant were inscribed these words: "Venite ad me omnes qui stomacho laboratoratis et ego restaurabo vos." Very few of the Parisians who saw this sign could read Latin, but if they could they knew it said, "Come to me, all whose stomachs cry out in anguish and I shall restore you."

Thus in the word "RESTORE" we find the roots of our word "RESTAURANT". With these words Monsieur Boulanger started the tradition we know today---that of restaurants attracting fashionable ladies and gentlemen who didn't want to patronize the public tavern where eating ran only a very poor second place to drinking.

Eating out is no longer "only fashionable" for ladies and gentlemen who wouldn't usually patronize the public taverns, but is now a firmly established custom and a daily necessity for millions of ordinary people like us. These changes have brought about a greatly increased number of eating places --- and different types of food operations.

In the 20's the development of the automobile began to make significant changes in our way of life, and again our restaurant industry went through a period of expansion with the drive-in, the country restaurant, and the soft drink

stand coming into prominence.

World War II put a demand on the work force --- and it also added a big "push" to the dining out trend. The sales volume of eating and drinking places increased by 171% from 1939 to 1945. This increase is continuing with more leisure time and higher income per capita, per family in America.

An interesting sidelight of the history of the food service business has to do with the way the word "TIP" came into being. Of course, "tips" are very close to all our hearts! It seems that "T" - "I" - "P" stands for "To Insure Promptness". Thus the tip is *INSURANCE*, and people don't pay for insurance they don't get! T - I - P TO INSURE PROMPTNESS !!!

"THE SIGN OF THE PENNY"

In an ancient Babylonian tavern, a weary traveler entered seeking rest, relaxation, and refreshment. After considerable trouble, our weary traveler managed to secure a seat at one of the common tables. In fact to do this, he had to physically toss the previous occupant of the seat into the always standing crowd near the common drinking barrel. (Bar, to you non-historians.)

Business in those days, being extremely good, due to importance and elegance of the religious ceremonies offered at the big Temple across the courtyard, our traveler now faced another problem. How to attract the attention of one of the many scurrying serving maids who were busily carrying planks of meat, pots of drinks or bowls of broth to a hundred bellowing customers.

Of course, he could get up and go to the fireplace or out into the back court (kitchen) and secure his own food, and then fight his way up to the bar, juggling his plank of meat and bowl of broth. If this venture was successful, it was back across that swarming mass in the common room to his seat.

When he reached his seat, odds were that it would be filled with yet another customer. If occupied by an individual of superior rank or physically larger than our traveler, then he must hunt for another seat. If occupied by a manageable individual, our hero must still put his food and drink down while he occupied his hands with seat finding details. Even if successful in securing a seat, success could still be denied as some unscrupulous individual could have purloined our friend's food and beverage while he was engaged in seat finding.

To solve his problem, our traveler did an outstanding simple thing. He removed from his pocket (wallet to be correct) the simplest coin of realm and placed it on the table. There it lay in full view, winking up for all to see.

Very soon, this performance, which caused considerable pointing, whispering and gesturing by other table occupants, attracted the attention of one scurrying tavern maid. Soon the question came forth from our over-curious and, I suspect, slightly greedy maid, "What's that for?" You see, the display of money on the table in those days was not a common occurrence, since hard money was scarce and people did not advertise their wealth for fear of robbery. Most tavern bills were paid directly to the innkeeper and was usually accompanied by a good deal of trading and barter. Cash to employees was not passed out with a lavish hand. (In fact, the average employee got bread, board, and whack on the back for their yearly effort.) Coins (hard money) were just not their lot. No wonder a coin on the table caused a near riot, especially since it probably represented the cost of an average meal for a customer.

Now our traveler went into his act, spurred on by his aching feet and empty stomach. "Honey," he said, "if you hurry over and bring me a plate of that cooked duck and pint of wine, this coin is yours."

With surprise in her eyes, the first restaurant capitalist was born. Speedily, our traveler's waiting girl sped to the pot and pit, gathering the required items; back to the table, through, over and under the other customers crowding the inn's floor to her benefactor. Quickly she set the items before the traveler and then with a shyness born of experience stepped back, half expecting the customary

wave off.

Instead, glory to Marduk, her Babylonian God, this strange man handed her the small coin which he had placed on the table. Thus was born the first gratuity (TIPS to you).

But the age of miracles was not yet done. Smiling, our traveler, who was beaming, pleased with the speed of the girl's work, added yet another coin of greater value to his first gift. With a pleasing pat, our traveler then showed the astonished serving girl on her way. By the by; when he waved for more service she was there like a rocket --- the first John Glenn.

Needless to relate, the looks, the stories, the inspections of the coins that went on amongst the employees of that tavern. Truly this strange man must be of the gods, for to so treat the working people of a tavern (slaves for the most part) so magnificently was unheard of in those crude days.

But all the wonder and amazement was not amongst the tavern staff. Other customers observing the reactions of the staff to the gift quickly followed suit. And so grew up "The Sign of the Penny". A man desiring quick service placed a small coin in front of him as he seated himself at the eating table. This became known as "insurance money" or "TIPS" (To Insure Prompt Service).

If you were pleased with the service and attention you received, another gift of larger value was in order when you left.

So grew the tradition of tipping throughout the ages. But as ages passed from our first tavern story, all did not go as smoothly as with this first time.

Many a guest, placing his coin on the table, found that everything was not to his liking. Not all the serving maids and men of all the ages were as sharp as our little maid of Babylon. Many were slow, indifferent, unpleasant or pure grouchy. And so were produced some dissatisfied customers, not far removed in behavior from some we have today.

So man refined his procedures of "tipping". By this time, the smallest coin of realm was the farthing in our English history. (All countries at this time had a small coin.) As our English (Scottish and Irish) ancestors entered their taverns or coffee houses, they would place a farthing on the table (insurance money).

If service was good, our English cousin would add to this coinage what value he placed on the service received. If very poor or unsatisfactory service was given, then he would leave only the farthing. From this came the common expression of that day, George Washington included, "He or she is not worth a farthing." The farthing thus represented poor service, or minimum insurance for any service.

The tradition grew and became the symbol of service for all eating places. Everyone received the "farthing", the lowest coin in realm. Any additional coins were a special gift, designed to show the special pleasure of guests.

So the sign of the farthing became part of our early English history. As money became more free, the farthing disappeared and the penny took its place.

In early America, meals cost about a quarter (25¢ or one shilling). To this

was added a penny and a tuppence if the service was good (about a nickel or 20%).

If the service was fair, a tuppence was left. Some of you will remember an old song, "I Got Tuppence To Spend", that went along with this era.

If service was poor, all that was left was the insurance money, a penny. The penny was always left because the number of taverns in any one town was small, and the odds were a customer had to come back to this one sometime. Without the penny, a customer probably would have been completely forgotten on his next visit.

But the penny served as a reminder to the serving maid that all was not well. It always said, "Do better the next time." Also it notified the innkeeper that all was not well, for he could see that was left and didn't have to ask the customer for comments on his house's service.

So it is today and will remain throughout history; "The Sign of the Penny" is the sign of service.

"SIGN OF THE PENNY"

LEAVES ONLY A PENNY -- Poor service or at least unsatisfactory service.

NORMAL GRATUITY ----- Fair, but you can do better I am sure.

SPECIAL GRATUITY ----- Real good service and attention, a large tip
(more than 10 per cent) plus a PENNY.

Now you have been told the story behind "The Sign of the Penny". If your next guest leaves you a penny, you know what it means. Make sure your tips in the future are in the special gratuity class, not just an insurance penny.

<p>B. Positive Attitude</p> <p>1. When you are positive, you are energetic, highly motivated, productive, and alert. Thinking about negative factors seems to drain our energy. A positive attitude seems to open the gate for our inner enthusiasm; a negative attitude seems to close the gate. Every healthy person can have enthusiasm; it's a matter of releasing it.</p> <p>2. Your future, to a large extent, depends on what people think of you. The impression they have of you is important. If you think negatively, you will unconsciously transmit this feeling to others. They will pick it up, and it will change their impression of you.</p>

3. A negative person curtails the productivity of others. If you are negative, it is more difficult for others to work next to you. Management will notice this, and it will have an influence on the impression they have of you.
4. People like you when you are positive. They like to be around you. You are fun. They respond to you. When you are negative, people prefer to stay clear of you. A negative person may build good relationships with a few other people, but they cannot build good relationships with everyone.
5. Attitudes are contagious---both negative and positive attitudes are transmitted on the job. They are caught or picked up by others. A persistently negative attitude, like the rotten apple in the barrel, can spoil the positive attitudes of others. It is never easy to work next to a person with a negative attitude.
6. Management will always be interested in the influence you have on your fellow workers. Management constantly reads your attitude, even though you may feel you are successful in covering it up. They can tell by your approach to your job, your reaction to directives, the way you walk, your facial expressions, and especially your relations with others, including customers.

It costs nothing, yet creates much.

It enriches those who receive, without impoverishing those who give.

It happens in a flash and the memory of it sometimes lasts forever.

No one is so rich he can get along without it, and no one is so poor but that he is richer for its benefits.

It creates happiness in the home, fosters goodwill in business and is the countersign of friends.

It is rest to the weary, daylight to the discouraged, sunshine to the sad, and nature's antidote for trouble.

And if in the hurry and rush of the day, you meet someone who is too weary to give you a smile --- leave one of yours.

For no one needs a smile so much as those who have none left to give.

<p>PLAN FOR PERSONALITY IMPROVEMENT</p> <p>A. The How To</p>	

Outline of the Material to be Taught

Suggestions for Teaching Material

The following plan is suggested to assist those who desire to improve and who wish to get a larger measure of personal satisfaction from their work and their contacts with people.

1. Think personality -- Be personable.

2. Accentuate the positive -- Eliminate the negative.

3. Reach out -- Not in.

4. More give -- Less get.

5. Make personality a habit.

First, identify the traits, attitudes, and other factors that make up personality---ie., cheerfulness, honesty, sincerity, and so on. Then, determine the way in which each is expressed. Next, make a *conscious and definite effort* to bring these personality characteristics into play whenever and wherever possible---at home, on the way to and from work, in the store, and in social groups.

INSERT #13. Use as an overhead. Awareness.

Concentrate on the plus side of the personality balance sheet. Build up the asset score. Think positively. Act positively. In so doing, there will be less likelihood for the negative traits to come out.

Think of the other person; put yourself in his shoes.

Give more attention to the other person ---less to yourself.

Take up a hobby if you don't already have one.

Remember that everyone else has plenty of problems these days, too.

It's service to others that really counts. "He profits more who serves best."

Question yourself -- "What will it mean to the other fellow?" and not, "What will I get out of it?"

Don't consider today only in selling, but tomorrow, the day after, and so on.

Start today -- Think personality!

<p>6. How am I doing?</p>	<p>Concentrate on the plus side. Do the same tomorrow, and the next day, and the next. Each will be easier than the last. Don't let exceptions or mistakes occur.</p> <p>Check daily on the plus and negative scores.</p> <p>"Where did I miss an opportunity to improve?" <p>B. Proven Personality Polishers</p> <ol style="list-style-type: none"> 1. Positive habit. 2. Search for ways to divert your anger and aggression. 3. Learn to be flexible -- to compromise. 4. Admire traits. 5. Develop a sense of humor. 6. Learn to disagree agreeably. 	<p>Try to develop a positive habit to replace an objectionable one. In time, your new way of acting will overcome your old one.</p> <p>Take time to think of something complimentary to say before lashing out at someone, and you'll find your anger cooling off. But don't bottle up your anger when annoyed by a situation. Instead, analyze why it arose and look for a constructive solution.</p> <p>See every situation through the eyes of the other person as well as through your own.</p> <p>Study people you admire to find out what it is about them that attracts you. You may want to copy their traits and mannerisms. A N E W D A Y

This is the beginning of a new day.

I have been given this day to use as I will.

I can waste it or use it for good.

What I do today is important because I'm

Exchanging a day of my life for it.

When tomorrow comes, this day will be gone forever;

Leaving in its place whatever I have traded for it.

Therefore, I pledge to myself that it shall be:

Gain, Not Loss !

Good, Not Evil !

Success, Not Failure !

In order that I shall not regret the price

That I paid for this day.

MAN WANTED

A MAN for hard work and rapid promotion, a man who can find things to be done without the help of a manager and three assistants.

A MAN who gets to work on time in the morning and does not imperil the lives of others in the attempt to be first out of the restaurant at night.

A MAN who is neat in appearance and does not sulk over an hour's overtime in emergencies.

A MAN who listens carefully when he is spoken to and asks only enough questions to insure the actual carrying out of instructions.

A MAN who moves quickly and makes as little noise as possible about it.

A MAN who looks you straight in the eye and tells the truth every time.

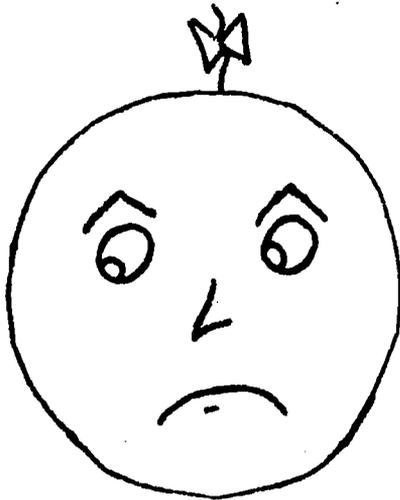

A MAN who does not pity himself for having to work.

A MAN who is cheerful, courteous to everyone and determined to make good.

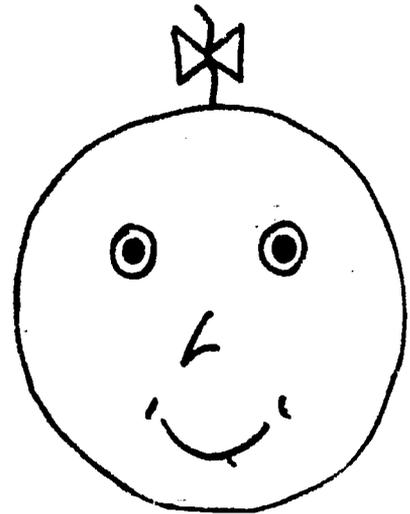

A MAN who works for his family, as well as for his employer; one who gets his happiness from the simpler things of life, finds time for recreation, but does not let recreation interfere with his work; one who lives within his means.

THIS MAN is wanted everywhere. Age or lack of experience do not count. There isn't any limit, except his own ambition, to the number or size of jobs he can get. He is wanted in every business, and most particularly, the Food Service business.

A STORY WITHOUT WORDS

THE TEN COMMANDMENTS OF BUSINESS

A CUSTOMER is the most important person in any business.

A CUSTOMER is not dependent on us --- we are dependent on him.

A CUSTOMER is not an interruption of our work --- he is the purpose of it.

A CUSTOMER does US a favor when he calls --- we are NOT doing him a favor by serving him.

A CUSTOMER is a part of our business --- not an outsider.

A CUSTOMER is NOT a cold statistic --- he is a flesh-and-blood human being with feelings and emotions like our own.

A CUSTOMER is NOT someone to argue or match wits with.

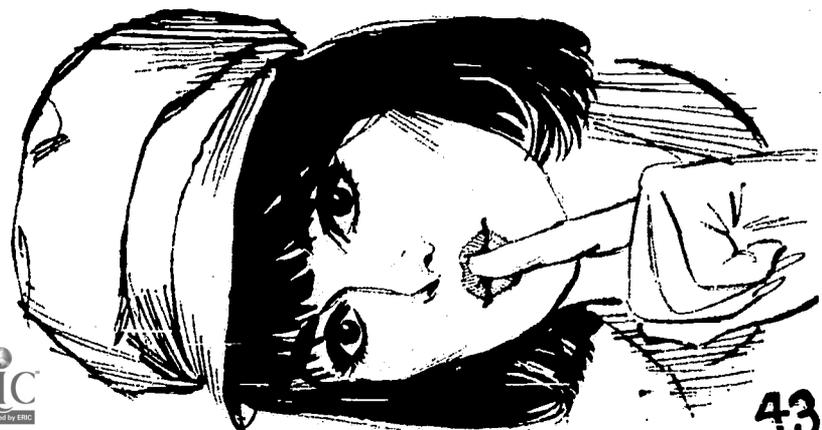

A CUSTOMER is a person who brings us his wants --- it is our job to fill those wants.

A CUSTOMER is deserving of the most courteous and attentive treatment we can give him.

A CUSTOMER is the lifeblood of this and every other business.

EVERYONE
IS
DIFFERENT

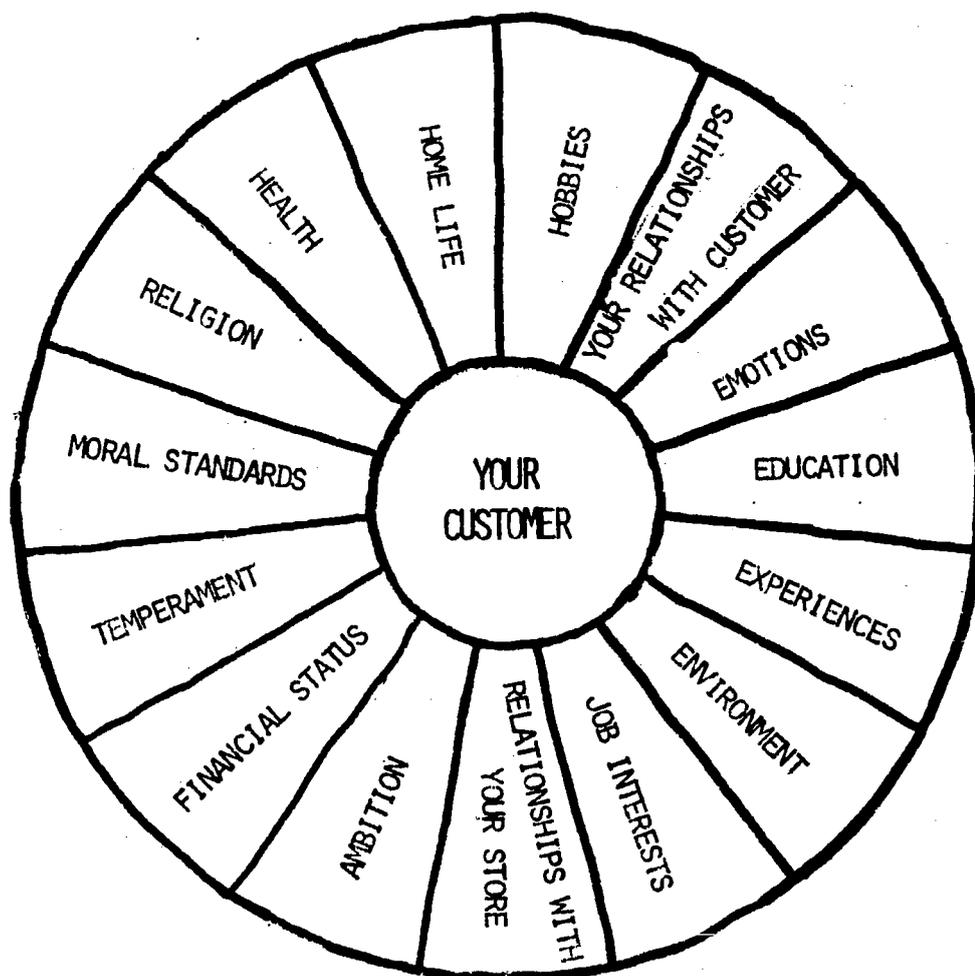

YOUR CUSTOMER

Your customer is the sum total of his traits, habits, interests, characteristics, and experiences. All of your customers have good and bad points.

Your customer is motivated and affected by the elements and factors listed below. The following factors will have an important effect on your customer relations, and how you feel about your sales job.

MAKE-UP OF YOUR CUSTOMER'S PERSONALITY

The better you know and understand your customers, the better you will be able to serve them more effectively.

Remember that each customer is an individual and has a personality all his own. **TREAT EACH CUSTOMER AS AN INDIVIDUAL.**

COURTESY IS MY NAME

Like the mighty atom
I am a little thing with untold power.
I help everyone. I open doors, even hearts,
dispel prejudices.
I make friends and hold good will.
I command respect and admiration.
I am loved by all. I offend nobody.
I violate no laws. I cost nothing.
Many have sung my praises.
None have condemned me.
I am pleasing to those in high and low places.
My full beauty thrives on sincerity.
I am useful every moment of the day.

ENTHUSIASM

That certain something that makes us great --- that pulls us out of the mediocre and commonplace --- that builds into us Power --- it glows and shines --- it lights up our faces --- ENTHUSIASM, the keynote that makes us sing and makes men sing with us.

ENTHUSIASM --- the maker of friends --- the maker of smiles --- the producer of confidence --- it cries to the world, "I've got what it takes." It tells all men that your job is a swell job --- the bureau you work for just suits you --- the services you have are the best.

ENTHUSIASM --- the inspiration that makes you "Wake Up and Live." It puts spring in your step --- spring in your heart --- a twinkle in your eye --- confidence in yourself and in your fellow men.

ENTHUSIASM --- It changes a dead-pan salesman to a producer --- a pessimist to an optimist --- a loafer to a go-getter.

ENTHUSIASM --- if you have it, you show it --- your prospect gets it --- your company loves it --- and you cash in on it.

BECAUSE --- upon the plains of hesitation, bleach the bones of countless millions, who, on the threshold of victory, sat down to wait; and waiting they died.

If possible, collect data or news articles in your area that could help you stress the importance.</p> <p>"Give Sanit Story a Barnum Touch." Most employees don't understand what a germ is, or what bacteria are. And let's face it: many food service employees come to work from a set of living conditions where sanitation is</p>

	<p>at best uncertain. If they don't wash their hands at home, why should they do so in your restaurant? In order to convince them that sanitation is, in fact, important, you'll have to resort to a big touch of Barnum.</p> <p>You'll have to make sanitation a personal experience for them, relating it to the familiar surroundings of your employees' homes. And that requires showmanship.</p> <p>Use scare tactics. As soon as the warm weather starts, collect newspaper stories dealing with food poisoning. And not necessarily about restaurants. Good articles will deal with local groups holding big picnics where food is likely to spoil. A poster or bulletin board full of these clips can be useful in demonstrating how poor sanitation can harm many people. Once you've shown employees that "spoiled" food can hurt people, you can work on telling them why.</p> <p>It's virtually impossible to convince anyone that something 1/25,000th of an inch can cause food poisoning. But if you say that 60 bacteria side by side take up the width of a human hair, then you've given them a basis for comparison.</p> <p>Unlike human hair, however, bacteria multiply like crazy. You can demonstrate that by letting someone with dirty hands paw a clean dinner plate; let the plate sit around a warm kitchen for a couple of days and then show them the reddish discoloration around the fingerprints. Those are whole bacteria.</p> <p>Then you can explain that these bacteria, in such great numbers, cause illness. But in order to multiply, they need food, moisture, warmth, and time. Employees will then understand</p>

If you can convince them to do it at home, they'll do it automatically in your restaurant.</p> <hr/> <p>It requires something like a three-ring circus to drive home to the employees the importance of sanitation.</p> <p>How do you convince the employees that it's vital to keep food clean, covered, and away from places where it can become contaminated?</p> <p>Begin with bacteria. But don't get yourself all tangled up in explaining what bacteria are, because the employees couldn't care less. Tell them what bacteria do.</p> <p>Tell them that bacteria are teeny little things---60 if them side by side are as wide as a human hair---and that they like to hang around where it's dirty and warm.</p> <p>"A couple of bacteria aren't so bad, but the darned things multiply faster than rabbits," you might say. In five hours, one of those critters can multiply to over a million. In 24 hours, it can become a thriving colony of 4,720,000,000,000,000---in other words, more germs in your kitchen than people on the earth!</p> <p>Ask: How do these bacteria spread? Is it any wonder that flies should be kept out of a food plant? They should be kept out of your homes as well.

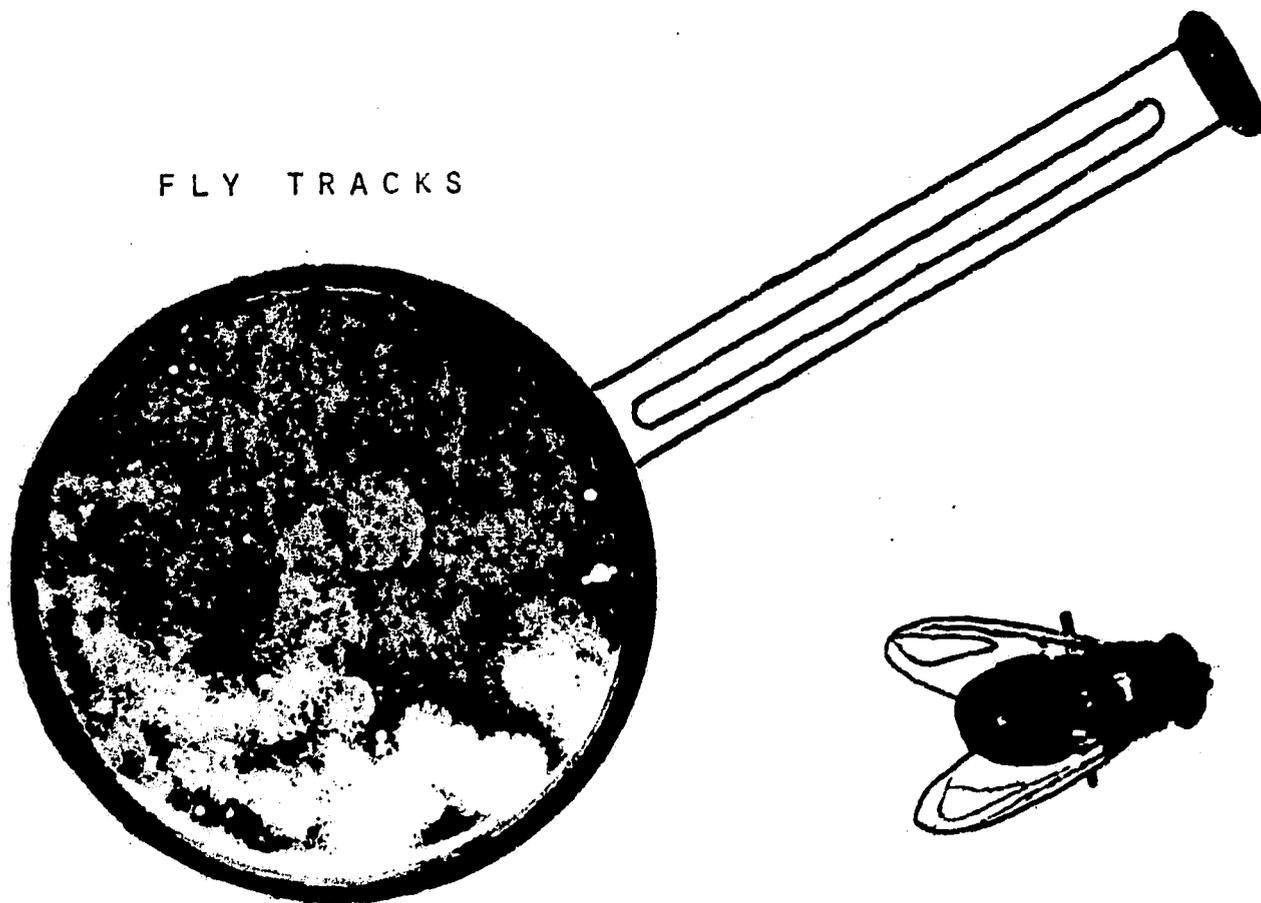

We use flies as an example. We should realize that other insects also spread disease, and they, too, should be kept out of the food plant and the home.

Although filth, fingers, and flies are not the only spreaders of disease, they are perhaps the most important. We should make a conscious effort to prevent the spread of bacteria through filth by way of the fingers or flies. In other words, we should:

- * KEEP FILTH OUT OF FOOD.
- * WASH OUR HANDS FREQUENTLY (ESPECIALLY AFTER USING THE TOILET).
- * KEEP FLIES AND OTHER INSECTS AWAY FROM PLACES WHERE FOOD IS PREPARED.

When these things are done with understanding, we will have a true feeling for Food Plant Sanitation, and we will protect our families and ourselves from disease.

FLY TRACKS

SANITATION AND FOOD SERVICE

THE FOLLOWING RULES AND REGULATIONS GOVERNING FOOD SERVICE ARE BASED ON PROVEN TECHNIQUES OF HANDLING FOOD AND CUSTOMERS ON PRACTICES OF GOOD HEALTH AND SANITATION PROCEDURES.

1. Bathe Daily. One hour before reporting to work. If you have been exposed to any disease or carrier thereof, a bath is one of the best ways to wash away the germs so that you will not pass them on to your customers.

2. Hair.

Women --- short, piled, close tight style must be two inches above the collar. Hair is one of the great conductors of germs and is unsightly in food or plates. The major fall out of hair occurs from the rubbing of the collar or the hair; therefore, it must be up off the collar or from loose hair styles. To protect hair bits from falling, it is required that you wear a hair net or that your hair be held in place by lacquer spray.

Men --- hair should be closely cropped a maximum length of two inches on top to 1/8 inch on side of head and neck areas. Neck hair should be closely trimmed at all times. The same reasons apply as for women. If the above is not followed, use a heavy lacquer spray or net.

Production personnel --- due to heat and high air circulation of food service establishments and the speed at which food service personnel move, it is necessary to observe very closely these rules and regulations, since any hair particles can be carried a great distance by the air movements created by heat waves, circulation, or body movements. These hair particles may land in uncovered food, even on the customers' plates. The hair of all food production personnel should be covered at all times either with a net or head covering.

3. Body Odor And Excessive Perspiration. Use a deodorant under the arms daily. Also, it is a good idea to place deodorant on the inside of the elbows and wrists. Fill shoes with foot powder and powder underarms. In cases of excessive perspiration odor, use baking soda both under arms and where else needed. Control of perspiration is important, since it not only offends your customers but is the carrier of germs and diseases. In cases of continued excessive perspiration, consult your family doctor. Open sores or rash from excessive perspiration disqualifies you from food work.

4. Colds, Illness, Or Exposure To Contagious Disease. If you are ill, have a cold, or have been knowingly exposed to a person with a contagious disease, you are not to work in a food service operation. Remain at home until you are well, or in case of a contagious disease, cleared by your family doctor or local health service.

5. Earrings And Jewelry. These are forbidden in any shape or form.

6. Rings. Only those rings that are solid metal, such as wedding bands and class rings are permitted. All rings with sets should not be worn. Frequently, a ring set, including engagement stones have been knocked out of ring mounts on the fingers of personnel reaching in ice chests, refrigeration boxes, salad

cases, shelves, etc., (particularly dangerous if you are dipping ice cream or stocking).

7. Nails. Nails should be trimmed to 3/8 inch beyond the finger tip. Nails should be filed and cleaned daily. Clean by scrubbing under nail with a brush, using hot water and soap. Nails pulled to the quick so as to bleed or appear raw disqualify you for food service operations. Reasons: Germs hide under nails and are easily transferred to food, dishes, and cooking utensils. Long nails hinder work and constitute both a health and safety hazard as they cannot be cleaned easily and interfere with safe handling procedures on dishes and cooking utensils.

Nail polish --- Only clear nail polish should be worn. One exception to this rule is the use of white or silver nail polish.

8. Uniform And Underclothing. Clean and freshly scented underclothing should be worn daily. The uniform should be clean. Daily washing or change of uniform should be made. Reason: Dirty clothing carries diseases. Washing removes the possibility of carrying diseases to restaurant customers. Also, the appearance and smell of fresh clothing is pleasant to customers, thereby increasing their dining pleasure. You feel and work much better in clean clothes. They give you a lift, thus making your work more pleasant.
9. Smoking. Prohibited except in areas designed as smoking areas. This area must be away from the food production, service, and other customer areas. Normally this area is located near the restrooms. No smoking is permitted elsewhere. Reason: Ashes in food; even if controlled, ashes float through the air and fall into food. Also, your hands touch your lips or smell of tobacco. Always rinse your mouth with mouthwash and wash your hands after smoking.
10. Eating And Drinking. This is done during break periods only. No sampling allowed. Eating must be done away from food preparation areas or customer areas in designated employee eating area. (In certain restaurants, see your manager; this may be done in the dining area.)
11. Toilet. Always scrub your hands, nails, and arms to the elbow before returning to work. Human refuse is one of the most contagious of disease carriers. Since your hands, nails, and lower arms may come in contact with germs, always scrub after visiting the restroom area.
12. Telephone. Wash hands after using a public telephone.
13. Handling Money. Avoid contact between food servers and money. Money is badly contaminated.
14. Breath And Teeth. Brush teeth after eating (never less than twice daily). Have teeth checked by dentist twice yearly (if you smoke, cleaned and checked three times a year). Have all cavities filled at once or teeth replaced; appearance alone should cause this to be done. **Bad or strong breath** is offensive to customers. Rinse mouth frequently with antiseptic.
15. Clean Tables And Counter Tops. Always use a clean damp cloth to clean tables, counter tops, and chairs. No excess water, streaks, or damp surface should remain after use.

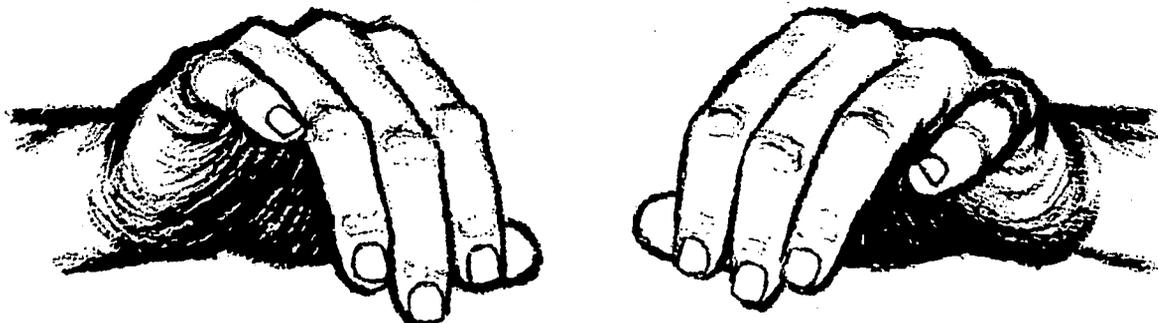

16. Use Of Service Cloths. When service cloths (arm towels) are used, make sure they are carried on the forearms at all times. Do not place service cloths on shoulders or underarms.
17. Menus. Menus are to be carried in the hands or between the body and the elbow. Do not place menus under the arm pit.
18. Handling Dishes And Utensils. Always stack dishes, trays, and utensils after checking that both sides are clean and dry. Avoid touching eating surfaces at all times. Handle silverware by their handles and dishes by the bottom and rims. Do not touch moist and cooked food with your hands. Return all soiled dishes, silverware, and linen promptly to the sanitation (or dish-washing) department. Before returning to cleaned areas after removing refuse, wash hands thoroughly.
19. Other Personal Habits. The following personal habits are to be avoided:
 - Coughing or sneezing --- If this occurs, cover mouth or nose with handkerchief or paper.
 - Do not touch face, hair, or pick at skin blemishes with hands. If you do, go wash your hands.
 - Do not chew gum.
 - Use a cloth or paper to pick up fallen objects from the floor.
 - Do not comb hair or apply make-up while in view of any customer.

KEEP IT CLEAN, PLEASE . . . FOR A SAFER AND MORE PLEASANT PLACE TO WORK !

SIX BASIC FACTS ABOUT BACTERIA

1. Bacteria are alive. They take in food and give off wastes just like our own bodies.
2. Bacteria are everywhere. They need food, moisture, light, and a warm temperature to live.
3. All bacteria are not harmful but most are.
4. Twenty-five catching diseases can enter the body through improper food handling.
5. A person infected with a disease germ can infect food, which in turn can carry the germ to anyone who eats the food.
6. Germs in food cause two kinds of sickness.
 - A. Some germs feed upon the body---they multiply faster than the body can fight them. Typhoid fever, diphtheria, tuberculosis are some of the diseases caused by this type of germ.
 - B. Some germs live on food. They change the food ---poison it with chemicals and wastes. We say the food is spoiled.

YOUR CUSTOMER'S
HEALTH
(YOURS TOO!)

IS IN YOUR
HANDS

1. Avoid touching the hair or face when on duty. If it is necessary to do so, wash hand before returning to work.
2. Always wash hands before leaving the restroom and after smoking.
3. Always hold glasses by the base and cups by the handles --- never by the rims.
4. Carefully remove all used dishes and silverware from the dining area to prevent their being reused before they are washed.
5. Handle silverware by the handles; do not touch fork tines, knife blades, or spoon bowls.
6. Do not serve food that has fallen on the floor.
7. Do not use silverware that has fallen on the floor.
8. Handle moist food with a fork or spoon, never with your fingers.
9. Wipe the tops of milk containers with a clean cloth after removing the cap.
10. Never carry a side towel over your shoulder or under your arm.
11. Keep serving trays wiped clean on the edges, top, and bottom so that they will not soil uniforms, dishes, or tablecloths.

HANDLING DISHES AND UTENSILS

1. Do not carry more than one item of china, silver, glass in each hand. If more than one item is carried, use a tray, plate, or napkin shield. This will insure that your hands, fingers, or the sides of plates or utensils do not touch food, or the rims of other plates or glasses.
2. When setting tables, place silver on clean tray or plate to carry to table or from kitchen to side stand.
3. Be sure all dishes are clean, both sides, before stacking.
4. Separate layers of glasses and cups with trays or toweling.
5. Inspect all silver before placing in side stand. Wipe with a clean, dry cloth for dust. Send all stained or dirty silver, glass, or dishes to dishwashing department for rewashing.
6. Handle all dishes by placing four fingers of the hand under the plate, open and spread with the thumb resting, as a guide, on the side rim. Do not place thumb over the top edge of plate.
7. Inspect all silverware, glassware, and china before serving. Do not place food or beverage in any discolored, chipped, pitted, or cracked glassware or china or serve same to a customer. Do not use or serve bent, pitted, soiled or tarnished silverware.
8. Handle all silverware by the handles. Do not touch the tines, bowls, or blades of any silverware.
9. Handle all glassware by their base or stems both clean and soiled. Remove soiled glassware the same as in serving. Never place fingers inside of glasses.
10. Never remove cup or glass from table to refill. If glass or cup is removed from the table for refill, serve in a fresh and clean cup or glass.
11. Handle all foods with forks, knives, or spoon, or other serving utensils. Do not touch moist or cooked foods with your hands.
12. Inspect all foods for foreign matter or dirt before serving. Although not part of sanitation, each plate should be checked by food service personnel for display appearance. Remember: 90% of food taste comes from appearance.
13. Return all soiled dishes, silverware, and linen promptly to the sanitation (dishwashing) department. Do not leave on trays or in dish pans in the service area except for a minimum time. Cover all soiled ware with cover, linen, or paper while in service area. Not only does this prevent the spread of disease but removes unsightly objects from customers' view.
14. Sort, store scrap, or soak soiled ware according to policies of your establishment.
15. Emptying and refilling sugar containers: The sugar container should be emptied, washed, and thoroughly dried as often as necessary to keep it spotlessly clean.

If the sugar container is an open type, care should be taken to keep the sugar free from lumps and foreign material. If shaker type containers are used, the screw top should be securely fastened and the spout examined to see that it is clean and that the sugar flows freely. The supply of sugar in the container should be checked before each meal. If sugar packs are used, be sure the container or holder is filled and cleaned.

16. Filling salt and pepper shakers: Same as above. A piece of wire or tooth pick may be used to unclog the holes in the lids before they are washed.
17. Filling syrup jugs: Syrup should always be poured into clean pitchers. Do not refill. The outside of the pitchers should be wiped carefully with a damp cloth after filling, to remove any stickiness.
18. Cleaning condiment bottles: The outside of condiment bottles should be wiped with a damp cloth. The tops and insides of the caps may be wiped first with a paper napkin to clean off gummy material and then with a clean cloth. Mustard pots and condiment jars should be emptied and washed weekly. Clean paddles should be provided for the mustard pots.
19. Folding napkins: Napkins should be folded carefully according to the instructions of the house. The folds should be straight and the edges meet evenly.
20. Arranging menus: The appropriate menu for the meal should be used and special lists and slips properly attached. Soiled and torn folders should be replaced with new ones.
21. Arranging flowers: When arranging fresh flowers, select containers that are appropriate in color, size, and material for the type of flowers. Arrange the flowers in each vase attractively without overcrowding them.
22. Filling individual creamers: The creamers should be washed and thoroughly cooled before being filled. Never refill a warm creamer. Care should be taken not to fill the creamers to overflowing.
23. Cleaning ash trays: Ash trays should be collected and washed before reuse. A small brush may be used to clean caked ashes from the crevices. Ash trays should always be washed separately from other dishes so that there is no danger of the ashes adhering to them. A clean ash tray should be provided each time guests are seated and emptied as often as necessary.
24. Cleaning serving trays: The edges and bottoms of serving trays should be kept clean and dry to protect the uniform and the serving table's surface. The top should be wiped clean before loading so that the bottoms of the dishes will not be soiled. Trays should be scrubbed daily with soap and water.
25. Preparing ice: Ice cubes and cracked ice should not be used in beverages and drinking water unless they are clean and free from foreign matter. Ice cubes should be handled with tongs, and cracked ice with a scoop provided for the purpose.
26. Dusting chairs: Crumbs should be dusted from chair seats after each guest has finished eating and before another guest is seated. Backs and legs of chairs should be carefully dusted.

HANDLE WITH CARE

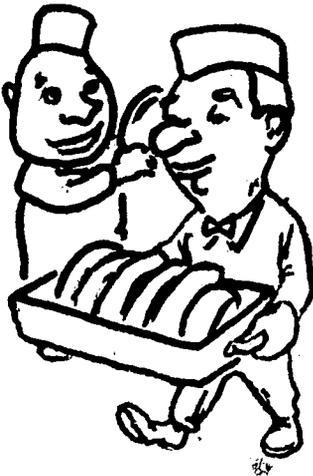

Your hands are never free from germs. It is important, then, that ready-to-eat foods and the food contact surfaces of dishes and utensils not be handled. Even if you think your hands are clean ---they aren't really! Heed these hints and HANDLE WITH CARE!!

1. ALWAYS GRIP SILVERWARE BY HANDLES.
2. FOR BUTTER---FORK PRINTS, NOT FINGERPRINTS.
3. NEVER HANDLE A GLASS BY THE RIM.
4. STACKING CUPS IS BAD FOR THE ONES UNDERNEATH.

IT WORKS BOTH WAYS

Did you know you, too, could be made ill from handling soiled dishes? Glasses, dishes, silverware and napkins which have been soiled by a customer can be dangerous to you. When cleaning the table or counter, take the same precaution you used to place the utensils there. Avoid touching the food contact surfaces!

STANDARDS FOR CLEANLINESS

If a restaurant is to have a reputation for being a clean place in which to eat, each worker must share responsibility for upholding high standards of cleanliness. The salesperson can assist in this program by:

1. Attending to personal cleanliness. A clean person clad in a clean uniform and ready to work with clean hands makes a favorable impression on customers.
2. Maintaining a clean serving station.
3. Using clean methods of work.

Cleanliness in one's work requires not only a knowledge of what to do, but constant care in doing it. To insure clean methods of work:

1. Avoid touching the hair or face when on duty; wash hands before handling food or dishes.
2. Avoid using a handkerchief in the dining room unless it is necessary. After doing so, wash hands immediately.
3. Wash hands carefully before leaving the washroom.
4. Avoid extending fingers over the rims of plates. Never touch the food.
5. Avoid handling cups and glasses by the rims.
6. Always hold glasses by the bases and cups by the handles.
7. Carefully remove all used dishes and silverware to prevent their being reused before they are washed.
8. Handle silverware by the handles and do not touch fork tines, knife blades, or spoon bowls with the fingers.
9. Do not serve food which has fallen from a plate.
10. Do not use silverware or napkins which have dropped to the floor.
11. Handle moist food with a fork or spoon, never with the fingers.
12. Be sure that the bottoms of plates are wiped clean before they are set on the table. Do this at the serving stand, not in front of the guest.
13. Wipe the tops of milk bottles with a clean cloth before removing the caps.
14. Never carry a side towel over the shoulder or under the arm.
15. Keep serving trays wiped clean on edges, top, and bottom to avoid soiling the uniform, the dishes, or the table cloth.

16. Use a clean cloth when wiping spots of food from dishes.

After using special pieces of equipment, such as the juice extractor or the malted milk mixer, dismantle, scrub, and reassemble correctly:

1. Rinse ice cream dippers and pat dry before reusing, so that the colors and flavors of the ice cream are not impaired.
2. Use clean individual spoons for dishing foods, to avoid blending flavors.
3. Remove silver spoons from bowls of mayonnaise, chopped eggs, catsup, and other dressings and relishes before putting them away.
4. Wipe the outside and rims of condiment jars and the mouths of pitchers before replacing them in the ice box.
5. Return covers to jars, and screw caps on straight.

Table Service For Typical Restaurants.</p>
<p>TABLE SERVICE</p>	
<p>A. Table Service Varies From Operation To Operation. There are two conditions that never vary.</p> <ol style="list-style-type: none"> 1. Each food service unit must follow the method appropriate to its particular conditions. 2. Each sales hostess must learn to follow the serving directions exactly, so that service will be uniform. <p>B. Order Of Picking Up. So that hot foods reach the customer hot, and cold foods reach him cold, the sales hostess follows a strict sequence of pick-up. While a great deal depends on the kitchen layout, some general rules do apply.</p> <ol style="list-style-type: none"> 1. The waiter collects all the serving equipment that he needs.

Cold foods are picked up next and placed on the tray away from where hot foods will go. 3. Hot foods are picked up last and, if possible, covered. 4. Hot plates and cold plates are picked up. <p>C. Basic Rules Of Table Service.</p> <ol style="list-style-type: none"> 1. Serve all food from the left of the guest, except when special circumstances (a wall or pillar) make this inconvenient for the guest. 2. Serve all beverages from the guest's right. Do not lift glasses from the table but slide them toward the edge when necessary. Fill water glasses two-thirds full. 3. Clear from the right. This is the practice in most operations, but some excellent restaurants clear from the left. The whole crew must use the same side---either left or right---but not both. 4. Do not stack plates in front of the guest; move behind him, slightly out of his sight. Never leave a guest's place bare---one course follows another. 5. When replacing one course with another, remove from the guest's right with the right hand, and replace with the next course from the left with your left hand.

<p>6. Serve hot foods hot, cold foods cold.</p> <p>7. Serve everyone in the party the same course at the same time.</p> <p>8. Crumbs, bread, and side dish plates should always be removed before the dessert is brought. Crumbs are picked up with a crumber or brushed away to the edge of the table onto a 9" dinner plate.</p> <p>9. Fill water and beverage glasses, replace cutlery, clear away side dishes, bring bread, empty ash-trays---before being asked.</p>	<p>Place the food with eye appeal. Don't put all of the brown together and all the green together---break up the monotony with a varied distribution.</p>
<p>D. Extra Side Dish Placement.</p>	<p>Example: alternate green salad, then brown potatoes, then green vegetables, and finally brown beverage.</p>
	<p>Put diagram on the board:</p>

Serve with the hand away from the guest so you don't cut across the front of your guest. 3. To serve someone on the opposite side of the table, place the other side of your hip against the edge of the booth and use the hand farthest from the guest. 4. In serving a booth of four--- first carry two plates to the table. Secondly serve the farthest guest first. Thirdly, transfer the second plate to your other hand. Serve the second plate with your hand farthest from the guest. 5. In clearing, use the same method. This allows you to be more graceful and permits gracious serving without danger of knocking over glasses because of flying elbows and hands. 6. Before serving each new course, remove the dishes from the previous course. Before removing any dishes, however, ask the guest if he is finished. 7. When dessert time comes, serve the dessert and then let your guests finish eating. Stay close by and watch for signs that they want their check: <ol style="list-style-type: none"> a. TECHNIQUES IN TRAY HANDLING

There are certain techniques that you can use in loading your trays that will add to both your efficiency and your safety.

- A. Place heavier plates in center, lighter pieces toward edges.
 - B. Do not place cups on saucers.
 - C. Do not allow hot dishes to touch cold ones.
 - D. Do not fill tea and coffee pots so full that liquid will leak from the spouts.
 - E. Turn pot spouts in, and away from plates of food so that they will not spill in the food.
 - F. Load the tray for balance so that the items will not slip or spill. Be sure that the tray is clean.
- G. Before leaving the serving section, you should check to see that:

| 1. The order is correct. | 5. The order is properly garnished. |
| 2. The order is complete. | 6. The order is attractively served. |
| 3. The food is properly cooked. | 7. There is no spilled food on edges of dishes. |
| 4. The right quantity has been served. | |
- H. Lift the right way. Lift with your legs, not with the muscles of your back.
 - I. Carry the tray shoulder high, not at waist level. This eliminates the possibility of running the tray into a seated guest. Carrying the tray in this position forces the thighs, legs, shoulders, and arms, rather than the back, to carry the weight. Also, the shoulder can be used to help carry the load if the tray is heavy.

Carry him through the rest of the order, offering at least two choices of potato, salad, and beverage.</p> <p>3. Don't forget to suggest an appetizer---the guest almost always forgets to order one.</p> <p>4. Read his order back to him after he gives each item.</p>	<p>The main object is not to push off on the customer something which he won't enjoy...because then he won't come back. We want the most satisfied guest leaving the restaurant, not an over-stuffed, suffering, miserable creature running for the bicarbonate of soda.</p> <p>If your guest hasn't ordered by the count of seven, you have what I will call the "confused guest". Many restaurants have menus that are long and complicated for the guest to be able to choose one selection quickly. He may not be confused...he may be only undecided. Sometimes there are so many items on the menu that he likes that he just can't decide which of them he would like. Often if a sales hostess suggests one of them his mind is clearer and he can decide on a selection.</p> <p>Since the guest has probably read at least the first few selections, if you suggest the first one he will remember it, and thus being familiar with it---possibly order it. It's psychological.</p> <p>If he orders an item other than the one you suggest, don't take it as a failure. Your only reason for suggesting is to aid the guest in making up his mind and this you did.</p> <p>Your tip is based on a percentage of the total check. If you sell a \$1.25 shrimp cocktail, the tip for it would be near 25¢. Is it worth a quarter to ask a simple question?</p> <p><u>Example:</u> GUEST: "I'll have the prime rib."</p>

S U C C E S S A N O N Y M O U S

If you think that you are beaten, then you are.

 If you think that you dare not, then you don't.

If you like to win, but think you can't,

 It's almost a cinch that you won't.

If you think you'll lose, you've already lost.

 For out in the world we find

That success begins with a fellow's will---

 It's all in the state of his mind.

If you think you're outclassed, then you are.

 You must think success if you're going to rise.

You've got to be really sure of yourself

 Before you can ever win a prize.

Remember this: life's battles don't always go

 To the stronger or to the faster man.

But sooner or later, the man who wins

 Is the one who really thinks and shows that he can.

HOW TO TAKE THE ORDER AND WRITE THE CHECK

After giving the guest an opportunity to look over the menu, the waitress should do the following (In many restaurants the management will give instructions as to how to approach the guest, take the order, and write the check):

- * Approach the table to the left of the guest.
- * Make appropriate remarks: "May I take your order?" -- "Are you ready to order?" -- "Would you like to order?"
- * Stand erect, never leaning over with the guest check pad on the table.
- * Write legibly so the cook can read the order easily.
- * Use accepted abbreviations known by the kitchen staff.
- * Get all necessary information from the guest to serve food as he wishes it (for example: toast--battered or plain; steaks--rare, medium rare, medium, well done).
- * Charge correct prices.
- * Add check correctly. Don't forget to add tax.
- * Fill in the top of the check accurately.
- * Account for all checks issued to you.

As to the actual method of taking the order, the most common is to select a starting point and proceed around the table clockwise. If a guest is not ready to order when it comes his or her turn, skip a check by turning it back, and then when he or she is ready to order turn the skipped check back down. Write the order so your checks remain in numerical order around the table as you have taken them. If in the kitchen the checks have gotten disordered, all the waitress need do is to restore guest checks into numerical order with the smallest number being the check (and food) belonging to the guest who's order was taken first.

Consult management on taking ladies' orders first or taking orders clockwise.

Always read the order back to the guest to assure each of you the order is written correctly.

The dessert order is taken after the table is cleared of the main course (water glass and coffee cup remaining). The same procedure is followed, but it is better for the waitress to politely tell the guests what desserts are offered than to return the menus for their selections.

BREAKFAST SERVICE

1. Place a glass of ice water above the tip of the knife.
2. When a fresh fruit or fruit juice is ordered, you'll serve it first and then remove the soiled dishes before placing the toast and coffee.
3. Sometimes customers will order a combination of fruit, toast, and coffee and will ask that you bring the whole order at once. In the event that this happens:
 - A. Place fruit on an underliner in the center of the cover.
 - B. Place the plate of toast at the left of the fork.
 - C. Place the coffee at the right of the teaspoon.
4. If your guest's order includes a cereal and a hot dish, you'll serve it this way:
 - A. Place the fruit course in the center of the cover.
 - B. Remove the fruit service.
 - C. Place the cereal bowl set on an underliner in the center of the cover. (Have individual boxes of cereal cut part way through the side near the top so the guest may open it easily.)
 - D. Remove the cereal service.
 - E. Place the breakfast plate of eggs, meat, or other hot food in the center of the cover. Place the plate of toast at the left of the fork. Place the coffee service at the right of the spoon.
 - F. Remove the breakfast plate and the bread plate.
 - G. Place a wet nap above and slightly to the right of the fork.
 - H. Place the sales check face down at the right of the cover presented on a clean change tray.

TYPICAL LUNCH SERVICE

1. Place a glass filled with ice water above the tip of the knife.
2. Place chilled butter on a chilled bread-and-butter plate.
3. Place the appetizer in the center of the cover.
4. Remove the appetizer when the guest is finished.
5. Place the entree plate in the center of the cover.
6. Place individual vegetable dishes, if used, above the cover.
7. If salad is served with the main course, place it to the left of the fork about two inches from the edge of the cloth.
8. Place tray or basket of bread and rolls above the salad plate.
9. Place the hot beverage to the right of the spoon in the position noted under Table Settings; place individual creamer to the right and slightly toward the bottom of the cover.
10. Place an iced beverage or milk at the right and a little below the water glass.
11. Remove the main course dishes.
12. Remove any extra silver not used in the main course.
13. Crumb the table.
14. Place the utensils that will be used for dessert on the table to the right of the cover.
15. Place dessert service in the center of the cover.
16. Refill hot beverages.
17. Remove dessert dishes and silver.
18. Place a wet nap above and slightly to the right of the tip of the fork.
19. Present the check face down.

ORDER OF SERVICE FOR DINNER

1. Place a glass filled with ice water above the tip of the knife.
2. Place the appetizer in the center of the cover.
3. Remove the first course dishes.
4. Place the soup service in the center of the cover.
5. Remove the soup service.
6. When entree is served on a platter, you'll place it directly above the cover and lay the serving silverware at the right of the plate. Place the warm dinner plate in the center of the cover.
7. Usually you'll place a plate of food in the center of the cover---the main course.
8. If the salad is served with the main course, place it to the left of the forks.
9. Place hot beverage to the right of the teaspoon.
10. Place rolls to the left of the salad plate.
11. When the salad is served as a separate course preceding the main course, place the salad fork to the left and the salad plate in the center of the cover.
12. Remove main course dishes when the guest is finished.
13. Crumb the table if necessary.
14. Place the needed silverware for dessert.
15. Place the dessert service in the center of the cover.
16. Refill coffee cups.
17. Place a wet nap above the forks and slightly to the right of the forks.

DO draw him a VERBAL PICTURE. Phrases you can use are:

"Fresh from our oven" - "Cool, refreshing" -

"Taste-tempting delight" - "I've just served a piece of _____ at another table and it looked DELICIOUS."

"Succulent piece of _____ drenched in _____ sauce."

USE YOUR OWN IMAGINATION FOR MORE "PICTURE WORDS" !!

DO offer a CHOICE.

Lead him to choose between two or more items---not between one item and nothing. For example:

"Would you like tart apple pie fresh from our oven or some cool, refreshing mint sherbet?"

CHILDREN

1. BIBS
2. HIGH-CHAIRS
3. JUNIOR-CHAIRS
4. TREATS
5. CRACKERS
6. NEVER TAKE ANY FOOD TO PARENTS
WITHOUT TAKING SOMETHING FOR THE
CHILDREN.
7. NO BEVERAGE 'TIL MOMMA SAYS SO!!
8. CHILDREN'S MENU!!
9. WET NAPS
10. IF CHILD IS HIGH-CHAIR SIZE ---
PUT FOOD ON ONE PLATE.

ADDING THE GUEST CHECK

How long will it take? How many times will he add it? Will he make erasures? Will it be correct? What impression does this make upon the patron?

THE FOOD LEAVES THE KITCHEN

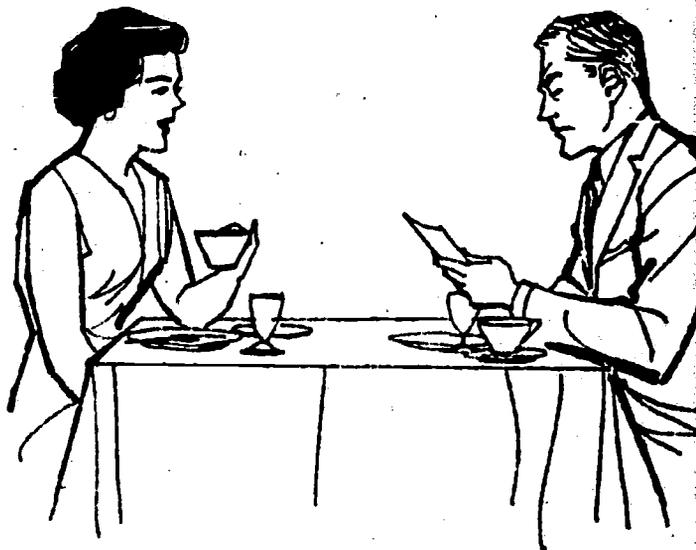

There it goes---your merchandise. The food is served---a guest check is written ---for HOW MUCH? Did you charge for a steak or a hamburger?

Thank You!
YOUR PATRONAGE IS APPRECIATED

POORLY WRITTEN FIGURES

What are the items? What are the prices? Are the amounts easy to add? Are errors invited? Losses are ever present because of poorly written figures.

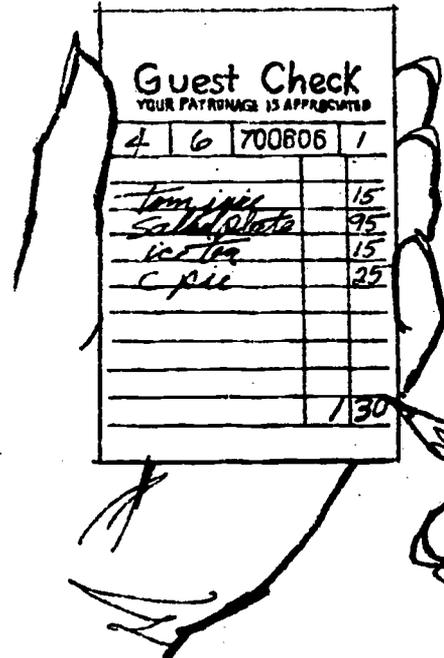

DO YOUR GUESTS GUESS?

When guest checks are difficult to read---almost impossible to add---what is the guest's reaction? Will he pay and be **101**ful? Will he return?

WAITING FOR THE GUEST CHECK

Ready to leave but NO CHECK. How long will they wait? How impatient will they get? Are other customers waiting to be seated? How long will they wait?

MISTAKES IN ADDITION

Is the total correct? Will the check be re-added? When busy---one addition is usually final. This mistake cost you 20¢---more than 10% of the total amount.

THE "LINE UP" TO PAY

Not pleasant for customers---not profitable for you. Time is limited for some customers. Will they be "late" returning to work? They may never return to your establishment.

FORGOT TO PAY CHECK

Maybe he will pay tomorrow if he remembers. Or, although unintentional, he may make a practice of it. How much are walkouts cost you?

POOR SERVICE

How long will the patron wait for service? Will she get up and leave? How long will the waitresses chat? What are you doing to improve service?

FORGOTTEN ITEM

No charge for orange juice. Was it intentional to influence a larger tip? Was it an oversight? Regardless---you lost on the sale.

IS EXTRA COFFEE FREE?

If so, the waitress is attentive. If not, she is generous with your merchandise. Maybe she serves dessert free! Bigger tips mean bigger "take home" pay for her---not you.

SHORT AGAIN!

Who's to blame? Was it a mistake in change? Forgotten paid out record? Out of balance means out of control of your business.
