PRESENTED IN THE ANNOTATED BIBLIOGRAPHY ARE 123 PRINT AND NONPRINT REFERENCES (1962 TO 1975) WHICH DOCUMENT INNOVATING EFFORTS FOR REINTEGRATING MENTALLY RETARDED PEOPLE INTO THE COMMUNITY. IT IS EXPLAINED THAT THE REFERENCES HAVE BEEN COMPILED FROM MAIL SURVEYS, COMPUTER SEARCHES OF NATIONAL INFORMATION SYSTEMS, LIBRARY HANDSEARCHES AND A TELEPHONE SURVEY OF DEVELOPMENTAL DISABILITIES CONSULTANTS. ENTRIES ARE LISTED ALPHABETICALLY BY TITLE AND USUALLY CONTAIN AUTHOR'S NAME, PUBLICATION DATE, PAGINATION AND AVAILABILITY INFORMATION, AND A BRIEF SUMMARY. PRINT MATERIAL INCLUDES JOURNAL ARTICLES, BOOKS, BOOKLETS, PROJECT REPORTS, CONFERENCE REPORTS AND MONOGRAPHS. PROVIDED IN THE NONPRINT MATERIAL IS INFORMATION ON FILMS AND SLIDESHOWS. (CL)

This bibliography contains 123 annotated references which document innovative efforts enabling mentally retarded individuals to move out of institutional settings. It is a special kind of bibliography designed for use by training personnel, planners, and administrators who are involved in community reintegration programs.

The document is organized into two major parts: Section I, Print Inclusions, references journal articles, books, booklets, project reports, conference reports, and monographs. Each entry is alphabetized by title, followed by author, media (e.g., article), date, and page length. The content of the inclusion is then described in a concise annotation and the reader is directed to one or two sources from which it is available. (Cost information is not shown.) If availability is said to be the Educational Resources Information Center, it is either in microfiche or hardcopy; the acquisition number which is provided should be used when ordering. In some cases, however, an inclusion such as an article may be available in a local library.

Section II, Nonprint Inclusions, contains information on films and slideshows. It is also alphabetized by title, followed by media (e.g., film, 16 mm, color), length, and year. The annotations describe the focus of the material and the reader is directed to sources of availability. Usually, the material is available on a free loan, rental, or purchase basis.

The careful reader will not find frequent reference here to esoteric research. What will be found are descriptions of informational and training materials which may prove useful in communicating with the varied audiences whom planners, trainers, and administrators reach. These audiences range from the local Lion’s Club to the local politician, and also include parents, consumer groups, students, state agency personnel, and other professionals.

The value of this document as a source of propaganda, however, is not its greatest utility.
No bibliography of this type is comprehensive. We have certainly overlooked some materials which could have been included and we have probably included some items which other compilers would choose to delete. One thing, however, is certain. There is today a fast growing body of practical literature documenting efforts to reintegrate mentally retarded people into community settings. More than one-half of the print and audiovisual citations included herein were published during the preceding 28-month period between January 1973 and May 1975. Until the limited supply runs out, single copies of this bibliography will be available at no charge through The Council for Exceptional Children.

Requests should be addressed to CEC Publications, 1920 Association Drive, Reston, Va. 22090.

August, 1975

David L. Braddock, Ph.D., Director
Program for the Analysis of
Deinstitutionalization Resources

Given are suggestions for planning and developing a group home for mentally retarded adults. It is proposed that group homes be operated by two types of agents: governmental and private non-profit boards. Criteria for funding these agents and utilization of appropriated funds are explored.

Write to: Albemarle Building
department of Human Resources
Division of Mental Health Services
325 North Salisbury Street
Raleigh, NC 27611

Described is an agency operated group home with houseparents or counselors who care for four to twelve adolescent children. Reasons for implementing the programs, defining and differentiating the home, admission requirements, and selecting criteria for children are covered. Information is given on referral sources, diagnosis, planning, and treatment, program and group life and staff qualifications; the location of homes and neighborhood resources available; the decision to rent, buy, or build; group home costs; licensing; values and limitations of the program; and implications for agency and community development.

Write to: Superintendent of Documents
U. S. Government Printing Office
Washington, DC 20402

Presented are four papers on the application of architectural principles to the planning of facilities for mentally retarded children and adults. Earl Grunewald stresses the need for integration of the retarded by means of the normalization principle. Types of facilities discussed include residential facilities for adults, residential facilities for children, and facilities for community activities. Anna Gunzburg examines architecture for social rehabilitation and the relationships of architecture to the sensory experiences of the mentally subnormal child. Kenneth Bayes recognizes the need for solitude, intimacy, and socialization experiences. Noted are innovative programs in Japan, Denmark, and Nebraska.

Write to: International League of Societies for the Mentally Handicapped
Rue Forestiere, 12, B-1050
Brussels, Belgium

Described are European and American architectural designs for "mini" institutions, e.g., cottages within the institutional setting. The final section describes one architect's group home and halfway house concept. Single residences, scattered throughout the community, housing mentally retarded persons in groups of 20 or less in single or two-person bedrooms. The halfway houses stress training persons with institutional backgrounds or overprotective home environments to become self-reliant. Staff training and counseling sessions are also discussed.

Write to: National Association for Retarded Citizens
2709 Avenue E, East
Arlington, TX 76011

Public residential facilities for the mentally retarded in the United States are discussed, including personal reactions by an American and
Scandinavian visitor; history of the U. S. institutions and their theoretical constructs; service concepts; the normalization theoretical construct of Scandinavia; continuum of services; and small, special service residential facilities. Four model service programs are treated. Considered are the importance of residential facilities as human service settings; a human service system based on a cost-benefit rationale; and a translation of theoretical notions into judging their feasibility and priority.

Write to: Educational Resources Information Center
P. O. Box 190
Arlington, VA 22210
Acquisition number: ED030228

Discussed are the rights of mentally retarded children, particularly the right to normalization, defined as living in a manner as like as possible to that in which other members of society live, in contrast to the organizational patterns of institutions. One of the organizational patterns which is said to obstruct normalization of choices is that the range of choices decreases as rigidity of structure increases. Recommended is a free enterprise system to localize and individualize human services.

Write to: George Peabody College for Teachers
Nashville, TN 37203

Discussed are group homes for adult retardates working in the community; the functioning concepts of small, dispersed, residences; some guidelines for group living; and the rationale that group homes are part of the continuum of services for the retarded. A report of the first year of a group home is also included.

Write to: American Association of Mental Deficiency
5201 Connecticut Avenue, N.W.
Washington, DC 20015

Discussed in terms of instrumental and expressive functions are citizen advocacy programs for mentally or physically handicapped children and adults. Major types of prevailing protective services (guardianship, adoptive parenthood, conservatorship, and trusts) are described and critiques given. Advocacy functions required by handicapped children and adults are compared. Variations of advocacy such as group advocacy, generic advocacy, and crisis advocacy are proposed. A citizen advocacy office at community and state levels is suggested. Noted are existing programs in Nebraska and Washington.

Write to: Superintendent of Documents
U. S. Government Printing Office
Washington, DC 20402

Education Resources Information Center
P. O. Box 190
Arlington, VA 22210

Acquisition number: ED077169

Described is a program initiated by the social work staff of a hospital mental retardation unit which involved locating and screening citizen advocates to serve as friend, big brother, social worker, and legal counselor to retarded patients. The example of a 31-year-old retarded man who had spent most of his life in government institutions is adduced to show the effect of citizen advocacy on community adjustment. Publicity build-up that preceded initiation of the program is discussed.

Write to: Mental Health Division
Department of National Health
Ottawa 3, Canada

This resource guide and checklist for writing grants and planning community residences covers such areas as city ordinances; insurance; zoning, fire, and safety codes; household furnishings;
individual training programs, community volunteers; transportation alternatives, and couples as houseparents. Summarized are steps to take in implementing training hostels, group homes, apartments, etc. Other features include: the need for sex education for residents; a sample program evaluation scale; vocational training for residents; and common pitfalls in community living arrangements.

Write to: Charles C Thomas, Publisher
301-327 East Lawrence Avenue
Springfield, IL 62717

This report deals with Minnesota’s implementation of deinstitutionalization; considers the major steps and decisions in the process of deinstitutionalization; and creates guidelines to be used. The steps include making a Global Assessment of the basic residential needs of the developmentally disabled individuals throughout the state; postulating Residential Needs, using these data; evaluating skills through Program Needs Assessment; and drawing up a Program Plan to evaluate the suitability of possible residences for each individual.

Write to: Minnesota State Planning Agency
Developmental Disabilities Program
550 Cedar Street
St. Paul, MN 55102

Presented is a bibliography on community based residential services for the mentally retarded. Thirty-eight references are included.

Write to: Library
National Association for Retarded Citizens
2709 Avenue E, East
Arlington, TX 76011

Discussed are the community placement idea, historical development, practical guidelines for success, advantages of community placement, program planning, the parents of the mentally retarded individual and the individual himself, and agency role. Considered are the recruitment, selection, recognition, and training of community care providers. Noted also are attempts to predict successful placement, identify problem areas for retardates, and use developmental plans. Appended are a training program outline for care providers, a sample developmental plan and recruitment materials, two California legislative bills, and a patient evaluation scale.

Write to: Charles C Thomas, Publisher
301 East Lawrence Avenue
Springfield, IL 62717

A rehabilitation and habilitation program for institutionalized mentally handicapped patients is described. History, philosophy, and goals are presented. Procedures for the selection and preparation of candidates are provided, as well as information about specific programs providing training and experience. The appendices include program outline, rehabilitation evaluation summary form, vocational training summary form, vocational psychograph-female, and job performance and training progress rating scale.

Write to: Pennsylvania Psychiatric Quarterly
Second and Chestnut Streets
Harrisburg, PA 17011

Education of institutionalized mentally handicapped adolescent males in adulthood is explained; program curriculum and evaluation by attendants is reviewed. Course content is outlined in the following areas: grooming for males, social hygiene and sex education, communications and transportation, the individual and the law, current events, bicycle training, dating, constructive use of leisure time, money management, and the world of work. The population involved and final examination results are also described.

Write to: Austin State School
P. O. Box 1269
Austin, TX 78767
Community Programs for Mentally Retarded People in Massachusetts. Massachusetts Department of Mental Health, Division of Mental Retardation. Information Packet: 1975.

Described are community programs developed by the state of Massachusetts. The information could be adapted by other states. The packet includes "What is a community residence for mentally retarded people?", "Your neighbor—The community residence," "Handbook of services," and "Guide to the employment of mentally retarded people."

Write to: Massachusetts Department of Mental Health
Division of Mental Retardation
190 Portland Street
Boston, MA 02101

Numerous print references directly and indirectly related to community programming for mentally retarded persons are identified and abstracted in this document. Copies of all abstracted items are said to be on file at the Developmental Disabilities Technical Assistance System office.

Write to: Developmental Disabilities Technical Assistance System
625 Cameron Avenue
Chapel Hill, NC 27514

This manual represents two years' research in the area of community efforts to prevent institutionalization and, more importantly, to aid persons in relocating out of institutions and into the community. Topics discussed include finance, zoning, home management, and insurance and liability.

Write to: Northern Virginia Association for Retarded Citizens
105 East Annandale Road, Suite 200A
Falls Church, VA 22046

Described is a community living program serving the mentally retarded in Clay County, Missouri. The integration process, directed toward developing independent living skills, is to be accomplished through a network of small group and training centers.

Write to: Concerned Care, Inc.
206 East 18th Avenue
North Kansas City, MO 64116

The thoughts and actions of the founders of the Central Connecticut Regional Center for mentally retarded children are examined to determine issues central to the creation of settings for community programs. Goals which the program has accomplished are pinpointed for the areas of buildings and beds, community services, staffing, utilization of community talent, target populations, and the utilization of the staff at a university's Psycho-Educational Clinic. Other innovative attempts to expand community responsibility for mentally retarded people are also discussed.

Write to: Syracuse University Press
Box 8
University Station
Syracuse, NY 13210

The article presents recent demonstration projects and discusses six criteria upon which community programming can be planned. The criteria include: a rehabilitation team to help the handicapped adjust to the regular community; employers who use their facilities as part of the work adjustment process, regular reevaluation of progress and capability, flexible expectation level, follow-up studies, and programming which includes recreation and health activities. Adult programming is presented as a cooperative venture.

Write to: American Association on Mental Deficiency
5201 Connecticut Avenue, N. W.
Washington, DC 20015

Described is the ENCOR program which aims at total community integration of all retarded citizens in a five-county region. Besides vocational, residential, and developmental services, ENCOR provides family resource services which include guidance and counseling services, supportive health services, a crisis assistance unit, transportation, and recreation. The vocational training program involves on-the-job evaluation, an individualized training program, and followup. The residential program consists of 13 hostels. Four developmental centers serve nearly 130 children. The ENCOR program has been cost-beneficial.

Write to: The Council for Exceptional Children Information Center 1920 Association Drive Reston, VA 22091

Current Trends in the Pattern of the Delivery of Services to the Mentally Retarded. Segal, R. Article in Mental Retardation, 1971, 9 (6), 44-47.

Reported are contemporary trends culled from a national survey regarding delivery of services to the mentally retarded. Various aspects of institutional care are examined, such as the pattern of current admission and discharge rates, and the length of stay of residents. A general review of community-based residential after-care programs is presented. Recognition is given to the problems still needing attention and to the present gaps in existing community programs.

Write to: American Association on Mental Deficiency 5201 Connecticut Avenue, N. W. Washington, D.C. 20015

This manual describes the curricula for the various components of the Elwyn Adjustment and Training (EAT) Programs, which stress continued functional educational experiences and work training for adolescents and adults. The track organization is explained, as are the criteria for grouping students into academic, behavior adjustment, pretraining, training, pre-vocational, and vocational levels. The aims, curriculum, and some teaching recommendations are presented in outline form.

Write to: Elwyn Institute Baltimore Pike and Elwyn Road Elwyn, PA 19063

Presented is a curriculum to meet the needs of trainable mentally handicapped persons, work orientation curriculum details, work habits and skills, and shop and homemaking programs. Also covered is the community living program returning persons to the community. Appended is information on concurrent work experiences and descriptions of specialized and supporting programs.

Write to: Southern Wisconsin Colony and Training School Union Grove, WI 53182

Acquisition number: ED 025048

This article questions the place of the large institution and considers the possible benefits of day care in either special or general hospitals. The authors assert that expense is not necessarily saved in changing from inpatient to day hospital status, but patients have been observed to gain in dignity and happiness. Hostel care is generally preferred by the mentally subnormal themselves.

Write to: Royal Medico-Psychological Association Chandos House 2 Queen Anne Street London W. 1, England

Deinstitutionalization Bibliography. 1975.

Presented is a bibliography on deinstitutionalization of mentally retarded persons. The document of print references follows a standard bibliographic format and does not contain annotations.

This manual is for developers of group homes, apartment living units, and other residential programs. Contents include: needs assessment, organizational issues, funding and capital requirements, architectural and building site issues, community support issues, individual program planning, personnel and staffing, and licensure and certification. It contains a flow chart of steps to follow, a glossary, and list of abbreviations. While specific to Minnesota, it could be useful as a model for developing similar manuals for other states.

Write to: Ardo Wrobel
Technical Assistance Project
Minnesota Department of Public Welfare
Centennial Building
St. Paul, MN 55155

A diffusion process model for the development of community programs for the mentally retarded is described under the framework of two generalizations: The process by which people accept new ideas is not a unit act but rather a series of complex individual acts, and these acts can be defined as five separate mental processes and five separate stages of individual acceptance of program concepts—awareness, interest, evaluation, trial, and adoption. Individuals pass through these stages at different rates.

Write to: American Association on Mental Deficiency
5201 Connecticut Avenue, N.W.
Washington, DC 20015

Presented are 74 step-by-step procedures for developing residential community-based, family-sized facilities for the retarded. Eight objectives are reviewed: development of an accountable community agency; development of a service program; generalization of community support; procurement of start-up money; obtaining a mortgage if necessary; selection and purchase of a site, with subsequent construction or remodeling; licensing; and staffing. Recommendations for implementing the stated objectives are also included.
Presented are specific suggestions for setting up group homes for young adults. The information is based on personal experiences of people in California.

Write to: Life Skills, Inc. 3803 East Lake Way Redwood City, CA 94062

Described is a detailed testing and evaluation of retarded individuals which allowed faster determination of the patient's suitability for community placement, and subsequently, more rapid return to society.

Write to: American Psychiatric Association 1700 18th Street, N.W. Washington, DC 20009

Described is a hostel in Manhattan for mentally retarded adults. Applicants must require little or no custodial care and be able to hold at least a part-time job or work in sheltered conditions; live under undesirable conditions or be in danger of losing living quarters; and be able to live compatibly with others. Residents have a minimum of supervision. Nominal rent is charged and dental and medical care furnished if needed. The house has overcome initial neighborhood opposition.

Write to: Outdoor Laboratory Southern Illinois University Carbondale, IL 62901

The concept of differentiated foster family care serving normal and handicapped children is examined. Considerations important in the selection and education of foster parents are outlined. Five models of family group homes are presented: the agency-owned family group home, the agency-rented family-owned group home, a group home for low-functioning children, the visiting foster home program, and the medical foster home.

Write to: Child Welfare League of America 67 Irving Place New York, NY 10003

The utilization of parents of retarded sons or daughters as foster parents to other retarded children is described. Advantages are discussed in terms of special skills already acquired by the foster parent and benefits to the family and the foster child. Foster care of this type can be considered as an alternative to institutional care or as a form of crisis intervention for a family temporarily unable to care for its retarded child.

U.S. Department of Health, Education and Welfare
OCD/Children's Bureau P.O. Box 1182 Washington, DC 20402

Examined are some of the anti-institution and pro-normalization statements as they pertain to rehabilitating severe and profoundly retarded persons. A "homestyle" community residence is described and compared to foster home placement. It is suggested that institutions might survive in a desirable way for many years if a new role in partnership with community rehabilitation programs is adopted.

Write to: Canadian Psychological Association 225 Lisgar Street Ottawa 4, Ontario, Canada

Through the programs at the recreation center, former wards of state institutions developed social skills, learned their way around the community, and demonstrated their ability to participate in recreation activities at public recreation and park facilities within the community. The primary goal of the center is to integrate the most severely disabled and mentally retarded persons into community recreation programs.

Write to: American Association of Health, Physical Education, and Recreation
1201 16th Street, N.W.
Washington, DC 20015

Therapeutic Recreation Information Center
Department of Recreation and Parks
University of Oregon
1587 Agate Street
Eugene, OR 97403

Interviews were held with parents or guardians to assess the quality of community life experienced by 120 moderately retarded adults after graduation from school. Recommendations were made for new criteria for evaluation of community adjustment, comprehensive postschool programming to meet recreational and social needs, and occupational and vocational training. Community-based residential facilities can provide such programming as an alternative to the parent-child model and the permanent parent-child relationship which it reinforces.

Write to: The Council for Exceptional Children
Information Center
1920 Association Drive
Reston, VA 22091

Examined is the potential of group homes coordinated by both mental retardation and vocational rehabilitation agencies. Issues covered include the need for a degree of support and supervision in the community for those retarded persons living independently, and the role of vocational rehabilitators in finding as well as helping the retarded person maintain a job.

Write to. Research and Training Center in Mental Retardation
Texas Tech University
P.O. Box 4510
Lubbock, TX 79409

Described is one alternative to institutional living—the group home for the developmentally disabled. This handbook was prepared for group home advocates. Explained is how one coalition of group home operators, planners, and residents shared their daily frustrations, strategies, and successes. The coalition participated in the creation of two group homes, one for children and another for adults.

Write to: Human Policy Press
P.O. Box 127
University Station
Syracuse, NY 13210

Described is a state-developed community based alternative to institutionalization of the retarded. For the past two years, Georgia's institutional services have been evaluated jointly by a local and state association for the retarded. The resulting State Act mandates and funds day training and work centers, community group homes, diagnosis and evaluation centers, and family social services.

Write to: American Association on Mental Deficiency
5201 Connecticut Avenue, N.W.
Washington, DC 20015

Presented are basic guidelines for community residential care. Designed by a community task force and organized by the Wisconsin Department of Mental Health and Social Services, this guide is useful for the development of future standards,
legislation, and planning for community programs and residences for retarded citizens.

Write to:  Wisconsin Department of Health and Social Services
Division of Mental Hygiene
Bureau of Mental Retardation
Madison, WI 53702

Designed as a transitional curriculum to community living, the three guides include such topics as employment, money management, banking, paychecks, income taxes, life insurance, social security, driving a car, finding a place to live, acquiring furniture, and legal and medical emergencies.

Write to:  Elwyn Institute
Elwyn, PA 19063

Presented are guidelines for planning and establishing a small, residential halfway house for the retarded male adolescent/adult. Mental health and use of the halfway house to replace institutionalization are emphasized. The halfway house provides a sheltered social environment in which new roles and behaviors can be tried and developed. Length of residence is typically limited to six months to a year. The overall objective of the halfway house is to assist the client's transition from institution to community life.

Write to:  New Bedford Health Clinic
New Bedford, MA 02740

Educational Resources Information Center
P.O. Box 190
Arlington, VA 22210

Acquisition number: ED065969

The goal of the hospital cottage program is said to be community job placement. Handbooks included are: program explanation, a behavioral scale manual and checklist, staff training materials, and an overview report. A checklist was formulated to aid an employer's evaluation of employees. A Basic Educational Curriculum (ABE) was also developed by the project to prepare retarded persons for community placement and living.

Write to:  Missouri Department of Mental Health
722 Jefferson Street
Jefferson City, MO 65101

Proposed as one alternative to large residential institutions for the mentally retarded is the creation of a community of small homes within an existing community. The objectives are to decrease the dehumanizing effects of large institutions and to lead to increased levels of functioning. Ideally, these homes would house residents of varying ages, and applicants would be carefully screened and prepared for this type of living.

Write to:  American Association on Mental Deficiency
5201 Connecticut Avenue, N.W.
Washington, DC 20015

The advantages of hostels over institutional care for the mentally retarded are described. Problem areas discussed include cooperation between community and authorities, as well as between medical and welfare departments.

Write to:  National Association of Teachers of the Mentally Handicapped
12 Saxonhursh Road
Bournemouth, England

Described are the results of a workshop on establishing and maintaining community residential facilities for the developmentally disabled. Workshop participants rank order problems of their community residential facilities. Major problem
areas included: normalization, legislation, funding, standards, client programming, staff, evaluation, and supportive services.

Write to: Rehabilitation Research and Training Center in Mental Retardation
College of Education
Center on Human Development
University of Oregon
Eugene, OR 97403

Described are attempts to place patients from hospitals for the mentally subnormal into community hostels. Local authority representatives interviewed patients to assess their suitability and to provide the local authority with estimates of services needed. It is suggested that to avoid disappointing the patient; the planning statistics should be obtained in other ways.

A joint program of the Arizona Training Program at Coolidge and the Bureau of Indian Affairs focused on the service needs of institutionalized mentally retarded Navajos. The identification of needs and the delivery of services to 35 Navajos was accomplished through individual and group work, inservice training, team meetings, and resource activities. During the program all 35 Navajo residents were reevaluated psychologically, and previously untapped vocational placement resources and alternative living sites were identified.

Washington, DC 20036

Presented is an introduction to some of the broad aspects of managing residential programs for the developmentally disabled. Primary attention is devoted to philosophy, personnel, organization, leadership, planning and evaluation, and organized labor.

Write to: Charles C Thomas, Publisher 301-307 East Lawrence Avenue Springfield, IL 62717

The community group home is explained to be a self-sufficient residential unit for a small group of unrelated retarded persons. Many group homes are situated in middle-class neighborhoods and accommodate an average of 10 adults. Cost of operating a group home is estimated at less than half the cost of institutionalizing the same individual. The group homes are administered by the training school’s social service department and aim at optimal integration of the individual with the community.

Write to: American Association of Medical Clinics 719 Prince Street Alexandria, VA 22313

Presented are six articles concerning innovative residential facilities for retarded children and adults, vocational education in homebuilding skills, on-the-job teaching techniques, recreation in state schools, deinstitutionalization, and a can recycling workshop experience.

Write to: Educational Resources Information Center P.O. Box 190 Arlington, VA 22210

Presented as part of a symposium relating to planning efforts for deinstitutionalization of the mentally retarded, this paper proposes new approaches in which rehabilitation can make significant impact in expanding services to the more severely mentally retarded client.

Write to: American Society of Planning Officials
1313 East Sixtieth Street
Chicago, IL 60637

It is predicted that institutions will be phased out because of five trends: development of nonresidential community services; new conceptualizations of and attitudes toward residential services; increased usage of individual, rather than group residential placements; provision of small, specialized group residences; and a decline in the incidence and prevalence of severe and profound retardation. The impact of the developing new service model on the institution is discussed. Residential alternatives to institutions and nonresidential community services are examined.

Write to: American Association on Mental Deficiency
5201 Connecticut Avenue, N.W.
Washington, DC 20015

The report examines the rationale behind such facilities as halfway houses, group homes, and foster homes, and surveys existing zoning practices and offers recommendations for a legal and sane zoning treatment of these uses. Most cities have overly restrictive zoning regulations which tend to prohibit these residential facilities from desirable residential districts. This document recommends that these facilities be allowed in all residential areas, including single-family zones, subject only to specific controls governing licensing, density, and concentration of facilities.

Elwyn. Film: 1973, 10 minutes, 16 mm, color.

Featured is a highly successful deinstitutionalization project for the mentally retarded at Elwyn Institute, Elwyn, Pennsylvania. Traced are the steps necessary to help the mentally retarded patient readjust to community living. Use of a half-way house and job placement are highlights of this film.
**A Family of Friends.** Film: 1975, 7 minutes, 16 mm, color. Slide/tape show also available.

Depicted is life in a group home for five moderately retarded men and women. Included are normal household activities, use of community recreational facilities, conversations with natural parents, and interviews with neighbors.

**The House at 104—3rd Street.** Film: 1967, 30 minutes, 16 mm, black and white.

Presented is a documentary about a small community residence in Manitoba for mentally retarded adults attending sheltered workshops or vocational training programs.

**If You're Not There, You're Missed.** Film: 1967, 30 minutes, 16 mm, black and white.

Examined are Jean Vanier's adult hostels and workshops in France, incorporating his philosophy that retarded adults should live independently.

**Like Other People.** Film: 1972, 30 minutes, 16 mm, color.

In this British film about people with developmental disabilities, two central figures speak about emotional and sexual fulfillment and about the advantages of living in a group home.

**Merging Right.** Produced by University of Denver. Film: 1974, 30 minutes, 16 mm, color.

This view of life in a group home presents several age levels of boys and girls. This could serve as an introductory film to acquaint parents and professionals with a group home lifestyle.

**Normalization: The Right of Respect.** Film: 1973, 20 minutes, 16 mm, color.

Defined and illustrated is the normalization concept. Outlined are the major needs which must be met to guarantee a normalized life for people with developmental disabilities. The normalization concept is presented as applicable to community residences and work training programs.

**Pattern for Change.** Produced by George Washington University, Department of Medical and Public Affairs. Film: No date available, 32 minutes, 16 mm, color.

Emphasized is the fact that through public understanding, federal support, and research, the institution is slowly shedding its traditional role of custodial repository. The film illustrates how the institution today can act as a catalytic agent to involve transitional programs and community services for the retarded, thus providing a chance for many mentally retarded citizens to live in the community.
