ABSTRACT

This bibliography includes studies and descriptions of federal information systems; including federal libraries, Educational Resources Information Centers (ERIC), Government Printing Office, Library of Congress, National Library of Medicine, and National Technical Information Service. Also listed are National Commission on Libraries and Information Science publications and hearings. Each listing provides title, source, availability, and a brief synopsis of the contents (except in the case of the National Commission on libraries and Information Science where most of the titles are self-explanatory). All the materials are available through ERIC, and the ERIC document (ED) numbers are provided. (EMH)

\*\*\*\*\*  
 \* Documents acquired by ERIC include many informal unpublished \*  
 \* materials not available from other sources. ERIC makes every effort \*  
 \* to obtain the best copy available. Nevertheless, items of marginal \*  
 \* reproducibility are often encountered and this affects the quality \*  
 \* of the microfiche and hardcopy reproductions ERIC makes available \*  
 \* via the ERIC Document Reproduction Service (EDRS). EDRS is not \*  
 \* responsible for the quality of the original document. Reproductions \*  
 \* supplied by EDRS are the best that can be made from the original. \*

## INTRODUCTION

This bibliography was prepared by the ERIC Clearinghouse on Information Resources at Stanford University for distribution at the American Library Association 1976 Conference in Chicago.

The readings included here comprise suggested background material for two sessions titled "The Dynamics of Federal Information: A Bicentennial Update" sponsored jointly by the Federal Libraries Round Table, the Government Documents Round Table, and the Association of College and Research Libraries.

Most listed items are available from ERIC (the Educational Resources Information Center), either at one of the 500+ ERIC collections located across the country, or from the ERIC Document Reproduction Service, which supplies microfiche and photocopies upon request. Ordering information for ERIC documents is available on the last page of this bibliography.

Included are both studies and descriptions of various aspects of federal information systems. Most citations are arranged alphabetically by personal author or title, and include annotations and bibliographic information obtained from the files of ERIC. No annotations are included in the last section, "National Commission on Libraries and Information Science," because of the self-explanatory nature of most titles. Items in the National Program for Library and Information Services Related Papers section are listed in numerical order, and the Regional Hearings are listed by city.

- Patricia Files, Compiler

## FEDERAL LIBRARIES AND INFORMATION SYSTEMS

Ayer, Nancy L. *Speech to Congress*. Washington, D.C.: National Agricultural Library, October 1974. Paper presented at the Annual Meeting of the American Society for Information Science, Atlanta, Georgia, October 1974. Spp. ED 097 004.

CAIN is the computer cataloging and indexing system of the National Agricultural Library. In this speech are described the structure of the CAIN system and the various uses of the CAIN data bases.

Crowers, Clifford P., ed. *Planning and Indexing of the Bibliographic Control of Public Documents - Report for the Library of Congress*. Philadelphia, Pennsylvania: Drexel University, Graduate School of Library Science, 1974. 156pp. FD 105 811.

In an attempt to clarify the indexing and announcing controls for government documents, this issue of the *Drexel Library Quarterly* presents background information on several of the information controlling and access agencies, describes their operations, and points out their inherent problems and weaknesses. The agencies covered are the Government Printing Office, the National Technical Information Service, the National Archives, and the Educational Resources Information Center. The roles and the effectiveness of the "Monthly Catalog of U.S. Government Publications," the federal depository library system, and the overall federal system of bibliographic control are analyzed.

Danilov, V.J., and others. *Report of the Panel on Economics of the Science Information Council*. Washington, D.C.: National Science Foundation, Office of Science Information Services, Science Information Council, January 1973. 119pp. IR 003 350.\*

Scientific and technical information services cost the federal government close to a billion dollars a year and cost further large sums to other sectors of the economy. Unless the relationship of benefit to cost for these services is quantitatively understood, there are dangers of enormous waste in some areas or of the passing up of enormous net benefits in others. Very little has been done toward the assignment of a monetary value to these benefits. It should be possible to develop rough but useful quantitative measures for the benefits delivered by many kinds of information services by combining theoretical analysis with suitably gathered empirical data on the response of the user community to these or related services. To obtain these value measures, extensive data on the markets for information services and on the habits of their users will be needed, as well as a sophisticated theoretical analysis of markets and of the interaction of different modes of information transfer.

Henderson, Madeline, and Susan Geddes. *Automation and the Federal Library Community: Report on a Survey*. Washington, D.C.: Federal Library Committee, June 1973. 58pp. ED 086 238.

The study sought to define which library operations were susceptible to automation, to describe potentially useful automation techniques and to

*Note: The ED number necessary for ordering this document was not available at the time of publication. You may obtain the ED number by checking upcoming issues of Resources in Education or by writing the ERIC Clearinghouse on Information Resources at Stanford University.*

establish criteria for decisions about automation. Questionnaires were sent to 2104 federal libraries, of which 1017 responded. Major results included the findings that most federal libraries were of small or medium size, but had varied collections and offered many services. The library community favored automation, but recognized that better communication, increased manpower, and strong central support would be needed. A stronger role for the Federal Library Committee (FLC) was indicated and centralized automated networks and standardized program packages for use in federal libraries were seen as desirable.

Iow. Jane Grant-Mackay. *The Availability of Maps and Charts Published by the United States Government*. Master's Thesis. Texas Woman's University, Denton, Texas, May 1975. 93pp. ED 101 725.

Sources and selection criteria for maps and charts published by the United States Government are outlined in this manual. Since there is still no comprehensive index to U.S. Government published maps, several selections tools are recommended. A section is included concerning the map and chart programs of each of the issuing departments, agencies, bureaus, and services.

*Report of the General Accounting Office to the Comptroller General of the United States*. Washington, D.C.: Comptroller General of the United States, July 24, 1973. 17pp. Available from U.S. General Accounting Office, Room 6417, 441 G Street, N.W. Washington, D.C. 20548 (B-174013; \$1.00). ED 082 762.

The General Accounting Office reviewed Federal libraries in Metropolitan Washington to identify common problems and to determine how they are being handled. The review revealed that: a central depository could provide numerous benefits; microforms are not used substantially; central direction is required for research projects; cooperative arrangements for acquiring materials have not been entered into by Federal libraries; and Federal libraries have not integrated their services, resulting in duplication, conflicts, and reduced efficiency. It was recommended that the Office of Management and Budget (OMB) should be more active in encouraging improved management and coordination of Federal library activities.

*Survey of Federal Libraries; Fiscal Year 1978*. Washington, D.C.: National Center for Educational Statistics (DHEW/OE), 1975. 251pp. Available from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (Stock Number 017-080-01459-9; \$3.15). ED 112 920.

The fourth study of federal libraries provided the first nearly complete statistical study of all federal libraries in the continental United States and overseas. The survey identified 2,313 federal libraries, and data were collected on 2,145. Expenditures for reporting libraries totaled \$191,825,822. The report includes summary statistics for all libraries, separate treatment of the national libraries, detailed findings for 1,386 libraries providing individual responses, and aggregate data for other reporting libraries.

## EDUCATIONAL RESOURCES INFORMATION CENTER

Brown, James W., and others. *ERIC: What It Can Do for You and How to Use It*. Stanford, California: Stanford University, ERIC Clearinghouse on Information Resources, September 1975. 27pp. Available from Box E, School of Education, Stanford University, Stanford, California 94305 (\$3.75; Check made payable to "Box E"). ED 110 095.

This publication explains the utility of the Educational Resources Information Center (ERIC) to educational institutions and practitioners. Included are a directory of ERIC Clearinghouses and other units; an introduction to the ERIC indexes, *Resources in Education* and *Current Index to Journals in Education*; and instructions for doing a manual search of ERIC. Methods of obtaining ERIC materials, the computer search process, and the standards for submitting documents for inclusion in ERIC are also outlined.

Hull, Cynthia, and Judith Wanger. *Educational Resources Information Center (ERIC) File Partition Study: Final Report*. Santa Monica, California: System Development Corporation, August 1972. 272pp. ED 067 520.

A study to provide the National Center for Educational Communication (NCEC) with information that could be useful in making the ERIC data base more relevant to the needs of educators and more efficiently usable by them is discussed. The project involved three data-gathering activities. These were: (1) a review of current ERIC practices, (2) a review of some current ERIC-related studies, and (3) a questionnaire survey. A comparison of the 15 user-group profiles created by the cross-tabulations revealed some similarities that cut across all groups, as well as a number of differences that set the groups apart.

Summit, Roger K. *ERIC Online Retrieval System. Use of the DIALOG Online Information Retrieval System with ERIC Research in Education Files. Final Report*. Palo Alto, California: Lockheed Aircraft Corporation, April 1970. 58pp. ED 040 592.

The utility of computer-based on-line retrieval of material from the ERIC document files was tested by members of the ERIC Clearinghouse on Educational Media and Technology at Stanford University and by the Region IX office of the U.S. Office of Education in San Francisco. The DIALOG retrieval system developed by the Information Sciences Group of the Lockheed Palo Alto Research Laboratory was the on-line system tested. More than 800 searches were conducted and over 51,000 citations and abstracts were printed in the one-year period covered by this report.

GOVERNMENT PRINTING OFFICE

*Publications: Microfilm Edition of the Government Printing Office*, Washington, D.C., Information Industry Association, 1971. 59pp. Available from Information Industry Association, 1025 15th Street, N.W., Washington, D.C. 20005 (\$3.00). ED 058 920.

Three speakers represented different points of view in considering the implications of a GPO micropublishing program--a librarian's, an information publisher's, and a micropublisher's.

*Pricing of Publications Sold to the Public (E-11-112)*, Government Printing Office, Washington, D.C.: Comptroller General of the United States, November 19, 1974. 28pp. ED 105 904 (microfiche only).

Government Printing Office (GPO) pricing was reviewed in order to determine whether: (1) the August 1973 price increases embraced the same financial philosophy which had prevailed in the past and (2) the relationship between the pricing structure and the annual appropriation by the Congress has changed. It was concluded that there has not been a major change in the financial philosophy of pricing publications for the sales program, because the Public Printers have traditionally operated on the philosophy that sales revenues should exceed full costs. It was further concluded that the GPO is now requesting appropriated funds for costs it intends to recover through sales revenues. An analysis of the pricing formula being used by GPO and its application to specific documents resulted in the suggestion that the pricing method used may not be the most appropriate.

Schwarzkopf, LeRoy C. *Regional Libraries and the Depository Library Act of 1962*. June 1972. 54pp. ED 066 177.

This report is a ten-year review of the regional depository library system for federal government documents which was established by the Depository Library Act of 1962. It describes the status of programs which regional libraries have undertaken to comply with the requirements of the Act to "provide interlibrary loan, reference service, and assistance in the disposal of unwanted publications." Also described are the retention policy of regional libraries for materials which they are authorized to discard as an exception to the Act, and the attitude of documents librarians on the desirability of providing federal support to regional depository libraries.

Schwarzkopf, LeRoy C. *Survey of Regional Depository Libraries for U.S. Government Publications*. College Park, Maryland: University of Maryland, School of Library and Information Services, December 1974. 85pp. ED 104 361.

Based on 33 responses to mailed questionnaires, visits to selected regional depositories, and the author's personal experience as a regional depository librarian, this report analyzes the interpretation and implementation by the Superintendent of Documents, state library agencies, and depository librarians of key provisions of the Depository Library Act of 1962. The following related subjects are also discussed: historical background, including experimental regional depositories in Wisconsin and New York in the 1950's; impact of other major changes introduced by the Act, including expansion of the depository system, and distribution of non-Government Printing Office publications; organization of regional depositories as large research libraries for overall government documents service; and federal financial support to the depository library system.

## LIBRARY OF CONGRESS

*Annual Report of the Librarian of Congress for the Fiscal Year Ending June 30, 1974.* Washington, D.C.: Library of Congress, 1975. 195pp. Available from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (Stock Number 050-000-00078-1; \$6.40). TR 003 224.\*

The body of the report begins with a general overview of recent LC activities in such areas as special services, automation, copyright, affirmative action, publications, and preservation of special materials. This is followed by reports on the activities of the Processing Department, Congressional Research Service, Reference Department, Law Library, Administrative Department, and Copyright Office. The Copyright Office report includes a table of United States international copyright relations listed by country.

*Compendium of Copyright Office Practices. 1973 Revisions.* Washington, D.C.: Library of Congress, Copyright Office, July 1973. 187pp. ED 092 099.

Proposed revisions and additions to the Compendium of Copyright Office practices for 1973 are presented. The Preface indicates that the Compendium is primarily an office manual for the use of the staff of the Copyright Office and is not a book of "rules" to be followed.

Cooke, Eileen D. *Statement for the Subcommittee on Legislative Branch Appropriations of the House Committee on Appropriations, March 22, 1974.* Chicago, Illinois: American Library Association, March 22, 1974. 9pp. ED 089 661.

This statement by the American Library Association (ALA) for the Subcommittee on Legislative Appropriations of the House Committee on Appropriations endorses the Library of Congress request for funding in 1975 and requests that funding be increased for the Office of Superintendent of Documents for the same period. The value and importance of several activities of the Library of Congress is commented upon. Some of the services of the Office of Superintendent of Documents vital to libraries and the American public are described, and the problems besetting the Office are discussed. The ALA also urges increased financial support for the Depository Library Program of the Office.

*Design of an Automated Library Information Storage and Retrieval System for Library of Congress Division for the Blind and Physically Handicapped (DBPH). Final Report.* Randolph, Massachusetts: Systems Architects, Inc., June 30, 1975. 444pp. ED 108 715.

A practical system for producing a union catalog of titles in the collections of the Library of Congress Division for the Blind and Physically Handicapped, its regional network, and related agencies from a machine-readable data base is presented. The DBPH organization and operations and the associated regional

\*Note: The ED number necessary for ordering this document was not available at the time of publication. You may obtain the ED number by checking upcoming issues of Resources in Education or by writing the ERIC Clearinghouse on Information Resources at Stanford University.

library network are analyzed. The major objectives of the proposed system are defined as improved bibliographic control over materials acquired by DBPH and the network libraries, and improved management control.

*The Library of Congress as the National Bibliographic Center.* Washington, D.C.: Association of Research Libraries, February 1976. 64pp. Available from Association of Research Libraries, 1527 New Hampshire Avenue, N.W., Washington, D.C. 20036 (\$4.00). ED 118 097.

In a program sponsored by the Association of Research Libraries (ARL), the Library of Congress (LC) Processing Department reports on progress in development of the National Bibliographic Service. The first paper deals with past, present, and future cooperation between LC and the ARL. The second paper provides an overview of the automation activities of LC's processing department and serves as an introduction to the three subsequent papers. In the first of these the LC core bibliographic system is described, with heavy emphasis on MARC system operations. The next paper covers the national bibliographic system including: CONSER; an automated register of additional locations; and participation in the projects of various library organizations. Finally, various problems encountered in transition to an automated system are described.

*Processing Department of the Library of Congress; Organization and Functions.* Washington, D.C.: Library of Congress, Processing Department, 1975. 41pp. Single copies available from Central Services Division, Library of Congress, Washington, D.C. 20540. ED 115 269.

This guide introduces visitors and new staff members to the history, organization, functions, funding, and responsibilities of its processing department. Twenty-three charts illustrate the organization of the department as a whole; the MARC office; the core bibliographic system; the National Union Catalog project; and various research, cataloging, and publications functions.

## NATIONAL LIBRARY OF MEDICINE

Bruce, Elizabeth W. *Decentralization of the National Biomedical Communications Network; Development of Regional and State Plans. North Dakota Library Notes, Vol. 5, No. 6.* Bismarck, North Dakota: North Dakota State Library Commission, November 1974. 33pp. ED 097 889.

Starting with the Medical Library Assistance Act of 1965, various plans of organization have been tried for improving the national diffusion of medical information. In 1973, the Midwest followed other regions in switching to a decentralized network, with 10 libraries designated as resource libraries for their regions. The formation of consortia of neighboring libraries was encouraged. A resource sharing plan for North Dakota included division of the state into four service quadrants with central coordination by a new Director of Health Science Libraries.

*Historical Chronology and Selected Bibliography Relating to the National Library of Medicine.* Bethesda, Maryland: National Library of Medicine (DHEW), 1971. 25pp. ED 058 914.

The chronological development of the National Library of Medicine is traced from 1836 through 1970. This history is followed by a selected bibliography of materials concerning the National Library of Medicine.

*The National Library of Medicine, Programs and Services, Fiscal Year 1974.* Bethesda, Maryland: National Library of Medicine (DHEW), 1975. 46pp. ED 103 000.

The activities and projects of the National Library of Medicine are described. New and continuing programs in library services and operations, on-line computer retrieval services, grants for library assistance, audiovisual programs, and health communications research are included. Summary statistics of the Library's 1974 fiscal year activities are provided with comparable statistics from previous years.

*The National Library of Medicine, 135th Anniversary Report, 1835-1971.* Bethesda, Maryland: National Institute of Health, 1971. 44pp. ED 056 700.

This report reveals some of the highlights of the National Library of Medicine's service during the 135th anniversary year. It recounts the accomplishments of its diversified professional staff of more than 450 library and biomedical scientists, physicians, medical educators, historians, literature analysts and translators, computer and electronic communications engineers, and the many persons working in their support. It describes the expanding progress both of established services and developing programs toward their goal of improving access to useful information and new medical knowledge.

NATIONAL TECHNICAL INFORMATION SERVICE

Howison, Beulah C. *Developing Self-Instructional Materials for NTIS Users.* Menomonie, Wisconsin: University of Wisconsin at Stout-Menomonie, Instructional Technology Services, November 5, 1975. 82pp. ED 112 930.

A package of information was developed to inform vocational, technical, and adult education teachers how to find information relevant to their occupational interests. Instructions were provided for the use of three indexes: Government Reports Announcements (GRA), Government Reports Index (GRI), and National Technical Information Service (NTIS).

Meredith, Joseph C. *Selective Dissemination of Microfiche Documents in a University Setting: Phase 1. Final Report. Project CLR-561.* Park Forest South, Illinois: Governors State University, Learning Resources Center, October 1975. 81pp. ED 112 954.

The selective dissemination service (SRIM) of the National Technical Information Service (NTIS) was used to test a university subsystem wherein a number of individual profiles were combined and submitted to NTIS as a composite. Microfiche documents received were duplicated in sufficient copies to meet local distribution requirements. The study indicated the effect of a local agency in stimulating and mediating the use of an SDI system, and the relative economy of local copying and redistribution of microfiche over direct ordering at current NTIS prices.
