ABSTRACT

Curriculum guides reviewed and recommended by the National Council of Teachers of English Committee on Curriculum Bulletins during 1974, 1975, and 1976 are listed and briefly annotated. The list seeks to publicize good curriculum planning and guide writing in order to provide models for schools which are revising their own programs. In addition to the annotations, detailed criteria are included for planning and evaluating English language arts curriculum guides. (AA)

## Foreword

The Educational Resources Information Center (ERIC) is a nationwide information system operated by the National Institute of Education (NIE) of the Department of Health, Education and Welfare as a service to educators throughout the country. ERIC makes available through hundreds of libraries and information centers over 100,000 unpublished documents on all phases, levels, and subject areas of education. This is accomplished through ERIC's network of specialized centers or clearinghouses, each of which is responsible for acquiring, evaluating, abstracting, and indexing current significant documents within a particular educational area. The bibliographical information and abstracts for these documents are then listed in ERIC's monthly reference publication, *Resources in Education* (RIE).

ERIC/RCS, the ERIC Clearinghouse on Reading and Communication Skills, collects, analyzes, evaluates, and disseminates educational information related to research, instruction, and personnel preparation at all levels and in all institutions. The scope of interest of the Clearinghouse includes relevant research reports, literature reviews, curriculum guides and descriptions, conference papers, project or program reviews, and other print materials related to all aspects of reading, English, educational journalism, and speech communication.

One of the primary goals of ERIC and NIE is to transform the information found in the ERIC system into a format that will be useful to the classroom teacher, the administrator, and the curriculum developer. Such is the goal of this bibliography, which brings together titles and descriptions of curriculum guides recommended by the NCTE Committee on Curriculum Bulletins. ERIC/RCS is pleased to assist NCTE in providing this continuing service to educators.

Director, ERIC/RCS

## Introduction

The Committee on Curriculum Bulletins of the National Council of Teachers of English has been for a number of years reviewing, as a service to schools, curriculum guides voluntarily submitted to NCTE. Each year, through the cooperation of the ERIC Clearinghouse on Reading and Communication Skills (ERIC/RCS), the Committee compiles an annotated list of recommended guides for the benefit of schools and agencies which are developing curricula. The purpose of this list is to publicize good curriculum planning and guide writing in order to provide models for schools who are revising their programs and need a variety of sample frameworks, units, and lesson plans. The list is not compiled for the purpose of recognizing every guide examined by the Committee. Since guides are received from school systems that wish to use this service, it must be recognized that the selections printed here are taken from those sent to NCTE during the course of the last three years. Guides which are recommended are displayed at the NCTE conventions.

The Committee welcomes guides for review. Schools and agencies which would like to submit guides should send two copies to the Committee on Curriculum Bulletins, NCTE, with a letter indicating at least the purpose of the materials and whether they are the only guides used in the system or are complements or supplements to other existing materials (the nature of which should be briefly described).

The review service is performed by members of the NCTE Committee on Curriculum Bulletins, who examine the materials carefully, comment on the printed list of review criteria, discuss the review, and make suggestions on a cassette tape. Persons who submit guides receive copies of the printed review and copies of the cassette free of charge. Most reviewing is done in late spring and early fall of each year. The process usually takes from four to eight weeks. The Committee also serves as a consultant to ongoing curriculum planning for those school districts or curriculum committees which solicit their services.

All the guides recommended here are available from the schools and agencies responsible for producing the guides, or from the ERIC Document Reproduction Service (EDRS).

Through EDRS, interested educators may order complete texts of most documents abstracted in *Resources in Education* (RIE), a monthly catalog announcing current acquisitions. See the inside back cover for prices and ordering information.

The major focus of this resource book is on people and the problems they have in relating to one another for mutual growth and development in a rapidly changing society. The goals and objectives of the guide, especially those related to the use and misuse of language in human affairs, have been validated by research as effective for the improvement of writing, critical thinking and critical reading, creativity, and for the reduction of prejudice. The contents consist of a section concerning perspectives on language and communication, with discussion and outlines of the subjects of language and communication, writing and communication, and language and literature; a section containing language study concepts and objectives, with sample lessons on the objectives, on speech dialects, and on general semantics; and eleven appendixes which contain material related to the various subjects of this guide.

A GUIDE TO TEACHING READING K-3. Wilmington, Massachusetts, Public Schools. 1973. [ED 090 530, 220pp.]

This curriculum guide was written with the intention of providing continuity to the Wilmington, Massachusetts, reading program—grades kindergarten through twelve. The skills and suggestions presented are adaptable to all reading materials currently available in Wilmington. The skills are meant to be developed in grades kindergarten through third as on-going processes. The guide is divided into the following sections: language development, vocabulary development, motivation, comprehension, word recognition, criteria for selecting activities, fluency, implementing the curriculum, assessment, and comparison of basals. CREATIVE DRAMATICS HANDBOOK K-6. Revised. Harriet W. Ehrlich, Ed. The School District of Philadelphia. 1974. Distributed by NCTE, 1111 Kenyon Road, Urbana, Illinois 61801 (Stock No. 08970, \$5.00 members, \$5.50 non-members). [ED 105 464, 165pp.]

Building on children's love of play-pretend, Philadelphia teachers have developed an affective curriculum by incorporating creative dramatics into the regular classroom day. The hundreds of suggestions in this handbook emerged from workshops held over the years to train teachers in creative dramatics. Included are ideas for techniques that are used in creative dramatics—sense memory, characterization, and so on—and specific activities—pantomime, word games, improvisation with music. More than 50 vivid photographs testify to Ehrlich's conviction that creative dramatics can help urban children develop language skills, express strong feelings, and know "the sweet taste of success." Bibliography on multi-media resources.

Sections are given (1) to the extension of skills of auditory and visual discrimination, (2) to the extension of comprehension skills through listening and observing, (3) to the extension of literary appreciation and reading experiences, and (4) to speech in action, written expression, and learning about language. An appendix provides background information in language and literature, recommended books for grades five and six, recommended poems for grades five and six, a basic list in spelling, sounds of English, and selected teacher references.

Contents include "Rhetoric in the 1960's," which defines composition and explains what languaging is about; "Ways to Set Up a Composing Exercise"; "Composition Program Grade 7" and "Composition Program Grade 8," which present writing activities for those grades based on recording, reporting, and generalizing from one's imagination, life, literature, and the mass media; and "Assessment-Evaluation," which raises questions about evaluating student writing and discusses the purpose of the composition program.

**A RESOURCE BULLETIN FOR TEACHERS OF ENGLISH--GRADE 10.** Baltimore County Board of Education. 1972. Available from Office of Curriculum Development, Baltimore County Board of Education, 6901 North Charles Street, Towson, Maryland 21204 (\$10.00) [ED 088 102, 352pp.]

This sequential curriculum guide for grade ten uses a sequence which encourages the teacher to begin with student experience and language and to progress to a variety of learning experiences which integrate all elements of the language arts and which permit students to discover their own generalizations and periodically evaluate their own progress. The steps in the procedure are: (1) propose a minimal situation which the students then develop and explore in a dramatic improvisation; (2) follow this with further exploration and development in class discussion; (3) use the ideas generated as the basis for student writing; (4) stimulate cross-commentary on and evaluation of the writing; and (5) provide for reading in the same mode of discourse. Three teaching

approaches used include small group discussion, dramatic improvisation, and induction. Units cover free reading, drama (interacting), language and feelings, points of view, the language of advertising, fantasy, reportage, argumentation, visual literacy, film communication, themes and variations, grammar, and the meaning in the poem.

This guide was developed to acquaint teachers with the Continuous Progress Program, which is designed to recognize the individual differences of students in a nongraded curricular system and to make available to teachers a comprehensive set of guidelines for implementation. The guide establishes the parameters within which the operation of an individualized process of instruction is to take place and presents seven principles on which the program is based. The contents of the document include "The National Sequence of Change in the School Organization," "Questions and Answers on Avon's Continuous Progress Program," "Philosophy of the English Arts Department," and a listing of specific courses within the program, including suggestions, skills, and materials.

## Criteria for Planning and Evaluation of English Language Arts Curriculum Guides (Revised)

### *Introduction*

To perform the task of curriculum evaluating, the Committee on Curriculum Bulletins has developed and repeatedly revised its "Criteria for Planning and Evaluation of Curriculum Guides," trying to keep up with trends set by the best curriculum practitioners. These criteria were established with several objectives in mind. First, with these criteria each member of the Committee has a uniform tool which he can use to evaluate the curriculum guide. In line with this first objective, the subcommittee that developed the criteria\* felt that each guide should be evaluated as a unique guide, not directly compared to other guides throughout the United States. Secondly, the criteria serve to help schools and other educational agencies develop and evaluate curricula designed to guide teachers. The Committee also hopes that the criteria will be a possible change agent. The evaluation instrument was designed to apply to many different content emphases within the field of English-language studies, along with the learning process, organization, methodology, and language versatility. The criteria and the annotation are a kind of synthesis set of Utopian standards with definite biases that the Committee readily acknowledges. So far no single guide has "met" the standards for the criteria.

School districts wishing to have guides evaluated should mail one copy to the NCTE Committee on Curriculum Bulletins, 1111 Kenyon Road, Urbana, Illinois 61801. It would help the Committee to have in addition a statement containing information about the development of the guide, the nature of the school population and community, and the guide's relationship to other curriculum materials in use. The evaluation process normally takes from four to eight weeks. There is no charge for this service.

\*The subcommittee for the 1971 criteria included Sister Rosemary Winkeljohant, then Chairman of the Committee; William Strong, Associate Chairman; Allan Dittmer, Member of the Committee; William J. Scannell, NCTE Liaison Officer; David Kives, former NCTE Director of Special Projects; and Richard Adler, former NCTE convention coordinator. The subcommittee for the current revised criteria (1973) included Richard Adler, University of Montana; Mae L. Jackson, University of Oregon; Allan Dittmer, University of Nebraska; Barbara Rodgers, University of Cincinnati; Betty Swiggett, Hampton, Virginia; Adrian B. Sanford, Educational Development Corporation; and Mima Ann Williams, Abilene, Christian College.

*PHILOSOPHY: What We Subscribe To*

This guide . . . .

1. has a statement of philosophy that coherently explores the beliefs of teachers about students and subject matter.  
*Philosophy is what we believe, and it's a good thing to get out in the open.*
2. has content that follows logically and consistently from its statement of philosophy.  
*If a philosophy doesn't guide decision-making, it's largely useless.*
3. promotes a natural, organic integration of language arts experiences.  
*Things ought to go together.*
4. encourages teachers to view language both as a subject and as a communicative process central to all human life and learning.  
*Language is primarily a living process, not an artifact.*
5. stipulates that individual processes of language development and concept development take precedence over arbitrary grade level expectancies or requirements.  
*The best chance for stimulating learning is to start where the kids are.*
6. expresses the belief that the English program should aid students in planning, executing, and evaluating their learning experiences both individually and in groups.  
*Who's it for anyway? Complete involvement in the process is ideal.*
7. suggests that teaching and learning are cooperative, not competitive, activities in the classroom.  
*Nobody ever really wins. The business of the classroom is cooperation: between teachers and students, and students and students.*
8. indicates that successful experiences in language development are essential for all students.  
*Success comes in all colors, shapes, and sizes. All kids need to succeed in school.*

*POLICIES AND PROCEDURES: How We Operate*

This plan . . . .

1. helps free teachers by explaining their responsibilities and by suggesting the possibilities open to them.

*School systems usually have expectations, and it's a good thing for teachers to know their options.*

2. states procedures for both individual and group decision-making on such matters as selecting and ordering materials, equipment, and services.

*The nuts and bolts ought to be specified, not just guessed at.*

3. supports the view that curriculum building is an ongoing process.  
*Curriculum, like kids, keeps changing - or at least it should. There ought to be a plan and somebody to make sure it happens.*

4. reflects the interaction and cooperation of members of the total educational community.

*Everybody should have a say, and they ought to be listened to.*

5. encourages continual inservice training and professional improvement for all teachers.

*Change is continuous, as is the learning process.*

#### *OBJECTIVES: What We Hope Will Happen*

This guide . . .

1. has objectives that follow directly from the philosophy.  
*"What you see is what you get!"*
2. sets clear objectives for all the major components of the English curriculum.  
*Say what you want to happen so that it makes sense to you and anybody who reads it.*
3. states objectives in a manner which facilitates recognition and description of progress.  
*An objective can be a useful thing if it helps you to focus on what kids do.*
4. distinguishes teacher objectives from student objectives.  
*What teachers do should be differentiated from what students do.*
5. recognizes that many objectives are desirable even though progress toward them may not be conveniently observed nor accurately measured.  
*Restriction to a limited set of precise objectives can unduly inhibit learning and teaching. Some goals are reached only very gradually, almost imperceptibly, and some processes are not easily broken into steps or levels of achievement.*

6. recognizes that cognitive and affective behavior are inseparable in actual experience.

*Thoughts and feelings interact continuously.*

7. contains objectives for improving language performance, as well as perceiving more clearly what others do with language.

*Language is a game for playing as well as watching. You learn to do something by doing it, not by sitting on the sidelines.*

#### *ORGANIZATION: How We Channel the Flow of Energy*

This plan . . .

1. makes clear how particular units, lessons, and/or procedures are related to the total English program.

*Connections need to be made now and then. It helps if you have some idea how things might fit together and make sense.*

2. suggests a possible workable sequence of basic communication skills.

*A suggested logical order is helpful even if it can't always be followed by particular children.*

3. organizes major aspects of the language arts to provide directions for planning.

*Themes are a pretty good way to organize a curriculum but not the only way.*

4. regards textbook materials, if used, as resources rather than courses of study.

*Textbooks don't equal the curriculum—at least not in the best programs. Teachers and kids and parents are the real resources.*

5. suggests a variety of classroom organizations and activities to accommodate various kinds of learning.

*Classrooms are not conveyor belts in the factory of learning. It's the things that happen on the way that count.*

6. supplies specific procedures which will enable teachers to help their students to become increasingly independent.

*Dependency is learned, but so is independence.*

7. reflects the principle that the students themselves should often generate learning activities.

*Kids are natural learners who sometimes learn to be uncurious and unquestioning. They learn when we let them.*

*PROCESS AS CONTENT: The Ways That Students Experience*

This guide . . .

1. distinguishes between conventional "expository" teaching methods and "discovery," "inductive," or "inquiry" methods.  
*No method is sacred; each is useful for a different purpose. In many schools, however, more emphasis needs to be placed on inquiry.*
2. contains activities that have a "problems" or "questions" focus.  
*Documents from the past or problems from the present or future should often be used to promote training in inquiry.*
3. arranges its inquiry approach so that students gain confidence in their problem-solving abilities.  
*An "inquiry attitude" is learned through successive and successful encounters with problems that can be solved.*
4. indicates methods to promote cooperative interaction among students.  
*Classroom experiences should provide guided practice in group dynamics.*
5. has strategies to encourage each student to discover and extend his own ways of perceiving and learning.  
*Because each student has a unique perception of experience, it is essential for him to develop his own growing analytic and creative powers.*
6. stipulates ways to focus conscious attention on the processes of inquiry and learning.  
*Inquiry processes—learning how to learn—are probably the most important activities that students and their teachers can engage in.*

*LANGUAGE*

This guide . . .

1. suggests that the content of language study often comes from real life.  
*Language is as real and personal as each individual.*
2. provides for study of conventional areas of linguistics.  
*Linguistics, as usually taken up in schools, includes semantics, history of language, grammars, regional dialects, social dialects, lexicography, and kinesics (body language).*
3. suggests study of unique customs of specific language areas.

*The "languages" of advertising, politics, religion, and many other human activities are worth studying. Teachers need to ask the right questions about the ways these languages work.*

4. provides for frequent imaginative use of language in student-created and student-moderated groups.

*Improvised drama, role-playing, task groups, and brainstorming are ways that kids can explore language. Imagine what it would be like if: . . . Then talk it out.*

5. reflects knowledge of current or recent developments in modern language theory.

*Some of the new grammars work better than the old ones because they describe our language more precisely.*

6. suggests activities that help students learn the difference between grammar and usage.

*Grammar is primarily the study of language structure; usage is the study of the values we attach to pronunciations, vocabulary, and particular conventions.*

7. recognizes that analysis of language, as in grammar study, does not necessarily improve performance in composing.

*The analysis of grammar is different from processes of composing.*

8. recognizes the assets of bidialectal, bilingual, and non-English-speaking children in exploring language concepts.

*We live in a pluralistic society.*

9. suggests activities that help students acquire or expand their facility to understand and use the English language.

*The basis for all language is experience.*

10. recognizes the importance of children accepting their "home-rooted" language, as well as that of others.

*Positive self-concepts help kids to become more "open" people.*

#### *COMPOSITION: How We Shape Language and Ourselves*

This guide . . .

1. perceives composing as occurring in four ways: speaking, writing, acting, and filming.

*Composing requires an orchestration of experience. There are different ways to say things, and all are worthy of investigation.*

2. emphasizes the significance of composing as a means of self-discovery.  
*E. M. Forster said, "How can I know what I think 'til I hear what I say?"*
3. recognizes the importance of the composing processes as ways of bringing order to human experience.  
*Composing is a way to make sense of our world.*
4. has activities designed to stimulate composing.  
*Precomposing experiences, if important to kids, can help stimulate more worthwhile writing.*
5. recommends that composing should often occur in small groups.  
*Kids can help each other shape their thinking.*
6. affirms that composing is always creative.
7. suggests that composing stems from meaningful precomposing experiences.  
*The better the input, the better the output. Creation requires stimulation.*
8. recommends that composition should occur for different purposes and usually for audiences other than the teacher.  
*Decisions about communication ought to be determined by something more than the teacher's grade book. Authenticity is a function of knowing whom you're talking to and why.*
9. recommends that composing should occur in an atmosphere of maximum sharing.  
*Let kids help each other.*

*MEDIA: "The Medium Is the Message"*

This guide . . .

1. promotes audiovisual as well as verbal literacy.  
*Students need to explore the relationships among visual, verbal, and kinesthetic communication.*
2. acquaints teachers with the characteristics and potential use of various media.  
*The electronic age is with us. Are we with it?*
3. suggests ways of involving students in using media.

*A pen and ink is just one voice. Kids need the options of communicating with color, motion, and sound.*

4. suggests specific media supplements for learning activities.  
*The media are like extension cords; they plug into a wider world.*
5. lists media resources available to teachers, and specifies procurement procedures.  
*What's available and how do you get it? Media doesn't get used unless it's accessible.*

#### READING AND LITERATURE: The Worlds Students Experience

This guide . . .

1. provides ways for the teacher to determine individual degrees of readiness.  
*Shakespeare said, "The readiness is all."*
2. suggests procedures to help teachers develop student reading skills.  
*The "teaching of reading" means more than having a few books around.*
3. recognizes that a total reading program reaches beyond the developing of basic reading skills.  
*A person really never stops learning how to read. There are always new skills to learn.*
4. relates the skills of reading to a total language program.  
*Reading, writing, listening, and speaking are more like a web than like four peas in a pod. You touch one strand of language experience, and the whole thing vibrates and responds.*
5. makes provisions for a comprehensive literature program.  
*Get a lot of books of all kinds in kids' hands.*
6. recognizes that it is more important to "engage in" literature than to talk about terms.  
*Literary terms, conventions, and systems of classification are inventions of the profession. If talk about these externals is substituted for experience with literature, we "murder to dissect," as Wordsworth put it.*
7. recommends that teachers allow and encourage students to select and read all types of literature, especially contemporary.  
*Take the lid off the reading list, and let kids explore.*

8. helps teachers to identify, accept, and explore all varieties of affective and cognitive response.

*What kids say about literature is important, and so is how they feel about it. Our efforts should be devoted to helping kids extend and deepen their responses.*

9. suggests acting and role playing as a means of exploring literature.

*Literature is frozen drama. Whenever you get your body into the language of a poem or story, you're interpreting it.*

#### *EVALUATION: Discovering and Describing Where We Are*

This guide . . .

1. has a coherent and useful rationale for evaluation.

*The rationale should be related to philosophy and objectives. The reporting policy should be explicit.*

2. stipulates that reporting procedures describe pupil progress, including growth beyond the scope of stated objectives.

*Teachers and students should not feel inhibited by narrowly specified objectives. "The asides are essential to the insides."*

3. makes clear that grades and standardized tests, if used, do not constitute the major purpose of evaluation.

*Marks and scores are not ends; the end of evaluation should be information useful for furthering achievement.*

4. suggests methods of evaluation which help to encourage a pupil, not to discourage him.

*Teachers should encourage and respect any progress a pupil makes rather than punish or badger him for any apparent lack of progress.*

5. helps teachers diagnose individual learning progress and suggests methods and material to accomplish this.

*Each pupil learns in a different way at a differing rate from other pupils.*

6. suggests that most evaluation be tailored to the students' ability, age, and personality.

*Evaluation should be adapted to people, not vice versa. If evaluation is primarily for helping individuals learn, and if differences are at least acknowledged, then evaluation should be individualized.*

7. recognizes that the student must be involved in all evaluation.

*Self-evaluation is crucial to learning.*

8. suggests ways that teachers and students can use the results of evaluation to change the program as often as necessary.

*The ideal curriculum is tentative, flexible, and responsive to the results of continual evaluation.*

*DESIGN: Form, Function, and Flavor*

This guide . . .

1. is easy to read; the language is clear and effective.  
*Guide writers should set a good example in communicating; our medium has a message.*
2. exhibits an appealing form and style.  
*An attractive and creative guide will stimulate use.*
3. has a format which makes revision convenient.  
*A looseleaf format makes a guide more amenable to change.*
4. states its relationship to any other curriculum guides published by the school system.  
*Sometimes new teachers have a better idea of what's going on when curriculum relationships are explicit.*
5. suggests as resources a large variety of specific background materials and school services.  
*A guide, to be useful, has got to have useable things in it.*
6. identifies people and procedures which will promote interdisciplinary activities.  
*We can build walls around ourselves with labels like English, social studies, and science.*

## NCTE Curriculum Resources

**Aids to Curriculum Planning: English Language Arts K-12.** *Bernard O'Donnell, editor; Charles and Nancy Neff, compilers*

Excerpts from useful guides are presented to aid committees developing language arts curriculum guides. Criteria for selection were that the excerpts be readable, efficient, adaptable, and dependable. As a collection these excerpts exemplify improvements in seven areas commonly covered by curriculum guides: philosophy, objectives, language, composition, media, reading and literature, and evaluation. **Reviews of Selected Published Tests in English.** *Alfred H. Grommon, editor*

This monograph stems from a continuing concern about the relationship between accountability and the use of standardized tests for English. In the preface Dr. Grommon discusses various considerations in test selection and evaluation: the major purpose of the testing program, how the results are used, and what efforts can be taken to assist local interpretation. In subsequent articles, the reviewers examine the organization and content validity of more than 50 standardized English tests commercially prepared and published and now in wide use across the country. 1975. **1975-76 Supplement: NCTE Guide to Teaching Materials for English, Grades 7-12.**

This supplement combined with the first edition of the *NCTE Guide* will be an indispensable aid to anyone trying to sort out the welter of new and recent teaching materials in English. Last year's *Guide* contained annotations and full bibliographic information for 830 titles; the supplement has 175 additional annotations, featuring publishers' spring '75 and fall '76 releases, and gives the latest prices for all titles in the first edition. The *Guide* and supplement will be particularly useful for reviewing materials to be ordered this spring. Together, the first edition and this supplement give comprehensive descriptions of textbooks, anthologies, workbooks, and other print-based materials available from virtually every educational publisher in the U.S. Annotations describe the book's content and approach, cite journal reviews, and give complete bibliographic information. The publications are grouped by subject: literature, composition, grammar, reading, language skills, speech, spelling, vocabulary, humanities, mass media, film, drama, and tests. Entries are indexed by ability level, author/editor, and title; items with audiovisual components are starred.
