ABSTRACT

A decline in enrollment accompanied by population shifts, change in social composition of enrollment, central city decline, and urban renewal have combined to have significant effect on Atlanta schools. This study was designed to gather community input, analyze population trends, examine school plants, examine educational needs, and reach conclusions with respect to the use of school facilities. Particular, but not exclusive, attention was paid to schools cited for closure. Chapters discuss the problems, issues, and concerns revolving around seven major areas: (1) transportation and safe access to schools, (2) the school as a center of community activity, (3) community development programs, (4) special programs at specific school sites, (5) size and space considerations, (6) level of integration, and (7) community cohesiveness. Recommendations are made for phasing out or conversion of the schools. Minority report summaries that oppose the report recommendation are presented.

## FORWARD

The Atlanta Public Schools have undergone significant changes in the past decade. Decline in enrollment has been the overriding factor. Additionally, population shifts, change in social composition of enrollment, central city decline, urban renewal, and other factors have combined to have significant effect on the Atlanta Public Schools.

In order to determine the most effective and efficient utilization of existing school facilities, a Superintendent's Educational Facilities Commission was established. This Commission was a broadly based representative committee, composed of approximately 300 members, drawing from every segment of the community — interested individuals and organized groups, students, parents, teachers, school administrators, business, labor, industry, city administrative agencies, civic, religious, and service organizations. We felt that the critical issues facing the school system should be examined thoroughly by a committee that reflected the broad spectrum of views and interests on one of the tough questions of educational priorities for the Atlanta Public Schools.

Since June, 1975, this group diligently worked to review the report and recommendations of the State Comprehensive Study team in order to make its own recommendations to the Superintendent.

This group was charged with the responsibility of involving parents and citizens in the development of recommendations with regard to changes and conversions necessary for the efficient organization of the Atlanta Public Schools facilities in the best interest of the students being served.

Throughout this undertaking, the focus was on communication and the solicitation of concerns and ideas relative to the accomplishment of the goals of this endeavor. The report herewith submitted is the result of the deliberations and recommendations of this broad-based group.

## CHAPTER I

### BACKGROUND OF FACILITIES

#### Introduction

The dynamic nature of curriculum coupled with an altered pattern of pupil population change has mandated shifts in the use of the facilities of the Atlanta Public Schools. The period of rapid growth and the accompanying problems of overcrowding, temporary facilities, and personnel and facility acquisition have come to a halt. The time has arrived when the number of students, both present and projected, does not appear to justify the maintenance of the Atlanta School System at its existent level. However, decisions with respect to shrinkage in size go far beyond the act of opening or closing a school building. These decisions affect and, indeed, may dramatically alter the well-being of pupils, parents, teachers, administrators — the whole school-community fabric. With this foremost in mind, the Atlanta Public School community has come together to attempt to resolve in a fair and selfless manner the problems incumbent on a shrinking and changing school system.

As an initial step to cope with the recent patterns of change in the Atlanta Public School System, the Atlanta Board of Education passed a resolution on September 9, 1974, requesting that the Georgia State Department of Education conduct a comprehensive study of the Atlanta Public Schools in accordance with Georgia Code 31-624 (1964). That State Study was completed in February, 1975, and was submitted to the Atlanta Board of Education to form a basis for improvement of the program of education. With the State Report as a foundation, Dr. Alonzo A. Crim, Superintendent of the Atlanta Public Schools, invited community and school leaders to serve on a Commission on Facilities in order to provide a forum to gather and synthesize the broad spectrum of community concern with respect to the use of facilities. Dr. Crim invited a Steering Committee of 30 community leaders to serve as the focus of the process of synthesis. Along with the Steering Committee, a Task Force from each of the four administrative areas of the School System was formed. Each of these four task forces consisted of 75 school/community leaders. The Task Forces each elected two members and one student to represent them, as full voting members, on the Steering Committee. The major job of each Task Force was to engage the community-at-large in a study of the relevant issues, to gather data and recommendations, and to form and document the logic of plans of action with respect to

facility use in each area. This process, which began in June, 1975, was perhaps the most complete and most active instance of community involvement ever witnessed regarding the schools in the City of Atlanta. (Certainly, it brought more people into the decision-making process of the Atlanta Public Schools than ever before.)

The Steering Committee established procedures for its (own) functioning and created guidelines for the operation of the entire process of study. To more completely examine data from the task forces, recommendations from the Georgia State Department of Education's Comprehensive Study and professional advice provided by the staff of the Atlanta Public Schools, the Steering Committee divided into three subcommittees: (a) high school subcommittee, (b) middle school subcommittee, and (c) elementary school subcommittee. These three subcommittees provided a vehicle for the Steering Committee to study, in depth, the data flowing to it. With the conclusions of these subcommittees regarded as strictly advisory and in no way binding, the Steering Committee, as a whole, voted on all final recommendations.

The basis for many of the recommendations of the Steering Committee were projections of trends in population, housing, and curriculum. Such projections are inherently approximate. For example, the United States Census Bureau, using three different sets of assumptions, has forecast United States elementary and secondary school enrollment. This forecast allows for 12 million in error and is given as either 47,54.1, or 59 million in the year 2000 — depending on the assumptions. With only slight variation from these assumptions, actual enrollment could easily turn out to be anywhere from 42 million to 64 million — a 22 million error. Trying to forecast a local situation is even more difficult. Such events as a change in local or national policy regarding public housing, a change in zoning ordinances, displacement of housing by industry at an unusual rate, inflation, family lifestyle, medical knowledge, among a myriad of others can act to nullify any local forecast overnight. Thus, any Steering Committee recommendation must be, and is, tempered with the knowledge that the data on which it is based may prove to be significantly in error. This is just as true for recommendations for immediate actions as for actions to be concluded in (20 or 25) years hence.

This process has been one of honest exploration, community participation, and cooperation. The Steering Committee and the task forces have explored in detail and with great care almost every conceivable fact and issue which would bear on the future use of Atlanta Public Schools facilities. This report is submitted in order to make known the best recommendations and the best evidence the Committee could produce.

### Purpose of the Study

In order for the Superintendent of the Atlanta Public Schools to be more fully aware of the facilities needs of the School System as they relate to community trends and priorities, this study was designed to gather community input, analyze population trends, examine school plants, examine educational needs, and reach conclusions with respect to the use of Atlanta Public School facilities. Particular, but by no means exclusive, attention was paid to (State) Category IV elementary schools, middle, and high schools marked by the State Report to be closed. Every element of the community was given full opportunity to participate in the recommendations.

### State Committee Proposal

The present trend in the Atlanta Public Schools is towards establishing a K-5, 6-8, and 9-12 grade organization. This requires suitable elementary, middle, and high school facilities. At present, approximately one-third of all grade 6-8 students are attending middle schools; the middle school potential has not yet been fully realized. Thus, the thrust of the future use of facilities is: (a) to establish (senior) high schools with adequate pupil population and space to afford a complete opportunity for education to those in grades 9 through 12; (b) to provide middle schools for students in grades 6 through 8 in order to make this program fully available; and (c) to establish elementary schools which can adequately serve grades K through 5, and day care in some cases.

In response to this thrust, the State Department of Education's Comprehensive Study placed each elementary school in one of four categories, as follows:

- Category I - Schools which possess qualities which allow their continued efficient and effective operation indefinitely with only relatively minor improvements, if any. (Thirty-one schools.)
- Category II - Schools which possess qualities which make them eligible for Category I classification through additions to the present plant. (Eighteen schools.)
- Category III - Schools whose qualities permit a continued operation with relatively minor improvements during the years immediately ahead to be followed by reclassification into Category II or Category IV as conditions dictate. (Thirty-three schools.)
- Category IV - Schools whose qualities indicate eventual phase-out of the regular program (Thirty-one schools.)

The particular elementary schools in each category are given in Table 1.1.

In presenting analysis of middle and high school facilities, the State Department Study presented firm recommendations for twenty middle schools and twelve high schools for housing of grades six through eight. The following facilities were recommended as middle schools: Bass, Coan (or Murphy), East Atlanta, Fulton, Kennedy, King (or Roosevelt), Long, North Fulton, Parks, Pitts, Price, Sylvan, Southwest, Sutton, Turner, Walden, West Fulton, and three new facilities. The projection of average daily attendance (ADA) was approximately 1,000 per school. Enrollment substantially above or below 1,000 in any middle school was considered undesirable.

For housing of grades 9 through 12, the following facilities were recommended: Archer, Carter, Douglass, George, Grady, Harper, Murphy (or Coan), Northside, Roosevelt (or King), Therrell, Washington, and (new) Southwest. The ideal high school ADA was considered to be 1,500, although allowances for ADA up to 2,000 were made. However, enrollment substantially less than 1,500 was considered undesirable. It is important to note that the high school facility projections were as much a product of the need to provide adequate facilities for the comprehensive high school curriculum as of the need to properly house the students. The comprehensive high school model stresses career-oriented education with specific occupational and post-secondary<sup>1</sup> preparation and is a State priority.

These State Department Study recommendations were seen as a beginning step along the road of planning and implementing facility changes for the future. Follow-up analysis, in-depth study, and community involvement provide further steps down the road. The assessment process is served only by the synthesis of all these steps.

### Projection of Pupil Population

The Atlanta Regional Commission has provided projections of pupil population in seven Atlanta City superdistricts. These projects were based on census data available in 1970. Factors such as birth or fertility rate, immigration, migration, availability of housing, and availability of transportation were used in a formula to make predictions of pupil population for grades one through eight and grades nine through twelve. The projections for each superdistrict, central business district, Northeast, Northwest, Southeast, Southwest, Buckhead, and Atlanta in DeKalb are given in Table 1.2. Note first that pupil population is not equivalent to active enrollment. That is, pupil population is always greater than pupils actually in attendance and carried on the School System's roll books. An example of why this is true is that pupils in the population sometimes will

attend special schools or private schools or will be unable to attend school for health reasons. Despite the fact that pupil population and active enrollment are not equivalent, it is true that as pupil population increases, so does active enrollment. Conversely, as pupil population decreases, so does active enrollment. Thus, the trends shown in Table 1.2 may be taken as indicators of trends for active enrollment, and hence, as indicators of trends for school facility needs.

TABLE 1.2  
ATLANTA REGIONAL COMMISSION  
PUPIL POPULATION FORECASTS

	Pupil Population	
	Grades 1 - 8	Grades 9 - 12
Central Business District		
1970	526	272
1980	366	208
2000	358	208
Northeast		
1970	6,131	3,722
1980	4,618	2,891
2000	4,641	3,035

1970	17,890	8,706
1980	14,771	7,563
2000	12,129	6,135
Southeast		
1970	15,905	7,933
1980	11,837	6,384
2000	10,512	5,244
Southwest		
1970	13,660	6,386
1980	14,109	7,175
2000	18,486	9,763
Buckhead		
1970	4,855	2,937
1980	4,073	2,689
2000	5,402	3,687
Atlanta in DeKalb		
1970	7,038	3,380
1980	5,739	2,978
2000	4,840	2,452
Totals		
1970	66,005	33,384
1980	55,214	29,887
2000	56,366	30,923

The Atlanta Regional Commission forecasts show a trend of decline in pupil population to 1980 and a leveling effect from 1980 to 2000. With respect to elementary and middle school pupil population, an overall decline of 16 per cent from 1970 to 1980 and 15 per cent from 1970 to 2000 is shown. Only the Southwest and Buckhead run counter to these trends. The Southwest is forecast to grow three per cent in elementary and middle pupil population from 1970 to 1980 and 35 per cent from 1970 to 2000. While showing a decline from 1970 to 1980, Buckhead is predicted to gain 11 per cent from 1970 to 2000. In actual count, the Southwest probably will grow by about 5,000, and Buckhead probably will grow by about 600 elementary and middle school pupils from 1970 to 2000. Thus, for facility planning, it was critical to note a strong elementary and middle school need in the Southwest and a weak need in Buckhead.

The forecasts for high school pupil population evidenced a 10 per cent decline from 1970 to 1980 and a 7 per cent decline from 1970 to 2000. As with the elementary and middle population, the projected high school population grew only in the Southwest and in Buckhead. The growth in the Southwest is forecast as 12 per cent from 1970 to 1980 and 53 per cent from 1970 to 2000. In Buckhead, despite a decline from 1970 to 1980, growth of 23 per cent is forecast from 1970 to 2000. Actual growth by the year 2000 should be about 3,500 in the southwest area and 700 in Buckhead. Thus, it is likely that the Southwest will require additional high school space.

## CHAPTER II

### ELEMENTARY SCHOOLS: CONSIDERATION OF PROBLEMS AND ISSUES

#### Introduction

As expected, the schools that received the greatest amount of attention and generated the most problems and issues were those schools that were listed in the State Report as being "Category IV" schools. Category IV schools, as mentioned in Chapter I, were the schools that the State Report identified for eventual closing. Many of the problems and issues revolved around seven major areas, which were as follows: (1) transportation and safe access to schools, (2) the school as a center of community activity, (3) community development programs, (4) special programs at specific school sites, (5) size and space considerations, (6) level of integration, and (7) community cohesiveness. Each of the above factors was considered in the discussion which follows.

Keeping the above observations in mind, it is the primary purpose of this chapter to discuss the problems, issues, and concerns revolving around the elementary schools that were cited in the State Report for closing. Additionally, the final report on the vote of the Steering Committee has been included, along with the recommendations from the area task forces and the Elementary Schools Subcommittee of the Steering Committee. A discussion follows each list of area schools and relates specifically to the questions, concerns, and comments raised by members of the community, area task forces, Steering Committee Subcommittee, and Steering Committee.

#### Area I

The Category IV elementary schools in Area I that were cited in the State Report are as follows:

1. E. R. Carter
2. Craddock
3. English Avenue Primary
4. Fain
5. Peeples
6. F. L. Stanton
7. E. A. Ware
8. Wright

The Area I schools that the community participants, Area I Task Force, and Elementary Subcommittee agreed to recommend for closing were Carter, Craddock, Peeples, Stanton, and Wright. In spite of the fact that each of the above groups agreed that the preceding schools should be closed, there were some specific suggestions as to how they could best be utilized in the future. In the case of Stanton, it was suggested that this building be renovated and used by the community in a different capacity. Additionally, minority reports were submitted from the Area I Task Force concerning the need to keep F. L. Stanton, Fain, and Craddock open. (See comments in Minority Reports in Appendix A and Composite Results Charts in Appendix E.)

English Primary was recommended to remain open by the Area I Task Force. The Steering Committee Subcommittee recommended that they (English Primary and F. L. Stanton) be closed and used in a different capacity and that Craddock be moved to Category III. The major contention of the Area I Task Force was that if English Primary were kept open, primary students from Craddock could attend English Primary. Additionally, English Primary is new, air conditioned, and has exceptional parental involvement. It was felt that such a setting would be an asset for the children from Craddock.

It was recommended by the Area I Task Force that Fain be kept open and used for community purposes. The Elementary Schools Subcommittee recommended moving Fain to Category III. (See Minority Reports in Appendix A.) E. A. Ware was recommended to remain open by each group and agreed that the building should be air conditioned and retained on the basis of its (Ware's) excellent academic programs in math, reading, community support, and special programs (Title I, Right-to-Read, and Day Care Center).

Finally, on October 30, 1975, the Steering Committee made the following recommendations with respect to Area I elementary schools:

<u>Maintain As Is</u>	<u>Phase Out</u>	<u>Hold For Further Study</u>
E. A. Ware	Carter	(None)
	Craddock	
	English Primary	
	Fain	
	Peeples	
	F. L. Stanton	
	Wright	

## Area II

The Category IV elementary schools in Area II are as follows:

1. Capitol View
2. Cascade
3. Crogman
4. Dobbs
5. M. Howell
6. J. M. Jones
7. Perkerson
8. West Atlanta

Capitol View, J. M. Jones, Perkerson, and West Atlanta were agreed upon on all levels to be phased out as elementary schools. However, different suggestions were made as to how they should be utilized. Capitol View was suggested for possible use by Atlanta Area Technical School as office space. J. M. Jones was also recommended by the Area II Task Force to become a part of Carver High School. Perkerson and West Atlanta were recommended to be closed, with the exception that the West Atlanta community be reevaluated in three years, in order to determine school facility needs at that time. (See comments in Minority Reports in Appendix A and Composite Results Chart in Appendix E.)

Cascade, Dobbs, and M. Howell were suggested for retention in different capacities by the Area II Task Force. Cascade was recommended to be kept open and converted to a K-5 school when a middle school becomes available. The Elementary Schools Subcommittee recommended that Cascade remain open until a middle school is built, and then it (Cascade) should be phased out. All levels agreed that Dobbs be retained as a K-5 school with the provision that it be closed if enrollment drops below the point where an adequate curriculum can be provided. Minnie Howell was recommended to be retained as a reading center by the Area II Task Force. The Elementary Schools Subcommittee recommended that Minnie Howell be retained.

Finally, on October 30, 1975, the Steering Committee made the following recommendations with respect to Area II elementary schools:

<u>Maintain As Is</u>	<u>Phase Out</u>	<u>Hold For Further Study</u>
Cascade	Capitol View	Crogman
Dobbs	J. M. Jones	
M. Howell	Perkerson	
	West Atlanta	

### Area III

The following elementary schools in Area III were placed in Category IV:

1. Bolton
2. Carey
3. Chattahoochee
4. Forrest
5. John Hope
6. E. P. Howell
7. Mayson
8. Robinson
9. Spring Street
10. Pitts

The Area III Task Force and Elementary Schools Subcommittee agreed with the State's recommendations to phase out Bolton, Forrest, Mayson, and Robinson elementary schools. However, Mayson and Robinson were recommended to be phased out after the middle schools are established. Both groups recommended that Carey, Chattahoochee, Hope, E. P. Howell, and Spring be retained and studied further. Additionally, the Area III Task Force and Elementary Schools Subcommittee agreed that Pitts should remain an elementary school, and Boyd should be converted to a middle school. (See comments section of the Composite Results Chart in Appendix E.)

Finally, on October 30, 1975, the Steering Committee vote indicated the following measures for Category IV elementary schools in Area II:

<u>Maintain As Is</u>	<u>Phase Out</u>	<u>Hold For Further Study</u>
Chattahoochee	Bolton	Carey
Spring	Forrest	Hope
Pitts (do not connect to a middle school)	Mayson	E. P. Howell
	Robinson	

### Area IV

The State Committee placed the following Area IV elementary schools in Category IV:

1. Fountain
2. Grant Park Primary
3. Jerome Jones
4. Reynolds
5. Slaton

In addition, Milton TMR Center was slated for closing due to the poor state of the facility.

The Area IV Task Force and Elementary Schools Subcommittee recommended that Fountain, Grant Park Primary, J. Jones, Reynolds, and Slaton be held for further study. (See comments in Minority Reports in Appendix A and Composite Results in Appendix E.)

Residents of the Grant Park Primary community expressed the following concerns about the closing of their school:

1. The level of school integration would be reduced.
2. The "Middle School Concept" is unacceptable to the Grant Park Area Council if it contributes to the closing of elementary schools.
3. Closing the school would necessitate the busing of primary students which is undesirable.

Residents of the Reynolds community expressed similar concerns as those listed by citizens of the Grant Park Primary community. Also, the Reynolds community noted that Reynolds is a neighborhood school and if it were closed, the children would have to cross Memorial Drive to attend the nearest school which is Hubert Elementary. It was further suggested that the boundaries of Reynolds be enlarged. Slaton residents also felt that the level of integration would be reduced if it were closed.

Finally, the October 30, 1975 vote of the Steering Committee recommended the following changes for Area IV elementary schools:

<u>Maintain As Is</u>	<u>Phase Out</u>	<u>Hold For Further Study</u>
Fountain	(None)	(None)
Grant Park Primary		
Jerome Jones		
Reynolds		
Slaton		

### Conclusions and Recommendations

Based on the final vote of the Steering Committee, which considered the recommendations of the State Report, area task forces, and the Elementary Schools Subcommittee, the following conclusions and recommendations are appropriate:

### Area I

It was recommended that seven of the eight Area I elementary schools listed in the State Report be phased out. The seven schools that were identified for eventual closing are: (1) Carter, (2) Craddock, (3) English Primary, (4) Fain, (5) Peebles, (6) F. L. Stanton, and (7) Wright. E. A. Ware was the only elementary school in Area I on which the Steering Committee disagreed with the State Report; the Steering Committee voted that Ware be maintained as is. If these recommendations are accepted, Area I would have twenty rather than the present twenty-seven elementary schools.

### Area II

It was recommended that four of the eight Area II elementary schools listed in the State Report be phased out. The four schools that were identified for eventual closing are: (1) Capitol View, (2) J. M. Jones, (3) Perkerson, and (4) West Atlanta. Cascade, Dobbs, and M. Howell were recommended to be maintained as is. Crogman was recommended to be held for further study. If these recommendations are accepted, Area II would have twenty-seven elementary schools rather than the thirty-one that it has presently.

### Area III

It was recommended that four of the nine Area III elementary schools listed in the State Report be phased out. The four schools that were identified for eventual closing are (1) Bolton, (2) Forrest, (3) Mayson, and (4) Robinson. Chattahoochee, Spring, and Pitts were recommended to be maintained as is. Carey, Hope, and E. P. Howell were recommended to be held for further study. If these recommendations are accepted, Area III would have twenty-four elementary schools rather than the twenty-eight that it has presently.

### Area IV

Although the State Report identified five Area IV elementary schools for eventual closing, no schools were identified to be phased out. Fountain, Grant Park Primary, Jerome Jones, Reynolds, and Slaton were recommended to be maintained as is. Therefore, for the time being, Area IV would continue to have its present number of elementary schools.

## CHAPTER III

## MIDDLE SCHOOLS: CONSIDERATION OF PROBLEMS AND ISSUES

Introduction

The purpose of this chapter is to discuss the problems, issues, and concerns with regard to the schools that were designated in the State Report for conversion to middle schools. As mentioned in Chapter II, many of the problems and issues related to seven major areas, which were as follows: (1) transportation and safe access to schools, (2) the school as a center of community activity, (3) community development programs, (4) special programs at specific school sites, (5) size and space consideration, (6) level of integration, and (7) community cohesiveness.

Organizationally, this chapter follows the same format used in Chapter II, i.e., the schools are discussed on an area-by-area basis with the discussion section following each list of schools that have been designated for conversion to middle schools.

Schools Recommended for Conversion to Middle SchoolsArea I

1. Turner High School
2. Southwest High School

The Area I Task Force, Middle Schools Subcommittee, and Steering Committee agreed with the State Report which recommended that Turner and Southwest be converted to middle schools. The only reservations were: (1) Turner should not be converted to a middle school until the incumbent principal retires and (2) Southwest should not be converted to a middle school until the new high school planned for that area has been built.

Finally, on October 30, 1975, the Steering Committee recommended the following concerning Turner and Southwest high schools:

1. Turner — Convert to middle school.
2. Southwest — Convert to a middle school.

Area II

1. Fulton High School
2. Price High School
3. Sylvan High School

The Area II Task Force, Middle Schools Subcommittee, and Steering Committee recommended that Fulton and Sylvan be converted to middle schools. On the question of Price, the Area II Task Force recommended that Price be converted to a comprehensive high school. The High Schools Subcommittee recommended that Carver serve as the comprehensive high school and Price as the middle school. (See comment section of the Composite Results Chart in Appendix E.)

The recommendations of the Steering Committee were as follows:

1. Fulton — Convert to middle school.
2. Price — Convert to middle school.
3. Sylvan — Convert to middle school.

Area III

1. Pitts Elementary School
2. O'Keefe Middle School

The State Report recommended that Pitts be converted to a middle school. Area III Task Force recommended that Pitts remain an elementary school and convert Boyd Elementary to a middle school for that area. The Middle Schools Subcommittee of the Steering Committee agreed with this recommendation.

O'Keefe was recommended to be renovated or sold so that if the student population warranted, another more suitable middle school could be built in that area more distant from the Georgia Tech campus. The Area III Task Force and Middle School Subcommittee agreed on this recommendation.

The recommendations of the Steering Committee were as follows:

1. Pitts Elementary — Maintain present status.
2. O'Keefe Middle — Phase out.

Area IV

1. Bass High School
2. East Atlanta Elementary School

The State Report recommended that Bass and East Atlanta be converted to middle schools. (See comments in Minority Report in Appendix A.) Area IV Task Force recommended that Bass be retained as a high school with a reevaluation of its student enrollment in five years. The High School Subcommittee recommended that Bass be converted to a middle school with the qualification that if the population increases warrant it, additional land would be purchased for the development of a comprehensive high school for that area.

It was recommended by the Area IV Task Force that East Atlanta be developed into a comprehensive high school. However, the High Schools Subcommittee concurred with the State's recommendation and voted to convert East Atlanta to a middle school (See comments in Minority Reports in Appendix A and the Composite Results Chart in Appendix E.)

Coan and King were recommended to remain middle schools by the Area IV Task Force, Middle and High Schools Subcommittees, and Steering Committee.

The recommendations of the Steering Committee were as follows:

1. Bass — Hold for further study.
2. East Atlanta — Hold for further study.

### Conclusions and Recommendations

Based on the final vote of the Steering Committee, which considered the recommendations of the State Report, area task forces, and Middle and High Schools Subcommittees, the following conclusions and recommendations are appropriate:

#### Area I

It was recommended that Turner and Southwest high schools be converted to middle schools. As stated earlier, the only qualifications were that Turner would not be converted to a middle school until the principal retires, and Southwest would not be converted to a middle school until the new high school planned for that area has been built.

#### Area II

It was recommended that Fulton, Price, and Sylvan be converted to middle schools.

Area III

was recommended that the [redacted] [redacted] [redacted] present status and not [redacted] [redacted] [redacted] to a middle school in the State District [redacted] [redacted]. Also, O'Keefe was recommended to be phased out.

#### Area IV

It was recommended that Bass and East Atlanta be held for further study.

## CHAPTER IV

### HIGH SCHOOLS: PROBLEMS AND ISSUES

#### Introduction

The purpose of this chapter is to discuss the problems, issues, and concerns expressed by community and Facilities Commission members on the high schools that were suggested for phasing out or conversion in the State Report. Many of the problems and issues, as stated in Chapters II and III, revolved around seven broad areas. These major areas were listed as follows: (1) transportation and safe access to schools, (2) the school as a center of community activity, (3) community development programs, (4) special programs at specific school sites, (5) size and space considerations, (6) level of integration, and (7) community cohesiveness.

This chapter follows the same format used in Chapters II and III. The high schools are discussed on an area-by-area basis with the discussion section following each list of schools that have been designated for phasing out or conversion.

#### High Schools

##### Area I

##### Brown High School

Due to the strategic location of Brown, its importance to the community, and its isolation from other high schools in the System, the Area I Task Force recommended that Brown be retained and developed into a comprehensive high school. The High School Subcommittee of the Steering Committee concurred with the Area I Task Force, outlining the following qualification:

Brown should remain a high school for the next three years and reevaluated at that time to determine whether it is feasible to keep the school open.

Finally, on October 30, 1975, the Steering Committee recommended that Brown maintain its present status.

### Area II

No high schools in this area were recommended for closing in the State Report. Fulton, Price, and Sylvan were identified as high schools that should be converted to middle schools. (Refer to Chapter II for a complete discussion on these schools.)

### Area III

1. Howard High School
2. North Fulton High School
3. West Fulton High School

The Area III Task Force recommended that Howard be given five years to increase its enrollment, and if no increase is realized, it would be phased out. The High School Subcommittee recommended that Howard be phased out, citing the following qualification:

Howard High School should be phased out with the stipulation that if population increases warrant it, additional land should be purchased for the building of a comprehensive high school for the Howard/Bass area.

The Area III Task Force recommended that North Fulton be maintained, at least temporarily, for further study. Members of the High Schools Subcommittee recommended that North Fulton be converted as suggested in the State Report, to a middle school. The two qualifications accompanying this recommendation were as follows:

1. If a comprehensive high school is developed in the North Fulton area, maximum input from the community should be received.
2. If the population growth warrants, another site should be selected for building a comprehensive high school for the North Fulton area.

It was recommended by the Area III Task Force that West Fulton remain a high school and Grove Park be converted to a middle school for that area. The High Schools Subcommittee recommended that West Fulton be converted to a middle school as the State Report suggested.

The recommendations of the Steering Committee were as follows:

1. Howard High School — Phase out
2. North Fulton — Convert to middle school
3. West Fulton — Hold for further study

#### Area IV

1. Murphy High School
2. Roosevelt High School
3. Smith High School

Murphy and Roosevelt were recommended by the Area IV Task Force, High Schools Subcommittee, and Steering Committee to be converted to comprehensive high schools. It was further recommended by the High Schools Subcommittee that Smith be phased out with the following qualifications:

1. Recreational facilities at Smith be retained for community use.
2. The high school for this area should be named the Smith/Roosevelt Comprehensive High School.

The Area IV Task Force voted to phase Smith out also. In spite of this recommendation, many Smith supporters expressed their concern about the feasibility of such a move. (Refer to Minority Reports in Appendix A.)

The recommendations of the Steering Committee were as follows:

1. Murphy — Maintain present status
2. Roosevelt — Maintain present status
3. Smith — Phase out

#### Conclusions and Recommendations

Based on the final vote of the Steering Committee, which considered the recommendations of the State Report, area task forces, and the High Schools Subcommittee, the following conclusions and recommendations are appropriate:

##### Area I

It was recommended that Brown be maintained as is. Turner and Southwest were recommended in the State Report for conversion to middle schools. (Refer to Chapter II for complete details.)

##### Area II

No high schools in this area were recommended for closing in the State Report. Fulton, Price, and Sylvan were identified as high schools that should be converted to middle schools. (Refer to Chapter II for complete details.)

Area III

Howard was recommended to be phased out. West Fulton was recommended to be held for further study, and North Fulton was recommended to be converted to a middle school.

Area IV

Murphy and Roosevelt were recommended to maintain their present status. Smith was recommended to be phased out.

3. English Avenue Primary

Perkerson

West Atlanta

Area IV

The State Committee placed the following Area IV elementary schools in

Category IV:

1. Fountain

2. Grant Park Primary

3. Jerome Jones

4. Reynolds

5. Slaton

## Conclusions and Recommendations

Based on the final vote of the Steering Committee, which considered the recommendations of the State Report, area task forces, and the Elementary Schools Subcommittee, the following conclusions and recommendations are appropriate:

Jerome Jones, Reynolds, and Slaton were recommended to be maintained as is. Therefore, for the time being, Area IV would continue to have its present number of elementary schools.

Finally, on October 30, 1975, the Steering Committee recommended the following concerning Turner and Southwest high schools:

1. Turner -- Convert to middle school.
2. Southwest -- Convert to a middle school.

2. O'Keefe Middle -- Phase out.

## Area IV

1. Bass High School
2. East Atlanta Elementary School

converted to a middle school until the new high school planned for that area was built.

## Area II

It was recommended that Fulton, Price, and Sylvan be converted to middle schools.

22

|

Brown should remain a high school for the next three years and use that

that time to determine whether it is feasible to keep the school open.

Finally, on October 30, 1975, the Steering Committee recommended that Brown maintain its present status.

The recommendations of the Steering Committee were as follows:

1. Howard High School — Phase out
2. North Fulton — Convert to middle school
3. West Fulton — Hold for further study

It was recommended that Brown be maintained as is. Turner and Southwest were recommended in the State Report for conversion to middle schools. (Refer to Chapter II for complete details.)

### Area II

No high schools in this area were recommended for closing in the State Report. Fulton, Price, and Sylvan were identified as high schools that should be converted to middle schools. (Refer to Chapter II for complete details.)

## CHAPTER V

## SUMMARY OF FINDINGS AND RECOMMENDATIONS

Review of the Process

The Steering Committee of the Superintendent's Facilities Commission carefully considered all facts and relevant input regarding the closing or change in use of the schools of the City of Atlanta. Particular attention was paid to those schools recommended for closing or change in use by the State Department of Education Comprehensive Study, submitted to the Atlanta Board of Education in February 1975. An extensive effort to define and explore issues and gather information at the community, grass roots level was undertaken. The broad range of community concern was examined and evaluated in this lengthy process. The recommendations summarized here and detailed in Chapters II, III, and IV are the results of this careful study.

Elementary School Recommendations

At present there are 112 elementary schools serving the active enrollment of 48,684 elementary school pupils. Of these schools, the State Report proposed that 31 be closed. The Superintendent's Commission on Facilities was concerned mainly though not exclusively with these 31 schools among the elementary schools. The recommendations of the Steering Committee of the Superintendent's Facility Commission were as follows:

Maintain As Is

Cascade	M. Howell	Reynolds
Chattahoochee	Grant Park Primary	Slaton
Dobbs	Jerome Jones	Spring
Fountain	Pitts	E. A. Ware

Phase Out

Bolton	Fain	Perkerson
Capitol	Forrest	Robinson
Carter	J. M. Jones	F. L. Stanton
Craddock	Mayson	West Atlanta
English Primary	Peeples	Wright

Hold for Further Study

Crogman	Hope
Carey	E. P. Howell

In addition, Milton Avenue TMR was recommended for closing in favor of a more modern appropriate facility.

Middle School Recommendations

The active middle school enrollment is presently 6,860. However, this figure excludes 6th, 7th, and 8th grade pupils who now go to either elementary or high schools due to the lack of middle schools. Eight middle schools now serve Atlanta; the State Report recommended twenty such schools. The Superintendent's Commission concerned itself with ten of these schools. The Steering Committee recommendations were as follows:

Convert to Middle Schools

Fulton High	Price High	Sylvan High
North Fulton High	Southwest High (Old)	Turner High

Do Not Convert to Middle School

Pitts Elementary

Hold for Further Study

Bass High  
East Atlanta High

Phase Out

O'Keefe Middle

High School Recommendations

The State Report endorsed the 9 through 12 grade comprehensive high school concept. The present structure of 23 high schools serving an active enrollment of 28,920 would be modified, according to the State recommendation, to cut the high schools to 12. The

Steering Committee of the Superintendent's Facility Commission voted to endorse the comprehensive high school concept serving grades 9 through 12, also. Recommendations concerning high schools (not given under the previous heading) were as follows:

Maintain As Is

Murphy High  
Roosevelt High

Phase Out

Howard High  
Smith High

Hold for Further Study

Brown High  
West Fulton High

Task Force Participation

The four area task forces encouraged and solicited input from all members of the interested community. No school-community was left out of the process of communication. Appendix C gives the data summarizing the representation of each school-community at the task force meetings. These attendance data document the extent to which the community took advantage of the opportunity to participate in the task force proceedings. In general, representation was quite high. Area I had 73 per cent of the schools represented in at least one meeting, Area II had 93 per cent representation, Area III had 86 per cent representation, and Area IV had 83 per cent representation. Of the schools directly being considered for changes, that is, phasing out or different uses, 96 per cent were represented. Thus, overwhelming school-community response was evidenced.

Conclusion

This project exemplified dedicated teamwork on the part of parents, community, and staff. There could be no better example of true community involvement characterized by observable, positive commitment. Therefore, the Steering Committee of the

Superintendent's Commission for Facilities wishes to submit this report with respect to facility closings, conversions and changes in the Atlanta Public Schools in the belief that these recommendations will be productive and positive for the Atlanta Board of Education and the community of the City of Atlanta.

## MINORITY REPORT SUMMARIES

## AREA I

## R. L. Craddock Elementary School

**Purpose:** To oppose the closing of Craddock Elementary

**Rationale:**

- I. Herndon Homes is served educationally and culturally by Craddock Elementary. It is a symbol of viable school-community relations. This low-income area would suffer the loss of this positive influence if Craddock were closed.
- II. Day care services, through Title XX, are available at Craddock. This program furnishes child care for welfare parents otherwise unable to afford such services. Its loss would adversely affect the economic aspirations of the parents and would deprive the young children of an early academic start.
- III. If Craddock were closed, the children would have to cross Northside Drive, a very busy thoroughfare, to attend elementary school.
- IV. Craddock has a tradition of academic excellence which has made it among the ten best in Atlanta with respect to pupil achievement.
- V. Craddock is demanding equal consideration by the Board of Education with respect to keeping its school open.
- VI. In 1959, a new building was added in which 95 per cent of the school program is being carried out — the old building was inspected in the summer of 1975 and judged to be physically sound and tornado proof.
- VII. Sending Craddock pupils to Bethune or English Avenue would create an overcrowded situation.,
- VIII. Closure of Craddock would impose undue hardship on welfare mothers in the Herndon Homes project, i.e., bus fare, etc.

### **Peeples Street Elementary School**

**Purpose:** To oppose the closing of Peeples Street Elementary

**Rationale:**

- I. Enrollment of 322 students live within walking distance of the school — majority of parents work and do not have automobiles — children would encounter heavy traffic in walking to other schools twice as far away — Peeples is near Brown and parents depend on older brothers and sisters to walk younger children to school, safely.
- II. Peeples has EMR and LD resource rooms — being near a bus line is extremely beneficial to out-of-area pupils.
- III. J. C. Harris to which many of the Peeples' pupils would go is already overcrowded.
- IV. The development and restoration of this area has already begun and will likely continue due to the construction of a MARTA station at Lee and Gordon.

### **English Avenue Primary School**

**Purpose:** To oppose the closing of English Avenue Primary School

**Rationale:**

- I. English Primary is one of the few bright spots in the community — well cared for building.
- II. The instructional program Follow-Through is "going" and "alive." It is definitely helping boys and girls to progress from ages 4-8 years.
  - a. Successful in finding techniques to teach children to read.
  - b. Parent involvement is successful.
  - c. Multi-age grouping used effectively.
  - d. Individualized instruction utilized.
- III. Concept of using "program administrators" to direct small elementary schools is educationally sound as evidenced at English Avenue Primary — Atlanta Public Schools should use this school as a model for others.

- IV. Carter has Title I Reading/English and Title I Math programs — achievement scores have been commendable.
- V. Using Carter as a community center is an unrealistic recommendation, since there is a YWCA and Kennedy Center in the immediate area.
- VI. Amanda Garden Apartments (public housing) is being closed and families sent to Eagan Homes — these children will be attending Carter.
- VII. Busing to Herndon by the Board of Education is too costly, and car fare paid by parents would provide a hardship.
- VIII. Carter is providing a valuable service to the community and it is hoped that it will not be disrupted.

#### **Margaret Fain Elementary School**

**Purpose:** To oppose the closing of Margaret Fain School

**Rationale:**

- I. Located in densely populated area.
- II. 95 per cent attendance of 625 pupils.
- III. Transportation cost prohibitive.
- IV. Safety factor with regard to walking distance of other neighborhood schools.
- V. Fain facilities need upgrading.

#### **F. L. Stanton Elementary School**

**Purpose:** To oppose the closing of F. L. Stanton School

**Rationale:**

- I. Instruction — 1st and 4th grades have made commendable achievement on standardized tests.
- F. L. Stanton involved in elementary curriculum revision project and presently piloting the Teacher Assessment and Evaluation Plan.

## II. General Assets

- a. Outstanding scouting program.
- b. Strong PTA organization.
- c. Viable parent volunteer program.
- d. Excellent student field trips.
- e. Fund raising — monies have been secured by the community to purchase essential items for the school — not provided by the Board of Education.
- g. Stanton has an adjoining park which offers recreational and environmental opportunities.
- h. Stanton is an architecturally sound building and has historic attributes — Stanton survey shows 600 pupils living in the area.

## III. Plan of Action Regarding Increasing Enrollment

- a. Expand experimental programs.
- b. Perpetuate innovative projects, i.e., homemaking, ecology, etc.
- c. Initiate program for the gifted to impede the flow of pupils to private schools.
- d. Extend attendance boundaries which have not changed significantly in 20 years.

## IV. Transportation

- a. School buses should be used to transport pupils in the area.
- b. Stanton has program to attract students who are currently being "bused" across the city.

### AREA III

#### Minnie Howell Elementary School

**Purpose:** To oppose the closing of Minnie Howell and, instead, to recommend Minnie Howell remain open and Blair Village be converted to other use.

**Rationale:**

- I. Parental involvement is high at Minnie Howell as compared to Blair Village.
- II. The construction and layout is superior at Minnie Howell as compared to Blair Village.
- III. The general environment and safety factors are better at Minnie Howell as compared to Blair Village.
- IV. The level of academic achievement at Minnie Howell is higher than at Blair Village.
- V. The per pupil expenditure is \$884. Minnie Howell as compared to \$948 at Blair Village.

**Crogman Elementary School**

**Purpose:** To recommend that Crogman be relocated in the Parks Middle School facility. Parks as a middle school would be phased out.

**Rationale:**

- I. Crogman's physical plant is old and delapidated.
- II. The young children need a nearby facility, which would be furnished by converting Parks.
- III. The Parks facility is suitable for modern, open-space curriculum.
- IV. Older children would not suffer as would the younger ones if they had to be transported significant distances. Thus, the closing of Parks as a middle school would be disruptive with respect to transportation.

**AREA III****E. P. Howell Elementary School**

**Purpose:** To oppose the closing of E. P. Howell and recommend that it be held for further study.

**Rationale:**

- I. Extensive remodeling and renovation has been accomplished since 1972. This includes partial air conditioning and carpeting.

- II. The auditorium serves quite well as a gymnasium providing space for physical education activities.
- III. There is extensive community involvement at E. P. Howell. This includes Town Hall Meetings, Rapid Transit Meetings, Civil Defense Study Groups, and Target Hardening and Opportunity Reduction (THOR) Study Groups.
- IV. An active Parent-Teacher Association supplements the educational materials and supplies as well as contributes building improvements. This includes playground equipment, library purchases, carpeting, and a piano. The PTA also has participated in a program which has improved attendance by 5.6 per cent.
- V. The school is located in a safe, convenient, pleasant area. It adjoins an Atlanta Parks and Recreation Department Facility. The Fulton County Health Department also has a facility adjacent to E. P. Howell. Thus, a complex of services are available in immediate proximity to E. P. Howell.
- VI. The school is located four blocks from a proposed MARTA station. The Atlanta Regional Commission has projected an increase in population in the immediate vicinity. The land use pattern is expected to be primarily residential.
- VII. Three other schools in a two mile radius of E. P. Howell have been closed within the past two years.
- VIII. The physical plant, although almost 50 years old, has been renovated. Renovations have also been made to the grounds which have provided beautification and safety. There is enough acreage to allow enlargement of the present facility.
- IX. With closing other schools as recommended in the State Report, E. P. Howell would gain at least 182 in Average Daily Attendance (ADA).

### AREA III

#### J. L. Mayson Elementary School

Purpose: To oppose the closing of Mayson Elementary School.

**Rationale:**

- I. School easily accessible as regards walking distance.
- II. Smaller pupil population allows teachers to give more individual attention to the students.
- III. Mayson is well equipped to serve its students.
- IV. Closing Mayson will not solve the financial problems of the Board of Education — they should look elsewhere.
- V. Older schools should be upgraded to give pupils quality education.

**Robinson Elementary School**

**Purpose:** To oppose the closing of Robinson Elementary School

**Rationale:**

- I. Robinson building is of sound construction and very clean.
- II. There should be a place in the Atlanta Public Schools for small, operative schools.
- III. If Boyd is changed to a middle school, there would be even greater need for Robinson to remain open.
- IV. A small school is advantageous to children from the standpoint of development self-concept in a small, home-like situation.
- V. Atmosphere of a small school lends itself to better discipline.
- VI. Robinson pupils are receiving a quality education.

**AREA IV****East Atlanta High**

**Purpose:** To oppose the conversion of East Atlanta to a middle school and to retain it as a high school and convert to a comprehensive high school.

**Rationale:**

- I. Adjacent property should be purchased to bring size and acreage of existing facility up to state regulations.

## MEMORANDUM

To: Mr. Kemp

From: The Executive Committee of the Area III Task Force

Having received the balloting results of the Steering Committee, the Executive Committee of the Area III Task Force is pleased to note that the Steering Committee agreed with 80% of our specific recommendations. The Executive Committee has prepared comments on certain schools as attached.

In addition, the Task Force wishes to express concern regarding the consideration of other recommendations made in the Area III final report. Specifically, general recommendations were made regarding certain schools designated in categories I, II and III. It is not evident in the steering Committee's report that these additional comments will be brought to the attention of the Board in their final deliberations. We respectfully request that this additional information be transmitted to the Board in your final report.

Responses from Area III Task ForceO'KEEFE

Since the sub-committee agreed with the recommendations of the Area III Task Force on this school, the Task Force requests that comments number 2, 3, 4, and 5 be underlined.

HOWARD

Since the sub-committee in essence agreed with the recommendations of the Area III Task Force on this school the Task Force requests that comments number 4, 5, and 8 be underlined.

NORTH FULTON

Since the sub-committee in essence agreed with the recommendations of the Area III Task Force on this school, the Task Force requests a review of the balloting results in regard to this school. Seven votes to maintain plus 8 votes to hold for study as opposed to 10 comments concerning conversion to a middle school would indicate a "hold for study" category (inconsistent with vote tally and category of Bass High School and others).

- II. Geographic location, nature of younger and older constituents, and newness of school plant would warrant renovation of East Atlanta and change to comprehensive high school.
- III. Numbers of students could be changed from potential dropouts to technically trained, productive members of our society with additional educational opportunity provided by a comprehensive high school in the community — the present school has no provision for technical and vocational education.
- IV. A middle school program in the East Atlanta facility would send graduates to high schools miles away from the community.

#### Grant Park Primary School

**Purpose:** To oppose the closing of Grant Park Primary School

**Rationale:**

- I. School boundaries should be changed.
- II. Grant Park is very important to the total neighborhood planning and development.

#### Reynolds Elementary School

**Purpose:** To oppose the closing of Reynolds Elementary School

**Rationale:**

- I. School boundaries should be changed.
- II. Reynolds School is very important to the total neighborhood planning and development.

### AREA IV

#### Smith High School

**Purpose:** To oppose the closing of Smith High School and to recommend the retaining of the comprehensive high school concept in a new Smith High building or in a renovated Smith High.

has and is taking place and its central location in Atlanta. It serves Capitol Homes, Cabbage Town, etc.

- IV. Atlanta Public Schools has a commitment to the Smith High community which the citizens are still hoping will be fulfilled. The residents of this area have maintained a continued, staunch interest in this school community.

## APPENDICES

TABLE A.1

## ADDENDUM

## ACKNOWLEDGEMENTS AND COMMISSION MEMBERSHIP LIST

Many persons participated significantly in the fulfillment of the challenge given this commission. However, it is incumbent upon us to acknowledge, specifically, the dedicated contribution of the following groups:

### Commission Chairperson

Mr. Edmond T. Kemp

### The Steering Committee

Mr. William Allison  
 Mr. Willie Bolden  
 Mr. John Busby  
 Mr. Leon S. Eplan  
 Mr. Davey Gibson  
 Mrs. Virginina Tate  
 Mr. Tom Grant  
 Mr. Richard Hodges  
 Mr. Dwight Jackson  
 Mr. Dick Layton  
 Mr. Theodore Mastroripanni  
 Dr. Carroll McGuffey  
 Mr. Ryburn Stephens  
 Mr. Dan Sweat  
 Mr. Lyndon Wade

### Technical Assistants

Dr. Hillard A. Bowen  
 Dr. Sidney Estes  
 Dr. E. Curtis Henson  
 Ms. Barbara I. Whitaker  
 Dr. Darwin W. Womack  
 Dr. Walter D. Mayfield

### Area Task Force Convenors

Mr. Ernest Pharr  
 Dr. Evelyn Turner  
 Mrs. Lucia L. Smith  
 Dr. Alvin Dawson  
 Mrs. Joan Zion

### Ballot Validating Committee

Rev. Richard Fuller  
 Mrs. Beatrice Garland  
 Mr. Theodore Jones  
 Mrs. Ina Evans

### Chairpersons

Mrs. Elmer Gould  
 Mrs. Ineata Lyman  
 Mrs. Edith Hammond  
 Mr. Fred Clark  
 Mrs. Goldie Johnson

## AREA TASK FORCE MEMBERS

### Area I

Mrs. Mattie Harris  
 Rev. Robert L. Johnson, Sr.  
 Mr. Eugene McFarlin  
 Mrs. Frances Saddler  
 Mrs. Mary Scott  
 Mrs. Ruby Houston  
 Mrs. Verna Harris  
 Mrs. Texann Ingram  
 Mr. Samuel Fullwood  
 Mr. Ray Kennix  
 Mr. Grady C. Gray  
 Mr. Robert Chatman

Mrs. Mary Copeland  
 Mrs. Diana Durrett  
 Mrs. Barbara Daniely  
 Mr. Joseph Atkins  
 Mrs. Annie Boyd  
 Mr. W. L. Pritchett  
 Mrs. Geraldine Hartnett  
 Mrs. Virginia Lewis  
 Mrs. Paul Grier  
 Mr. Al Townsend  
 Ms. Betty Young  
 Mrs. Mary Vowels

Area I (Cont'd.)

Mr. Benjamin Brown  
 Mrs. Betty Travis  
 Miss Patrice Perkins  
 Miss Caria Wilkins  
 Mrs. Lizzie Terry  
 Mr. Joseph W. Robinson  
 Mr. Al Dodson  
 Miss Emily Olshine

COMPOSITE VOTING RESULTS CHART

ATLANTA PUBLIC SCHOOLS  
SUPERINTENDENT'S COMMISSION FOR FACILITIES

COMPOSITE RESULTS

of

STEERING COMMITTEE'S BALLOTING

for

CATEGORY IV SCHOOLS

from

STATE SURVEY COMMITTEE - FEBRUARY, 1975

November 10, 1975

November 5, 1975

TO WHOM IT MAY CONCERN:

This is informative in the area of conversions (i.e., elementary school to middle, middle school to high, high school to middle school); the results of the comment column of the ballot should be carefully scrutinized. This needs to be done as it was observed, by the committee, in tabulating the voting results, that the four category columns of the ballot were used by many of the voting members interchangeably. For example, a ballot would be marked "Maintain As Is", "Phase Out", or "Hold for Further Study", and in the comment column the voting member stated, "convert, change, combine, use in different manner than as a school facility, etc." This problem in interpreting the total response of each voter so that a specific result could be had, is being brought to the attention of the Superintendent's Commission for Facilities. Therefore, the voting results will be accompanied by a summarization of all of the comments appearing on the 27 ballots for documentation and reference purposes by those receiving the tabulated results.

Respectfully,

THE BALLOT VALIDATING COMMITTEE

Theodore R. Jones, Area I

Beatrice Garland, Area II

Richard Fuller, Area III

Ina C. Evans, Area IV

Alternative Concepts of Atlanta Public School Organization Pattern			HOLD FUR- THER STUDY	AB STAIN	COMMENTS
	YES	NO			
1. Elem. (K-5); Middle (6-8) Secondary (9-12)	22		1	3	1. Upgrade
2. Comprehensive High School Concept (9-12) for the Atlanta Public Schools	19	1	1	5	2. Community may need further education on this concept Bd. of Ed. should inform public of advantages and disadvantages.
3. Comprehensive High School Concept as determined by the community to meet pupil needs	17	2	2	4	3. In certain areas Comp. H.S. not needed-alternative types of magnet schools could be used.
4. Academic High School with Vocational Skills Centers in school area	6	7	4	7	2. Every student needs vocational skills

Additional Schools considered and Recommendations:

AREA IV

1. Elementary school sub-committee investigation of feasibility of Gilbert Elementary School as a facility for the Milton Avenue Special Education Program, if and when it were to become available.

AREA I

1. Middle school sub-committee recommended maintaining Kennedy as a middle school.

AREA II

1. State Report recommends Carver be developed into a Comprehensive High School (See State Report and Area II Task Force Recommendations regarding Price)
