ABSTRACT

These materials for the curriculum area of economics and managing resources comprise one of six such packages that are part of the Ohio Vocational Consumer/Homemaking Curriculum Guide. The curriculum area or perennial problem taken up in this document is divided into three practical problems about what to do regarding: (1) decision making; (2) resource/product management; and (3) citizen participation. These are further categorized into seven concerns: external and personal factors affecting consumer decisions, financial planning, purchasing, conserving, consumer protection, and consumer responsibilities. Each concern is divided into a number of concepts or modules. This package consists of 25 modules. The format for each module is as follows: code, perennial problem, practical problem, concern/concept, homemaking skills (listing of various skills needed by the homemaker as related to the developed concepts), and a chart relating process skills (steps of practical reasoning), concepts (further breakdown of the topic), and strategies (information and activities that facilitate the teaching/learning of the concepts). In some cases, specific resources are attached; otherwise, teachers may choose their own resources based upon availability and appropriateness to individual classrooms. (YLB)

INTRODUCTION

Functioning in the marketplace has become a complex process in today's economy. As consumer, producer and citizen, the individual is concerned with economic questions during virtually every hour.

Understanding our economy is vital. Widespread economic literacy is essential if we are to maintain the viability of an economic and political system based on individual freedom and responsibility.

The curriculum addresses economic theory - macroeconomic/microeconomic issues and applied economics - financial planning and consumer decisions. The economic problems presented in the curriculum include those of interest to students as adolescent consumers and those they will face in the future as producers/consumers/citizens.

The practical reasoning approach brings an appropriate process for students to explore the many decisions to be made. Students can be encouraged to be a prosumer who asks, "What is best for me, my family and society?" while looking at all sides of the issue (producer, consumer, government, financial institution, foreign trade).

Special acknowledgements are due to the following for their leadership and guidance in incorporating economic concepts:

Mr. Donald G. Fell, President
Ohio Council on Economic Education

Ms. Sue Saravalli, Teacher
Vocational Home Economics
Springfield City Schools

Dr. George M. Vredevelde, Director
Greater Cincinnati Center for Economic Education

HOMEMAKING SKILLS

Homemaking skills which are essential for performance of the following homemaking tasks are developed in the modules in Economics and Managing Resources.

Managing Money

- Balance checkbook
- Collect information about new products
- Develop a budget based upon income
- Develop a savings plan
- Develop and maintain an accounting and filing system
- Establish and maintain a sound insurance program
- Include family members in financial decisions.
- Pay bills
- Prepare estate planning information sheet and update regularly
- Provide a will and update regularly
- Read and interpret contracts before signing
- Regulate cash flow to meet payments
- Seek legal advice
- Set goals and priorities for use of money
- Shop for goods and services
- Use credit

Providing Transportation

- Budget for variable and fixed transportation costs
- Check the oil in vehicle
- Drive a vehicle
- Equip vehicle for possible emergency
- Fill vehicle with proper grade of fuel
- Identify signs of vehicle malfunction
- Provide for regular vehicle maintenance
- Select a vehicle
- Use mass transit
- Utilize carpools
- Walk whenever possible

Managing Time

- Develop schedule of routine household tasks
- Keep a calendar of activities
- Organize tasks to save time and energy
- Plan time alone with spouse
- Plan and coordinate family activities
- Provide time for self
- Set priorities for use of time

PERENNIAL PROBLEM

What To Do Regarding Economics And Managing Resources

PRACTICAL PROBLEM

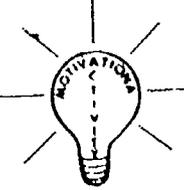

What Should I Do Regarding Decision Making?

CONCERN/CONCEPT

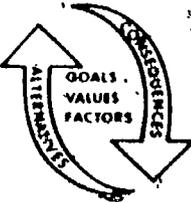

External Factors Affecting Consumer Decisions/Economic Systems - Macroeconomic Issues

HOMEMAKING SKILLS

- Identify types of economic systems
- Identify scarce resources
- Analyze opportunity costs

PROCESS SKILLS	CONCEPTS	STRATEGIES
 	<p>Economic wants</p> <p>Economic terms --opportunity costs</p>	<p>Find newspaper/magazine clippings related to economics for bulletin board. Discuss how these impact on people's lives.</p> <p>Using resources, define economics.</p> <p>Individually write a response to the question: Should I be concerned about economics? Ask your parents or other adults to respond to this question. Share with class.</p> <p>What would you like to buy that you are unable to purchase? Why can't you buy everything?</p> <p>Using resources, define scarcity (total economic wants exceed available resources) and opportunity cost (for the producer--opportunity cost is what is given up when decisions are made to use a scarce productive resource to produce particular goods and services; for the consumer--opportunity cost is what is given up when action is taken [a purchase]).</p> <p>Read each of the five situations.</p> <p>--You have saved \$60. You would like to buy a pair of roller skates with specially attached boots, but you also need a jacket and sweater. The \$60 will only be enough to buy either the skates or the jacket and sweater.</p>

PROCESS SKILLS	CONCEPTS	STRATEGIES
	<p>Economic terms --opportunity costs (continued)</p> <p>Scarcity</p>	<p>--You are the fire chief in a small town of 20,000. There are only enough fire engines to fight one major fire. Unluckily, two major fires break out at once. The fire department of the nearby town that usually helps you out is engaged in fighting a fire.</p> <p>--You are the manager of a supermarket. Lots of consumers are waiting to be checked through two different lines, but you have only one packer.</p> <p>--You have a busy job and hire someone to mow your lawn.</p> <p>--You have been given a free ticket to a baseball game or King's Island.</p> <p>Discuss the following questions for each situation.</p> <p>--What resource is scarce? (Money or income, fire engines, labor, time, energy.)</p> <p>--What decisions must be made for using the resource? (Which item to buy, which fire is more important, which line to help, who should mow the lawn, which activity?)</p> <p>--What is the opportunity cost? (The thing(s) not purchased, not being able to extinguish one of the fires, customer inconvenience.)</p> <p>Do a scarcity diary for a week. Record source of information and scarcity. (Newspaper—too few physicians; radio—not enough rain for farmers; wages paid to mower, activity not chosen.)</p> <p>Do *Musical Chair Scarcity activity to demonstrate the role of scarcity in economic systems.</p> <p>Individually write a paragraph illustrating the following chart.</p> <div style="text-align: center;"> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="border: 1px solid black; padding: 2px;">Unlimited Wants</div> <div style="font-size: 2em;">and</div> <div style="border: 1px solid black; padding: 2px;">Limited Resources</div> </div> <p style="text-align: center;">create problems of</p> <div style="border: 1px solid black; padding: 5px; width: fit-content; margin: 0 auto;">Scarcity and the need for choices</div> <p style="text-align: center;">which necessitates</p> <div style="border: 1px solid black; padding: 2px; width: fit-content; margin: 0 auto;">Economic Systems</div> </div>

PROCESS SKILLS	CONCEPTS	STRATEGIES
	<p>Types of economic systems</p> <p>Economic goals</p>	<p>Read <u>*The Economic Problem</u>. Develop definitions of the three types of economic systems.</p> <ul style="list-style-type: none"> --Tradition--(People generally repeat the decisions made at an earlier time or by an earlier generation,) --Command--(Decisions are made largely by an authority and then passed down to the people who must accept them.) --Market--(All persons participate by registering their desires by choosing products/ services in the market. Individuals decide what should be produced and how to produce it.) <p>Do <u>*Types of Economic Systems</u> activity. For each type identify underlying goals and values.</p> <p>What do economic goals include?</p> <ul style="list-style-type: none"> --Freedom (of consumers to choose, to establish business, to invest or save) --Efficiency --Equity --Full employment --Price stability --Security --Growth <p>Which action illustrates each goal?</p> <ul style="list-style-type: none"> --Purchases an insurance policy (security). --Shops in various stores for groceries (freedom). --Invests savings in stocks (growth). --Announces new company pension plan (security). --Company installs robots on assembly line, reducing production costs (efficiency). --School lunches are priced on sliding scale so students from families with low income pay less (equity). --Price of gasoline remains same for a year (price stability). --Gross National Product increases (growth). --A large company is rehiring all its laid-off employees (full employment). <p>Add additional actions for each goal by reflecting on how this affects self, family, society.</p> <p>IEE--Develop notebook of newspaper articles related to the economy. For each article, note how the economic problem affects individuals and families.</p>

MUSICAL CHAIRS SCARCITY

Concept: To illustrate the role of scarcity in economic systems.

Objective: To possess a product each time the stop signal is given.

PART I

Directions:

1. Students sit in a circle and play musical chairs.
2. Distribute an insufficient number of products (apples, pencils, etc.) to the group.
3. As an agreed-upon signal (music, bell) sounds to begin, each student with a "product" will pass it to the person on left.
4. As soon as the signal sounds again, all passing stops.
5. Those who do not have a "product" are penalized 10 points.
6. Those who have products each time are awarded 10 points.
7. The student with the highest number of points after the agreed-upon number of rounds is the winner.
8. After playing, answer these questions individually or as a group.

Questions:

- How did you feel when you were left with no "product"?
- How did you feel when you had a "product" but were afraid the signal would ring as you passed the "product" and no longer had one?
- When someone failed to pass the "product" freely, hanging on to the "product" to the very last moment, how did you feel about them?
- Compile a list of some responsibilities the individual has toward the group (society).
- List some responsibilities society (the group) has toward the individual.
- Identify with a term what was happening in the game as it applies to society and economics (scarcity).
- If we compared the working of this game to the working of an economy, what factors might we list?

EXAMPLE:	scarcity	helplessness
	self-interest	commitment of some of the group
	fear	to keep going
	frustration	lack of commitment on the part
		of some

PART II

Directions:

1. Play the game again, but this time give students play money by drawing from a bag a "pay envelope" containing varying amounts of play money. Each envelope will be identified with the name of an occupation--some unskilled, some requiring further training and education.
2. During this round after the stop signal sounds, students have 30 seconds to bargain for a product.
3. This time the teacher will play (but not bargain) and each time the teacher is left with a product, he/she removes it from the "economy," thus reducing supply.
4. After several rounds, ask these additional questions:
 - What happened when there was money to spend? (competition, demand)
 - As the rounds progressed, what happened to the number of products? (supply reduced)
 - What happened to the "cost" of the remaining supply? (cost was higher)
 - Identify, with terms, what was happening in the game as it applies to society and economics. (supply, demand, price or cost, scarcity)
 - What implications do you see from the amount of money you received in your "pay envelope"?
 - What "roles" related to the economy did the individual play? (consumer, producer)
 - Since the teacher made the rules of the game, what was his/her position in the economy?
 - Were there rules of the game you might like to have changed?
 - What role would you have been playing had you been able to help make the rules of the game? (citizen)

THE ECONOMIC PROBLEM

...[Much] economics grows out of one simple but powerful fact: There is never enough of everything to go around. For this reason, the study of economics focuses upon the concepts of scarcity and choice. Every society must find a way to divide what it has among what it needs. This generalization applies to such varied goods and services as food, shelter, transportation, and medical care.

The world's poorest societies face scarcity in its most severe form. Anyone living in an underdeveloped country where a typical person's income may average less than \$100 a year knows that he cannot have everything he wants. The same point applies, however, to the governments and people of rich societies, such as...the United States. The United States may have to choose between trips to the moon and a clean environment. A rich family in the United States may have to choose between an expensive automobile and a vacation in Europe....

Economies Along Spectrums

Throughout history, people have developed many ways of organizing a society to decide what, how, and for whom to produce goods and services. Different values, backgrounds, and geography have produced a wide variety of economies. Out of this variety, however, three general types or categories of economic systems can be identified--traditional, command, and market.

The oldest of these systems is the traditional economy.... Such systems answer the what, how, and for whom questions largely according to what was done in the past. They stress the old ways, not new ways or progress. People in these societies would be puzzled by the emphasis which [many modern] economies...place on constant change and improvement.

A second group, nearly as ancient as the first, includes the command economies. Rulers run these economies from above. The commands of these rulers determine the answers to key economic questions. In the past, and in a few modern societies, the command economies have often preferred old, set ways of doing things. In that respect, they resemble traditional economies. But today many nations with command economies, such as the Soviet Union and China, stress progress.

A third group, only a few centuries old, contains the market economies... [T]hey include some of the wealthiest economies the world has yet seen, such as the United States and Canada. Like the newer command economies, they emphasize progress and change. For the most part, the buying and selling activities of private citizens answer the what, how, and for whom questions in market economies. Citizens sell their labor to one another for whatever price they can get. Then they use the proceeds to buy whatever they want and can afford. Therefore, unlike a command economy, the general public--not the rulers--decides what should be produced or how to produce it.

Source: Joint Council on Economic Education Curriculum Materials.

Each of the three types of economic systems has been described very simply here. Moreover, when you try to put the world's economies into one of these three groups, you will find that no economy fits exactly into place. Although the United States serves as an example of a market economy, it has elements of...traditional economic systems. For example, ...some individuals, almost without giving it another thought, go into the same line of work as their fathers or mothers. [In many instances, women do not yet receive as much pay as men for equal work.]

[T]he Soviet command economy has some elements of a market system. Some farmers on collective or state farms sell parts of what they raise for whatever they can get in the market. Likewise, the Soviet system has elements of a traditional economy. The long history of the Soviet people still influences the country today. Yet, for the most part, the Soviet economy operates on commands from the central government....

No economy is fully a traditional, command, or market economy. Each has traces of all three systems.

EM 1.1e

TYPES OF ECONOMIC SYSTEMS

Below are statements describing various economic actions. In the space provided, label or classify each statement according to whether you think it is typical of a traditional economy (T), a command economy (C), or a market economy (M):

1. "On the farms, the working day lasts from before sunrise until dusk or dark. As they have done for centuries, women follow the reapers and binders on foot to gather the gleanings from the fields;..."
2. "The problem of finding skilled workers was immense. There were simply not enough trained men available. His competitors were fighting for their share of the labor supply. [He] decided to introduce a five-dollar-a-day minimum wage. The new minimum more than doubled the existing wage...."
3. "The practice of giving certain industries [first call on scarce materials] has brought more rapid overall economic growth than otherwise might have been possible."
4. "The proclamation of the [head of state] declared that no banking operations should be carried on throughout the country until further notice."
5. "The [people being studied] were still living on seal meat and were making no attempt to kill any of the numerous caribou that were continually migrating past. I thought at first that there might be some taboo preventing them from hunting caribou on ice, but this they told me was not so. It was simply that they had never hunted caribou on the ice and had not considered it possible...."
6. "Holding prices in check was difficult. A great burden fell on the Office of Price Administration, created to keep the lid on prices by setting price ceilings on a large list of commodities which were much in demand."

PERENNIAL PROBLEM

What To Do Regarding Economics And Managing Resources

PRACTICAL PROBLEM

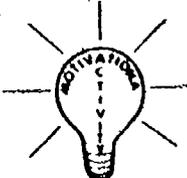

What Should I Do Regarding Decision Making?

CONCERN/CONCEPT

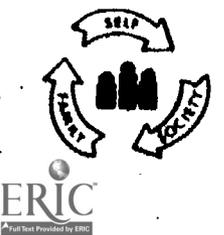

External Factors Affecting Consumer Decisions/Economic Systems - Macroeconomic Issues

HOMEMAKING SKILLS

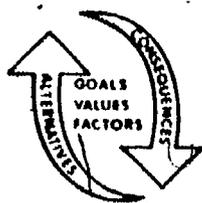

- Explain components of the economic system
- Compare market vs. command economy
- Identify cause and effects of inflation
- Analyze cause and effects of unemployment
- Analyze effects of productivity

PROCESS SKILLS	CONCEPTS	STRATEGIES
	<p>Market economy</p> <ul style="list-style-type: none"> -Supply and demand -Price -Competition -Government regulation <p>Supply and demand</p> <p>Products</p> <p>Profit</p>	<p>Read and respond to vignette.</p> <p>Bill and Lynn are brother and sister. They both enjoy baking and friends have occasionally asked them to provide baked foods for a special event. They thought they might form a business and work after school and weekends.</p> <p>Using resources, define the following terms and then relate why Bill and Lynn need an understanding of these terms in order to start their business.</p> <ul style="list-style-type: none"> --Market --Price --Competition --Government regulation <p>Do <u>*News Stories Affect How We Live.</u></p> <p>Using resources, define goods and services. As a class, compile a list of goods and services that were not available ten years ago. What are the advantages and disadvantages of the new products and services?</p> <p>Consider effects on self, family and society. In what ways does a market economy encourage development of new products?</p> <p>Make two lists, one of facts and one of fallacies regarding profits. Using resources, define profits.</p>

11.

PROCESS SKILLS	CONCEPTS	STRATEGIES
	Inflation (continued)	<p>In times of inflation is it best to:</p> <ul style="list-style-type: none"> --Invest savings in real estate? --Sell property? --Buy durable goods? --Save money? <p>How would inflation affect</p> <ul style="list-style-type: none"> --Retired person on fixed income? --Homeowner with 30-year mortgage? --Factory worker? --Storekeeper with large inventory? <p>List an item you have purchased recently. Write different items on the chalkboard for each student. Indicate whether the price is increasing (+), decreasing (-) or staying the same (0). Figure the price of the item if it doubled in ten years. Discuss the following questions.</p> <ul style="list-style-type: none"> --Would you purchase these items (increased, decreased, stayed the same)? Why or why not? --If you were middle-age, would you purchase them? --If you were from Africa, would you purchase them? <p>Define the causes and effects of inflation. Use bulletin board idea <u>*Fluctuation</u> to illustrate effects of inflation.</p> <p>Look at <u>*Consumer Price Index</u>. Using resources, define consumer (buyer of product or service for personal or family use), price (quantity of money exchanged for good or service), and Consumer Price Index (measure of changes in prices consumers pay for goods and services).</p> <p>IEE--Check library and chart most recent Consumer Price Index available from U.S. Bureau of Labor Statistics. Share with class categories of greatest and least change.</p> <p>Review <u>*The Good Old Days</u>. Using minimum wage or wages earned on a part-time job, calculate the length of time you need to work for each item. Update the current costs.</p>

PROCESS SKILLS	CONCEPTS	STRATEGIES
	<p>Inflation (continued)</p> <p>-Recession/depression</p> <p>-Unemployment</p>	<p>Create a scenario depicting effects on others when people buy fewer automobiles or appliances because of inflation. Are some people hurt more than others? What should you do as a family member to alleviate the effects of inflation on your family? What should you do as a voter regarding inflation?</p> <p>Using resources, define recession and depression, causes and effects.</p> <p>Invite a speaker who lived through the Great Depression in America. Explain cause-effects of the Great Depression on self, family and community.</p> <p>Explain the Federal Reserve System. What are the functions and powers of the Federal Reserve System? What is the role of the Federal Reserve System in controlling inflation? What happens to prices when the government prints new money in order to pay its debts?</p> <p>Brainstorm a list of problems created by unemployment on the family, society and government.</p> <p>Using resources, including texts and current periodicals, find reasons for unemployment. (Seasonal, new technology, business downturn, personal and physical problems, lack of skills, immobility.)</p> <p>Investigate types of social insurance for unemployed persons. (Unemployment insurance, disability insurance, social security, retirement, assistance programs.)</p> <p>Invite speaker from Bureau of Employment Services to explain services available to the unemployed including financial benefits.</p> <p>Invite speaker from vocational adult education program to explain training and retraining opportunities.</p> <p>Identify major areas of unemployment in your community. Classify according to occupational category. What types of incentives might the government provide these businesses to rehire or locate in your community? (Federal income tax--research and development credit, reduction in state or local taxes; job training provided; revenue bonds provided for development.)</p>

PROCESS SKILLS	CONCEPTS	STRATEGIES
  15.	Unemployment (continued) -Gross National Produce (GNP)	<p>Ask the following questions.</p> <ul style="list-style-type: none"> --Why is employment important? --What would happen to your family if the breadwinner(s) were unemployed? --How would the community (business, individuals) be affected if a plant closed? --What do you feel should be done about employment? (Retraining, encourage business.) <p>Read <u>*Sound Off</u>. Write a personal reaction paper.</p> <p>Use the practical reasoning process to show ways your community might increase employment. Follow through by actually writing to community leaders.</p> <p>An important measure of economic growth is the Gross National Product (GNP). Using resources, define the GNP and its relevance to the economy (total yearly output of goods and services measured in current dollars).</p> <p>Using resources, define GNP and its relevance to the economy. (GNP is a measure of the total money value of a nation's output of goods and services over a given time.)</p> <p>Bulletin board idea--Make a display using GNP formula (GNP = Consumer (C) + Business Investment (I) + Government Spending (G) + Foreign Trade (F). $GNP = C + I + G + F$).</p> <p>Use the bulletin board to discuss issues affecting GNP.</p> <ul style="list-style-type: none"> --Rising GNP --Growth in incomes --National emergencies (war, environmental protection) --Inflation --Recession --Foreign trade impact (cars, agriculture, electronics) <p>What happens to the GNP if consumers buy less goods and services? How does this affect you, family and society? (Less produced, unemployment.)</p>

PROCESS SKILLS	CONCEPTS	STRATEGIES
	<p>-Productivity</p>	<p>Using resources, define productivity and its importance in the workplace and home. (Efficiency with which goods and services are produced.) $Productivity = \frac{Output}{Input}$</p> <p>Do *<u>Productivity</u> worksheets.</p> <p>Describe how the following factors are sources of economic growth. Note that they all contribute to increases in productivity in the home.</p> <ul style="list-style-type: none"> --Increase in education, increasing skill level of labor force. --Advances in knowledge (research) resulting in lower production costs or in new or better products. --Increase in equipment or machinery (capital). <p>Discuss what happens to productivity when:</p> <ul style="list-style-type: none"> --Individual workers fail to produce up to their capacity. --Workers demand higher wages, shorter hours, more fringe benefits without increasing output per worker. --Workers are provided with the best modern tools and equipment. --Workers are highly motivated to do their best on the job. <p>Write responses to two questions.</p> <ul style="list-style-type: none"> ---Should I be concerned with inflation, unemployment and productivity? ---What should I do about these economic issues?

RR

NEWS STORIES AFFECT HOW WE LIVE

News events often have a dramatic effect on how we live and how we spend our money. Read the headlines below. Then read the sentences that follow. Choose which statement most accurately describes the results of the news happening.

FIRE DESTROYS LARGEST FRISBEE FACTORY

1. The price of frisbees will: a) go up; b) go down; c) stay the same.
2. The profits of the other remaining frisbee businesses will: a) go up; b) go down; c) stay the same.
3. The production of frisbees will: a) go up, b) go down; c) stay the same.

GASOLINE PRICES REACH \$1.30 PER GALLON

4. Interest in riding the bus will: a) increase; b) decrease; c) stay the same.
5. The number of people not taking motor trips will: a) increase; b) decrease; c) stay the same.
6. The number of automobile workers unemployed will: a) stay the same; b) decrease; c) increase.

INFLATION HITS RECORD HIGH

7. Persons hurt the most will be: a) the very wealthy; b) retired people; c) factory workers.
8. The type of business that could most benefit during a period of inflation: a) dealers selling gas-hungry cars; b) stores selling high-priced clothing; c) discount stores.
9. As prices become inflated: a) workers demand higher wages; b) people do not save as much money; c) people begin to look for cheaper substitutes to buy; d) all answers are correct.

ANSWERS: 1(a) 2(a) 3(b) 4(a) 5(a) 6(c) 7(b) 8(c) 9(d)

Source: Ray Pauken, Economic Specialist, Columbus City Schools.

Students have many misconceptions about profits, their size and function. Here are several ways I have found to successfully teach about profits in a market economy. Start with

EM 1.11

What is Profit?

Present this situation to your class:

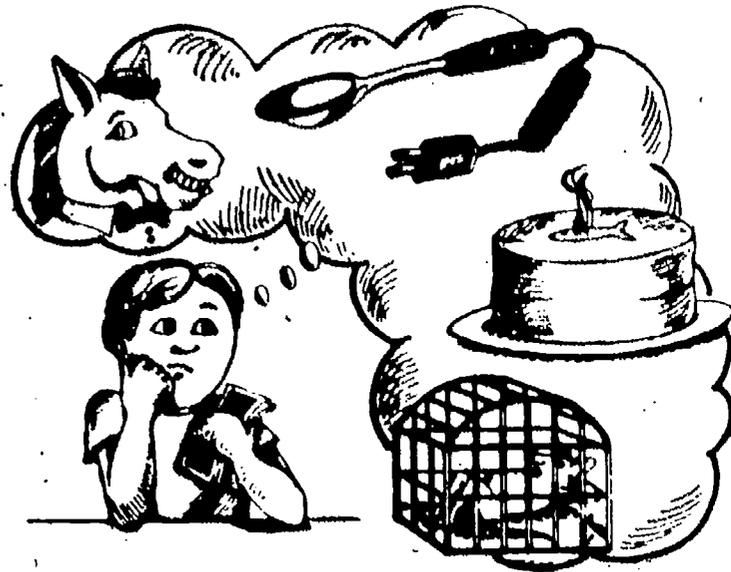

Let's imagine for a moment that you have suddenly come into a large sum of money. After resisting the immediate impulse to run right out and spend it, you decide to invest it. Now the question is, "What will you do?"

1. Will you invest it in a company which manufactures after-shave lotion for horses, electric coffee spoons, fur-lined rat cages, and sardine flavored cake frosting?
2. Will you invest it in a company whose products cost three times as much to produce as almost identical products made by another company?
3. Will you invest it in a company which promises to return only your annual investment to you at the end of each year?

If you answered "No" to each of the questions, you have a good chance of seeing your money grow, for you already have a basic understanding of how a business works. For example, you know that (1) no business can succeed if it makes products that nobody wants, (2) no business can succeed if it can't compete with similar businesses, and (3) no business can succeed for very long if it doesn't make a profit.

After this exercise, have your class develop a definition of profit. Some possible ones are:

1. Profit is the difference between the price a company pays for a particular product and the price it charges for that product.

2. Profit is what remains for the owners of a company after all the expenses, including taxes, have been paid
3. Profit is the money used to pay the salaries of the managers of a business.
4. Profit is the amount of money a business' owners decide they want to take from the business.
5. Profit is the money businessmen make by charging high prices for the goods they sell.

Only answer #2 is correct. Your class may arrive at other definitions. Before discussing which is an accurate definition of profits, go on to elaborate on...

What Isn't Profit?

Present the situations to the class and discuss whether or not they are proper examples of profit situations.

Match the situations to the definitions of profits given in the previous exercise to illustrate some of the common misconceptions of profit.

Example A

Mary Roberts, a dress shop owner, sells fashionable dresses for about \$40. She pays a wholesale distributor about \$25 for each dress. If she sells each \$25 dress for \$40, she makes \$15, or 37.5% profit.

(The 37.5% is gross profit. Out of that 37.5% must come the money for running the dress shop—salaries, rent, lighting, equipment, display racks, etc.) Ans. #1.

Example B

Robert Gungley and Stephen Hobart are partners in the Gung-Ho Home Improvement Company. Both have sons who will be starting college next year. To finance their sons' educations, Gungley and Hobart decide that they will increase their profits by 10% in the coming year.

(Generally, a business must sell more products, or complete more services, to increase its profits. Prices can be

increased, but the business then risks competition from businesses with lower prices.) Ans. #4.

Example C

Bill Clark is one of dozens of young men and women who deliver *The Daily Blast* to the citizens of Typicaltown every morning. There are 100 customers on his route. Each customer pays him 15¢ per issue, 11½¢ of which goes to the *Blast*. Bill would like to increase his profit by charging each customer 16¢ per issue, giving him 4½¢ per issue profit rather than 3½¢.

(The delivery person, or salesperson, cannot raise the price of a product. Only the company can do that.) Ans. #5.

Example D

Econo-Markets, a national discount department store, did not have a very good year last year. Consequently, this year its managers had to take a reduction in pay.

(A store would probably have a very difficult time lowering wages. It may be necessary to reduce the number of employees or close unprofitable stores.) Ans. #3.

Now discuss a proper, accurate definition of profit with your class.

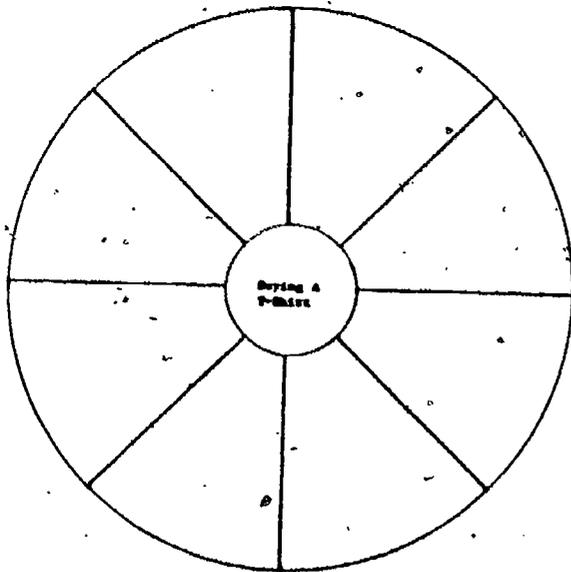

MONEY WHEEL

SPENDING - SAVING - INVESTING - BORROWING - EARNING

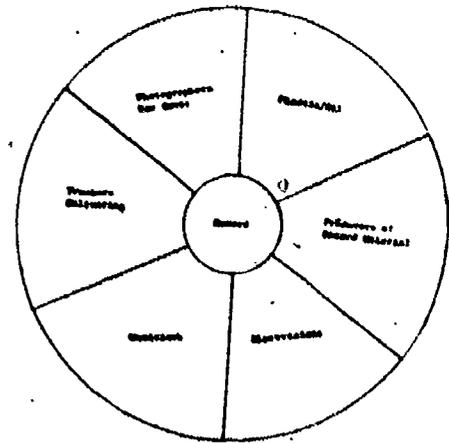

Students should recognize how the use of money (spending, saving, investing, borrowing and earning) affects other individuals and the whole economy and is, in turn, affected by how the economy functions. (Interdependence.)

Directions: Write in the spokes all the people who are involved in the production, distribution, and consumption of each item. Think how the people might, in turn, affect the economy.

DISCUSSION QUESTIONS

Cartoon 1

1. What does the pig represent? (Inflation.)
2. What does inflation mean? (A sustained rise in the average of all prices.)
3. What group of people does the man represent? (Wage and salary earners or workers.)
4. What does the eaten away portion of the paycheck represent? (The buying power of wages that has been lost through inflation.)
5. What does the remaining portion of the paycheck represent? (The buying power left in the wage earners' wages--"real income.")
6. What is the essential message of the cartoon? (Lost buying power reduces the amount of goods and services people can purchase with their income.)
7. Which groups of people are hurt the most by inflation? (Those whose incomes don't rise as fast as prices do, for example, retired people who live on fixed pensions.)
8. Do any groups benefit from inflation? Who benefits? (Debtors, for example, because they repay their debts with an amount of money that has less buying power than when they borrowed it.)

Cartoon 2

1. What does the bear represent? (Double-digit inflation.) What does the term "double-digit inflation" mean? (An inflation rate of 10 percent or more but less than 100 percent--100 percent would be "triple-digit inflation.")
2. Who or what does the skier represent? (Consumers or consumer income.)
3. Why are the bear and the skier shown racing uphill? (To show a rise in both prices and personal income.)
4. What is the essential message of the cartoon? (Prices are rising faster than personal income. This is symbolized by the bear catching up with the skier.)
5. What does the message mean in terms of the purchasing power of consumers, i.e., the amount of goods and services consumers will be able to buy? (Purchasing power is being reduced.)

Cartoon 3

1. What does the fly represent? (Inflation.) How do you know? (It is labeled.)
2. Why do you think the cartoonist used a fly? (Like inflation, once let loose, flies are difficult to control.)
3. Why is the fly so much bigger than the human? (Inflation is a big problem.)
4. Assuming that the person with the flyswatter represents the government, what is the cartoonist saying? Do you agree? Why? (The government is having a difficult time controlling inflation. Alternate interpretation is that the government is using ineffective methods to control inflation.)
5. Which of these statements do you think represents the cartoonist's opinion? (The second is the correct answer.)
 - a. Inflation is a difficult problem that the government is controlling effectively?
 - b. The government needs to take stronger actions to control inflation.

FLUCTUATION

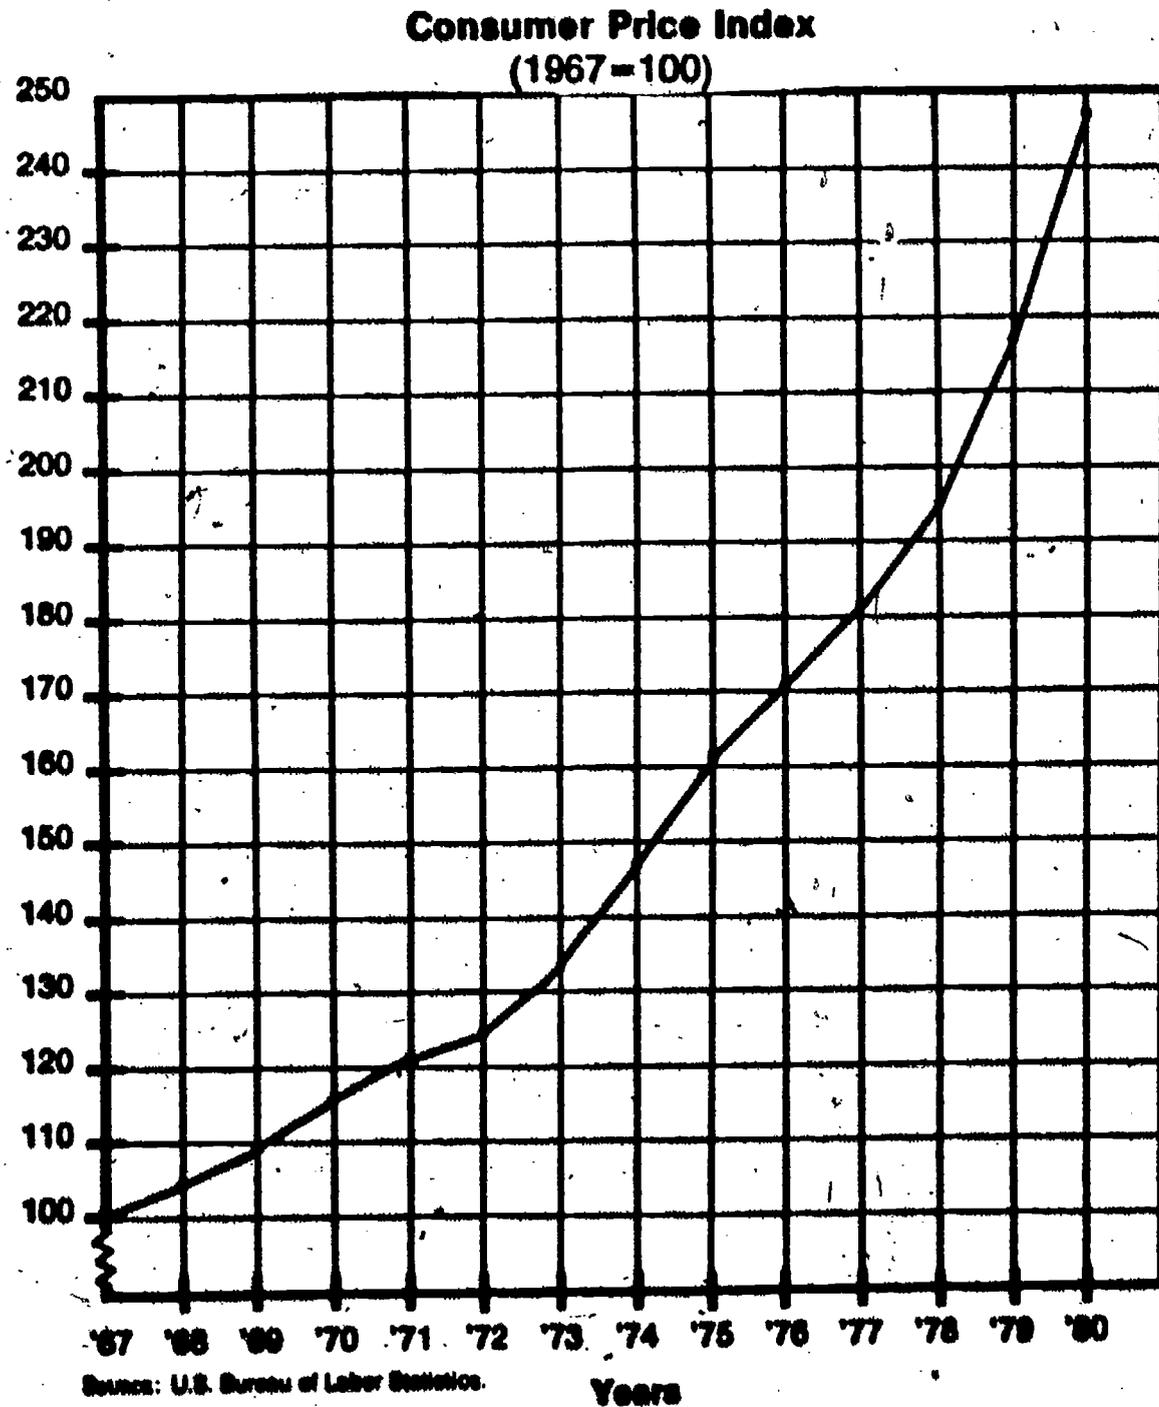

ADVANTAGES

DISADVANTAGES

CONSUMER PRICE INDEX

Questions: The chart below pictures the behavior of the CPI from 1967 to 1980. After examining it, answer the questions that follow.

- a. Look at the chart on the Consumer Price Index (CPI).
- (1) What can you say about changes in the price level since 1967?
 - (2) What was the percent change in prices from 1967 to 1973?
 - (3) Look at the change from 1973 to 1980. What was the percent change in prices for that period?
- b. "Inflation" is defined as a period of time when the average of all prices—or the general price level—is increasing.
- (1) Were the 1970s a period of inflation? Why do you think so?
 - (2) What has been happening to the general price level during the last twelve months? Has it been stable? Going up? Going down? Fluctuating?

Sound off

the effects of unemployment & the economy on family life & teens

The so-called American dream—the belief that each new generation could AND would live better than the one before it—is being strongly challenged these days.

In fact, in a March 1982 *Washington Post/ABC News* survey, 70 percent of the adults polled thought they were better off than their parents BUT only 43 percent thought their children would be better off than they.

Why?

A decade of inflation has reduced the buying power of our dollar to a mere 34 cents.

Unemployment—an even harsher burden for Americans—hit a 35-year high earlier this year.

Old industries—manufacturing in particular—are dying, taking with them hundreds of thousands of good-paying, blue-collar jobs.

Meanwhile, the rise of new "high tech" industries is requiring Americans to gain new skills—and often college degrees.

That's another frustration for teens and parents. The cost of a public college education has risen 66 percent in just seven years. Private college tuition has risen 89 percent.

The latest news about our economy looks slightly brighter.

The inflation rate has slowed to a near standstill. Unemployment figures are dropping. But the financial AND emotional toll on Americans has made young people as doubtful as their parents about future job security and a nice standard of living.

In fact, in a nationwide survey of teens conducted by Jane Norman for her book, *The Private Life of the American Teenager*, it was discovered that the only thing teens feared more than "not getting a good job or being successful" was losing their parents.

Last spring, the *Teen Times* editor talked with five FHA/HERO members at Highlands High, Natrona Heights, Pa.—a community just outside of Pittsburgh, an area where unemployment has been even higher than the national average.

Two of the students were in the child care program. The other three were in the commercial foods program. All five were just a week short of graduation.

Here's what they had to say about the stresses and changes they've witnessed in their own families due to the economy—and how those experiences have shaped their own plans and expectations for the future.

TT: NATIONALLY THE UNEMPLOYMENT RATE IS THE HIGHEST IT'S BEEN IN THE U.S. SINCE WORLD WAR II (APRIL 1983). HAS THIS SITUATION AFFECTED ANYONE IN YOUR FAMILY?

CHRIS: My sister and brother-in-law are divorced now, but when they were married they were on a kind of economic seesaw. One time, they'd be living really good, then he'd get laid off and things would be really hard for them.

NEIL: My mother's laid off. She used to work for a bookstore but business is off, soIt really hasn't made much difference in our family income, though.

LAURA: My brother has been looking for a job for three years, ever since he got out of high school. He just wants any kind of job he can get, but he hasn't found anything yet.

CHRIS: It's the same with my brother. He quit school and went into the Army. Since he's been discharged, he hasn't been able to find anything. He has applications in all over the valley.

TT: HAVE OTHERS IN YOUR FAMILY HAD TO HELP OUT YOUR BROTHERS FINANCIALLY?

CHRIS: My brother's living at home.

LAURA: Mine, too.

JUDY: It was sort of the same with my mother. When she got laid off from her job as a secretary, it was really hard for her to meet the bills and the house payments.

My mom and dad are divorced so she didn't have any other income. My grandmother helped out a lot with the bills.

TT: FAMILY TENSIONS--FIGHTING, DEPRESSION, NERVOUSNESS--OFTEN ARE RELATED TO THE STRESS PEOPLE EXPERIENCE ON THE JOB OR BECAUSE THEY ARE UNEMPLOYED. HAVE YOU WITNESSED ANY TENSIONS IN YOUR OWN FAMILIES RELATED TO JOB OR FINANCIAL WORRIES?

CHRIS: My sister, again. She developed hypothyroidism (a general loss of energy due to a dysfunctioning thyroid gland). They think it was because her eating habits changed and because she was under a lot of stress.

I don't know—indirectly, my brother-in-law's work being so on and off probably contributed to it.

JUDY: While my mom was laid off she was really depressed. Our house looked like a cyclone hit it because she was so down all she could do was just sit around.

LAURA: My brother really drinks a lot. I get worried about it, so I ask his friends why they won't help keep him from drinking so much.

They say he's lucky because he doesn't have anything else to do. I tell them that's not right and they just say, "Well, a lot of people with time on their hands don't know what else to do either."

JUDY: It's very frustrating. You don't know what to do. When my mom wouldn't clean the house, I would. Also, I've been working (as a child care aide) at the elementary school this year, so I was helping her with some of the bills so she wouldn't worry so much.

TT: FAMILY TENSIONS ASIDE, HOW ELSE HAS THE ECONOMY AFFECTED YOUR FAMILIES?

DOROTHY: I thought once my older sisters left home we could buy more. But prices are so high nothing's changed.

LAURA: Our vacations are shorter and we don't take as many. Before, we'd go to a resort for two or three weeks. Now it's for a week, sometimes just for five days.

CHRIS: We have a really big family—10 kids. So we never really did much of anything. Just picnics and stuff. Even though there are fewer of us at home, now, that hasn't changed much.

NEIL: I've worked since I was 12. I had a paper route, then I worked at a gas station. Now I'm at Eaton Park restaurant.

I cover a lot of my own expenses, so that takes off a lot of the strain. We haven't suffered that much.

JUDY: I don't spend like I used to. I try to save my money. I still help my mother with a bill or two when she needs something paid. If she doesn't need it, I put my money in the bank. That way, if the need arises I have it.

TT: YOU'RE ALL VERY CLOSE TO GRADUATING AT A TIME WHEN THE JOB MARKET SEEMS FAIRLY UNPROMISING. HOW HAVE YOU PREPARED YOURSELF TO BEAT THE ODDS?

JUDY: We're required to do a research paper on careers in our child care program. I've been thinking of becoming a physical therapist so I researched that.

It turns out that jobs in the field will increase 53 percent in the next four years and that they'll pay pretty good. Now I feel a little safer pursuing that.

DOROTHY: I'm not too sure what I'm going to be. The only thing I did look into was being an operating room technician. It seems, from my research, like a good thing to get into as far as job security is concerned.

LAURA: I'm going to community college for their two-year secretarial program. I've looked it up—that's one area where there will be a lot of jobs in the future.

CHRIS: Unfortunately, I don't think there are very many openings in special education but that's what I want.

I went to a day school in Pittsburgh and applied for a job. I'm hoping I can do some substitute work over the summer before I go to school this fall.

TT: AT THIS POINT, YOU'RE "OFF AND RUNNING" SO TO SPEAK. DO YOU HAVE ANY ADVICE RELATED TO JOB PREPARATION FOR TEENS STILL IN HIGH SCHOOL?

NEIL: Catch as much education as you can while it's free.

DOROTHY: The earlier you start researching what skills and education you need for a job the better. Now that I'm thinking about being an operating room technician, I wish I'd taken harder courses—more math and science.

JUDY: Depending on what you want, I'd say get into a work-study program. I've really learned a lot in my child care program. I feel real confident, having already worked with kids, about succeeding in a job as an adult.

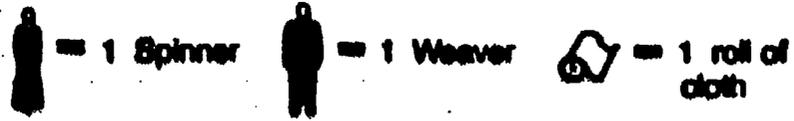

Editor's note: Being active in Future Homemakers of America is another thing you can do, during junior and senior high school, to better prepare yourself for a competitive job market and sound family life.

Plan the kinds of chapter action that help you and others—

- build personal relationships with business owners and managers in your community—great contacts for future jobs.
- explore, thoroughly, the wide range of home economics related careers open to you.
- plan, realistically, for the expense of being a home owner and parent; or single adult living alone.
- develop decision-making skills and the ability to work well with others—two skills you'll need, always, both on the job and in your personal family life.

PRODUCTIVITY

Year	No. of Spinners	No. of Weavers	Total No. of Workers	No. of Rolls of Cloth	Productivity (average output per worker ^a)
1700					
1733					
1764					
1789					
1779					
1805					

^aTo compute the average output per worker, divide the number of rolls of cloth by the total number of workers.

QUESTIONS

- WHAT IS "PRODUCTIVITY"?
- WHY IS A RISE IN PRODUCTIVITY DESIRABLE?
- WHAT WAS THE AVERAGE OUTPUT PER WORKER, I.E., WORKER PRODUCTIVITY, IN 1700? IN 1805?
- WHY DID AVERAGE OUTPUT PER WORKER INCREASE SO MUCH FROM 1700 TO 1805?
- WHY IS ECONOMIC GROWTH IMPORTANT?

ANSWERS

- WHAT IS "PRODUCTIVITY"? (A MEASURE OF THE EFFICIENCY WITH WHICH GOODS AND SERVICES ARE PRODUCED IN A SPECIFIC AMOUNT OF TIME.)
- WHY IS A RISE IN PRODUCTIVITY DESIRABLE? (IT PERMITS MORE GOODS AND SERVICES TO BE MADE FROM AVAILABLE RESOURCES, THUS CONTRIBUTING TO ECONOMIC GROWTH.)
- WHAT WAS THE AVERAGE OUTPUT PER WORKER, I.E., WORKER PRODUCTIVITY IN 1700? (HALF A ROLL OF CLOTH PER WORKER.) IN 1805? (30 ROLLS OF CLOTH PER WORKER.)
- WHY DID AVERAGE OUTPUT PER WORKER INCREASE SO MUCH FROM 1700 TO 1805? (THE INVENTION OF NEW OR IMPROVED MACHINES; INCREASES IN THE SKILLS OF WORKERS.)
- WHY IS ECONOMIC GROWTH IMPORTANT? (IT IS THE SOURCE OF RISES IN THE STANDARD OF LIVING.)

Year	No. of Spinners	No. of Weavers	Total No. of Workers	No. of Rolls of Cloth	Productivity (average output per worker ^a)
1700	1	1	2	1	.50 roll
1733	4	1	5	4	.80 roll
1764	1	8	9	20	2.22 rolls
1789	1	12	13	30	2.31 rolls
1779	1	14	15	50	3.33 rolls
1805	1	1	2	60	30.00 rolls

^a TO COMPUTE AVERAGE OUTPUT PER WORKER, DIVIDE NUMBER OF ROLLS OF CLOTH BY TOTAL NUMBER OF WORKERS.

MONETARY AND FISCAL POLICY

Money and Monetary Policy

The government has two major ways—monetary policy and fiscal policy—of trying to keep the level of aggregate demand roughly in balance with the growing productive capacity of the nation. Monetary policy seeks to affect the amount of money in existence and its cost (interest rates). This is the responsibility of the Federal Reserve System, a quasi-independent government agency.

Money is generally defined as the sum of currency (cash) and demand deposits (checking accounts) in banks. Currency is printed or coined by the government but the bulk of the nation's money supply, demand deposits, is created by the banking system. The banking system increases the money supply by making loans to individuals, businesses, and the government. This lending creates more demand deposits and thus increases the spending power of the economic units which make up aggregate demand.

Banks are required to hold reserves behind their deposits. The principal but not the only instrument of Federal Reserve monetary policy is control over these reserves which are held on deposit at Federal Reserve Banks. If the Federal Reserve provides the banks with more reserves, this permits them to lend more to the public, thus making possible an increase in aggregate demand. Conversely, a "tight money" policy, which involves holding down the size of bank reserves, means restraining aggregate demand.

Monetary policy today is an area of considerable controversy with economists divided on what Federal Reserve policy ought to be. We still have much to learn about how to manage the money supply so as to achieve economic stability.

Fiscal Policy: Taxes, Expenditures and Transfers

Fiscal policy consists of changes in taxes, government expenditures on goods and services, and transfer payments to control the level of aggregate demand. Generally, when the government increases spending on goods and services or on transfer payments but does not correspondingly increase tax receipts, total aggregate demand will be stimulated and push the economy toward more employment or inflation. Conversely, when government reduces expenditures without reducing tax receipts, aggregate demand will be reduced and push the economy toward less employment or less inflation. Similar effects can be obtained by cutting or increasing tax receipts, with government expenditures being held constant.

Students should have a rough idea of the magnitude of government expenditures and taxes, and should know something about the practical problems of increasing or decreasing taxes and expenditures flexibly. They should see the difference between government purchases of goods and services, which provide jobs directly, and transfer payments

Source: A Framework for Teaching Economics. Joint Council on Economic Education

(unemployment insurance, social security payments, and the like), which change recipients' incomes but do not directly provide jobs or use up productive resources. As with monetary policy, we still have much to learn about fiscal policy and how to use it to achieve stable economic growth. It is important to understand both its potentialities and its limitations.

CASE STUDY: SLINKY SLEEPWEAR

NEWSFLASH: THE CONSUMER PRODUCT SAFETY COMMISSION HAS JUST BANNED THE SALE OF SLEEPWEAR MADE OUT OF XLON. XLON IS THE MIRACLE FABRIC THAT CONSUMERS HAVE FOUND MUCH TO THEIR LIKING. IT NOT ONLY FEELS SOFT, IT CLEANS EASILY AND COSTS MUCH LESS THAN OTHER FABRICS. THERE HAVE BEEN SEVERAL REPORTS OF INDIVIDUALS WHO WERE BURNED, SOMETIMES FATALLY, WHILE WEARING SLEEPWEAR GARMENTS MADE WITH XLON. THE CAUSE WAS USUALLY HOT ASHES FROM CIGARETTES. TESTS HAVE SHOWN THAT XLON IS HIGHLY FLAMMABLE WHEN PRODUCED AS A SHEER FABRIC BUT WILL NOT BURN EASILY IF MADE INTO THICK CLOTH.

THE SLINKY SLEEPWEAR COMPANY, WHOSE MAIN PLANT IS IN DROWSY, ARIZONA, IS THE LEADING MANUFACTURER OF SLEEPWEAR USING THIS FLAMMABLE MATERIAL. COMPANY OFFICIALS ARE CONCERNED ABOUT THE IMPACT ON BUSINESS. IT WAS REPORTED THAT MILLIONS OF DOLLARS HAVE BEEN INVESTED BY THE COMPANY TO DEVELOP THE XLON FORMULA.

Questions:

- a. What probably prompted the Slinky Sleepwear Company to manufacture Xlon sleepwear in the first place?
- b. What is likely to happen to the profit picture for the Slinky Sleepwear Company in the immediate future?
- c. How will the Slinky Sleepwear Company's competitors react to the news?
- d. Who will benefit from the commission's ruling? Who will pay the costs? (In other words, what are the trade-offs?)
- e. What decisions will the business manager(s) of Slinky Sleepwear have to make as a result of the ruling?
- f. How might the ban affect prices for sleepwear?
- g. How might the ban affect employment?
- h. If you were a manager of Slinky Sleepwear Company would you support the ban on Xlon? Explain your answer.
- i. If you were a consumer of Xlon sleepwear, would you support the ban? Explain your answer.

Source: Joint Council on Economic Education Curriculum Materials.

TEACHER ANSWER SHEET TO THE CASE STUDY: SLINKY SLEEPWEAR

- a. There seemed to be sufficient demand to make the production and sale of sleepwear of Xlon highly profitable. Prospective profits were probably so attractive that the company invested heavily in special machinery to make sleepwear from Xlon.
- b. In the short run, profits would fall because the banned garments that have already been produced by the company cannot be sold in the domestic market. The amount of profits lost will depend on the number of garments already produced but not sold. It would take time for the company to shift to other fabrics. Meanwhile, competitors may take customers away.
- c. The competitors will increase their sales and probably increase their production, too. Consumers of Slinky Sleepwear products would now be the competitors' prospective customers.
- d. The protection of consumers was traded for lower profits in the short term for firms manufacturing the banned sleepwear. Since Xlon was the least expensive cloth for sleepwear, some customers will pay higher prices for sleepwear in the future.
- e. The decisions made by managers will depend on the circumstances. If all sleepwear manufactured by the company were made out of the flammable fabric, the loss incurred might be too much for the company to sustain and thus result in a dissolution of the business. If the company's production of sleepwear is quite diversified, it might just drop the banned products and continue the manufacture of the others. The company could introduce a new line of sleepwear to replace the banned one or start manufacturing an entirely new line of products such as women's blouses, underwear, etc.
- f. Prices for sleepwear are likely to rise. How much depends upon the supply and demand conditions of the sleepwear market as well as on how much more the materials that can be substituted for Xlon cost.
- g. The ban could result in some local unemployment if the Slinky Sleepwear Company closes down.

CITY COUNCIL SIMULATION

You are a member of the City Council in a city of 100,000 people. Over the past ten years the city has had a population growth of about 20 percent. In order to provide the needed additional services, it has been necessary to increase the property tax rate for the past two years. Citizens are becoming angry about continuing increases.

The funds for the most urgent items in the budget for the forthcoming year have already been appropriated. There are approximately \$1.5 million left to allocate and twelve important programs that various citizen groups have urged the council to approve:

Proposal 1 One area of the city does not have adequate fire protection. A home in that area burned down in the past year, and a small child was badly hurt. Citizens in the area have written, phoned, and appeared at the budget hearings to request better fire protection. Cost for additional fire personnel: \$200,000.

Proposal 2 Problems with teenagers have been increasing. Vandalism is on the rise, parents are concerned about the mounting use of drugs, and the police are dealing with more runaways. The City Council would like to start a new juvenile division in the Police Department to help keep youngsters out of trouble. Cost for a social worker, two police officers, and a secretary: \$100,000.

Proposal 3 The city has inadequate recreational facilities, and much of what is available is in very bad condition. One group of citizens feels that more should be spent on recreation, especially for teenagers. More opportunity for recreational activities, they say, will pay off in a reduction in the number of teenagers getting into trouble. Cost for repairing the tennis, basketball, and softball areas, and additional personnel: \$250,000.

Proposal 4 In addition to the need for more recreational facilities there is the need for a neighborhood center in a particular area of the city. A wealthy citizen is willing to give the city a large mansion, which would provide a place for meetings, programs, and recreational opportunities for everyone from preschoolers to senior citizens—if the city can staff it. Cost of staffing and maintaining the neighborhood center: \$350,000.

Proposal 5 The city landfill site is reaching capacity. The city must find another area for trash disposal within the next year. Federal and state guidelines no longer allow municipalities to use low or marshy areas for landfill. Cost of using an out-of-town landfill site: \$200,000.

Proposal 6 One section of the city has developed very rapidly, and sewer lines are at capacity. Citizens are complaining about the unpleasant odors, and many think that a satellite treatment plant is needed. Federal funds will pay for building the plant but the community will have to pay for its operation. Cost of one year's operation of a treatment plant: \$300,000.

Proposal 7 Three streets in the city are unpaved and many contain large potholes. When it rains, the unpaved streets are muddy and all but impassable. In dry weather the dust is thick, and some citizens feel the dust to be a definite health hazard. Several citizens have broken automobile axles when hitting potholes. Cost of upgrading those streets: \$500,000.

Proposal 8 In one part of town the houses are rundown but could be rehabilitated. Wiring, plumbing, general carpentry work, roofing, etc., would make the houses more livable and improve the neighborhood's appearance. Some citizens have recommended that local money be given to poor citizens so that they could rehabilitate their homes. Cost to fix up the most rundown houses: \$300,000.

Source: Joint Council on Economic Education Curriculum Materials.

Proposal 9 City employees are feeling the pinch of the rising cost of living. They are demanding a 10 percent raise. Estimated cost of employee pay raise for the first year: \$200,000.

Proposal 10 A lovely creek runs through the center of the city. Over the years it has been silting up, and as a result one residential section has a flooding problem. Homeowners there are demanding that the city dredge the creek to prevent flooding. Cost of dredging and fixing the banks: \$150,000.

Proposal 11 Citizens want educational standards to be upgraded. School officials say they can improve education in basic skills and career placement if they employ a specialist at each grade level. Cost of new personnel: \$300,000.

Proposal 12 The city has a high rate of teenage unemployment. Citizens have said there is a need to develop activities and meaningful work experiences for this age group. Much interest and support for a summer employment program exists. Cost for the summer employment program: \$150,000.

ESTIMATED TOTAL COST OF ALL PROGRAMS . . .
\$3,000,000

You have been a good Council member—one who tries to study the issues and is concerned about the welfare of all the members of your community. *You would also like to be re-elected.* Which combination of programs totalling approximately \$1,500,000 do you think is the best alternative for the community? Use the Budget Analysis Worksheet as a guide while making your decision.

CASE STUDY—THE FEDERAL TAX POLICY COMMISSIONER'S DECISION

It is the policy of the United States government (and of other tax jurisdictions) to allow certain categories of taxpayers to reduce the amount of income tax they must pay in order to give them help with special problems or to encourage them to engage in certain activities. Below are listed several tax advantages. Some are in effect; others have been proposed. The use of each of such tax advantages either reduces the amount of money that the federal government receives or makes it necessary for other taxpayers to pay more than they otherwise would. You have just been appointed to serve on a tax policy commission. As a commissioner you must evaluate seven proposals. In judging, you will try to decide what the government accomplishes by allowing taxpayers in each category to reduce the amount of taxes they pay. The commission chairperson has asked each commissioner to rank the proposals in order of their importance. You will soon be asked to explain your rankings.

- A. A provision that homeowners may deduct from their taxable income the money they pay for local property taxes and the interest they pay on their home mortgages.
- B. A provision that parents receive an exemption of \$1,000 for each child they support.
- C. A provision that enables parents with children in college to pay less in taxes to help offset tuition costs.
- D. A provision that all parents whose jobs make it necessary for them to pay for child care while they are at work pay less in taxes.
- E. A provision that people over the age of 65 take an extra personal exemption from their gross incomes and thereby pay less in income taxes.
- F. A provision that a married couple whose income is less than \$8,000 a year and who have at least one dependent need not pay any income taxes.
- G. A provision that corporations and other businesses pay less in income taxes if they invest money in new plants or equipment in locations where unemployment is high.

By placing the appropriate number in the space provided, rank the tax provisions listed above in order of their importance to you.

(Status
(continued))

In small groups, write two case studies using the following information.

- Case Study 1--Young single person with good income rents luxury apartment and uses credit to purchase luxury status items. Person belongs to health club and has active social life. Describe items person might buy and activities in which he/she may participate.
- Case Study 2--Married couple with two children have moved from the city to the country. They believe in "voluntary simplicity"--playing family games instead of television, growing own food, woodburning fireplace. Describe other ways in which family may carry out the goal of voluntary simplicity (include goods, services and family social activities).

Each small group present to class.

- What would be the effects on families and society if everyone lived the luxury lifestyle? Voluntary simplicity lifestyle?

Using resources, define voluntary simplicity (outwardly simple, de-emphasizes consumption, strong sense of the environment, living with nature).

Do *Voluntary Simplicity Scale.

Using resources, identify major areas of social change in the family. (Increased number of women working, increased single-parent families, increased number of senior citizens.) Discuss implications for producers, self, family and society.

Social change

CASE STUDY: ECOLOGICAL INFLUENCE

PLACE: Susie's kitchen

Susie's mother, Mrs. Scott, tells Susie there are a few breakfast dishes on the counter and to put them in the dishwasher. Then Susie is to go to the store to get the items on the list Mrs. Scott left on the kitchen table.

SUSIE: I'll wash the dishes by hand, since there are just a few of them. And since Mom's not in a real big hurry, I'll ride my bike to the store instead of taking the car. I need the exercise and there won't be many more nice fall days left. Where did she leave that list? Oh, here it is.

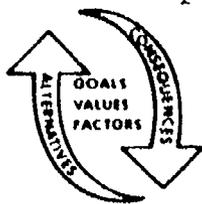

- * 1 pound ground beef
- 2 cans aerosol bathroom cleaner
- 1 loaf bread
- 1 squeeze bottle liquid dishwashing detergent
- 8 oranges
- 2 large boxes of trash bags
- Six-pack of canned cola
- Large box of laundry detergent

MRS. SCOTT: Susie, make sure you get the laundry soap with phosphate. It does a better job and take the shopping cart with you instead of using the paperbags from the store.

RR

BEST CAREER PROSPECTS FOR THE 1980s

The American economy will provide nearly 20 million new jobs by 1990, according to the Bureau of Labor Statistics. That will raise the total to 114 million. However, more than half the openings will be comparatively routine and low-paying. The BLS estimates that twice as many new clerical workers as managers will be needed in the 1980s. Jobs for cashiers and janitors will grow faster than openings for professional and technical employees.

These somewhat somber tidings are statistical generalities. The real job market has infinite variety—and doesn't necessarily conform to the forecasts. There will, as always, be tremendous opportunities for the person who chooses the right career, the right employer or the right part of the country—preferably all three. Furthermore, there are two big pieces of good news.

- As the 1980s progress, young people should be able to find entry-level jobs more easily than they can now. Because of the drop in the birth rate since the 1950s, fewer and fewer youngsters will reach working age. For example, there will be 516,000 fewer in 1985 than in 1980 and 913,000 fewer in 1990. That should make teenage unemployment, 19.2 percent last May, less acute.

- The demand for engineers is exceptionally strong. As a heritage of the hiring slump in the early 1970s and the resulting drop in student enrollments, engineers are in short supply. "Engineers will be kings of the job market until the mid-1980s," says Van Evans, President of Deutsch, Shea and Evans, Inc., a New York manpower consulting firm.

Engineers with energy specialties have particularly hot prospects right now. Among this year's crop of bachelors, reports the College Placement Council, petroleum engineers are being offered an average of \$23,748, and chemical engineers \$21,480.

Old engineering specialties are reviving to meet new demands. Since the country needs more coal, jobs for mining engineers are expected to multiply faster than those for any other engineer; however, the number of openings won't be large. After being grounded through most of the 1970s, aerospace engineers have been put back in the cockpit by a healthy volume of aircraft orders.

The computer industry will remain uniquely promising through the 1980s. Computer use is proliferating in office, factory, store, school and home. "The job market is just going wild," says John Hamblen, chairman of the computer-science department at the University of Missouri at Rolla. Hamblen figures that the 12,000 to 14,000 new bachelors of computer science who graduate this year will have a choice of 55,000 jobs. The supply of programmers with four-year degrees, he says, probably won't match demand before 1990.

Excerpted from Readers Digest.

Colleges will continue to turn out more graduates than the economy needs. The BLS estimates that in the 1980s one in four college graduates will have to take a job beneath his expectations.

This scrimmage for jobs will come at a particularly bad time for women and blacks. By rights, they should now be starting to move up to middle and upper management. But they'll be fighting the population bulge, a slowing economy, and resistance from the white males who dominate some industries.

The '80s job market will put a premium on people who pick the best industry, company and region to work in. Health services, for example, will expand vigorously while many manufacturing jobs barely increase. Banking, retailing, insurance and real estate will need more new people than government, which must hold down spending to fight inflation and appease taxpayers.

Today's graduates are also more likely to prosper in regions where the economy is growing faster than average. The Sunbelt will continue to attract more businesses than the Northeast. Consultant Van Evans expects strong growth in Austin, Charlotte, Raleigh, Tucson, Tulsa and other cities with metropolitan-area populations of about half a million. California still beckons to people in high-technology industries such as computers, office equipment, communications and aerospace.

Inflation complicates the choice of a career. A few strong unions have contracts with escalator clauses tied to the Consumer Price Index, but most employers don't come close to keeping up with today's inflation. Last year's average pay increase for white-shirt workers, from clerks to presidents, was 7.9 percent, while the Consumer Price Index went up 13.3 percent. Jay Engel, director of executive-compensation service for the American Management Associations, says most employers will not normally give more than a 10 percent raise in recognition both of merit and the rising cost of living. Employees of nonprofit or government-regulated organizations, such as hospitals, schools, colleges and utilities, probably won't get even that much. But it is easier for professionals to adjust to inflation. Lawyers, doctors, accountants and consultants can simply raise their fees—within reason.

In pure economic terms, it may be more tempting than ever during the 1980s to skip college and choose a blue-collar trade. The demand for many skilled craftsmen, such as business machine and computer repairers, iron and sheet metal workers and tool-and-die makers, is growing rapidly. A skilled worker with a strong union behind him can earn \$20,000 to \$30,000 a year. The average male college graduate earned about \$23,600 in 1976, and women graduates averaged \$13,300.

In blue-collar careers, O'Toole reports that more and more businesses are being started by ambitious young entrepreneurs who don't want to go to college. In six months to a year they can learn a skill such as repairing roofs or installing swimming pools. Then they set up their own businesses. "It's possible for some to make a million by the time they are 30," says O'Toole.

In a way these "wealthy dropouts" illustrate what it takes to be successful in the 1980s. They've seen an opportunity and grabbed it. The '80s are likely to be hard on those who can't adjust. Accelerating technological change will hasten the obsolescence of some jobs and the creation of others. Few people will stick to one career all their lives. Says one consultant half seriously: "I am told by sociologists that the typical new executive will have two families and three career cycles."

SERVICE INDUSTRIES: GROWTH FIELD OF '80s

Americans keep clamoring for more health care, repair work, service of all kinds - it's a trend that promises a new boost for the economy.

If you are hunting for growing businesses in the '80s, look at services.

Before the decade is over, more than half the nation's economic activity will center on industries that provide services rather than products.

Although steel, autos and other production industries are having troubles, opportunities are expected to increase in retailing, health care, travel, banking and government.

"Services are taking the lead over manufacturing just as manufacturing previously took the lead from agriculture," says Wray Candilis, director of the service-industries division at the Commerce Department.

Already, services employ more than twice as many people as do goods producers and the agricultural sector—63.7 million to 30.1 million.

Now, says this magazine's Economic Unit in a special study, services are expected to provide 53 percent of the nation's total output of goods and services by the end of the 1980s, compared with about 45 percent in 1979.

Service industries reach into every part of the economy, from taking in other people's washing to jobs for doctors, lawyers, waitresses and maintenance workers. Also included: Federal, state and local government employees.

Housing costs take the biggest bite out of personal spending for services, accounting for about one-third of total outlays. The shelter expenditure of more than 210 billion dollars a year includes the estimated rental value of living in a home you own. In second place is spending for medical care, followed by financial and legal services.

So fast are services growing that during the last 10 years the industry created almost 18 million new jobs, compared with less than 2 1/2 million in the goods-producing part of the economy.

Fewer assembly line jobs. That pattern is continuing. Numbers of service jobs are expected to grow 31 percent in the 1980s, while goods-producing jobs rise 14 percent. Industry is looking for more computer, financial and other business specialists, but has less demand for assembly workers.

Consumers with time on their hands and money in their pockets will want more than just goods, say forecasters. People will be ready to spend to travel, to be entertained and to be waited on. They will want better medical care and more help managing finances.

Excerpted from U.S. News and World Report, 81

By 1989, according to estimates from the Economic Unit, families will be devoting 49 percent of their personal consumption spending to services, up from 46 percent today and 39.5 percent in 1949. These figures are adjusted to exclude any spending boost resulting just from higher prices.

Analysts note that even when times get tight, sick people continue to need medical care, children continue to attend school, fire and life insurance policies stay in force, and governments keep spending for services such as police protection and sanitation. This, economists say, tends to cushion slowdowns in the economy as a whole.

Where will the boom in services focus during the '80s? If the growth patterns of the 1970s continue, people will spend more of their incomes on health care, utilities and auto repairs, but less on such needs as laundry, cleaning, haircuts and permanent waves. Here's what's expected during the 1980s in major service industries—and the impact on jobs.

Retailing—Some 6 million new jobs will be available by 1990, primarily in eating and drinking establishments, food shops and general merchandise stores. Many of these spots will go to part-time employees. Energy-conscious consumers, meanwhile, are likely to do more shopping closer to home, or by mail, rather than drive to distant regional shopping centers.

WHAT PEOPLE SPEND FOR SERVICES	1978 Spending	Increases Since 1968
Housing	\$212.2 bil.	165.4%
Doctors, dentists, hospitals.....	103.4 bil.	272.7%
Brokerage, banking, legal help.....	71.1 bil.	164.9%
Electric, gas, water services.....	49.5 bil.	221.7%
Auto repair.....	29.5 bil.	232.8%
Telephone, telegraph.....	23.4 bil.	180.8%
Private education.....	20.8 bil.	156.5%
Health insurance.....	12.7 bil.	243.5%
Public transportation.....	10.2 bil.	105.4%
Movies, theater, sports.....	7.4 bil.	177.9%
Haircuts, styling.....	5.9 bil.	64.7%
Cleaning, laundry.....	4.6 bil.	24.9%
Foreign travel.....	3.8 bil.	68.3%
Other services.....	65.3 bil.	121.4%
Total spending.....	\$619.8 bil.	174.8%

IN ADDITION, outlays for government purchases and other items bring total spending on services to more than \$1 trillion today—up 179.2 percent in a decade.

NOTE: SPENDING FOR HOUSING INCLUDES RENTAL OUTLAYS FOR DWELLINGS, HOTELS, PLUS ESTIMATED RENTAL VALUE OF OWNER-OCCUPIED HOMES. FOREIGN TRAVEL IS NET OF SPENDING BY FOREIGNERS HERE.

Medical care—There will be more than 4 million new openings. Total employment in medical and dental services, hospitals and nursing homes will jump 81 percent. Especially promising: The job outlook for nurses.

Auto repair—Budget-watching consumers, who are expected to keep their cars longer, will help spur a doubling in the number of auto maintenance jobs to more than 1.1 million. More mandatory auto inspection and tougher enforcement of safety and emission standards will also increase these types of work opportunities. Watch for a continuing shortage of skilled mechanics able to deal with the growing complexity of vehicles.

Lodging—Employment will jump by 72 percent, creating more than 700,000 new slots to fill. Hotels and motels will be a big source of jobs for minorities, women and young people. Business travelers will still be major users, but tourists will grow in importance as customers.

Transportation—Airlines should experience healthy growth as they gear up to serve 200 million more passengers by 1989. Also expanding will be freight forwarding, travel agencies and other shipping and transit services. But there will be fewer jobs in railroading and water transport. Look for about 100,000 new jobs on balance.

Professional services—Accountants, lawyers, architects, auditors, engineers and others will benefit as businesses and individuals expand their need for specialized professional assistance. Some 700,000 new positions will be available in this category.

Business services—By 1990, almost 4.4 million jobholders will be catering to an assortment of business needs—up almost 60 percent from now. New openings will occur in such areas as data processing, secretarial and clerical work, cleaning and security services, photocopying, equipment leasing and employee recruiting.

Finance—There will be room in banking and insurance for more than 1 million new workers. Credit and real estate companies also will boost their employment numbers.

Government—Some 2 million more state and local posts will open up, with most of the gain in administration and public health. Expect little or no growth at the federal level. Teaching job gains will ease.

There's a price to be paid for the shift to more services.

Service industries in general aren't as automated and efficient as manufacturing plants; much costly labor must be used to satisfy customers. On top of that, workers are pushing hard for hefty wage gains.

Therefore, an economy that is heavily service oriented has much underlying inflationary pressure.

The impact is already showing up. Prices for all commodities are up 92.3 percent since 1969, but the cost of services is up even more—108.2 percent. That's despite the fact that service industry wages are significantly lower than those in the mining, manufacturing and construction sectors.

WHERE SERVICE JOBS WILL GROW IN YEARS AHEAD. . .	Jobs Forecast in 1990	Percent Change From 1979
Water, sanitary services.....	163,000	Up 123%
Automobile repair.....	1,137,000	Up 100%
Medical, dental offices.....	1,882,000	Up 81%
Hotels, lodging places.....	1,747,000	Up 72%

. . . AND WHERE THEY WILL DECLINE		
Pipelines.....	17,000	Down 11%
Waterways.....	192,000	Down 16%
Railroads.....	450,000	Down 19%
Gas utilities.....	168,000	Down 30%

Retailers are boosting their efficiency with computerized checkout and inventory systems. They are hiring more part-time workers to handle the peak shopping times, thus keeping down their full-time staffs.

Restaurants cut costs by using standardized menus and save on kitchen help by serving once-frozen meals.

Architects are using computers to pare their working time on projects.

Future changes in service industries will reflect shifts in the population as well as the search for more efficiency. For example, the number of persons age 65 or more will jump by 20 percent between now and the end of the 1980s. That means even higher levels of demand for medical care. In contrast, declining school enrollment at the high school and college levels is the reason for fewer new school jobs.

Also spurring a wide variety of service industry business will be an increase to 29 percent in the share of the population 30 to 49 years old, compared with about 24 percent today. That's a big spending age group that's likely to be eager for more travel, entertainment, financial services and choices for shopping opportunities.

Thus, in the decade ahead, Americans will be spending more and more to serve each other.

GREEN RIVER BLUES

Keith wondered how on earth he could have gotten into such a fix. Here he was miles from civilization with faint chances of making contact with human beings for days or perhaps weeks. He sat down on the damp sand and gazed unhappily at the steep canyon walls. What had started as a canoe trip through the rapids of Green River in western Colorado now took on the appearance of personal tragedy—for Keith at least.

As the canoes hit the last stretch of turbulent water, Keith managed to guide his craft through the first few yards when suddenly he rammed a partly submerged log which was running the rapids too. The canoe spun to the left and to the right in a crazy pattern and in a second the pleasant canoe trip turned into a wild and wet struggle for survival among the swirling waters of Green River.

When Keith's eyes became accustomed to the sand-laden water, he saw his canoe being tossed like a paper cup on the rocks on the west side of the river. The rest of the canoe party members were rushing through the half-mile stretch of rapidly moving water. Even if they knew of his plight, they could do little to aid him. The next landing place where the group planned to meet was many miles downstream. This was no time to change plans. The foaming waters pushed him against his will and lodged him between two massive rocks almost opposite the wrecked canoe.

Breathing short, hurried gasps of air, he held onto the smooth cold rock. It was impossible to get to the canoe, but beneath the east wall of the canyon at this point there was a beach—a strip of land at least. Keith hesitated and then acted. His only hope was to make it to the east bank. The cold water began to numb his arms and legs, but with a last spurt of energy he struggled across the narrow channel of swift flowing water and struggled onto the sandy shore.

He was not alone. Lizards scattered in all directions as he made his way to a higher level, and flies buzzed around his head. He saw in an instant that he couldn't go anywhere. Beyond the few jasmine bushes and willows the canyon walls rose steeply to the cloudless sky. His hands clutched at the damp sand, and he threw it angrily at the churning water. He began to think. If only he had followed instruc-

tions about . . . oh well, what good was there in worrying about what he had or hadn't done. At least he was alive, and he could do something to stay that way. He began to survey the situation and laid out on the sand his total possessions: one knife, some string, a small first aid kit strapped to his belt and 28 cents in cash. Oh for a hamburger, he thought, but quickly realized that hamburger stands are not too common on the isolated beaches of Green River. The 28 cents were worthless for the present.

A movement in the small pool of water to his left drew Keith's attention. In one of the many side pools formed by water escaping from the main current of the Green, he saw the fleeting form of fish. His hunter's instinct came into play, and he fashioned a hook from one of the safety pins in the first aid kit. Baiting it with a crude worm made from a piece of bandaid, he lowered the hook into the pool on the end of the string. Eventually he landed a fish.

At least he wouldn't starve, he thought, and then he said slowly to himself, "Raw fish!" The idea was revolting, and he started thinking of an alternative. He needed fire, but how could he get fire? The afternoon sun had just begun to hit his side of the canyon, and he had noticed a soft drink bottle near the water's edge. He smashed the bottle against a rock and, using the thick bottom, began to focus the sun's rays on the dry bark of a dead willow. It was a tedious process, but after 20 or 30 minutes smoke, then flame, began to emerge from the bunch of tinder-dry bark. Later he felt much like a caveman as he crouched over the small fire and licked the last morsel of fish from his fingers.

The sky was beginning to cloud over and his thoughts turned to shelter and sleep for that night. A cooling breeze began to move through the canyon. It occurred to him that he was really a caveman without a cave. Selecting the largest of the rocks scattered on the higher level, he decided to use it as one side of a lean-to shelter. With his knife he cut into the willow stand, and after much bending and pulling and hacking, he managed to produce poles which he used as rafters for his lean-to. He covered them with a mixture of dry bark and grass and decided to hope for the best if it rained.

He kept the fire burning in spite of the smoke the green wood was producing. "Better to have the

smoke," he sputtered, "than to be eaten alive by gnats." Besides, it could lead to his rescue if anyone took the trouble to look for him. He became depressed at that thought and began to wonder if he was worth looking for. "Anyone as stupid as I am deserves to be lost," he muttered under his breath. Thoughts of how he could be rescued crowded into his mind until finally he gave up and crawled into his home and went to sleep.

A small bird, seeking its first food of the day, awoke him next morning with its short, sharp cries. He stirred himself with difficulty from his hard bed of sand and grass. Sand seemed to be everywhere—in his eyes, nose, ears, and throat. His neck was raw with the pressure of damp sand on the life jacket he had used as a pillow. Staggering to the water's edge, he tried to wash the sleep from his eyes and in the process added more sand. "Sand and water everywhere and not a bite to eat," he thought as he tried to locate the canoe.

It was still held securely in the grip of the rocks. In the canoe were the things he needed so that he could exist for a few days at least: canned fruit, beans, flour, a saw, flashlight, matches, and ... he stopped short. He was wasting his time again. The canoe was as worthless to him as his 28 cents. He couldn't make use of things he couldn't get to.

He thought back on the stories he had heard about Robinson Crusoe and the Swiss Family Robinson. They had managed to survive all right, but they had the fortune to land on South Sea islands with plenty of fruit and animal life. He didn't exactly relish the idea of roasted lizard, but if ... well, he decided to wait and see if the day would bring his rescuers.

In the meantime, he set about making himself more comfortable. A few old wooden crates had

been washed ashore, and he took them apart using a small rock. He straightened out the nails and used the wood and nails to reinforce the roof of his lean-to.

The fish in the pool were still biting. This time he cooked the fish by wrapping them in layers of wet leaves (and the ever-present sand!). He wondered how many different ways he could cook fish—dry it, roast it, boil it—no, he didn't have a pot. He could always preserve it by drying it on a board, but that would only be done if he wasn't rescued shortly. Rescued—he rolled the word on his tongue as if it were dessert. How much he'd appreciate all the things he had grown accustomed to at home.

Just then he looked up to see in the distance a group of river runners approaching the rapids. Their rubber rafts fairly bounced from wave to wave. Keith rushed to the river's edge and waved his hands wildly. As they approached they spotted his canoe and then turned to see him jumping frantically on the shore. The runner in the first raft maneuvered the raft into the channel, and Keith almost threw himself bodily on it.

As he recounted the happenings of the last two days to the river runners, Keith was almost too excited to talk clearly. One word kept coming up in his conversation. A weather-beaten man in a Colorado State Game Warden uniform looked at Keith and asked, "Did you say fish?"

"Yes," said Keith, "I caught them in a side pool."

"I suppose you have a license for fishing," the warden asked, with a twinkle in his eye.

Keith felt in his back pocket and pulled out a soggy piece of paper—his fishing permit. Yep—his fishing had been legal, fully authorized by the State Game Commission.

Financial planning formats

Do *Self Test on Personal Spending Habits. Write a paragraph evaluating your strengths and weaknesses.

Develop a weekly (monthly) spending plan based on your own income and expenses. Review references to select formats. Discuss the various format using practical reasoning. Incorporate school lunches, meals away, sport events, clothing, transportation, other recreation costs. Draw case situations (married couples, two singles, elderly) and work out budget plans for the different situations. Do *Vine Covered Cottage. Discuss opportunity costs (choosing this over that, what do you give up?).

Consumer skills

Practice skills necessary to assist you with carrying out your financial plan (check-book balancing, envelope budget system, unit pricing, using resources). Develop a budget simulation using computer software.

Reflect on how the way you spend your money affects you, family and community by using the chart below. Test your thinking by using the questions that follow.

Expenditure	Self Effects	Family Effects	Community Effects

- What would happen if everyone did this?
- If you were another person, would you do the same?
- In a new situation, would you do the same thing?

Do *Making A Future Budget Work For You.

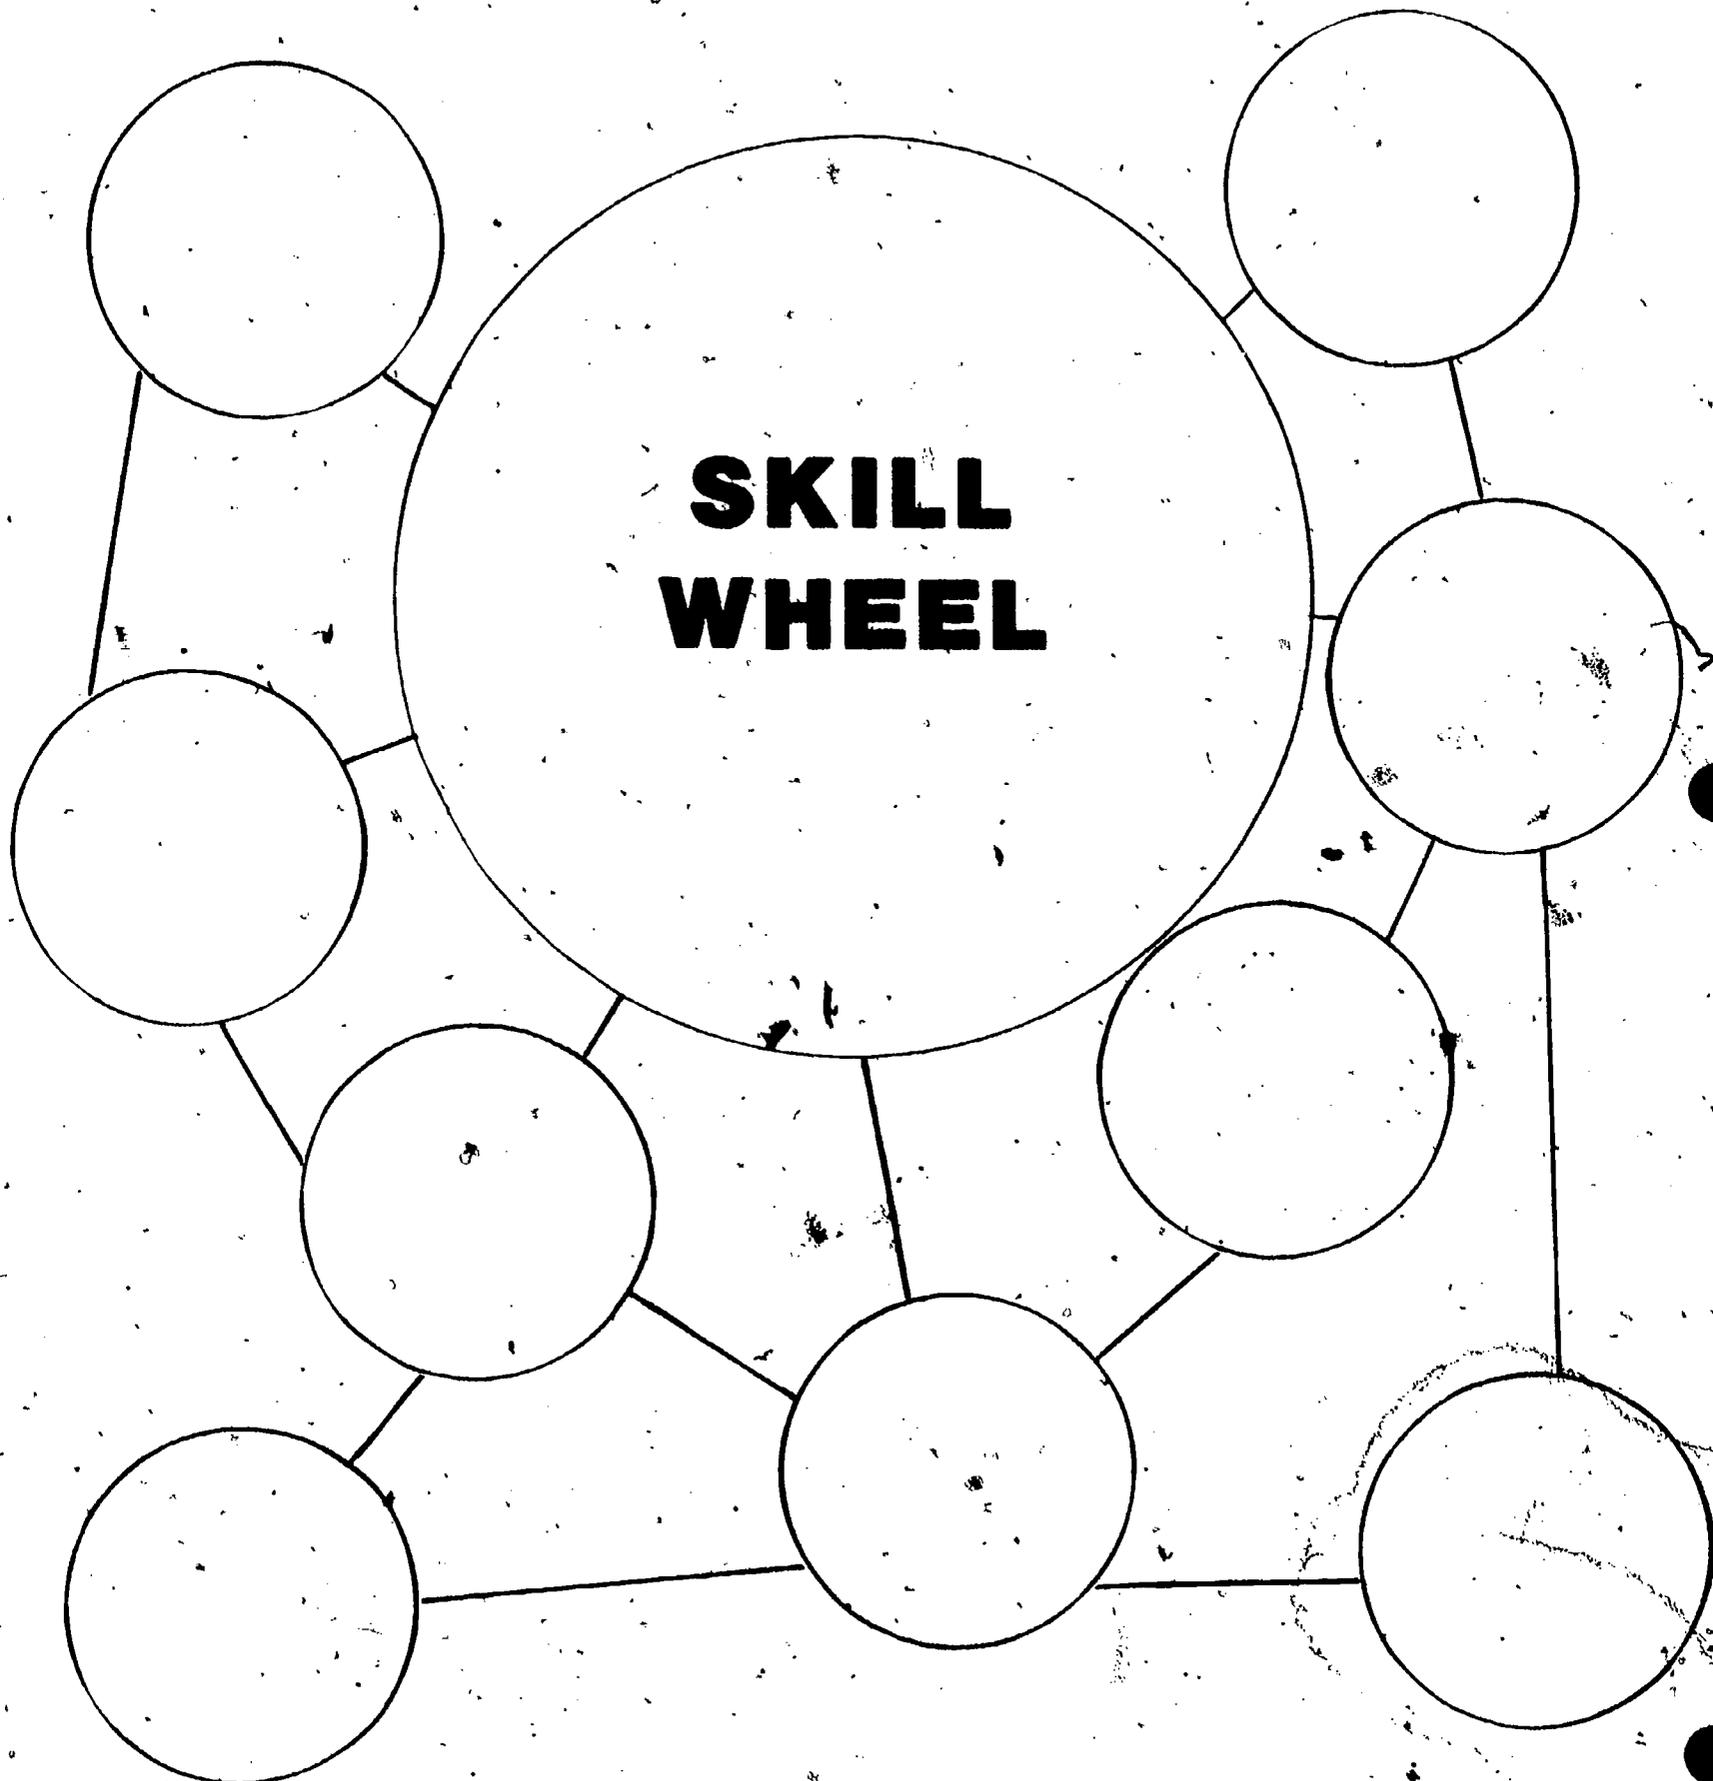

Banking

Using resources, identify banking services. Reinforce any needed skills.

- Check writing
- Balancing checkbooks
- Deposit slips

DIRECTIONS: THINK ABOUT PEOPLE WHO YOU THINK MANAGE THEIR MONEY WELL. WHAT DO YOU THINK THEY DO TO MANAGE? WHAT SKILLS DO YOU THINK THEY HAVE?

DECISIONS ... DECISIONS

DECISION MAKING

Teacher Objective: To discover the types of consumer decisions your students are making...what their feelings are about "wants" and "needs." Then utilize data as a basis for insight and planning teaching strategies for the study of Consumer Decision Making!

Student Objective: To recognize various decisions that one makes as a consumer and to decide whether these decisions are "wants" or "needs."

Directions for Students: Check below in the boxes provided decisions that you have made or will be making.

N or W Then place a "W" for an item that you think would be a "want" and "N" for items that you think are "needs."

SELF-TEST ON PERSONAL SPENDING HABITS

This questionnaire, if filled out as accurately as your memory permits, will help you to discover your weaknesses in personal money management. Each "yes" answer rates 5 points. Add the points to find your money management IQ. If your score is:

Over 75 - consider yourself a good money manager
 Between 75 and 55 - consider yourself average
 Between 55 and 35 - you are below average
 Below 35 - you are very poor

1. Have you made a rough plan for your large expenses for the year?
2. Have you kept a written record of your expenditures for at least one month?
3. Have you examined your record of expenditures and made necessary changes?
4. Are you seldom "broke" before your next allowance or income is received?
5. When "broke," do you generally get along as best you can until your allowance is received?
6. Do you avoid making yourself miserable and unhappy by fretting about something you want but cannot afford?
7. Are you in the habit of spending moderately on personal grooming?
8. Can you generally be entertained without spending money?
9. Do you usually resist the spending pressures of friends?
10. Do you resist the spending of money according to your whim without regard to what you really need?
11. When "broke," do you tend to avoid getting an extra sum from your parents or guardian?
12. If you saw a clothing item in a store where you have a charge account, would you be likely to think about how to pay for it before you bought it?
13. Are you careful about not leaving cash in your room or carrying fairly large sums of money on your person?
14. Do you usually avoid buying clothes that you may wear only a few times?
15. Do you spend a moderate amount of money for food between meals?
16. Do you usually save ahead for something you want very much, such as a new dress or suit, a gift, a prom?
17. Do you make it a habit to go to more than one store to compare price and quality before deciding on a big purchase?
18. Would you say that about half your purchases are planned in advance and are not merely "impulse" buying?
19. Do you know whether your family carries personal belongings insurance, protecting such items as your luggage, clothes, jewelry, golf and tennis equipment?
20. Can you resist buying bargains just because they are advertised as bargains?

YOUR SCORE: The number of checks () x 5 = ().

VINE COVERED COTTAGE
(A Case Study for Consumer Decision Making)

Housing, Home Furnishings and Equipment

PRIORITY RANKING

Objective: For students to gain experience in clarifying their own values and decisions through use of discussion and ranking priorities.

Directions: Have each student listen to a tape or read the following case study and then have each student rank what the couple should buy first, second, third, etc. Then have two students, one play the role of the husband and one the role of the wife and have them rank priorities together.

Steve, 26, and Mary Ruth, 25 (M.R.), have been married now for six years. They have three children, Dannie, 3-1/2 years, Bobbie, 5 years and Sue Ellen, 16 months. They rent a 75-year-old two-story, three-bedroom house in a rural area. They are trying to save money to buy their dream house and the various other wants and needs of their family. They are trying to decide what should be done first, second, third, and so forth. They are trying to consider each other's feelings, the budget and the logical order of purchases and savings they should try to accomplish.

Steve works as a factory worker and earns around \$350 take-home pay, while M.R. works as a secretary earning \$250 per week take-home pay. Their budget is approximately as follows for each month:

Gas	\$ 80.00 (budget)	Gasoline	\$100.00
Electricity	30.00	Insurance	40.00
Telephone	16.50	Entertainment	50.00
Food	250.00	Day Care Center	140.00
House Payment	325.00	Used Car Payment	95.00

How would you have them rank the following?

- | | |
|--|---|
| <input type="checkbox"/> savings per week (\$10, \$20, \$30) for house | <input type="checkbox"/> color T.V. set |
| <input type="checkbox"/> a sewing machine to make family clothes | <input type="checkbox"/> new shotgun for deer hunting |
| <input type="checkbox"/> a lawn mower | <input type="checkbox"/> tent for camping |
| <input type="checkbox"/> buying a new stove | <input type="checkbox"/> new car |
| <input type="checkbox"/> a new bed for baby, Sue Ellen | <input type="checkbox"/> a new couch |
| <input type="checkbox"/> curtains for living room | <input type="checkbox"/> throw rugs for dining room |
| <input type="checkbox"/> new winter coats for children | <input type="checkbox"/> bicycle and tricycle |

Developed by: Consumer Economic Education Unit, Ohio Department of Education.

MAKING A FUTURE BUDGET WORK FOR YOU

How much would you have to take home each month in order to support yourself according to your proposed budget?

What kind of job can you find now with your education and experience that pays the money you need to support yourself?

What are some implications for your future planning?

What type of financial recordkeeping system would you elect to use for your first budget? Why did you choose this system over others?

Food for Thought: Most people stop budgeting for the following reasons:

1. They follow a budget for a lifestyle that does not apply to them.
2. They spend too much time recording minor details. They get discouraged because the budget takes too much time and energy.
3. They are unorganized and don't keep practical or accurate records.

How does the financial recordkeeping system you selected avoid these pitfalls?

HOW DO YOU FEEL ABOUT MONEY?

LEVEL V

Strongly Agree

Agree

Undecided

Disagree

1. Money is important to me at any age.
2. I have enough money for the things I need.
3. My parents need to know how I use money.
4. I should have a savings account in a bank.
5. I should have a good idea of the amount of our family income.
6. I should earn some of the money I spend.
7. I should have an allowance, and in addition, enough extra money for clothes.
8. The way I spend my own money reveals the value I place on money.
9. No matter how much you have, spend less.
10. Husband and wives should have a joint banking account.
11. If I can't pay, I can owe.
12. Good money management is an essential element in a happy marriage.
13. Working wives should decide how their salaries are to be spent.
14. Newlyweds should be able to start house-keeping on the same economic level as their parents.
15. Working children should pay room and board if they live at home after graduation.
16. Money matters should be discussed before marriage in the light of day rather than in the moonlight.
17. The ideal husband is one who definitely does not want his wife to work.
18. One should consider the possible earning power when selecting a mate.
19. The wife should help support the family by working outside the home.
20. The money on hand at the time of marriage affects the success of the marriage.

REASONS FOR A SPENDING PLAN

Directions: Put a + in the blank beside those items you think are reasons for using a spending plan, and an 0 beside the items you think would not be benefits of using a spending plan.

- A. Enables one to earn more money.
- B. Helps one make future plans.
- C. Allows one to know how much money is available to work with.
- D. Determine how much income has already been committed.
- E. Shows how much money is required for daily living expenses.
- F. Helps one get the most out of one's money.
- G. Shows how much money is available for new expenses.
- H. Increases monthly income.
- I. Decreases worry over money.
- J. Enables one to satisfy more of one's wants.
- K. Provides cash reserve to take advantage of sales and bargain opportunities.
- L. Enables one to be more self-disciplined.
- M. Encourages examination of values.
- N. Helps one to become a regular saver.
- O. Helps one to understand that money has value other than immediate expenditures.
- P. Keeps one conscious of limiting spending to usable income.
- Q. Changes one's values.
- R. Lessens the number of family arguments over money.
- S. Lets one know where the money is going.
- T. Changes the way one spends money.

LIFE STYLES AND FINANCIAL PLANNING

Widow Betty Keller

Hi . . . I can't believe I'll be 57 next month. I've been a widow now for five years . . . doesn't seem possible. I don't have a car, really can't afford one . . . and isolated in this rural area I find it difficult to find a job. I guess I'm afraid to look for a job . . . I really don't have any skills . . . no typing, stuff like that. I've been a homemaker all my life. My children have their own families and have moved out of state. I do receive \$150.00 a month from my husband's pension from the company and I'll receive more when I reach retirement age. Good thing we had some money saved when Ike died and that he had that life insurance policy for \$20,000. I need some advice, can you help me get the most out of my money?

John and Nat, On Our Own

Cool baby cool . . . We finally got an apartment. We've wanted to be on our own since we were juniors starting at the vocational school. John and I have been friends since grade school. We even graduated this past June in the same trade area, welding, from the J.V.S. And we both make \$8.00 an hour! This two-bedroom apartment, with a dining room, kitchen (stove and refrigerator), living room and patio is just down our alley, \$189.00 a month . . . but we do have to pay utilities. We're going to start looking for furnishings soon . . . we need everything . . . we're even sleeping on the floor in sleeping bags now. Do you have any hints you can give us?

Expectant Dena and Ed the Master's Degree Candidate

Yes, we made the big decision that I go back to school to get my Master's degree. I've got a tuition and book scholarship and have been working part time as a graduate assistant bringing a take-home pay of \$140.00 every two weeks. Dena and I have been married three years now. Needless to say, we both have mixed feelings about our expectant baby in eight months and the financial decisions that must be made. Dena is bringing take-home pay of \$275.00 every two weeks. If everything goes O.K. she plans to work until her eighth month. I could graduate about the same time the baby is due, if I continue my schooling. We do have some savings, \$250.00, but our too-small house for a baby rents at \$198.00 a month, the car payment is \$95.00 . . . what should we do? Should I quit school even if I've been promised a \$20,000 job after I graduate? How can I swing it?

Swinging Single Susan

Hi . . . I'll be nineteen on March 21. My name is Susan McCafferty and I live at home with my parents, a sister who is still in high school and a baby brother who is in elementary school.

I work at a local grocery store as a cashier and I earn \$125.00 a week take-home. I'm buying a 1972 used Nova, \$50.00 per month, and I pay Mom and Dad \$50.00 a month for my room rent and food that I eat. I need some advice on how to budget my money . . . What do you think I should do? And what items should go into my budget . . . How do you start anyhow?

One Day At A Time Krosky

Hi . . . I'll be 33 years old in September. My name is Mary Krosky. I'm a mother of a 6-month-old baby girl, Valerie Ann . . . I'm divorced. I get child support monies from my Ex, \$86.00 a month. My mother takes care of Valerie while I work as a clerk-steno. I earn \$3.30 an hour. My mother wants Valerie and me to move in with her; I'd rather keep the apartment, but I'm having trouble making ends meet. I need some advice . . . how do I budget?

FINANCIAL PLAN

Directions for using the following form:

First Step: Estimate the disposable, or take-home pay, for the year of the family members and any other expected income such as interest, commissions, bonuses, etc. Total this and divide by the number of paychecks the family will receive in the year. (Divide by 12 if pay is monthly; by 52 if weekly.) This is the disposable income each pay period.

Second Step: Plan savings first. A definite amount should go into regular savings until the family has built up a backlog of savings, enough to take care of six months' living expenses if emergencies arise such as illness, unemployment, death, etc.

Special purpose savings are for any items that are a part of the family's goals for that year, such as college education, a TV, camping outfit, down payment on house, etc. Christmas and vacation money may be saved this way also.

Add the total for the year and divide by the number of paychecks to see how much should be put in savings account each payday.

Third Step: Plan the amount which will have to be set aside each payday for Fixed Expenses. These are expenses the family knows are coming, such as house payment, insurance, utilities, etc., and the amount is fairly predictable. Some come monthly, and some at different times in the year. Most of these expenses are too big to be paid out of any one paycheck, so a proportion of each check should be set aside in a reserve fund so the money is there when the bills come.

List all Fixed Expenses for the year and divide by the number of paychecks to see how much must be set aside each time. This could go into a checking account.

Fourth Step: Plan the family's Flexible Expenses. These are everyday living expenses which are usually paid in cash as the need arises, such as entertainment, medical care, etc. The family should decide who is to be responsible for each item, so that after savings and fixed expenses are put in the bank, the remaining cash may be divided between the family members according to the needs of the week.

Fifth Step: Work out the summary on the last page to see if income and expenditures for each payday balance. If not, the family will have to decide where to make adjustments.

PROCESS SKILLS	CONCEPTS	STRATEGIES
 104	Loan qualifica- tions	<p>How you would determine whether to lend something to another person (\$5, your car, a new outfit, a pencil)? Make a list of factors which characterize people who are good credit risks. Compare your list with the standards used by one or more local businesses.</p> <p>Investigate the responsibilities that come with co-signing a loan. Write a short paper entitled "Why I Would (or would not) Co-sign a Loan for My Best Friend." As a class, share ideas. Invite a person from a local bank or loan association to discuss the pros and cons of co-signing a loan.</p> <p>Invite a speaker from a nearby lending institution to discuss the ways to borrow for different purposes and what kind of loan a school-age person might be likely to use (cash loans, character loans, co-signer loans, collateral loans). Ask the speaker to distribute and discuss a credit rating sheet or chart used to determine the eligibility of a customer for a personal loan.</p> <p>Locate sources of credit in your community where Joe could obtain \$400. Research qualifications for loan, repayment arrangements, interest rate, total cost of loan, other services. Secure examples of credit applications and contracts. Develop a wall chart comparing the sources. Discuss the following questions.</p> <ul style="list-style-type: none"> --What values, goals, conditions might influence Joe's decision? --If Joe had children, family obligations, what alternative do you think he might choose? Why? --What if everyone chose this alternative, what might happen?
	Credit application	<p>Fill out sample application loan forms. Follow up with a discussion using the following questions.</p> <ul style="list-style-type: none"> --What type of questions were asked? --What are your legal rights and obligations? --What are the consequences if everyone failed to complete the full application? --How might you feel as a lender if you were looking at your application? --Are you a good risk?

PROCESS SKILLS	CONCEPTS	STRATEGIES
	<p>Types of credit</p> <p>Credit cards</p> <p>Method of finance charge</p>	<p>Review and discuss other sources of credit you or close acquaintances are presently using (credit card, installment plan, revolving charge, cash credit, sales credit, service credit). Read <u>*Types of Credit</u>.</p> <p>Discuss the popularity of credit cards. Using resources, working in groups, develop a chart listing advantages and disadvantages for credit card use, the cost for use of credit card, interpretation of monthly credit card statement, procedures to follow should you lose a credit card.</p> <p>Compare the various finance charge methods and their costs or benefits to consumers. Figure the costs or savings for each. Discuss consequences of using each method. Ask key questions: Why would you choose one method over another? What condition might change your decision?</p> <p>Divide the class, debate the following statements.</p> <ul style="list-style-type: none"> --Credit cards tempt people to overspend. --Teenagers should not use credit. --Credit should be used only for emergencies and absolute necessities. <p>Evaluate the debate, giving points for facts cited to refute or support the value positions.</p>

SOURCES OF CREDIT (B)

Stores -- offer charge accounts and installment plans. The amount of interest you pay depends on the store where you buy.

Banks -- charge a lower interest than most other places that lend money. To borrow from a bank, you must have a good reason and be a good risk.

Credit Unions -- are formed by a group of people. You must pay money into the credit union to join. You earn interest on your money. Members may also borrow money. You need a good reason to get a loan, just as you do at a bank. Each credit union decides how much interest it will charge. Their charges are usually about the same as a bank.

Personal Finance Companies and Small Loan Companies -- extend loans to people with high risk credit ratings. You pay more interest than you would at a bank because you do not need to own much property to back the loan. At some companies you do not need to own anything to back up the loan but the interest rate will usually be even higher.

Pawnshops -- loan money, too. You must leave something valuable like a watch or a television with a pawnshop. They do not give you much money for what you leave. They can sell it if you do not pay back the loan when you say you will. Pawnshops charge high interest rates.

Illegal Lenders -- charge very high interest rates. Sometimes they are called "loan sharks." They charge more than any other place you can get credit. For your own good, do not borrow from illegal lenders.

TYPES OF CREDIT

There are three main types of credit. These are: sales credit, cash credit and service credit. Place these headings on a flannel board or bulletin board and place examples of each type under the heading as they are discussed.

SALES CREDIT--credit you receive when you make a purchase now and promise to pay later.

1. Installment Plan - payments to the store are made in equal amounts over a period of weeks or months. A down payment is often required. Many people use this plan to buy things that are expensive. The store can take back what you are buying if you do not make the payments. This type of credit is usually used for big things, like a washing machine, television or furniture.
2. Charge Accounts - are offered by many stores. The store may tell you how much you can charge. Sometimes, however, no limit is set. You usually get a bill each month telling you how much you owe. Charge accounts may be different types. One kind is the "open charge account." With this kind of charge account, you must pay the entire amount when you get the bill. You pay no interest on this kind of account. With another kind called "budget accounts," you must pay a certain amount each month as long as you owe at least that much. If you owe less, you pay less. You pay interest on what you still owe. Still another kind is called "revolving credit." The amount you must pay depends on how much you still owe. This amount is a certain percentage of what you owe. You pay interest on what you owe.
3. Lay Away - another type of sales credit. The store keeps the item you purchase until you have paid the whole amount. This is good when you want to take advantage of a sale and do not need the item for awhile. No interest is charged at most stores.
4. Credit Cards - another type of sales credit. They are similar to installment plans. They are convenient to use when you do not want to carry much cash.

CASH CREDIT - credit you receive when you borrow cash and pay it back later.

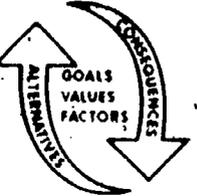

Personal loans may be either installment loans or single payment loans. Personal loans are particularly useful when you need cash to meet an unforeseen emergency or to help your family through a

period of unexpected financial stress. A personal loan can help pay rent, buy food and meet medical expenses when the head of the household is temporarily out of work or some member of the family is seriously ill. If it is repaid in a number of equal payments, it is an installment loan. If the loan is repaid all at once, it is a single payment loan.

A mortgage is also a loan. It is usually used when a family buys a house. The house is the security for the loan. The family pays back the loan in monthly payments. When the loan is repaid, they own the house.

SERVICE CREDIT - credit given for a service one's family receives and pays for later.

You use service credit when you make monthly payments for utilities you have used during the month, your telephone, gas and electricity. You also use service credit when you pay your doctor, dentist or hospital at the end of the month. You use service credit when you have your car repaired at a garage and then pay the bill.

PROCESS SKILLS	CONCEPTS	STRATEGIES
 	<p>Credit alternatives (continued)</p> <p>Local, state and federal credit laws and regulations</p> <p>Potential problems caused by misuse of credit</p> <p>Credit counseling, legal counsel</p> <p>Consolidation loan</p>	<p>After completing chart, ask these questions.</p> <ul style="list-style-type: none"> --Which source of credit should Heather use? --What values, goals, conditions do you base this decision on? --Would everyone choose the same solution? Why or why not? <p>Use <u>*Clues for Protection</u> as bulletin board/overhead. Discuss information which must be provided the consumer. Local, state and federal laws and regulations which protect consumers in their credit use. Contact community government agency to determine the laws in effect.</p> <p>Using resources, prepare a one-page fact sheet on information which must be provided the consumer of credit, including how you report violations, common credit violations. Combine fact sheets into an article for school newspaper or as one article in a series of articles.</p> <p>Discuss possible reasons for misuse of credit (confusion regarding needs and wants, desire for status, poor budgeting, failure to foresee emergencies or expenses).</p> <p>Discuss what should you do if you find you have misused credit? Use resources to identify alternatives, consequences and factors affecting the resolution of problem.</p> <p>Discuss case study <u>*What Now?</u> Role play alternative ways to handle problem.</p> <p>Invite representatives from a credit counseling service, debt adjustment agency, finance company that makes debt consolidation loans. Have them discuss ways debt consolidation can be arranged, fees for service, extra costs in finance charges, advantages and disadvantages of pooling debts, alternatives to debt pooling, criteria for selecting reputable debt adjusters and credit counselors, and how to establish a good credit rating.</p> <p>Visit the local credit bureau. Find out how it operates, type of information recorded and ways to challenge an inaccurate credit record. Collect credit applications from retail stores. PROCESS
SKILLS

CONCEPTS

STRATEGIES

Lifestyle, life stage affects credit use

Assign small groups a lifestyle/life stage situation. Develop case studies for persons in each lifestyle. For each person, identify an object for which they may wish to borrow money. Describe characteristics of the person--income, other debts, values, needs, goals.

- Adolescent living at home.
- Young single living in apartment with roommate.
- Young married couple, no children.
- Single parent, teenage children.
- Older person living alone.

Complete the chart.

Item	Alternatives	Consequences	Test
	Borrow from a friend bank credit union loan shark Don't borrow		Will it work? What if everyone did? Would I advise a good friend to do this? What if my job is insecure? What if a medical emergency happens?

Effect of credit on economy

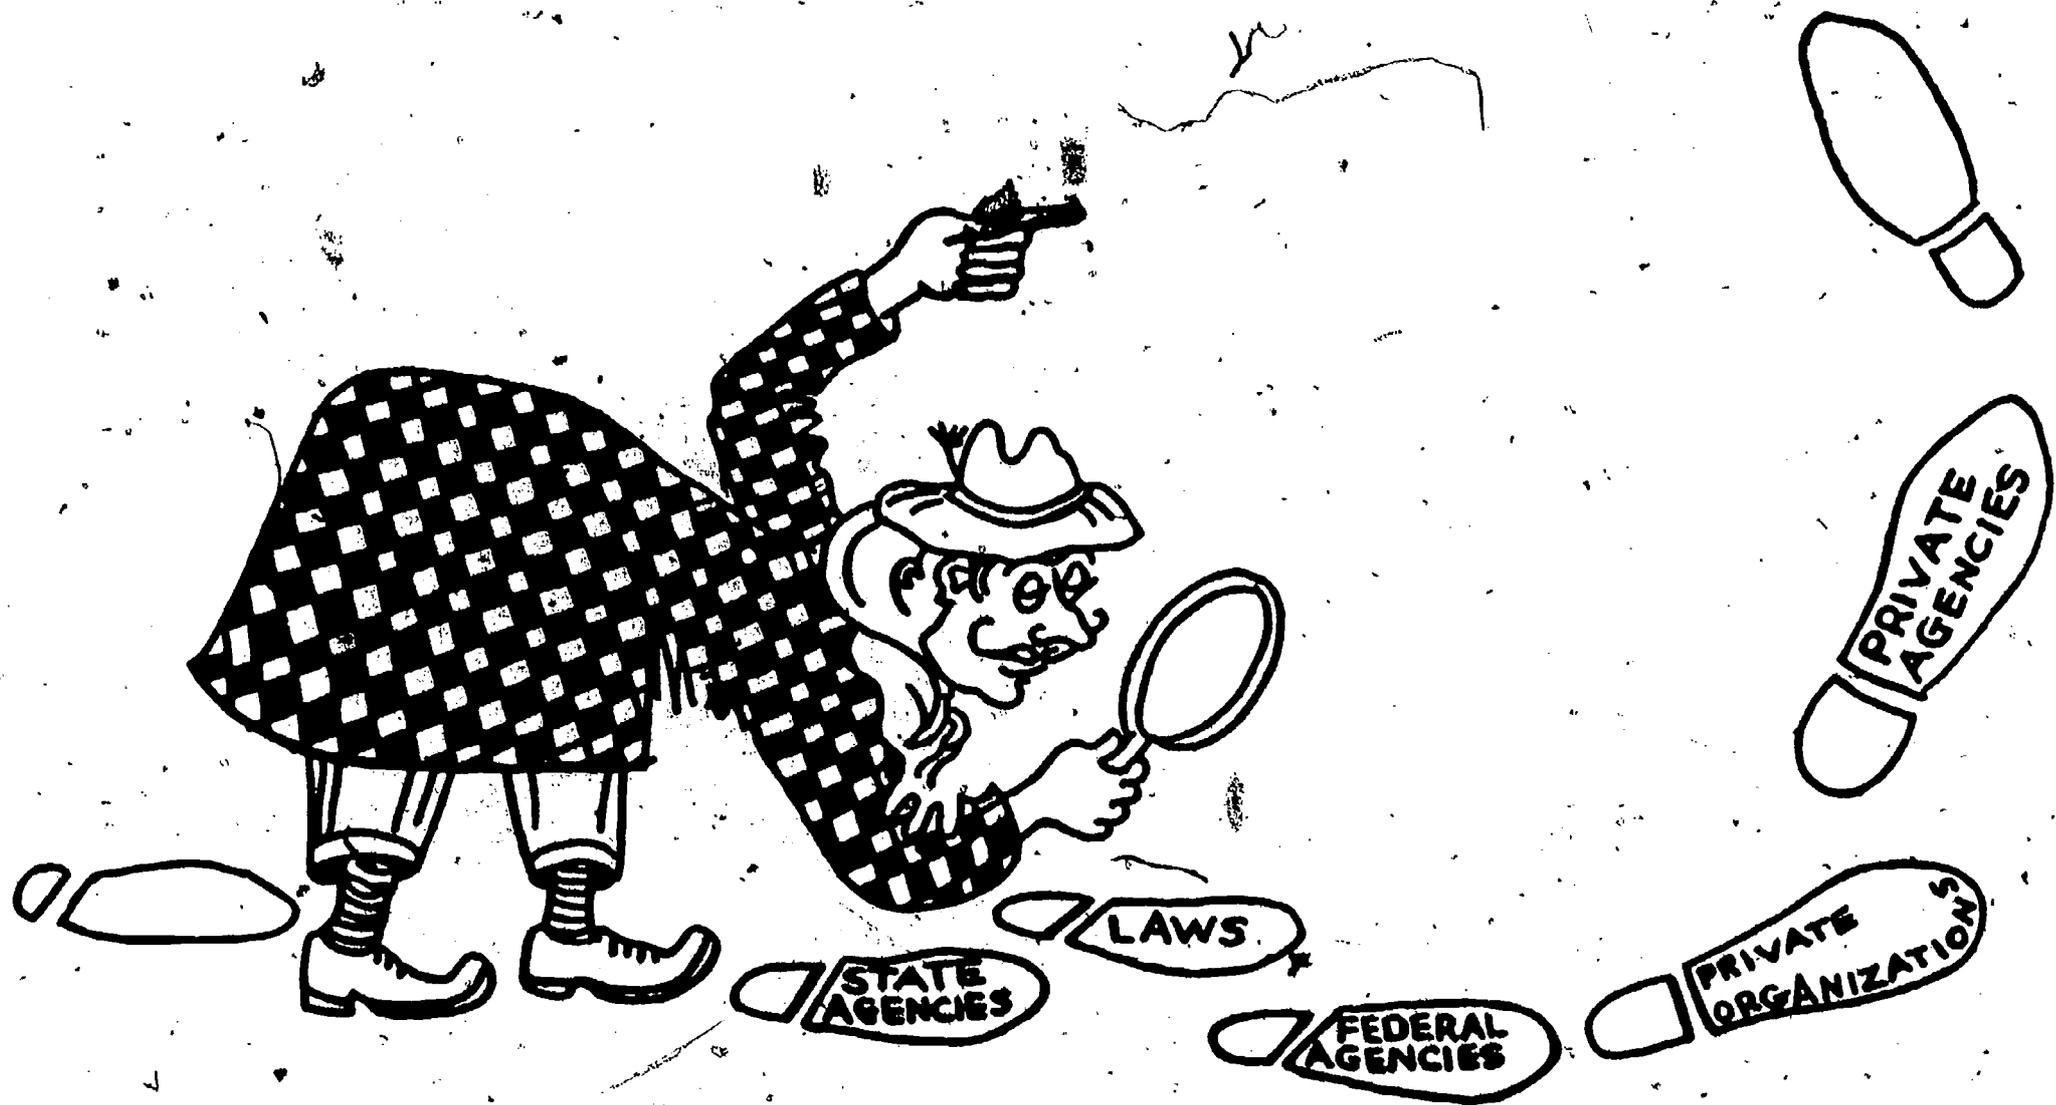

Discuss the following "what if" questions to examine the effect of credit on our economy. What do you think would happen to the automobile industry if cars could no longer be purchased on the installment plan? Whose income would be affected if houses could not be purchased on the installment plan? What if teenagers could be issued credit cards? Summarize points made about the effect of credit on the economy.

CLUES FOR PROTECTION

WHAT NOW?

Case Study

Rochelle and Darnell have been married two years. When they first married and set up housekeeping, both were working. Now Rochelle is home caring for their nine-month-old daughter.

Rochelle and Darnell had nothing when they set up housekeeping. So they made a number of installment credit purchases in addition to acquiring a car loan and home mortgage. They are presently paying off installment credits on a washer and dryer, bedroom and living room furniture, a refrigerator and range. They still owe on their car and home.

Without Rochelle's earnings and the many expenses of the baby, each month they face which monthly bills to pay. They just can't pay them all.

They don't know what to do--which way to turn for help. What are their alternatives? Factors that must be considered? Values that influence each alternative?

Discuss the consequences of each alternative suggested.

APPLYING FOR CREDIT

Please Check Individual Account or Joint Account INDIVIDUAL ACCOUNT (For an individual account complete Parts A, B, and C and sign Part C) JOINT ACCOUNT (For a joint account, complete Parts A, B, C and D, and sign Parts C and D)

PRACTICAL PROBLEM

What Should I Do Regarding
Resource/Product Management?

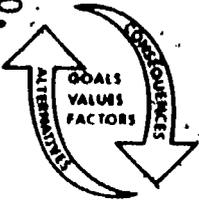

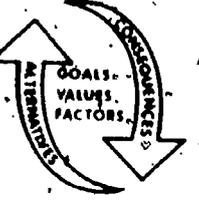

CONCERN/CONCEPT

Financial Planning/Saving

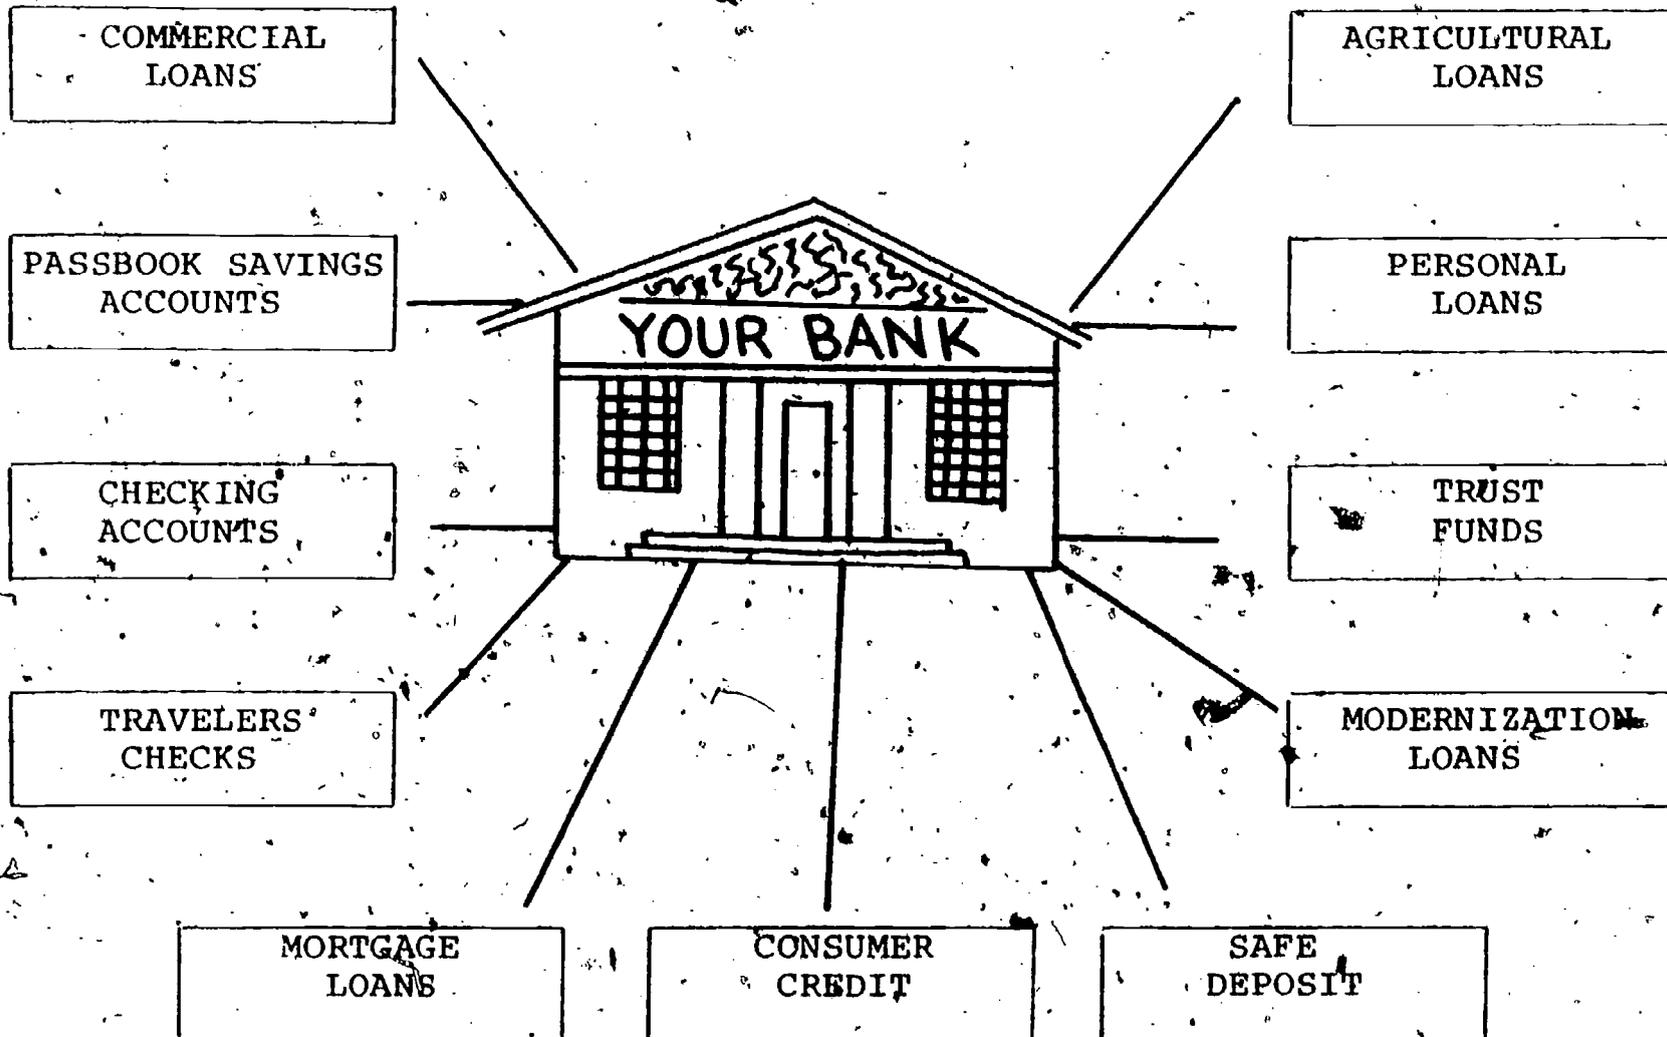

HOMEMAKING SKILLS

- Develop a saving strategy based on personal needs
- Plan where to save
- Interpret saving earnings

PROCESS SKILLS	CONCEPTS	STRATEGIES
<p>119.</p> 	<p>Personal saving strategy</p> <p>Goals and values</p> <p>Purposes for saving</p>	<p>Read the vignettes.</p> <p>Iris stopped at an ice cream store each day after school with friends. Her friends usually ordered an 85¢ sundae. How much money would Iris save in a year if she only purchased a 25¢ ice cream cone? (Consider the school year 180 days.)</p> <p>Timothy could buy the school lunch for \$1.25 per day. If he ate at the fast food restaurant nearby, he usually spent \$3.50. How much money would Timothy save in a year if he purchased the school lunch?</p> <p>Discuss the role of savings in financial planning.</p> <p>--What values affected the choices each made? --Do you see a pattern which could be carried on into later life?</p> <p>Brainstorm--What consequences could arise if a person does not have a plan for savings?</p> <p>Using resources, working in groups, develop a series of posters. Group 1--Why save? Group 2--How to save? Group 3--Where to save? Groups should include such items as (Personal, future security, income, interest and dividends, unexpected opportunities or emergencies, protection for dependents.)</p> <p>Develop a "Tips for Savings" bulletin board incorporating posters and ads from newspapers regarding savings institutions.</p>

PROCESS SKILLS	CONCEPTS	STRATEGIES
<p>120.</p>  	<p>Savings habit</p> <p>Guidelines for saving and investing</p>	<p>Use <u>*Banking Services In Our Everyday Living</u> as overhead/bulletin board. Discuss.</p> <ul style="list-style-type: none"> --Purposes for savings. --How to establish your personal strategy to ensure savings. --Where to save? Include such institutions as (banks, savings and loan, credit union, insurance policy, stocks and bonds, government savings bonds, municipal savings bonds, pension and retirement plans). --Pros and cons of various savings programs. <p>Use practical reasoning to test the above decision results for your own personal use.</p> <p>Develop a wall chart listing the advantages and disadvantages of the various saving program options. (Safety, earnings, services, money available, interest or dividends.)</p> <p>Using resources, interpret interest income. Complete <u>*Interest Income</u>. Apply your own values and goals concerning savings. Ask yourself these questions.</p> <ul style="list-style-type: none"> --What will I gain? --What do I stand to lose? --Is it good for those around me? --If I suddenly changed income level or jobs, would I still feel the same? <p>Prepare a collage or stories which depicts your present savings program, saving habits, you now have or plan to begin to develop, type of savings institutions you will plan to utilize, and goal expectations. Answer these questions.</p> <ul style="list-style-type: none"> --What other things might happen to change your savings plan? --Would you keep this plan if you were married? Expecting children? --What if someone in your family were in a bad auto accident? <p>Bring in various types of examples of savings (passbook, pensions, bonds). Use as a bulletin board, <u>Savings Can Mean Many Things</u>.</p>

BANKING SERVICES IN OUR EVERYDAY LIVING

INTEREST INCOME

Maturity Period	Interest Rate	Minimum	Compounded
30-48 months	10.9%	\$ 500	No
18-24 months	10.5%	500	Daily
12 months	9.9%	500	Daily
6 months	9.4%	2,500	Daily
PASSBOOK SAVINGS ACCOUNTS NO MATURITY RESTRICTIONS			
	Minimum Balance	Interest Rate	Effective Annual Yield*
Regular Passbook Christmas Club Vacation Travel Club	\$10	5$\frac{1}{4}$%	5.39%

If you're offered several savings plans, how do you decide which to pick? How good is each one? See if you can answer the questions below.

Reading A Savings Ad

The table shown here was part of an ad for a savings bank. Along with the table were these two notes:

—"All deposits in by the 10th earn from the 1st. Ten free days of interest. Interest earned from date of deposit to date of withdrawal."

—"Interest is compounded daily, paid quarterly, and must be left undisturbed for one year to earn effective annual yield. Certificates withdrawn prior to maturity earn passbook rate less 90 days interest."

1. How long do you have to keep your money in the bank to earn 9.90 percent interest.
2. What penalty do you pay if you buy a 30-month certificate and cash it in after a year?
3. How often does the bank compound interest?
4. How often does the bank pay interest?
5. How many days of interest would you get if you deposited your money in a passbook account on June 11 and withdrew it on June 30? What if you deposited it on June 10 and withdrew it on June 30?

- Compute interest income

PROCESS SKILLS	CONCEPTS	STRATEGIES
<p>123.</p> <p>PROBLEM</p>  <p>Need for saving</p> <p>Savings habit</p> <p>178</p>		<p>Read case study <u>*Savers and Spenders</u>, Discuss the decisions made in each case study.</p> <p>Suggested discussion questions:</p> <ul style="list-style-type: none"> --What problems do you see that Curtis has that can be corrected? --Does Lee have any problem? Explain. --What values affected the choices each made? --Do you see a pattern that may/may not be carried on into later life? --What are some purposes for which teenagers save money? --What are some reasons adults save money? --What are some of the problems that may arise if a person does not have a plan for savings? --What values were reflected in each case study? --What were the rewards for saving? --What were the consequences experienced for not saving? <p>Compile a list of specific purposes students might have for saving. (Go to college, purchase a car, attend prom, buy an engagement ring.)</p> <ul style="list-style-type: none"> --What values, goals, conditions influenced your decision? --What would happen if you changed your decision from one purpose to another after you started savings? <p>179</p>

PROCESS SKILLS	CONCEPTS	STRATEGIES
  124	<p>Savings habit (continued)</p> <p>Interest</p> <p>Calculating simple interest</p> <p>Compound interest</p>	<p>--How could you cope with this change?</p> <p>Survey students to determine who presently has a savings program. Where they have elected to save (bank, savings and loan association, bonds, stocks)? Write the collective list on board. In groups, use resources to identify characteristics of each saving program. Report findings to class. Discuss:</p> <ul style="list-style-type: none"> --Who might benefit from each one? --What are the disadvantages and advantages of each? --What goals would influence you to choose one plan over another plan? <p>In groups, using resources, brainstorm different interest plans offered with savings plans by financial institutions. List on board.</p> <p>Using resources, investigate the advantages and disadvantages of each type of financial institution.</p> <ul style="list-style-type: none"> --What type of person (values, goals) would choose each interest plan? --If you were 20, and single, which plan would you choose? Why or why not? --If you were counseling someone (young child, friend, elderly person) what advice would you give them? --Explain why or why not you feel each different type of savings helps your local community (directly/indirectly)? <p>Use <u>*Ted Daily</u> to practice determining simple interest on a savings plan. Discuss terms (principal, terms, interest, rate of interest). Use the basic formula (principal x rate x time = interest) to calculate other amounts of interest on savings plans in <u>*Case Studies: Simple Interest Worksheet</u>.</p> <p>Using resources and bulletin board "Time Is Money", explain compound interest (when interest is compounded, the interest is added to the principal, thus increasing the amount of the principal. Remember, the larger your principal and the more frequently interest is compounded, the greater the amount of interest you will earn.)</p>

PROCESS SKILLS	CONCEPTS	STRATEGIES
	Economic growth	<p>Do <u>*Interest Compounded Worksheet</u> and <u>*Compound Interest Chart Worksheet</u>.</p> <p>Develop a computer program to explain compound interest. Discuss the advantages and disadvantages of compound interest daily, monthly, quarterly, semiannually and annually. Determine which type of compound interest is best.</p> <p>Review effect of one's savings on the economy (factors, savings, business growth, employment, reflection).</p> <p>Debate the topic "savings is a hedge against inflation and the effects of savings on economic growth."</p> <p>IEE -- How to start and continually expand one's personal saving program. Prepare a report outlining your present and future savings plans. Note the kind of discipline that will be required, the saving habits you wish to establish, the type of saving institutions you will utilize, and interest income expectations. Answer these questions in your report.</p> <ul style="list-style-type: none"> --What values and goals did you consider? --What are the advantages and disadvantages of your choice? --If you were a single parent, what would be your choice? Why? --If you were in a nursing home, what would be your choice? --If you were in college, what would be your choice? --How would your community be affected?

SAVERS AND SPENDERS

EM 2.14

CASE STUDY #1

Curtis and Lee work after school. They each take home \$30.00 per week and have the same dream of owning a 360 motorcycle. Curtis saved some of his pay trying to make his dream a reality. He put about \$12.00 of each weekly paycheck into a bank account. By the end of a year, he had over \$600.00, enough to buy a good used motorcycle. Lee was shocked when Curtis came to work on his own motorcycle. "How'd you get that bike, Curtis?" "I just used the money I earned here." Lee didn't understand. They both worked at the same place, made the same salary, yet Lee did not have nearly enough money for a new or used bike.

CASE STUDY #2

Joan and Bob Merriweather knew how to live. They had a luxurious apartment and took great vacations. They had two cars, and on weekends they enjoyed the night life of the city. In their mid-twenties, Joan and Bob had high-paying jobs, and they could afford it. They also borrowed money freely. They never saved, but why bother? Two good salaries every month.

Then the impossible happened--Bob lost his job. Their income was cut in half, and the bills were coming fast. Bob couldn't find another job. After struggling to pay the bills, they decided it was an impossible task. They declared bankruptcy.

CASE STUDY #3

Gordon and Sally Law always wanted to buy a home, but they could never save enough for the down payment. Finally, Gordon went in to see Arthur Crow at the company credit union. They arranged for Arthur to take \$100.00 a month from Gordon's paycheck to put into the Laws' savings account. In this way, the Laws would automatically save \$100.00 each month.

In five years they had \$6,000 plus interest. They used their money for a down payment on a two-bedroom house. Gordon and Sally learned that it is not always easy to save, but their goal of buying a home made the sacrifice worthwhile.

EM 2.14

TED DAILY

After graduating from high school, Ted and Denise got married. Before too long, Ted and Denise Daily had over \$600 in their checking account. Ted wanted to see the checking account grow so he and Denise did not spend a lot of money. It was no surprise to Denise when Ted decided to open a savings account at the bank.

Denise remembered that her former Home Economics instructor told her that a "savings account is a place to put your money where it is safe and will draw interest."

Ted and Denise wanted to find out all they could about interest before opening a savings account so they looked up their former Home Economics instructor, Mrs. Penney, who knew about interest and how to calculate it.

Mrs. Penney walked to the board and said, "If a person deposits \$100 in a bank (savings account), the bank pays that person interest.

Example: If Ted deposits \$100 in savings at 5% interest and leaves the money in savings for one year, he will earn \$5.00 interest.

This is how you figure the interest paid on \$100 at 5% interest for one year.

$$\begin{array}{rcccccc} \text{Principal} & \times & \text{Rate} & \times & \text{Time} & = & \text{Interest} \\ \$100 & & .05 & & 1 \text{ yr.} & & \$5.00 \end{array}$$

Ted and Denise said they had forgotten how to convert percentages to decimals, so Mrs. Penney further explained.

"When converting a percent to a decimal, move the decimal point two places to the left and drop the % sign."

Example: 5% = ?
.05 (add zero to show place value)

"If you have a fraction as part of your percent, convert the fraction to decimal first."

Example: 6-1/2% = ?
1/2 = .50 (fraction converted to a decimal)
6-1/2% = 6.50 or simply 6.5, then .065 = .065

"Most fractions related to interest are expressed in fourths or halves. So you might remember these fraction conversions."

$$\begin{array}{l} 1/4 = .25 \\ 1/2 = .50 \\ 3/4 = .75 \end{array}$$

"If you have to convert a fraction to a decimal, divide the denominator of the fraction into the numerator.

Example: 1/5 = .20

According to Mrs. Penney, the following procedure should be followed when converting a mixed number (a whole number and a fraction) to a decimal number.

Example: $5\frac{1}{4} = ?$

Whole number 5 = 5.0

Fraction $\frac{1}{4} = 100 \div 4 = .25$

Mixed number $5\frac{1}{4} = 5.25$

To find the decimal number, move the decimal point two places to the left.

$5.25 = .0525$

Ted and Denise were given another problem on simple interest to solve.

Principal	x	Rate	x	Time	=	Interest
\$200		.05		1 yr.		\$10

Remember: Principal	+	Interest	=	Amount Saved
\$200		\$10		\$210

Ted and Denise could see that after leaving \$200 in savings for one year it would be \$210. Most people try to add to their savings on a regular basis to increase the principal because the greater the principal, the more interest earned.

CASE STUDIES SIMPLE INTEREST WORKSHEET

Convert fractions to decimals:

1. $5 \frac{1}{2}\%$ = 5.5% = .055
2. $5 \frac{1}{4}\%$ = 5.25% = .0525
3. $8 \frac{1}{4}\%$ = 8.25% = .0825
4. 6% = 6.0% = .06
5. $1 \frac{1}{2}\%$ = 1.5% = .015

In each case below, find the simple interest and amount saved.

	Interest	Amount Saved
1. \$300 for 1 year at $5 \frac{1}{2}\%$	<u>\$ 16.50</u>	<u>\$ 316.50</u>
2. \$2,000 for 1 year at $6 \frac{1}{4}\%$	<u>125.00</u>	<u>2,125.00</u>
3. \$400 for 1 year at $5 \frac{1}{4}\%$	<u>21.00</u>	<u>421.00</u>
4. \$1,000 for 1 year at $9 \frac{3}{4}\%$	<u>97.50</u>	<u>1,097.50</u>
5. \$600 for 5 year at $7 \frac{1}{2}\%$	<u>225.00</u>	<u>825.00</u>

* Add your own examples

 \end{array}$$

INTEREST COMPOUNDED WORKSHEET

Example: Interest compounded annually for two years at 5%.

$$\begin{array}{r} \$ 100 = \text{original principal} \\ \times .05 = \text{interest rate annually} \\ \hline \$ 5 = \text{interest, first year} \\ + 100 = \text{original principal} \\ \hline \$ 105 = \text{principal at end of first year} \end{array}$$

$$\begin{array}{r} \$ 105 = \text{principal at end of first year} \\ \times .05 = \text{interest rate annually} \\ \hline \$ 5.25 = \text{interest, second year} \\ + 105 = \text{principal, second year} \\ \hline \$ 110.25 = \text{principal at end of second year} \end{array}$$

Figure out the compound interest and the amount on deposit at the end of each time period. Remember: When interest is compounded semiannually, you divide the percentage rate by 2 (6% interest divided by 2 = 3% or .03). If interest is compounded quarterly, you divide the percentage rate by 4 (6% interest divided by 4 = 1 1/2% or .015).

Problems:

	Interest	Amount on Deposit
1. \$500 for 3 years at 6% compounded annually	\$ 95.51	\$ 595.51
2. \$1,000 for 1 year at 5% compounded quarterly	\$ 50.94	\$1,050.94
3. \$600 for 2 years at 5% compounded annually	\$ 61.50	\$ 661.50
4. \$2,000 for 1 year at 6% compounded quarterly	\$ 122.37	\$2,122.37
5. \$2,000 for 1 year at 5% compounded semiannually	\$ 101.25	\$2,101.25

COMPOUNDED WORKSHEET ANSWERS

EM 2.14

Problem #1

1st year $\left\{ \begin{array}{l} 500 \\ \times .06 \\ \hline 30 \\ +500 \\ \hline 530 \end{array} \right.$

2nd year $\left\{ \begin{array}{l} 530 \\ \times .06 \\ \hline 31.80 \\ 530.00 \\ \hline 561.80 \end{array} \right.$

3rd year $\left\{ \begin{array}{l} 561.80 \\ \times .06 \\ \hline 33.71 \\ 561.80 \\ \hline \$595.51 \end{array} \right.$

Interest

1st year \$30.00
2nd year 31.80
3rd year 33.71
\$95.51

Problem #2 (quarterly)

$.05 \div 4 = .0125$

1st quarter $\left\{ \begin{array}{l} \$1,000 \\ \times .0125 \\ \hline 12.50 \\ 1,000.00 \\ \hline \$1,012.50 \end{array} \right.$

COMPOUND INTEREST CHART WORKSHEET

Example of a compound interest chart:

This chart is based on a fixed amount in savings. If you added to your principal on a regular basis, your savings would be increased considerably each year.

Fixed Amount--This chart shows how given amounts grow when left in your savings account for various periods of time. Figures are projected at 5-1/4% a year compounded daily.

How Savings Grow.	\$50	\$100	\$500	\$1,000	\$5,000	\$10,000
6 mos	51.34	102.69	513.47	1026.95	5134.75	10289.50
1 year	52.70	105.39	526.95	1053.90	5269.50	10538.00
2 years	55.54	111.07	555.35	1110.71	5553.53	11107.06
3 years	58.53	117.06	585.29	1170.57	5852.86	11705.72
4 years	61.68	123.37	616.83	1233.67	6168.33	12336.66
5 years	65.01	130.02	650.08	1300.16	6500.80	13001.81
10 years	84.52	169.04	845.21	1690.42	8452.09	16904.18
20 years	142.88	285.75	1428.76	2857.51	14287.56	28575.12

Answer the following questions according to the chart above:

1. What is the rate of interest?
2. How often is the interest compounded?
3. How much will you earn on \$10,000 in savings for one year as opposed to having \$10,000 hidden in a shoebox for one year?
4. How much would you save if you leave \$1,000 in for one year?
5. How much would you save:

- A. \$100 in savings for 1 year _____ 2 years _____ 3 years _____
- B. \$50 in savings for 20 years _____
- C. \$500 in savings for 3 years _____
- D. \$5,000 in savings for 5 years _____
- E. \$5,000 in savings for 10 years _____

Investments

Consider the following situation.

Susan won the lottery for \$50,000. She decided that after taxes, she would not have very much of her money left. She wanted to ensure an income for her life. Her first step was to see her banker who suggested various means of ensuring a good rate of return on her money. The banker suggested mutual funds, municipal bonds, annuities and certificates of deposit. Susan did not understand any of these. How would she determine if she were risking her money?

Discuss the case study above. What should Susan do? What information does she need before acting?

- What factors and values might influence Susan's decision?
- Consequences of placing all the money in one place?
- How she might get the highest rate of return?
- What could she do to ensure safety?
- What could she do to ensure liquidity?

Using resources define investments, brokers, brokerage fees. Discuss questions similar to the following.

INVESTMENT PROBLEM #1

Each month for ten months James D. Bond bought ten shares of one corporation's common stock. He paid the following prices: \$35, \$37, \$39, \$38, \$35, \$33, \$32, \$31, \$30 and \$30.

Lora C. Loss bought 100 shares of the same stock all at one at \$35 a share.

Questions:

1. What was the average price per share paid by James D. Bond?
2. Who paid the lowest price per share?
3. Over the one-year period, who do you think made the better decision? Why?

INVESTMENT PROBLEM #2

Suppose you have \$4,000 to invest in stocks. Using the stock quotations in the daily newspaper and other resources you wish, choose up to five different stocks to invest in. Once you have chosen a stock, you may "sell" at any time between the beginning and end of the project. (It is recommended that the project run for 30 days.) You must then keep the proceeds of the "sale" in "cash" and may not reinvest it. At the end of the 30 days, you must sell all securities still held and total your cash to determine your total gain or loss.

Question:

1. What was your total gain or loss?
2. If you had this to do again, would you choose the same investment? Why or why not?
3. What would happen to the stock prices if everyone made your decisions?
4. What other type of information might you need to know to make a decision?

Record your investments on the following chart.

Name of Stock	Purchase Price	Shares Bought	Amount Paid	Date Sold	Selling Price	Amount Received
Total Amount Invested				_____		
Total Proceeds from Sales				_____		
Gains or Losses				_____

MAJOR MEDICAL	YOU (COULD INCLUDE MEMBERS OF YOUR FAMILY)	DOCTOR BILLS, AMBULANCE FEES, RENTAL OR THERAPEUTIC EQUIPMENT.

FACTORS DETERMINING WHAT YOU PAY FOR AUTO INSURANCE

There are many variables involved in the determination of auto insurance rates. But, your own personal situation will have a direct bearing on the rate you pay. These variables also explain why different drivers may pay different rates for the same auto insurance policy. These are the most common situations:

AGE OF DRIVER

If there's anything on which all the traffic safety experts agree, it's that young drivers have more accidents . . . and more serious accidents . . . and that young males are "worse" than young females. (See section entitled Youthful Drivers).

A teen-age girl in the family can increase the auto insurance bill from 20% to nearly double . . . and a teen-age boy, even though he only occasionally drives the car, can triple the cost of insurance. If he's the principal operator of his own car, the tab for insurance can rise to four or five times the premium his parents alone would have to pay.

The rates that insurance companies charge for cars operated by youthful drivers are based on years of accumulated statistics which establish the relative differences between young drivers as a group and adult drivers . . . and between different classes of young drivers.

The surcharge on female youthful drivers lasts only until they marry or, depending on the company, until they reach age 21 or 25. Married men also get a break, while young single males are charged more until age 29.

And young drivers . . . single or married, male or female . . . can be consoled by the fact that as they grow older and become more experienced drivers, the cost of automobile insurance goes down. With some companies it drops year by year, with others at certain specified ages.

Many companies give discounts when the youthful driver maintains a certain level of academic achievement in high school or college . . . or after he has completed an accredited driver education course.

Following are some details on Youthful Driver rates which are generally followed by the majority of companies:

1. Where there are more cars in the family than youthful operators, the youthful operator surcharges will be applied to the most expensive car or cars, except that a youthful owner or principal operator will be charged on the car he regularly drives.
2. If there is more than one car and more than one youthful driver in the family, surcharges will be made on as many cars as there are youthful drivers . . . if the family has that many cars.
3. No charge will be made for a youthful family member who is in military service and drives only when on furlough, but a charge will be made when there is regular or frequent use, such as on weekend passes.
4. A premium credit is given when an unmarried youthful operator is a resident student at a school more than 100 miles from home and does not have the car at school.

TYPE OF CAR

Generally, the model car you drive affects only the cost of those insurance coverages which apply to repairing or replacing that car. The premiums you pay for liability insurance, medical payments, uninsured and underinsured motorist coverages are not affected by the kind of car you drive, unless it is a "high performance vehicle."

The cost of comprehensive and collision coverages is directly related to the cash value of the car. Some insured losses require that the car merely be repaired, others that it be completely replaced. And some vehicles are more expensive to repair or replace than others.

Since it would be entirely too unwieldy and expensive to develop and maintain a value record on each individual automobile, insurance companies group all cars into brackets according to two factors . . . purchase price new and age.

A consideration in determining the approximate value is the age of the car. Most companies use age brackets for establishing rates. Current year models fall in the first group, those from the preceding model year in the second, and so on for several model years. As a car gets older, the

premium reduction is applicable at the next renewal date of your policy. There is no further reduction after the sixth year.

However, starting with 1980 model year cars a number of companies are making departure from the actual cash value rating of the car. Statistics are now available to substantiate a difference in the extent of damage sustained by the various models and types of cars. Certain cars sustain less damage, on the average, and therefore cost less to repair than others in same price range. Accordingly the premiums have been reduced on some models and increased on others for more equitable premium determination based upon the damageability potential.

Even though you may be willing to pay a little more for auto insurance in order to drive the car you prefer, you might want to check with your agent or company before you buy your next car.

WHERE YOU LIVE

The area where you live directly affects your auto premium. In general, the bigger your city, or the more densely populated the area in which you live, the higher your auto insurance rates will be.

Where you live can affect both your likelihood of having an accident and the probable cost of paying for that accident. Accident frequency tends to be greater in areas of high traffic density. Accident severity tends to be greater in areas where roads and road conditions (freeways, for example) encourage high speed driving. When both these factors are considered, those who live in the major metropolitan areas will pay the most for their automobile insurance, all other things being equal.

Wage levels are another factor. In heavily industrialized, densely populated metropolitan areas, wage levels are generally higher . . . and this shows up in higher hospital costs, higher automotive repair costs and larger settlements for lost wages in bodily injury cases. These add up to higher insurance rates for rating territories having these high-hazard characteristics.

Rating territories are designated geographical areas used by automobile insurance companies to accumulate statistics on premiums received and losses paid. On the basis of these statistics, proper rate levels are determined. What comprises a territory is less a function of area than of population. It may be a single county, or a number of counties grouped together. In a few heavily populated areas, there may be two or

even three rating territories within a single county where accident experience has demonstrated a need for different rates, in order to pay different levels of insured loss.

This arbitrary division of the state of Ohio into 30 or 40 territories for rate making purposes could produce auto rate inequities in some individual cases. Undoubtedly it does, just as the same kind of arbitrary boundaries of political subdivisions occasionally result in inequities in the tax burden. But any attempt by the insurance companies to base rates on a significantly finer, more detailed geographical breakdown would add so much to their administrative expenses that all of us would end up paying more for automobile insurance.

HOW YOUR CAR IS USED

The little old lady who never took her car out of the garage except to drive three blocks to church every Sunday may not exist except in the imagination of some used car salesman. But she would be charged a lower premium for her automobile insurance than most of us would.

With the amount and the kind of driving she does, she has relatively less chance of being involved in an accident than people who drive many more miles and under more hazardous traffic conditions.

All other things being equal, the more miles you drive the greater the likelihood that you will have an accident. And . . . again assuming that all other factors are equal . . . accidents are more likely to happen to people who do most of their driving on congested city streets or high speed highways, as opposed to residential streets and secondary rural roads.

In one way or another, all these factors are taken into consideration in the formulas used to determine the amount you pay for automobile insurance. But not all insurance companies approach the problem in exactly the same manner.

Most companies do not consider the number of miles you drive annually, although there are some that offer lower rates to people who drive fewer than a specified number of miles a year.

The car that is driven to and from work is likely to be driven more miles than the one that is not. And those "to and from work" miles are likely to be on congested streets and highways. So . . . "to and from work" is almost always a consideration. But some companies charge higher rates on any car that is regularly driven to and from work, while others make this differentiation

only if the distance to work one way is more than a stated minimum.

For much the same reasons, all companies charge even higher rates when the auto is used for business. There are variations in defining "business use," but driving to and from one's principal place of employment is not considered business use.

Because of the type of driving they do and the type of roads on which they normally drive, farm families enjoy lower automobile insurance rates than either city residents or non-farmers who live in rural areas. The farm discount does not apply to a vehicle used by a member of a farm family who is engaged in an occupation other than farming and uses the vehicle to drive back and forth to work.

SAFE DRIVER PLANS

If you have a good driving record, you may qualify for savings on your insurance premium. This is generally called a Safe Driver or Merit Rating Plan. The savings in these plans are based on your past driving record and your record while insured.

You earn more favorable rate treatment by maintaining an accident-free record through careful and defensive driving. Your insurance premium will increase if you have an accident, however.

The whole idea behind such plans is to give the best rates to the best drivers. To keep the premium of the accident-free drivers at the low level they have earned, insurance companies must charge more for those drivers who do have accidents. The insurance company takes in the same total premium from all its policyholders as a group — but accident-free drivers (a majority of most companies' policyholders) pay a lower premium than they would otherwise.

These plans vary so much from company to company (and are not used at all by some companies) that it is difficult to make generalizations. But here's an example of how two typical plans work.

Company A quotes a premium of \$100 and Company B charges \$110 for the same insurance coverages. An important difference is that Company B's premium will remain the same if the policyholder has an accident. Thus, over a five-year period (assuming the rate of inflation and accident frequency permit the premium level to remain constant) the Company B policyholder will pay \$550 for insurance.

On the other hand, Company A's policyholder would pay only \$500 for the same five-year period — if he doesn't have an accident. Should he be involved in a "chargeable" accident, the premium will be increased to perhaps \$140 for each of the three years after the accident, or a total of \$820 over the five-year period.

Under either rating system, each company would take in the same amount of money from all policyholders as a group. So in terms of company income, the system makes no difference. However, it does make a difference to the policyholder. It's a matter of the policyholder choosing the plan he or she prefers.

It seems that most policyholders think an accident will not happen to them. Accidents always involve "the other guy." Therefore, the preference has been for the lowest possible premium now. This has prompted most insurance companies to adopt some kind of Safe Driver Rating Plan.

EXPENSE FLATTENING

A change in auto insurance rating was instituted under the direction of the Ohio Department of Insurance requiring that companies equalize certain expenses among all policyholders.

The change was instituted because some insurance expenses are fixed rather than proportional. For example, the cost to print a policy for a high-risk driver in an urban area is no greater than for an accident-free driver living in a sparsely populated area. Fixed expenses affected by this change include general expenses, miscellaneous taxes, licenses and fees, and for some companies certain selling expenses. These costs will vary by company.

WHAT OHIOANS PAY FOR AUTO INSURANCE

Just as the costs of food, clothing, housing and transportation have risen sharply over the past decade, so has the cost of automobile insurance. While no one likes to pay more than they did ten years ago, it helps to know that Ohio's auto insurance rates compare favorably with those paid in other states.

In a comparison of the percentage of household income spent on auto insurance premiums, Ohio ranks in the "medium" range.

212

YOU CAN SAVE MONEY ON AUTO INSURANCE

There are ways you can cut your auto insurance costs. Many factors affect the amount of premium you pay. The following list of money-saving ideas may help you reduce your own insurance costs:

- **INCREASE YOUR DEDUCTIBLES** for both collision and comprehensive coverages. These are the coverages that pay for physical damage to your car. Because small claims are costly to settle, insurance companies don't charge you as much premium when you agree to pay for these small losses through a deductible. The higher your deductible, the lower your premium. Chances are good you'll never have to pay that deductible if you're a careful driver. Although the amount you save varies, the premium reduction will probably equal the amount you "risked" through the higher deductible in just a few years of accident-free driving.
- **COMPANY DISCOUNTS** can reduce your premium. Most companies offer lower premiums if you insure two or more cars with them. Some give a discount to students with good grades. And some allow a premium credit if a young driver is away at school more than 100 miles from where the insured car is garaged.
- **REDUCE OR ELIMINATE COLLISION AND COMPREHENSIVE COVERAGES** as your car gets older. These coverages provide physical damage protection for your auto. If your car is an older model (5 years or older), it has depreciated in value to the point where you may be paying more in premiums than the car is worth. You should keep your auto liability coverage, however.
- **DRIVE SAFELY.** One at-fault accident or traffic violation can increase your premium as much as 40%. Your insurance costs will remain low as long as you remain accident and violation free. Check with your insurance agent or company to determine if you are now paying a surcharge because of your driving record. If so, be especially cautious in the future and your clean driving record will pay off.
- **PARK DEFENSIVELY.** Don't park on the street where your car can be stolen, van-

dalized or hit by another vehicle. Close the windows tightly and always lock the car.

- **CONSIDER AUTO INSURANCE COSTS WHEN BUYING A NEW CAR.** Premiums are higher for certain luxury and sport models because of their greater accident, damage and auto theft experience. Your insurance agent or company can give you specific information.
- **REDUCE YOUR DAILY DRIVING.** The farther you drive to work each day, the more likely you are to be involved in an accident — and the more you pay for insurance. Check to be sure the number of miles you drive to work is correctly listed with your insurance company.
- **CONSIDER JOINING A CAR POOL OR TAKING A BUS TO WORK.** Cars that aren't driven to work every day generally qualify for lower insurance rates. For example, a motorist who joins a car pool and uses his or her car no more than twice a week could save an average of \$81 annually in Ohio. (Savings calculated for Ohio's eight major cities and rural territories show savings of \$97 in Akron, \$92 in Canton, \$95 in Cincinnati, \$153 in Cleveland, \$86 in Columbus, \$83 in Dayton, \$94 in Toledo, \$132 in Youngstown and \$69 in rural areas.)

Joining car pools could save as much as three million gallons of gasoline each week in Ohio and, at the same time, reduce auto insurance premiums by an estimated \$40 million annually, according to a recent OII study. If 500,000 cars in Ohio were not driven to work three days a week, gasoline savings would be three million gallons a week, based on federal estimates of two gallons of gas used per day by the average driver. By eliminating only a little more than 7% of the state's total private passenger cars three days per week, 500,000 cars would be off the road.

Based on gasoline costs of \$1.30 per gallon, this type of car pooling would also save the average Ohio driver \$408 in gas charges annually. This is based on a reduction of two gallons of gas used per day, three days per week.

Estimated savings* on Insurance for selected Ohio cities are:

Akron	\$ 97	Mansfield	\$ 71
Ashland	72	Marion	72
Ashtabula	89	Martins Ferry	92
Athens	69	Medina	85
Aurora	85	Middletown	92
Bellefontaine	69	Mt. Vernon	72
Bucyrus	69	Newark	69
Cambridge	69	New Philadelphia	69
Canton	92	Norwalk	72
Chardon	85	Painesville	89
Chillicothe	69	Piqua	69
Cincinnati	95	Portsmouth	84
Circleville	69	Ravenna	85
Cleveland	153	Sandusky	85
Columbus	86	Sidney	69
Coshocton	69	Springfield	77
Dayton	83	Steubenville	102
Defiance	69	Tiffin	69
Delaware	72	Toledo	94
Elyria	101	Van Wert	69
Findlay	69	Wapakoneta	69
Fostoria	69	Warren	92
Fremont	69	Washington, C.H.	69
Hamilton	92	Wilmington	69
Lancaster	69	Wooster	72
Lebanon	69	Xenia	69
Lima	76	Youngstown	132
Logan	69	Zanesville	75
Lorain	101		

If you join a car pool, be sure your auto policy includes medical payments coverage for the protection of your passengers. Also, be sure to share the actual driving, rather than charging your passengers, since this charge could be considered a "public livery fee" (such as a taxi fare) and you might not be covered by your personal auto policy.

Now that you have reviewed the list, check those suggestions that you think could save you money. Then, contact your insurance agent or company and review the list with them. Your insurance representative may be able to offer additional suggestions and tailor your auto insurance to your needs.

- 1. THE GOVERNMENT SHOULD PROVIDE INSURANCE PROTECTION FOR THOSE WHO CANNOT AFFORD IT. 1. _____
- 2. A DOCTOR IS THE BEST PERSON TO ADVISE YOU REGARDING THE TYPE OF MEDICAL AND HEALTH INSURANCE TO BUY. 2. _____
- 3. YOU CAN BUY INSURANCE ON THE LIFE OF ANY OTHER PERSON YOU WISH. 3. _____
- 4. A PERSON SHOULD BUY LIFE INSURANCE ONLY IF HE OR SHE HAS DEPENDENTS. 4. _____
- 5. A TEENAGER DOES NOT NEED TO LEARN ABOUT SOCIAL SECURITY, BECAUSE THIS PROGRAM IS ONLY FOR OLD PEOPLE. 5. _____
- 6. A PERSON UNABLE TO FIND WORK SHOULD RECEIVE A STEADY INCOME FROM THE GOVERNMENT. 6. _____
- 7. ALL PEOPLE WHO RETIRE FROM WORK SHOULD CONTINUE RECEIVING A PAYCHECK FROM THE GOVERNMENT. 7. _____
- 8. MOST PEOPLE DO NOT NEED HEALTH INSURANCE, BECAUSE THEY PROBABLY HAVE ENOUGH MONEY SAVED TO PAY THEIR MEDICAL AND HOSPITAL BILLS. 8. _____
- 9. A PERSON WHO HAS HEALTH INSURANCE COULD STILL HAVE TO PAY FOR MEDICAL BILLS FROM HIS OR HER OWN POCKET. 9. _____
- 10. THE ONLY TYPE OF HEALTH INSURANCE A PERSON NEEDS IS ONE THAT PAYS FOR BASIC DOCTOR AND HOSPITAL BILLS. 10. _____
- 11. MOST HEALTH INSURANCE PLANS ARE SPONSORED BY THE FEDERAL GOVERNMENT, NOT BY PRIVATE COMPANIES. 11. _____
- 12. BUYING GROUP HEALTH INSURANCE IS PROBABLY THE BEST WAY TO PROTECT YOURSELF AGAINST MEDICAL BILLS. 12. _____
- 13. ONLY THE BREADWINNER IN A FAMILY NEEDS TO HAVE LIFE INSURANCE. 13. _____
- 14. A PERSON WHO WANTS TO INVEST SOME MONEY SHOULD BUY LIFE INSURANCE AS AN INVESTMENT. 14. _____
- 15. YOU SHOULD NOT BUY LIFE INSURANCE IF YOU DO NOT HAVE A STEADY JOB. 15. _____

ECONOMIC IMPACT

EM 2.16

IF INSURANCE CEASED FOR JUST ONE DAY IN OHIO
HERE ARE SOME OF THE ECONOMIC LOSSES OHIOANS WOULD SUFFER.

131 NEW FAMILY DWELLINGS AND APARTMENTS WOULD NOT BE STARTED.

49 NEW CORPORATIONS WOULD NOT BE FORMED.

182,905 PERSONS EMPLOYED IN THE CONSTRUCTION INDUSTRY WOULD BE OUT OF WORK
WITH AN APPROXIMATE WAGE LOSS EXCEEDING \$17.2 MILLION.

38 ONE AND TWO-FAMILY HOMES DAMAGED \$191 THOUSAND BY FIRE WOULD NOT BE
INSURED.

1,533 PASSENGER CARS AND 400 TRUCKS WOULD NOT BE SOLD.

MORE THAN 7,136,000 LICENSED DRIVERS WOULD BE COMPELLED TO DRIVE WITHOUT
AUTOMOBILE INSURANCE.

THE STATE TREASURY WOULD LOSE \$377 THOUSAND IN INSURANCE TAXES AND FEES.

APPROXIMATELY \$3.8 MILLION IN WAGES FOR MORE THAN 68,000 INSURANCE INDUSTRY
EMPLOYEES WOULD BE IMPERILED.

\$5.3 MILLION WOULD NOT BE PAID FOR PROPERTY, AUTOMOBILE, MEDICAL AND OTHER
PROPERTY-CASUALTY INSURANCE LOSSES. THIS INCLUDES \$2.1 MILLION FOR
AUTOMOBILE ACCIDENT LOSSES ALONE.

MORE THAN \$530 THOUSAND IN DIRECT LOSSES TO HOMEOWNER POLICYHOLDERS WOULD
NOT BE PAID.

\$4.3 MILLION WOULD NOT BE PAID TO BENEFICIARIES OF ACCIDENT AND HEALTH
INSURANCE POLICIES IN PRIVATE COMPANIES.

\$1.8 MILLION IN DEATH PAYMENTS TO LIFE POLICYHOLDERS WOULD NOT BE PAID.

\$524,932 IN FARM MORTGAGES HELD BY LIFE COMPANIES WOULD GO UNPAID AND BE
SUBJECT TO FORECLOSURE.

\$42,200 IN AVERAGE LIFE INSURANCE IN FORCE PER FAMILY WOULD BE IMPERILED.

CONSTRUCTION OF NEW SCHOOLS WOULD NOT BE STARTED AND THE EXISTING
INSURANCE ON 4,846 SCHOOLS WOULD BE ENDANGERED.

\$117.2 MILLION IN RETAIL SALES WOULD BE IN JEOPARDY.

THE CITIZENS OF OHIO WOULD BE DEPRIVED OF \$1,139,452 IN LIFE ANNUITY
PAYMENTS.

\$157,808 IN MATURED ENDOWMENTS WOULD GO UNPAID.

\$1,089,883 IN POLICY DIVIDENDS WOULD NOT BE PAID TO LIFE POLICYHOLDERS.

1,200 INSURANCE COMPANIES ARE LICENSED TO DO BUSINESS IN OHIO, CREATING
A HEALTHY, COMPETITIVE ENVIRONMENT TO THE BENEFIT OF THE INSURANCE-BUYING
PUBLIC. OF THESE COMPANIES, 463 ARE PRIMARILY WRITING LIFE INSURANCE AND
THE REMAINDER ARE WRITING FIRE, AUTO, ACCIDENT AND HEALTH AND MISCEL-
LANEOUS INSURANCE LINES.

IT IS IMPORTANT TO REMEMBER THAT THESE ECONOMIC BENEFITS ARE PROVIDED
THROUGH THE AMERICAN ECONOMIC SYSTEM; THE INSURANCE INDUSTRY MUST
CONTINUE TO OPERATE UNDER THIS SYSTEM IN ORDER TO MAINTAIN AND STRENGTHEN
ITS POSITION AS AN ESSENTIAL CONTRIBUTOR TO THE BENEFIT AND WELL-BEING OF
SOCIETY.

PLAN FOR PROTECTION

PLAN AN INSURANCE PROGRAM TO PROVIDE PROTECTION FOR ONE OR MORE FAMILIES BELOW.

1. RALPH IS THE FATHER OF TWO SMALL CHILDREN, AGES 6 AND 4. HIS WIFE DIED A LITTLE OVER A YEAR AGO AND NOW HIS PARENTS HELP OUT WITH THE CHILDREN. RALPH KEEPS HIS OWN HOME AND TAKES HIS CHILDREN TO HIS PARENTS DURING THE DAY.
2. SHEILA AND HER HUSBAND RON LIVE IN A RENTED HOUSE IN THE SUBURBS. THEY EACH OWN A CAR, WHICH THEY DRIVE TO WORK EACH DAY. THEY DON'T PLAN ON BUYING A HOME OF THEIR OWN BECAUSE THEY PREFER NOT HAVING THE RESPONSIBILITY OF THE UPKEEP. THEY BOTH HAVE DECIDED TO PURSUE THEIR OCCUPATIONS BUT NOT TO HAVE CHILDREN.
3. ELAINE AND JIM HAVE BEEN MARRIED FOR SIX YEARS. THEY HAVE ONE SON, AGE 3, AND ARE EXPECTING A SECOND BABY SOON. ELAINE STOPPED TEACHING WHEN THE SON WAS BORN IN ORDER TO BE AT HOME. JIM HAS A VERY GOOD JOB AND HAS ADVANCED A GREAT DEAL IN HIS WORK. THEY OWN TWO CARS AND ARE BUYING A HOME. THEY ENJOY CAMPING AND HAVE RECENTLY PURCHASED A NEW CAMPER.
4. SUE DAVIS HAS BEEN DIVORCED FOR TWO YEARS. SHE HAS CUSTODY OF HER TWO-YEAR-OLD DAUGHTER, SARA. SUE LIVES IN AN APARTMENT BUILDING CLOSE TO WHERE SHE WORKS AS A WAITRESS IN A LOCAL RESTAURANT. SHE WOULD LIKE TO MOVE OUT OF THIS NEIGHBORHOOD INTO A BETTER ONE BUT, WITHOUT THE SKILLS TO OBTAIN A BETTER JOB, SHE CANNOT AFFORD TO MOVE. A NEIGHBOR LOOKS AFTER HER DAUGHTER WHILE SHE WORKS. SHE HAD TO SELL HER CAR LAST YEAR BECAUSE SHE COULDN'T AFFORD TO KEEP IT.
5. ELIZABETH AND MACK ARE BOTH IN THEIR LATE SIXTIES. THEY HAVE BEEN MARRIED FOR SIX MONTHS. THIS IS THE SECOND MARRIAGE FOR EACH OF THEM AND THEY EACH RECEIVE SOCIAL SECURITY. THEY HAVE DECIDED TO MOVE IN WITH ELIZABETH'S BACHELOR SON IN ORDER TO SAVE ON EXPENSES.
6. STAN AND PAT HAVE BEEN MARRIED FOR TWO YEARS. THEY BOTH ARE ATTENDING COLLEGE AND WORKING TOWARD DEGREES. STAN HAS A PART-TIME JOB, WHICH HELPS WITH THEIR EXPENSES. PAT WORKS PART TIME AS A WAITRESS. THEY LIVE IN THE COLLEGE'S APARTMENT FOR MARRIED STUDENTS. STAN AND PAT WILL GRADUATE IN ABOUT EIGHT MONTHS AND HOPE TO FIND JOBS IN THEIR HOMETOWN. THEY DON'T OWN A CAR BUT HOPE TO BUY ONE AS SOON AS THEY GRADUATE. PAT HAS JUST FOUND OUT THAT SHE IS EXPECTING THEIR FIRST CHILD.

RR

UNCLE'S BUSY IN YOUR LIFE

What has Uncle Sam done for you lately? Plenty. But maybe you don't recognize his services and take them for granted--until something goes wrong.

Just consider how many times the federal government affected your life during the first hour or so after you awoke today.

If you're like millions of others, you switched on your radio (regulated by the Federal Communications Commission), heard the time (kept officially by the Navy Department), and heard the weather forecast (courtesy of the Weather Bureau); shaved or sprayed with an aerosol bomb (regulated by the federal agencies); wore clothes made to measurements arrived at by the Bureau of Standards, and whose fiber content is policed by the Federal Trade Commission; and that last second dash of cosmetics was checked by the Food and Drug Administration.

Your orange juice could come from a frozen concentrated process controlled by federal inspectors, or from a better and more tasteful fresh fruit introduced by agriculture scientists.

Your bacon and ham were checked by federal inspectors, and the milk you drink must meet federal standards. That pill you took on the run had to be approved by the Food and Drug Administration.

The bus that takes you to school must meet safety standards and rate charges as laid down by the Interstate Commerce Commission. It will use roads that were made more durable by engineers of the Bureau of Public Roads, and no doubt financed in part with federal funds.

You hardly noticed the plane flying overhead, but its flight is directed by the Federal Aviation Agency.

You pass a bank and you're unconcerned about your money in it because it's insured by the Federal Deposit Insurance Corporation.

The air you breathe and the water you drink are checked for pollution content by your busy Uncle Sam. Throughout the day and night your government provides services for you, most of them unseen and taken for granted.

In spite of them there are still people who say rather innocently that the only federal services they get are from the postman who delivers them checks, and the Internal Revenue staff that takes too much of their money from them.

INTRODUCTION TO TAXES (CONTINUED)

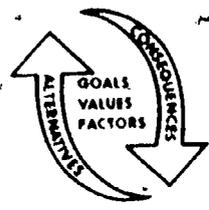

INDICATE WHETHER THE FOLLOWING STATEMENTS ARE TRUE OR FALSE BY PLACING A T OR AN F IN THE COLUMN AT THE RIGHT.

1. THE WORDS DIRECT AND INDIRECT, WHEN APPLIED TO TAXES, REFER TO THE WAY TAXES ARE PAID. 1
2. WITH PROGRESSIVE TAXES, THE MORE AN INDIVIDUAL EARNS, THE SMALLER THE PERCENTAGE OF EARNINGS HE OR SHE IS REQUIRED TO PAY IN TAXES. 2
3. BECAUSE IT WOULD BE IMPOSSIBLE TO ADMINISTER THEM, THERE ARE NO PROGRESSIVE INDIRECT TAXES. 3
4. REGRESSIVE TAXES TAKE MORE FROM THE RICH THAN THEY DO FROM THE POOR. 4
5. THE FEDERAL INCOME TAX IS ESSENTIALLY A PROGRESSIVE DIRECT TAX. 5
6. IN RECENT YEARS, THE GOVERNMENT REQUIRED TAXPAYERS TO PAY A SURTAX OVER AND ABOVE THE REGULAR TAX. THIS SURTAX WAS A DIRECT REGRESSIVE TAX. 6
7. IN FISCAL YEAR 1970, NEARLY 50 PERCENT OF THE MONEY RECEIVED BY STATE AND LOCAL GOVERNMENTS CAME AS AID FROM THE FEDERAL GOVERNMENT. 7

PROCESS SKILLS	CONCEPTS	STRATEGIES
  	Buying skills (continued)	<p>In groups, discuss how Joyce (#3 in Clothing Purchases) can make a more informed (rational) decision using the practical reasoning process. Ask questions such as:</p> <ul style="list-style-type: none"> --What is Joyce's problem? --What values, goals, factors does she consider? --What choices (alternatives) does she consider? --How do her goals, values support her choice? --What would happen if everyone made decisions the way Joyce did? --What information, skills does Joyce need to make better decisions so she doesn't waste her money? (Reading labels, comparing information on labels, comparing garments at different stores, seasonal shopping)
	Government regulations	<p>Using resources, determine and chart government regulations concerning label information for clothes and food items. Bring in labels from clothes and food items to illustrate government regulations. Design own labels for products drawn out of a sack. Use <u>Seasonal Shopping Guides #1 and #2</u> (or your own) to identify common periods when items are less expensive.</p>
	Types of stores	<p>Using resources, develop a chart of types of stores for shoppers (specialty, discount, department). Ask these questions:</p> <ul style="list-style-type: none"> --What store do you think Joyce should shop in? Why? --What would happen if everyone shopped at this store? --If you had \$200 to spend, which type of store would you shop in? <p>Do <u>*Where To Shop</u>. Share responses and reasoning.</p> <p>Mark Evans has decided to cook dinner for his girlfriend, Patricia. He went to the corner store to purchase the food for his dinner. Two hours later he returned home with one bag of groceries costing \$35. He was angry and frustrated because it took him so long and spent so much money for one dinner to impress his girlfriend.</p> <p>Questions:</p> <ul style="list-style-type: none"> --What was Mark's problem? --Why was he angry? (Values, time, money not used wisely.)

PROCESS SKILLS	CONCEPTS	STRATEGIES
	<p>Types of stores (continued)</p> <p>Consumer information</p>	<p>In groups, brainstorm ways Mark could have saved money and time. Share ideas (menu plans, shopping list, compare stores' prices, unit pricing, check ingredients on hand).</p> <p>Develop menu plans and food on hand lists. Individually determine what foods to purchase. Using resources, determine how to make a shopping list. Make shopping lists from menu plans above. Do <u>*Shopping List</u></p> <p>Using resources, discuss unit pricing. Do <u>*Unit Pricing Worksheet</u>. Add your own ideas!</p> <p>Share with groups sources of consumer information (Consumers Reports, Consumers' Research Magazine, Changing Times). Note the benefit they can provide when making shopping decisions.</p> <ul style="list-style-type: none"> --What are the advantages and disadvantages of using these sources? --If you did not have these sources, where can you obtain information on the product you want to purchase? (Friends, dealers.) --What would happen if everyone used consumer sources for information when buying products? <p>In groups, give students \$8,000 to purchase a car. Using practical reasoning and buying skills learned, each group must agree on the type (options, cost) of a car to purchase. Share reasoning process and solution with the class. Ask questions about each solution.</p> <ul style="list-style-type: none"> --If you had only \$6,500 to purchase a car, what would you do? --If you were married and your spouse could not drive a "standard," what would you do? --If you had a job that required a lot of travel, what would be your choice? Why? --If a member of your family was in a wheelchair, what would you do? --How can you better plan for this purchase?

RR

CLOTHING PURCHASES

General Directions: Role play the following situations.

1. Dick has asked Sally to attend a friend's wedding on Sunday. On Saturday, Sally decides she has to have a new dress and rushes out to buy one. She can't find one she really likes but as the store is about to close, she buys one.

2. Over the summer, Mark has outgrown every pair of jeans and shirts he owns. It is almost time for school to start so he plans a shopping trip to get some school clothes. His father has been out of work for the past four months, therefore, his funds are limited. He makes a list: jeans--brand worn by all my friends, shirts--want ones with emblem like friends.

3. Joyce saw a great looking outfit advertised. She ordered it and wore it. It didn't look too bad, she thought, regardless of what her mother said about it. The outfit got pretty dirty, so she threw it in the laundry. The next time she tried to wear it, she couldn't get it zipped. It hadn't occurred to her that it might not launder well. She gave up when she noticed that all the trim was coming off. Her mother told her she hoped she had learned not to believe the pictures, and when she looked at ads in the future, to check the garment's fiber content. Joyce's mother pointed out the ad didn't say what the outfit was made of or anything about laundering it.

MY CONSUMER IMAGE

Place a check in the column that describes your self-image for each statement.

	YES	NO	SORT OF
1. I am an impulse buyer.			
2. I am often swayed by clerks.			
3. I am often swayed by advertizing.			
4. My friends influence me in shopping.			
5. I know what I want when I shop.			
6. I have trouble deciding what to buy.			
7. I love to spend.			
8. I love to shop.			
9. I don't bother with labels.			
10. I buy things I don't need.			
11. I buy things I don't use.			
12. I am satisfied with how I spend.			
13. I never have enough money.			
14. My money runs out too early.			
15. I am a careful buyer.			
16. I know what things cost.			
17. I "shop" to pass the time.			
18. I try on things just for fun.			
19. I feel funny in strange stores.			
20. I feel that clerks are suspicious of me.

WHERE TO SHOP

Directions: After studying each shopping venture, select the best choice or choices of marketplaces for purchasing the product. Indicate your selections by placing a check (✓) under the name of the appropriate marketplace. Then explain the reasoning behind your decision.

VENTURE	Chain Store	Department Store	Specialty Store	Community Store	Mail Order Store	Door-to-Door Salesman	Discount Store	REASONING
1. Jan needs to replenish her supply of personal grooming items. She has time and transportation but is tight on money this month. Where should she go?								
2. Molly is a mother of infant twins and a toddler. She has a little time and irregular means of transportation. One luxury she allows herself is a good brand of cosmetics which she can get in spite of these problems. How does she get it?								
3. Sue's friend, who lives in another city, sent a set of sheets for Sue's wedding. Now Sue wants to buy a matching set. She has adequate time and money but lacks transportation to go to the original store. Where might she find them?								
4. Fran wants to buy a 3-piece suit, but has a fitting problem with average ready-made clothes. Money, time and transportation are not critical factors. She likes a store where she feels less rushed and has more personal attention to fitting needs. Where should she go?								
5. Pam lives in the country near a small town. She has duties which keep her busy when she's not at school. She saved money for a Sunday dress, but has limited transportation and practically no time to visit the nearest city, 60 miles away. Where will she get the dress?								

SHOPPING LIST

Directions:

Study the fictitious shopping list below. Answer the questions below it.

<u>Item, Brand, Size</u>	<u>Joe's Supermarket</u>	<u>Ben's Supermarket</u>	<u>Carol's Supermarket</u>
Sweet peas, Pink Giant 17 oz.	2/50c	2/45c	2/53c
Pork and Beans, Hall's 1 lb.	20c	29c	26c
Green beans, Rosey's 8 oz.	12c	13c	12c
Corn, creamed, Pink Giant 12 oz.	2/50c	2/49c	2/49c
Evaporated milk, Pete 3/33c	3/33c	3/39c	3/28c
Spaghetti, canned, Spanish- American 26½ oz.	31c	33c	31c
Tomato paste, Hall's 12 oz.	35c	33c	33c
Soup, Pine's 14½ oz.	19c	16c	20c

PROCESS SKILLS

CONCEPTS

STRATEGIES

Impact of advertising

Spending habits

Review factors involved in deciding whether to produce goods or services yourself or to pay someone else (time available, quality desired, family members' skill).

FHA/HERO -- Collect "cents-off" coupons that could provide savings in operating the foods laboratory. Develop a system and carry it out under direction of instructor.

FHA/HERO -- Set up a cooperative with school administrative approval to buy an item needed throughout the school (poster board). Operate the co-op for a designated period of time. Evaluate results.

FHA/HERO -- Establish a service swap among members. List services you are willing to trade (alter jeans, bake birthday cake, type term paper). Set up a system of credits so the service does not have to be a direct swap.

IEE -- Research pros, cons, and methods employed in couponing. Interview a minimum of two homemakers involved in couponing and include their comments in report.

Set up a display featuring jeans. Include advertisements for jeans and actual jeans. Feature men's and women's jeans, designed through no name. Using resources on advertising, analyze the jean ads to determine information provided, selling techniques, emotional appeal, factual claims, and general tastefulness. Rewrite the poorest ads. Discuss with class members their jean preference. Review what jeans they purchase and reasons for their preference and actual purchase by using the practical reasoning process.

Why buy jeans? Why do you think certain consumers are buying jeans? If you were your mother/dad, would you buy jeans? Why or why not? How do you think the retail and manufacturing markets might be affected if consumers stopped buying jeans?

Brainstorm a list of products and services bought by teenagers. Use practical reasoning process to decide what to do if you wanted to start a business catering to teenagers. Incorporate advantages of going into certain businesses, disadvantages, goals, values and factors.

EM 2.22

IS IT WORTH IT?

Directions: Brainstorm in your class about ways families can produce goods and services for themselves. Fill in the chart below with the ideas you have showing who in the family might be the producer and what skills, equipment or time is required. Answer the questions below.

Family member who produces goods or services	Goods or services produced	Skills, equipment and/or time required
<p><u>EXAMPLE</u></p> <p>Father</p>	<p>car repairs</p>	<p>knowledge of mechanics tools spare time -- varies</p>

1. How can family needs be met without using money?
2. Tell what factors are involved in deciding whether to produce the goods or services yourselves or to pay someone else to produce them.
3. Suggest ways jobs could be shared or traded so that everyone's needs are met.

THE BUYERS FAMILY

EM 2322

"Our money never seems to go far enough. Why can't we get ahead of these bills?" Mr. Buyer was muttering to himself as he was going over the family expense figures the accountant had given him. "I will barely have enough to pay the accountant, get a new oil filter put on my car and have the lawn mowed," he moaned.

Cash Buyer seemed not to notice as he busily went over plans for his week. This was to be the week of his last Boy Scout camp before tenth grade. "I'll take my clothes to the laundry, get my shoes shined at the shoe shop and buy some cookies to take along when I go down town this morning," he thought. "I hate to show in Dad's dirty car, so I'll get that washed too."

Fancy Buyer, at 15, had no time for money worries. She was too concerned about what to wear to the school dance Saturday. She was working up nerve to ask for an advance to buy the \$75.00 skirt she had seen in the window at Alex's Dress Shop. She would also need to get her hair done and get a manicure if she was to look as she wanted to look.

Pam Buyer surveyed the scene with concern as she went over the meal plan for the week. What would happen if this family missed just one paycheck? The thought seemed scary. She made a mental note to talk with the children about spending less. "Let's see," she thought. Monday the kids have meetings so we can all eat out at Joe's Pizza and Spaghetti House. Tuesday I will be busy playing golf at the club, so we will have steaks. They are quick to fix. Wednesday is Fancy's birthday. I must remember to order a cake from the bakery.

The scene shifts to the local garage later that day. Mr. Buyer is complaining to a friend that things are so high that he has trouble keeping within his budget. "We had that trouble for a long time" his friend said. "However, about a year ago we sat down at home and took a hard look at what we were paying for and what we could really do for ourselves. Seems like our money goes a lot further now."

BUYING A USED CAR

I. Analyzing Car Ads

Roslyn wants to buy a used car. Here are two newspaper ads about cars Roslyn is considering. Read the ads and answer the questions that follow.

DODGE '71, V8, R & H, A/C, auto trans, exc cond, sale priced \$1495	SUBARU '74, Fully loaded 2 door hardtop, factory options, priced to sell, 100% parts and labor guarantee, \$2200
COUNTRY MOTORS 210 Oak St.	CITY-LINE SUBARU 35 Plymouth Rd.
Portsmouth 756-9175	Dayton 245-2021

1. What do each of the following abbreviations stand for?

- auto trans: _____
- R & H: _____
- A/C: _____
- exc cond: _____
- V8: _____
- factory options: _____
- fully loaded: _____
- priced to sell: _____
- 100% parts and labor guarantee: _____

II. Choices...What Do You Think?

List the disadvantages of buying a used car and the advantages of buying a used car.

DISADVANTAGESADVANTAGES

Questions to analyze:

- Do you think you should buy many extras when you buy a car so that resale will be easier?
- Should you shop around before you buy a used car? Explain your answer.
- The average family spends about \$900 a year for the expenses involved in owning a car. How much of this amount do you think is spent for:
 - Insurance: _____
 - Gas: _____
 - Maintenance: _____
- Compare your answers with what your parents or friends actually pay. How do you account for the difference?
- Your family wants to buy a car. Although they can afford to buy a new car, they are thinking of buying a used one. What advice would you give them?
 - Why do different car dealers charge different prices for identical cars?
 - Do you think you might be willing to actually pay more for a car from Dealer A rather than pay less for a car from Dealer B? Why?

PERENNIAL PROBLEM

What To Do Regarding Economics and Managing Resources

PRACTICAL PROBLEM

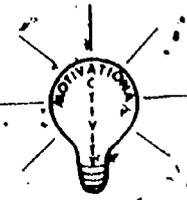

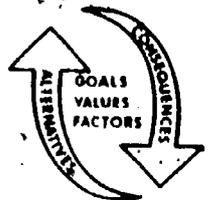

What Should I Do Regarding Resource/Product Management?

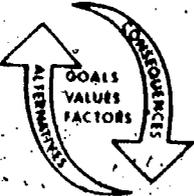

CONCERN/CONCEPT

Conserving/Diminishing Resources

HOMEMAKING SKILLS

- Identify diminishing resources
- Consider consequences of diminishing resources
- Plan to conserve resources

PROCESS SKILLS	CONCEPTS	STRATEGIES
<p>191</p>  	<p>Diminishing resources</p> <p>271</p>	<p>List items or goods that have become scarce in recent years (oil, coffee, sugar). Suggest ways to solve shortages (rising prices for items, alternate items -- tea instead of coffee). How do limited resources contribute to development of new products (synthetic fuels for gas)?</p> <p>Discuss how use of a product or practice may diminish resources. List as many examples as you can. (Cars -- gasoline; air conditioners -- electricity; writing on restroom walls -- paint and time of custodian; factory pollution -- air quality; long showers -- water.)</p> <p>In groups of four, two persons plan an argument pro and the other two plan an argument against each statement. Debate before the class.</p> <ul style="list-style-type: none"> --Should Americans be concerned with conserving food when we have an abundance? --Is it all right for me to waste resources if I have the money to buy them? --Shopping has become a form of recreation. This means that we are so busy looking ahead to the next purchase that we don't enjoy what we have. --Happiness is measured by what you own. --Whenever we buy something we give up freedom -- we have to care for it, repair it, store it and eventually dispose of it. <p>272</p>

PROCESS SKILLS	CONCEPTS	STRATEGIES
<p>193</p>  <p>275</p>	<p>Energy (continued)</p> <p>Reflection</p>	<p>In small groups, identify advantages and disadvantages of each plan. Choose one plan and give reasons to support your decision. Share in class. Discuss whether it would be easier to support a plan that asked some other group (not teenagers) to reduce their driving.</p> <p>Keep a record of your family's automobile use for one week including trips made and gasoline used. Evaluate in terms of the number of trips that could have been avoided or combined. Develop a list of suggestions to improve your auto energy use and enlist your family's support in implementing them. Share results, in terms of energy saved, with the class.</p> <p>Invite an automobile mechanic to discuss factors that affect auto performance and gasoline consumption (driving habits, tune-ups). Visit several auto dealers to find out about mileage ratings of various auto makes and models. Formulate general guidelines for purchase and use of automobiles based on your findings.</p> <p>Given situations where resources are limited, indicate how you would cope with these limitations (due to an environmental emergency, these resources will be available only as follows: water between 7-8 a.m.; fuel rationing: auto -- an economy car with five gallons of gas per week and driven with three person minimum between 7-8 a.m. and 5-6 p.m.; food: no meat). Share ideas. Discuss ways an individual or family could help prevent these emergencies, the trade-offs of the alternatives, and the long and short-range implications of decisions made.</p> <p>276</p>

PLANS FOR TEENAGE DRIVING

PLAN A) One way to stop students from driving to school would be to close all parking lots to student drivers. Only teachers and school staff would be allowed to park on school property. All cars violating this plan would be towed away at the expense of the owner. It is assumed that students would no longer drive to school if they are not allowed to park in the school parking lots.

PLAN B) Students will be allowed to park on school property if they are willing to pay \$4 per day for the privilege. If a large number of students continue to use the parking lot, the price will be raised until it is too expensive for most students to park on school grounds. This plan allows students who have the greatest need to drive a personal car to school to pay for that privilege.

PLAN C) The administration will distribute parking permits to students who need to drive to school. The total number of permits would be one-third of all the present parking spaces at the school. Preference would be given to students on the basis of the following priorities:

1. Handicapped students.
2. Working students.
3. Drivers who transport at least three additional students to school.
4. Seniors.
5. All other students.

291

CASE STUDY: SALLY

Sally wants the house painted. A painter would do the job for \$50 a day and he figures it would take 6 days to finish the job. Sally could paint the house but it would take her 12 days to do it. Sally makes \$30 a day at her own job. Sally's brother said if she decided to paint the house he would help paint for 3 days at \$30 a day. Sally figures that would cut her own time to paint to 8 days.

1. Figure what it would cost if Sally painted the house by herself (multiply the number of days it would take times her foregone income).
2. Figure the total cost if Sally's brother helps. (Multiply the number of days it would take if he helps, times her foregone income. Add what she would pay her brother.)
3. What would it cost to have a painter do the job?
4. Which would cost the least?
5. To find the opportunity cost for the best use of Sally's time and the second best use, subtract the best use from the second best use.
6. What is the best use of Sally's time?
7. Check your answers below.

KEY

1. $\$30 \times 12 \text{ days} = \360
2. $(\$30 \times 8 \text{ days}) + (\$30 \times 3 \text{ days}) = \330
 $\$240 \quad + \quad \$90 \quad = \$330$
3. $\$50 \times 6 \text{ days} = \300
4. Getting a painter
5. $\$330 - \$300 = \$30$
6. Go ahead and work and hire a painter.

WORK SIMPLIFICATION

Using the case study below that describes how Ms. Parker set her table for the evening meal, list 8 ways she could have prevented fatigue and increased the amount of energy she could use for the task. Note positions and motions that cause fatigue.

Ms. Parker sets her table:

It is time to set the table for the evening meal and Ms. Parker begins her task. From the wall cabinet she sets the dishes and glasses needed for the family of five and carries them to the table in two separate trips. The cream is taken from the refrigerator and placed on the counter while she goes to the wall cabinet and gets the sugar bowl, both are taken to and placed on the table.

Remembering that Mr. Parker wants coffee when pork roast is served, she gets his coffee cup from the wall cabinet and sets it beside his plate. From the silverware drawer she gets five knives, forks and spoons and places them on the table. The paper napkins are obtained from the back of the base cabinet behind the baking dishes and she folds each as she places it under the fork on the table.

It is now time to remove the food from the oven and place it on the table for serving. The pork roast is placed on a large serving platter that she had to get from the wall cabinets above the refrigerator. She gets the serving bowl for the applesauce from the wall cabinet and goes to the refrigerator to get the chilled applesauce and place it in the serving bowl that is on the counter. She then takes it to the table. Ms. Parker removes the broccoli from the oven and places it on the range top after going to the drawer to get a pot holder. She returns to the drawer to get a hot pad and places it on the table. Then she carries the broccoli to the hot pad on the table.

The family is called for the evening meal. After everyone is seated, she remembers the butter that is in the refrigerator and gets up to get it. As Mr. Parker reaches for the applesauce, it is evident there is no serving spoon so Katie goes to the silverware drawer for it. As the meal progresses, Tommy asks for more iced tea and Ms. Parker goes to the counter to get the tea pitcher.

After the meal is concluded, Ms. Parker can't seem to find the energy to get up and begin on the kitchen clean-up. Katie is assigned the job of cleaning the dishes and kitchen following the evening meal.

GOALS AND HUMAN CAPITAL

EM 2.33

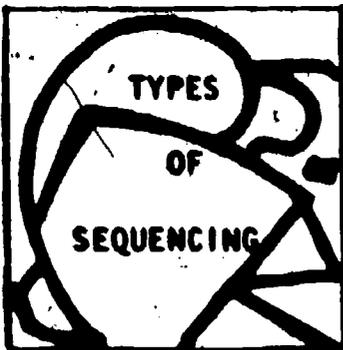

Whether or not you reach your goals may depend on the amount of human capital you have. Consider the following situations.

1. Rod would like to be able to travel more than anything. He doesn't like to rough it; however. Therefore the cross country trip he would like to make is out of the question since he does not earn enough to do more than just live from payday to payday. He quit school in his junior year so there is not much chance of getting a better job.
2. Sally finds she doesn't like her present job. She is a secretary in a large business firm. The equipment is old and the boss is grouchy. Sally decides she would like to have a secretarial job that involves some travel. She knows she will be able to get a different job easily because she had good training.
3. The Millers would like to move to Arizona. Betty has asthma and the climate here makes it worse. Her husband Sam, has a steady job which he is afraid to give up. He has learned his job pretty well but knows that it will be hard to get similar work elsewhere.
4. George works in the engineering department of a utility company. He is a high school graduate and got on-the-job training when he started 20 years ago. Now it gets to him that engineers who have degrees but no experience get moved up ahead of him. They can veto his suggestions even though he knows more about some matters than they do.
5. Georgia was a floor nurse at the local hospital. When she got on the job she found she just did not like shift work. Finally she decided to work for the health clinic which was an 8:00 -- 5:00 job. She likes this much better.

Source: Competency-Based Guide for Home Management. West Virginia.

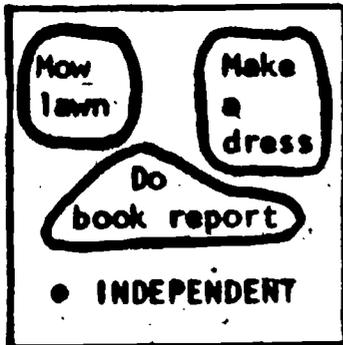

SEQUENCING

EM 2.33

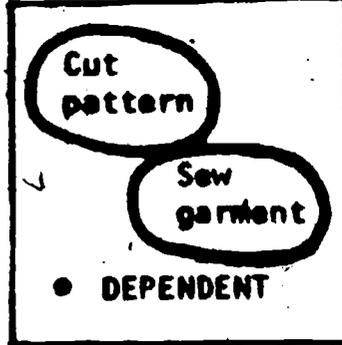

- Independent
- Dependent
- Coordinated

INDEPENDENT--
complete one task before going to the next.

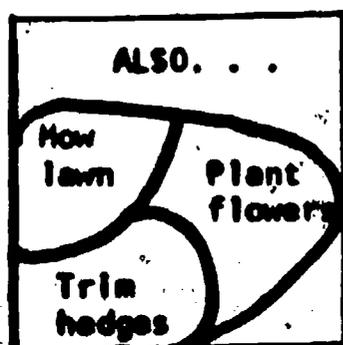

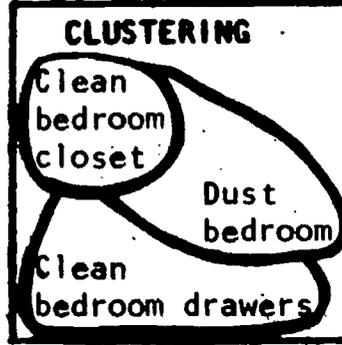

DEPENDENT--
tasks can be started or after another is completed.

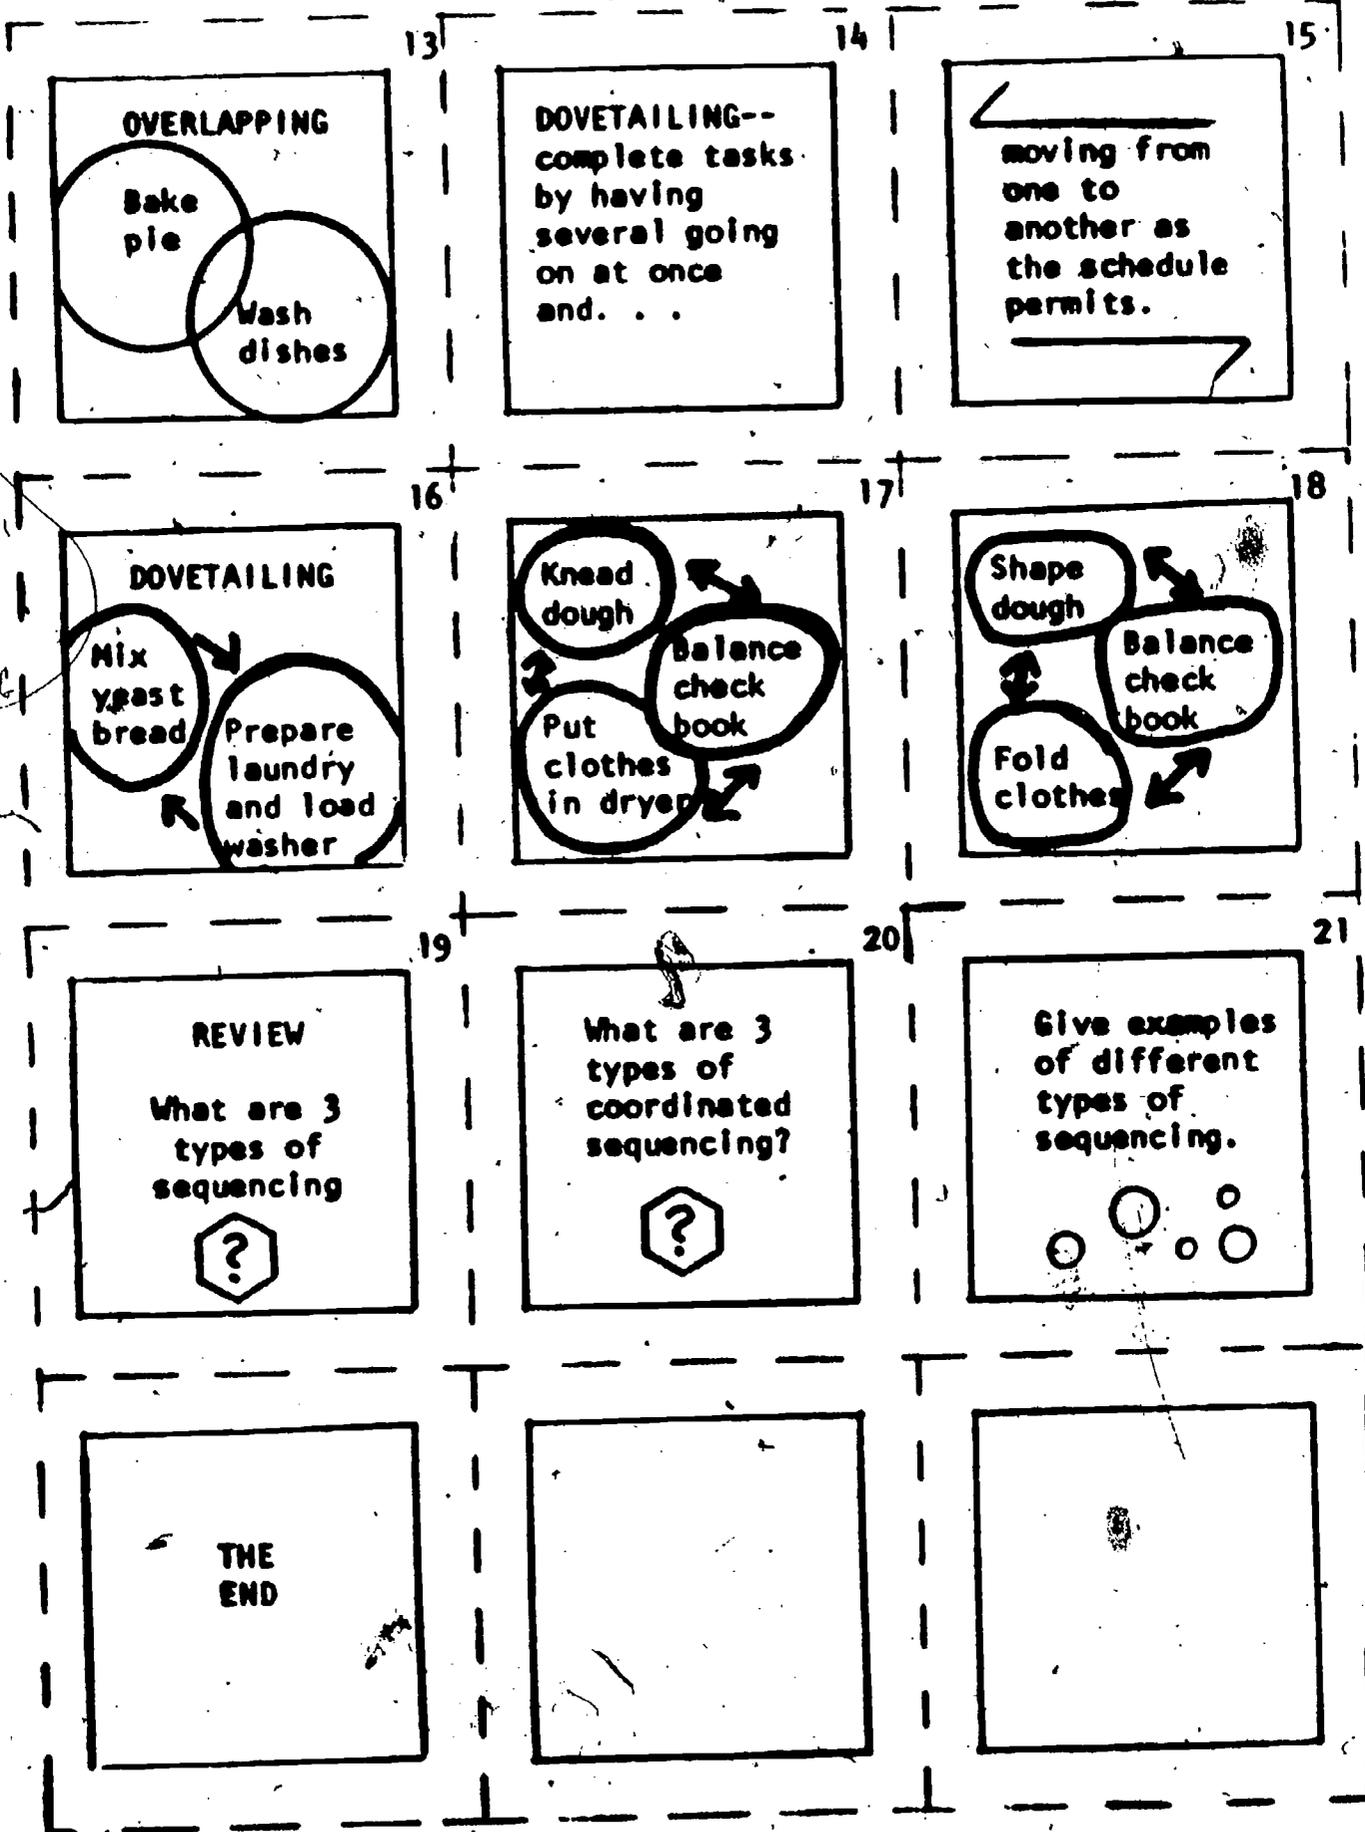

COORDINATED--
A-Clustering
B-Overlapping
C-Dovetailed

CLUSTERING--
complete tasks located in or related to one area before going to another area.

OVERLAPPING--
complete tasks which are related in that one job is part of the other job.

TYPES OF SEQUENCING

EM 2.33

Each of the following situations describes a type of sequence. Identify the type of sequencing in each by matching each situation with the correct type of sequence. Use letters to show your answers.

TYPE OF SEQUENCE:

- A. Clustering
- B. Independent tasks
- C. Dovetailing
- D. Dependent tasks
- E. Overlapping

- _____ 1. Mary Ann is making a birthday cake for her father. She prepares and bakes the cake first. Then she frosts the cake with canned frosting.
- _____ 2. Cindy is preparing a casserole for supper for her family. While she prepares the casserole she washes the dishes she is using.
- _____ 3. When Mrs. Smith cleans her bathroom, she cleans the tub first, then the sink and finally the toilet bowl. Last she cleans the bathroom floor.
- _____ 4. Mary Ann had three things to do Saturday morning. First she cleaned her room, then she hemmed a skirt, and finally she washed the family car.
- _____ 5. While Mrs. Smith sits under the hair dryer, she plans her menus for the following week and makes out her market order.
- _____ 6. Mrs. Smith is preparing supper and sewing. She puts a roast in the oven. While the food cooks she cuts out a pair of slacks for her daughter. She then puts fresh green beans on to cook and potatoes in the oven. Then she marks her pattern and staystitches. After that she sets the table and finishes supper.
- _____ 7. Bill has been working on Saturday to earn extra money. Today he is working for Mrs. Smith. He mowed her lawn and then washed her car. Then he carried boxes to the attic for her.
- _____ 8. Sometimes Mr. Smith prepares Saturday morning breakfast. After he puts the coffee on he starts the bacon frying. While the coffee perks and bacon fries, he scrambles the eggs and puts the toast in the toaster.
- _____ 9. Cindy is cleaning the family room. She dusts the furniture, cleans the windows and mirror, and finally she vacuums the carpet.
- _____ 10. Mrs. Smith has a vegetable garden. Today she plans to prepare fresh green beans and potatoes for supper. She goes to her garden to select and gather her vegetables, she cleans and prepares the vegetables, and finally she cooks the vegetables.

SHOPPING TRIP

Seventeen-year-old Jan is planning to go shopping Saturday. She has to buy a birthday gift, get some stockings, and exchange a blouse for her mother. Her dad has asked if she will stop at the post office and mail some important letters. They must be registered and the window is only open from 9-12. She has to be back by 2:00 p.m. to take her brother to the dentist. He can't go with her this morning though as he has band practice at 9:00 a.m. She must also drop off some drycleaning which she has to have back for tonight. The cleaners have one-hour service but won't take anything new after 11:00 a.m. They open at 8:00 a.m. and close at 4:00. It takes about 30 minutes to drive to town. The dentist is also in town.

She figures she can do all of her shopping in the main part of town but the post office is about five blocks from the shopping center--farther than she wants to walk. She will have to wait for her brother to finish at the dentist since they never know how long it will take. She figures he will be through by 3:30 though. She needs to be home by 4:00 p.m. She is going out to dinner at 6:00 and has to straighten her room a little, wash her hair, and get ready. Fortunately, she has a brush dryer. Somehow she must also finish reading the last 40 pages of a book for a report. She knows today is the only chance before it is due Monday.

Arrange the tasks from the various plans so that they can all be carried out. Number in order 1-14. When you finish check your answers below.

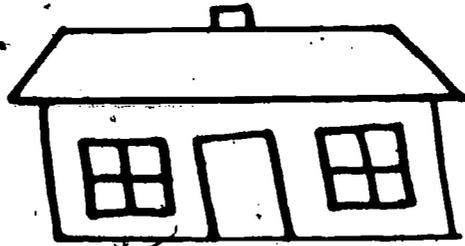

- | | |
|--|---|
| <input type="checkbox"/> Clean room | <input type="checkbox"/> Go to dentist's office |
| <input type="checkbox"/> Read book | <input type="checkbox"/> Wash hair |
| <input type="checkbox"/> Do shopping | <input type="checkbox"/> Dress for dinner |
| <input type="checkbox"/> Stop at cleaners | <input type="checkbox"/> Drive to town first time |
| <input type="checkbox"/> Pick up at cleaners | <input type="checkbox"/> Drive home first time |
| <input type="checkbox"/> Go to post office | <input type="checkbox"/> Drive to town again |
| <input type="checkbox"/> Pick up brother | <input type="checkbox"/> Drive home again |

If your answers are different after checking the key, go over the schedule with a friend to see if your overall plan would work.

KEY: 12, 10, 4, 1, 6, 3, 7, 9, 13, 14, 2, 5, 8, 11.

PERENNIAL PROBLEM

What To Do Regarding Economics and Managing Resources.

PRACTICAL PROBLEM

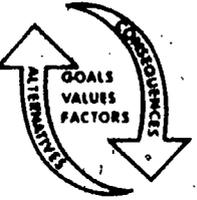

What Should I Do Regarding Citizen Participation?

CONCERN/CONCEPT

Consumer Protection/Consumer Assistance

HOMEMAKING SKILLS

- Recognize consumer assistance needs
- Identify public, private and community resources
- Analyze value of information

PROCESS SKILLS	CONCEPTS	STRATEGIES
<p>215</p>  	<p>Consumer assistance</p> <p>Type of consumer needs</p> <p>Public information</p> <p>Private information</p>	<p>Send for or collect consumer information from various sources (Attorney General's Office, State Tower, 15th floor, Columbus, Ohio, 43215, local Chamber of Commerce, local Better Business Bureau, Consumer Union, Consumer Research, Consumer Federal of America Washington, D.C.). Give reports on the consumer information found. Use information as a classroom bulletin board.</p> <p>Write various products, career, human needs (hospital care, dietary problem, odd shoe size) on slips of paper and place in a paper bag. Direct each student to draw one slip of paper. Have the students research information concerning consumer assistance available on the item drawn and report findings to the class.</p> <p>Gather consumer literature information from governmental agencies. (Special Assistance for Consumer Affairs, Food and Drug Administration, Internal Revenue Service, Post Office, Extension Department, Fire Bureau.) Have students review the information, ranking on a scale from 1 to 5, by the following criteria: 1) information factual and accurate, 2) concise and clear to understand and 3) additional information not necessary. Discuss why the government is involved with consumer information. Follow-up activity: gather consumer literature information from the private sectors (automobile manufacturers, appliances, foods, stereo) and proceed with the same above-mentioned activity.</p> <p>Brainstorm where consumers might gather information. Then evaluate the list by using the practical reasoning process. Use the chart below as a motivator.</p>

HOMEMAKING SKILLS

PRACTICAL PROBLEM

What Should I Do Regarding Citizen Participation?

- Recognize importance of consumer laws and action needed

CONCERN/CONCEPT

Consumer Protection/Consumer Law

PROCESS SKILLS

CONCEPTS

STRATEGIES

Consumer Law

Read the following as a motivator, "It Pays to Know Consumer Law." Ohioans lose millions of dollars annually to consumer fraud. The average Ohioan loses approximately \$200 each year and often doesn't realize it due to lack of knowledge of the law. Ohioans call the Attorney General's office each month with consumer complaints. What can you do to protect YOU from consumer frauds if you had the following problem(s)? Specify consequences and alternatives.

Case 1: Donovan vs. Raleigh Record and Tape Club

Facts: In March 1975 Elton Donovan joined the Raleigh Record and Tape Club. When Elton ordered two tapes by the Grateful Zepilin and The Blunt Sisters he received a tape by the Painters.

Elton returned the tape with an explanation of the problem, but he was billed for the two albums which were originally ordered. He sent another letter attempting to rectify the problem; he was unsuccessful. Elton began to receive letters threatening to turn his account over to a collection agent.

Answer: An investigator sent a letter to Raleigh explaining the problem. In their response the Director of Operations contended that Elton's

RR

PROCESS SKILLS	CONCEPTS	STRATEGIES
	Consumer Law (continued)	<p>albums were sent and he was "unable to determine why both shipments did not reach him." However, "In any event," the record club agreed to remove the charge of \$15.20 and close the account.</p> <p><u>Discussion Questions</u></p> <p>--How could both the business and the consumer be certain that correspondence and packages would arrive at the desired location? What are the advantages and disadvantages of this method.</p> <p><u>Case 2: Juan vs. Bob's Sharp Cars</u></p> <p><u>Facts:</u> On September 10 Juan was searching the used car lots for just the perfect car. He discovered a 1962 Valiant at Bob's Sharp Cars and fell in love. He was told the vehicle price was \$599.00.</p> <p>When Juan arrived home he looked at his contract and realized that the vehicle price was listed as \$660.00. He immediately called Consumer Protection.</p> <p><u>Answer:</u> The investigator realized that Juan's case was weak when it was originally accepted. Juan had no witnesses, receipts or any other verification that he had been told that the cost of the Valiant was \$599.00.</p> <p>Bob's was contacted regarding the dispute over the price. The salesman denied ever promising the car for \$599.00; in fact, according to his "recollection" the price was originally \$699.00 and Juan has talked him down to \$660.00.</p> <p>Frustrated the investigator closed the case.</p>

PROCESS SKILLS	CONCEPTS	STRATEGIES
	Consumer Law (continued)	<p><u>Discussion Questions:</u></p> <ul style="list-style-type: none"> --What mistake did Juan make when he purchased the car? --If Juan spoke only Spanish, should the contract be written in Spanish? --Should a car dealer be compelled to hire Spanish-speaking salesmen so that the entire transaction can be conducted in Spanish? <p><u>Case 3: Freta vs. Shady Acres Apartments</u></p> <p><u>Facts:</u> On August 15, Flora and Freta toured a 2-bedroom apartment at Shady Acres which rented for \$180.00 each month. Both the girls were students and short of funds, so the apartment management offered to give them 2 weeks of free rent. The girls accepted the offer and both signed the month-to-month rental agreement.</p> <p>In early October Flora and Freta got into a terrible argument which resulted in Freta stating that she would move out. Since her rent had already been paid for October, she requested that Shady Acres refund her portion of the rent. The apartment management refused.</p> <p><u>Answer:</u> When Freta contacted the investigator and explained the problem, it was suggested that she attempt to recover her lost rent from Flora's new roommate on a pro-rated basis. The apartment management could not be held responsible when each tenant signed the contract to rent the apartment.</p>

PROCESS SKILLS	CONCEPTS	STRATEGIES		
	<p>Consumer Law (continued)</p> <p>Effect on consumers</p>	<p><u>Discussion Questions:</u></p> <p>--Was Freta's complaint justified? Explain.</p> <p>--If you were the investigator how would you handle this problem?</p> <p>Brainstorm a day without laws (highway speeds, drinking laws, robbery, unlicensed doctors, lawyers). Discuss the following questions:</p> <p>--Why are laws important?</p> <p>--What laws protect you daily?</p> <p>--Do laws harm consumers?</p> <p>--What laws would you like to do away with (driving age, driving speed, marriage age)? Further discuss these by solutions (good and bad) and the consequences (good and bad).</p>

Use practical reasoning to suggest alternatives and consequences.</p>

OHIO LAWS... BE PREPARED

OHIO'S CONSUMER SALES PRACTICE ACT:

Ohio's Consumer Sales Practices Act* and other laws give you many consumer rights. These laws set standards which must be complied with in any consumer transaction. When these standards are not met, you may have the right to:

- 1) cancel the transaction, OR in many cases
- 2) sue and win:
 - a) 3 times the actual damages, or
 - b) \$200

WHICHEVER IS GREATER!
- 3) recover the attorney's fees, if the violation was committed knowingly.

*Ohio Revised Code § 1303.01, et. seq.

AUTOMOBILES

BUYING

When buying a car you **MUST** be given a "seller's affidavit" which verifies:

- 1) the accuracy of the odometer reading;
- 2) whether the odometer was altered, repaired or replaced;
- 3) whether the odometer represents mileage over the mechanical limit of 99,999 miles.

If the odometer has been tampered with and this is not stated in the "affidavit", then you can sue and recover triple damages or \$1500, whichever is greater.

(ORC 4505.06, 4549.99,
and 4549.41—4549.51)

★ REPAIRING

When you take your car into a repair shop you have all the rights described under the next section on "Repairs and Services" on page 3. Also, when telephoning for assistance, towing, or repair, you **MUST**:

- 1) receive an oral estimate during the phone conversation and be advised that you have a right to receive a written estimate before any work begins;
- 2) be informed of the basis of any towing charge (e.g. cost per mile) as well as any other miscellaneous charges.

Before you have your car repaired, check any warranty or guarantee; some repairs could be free, or at least reduced in cost.

(DAC 100-4-3-13)

Source: "Consumer Survival Handbook", Ohio Public Interest Group.

BEST COPY AVAILABLE

★ RUSTPROOFING

The term "rustproofing" can only be used if the firm guarantees the process with a warranty and agrees to repair future rust damaged areas to your satisfaction. The rustproofing firm **MUST**:

- 1) give you either in writing or by picture a description of the areas of your car that will be treated;
- 2) make any repairs within 30 days;
- 3) tell you within 10 days in writing if it has decided not to honor the warranty, and why.

Your claim **CANNOT** be denied because:

- 1) the damage is not extensive enough;
- 2) the cost of the repair is excessive;
- 3) you waited "too long" to report the damage (unless the warranty specifically states a time limit);
- 4) you have filed a claim in the past (unless the warranty specifically limits the number of claims).

There is no industry standard for rustproofing procedures or rustproofing chemicals. Without standards, each firm will have different practices, and warranties will differ. **READ THE WARRANTY** before you rustproof. **SHOP AROUND** for the best warranties and prices.

(OAC 109-4-3-15)

★ REPAIRS AND SERVICES

In any transaction where you need repairs or services, the supplier (seller, repairperson, etc.) **MUST** give you:

- 1) a written estimate of the cost unless the total cost will be less than \$25 or unless you decline in writing to get an estimate;
- 2) a copy of any document you sign or initial;
- 3) an itemized list of all costs, including parts and labor, and the name of the individual making the repairs;
- 4) all repaired parts, unless you were initially told that you would not get the parts back.

The supplier **CANNOT**:

- 1) charge you more than 10% over the estimate (or, if not a car repair, more than \$5 over the estimate, whichever is greater), unless you authorize additional repairs for a specified cost.
- 2) charge you for anything not directly related to the repairs or services (such as a charge for delivery or diagnosis) unless you were told about these charges beforehand;
- 3) claim a repair is needed when it is not.

Doctors, dentists, and lawyers are not required to give you an estimate, but you should request one.

(OAC 109-4-3-01)

★ ADVERTISEMENTS

- 1) Any advertisement offering goods or services for sale **MUST** conspicuously state **ANY** exclusions, limitations, or conditions of the sale. For example, if there is an additional charge for delivery, or a requirement that a certain amount be purchased, or if the item is not available at all outlets, then the ad **MUST** conspicuously state that fact.

(OAC 109-4-3-01)

BEST COPY AVAILABLE

326

- 2) If an item or service is advertised, then the seller **CANNOT** attempt to sell you a higher priced item by refusing to sell you the advertised item. If an item is advertised, then you have a right to see that item and to purchase it as advertised. If the seller has run out of the item, then you are entitled to a "raincheck" allowing you to purchase it later at the advertised price.

(OAC 109.4-3-43)

- 3) If an item or service is advertised as "free", then the ad **MUST** clearly spell out anything you must do to obtain it for "free". If the requirement is that you must purchase another item at its "regular price" to obtain the "free" item, then the required item **MUST** be of regular quality and the true regular selling price, not a higher price. Similarly, if an item is offered at "half price", then it must be sold for one half the price it is regularly sold for.

(OAC 109.4-3-44)

★ DELIVERY

If you have paid for goods to be delivered to you, then the seller has 8 weeks to either deliver the goods (or an adequate substitute) or to offer you a refund.

(OAC 109.4-3-49)

MAIL ORDER AND UNORDERED MERCHANDISE

If you have ordered goods through the mail, then the seller has 30 days to either deliver the goods (or an adequate substitute) or offer you a refund, **UNLESS** the advertisement stated that delivery would take longer. This rule does **NOT** cover services like photofinishing, magazine subscriptions, seeds, growing plants, or C.O.D. orders.

The Federal Trade Commission can fine businesses that violate this rule up to \$10,000 per day.

If you receive something in the mail that you didn't order, consider it a gift. You are not responsible for payment.

DOOR-TO-DOOR SALES

- 1) Any door-to-door salesperson **MUST** immediately inform you that his or her reason for contacting you is to make a sale.
- 2) If you decide to purchase any item or service over \$25, then the salesperson **MUST** give you **BOTH** written and oral notice that you have 3 days in which to change your mind and get your money back.
- 3) If you change your mind, then you **MUST** make the goods available for the seller to pick up. If the seller does not pick up the goods within 20 days, then they are yours, free of charge.

(OAC 109.4-3-11, 109.4-3-12, 109.4-3-13)

★ DEPOSITS

If you put down a deposit to purchase an item, then the seller **MUST** give you a dated receipt that specifies:

- 1) how long the seller will hold the item for you;
- 2) the cash selling price;
- 3) the description of the item;
- 4) whether the deposit is refundable and under what conditions.

(OAC 109.4-3-97)

REFUNDS

You are entitled to a refund for any item which you purchased by cash or check and are returning in its original condition, **UNLESS** a sign was conspicuously posted stating an alternative refund policy or stating "no refunds".

(CAC 1346.00 (B) (7))

★ PRIZES

If you are notified that you have won a prize or are eligible to win a prize, then you are entitled to that prize with no additional charges (such as a service, mailing, or handling charge). You need not endure a "sales pitch" to receive the prize, unless you are told to expect this sales pitch when you are notified of winning the prize.

(CAC 109.4-3-07)

DANCING, DATING, MARTIAL ARTS, AND HEALTH SPAS

When you enroll for prepaid dancing lessons, martial arts instruction, computer dating, and health spa membership, you have many rights. Prepaid entertainment and training contracts **MUST**:

- 1) be in writing;
- 2) be signed by both you and the seller;
- 3) be attached to an explanation of how to cancel the contract.

The contract **CANNOT**:

- 1) run longer than 3 years;
- 2) contain any waiver of your rights;
- 3) require payment of more than \$50 or 10% (whichever is less) of the contract price before the services are available.

You also have these **RIGHTS**:

- 1) the prepaid service **MUST** begin no later than 180 days from the date you sign the contract;
- 2) all information or materials of a private or personal nature (e.g. photographs, questionnaires, etc.) acquired from you **MUST** be returned within 30 days after the contract expires;
- 3) if the contract costs more than \$200 or is good for more than one year, then you have 7 days after first signing the contract, or 3 days after you receive your first service, whichever comes first, to cancel the contract. You **MUST** be told when you sign the contract of your right to cancel. Your cancellation is effective upon the postmarked date of your letter. If you cancel, the seller is allowed to keep no more than ten dollars of what you paid.
- 4) if you become disabled, then you pay only for the portions of the contract used and you **MUST** be refunded the remaining amount.

These laws do not apply to prepaid entertainment or training services offered by universities or nonprofit organizations.

(CAC 1346.01-1346.02)

DEBTS AND CREDIT

DEBT MANAGEMENT

If you are in serious debt and seek the assistance of a "debt pooling" service or other agency, you **CANNOT** be charged for that service. For example, there is a Consumer Credit Counseling Service in your area that will counsel you and manage your debt without charge.

(CAC 4716.01)

DEBT COLLECTORSA debt collector **CANNOT**:

- 1) call you at unusual or inconvenient times (in most cases between 9 p.m. and 8 a.m.), or call you at all if you are represented by a lawyer;
- 2) call you at work if your employer objects;
- 3) talk about your debt with anyone other than your legal or financial advisor, except with court permission;
- 4) harass or intimidate you through threat of violence, abusive language, continuous telephoning, or publishing your name;
- 5) pose as a lawyer or police officer, or falsely threaten arrest.

You can sue and win up to \$1000 if these rights are violated.

(15 USC §1692)

YOUR CREDIT RATING

A business which refuses to give you credit because you have received a poor credit rating from a credit reporting agency **MUST** tell you the reason why you were denied credit, and give you the name and address of that agency. You may have an interview with that agency in person or over the phone. Someone of your choosing may also participate in the interview.

If, 30 days after your interview you have been denied credit, insurance, or employment because of this agency's report, then the agency **MUST** give you free of charge:

- 1) the actual information (except medical) it has about you;
- 2) the sources of this information;
- 3) the names of those who have received a report on you within the last six months, or the last two years if the report was for employment purposes.

You may demand to have this information reinvestigated. If the information is found to be inaccurate, or if the agency cannot prove that it is correct, then it **MUST** be removed from your file, and the people you name **MUST** be notified that it is no longer in your file.

If these rights are violated, you can sue for damages and lawyers fees.

(15 USC § 1681)

TENANTS AND LANDLORDS**RENTAL AGREEMENTS**

- 1) Get all agreements **IN WRITING** whenever possible, and keep a copy;
- 2) Read all agreements carefully before signing;
- 3) If it's an oral agreement, keep all receipts and have a witness to the agreement;
- 4) Any clause in an agreement contrary to state law is not enforceable.

There are two kinds of agreements:

- 1) **LEASE**: a **WRITTEN** agreement that states a **SET LENGTH OF TIME** you agree to rent, a **SET AMOUNT OF RENT**, and is **SIGNED** by both tenant and landlord.

ADVANTAGES: the rent can't be raised and you can't be forced to leave without a good reason (non-payment of rent, lease violation, etc.).

DISADVANTAGES: if you need or want to move out before the end of the lease, you may have to pay rent even after you are gone.

2) **MONTH-TO-MONTH** (or similar time period) **AGREEMENT**: an ORAL or WRITTEN agreement that is **BINDING FOR ONE RENTAL PERIOD** and is renewed for one more period each time you pay rent. The period begins on the day you pay rent.

ADVANTAGES: If you want to move, all you have to do is give the landlord a written notice at the first day of the rental period stating that you plan to move at the end of the rental period.

DISADVANTAGES: the landlord can raise your rent, change the terms, or try to force you to leave by giving you a rental period's notice.

(ORC 5321.06 through 5321.14)

EVICCTIONS

1) **THE NOTICE**: You may receive a three day notice from your landlord. This notice **MUST** say on it somewhere:

"You are being asked to leave the premises. If you do not leave, an eviction action may be initiated against you. If you are in doubt regarding your legal rights and obligations as a tenant, it is recommended that you seek legal assistance."

You do **NOT** have to leave. If you choose to stay, your landlord may file for a court hearing.

2) **THE SUMMONS**: At least five days before your court hearing you will receive a summons from the court telling you when your hearing will be. At this point you should seek legal assistance.

3) **THE HEARING**: You should always attend your hearing. Some evictions can be stopped if there are local housing code violations and/or lease violations connected with nonpayment. Contact the local tenant union for assistance.

SECURITY DEPOSITS

Within 30 days after you move out, your landlord **MUST**:

- 1) return your security deposit in full, OR
- 2) give you a written notice which itemizes every deduction he or she made from your security deposit.

Your landlord may **ONLY** deduct from your security deposit the amount of damage you or your guests caused to the apartment. The landlord **CANNOT** deduct for normal wear and tear or for the repairs the landlord is responsible for (e.g. vandalism, weather damage, etc.).

If your landlord has wrongfully withheld all or part of your deposit, you may sue and collect double damages and your attorney's fees.

To do this, however, you **MUST** have:

- 1) given your landlord written notice that you were leaving, a full rental period (or less, if your rental agreement specified a shorter time) prior to the day you planned to move out. You **MUST** do this on or before the day the last rental period's rent is due.
- 2) given your forwarding address in writing to the landlord.

To prevent possible problems, turn in the keys on the last day you have possession of the apartment.

If your security deposit is more than one month's rent AND over \$50, then the landlord **MUST** pay you 5% annual interest on the amount of the deposit exceeding the monthly rent, if you live in the unit for six months or more.

(ORC 5321.14)

GAS AND ELECTRIC SHUT-OFFS

You **CANNOT** be disconnected by a regulated gas or electric company unless you are at least one month behind in your payments and have previous months' charges listed on your current bill.

To stop the utility from shutting you off, you can:

- 1) pay your previous months' bill. You do **NOT** have to pay your current month's charges;
- 2) contact the utility and get an "extended payment plan" that allows you to pay your total bill over a period of several months;
- 3) have a doctor certify that a shut-off would be especially dangerous to your health or the health of any permanent resident of your household. A phone call from a doctor to the utility will stop a shut-off for 7 days, by which time the doctor must send a certification form provided by the utility. This form prevents a shut-off for another 23 days, and can be renewed twice for another 30 days each time. If you have been shut off, a medical certificate will restore your service.

You also have these **RIGHTS**:

- 1) At **ANY** time you are entitled to work out a budget payment plan with the utility so that high winter bills are spread over the entire year;
- 2) Between December 1 and February 28, if you cannot pay your bill, you can prevent a shut-off by paying $\frac{1}{2}$ of your total bill, but not more than 15 percent of your total monthly household income. Also, companies **MUST** tell you of sources of financial aid, **BEFORE** disconnecting you;
- 3) If your landlord fails to pay the utility bill, the utility **MUST** give you 5 days notice before shutting you off. A representative of the renters can collect enough money to pay the **CURRENT** month's charges. This will prevent a shut-off. The utility **CANNOT** collect from you any earlier bills not paid by the landlord. You can recover this money from the landlord through small claims court or other legal action.

If you are going to be shut off, the utility **MUST**:

- 1) give you fourteen days notice;
- 2) personally tell you on the day of your shut-off, or leave a written notice if no one is home;
- 3) shut you off during normal company hours, and **BEFORE** 12:30 P.M. **IF** the following day is a bank holiday or the company is closed.
- 4) tell another person before you are shut off, if you so request;
- 5) give you a way to stop the shut-off, such as directly paying the utility personnel when they come to shut you off;

If you think you are going to be shut off unfairly, the company **MUST** review its decision if you request it. You can appeal to the Public Utilities Commission.

Express Yourself

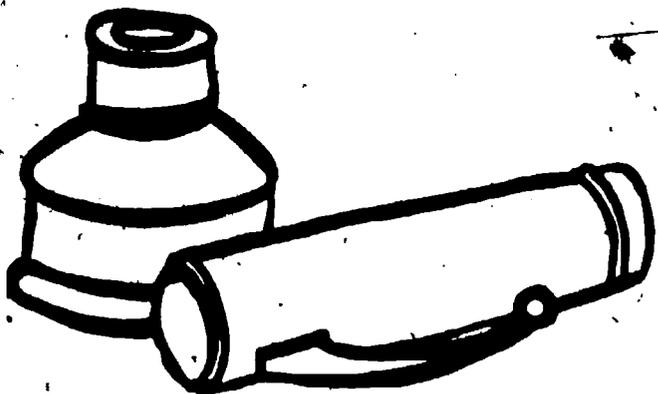

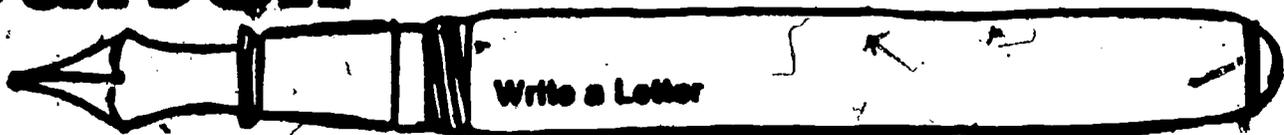

Writing a Redress Letter

To the Educator:

Ask each participant to use one of the Problem Profiles in this packet to write a redress letter.

Follow this Format.

1. Explain the problem carefully and briefly.
2. State when and where you bought the item or arranged for the service.
3. Explain how the purchase is defective.
4. List the steps you have already taken to solve the problem.
5. Give as much specific information as possible, including style numbers, catalog numbers, order numbers, etc.
6. State what you believe should be done about your claim.
7. Keep a copy of your letter of complaint.
8. If you write a second letter, include a copy of the first.

SMART ACTION

- 1) Don't throw away bills, receipts, contracts, letters, envelopes, magazine or newspaper ads, brochures, faulty merchandise, or other items that may help you prove that you have been ripped-off.
- 2) If you think you have been ripped-off, then contact the merchant or company immediately about your complaint. If the person you talk to can't or won't help you, then demand to talk with his or her superior, and continue on up the line until you are satisfied.
- 3) Neatly **TYPE** your complaint letters, send all correspondence by certified mail, and keep copies.
- 4) If your complaint is not resolved in this way, then there are several agencies that may be able to help you if you contact them as soon as possible:

 WHEN YOU NEED **REPAIR WORK**
RELIABILITY
 COUNTS MOST

When you have repair work done, make sure you are dealing with a reliable repairer and have a written contract so that you will know exactly what you are getting and the terms.

- ➔ All estimates should be in writing.
- ➔ All guarantees should be in writing.
- ➔ Guarantees should be clear as to what they cover and for how long.
- ➔ Inspect work before paying.
- ➔ Obtain receipted bill listing parts and labor.
