ABSTRACT

A comprehensive annotated bibliography contains 108 items including books, journal articles, children's books illustrative of educational materials in China, government reports, research reports, newspaper stories, ERIC documents, and articles from the popular press. The listed items have been published over a broad span of time ranging from the 1920's to the present. While most of the materials are in English, the bibliography contains items written in Swedish, Chinese, French, Russian, Chinese, Czech, Japanese, German, and Danish. All abstracts are in English. Two extensively covered topics are the major changes in educational public policy that took place after the Communist victory in 1949 and the policy changes during and after the Cultural Revolution. The annotations tend to be brief and are primarily descriptive, not evaluative. (CFR)

"Education and Cultural Affairs." Quarterly Chronicle and Documentation. CHINA QUARTERLY, 85 (March 1981), 190-91.

Dual secondary education policy will be pursued: continuing general education and also increased vocational and technical education. Also, in recent years 5,100 students were sent to study in 45 countries, over 4,600 in the natural sciences, 110 in social sciences, and 380 in foreign languages.

"Education and Culture (Including the Question of Intellectuals)." Quarterly Chronicle and Dc · entation. CHINA QUARTERLY, 92 (December 1982), 770-72.

Aim is for universal primary education by 1990. China needs more two-year colleges; more education by radio, TV, and correspondence courses; and more workers' night universities. Regrets that there are few college-educated personnel in rural areas. Urges that intellectuals be recruited into Party ranks.

"Education and Culture (Including the Question of Intellectuals)." Quarterly Chronicle and Documentation. CHINA QUARTERLY, 95 (September 1983), 588-90.

Gives 1982 enrollment at all school levels. Urges universal primary education by 1990, strengthening vocational education in order to apply science and technology to agricultural production, admission of more rural students to all schools, sending trained people to the countryside, and using intellectuals more fully.

School statistics at all levels for 1980 and 1981. Criteria given for university admissions. Inappropriate school practices during the Cultural Revolution resulted in poor training of those entering the work force.

"Education in Asia and Oceania: The People's Republic of China." BULLETIN OF THE UNESCO REGIONAL OFFICE FOR EDUCATION IN ASIA AND OCEANIA, 20 (June 1979), 50-55.

Noncritical educational overview since 1949: illiteracy reduced and women and minorities' schooling at all levels increased. By 1979 over 200 million Chinese youth were fulltime students (taught by nine million "education workers"): 140 million elementary, 60 million secondary, and 600,000 higher education enrollees.

EDUCATION IN COMMUNIST CHINA: ARTICLES FROM CHINESE SOURCES ON EDUCATION. Washington, DC: Government Printing Office, 1965.

Articles on education published in mainly scholarly and political journals, 1956-62, many of them about work and study, examinations, and other features of school and university policy. Articles from Japanese publications include "Educational Program of Communist China" and "Legal Education and Research."

"Education." Quarterly Chronicle and Documentation. CHINA QUARTERLY, 3 (July-September 1960), 126.

Lu Ting-yi's speech at People's Congress reporting on plan to cut twelve years of primary and of secondary school (6-6), inherited from Nationalists, to a shorter nine-year integrated course and begin schooling at age six.

"Education." Quarterly Chronicle and Documentation. CHINA QUARTERLY, 56 (October-December 1973), 809-10.

"Education." Quarterly Chronicle and Documentation. CHINA QUARTERLY, 58 (April-May 1974), 414-15.

Criticizes practice of entering higher education by the "back door"; i.e., by using influence to avoid going to the rural areas to work. Criticizes teachers who return to pre-Cultural Revolution demand for absolute obedience and stress book learning and examinations at the expense of practical work and political study.

"Education." Quarterly Chronicle and Documentation. CHINA QUARTERLY, 64 (December 1975), 84.

"Education." Quarterly Chronicle and Documentation. CHINA QUARTERLY, 90 (June 1982), 347-48. Calls for better training for soldiers and improved education standards in military academies. "Self-education" advocated for the 160 million youths unable to be educated during the Cultural Revolution.

"Education." Quarterly Chronicle and Documentation. CHINA QUARTERLY, 94 (June 1983), 403-4.

Urges higher education reform to serve modernization: lower examination pass marks for rural secondary youths, more contracts with employers, more competent faculty and staff, and higher educational standards in middle and primary

14

schools. Planned higher education enrollment in 1983 was 348,600, higher than in 1982.

"Education." Quarterly Chronicle and Documentation. CHINA QUARTERLY, 96 (December 1983), 771-74.

Lists 25 percent of total population illiterate or semiliterate. Notes that China had 11.6 university students per 10,000 population (fewer than India) and that out of 151 countries China's per capita expenditure on education was the third lowest. Also, plans are being made to universalize primary education and to recruit more middle school graduates to the work force rather than to higher education.

Hawkins, John N., ed. EDUCATION AND SOCIAL CHANGE IN THE PEOPLE'S REPUBLIC OF CHINA. New York: Praeger, 1983.

Examines political and administrative impact on Chinese education policy since 1949. Describes structure of formal education, curriculum and workers' training, and teacher education. Contains extensive data, commentary, and some personal observations on "red versus expert" tensions.

Hechinger, Fred M. "In China, the Pendulum is Swinging." NEW YORK TIMES, July 17, 1979, p. C4.

Maoist educational policies failed, especially during the Cultural Revolution, but the post-1976 return to academic

standards is not assured success. The lesson for U.S. in China's experimentation with schooling is to avoid centralized planning and strive for open access and equal opportunity.

Education under Communism, always an economic and political tool, in 1949-57 had conventional plus spare-time programs aimed at improved literacy, raising level of training, and achieving ideological goals. In 1958-67, to conventional and spare-time programs was added half-work halfstudy, mainly in secondary schools. Describes educational programs within industry. Predicts that China will increasingly use mass media in teaching and will use education to serve production needs.

Republican China's Ministry of Education stimulated Western education, set up a four-three-three school plan, adopted new textbooks, and held a national education conference (1912) to promote schooling nationwide, with elementary education as first priority.

Kwong, Julia Chak-sin. "Is Everyone Equal Before the System of Grades: Social Background and Opportunities in China." BRITISH JOURNAL OF SOCIOLOGY, 34, 1 (March 1983), 93-108.

The three-tiered examination system, begun in 1977 to select students for junior and senior high school and university, perpetuates inequality because of economic advantage and because educated families, by coaching, can give them an advantage. Thus children from worker-peasant families

receive less education, attain lower positions, and the gap between them and children from intellectual/cadre families widens.

Lampton, David M. "Performance and the Chinese Political System: A Preliminary Assessment of Education and Health Policies." CHINA QUARTERLY, 75 (September 1978), 509-39.

Despite centrally set expenditure ceilings and policy directions, education and health care vary greatly among China's provinces because of local leadership, funding, and citizen demands.

provide four to six years of compulsory schooling and improve secondary and higher education; and to send Chinese specialists to Europe to study curricula and textbooks. See entry 921.

Liao, T'ai-ch'u. "School Land: A Problem of Educational Finance." YENCHING JOURNAL OF SOCIAL STUDIES, 2, 2 (February 1940), 212-33.

Using land to finance schools and help bright youths taking civil service exams began 1023 A.D. and was confirmed by a Ming dynasty edict. After civil service system was abolished and Western education grew, the scholar became less an object of community admiration and support and more a family and individual responsibility.

Articles from 1979-80 issues of China's POPULAR EDUCATION and RED FLAG correct ultraleftist distortions of Mao's educational thought, reject the Cultural Revolution's putdown of intellectual effort in education, reaffirm the value of higher education as essential to the national economy, reaffirm different school curricula and methods of financing to support the "four modernizations," explain sending urban youth to work in rural communes (rustication) to aid the national economy (rather than for ideological

34

reasons given during the Cultural Revolution), urge schools to concentrate on the 96 percent of youths who go to work and not on the four percent who go to higher education (in this regard, urges more vocational schools to help more students get jobs), laud the Television University and other ways to expand further education, and urge expanding rural educational opportunities where 80 percent of the people live (about 30 percent of young to midcle-aged rural people are still illiterate. This problem is the main weakness of Chinese education).

Seybolt, Peter J., ed. "Educational Policy After the Gang of Four." CHINESE EDUCATION, 12, 1 (Spring-Summer 1979), 1-176.

Twenty-one articles from Chinese publications of late 1977 and early 1978 document changes in education after late 1976. Articles are on upgrading science and technology, raising the quality of education, restoring higher education entrance requirements, and in general restoring "expertness."
