IDENTIFIERS American College Testing Program; *Dade County Public Schools FL; Florida State Student Assessment Test; Scholastic Aptitude Test; Stanford Achievement Tests

ABSTRACT

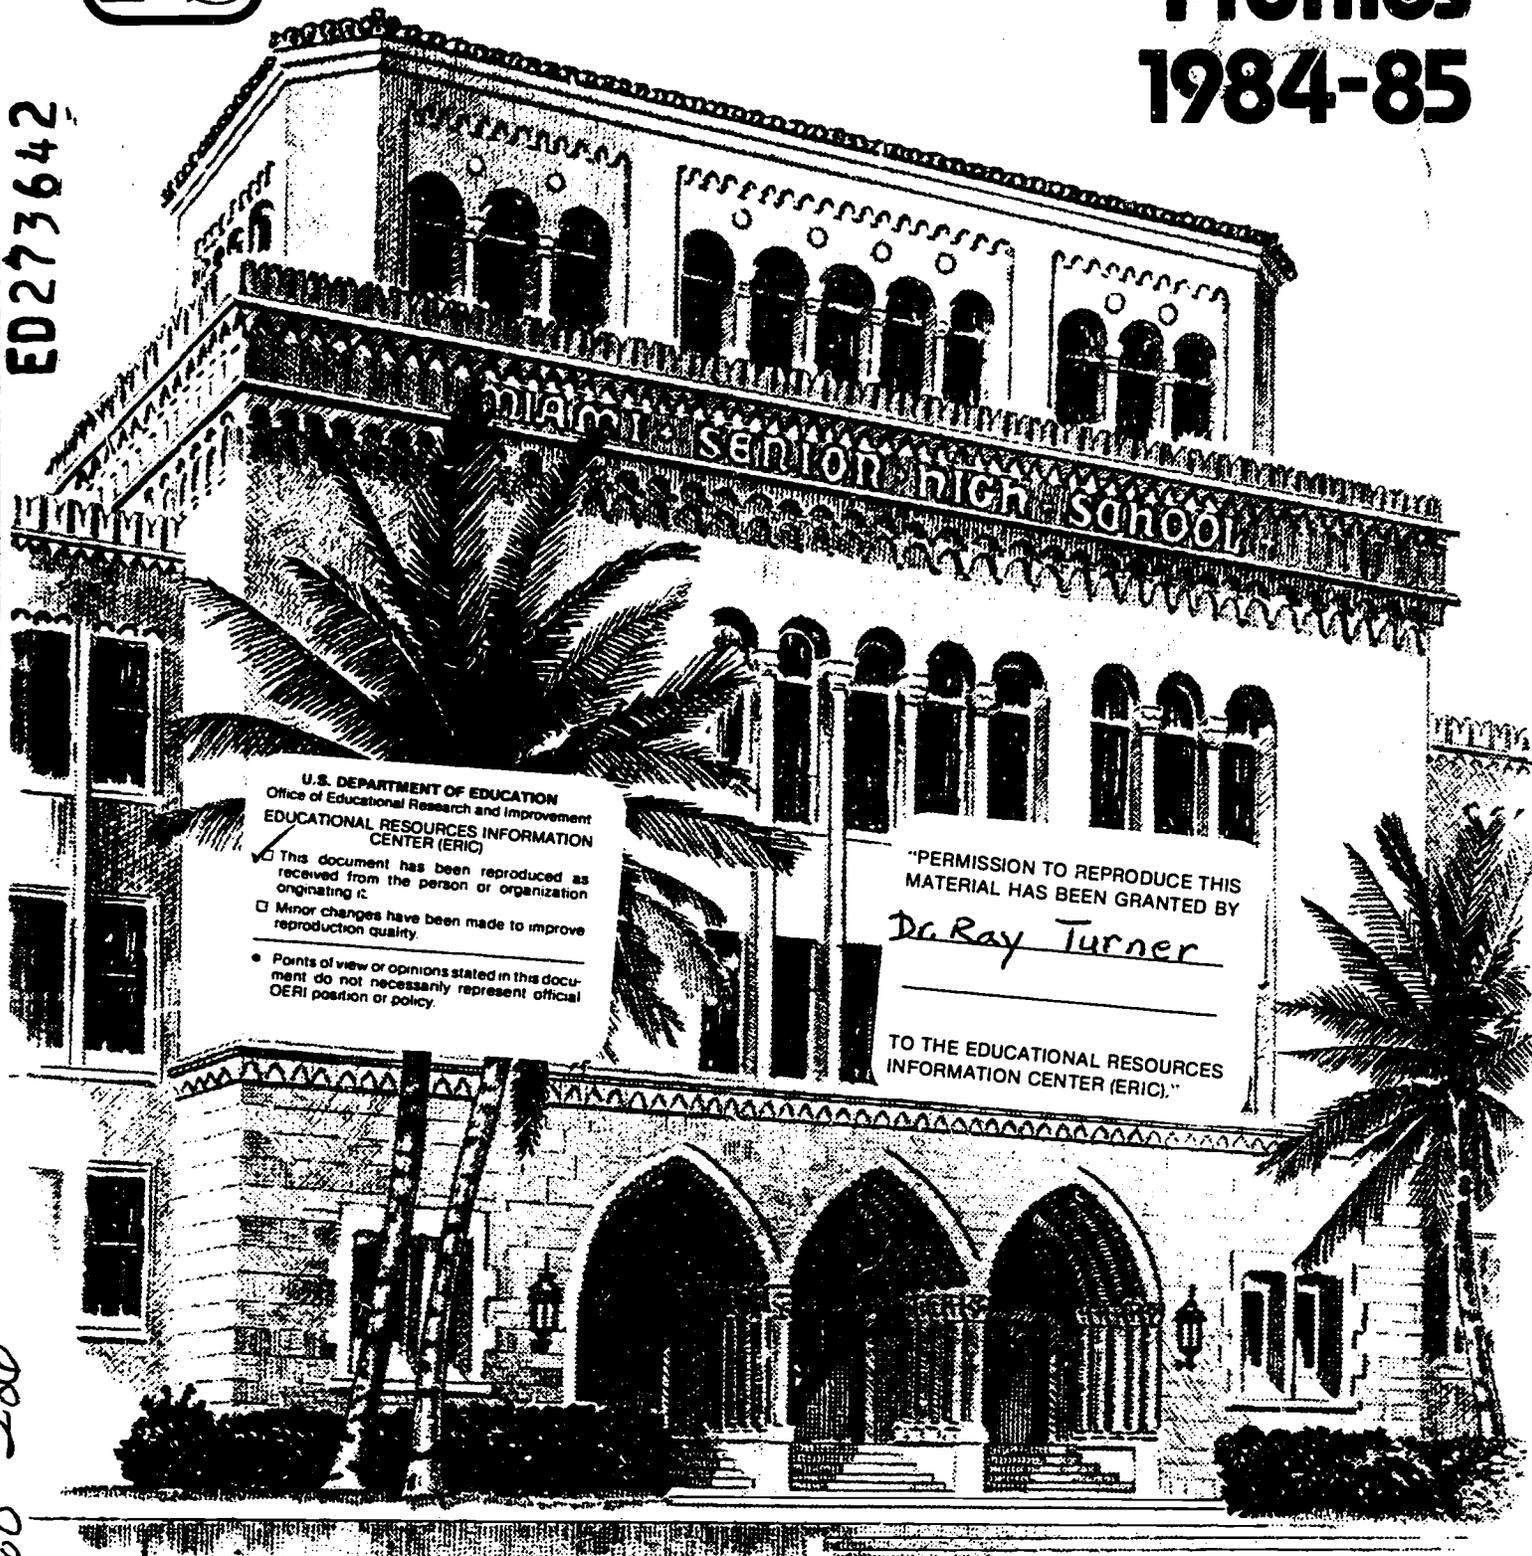

This annual document is a collection of general and statistical information on 251 schools in the Dade County (Florida) Public School system. The document is divided into four sections corresponding to the major geographical areas of the county: North, North Central, South Central, and South. A profile sheet, presented for each individual school in these areas, provides general information about the school, including location, telephone number, principal's name, grade organization, administrative area, and the United States Congressional District. The sheet also includes statistics on school, staff and student characteristics, as well as summaries of student achievement information. Some of the other available information includes: (1) staff characteristics, such as race, number of beginning teachers, pupil/teacher ratio, educational background; (2) student characteristics, such as student membership, racial background, dropout rate, average class size, total full-time equivalent students and the average cost per pupil, percentage of students with limited English proficiency; and (3) student achievement as measured by the Stanford Achievement Tests, Scholastic Aptitude Test, American College Testing Program, and the Statewide Student Assessment Test. (JAZ).

INTRODUCTION

This annual document is a collection of statistical information describing some of the more important characteristics of individual schools in the Dade County Public School system. It is intended to provide detailed information of interest, not only to the professional staff, but to the general public as well.

The profile sheet, presented for each individual school, provides statistics on school, staff, and student characteristics and a summary of student achievement as measured by the Stanford Achievement Test and the Statewide Student Assessment Test. The Student Achievement section also includes results of subject area testing in secondary schools. A school is a complex organization, and efforts to characterize schools by the use of quantitative data are never complete. The factors selected for inclusion in the District and School Profiles are among those considered to be most indicative of the total school environment and of greatest concern to the educational community. Some factors, such as Percentage Instructional Staff Attendance, total Full Time Equivalent (FTE), and cost per FTE are for the entire fiscal year 1983-84 (these are so indicated in the individual profile sheets). All the other variables, such as student and staff characteristics, describe the schools at a point in time (generally the fall of 1984-85 school year). The data for 1984-85 reflect the status as of October 1984. Variances, if any, between the data as shown in this document and the schools' records may be due to changes that have occurred since October 1984 and/or individual records being in a transitional stage at the time the computerized files were accessed.¹

The document, District and School Profiles, has been published annually since 1979-80. For the first two years, it was published in loose-leaf format with individual schools receiving only those data sheets pertaining to their schools. Since 1982-83, the document has been published in a single bound volume and distributed countywide.

[Note: Whenever asterisks (***) appear in place of data in the individual profile sheets, the item is either not applicable or the data were not available at time of publication. Blanks are generally used when the data are not appropriate for the school, as for example, SSAT II results for a junior high school.]

DATA DEFINITIONS

Listed below are definitions for each of the data elements in the profile sheets. The definitions are organized in the same sequence as that appearing in the individual profile sheets.

Area - the school district is divided into four geographical areas, each with an area superintendent and administrative staff. (Data Source: Annual Records, Attendance Services.)

1

Most such transitional examples involve personnel actions. For example, a school's Black assistant principal may be retiring and an Hispanic is being hired at essentially the same time. The ethnic membership for the school's assistant principal shown in the profile will depend on the status of the two actions at the point in time at which the personnel file is accessed.

Grade Organization - the official grade organization of a school denoting the grades at which pupils are served. (Data Source: Annual Records, Attendance Services.)

Congressional District - the territorial division from which a member of the U.S. House of Representatives is elected and in which the respective school is located. (Data Source: Elections Department, Metropolitan Dade County.)

School Characteristics, 1984-85

Exceptional Student Center - a school housing in excess of nine exceptional student classes. The center schools offer the related service programs of Speech/Language Therapy, Occupational and Physical Therapy as well as educational programming based on each student's Individualized Educational Plan (IEP). (Data Source: Annual Records, Division of Student Services.)

Community School - a school providing the community with educational, cultural, and recreational services beyond those offered through the regular elementary and secondary school program. This process provides a means by which resources of the school system and the community are mobilized to provide a total learning climate. Activities provided range from children's afternoon enrichment programs to classes offered for adults and senior citizens. Community schools are distinguished from adult schools in that: community schools offer programs mainly of a cultural and recreational nature with no high school credit awarded; adult schools offer high school credit courses and vocational/job preparatory subjects; and community schools are funded primarily by tuitions, grants, and donations. Adult centers are responsible for services funded through the Florida Educational Finance Program (FEFP). (Data Source: Annual Records, Office of Vocational, Adult, and Community Education.)

Date School Established - date school center was originally established. (Data source: Historical Records, Office of Facilities Management.)

Number of Acres - acreage of the school. (Data Source: Profiles, November 1984, Office of School Operations.)

Adult School - a school serving the adult population through a variety of programs organized to give adults the opportunities for personal improvement and enrichment to enable them to participate more effectively in a changing society. Programs offered at Adult Education Centers include: elementary classes for adults, high school courses for adults, occupational preparation courses, and various vocational programs. See also the discussion under Community Schools above. (Data Source: Annual Records, Office of Vocational, Adult, and Community Education.)

Comprehensive High School - a comprehensive high school is one that offers five or more trade and industrial programs in addition to a regular academic curriculum. (Data Source: Annual Records, Office of Vocational, Adult, and Community Education.)

Percent of Utilization of Permanent Facility - this is a measure of the usage of the permanent facility in relation to its assigned capacity. Utilization is computed by dividing assigned program capacity by total student membership. Preliminary student membership (not the official count as of October 8, 1984) was used for the purpose of this computation. (Data Source: Profiles, November 1984, Office of School Operations.)

Assigned Program Capacity - represents the ideal number of pupils that can be physically accommodated in a school of a given educational program configuration. It is computed by using the Room Utilization Chart and adjusting it by program, excluding portables and relocatables. (Data Source: Profiles, November 1984, Office of School Operations.)

After-School Care - a program offered by many elementary schools to meet the community's need for safe and supervised care for its elementary school children after regular school hours. The program is intended to provide this care on a cost basis. (Data Source: Annual Records, Office of Vocational, Adult, and Community Education.)

School/Park Site - this designation applies to schools in which the playground is also a municipal/county recreational park. (Data Source: Profiles, November 1984, Office of School Operations.)

Number of Students Transported - indicates number of students provided transportation by the district bus service to and from school. (Data Source: Profiles, November 1984, Office of School Operations.)

[Note: The summary page (9) indicates that a total of 48,900 students were provided transportation to and from school. According to the FEFP report submitted to the State by the Transportation Department, 39,742 students were provided transportation. The Transportation Department includes a student in their count only if that student was transported at least one day during the week of October 22 - 26, 1984.]

Staff Characteristics, 1984-85

The top section lists the different job groups at the school and provides statistics on all the full-time and part-time staff categories by ethnic composition and sex. The numbers represent actual staff on board as of October 1, 1984, excluding open positions as of that date.² (Data Source: EEO-C Report, November 1984, Office of Educational Accountability.)

Number of Beginning Teachers - the number of first-year teachers. (Data Source: School Summary Survey, October 1984, Office of Educational Accountability.)

Regular Program Pupil/Teacher Ratio - ratio has been computed by dividing total students in regular programs by total classroom teachers (including special allocations to art, music, and physical education). This ratio does not represent class size. (Data Source: computation by OEA.)

Average Years Teaching in Florida - represents the teacher's average experience in Florida schools. (Data Source: Personnel File, October 1984, Management Information Systems.)

Number of Teachers New to this School this Year - indicates number of instructional staff who are new to the particular school during the school year 1984-85. Although this item refers to "number of teachers", the data provided pertains to all instructional staff (teachers, counselors, librarians, school psychologists, and visiting teachers). (Data Source: Personnel File, October 1984, Management Information Systems.)

2

In instances where +0 percent is indicated, there is at least one person counted in this category, but the number is less than .5 percent of the total.

Percentage of Instructional Staff with Masters Degree - indicates percentage of instructional staff with masters degree (those who also have specialist or doctors degrees are not included). Instructional staff includes all teachers, counselors, librarians, school psychologists, and visiting teachers. (Data Source: Personnel File, October 1984, Management Information Systems.)

[Note: The percentage of staff with masters degree (and also those with specialists and doctors degrees in the following items) indicated is not limited to those receiving credential payment.]

Percentage of Instructional Staff with Specialists Degree - indicates percent of instructional staff with specialist degree (those who also have doctor degree are not included). Instructional staff includes all teachers, counselors, librarians, school psychologists, and visiting teachers. (Data Source: Personnel File, October 1984, Management Information Systems.)

Percentage of Instructional Staff with Doctors Degree - indicates percent of instructional staff with doctors degree. Instructional staff includes all teachers, counselors, librarians, school psychologists, and visiting teachers. (Data Source: Personnel File, October 1984, Management Information Systems.)

Percentage of Instructional Staff Attendance - indicates, for the 196-day teacher year, the rate of attendance of instructional staff, which includes teachers, counselors, librarians, school psychologists, and visiting teachers. Absence/leave counting against attendance includes sick leave, personal leave and leave without pay. Typically, an instructional employee accrues sick/personal leave at a rate of 10 days per year or 5.1 percent. (Data Source: Personnel File, October 1984, Management Information Systems.)

Average Salary for Instructional Staff - the average salary of all teachers, counselors, librarians, school psychologists, and visiting teachers. (Data Source: Personnel File, October 1984, Management Information Systems.)

Teacher Salary Range - the number of teachers that fall in each salary range, not including summer school. (Data Source: Personnel File, October 1984, Management Information Systems.)

Student Characteristics

Student Membership - the official membership of the school as of October 8, 1984, by grade and ethnicity. The sum of the membership in individual schools does not agree with the official membership figure for the school district (228,062), since this document does not include students enrolled in off-campus programs for alternative and exceptional student education. (Data Source: 1984-85 Fall Student Survey, October 1984, Office of Educational Accountability.)

Percent Not Promoted - percent of students not promoted to the next grade during the 1983-84 school year. If a student who is not promoted transferred to another school, the receiving school's records would reflect this statistic. (Data Source: 1984-85 Fall Student Survey, October 1984, Office of Educational Accountability.)

Dropout Rate (High Schools) - percentage of those students who have been identified by school personnel as having dropped out of school. The definition of a dropout, according to Florida Statutes 228.041(29), is as follows:

A dropout is a student who, during a particular school year, is enrolled in school and leaves such school for any reason except death before graduation or completion of a program of studies and without transferring to another public or private school or other educational institution.

A dropout rate has been computed only for senior high schools. Data are for school year 1983-84. (Data Source: Computation by OEA based on data in 1984-85 Fall Student Survey, October 1984.)

Average Class Size (Elementary Schools) - computed by dividing membership by the number of full-time equivalent teachers. (Data Source: Course Code Survey, October 1984, Office of Educational Accountability.)

Average Class Size (Secondary Schools) - average class size for each subject area is computed by dividing total number of assigned seats (membership) by the number of full-time equivalent teachers. (Data Source: Master Seat Inventory, October 1984, Management Information Systems.)

Number of A.P. Pupils - number of students in Advanced Placement courses in which students can obtain college credit, depending on their A.P. test scores. (Data Source: Seat Assignment Count from ISIS Course File, October 1984, Attendance Services.)

Number of Advanced Pupils - number of students in advanced or higher level courses, also classified as honors courses in senior high school; does not include A.P. students. (Data Source: Seat Assignment Count from ISIS Course File, October 1984, Attendance Services.)

Total Full-Time Equivalent Students - the number of FTE generated in the July, October, and February counts at that location by program. The data are for fiscal year 1983-84. (Data Source: FTE Reports, Management Information Systems.)

Average Cost Per FTE - total cost in general and special revenue funds divided by total FTE generated in each location by program, including summer school. The cost per FTE in basic programs includes the expenditures in the Educational Alternative program. The data are for fiscal year 1983-84. (Data Source: Cost Reports, Management Information Systems.)

Percent of Students with Limited English Proficiency - percentage of students whose primary or home language is other than English and who are not judged to be independent in English. (Data Source: 1984-85 Fall Student Survey, October 1984, Office of Educational Accountability.)

Number of Graduates (High Schools) - number of students graduating from high school and the type of diploma awarded. The data are for school year 1983-84. (Data Source: 1984-85 Fall Student Survey, October 1984, Office of Educational Accountability.)

Percent Free/Reduced Lunch - percentage of students eligible to receive free or reduced price lunch. (Data Source: Survey of individual schools as of November 5, 1984, Bureau of Governmental Relations.)

Number of Students Served by Chapter 1 and Compensatory Education - indicates the number of students served by these programs (in elementary schools). In secondary schools, the data reflect the number of students served in the reading and/or math programs (one child could be counted twice if that child is served in both the reading and math programs). In elementary schools, an eligible child is automatically served in both the reading and math programs. (Data Source: Annual Records, Bureau of Governmental Relations.)

Percent of Attendance - computed by dividing the aggregate number of days that the students are in attendance during the year by the total number of student days in membership. Data are for school year 1983-84. (Data Source: Annual Report, Attendance Services.)

Number of Students with Out-of-School Suspensions - the data are for the school year 1983-84. (Data Source: 1984-85 Fall Student Survey, October 1984, Office of Educational Accountability.)

Number of Students Referred to Alternative Education - educational alternative programs are designed to meet the needs of students who are disruptive, disinterested, or unsuccessful in a normal school environment. The data are for the school year 1983-84. (Data Source: 1984-85 Fall Student Survey, October 1984, Office of Educational Accountability.)

Number of Students Receiving Corporal Punishment - The data are for the school year 1983-84. (Data Source: 1984-85 Fall Student Survey, October 1984, Office of Educational Accountability.)

Student Achievement

The section provides a summary of student test scores on the Stanford Achievement Test, 7th Edition, and the Statewide Student Assessment Tests. For secondary schools, the results of subject area testing and College Board Tests are also provided.

Stanford Achievement Test, 7th Edition - Dade County Public School students in grades K-11 are tested with the Stanford in late April or early May each year. Two-year data are provided for comparative purpose. (Data Source: Test files, Office of Educational Accountability.)

Number Tested - excluding certain exceptional and limited-English proficient students, this includes all pupils tested in the 1982-83 and 1983-84 school years.

Median Percentile - this is the percentile score point which separates the distribution of scores into a top and a bottom half. The school median percentile may be compared to the national norm (or average) of the 50th percentile for all grades and all subtests.

Statewide Student Assessment - Each year, Florida students in grades 3, 5, 8, and 10 are assessed in the basic skill areas of reading, writing, and mathematics.

At the senior high level, the test is divided into two parts. Part I tests the basic skills, focusing on reading, writing, and mathematics. Part II deals with the application of basic skills. For example, the student may be asked to compute the cost, including Florida sales tax, of specific items listed in a newspaper ad. If a student fails to master the basic skills standards of the

test, the school may use local procedures to remediate and then certify mastery at a later date. Mastery of Part II standards can be demonstrated only by taking and passing the State Assessment Part II test. Passage is required for receipt of a regular high school diploma. (Data Source: Listings of Achievement, October 1984, Florida Department of Education.)

Average Percent Mastery - This is the average of the percentage mastery of the assessed standards in each skill area.

For the Part II test, the time of testing and percent of grade 10 students passing each section of the test is indicated.

Subject Area Tests (Secondary Schools) - Dade County Subject Area Tests are administered to students in selected secondary subject areas in order to provide detailed information about specific secondary subjects within the local curriculum. These tests are locally developed to match the specific content of each course, and were administered in Algebra I and Life Science in May 1984.

Number Tested - This is the number of students tested for whom there were the additional data required to calculate the Residual Score (described below).

Average Score - This is the average number of correct answers for the 36 item tests.

Residual Score - This is the difference between the average score and an expected score. The expected score is produced by averaging scores districtwide of students who are similar with regard to prior achievement test scores, ethnicity, and grade level.

College Board Tests (High Schools) - The Scholastic Aptitude Test (SAT) is a nationally administered test made up of separate verbal and mathematical sections. The verbal questions measure the student's ability to understand what is read and the extent of a student's vocabulary. The mathematics section measures a student's ability to solve problems involving arithmetic reasoning, algebra, and geometry. These abilities have been shown to be related to successful academic performance in college.

The American College Testing Program (ACT) is a nationally administered test that measures English Usage, Social Studies Reading, Natural Sciences Reading, and Mathematical Usage. The scores achieved on the four sections of the ACT are important to colleges because they provide information about a student's readiness for college-level work.

Both the SAT and the ACT provide scores that indicate a student's standing as compared to college preparatory students in the nation. The SAT scores range from 200 to 800 on each section while the ACT scores range from 1 to 36 for each section. The scores provided in the District and School Profiles are the percentage of students scoring at or above 550 for the SAT and 24 and above for the ACT.

Totals used here frequently differ from districtwide summaries. The data in this table represent the sum of the numbers in the individual profile sheets included in this document. Districtwide statistics can be found in the Statistical Highlights and the Statistical Abstract.

* Total does not include students enrolled in off-campus Alternative and Exceptional Student Education Programs.

The School Board of Dade County, Florida adheres to a policy of nondiscrimination in educational programs/activities and employment and strives affirmatively to provide equal opportunity for all as required by:

Title VI of The Civil Rights Act of 1964 - prohibits discrimination on the basis of race, color, religion, or national origin.

Title VII of The Civil Rights Act of 1964, as amended - prohibits discrimination in employment on the basis of race, color, religion, sex, or national origin.

Title IX of the education amendments of 1972 - prohibits discrimination on the basis of sex.

Age Discrimination Act of 1967, as amended - prohibits discrimination on the basis of age between 40 and 70.

Section 504 of the Rehabilitation Act of 1973 - prohibits discrimination against the handicapped.

Veterans are provided re-employment rights in accordance with P.L. 93-508 (Federal) and Florida State Law, Chapter 77-422, which also stipulates categorical preferences for employment.
