 IDENTIFIERS *Osteoporosis

ABSTRACT

This bulletin furnishes a listing of educational resources on the subject of osteroporosis that are available in the reference collection, Science Reading Room of the Library of Congress, Washington, D.C. The following sources are cited: (1) magaine introductions; (2) subject headings used by the Library; (3) basic texts; (4) additional titles; (5) bibliographies; (5) conferences; (6) government publications; (7) journal articles; (8) selected journal articles; (9) selected materials available in the Science Reading Room; and (10) additional sources of information other than the Library. (JD)

OSTEOPOROSIS
Compiled by Vivian O. Sammons

TB 87-7

September 1987

SCOPE: Osteoporosis, a disease marked by thinning of the bones, making them brittle and more vulnerable to spontaneous fracture, affects some twenty million people in the United States. After the age of forty-five, it is nine times more common in women than men. Older persons are more susceptible than middle-aged persons, and whites and Orientals more than Blacks. Exactly what causes the increased loss of bone is unknown. However, there appear to be many contributing factors, including hormonal imbalances, which affect the absorption of calcium and phosphorus, and the decrease in estrogen production in menopausal women. Inadequate nutrition, including a diet lacking in calcium, vitamin D, and protein, is also thought to contribute to the onset of the disease. This guide to the literature of osteoporosis is based on materials available in the collections of the Library of Congress and is not meant to be a comprehensive bibliography. It is designed--as the name of the series implies--to put the reader "on target."

INTRODUCTIONS

Burkhardt, Sandra, and Sandie Horwitz. Understanding osteoporosis. Walking magazine, autumn 1986: 23-25, 27. Pamphlet box*

Cullerton, Barbara J. Osteoporosis reexamined: complexity of bone biology is a challenge. Science, v. 235, Feb. 20, 1987: 833-834. Q1.S35 and Pamphlet box*

Lane, J. M., V. J. Vigorita, and M. Falls. Osteoporosis: current diagnosis and treatment. Geriatrics, v. 39, Apr. 1984: 40-47. RC952.A1G47 and Pamphlet box*

SUBJECT HEADINGS used by the Library of Congress, under which books on osteoporosis can be located in most card, book, and online catalogs, include the following:

OSTEOPOROSIS (Highly relevant)
CALCIUM, DIETARY (Relevant)
ESTROGEN--THERAPEUTIC USE (Relevant)
CALCIUM--THERAPEUTIC USE (Relevant)
