ABSTRACT
                 This guide contains an overview and procedures for
the development of three sound slide/tape programs--Application
Process, Academic Advising Process, and Registration Process. The
tapes are intended to enhance the factors that facilitate, and to
moderate the influence of those that impede, adults in negotiating
the admissions process. Their primary purpose is to provide an
overview of the steps involved in helping adults gain an
understanding of the process. The visuals help to provide an
orientation to facilities and staff. These eight steps in the
development process are discussed: establish need and audience,
identify resources needed and establish a development plan, develop
purpose and objectives, collect and organize information needed,
develop script and visualization specifications, record narration and
photograph visualization, train staff on use of equipment and
audiovisuals, and evaluate, revise, and update the slide/tape
program. Appendixes contain the scripts and visualizations from three
sample slide/tape programs and evaluation checklists. (YLB)

INTRODUCTION

In early 1980, the National Institute of Education directed the
Appalachia Educational Laboratory (AEL) to conduct a Needs Assessment in
the seven states served by the Laboratory. The purpose of this assessment
was to have the people of the region identify what they felt were the most
important educational problems facing them today so future R & D work could
be directed to meet those needs.

As a result of this Needs Assessment process, AEL conducted research
and development on lifelong learning.

The Lifelong Learning Program (LLP) research was concerned with
identifying those factors that facilitate and those that impede adults in
entering into and successfully completing postsecondary education programs.
It was also concerned with helping postsecondary institutions make more
effective use of resources and create more effective conditions for success-
ful adult learning through development and validation of interventions
designed to enhance the facilitating and moderate the effect of the
impeding factors.

Five educational development tasks form the research framework. These
tasks are: (1) making a commitment to return to school, (2) managing
learning, (3) developing occupational competency, (4) planning for employ-
ment, and (5) becoming employed. Each task is sequential and involves the
following R & D stages: context analysis, problem investigation and speci-
fication, intervention design, pilot test and revision, field test and
product finalization, and first level of dissemination in consortium
institutions, with dissemination to other institutions in the AEL Region
and nationally as resources permit.

The potential impact of the LLP will give adults more control over the planning and management of their learning, help institutional staff understand the learning process from an adult motivational point of view, and provide intervention products and processes as a direct means to implement changes.

During the first phase of the LLP a research plan was developed, and public postsecondary institutions in the AEL Region providing vocational and technical training for adults were identified, reviewed, and surveyed with respect to the research problem. Seven schools were visited, two of which were selected as research sites. An in-depth study of each of the two research sites was made to develop background information and understanding of each of the institutions in which subsequent R & D activities were to be conducted.

LLP research sites were: Ashland Community College, Ashland, Kentucky; and Southwest Virginia Community College, Richlands, Virginia. Five additional sites were invited to form a consortium that served in a review and advisory capacity and provided the first level of dissemination. These sites were: Hocking Technical College, Nelsonville, Ohio; Parkersburg Community College, Parkersburg, West Virginia; Southern West Virginia Community College, Logan, West Virginia; Washington Technical College, Marietta, Ohio; and Wytheville Community College, Wytheville, Virginia.

Task #1 involved the study of adults as they formulate the commitment to return to school. This task begins with the initial consideration of returning to school, continues throughout the admissions process, and concludes with being accepted and starting classes.

The basic question that guided the research and development for task #1 was:

What factors facilitate and what factors impede adults in making a commitment to return to school?

The research focused on adults who completed, and those who did not complete, the admissions process at each of these research sites. The sample studied was selected from the total population of adults that met the following criteria: (1) 20 years of age or older, (2) interrupted educational experience, (3) no prior postsecondary, and (4) enrolled in at least two courses for five or more credit hours. The problem identification stage of R & D, focusing on the admissions process, was conducted at each research site to identify important areas to be included in the research. Also, instrument development and interviewer training for task #1 research was accomplished during this phase.

Research on identifying critical factors affecting adults in making the commitment to return to school was completed during the 1982-83 school year and is reported in the Lifelong Learning Program Technical Report #1. This research involved a study of adults at the Ashland and Southwest Virginia Community Colleges.

Research findings identified 93 impeding factors and 101 facilitating factors that were grouped into six categories as shown in Table 1 on page 4.

Table 1

Relationship of Categories of Facilitating and Impeding Factors
Affecting Adults Making a Commitment to Return to School

Facilitating Factor Categories	Impeding Factor Categories
Employment related motivators	
Financial assistance and improvement	Financial difficulties
Institutional information, services, and offerings	Lack of information and services
Institutional characteristics	Confusion/unfamiliarity with institutional processes
Personal motivators	Apprehensions about self
Encouragement from others	Handling multiple responsibilities
	Time management concerns

Interventions for Changing Critical Factors

The basic question that guided the research and development of inter-
ventions for Educational Development Task #1 was:

> What intervention(s) can be developed and used to enhance
> those factors that facilitate and to moderate the influence
> of those factors that impede adults in making a commitment
> to return to school?

This research question addresses the process of identifying, developing,
and validating interventions to enhance the effect of the facilitating
factors and moderate the effect of the impeding factors on adults in formu-
lating a commitment to return to school. This question was considered at
the Intervention Planning Meeting (IPM) held in July 1983 with key repre-
sentatives of the research sites, the program consultant, and AEL project
staff. The purpose of this meeting was to review the research findings and
to identify the most promising ways of assisting adults in successfully

completing task #1. As a result of this meeting, a wide range of recommen-
dations for interventions was made and special follow-up meetings were
scheduled at each research site. At these meetings: (1) the critical
factors were reviewed in order to base the final recommendations for inter-
ventions on the findings for task #1; (2) each recommendation made at the
IPM was discussed and evaluated; and (3) the recommendations that were most
appropriate for each school were identified. The site meetings involved
two rounds of discussion. This was to allow LLP staff an opportunity to
"broker" the refinement of recommendations between both institutions to
arrive at as many interventions as possible that could and would be used by
both schools. The list of areas for the preparation of intervention
resource materials agreed upon is as follows.

The Admissions Process: Administrative Handbook

> Admissions Management Information Tracking System
> Validation of Placement Tests
> Toll-Free Telephone Access Number
> Information Booth
> Reading Level Analysis of Admissions Documents
> Educational Planning Resource Center

The Admissions Process: Staff Development Handbook

> Staff Training Packages:
> Research Findings
> Academic Advising and Counseling Staff
> Adult Commitment
> Educational Planning Resource Center
> Admissions Office and Support Staff

The Admissions Process: Audiovisual Information Development Guide

> Application Process
> Academic Advising Process
> Registration Process

Educational Planning Course

> Instructor's Guide and Student Handbooks

The product design, pilot testing, and initial revision of these resource materials were completed and field tested in preparation for final revision and dissemination. Field test validation involved a post test evaluation design using qualitative methodology to assess the effects of the resource materials in producing positive changes in the critical factors.

This Audiovisual Information Development Guide has been designed to enhance the factors that facilitate and to moderate the influence of those factors that impede adults in the admissions process. Table 2 lists these facilitating and impeding factor categories.

Table 2

Relationship of Categories of Facilitating and Impeding Factors to The Admissions Process: Audiovisual Information Development Guide

Facilitating Factor Categories	Impeding Factor Categories
Institutional information, services, and opportunities	Apprehensions about self
	Confusion/unfamiliarity with institutional process
Financial assistance and improvement	
	Lack of information and services

The impeding factors--related to low self-confidence, fear of not knowing what to expect, and unfamiliarity with the facilities and staff at the institution--take their annual toll eliminating many adults from educational programs before they even attend their first class. Although it may not be apparent, many adults have a very difficult and frustrating time with the application, academic advising, and registration processes. Personalizing each of the steps involved can help reduce this fear and

anxiety, but when the institution is faced with working with a large number
of students in a limited amount of time, it becomes impossible to indivi-
dualize the process. Therefore, group procedures and a variety of materials
are used to provide students with the information necessary to follow the
step-by-step process. These procedures and materials vary from institution
to institution. Primarily, information is provided through printed
instructions on forms that need to be completed and verbal directions
provided by staff and clerical workers in the offices associated with the
various steps in the process.

Although the information provided by institutions for each step is
very specific and detailed, four of the major problems students usually
have are: (1) getting a good overview of the process, (2) knowing the
sequence of steps they must follow, (3) finding out where they must go for
information and materials, and (4) feeling comfortable in going through the
process.

As the intervention alternatives were being identified for task #1 of
the Lifelong Learning Program, slide/tape audiovisuals were selected as one
means of addressing the related impeding factors. This guide contains an
overview and procedures for the development of the following three sound
slide/tape programs: Application Process, Academic Advising Process, and
Registration Process.

Three slide/tape programs were designed, one for each major phase in
the process. The primary purpose of the slide/tape programs is to provide
an overview of the steps involved to help adults gain an understanding of
the process. The visuals help to provide an orientation to facilities and
staff. This overview and visual presentation can help alleviate the fear

and anxiety that adults have expressed. The audiovisuals were designed to

supplement existing materials in each institution and may be used in

several ways with:

- Groups - students at the same step of the admissions
  process can be brought in at one time to view the
  audiovisuals. This also presents an opportunity for
  a question and answer session.

- Individuals - students who come in before the
  scheduled time or who show up the first day of classes
  to be admitted and registered. It may also be used
  on an as needed basis with prospective students.

- Faculty - as an orientation to the processes of
  admissions, academic advising, and registration.

- Clerical staff - as in-service for new staff in the
  offices that deal with these processes. It serves as
  a good orientation to part of their jobs, what they
  will be dealing with, and how it fits into the total
  process.

DEVELOPMENT PROCESS

Three slide/tape audiovisuals were developed for each of the two research sites involved in the Lifelong Learning Program. Although the specific content differed for each site, the general topics and content were the same for presenting the application, academic advising, and registration processes. The eight steps used to develop the slide/tapes were: (1) establish need and audience; (2) identify the resources needed and establish a development plan; (3) develop purpose and objectives; (4) collect and organize information needed; (5) develop script and visualization specifications; (6) record narration and photograph visualization; (7) train staff on use of equipment and audiovisuals; and (8) evaluate, revise, and update the programs.

In replicating the development process it should be planned and organized with a specific assignment of coordination given to one staff member. However, key staff should be involved in the process at various points to clarify and to explain the step-by-step process involved. Also, this helps staff develop and identify with the "product" and be more willing to use it or coordinate their services with the total process.

The process used to develop the admissions process audiovisuals could be used to develop any slide/tape program. Appendices A, B, and C provide the scripts and reproductions of the visualizations for the slide/tape programs developed for one of the research sites, Ashland Community College. The following is an overview of the eight-step process.

Step One: Establish Need and Audience

The need for the development of interventions to get at the problems adults have in the process of applying and successfully enrolling in educational and vocationally oriented programs was identified through the research project of the AEL Lifelong Learning Program. Factors which enhance and impede adults in this process were identified through a series of interviews with adults who were successful and with those who were unsuccessful.

Adults were identified as the target group through a broader needs study of educational problems in the seven-st te AEL Region. Although the primary audience for the slide/tape audiovisuals was adults, this intervention should be designed for use with all students. As a first step, the specific problems of the target audience need to be identified as a basis for developing these interventions. As part of this need identification, the potential use of the intervention(s) should be established to justify the development effort required.

Step Two: Identify the Resources Needed and Establish a Development Plan

The primary resource needed for the development of slide/tape audio-visuals is staff time. In addition, one person needs to be identified as the project leader to coordinate the development efforts. Through the involvement of other staff members, the amount of time required of the project leader can be reduced. The other resources needed are the technical capabilities for photography and sound recording. Many institutions have an audiovisual department that can provide these services. If not, staff members or a person in the community might be identified who has photography as a hobby. Radio stations and commercial sound studios can also be used

as technical resources for sound recording. Once the basic resources needed
have been identified, a development plan should be established so that costs
can be estimated and the budget required can be obtained.

Step Three: Develop Purpose and Objectives

The purpose and objectives should be directly related to the problems
identified and the need established. The specific changes desired in the
target audience's knowledge and attitude should be the basis of writing the
purpose and objectives. For example, the following specific objectives for
both the adult students and institutional staff were identified for each of
the slide/tape programs developed for the LLP research sites.

A. Slide/Tape on the Application Process

   Objective: Provide an information delivery system to help:

   Prospective Adult Students:

   ● Understand the application process including the reason
     information is required (and how it is to be used in
     making admissions and placement decisions).

   ● Understand the role of testing in the admissions process
     and how test results can be helpful in education and
     career planning.

   ● Know to whom and where to go for help by showing visuals
     of the locations, facilities, and staff members available
     to assist them.

   ● Follow through to complete all necessary and helpful
     steps related to making application to attend school.

   ● Utilize all relevant information resources for educa-
     tional and career exploration and planning.

   ● Utilize student development services available for
     counseling and exploring options for financial aid.

Institutional Staff:

- Provide a complete and accurate overview of important information about the application process to adults using an attractive and interesting mode of delivery.

- Provide a flexible and reliable means of orienting prospective adult students that can be operated and maintained by clerical staff.

- Provide a relevant framework for subsequent discussions to elaborate upon and/or explore the personal relevance of the application process for individual adults.

B. Slide/Tape on the Academic Advising Process

Objective: Provide an information delivery system to help:

Prospective Adult Students:

- Understand basic terms and information regarding institutional and program requirements involving program offerings, course sequence and prerequisites, academic standards, etc.

- Understand the role of the academic advisors and how one's advisor can help in planning and scheduling courses.

- Understand the various institutional services available for educational and career planning and special assistance such as tutoring, developmental courses, orientation courses and programs, counseling, etc.

Institutional Staff:

- Provide a complete and accurate overview of important information about academic advising to adults using an attractive and interesting mode of delivery.

- Provide a flexible and reliable means of orienting prospective adult students that can be operated and maintained by clerical staff.

- Provide a relevant framework for subsequent discussions to elaborate upon and/or explore the personal relevance of the academic advising process for individual adults.

C. Slide/Tape on the Registration Process

Objective: Provide an information delivery system to help:

Prospective Adult Students:

● Understand the individual and institutional purposes for
  registration.

● Evaluate the different options for registering such as
  preregistration, regular registration, and late regis-
  tration.

● Understand the registration process in terms of the steps
  to be followed and records to be developed.

Institutional Staff:

● Provide a complete and accurate overview of important
  information about the registration process to adults
  using an attractive and interesting mode of delivery.

● Provide a flexible and reliable means of orienting
  prospective adult students that can be operated and
  maintained by clerical staff.

● Provide a relevant framework for subsequent discussions
  to elaborate upon and/or explore the personal relevance
  of the registration process for individual adults.

Step Four: Collect and Organize Information Needed

Most of the information on the admissions process should be contained
in materials that are presently in use. These materials should be collected
and used as the basic information resource. Also, as the slide/tape
programs are being developed, it should be kept in mind how they will be
used to supplement existing materials or how existing materials can be
modified. Where information is provided by staff and clerical help, it
should be obtained through a recorded interview. Once these materials and
information are collected, an outline of the steps involved in the admis-
sions process should be made. Outlining the step-by-step process is very

important because it helps staff to clarify the process itself. As part
of the organization of information, key concepts and the most important
information to be conveyed by the audiovisual need to be identified and
prioritizied. This will help in reducing information overload.

Step Five: Develop Script and Visualization
Specifications

A first draft script should be developed using the identified objectives
and the key concepts and important points of information. This draft should
be written in the second column of a two-column worksheet. (See page 14a
for an example of a script worksheet.) A conversational language should be
used and the script writer should mentally visualize talking to adults in
taking them through the process. Care should be taken to explain new terms
or words that might be unfamiliar. Also, draft script development should
include identifying what information could be presented through visuali-
zation. Therefore, ideas for visualization can be noted in the first column
of the script worksheet. Script content should be written for each visuali-
zation frame taking care that too much content is not presented with each
visual, and that content meets the identified objectives for that program.
Also, the content should be written at approximately a 12th grade reading
level or below.* The number of frames may be limited by the equipment that
is available for use. In all cases this should be predetermined. All three

---

*The LLP intervention "Reading Level Analysis of Admissions Documents,"
found in The Admissions Process: Administrative Handbook, can be used in
conjunction with this step of development.

Visualizations	Frame	Narration

of the slide/tape audiovisuals developed for the LLP research site were
limited to one slide carrousel. This was not a handicap because the slide/
tape program purpose was to present an _overview_ of the process and to
introduce the key concepts and other important information.

Once the script, with visualization, is drafted, it should be reviewed
by key staff members for accuracy of information and suggestions for changes.
Based upon this revision, a second draft should be developed. As part of
this draft, the visualization specifications should be completed. Again,
the script should be reviewed for suggestions before being finalized. Care
should be taken not to set specific requirements for a visualization. Using
general visualization specifications permits flexibility for the photographer
in capturing many "action" scenes from actual activities, thus reducing the
posed look.

Step Six: Record Narration and
Photograph Visualization

The narration can be recorded while the visualization is being done.
However, it is very important to make sure that there is no problem in
getting the visualization needed when it is specified by the script. If
time permits, waiting until the visualization is completed allows for a
modification of script to include a comment about a unique visualization
that was unplanned or to "try out" the script, reading it while showing the
visuals.

Photographing actual students (adults in this case) going through the
process is preferred, especially where groups of students are involved.
However, individual students representative of the target audience should
be selected as subjects for specific shots. Some of these photographs can

16

be taken easier when students are not going through the process. This
allows time for alternative shots, proper lighting to be set up, and other
conditions that might be necessary.

Special instructions need to be provided to the narrator on special
pronunciations, voice inflections, etc. Also, whenever possible, it helps
to have a staff member present at the recording to have any frame rerecorded
when necessary rather than to have the narrator redo it later. Including
background music and other special sound effects where appropriate improves
the sound recording. The sound tape should have an audible beep between
frames for use on manual equipment. If used on automatic equipment, it
should have an inaudible pulse. It is not recommended to have an audible
beep and an inaudible pulse on the same side so that you hear the beep even
though the slides are changed to the next frame by the inaudible pulse.
Also, some equipment will not work if the cassette tape has one side with
an audible beep and the other side with an inaudible pulse.

Another consideration for the visualization could be to use a filmstrip
format. This format, however, does not permit updating slides each year to
include new staff, changes in facilities, etc. But if several copies are
needed and automatic filmstrip projectors are the only equipment available,
this limitation and additional expense may be appropriate.

Step Seven: Train Staff on Use of Equipment and Audiovisuals

All personnel responsible for showing the sound slide/tape programs
should be trained on the use of equipment and become familiar with the
content of each audiovisual program. This would provide staff with the
expertise necessary to operate the equipment as well as answer questions on
content or to follow-up on requests.

23

Staff involved in this training might include the director of admissions for training other staff; dean of instruction for use in a staff development session; recruiters for going out into the community; and counselors for one-to-one or group sessions with prospective students.

It is recommended that an institution have an extra set of slides and tape for each program. This extra set would serve as backup, i.e., when the recruiter had a set outside of the institution, or in case the slides or tape were lost or destroyed they could be duplicated and replaced.

Step Eight: Evaluate, Revise, and Update the Slide/Tape Program

Since the slide/tape program was developed to alleviate impeding factors and to meet specific objectives, an evaluation of the effectiveness should be part of the slide/tape development process. As objectives are formulated in step three, consideration should be given on how the objectives can be evaluated. Based upon evaluative data the slide/tape program can be reviewed and revised. The visuals should be updated regularly to keep the program current with changes in support materials, facilities, and staff.

To ensure that the objectives for this intervention were met at the LLP research site, staff designed an evaluation checklist. This instrument served two purposes: (1) for collection of data to validate the intervention, and (2) for students to have a personal copy of the audiovisual information for a reference. (See Appendix D for copies of the evaluation checklists.) The validation report for this intervention may be found in the LLP Technical Report #1.

SUMMARY

Slide/tape audiovisuals can be an effective means of providing an overview of the admissions process. They can be used to introduce concepts and terms students need to understand. In addition, the audiovisual format can acquaint students with facilities and staff in advance of going through the process. Thus, the specific impeding factors of: (1) apprehensions about self (not knowing what to expect, being undecided about personal and program goals, being scared during registration, and feeling lost when others seem to know what is going on); (2) confusion/unfamiliarity with institutional process (unfamiliar with building, room, staff, and procedures); and (3) lack of information and services (not knowing where to go for help, insufficient supply of catalogs, receiving conflicting information, and insufficient time for counseling) can be addressed through audiovisual programs.

Slide/tape programs can be designed for use during orientation programs, group counseling sessions, off-campus meetings with prospective students, and other group settings or can be set up for individual student use. In addition to providing an overview, the audiovisuals can be keyed to school brochures and other materials with more detailed information on the admissions process.

The advantage of the slide visuals is the ease of keeping the program up-to-date on facility and staff changes along with other changes such as hair and clothing styles. However, the sound tapes also need to be revised as changes are made in the admissions policy or process.

20

Finally, involvement of staff in the audiovisual development process provides a means to clarify the steps involved and to provide for a coordination of services and information. And, the audiovisual programs can be used to inservice new faculty and staff on the admissions process and their role in it.

APPENDICES

Appendix A:

Ashland Community College Application Process
(script and visualizations)

FOCUS

ASHLAND
COMMUNITY COLLEGE
APPLICATION
PROCESS
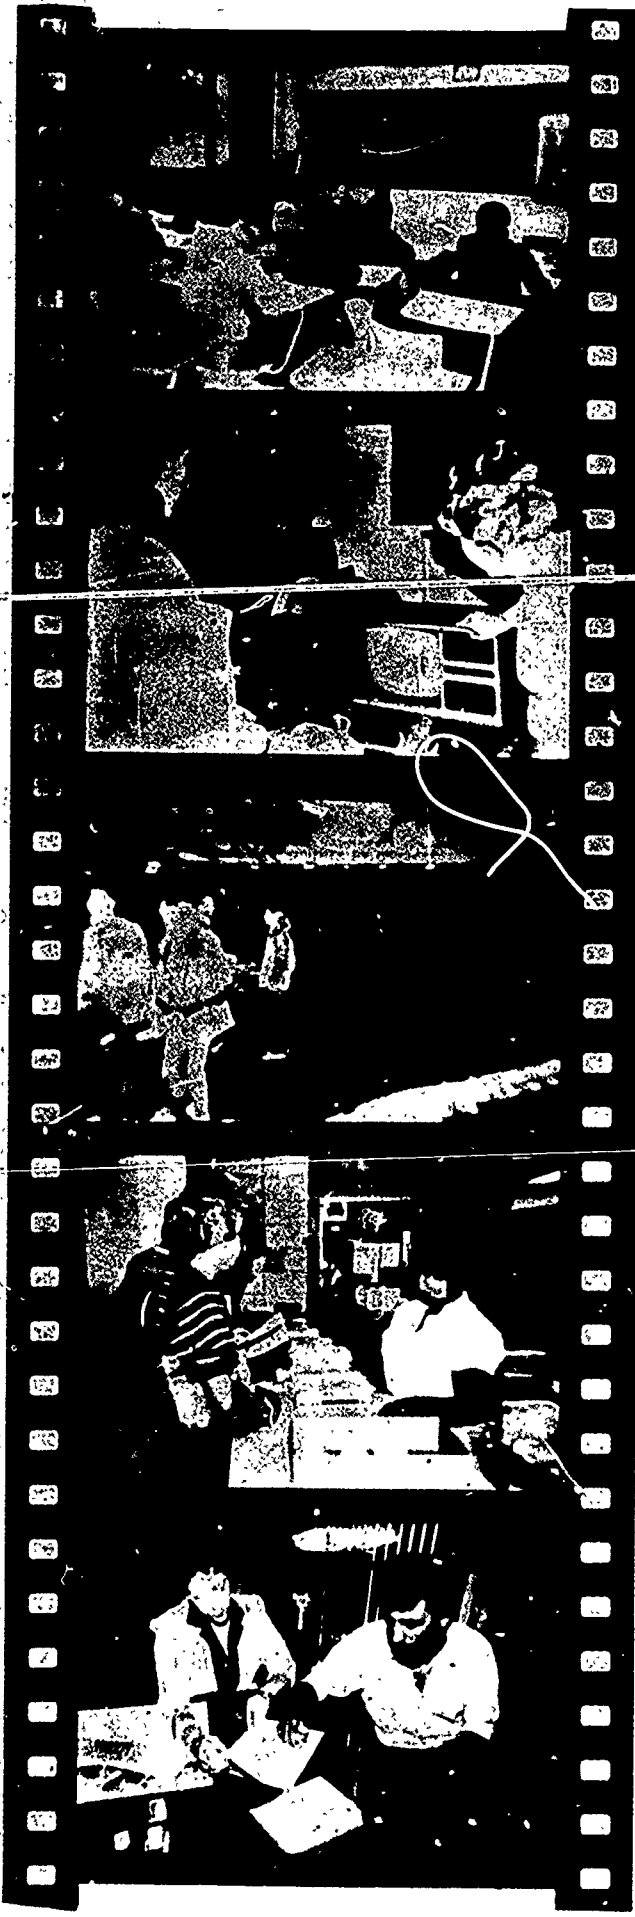

Focus

1 Music

2 Music

3 Welcome to Ashland Community College--a college with many educational opportunities for you--

4 the two-year Associate in Applied Science Degree Programs--designed to prepare you for specialized employment--

29

5 the two-year transfer programs--designed
  to enable you to transfer to a four-year
  college or university.

6 These and many special programs are
  available to you as a full-time or
  part-time student--

7 day or night.

8 Now, to become a student at Ashland
  Community College, your first step is
  to be admitted.

9 Although this college is an open-door
  institution and accessible to the handi-
  capped, you are required to fill out a
  few forms and encouraged to have a Career
  Planning Interview with a counselor.

10 The purpose for this is to obtain infor-
   mation to help you enroll in the program
   and courses which will best meet your
   needs.

11 You will receive, by mail or in person,
   an application form and a health form.

12 If you have decided that you want to go
   to school--and already know the program
   you want to enroll in--then go ahead and
   fill out the application and health
   forms.

13 However, if you don't know for sure
   whether or not you want to go to school,
   or if you have questions about the
   programs offered at Ashland Community
   College--
14 or need financial assistance in order
   to enroll--then see a counselor in
   Student Services prior to filling out
   the forms.

31

15 For example, if you need financial aid, do not wait too long before you apply because it usually takes four to six weeks to determine eligibility.

16 You should be aware of the financial aids available. First is a grant. It it not a loan so you don't have to pay it back.

17 The second is a college work-study job which will let you earn part of your college expenses. This does not have to be repaid.

18 However, if you do not qualify for the ones mentioned above, you may want to consider low interest loans made by the college or a financial institution. These loans are repaid after you finish college and are made in small monthly payments.

19 In addition, there are other types of financial assistance available for those who qualify--such as veterans benefits--scholarships--

32

20 Dislocated Workers Program--

21 or vocational rehabilitation assistance

22 The financial aid counselor has infor-
mation on the various types of aid or
can direct you to the specific source
you should consider.

23 Another thing you should be aware of--
admission to the college's limited
enrollment programs - primarily health
care - is determined by selection
committees. Students desiring admission
to these programs shall submit all
materials and satisfy all admission
requirements before March 1. Appli-
cants are generally notified of their
status by early April.

24 Now, back to the application and health
forms.

APPLICATION
FOR
ADMISSION
FORM

25 The following information will help
   you understand how to complete the
   forms and how the information will
   be used.

26 First, the application form. This
   form serves as your formal request
   for admission and the information you
   furnish will be used to set up your
   student record file.
27 Your student record file is used to
   record the program, courses, credits,
   grades, school activities, and other
   information about your education at
   ACC.
28 On the application for admission form,
   you will be asked to provide information
   such as--the year and semester you wish
   to begin classes--your legal name--your
   legal address--and information on your
   previous education.
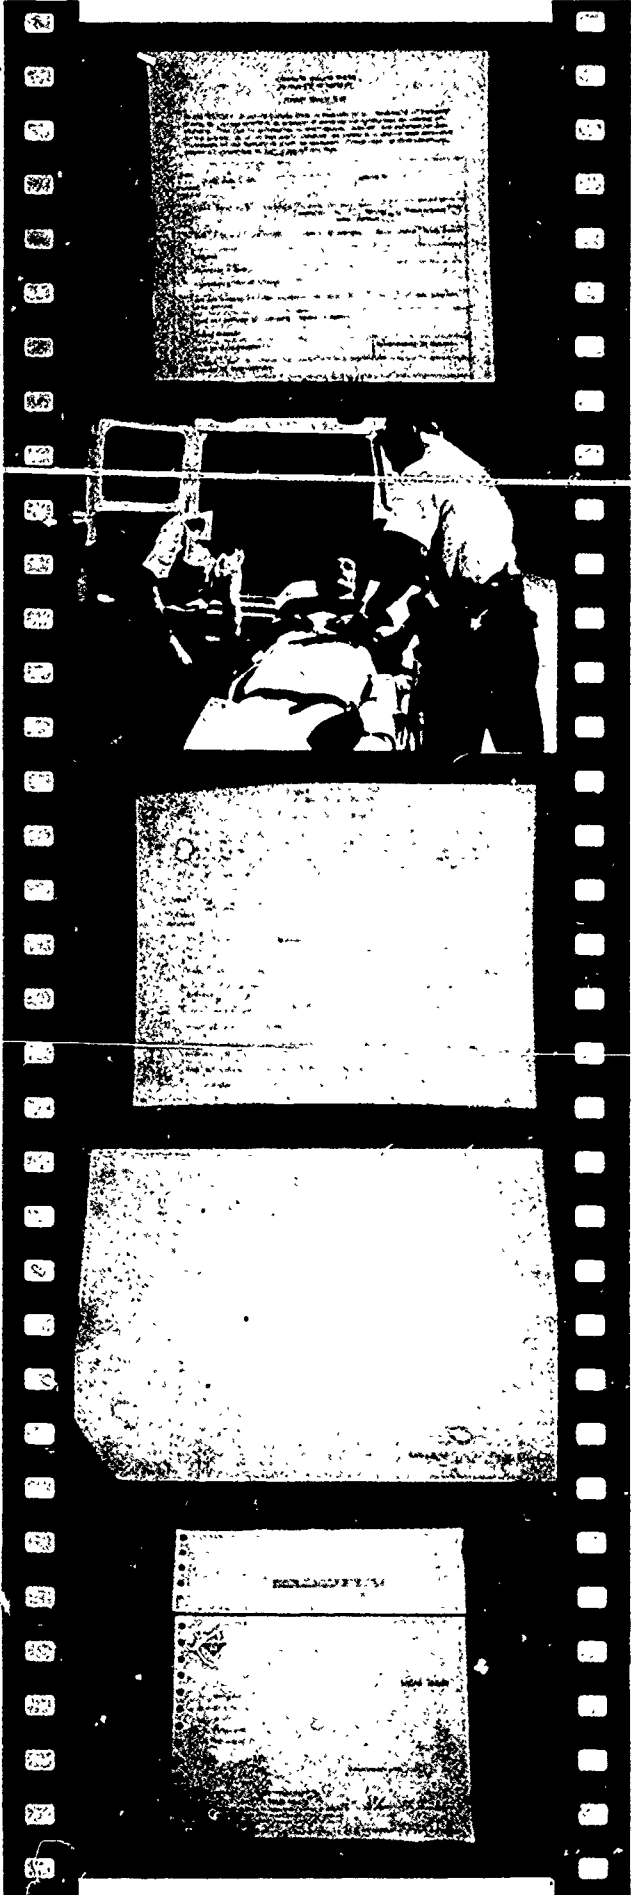

29 As you will note, this form also has
   space for you to enter your social
   security number. It will be used as
   your student number for data processing.

30 The other form to be filled out pertains to your health. This information is confidential and it is for your protection.

31 For example, if you were injured or became ill while at school, we might be able to help you at the hospital.

32 As you complete the forms, make note of any sections of information you have questions about. Leave these blank and you can get help from an Admissions Office staff member or during your interview with a counselor.

33 If you have received a high school diploma or attended another college-- then you need to arrange for transcripts to be sent to Ashland Community College.

34 If you have not completed high school, but have completed a GED certificate, you should formally request that your GED examination scores be added to your application file.

35 And how do you go about getting transcripts? Well, just notify your high school and request that they send a copy of your transcript to ACC.

36 However, if your school has been consolidated or no longer exists, then inform ACC where you went to school and they will try to help you determine the location of your records.

37 Then you would write to the superintendent of that school district and request a copy of your transcript. Give the name you used in school, your birthdate, and your social security number.

38 Or, if you are an older adult, give your parents' name in addition to the other information.

39 If you have attended college, write or call that institution and ask that a transcript of your work be mailed to the registrar of the college. Sometimes there is a small fee charged for this; however, it usually doesn't exceed a few dollars.

40 Now, if you were applying to some colleges, you would be required to take a test for admission. However, there are no minimum testing standards at ACC.

41 However, all applicants, especially those who intend to be full-time students, are required to take the American College Test--the ACT--or the Career Planning Profile Examination--the CPP.

42 In addition, applicants are encouraged to take the Nelson Denny Reading Test and the Math Placement Test.

43 These tests are <u>not</u> used to determine if you can be admitted. The results are used to help you make the decisions--decisions about what program and courses best meet your career goals.

44 For example, it might help you identify basic courses in your major in which you already have a lot of knowledge and skills--courses in which you might earn advanced credit or be exempt by taking an examination.
45 Or--it might help you identify skill areas where you need help before enrolling in some of your program's required courses.

46 The important thing to remember is, it's to help you make decisions--and to be successful in the major you choose.

47 The ACT and the CPP tests are given periodically and dates are available at the Student Services Office. And, after the tests have been processed, your results will be interpreted for you, so that you can use your results to help you with your educational planning.

48 You will take the Nelson Denny Reading Test and the Math Placement Test during Freshman Orientation.

49 After you have completed the application and health forms, you should take time to see a counselor to answer any preliminary questions you may have and to help you focus your thinking on the most important aspects of the application process.

50 At that time you would schedule an appointment to come back and talk about possible curriculum choices and a Career Planning Interview.

51 You will be notified, by mail, of your acceptance and invited to come in for the Career Planning Interview if one has not already been scheduled.

52 The purpose of the Career Planning Interview is to help you set your goals and to explore the opportunities available for selection of a major.

53 The important thing is that the interview is designed to provide you with the answers to questions that you might have, and a way of reviewing your plans for enrolling at Ashland Community College.

54 Once you have made your decision for a program, you will be assigned a faculty advisor in that department.

55 Your advisor will help you learn about the program requirements and assist you in selecting the courses you need to take. This will help you to get ready to register for classes.

56 You may think the application process for admission to ACC is difficult—but it really isn't.

57 Just remember to fill out the application and health forms--
58 have your transcripts or GED scores sent to the Admissions Office--

59 and--register for the ACT or CPP tests.

FOCUS

ASHLAND
COMMUNITY COLLEGE
ACADEMIC ADVISEMENT
PROCESS
Focus

1 Music

2 Application to college is a great step
toward your future.

3 And now that you have finished the
application process--your next contact
should be with your academic advisor.

4 But, what is academic advising?

43

5 Well--academic advising is help that
faculty members give to students. This
help includes how to plan for and reach
educational and vocational goals while
attending Ashland Community College.

6 How is an academic advisor assigned to
  you?

7 If you are a full-time or part-time day
  student, you will be assigned an academic
  advisor according to your area of
  program interest.

8 You will be informed whom your advisor
  will be. You generally remain with the
  same advisor throughout your enrollment
  at Ashland.
9 However, you may ask the question, can
  I change advisors?

10 Yes, if a change in your major is
   involved. Or, possibly upon request
   by you to the division head or to the
   counseling staff.

11 Another question you might have is,
   how does academic advising differ
   from counseling?

12 It is difficult to distinguish between
   advising and counseling, however,

13 The academic advisor is responsible
   for encouraging you to achieve in
   subject areas and steering your
   progress toward graduation.

14 An example of this includes the advisor
   assisting you in exploring occupational
   goals either for transfer to a senior
   college or for job entry.
15 Counseling, on the other hand, helps you in general career planning and with personal, social, financial aid, and emotional problems.

16 But, what are the basic responsibilities of an academic advisor?

17 To work with you in planning your courses to meet graduation requirements for your major,

COURSE REQUIREMENTS FOR MAJOR

18 to assist you in the pre-registration process each semester,

19 to help you add or drop courses, or make any changes in your schedule--

20 to help you follow the proper proce-
   dures when withdrawing from school,
   so you will leave in good standing--
21 and to talk with you when you have
   problems, with such things as
   finances, study habits, or when you
   are upset because of a course or
   instructor--

22 or, if you need further help, your
   advisor will refer you to the proper
   person.

23 The advisor will also help you begin
   the Graduation Application form before
   the term in which you plan to graduate.
24 In addition, the advisor will help you
   with such problems as choosing a college
   for transferring,

25 or assist the Placement Office in
exploring employment opportunities
for you.

26 In brief, the Academic Advising System
has been planned to provide you with
help to insure careful scheduling and
progress in your major.

27 What information will your advisor
have about you?

28 If you are a new student--the advisor
may have

29 your ACC math test and Nelson Denny
reading test scores, a copy of your
high school transcript or GED, a copy
of your application for admission, as
well as your ACT or CPP test scores
if they are available.

30 If you are entering from another
   college, the advisor may have a copy
   of your transcript evaluation or a
   copy of the transcript.

31 In addition, after the close of each
   grading period, a copy of your grades
   will be sent to your advisor.

32 Now, you should be ready to talk with
   your academic advisor. Before you do,
   there is one term you should under-
   stand--that is credit hour.

33 All of your college work will be done
   in terms of credit hours and you will
   need a specified number of credit
   hours to graduate.

34 Basically a credit hour represents the
   number of class hours a course meets
   during one week. For example, English
   101 is three credit hours and may meet
   for one hour three times per week.

35 Credit hours are very important. You
pay your tuition based upon the number
of credit hours you take each term--
if you take 12 or more you are consid-
ered a full-time student.

36 Your grade point average is calculated
from the grades you earn--times the
credit hours for each course.

37 Your academic advisor can show you how
to calculate your grade point average.

38 And of course you will need a specific
number of credit hours to complete a
two-year degree.

39 Look over the major you have selected
in the college catalog before you meet
with your advisor--he or she will be
able to help you with any questions
you have about these requirements.

40 Now, how can your advisor help you get started in school?

41 Your academic advisor can aid you during the admissions period by helping you understand your major, learning requirements, and occupational outcomes.

42 For example, before talking with your academic advisor, you can use your schedule of classes and your trial worksheet from the registration packet to develop a trial schedule.

43 You will need a copy of the required courses for your major or the college catalog. The required or recommended courses are presented in the general order you should take them. For example, 1st semester, 2nd semester, etc.

44 Use your copy of the schedule and fill in the request number for the courses you should take first, then the course prefix, which is the abbreviation for the course title--
45 course number, section number, credit
   hours you will receive for the course,
   and subject--
46 along with the day and hour the course
   meets, the room number, and instructor's
   name.

47 Be sure to check the days and hours
   given for each course section so that
   there are no conflicts and so that
   your selection of courses makes the
   best possible time schedule for you.

48 Also, you may need to consider devel-
   opmental courses if you feel that
   your academic skills are a "little
   rusy"--or consider testing for advanced
   credit.
49 After completing the trial schedule,
   take it to your advisor for approval.
   Your advisor will discuss your courses
   with you and have you complete the
   class schedule cards.
50 Your advisor will discuss this with
   you as part of planning your schedule.

51 Once your advisor has approved your
   schedule, obtain your advisor's
   signature on the class schedule
   cards.

52 Another important area to be covered
   with your advisor is the policies and
   procedures related to registration.

53 The way this is done is by discussing
   and evaluating with you the information
   in your folder and any additional
   information--like your work exper-
   iences--you share during this
   interview.

54 Once you have started school, when
   should you see your advisor?

55 Don't wait for a problem--touch base
with your advisor periodically. This
may keep problems from occurring.

56 It's your responsibility--the help is
there! Use it to the best of your
advantage.

57 However, when you do have a problem
that is affecting your school perfor-
mance, the first person you should
see is your instructor.

58 If the problem is not solved, your
faculty advisor may be in the next
best position to help you.

59 Faculty advisors have regular office
hours. You should check the hours
posted on your advisor's door and call
or stop to schedule an appointment.

60 However, an appointment can be made
   through the faculty's secretary if
   your classes conflict with your
   advisor's posted office hours.

61 Together, you and your advisor can be
   a team, working to achieve a common
   goal--your success!

ASHLAND
COMMUNITY COLLEGE
REGISTRATION
PROGRAM

1 Music

2 Music

3 You've probably wondered how to go about
registering and scheduling your classes.

4 But, what is registration?

5 Well, registration is the act of becoming
  formally enrolled in courses for credit.
  This involves filling out your schedule
  cards and getting them approved by your
  advisor--

6 so your name can be officially entered
  on class rolls, authorizing you to pay
  tuition and fees, to attend class, and
  to receive credit.

7 You will start the registration process
  by reporting to station 1 and having
  your name checked to determine your
  eligibility to register.

8 If you are eligible and, at this point,
  have already met with your academic
  advisor to work out your schedule,
  registration will be easier for you.

9 If not, you will pick up your regis-
  tration materials at station 1 and then
  meet with your advisor to plan your
  schedule.

SCHEDULE CARD

ICAL SCAN SHEET
10 For the specific steps to follow during
the process, check the registration
procedures on a sheet attached to your
schedule of classes--

11 also, if you have any questions about
the process, be sure to check with
the people at each station about what
to do next.

12 There are, however, some very important
things you should know about the regi-
tration process--

13 the first is that your schedule card
should be filled out completely and
accurately--this includes information
about yourself, your major, and the
courses you plan to take.

14 Secondly, a special sheet, called an
optical scan sheet, will have to be
completed. This sheet will be read by
a computer to enter your name on the
class list   or the specific courses
and sections you register for.

15 It is very important that the optical
scan sheet be completed accurately to
avoid any mix-up in your schedule card
or confusion during your first several
days in school. Specific instructions
for completing the form will be
explained during registration.

16 Thirdly, a_ the end of the registration
process, you will be expected to pay
your tuition and fees. See someone in
the Business Office if you have any
problems.

17 If you are a part-time student, your
tuition will be based on the number of
credit hours you register for.

18 If you are a full-time student, taking
12 or more hours, your tuition will be
a flat rate.

19 You should determine the amount of your
tuition in advance of registration.

20 To determine these costs, check with
the Student Services Office or your
academic advisor.

21 If your tuition is being paid by a
grant or scholarship, or some form of
assistance controlled by the Financial
Aid Office, then you have to get an
authorization form from them.

22 Registration may sound like a little
"red tape" because of the number of
steps involved. It is, however, a very
important part of becoming enrolled in
the classes you need to take. It is
set up to allow you to talk with some-
one at each step if you need help or
have a problem.

23 Also, working with a faculty advisor
can really help you in making sure that
you are taking the right courses and
meeting program requirements--

24 for example, if a course is filled, you
will need to work out a new schedule
with your advisor for approval. Your
advisor will help you with these
problems.

ERIC
Full Text Provided by ERIC

25 Once you have completed registration and your tuition has been paid, you cannot make a change in schedule until the first day of classes.

26 Once classes have started, you may find that you need to add or drop a course for various reasons.
27 The first thing you need to do to change any course is to stop by the Student Services Office and--you guessed it--pick up an add/drop form.

28 Again, work with your advisor in making the change, you need his or her approval as well as approval from the instructors.

29 Once you have approval, return the form to the Student Services Office. If you have only "swapped" one course for another course of the same credit hours, or just changed class sections or schedules--there is no change in your tuition payment.
30 However, if you drop a course and are
   no longer a full-time student, then
   you may qualify for a tuition refund--
   that is if you complete the process
   before the deadline for tuition refunds.

31 If you are not a full-time student and
   add more hours than you originally paid
   for--then, naturally, you need to pay
   the additional tuition.

32 If you withdraw from all classes you
   still use the same form and process.

33 It is very important that you follow
   this process for any changes--in addi-
   tion to getting a tuition refund that
   you might be eligible for.

34 If you are on financial aid and drop a
   course, you will need to check with the
   Financial Aid Office.

35 The add/drop process is tied to the college record system. To get on a class roster-to officially be in class and get credit--you have to register.

36 And just as important, if you don't follow this process to withdraw, you may end up with a failing grade for the course as part of your college recc :d.

37 If ycu drop or withdraw from classes through the first ten calendar days, it does not appear on your records.

38 You may officially withdraw from any class up to and including the date of mid-term, or eight weeks, with a W grade.

39 After mid-term, and through the last class day of the semester, you may officially request the W grade, which may be given at the discretion of your instructor.

40 One important thing to remember is that if you withdraw from school in good standing--

41 and choose to return at a later time, you will only need to complete a new application form.

42 A good source of information on the procedures we just discussed is your college catalog.

43 You will find that once you go through registration or add or drop a course-- it's not difficult.

44 And, there is always help available, but you need to take the responsibility to ask.

45 As a new student, you may find that
   starting a semester--new classes, new
   instructors, new classmates--creates
   a bit of excitement in you, and may
   even make you a little anxious or
   nervous.

46 But you will probably like your new
   experiences--

47 although there may be times when things
   don't always go as expected.

48 But don't get discouraged! Your
   enthusiasm will start to climb again
   when you prove to yourself you can
   do it.

49 If you do become discouraged--talk
   with your advisor or any of the
   Student Services personnel.

50 They are here to help you--let them!
