ABSTRACT

Historical data (since 1968-69) and current data on schools are presented and their significance and implications discussed. The data include national population, birth rate, and age trends; enrollment trends in public and private schools; and enrollment trends in private schools by religious affiliation. Catholic school statistics, gathered from 172 archdiocesan and diocesan offices, include enrollment trends by level, region, type of school, and ethnic composition; pupil teacher ratios; staff employed; and percentages of lay/religious teachers. Highlights include the following findings: (1) the number of elementary school-age children will continue to increase, but that of the secondary school-age pupils will not stop declining until 1991-92; (2) private education represents a higher percentage of elementary and secondary enrollment in the 1980s than it did in the 1970s; (3) the number of prekindergarten and kindergarten pupils has increased dramatically over the past 5 years (215 percent); (4) the percentage of non-Catholics in Catholic schools was 11 percent in 1987-88; and (5) the percentage of minority students in Catholic schools has increased from 11 percent in 1970-71 to 22 percent in 1987-88. 	Summary Report of Basic School Statistics for Schools, Enrollment and Teachers Sorted by Region, State and Diocese.....	19

PREFACE

Every year since the 1969-1970 school year, the National Catholic Educational Association (NCEA) has published a statistical report on Catholic Elementary and Secondary Schools in the United States. Extensive data on these schools and other private schools did not exist prior to that time. This data was needed to understand this significant educational sector, to discuss potential forms of federal and state aid, to inform the discussion occurring on other educational policy issues, and to encourage improved local management. With the assistance of the Carnegie Corporation of New York and the United States Office of Education, a data base on Catholic schools was established and remains available in the annual publications of the NCEA through 1974-1975.

Beginning with 1975, the NCEA and the Curriculum Information Center, Incorporated, published a report and directory of Catholic Schools. This publication continues the data base and is now produced in cooperation with Fisher Publishing Company of Englewood, Colorado, and Market Data Retrieval of Westport, Connecticut.

Readers will find this year's Data Bank publication contains the core school, enrollment, and staffing data of the NCEA historical file. In addition, a special feature of this report is an analysis of Catholic school enrollment by grade. As in the past, where information is available, comparisons are made with other private schools as well as the public sector. Please note that the figures for past years are updated to reflect the most recent data.

Information from this report is gathered from the 172 archdiocesan and diocesan offices. Sometimes assistance is provided by state Catholic conferences. To these administrators and their staffs, a well deserved word of appreciation is offered for their fine cooperation resulting in a 100% response rate.

Gratitude must also be expressed to Mary Mahar of Fisher Publishing Company, the staff of Market Data Retrieval, and Janice Murray of the NCEA Staff for their assistance. A special word of thanks must also go to the Reverend Frank Bredeweg, C.S.B., for his analysis of the data.

Interested parties who want to further analyze Catholic elementary and secondary data should write to the NCEA Publications Office for information on other research publications.

NCEA Data Bank
Rhoda Goldstein

National Catholic Educational Association

February 1988

HIGHLIGHTS

- ...Catholic schools have been part of American education since the Colonial days...they numbered about 5,000 elementary and secondary schools in 1900, and grew to more than 13,000 by 1968,
- ...population trends indicate that elementary school-age pupils will continue to increase, but that secondary school-age pupils will not stop declining until 1991-92,
- ...private education represents a higher percentage of total elementary and secondary enrollment in the 1980's than it did in the 1970's...about 12.6% in 1983-84,
- ...in 1987-88, there are 7,601 Catholic elementary schools and 1,391 secondary schools in the U.S., compared to 7,693 and 1,409 in 1986-87,
- ...in 1987-88, enrollment in Catholic elementary and secondary schools was approximately 2,623,000, compared to 2,726,000 in 1986-87, a difference of 3.8%,
- ...the percentage of non-Catholics in Catholic schools was 11.2% in 1987-88,
- ...the percentages of enrollment by grade level reflect today's population trends in both elementary and secondary schools,
- ...the number of pre-kindergarten and kindergarten pupils has increased dramatically over the past five years, (215%),
- ...the numbers and percentages of minority students in Catholic schools are greater in 1987-88 than they were in 1970-71, up 116,600 (25%),
- ...the 1987-88 full-time faculty in Catholic elementary and secondary schools was approximately 140,000,
- ...the 1987-88 national pupil/teacher ratio was 20.8/1 on the elementary level, and 14.6/1 on the secondary level.

UNITED STATES CATHOLIC
ELEMENTARY AND SECONDARY SCHOOLS
1987-88

Frank H. Bredeweg, C.S.B.

Educators are constantly faced with conserving what has been proven to be sound while dealing with the reality of change and the need to adjust. For that matter, so are we all. However, the institutional responsibility for integrating educational values with social, cultural, and religious values may be at an extremely challenging stage for both public and private schools.

Several themes and dynamics affecting education are commonly discussed today. We are warned of a rising tide of mediocrity, while being told that many young people will be "at risk" from one or several factors such as poverty, physical or mental handicaps, divorced parents, inability to speak the English language, or lack of academic basics and discipline. Educational excellence is the goal, but achieving it is complicated by demographics and population trends. The growth in the number of age 6-13 children will increase demands upon elementary schools, but the continuing declines in the 14-17 age group will reduce high school enrollment. Local and regional differences are great, so some areas will face overcrowding, while others will continue to lose enrollment.

Current demographic studies tell us that 1983 marked the first time in our history that there were more people over 65 than there were teenagers. Furthermore, this will be true for the lifetime of anyone reading this. The Baby Boom population bulge, the 70 million born between 1946 and 1964, reflects people in their 30's and early 40's during the 1980 decade. They will be followed by a much smaller group, now working its way through high school and college. Educators are expected to adjust to population bulges and busts for the next 20 years.

As for attitudes and objectives, other studies and polls indicate that there are significant differences in what the public wants and what teachers want. Teaching children to speak and write correctly is considered most important to the public, and lack of discipline the biggest problem. Teachers say that it is most important to develop good work habits, and that parents' lack of support and interest is the biggest problem. All things considered, it is another very demanding period in which to be an educator.

It seems safe to assume that every available educational resource will be needed. Although often overlooked because it educates only 12% of the elementary and secondary enrollment, private education has become increasingly significant during the past decade, and is eager to help. The private sector, whether church-related, as most schools are, or not church-related, remains a willing and valuable partner on the American educational scene.

Catholic Schools Have a Tradition

In an era that is rediscovering the values related to roots and traditions, it is meaningful to say that for many centuries Catholic schools have been educating the youth of Europe, the United States, and the entire Western World. In colonial America, the Catholic school was an integral feature of each French and Spanish settlement. With the adoption of the Constitution and the Bill of Rights, and the arrival of many Catholic immigrants at the start of the 19th Century, parochial schools were solidly established in the new nation.

By 1860, about 200 Catholic schools were in operation. By 1870, there were more than 1,300 and a controversy raged on whether or not the Church in the U.S. should undertake a vast school system. At the Third Plenary Council of Baltimore in 1884, the American bishops decreed that a parish school should be built and maintained near every church. While the move from principle to practice was never fully accomplished, by 1900 there were about 3,800 elementary and 1,200 secondary schools. The decision of 1884 had lasting effects, and the parish school became part of the fabric of parish and family life.

The Twentieth Century

The growth of Catholic elementary and secondary schools was constant and gradual from 1920 to 1950. During this period, the schools were staffed almost entirely by religious sisters, brothers, and priests. In the fifties, however, the teaching staff began to change. The percentage of religious staff went from about 90% in 1950, to 75% in 1960, and to less than 66% by 1965. In general, this was attributed to the decrease in the number of men and women entering religious communities, the increase in the number leaving these communities, and a shift in the commitment of some religious from schools to other ministries. Despite these personnel shifts, parishes, dioceses, and religious communities by 1968 operated 10,800 Catholic elementary schools and 2,400 secondary schools.

The decade from 1963 to 1973 saw many changes in American society. More and more families moved to the suburbs where few Catholic schools existed. Administrators consciously sought to reduce the size of classes. Tuition became a common practice. By 1973, 3,600,000 students were being educated in 10,296 Catholic schools. A substantial number of these students came from different ethnic groups and Catholic schools began educating non-Catholics.

Since the mid-seventies, there have been gradual reductions, but these seem to reflect geographic and demographic influences rather than anything within the Catholic community. During the past decade, supporters of Catholic elementary and secondary education have made a prodigious effort to keep their schools alive and well, and it seems to have succeeded. Indeed, these schools have become increasingly popular not only to their traditional proponents, but also to non-Catholics and in urban areas.

Before studying Catholic schools as a separate entity, it may be helpful to reflect upon a few statistical trends.

U.S. Population Trends

Current population trends are important to both public and private schools. The birth rate (births per one thousand persons) rose slightly during the past decade but remains far below former levels. Since the population is greater, the number of births has been increasing. The 16.8 birth rate produced about 4,000,000 births in 1985, the most since the 1960's.

<u>Reported</u>	<u>Population</u>	<u>Births</u>	<u>Birth Rate</u>
1955....	165,900,000	4,128,000	24.9
1960....	180,700,000	4,307,000	23.8
1965....	194,300,000	3,801,000	19.6
1970....	204,900,000	3,739,000	18.2
1975....	213,600,000	3,144,000	14.7
1979....	220,600,000	3,468,000	15.7
<u>Projected</u>			
1985....	232,900,000	4,008,000	16.8
1990....	243,500,000	3,868,000	15.6
1995....	252,700,000	3,676,000	14.3

These statistics from the U.S. Dept. of Commerce, Bureau of Census, indicate that after the high-point 4,008,000 births in 1985, a decline is projected, to 3,868,000 births in 1990 and to 3,676,000 in 1995, as the birthrate drops.

School-Age Population

There will be a corresponding future decline in the number of school-age children. The following data and projections are supplied by the National Center for Education Statistics (NCES):

<u>Reported</u>	<u>Ages of Students</u>			<u>Total Students</u>
	<u>5-6</u>	<u>7-13</u>	<u>14-17</u>	
1970....	7,703,000	28,969,000	15,924,000	52,596,000
1975....	7,014,000	26,905,000	17,128,000	51,047,000
1980....	6,293,000	24,787,000	16,139,000	47,219,000
<u>Projected</u>				
1985....	6,950,000	22,704,000	14,731,000	44,385,000
1986....	7,191,000	22,731,000	14,587,000	44,509,000
1987....	7,278,000	23,080,000	14,236,000	44,594,000
1988....	7,373,000	23,580,000	13,662,000	44,615,000
1989....	7,465,000	24,058,000	13,160,000	44,683,000
1990....	7,558,000	24,631,000	12,950,000	45,139,000
1991....	7,633,000	25,145,000	12,964,000	45,742,000
1992....	7,690,000	25,710,000	13,087,000	46,487,000

Source: Projection of Education Statistics to 1992-93, p. 35.

The number of elementary school-age children is increasing once again, beginning with the 1985-86 school year. On the secondary level, the number of school-age children (14-17) will not stop declining until the 1991-92 school year, when elementary trends have affected it.

Public and Private School Relationships

The role of private schools as "minority partner" in today's world of elementary and secondary education cannot be precisely defined, but statistics verify that it is a significant one. The following NCES figures compare public and private school K-12 enrollments:

<u>Reported</u>	<u>Total Enrollment</u>	<u>Public</u>		<u>Private</u>	
		<u>Pupils</u>	<u>%</u>	<u>Pupils</u>	<u>%</u>
1970....	51,272,000	45,909,000	89.5	5,363,000	10.5
1975....	49,791,000	44,791,000	90.0	5,000,000	10.0
1980....	45,949,000	40,987,000	89.2	4,962,000	10.8
<u>Projected</u>					
1985....	43,977,000	38,977,000	88.6	5,000,000	11.4
1986....	44,175,000	39,075,000	88.5	5,100,000	11.5
1987....	44,173,000	39,173,000	88.7	5,000,000	11.3
1988....	44,344,000	39,244,000	88.5	5,100,000	11.5
1989....	44,644,000	39,444,000	88.4	5,200,000	11.6
1990....	45,069,000	39,869,000	88.5	5,200,000	11.5
1991....	45,641,000	40,441,000	88.6	5,200,000	11.4
1992....	46,378,000	41,078,000	88.6	5,300,000	11.4

Source: Projections of Education Statistics to 1992-93, p.44.

According to December 1984 data released by NCES, the private sector reached 12.6% in 1983, exceeding the 11.4% projected for 1985. The National Center for Education Statistics does not gather private school data on a regular basis, and some national discrepancies are beginning to appear. In this report, we are using the same NCES sources we have used in the past.

Private Education by Religious Affiliation

In 1965-66, Catholic school enrollments constituted about 87% of the private elementary and secondary sector. By 1980-81, this figure had fallen to 63%. While Catholic schools were undergoing re-evaluation, other private schools were opening and enrollments were increasing. The following provides a perspective regarding private school enrollments:

	<u>Private School Enrollments</u>		
	<u>1965-66</u>	<u>1978-79</u>	<u>Increase</u>
Roman Catholic	5,481,300	3,269,800	(40%)
Lutheran	188,500	217,400	15%
7th Day Adventist	62,600	148,200	183%
Baptist	25,200	204,100	710%
Jewish	52,600	101,800	94%
Episcopal	48,600	76,500	57%
Methodist	5,600	11,200	100%
Presbyterian	4,800	12,800	167%
Friends	10,600	14,600	38%
Other Church-Related	83,700	281,200	241%
Total Church-Related	5,963,500	4,337,600	-
Not Church-Related	341,300	746,700	119%
Total Private Sector	6,304,800	5,084,300	-

Sources: Statistics of Nonpublic Elementary and Secondary Schools, 1965-66, NCES; The Condition of Education, NCES, 1981 Edition.

The 1978-79 data is the most recent universal information on the total private sector. More recent government reports do not include breakdowns by religious affiliation except for Catholic enrollment, which seems to be about 60% of all private enrollment in 1985-86.

Private Education

The National Center for Education Statistics defines private schools as privately controlled by a nonpublic entity and financed from sources other than public taxation or public grants. The question of state and federal aid to nonpublic elementary and secondary education continues to be debated, although the U.S. Supreme Court decisions of 1971 and 1973 denied several states the right to legislate limited financial support. Despite financial difficulties, private schools continue to serve an even greater educational sector.

"Private education appears to represent an increasing share of the American educational effort at the elementary levels," observed Secretary of Education T. H. Bell, when the results of a study were released in December of 1984. "Private school enrollment rose steadily over a recent three-year period while public school enrollment declined," the report said.

According to the survey, Statistics for 1983 showed a dramatic upswing in both the number of private schools and their enrollment. The survey was conducted by the National Center for Education Statistics and disclosed that 5.7 million students (12.6%) out of 45.2 million students in all elementary and secondary schools in the country were attending private schools in the Fall of 1983. The number of schools has also increased sharply. In 1960, there were 24,500 private schools (22.2%) of the total 110,400 elementary and secondary schools in the United States. In 1983, there were 27,700 private schools of the total 112,700 elementary and secondary schools (24.6%), or nearly one out of every four schools.

Private Schools as Partners in Education

In 1982, the American Enterprise Institute for Public Policy Research, in Washington, D.C., published Meeting Human Needs: Toward a New Public Policy. In the section on education, "Private Meets Public: An Examination of Contemporary Education," the authors state:

The growth of private schooling in the face of public school decline is a challenge of such consequence that policy analysts, policy makers, and public school educators cannot afford to ignore it.

As enrollment data testifies, an increasing proportion of American parents supports private education.

Those who study the relationships between public and private education should keep two principles in mind. First, neither public nor private schools constitute homogeneous groups. Schools and school systems differ greatly within each sector. Problems will resolve themselves differently. Developments in one community may not parallel developments in another. Secondly, private schools are here to stay. They are part of the American Educational tradition, as strong as ever, and will be part of the future to an extent not yet determined. It is the hope of private school educators that their role in education is understood, appreciated and supported.

Number of Schools

In 1987-88, there were 7,601 elementary and 1,391 secondary Catholic schools in this country. School openings and closings for the last two years have been as follows:

	New Schools	Closings, Mergers	Net Decrease
<u>1986-87</u>			
Elementary	20	117	97
Secondary	4	25	21
<u>1987-88</u>			
Elementary	16	108	92
Secondary	7	25	18

In general, it is the smaller schools that have difficulties. Over 80% of the elementary schools closed or merged in 1987-88 had less than 200 pupils. All but one of the secondary schools had less than 150 pupils.

Catholic schools of the 1980's are different in some respects from those of past decades. In regard to management, administrative reviews of diocesan school systems have long been completed, and budget procedures are much more sophisticated than former times. The movement of people from city to suburbs has all but ended, a significant factor since Catholic schools were built mainly in the cities. Most important of all, Catholic parents and students continue to enthusiastically support Catholic schools. Proponents of Catholic education have borne higher tuitions and intensive fundraising efforts to retain schools.

Regional Changes

NCEA statistically divides the nation into the following six geographical regions:

New England-	Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont
Midwest-	Delaware, District of Columbia, Maryland, New Jersey, New York, Pennsylvania
Great Lakes- Plains-	Illinois, Indiana, Michigan, Ohio, Wisconsin Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota
Southeast-	Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, West Virginia
West/Far West-	Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington, Wyoming.

Table No. 2 shows the percentage of schools in each region and what has happened in the past five years. The Midwest and Great Lakes regions comprise over 54% of the nation's Catholic schools, but they each have a slightly smaller percentage today than they did in 1983-84. The Plains and the West regions have a higher percentage today than they did in 1983-84.

Table No. 1
Elementary and Secondary Schools-by Region
1983-84 thru 1987-88

Types of Schools

Catholic schools can be classified according to ownership and administration. As Table 3 shows, most elementary schools are single-parish schools. Secondary schools are administered and financed in several ways: by a single parish, by several parishes, by the diocese, or by a particular religious community. The following compares the early Data Bank figures of 1970-71 with 1987-88:

	<u>Elementary</u>		<u>Secondary</u>	
	<u>1970-71</u>	<u>1987-88</u>	<u>1970-71</u>	<u>1987-88</u>
Single-Parish...	92.6%	86.6%	23.2%	14.4%
Inter-Parish....	3.5	7.6	11.6	11.7
Diocesan.....	0.3	2.0	26.3	34.4
Private.....	<u>3.6</u>	<u>3.8</u>	<u>38.9</u>	<u>39.5</u>
Total.....	<u>100.0%</u>	<u>100.0%</u>	<u>100.0%</u>	<u>100.0%</u>

Although interparochial elementary schools have increased from 3.5% in 1970-71 to 7.6% in 1987-88, the single parish elementary school is still the norm, representing 86.6% of the total in 1987-88.

As for secondary schools, single-parish schools are a smaller percentage today (14.4%). Diocesan high schools comprise 34.4% of the total, but private high schools sponsored by religious communities continue to represent the largest number (549) and share (39.5%).

Location of Schools

Table 4 shows where Catholic schools are located. The following provides an overview of some of the percentage changes since 1970-71.

	<u>Elementary</u>		<u>Secondary</u>	
	<u>1970-71</u>	<u>1987-88</u>	<u>1970-71</u>	<u>1987-88</u>
Urban.....	46.3%	44.4%	54.2%	51.7%
Suburban...	24.4	30.9	25.5	31.1
Rural.....	<u>29.3</u>	<u>24.7</u>	<u>20.3</u>	<u>17.2</u>
Total....	<u>100.0%</u>	<u>100.0%</u>	<u>100.0%</u>	<u>100.0%</u>

The percentage of urban schools has decreased for elementary and secondary schools. The share of suburban schools has increased significantly. The percentage of rural schools has changed significantly on both the elementary and secondary levels. Rural schools face problems which do not lend themselves to solutions available to more populated areas, e.g., consolidations.

Enrollment By Grade Level

Catholic schools reflect a solidly distributed enrollment, but one affected by current population trends. Table 5 compares 1987-88 with 1982-83, and indicates that enrollments and percentages by grade level have varied greatly during the past five years. Kindergarten enrollment has actually increased, and grades 1-4 percentages compare favorably with 1982-83, but grades 5-8 pupils and percentages have fallen off significantly. Lower grade 9-10 percentages indicate that the population fall off has penetrated these levels.

Pre-school enrollments have increased dramatically during the past five years:

	<u>1982-83</u>	<u>1987-88</u>
Pre-Kindergarten	31,381	67,637
Kindergarten	174,548	199,359

Pre-Kindergarten enrollment has more than doubled since 1982-83. Kindergarten enrollment has increased about 25,000 pupils, or 14%.

Student Enrollment

In 1987-88, Catholic K-12 enrollment was 2,623,000. Enrollments of the past five years are shown by region in Table No. 6. The following outline of selected Fall enrollments provides a brief history of Catholic elementary and secondary enrollments since 1940:

	<u>Elementary</u>	<u>Secondary</u>	<u>Total</u>
1940	2,035,000	361,000	2,396,000
1950	2,561,000	506,000	3,067,000
1960	4,373,000	880,000	5,253,000
1964	4,534,000	1,067,000	5,601,000
1970	3,355,000	1,008,000	4,363,000
1975	2,525,000	890,000	3,415,000
1980	2,269,000	837,000	3,106,000
1985	2,061,000	760,000	2,821,000
1986	1,996,000	728,000	2,726,000
1987	1,942,000	681,000	2,623,000

Catholic schools achieved their highest enrollment in the 1964-65 academic year. Compared to 1986-87, 1987-88 elementary enrollments have decreased 56,000 pupils (2.8%), secondary 47,000 pupils (6.5%), and combined enrollments 103,000 pupils (3.8%).

The enrollment decreases of the past few years are no doubt related to population trends, but it is difficult to determine the extent. As indicated earlier, the elementary school-age population (7-13) began to increase in 1985-86, but only the early grades have been affected thus far. School-age populations on the secondary level (14-17) are not expected to increase until 1991. Catholic high schools, like their public school counterparts, are facing a difficult enrollment period.

Enrollment Sizes

In regard to schools by enrollment size, Market Data Retrieval provides the following breakdowns:

Enrollment	<u>Elementary</u>		<u>Secondary</u>	
	<u>1975-76</u>	<u>1986-87</u>	<u>1975-76</u>	<u>1986-87</u>
Under 300	4,947	5,462	-	-
300-500	2,074	1,631	-	-
Over 500	1,308	600	-	-
Under 500	-	-	939	819
500-1000	-	-	525	433
Over 1000	-	-	183	157
Total	<u>8,329</u>	<u>7,693</u>	<u>1,647</u>	<u>1,409</u>

The number of elementary schools over 300 pupils has decreased greatly.

Catholicity

The percentage of non-Catholics has increased significantly since 1969-70, the first year in which this data was gathered:

	<u>Catholic</u>	<u>Non-Catholic</u>
1969-70	97.3%	2.7%
1983-84	88.9%	11.1%
1987-88	88.8%	11.2%

The percentage of non-Catholics is a little higher on the secondary level (13%), than it is on the elementary level (10.6%).

Enrollment in Key States

As Table 8 shows, ten states account for over two-thirds of Catholic school enrollment. New York, Pennsylvania, California, Illinois and Ohio (the top five) comprise 47.6% of the enrollment. In many ways, this is merely a reflection of national statistics, since these five states plus Texas constitute the six most populous states, although in different order. These ten states generally dictate the national trends in Catholic education.

Each of the top ten decreased from 1986-87, but in varying degrees. The following states exceeded the national average (3.8%):

	<u>Decrease</u>	<u>%</u>
Massachusetts	7,400	7.6
Michigan	6,200	5.5
Wisconsin	5,000	5.5
New York	15,200	4.5

The following states decreased less than the national average:

	<u>Decrease</u>	<u>%</u>
California	3,700	1.5
Pennsylvania	7,700	2.9

Illinois, Ohio, New Jersey, and Louisiana reflected the national average.

Enrollment in Key Dioceses

Catholic school enrollment is also concentrated in certain dioceses. Dioceses are larger than the metropolitan area providing the name, but most of the enrollment in these twenty actually does come from the major city and immediate suburbs of that area. The twenty largest dioceses serve 50% of the total enrollment in Catholic elementary and secondary schools. They too reflect and determine the national trends. In 1987-88, the 53,900 decrease in these dioceses was 52% of the national 103,000 decrease. It is extremely important to point out that about one-half of all Catholic school pupils are located in twenty metropolitan areas pivotal to the American culture. These dioceses have been entwined with the social, economic, and cultural developments of large urban areas since the turn of the century, and will continue to be a significant influence as current changes take place.

Boston (5,700), Chicago (5,600) and Cleveland (5,100) lost the most pupils. The largest percentage loss was Boston (8.8%), the lowest in Los Angeles (only 1,600 pupils) 1.5%, and St. Louis (only 1,000) 1.6%. The other dioceses fluctuated widely, both above and below the national average (3.8%). The twenty averaged a 3.9% loss. In 1981-82, six dioceses reported enrollment increases. Since 1983-84, with very few exceptions, major states and dioceses have reported at least some reduction in enrollment.

Ethnic Minorities

The role and contribution of Catholic schools in ethnic minority education has been and remains extremely important on the elementary and secondary school level. Most Catholic schools were built in the major cities, and the large dioceses have made an outstanding effort to keep urban schools open. The rural schools, not the urban, have closed at the faster rate.

Efforts by Catholic schools to help minority education have been complicated by the explosion of many factors within the Catholic school system, i.e., the large declines in the number of religious community members, inflation, the increase in lay teacher salaries, the movement of so many people to the suburbs in the 1960's. Through it all, however, statistics indicate that Catholic schools remain integrally involved with minority education and with urban problems in this country.

Minority Enrollment Trends

As Tables 10 and 11 show, the percentage of ethnic minority students in Catholic elementary and secondary schools combined has increased from 10.8% in 1970-71 to 22.4% in 1987-88. The following outlines these increases:

	<u>Minority Enrollments</u>		
	<u>1970-71</u>	<u>1980-81</u>	<u>1987-88</u>
Hispanic....	216,500	256,000	256,300
Black.....	209,500	252,900	234,300
Asian.....	23,500	52,100	86,700
Indian.....	<u>20,400</u>	<u>9,700</u>	<u>9,200</u>
Total....	<u>469,900</u>	<u>570,700</u>	<u>586,500</u>

Hispanic and Black students together constitute 84% of the minority students in Catholic schools. The number of Asian American students has increased dramatically. The number of American Indian students has declined.

It is noteworthy that, despite the fact that total Catholic school enrollment had declined 1,740,000 pupils (40%) since 1970-71, the number of ethnic minority students has increased by 25%. Hispanic students in Catholic schools are about 97% Catholic. Black students are 64% non-Catholic.

Comparison of Elementary and Secondary Ethnic Enrollment

Of the 586,500 students from major ethnic minorities in 1987-88, about 450,800 were in elementary schools and 135,700 in high schools. The following compares 1980-81 and 1987-88:

	<u>Elementary</u>		<u>Secondary</u>	
	<u>1980-81</u>	<u>1987-88</u>	<u>1980-81</u>	<u>1987-88</u>
Hispanic....	199,300	197,500	56,700	58,800
Black.....	200,300	181,100	52,600	53,200
Asian.....	42,000	65,400	10,100	21,300
Indian.....	<u>7,300</u>	<u>6,800</u>	<u>2,400</u>	<u>2,400</u>
Total....	<u>448,900</u>	<u>450,800</u>	<u>121,800</u>	<u>135,700</u>

Catholic elementary schools have 74% of the Catholic school enrollment and 77% of the minority students.

Total Staff and Pupil/Teacher Ratios

In 1987-88, the total full-time teaching staff in Catholic elementary and secondary schools was 139,887 (Table 12). There are about 93,200 elementary and 46,700 secondary teachers. Despite the loss of enrollment, the professional staff continued to increase until 1985-86. The following provides an overview of national Catholic school pupil/ teacher ratios since the higher enrollment levels of a generation ago.

	<u>National Pupil/Teacher Ratio</u>	
	<u>Elementary</u>	<u>Secondary</u>
1968-69....	31.3	19.2
1978-79....	24.0	17.2
1987-88....	20.8	14.6

The pupil/teacher ratio in elementary schools has decreased from 31 students per full-time teacher in 1968-69 to about 21. The secondary school ratio was a respectable 19.2 in 1968-69, and has lowered to 14.6 in 1987-88. These lower ratios reflect in great part the efforts of Catholic schools to improve staff and class sizes.

Change From Religious to Lay Staff

We have described changes regarding the number of schools and the enrollment, but the most radical changes have probably been with professional staff and administration. As Table 14 shows, lay teachers continue to replace sisters, brothers, and priests. This shift from religious to lay staff actually began in the 1950's and was a pre-Vatican II phenomenon. Looking at the last twenty years or so, the percentage of lay staff changed from 45.4% in 1968-69 to 84.1% in 1987-88 on the elementary level, and from 41.3% to 79.5% on the secondary level. The dedicated and committed response of the lay staff to the challenges facing education in our schools, both elementary and secondary, is most encouraging for the future of Catholic Education.
