## ABSTRACT

A statistical overview of the educational system in Alberta (Canada) for 1989 is presented. The report includes data and analyses concerning demographics; family and social structure; economy and workforce; early childhood services enrollments and projections; public and separate school enrollments and projections; private school enrollments; special education enrollments; correspondence school registrations and distance education; French minority language education enrollments; second language education enrollments; school personnel; teacher demography and experience; teacher salaries; student to teacher ratio; provincial funding; local funding; school board expenditures; number of diploma examinations written; examination results by gender for grade 12; diplomas awarded by gender and age as well as type of school system; Rutherford Scholarships; student participation/completion rates; major activities of high school graduates; enrollment in postsecondary institutions; public and student satisfaction; and achievement test results for grades 3, 6, and 9. Sixteen data tables, 42 graphs, and 35 appendices are provided. The evaluation form used is included. (TJH)

## Highlights

### CONTEXT OF EDUCATION

- Alberta's population continues to increase but at a slower growth rate. The slower growth is due to declining birth rates - from an average of 2.4 children per woman 15 to 45 in 1971 to 1.9 in 1986, and is expected to decline to 1.75 by 2001.
- Alberta's population is aging. It is projected that the 45 and over population in Alberta will increase from 25 per cent in 1986 to 34 per cent of the total population by 2001.
- The percentage of young persons aged 0 - 19 in the total Alberta population is decreasing. It is projected to decrease from 31.5 per cent in 1986 of the total provincial population to 23.1 per cent by 2016.
- More Albertans are living in urban centers than before. By 2001, 86.2 per cent of Alberta's population will reside in urban areas as compared to 79.4 per cent in 1986, and 73.5 per cent in 1971.
- Two-parent families continue to be the majority, 88.2 per cent in 1982. However, there has been a steady increase in the proportion of lone-parent families rising from 6 per cent in 1961 to 9 per cent in 1981, and 11.8 per cent by 1986. In addition, 82.3 per cent of lone-parent families are headed by women.
- There is an increase in the number of divorces in Alberta. As well, the number of marriages has increased, but has declined in recent years. An increasing proportion of marriages involve individuals who have been divorced.
- The number of out-of-wedlock births in Alberta is increasing. The out-of-wedlock births represented 18 per cent of all births in Alberta in 1986, as compared to 10 per cent in 1976. Teen pregnancies are 37 per cent higher than the national average.
- The number of offences committed by young persons aged 12-17 years, and charged under the Young Offenders Act is increasing. Most are charged with residential break-ins and thefts under \$1,000.
- The forecast for the Alberta economy is for 2 per cent growth. However, high interest rates will decrease economic activity and slow growth. Alberta's 1986 GDP (Gross Domestic Product) was at the lowest point in 15 years. In 1987, Alberta's economy recovered from the economic slowdown of 1986 and grew by 4.4 per cent.
- Alberta has the highest labour force participation rate in Canada. Alberta's women are the most active in the labour force in Canada rising from 57.1 per cent in 1980 to 63.9 per cent in 1988.

---

## Highlights

- As the economy recovers, even slowly, unemployment is expected to decline from the 8.1 per cent recorded in July 1988. However, youth will continue to have a 4 to 5 percentage points higher rate of unemployment.

### EDUCATIONAL INPUTS/RESOURCES

- ECS (Early Childhood Services) enrollment in Alberta's public and separate schools has increased steadily since 1973-74. In 1988-89, 33,773 children were enrolled, an increase of 5.2 per cent from 1987-88. This growth is partly due to greater participation in pre-school programs, and partly to an increase in the number of four- and five-year-olds in Alberta's population.
- In 1988-89, 430,725 students were enrolled in public and separate elementary /secondary schools, an increase of 1.6 per cent from 1987-88. Enrollment in Grades 1-9 increased, while Grades 10-12 enrollment declined slightly.
- Private school enrollment and the number of operating private schools have more than doubled since 1978-79. There were 134 private schools with 13,430 students in 1988-89, as compared to 60 schools and 5,508 students in 1978-79.
- The number of students registered in Alberta Correspondence School (ACS) courses has doubled since 1965-66, from 14,934 students in 1965-66 to 30,380 students in 1988-89. Over 90 per cent of the total ACS student registration was at the senior high level.
- French minority language education enrollment has increased since 1983-84. In 1988-89, 2,307 students were enrolled in French minority language programs, ECS to Grade 12. This represents an increase of 10.3 per cent from 1987-88, and 118.5 per cent from 1983-84.
- Participation in second language education has been rising steadily. In 1988-89, 26,038 students were enrolled in French Immersion Programs, an increase of 8.1 per cent over 1987-88. Between 1987-88 and 1988-89, enrollment in second language courses in Alberta's senior high schools increased by 5.1 per cent, and enrollment in English as a Second Language (ESL) programs increased by 26.9 per cent. Various bilingual programs have also shown enrollment increases.
- In 1988-89, 36,727 students were enrolled in special education programs in Alberta's public and separate schools, representing 9.7 per cent of the provincial school population in Grades 1-12 receiving special education programs and services.

---

## Highlights

- The number of teachers (certificated teaching as well as certificated non-teaching administrative staff) in Alberta peaked at 27,306 in 1985-86. Since that year, their numbers have remained relatively stable. In 1988-89, Alberta teachers totalled 27,232, 96 more than the previous year. Since 1980, average teacher salaries, adjusted for inflation, have risen 8.2 per cent.
- In 1988-89, there were 20.7 students per certificated classroom teacher, based on actual classroom teaching time.
- In 1988-89, the total provincial grants for elementary and secondary education were \$1.39 billion. This represents an estimated 12.3 per cent of the total budgetary expenditure for the province.
- In 1988-89, total school board operating expenditure was \$2.1 billion, an increase of 3.9 per cent over 1987-88. School board operating expenditure per full-time equivalent (FTE) student was \$4,773, an increase of 1.7 per cent over 1987-88.
- Over 80 per cent of the students achieved an acceptable level of performance in Grade 3 Social Studies, Grade 6 English language Arts, and Grade 9 Mathematics Achievement Tests.
- The provincial average marks for diploma subjects have increased for high school students in Alberta. In 1983-84, the provincial average of marks for diploma subjects ranged from 60.3 per cent to 65.7 per cent for males, and 62.3 per cent to 65.6 per cent for females. In 1987-88, the average marks for males ranged from 60.4 per cent to 68.1 per cent, and for females, from 63.7 per cent to 71.8 per cent.

### EDUCATIONAL OUTCOMES/RESULTS

- Between 1981-82 and 1988-89, the total number of students eligible for the Rutherford scholarship in all three grades (10, 11 and 12) increased by 67.3 per cent from 1,531 to 2,562. The total value of the number of awards increased from \$3.4 million to \$4.9 million, an increase of approximately 45 per cent.
- Between 1978-79 and 1988-89, the participation rate of 14 to 19 year olds in Alberta's public, separate and private school system increased from 56.3 per cent to 62.6 per cent. Participation rate is the total enrollment of 14 to 19 year olds as a proportion of all 14 to 19 year olds in the population.

---

## Highlights

- Well over half (57.9 per cent) of the recent Alberta high school graduates surveyed had continued their education full-time in a post-secondary institution. Another 4 per cent of the graduates entered post-secondary institutions on a part-time basis and 10.4 per cent had returned to high school.
- Among the graduates surveyed who continued their education full-time in post-secondary institutions, 44.9 per cent were attending universities, 39.3 per cent were in colleges (including technical institutions), 7.2 per cent were in other types of Alberta schools, and 8.6 per cent were attending post-secondary institutions outside the province.
- Over half of recent Alberta high school graduates surveyed rated the quality of their high school education as good and said it had provided them with useful skills and knowledge for making decisions about their immediate future.
- About 47 per cent of Albertans surveyed believed that Alberta high schools were doing a good job of providing a balanced program. One third believed only a fair or poor job was being done.
- Among the 49 per cent of the respondents who felt they could assess education in Alberta with available information, three-in-five (61 per cent) were satisfied with the quality of education in Alberta.
- Based on a list of characteristics of good schools, the respondents rated schools favourably on characteristics which directly related to the students, and somewhat less favourably on areas involving parents in school activities and plans for improvements.

---

## Foreword

*Education in Alberta: Facts and Figures 1989* is intended to present an overview of the educational system in Alberta. This publication contains tables, charts and narratives about data on student enrollments, school finance, teachers, and graduates.

The publication is organized into three parts:

1. Context of Education;
2. Educational Inputs/Resources; and
3. Educational Outcomes/Results.

*Context of Education* examines, among others, the demographic and social environments within which education takes place. Educational *inputs* include the human and fiscal resources available to the education system; and *outcomes* or *results* are the consequences of schooling on students, and include indicators such as student achievement and participation rates.

The organization of this year's information into these three parts reflects an attempt by Alberta Education to develop a meaningful framework for organizing information about education in the province. This is being

presented as a starting point for generating discussion and ideas about how best we should organize our information. For further information about the framework used to organize information, see Alberta Education's *Educational Quality Indicators: Framework for Action 1989*.

In this second edition of *Facts and Figures*, information is presented for the school year 1988-89. Reference to the 1987-88 school year and some historical data is made. Because the first (1988) edition of *Facts and Figures* presented much historical data, this second edition has fewer references to historical data. Instead, the appendix has been expanded to provide complete historical data (where available) for all the sections presented in this edition of *Facts and Figures*.

*Education in Alberta: Facts and Figures 1989* was prepared by the Planning and Policy Secretariat, under the supervision of Henry Codjoe and Rosanna Shih with research assistance provided by Pat Cox and Nancy Leung. Special thanks is extended to staff of the following Alberta Education Branches: Finance and Support Services, School Business

Administration, Language Services, Student Evaluation and Records, Teacher Certification, Information Services, Communications, Library Services, and the Alberta Correspondence School.

Also, thanks to the Alberta School Trustees' Association, the Alberta Teachers' Association, the Alberta Bureau of Statistics, and the Department of Advanced Education for their valuable assistance.

We encourage feedback on this publication. An "Evaluation Form" is provided at the back for you to submit your response and comments. Further information is available from the Planning and Policy Secretariat.

A summary of these statistics is also available in a pocket-sized folder, *Education in Alberta: Basic Statistics 1989*.

# 1. CONTEXT OF EDUCATION

---

## 1.1 Our Education System

In Alberta, responsibility for education is shared between the provincial government through the Department of Education, and local school boards. In 1988-89, there were 143 active school boards with 1,238 school trustees in the province.

In 1988-89, there were a total of 1,524 public and separate schools in the province, of which 23.9 per cent were in Counties (79,877 ECS to Grade 12 students), 21.1 per cent were in School Divisions (69,934 students), 36.6 per cent were in Public School Districts (218,590 students), and 16.5 per cent were in Roman Catholic School Districts (85,797 students). The remaining 1.8 per cent

were Consolidated Schools, Regional Schools, Roman Catholic Public School Districts, Protestant Separate School Districts and the Department of National Defense (10,300 students). As of September 1988-89, the total student enrollment (ECS to Grades 12) for all public and separate schools in the province was 464,498.

There were 134 private schools in Alberta in 1988-89 with total student enrollment (ECS to Grade 12) of 20,768.

Alberta Education also provides educational programs for Albertans whose educational needs

are not met through classroom instruction. The Alberta Correspondence School (ACS) delivers correspondence courses for Grades 1 to 12 in the Alberta curriculum, as well as preparatory courses designed for adult students.

Alberta Education assists school jurisdictions to offer adult basic education programs. Under the School Extension Program, school jurisdictions may offer adult upgrading courses at the grades 1-9 level and high school credit courses for adult students.

**Table 1.1**

Profile of Public and Separate Elementary-Secondary Education, 1988-89

Type of School Jurisdiction	No. of School Jurisdictions	Schools	FTE Classroom Staff <sup>1</sup>	FTE School Personnel <sup>2</sup>	School Enrollment

# 1. CONTEXT OF EDUCATION

---

## 1.2 Demographic Indicators

Though demographic trends are not subject to rapid and dramatic fluctuations, it is important to recognize those changes which are likely to have long-term implications for Alberta's schools. This section highlights a number of important demographic developments which are likely to affect education in the province.

### Population Growth

Over the past thirty years, Alberta's population grew by 1.26 million people, to reach 2.38 million in 1986. The provincial population is expected to grow to 3.28 million by 2016 (Series 5 - medium growth). Alberta's population growth has fluctuated from less than 1 per cent in the mid-sixties to a record of 4.5 per cent in 1981. From 1986 to 2016, population growth will average 1.1 per cent (medium series projection). The size and composition of Alberta's population are determined by fertility and mortality rates and patterns of net migration into the province.

### Fertility and Mortality Rates

The baby-boom generation (or individuals born from 1947 to 1966), was the result of record birth rates. Fertility rates have declined significantly since 1961. In recent years the rate has declined more slowly, but is projected to continue to decline. The baby-boom generation, during the next few years, will move beyond the peak childbearing

years. With relatively fewer women in their childbearing years, combined with low fertility levels, the number of births is projected to taper off. At the same time, the overall population will age. Since 1961, the median age in Alberta has increased by 4 years. The aging will increase the number of deaths in future years. Deaths per 1000 population are projected to rise from 5.7 in 1986 to about 7.0 in 2016 (medium series).

### Net Migration

Alberta's international and interprovincial migration have experienced dramatic fluctuations. Annual net migration into the province peaked in 1980-81 with 68,300. Migratory movements between provinces are influenced in both the short and long term by economic factors. In 1986, Alberta experienced a net loss of 39,000 people. It is projected that Alberta will experience a net migration inflow rather than outflow over the next twenty years.

### Age Distribution of Provincial Population

Alberta's population will increase, but the age distribution of the population will change considerably in the years to come. Most notable will be the shrinking proportion of those younger than age 45, a projected drop from 75% of the population in 1986 to only 58% by the year 2016 (medium series projection). The 0 to 19 age group,

which has the most significant implications for enrollments in kindergarten, elementary and secondary schools, is expected to decrease from 31.5 per cent in 1986 of the total provincial population to 23.1 per cent by 2016.

### Rural/Urban Population Distribution

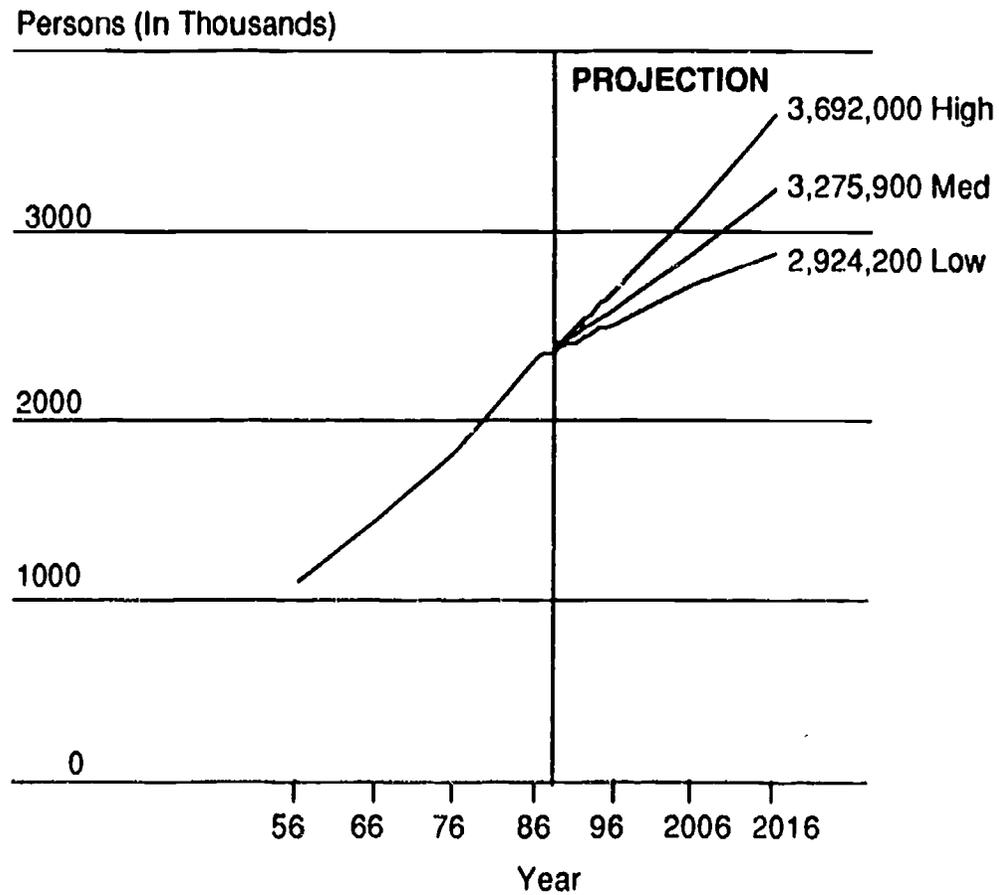

The transition of Alberta's population from rural to urban was substantially accomplished by 1980. In 1951, persons living in urban places of 1,000 or more people accounted for less than half of the provincial population. By 1980, however, it was estimated that about 77 per cent of Alberta's people lived in urban centres. By 2001, urban populations are projected to increase further to 86 per cent.

### Student Mobility

Of the 2,133,865 Albertans 5 years of age and over living in Alberta in June 1986:

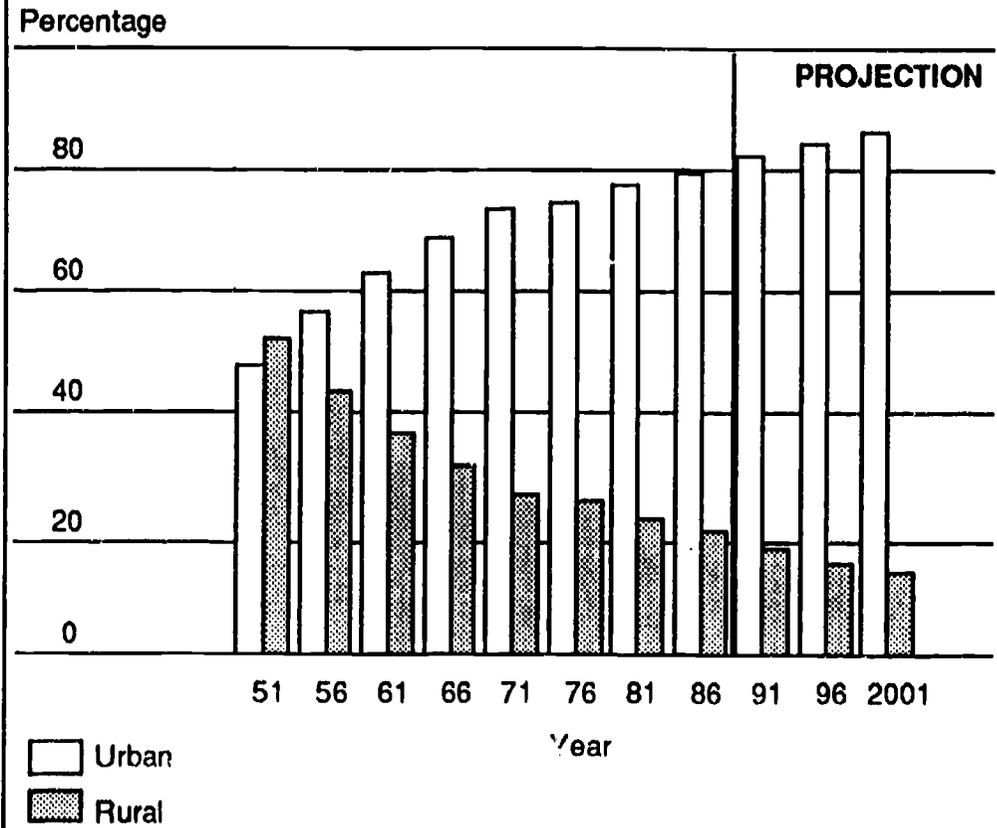

- 48.7 per cent did not move between 1981 and 1986,
- 27.6 per cent moved within the same area,
- 12.3 per cent moved from another part of Alberta,
- 8.3 per cent moved to Alberta from another province, and
- 2.6 per cent moved to Alberta from another country.

# 1. CONTEXT OF EDUCATION

---

## 1.3 Family and Social Structure

### **Families and Family Size**

Although there has been an increase in the number of Albertans in families, (husband-wife with no children at home, husband-wife with children at home, and lone parent with children at home), the number of Albertans not in families has also increased in recent years. Between 1941 and 1986, the number of Albertans in families grew by an average of 4.1 per cent annually, increasing from 687,724 to 1,962,755. During the same period, the number of Albertans not in families grew by an average of 6 per cent per year, increasing from 108,445 to 403,700.

The number of lone-parent families headed by females (82.3 per cent in 1986) has increased at a much faster rate than that of husband-wife families. Lone parent families increased from 5.6 per cent or 17,141 in 1961, to 11.8 per cent of all families, or 72,860 in 1986. Husband-wife families declined from 92.4 per cent, or 282,350, to 88.2 per cent, or 543,465 during the same period.

In 1941, 73 per cent of husband/wife and lone parent families in Alberta had children at home, but by 1986, the proportion of families with children

at home had fallen to 67.3 per cent. While the total number of families has increased, the proportion of families with children at home was at its lowest point in 1981.

These trends reflect a general decline in birth and fertility rates. From an average of 3.22 children per woman in 1951, the fertility rate, or the expected births per woman in Alberta, increased to 4.28 in 1956, but has since steadily declined to 1.9 births per woman in 1986. It is expected to decline to 1.75 children in 2001, and to 1.61 children by 2016.

### **Marriages and Divorces**

Since 1971, there has been a steady increase in the number of divorces in Alberta. The number of marriages has declined since 1981. In 1971, 3,656 of Alberta's 318,062 married couples divorced. By 1986, divorces had increased by 156.7 per cent to 9,386. During the same period, marriages rose from 15,614 in 1971, to 21,781 in 1981, and declined to 18,896 in 1986. An increasing proportion of marriages involve individuals who have been divorced.

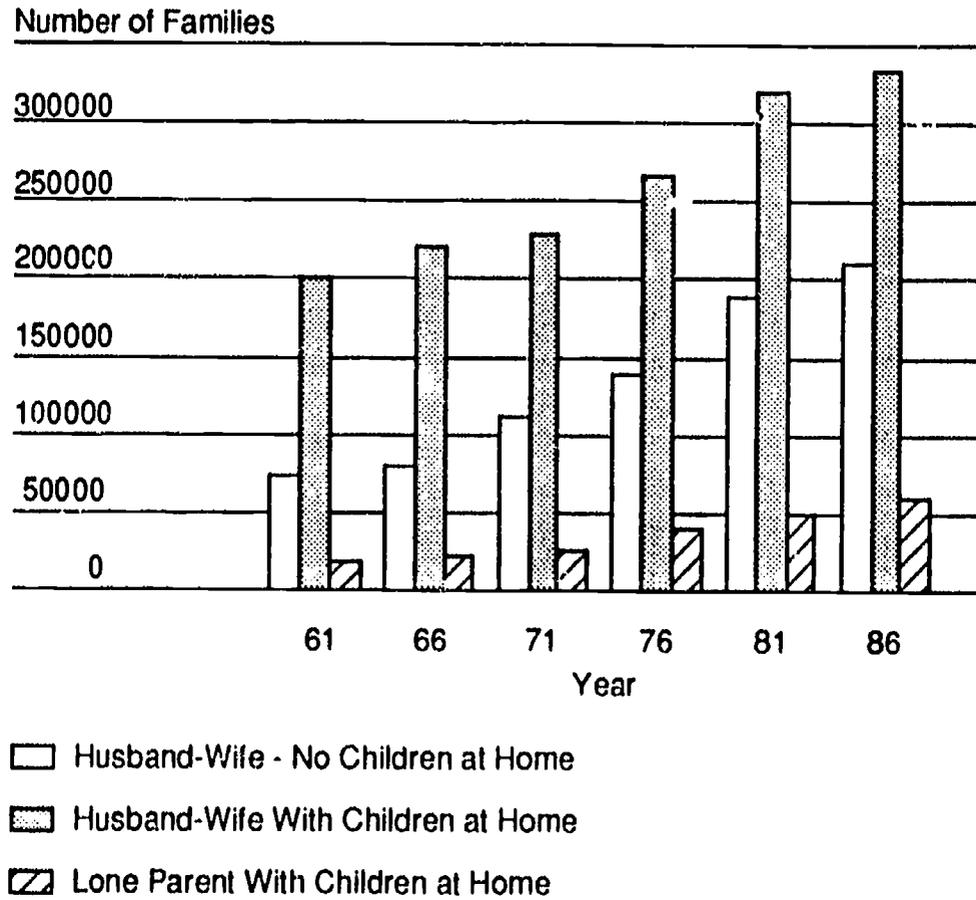

### **Out-of-Wedlock Births**

The number of births to unmarried women aged 10 and over increased from 3,398 in 1976 to 7,969 in 1986, an increase of 134 per cent. Out-of-wedlock births represented 18 per cent of all births in Alberta in 1986, as compared to 10 per cent in 1976. Births to unmarried females as a percentage of all births is highest among females aged 10 to 19 years.

### **Family Income**

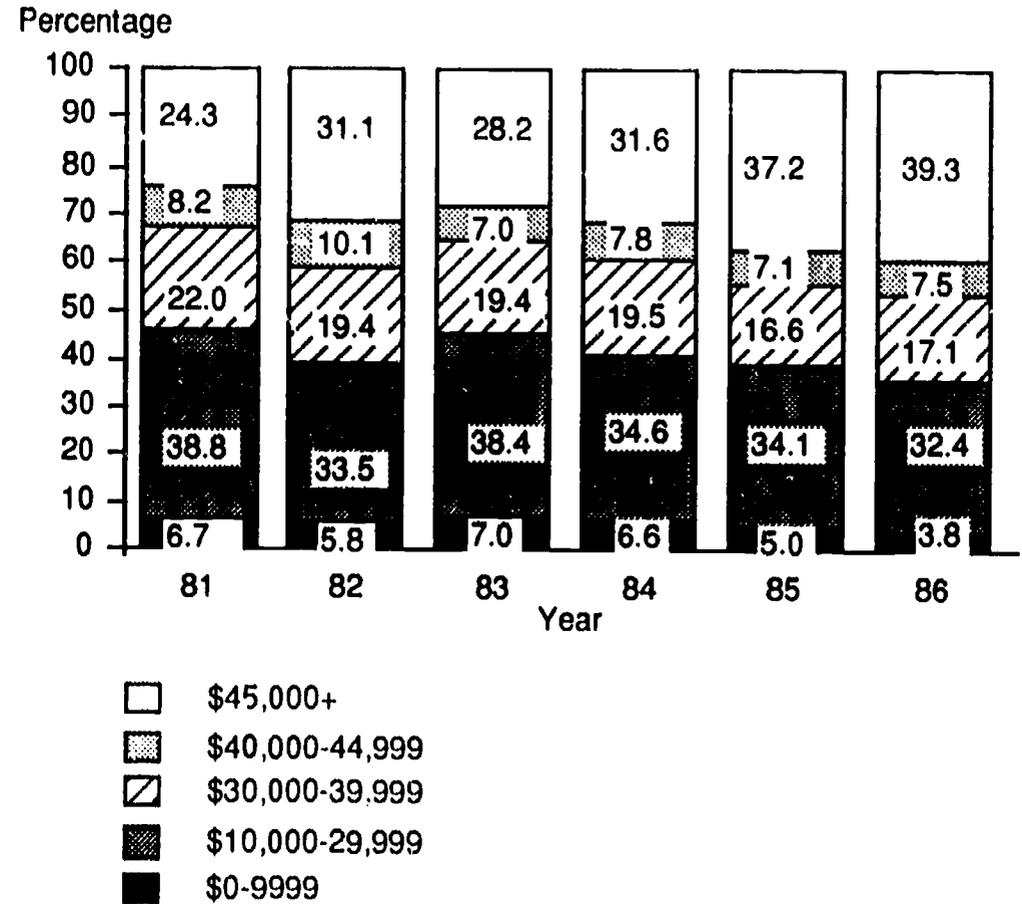

The percentage of Alberta families earning less than \$10,000 declined slightly from 6.7 per cent in 1981 to 3.8 per cent in 1986. During the same period, the proportion of Alberta families earning more than \$45,000 increased from 24.3 per cent to 39.3 per cent. While family incomes generally increased, the number of children from low income families increased as well. In 1981, the number of children under 16 years of age living in low income families was 69,670 or 11.7 per cent of all children. By 1986, the number of children in low income families increased to 93,640 or 15.6 per cent of all children.

---

## 1.4 Alberta's Youth

### Teen Sexuality

A December 1988 report on AIDS (Acquired Immune Deficiency Syndrome) and sexual attitudes of Canadian teens found that 31 per cent of boys and 21 per cent of girls reported having had sexual intercourse, at least once by Grade 9. By Grade 11, the total rose to 49 per cent for boys, and 46 per cent for girls. In 1985, Alberta Community and Occupational Health reported that one in six Alberta teens was sexually active between the ages of 10 and 14, and 40 per cent to 50 per cent of Alberta teens between 14 to 18 were likely to be sexually active.

### Teen Pregnancy

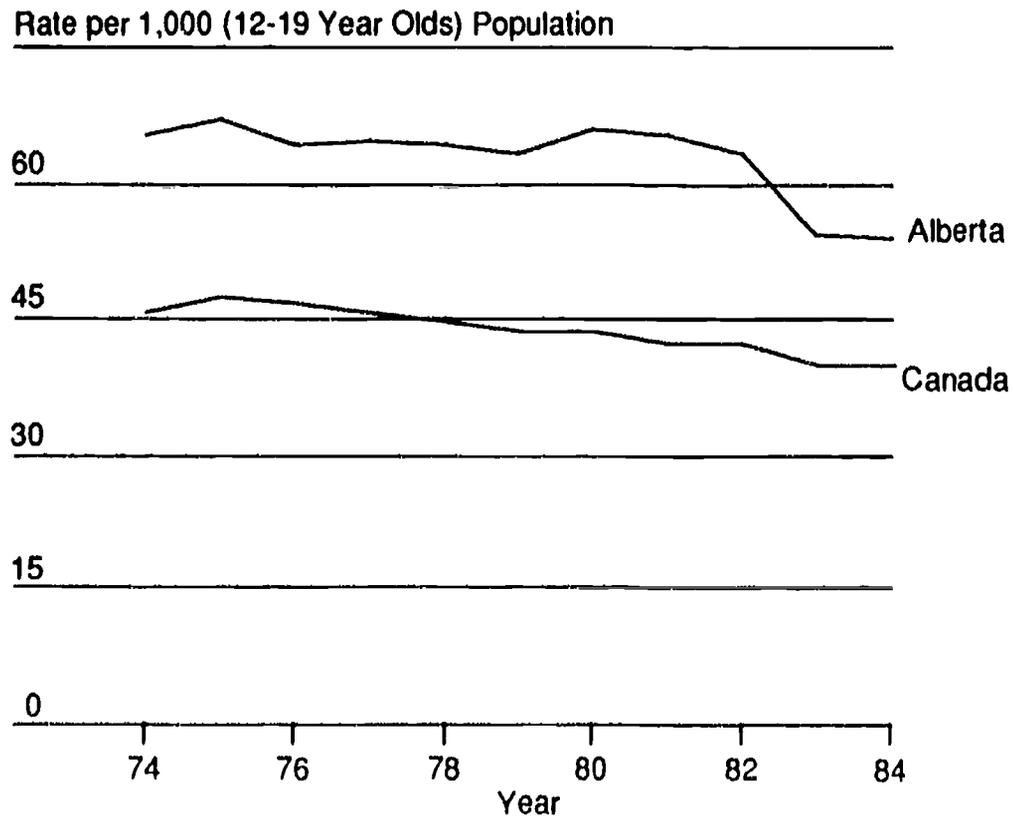

Alberta female teenagers are more likely to become pregnant than teens in most other Canadian provinces. An Alberta Community and Occupational Health study reports that between 1974 and 1984, the adolescent pregnancy rate (live births plus abortions) was significantly higher in Alberta than the rest of the country. Although from 1974 to 1984 the rate declined by 19.6 per cent in Alberta, and by 17.3 per cent across the country, the Alberta rate remained 36.8 per cent higher than the overall national rate.

### Suicides

Suicide rates pertaining to the school-age population (10 to 19 years) in Alberta are among the highest in Canada. Between 1960 and 1985, the provincial suicide rate rose from 9.2 to 12.6 per 100,000 total population aged ten years and over. The national rate rose from 7.6 to 12.9 during the same period. In 1960, the suicide rate per 100,000 population for young Albertans aged 15 to 19 years was 4.2. Males have generally higher suicide rate than females in both 10 to 14 and 15 to 19 age groups. In 1960 the suicide rate for Alberta males aged 15 to 19 years was 8.3 per 100,000 population, increasing to 22.9 in 1985. The suicide rate for males aged 10 to 14 decreased from 3.0 in 1961, to 2.3 in 1985.

# 1. CONTEXT OF EDUCATION

---

## 1.4 Alberta's Youth (cont'd)

### Young Offenders

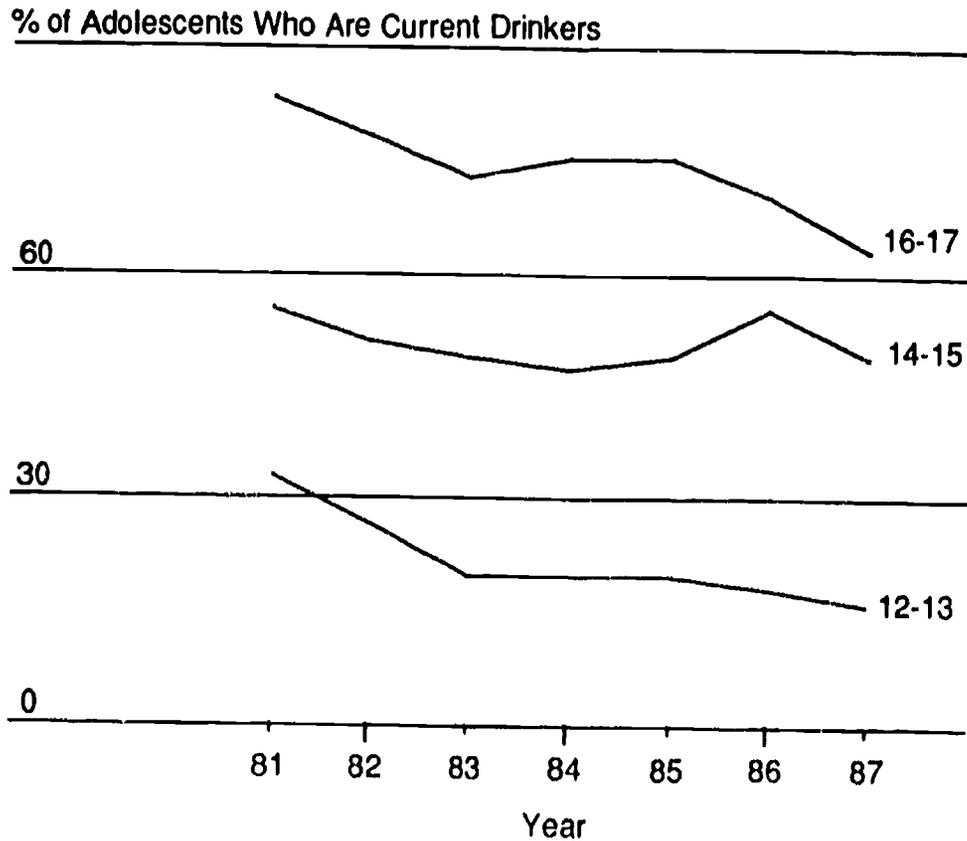

Between 1985-86 and 1988-89, the number of young persons charged with Federal Statute Offences increased from 8,247 to 9,612, an increase of 16.5 per cent. In 1988-89, 70 per cent of the young persons charged were male between the ages of 14 to 17. Most are charged with residential break-ins and theft under \$1,000. On April 1, 1985, the Young Offender Act raised the minimum age of a "young person" under the authority of the Act to 12 years from 7 years of age. The maximum age is 17 years.

### Substance Use

Alberta Alcoholism and Drug Abuse Commission (AADAC) Prevention Program, Benchmark Surveys of Alberta 12 to 17 year olds show that: (1) the proportion who drink alcohol has declined from 55 per cent in 1981 to 43 per cent in 1987; (2) the proportion who smoke daily has remained relatively stable from 19.9 per cent in 1981 to 19.6 per cent in 1987; (3) the proportion who use marijuana has declined significantly from 25.1 per cent in 1981 to 12.9 per cent in 1986.

# 1. CONTEXT OF EDUCATION

---

## 1.5 Economy and Workforce

The forecast for the Alberta economy is a slow economic growth, averaging about 2 per cent within the next five years. Continuing high interest rates, however, could slow growth further. The economy of Alberta has changed considerably during the past 30 years, with the shift from the agricultural sector toward the service sector.

### Gross Domestic Product

The Gross Domestic Product (GDP) is an indicator of overall economic performance. The growth in the Alberta GDP exceeded that of Canada up to 1982, when it started to lag behind. Since 1982, the growth in Alberta's GDP has been at its lowest in 15 years, and matches a related decline in the growth of the country's GDP. Improvement occurred in 1985 when the growth in Alberta's GDP closely matched that of Canada, but the decline in the price of oil in 1986 contributed to a 10.5 per cent drop in the Alberta figure. In 1987, Alberta's economy recovered from the economic slowdown of 1986 and grew by 4.4 per cent. The price of oil continues to be a major economic factor in Alberta's economy.

### Labour Force

Alberta has the highest labour force participation rate in Canada. Except for a decline in 1983 due to economic recession, the participation rate has

risen steadily, reaching 72.4 per cent in 1988, compared to 70.9 per cent in 1980. The increase in the total participation rate is explained by the large rise in the female participation rate, which rose from 57.1 per cent in 1980 to 63.9 per cent in 1988. In contrast, the male participation rate has fallen from 84.3 per cent in 1980 to 81.1 per cent in 1988. Rising female participation is largely due to the increase in the participation rate for married women: from 53.6 per cent in 1980, to 64.4 per cent in 1988. The rise in the participation rate reflects not only a return to the work force of women whose children have left home or are in school, but also the entry into the workforce of women with pre-school age children. For example, the participation rate of women with pre-school age children has risen from 42.7 per cent in 1980 to 59.4 per cent in 1987.

### Employment

Employment has been increasing by an annual average of nearly one per cent since 1981, reflecting the impact of the 1983 recession. In 1988, employment was up 3.5 per cent over the previous year. Almost all net employment growth has been in community, business and personal services, and wholesale and retail trade. A high proportion of employment growth has also occurred in managerial and professional occupations, with their share of

total employment rising from 23.9 per cent to 29.0 per cent between 1981 and 1986. Part-time employment has also grown rapidly. Between 1975 and 1988, part-time employment increased from 12.3 per cent to 15.5 per cent of total employment. Women account for over 70 per cent of all part-time workers in Alberta.

### Unemployment

During the economic boom times of the late 1970s and early 1980s, the unemployment rate ranged from a low of 3.8 per cent in 1981, to a high of 4.7 per cent in 1978. With the recession in 1981, the unemployment rate started to rise, reaching a record high of 11.1 per cent in 1984. As the economy recovered, unemployment declined to 8.0 per cent in 1988. Youth unemployment rates significantly exceed those of older age groups. In 1988, the unemployment rate for Albertans aged 15 to 19 years was 13.6 per cent, compared to 11.7 per cent for 20 to 24 year olds.

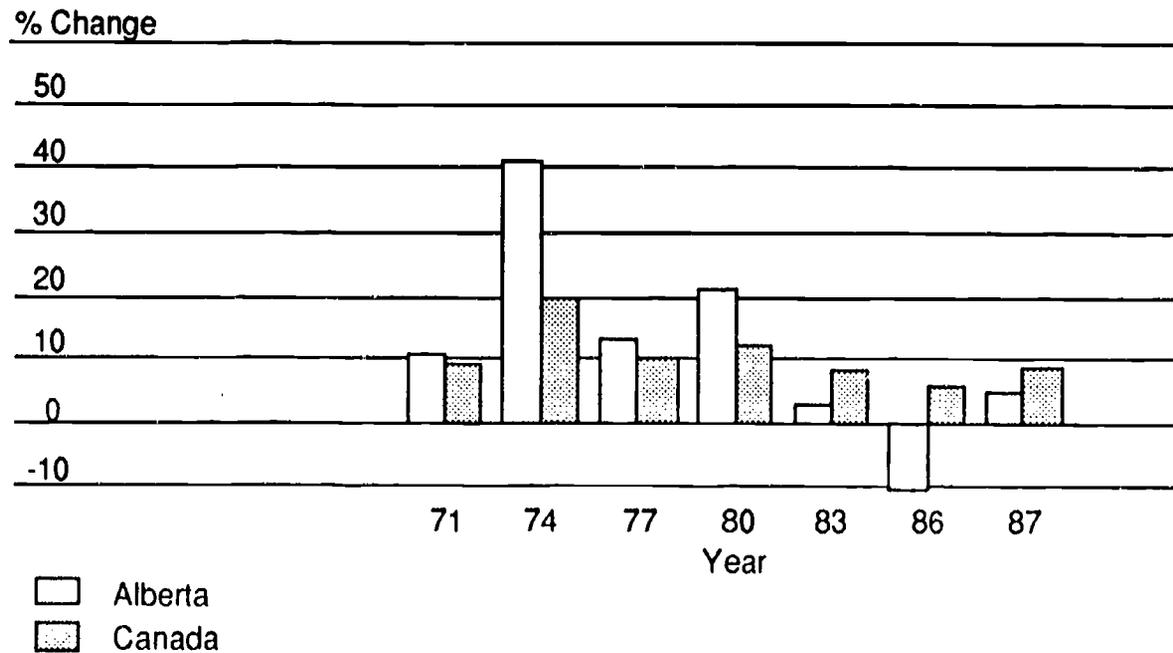

Detailed demographic, family, and economic information can be obtained from the two Alberta Education publications available at the Planning and Policy Secretariat, *Education in Alberta: Some Major Societal Trends*, and *Education in Alberta: A Compendium of Education and Social Statistics*.

## 2. EDUCATIONAL INPUTS/RESOURCES

---

### 2.1 Early Childhood Services Enrollments and Projections

- *In 1988-89, 7.2 per cent of Alberta's total enrollment in public and separate schools was in ECS.*
- *Public and separate ECS enrollments increased 5.2 per cent from 32,090 in 1987-88 to 33,773 in 1988-89.*

In 1988-89, Early Childhood Services (ECS) enrollment in the public and separate school systems was 33,773 students. This was an increase of 5.2 per cent from 1987-88. ECS enrollment in Alberta public and separate schools has increased steadily since 1973-74.

ECS enrollment in privately operated programs was 7,338 in 1988-89, a decrease of 6.7 per cent from the previous year. ECS enrollment in Alberta private schools has declined since 1981-82.

It should be noted that government sponsorship of

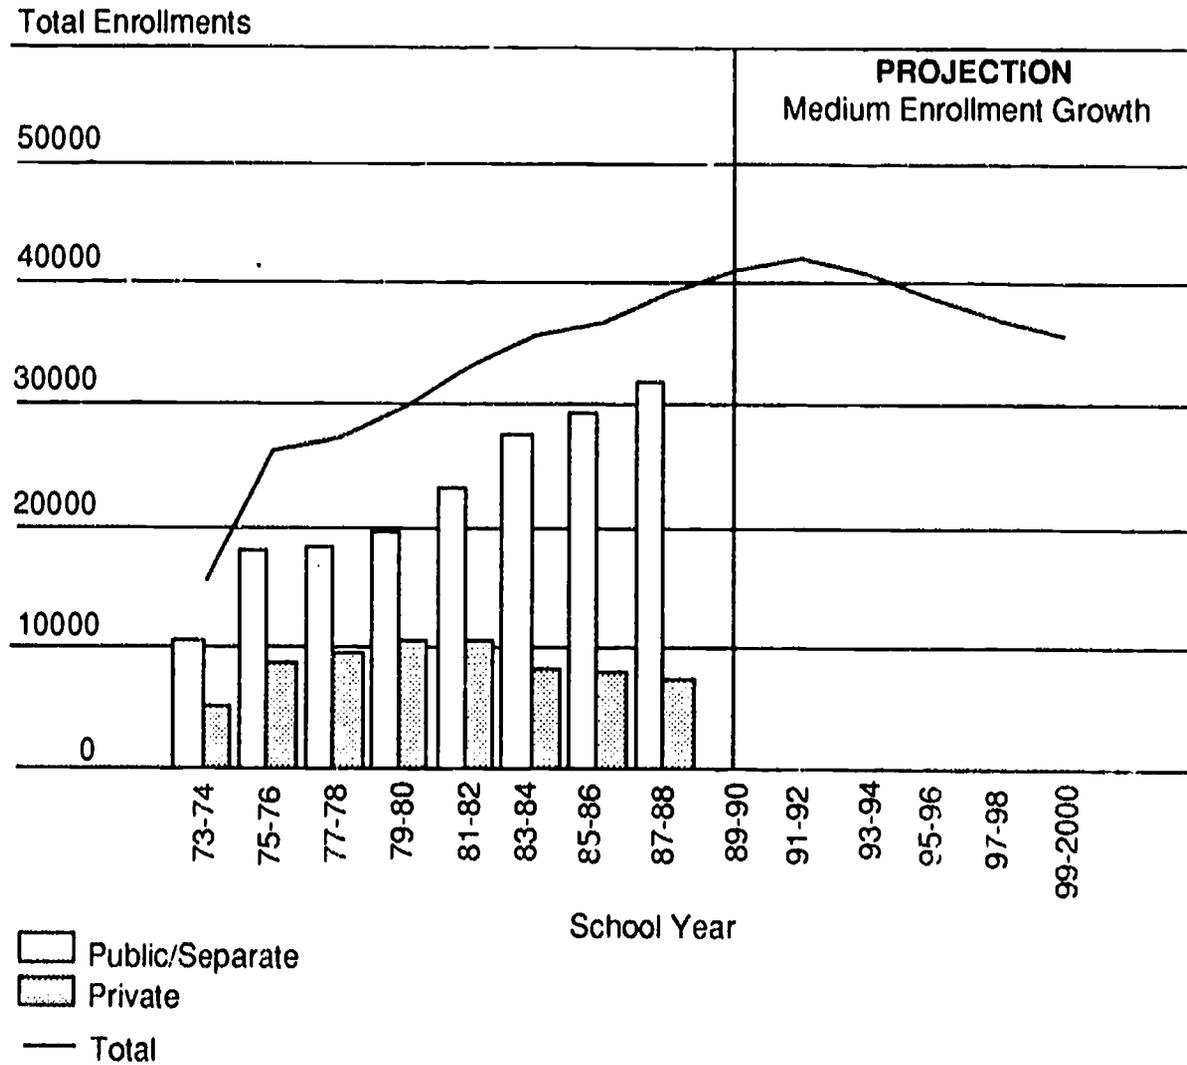

the ECS programs began in 1972 and, as a result, some of the spectacular ECS growth in Alberta's public and separate schools can be attributed to the increased availability of this program. From 1973-74 to 1981-82, ECS enrollment increased from 10,661 to 23,244, or 118.0 per cent, despite the fact that the population of 5 year olds increased by only 17.7 per cent over the same period.

Concurrent with the rise in ECS enrollment is the rise in the labour force of women. The labour force participation rate of women increased from 44.4 per cent in 1971 to 58.2 per cent in 1981. Mothers

working outside the home may have contributed to the rising level of ECS enrollment and may continue to affect this level in the future.

Total ECS enrollments (public/separate/private) in the province will increase to 42,613 in 1991-92 from the 1988-89 level of 41,111, but decline thereafter. A drop in enrollment is expected primarily because of the continuing decrease in fertility among women of prime childbearing age (20 to 29 years). Total fertility rates have dropped from 2.4 births per woman aged 15 to 49 in 1971, to 1.9 in 1986. This rate will drop to 1.6 by 2016.

## 2. EDUCATIONAL INPUTS/RESOURCES

---

### 2.2 Grades 1 to 12 Public and Separate School Enrollments and Projections

- *Total public and separate elementary/secondary school enrollment increased in 1988-89 and will continue rising through 2000-2001.*
- *Enrollment in elementary schools began increasing in 1985-86 and will keep rising until 1996-97, after which it will decline.*
- *The number of junior high school students is expected to continue rising through 2000-2001.*
- *The number of senior high school students is expected to fall until 1991-92, and then begin to increase.*

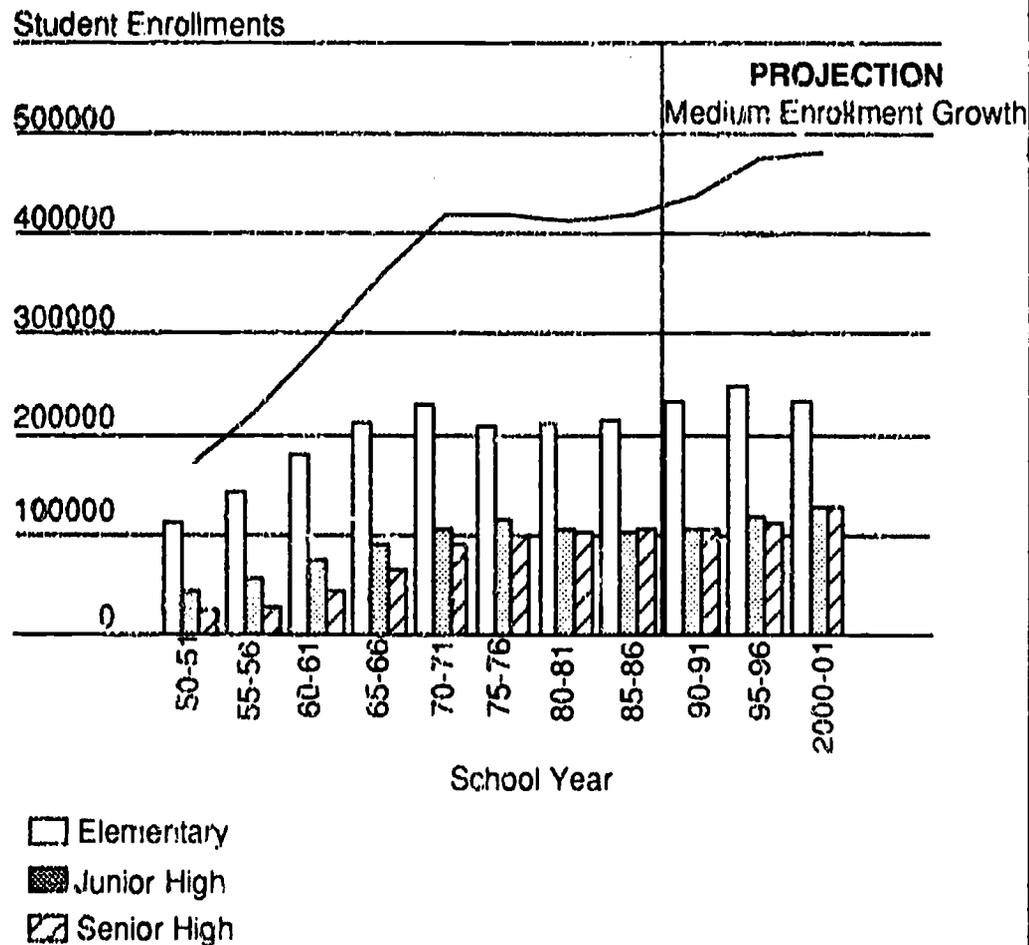

Total enrollment in all public and separate elementary/secondary schools in Alberta in 1988-89 was 430,725, up 1.6 per cent from 1987-88. Fifty-two per cent of Alberta's school enrollment was at the elementary level, 23.7 per cent at the junior high level, and 24.5 per cent at the senior high level. In Alberta, the four largest school districts are: Edmonton Public School District, Edmonton Separate School District, Calgary Public School District, and Calgary Separate School District. These four districts combined had 46.2 per cent of the total provincial enrollment in elementary/secondary schools in 1988-89.

Enrollment in Grades 1 to 6 increased from 217,571 in 1987-88, to 223,221 or 2.6 per cent in 1988-89.

Enrollment in Grades 7 to 9 increased from 100,700 in 1987-88, to 102,107 or 1.4 per cent in 1988-89, while enrollment in Grades 10 to 12 decreased slightly from 105,629 in 1987-88, to 105,397 in 1988-89. Enrollment in Grade 9 and higher has decreased since 1976-77, corresponding to the reduction in the 14 to 17 year-old population. However, despite the diminishing size of the age group, the decline in enrollment has slowed. This is a result of more students staying in school longer to complete secondary school. In 1988-89, of total enrollment in elementary/secondary schools, 7.29 per cent were 16 years old, 5.7 per cent were 17 years old, and 2.0 per cent were 18 years old.

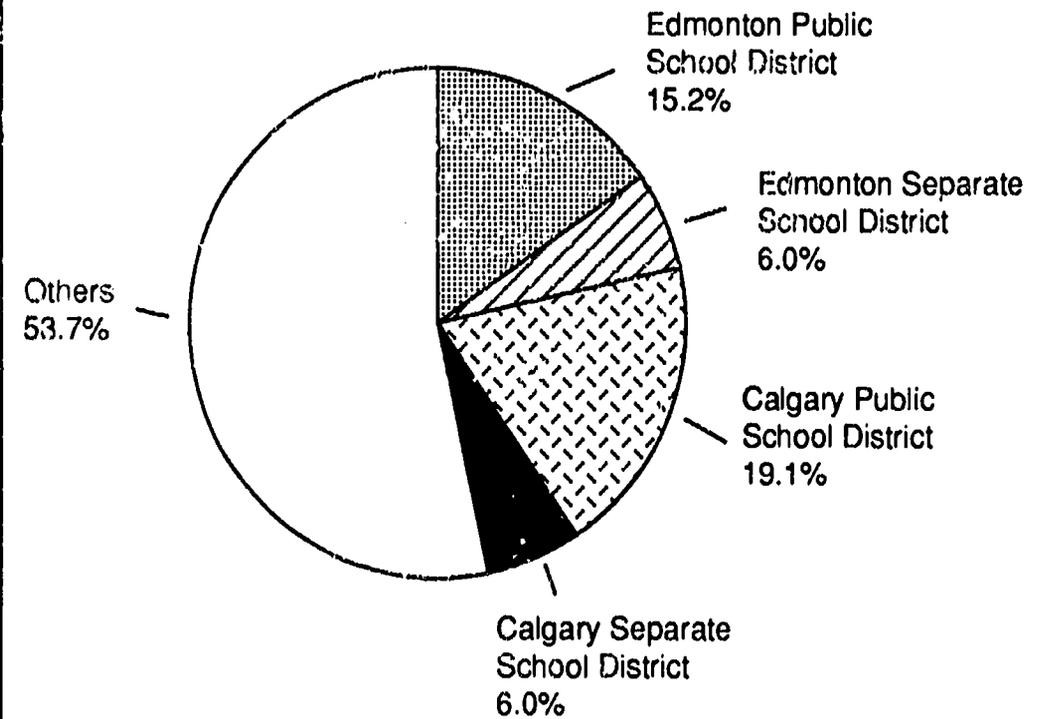

By 1995-96, total provincial enrollment in Grades 1 to 6 will reach 247,526, an increase of 24,305 over 7 years. Elementary enrollment will decline thereafter. Enrollment at the junior and senior high levels will increase by 23.4 per cent and 21.5 per cent, respectively, between 1988-89 and 2000-2001. These projections suggest that enrollment in Grades 1 to 12 will increase from 430,725 in 1988-89 to 485,515 students in 2000-2001. Over the 12-year period, the percentage of students enrolled in Grades 1 to 6 will range from 51.8 in 1988-89 to 47.7 in 2000-2001, while the percentage of enrollment in Grades 7 to 12 will range from 48.2 to 52.3.

## 2. EDUCATIONAL INPUTS/RESOURCES

---

### 2.3 Grades 1 to 12 Private School Enrollments

- *Private school accounted for 3 per cent of the total 1988-89 provincial school enrollment.*
- *Private schools enrollment and the number of operating private schools in Alberta have more than doubled since 1978-79.*

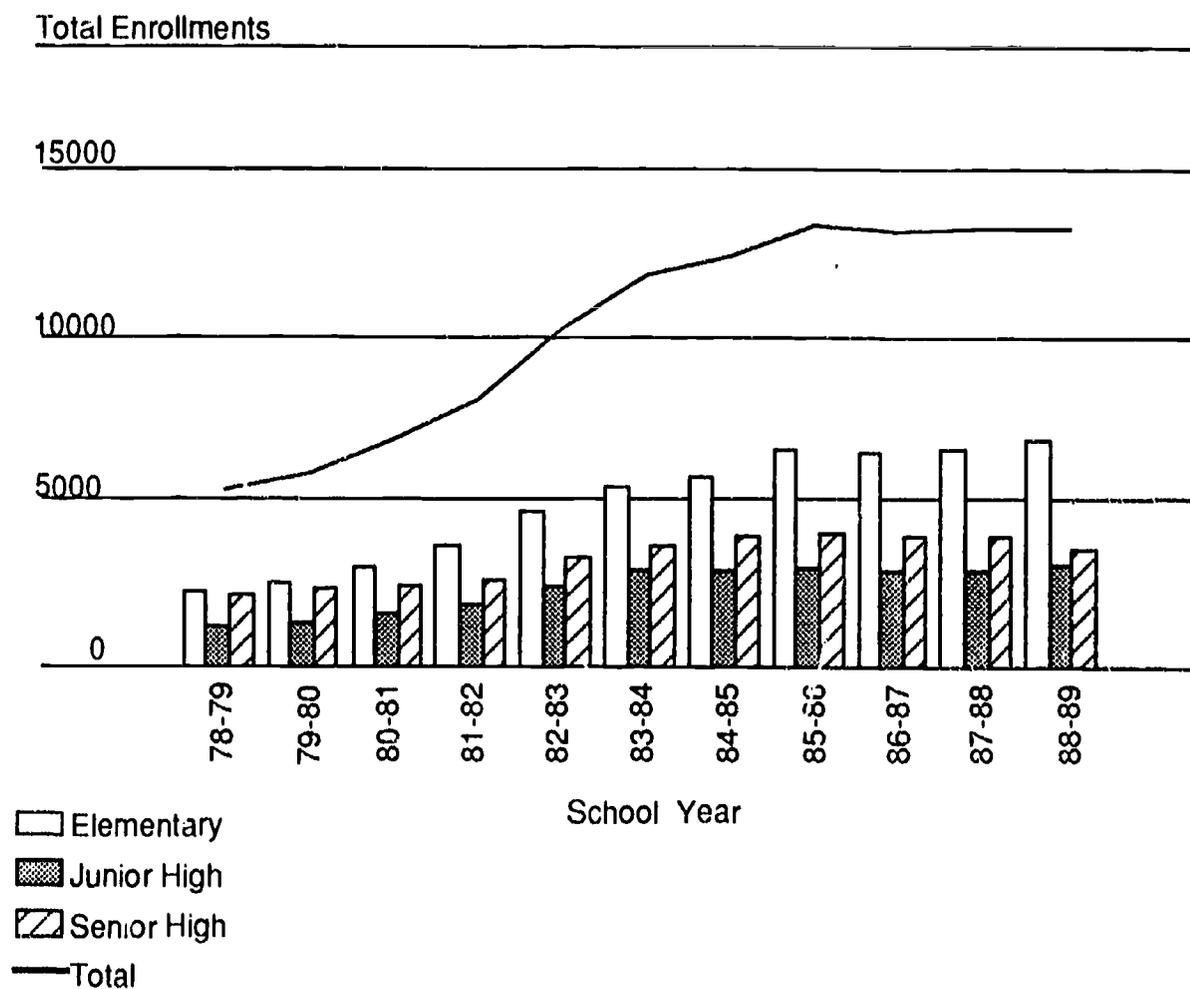

Throughout Alberta there are elementary and secondary schools that are managed privately by an individual, association or corporation. Some private schools receive financial support from the province. Private schools offer a variety of programs and services, including instruction in religion, languages and special education. They

also provide an alternative to the programs offered by the public/separate school systems. In 1988-89, there were 134 private schools in Alberta, compared to only 60 in 1978-79.

Enrollment in private schools has remained fairly stable since 1985-86. In that year, fifty-one per

cent of Alberta's private school enrollment was at the elementary level, 22.7 per cent was at the junior high level, and 26.3 per cent was at the senior high level. In 1988-89, private school enrollment accounted for 3 per cent of total elementary-secondary enrollment in Alberta, up from 1.3 per cent in 1978-79.

## 2. EDUCATIONAL INPUTS/RESOURCES

---

### 2.4 Special Education Enrollments

Under the new *School Act*, all children in Alberta will be guaranteed access to the education system and to a program which addresses their unique needs. The number and distribution of children with special needs is being tracked, to help determine where more resources will be needed, and where compliance with the School Act is evident.

Special education includes programs for exceptional students. Exceptional students are defined as "those students who require a different program or an adaptation or modification to the

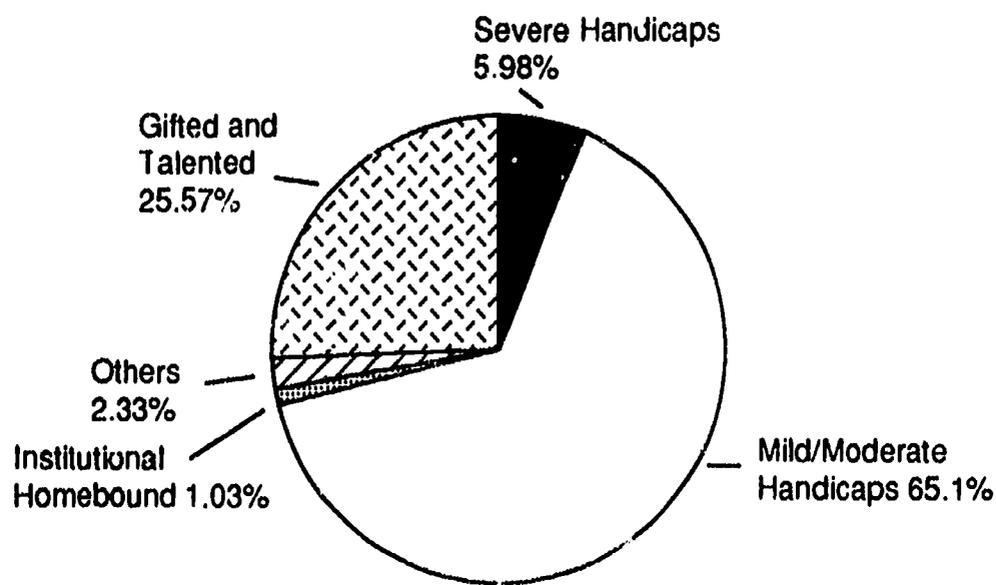

regular school program" (*Alberta Education Policy Manual*, 1989. Document Number: 02-02-01). In a 1989 survey completed by school jurisdictions, ECS private operators, and private schools, 36,727 students (including students from resource rooms, home schooling, programs for unwed mothers, and programs for underachievers) were enrolled in special education programs in Alberta's public and separate schools. This represented 9.7 per cent of the provincial school population in Grades 1 to 12. Exceptional students with mild to moderate handicaps constituted the largest number and percentage (6.3 per cent) receiving special

education programs and services, followed by the gifted and talented (2.5 per cent), and students with severe handicaps (0.6 per cent). In ECS centres operated by public schools, 8.5 per cent of the children receiving assistance were in the mild to moderate category, while 1.4 per cent receiving support were in the severe handicap category.

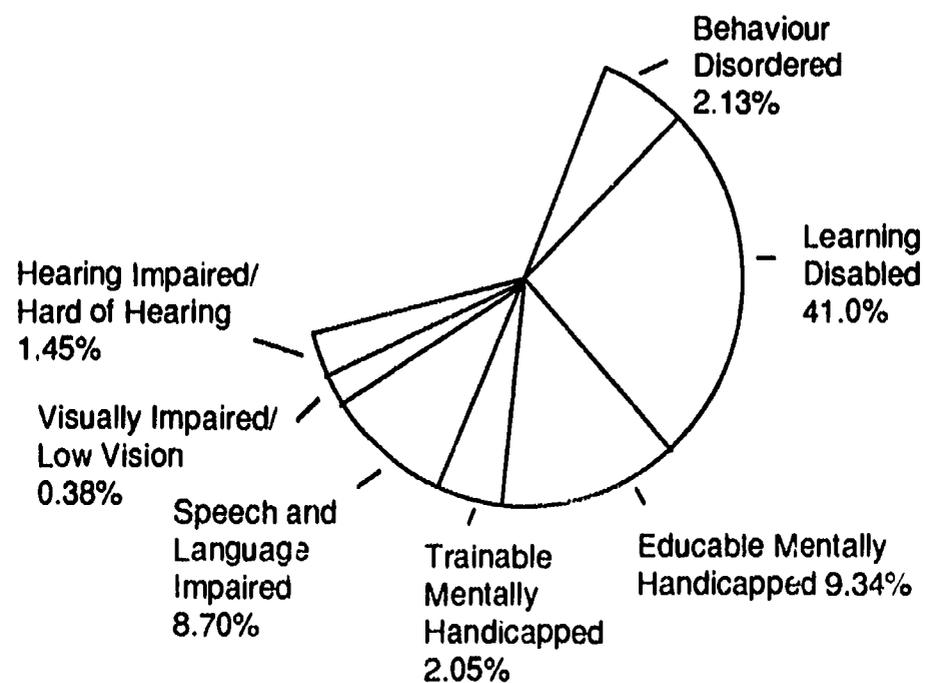

In private schools providing special education, the largest category of exceptional students were learning disabled (49.3%), followed by the dependent handicapped (21.5%).

## 2. EDUCATIONAL INPUTS/RESOURCES

### 2.5 Alberta Correspondence School Registrations and Distance Education

- *The number of students enrolled in the Alberta Correspondence School has doubled since 1965-66.*
- *Over 90 percent of total ACS student registrations in 1988-89 was at the senior high school level.*

#### **Alberta Correspondence School**

The Alberta Correspondence School (ACS) provides a varied and flexible program for Albertans whose educational needs cannot or have not been met through classroom instruction. The school delivers correspondence courses for Grades 1 to 12 in the Alberta curriculum, as well as preparatory courses designed for adult students. There were 30,380 students registered in 45,387 courses in the Alberta Correspondence School in 1988-89, an average of 1.5 courses per student. The 1988-89 ACS student registration dropped one per cent from the previous year. Registrations at the senior high school level accounted for 92.9 per cent of 1988-89 ACS student registrations; 5.6 per cent of the registrations were at the junior high school level, while the remaining 1.4 per cent were at the elementary level. Total student registrations in the Alberta Correspondence School have doubled since 1965-66. The majority of the students enrolled in ACS courses in 1988-89 were female (58.8 per cent), under 19 years of age (64.4 per cent), and from rural Alberta (62.7 per cent).

For school years up to and including 1985-86, figures included pre-registered and new student registrations.

#### **Distance Education**

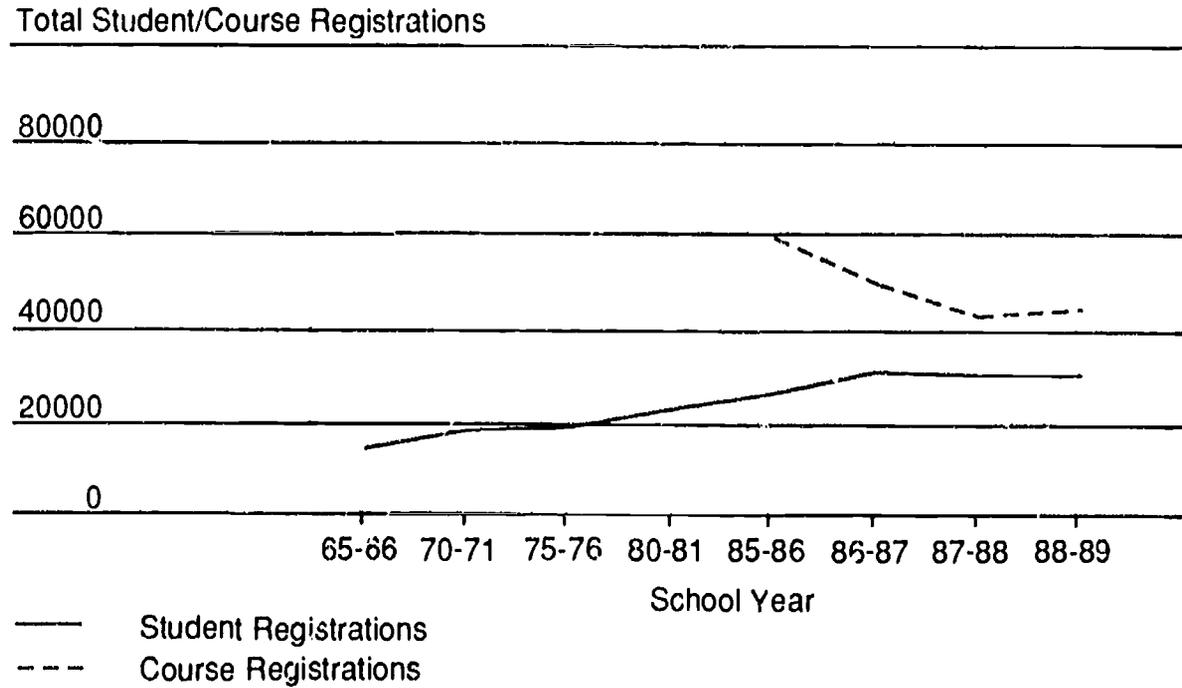

In October 1988, the Minister of Education announced a \$5.4 million grant for equity in education so that students in all locations, especially in rural communities and remote areas in the province, will have access to a comparable range of high quality education courses through distance education. This will enable students in rural areas to take many of the same courses available to students in urban centres. As of 1988, there have been two distance learning projects in place. The first began in September 1987, in Southern Alberta, and was known as the Distance Learning in Small Schools Project. The second project began in the Fall of 1988, and was known as the Distance Learning Project North. Since September 1989, projects have been replaced by distance education consortia and locally administered distance education programs.

The first Distance Learning project has been so successful that the number of participating schools and students has more than doubled, a total of 28 schools with over 1,000 students taking 1,714 individual courses. In 1987, 106 courses were available, as compared to an average of only 32 courses which would have been offered by the project schools without the project.

In the fall of 1989, a Distance Education Equity Grant for \$8 million was made available to 135 small rural high schools in Alberta. Additional funds were assigned to the ACS for correspondence/distance education course upgrading. The Distance Education Program Implementation Branch was created to assist school jurisdictions in implementing distance education on a province-wide basis.

## 2. EDUCATIONAL INPUTS/RESOURCES

---

### 2.6 French Minority Language Education Enrollments

- *In 1988-89, 14 schools in Alberta offered French Language Education Programs.*
- *French minority language enrollment has increased since 1983-84.*

The minority language education program offers the minority group (Anglophones in Quebec, Francophones outside Quebec) education in their mother tongue. In these programs the minority language is used as the language of instruction for a large part of the school day. In Alberta, 11 elementary schools and 10 secondary schools offer such programs. In the 1988-89 school year, 2,307 students were enrolled in minority language programs (programs designed for children of Alberta residents who qualify under Section 23 of the *Charter of Rights*). This represents an increase of 10.3 per cent from 1987-88. In 1988-89, 55 per cent of Alberta's French minority language enrollment was at the elementary level, 19.5 per cent at the junior high level, 14.9 per cent at the senior high level, and 10.4 per cent at the ECS level.

#### Canada Act 1982

*In November 1981, the provincial Premiers and the Prime Minister reached consensus on a new Canadian Constitution. A key component of the Constitution is the Charter of Rights and Freedoms. Section 23 of the Charter provides certain rights to members of the minority language community. Those rights are as follows:*

#### 23. (1) *Citizens of Canada,*

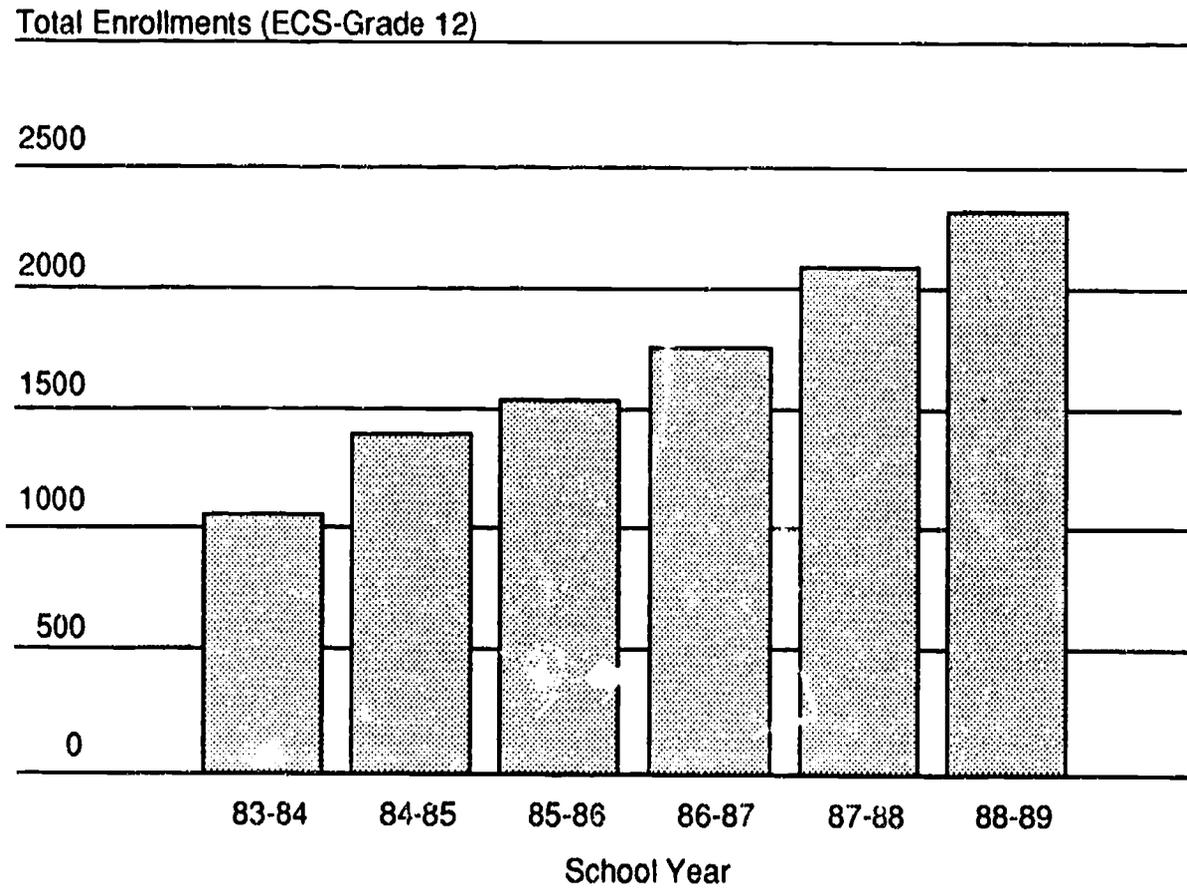

- (a) whose first language learned and still understood is that of the English or French linguistic minority population of the province in which they reside, or*
- (b) who have received their primary school instruction in Canada in English or French and reside in a province where the language in*

*which they received that instruction is the language of the English or French linguistic minority population of the province,*

*have the right to have their children receive primary and secondary school instruction in that language in that province.*

- (2) Citizens of Canada of whom any child has received or is receiving primary or secondary school instruction in English or French in Canada, have the right to have all their children receive primary and secondary school instruction in the same language.*
- (3) The right of citizens of Canada under subsections (1) and (2) to have their children receive primary and secondary instruction in the language of the English or French linguistic minority population of a province.*

**Figure 2.6**  
Enrollments in French Minority  
(Francophone) Language Education,

## 2. EDUCATIONAL INPUTS/RESOURCES

### 2.7 Second Language Education/Immersion Programs

- *Students in Alberta have shown an increased interest in French Immersion Programs.*
- *As international immigration continues to rise in Alberta, the demand for ESL programs in Alberta's schools will increase.*

Second language education programs are designed to offer instruction in the minority language (English in Quebec, French outside Quebec) for children of the majority language group. There are two types of second language programs: the Second Language Immersion program and the Regular Second Language program.

#### **Second Language Immersion**

In this program students learn the second language by receiving all or a large part of their education in that language. French Immersion students generally are non-French-speaking children for whom French is the language of instruction. In Alberta, French Immersion Programs provide the majority of instruction in the French language. The purpose of immersion is to enable English-speaking students to learn and to become proficient in French. In

1988-89, 26,038 students were enrolled in French Immersion Programs, an increase of 8.1 per cent over 1987-88.

Enrollment in French Immersion Programs in Alberta schools has increased since 1977-78. In 1988-89, 61.5 per cent of the students in French immersion programs were elementary students, while 21.9 per cent were at the secondary level and 16.6 per cent were ECS students.

#### **Regular Second Language**

In this program students take the second language as a "subject." That is, the second language occupies much the same position in the school's curriculum as other academic subjects. Enrollment in the regular second language program increased 5.1 per cent from 1987-88 to 1988-89. French,

being the most popular second language course taken by students in Alberta's senior high school, represents 97.6 per cent of total enrollment in high school second language courses in Alberta.

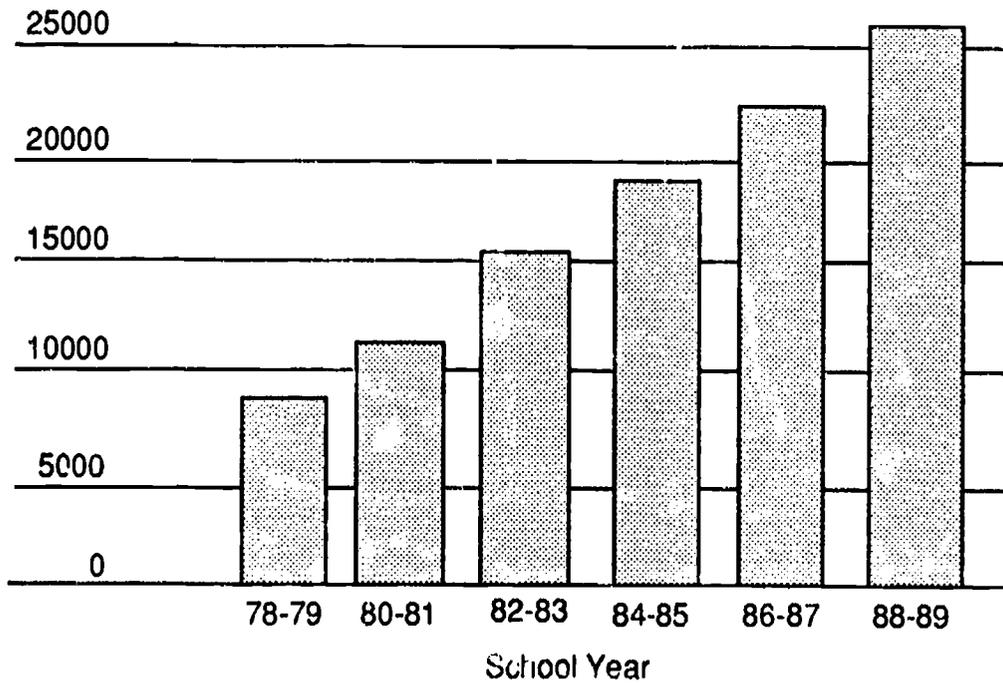

#### **Bilingual and English as a Second Language**

In 1988-89, 2,878 students were enrolled in a variety of bilingual programs, such as Arabic, Chinese, German, Hebrew/Yiddish, Ukrainian, and Polish, an increase of 1.5 per cent over the previous year. The growing number of immigrant children has contributed to the increased demand for English as a Second Language (ESL) programs in Alberta's schools. Enrollment in ESL programs increased 26.9 per cent from 1987-88 to 1988-89. As international immigration in Alberta is expected to rise moderately, the demand for ESL programs will continue to increase.

## 2. EDUCATIONAL INPUTS/RESOURCES

---

### 2.8 School Personnel

- *The number of teachers in Alberta peaked at 27,306 in 1985-86. Since that year, their number has remained relatively stable. In 1988-89, Alberta teachers totalled 27,232.*
- *Women comprise 61 per cent of the total teaching force but only 27 per cent of education administrators are female.*

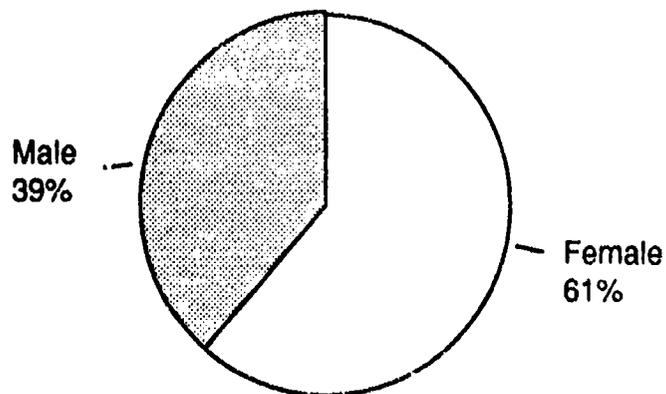

In the 1988-89 school year, Alberta's public and separate school systems employed 27,232 teachers, 96 more than the previous year. Teachers include all teaching and non-teaching administrative staff, such as principals, vice-principals, and department heads. Teaching remains predominantly a female profession. In 1988-89, the female component of the teaching force in Alberta was 61 percent.

If instructional support staff (guidance counsellors, psychologists, clinicians and librarians) were included with classroom teachers, the dominant category, instructional personnel accounted for 86.1 per cent of total staff, while administrators made up the remaining 13.9 per cent

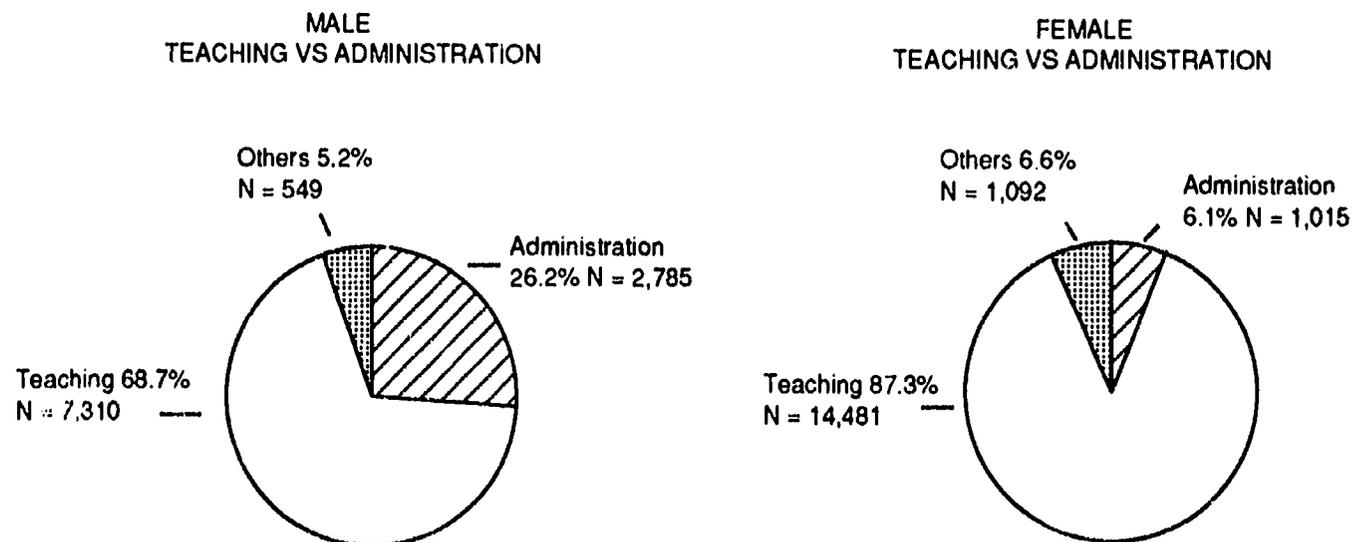

Men, however, are more likely than women to be

in administrative positions. In 1988-89, only five out of 99 superintendents, and 42 out of 147 assistant, associate and deputy superintendents were women. Twenty-two per cent of male teachers in Alberta public and separate schools were principals, vice-principals or department heads; the corresponding proportion for female teachers was 3.7 per cent.

## 2. EDUCATIONAL INPUTS/RESOURCES

---

### 2.9 Teacher Age, Education, Experience, and Average Annual Salary

- *The age distribution of teachers in Alberta has shifted toward older ages.*
- *Most school teachers have university degrees.*
- *Since 1980, average teacher salaries, adjusted for inflation, have risen 8.2 per cent.*

#### **Average Age**

The average age of Alberta's teachers was 39.2 in 1988-89, compared to 36.3 in 1978-79. A comparison with data collected a decade ago indicates that the teaching force is aging. In 1978-79, 35.7 per cent of the teachers were between 20 and 31, and 51.9 per cent were between 31 and 50. Ten years later, the first group represented 18.3 per cent of the teaching force, while the second group had increased to 70.4 per cent of teachers.

#### **Education**

nearly all school teachers in Alberta have university degrees. The percentage of teaching staff holding

a bachelor degree in 1988-89 was 85.2 percent. The proportion with masters and doctoral degrees was 11.8 percent. Males were more likely than females to have post-graduate degrees: 61.9 per cent versus 38.1 per cent. This may partially explain the imbalance in the ratio of males to females in administrative positions.

#### **Average Years of Teaching Experience**

In 1988-89, the average teaching experience of Alberta teachers was 13.3 years, three more than a decade earlier. This is a rise from 9.9 years in 1975/76, and a reflection of the aging teacher

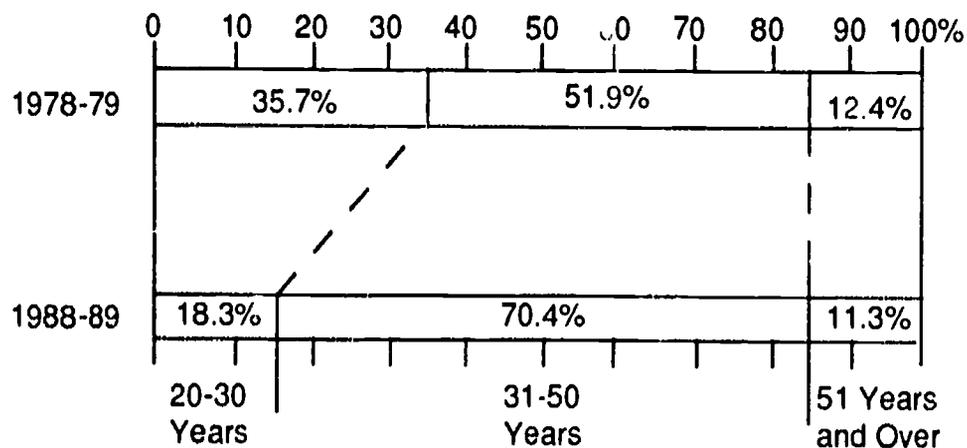

population. The average teaching experience with the same employer for Alberta teachers has also increased from 7.89 years in 1981-82 to 10.51 years in 1988-89.

#### **Average Annual Teacher Salaries**

In 1988-89, the average annual salary of Alberta teachers was \$40,353. Average salaries, when adjusted for inflation, increased by 0.15 per cent; unadjusted, they grew by 2.85 per cent from 1987-88. Since 1981-82, due to budget restraints, there has been a decrease in the growth rate of teacher salaries.

## 2. EDUCATIONAL INPUTS/RESOURCES

---

### 2.10 Pupil/Teacher Ratio

Pupil/teacher ratio (PTR) is the proportion of total students to school certificated staff, including all teachers, counsellors, administrators and other non-instructional staff. The PTR reflects the relationship between the number of students enrolled, and the number of full-time equivalent certificated teachers employed at a school or school jurisdiction. In Alberta, the PTR is calculated by dividing the total number of ECS to Grade 12 students in public and separate schools by the total number of full-time equivalent certificated teachers. Enrollment does not include ECS private operators, private schools, or Lloydminster.

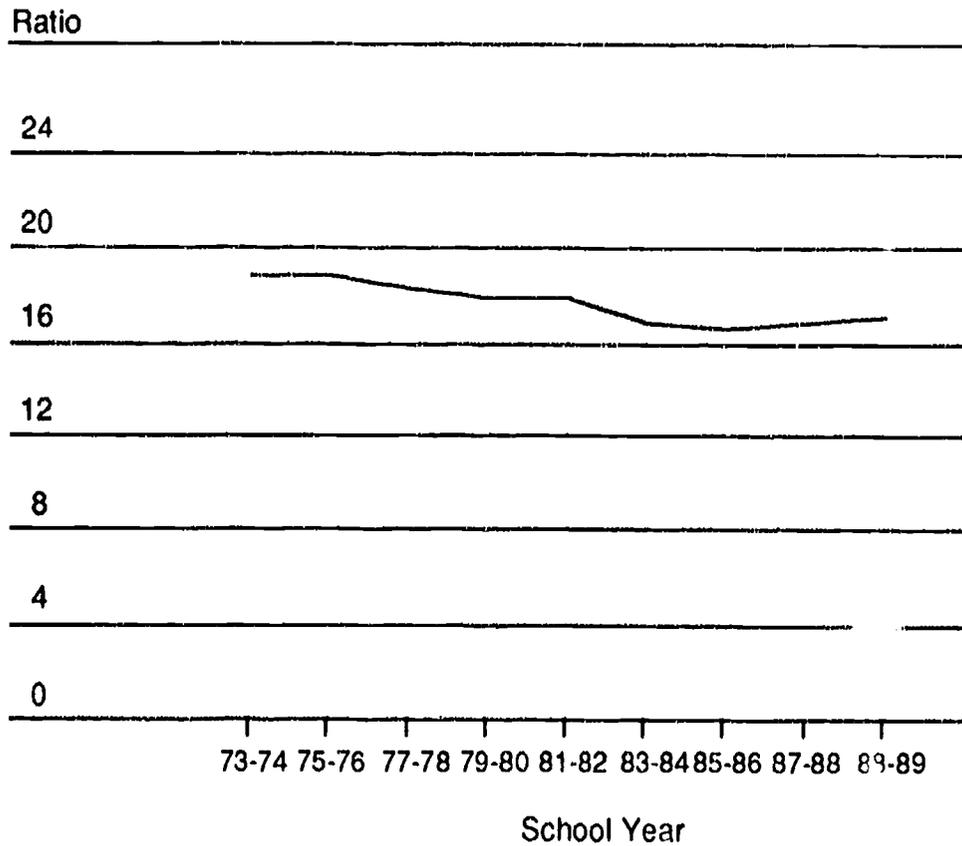

Because the word "teacher" in the pupil/teacher ratio includes all certificated staff (teachers, counsellors, administrators and other non-instructional staff), and not just classroom teachers, the average pupil/teacher ratio is slightly lower than the PTR based on classroom teachers only.

Since 1973-74, the PTR has steadily declined. In 1973-74, there was an average of one certificated teacher for every 18.9 students in each Alberta public and separate school system. By 1988-89 this average had declined to 17.2, a decrease of nine per cent. When the PTR based on classroom teachers

was calculated (based on actual teaching time of classroom teachers), the ratio was 20.7 in 1988-89.

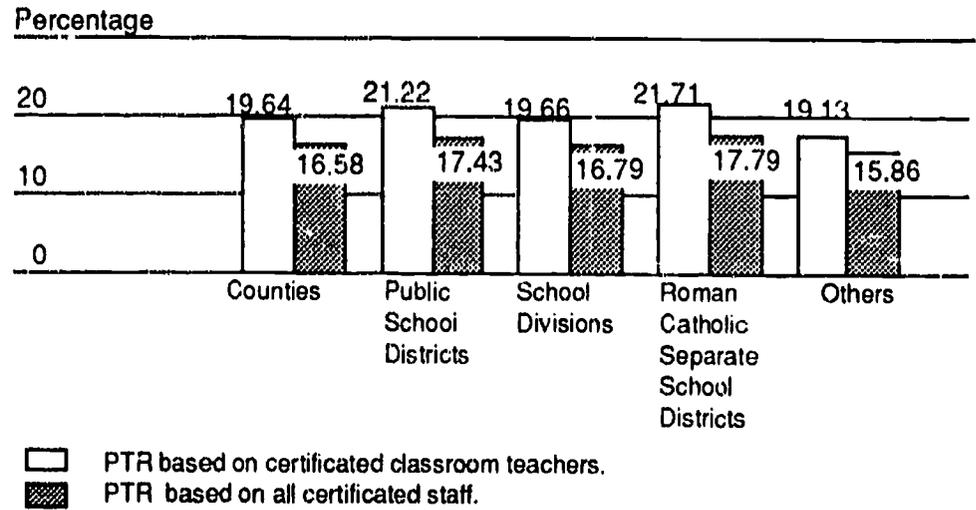

Pupil/teacher ratios increase with district size. That is, larger school districts have more students per certificated staff and certificated classroom teacher. Public School Districts and Roman Catholic Separate School Districts have slightly higher certificated staff and classroom teacher PTRs, approximately 17.6 to one and 21.5 to one respectively, slightly above the provincial level of 17.2 and 20.7 for 1988-89.

**Figure 2.10.a**

## 2. EDUCATIONAL INPUTS/RESOURCES

---

### 2.11 Provincial Funding of Elementary and Secondary Education

- *For the fiscal year 1989-90, total financial assistance to school boards increased by 7.6 per cent over the previous grant rates.*
- *The province allocates over \$3,100 for each child attending school in Alberta.*
- *Basic operating grants were increased by 5.5% for 1989-90. They now range from \$1,142 for private ECS students to \$2,272 for public and separate senior high school students.*
- *Fiscal equity grants increased in 1989-90 by 13.3 per cent to over \$69 million.*
- *Special education grants to school boards increased by nearly 11 per cent to a total of \$92.2 million.*

For the fiscal year 1989-90, the government of Alberta is providing nearly \$1.5 billion in a variety of grants and support programs to school boards, approved private schools and Early Childhood Services (ECS) operators

The total provincial grant estimate for elementary and secondary education is \$1.494 billion, an increase of approximately eight per cent over 1988-89 grants. This represents 12.3 per cent of the total

budgetary expenditure for the province. In 1978-79, \$0.668 billion in provincial grants, or 16 per cent of the total provincial expenditure, was spent on elementary and secondary education in Alberta.

The table on page 35 summarizes the province of Alberta's funding of elementary and secondary education for the years 1978-79, 1988-89 and 1989-90.

**Table 2.11**

## 2. EDUCATIONAL INPUTS/RESOURCES

---

### 2.12 Local Contribution to Funding Elementary and Secondary Education

The funding of education in Alberta is a cooperative and joint undertaking of locally elected school boards and the provincial government. School boards are responsible for a portion of education costs through taxation on both residential and non-residential property. There are no restrictions on the ability of local school boards to tax locally.

Each year school jurisdictions determine the funds required to support their share of the costs of local school programs. They raise the tax revenue, or requisition, from the contributing municipalities. The rate of taxation is determined by the property value of the municipalities that make up the school jurisdiction, and by the revenue required. The tax rate is expressed as a "mill rate." A mill is 1/1000 of a dollar.

The level of the mill rate in a school jurisdiction is a comparative measure of the level of the burden on the local taxpayer. The provincial average of

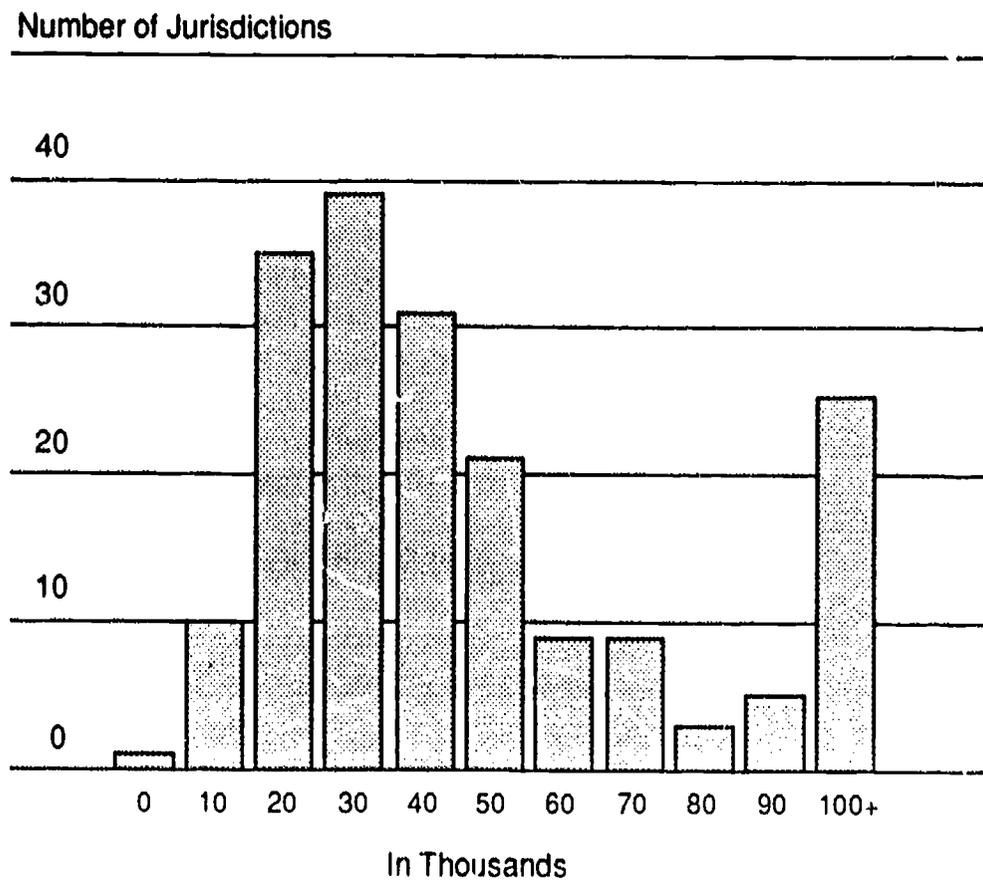

net mill rates was 33.17 for 1988 and 34.24 for 1989. However, the actual range of net mill rates for both years varied from less than 5 mills to almost 60 mills per dollar of equalized assessment.

Mill rates vary widely across the province, partly due to variations in the programs local school boards offer and the costs of providing those programs. Mill rates also vary because of the wide differences in the value of property in municipalities. Some municipalities have benefited from commercial, industrial and extraction activities within their boundaries. Others have not been so fortunate. A comparison between school jurisdictions of the equalized assessments of property in 1989, adjusted for the electric power and pipeline levy, shows a range of about \$8,000 per resident student to more than \$2,900,000. The provincial average of the adjusted equalized assessment per resident student was \$50,980. Areas

with a high property value tend to have low rates of taxation, whereas school boards with low property assessments must have high rates of taxation to requisition the money they need for their share of educational programming.

In order to compensate for the wide variations in the ability of school jurisdictions to raise funds, and the higher costs of providing some programs, the provincial government provides equity grants. These grants are available to school boards that have a low assessment base, a sparse population and that are located in remote areas of the province. Additional equity funding is also provided to school boards that serve a high proportion of severely disabled children, or that need assistance in carrying the costs of school construction. In 1989 approximately 16% of the grants provided by Alberta Education were directed toward achieving greater equity.

## 2. EDUCATIONAL INPUTS/RESOURCES

### 2.13 School Board Expenditures

- *School board spending increased by 3.9 percent in the last school year.*
- *Costs in administration and instruction programs continue to increase.*
- *The provincial share of the total cost of school board spending increased slightly to 61.2 per cent in 1988-89.*

For the school year 1988-89, total school board operating expenses were \$2.128 billion, an increase of nearly four per cent from the 1987-88 total of \$2.056 billion. In the same period, however, total Grade 1 to 12 enrollment in the public and separate school system increased by less than 2 per cent.

The growth in school board spending appears to have slowed and stabilized in recent years to about 5 per cent per year.

As a percentage of total operating expenditures, school board spending for the various programs and services remained stable except for instructional

programs, which increased from 65.8 per cent of total expenditures in 1987-88 to 66.2 per cent in 1988-89. Administration costs also increased slightly from 5 per cent of total expenditures to 5.4 per cent in the same period.

#### **Major Sources of School Board Funding**

Provincial revenue remains an important source of funding, even though its share has fluctuated over the years. The government's share of the total cost of education in the province has increased substantially each year in absolute dollars, and has exceeded the rate of inflation since 1975 on a cumulative basis.

In 1986-87, the province provided 63 per cent of school board funding, down from 79 per cent in 1975. The municipal and other local share increased from 21 per cent in 1975 to 37 per cent in 1986-87.

In 1988-89, the province provided 60.5 per cent of the revenue to school boards, hardly changing from the 60.7 per cent share in 1987-88. The revenue share from municipal and other local government sources accounted for 39.3 per cent in 1987-88 and 39.5 per cent in 1988-89.

**Table 2.13**

School Board Operating Expenditures by Function,  
1978, 1987-88 and 1988-89

## 2. EDUCATIONAL INPUTS/RESOURCES

### 2.14 School Board Expenditure per Student

- *From 1987-88 to 1988-89, spending per student by Alberta's school boards increased by 1.7 per cent.*
- *Compared to other provinces, Alberta ranked fourth in per-student spending in Canada in 1988-89.*

In 1988-89, school board operating expenditure per full-time equivalent (FTE) student in Alberta was \$4,773. This represents a 1.7 per cent increase over the 1987-88 per pupil expenditure of \$4,692.

Between 1972 and 1988, school board spending per student in current dollars in Alberta increased by approximately 400 per cent. Inflation accounted for much of this apparent growth. However, in constant 1988 dollars, per student spending increased by 62 per cent during the same period.

#### Inter-Provincial Comparison of Expenditures per Student

Among Canada's provinces, Alberta ranked fourth in per student spending in 1988-89. Alberta spent \$4,946 per student. Preceding Alberta were Quebec, at \$5,894; Ontario, at \$5,305; and Manitoba, at \$5,196. The United States' average per pupil expenditure in 1989 was US \$3,977.

In 1985-86, Alberta ranked second in Canada by spending \$4,085 per student. Only Quebec

preceded that, at \$4,714 per student. Ontario ranked third at \$4,074 per student. The United States' average per student spending in 1986 was US \$3,756.

This data should be interpreted with some caution; it does not necessarily mean that spending more per capita on students means better or improved student achievement. As well, methods for calculating per-student spending may vary from province to province in Canada, and from state to state in the United States.

**Table 2.14.a**

Operating Expenditure per Full-Time Equivalent Student,  
Alberta, 1972 to 1988-89

Year	Current Per Pupil Expenditure	Real (Constant 1988) Per Pupil Expenditure
1972	\$ 950	\$ 2,954

### 3. EDUCATIONAL OUTCOMES/RESULTS

#### 3.1 Number of Students Who Wrote Diploma Examinations

The Diploma Examinations Program is an integral part of Alberta's high school diploma requirements. The program is intended to certify the level of students' academic achievement in selected Grade 12 courses.

The Grade 12 Diploma Examinations Program consists of course-specific examinations that are based on the prescribed Program of Studies for Senior High Schools for the following Grade 12 courses:

- English 30
- English 33
- Social Studies 30
- Mathematics 30
- Biology 30
- Chemistry 30
- Physics 30

From 1983-84 (when the current Diploma Examinations program was introduced) to 1988-89, the number of students writing diploma examinations has increased in all diploma subjects, except for English 33. The greatest increase was in Biology 30, which rose from 14,315 to 18,791 students, an increase of 31.3 per cent. Physics 30, which also had the fewest number of candidates, showed the smallest increase during the same period: the number of students who wrote Physics 30 only increased by 1.8 per cent from 8,005 to 8,149. The number of students writing English 33 declined, from 10,534 in 1984-85, to 9,376 in 1988-89. This was a decrease of 11 per cent.

Table 3.1 provides a statistical summary of enrollment in each Grade 12 Diploma examination subject between 1984-85 and 1988-89. It also shows enrollment in each of the subjects as a percentage of the total Grade 12 enrollments. English 30 had the largest increase in student enrollment. Its enrollment rose by 15.9 per cent, from 20,548 to 23,805. As a per cent of Grade 12 enrollment, it increased from 54.6 per cent to 60.3 per cent. Physics 30, with the lowest student enrollment, increased slightly but showed a modest decline as a per cent of Grade 12 enrollment, from 21.3 per cent to 20.6 per cent.

**Table 3.1**

Number of Students\* Writing Diploma Examinations, 1984-85 to 1988-89

Course	1984-85	% of Total Grade 12 Enrollment	1985-86	% of Total Grade 12 Enrollment	1986-87	% of Total Grade 12 Enrollment	1987-88	% of Total Grade 12 Enrollment	1988-89	% of Total Grade 12 Enrollment

### 3. EDUCATIONAL OUTCOMES/RESULTS

---

#### 3.2 1989 Grade 12 Diploma Examination Results

The Diploma Examinations Program consists of course-specific examinations that are based on the prescribed *Program of Studies for Senior High School* for the following Grade 12 courses: English 30, English 33, Social Studies 30, Mathematics 30, Biology 30, Chemistry 30, and Physics 30. Diploma examinations in Social Studies 30, Mathematics 30, Biology 30, Chemistry 30, and Physics 30 are available in French translations upon request.

Examinations are administered three times per year: January, June, and August. The majority of students write the exams in January and June. Marks for school work, the diploma examination and a final blended mark made up of the average of the school and diploma examination marks are available for all students.

All Grade 12 students registered in Alberta are now required to write at least one diploma examination in either English 30 or English 33 in order to receive a high school diploma. Students with

mature status may receive credit for a Grade 12 course by writing the appropriate diploma examination without having taken instruction in the course.

To obtain credit in any high school course, students must earn a final mark of 50 per cent or better. To obtain credit in a Grade 12 diploma examination course, students must write the diploma examination and attain a final blended mark of 50 per cent or better. The final blended mark is made up of 50 per cent of the mark awarded by the school and 50 per cent of the diploma examination mark. For example, a Physics 30 student might receive a mark of 45 per cent from the school and achieve a mark of 57 per cent on the diploma examination. This student would earn credit for Physics 30 because the average of the school and diploma examination marks would yield a final blended mark of 51 per cent. For students with mature status, who do not have a school mark or whose school mark is lower than the examination mark, the examination mark is the final mark.

Table 3.2 provides a more detailed summary of the January 1989 and June 1989 Grade 12 diploma examination results, including a distribution of student marks by grade categories in diploma examination courses. No attempt is made to compare the results for the two periods, as the populations are not equivalent. The examinations are designed to be equivalent, but proof of equivalence may be difficult.

Average marks for the January 1989 results ranged from 61.1 per cent to 69.3 per cent for school-awarded marks; 62.6 per cent to 65.8 per cent for diploma examination marks; and 62.3 per cent to 67.7 per cent for final blended marks.

Results for June 1989 indicated average marks ranged from 59.6 per cent to 70.4 per cent for school-awarded marks; 61.5 per cent to 66.4 per cent for diploma examination marks; and 61.8 per cent to 68.6 per cent for final blended marks.

**Table 3.2**  
Student Marks in Diploma Examinations, January 1989 and June 1989

Diploma Exam Course	No of Students	JANUARY 1989					Average Awarded	Diploma Exam Course	No. of Students	JUNE 1989					Average Awarded

Diploma Exam Mark		24.8	29.6	26.0	19.6	65.2	Diploma Exam Mark		24.7	29.8	28.3	17.2	66.0		
Final Blend Mark		24.1	35.0	31.5	9.5	67.7	Final Blend Mark		26.0	34.7	31.1	8.2	68.6		

**Notes:** 1. Effective January 1989, the Langue et Litterature 30 Diploma Examination will no longer be administered. This diploma examination will be replaced with a Francais 30 Diploma Examination which will be administered for the first time in January 1990. Students enrolled in Francais 30 and Langue et Litterature 30 in 1988-89 will receive a final mark based entirely on the school mark. Final marks for students enrolled in French Language Arts 30 in 1989 and in the future will be based entirely on the school mark. 2. Totals will differ from numbers reported in Table 3.1 because Table 3.1 includes the August sittings.

### 3. EDUCATIONAL OUTCOMES/RESULTS

---

#### 3.3 Diploma Examination Results by Gender

To compare the performance of Alberta's Grade 12 male and female students, provincial average marks for diploma subjects by gender are presented for two school years, 1983-84 and 1987-88. This is not an attempt to compare examination results between the two time periods for both genders. The populations are different and the tests have not been equated. Neither are the examination results standardized or equated over the years or across

subject boundaries. The only purpose here is to provide some indication of the performance of male and female Grade 12 students on the diploma examination program.

In 1983-84, the provincial average marks for diploma subjects ranged from 60.3 per cent to 65.7 per cent for males, and 62.3 per cent to 65.6 per cent for females. In 1987-88, average marks for diploma

examination results ranged from 60.4 per cent to 68.1 per cent for males, and from 63.7 per cent to 71.8 per cent for females. In both 1983/84 and 1987/88, females scored higher than males in English 30, English 33 and Physics 30. Males scored higher on Social Studies 30, Math 30, Biology 30 and Chemistry 30.

**Table 3.3**

Alberta Diploma Exam Results\* by Gender, 1983-84 and 1987-88

Course	1983-84		1987-88	
	Males	Females	Males	Females

### 3. EDUCATIONAL OUTCOMES/RESULTS

#### 3.4 Number and Type of Diplomas Awarded

Alberta Education issues three distinct high school diplomas. The General High School Diploma and the Advanced High School Diploma certify that the recipients have met the requirements outlined in the *Junior High School Handbook* and the *Senior High School Handbook*. The High School Equivalency Diploma is an alternative means of certification for individuals who have left high school. The requirements that must be met in order to earn a High School Equivalency diploma are also specified in the *Senior High School Handbook*.

To earn a General High School diploma, students must obtain course credit in either English 30 or English 33 and obtain 100 credits distributed over courses as specified in the handbook. Some students who are working towards the General High School diploma may wish to obtain credits in other diploma examination courses (i.e. Social Studies 30, Mathematics 30, Biology 30, Chemistry 30, Physics 30). To obtain credits in these courses, students must also write the appropriate diploma examinations regardless of the type of diploma they wish to receive.

The Advanced High School Diploma certifies achievement in an academic program. To earn this diploma, students must satisfy the current course and credit requirements for a General High School Diploma and obtain course credits in English 30, Social Studies 30, Mathematics 30, and one of Biology 30, Chemistry 30, or Physics 30.

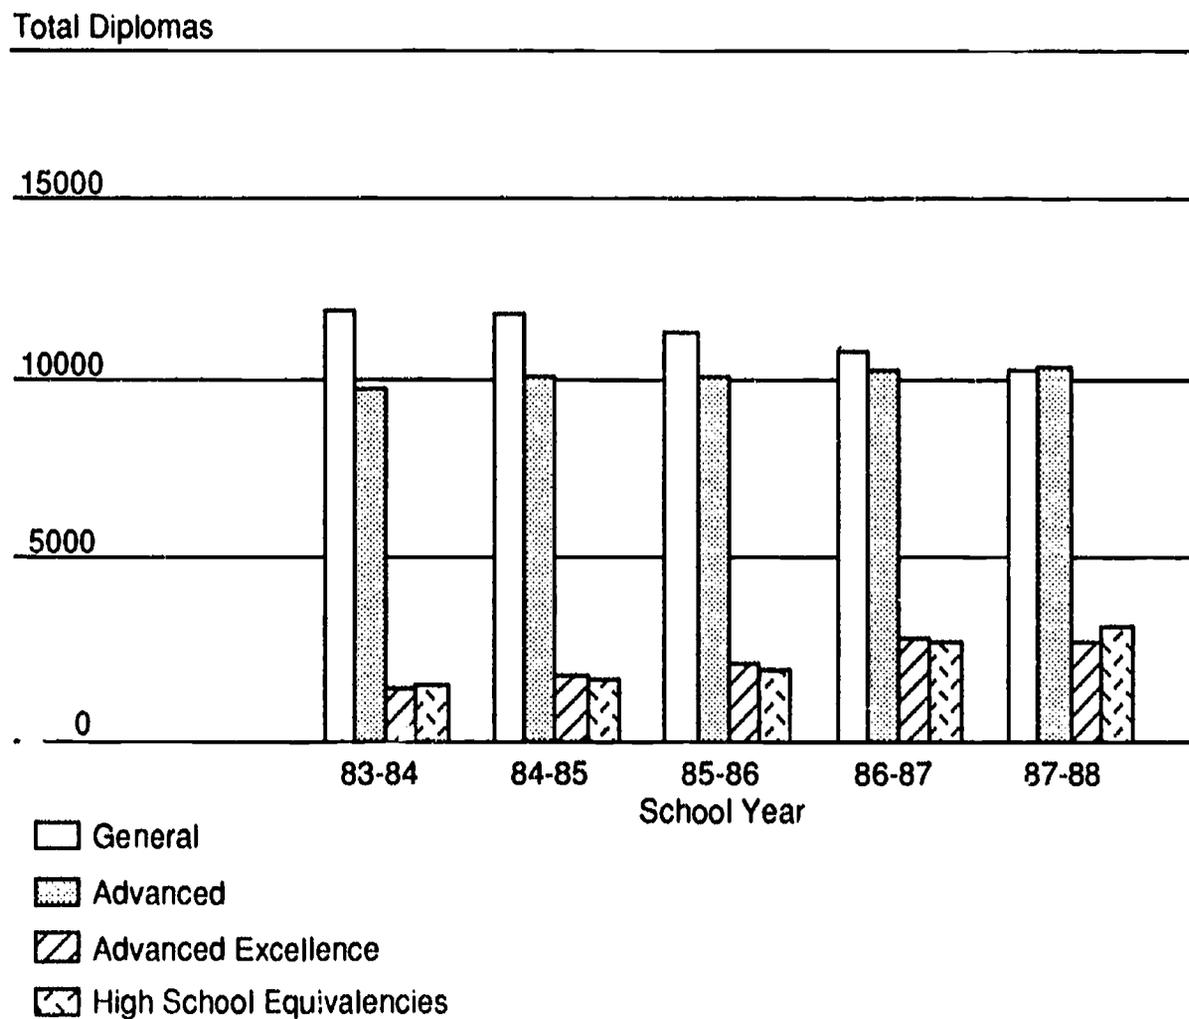

An Award of Excellence is given to students who meet the requirements for an Advanced High School Diploma and obtain a final average of 80 per cent or higher on the four required diploma examination courses, with not less than 65 per cent in any one of these four required courses. The Award of Excellence is noted on the student's Advanced High School Diploma.

The number of high school diplomas awarded by Alberta Education in 1987-88 was 26,559. This is an increase of 7.9 per cent from the 24,604 diplomas awarded in 1983-84. These numbers include student diploma upgrades and all students in the Northwest Territories, the Alberta Correspondence School, private schools and extension programs,

and the Alberta vocational centres. The totals also include diplomas awarded annually as of September 30th of the school year. For example, 1987-88 figures are total diplomas awarded as of September 30th, 1988.

Presently, there appears to be a trend in student enrollment away from the general and advanced diplomas to more Advanced with Excellence Diplomas. Of all the diplomas awarded to students each school year, the proportion of General High School Diplomas declined from 48.2 per cent in 1983-84 to 38.5 per cent in 1987-88. The proportion of Advanced High School Diplomas has remained stable, around 39 per cent, but the proportion of Advanced with Excellence Diplomas has increased from 5.9 per cent to 10.4 per cent. In the same period, the proportion of the High School Equivalency Diplomas increased from 6.2 per cent to 11.9 per cent. Figure 3.4 provides a graphic presentation of the number and type of diplomas awarded from 1983-84 to 1987-88.

**Figure 3.4**  
**Distribution of Types of Diplomas**  
 Awarded\*: 1983-84 to 1987-88

\* Includes diplomas awarded to students who have upgraded their previous or original diplomas. For complete figures, see Table 3.5, page 51.

### 3. EDUCATIONAL OUTCOMES/RESULTS

---

#### 3.5 Number and Type of Diplomas Awarded by Type of School System

In 1987-88, 20,814 General High School Diplomas, Advanced High School Diplomas and Advanced with Excellence diplomas were awarded to students by schools in Alberta's public school system. This represents 78.4 per cent of the total diplomas awarded. Of these, 17,087 or 64.3 per cent were awarded to students in public schools and 3,727 or 14.1 per cent were awarded to students in separate schools (including the Protestant Separate and Roman Catholic Public schools), consolidates and regional schools.

Students in private schools, post-secondary institutions, the Alberta Correspondence School, the Northwest Territories, and other centres were awarded 2,572 general, advanced and Advanced with Excellence diplomas. This represents 9.7 per cent of total diplomas. High School Equivalency Diplomas accounted for 11.9 per cent or 3,173 of the total diplomas awarded in 1987-88. Table 3.5 provides a detailed distribution of the number of diplomas and type for each school system from 1983-84 to 1987-88.

Students in the public, separate and private schools were awarded more advanced diplomas than general diplomas compared to the other school systems.

**Table 3.5**  
**Number of Type of Diplomas<sup>1</sup> Awarded by Type of School System, 1983-84 to 1987-88**

1983-84	General	Advanced	Excellence	Equivalency	Total	1986-87	General	Advanced	Excellence	Equivalency	Total

### 3. EDUCATIONAL OUTCOMES/RESULTS

---

#### 3.6 Number and Type of Diplomas Awarded by Gender and Age

##### **Diplomas Awarded by Gender**

There are slightly more female senior high students receiving diplomas than male students. Figures from 1983-84 to 1987-88 show that approximately 52 per cent of all diplomas awarded go to female students. Male students receive 48 per cent of all diplomas awarded.

In 1987-88, 13,721 diplomas or 51.6 per cent were awarded to female students, compared to 12,838 or 48.3 per cent of diplomas to male students. In 1983-84, 12,761 or 51.9 per cent of total diplomas were awarded to female students, while 11,843 diplomas or 48.1 per cent went to male students.

However, when it comes to the types of diplomas awarded, the percentages of males and females receiving general, advanced and Advanced with Excellence diplomas are roughly the same. For example, in 1987-88, 39.3 per cent of females and 39.0 per cent of males received advanced diplomas. Ten per cent of females received Advanced with Excellence diplomas, and 10.6 per cent of males received Advanced with Excellence diplomas.

There was a slight difference between males and

females receiving general diplomas: in 1987-88, females received 39.7 per cent of general diplomas, compared to 37.2 per cent for males. Table 3.6.a presents a detailed summary distribution of diplomas awarded from 1983-84 to 1987-88, by type and gender.

##### **Diplomas Awarded by Age**

The number of diplomas awarded to 16, 17 and 18 year olds in Alberta's senior high schools account for the largest percentage of diplomas awarded. The greatest proportion of diplomas awarded are received by 17 year olds, followed by 16 and 18 year olds. At the same time, the number of diplomas awarded to students 19 years and over is increasing.

In 1987-88, the number of diplomas awarded to 16, 17 and 18 year olds was 21,387, or 80.6 per cent of total diplomas, compared to 21,032, or 85.5 per cent of all diplomas in 1983-84.

Of total diplomas awarded in 1987-88, 48.3 per cent were received by 17 year olds, 20.6 per cent by 16 year olds, and 11.7 per cent by 18 year olds.

The diploma totals for 1983-84 were 53.2 per cent, 20.0 per cent, and 12.3 per cent for 17, 16, and 18 year olds respectively.

Between 1983-84 and 1987-88, the number of diplomas received by students 19 years of age and over increased by 45.7 per cent, from 3,524 to 5,136. Diplomas received by this age group accounted for 19.3 per cent of the total diplomas awarded in 1987-88, compared to 14.3 per cent of the total diplomas awarded in 1983-84.

The largest proportion of diplomas in the 19 years and over age group are awarded to students 25 years old and over. In 1983-84, 1,356 diplomas, or 5.5 per cent of the total diplomas, were awarded to students 25 years old and over. In 1987-88, this increased to 2,782, or 10.5 per cent of the total diplomas. Table 3.6.b. provides a detailed summary of diplomas awarded by age from 1983-84 to 1987-88.

### 3. EDUCATIONAL OUTCOMES/RESULTS

---

#### 3.7 Rutherford Scholarships for High School Achievement Awards

The Alexander Rutherford Scholarship for High School Achievement Awards is provided through the Alberta Heritage Scholarship Fund, funded by a \$100 million endowment from the Alberta Heritage Savings Trust Fund. The program is designed to encourage people in all walks of life to continue their education.

The Rutherford scholarship, with a value of up to \$1,500, is awarded to Alberta's high school students who meet certain eligibility criteria, and requires enrollment in post-secondary institutions in or outside Alberta. Because of its appeal to well-motivated students at each Alberta high school grade level, as well as the breadth of the eligibility criteria, the Rutherford Scholarship is a significant indicator of the academic excellence and performance of Alberta's high school students.

##### Eligibility Criteria

Currently, to qualify for the scholarship, students must maintain an average in Grades 10, 11, and 12 of 80 per cent or higher in five designated subjects. The table below summarizes the eligibility criteria for Grades 10, 11, and 12.

##### Grade 10

English 10 or 13

Two of the following:

- Social Studies 10
- Mathematics 10
- Biology 10
- Chemistry 10
- Physics 10
- A language other than English at the 1000 level

Any two other subjects at the 1000 level including the above subjects.

##### Grade 11

English 20, 23 or Literature/  
Communications 21

Two of the following:

- Social Studies 20
- Mathematics 20
- Biology 20
- Chemistry 20
- Physics 20
- A language other than English at the 1000 level.

Any two other subjects at the 2000 level including the above subjects.

##### Grade 12

English 30

Four of the following:

- Social Studies 30
- Mathematics 30
- Mathematics 31
- Biology 30
- Chemistry 30
- Physics 30
- A language other than English at the 3000 level.

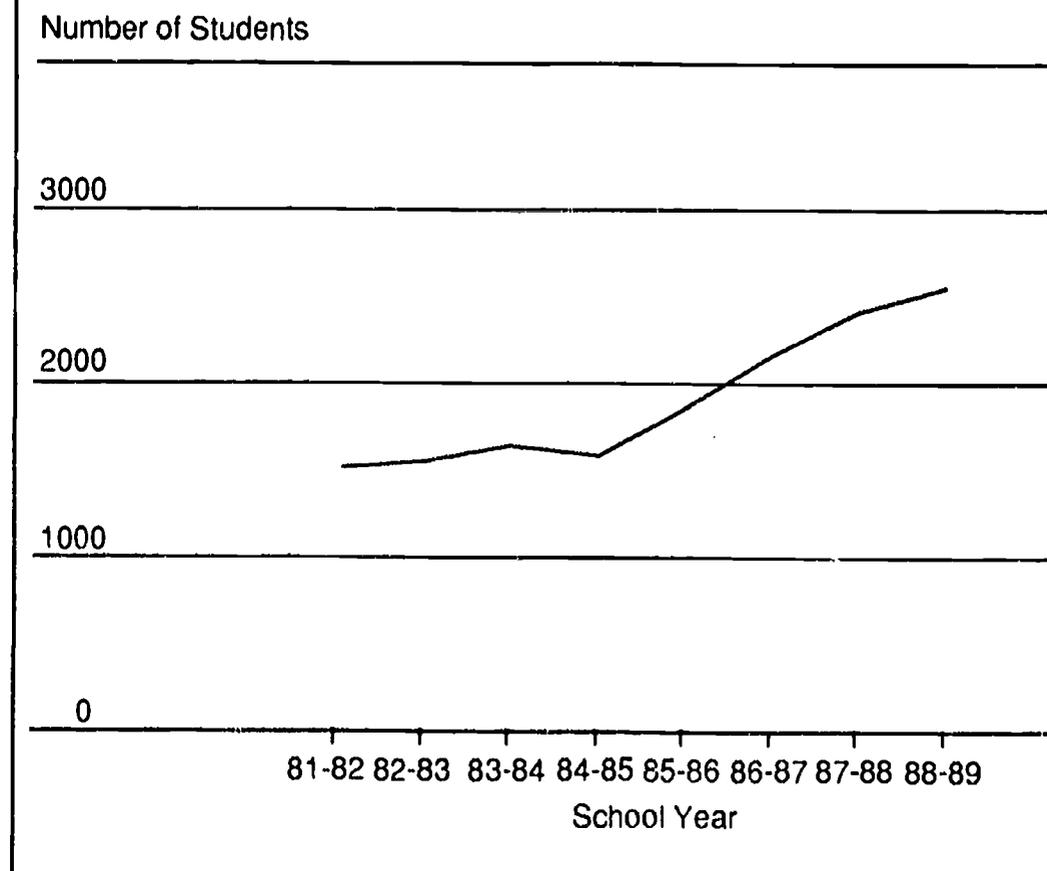

##### Number of Students Eligible

Between 1981-82 and 1988-89, the number of students eligible for the scholarship in all three grades (10, 11 and 12) increased by 67.3 per cent from 1,531 to 2,562. During the same period, the total value of the number of awards increased from \$3.4 million to \$4.9 million, an increase of approximately 45 per cent.

**Table 3.7**  
**Number of Students Eligible for Rutherford Scholarships,**  
**Grades 10, 11, 12, 1981-82 to 1988-89**

Year of Eligibility*	Number of Students
1981-82	1,531
1982-83	1,570
1983-84	1,655
1984-85	1,622
1985-86	1,863
1986-87	2,178
1987-88	2,430
1988-89	2,562

**Figure 3.7**  
**Number of Students Eligible\* for Rutherford Scholarships,**  
**Grades 10, 11, 12, 1981-82 to 1988-89**

\* The records of students who graduated or left school in the years 1980-81 to 1987-88 were analysed according to year of eligibility. The year of eligibility is defined as the first year the students became eligible for the scholarships. This means, for example, their records of students who graduated or left completed a course in 1987-88 were analysed and assigned to the 1988-89 year of eligibility.

### 3. EDUCATIONAL OUTCOMES/RESULTS

---

#### 3.8 Student Participation/Completion Rates

The success of any school system may be evaluated by its ability to keep its students in school until graduation. Other indicators that may be used are: participation rates, the graduation rate, and early school leaver or drop-out rate.

##### Participation Rates

Participation rate is defined here as the total enrollment of a select age group (e.g. 14 to 19 year olds) in Alberta's public, separate and private school systems as a proportion of all 14 to 19 year olds in the population.

Between 1978-79 to 1988-89, the participation rate of 14 to 19 year olds in Alberta's public, separate and private school system increased from 56.3 per cent to 62.6 per cent.

Recent data from selected OECD (Organization of Economic Cooperation and Development) countries showed that the participation rates of 17 year olds in formal education were: 94 per cent in Japan, 89 per cent in Germany, 87 per cent in the United States, 78 per cent in Sweden, and 72 per cent in

Canada. The Alberta equivalent for 17 year olds is 66.3 per cent. These figures may or may not be directly comparable as methods used to calculate participation rate may vary from country to country.

##### Graduation Rate

Graduation rate is defined here as the total number of diplomas awarded as a percentage of the total number of Grade 12 students in a given school year. Only the public school system, i.e. public and separate schools, will be reported here. As well, the total diplomas do not include High School Equivalency diplomas. Grade 12 enrollment totals also include a number of students who already have diplomas but have returned to school to upgrade their diplomas, mostly for post-secondary entrance.

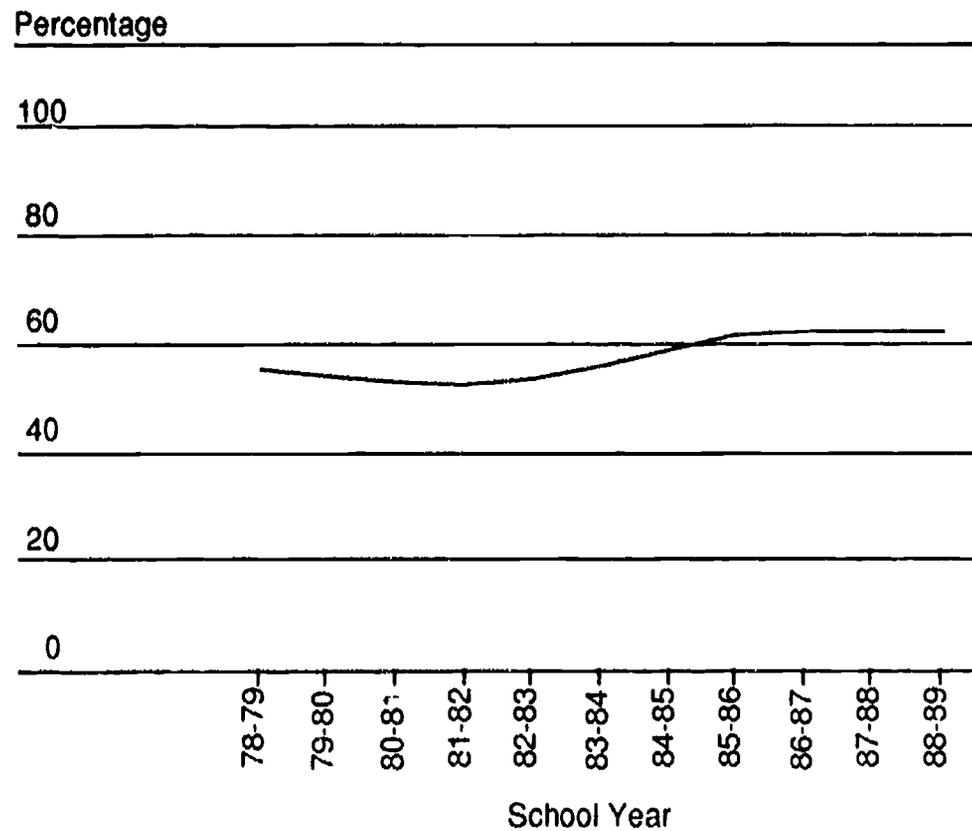

Because of the exclusion of the other school systems as well as the high school equivalency diplomas, the graduation rate for Alberta's public and separate schools may appear lower if compared to other province or states in the United States. Usually, graduation rate data are not directly comparable as the methods used to calculate graduation rates

may be significantly different.

In 1987-88, the graduation rate in Alberta's public and separate school system was 55.3 per cent, down from 58.7 per cent in 1983-84. However, if all Grade 12 students (excluding Lloydminster) enrolled in *all* of Alberta's school systems (i.e. public, separate, private, NWT, etc.), and *all* diplomas awarded to students in all the school systems were included, the graduation rate for 1987-88 would be 67.2 per cent, down from 68.6 per cent in 1983-84.

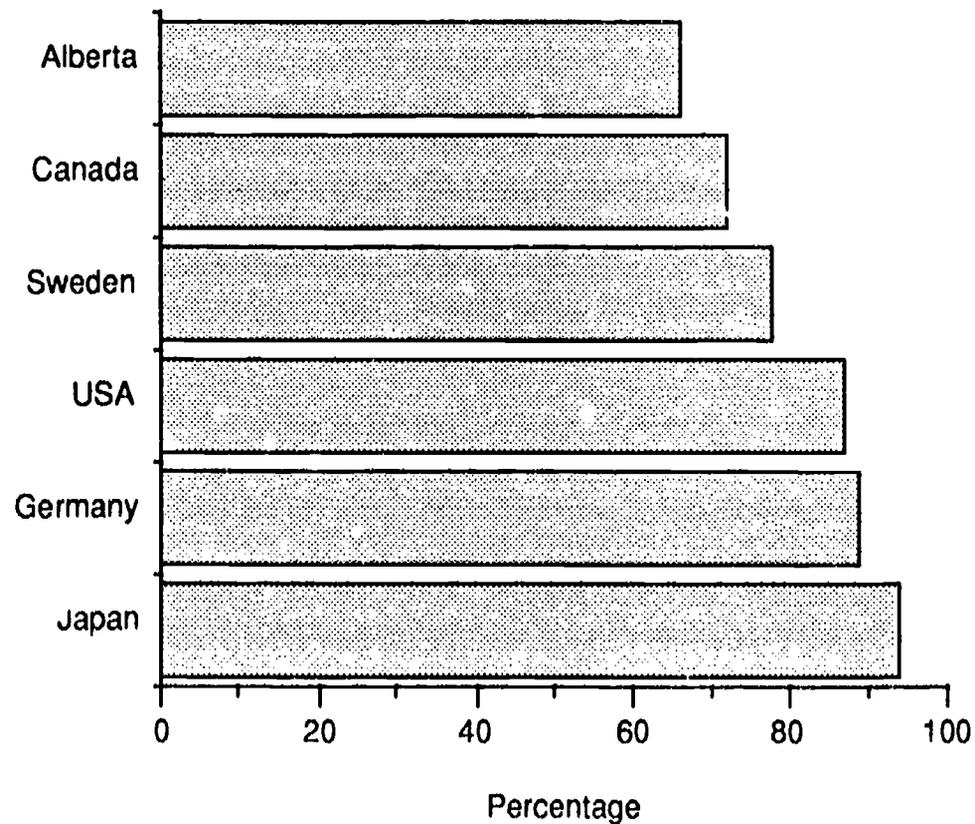

Some comparative provincial and American states' graduation rates for the most recent years available are: Ontario - 69 per cent (1987); Quebec - 68 per cent (1989); Newfoundland - 65 per cent (1987); U.S. average - 71.1 per cent (1987); Florida - 59 per cent (1987); Minnesota - 91 per cent; California - 66 per cent (1987).

**Figure 3.8.a**  
Participation Rates of 14-19 Year Olds,  
Alberta, 1978-79 to 1988-89

**Note:** For complete figures, see Appendix 2-4, page 77.  
**Source:** Alberta Education.

**Figure 3.8.b**  
Participation Rates of 17 Year Olds in Formal Education,  
Alberta and Selected OECD (Organization of Economic  
Cooperation and Development) Countries, 1988-89

**Source:** Rona Maynard, "Look, Jane, Dick Can't Read",  
*The Globe and Mail* (April 21, 1989). Alberta Education.

### 3. EDUCATIONAL OUTCOMES/RESULTS

#### 3.8 Student Participation

##### **Early School Leaver (or Drop-Out) Rate**

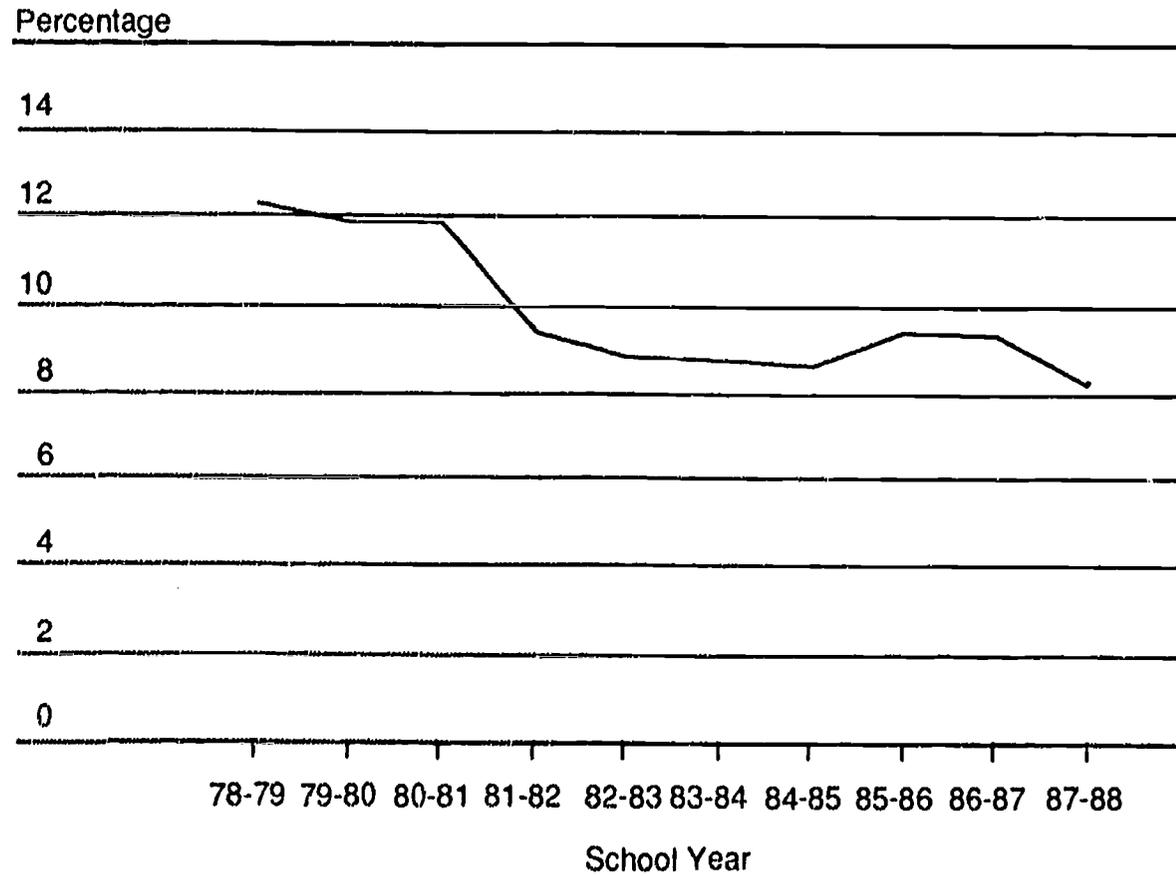

Early school leavers or drop-outs are defined here as: 14 to 18 year old students, registered by September 30th, and not in school the following September 30th. These students did not receive a diploma, and did not complete other school programs. Adjustments to the registration data must be made to account for age-specific interprovincial and international migration, and mortality rates.

In 1987-88, the early school leaver rate in Alberta's public, separate and private schools was 8.3 per cent, the lowest since 1978-79, and down from the 1986-87 rate of 9.4 per cent. In 1978-79, the drop-out rate was 12.4 per cent.

Comparative provincial data for the most recent years available are: Newfoundland - 5.3 per cent (1987); British Columbia - 7.1 per cent (1985-86); Ontario - 13.1 per cent (1984-85). In 1987, Quebec

reported 33,400 drop-outs, and estimated that the probability of leaving secondary school before graduation for its students was 32.4 per cent. Caution is advised in comparing data from different provinces, since the definitions of and data collection methods may vary considerably.

### 3. EDUCATIONAL OUTCOMES/RESULTS

#### 3.9 Grades 3, 6, and 9 Achievement Test Results

In 1988, Alberta Education administered tests in Grade 3 Social Studies, Grade 6 Language Arts, and Grade 9 Mathematics. The 1988 achievement tests were based on the prescribed objectives of the *Grade 3 Social Studies*, *Grade 6 English Language Arts*, and *Grade 9 Mathematics* provincial programs of studies.

The Grade 3 Social Studies Achievement Test consisted of 50 multiple-choice questions on knowledge and inquiry skills. In 1988 the test was administered to 29,961 students, compared to 25,775 students in 1984.

The Grade 6 English Language Arts Achievement Test was a two-part test. Part A, Composition, consisted of an assignment in which students were required to write a story based on a story starter. Part B, Reading, consisted of 50 multiple-choice questions on a variety of literary and expository

reading selections. A total of 32,069 students wrote the Grade 6 English Language Arts Achievement Test in 1988, as compared to 28,812 students in 1984.

The Grade 9 Mathematics Achievement Test consisted of 75 multiple-choice questions on the first six strands in the core program. The test was written by 25,290 students in 1988, excluding 1,867 students who were exempted due to their involvement in piloting the new Mathematics Program of Studies. In 1984, 27,121 students took the Grade 9 Mathematics Achievement Test.

##### Summary of Test Results

Student achievement in *Grade 3 Social Studies* in 1988 was about as high as expected. Results show that 80.0 per cent of the students who wrote the test achieved an acceptable performance level and 18.8

per cent achieved an outstanding level. A comparison of 1984 results show that achievement in 1988 was the same as in 1984.

In *Grade 6 English Language Arts*, student achievement was also high. Results show that 83.1 per cent of the students who wrote the test achieved an acceptable performance level and 9.9 per cent achieved an outstanding level. A comparison with results in 1984 shows that, overall, achievement was higher in 1988.

Student achievement in 1988 in *Grade 9 Mathematics* was higher than expected. Results show that 88.9 per cent of the students achieved an acceptable level of performance and 24.3 per cent achieved an outstanding level. A comparison with results in 1984 indicate higher achievement in 1988.

**Table 3.9**

Summary of Achievement Test Results:  
Grades 3, 6, and 9, 1983 and 1987

	1983 Test	1987 Test
<b>Grade Three Social Studies</b>		
Number of Questions	50	50
Number of Students Writing	25,775	29,961

### 3. EDUCATIONAL OUTCOMES/RESULTS

#### 3.10 Major Activities of High School Graduates

In December 1988, Alberta Advanced Education with the assistance of Alberta Education conducted a survey of the 1987-88 high school graduates. The survey collected information on the post-secondary education experiences, plans and other characteristics of these recent graduates.

A random sample of 1,250 high school graduates was selected from the population of 21,905 secondary school students who received an Alberta high school diploma between September 1, 1987 and August 31, 1988. A total of 780 Alberta high school graduates responded to the survey. After adjusting for those graduates who could not be located and for those who should not have been included in the sample, as they were not 1988 graduates, the 780 replies received represented a response rate of 65.1 per cent. Although the graduates who responded to the survey are reasonably representative of the 1988 high school graduates population, generalizations to the population should be made with caution regarding the region in which the students graduated, their gender and their matriculation status.

Only selected areas of the survey results are summarized here. (For more about the survey instrument and other information, or for a copy of

the full report, please contact the Research and Information Support Branch of Alberta Advanced Education).

##### Plans prior to high school graduation

Graduates were asked what their plans were in Grade 12 for most of the first year after graduation. It was found that 64.6 per cent of the graduates surveyed said they had planned to continue with their education. Thirty-one per cent planned to work, and 2.3 per cent planned to travel. The remaining 2.1 per cent of the graduates either did not respond, listed other activities or indicated that they were undecided.

##### Actual and Major Activity of Graduates

Although many graduates' responses indicated that they were involved in more than one activity (such as working and attending school), the following summary represents their major activity after high school graduation. Well over half of recent Alberta high school graduates followed a direct route into higher education. It was found that 57.9 per cent of the graduates surveyed were continuing their education full-time in post-secondary institutions. Another 30.9 per cent were engaged in paid or self-employment, while 2.9 per cent of the graduates were unemployed and looking for work. Other

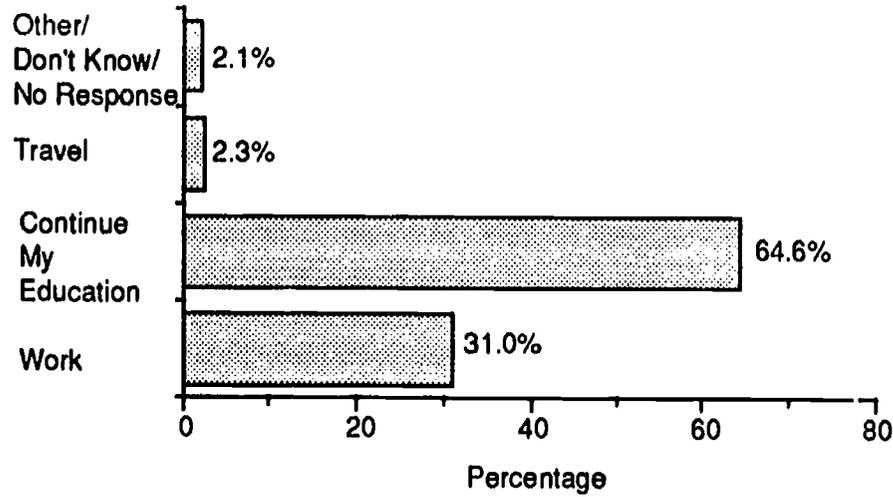

activities accounted for 8.0 per cent of graduates.

##### Participation in Post-Secondary Education

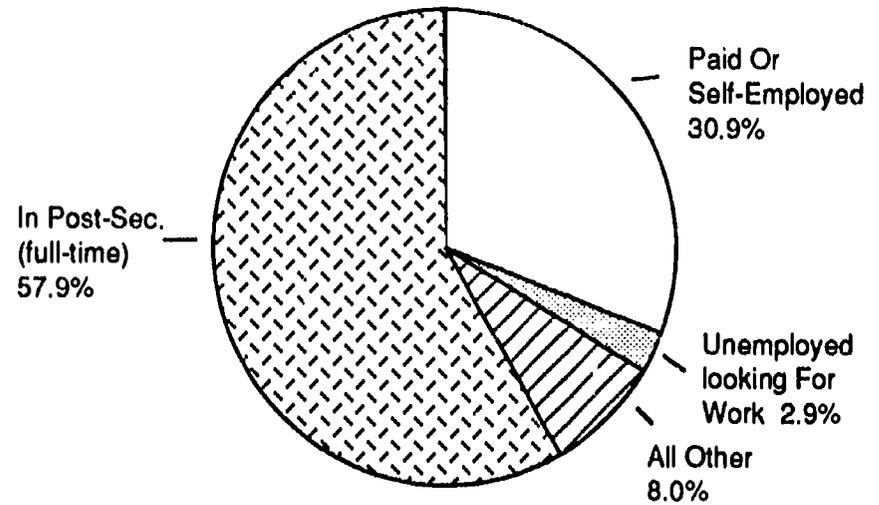

Apart from the 57.9 per cent of the graduates who were attending post-secondary schools on a full-time basis, it was found that four per cent of graduates were attending post-secondary institutions on a part-time basis, while 10.4 per cent indicated that they were attending a high school at the time of the survey. The remaining 27.7 per cent of graduates were not participating in any type of educational activity.

Among the graduates who continued their education full-time in post secondary institutions, 44.9 per cent were in universities, 39.3 per cent were in colleges or technical institutes, 7.2 per cent were in other types of Alberta post-secondary institutions, and 8.6 per cent were attending post-secondary institutions outside of the province. The Grade 12 averages of graduates were significantly related to the type of institution attended. Among those who entered post-secondary schools on a full-time basis, those with Grade 12 averages of 70 per cent or over, compared to those with lower grades, were much more likely to be attending university.

### 3. EDUCATIONAL OUTCOMES/RESULTS

---

#### 3.11 Enrollment in Alberta Post-Secondary Institutions

In recent years, an increasing number of Alberta's high school graduates are attending various post-secondary institutions in the province. New student data for 1988-89 supplied by the various post-secondary institutions and by Alberta Advanced Education shows that, of students moving on to further studies *directly* from high school on a full-time basis, 58.9 per cent enrolled in studies at the Universities of Alberta, Calgary, and Lethbridge. Another 12.7 per cent attended a technical institute, 27.0 per cent attended a community college and the remaining 1.4 per cent attended schools of nursing and adult education programs.

Table 3.11 shows the enrollment statistics for new part-time and full-time students who entered directly into a post-secondary institution after high school, as well as the statistics for those who delayed their entry. Of the total new post-secondary students, full and part-time, who last attended an Alberta high school, 34.7 per cent enrolled in studies at an Alberta university, 24.7 per cent attended a technical institute, 33.8 per cent attended a community college, 1.3 per cent attended a nursing school, and 5.5 per cent attended an adult education centre.

Precise statistics about what programs or fields of study students choose are not available. A general observation is that, for those who attend universities, the majority enroll in the arts and sciences. However, at the technical and college levels, students enroll in highly specialized programs or career-preparation fields. Some also enter university transfer programs.

### 3. EDUCATIONAL OUTCOMES/RESULTS

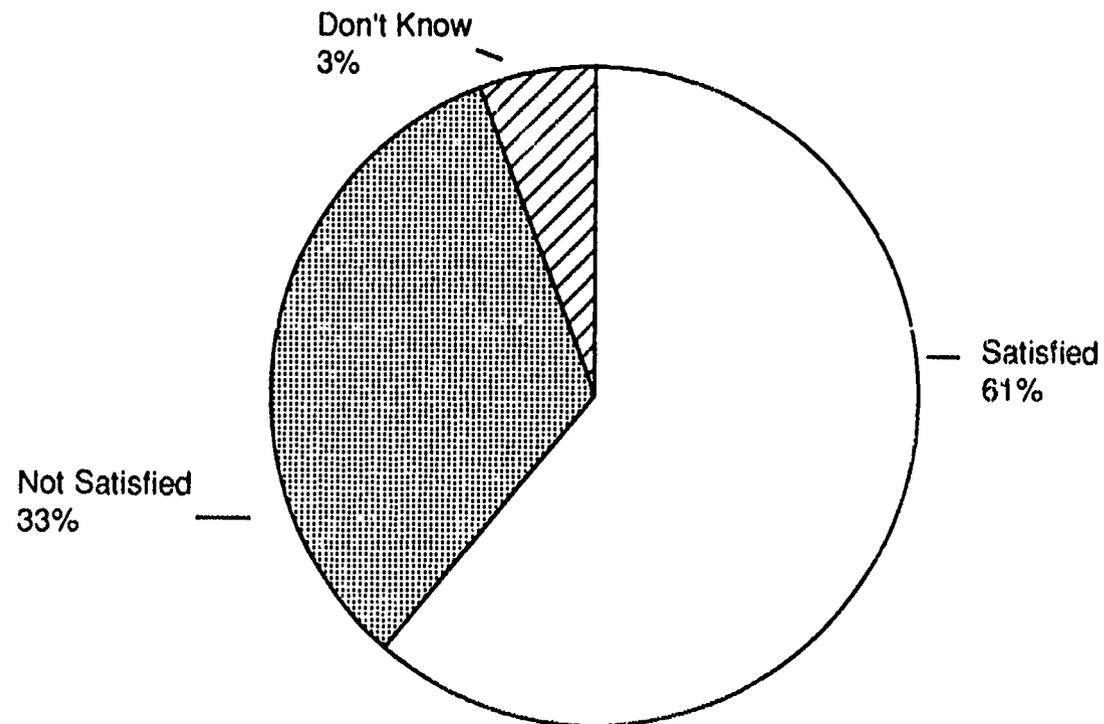

#### 3.12 Public Satisfaction

In 1988, Alberta Education commissioned Gallup Canada, Inc. to conduct an in-home survey of residents of Alberta aged 18 and over. The objective of the study was to obtain measures of public attitudes toward both education in Alberta and how education affects students and society.

The context within which education takes place can have a marked effect on the success of the teaching/learning experience. Among those variables that are important are the instructional climate of the school itself and the opinion and support of parents and community.

Presented here are some key findings concerning the standards and goals of education, and the strengths, weaknesses, and performance of Alberta schools as measured by public opinion.

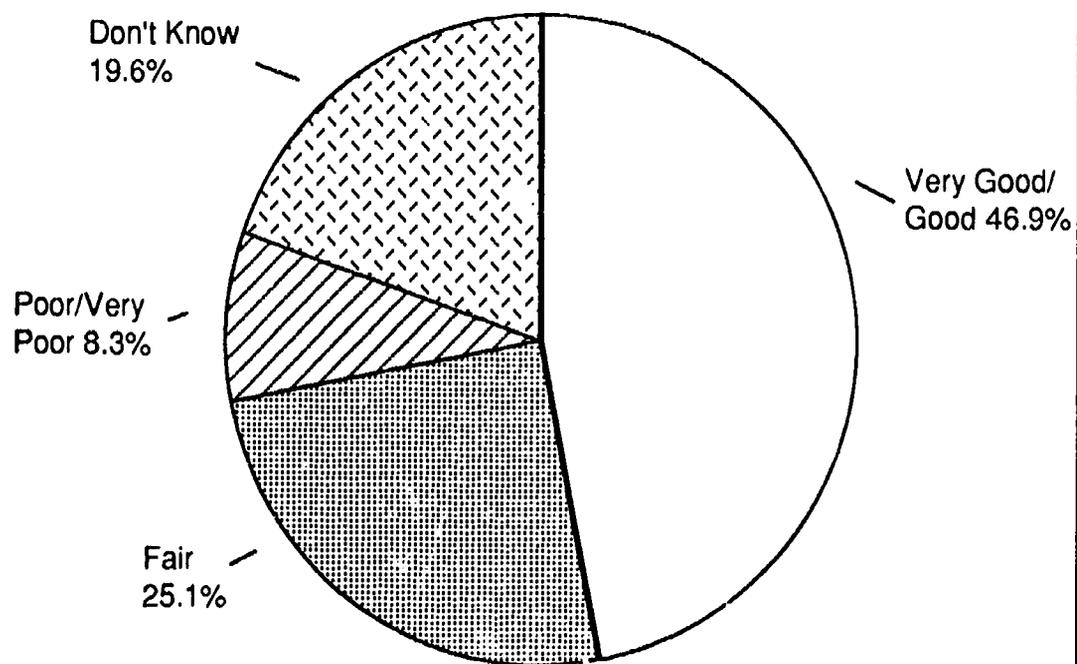

Are you satisfied with the quality of education in Alberta schools?

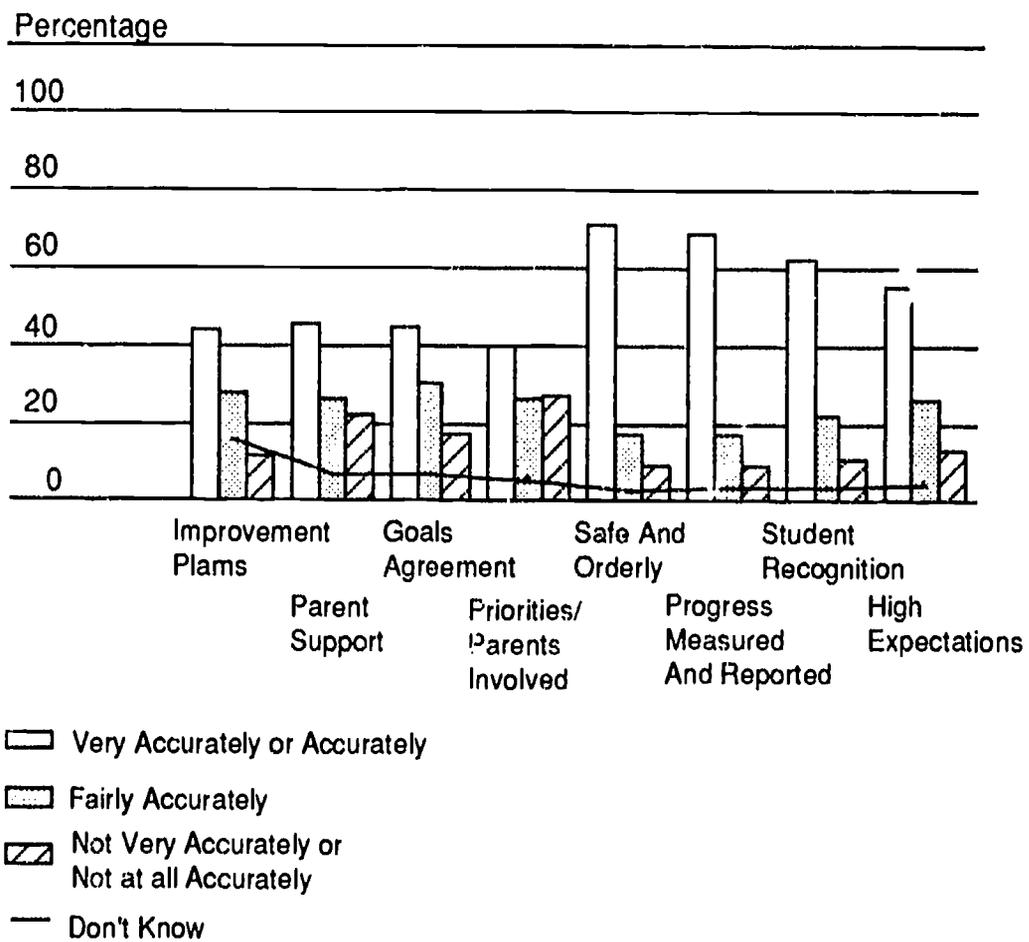

**Note:** Based on respondents (49%) who feel they have enough information to confidently assess the quality of education in Alberta.

Sources: Alberta Education 1988 Gallup Poll.

How would you rate the high schools in Alberta in providing a balanced program?

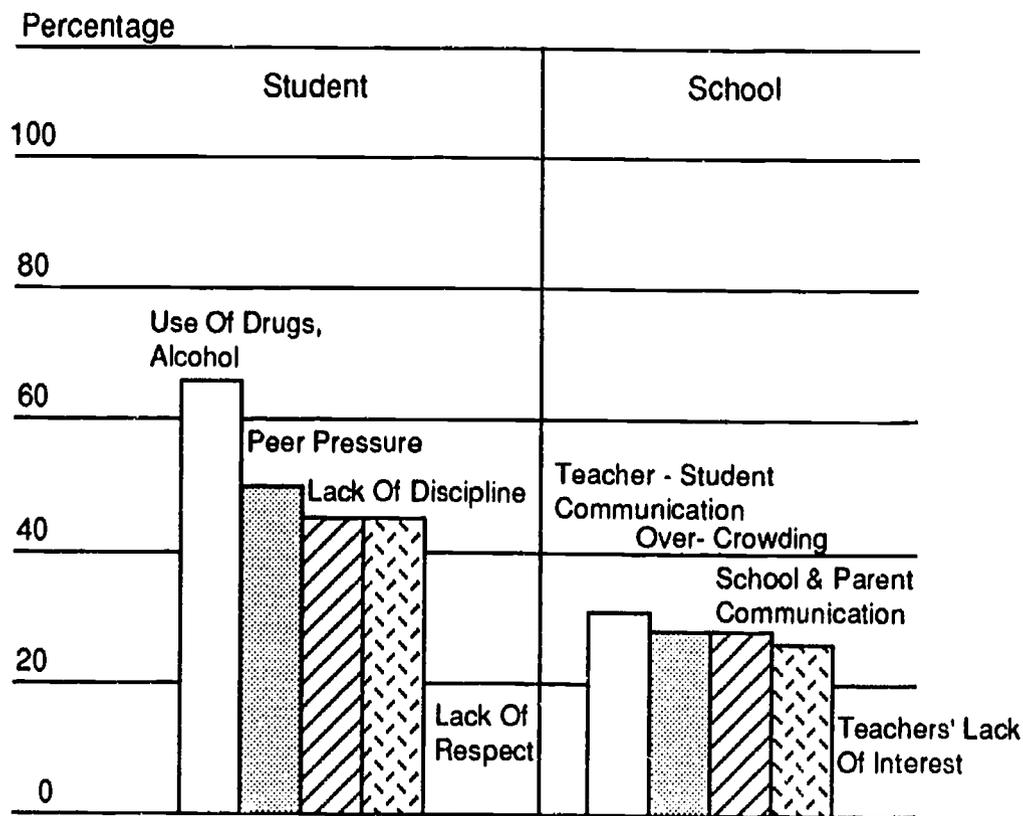

How well these characteristics of a good school described the school your oldest child attends?

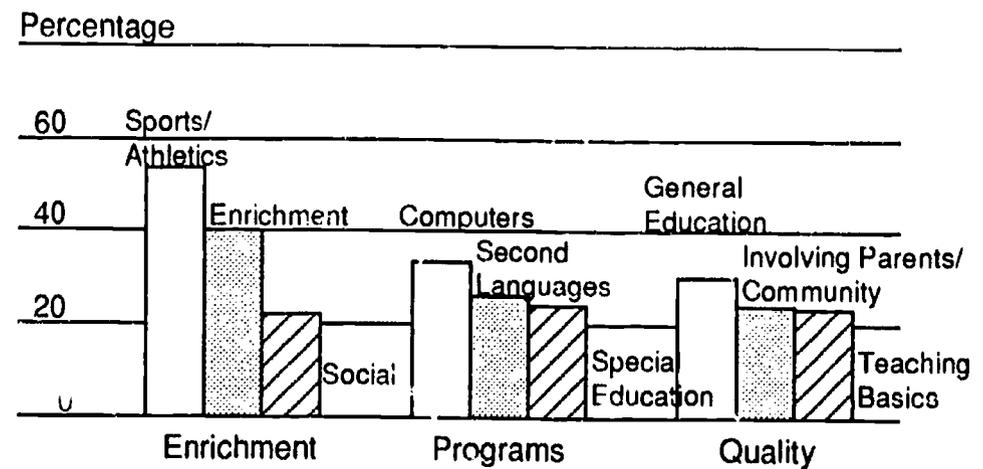

Sources: Alberta Education 1988 Gallup Poll.

### 3. EDUCATIONAL OUTCOMES/RESULTS

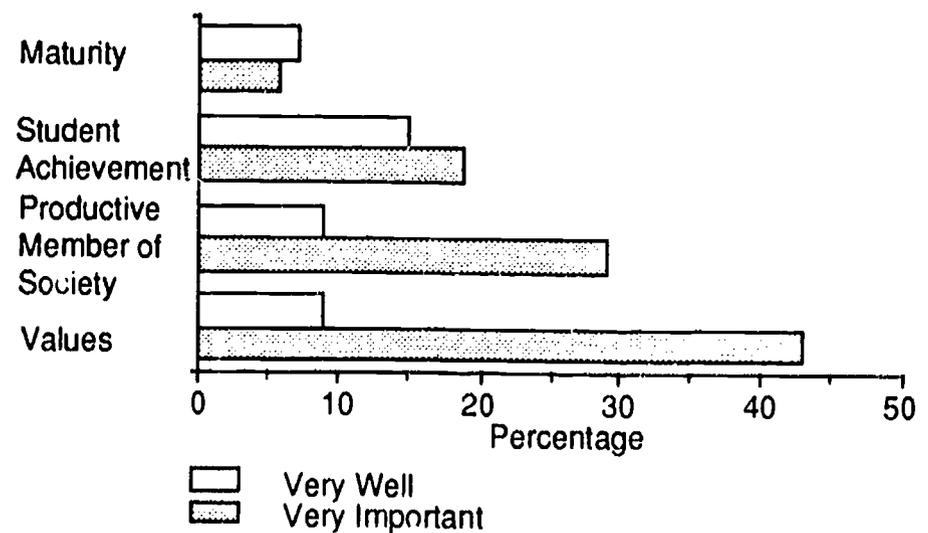

What do you think are the most important problems facing Alberta schools?

Which areas are the schools in your community doing a particularly good job?

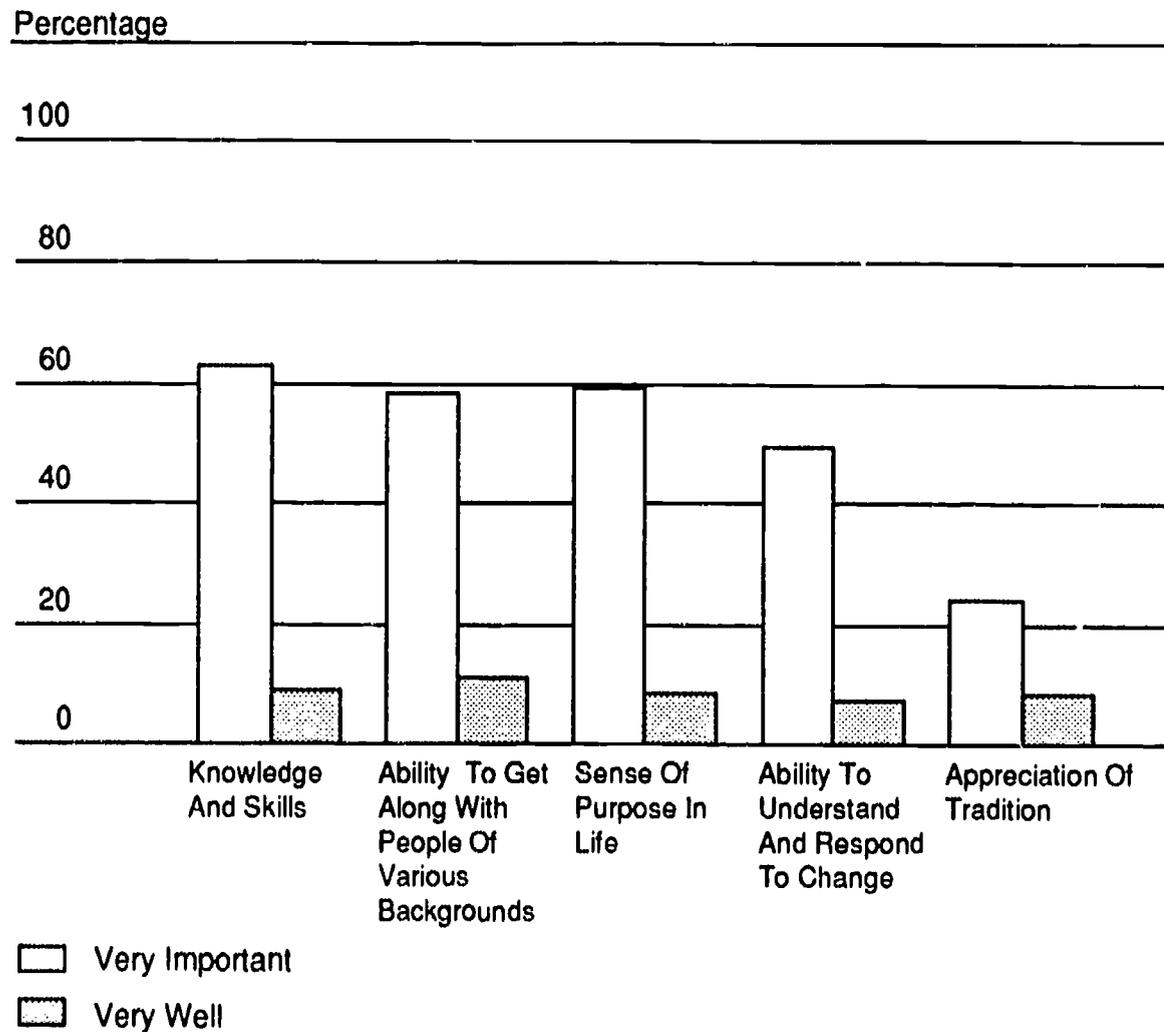

How well you think the schools in Alberta assist students to achieve these standards? How important are these standards?

Source: Alberta Education 1988 Gallup Poll.

How important are the stated purposes of education in Alberta? How well you think schools in Alberta achieve each purpose?

Source: Alberta Education 1988 Gallup Poll.

### 3. EDUCATIONAL OUTCOMES/RESULTS

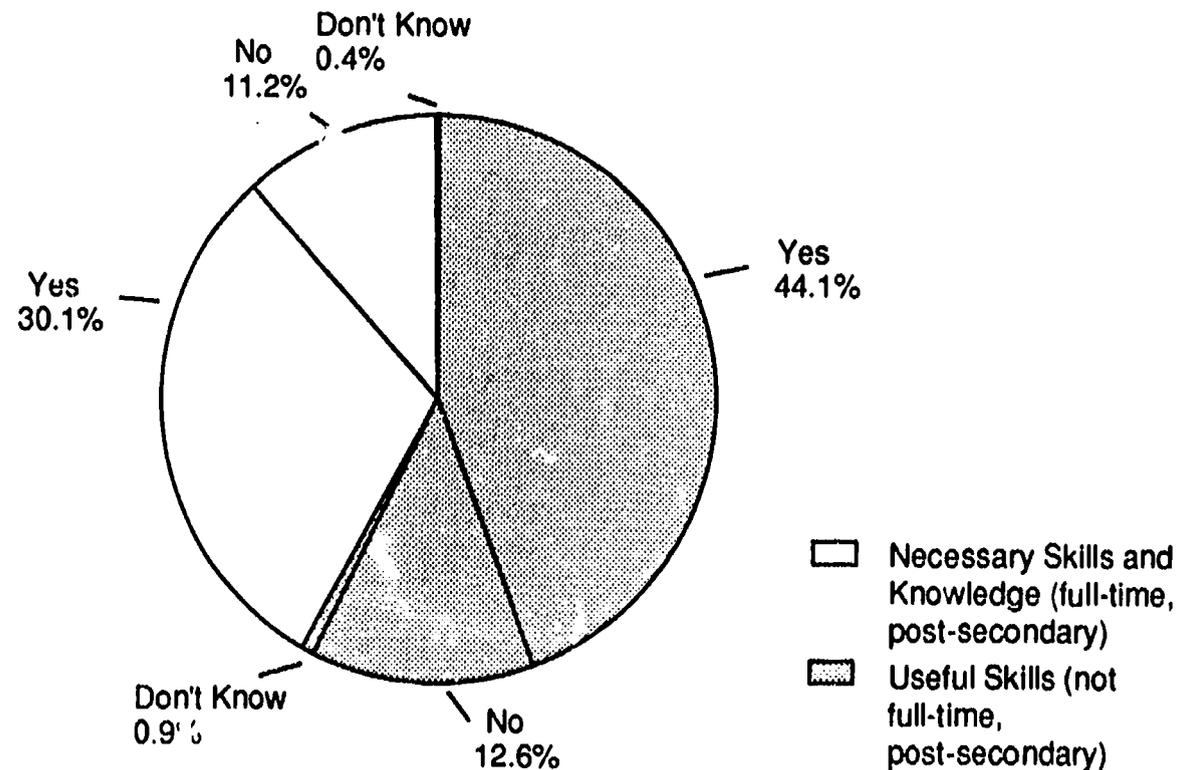

#### 3.13 Student Satisfaction

In December 1988, Alberta Advanced Education conducted a survey of recent Alberta high school graduates, to collect information on the post-secondary educational experiences, plans and career aspirations of high school graduates. A stratified

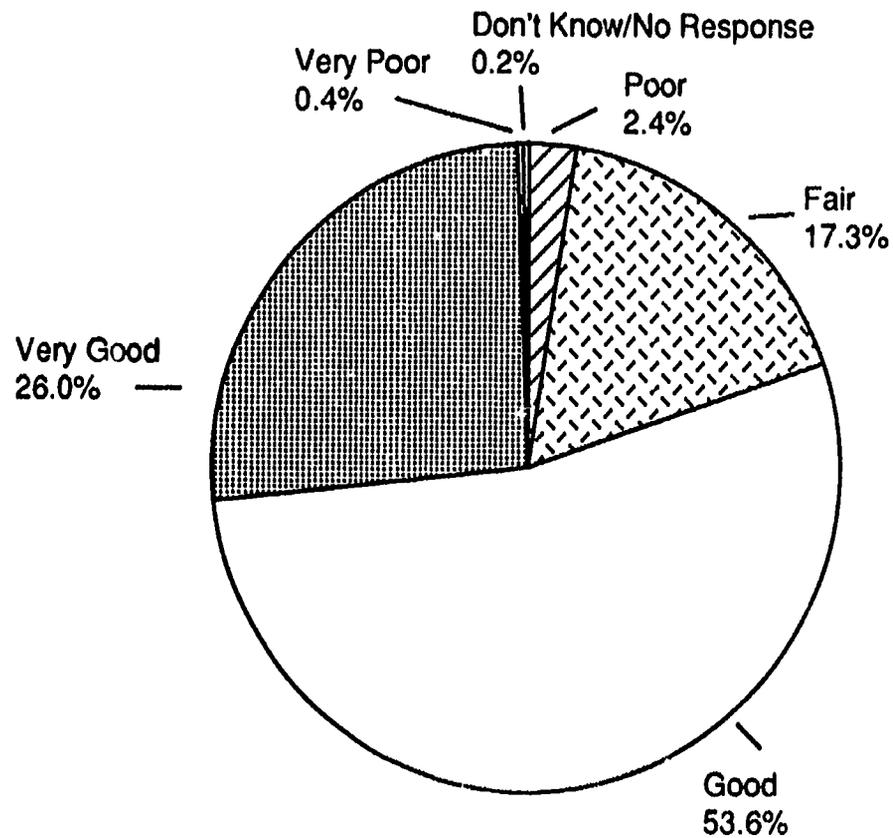

random sample of 1,250 graduates was selected from the population of 21,905 secondary students who received an Alberta high school diploma between September 1, 1987 and August 31, 1988. A total of 780 graduates responded to the survey,

representing a return rate of 65.1 percent. Presented here are some findings that reflect students satisfaction and their rating of the education received in Alberta schools.

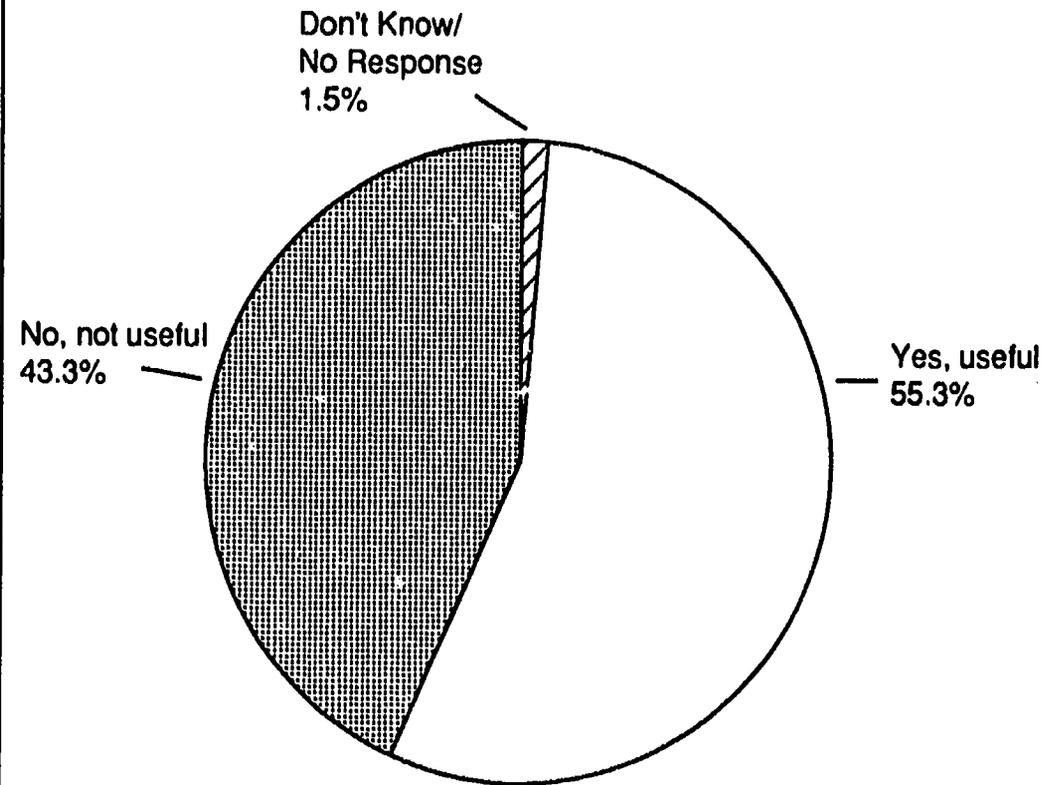

Do you feel that your high school courses provided you with useful skills or knowledge?

How would you rate the quality of education that you received in high school?

Would you say the skills and knowledge learned in high school useful in making decisions about your immediate future?

Source: Alberta Advanced Education.

## GLOSSARY OF TERMS

---

**Academic Year** - September 1 to August 31.

**Achievement Test** - An examination that measures the extent to which a student has acquired certain information or mastered certain skills, usually not as a result of specific instruction.

**Advanced High School Diploma** - High school diploma granted to students who successfully complete specified courses and earn a minimum of 100 credits. There are more core requirements, and less opportunity to take complementary courses, than in the general high school diploma program.

**Advanced With Excellence** - High school diploma granted to a student who qualifies for the Advanced High School Diploma and earns a final average of 80 per cent or higher. The student may not have less than 65 per cent in any one of the four required diploma examination courses.

**Alberta Education** - The Ministry, or the Department of Education, of the Government of Alberta.

**Calendar Year** - January 1 to December 31.

**Certificated Staff** - Teachers, administrative (non-instructional) as well as classroom teaching (instructional) staff, who possess a valid Alberta teaching certificate.

**Child** - refers to a person who attends an Early Childhood Services program, whose parent or guardian is ordinarily resident in Alberta, and whose school entrance age is set by the board of the district, division or county in which the parents or guardians of the child reside, or in the School Act.

**Cohort** - A group of individuals that have a statistical factor in common, for example, year of birth.

**Consumer Price Index (CPI)** - The index is used to measure the movement of prices in each province. It does not indicate price level differences between provinces.

**Dollars (Constant or Real)** - Current dollars inflated to 1988 value in order to see the growth (or lack of it) in the actual purchasing power of the current dollar.

**Dollars (Current or Nominal)** - Actual dollars spent for the year named.

**Educational Attainment** - The highest grade of regular school attended and completed.

**Equity Grants** - Introduced in Alberta in 1984 and planned to be phased in over five years. At full implementation, equity grants would bring all districts with below average fiscal capability up to 80 per cent of the provincial average supplementary requisition per pupil.

**Exceptional Students** - Students who require a different program or an adaptation or modification to the regular school program. Exceptional students include students with severely handicapping conditions, mildly/moderately handicapping conditions, and students who are institutional/homebound.

**Fertility Rates** - Based on the number of live births to the number of women of child bearing age.

**Fiscal Year** - April 1 to March 31.

**French Immersion Program** - A program intended for English speaking students where French is used as the language of instruction.

**French Minority Language Education Program** - A program intended for English speaking students where French is used as the language of instruction. It is intended for students who qualify according to Section 23, of the Charter of Rights and Freedoms.

**Full-time Equivalent Teachers** - Includes all Grades 1 to 12 certificated staff, not just classroom teachers; excludes ECS private and private schools. Two half-time teachers are equal to one full-time equivalent.

**General High School Diploma** - High school diploma granted to students who successfully complete specified courses and earn a minimum of 100 credits. There is more choice in the level of difficulty of core courses, and there are fewer courses required in mathematics and science. There is also more opportunity to take complementary courses.

**Gifted and Talented** - Students who by virtue of outstanding abilities are capable of exceptional performance. Children capable of exceptional performance include those with demonstrated achievement and/or potential ability in one or several areas: general intellectual ability, specific academic aptitude, creative or productive thinking, visual and performing arts ability, leadership ability, and psychomotor ability.

**High School Equivalency** - High school diploma granted to persons 18 years of age and over, who have been out of school for at least ten consecutive months, who successfully complete specified courses and who earn a minimum of 100 credits.

**Institutional/Homebound** - Students of legal school age (ages 6 to 15 inclusive) who require educational services in a non-school environment such as a group home, correctional institution, hospital, or home.

**Learning Disabled** - Students who have chronic disorders that may be based on either an identifiable or inferred central nervous system dysfunction. These disorders may be manifested by difficulties in one or more processes such as attention and concentration, perception, coordination, memory, reasoning, organization, and planning. This results in demonstrable weaknesses in the language arts, mathematics, and/or in the student's social competence.

**Medium Population Growth Scenario** - It is based on Series Five of the Alberta Bureau of Statistics (ABS) Population Projections. The medium growth scenario reflects moderate net migration flows and moderate natural increase.

**Medium Enrollment Scenario** - Based on medium population growth scenario as defined by ABS.

**Mildly/Moderately Handicapped Children** - Mildly/moderately disabled child is one who is assessed as mildly or moderately mentally retarded, visually impaired, learning disabled, emotionally disabled or physically handicapped.

**Natural Increase** - A change in population size over a given period as a result of the difference between the number of births and deaths.

**Private Schools** - Schools operated and administered by individuals or groups.

**Public Schools** - Schools operated by local education authorities according to public school acts of the province.

**Pupil/Teacher Ratio** - The enrollment of pupils at a given period of time, divided by the full-time equivalent number of teachers serving these pupils during the same period.

**School Year** - July 1 to June 30.

**Secondary Schools** - Schools that offer academic courses in preparation for university. They also offer vocational courses that prepare students for an occupation or post-secondary education at a community college. The term "Secondary School" is synonymous with high school. Secondary School is also junior high school (Grades 7 to 12).

**Separate Schools** - Religious groups that establish schools under the authority of the Department of Education, and that conform to departmental regulations on curriculum text books and teacher certification. As a legal corporation, separate school boards can levy taxes and receive government grants.

**Special Education** - Direct instructional activities or special learning experiences designed primarily for students identified as having exceptions in one or more aspects of the cognitive process, or as being under-achievers in relation to their overall abilities.

**Total Fertility Rates** - The sum of age-specific rates, defined as the number of births per woman of a specific age group within the childbearing age group 15 to 49.

**Vocational Education** - A program of studies designed to prepare students for employment in one or more semi-skilled, skilled, or technical occupations.

**Appendix 8-1**

**Number of Teachers by Gender, 1978-79 to 1988-89**

School Year	Male	Female	Total
1978-79	10,545	13,322	23,867
1979-80	10,523	13,550	24,073
1980-81	10,455	14,146	24,601
1981-82	10,556	14,450	25,016
1982-83	10,889	15,333	26,222
1983-84	11,000	15,668	26,668
1984-85	11,118	15,975	27,093
1985-86	11,057	16,249	27,306
1986-87	10,919	16,341	27,260
1987-88	10,753	16,383	27,136
1988-89	10,644	16,588	27,232

- Notes:**
1. Numbers are actual teacher counts which include all certificated staff (Early Childhood Services to Grade 12) - administrative as well as classroom teaching staff.
  2. Statistics exclude teachers in private schools.
  3. 1981-82 to 1983-84: Discrepancies from original data due to recreation of files. For purposes of this document the latter statistics are used as they are calculated the same way as is done currently.
  4. Teacher statistics should be interpreted with caution because of unreported cases.

EL-JR-SR (and ECS)	35	1	0	1	42
Other Combinations	28	2	0	1	31
<b>Total</b>	<b>27,232</b>	<b>864</b>	<b>130</b>	<b>766</b>	<b>28,992</b>

- Notes:**
1. These counts include all certificated educational personnel, including central office administrative and/or support staff who may not necessarily be teaching. The GRADE LEVEL indicates the level which the person works with, whether in a teaching, administrative, or support role.
  2. Substitute and relieving teachers are Not included.
  3. Any Staff who work with SPECIAL EDUCATION only have been included in the 'SPEC ED only' count. i.e. they have not been categorized in a specific grade level.
  4. Any who work with SPEC ED students along with other grades have been categorized on the basis of the grades they deal with, without taking the SPEC ED levels into consideration (e.g. A teacher teaching Grades 1-3 and Jr. High SPEC ED will be categorized as 'GR 1-6').
  5. \* PUBLIC - includes all Counties, School Divisions, Public, Separate and Regional School Districts, and DND Districts.
  6. \*\* OTHER - includes Prov Gov't institutions (AVC's, Sch for Deaf, etc), schools in Prov. & Fed. jails, and Indian Affairs Schools.
  7. PRIVATE schools include all categories.

**Source:** Alberta Education.

**Appendix 9-1**

Pupil/Certificated Staff Ratio for ECS to Grade 12,  
Public and Separate Schools, 1973-74 to 1988-89

**Appendix 9-2**

Number of School Jurisdictions Within  
Specified (Pupil/Certificated Classroom  
Teacher Ratio) Ranges, 1988-89

School Year	FTE Pupils	FTE Teachers	Pupil/Certificated Staff Ratio (PCSR)	Range	Number
1973-74	425,085	22,536	18.9	8.50-9.99	2
1974-75	425,925	22,622	18.8	10.00-14.99	15
1975-76	430,763	22,614	19.0	15.00-19.99	68
1976-77	432,333	23,180	18.7	20.00-23.78	58
1977-78	430,879	23,242	18.5		
1978-79	427,889	23,238	18.4		
1979-80	425,443	23,407	18.2		
1980-81	427,835	23,878	17.9		
1981-82	431,278	23,743	18.2

1983-84	436,614	25,647	17.0		
1984-85	434,465	26,030	16.7		
1985-86	435,959	26,150	16.7		
1986-87	438,805	26,111	16.8		
1987-88	439,945	25,904	17.0		
1988-89	447,611	26,018	17.2		

- Notes:**
1. FTE pupils are calculated based on 0.5 of Early Childhood Services Enrollment and 1.0 of Grades 1-12 enrollment in public and separate schools.
  2. FTE teachers include all certificated staff (classroom teachers, administrative and support staff).
  3. PCSR is calculated based on all certificated staff.
  4. 1981-82 to 1983-84 teacher statistics discrepancies due to recreation of files. For purposes of this document these statistics are being used as they are calculated the same way as is currently done.
  5. Teacher statistics should be interpreted with caution because of unreported cases.

<b>Total Alberta</b>	<b>447611.5</b>	<b>21607.11</b>	<b>20.71</b>	<b>26018.47</b>	<b>17.20</b>

- Notes:**
1. FTE teachers include classroom teachers only, based on actual classroom teaching time.
  2. Excludes Lloydminster, School for the Deaf and private schools.
  3. Excludes substitute, relieving or intern teachers and private school teachers.
  4. FTE pupils are calculated based on 0.5 of Early Childhood Services enrollment and 1.0 of Grades 1-12 enrollment in public and separate schools.
  5. FTE System Staff include central office as well as school based staff (classroom teachers, administrative and support staff).
  6. "Others" includes Consolidates, Roman Catholic Public School Districts, Protestant Separate School Districts, Regional School Districts, and Department of National Defense.
  7. Teacher statistics should be interpreted with caution because of unreported cases.

**Notes:** 1. Statistics exclude Department of National Defense; revenue and expenditure statistics exclude Lloydminster. The local SFPF contribution includes revenues from the City of Lloydminster. 2. SFPF: School Foundation Program Fund is funded by a local tax levy on non-residential property and from the general revenues of the province. This fund provides basic support for instruction, transportation and debt retirement. 3. The 1986 local contribution to the SFPF is matched with the 1986 stub year revenues. From then on the calendar year SFPF is match with the last 8 months of the school fiscal year (ie: 86-87 matched with 1987 local contribution to SFPF). 4. Revenues and Expenditures: Stub 1986 is a 12 month equivalent, consisting of 1.5 \* the Jan. to Aug. 1986 A.F.S. of divisions and districts changing to the school fiscal year plus the calendar 1986 A.F.S. of the remaining divisions, districts and counties. 1986-87 consists of the 1986-87 A.F.S. of divisions and districts reporting on the school fiscal year plus 1.5 \* the Jan. to Aug. 1987 A.F.S. of divisions and districts changing to the school fiscal year plus calendar 1987 A.F.S. of counties. 1987-88 consists of 1987-88 A.F.S. of divisions and districts and the 1988 A.F.S. of counties.

1985	2.3 (1.3)	- (0.6)	22.9 (18.4)	5.5 (3.6)

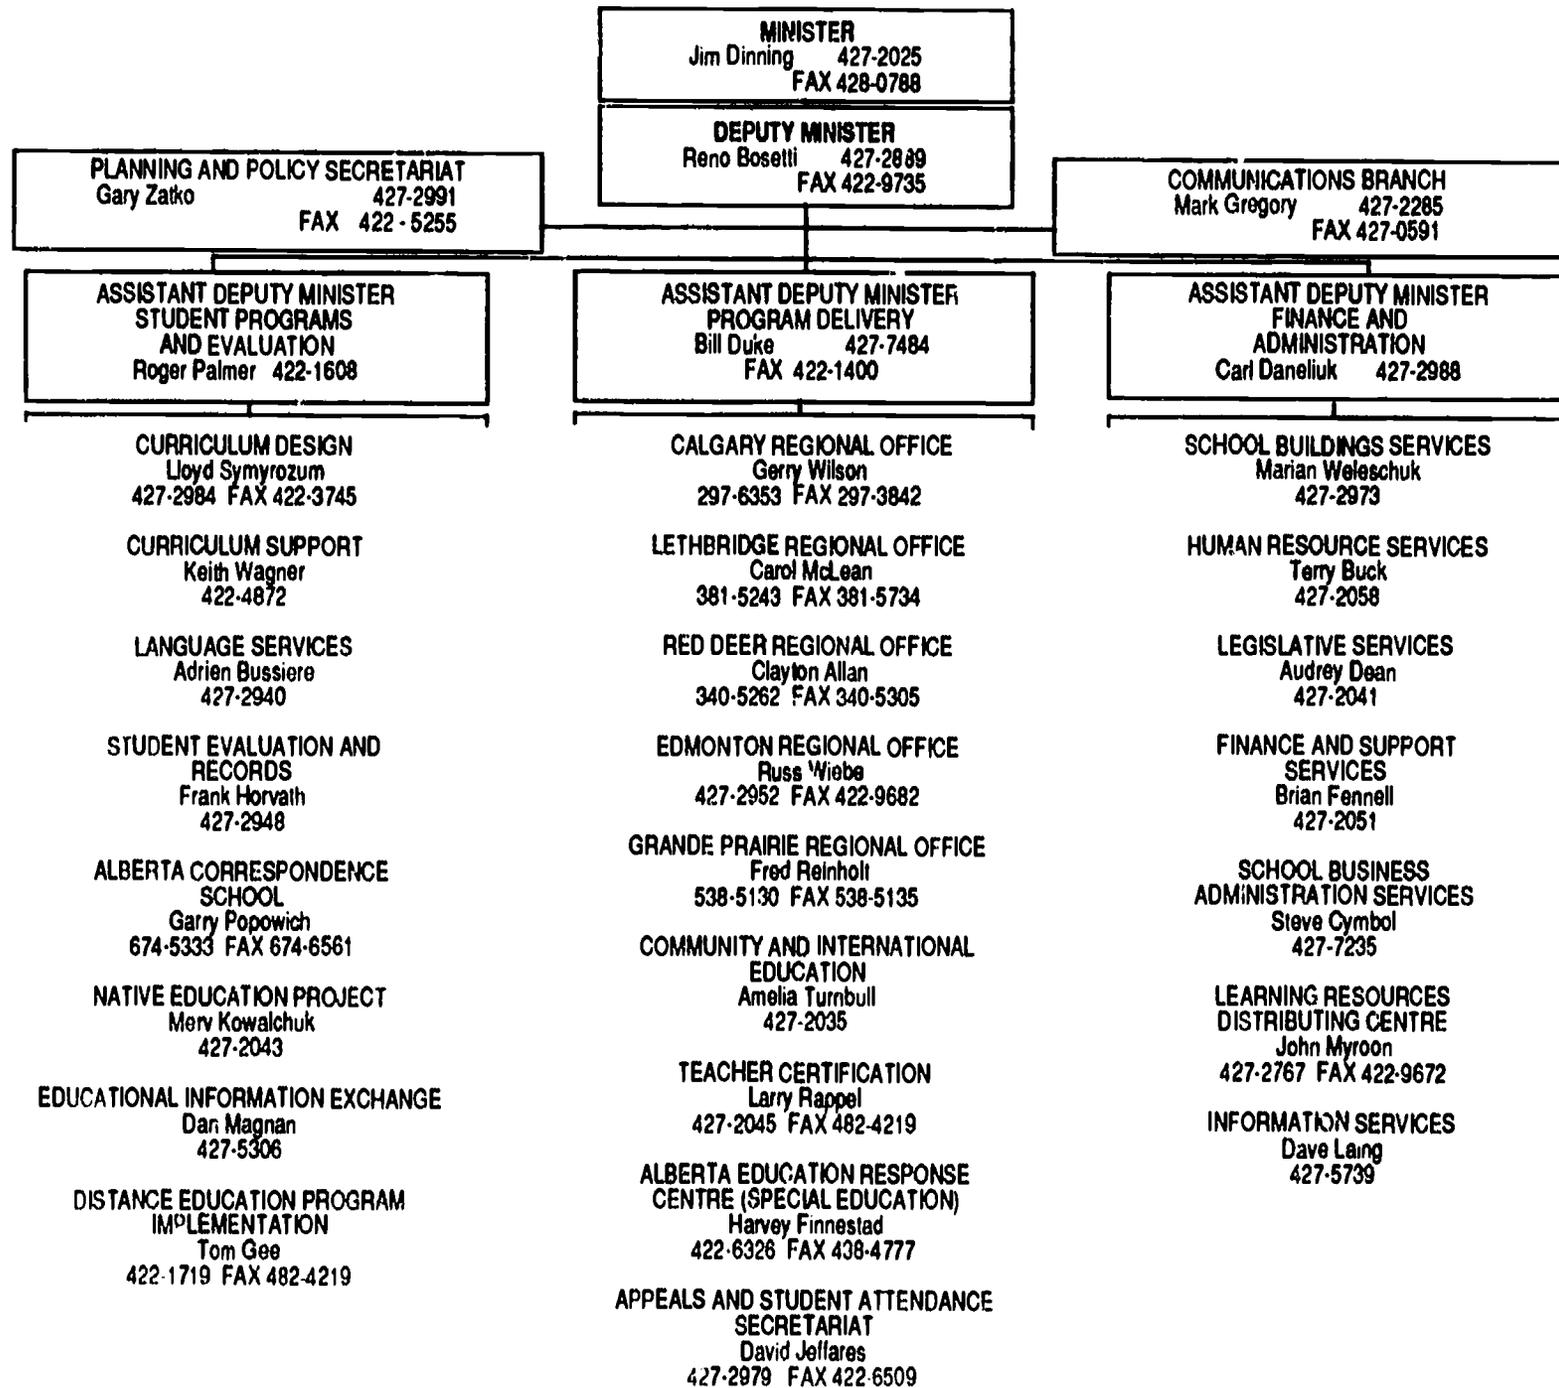

Notes: 1. A single dash (-) in a cell of the Table indicates that there were no suicides for that age group in the specified year.

2. For national comparisons, Canadian suicide rates are those in brackets.
