ABSTRACT

This report includes the first results on salaries of full-time instructional faculty on 9- and 10-month contracts that have been collected through the new Integrated Postsecondary Education Data System (IPEDS). Data revealed that in 1987-88, full-time faculty in institutions of higher education earned an average of \$35,900. Full professors averaged the highest salary, \$47,000, while instructors earned the least, \$22,700. Other findings include the following: (1) recent increases in salaries have helped full-time faculty regain the purchasing power they had in 1977-78; (2) average faculty salaries for public institutions are higher than those for private institutions, but the difference narrowed in 4-year schools; (3) the number of full-time faculty on 9- and 10-month contracts has increased about 1 percent annually between 1977-78 and 1987-88, from 324,300 to 356,000; (4) average salaries in constant dollars continue to be higher for males than for females, \$38,100 versus \$30,500 in 1987-88; and (5) the proportion of women faculty in higher education is slowly increasing, going from 25.4 percent in 1977-78 to 29.1 percent in 1987-88. Statistical data are detailed in nine tables. (GLR)

Highlights

In 1987-88, full-time faculty in institutions of higher education earned an average of \$35,900. Full professors averaged the highest salary, \$47,000 while instructors earned the least, \$22,700. Other findings include the following:

- o Recent increases in salaries have helped full-time faculty to regain the purchasing power they had in 1977-78.
- o Average faculty salaries for public institutions are higher than those for private institutions, but the difference narrowed in 4-year schools.
- o The number of full-time faculty on 9- and 10-month contracts has increased about 1 percent annually between 1977-78 and 1987-88, from 324,300 to 356,300.
- o Average salaries in constant dollars continue to be higher for males than for females, \$38,100 versus \$30,500 in 1987-88.
- o The proportion of women faculty in higher education is slowly increasing, going from 25.4 percent in 1977-78 to 29.1 percent in 1987-88.

This report includes the first results on salaries of full-time instructional faculty on 9- and 10-month contracts that have been collected through the new Integrated Postsecondary Education Data System (IPEDS). In prior years, data were collected through the Higher Education General Information Survey (HEGIS).

Appendix Tables

A. Average salaries in current and constant dollars of full-time instructional faculty on 9- and 10-month contracts in institutions of higher education, by sex and academic rank: 50 States and D.C., 1977-78 through 1987-88 10

B. Average salaries in current dollars of full-time instructional faculty on 9- and 10-month contracts in institutions of higher education, by academic rank and sex: 50 States and D.C., 1977-78 through 1987-88 11

C. Average salaries in current dollars of full-time instructional faculty, on 9- and 10-month contracts in 4-year higher education institutions, by academic rank and State: academic year 1987-88 12 12

D. Average salaries in current dollars of full-time instructional faculty on 9- and 10-month contract in institutions of higher education, by academic rank, sex, and type and control of institution: 1977-78 through 1987-88 13

E. Consumer Price Index (CFI) factors: 1977-78 through 1987-88 14

Introduction

Average salaries for full-time instructional faculty have regained the purchasing power of 11 years ago. Academic year 1987-88 marked the 7th consecutive year that average faculty salaries at institutions of higher education outpaced inflation. These increases in real income reversed an earlier trend of income losses, the most notable occurring in academic year 1979-80 when salaries fell 5.1 percent in one year.

In 1977-78 the average salary in constant (1987-88) dollars was \$34,600 and increased to \$35,900 in 1987-88 (table 3). However, in the 7 years that salaries outpaced inflation, the real 1987-88 growth of 2.0 percent represented a significant slowdown from 1985-86 when real salaries grew 3.4 percent (figure 1).

When average salaries are examined by academic rank, professors, associate professors, and assistant professors (who together compose 77.6 percent of the faculty) have regained their purchasing power from 1977-78. However, the salaries for "instructor," "lecturer" and "no academic rank" have actually lost ground to inflation (figure 2). The average salary in constant dollars for "no academic rank" decreased from \$33,000 in 1977-78 to \$31,500 in 1987-88 (table 1).

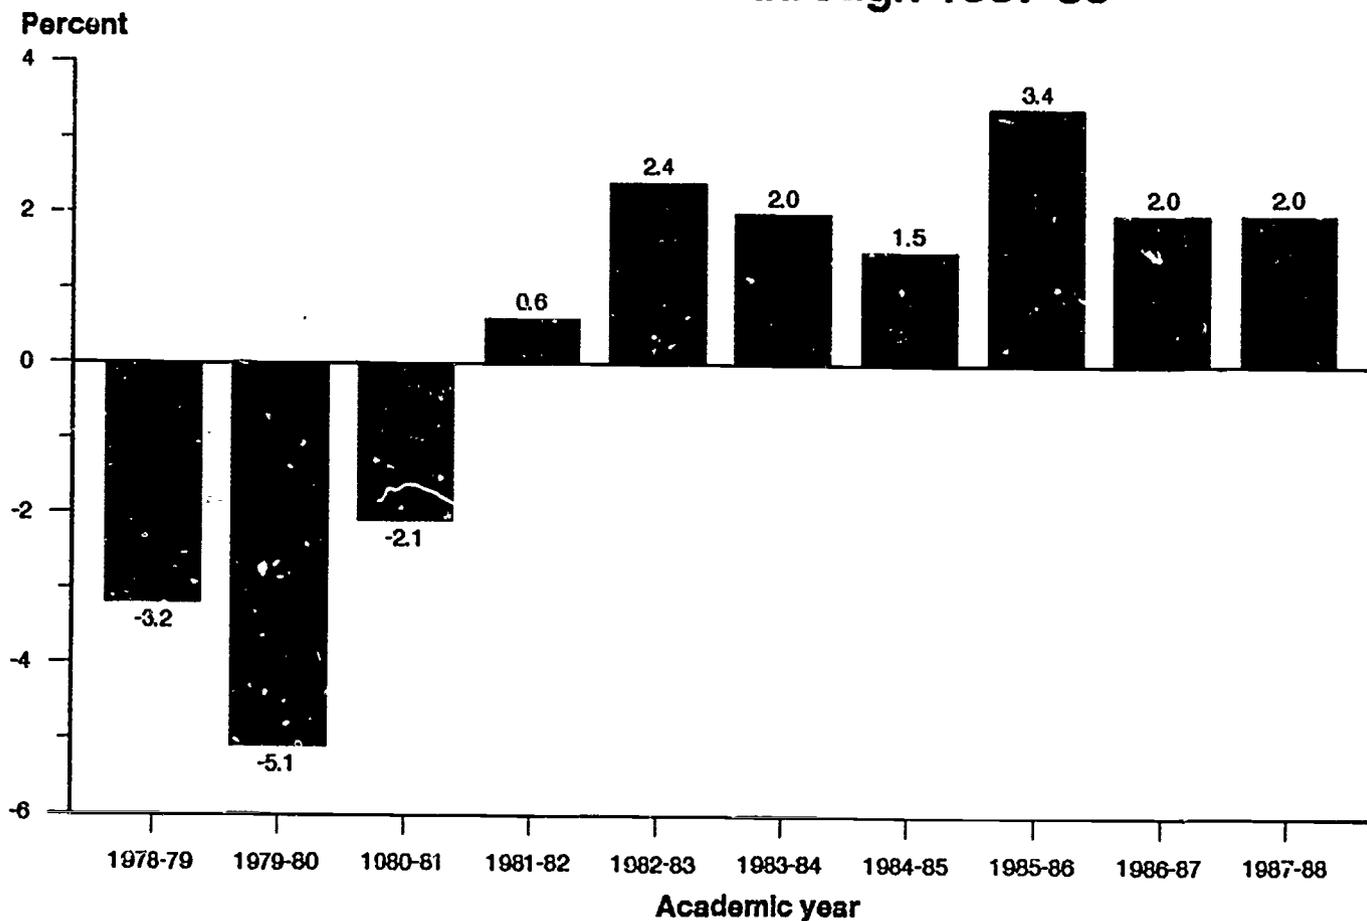

In 1987-88, average salaries in constant dollars ranged from \$47,000 for professors to \$22,700 for instructors (table 1). Professors received the largest salary increase over the 11-year period, from \$46,500 in 1977-78 to \$47,000 in 1987-88. The smallest salary increase occurred for the rank of associate professors, who earned \$35,100 in 1977-78 and \$35,200 in 1987-88.

Salaries, by Type and Control of Institution

Over the past 11 years, the average salaries in current dollars by institutional control have shown a consistent pattern. Salaries at public institutions have remained higher than those at private institutions. However, the gap in salaries by rank between public and private 4-year institutions has narrowed since 1977-78. For example, in 1977-78 salaries for professors in public 4-year institutions were 5.1 percent higher than professors' salaries in private 4-year institutions. In 1987-88, the difference was only 1.7 percent (table 2). The pattern was similar across the other academic ranks in 4-year institutions with the exception of "no academic rank".

Salaries in public 2-year institutions are higher than those in private 2-year institutions. For example, in 1977-78 the salaries for professors at public 2-year institutions were 64.2 percent higher than salaries of professors at private 2-year institutions. In 1987-88 the percent difference had narrowed but still remained at nearly 47.2 percent. The percent difference actually increased for associate professors (from 33.9 percent to 40.0 percent), assistant professors (from 29.8 percent to 33.2 percent), and instructors (from 32.3 percent to 33.3 percent) (table 2).

NOTE: All calculations were performed on actual rather than rounded data.

SOURCE: U.S. Department of Education, National Center for Education Statistics, IPEDS "Salaries, Tenure, and Fringe Benefits of Full-Time Instructional Faculty 1987-88," and HEGIS "Salaries, Tenure, and Fringe Benefits of Full-Time Instructional Faculty" surveys 1977-78.

Salaries, by Sex and Academic Rank

The 1987-88 average salaries in constant dollars (table 3) reached the 1977-78 levels, but this varied when examined by sex. The average salaries for men in all ranks except "lecturers" and "no academic rank" have reached the 1977-78 level. Salary gains for men were highest for assistant professors, who received an increase from \$29,100 in 1977-78 to \$30,100 in 1987-88. Instructors showed the smallest salary increase for men, increasing only 0.4 percent (from \$23,500 in 1977-78 to \$23,600 in 1987-88). On the other hand, average salaries for women lost ground to inflation at every rank except that of "professor" which remained the same. The losses ranged from 8.8 percent for "no academic rank" (from \$30,800 in 1977-78 to \$29,600 in 1987-88) to 0.3 percent for associate professors (from \$33,900 to \$33,500).

Average salaries in current dollars were higher for men than women at every academic rank. In 1977-78, average salaries (all ranks combined) for men were \$19,575 and \$16,159 for women. Men earned 21.1 percent more than women in 1977-78 with the gap widening to 24.9 percent in 1987-88 (table B).

However, the differences in average salaries of men and women varied by rank. In some cases, the gap widened between 1977-78 and 1987-88. Male assistant professors earned 4.1 percent more than women in 1977-78 and 9.0 percent more in 1987-88. Male instructors earned 3.6 percent more than women instructors in 1977-78 and 7.7 percent more in 1987-88. The gap between "no academic rank" men and women narrowed to 10.6 percent in 1987-88 from 11.0 percent in 1977-78 (table B). Additional data on average salaries in current dollars, by State, and type and control of institution may be found in tables C and D.

Number of Faculty

The number of faculty has increased about 1 percent annually between 1977-78 and 1987-88, rising from 324,327 to 356,284 (table 4). Over the 11-year period, the growth by academic rank ranged from 41.1 percent for lecturer to 11.1 percent for "no academic rank." The number of instructors declined 21.7 percent (from 27,714 to 21,685) and assistant professors declined 7.3 percent (from 88,998 to 82,467). Although the largest increase was in the number of lecturers, the most notable was the 39.2 percent increase in the number of full professors. Professors represented 30.0 percent of the total number of faculty in 1987-88 while lecturers represented only 1.9 percent.

Men continue to hold the majority of full-time instructional faculty positions. Of the 356,284 faculty on 9- and 10-month contracts, 252,607, or 70.9 percent, were men. This was down from 1977-78 when 75 percent of total full-time faculty were men. However, when examined by rank, women were in the majority at the ranks of instructor and lecturer. Although men make up the majority at higher ranks, the number of women in these ranks have increased. For example, the number of women professors has increased from 9.7 percent in 1977-78 to 18.0 percent in 1987-88. The proportion of female associate and assistant professors has also increased, to 25.8 percent and 39.3 percent of the total, respectively.

Table 3.--Average salaries in constant 1987-88 dollars of full-time instructional faculty on 9- and 10-month contracts in institutions of higher education, by academic rank and sex: 50 States and D.C., 1977-78 through 1987-88

Survey Methodology

This report presents data from the survey entitled "Salaries, Tenure, Fringe Benefits of Full-Time Instructional Faculty," conducted by the National Center for Education Statistics (NCES) for academic years 1978-88. The 1987-88 data were collected through the Integrated Postsecondary Education Data System (IPEDS); data for the earlier years were collected through the Higher Education General Information Survey (HEGIS). IPEDS has replaced HEGIS as the new postsecondary education data collection system for NCES.

The IPEDS tape makes available salary data representing a select subset of 4,601 postsecondary institutions. The salary tape does not include data for 2-year private for-profit or less-than-2-year private nonprofit and for-profit institutions. However, the data in this report represent the subset of 3,158 higher education institutions that are accredited at the college level by an agency recognized by the Secretary of Education. Data for non-HEGIS institutions are not presented, because survey response rates for these institutions did not satisfy NCES standards.

Data were collected on instructional faculty employed by postsecondary education institutions for 9- and 10-month and 11- and 12-month contracts. This report discusses only the faculty on 9- and 10-month contracts because they represent 85.1 percent of the total faculty in 1987-88.

Table 4 shows the number of faculty by sex and rank for each year salary averages were computed. Average salaries were converted to 1987-88 constant dollars using the Consumer Price Index. See table E for the conversion factors.

Data were edited for major reporting and processing errors. Institutions were contacted when data problems could not be resolved by survey editors. In 1987-88 data were imputed for total nonresponding institutions only (for more information contact the author). Data for partial responses were resolved through editing procedures. Under HEGIS, no data were imputed for nonresponding institutions.

The following people helped with this bulletin: Peer reviewers were W. Lee Hansen, University of Wisconsin - Madison; Celeste A. Loar and William Fowler, National Center for Education Statistics; and Leo J. Eiden Information Services U.S. Department of Education.
