ABSTRACT

The Kinder Lernen Deutsch (Children Learn German) project, begun in 1987, is designed to promote German as a second language in grades K-8. The project is premised on the idea that the German program will contribute to the total development of the child and the child's personality. Included in this guide are a selection of recommended core materials for K-8 German classes, a list of criteria for evaluating teaching materials, and a bibliography of commercially-produced instructional texts, teaching manuals and supplementary library materials that are available to school districts wishing to begin German programs. ACKNOWLEDGEMENTS

The AATG is pleased to bring you the product of the first stage of its Kinder Lernen Deutsch project begun in the 1987-1988 academic year with the financial support of the Ständiger Ausschuß Deutsch als Fremdsprache, and its members, representatives of the Embassy of the Federal Republic of Germany, the Goethe Institute and the Deutscher Akademischer Austauschdienst. This key funding agency for projects which support the teaching and learning of the German language and culture in the United States has been influential in revitalizing the growing interest in elementary school German instruction. The next phase will support the training and retraining of teachers who wish to begin German language instruction with young children.

We are particularly grateful to the members of the Materials Evaluation Committee: Horst Bussiek, Fachberater from the Georgia Department of Education, Helena Anderson Curtain, Milwaukee Public Schools, Carol Ann Pesola, Concordia College (MN), and Pat Pillott, Ferndale Public Schools (MI). Our association is indeed fortunate to have such experts in the field among its members.

We also acknowledge the advice and support of the Kinder Lernen Deutsch Task Force which met in May 1988 with Goethe Institute Chicago assistance: Hildegard Beyer, Horst Bussiek, Neva Christensen, Ulrike Criminale, Helena Anderson Curtain, Jens Peter Green, Gisela Griffin, Lynn Haire, Richard Hartzell, Chris Joslin, Renate Ludanyi, Carol Ann Pesola, and Hans-Georg Salm.

**KINDER LERNEN DEUTSCH
MATERIALS EVALUATION PROJECT
GRADES K-8**

INTRODUCTION

The Kinder Lernen Deutsch materials evaluation project came about because of the need to identify materials appropriate for the elementary school German classroom in grades K-8. School districts wishing to begin German programs can use the resources identified here as the basis for articulated or non-articulated programs.

Materials were collected from school districts throughout the United States who responded in May 1988 to an AATG survey regarding elementary school foreign language programs. These materials were collected at the AATG headquarters, together with commercial materials submitted by publishers and distributors.

The materials recommended below are of high quality, and to the best of the participants' judgment, they can be used successfully to start and maintain a German program in the elementary school. It is important to note that the project participants examined only those materials that had been submitted, and they may have missed others of excellent quality because they were not available at the time.

It must be emphasized that the attached lists are not a definitive statement but are the beginnings of an ongoing project.

PHILOSOPHY

The philosophy of second language education for children, on which project members are in basic agreement, supports the selection of materials below. Paramount is the idea that the German program will contribute to the total development of the child and the child's personality. The attached evaluation instrument was used to identify the materials included on the list.

Teaching for communication

The basic goal of the program is that the students will be able to communicate in German about real matters that are of interest and relevance to them.

Integration of subject-content from the regular elementary school curriculum into the German curriculum

Integration of subject content enhances thinking skills and academic skills and also provides a meaningful topic for communication. In addition it partially answers the question of where to find time in the curriculum for an elementary school foreign language program. If subject content skills and concepts are taught or reinforced in the German class, then a stronger justification for the role of a foreign language in the curriculum can be built.

Functional use of grammar

The curriculum is organized according to topics that are meaningful to the students, and the grammar that is taught supports the ability of the students to communicate about those topics.

Consistent use of the target language

The language of the classroom is German. When English is used in rare instances, the transition between languages is careful and deliberate and only one language is used at a time. The languages are never mixed.

Promotion of intercultural understanding

Students in the German class have experiences with the culture of all the German-speaking cultures that help them to value cultural diversity.

Use of concrete materials

Visuals, props, realia and hands-on activities are an integral part of instruction.

Age-appropriateness

Activities are geared to the needs and interests of students at the level of instruction.

Learner-centered

Activities are learner-centered and not teacher-centered, in that they reflect the interests of the specific learner group and their interactions.

Spiral approach

Language concepts and topics are constantly reentered so that students can internalize and expand on the material they have learned.

Flexibility

The program, materials and planned activities are flexible so as to best meet the needs of each individual student and group of students.

EVALUATION CRITERIA

The attached evaluation criteria reflect our understanding of what materials should look like in a German program that reflects the philosophy outlined above.

Other materials levels 2 - 4 in preparation.

Bild und Wort, 1974

Picture dictionary for program (useful picture resource for any program).

Recommend for use as reading/writing materials in a FLES program. Other activities must be used to integrate other subject areas into program.

LOS

Teacher's manual: German

Date: 1964

Source: Klett

Intended age: 7 - 13

Intended program model: FLES/FLEX

Intended language development level: Beginner

Levels 1 and 2, thirty leaflets in each level. Each based on a theme. Although there is a progression of difficulty they can be used out of sequence. Limited use as supplemental material. Dated, published in the early 1960's. Extreme care must be used. Craft/activity ideas may be useful as a supplement.

WER? WIE? WAS?

Teacher's manual: German

Date: 1985

Author: Harold Seeger

Source: Gilde Buchhandlung, Bonn

Intended age: 8 - 12

Intended grade level: 3 - 6

Intended program model: Fles

Intended language development level: Beginners

Textbook series designed for FLES Programs. Text in 2 levels, workbooks, teacher's manual, transparencies, cassettes, tests, slides.

SUGGESTED SEQUENCING OF MATERIALS FOR VARIOUS PROGRAM MODELS

This list has been divided into three categories: FLES, Immersion and FLEX. Immersion programs are those in which the usual curriculum activities are taught in the second language. In immersion programs the second language is both the medium and the object of instruction. FLES (Foreign Language in the Elementary School) is a type of elementary school foreign language program that is taught one to five times per week for class period of twenty minutes to an hour or more. (Minimum recommended time allotment is 30 minutes per day, 5 days per week.) Some FLES classes integrate other areas of the curriculum, but because of time limitations the focus of these classes is most often the second language and its culture. FLEX (Foreign Language Exploratory or Experience) programs are self-contained, short-term programs usually lasting from three weeks to a year. The goals in these programs are most often to introduce students to language study, and to motivate them to later formal language study.

Within each different type of program model the materials have been classified as commercially available materials or teacher-prepared materials. Materials for summer programs have also been included.

FLES

COMMERCIALY AVAILABLE MATERIALS

Each of the programs listed below is a beginning program, intended for learners at the age/grade level indicated and written to appeal to their interests and to be appropriate to their developmental level. These texts can also be used in sequence, with the overlap between programs serving as a review. The teachers must make the decision when a group of learners has spent enough time in one text series and at what point in the next series the class should begin. Each of the models below suggests a possible sequencing of materials for a program that continues approximately through tenth grade.

For grades 11 and 12 we recommend a range of materials grouped around topics reflecting the learners' interests. Examples of such topics are: the generation gap, the peace movement, relationships between young people, etc. Learning subject content in the target language, Advanced Placement, and the International Baccalaureate program are other viable options at this level. Intended grade range of teaching materials included below:

- Du und Ich K - 1
- Komm Bitte Entire series, grades 2 - 5
- Wer? Wie? Was? Books 1 and 2, grades 3 - 6
- Deutsch Konkret Books 1 - 3, grades 7 - 8

MODEL 1 Teaching German grades K - 12Option A

Du und Ich -> Komm Bitte (Entire Series) -> Deutsch Konkret

Option 2

Du und Ich -> Komm Bitte (Book 1 only) -> Wer? Wie? Was? -> Deutsch Konkret

MODEL 2 Teaching German beginning in Grade 3

(Up to a full year of oral and non-textbook communicative work should take place before the textbook is carefully phased in.)

Wer? Wie? Was? -> Deutsch Konkret

MODEL 3 Teaching German beginning in Grade 5

Wer? Wie? Was? -> Deutsch Konkret

**SOME SUGGESTED SUPPLEMENTARY MATERIALS
FOR A BASIC CLASSROOM LIBRARY**

The following supplementary materials are identified as being useful for elementary school German programs developed according to the guidelines and role models described elsewhere in this document. They were selected exclusively from the materials submitted for consideration by the committee and do not represent a definitive list. We do, however, feel that this collection is representative of the variety and types of materials useful for a teacher beginning a program. Materials listed are available through American suppliers.

For more extensive listings, AATG offers the 36-page Kinder Lernen Deutsch Bibliography which contains recommendations for various topics and subject areas as well as for library books. This document is available at \$4.00 a copy. For an even more comprehensive listing, AATG also offers the Bibliography for the Teaching of German at Primary Level developed by the LOTE Centre, Ministry of Education and the Education Committee of the Association of German-speaking Communities in New South Wales, Melbourne, Australia. This 72-page listing describes the content of several hundred materials, the language level, interest level and evaluation of the materials. This bibliography is available at \$6.00.

SUPPLEMENTARY

The Pappenheimers Oregon Public Broadcasting/ Langenscheidt.

Videotape -full 1/2 hour programs or 2-minute cartoon segments, Student book (cartoon segments), Audio tapes (Cartoon segments). Videotapes present authentic German situations interspersed with extensive English language commentary and translation. Cartoons review key vocabulary entirely in German. Audiotapes and student books reproduce cartoon content; student books include interlinear translation and phonetic transcriptions. Supplementary for grades 2-5; cartoons useful with any age or level. Request text of German components from Oregon Public Broadcasting. As advertising medium on educational TV highly recommended.

Lohfert, Scherling. Wörter, Bilder, Situationen. München: Langenscheidt, 1983.

Black & white pictures incorporating thematic vocabulary.

Neuner, Wahie. Pauli Puhmanns Padelbook. Zehn Lieder zum Singen. Spielen und Lernen. München: Langenscheidt, 1985. Grade 4 & up.

Songs of varying degrees of difficulty, accompanied by tape. Teaching suggestions developed for each song.

Jacobi-Vrignaud, Irene. Sonne, Mond und Sterne. Bonn: Inter Nationes. Poetry, songs and games are woven into thematic supplementary units for children ages 8-10. Four color transparencies and a cassette tape of the rhymes and songs accompany the teacher handbook, some exercises incorporated with each unit.

Schröter, Rudolf. Ina und Udo. Frankfurt: Verlag Moritz Diesterweg, 1972. A primer for German children, limited by its age, but progression of vocabulary development builds reading skills.
