ABSTRACT

This report on public and private school teachers presents data on personal characteristics, highest degree earned, years of experience, type of certification, salary and incentives, and nonschool employment. National estimates are provided for all data, and state estimates for public school teachers' highest degree earned, years of experience, and salary. The data were collected on the Public and Private School Teachers Questionnaires, two of seven questionnaires comprising the 1987-88 Schools and Staffing Survey (SASS), developed by the U.S. Department of Education's National Center for Education Statistics and conducted by the U.S. Bureau of the Census. The data are displayed in 13 tables. The survey methodology is described in the technical notes. Information on the source for more information is provided, and the Public School Teachers Questionnaire is appended along with a notation on the differences in a few response items on the Private School Teachers Questionnaire. Selected Characteristics of Public and Private
School Teachers: 1987-88

Introduction

This report on public and private school teachers presents data on personal characteristics, highest degree earned, years of experience, type of certification, salary and incentives, and nonschool employment. The data were collected on the Public and Private School Teachers Questionnaires, two of seven questionnaires comprising the 1987-88 Schools and Staffing Survey (SASS), a survey developed by the U.S. Department of Education's National Center for Education Statistics, and conducted by the U.S. Bureau of the Census. This report provides national estimates for all data, and State estimates for public school teachers' highest degree earned, years of experience, and salary.

The SASS was a mail survey which collected public and private sector data on the Nation's elementary and secondary teaching force, aspects of teacher supply and demand, teacher workplace conditions, characteristics of school administrators, and school policies and practices. The seven questionnaires of the SASS are as follows:

1. The Teacher Demand and Shortage Questionnaire for Public School Districts (LEA's).
2. The Teacher Demand and Shortage Questionnaire for Private Schools.
3. The School Administrator Questionnaire.
4. The Public School Questionnaire.
5. The Private School Questionnaire.
6. The Public School Teachers Questionnaire.
7. The Private School Teachers Questionnaire.

The survey methodology is described in the Technical Notes section which follows presentation of the tables.

Technical Notes

Sample selection

All 56,242 public and 11,529 private school teachers in the teacher samples were selected from the 9,317 public and 3,513 private school samples.¹

Selection of schools

The public school sample was selected from the Quality Education Data (QED) file of public schools. All public schools in the file were stratified by the 50 States and the District of Columbia, and then by three grade levels (elementary, secondary, and combined). For each stratum within each State, sample schools were selected by systematic (interval) sampling with probability proportional to the square root of the number of teachers within a school. This approach provides a blend of the best estimates for schools and teachers.

The private school sample was selected primarily from the QED file of private schools. To improve coverage, two additional steps were taken. The first step was to update the QED file with current lists of schools from 17 private school associations. All private schools on the QED file and the lists from the private associations were then stratified by State, grade level, and affiliation. Sample schools were then selected by systematic (interval) sampling within each stratum, with probability proportional to the square root of the number of teachers. The second step was to include an area frame of schools, contained in 75 probability selected Primary Sampling Units (PSU's), each PSU consisting of a county or group of counties. The PSU's were stratified by Census geographic region: Northeast, West, South, and Midwest; Metropolitan Statistical Area (MSA) status; and private school enrollment. These PSU's were selected from the universe of 2,497 PSU's with probability proportional to the PSU population. Within each of the 75 PSU's, a telephone search was made to find all eligible (in scope) private schools, using such sources as yellow pages, Non-Roman Catholic religious institutions, local education agencies, chambers of commerce, local government offices, commercial milk companies, and commercial real estate offices. Roman Catholic religious institutions were not contacted because QED calls each Catholic diocese during its annual list update. All schools not on the QED file or the lists from the private school associations were eligible to be selected for the area sample. Most of these schools were selected with certainty. However, when sampling was performed, schools in the area frame that could be contacted were sampled with probability proportional to the square root of the number of teachers, and those that could not be contacted were selected using a systematic equal probability sampling procedure.

¹ The other SASS samples were as follows: 5594 public school districts, and the administrators (principals) of schools in the public and private school samples.

A private school was declared out-of-scope and excluded from the sample if it did not have any students in any of grades 1-12, if it operated in a private home that was used as a family residence, or if it was undetermined whether it operated in a private home and its enrollment was less than 10 students or it had only one teacher.

Selection of teachers

A list which included all full-time and part-time teachers, itinerant teachers, and long-term substitutes was obtained from each sample school. Within each school, teachers were stratified by experience; one stratum included new teachers, and a second stratum included all other teachers. New teachers were those who, counting the 1987-88 school year, were in the first, second, or third year of their teaching career in either a public or private school system. Within each teacher stratum, elementary and secondary teachers were sorted by subject. Elementary teachers were sorted by General Elementary Education, Special Education, and other; Secondary teachers were sorted by Mathematics, Science, English, Social Science, Vocational Education, and other.

The public and private school teacher samples were each designed to include a basic sample and a Bilingual/ESL(English as a Second Language) supplement. The Bilingual/ESL supplement treated as one group teachers who use a native language other than English to instruct students having limited English proficiency, and teachers who provide students having limited English proficiency with intensive instruction in English. The supplement was funded by the Department of Education's Office of Bilingual Education and Minority Language Affairs (OBEMLA) in order to obtain more reliable estimates of Bilingual/ESL teachers.

The basic sample of teachers was allocated to the sample schools in each stratum so that the teacher weights were approximately equal. The specified average teacher sample size for each sample school (4, 8, and 6 teachers for each public elementary, secondary, and combined school, respectively, and 4, 5, and 3 teachers for each private elementary, secondary, and combined school, respectively) was then allocated to the two teacher strata to obtain a 60 percent oversampling of new private school teachers. New teachers were not oversampled in the public sector. Finally, an equal probability systematic sampling scheme was applied to select the basic sample within each school. The Bilingual/ESL supplement was selected independently from the basic sample, and was designed to provide estimates for California, Texas, Florida, Illinois, New York, and all other States. Within a school containing Bilingual/ESL teachers, teachers were selected systematically with equal probability.

The sample sizes were as follows:

Basic samples	
Public	54,340
Private	11,412
Bilingual/ESL supplement samples	
Public	2,258
Private	183

Bilingual/ESL teachers selected in both the basic and supplement samples were unduplicated so that each teacher appears only once in the combined sample of Bilingual/ESL and all other teachers.

More detailed information about the sampling, will be available from a technical report currently in preparation.

Data collection

The Teacher Questionnaires were mailed to the sampled schools in February 1988. Approximately 10 days after this mailout, a letter was sent to the survey coordinator in each school identifying the school's sample teachers and requesting the coordinator to remind the the sample teachers to complete and return their questionnaires. Approximately six weeks after the mailout, a second set of questionnaires, for sample teachers who had not returned the first questionnaire, was sent in a package to the school coordinators for distribution to nonresponding teachers. During the time of this second mailout, each coordinator was telephoned and asked to remind those teachers who had not returned the first questionnaire to complete the second one and mail it back. A telephone follow-up was conducted during April, May, and June. Due to the large number of nonrespondents to the mailout and the necessity for completing the follow-up prior to the closing of schools for the summer, only a subsample of these teachers was included in this effort. This subsample had their weights adjusted to reflect the subsampling.

Effects of missing schools

Following the data collection, it was discovered in a comparison of SASS public school estimates with NCES' Public Elementary/Secondary School Universe Survey of the Common Core of Data (CCD) series, that some Class 1 public school districts were not on the frame. Class 1 schools include only elementary schools, and for Nebraska, a comparison of the QED and CCD counts indicated there were about 275 of these schools, with an average of about 10.2 students per school. Because of these missing schools, the SASS national counts of public schools, administrators, and teachers, and the corresponding counts for Nebraska, in particular, are underestimated. The effects of these missing schools on the nature of the bias for averages is unknown.

Questionnaire response rates

Weighted response rates were 86.4 percent for the Public School Teachers Questionnaire and 79.1 percent for the Private School Teachers Questionnaire. The data were weighted to reflect the universe of public school teachers and the universe of private school teachers, and the weights were adjusted for nonresponse.

Item descriptions and item response rates

The Public School Teachers Questionnaire is shown in Appendix 1. With a few exceptions (see Appendix 2) it is identical to the Private School Teachers Questionnaire. Specific data items in the tables and the corresponding questionnaire items and unweighted item response rates are as follows:

Effects of item nonresponse

There was no explicit imputation for item nonresponse. Not imputing for item nonresponse leads to a bias in the estimates. In tables which present averages, the nature of this bias is unknown. In tables which present counts, item nonresponse leads to underestimates of the details. The item response rates for twenty-five of the thirty-one items used in this report were above 90 percent. Response rates for items 23a-2, 23b-1, and 23b-2 ranged from 76.0 percent to 86.1 percent and may have been affected by item complexity. The response rates for item 39a-3 were 88.3 percent for public school teachers and 84.1 percent for private school teachers. The response rate of 49.0 percent for public school teachers on item 8b-2 and the response rate of 72.0 percent for private school teachers on item 8a-2 could be attributable to the failure of public school teachers with no private school teaching experience and private school teachers with no public school teaching experience to check the appropriate "None" box on the questionnaire. Caution must be exercised in the use or interpretation of estimates from an unimputed data file, especially estimates with low item response rates.

Comparative estimates of teacher counts

The sampling frame for teachers was developed by obtaining from each sample school a list of all full-time and part-time teachers, itinerant teachers, and long term substitutes. Following the data collection, a comparison of the number of teachers on the school lists with the number of teachers (head count) on the school file revealed fewer teachers on the school lists. Fewer teachers on the school lists cause the teacher national estimates from the teacher files to be underestimates relative to the teacher national estimates from the school files.

To obtain an estimate of the magnitude of these underestimates, an FTE count of teachers on the school lists was approximated by adjusting the counts for part-time teachers. This approximated FTE count was weighted up to a national estimate and compared with the national FTE estimate for fall, 1987, reported

on NCES's Public Elementary/Secondary School Universe Survey of the Common Core of Data (CCD) series. The CCD estimate was 2 percent higher than the SASS estimate.

Standard errors

The estimates in these tables are based on samples and are subject to sampling variability. Standard errors were estimated using a balanced repeated replication procedure that incorporates the design features of this complex sample survey. The standard errors provide indications of the accuracy of each estimate. If all possible samples of the same size were surveyed under the same conditions, an interval of 1.96 standard errors below to 1.96 standard errors above a particular statistic would include the universe value in approximately 95 percent of the cases. Note, however, that the standard errors in the tables do not take into account the effects of biases due to item nonresponse, measurement error, data processing error, or other systematic error.

Definition of teacher

For purposes of this survey, a teacher was any full-time or part-time teacher whose primary assignment was teaching in any of grades K-12. Itinerant teachers were included, as well as long-term substitutes who were filling the role of a regular teacher on an indefinite basis.

Full-time teachers were all teachers reporting themselves as full-time teachers at the sample school. This included regular full-time teachers, itinerant teachers, and long term substitutes who were full-time.

Classification of elementary and secondary teachers

Generally, teachers were classified as elementary or secondary on the basis of the grades they taught rather than the schools in which they taught. The variety of teaching circumstances required the development of a number of criteria for classification.

A teacher classified as an elementary teacher had to meet one of the following criteria:

1. A teacher who checked the "ungraded" option only in item 24 (which asks for grades being taught) and was designated as an Elementary teacher on the list of teachers obtained from each sample school (code "0", "1", or "2" for field name TSUBJ in the tape documentation).
2. A teacher who checked 6th grade or lower and no grade higher than 6th in item 24, or 6th grade or lower and "ungraded" and no grade higher than 6th.
3. A teacher who checked 6th grade or lower and 7th grade or higher and entered a primary assignment code of "01", "02", or "03" in item 16a.
4. A teacher who checked 7th and 8th grades only in item 24 and entered a primary assignment code of "01", "02", or "03" in item 16a.
5. A teacher who checked 6th grade or lower and 7th grade or

higher in item 24 and entered a primary assignment code of Special Education in item 16a and was designated as an Elementary teacher on the list of teachers obtained from each sample school (code "0", "1", or "2" for field name TSUBJ).

6. A teacher who checked 7th and 8th grades only in item 24 and entered a primary assignment code of Special Education in item 16a and was designated as an Elementary teacher on the list of teachers obtained from each sample school (code "0", "1", or "2" for field name TSUBJ).

A teacher classified as a secondary teacher had to meet one of the following criteria:

1. A teacher who checked the "ungraded" option only in item 24 and was designated as a Secondary teacher on the list of teachers obtained from each sample school (code "0", "1", or "2" for field name TSUBJ in the tape documentation).
2. A teacher who checked 6th grade or lower and 7th grade or higher in item 24 and entered a primary assignment code greater than 03 in item 16a.
3. A teacher who checked 9th grade or higher, or 9th grade or higher and "ungraded".
4. A teacher who checked 7th and 8th grades only in item 24 and entered a primary assignment code of "04" or higher but not a Special Education code in item 16a.
5. A teacher who checked 7th and 8th grades only in item 24 and entered a primary assignment code of Special Education in item 16a and was designated as a Secondary teacher on the list of teachers obtained from each sample school (code "03" or higher for field name TSUBJ).
6. All other teachers who checked 6th grade or lower and 7th grade or higher in item 24, or 7th and 8th grades only, and were not categorized above as either Elementary or Secondary.

The draft manuscript of this report was reviewed within the Department of Education by Edith K. McArthur, Data Development Division, Peter S. Stowe, Postsecondary Education Statistics Division, and Joyce D. Stern, Programs for the Improvement of Practice. Joyce McCray, Executive Director, Council for American Private Education, and Erling E. Boe, Professor of Education, University of Pennsylvania, served as external reviewers. Preliminary programs for the tables were developed by Sharon A. Bobbitt, Elementary/Secondary Education Statistics Division. Final programs were developed by Shelley K. Burns and Ross Z. Merlin of Pinkerton Computer Consultants. Lance Ferderer of Information Services provided guidance in table design and formatting. Robert S. Burton, Elementary/Secondary Education Statistics Division, was the mathematical-statistical consultant for the report.

<p>Dear Teacher:</p> <p>The Center for Education Statistics (CES) of the U.S. Department of Education requests your participation in the Teacher Survey for the 1987-88 Schools and Staffing Survey. You are one of the 65,000 teachers from over 12,000 public and private schools across the nation selected to be in the teacher sample.</p> <p>The Schools and Staffing Survey is an integrated set of surveys consisting of the Teacher Demand and Shortage Survey, the School and School Administrator Surveys, and the Teacher Survey. These surveys are revisions of previous CES surveys, designed to better measure critical aspects of teacher supply and demand, the composition of the administrator and teacher workforce, and the status of teaching and schooling generally. The purpose of the Teacher Survey is to obtain information about such factors as the education and training, current assignment, job mobility, workplace conditions, and career choices of teachers, as well as their opinions about various policy issues such as merit pay or incentive pay.</p> <p>The U.S. Bureau of the Census is conducting these surveys for the Center for Education Statistics by the authority of Section 406(b) of the General Education Provisions Act, as amended (20 USC 1221e). The data will be treated as confidential and will be reported only in statistical summaries so that individual teachers cannot be identified.</p> <p>We are conducting this survey with a sample of teachers. While this minimizes overall response burden, the value of each individual survey response is greatly increased because it represents many other teachers. I, therefore, encourage you to participate in this voluntary survey by completing this questionnaire and returning it within 2 weeks to the Bureau of the Census. A preaddressed envelope is enclosed for your convenience.</p> <p>I thank you for your cooperation in this very important effort.</p> <p>Sincerely,</p>  <p>Emerson J. Elliott Director Center for Education Statistics</p> <p>Enclosure</p>	<p>Please correct any error in name and address including ZIP Code.</p> 

INSTRUCTIONS

If you are unsure about how to answer a question, please give the best answer you can and make a comment in the "Remarks" section.

If you have any questions, call the Bureau of the Census collect at (301) 763-2220.

Use the enclosed postage-paid envelope to return this questionnaire to the Bureau of the Census. Please return it within the next 2 weeks.

THANK YOU FOR TAKING PART IN THIS STUDY.

*If your primary or secondary assignment is BASIC SKILLS AND REMEDIAL EDUCATION, BILINGUAL EDUCATION, or GIFTED, and as part of that assignment you teach a specific subject area (e.g., remedial math, bilingual social studies, or gifted science), record the code for Basic skills, Bilingual, or Gifted as the assignment area.

16a. What is your current primary teaching assignment field at THIS SCHOOL, that is, the field in which you teach the most classes?

(Use the code numbers listed above to record your assignment field. If your teaching schedule is divided equally between two fields, record either field as your primary assignment in this item, mark box 1, and record the second field in item 16b.)

076 Primary assignment field code

076 1 Teaching schedule equally divided between two fields

b. Are some of your classes at THIS SCHOOL in other fields?

077 1 Yes — In what field do you teach the second most classes? (Use the assignment field codes listed above.)

2 No

17a. What field do you feel BEST QUALIFIED to teach, regardless of whether you currently teach in that field? (Use the codes listed above.)

079 Best qualified field code

b. Do you feel qualified to teach any other fields?

080 1 Yes — For what field do you feel second best qualified? (Use the codes listed above.)

2 No

18. Has your primary teaching assignment field changed since you began teaching?

082 1 Yes

2 No

What was your previous primary assignment field? (Use codes listed above.)

Counting this year, how many years has your primary assignment field remained unchanged?

19. For each of the fields in which you now teach (and for your best-qualified field, if different from your current teaching assignment), how many undergraduate and graduate COURSES have you taken in that subject area?

A course is one that meets 2–5 classroom hours per week during one semester or quarter. If you have taken both semester and quarter courses, enter the respective numbers in each column. Count ALL the courses that relate to the field(s) in which you teach, e.g., if you teach ANY math subject, count ALL math courses; if you teach ANY kind of special education class, count ALL courses in the field of special education.

If no courses were taken for a field for any column, enter "0."

Please refer to records if you cannot accurately recall your coursework.

21. Did you take any education or teaching related in-service or college courses requiring 30 or more hours of classroom study during the past two school years, that is, in 1986–87 or 1987–88?

- 128** 1 Yes – For what assignment field was this training relevant? (Use list of codes on page 7.) **129**
2 No – Skip to question 23 Answer 22

22. What was your MAJOR purpose for taking this training.

Mark (X) only one.

- 130** 1 To fulfill initial certification requirements for current position
2 To maintain and/or improve qualifications for current position (including meeting recertification requirements)
3 To retrain to teach a different subject matter area
4 To retrain to teach at a different grade level
5 To retrain to teach handicapped students or students with learning disabilities
6 To acquire credentials in new nonteaching areas (e.g., administration, guidance counseling)
7 Other – Describe

23a. Do you have a teaching certificate in this state in your –

- (1) Primary assignment field?
(2) Secondary assignment field, if any?
(3) Best qualified field?

b. If you do, what type of certification do you hold in each field? (Use the codes below for type of certification.)

c. In what year were you certified in each field?

Codes for certification

- 1 Regular or standard state certification (the standard certification offered in your state)
2 Probationary certification (the initial certificate issued after satisfying all requirements except the completion of a probationary period)
3 Temporary, provisional, or emergency certification (requires additional coursework before regular certification can be obtained)

25. Which of the following best describes the way your classes at this school are organized?

Mark (X) only one.

- 157** 1 Self-contained class – You teach multiple subjects to the same class of students all or most of the day – *Continue with item 26a*
- 2 Departmentalized instruction – You teach subject matter courses (e.g., history, typing) to several classes of different students all or most of the day – *Skip to question 27, page 10*
- 3 Team teaching – You collaborate with one or more other teachers in teaching multiple subjects to the same class of students – *Answer either question 26 or 27 below, depending on which format better describes the way your classes are organized all or most of the day.*
- 4 "Pull-out" class – You provide instruction to students who are released from their regular classes – *Continue with item 26a*

NOTE – ANSWER THIS QUESTION IF YOU TAUGHT A SELF-CONTAINED CLASS OR A PULL-OUT CLASS.

26a. At this school, how many students were enrolled in the class or program you taught during the most recent full week school was in session? (If you teach two kindergarten or prekindergarten sessions per day, report the average number of students.)

158 Students

b. Approximately how many hours did you spend teaching each of the following subjects during the week?

(If you taught two or more subjects at the same time, apportion the time to each subject as best you can. Report hours to the nearest whole hour, e.g., 1, 2. If you did not teach a particular subject during the week, mark the "None" box.)

Subject (a)	Hours spent teaching in most recent full week (b)
(1) English/reading/language arts	159 <input style="width: 50px;" type="text"/> o <input type="checkbox"/> None
(2) Arithmetic/mathematics	160 <input style="width: 50px;" type="text"/> o <input type="checkbox"/> None

d. Which of the following best describes the general academic achievement level of your students relative to the other students at this school?

- 164** 1 Primarily higher achieving students
2 Primarily average achieving students
3 Primarily lower achieving students
4 Students of widely differing achievement levels

PLEASE SKIP NOW TO QUESTION 28 ON PAGE 11.

SECTION 4 – CURRENT TEACHING LOAD – Continued

Answer questions 27a–g below ONLY if you taught subject matter courses to different groups of students.

27. The following questions refer to the subject matter classes you taught AT THIS SCHOOL during the most recent FULL week school was in session. (Complete a line of the table below for each period in which you taught a class. Exclude study halls, homeroom periods, unscheduled tutoring, etc.)

- a. What was the subject matter of each class you taught? (Use the code numbers listed on page 11 to record your answer in column (a).)
- b. For how many periods per week does each class meet? (If your school day is not organized by class periods, mark box 1 at the top of column (b) and record the number of hours per week that you teach each class.)
- c. What is the grade level of MOST of the students in each of your classes? (Use numerals 1, 2, . . . , 12 for grades 1–12, PK for prekindergarten, K for kindergarten, and U for ungraded. Enter only one grade level for each of your classes in column (c).)
- d. How many students are enrolled in each class period?
- e. For each class period, did you assign homework during the last full week?
- f. What is the achievement level for most of the students in each class period you taught, relative to other students at this school?

Use these codes to record achievement level in column (f):

- 1 Primarily higher achieving students 3 Primarily lower achieving students
- 2 Primarily average achieving students 4 Students of widely differing achievement levels

g. For each class period you taught, was it advanced placement, bilingual, gifted, remedial, or special education?

Use these codes to record course level in column (g):

- 1 Advanced placement (AP) – Course that allows completion of college level credit, as defined by the College Entrance Examination Board
- 2 Bilingual
- 3 Gifted
- 4 Remedial
- 5 Special education
- 6 None of the above
