ABSTRACT

A goal of the Colorado administrator survey is to provide Colorado institutions of higher education and the state board of education with information for the continued improvement of administrator education programs. Of 67 participants, 42 surveys were used. Respondents made assessments concerning major areas of their preparation programs. Major components were basic management, leadership, decision making, problem solving, human relations, personnel administration, curriculum and instruction assessment, and resource utilization. Components and subcomponents were rated on relevance to current position and adequacy of preparation. Well over 70 percent of the respondents indicated each component as relevant to their position. Over 80 percent rated 6 of the 29 components as adequate, including planning and accepting responsibility. Seven components received less than 60 percent adequate ratings, including recruiting, screening, and selecting competent staff members. A table and outline of results are included. The evaluation instrument is appended. (EJS)

## EXECUTIVE SUMMARY

The Colorado administrator survey is sponsored jointly by the Colorado Department of Education and the Colorado Council of Deans of Education. The implementation of this survey is required by the Teacher Certification Act of 1975 as amended in 1988. A goal of the project is to provide feedback to institutions from former students regarding their administrator programs.

The administrator survey was implemented for the first time in 1989. Survey questions were based upon the State Board of Education standards for the approval of school administration preparation programs. Due to the relatively small size of this year's sample, the content of this report has been abbreviated from that of last year. However, additional information and/or specific feedback pertaining to an individual institution's preparation program is available upon request.

The majority of administrators who completed the survey felt that components in the major areas of their administrator preparation programs were relevant to their current position. There was only one exception. Less than 80 percent of the administrators believed that the component "administering provisions of negotiated employment contracts" was relevant to their current positions. In relation to whether administrators found their preparation to be adequate or not adequate, the distribution of responses was variable. Components where the highest rate of administrators found preparation to be adequate were:

- Ensuring that legal responsibilities of the school are being met and safeguarding legal rights of students, staff, parents.
- Using findings of research and exemplary practice in rational decision-making process.
- Articulating the role and purpose of education in contemporary society.
- Accepting responsibility for results of the decision-making process.

The components for adequacy of preparation with the lowest frequency of administrator response were:

- Working effectively with diverse community groups and involving them in meaningful activities related to the school and educational program.
- Administering provisions of negotiated employment contracts.
- Assessing relationship between cost and effectiveness.
- Identifying, utilizing resources available to schools; including state, federal categorical aid and foundation grants.

Over 80 percent of the administrators rated 6 of the 29 components as adequate in preparation; 60 to 79 percent rated 16 components adequate; and 40 to 59 percent rated 7 of the components adequate.

## INTRODUCTION

This report presents the 1990 results of the survey of Colorado administrators, mandated by the Teacher Certification Act of 1975 as amended in 1988. The purpose of the survey is to provide Colorado institutions of higher education and the Colorado State Board of Education with information for the continued improvement of administrator education programs.

The survey form was developed by the Colorado Department of Education in collaboration with a committee of higher education professors of school administration. Questions were based on the State Board of Education standards for approval of school administration preparation programs. The administrator survey was implemented for the first time in 1989. Due to the relatively small size of this year's sample, the content of this report has been abbreviated from that of last year. However, additional information and/or specific feedback pertaining to an individual institution's preparation program is available upon request.

Raters were asked to make assessments concerning major areas of their administrator preparation programs. Each component was rated in relation to relevancy to current position and adequacy of preparation. In addition, the respondent was given an opportunity to indicate specific aspects of an area which were not adequately covered. The major components rated were basic management, leadership, decision-making and problem-solving, human relations, personnel administration, curriculum and instruction assessment, and resource utilization. Opinions were also recorded with regard to practicum/internships, areas of study insufficiently covered or not included at all, overall strengths and weaknesses of the preparation and limitations of the program.

1990  
ADMINISTRATOR SAMPLE

Survey Distribution and Response Rate

In spring 1990, survey forms were sent to 120 Colorado administrators. The sample consisted of superintendents, assistant superintendents, principals, and assistant principals who received their administrative endorsements in 1988, 1989, or 1990. A total of 67 survey forms were returned, yielding a 55.8 percent response rate. Twenty-five of the 67 survey forms were eliminated from the database for the following reasons: 14 forms indicated a program completion year prior to 1988; 2 indicated an out-of-state college or university and; 9 indicated both an out-of-state college or university and a completion date prior to 1988. Analyses were conducted based on a sample of 42 administrators.

Colorado Institution Attended: Administrator Preparation

	<u>Number</u>	<u>Percent</u>
University of Northern Colorado	8	19.0%
Colorado State University	5	11.9
University of Colorado-Boulder	1	2.4
University of Colorado-Colorado Springs	7	16.7
University of Colorado-Denver	3	7.1
University of Denver	7	16.7
Western State College	<u>11</u>	<u>26.2</u>
	<u>42</u>	100.0

## 1990 STATE RESULTS

### ADMINISTRATOR PREPARATION PROGRAM EVALUATION

The survey form was developed by the Colorado Department of Education with input from a committee whose members were deans of Colorado institutions of higher education. Survey questions included were based on the standards for Approved Programs of Professional Education adopted by the State Board of Education.

Respondents to the survey were asked to rate components in seven major areas of their administrator preparation program on two different scales. Each one was based on a two-point scale relating to: a) relevancy of each component to current administrator position and b) adequacy of preparation for each component in the major areas (as shown below). Results are presented as percent of respondents.

<u>Relevance to Current Position</u>		<u>Adequacy of Preparation</u>	
Relevant	Not Relevant	Adequate	Not Adequate

In addition, each respondent was granted the opportunity to identify any specific aspects of their programs which they felt were not adequately covered. Administrator opinions were collected regarding practicum/internships, areas of study insufficiently covered or not included at all, overall strengths and weaknesses of their preparation and limitations of the preparation program.

The following pages summarize the results of those respondents who received their administrator endorsements at an institution of higher education in Colorado.

Relevance to Current Position. The majority of administrators who completed the survey felt that all components of the major areas of their administrators preparation program were relevant to their current position. Well over 80 percent of respondents indicated each of the components as relevant with only one exception. Seventy-four percent of the respondents felt that "administering provisions of negotiated employment contracts" was relevant to their job, leaving 26 percent who did not.

Adequacy of Preparation. With regard to whether administrators found their preparation to be adequate or not adequate, the distribution of responses was more variable. Ninety-five percent of the respondents felt that they were adequately prepared in ensuring that legal responsibilities of the school are being met and safeguarding legal rights of students, staff, and parents. Over 80 percent of the administrators rated 6 of the 29 components as adequate in preparation. The 6 were:

- Ensuring that legal responsibilities of the school are being met and safeguarding legal rights of students, staff, parents.
- Planning.
- Accepting responsibility for results of the decision-making process.

- Planning, utilizing physical facilities in an effective manner.
- Using findings of research and exemplary practice in rational decision-making process.
- Articulating the role and purpose of education in contemporary society.

Sixteen of the components received an adequate rating by between 60 percent and 79 percent of the sample. There were 7 components in which less than 60 percent of the administrators rated their preparation as adequate. Only 26 percent felt adequately prepared with regard to identifying and utilizing resources available to school; including state, federal categorical aid, and foundation grants. Forty-six percent of respondents felt that they had been adequately prepared to assess the relationship between cost and effectiveness in curriculum and instruction. The 7 components receiving a less than 60 percent adequate rating were:

- Recruiting, screening, selecting competent staff members.
- Administering provisions of negotiated employment contracts.
- Assessing the relationship between cost and effectiveness.
- Identifying, utilizing resources available to schools; including state, federal categorical aid and foundation grants.
- Articulating financial needs of the schools to staff, parents, citizens: to show relationships between program needs, financial needs, total student development.
- Getting people to work together to achieve organization's goals in the most effective and efficient manner.
- Bringing about change in the organization, it's programs, activities and people.

Articulating financial needs of the schools to staff, parents, citizens: to show relationships between program needs, financial needs, total student development.	97	3	56	43
Utilizing auxiliary business services that are available to the district in an effective manner. (i.e., transportation, food services, purchasing, data processing).	92	8	63	37

1990 STATE RESULTS

ADMINISTRATOR PREPARATION PROGRAM EVALUATION: OPINIONS

Completed Supervised Practicum/Internship for Principalship or Superintendency As Part of Preparation Program

79% Yes  
21% No

If Yes to Above Question, was Practicum at the Appropriate Level to Your Current Assignment?

100% Yes  
--% No

Effectiveness of Practicum/Internship

3% Not adequate  
24% Moderately adequate  
73% Adequate

Was the Practicum/Internship Waived or Substituted by the Preparing Institution Based Upon Previous Administrative Experience?

31% Yes  
69% No

---

About 34 respondents (81 percent) took the opportunity to make additional comments relative to the last three questions of the survey. The following are general statewide summaries for these questions:

List any areas of responsibility or functions of your current position that were absent or insufficiently covered in your preparation programs for school administrators.

The areas most frequently mentioned pertained to interpersonal skills and activities: teacher/staff evaluations, discipline, conflict resolution, difficult parents, and staff conflict and management. Other areas mentioned include curriculum development, school budgeting and finance, school athletics and activities, accountability accreditation, law, and special needs students.

List the strengths of your preparation program (excluding the internship).

School law and school finance were by far the most frequently mentioned strengths of programs. Other areas mentioned included: business, time, and personnel management, instructors --including current administrators, theory, relations with staff and community, and small study groups and classes.

List the limitations of your preparation program.

Many respondents commented that their programs "included too much theory, not enough practical experience," outdated information, and professors who were out-of-touch. Some asked for longer internships and apprenticeships. Other limitations mentioned were: curriculum, facilities, teacher supervision, non-certificated employees, and a lack of in-depth coverage of topics.

March 15, 1990

Dear School Administrator:

In order to fulfill the requirements of the Teacher Certification Act of 1975 (22-60-114), a survey was developed to aid in the collection of information related to administrator preparation programs in the state of Colorado.

This survey is being sent to those of you who received an administrative endorsement since 1988 and who are currently principals, assistant principals, superintendents or assistant superintendents in Colorado school districts. The results will be provided to Colorado institutions of higher education for their use in improving administrator preparation programs. The survey form is anonymous to protect the confidential nature of your response.

We hope you will assist us in improving Colorado administrator preparation by completing and returning the enclosed survey, by April 15, 1990.

Please call Patrick Chapman (866-6882) of the Department of Education if you have questions about the survey. Again, thank you for your prompt attention to this request.

Sincerely,

  
William T. Randall  
Commissioner

1990 ADMINISTRATOR PREPARATION PROGRAM EVALUATION

1. Which of the following best describes your position?

- (a) Superintendent
- (b) Assistant or associate superintendent
- (c) Principal
- (d) Assistant or associate principal
- (e) Other \_\_\_\_\_

2. How many years have you worked as a school administrator, including the current year?

\_\_\_\_\_

3. Please indicate the college or university at which you completed your school administration program which prepared you for your present position.

- (49) University of Northern Colorado
- (50) Colorado State University
- (70) University of Colorado - Boulder
- (71) University of Denver
- (74) University of Colorado - Colorado Springs
- (75) University of Colorado - Denver
- (99) Other \_\_\_\_\_

4. In what year did you complete this administrator preparation program?

\_\_\_\_\_

5. Which endorsement best describes your preparation program?

- (a) Elementary Principal
- (b) Middle, Junior High Principal
- (c) Secondary School Principal
- (d) Superintendent of Schools
- (e) Multiple endorsements, please specify: \_\_\_\_\_

6. Please indicate the level which best describes your current assignment.

- (a) District office
- (b) Elementary school
- (c) Junior high or middle school
- (d) Secondary school
- (e) Junior/senior high school
- (f) K-12 or multiple level

7. Please indicate the size of your school district.

- |  |   |
|--|---|
| <input type="checkbox"/> (a) 300 or fewer pupils | <input type="checkbox"/> (d) 1,201 to 6,000 pupils  |
| <input type="checkbox"/> (b) 301 to 600 pupils   | <input type="checkbox"/> (e) 6,001 to 25,000 pupils |
| <input type="checkbox"/> (c) 601 to 1,200 pupils | <input type="checkbox"/> (f) Over 25,000 pupils     |
