ABSTRACT

The workbook is designed to accompany a textbook, "The Story of California," a Spanish-English bilingual history and geography of the state intended for classroom use by limited-English-proficient, native Spanish-speaking students in California's urban middle schools. The teacher's edition, presented here, consists of reproductions of 51 separate worksheets with answers provided. The worksheets are geared to the 10 chapters of the textbook, whose topics are: California's location on the earth and the characteristics of its people; the state's geography; the first people in California; the advent of the European explorers and settlers; Spanish movement from Mexico into California, and colonization; the end of Spanish government in California and the beginning of Mexican government of the area, including the history of the missions and the Indians; statehood; the California Gold Rush; the impact of the industrial revolution; and use of the land from the 1850s to the present. Each worksheet contains some questions in English and some in Spanish. (MSE)

WORKSHEET 16

PRONOUNS

In both English and Spanish we often use words called pronouns instead of nouns (words for people, things or ideas). Examples of pronouns in Spanish are: él, ella, la, los, le, ellos. Can you think of more Spanish words that do this? In English there are fewer of these words than in Spanish. The most common are: he, she, it, you, they, him, her, them, this, that, these, those, some. Also, pronouns are sometimes used in English in different ways than in Spanish. For example:

- (a) Some pronouns that are placed before the verb (action word) in Spanish, are placed after it in English;
- Marfa lo puso en la mesa.
 - Marfa put it on the table.
- (b) Some pronouns that can be left out in Spanish must remain in English;
- Ya lavé los platos.
 - I already washed the dishes.
- (c) Some pronouns that are usually used in Spanish are left out in English;
- A ella Jorge le dió un anillo.
 - Jorge gave her a ring.
 - Felipe tocaba sus discos de Iron Maiden, lo que siempre me enoja.
 - Felipe was playing his Iron Maiden records, which always makes me angry.

Now read these pairs of sentences. One sentence of each pair uses a pronoun incorrectly. Check the box next to the correct sentence in each pair.

1. Sometimes they it dried in the sun.
 Sometimes they dried it in the sun.
2. The Indians used the skins to make clothes.

Indigenous Tribes of the San Francisco Bay Area

Indigenous Tribes of the Bay Area*

scale in miles
0 5 10 15 20

For many, many thousands of years, only the indigenous people lived in the San Francisco Bay Area. When the Spanish first came here about 200 years ago, 13 tribes—with about 250 people in each—were living in the area shown on the map. These tribes spoke 8-12 languages, and tribes who lived next to each other often did not speak the same language!

Members of a tribe might occasionally visit a neighboring tribe—to trade or arrange things—but most indigenous people did not ever travel very far. For example, the Huchiun tribe in the East Bay had 3 villages—one where downtown Oakland is now, one at the Berkeley marina, and one in downtown Richmond. Members of a village travelled to the other villages only once or twice in their life!

No indigenous people lived in San Francisco, or on the San Francisco Peninsula, because it was too cold and foggy for them. They thought the Spanish were very foolish to construct Mission Dolores in San Francisco, because the weather was so "bad" there!

I. Write short answers to these questions.

1. Today the water between San Pablo Bay and Suisun Bay is called the Carquinez Strait. Which tribe did the Spanish name this strait after?

the Karkin

2. Which tribe lived closest to San Francisco? the Salson

Learning About the Past

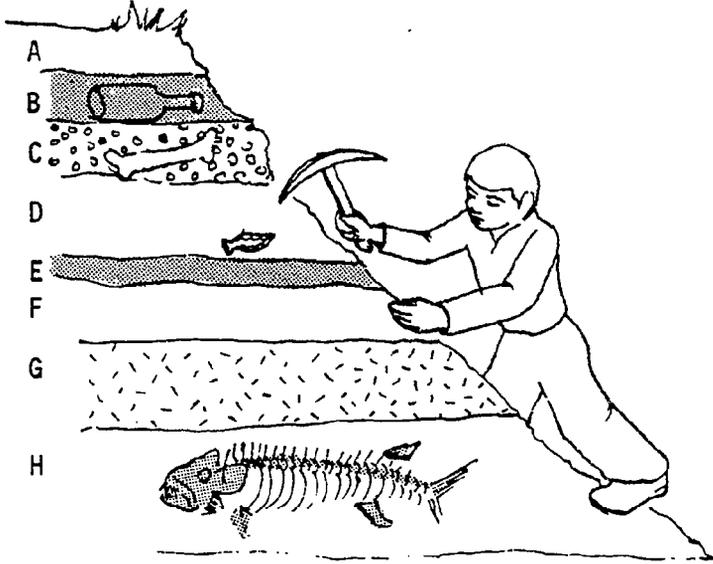

Chapter 3

WORKSHEET 18

NAME _____

Digging Into the Past

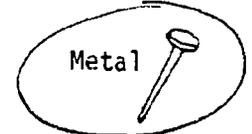

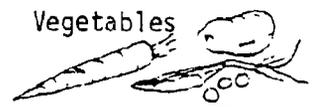

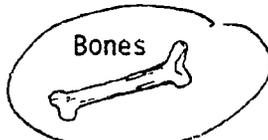

People first began to write about 3,500 years ago. The Indians of California never had a way of writing their own languages. How do we know about people's way of life if we can't read about it?

We can learn some things by looking at the things they left behind: arrowheads, bones, even cities have been found under the ground. Things from older times are buried deeper in the ground.

People who study life before written history are called "archeologists." They try to put together a picture of the past from the things they find in the earth.

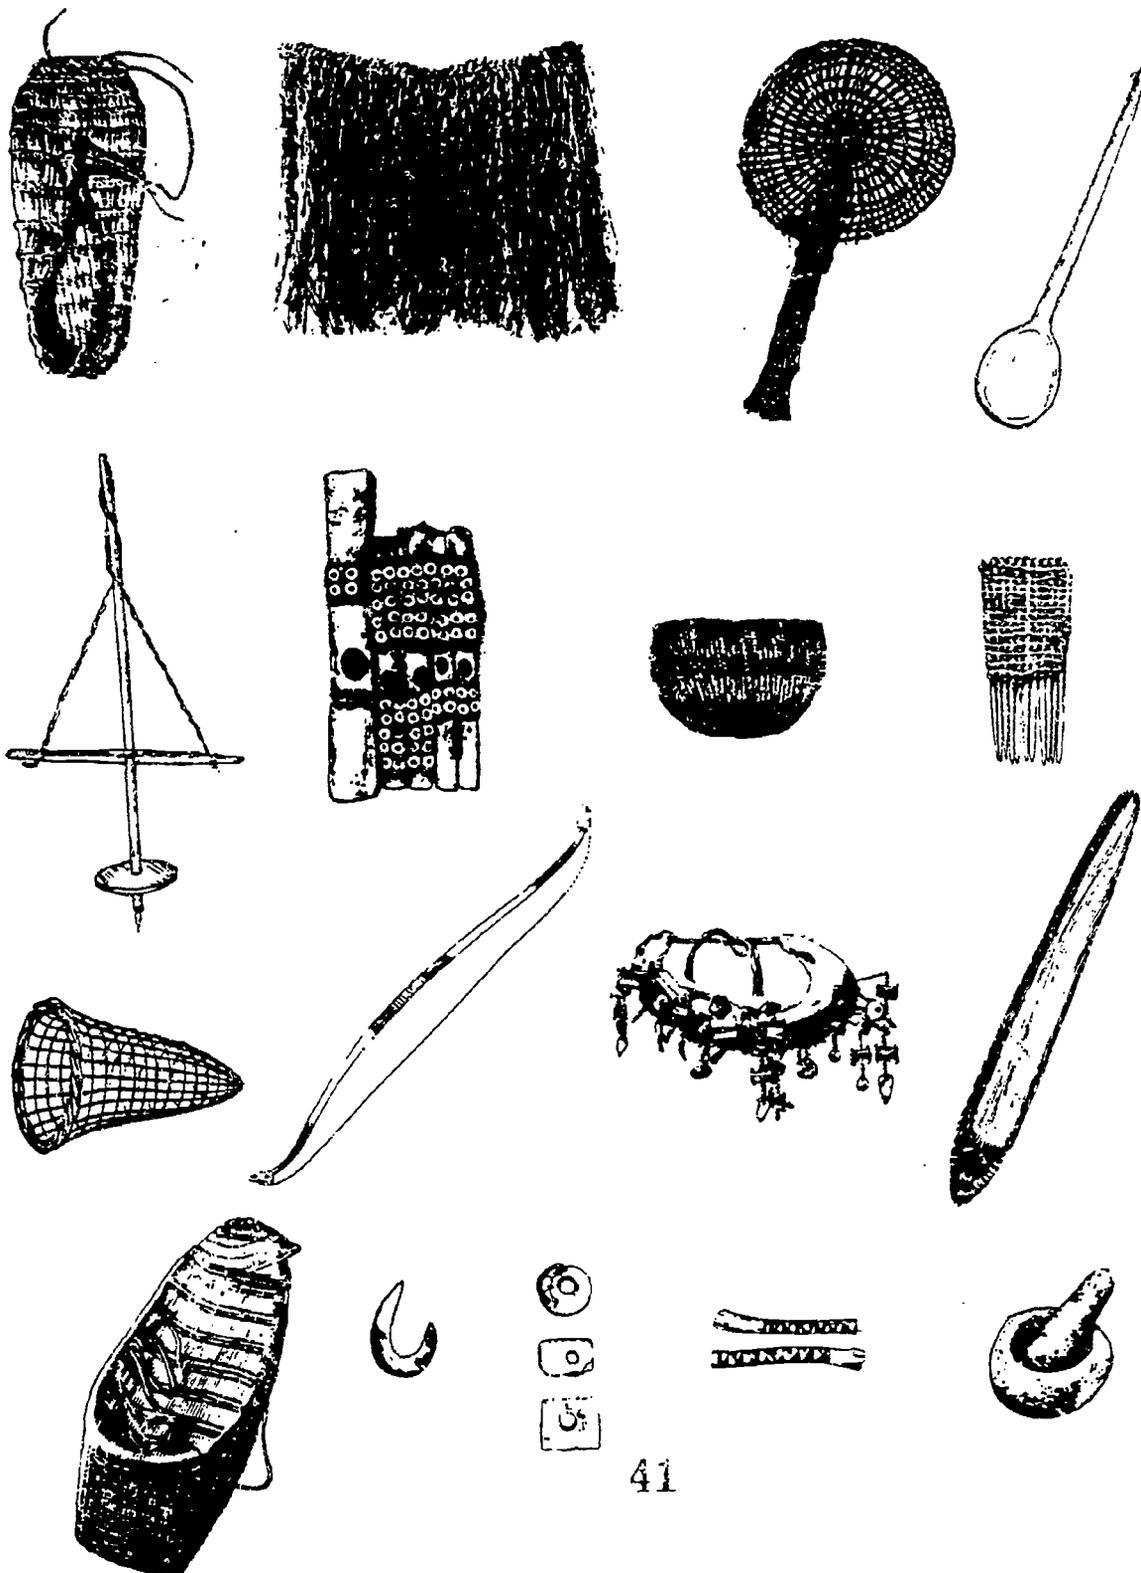

QUESTIONS:

1. Look at the picture above. Which layer (A, B, C, D, E, F, G, H) has the newest things in it? **A**
2. Which layer has the oldest? **H**
3. In which layer can you find a bottle made of glass? **B**
Do you think this is very old? **No**
4. In which layer can you find an arrowhead? **D**
5. If you found an arrowhead in the layer that is about 10,000 years old, what would this tell you?
That people made this arrowhead about 10,000 years ago.
6. In which layer can you find an unusual fish? **H**
What does this tell you about the land there long ago?
That it used to be under the ocean.
7. Circle the three things that will stay buried in the earth for a very long time.

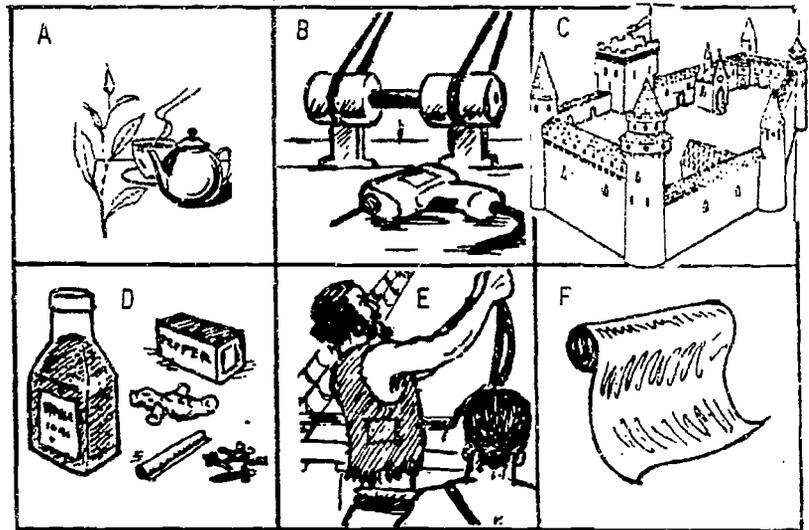

WORKSHEET 18

Try to be an archeologist (a person who studies the time before written history). Look at these things that you found. Can you tell what the Indians used them for? Can you tell what they are made of? Do we use anything like these today?

WORKSHEET 23

- I. Hasta ahora cuando se ha presentado a ustedes ejercicios de responder a preguntas con oraciones escritas, se les pide que repitan cuantas palabras puedan de la pregunta.

Ejemplo:

De qué forma buscaban su comida los indígenas californianos?

- Los indígenas californianos buscaban su comida de los animales salvajes y las plantas silvestres.

Se les ha pedido esto a ustedes para acostumbrarles a escribir oraciones completas. Sin embargo esta manera de responder a las preguntas no es natural, ni en español ni en inglés. Lo natural es de substituir los pronombres (pronouns) por los nombres claves de la pregunta. Así la respuesta más natural a la pregunta mencionada sería:

- Ellos la buscaban de los animales salvajes y las plantas silvestres.

Favor de hacer lo mismo con las preguntas que siguen. En lugar de repetir los nombres, substituye los pronombres como en la conversación de cada día, pero sigue escribiendo oraciones completas.

II. LOOK AT THE MAPS IN CHAPTER FOUR AND ANSWER THE QUESTIONS

- Look at page 76. Compare it with a modern world map. We can tell that in 1480:
 - the Europeans knew about North America.
 - no sailors had sailed around Africa yet.
 - no sailors had gone to England yet.
 - no one knew about India yet.
- Look at page 80. We can tell that:
 - most of the trading between Europe and Asia went across Africa.
 - the trading ships went around the Southern part of Africa.
 - there were three main trade routes between Europe and Asia.
 - most trading ships sailed west from Europe.
- Look at page 83. We can tell that Columbus:
 - thought the world was round.
 - thought the world was flat.
 - had a good map of Japan.
 - Knew about North and South America.
- Look at page 84. What is NOT true about Columbus's trips?
 - Columbus made four trips to the New World.
 - Columbus came to land that is now part of the United States.
 - Columbus's last trip was in 1502.
 - Columbus went the furthest south on his third trip.
- Look at page 95. This map is better than earlier maps, but there are still big "mistakes." Which statement is NOT a mistake?
 - There is a waterway between the Atlantic and the Pacific Oceans across the top of North America.
 - The Australian continent is larger than Europe and Asia together.
 - North and South America are two large continents connected by a narrow piece of land.
 - There are large continents near the North Pole.

III. The time-line below is exactly 10 centimeters long. The scale of the time-line is 2 millimeters per year. The line begins at the year 1492 and ends a century later. Using a ruler, mark on the line the following events:

- (a) Columbus' 3rd trip.
- (b) Cortes lands in Mexico.
- (c) De Vaca lands on the East Coast.
- (d) Ulloa sails North.
- (e) Cabrillo claims California.
- (f) Drake sails into the Pacific.

IV. The chart below shows which inventions were used by the Aztecs and which were used by the Spanish. (A in the box under the invention means that they used it.)

Inventions	the wheel	covered drains under the streets	guns and cannons	fine stone buildings	ships with sails	electric machines	the best calendar	metal armor
