TITLE A Matter of Facts: The North Carolina Community College System Fact Book.

INSTITUTION North Carolina State Dept. of Community Colleges, Raleigh. Div. of Planning and Research Services.

PUB DATE 93

NOTE 148p.; For an earlier version, see ED 317 231. Much of the document is printed on colored paper which may not reproduce well.

PUB TYPE Statistical Data (110) -- Reports - Research/Technical (143)

EDRS PRICE MF01/PC06 Plus Postage.

DESCRIPTORS Budgeting; *Budgets; *College Administration; College Planning; *College Programs; Community Colleges; *Educational Finance; Enrollment; Enrollment Trends; Expenditure per Student; *Institutional Characteristics; *Institutional Mission; Program Descriptions; State Surveys; Student Characteristics; Teacher Characteristics; Two Year Colleges; Vocational Education

IDENTIFIERS *North Carolina Community College System

ABSTRACT

This five-part report offers background information and current data on the programs, finances, facilities, students, and personnel of the North Carolina Community College System (NCCCS). Section I presents an overview of the system, including general information on the NCCCS's mission, history, programs, governance, funding, the NCCC Foundation, service area assignments, statewide plan, and the planning process. This section also contains a map and organizational chart. Section II provides program briefs covering the following: technical/vocational curriculum programs; academic curriculum programs and accrediting agencies of curriculum programs; basic skills; occupational extension; community service; human resource development; Educational Network (EDNET); professional development; New and Expanding Industry Program; focused industrial training centers; small business center network; in-plant job training; Job Training Partnership Act; Carl Perkins Act; correctional education; proprietary schools licensure; and fire training. Section III examines finances, facilities, and equipment, including a budget overview and information on the disposition and source of funds, regular program costs by purpose, state-level expenditures, and average cost per full-time equivalent (FTE) student by institution. Section IV provides data on students, including information on enrollment by program area, sex, race, residency status, and employment status; student completions; and average annual FTE by program area and by credit hour load. The final section provides data on faculty and staff, including 1992-93 system totals by position category, race, sex, years of service, educational level, and months of employment. A bibliography and glossary are appended. (PAA)

Preface

The North Carolina Community College System Fact Book is a yearly publication providing authoritative data on the status of the entire system. The targeted audience is primarily decision-makers and planners dependent on timely information for the success of their endeavors.

However, the Fact Book is an excellent reference and point of entry for anyone researching the N.C. Community College System.

As stated, the Fact Book is an annual, implying the flexible nature of its content. Any questions or suggestions, concerning the content, purpose, or format of the Fact Book should be directed to Paul Nagy, Coordinator of Special Projects, at 919/733-7051, ext. 737.

OUR PURPOSE

Support of economic growth and prosperity through education was the underlying concept in the development of the community college system. All of the institutions in the North Carolina Community College System offer vocational/technical training and basic education to prepare adults for the job market. In addition, a majority of institutions offer the first two years of a baccalaureate program.

The mission of the system has been defined in the North Carolina General Statutes (115D):

... the establishment, organization, and administration of a system of educational institutions throughout the state offering courses of instruction in one or more of the general areas of two-year college parallel, technical, vocational, and adult education programs ...

The law further states that:

The major purpose of each and every institution operating under the provisions of this Chapter shall be and shall continue to be the offering of vocational and technical education and training, and of basic, high school level, academic education needed in order to profit from vocational and technical education, for students who are high school graduates or who are beyond the compulsory age limit of the public school system and who have left the public schools.

The statutory mission statement serves to keep the system focused on vocational and technical education. It also specifically mandates provision of basic academic education for adults through the high school level. These programs -- vocational and technical education, and basic academic education for adults -- have priority status because of their specific place in the statutory mission statement.

The mission directs the system to serve adults who have left the public schools and are beyond compulsory school age. This definition provides the background for development of policies governing the institutions' relationship to the public schools.

It is the statutory mission statement from which the "working mission statement" derives. It is the working mission statement which focuses the community college system's resources by responding to contemporary societal issues. Legitimized by the State Board of Community Colleges, the working mission dynamically mobilizes our abilities to concentrate on current concerns.

The Working Mission Statement

The North Carolina Community College System is a statewide organization of public two-year postsecondary educational institutions with an open-door admissions policy. Its mission is to provide adults in North Carolina with quality and convenient learning opportunities consistent with identified student and community needs. These opportunities are accessible to all adults regardless of age, sex, socio-economic status, ethnic origin, race,

religion, or handicap. Educational and training programs are designed to enhance the personal, social, and economic potential of the individual and to produce measureable benefits to the state. The system fulfills this mission by providing:

vocational programs and courses for students desiring to prepare for skilled trades or to upgrade their job skills;

technical programs and courses that meet the career needs of individuals;

transferable programs and courses for students desiring to attend a senior college or university;

special occupational training and upgrading programs and services for businesses, industries, and agencies;

programs and courses in adult basic education, high school completion, and continuing education;

counseling, career guidance, job placement services, and other programs essential to developing the potential of individual students;

programs and services to enrich the quality of community life;

effective and cooperative relationships with the schools, colleges, universities, government agencies, and employers across the state, and

sound management practices and systematic planning to allocate the resources required to achieve the stated objectives of the North Carolina Community College System.

Adopted by the State Board of Community Colleges, September 1987

HISTORY

In the years following World War II, North Carolina began a rapid shift from an agricultural to an industrial economy. With that change came an awareness that a different kind of education was needed in the state. People who did not desire a four-year baccalaureate education nevertheless had the need for more than a high school diploma.

In 1950, the State Superintendent of Public Instruction authorized a study of the need for a system of tax-supported community colleges. The resulting report, by Dr. Allan S. Hurlburt, was published in 1952. It proposed a plan for development of state supported community colleges. In 1957, the General Assembly adopted the first Community College Act and provided funding for community colleges.

The same (1957) General Assembly also provided funding to initiate a statewide system of Industrial Education Centers. These centers were to train adults and selected high school students in skills needed by industry. By 1961, there were five public junior colleges emphasizing arts and sciences, and seven industrial education centers focusing on technical and vocational education.

The need to coordinate these two post-high school education systems led Governor Terry Sanford to appoint the Governor's Commission on Education Beyond the High School (Irving Carlyle, chair). In 1962, this commission recommended that the two types of institutions be brought into one administrative organization under the State Board of Education and local boards of trustees. The resulting unified community college system would provide comprehensive post-high school education.

In May 1963, the General Assembly, in line with the Carlyle Commission report, enacted into law G.S. 115A (later changed to 115D), which provided for the establishment of a Department of Community Colleges under the State Board of Education and for the administration of institutions in the Community College System. There were then 20 industrial education centers, six community colleges (three of which became four year schools in 1963), and five extension units.

By 1966, there were 43 institutions with 28,250 full time equivalent (FTE) enrollments. In 1969, there were 54 institutions with 59,329 FTE. The system had grown very rapidly, exceeding ten percent annually nearly every year until the late 1970s. In 1974-75, growth reached the 32 percent mark. The system continues to grow in enrollments nearly every year, but by much more modest margins. The number of institutions has not increased since Brunswick Community College became the 58th in 1978, with enrollments in 1989 at approximately 660,000 students by unduplicated headcount.

The original legislation placed the community college system under the purview of the State Board of Education, and created a State Department of Community Colleges. In the early years of the system, the State Board of Education Chair was Dallas Herring; David Bruton succeeded him in 1977.

In 1979, the General Assembly changed the state control of the system.

Provision was made for a separate State Board of Community Colleges. The Board was appointed and organized in 1980, and met several times with the State Board of Education. The new Board assumed full responsibility for the system on January 1, 1981. The Board's first chairperson was Duke Power Company Executive Carl Horn. He was succeeded in 1983 by John A. Forlines, president of the Bank of Granite. In 1989, William F. Simpson became the current chair.

In 1988, the North Carolina Community College System celebrated its 25th anniversary, recognizing that in its first quarter century of service, the system had emerged as the nation's third largest community college network, educating millions of students and employing thousands of faculty and staff.

In November of 1987, the State Board established the Commission on the Future of the North Carolina Community College System. The 23-member, blue-ribbon panel of business, civic and education leaders was charged with establishing a systemwide agenda for policy and action over the next 25 years. The resulting Commission on the Future report, released in 1989, outlined 33 recommendations for action and change. All 33 recommendations have been adopted by the State Board and the General Assembly, and a strategic implementation plan, the Educational Blueprint, has been developed.

The Department of Community Colleges has had four presidents: I.E. Ready (1963-1970), Ben E. Fountain, Jr. (1971-1978), Larry J. Blake (1979-1982), and Robert W. Scott (1983-present). Charles R. Holloman served in an acting capacity from September, 1973 to July, 1979. The Department of Community Colleges became fully separate from the Department of Public Instruction in all matters, including fiscal affairs, when the new State Board assumed its full powers in January, 1981.

PROGRAMS

The North Carolina Community College System offers a comprehensive range of educational programs to meet the needs of local communities for higher academic education, employment skills, basic educational skills, job retraining, personal growth and development, and community and economic development. These programs are organized under several broad categories.

Curriculum programs offer credit courses leading to certificates, diplomas, or degrees. These may be technical, vocational or academic. The majority of the more than 1800 programs offered are technical, with particular emphasis on Associate in Applied Science degrees in business and office skills, nursing and allied health, engineering technologies, transportation technologies, and technical industrial occupations. There are also a significant number of vocational trade and industry programs leading to certificates or diplomas in such areas as construction trades, machine and metalworking occupations, industrial maintenance occupations, agriculture, etc. College transfer and general education programs provide academic courses parallel to the first two years of a baccalaureate degree; one or the other is offered at most of the colleges in the system.

Each of the colleges also offers instruction in basic academic skills and instructional support. Programs include Adult Basic Education (K-8 basic academic skills), Adult High School and GED programs (9-12 academic preparation), developmental studies courses to prepare students to master collegiate level coursework, individualized learning laboratories and other programs.

A third broad category of programs is continuing education. These non-credit courses may be occupational, academic, or avocational in nature. Some are offered as a categorically funded community service. Others are designed to upgrade occupational skills and are funded through enrollment driven formulas (See Finance).

Because of the unique character of community colleges, student services programs play an especially important role in the life of the colleges. Students receive academic, personal and career counseling services, special assessment and placement assistance, help in transition to work and job development, and a variety of other services which are essential to the success of the instructional programs.

Finally, there is a broad effort in specialized programming, often targeting the economic development of the community. The New and Expanding Industry Program, the Focused Industrial Training Program, and the Small Business Assistance Network all provide direct consulting and custom training to business and industry to promote their success. The Human Resources Development and Job Training Partnership Act Programs provide services and training specifically targeted to the unemployed and disadvantaged. And a variety of other programs connect the colleges uniquely to the needs and aspirations of their communities.

GOVERNANCE

The State of North Carolina has assigned the 58 public community colleges in North Carolina to the State Board of Community Colleges. The board has full authority to adopt all policies, regulations and standards it may deem necessary for operation of the system. The Department of Community Colleges serves as an administrative arm of the State Board.

The State Board is responsible solely for the state's community college system and is not under the domain of any other board or commission. Members of the State Board are selected by the governor and the general assembly. The board's membership should reflect the state's population in terms of race, age, sex, ethnic origin, economic and social background and the geographical distribution of the state. Members represent business, industry, education and government.

The board consists of 20 members. The lieutenant governor and the state treasurer are ex officio members. The governor appoints 10 members, four from the state at large and one from each of the six trustee regions. Four are designated by the senate and four more by the house. Terms are staggered and expire every other odd-numbered year. No person may be appointed or elected to more than two consecutive terms of six years.

The board meets at least ten times per year to evaluate the recommendations of the Department of Community Colleges, to set policy for the system and to oversee its operation. Members elect a board chair to serve as the board's leader, spokesperson and presiding officer. The chair is responsible for projecting the public image of the board and providing positive leadership.

The Department of Community Colleges, headed by the system president, provides state-level administration and leadership of the community college system under the direction of the State Board of Community Colleges.

The State Board and the Department have three major functions: (1) equitable distribution of funds and fiscal accountability; (2) establishing and maintaining state priorities; and (3) educational program approval and accountability. Through the exercise of its authority in these areas, the Board can recommit the system to existing policies or alter the direction of the system through changes in policy.

As part of its administrative function, the Department provides support services for the various program offerings such as nursing, agriculture and business. Departmental staff assist college staffs by helping to develop and implement curriculums and other programs, and by providing technical assistance in a range of areas. The Department provides other services for the system that would be difficult for an individual institution to initiate, such as statewide data collection.

At the local level, each of the colleges operates under a board of trustees. Each board is composed of twelve citizens from the service area in which the college is located. The president or chairman of the executive board of the student body serves as an ex officio member. Local board members are appointed for staggered 4-year terms. Four members each are elected by the

local school board and the board of commissioners of the county in which the institution is located. Four members are appointed by the governor.

The board of trustees sets local policy. The local board selects, and the State Board must approve selection of each college's president. The president operates the college within state policies and policies adopted by the local trustees. Administrative decisions, such as employment of faculty members, are made by the president. All personnel employed at the colleges are employees of the college and not of the North Carolina Department of Community Colleges.

FUNDING

By law, the State Board of Community Colleges is responsible for providing funds to meet the financial needs of the colleges in accordance with the policies and regulations of the board. The State Board has delegated authority to the local trustees to disburse the funds within these policies and regulations.

Sources of funding include state, federal and local government as well as tuition. For 1992-93 the tuition rate is \$13.25 per credit hour and \$185.50 maximum tuition charge per quarter for in-state students. For out-of-state students the tuition is \$107.50 per credit hour and \$1,505.00 maximum charge per quarter.

State funds may be used by community colleges for current operating expenses, equipment, library books, acquisition of land and capital construction.

Local funds must be used for operating and maintaining the plant or to supplement any state budget item.

The percentages of funding origination are as follows:

State	70.7 %
Local	12.8 %
Tuition	12.6 %
Federal	3.4 %
Other	0.6 %

These funds are deposited into the State Treasury. The largest portion is allocated to the colleges based on a formula adopted by the State Board. This formula is stated in Section 2D.0300 of the North Carolina Administrative Code (APA). Other funds are appropriated by the legislature and federal government for special purposes.

The State Board allocates the funds to the local boards of trustees which are responsible for using these funds in accordance with State Board policies and state and federal laws and regulations.

It is the intent of the system to minimize the out-of-pocket expense to students. For that reason, tuition is kept as low as possible. In addition, state and federal aid is provided by grants, loans, and scholarships. Many private companies have established scholarship funds at the local and state level.

The Department of Community Colleges audits the enrollment records of the colleges, and the state auditor's office audits their financial records.

North Carolina's fiscal year runs from July 1 to June 30. Unless otherwise specified, all funds not expended during that period revert to the general treasury and are available to the legislature for reappropriation.

THE NORTH CAROLINA COMMUNITY COLLEGES FOUNDATION, INC.THE NEED

The system relies primarily on state, local, and federal governmental units and tuition/fees for both operating and capital investment funds. In the early years of the system's history, traditional funding sources were adequate. During the 1970's and 1980's, increased competition for state and local funds, inflation, the need to update programs and equipment, and demographic changes eroded the system's financial base of support.

As the system matured, all 58 institutions established private foundations (503)(c)(3) for the purpose of raising funds from private sources to support a variety of activities and local projects.

The Department of Community Colleges also realized a need to attract support from large companies and corporations whose presence in North Carolina is pervasive and not related to any particular college. Thus, the NCCCF was established as an avenue to large donors who depend on the community college system for many of their employees. It is important to note that the NCCCF is not a competitor with local institutional foundations. Rather it is a resource to be used in increasing local support.

THE FOUNDATION PURPOSES

The North Carolina Community Colleges Foundation, Inc. was chartered on September 11, 1986 as a nonprofit charitable corporation and has a 501(c)(3) designation by the Internal Revenue Service. A Board of Directors manages the foundation.

The purposes of the foundation are to:

- * Support the mission of the community college system and to foster and promote the growth, progress, and general welfare of the system
- * Support programs, services, and activities of the community college system which promote the mission of the system
- * Support and promote excellence in administration and instruction throughout the system
- * Foster quality in programs and encourage research to support long range planning in the system
- * Provide an alternative vehicle for contributions of funds to support programs, services, and activities that are not being funded adequately through traditional resources
- * Broaden the base of the community college system's support
- * Lend support and prestige to fund raising efforts of the institutions in the system
- * Communicate to the public the system's mission and responsiveness to local needs

FUND DEVELOPMENT GOALS

The Board of Directors seeks funds to enhance:

- * Educational assistance for students
- * Professional development for faculty, staff, and administration
- * Educational program improvement
- * Instructional equipment
- * Research programs
- * Public relations
- * Special initiatives and projects

CONTRIBUTIONS

The foundation receives contributions of:

- * Cash gifts
- * Common stock and other securities
- * Life insurance
- * Funds honoring individuals during life
- * Memorial gifts
- * Annuity trusts
- * Property and/or land with provision to use for duration of life
- * Donations by will
- * Individual Retirement Accounts
- * Other methods used by donors to meet specific situations

SERVICE AREA ASSIGNMENTS

PHILOSOPHY

Service areas were established to regulate the offering of courses by colleges in specific geographic area in order to eliminate duplication of services by different colleges in the same area. The assignments do not regulate or establish attendance areas. Citizens may enroll in any course at any college they choose.

PURPOSE

The purpose of service area assignments is to assign specific geographic areas for all colleges, assigning the authority and responsibility for providing courses in a county other than the one in which the college is located. The assignments also include a coordination procedure, whereby a college may offer courses in another college's service area when there is mutual consent and written agreement approved by the State Board.

SPECIAL PROVISIONS

1. Bertie County is divided between Roanoke-Chowan CC and Martin CC as stated in the service area assignments. In the case of offering courses within the town or township of Windsor, Martin CC has exclusive authority for offering curriculum and adult basic education courses, and both Martin CC and Roanoke-Chowan CC are authorized to offer other continuing education courses.
2. Catawba Valley CC is authorized to continue offering the furniture training program at the Iredell Prison Unit. This exception shall be re-examined periodically by the State President with his findings reported to the State Board.
3. Union County is assigned to both Anson CC and Stanly CC. The existing consortium (agreement) between the two institutions shall be used in providing service in Union County.
4. Martin CC is authorized to offer in Washington County all adult basic education, adult high school/GED, fire training and emergency medical training and in-plant training.

STATEWIDE PLAN

The first statewide plan, "Planning for Our Future" was adopted by the State Board in April, 1988. The plan includes a revised mission statement and goals and objectives. State Board members, local trustees, community college presidents, staff, faculty and administrators from the colleges, and staff of the Department of Community Colleges all participated in the development of the plan.

To secure citizen participation in planning for the system, a 23-member Commission on the Future of the North Carolina Community College System was created in 1988. Its report, GAINING THE COMPETITIVE EDGE, is the basic planning document for the next six years. The document contains 33 recommendations which have far-reaching implications for community colleges. (See following pages.)

The planning process is continuing (see following pages). In the spring of 1990 a new statewide plan was adopted by the State Board of Community Colleges. It closely tracks the report of the Commission on the Future.

COLLEGE-LEVEL PLANNING

In September each college submits an institutional effectiveness plan, which is reviewed at DCC and submitted to the State Board. The State Board adopted guidelines for biennial institutional plans, with annual updates, as required by the General Assembly. Major elements of the guidelines include:

- 1) a statement of institutional purpose consistent with the mission of the N.C. Community College System;
- 2) a statement of educational needs of the service area, including the characteristics of the people and businesses to be served;
- 3) a projection of long-range needs in the areas of personnel, facilities and equipment;
- 4) a description of the accomplishments of the college in addressing college level goals from the previous year institutional effectiveness plan, include substantiating data;
- 5) an evaluation of the college's progress in addressing system level goals;
- 6) a statement of institution goals and objectives with emphasis on educational outcomes - where appropriate goals should be cross-referenced to system goals;
- 7) a section on institutional diversity; and
- 8) a description of the institution's procedures for planning & evaluation.

Critical Success Factors

The State Board has adopted critical success factors to measure the performance of the system. The six factors were developed from the Statewide Plan and the Commission's report. They are: Student Success, Resources, Access, Education Continuum, Workforce Development, Community Services, Program Management/Accountability. Data are being collected on 33 measures of progress toward success as indicated by the factors. An initial report, presenting five years of data, was presented to the State Board and General Assembly in April, 1990. Annual reports are submitted in April.

PLANNING PROCESS

PHASE I: DEVELOPMENT OF GOALS AND OBJECTIVES

The planning cycle begins when the State Board, at its annual retreat in odd-numbered years, reviews the mission of the system and selects the strategic themes which shall be the focus for planning. These strategic themes transcend the annual and biennial time frames.

Following State Board selection of strategic themes, the planning committee coordinates development of long-range (biennial) plans to address these themes. The planning committee will host an annual planning conference in the late fall. In odd-numbered years the presidents and local board chairs discuss the strategic themes developed by the State Board and long-range goals drafted by the planning committee at the planning conference. Objectives and strategies for implementing the goals are also deliberated at the Conference.

Following the Conference, the Policy Council of the Department of Community Colleges develops the specific strategies, working with standing and ad hoc committees of the Presidents' Association, the Trustees' Association and other groups. Concurrently, the goals are discussed at the college level, and reports on institutional plans relative to each goal are prepared for the planning committee.

By March, the planning committee selects those strategies to be included in the system plan and submits them to the State Board for approval. The System President includes these strategies in the development of the budget proposal and legislative agenda for the next biennium.

PHASE II: ASSESSMENT AND ENVIRONMENTAL SCAN

Assessment and environmental scanning go on continually throughout the planning cycle. However, because of the biennial budget cycle, it is appropriate for these functions to receive concentrated attention during the second year of the planning cycle. They are also the focus of the annual Planning Conference in even-numbered years.

While the planning committee oversees these functions, a wide variety of resources and groups within the system are involved. These include institutional planning processes, the Presidents' Association, the Trustees' Association, other professional associations, special task forces, ad hoc committees and staff in the Department.

Some of the activities which will be included in this phase of the planning cycle are:

SCAN

The scanning process is an analysis of data and information (national, state, and regional) to identify trends which may affect the community college system. This may involve review of selected publications and presentations

which have special significance for the identification of trends.

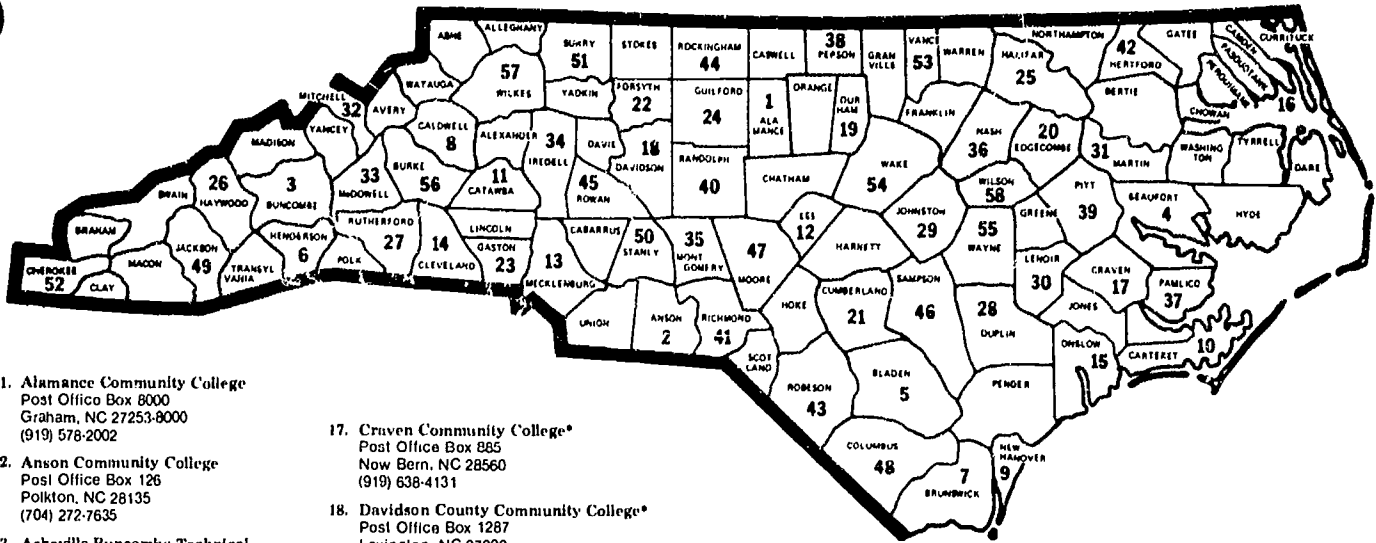

ASSESSMENT OF PROGRESS

The assessment of progress involves an analysis of routine data reports and special reports from the MIS to support policy or program development and improvement. In addition, the process may include commissioning special studies which draw on other sources of information and expertise to support policy or program development and improvement; collection and analysis of reports from the individual college planning processes; and recognition of outstanding programs.

POLICY RECOMMENDATIONS

Ongoing analysis may identify problems and/or promising ideas which may be developed or piloted outside of the budget process. The Planning Committee may initiate development of policy recommendations for the State Board in coordination with the Office of the System President and the Presidents' and Trustee's Associations when it determines a need.

ACADEMIC CURRICULUM PROGRAMS

College level academic courses have been a part of the mission and programming of the N. C. Community College System from its inception in 1963. Currently, 41 of the fifty-eight colleges are authorized to offer college parallel programs leading to Associate in Arts, Associate in Science and Associate in Fine Arts Degrees. These degrees are fully transferable to most baccalaureate level colleges and universities. From time to time, the State Board of Community Colleges entertains proposals from additional colleges in the system to offer this program. These proposals are evaluated in terms of the need for the program, student demand for the program, the college's capacity to support a quality program, and the potential impact of the program on other colleges in the region.

The Associate in General Education degree is offered by 36 of the colleges. While this program is generally designed for the academic enrichment of students who may not seek to transfer, many of the courses in the program transfer through articulation agreements with senior colleges. In addition, 12 of the colleges offer this degree under contract with a senior college. Students in these programs earn credit at both institutions and often enjoy expanded opportunities for transfer.

TECHNICAL/VOCATIONAL CURRICULUM PROGRAMS

Contact: Roger Worthington

The North Carolina Community College System offers over 1800 technical and vocational curriculum programs leading to certificates, diplomas and degrees under 269 titles.

Technical degree programs account for 1240 of these (174 titles) and lead to the Associate in Applied Science degree. A full-time student can typically complete these programs in two years (6-8 quarters). In addition to technical major coursework, these programs require a minimum of 18 quarter credit hours in general education (English, social science and humanities) and approximately 24-36 quarter credit hours in related courses (foundation courses in mathematics, science, and other related subjects.)

Vocational programs account for 624 of the occupational curriculums under 95 titles. These programs lead to a certificate or diploma and can be completed by a full-time student in one to four quarters. Vocational programs require up to 12 quarter credit hours (typically six) in general education and 12-18 quarter hours credit in related courses.

Certificate programs may consist of major courses from either a technical or vocational program and are usually 18 or more quarter hours credit in length.

In 1991-92 the system initiated 59 new vocational and technical curriculum programs and discontinued 47. These programs are established on the basis of local or regional labor market need and student demand. Each is approved by the State Board of Community Colleges through a regular program approval process at the request of an institution. Curriculums are designed by the institution with input from advisory committees of employers and practitioners, but the design must be consistent with a general framework established through the curriculum standards. Under a policy adopted by the state board in 1989, each of these programs must be reviewed by the college at least once every five years with regard to quality, student outcomes, cost effectiveness, etc.

Many of the programs are of regional interest and 98 of the programs are offered by only one institution in the system. Offerings are documented in a systemwide catalog and chart.

BASIC SKILLS

Contact: Bobby Anderson

One of the primary missions of the community college system is the offering of educational opportunities for adults 16 years of age and older who are out of school. The system provides educational opportunities through four major literacy components, utilizing over 2,450 off-campus sites, including work sites, churches, community centers, schools, libraries, sheltered workshops, and prisons.

Adult Basic Education. This program addresses the needs of adults who lack sufficient mastery of basic educational skills to enable them to function effectively in society. Adults also enroll in the program if their lack of mastery of basic skills results in an inability to speak, read, or write the English language. These barriers generally constitute a substantial impairment of their ability to get or retain employment commensurate with their real ability. ABE can help to eliminate these disabilities and raise the level of education of such individuals with a view toward making them less likely to become dependent on others.

Adult High School. This program consists of two components: the General Educational Development (GED) program and the Adult High School Diploma program. These components provide for the completion of an academic high school education for all non-high school graduates who are at least 18 years old and for individuals between 16 and 18 years old with special needs.

The GED testing program is operated jointly by the American Council on Education and the State Board of Community Colleges. There are GED testing centers at all community colleges.

The Adult High School Diploma program operates through an agreement of affiliation between the boards of trustees of the local community colleges and the local boards of education.

Compensatory Education. This is a program to compensate those mentally retarded adults who have not had an education or received an inadequate one. It focuses on the skills needed by mentally retarded adults to function as independently as possible. The program assumes an end result of productivity, employment, independence and self-sufficiency for its clientele.

Enrollments. (Programs are duplicated across type and will not add up to the total)

Year	ABE	AHSP	GED	CED	TOTAL
1987-88	50,790	18,235	16,445	7,989	87,033
1988-89	56,055	17,517	21,632	8,508	96,680
1989-90	64,869	19,350	23,790	8,731	109,415
1990-91	73,535	20,667	25,726	8,436	120,043
1991-92	77,005	20,955	28,761	8,137	125,660

OCCUPATIONAL EXTENSION

Contact: Roger Worthington

One of the major missions of the community college system is to provide opportunities for the citizens to prepare for new occupational opportunities or to upgrade their knowledge and skills in their current employment. These opportunities are provided through single courses or a series of courses specifically designed for an occupation.

These courses are designed for the specific purposes of training an individual for employment, upgrading the skills of persons presently employed, and retraining others for new employment in occupational fields. They are offered to people in all technical or vocational occupations and vary in length according to the complexity of the skill and the need of the employee or employer. Most occupational extension courses are developed and taught on request from a group or an employer. Courses are usually offered at a time and place convenient to the employee and/or employer. In 1991-92 there were 289,087 (21,890 FTE) enrollees in the occupational extension courses. Expenditures for occupational courses were \$18,093,889 in 1991-92.

YEAR	ENROLLMENT	FULL-TIME EQUIVALENT STUDENTS
1987-88	244,254	17,062
1988-89	272,077	18,161
1989-90	290,636	20,243
1990-91	282,623	20,024
1991-92	289,087	21,890

COMMUNITY SERVICE/VISITING ARTIST PROGRAM

Contact: Chuck Barham

Community service programs are designed to provide courses, seminars, and activities that (1) contribute to the community's overall cultural, civic and intellectual growth; and (2) assist adults in the development of new skills or the upgrading of existing ones in their avocational, academic, and practical skills areas.

Academic Courses are designed to serve the academic needs of adult citizens. Courses include humanities, mathematics and science, and social science.

Practical Skills Courses are designed to provide practical training for persons pursuing additional skills which are not considered their major or primary vocation, but may supplement income or may reasonably lead to employment.

Avocational Courses are designed to focus on an individual's personal or leisure needs rather than their occupation.

Cultural and Civic Activities are provided by the colleges to meet community needs. These activities include lecture and concert series, art shows, seminars, and exhibitions.

Each college must address community service programs in the institutional effectiveness plans which are submitted annually to the Department of Community Colleges.

HUMAN RESOURCES DEVELOPMENT PROGRAM

Contact: Peggy Graham

The HRD program, which operates in 44 of the 58 community colleges in the NC Community College System, has since 1973 provided short-term prevocational training and counseling designed to help unemployed and underemployed adults successfully enter the work force or further training. HRD has proven to be an effective means of reducing welfare payments, unemployment and underemployment by making it possible for unemployed adults to become and remain productive employees. More than 89,620 North Carolinians have participated in the program since it began in 1973.

Students in an HRD program enroll for a period of instruction that averages six weeks. The curriculum focuses on training which helps students learn how to find and keep a job. This includes teaching students to assess their assets and limitations, develop their problem-solving and communication skills, develop a positive self-image, improve academic skills, and understand the dynamics of interpersonal relationships.

Two components of the HRD model are essential to each program's performance:

- Each student who completes an HRD class must receive 3, 6, and 12 month follow-up services. This requirement is to ensure that graduates continue to receive counseling and placement services for one year from the HRD staff and that sufficient data is available to calculate each program's performance.
- Each program's continued operation is determined in large part by the economic performance of program graduates. This success is gauged by annual performance calculations which determine increases in income and decreases in public assistance information for each HRD graduate. If a program fails to demonstrate its effectiveness for two successive years, it loses program funding.

Since 1975, 85,713 students have enrolled in HRD programs and over 72,973 program graduates have received follow-up services. Of those enrolling in the program, 69% completed the program of instruction. Placements for students completing the program include the following:

- 50% placed in employment
- 31% placed in further vocational training
- 9% placed in basic skills training (ABE, GED, or AHSD)
- 90% total placed.

Since 1975, HRD programs have demonstrated the following cost effectiveness:

- Generated a total income increase of more than \$137 million and decreased welfare payments by more than \$19 million, giving the state a return of more than \$2 for every \$1 invested in the program.
- Provided training to 85,713 students at an average state cost of \$578 per student.

EDUCATIONAL NETWORK (NC-EDNET)**Contact: Parks Todd**

The system's EDucational NETwork (NC-EDNET) is an audio and video telecommunications network that provides a distance education capability to each of the 58 colleges. It unites the community colleges into a partnership for the production, reception, and coordination of educational services delivered through telecommunications technology.

EDNET provides the following services to the N. C. Community College System:

The production of programming: Most of the emphasis is on interactive video teleconferences aimed at meeting the needs of students, faculty, staff, and administrators. The production work is done largely by students, staff, and faculty of the colleges, thereby saving money and providing valuable experience and training to our own people. The events are distributed via satellite to all 58 community colleges. Two NC-EDNET teleconferences have received national awards. NC-EDNET also produces short-course and supplementary video material and other projects for the department and the system. "Community College Report" is an every-other-month program of news and features from around the system. To the best of our knowledge, it is the only such program produced by a community college system in the nation.

The bulk purchase of programming and services: Under a "wholesale" contract negotiated with PBS and other distributors/producers in cooperation with the UNC Center for Public Television, NC-EDNET pays the license fee covering the 58 community colleges for over 200 PBS telecourses at a savings of more than \$100,000 over what it would have cost the colleges under separate contracts. Nearly 4,000 students have enrolled in telecourses during the current academic year. A blanket license covering all community colleges for a production music service has been negotiated at substantial savings.

Assistance in developing local two-way video networks for distance learning: Although the educational community will still be using satellite technology and public broadcasting into the next century, the next advance in distance learning is two-way interactive video based on fiber optic technology. Three community colleges are interconnected, via the Vision Carolina networks and CONCERT, with each other and with the major research universities and medical centers throughout the state. They are also interconnected with several public schools in their service areas.

System Telecommunications Resources

In addition to the satellite system linking all community colleges and the Vision Carolina networks, the system has:

Thirteen (13) dedicated community cable channels that go into more than 255,000 homes.

Two high-power FM radio stations affiliated with National Public Radio and three low-power FM stations.

Approximately 25 video/TV studios.

Production capabilities ranging from broadcast quality at a few colleges to professional-level audio-visual capabilities at almost every college.

A distance learning system enables the total educational community to:

- * Share instructional programs.
- * Participate in interactive video teleconferences.
- * Share expertise in order to improve production capabilities.
- * Cooperate in the use of facilities and equipment.
- * Realize savings through the bulk or wholesale purchase of licenses for programs and services.

PROFESSIONAL DEVELOPMENT

Contact: Bob Allen &
James Wingate

The Commission on the Future recommended that a task force on professional development be appointed to evaluate the present staff development program delivered through the Department of Community Colleges, recommend what the future level and nature of that delivery should be, and study the need for additional staff development funds to be used according to a staff development plan prepared for each college (Recommendation #1 of the Commission's report). The task force should have broad representation from all sectors and report its findings to the State Board in 1993. Upon the President's recommendations, the Chairman appointed the following members to the Professional Development Task Force.

Jerry Owens, President Rockingham Community College (Chair)

David Sink, President, Blue Ridge Community College

Ronald Lingle, President, Coastal Carolina Community College

Cuyler Dunbar, President, Catawba Valley Community College

Donald Cameron, President, Guilford Technical Community College

Richard Holmes, Vice Pres., Piedmont Community College

Jonnie Simpson, Vice Pres., Brunswick Community College

Pat Toney, Dean, Sandhills Community College

Billie Meeks, Dean, Mitchell Community College

Harold Thompson, Director of Personnel, Fayetteville Community College

Lois Dem.y, Associate Dean of Instruction, Sampson Community College

NEW AND EXPANDING INDUSTRY PROGRAM

Contact: Joe Sturdivant

More than half of the Fortune 500 companies now have at least one manufacturing plant in North Carolina, and the state continues to enjoy one of the highest rates of industrial growth in the nation. These new companies, employing thousands of North Carolinians, consistently cite the N. C. Community College System's proven ability to train workers for jobs in new industries as one of their primary reasons for locating here.

Since 1963, the New and Expanding Industries program has trained more than 250,000 employees in skills needed by approximately 3,000 companies. It was the nation's first training program designed expressly to support industrial growth, and has served as a model for other states to follow. Its success can be measured in dollars and cents. In four of the last five years North Carolina has led the nation as the first choice in location of major new manufacturing facilities.

The training program, totally state-funded, is an incentive to industry to create more jobs in North Carolina. Traditionally, North Carolina has resisted some of the strategies used by other states in attracting industry, such as tax incentives and special financing. Instead, the state has elected to build its eminently successful development program on providing responsive and responsible services through such organizations as the community college system.

The New and Expanding Industries program is available to any new or expanding industry creating a minimum of 12 new jobs in North Carolina or to any prospective employee referred for training by the participating company or its employment agent.

The versatility of the program is its strongest point. Regardless of the company's location, size, product or service, one of the 58 institutions in the community college system will provide it with a custom-designed employee training program at virtually no cost to the company.

Through the New and Expanding Industries program, industrial training specialists are available to visit existing company operations and study the job skills, work schedules, production processes and other pertinent variables necessary in designing a training program suited specifically to that company's needs.

If the job can be defined, it can be arranged into a logical learning sequence and taught at the campus closest to the company, at the plant itself or in special facilities. Instructors may be provided by the college, selected from company ranks or recruited elsewhere. Employees may be hired before or after training.

Using state funds exclusively, the program provides for instructors' wages and travel expenses (even if the instructor is a company employee), for classroom materials, for a suitable training facility and for some non-salvageable production materials used in training.

This program for new and expanding industries will continue, as it has for more than 28 years, to reaffirm the basic commitment of the North Carolina Community College System to serving the business community with meaningful and effective training services.

New & Expanding Industry Training

Year	# of Projects	Total Expenditures	# of Trainees	Avg. Cost Per Trainee
1991-92	151	\$5,484,869	15,738	\$348.51
1990-91	140	\$5,400,630	14,857	\$363.51

1988-89	149	8,938,463	16,833	531.01
1987-88	167	5,874,136	12,263	479.01

FOCUSED INDUSTRIAL TRAINING CENTERS

Contact: Glynda Lawrence

As the state's traditional industries update their operations to take advantage of rapidly evolving technology, many of them turn to the N. C. Community College System for help in training their workers in the skills the new technologies demand. Since 1981 over 65,000 workers, in over 6,900 industries, have participated in the Focused Industrial Training (FIT) program.

FIT furnishes dedicated resources to the colleges to assess and address training needs in industry. To the extent that it uses grant funds not subject to the enrollment constraints typical of regular FTE-generated funds, FIT enlarges the colleges' response capacity to offer customized, small enrollment classes in skills critical to a particular company.

This year, for FIT activities, thirty-one colleges have been awarded an annual grant averaging \$90,000. The department also maintains a "balance-of-state" fund that allows colleges that do not have a designated FIT Center to access on a project-by-project basis. These classes, primarily directed toward veteran workers in critical occupations who need to renew their skills and technical knowledge, are planned jointly by the sponsoring college and the participating industry to assure training is focused on the reality of each job.

Each FIT center is operated by a director who works directly with industry personnel to assess training needs and develop training programs tailored to those needs. They conduct and analyze surveys within companies, develop and administer pre- and post-training tests to evaluate skills, determine skill and knowledge content of jobs and organize that content into a learning sequence, then plan jointly training that cannot be addressed through other existing occupational programs.

Emphasis is placed on training employees involved in metalworking, industrial maintenance, production technologies, and other occupations critical to a company's operation.

Year	# of FIT Centers	# of Industries	Total # of Trainees	Total # of Skills Classes
1987-88	19	613	4,766	557

TOTAL		6,929	65,339	6,755

SMALL BUSINESS NETWORK

Contact: Jean Overton

The North Carolina Community College Small Business Network was founded in 1983 in response to the growing needs of small businesses and entrepreneurs - a major economic factor in the state. There are Small Business Centers in place at 53 of the 58 community colleges.

The Small Business Centers (SBCs) function as a local, community-based resource to help actual or prospective entrepreneurs and owners of small businesses to plan and operate successfully.

The SBCs offer to entrepreneurs, both owners and employees, appropriate courses, seminars and workshops; one-on-one consultation on basic business issues; referrals to other agencies and sources of assistance; and a resource library of relevant publications, videos, audios and information.

The mission of the SBCs is to support job growth and economic development in the state by providing assistance which is focused on the small business community. The programs and services of the SBCs are primarily dedicated to the needs of the local business community.

RANGE OF SERVICES

- Entrepreneurial, technical and business-related educational programs
- Consultations and referrals
- Computer network linkages, data bases and bulletin boards
- Teleconferences and video replays
- Local and statewide partnerships
- Educational programs for employees
- Network of community-based, statewide, national and international linkages
- Walk-in resource and information center

IN-PLANT TRAINING PROGRAM

Contact: Glynda Lawrence

The in-plant training program enables the colleges to assist manufacturing, service, and/or governmental organizations with in-service training of their employees. This occupational extension training includes involvement in five areas: industry, business, health, government and agriculture. Training occurs in the facilities or at the site in which an organization normally operates, usually at the employee's assigned work station. This method of delivering skills training works very well for companies where it is not feasible to duplicate the training environment in an institutional setting.

Production industries continue to benefit most from in-plant training. On-the-job training continues to be utilized in all sectors for training of new hires and in the retraining of veteran workers.

YEAR	# OF ORGANIZATIONS SERVED	# OF TRAINEES
1987-88	332	6,011

1991-92	205	9,575

JOB TRAINING PARTNERSHIP ACT

Contact: Stephanie Deese

The JTPA program services section is responsible for the administration of the departmental Job Training Partnership Act (JTPA) program.

The JTPA is a federal law which was enacted in 1962 to provide funds to the states to support job training programs. It is a part of a long history of federal job training programs intended to help citizens keep pace with advancing technology and lead more productive lives. It differs from its predecessors in its strong emphasis on meeting the training needs and standards of the business community. At the same time, it offers education and training services to prepare eligible individuals, (i.e., persons who are 16 or older) and who are considered economically disadvantaged and/or who have certain barriers to employment, to become valuable employees of businesses in their communities. The services provided include basic education, training, counseling, support services, and screening for appropriate job placement.

The department annually receives a portion of the funds provided under the "Education Coordination and Grants" section (commonly referred to as the "8 percent funds") of the JTPA. These funds are utilized to promote coordination between the department and other state agencies involved in employment and training activities and to provide assistance to interested local community colleges and other local agencies similarly involved in such programs. In addition, the department receives program funds which are granted to select local colleges for the implementation of appropriate employment and training programs.

During the 1991-92 year the department has at its disposal \$194,739 to support the state level coordination activities and \$878,648 to support local innovative training/educational programs in the colleges.

COORDINATION ACTIVITIES

Activities to fulfill the section's responsibilities to assist in the coordination of employment and training programs on the local level have included the provision of technical assistance to the colleges in the community college system as they work with the local JTPA service delivery areas (SDAs) and private industry councils (PICs) which are the local entities for the implementation of JTPA programs. During the early years of the program, this technical assistance focused primarily on basic information; since the program has come of age, this technical assistance is now centered in the provision of more sophisticated information regarding the coordination of JTPA programs with the more traditional offerings within the community college system. In addition to on-site visitation by the sectional staff members, regional and statewide workshops are held periodically to assist in the transmission of this information.

In addition to the above and in an attempt to assure that coordination between the local community colleges and other agencies involved in employment and training activities takes place, the section via a request for proposal (RFP) process has historically required that the appropriate local

SDA and its PIC review and concur with proposed programs prior to submission of proposals to the department.

Coordination on the state level consists mainly of service by staff members serving on numerous and various committees and bodies concerned with employment and training. These committees include the State Job Training Council and its Interagency Coordinating Committee, Performance Evaluation Committee, Older Workers Committee, Welfare Reform Committee, the Department of Commerce's Rapid Response Team, the Department of Human Services' Welfare Reform Advisory Committee, the Interagency Transportation Review Committee, and others.

GRANTS PROGRAM ACTIVITIES

As in prior years, for the 1991-92 year, the section issued a request for proposals to the colleges in the system soliciting proposals to operate JTPA programs utilizing the education coordination and grants funds. Thirty-eight proposals were received, evaluated, and ranked. The State Board of Community Colleges has approved 34 separate projects in 32 local colleges utilizing the \$878,648 available. These projects will serve approximately 2,000 participants.

In addition to providing the necessary technical assistance to the local colleges in the operation of the funded programs, the section conducts on-going program monitoring. This monitoring is aimed at assuring that individuals enrolled in the programs are eligible to receive services and that proper record and documentation of activities are retained by the local colleges.

**CARL D. PERKINS VOCATIONAL
AND APPLIED TECHNOLOGY EDUCATION ACT**

Contact: J.W. Eades

The purpose of the Carl D. Perkins Vocational and Applied Technology Education Act is to make the United States more competitive in the world economy by developing more fully the academic and occupational skill of all segments of the population. This purpose will principally be achieved through concentrating resources on improving educational programs leading to academic, occupational, training, and re-training skill competencies needed to work in a technologically advanced society.

The primary resources which are available for support of local federally assisted vocational education programs are provided under the Carl D. Perkins Vocational and Applied Technology Education Act. The N.C. Community College System receives one-third of the state's \$32,913,027 grant or \$10,969,912.

The most recent reauthorization is the Carl D. Perkins Vocational and Applied Technology Education Act of 1990 which contains a number of changes from previous federal vocational education programs. These changes continue to affect the implementation of federally supported vocational education programs in the N.C. Community College System.

Changes in the Act**IMPORTANT: Take note of change #5.**The Act:

1. requires that the federal funds provided under the Act be allocated to local community colleges by a formula that is different from the one used during previous years; it requires that the funds be distributed based upon the number of Pell Grant recipients in a local community college as a percentage of such recipients in the system; it also requires that no grant under this part be provided to any institution which would receive less than \$50,000 under this formula distribution (this will have a negative impact on several community colleges in the N.C. system);
2. places major emphasis on the interpretation and mutual reinforcement of academic and vocational competencies with a special emphasis on technologies;
3. eliminates many of the fiscal constraints such as matching and excess cost requirements;
4. maintains a strong emphasis on special population groups (the handicapped, educationally and economically disadvantaged including individuals of limited English proficiency, individuals in programs designed to eliminate sex bias, and individuals in correctional institutions) while, at the same time, eliminating the categorical formula funding for the handicapped, disadvantaged and persons with limited English proficiency; and
5. promotes greater accountability by requiring the **MEASUREMENT OF STUDENT ACHIEVEMENT AGAINST A SET OF PERFORMANCE STANDARDS WHICH WERE IMPLEMENTED IN SEPTEMBER, 1992.**

CORRECTIONAL EDUCATION

Contact: Chuck Barham

Correctional education includes classes offered by the North Carolina Community College System (CCS) to adult inmates incarcerated in correctional facilities operated by the Department of Correction (DOC).

Definition: Correctional education in N.C. "shall be for the purpose of providing basic skills, occupational continuing education, vocational, technical, and post-secondary academic education that enables inmates to enhance and maintain their personal growth and development in order that they function effectively in prison and upon returning to the community. All courses and programs provided through the CCS shall be appropriate to these purposes and shall not be designed for population control, therapy, recreation, production processes of the enterprise operations of the correction facility, or other purposes which may be legitimate objectives of DOC program efforts." (Oct. 22, 1992 Cooperative Agreement, p. 4)

State-level Planning and Coordination: In response to House Bill 50 (1987 General Assembly), the CCS and the DOC have developed a state correctional education plan to ensure that an educational program for inmates is provided at each state correctional facility. Courses and/or programs have been designed to reflect the definition of correctional education stated above and to support each unit's educational objectives. A DCC/DOC Interagency Committee plans and monitors correctional education programming in the state.

On October 22, 1992, a policy manual entitled Cooperative Agreement Between The North Carolina Department of Community Colleges and The North Carolina Department of Correction On The Programming Of Correctional Education went into effect, covering such items as the course approval process, funding, data reporting and student transcripts.

Programming: In academic year 1991-92, 34 community colleges offered curriculum-level instruction in N.C. correctional facilities. In that same year, 47 community colleges provided continuing education offerings (literacy, GED, etc.).

Correctional Education Enrollment for 1991-92:**Extension:**

Headcount (Duplicated)	39,001
Hours	2,300,143

PROPRIETARY SCHOOLS LICENSURE

Contact: Neill McLeod

Proprietary schools are for-profit businesses which provide education and training. They may be privately owned, a partnership or corporation.

Under Article 8 of N.C.G.S. 115D, the State Board of Community Colleges is responsible for licensing certain proprietary business, technical, trade and correspondence schools in North Carolina. This responsibility was transferred from the State Board of Education by action of the General Assembly in 1987. This action was taken because the State Board of Community Colleges is often referred to as the "occupational board," and it and the system it governs possess the expertise to make informed decisions regarding business, technical, trade and correspondence school education.

The State Board of Community Colleges, along with four other state boards or agencies, is charged with regulating the proprietary school industry in North Carolina. Others include

- Board of Barber Examiners - Barber Schools
- Board of Cosmetic Arts - Beauty Schools
- Department of Motor Vehicles - Truck Driving Schools
- UNC Board of Governors - Degree Granting Programs

The initial licensing process consists of four phases and may take between four and six months because of the investigations and reviews required. To be licensed, proprietary schools must pay an initial licensing fee of \$750, a renewal fee of \$500 each year thereafter and meet the general requirements for licensing including standards for program and course offerings, facilities, financial stability, personnel, and operating practices.

Current Status of Licensed Schools

Licenses	36

FIRE & RESCUE TRAINING SERVICES

Contact: Ken Farmer

The North Carolina Department of Community Colleges provides training to over 76,500 students who serve as both paid and volunteer fire fighters in the state. Training is provided in over 50 different subject areas. This training serves to improve the fire fighters' skills and education in areas such as basic firefighting to advanced management training. Service certification is provided in the areas of basic skills, public education, driver-operator, hazardous materials and arson investigation rescue, and instructional techniques. Several programs are now offered in speciality areas such as advanced rescue techniques, incident command, leadership and management training.

Training is delivered in local fire departments and community colleges. Classes are conducted during the day, evenings and on weekends to meet varying student needs. Eighteen regional training seminars are offered by various community colleges where classes are provided during a weekend for the accessibility of volunteer fire & rescue personnel.

All training is provided for without fees to members of local fire departments.

Fire Training Program Statistics:
Class Hours, Students, and FTE

	Class Hours	Students	FTE
1987-88	39,176	57,807	1,079
1988-89	46,031	73,248	1,283
1989-90	48,888	82,530	1,278
1990-91	54,780	94,707	1,419
1991-92	43,957	76,591	1,238

OVERVIEW OF COMMUNITY COLLEGE BUDGET PROCESS

Community Colleges are funded by the General Assembly based on the average number of full-time equivalent students (FTE) for the year which is converted to dollars by formula. The essential elements of this process are outlined below:

- 1) One student who takes 16 hours of class work for one quarter (or 11 weeks) generates 176 hours. If this same student attends classes for one year (4 quarters), the student would generate 704 hours which is equivalent to one annual FTE.

1 Quarterly FTE = 16 hrs. X 11 wks. = 176 hours

1 Annual FTE = 176 hrs. X 4 qts. = 704 hours

In order for an institution to generate budget, approximately 21 FTE's must be generated before an instructional unit can be allocated. Each year the dollar amount for curriculum (credit) and extension (no-credit) changes depending on funds available.

- 2) The actual dollar amount paid to each institution by the state for each FTE earned is determined by the amount of money appropriated by the General Assembly for this purpose. Therefore, it varies from year to year. It is also different for FTE's earned by students in curriculum (degree or certificate) programs and continuing education or extension programs. (If the legislature fails to increase funding as enrollments increase, the institutions do not receive funds for the full number of FTE credits earned.)
- 3) FTE funds are to be used for current operating expenses such as instructional salaries, supplies and travel, administration, clerical and fiscal support, counselors, librarians, financial aid, placement and other personnel performing services for students. An average of 90-92 percent of these funds are used for salaries.
- 4) The majority of funds (90%) are allocated to the colleges based on applicable FTE formulas. Current operating funds are allotted based on FTE generated in the curriculum programs for the preceding academic year (Fall, Winter, Spring). Continuing Education funds are based on FTE earned in the previous Spring, Summer, Fall and Winter quarters. Continuing Education Programs include Occupational Extension and Literacy Education. Funds for Community Service Programs are allotted as a block grant and can be used only for community service programs. These programs do not generate budget FTE.
- 5) Funds allotted for educational equipment and library books are based on a weighted FTE formula. The previous calendar year's FTE, Winter, Spring, Summer, Fall, are used in determining the fund distribution. Funds allotted for these purposes cannot be transferred to other areas.

- 6) Funds set aside for the Human Resources Development Program are allotted by distributing one-third of the available funds for program maintenance, one-third for FTE earned, and one-third for performance earned back. These funds are restricted and cannot be used for other purposes.
- 7) The other State Aid funds are distributed based on either project proposals or some modified FTE formulas. Funds set-aside for categorical programming must be used for those purposes.
- 8) FTE funds may NOT be used for utilities (including telephone) or plant maintenance. These costs must be paid from local sources.
- 9) Some kinds of classes must be "self-supporting" if offered. That is, instructional costs of recreational courses must be paid from fees charged.

DESCRIPTION OF STATE LEVEL EXPENDITURES

1. General Administration

The funds expended in this area include the President's Office, Governmental Affairs, Board Affairs, Legal Affairs, Administration, Planning and Research, Program Audits, Personnel, Public Affairs.

2. Finance

The funds expended in this area include Finance Administration, Auditing and Accounting, JTPA-Fiscal Administration, Departmental Services, Publications, Telecommunications, Facility and Property Services, Information Services, Institutional Services, and Library Services.

3. Adult and Continuing Education

The funds expended in this area include Student Development Services, Enrollment Management, Student Progress, Student Support Services, and Student Access.

4. Program Services

The funds expended in this area include Program Services Administration, Special Programs, Program Development Services, Professional Development, Employee Readiness, JTPA-Technical Assistance, Vocational Education, Sex Equity, Business and Industry Services, Existing Industry, Small Business Services, Basic Skills, Adult Basic Education, Adult High School/GED, and Special Populations Training.

5. Unallotted Expenses

The funds expended represent payments at the state level for the benefit of the colleges and includes Worker's Compensation, Adult Basic Education, Unemployment Compensation, Liability Insurance, Diploma Nursing, GED Scoring, Focused Industrial Training-Textile School, Networking, Vocational Education, New Industry, Systemwide Projects, Small Business Export Outreach, and current operating funds transferred into fiscal year 1992-93.

6. Equipment

The funds expended represent payments at the State Level for the benefit of the colleges and includes New Industry equipment, and freight and tax on books.

7. Indirect Costs

Indirect costs are computed on direct current operating expenses allowable under the various Federal grants. The funds received for indirect cost are reverted to the State.

FACILITIES/EQUIPMENTFACILITIES

Building Gross Square Footage 13.2 million

Number of Buildings 821

Building Value \$ 883 million
(replacement)Campus Acreage 5269 acres
(Does not include off-campus facilities)

Learning Resource Center Book Volumes 1.89 million

State Appropriations, Capital Improvement.

1987-88	\$ 25.7 million
1988-89	\$ 23.7 million (1)
1989-90	\$ 3.0 million (1)
1990-91	\$ 0.1 million (1)
1991-92	\$ 0.0 million (1)
1992-93	\$ 0.9 million

EQUIPMENTState equipment inventory \$ 180 million
(cost)

State Appropriations:

1987-88	\$ 18.8 million
1988-89	\$ 18.8 million
1989-90	\$ 13.8 million
1990-91	\$ 18.8 million
1991-92	\$ 13.8 million
1992-93	\$ 13.8 million

Depreciation \$ 42.2 million
(unfunded accumulated)

1. Does not include the following reverted funds:

1987-88	\$ 0.2 million	1988-89	\$ 5.9 million
1989-90	\$ 1.6 million	1990-91	\$ 2.9 million

OFF-CAMPUS FACILITIES

The following list includes the 58 community colleges and their respective off-campus facilities. These off-campus facilities are those considered "dedicated," meaning a community college has the predominate use and control of the space both day and night. Dedicated off-campus facilities include those for which a college has the title to or a long-term lease, or which have been made available for the college use. Dedicated facilities also include portions of a building such as one room or one floor.

GLOSSARY

ACADEMIC QUARTER An 11-week period during which credit classes are offered.

ACADEMIC YEAR The period of the regular session, generally extending from September to early June, divided into three quarters.

ACCREDITATION A formal means of recognizing an institution for maintaining standards that qualify the graduates for admission to higher institutions or for professional practice. Accrediting agencies are responsible for establishing the standards and evaluating the schools' compliance with them (e.g. Southern Association of Colleges & Schools, American Dental Association, Engineering).

ACCOUNTABILITY The acceptance of personal responsibility for the achievement of predetermined measurable objectives.

ADULT BASIC EDUCATION (ABE) A fundamental education program designed for adults 16 years old or older who have not completed the eighth-grade or who function at less than the eighth-grade level.

ADULT EDUCATION Programs offered by a community college or technical institute that provides opportunities for adults and out-of-school youth to further their education.

AFFIRMATIVE ACTION The planned, aggressive, coherent, management program to provide for equal employment opportunity. It is a results oriented program designed to achieve equal employment opportunity rather than simply a policy to assure nondiscrimination. As an ongoing management program it requires periodic evaluation.

APPROPRIATION The act by which the legislature provides the state dollars for the operation of an institution. Funds are appropriated to the State Board of Community Colleges to be distributed to the institutions.

ASSOCIATION OF COMMUNITY COLLEGE TRUSTEES (ACCT) A nonprofit international association with headquarters in Washington, D.C., that seeks to unify, promote, encourage, and develop two-year institutions through the expertise and insight of trustee leadership.

ASSOCIATION OF GOVERNING BOARDS OF UNIVERSITIES AND COLLEGES (AGB) A nonprofit educational organization of governing, coordinating, and advisory boards of post-secondary education. AGB exists to help its members fulfill their roles and meet their responsibilities. Headquarters are in Washington, D.C.

BASE BUDGET Appropriations made by the legislature to fund the current level of operation.

BIENNIUM a two-year period for which an agency builds a budget.

CAPITAL OUTLAY Capital outlay expenditures are those that result in the acquisition of fixed assets or additions to fixed assets (i.e. expenditures for land, buildings, or equipment).

budget and to provide for an equitable distribution of the equipment funds allocated by the State Board to the institutions.

Library Full-Time Equivalent (L/FTE) Used to prepare the library budget to provide for an equitable distribution of library funds allocated for the purchase of library books and audiovisual materials.

Credit Hour Full-Time Equivalent (H/FTE) Used in furnishing data to the North Carolina Commission on Higher Education Facilities and the University of North Carolina.

Construction Full-Time Equivalent (C/FTE): Used to determine priorities and institutional eligibility for federal and state construction funds for the institutions

FULL-TIME STUDENTS A student is considered full time if he/she carries 12 or more quarter hours of classes.

GENERAL EDUCATIONAL DEVELOPMENT (GED) A high school equivalency program enabling adults to take the General Education Development Tests to determine if they are at the 12th grade completion level of English, social studies, science, reading, and math. Individuals achieving the required scores on the GED are awarded the High School Equivalency Diploma. The program is open to individuals 18 years or older.

HUMAN RESOURCE DEVELOPMENT (HRD) A program for chronically unemployed adults with prevocational training and counseling.

JOB TRAINING PARTNERSHIP ACT (JTPA) A federal program designed to provide job training and employment opportunities for economically disadvantaged, unemployed, or underemployed persons.

NON-CREDIT (EXTENSION) COURSES Courses for professional training, upgrading or general interest.

OCCUPATIONAL EDUCATION Any type of instruction or training (credit or non-credit) that prepares one to enter an occupation.

OTHER COSTS "Other Costs" is a term describing current instructional and operating instructional support costs excluding personnel and the associated fringe benefits. The term is used for supplies, travel, postage, etc.

PELL GRANTS Needs-based federally funded grants.

TECHNICAL PROGRAMS (ASSOCIATE DEGREE PROGRAMS) A term generally used to describe associate degree programs in the N.C. Community College system (sometimes referred to as two-year programs).

UNDUPLICATED HEADCOUNT The total number of students (both full time and part time) enrolled in all courses during a year. Each student is counted only once during the year regardless of the number of classes he takes or the number of quarters for which he registers.

VOCATIONAL PROGRAMS (DIPLOMA PROGRAMS) A term generally used to describe diploma programs in the N.C. Community College system (sometimes referred to as one-year programs).

CATEGORICAL FUNDS (restricted) Funds from a federal, state, local, or private source that are restricted to expenditures in a particular category or program.

CERTIFICATION A voluntary form of recognition for knowledge and skill in a particular profession.

CLOCK HOUR One hour of instruction given one student. Class periods from 50-60 minutes may be counted as one clock hour depending on the type of instruction delivered.

COMPENSATORY EDUCATION A special state-funded educational program for mentally retarded adults (over 17 years of age).

COMPETENCY-BASED INSTRUCTION Instruction based on measurable student performance outcomes consistent with the skills and knowledge needed by entry-level employees in a particular field.

COOPERATIVE SKILLS TRAINING A training program specifically designed to provide customized training for existing industry. This training can be provided on campus or at the industrial site.

CREDIT HOUR An instructional unit used for recognition of the amount of credit a student earns for a given course. Example: Quarter Credit Hour - A student who spends one hour per week in a class for 11 weeks earns one quarter hour credit.

CURRENT EXPENSE Funds used for the general operation of the institution to include salaries, benefits, and other instructional costs.

DEVELOPMENTAL EDUCATION A program providing specialized credit courses for students who need to improve their basic skill in order to perform at the level required for admission to degree and diploma programs. Usually these courses are in reading, writing, and mathematics.

EXPANSION BUDGET Additional funds from the legislature to increase the quantity or quality of services rendered.

FISCAL YEAR The 12 month period upon which the institution's budget is based, July 1 - June 30.

FULL-TIME EQUIVALENT (FTE) One full-time equivalent (FTE) student represents 16 student membership hours per week for 11 weeks or 176 student membership hours for each quarter enrolled.

Average Annual FTE: The average of the summer, fall, winter, and spring FTE or the average FTE developed over an entire school year.

Four-Quarter Average FTE: The average of the FTE developed in any consecutive four-quarter period.

Budget Full-Time Equivalent (B/FTE): Used to prepare the operating budget and to provide for an equitable distribution of the operating funds allocated by the State Board to the institutions.

Equipment Full-Time Equivalent (E/FTE): Used to prepare the equipment
