ABSTRACT

The 1990 High School Transcript Study provides information regarding current course offerings and students' course-taking patterns in the nation's secondary schools. Since similar studies were conducted of the course-taking patterns of 1987 and 1982 graduates, changes can be studied. Transcripts were collected from 21,589 students who graduated from 330 nationally representative high schools in 1990. About three-fourths had participated in the National Assessment of Educational Progress. The study produced the following nine data files that are available on tape: (1) the Classification of Secondary School Courses (CSSC) Master File; (2) the CSSC Text File; (3) the Course Offerings File; (4) the School File; (5) the Student File; (6) the Linked Weights File; (7) a file with information on limited English proficiency and handicapped students; (8) the Test and Honors File; and (9) the Transcript File (list of all courses). This user's manual describes sampling, data collection, data processing, weighting and variance estimation, and the data files. Seventeen tables, three figures, and two exhibits present information about the study. Fifteen appendixes describe the files and include the questionnaires. (SLD)

1. OVERVIEW

The 1990 High School Transcript Study (HSTS) was conducted by Westat, Inc. for the U.S. Department of Education's National Center for Education Statistics. This study provides the Department of Education and other educational policy makers with information regarding current course offerings and students' course-taking patterns in the nation's secondary schools. Since similar studies were conducted of course taking patterns of 1987 and 1982 graduates, changes in these patterns can be studied.¹ In particular, the data from this study permit analysts to investigate the impact of the Core Curriculum introduced in the 1980s. Another research objective was the comparison of course taking patterns to results on the 1990 National Assessment of Educational Progress (NAEP). NAEP is a federally funded, on-going, periodic assessment of educational achievement in the various subject areas and disciplines taught in the nation's schools. Since 1969, NAEP has gathered information about levels of educational achievement of 9-, 13-, and 17-year-olds across the country.

In the Spring of 1991, Westat collected high school transcripts from 21,589 students who graduated from American high schools in 1990. These students attended 330 schools that had been sampled for NAEP in 1990. The sample of schools was a nationally representative sample and the sample of students was a representative sample of graduating seniors from each school. The NAEP sample included students who were in 12th grade at the time of the NAEP sampling. The transcript study includes only those students whose transcripts indicate that they graduated between January 1, 1990, and December 31, 1990. Approximately three-fourths of the students included in the transcript study participated in NAEP assessments in 1990. The remaining students were sampled specifically for the transcript study either because their schools had not agreed to participate in the NAEP study or had participated in NAEP, but had not retained their administration materials linking student identification numbers to student names.

¹ The 1987 data were collected by Westat in coordination with the 1987 NAEP (1989). The 1982 data were collected by the National Opinion Research Center as part of the High School and Beyond project (1982).

The Coding System

In order to compare transcripts from different schools, it is necessary to code each of the courses entered on the transcripts using a common taxonomy. The coding system employed for this purpose was a modification of the Classification of Secondary School Courses (Ludwig, et al.). The CSSC, which contains approximately 2000 course codes, is a modification of the Classification of Instructional Programs (CIP) that is used for classifying college courses (Morgan, et al.). Both systems use a three-level, six-digit system for classifying courses. The CSSC uses the same first two levels as the CIP, which are represented by the first four digits of each code. The third level of the CSSC (the fifth and sixth digits of the course code) are unique to the CSSC and represent specific high school courses.

The CSSC also uses an additional one-digit "handicapped" flag and a one-digit "sequence" flag. The handicapped flag indicates whether a course is open to all students or is restricted to handicapped students. The sequence flag indicates whether a course is part of a sequence of courses and its place in that sequence. The handicapped flag was added to the CSSC during the 1987 transcript study. The sequence flag was added during the current study.

During both the 1987 study and the current study, courses appearing on student transcripts were also coded to indicate whether they were transfer courses, offered off campus, honors or above grade-level courses, remedial or below grade-level courses, or designed for students with limited English proficiency (LEP) and/or taught in a language other than English.

We used course catalogs and other materials and information from the participating schools to determine the codes assigned to each course. We also entered the grade and credits received for each course and standardized them into a consistent system.

Student Information

Information gathered for all students included sex, grade level, birth year, birth month, graduation status, and race/ethnicity. When it was available, we also gathered date of entry to the school, the graduation date, type of diploma, number of days absent in each of 4 years (9th grade,

10th grade, 11th grade, and 12th grade), grade point average, and class rank. In addition, we listed all awards and standardized tests taken by each student as reflected on his or her transcript. We planned to list all disciplinary actions on the transcripts, but none were found.

The following additional information, as reported by the student's teacher, was collected for handicapped students: grade-level equivalent performance in English and mathematics, proportion of placement in mainstream classes, type and severity of disability, and special services provided. The following additional information, as reported by the student's teacher, was collected for students with limited English proficiency: English and mathematics grade levels, percentage of the day spent in special language programs, native language, information on the student's linguistic environment, type of specialized instruction, number of years that the student has been in a special language program, and the student's ability to speak, understand, read, and write English.

Student transcript data were weighted for the purpose of making estimates of course taking patterns by students in the class of 1990 nationwide. Six sets of weights were created:

- Weights for all students who participated in the transcript study; i.e., for whom a transcript was received and coded;
- Five sets of "link_d" weights for students who participated in both the transcript study and NAEP. Since students participating in NAEP were selected to participate in the assessment of a particular subject, separate weights were developed for the students in each subject-specific assessment:
 - Weights for students who participated in the transcript study and the NAEP reading assessment;
 - Weights for students who participated in the transcript study and the NAEP science assessment;
 - Weights for students who participated in the transcript study and the NAEP mathematics assessment; and
 - Weights for students who participated in the transcript study and the NAEP mathematics estimation assessment; and
 - Weights for students who participated in the transcript study and were excluded from NAEP because of a handicap or limited English proficiency.

In each set of weights the final weight attached to an individual student record reflects two major aspects of the sample design and the population surveyed. The first component, the base weight, was used to expand sample results to represent the total population and reflected the probability of selection in the sample (the product of the probability of selecting the primary sampling unit (geographic area), the probability of selecting the school within the primary sampling unit, and the probability of selecting the student within the school). The second component resulted from the adjustment of the base weight to account for nonresponse within the sample and to ensure that the resulting survey estimates of certain characteristics (race/ethnicity, size of community, and region) conformed to those known reliably from external sources.

Estimation of sampling errors was performed by an application of the jackknife replication procedure. A set of replicate weights (in this case 56) was attached to each record, one for each replicate. Variance estimation was performed by repeating the estimate procedure 57 times, once using the original full set of sample weights, and once each for the set of 56 replicate weights. The variability among replicate estimates was used to derive an approximately unbiased estimate of the sampling variance. This procedure was used to obtain sampling errors for a large number of variables for the whole population and for specified subgroups.

Data Files

The study has produced a set of 9 data files that are available on a restricted use tape:

- The Master CSSC File -- The Classification of Secondary School Courses (CSSC) including all modifications made to the original (1982) CSSC during the 1987 and 1990 transcript studies. This file has separate variables for the CSSC code, the handicap flag, the sequence flag and the course title.
- The CSSC Text File -- This file contains the full CSSC text formatted for easy printing. It includes alternate titles and the full CSSC course description.
- The Course Offerings File -- Provides a comprehensive listing of the courses offered in the 330 schools included in the study. A code from the CSSC has been associated with each course title.
- The School File -- Provides detailed information on the schools from which the students were sampled.

- **The Student File -- Provides demographic information on all students included in the study as well as weighting data and summaries of their course taking histories.**
- **Linked Weights File -- Provides weights for use when performing analyses relating transcript data to NAEP assessment results.**
- **The IEP/LEP Questionnaire File -- Provides information on the handicapped students and students with limited English proficiency who are included in the study.**
- **Test and Honors File -- Provides a list of honors and standardized test results that were included on the transcripts.**
- **The Transcript File -- Provides a complete list of all courses appearing on the transcripts of students included in the study.**

2. SAMPLING OF SCHOOLS AND STUDENTS FOR THE 1990 HIGH SCHOOL TRANSCRIPT STUDY

The 1990 High School Transcript Study (HSTS) was designed to allow an analysis of the course-taking patterns of students who graduated from American high schools in 1990. In addition, it was designed so that data on students' course taking patterns could be linked to the 1990 National Assessment of Educational Progress (NAEP) assessment results.¹

To enable the link between the HSTS and NAEP, the HSTS used the same sample of schools as the 1990 NAEP assessment for grade 12/age 17. Although the target sample of students within the schools was also the same, the HSTS sample was restricted to 12th graders while NAEP assessed both 12th graders and students who were 17 years old (students born in 1972).

2.1 NAEP Sample Design

The samples for the 1990 NAEP assessment were selected using a complex, multistage sample design that involved sampling students from selected schools within 97 selected geographic areas, called primary sampling units (PSUs), across the United States.

The sample design had four stages of selection:

- (1) Selection of geographic PSUs (counties or groups of counties);
- (2) Selection of schools within PSUs;
- (3) Assignment of session types² to schools; and
- (4) Selection of students for session types within schools.

¹ The 1987 data were collected by Westat in coordination with the 1987 NAEP (Westat, 1989). The 1982 data were collected by the National Opinion Research Center as part of the High School and Beyond project (Jones, et al., 1983).

² There were three distinct types of session: Reading/Science, Mathematics and Mathematics Estimation. See *1990 NAEP Technical Report*, Section 3.2 (Johnson and Allen, 1992).

The main sample represented all grade 12 students in the U.S. However, within the main sample, private schools and also public schools with moderate or high enrollment of Black or Hispanic students were oversampled to increase the reliability of estimates for private school students, and for students in these two minority groups.

For details of the sample selection procedure, including the selection of the 97 PSUs, and information on the results of the sampling process, see Chapter 3 of the *NAEP 1990 Technical Report* (Johnson and Allen, 1992). For a shorter version of the sample selection procedure which is focussed on those aspects affecting the transcript study, see Chapters 2 and 3 of the *1990 High School Transcript Study Technical Report*.

2.1.1 School Samples for NAEP

Schools within each PSU were selected (without replacement) with probabilities proportional to assigned measures of size. Equal measures of size were assigned to schools containing estimates of 12th-grade/age 17 students ranging from 20 to 200. Schools with more than 200 eligible students were selected within the selected PSUs, with probabilities proportional to the number of grade/age-eligible students. Schools with fewer than 20 estimated 12th-grade/17-year-old students were assigned somewhat lower measures of size, and thus lower probabilities of selection, since assessment in these schools involved substantially higher per-student administrative costs.

Each public school with minority (Black and/or Hispanic) enrollment in excess of 15 percent of total enrollment was given double the probability of selection of a public school of similar size in the same PSU with minority enrollment below 15 percent. Overall probabilities of selection for such high-minority schools were twice those for other schools of the same size from a given PSU in order to enlarge the sample of Black and Hispanic students, thereby enhancing the reliability of estimates for these groups. For a given overall size of sample, this procedure reduces somewhat the reliability of estimates for all students as a whole and for those not Black or Hispanic.

Each private school was given triple the probability of selection of a low-minority public school of similar size. These greater probabilities of selection were used to ensure adequate samples of private school students, in order to allow for the derivation of reliable estimates for such

students. The total number of schools selected was determined to be such that the predesignated student sample sizes would be achieved by selecting all eligible students in a selected school, up to a maximum of 200, allowing for losses due to nonparticipation of selected schools and students and the exclusion of handicapped and limited English proficient students from the assessment.

In a very few PSUs where school refusals were relatively heavy, substitute school selections were made, replacing the refusals (to the extent feasible) with schools from within the same PSU and similar in size, affiliation (public, Catholic, or other private), grade span, and minority composition. The goal of this procedure was to maintain the student sample sizes needed, while keeping variance and nonresponse bias at acceptable levels. Table 2-1 shows the number of in-scope schools selected and cooperating. The participation rates given are based on the initially selected sample of schools. These response rates are comparable with those of previous NAEP assessments conducted during the 1980s. Note that since the response rates quoted do not include the substitute selections, the potential for nonresponse bias is likely to be a little less than these rates would indicate. This is because the substitute selections were chosen based on their similarity to the initially refusing selections.

Table 2-1. Number of schools selected, refusing, and participating in the NAEP grade 12/age 17 main sample

	Total	Public	Private*
Selected in scope	417	256	161
Refusals	78	47	31
Participation rate of originally selected schools	81%	82%	81%
Participating, no eligibles enrolled	38	11	27
Substitutes participating	3	2	1
Final assessed sample	304	200	104

*Catholic and other private schools.

Having established that a given school would be participating, assessment sessions were assigned to the school. Three different session types were administered at each age class. One was a spiraled, print-administered session, in which some students were assessed in reading while others were assessed in science. The second was a spiraled, print-administered mathematics session. The third involved a tape-administered mathematics booklet. These three session types were assigned among the selected schools found to be in-scope and, at the time of assigning sessions, to schools that were likely or possible participants in NAEP.

2.1.2 Sampling Students

In the fourth stage of sampling, a consolidated list was prepared for each school of all grade-eligible and age-eligible students. A systematic selection of eligible students was made from this list (unless all students were to be assessed) to provide the target sample size.

A maximum of 200 was established as the number of students who would be selected for a given school. In those schools that had fewer than 200 eligible students, all eligible students were selected. In other schools, a sample of students was drawn.

2.1.2.1 Excluded Students

Once the student sample was selected, school authorities were asked to review the list and to identify students classified by the schools as limited English proficient (LEP) and students with an Individualized Education Plan (IEP) for reasons other than being gifted and talented. The school staff was then asked to determine whether any students so identified were unassessable and should be excluded.

Table 2-2 shows the rate of exclusion for both public and private schools. A notable effect was the much higher rates of exclusion in public schools than in private.

Table 2-2. Student exclusion rates for grade 12/age 17 by school type, unweighted

School type	Percentage excluded in 1990
Public	4.9
Private	0.9
Total	4.2

2.1.2.2 Student Participation Rates

Table 2-3 summarizes the rates of participation of invited students. The set of invited students consists of the selected students, after removing the excluded students. For a given session, a makeup session was scheduled when, for various reasons, more than a tolerable number of invited students failed to attend the originally scheduled session to which they were invited. The participation rates given in the table express the number finally assessed as a percentage of those initially invited in the participating schools. The participation rate of private school students exceeds that of public school students.

Table 2-3. Student participation rates for grade 12/age 17 by school type, unweighted

School type	Number invited	Participation rate (percentage)
Public	28,383	80.0
Private	6,492	87.3
Total	34,875	81.3

2.2 Transcript Study Sample Design

The purposes of the 1990 High School Transcript Study (HSTS) are to gather data on a national representative sample of students who graduated from American high schools in 1990 and to gather data that can be linked to NAEP results. For the HSTS school sample to be as representative as possible, it included all schools with 12th grades that were selected for NAEP regardless of whether they participated in NAEP. A representative sample of students was included from each school. When possible, the students selected for the transcript study were the same students who were selected for NAEP. When this was not possible, a systematic sample of students was drawn from the school for the transcript study. The school sample and the student sample are described below.

2.2.1 School Sample

As discussed in Section 2.1, the 1990 NAEP sample included both schools with 12th grades and schools without 12th grades that had 17-year-old students enrolled. The 1990 HSTS sample, however, included only schools selected for the NAEP main sample that had 12th grade. There were 379 grade 12/age 17 schools in the NAEP sample, and these schools were invited to participate in the transcript study. Where schools refusing to participate in NAEP were replaced by substitute schools, the substitute schools, not the refusals, were asked to participate in the HSTS. All three of the substitute schools with 12th grade that participated in NAEP also participated in the transcript study. These three schools represent less than 1 percent of the schools in the sample, and slightly over 1 percent of the transcripts that were coded.

As shown in Table 2-4, 283 schools participated in both the NAEP assessment and the Transcript Study. Eight schools from the NAEP sample had 17-year-old students but were ineligible because they had no 12th grade. Forty-seven schools that did not participate in NAEP did agree to participate in the Transcript Study. Forty-one schools refused to participate in the Transcript Study or failed to provide usable data. Table 2-5 shows the participation status by school type (public/private) and overall.

Table 2-4. Number of schools participating or not in NAEP by the number of schools participating or not in the transcript study

1990 Transcript Study status	1990 NAEP school status		
	Participating	Refusing	Total
Total selected	304	75	379
Out-of-scope*	4	4	8
Eligible for transcript study	300	71	371

NAEP substitutes included among participating schools	3	2	1

*Schools with 17-year-old students, but no 12th graders.

**Catholic and other private schools

2.2.2 Student Sample

For schools participating in both NAEP and HSTS, the same students were, where possible, included in the two samples. For privacy reasons, the only means of identifying the names of students participating in NAEP is a list left in the school office. Since the NAEP assessments were administered in the Winter and Spring of 1990, the schools were asked to preserve the NAEP administration schedules until the HSTS data collection in the Spring of 1991. A majority (N=204) of the schools did so, but 79 were unable to provide these lists when our field personnel visited the school to collect the transcripts.

For schools that participated in NAEP but were missing their NAEP administration schedules and for schools that agreed to provide transcripts but did not participate in the NAEP assessment, our field staff sampled the students at the school using the following rules:

- If 60 or fewer students were in the senior class, then transcripts were collected for the complete class.
- If more than 60 students were in the senior class, then the field supervisor drew a systematic random sample of 50 transcripts.

Students who were sampled by the field staff all have ID numbers beginning with 990. All other students have ID numbers that are the same as their NAEP booklet ID numbers. A variable (LINKED) on the School File indicates whether a school participated in NAEP and whether the original NAEP sample of students was used in the transcript study. A value of "1" indicates that the school participated in NAEP and student IDs are NAEP booklet numbers. A value of "2" indicates that the school did not participate in NAEP, and students were sampled in the field. A value of "3" indicates that the school participated in NAEP, and a new sample was selected in the field for the transcript study.

2.2.3 Nonresponse Within Schools

Since transcripts were requested for all students in the NAEP sample, whether or not they actually took the NAEP assessment, there is no residual effect of NAEP nonresponse on the

transcript study, other than through the inclusion of the three NAEP substitute schools.³ However, schools were not always able to provide us with all of the requested transcripts. Some reasons for this included:

- The student had transferred from the school and his or her transcript had been forwarded to the new school.
- The school could find no record of the student.

Even if a transcript could not be obtained, we attempted to collect the following information on a student:

- Graduation status;
- Sex;
- Race/ethnicity;
- Birth date; and
- Grade.

Using this information, we were able to ascertain that many of the students for whom transcripts were not obtained did not graduate, and were thus not within the scope of this study. Tables 2-6 through 2-8 compare the distribution of students for whom we obtained transcripts with that for students for whom we did not obtain transcripts.

Table 2-6. Number of transcripts received or not received by gender

Gender	Transcripts received		Total
	Yes	No	
Male	10,510 (48.3%)	857 (57.7%)	11,367 (48.8%)
Female	11,265 (51.7%)	613 (41.3%)	11,878 (51.0%)
Unknown	9 (0.0%)	16 (1.1%)	25 (0.1%)
Total	21,784 (100.0%)	1,486 (100.0%)	23,270 (100.0%)

³ Analyses linking NAEP data to HSTS data are, of course, affected by NAEP nonresponse. We constructed separate sets of weights for use in such analyses (see Appendix N).

Table 2-7. Number of transcripts received or not received by exit status

Exit status	Transcripts received		Total
	Yes	No	
Graduates:			
Standard diploma	19,930 (91.5%)	61 (4.1%)	19,991 (85.9%)
Honors diploma	1,403 (6.4%)	0 (0.0%)	1,403 (6.0%)
Special education diploma	126 (0.6%)	1 (0.1%)	127 (0.5%)
Attendance certificate	72 (0.3%)	14 (0.9%)	86 (0.4%)
Nongraduates:			
Still enrolled	102 (0.5%)	266 (17.9%)	368 (1.6%)
Dropout	62 (0.3%)	518 (34.9%)	580 (2.5%)
Other nongraduate	65 (0.3%)	166 (11.2%)	231 (1.0%)
Other:			
Unknown	0 (0.0%)	326 (21.9%)	326 (1.4%)
Out-of-scope	24 (0.1%)	134 (9.0%)	158 (0.7%)
Total	21,784 (100.0%)	1,486 (100.0%)	23,270 (100.0%)

Table 2-8. Number of transcripts received or not received by race/ethnicity

Race/ethnicity	Transcripts received		Total
	Yes	No	
White	15,350 (70.5%)	696 (46.8%)	16,046 (69.0%)
Black	2,832 (13.0%)	236 (15.9%)	3,068 (13.2%)
Hispanic	1,844 (8.5%)	173 (11.6%)	2,017 (8.7%)
Asian/Pacific Islander	870 (4.0%)	57 (3.8%)	927 (4.0%)
American Indian/Alaskan Native	134 (0.6%)	8 (0.5%)	142 (0.6%)
Other	49 (0.2%)	2 (0.1%)	51 (0.2%)
Unknown	705 (3.2%)	314 (21.1%)	1,019 (4.4%)
Total	21,784 (100.0%)	1,486 (100.0%)	23,270 (100.0%)

Clearly, there is no great bias in the collection of transcripts for males and females or by race/ethnicity. The preponderance of missing transcripts was among those students who did not graduate. Of those students known to have graduated, we were unable to obtain transcripts for only 68.

Some collected transcripts were not included in the final set of coded transcripts. Some reasons for this included:

- A transcript was received from the school, but was not sufficiently legible to enter and code.
- Information on the transcript showed that the student was not in the scope of the study. For instance, in a handful of cases, students were found to have graduated prior to 1990, but were taking an extra year of "postgraduate" study.
- Although all 12th graders were included in the universe for each school when the transcripts were collected, a change in the contract after data collection but before data entry and coding narrowed the scope of the project to 1990 graduates. The analysis of students who fail to graduate is substantially more complicated than those who finish, and unless they are left out of nearly all analyses, the analysis of credits earned can be confounded. The 17-year-old, non-12th graders were also left out for the same reason. To be consistent with the 1987 transcript study, the transcripts of students who were still enrolled in school, drop outs, transfers, or who received GED diplomas were excluded from the study.

We requested transcripts for 23,270 students from the participating schools. Of these, we found that 158 students were out of scope because they had graduated prior to 1990, were not in 12th grade, or were foreign exchange students. This left 23,112 students. We were able to obtain neither transcripts nor information regarding the graduation status for 326 students. Of the remaining 22,786 students, 1,179 were out of scope because they did not graduate. They were either still enrolled (N=368), dropout (N=580), or had left school for other reasons (e.g., transfers, passed GED test, etc.; N=231). Thus, we were able to determine the graduation status for 98.6 percent of the 12th graders for whom we requested transcripts. Of the 21,607 known graduates for whom we requested transcripts, we received 21,531 (99.6%).

As a measure of our success in obtaining transcripts from schools, we can define the overall within-school response rate as the number of in-scope transcripts received divided by the number of 12th-grade graduates in the sample. For this purpose, we will assume that the 326

students for whom we received neither transcripts nor graduation status were, in fact, 12th-grade graduates. Thus, using the data in Table 2-7, the overall within-school response rate is

$$\frac{19,930 + 1,403 + 126 + 72}{19,991 + 1,403 + 127 + 86 + 326} = \frac{21,531}{21,933} = .982$$

The overall response rate (school response rate multiplied by within-school response rate) is 87.3 percent (.889 x .982). Appropriate nonresponse adjustment factors were included in the determination of the weights for each school and student (see Chapter 6 of the *1990 High School Transcript Study Technical Report*).

Rates for public and private schools are displayed in Table 2-9.

Table 2-9. Response rates by type of school, in percentage

	Public	Private	Overall
School response rate	92.1	82.9	88.9
Within-school response rate	97.8	99.5	98.2
Overall response rate	90.1	82.5	87.3

3. DATA COLLECTION AND DATA PROCESSING

This chapter provides a summary of those aspects of our data collection and data processing procedures that are useful for an understanding of the data files. Detailed descriptions of these procedures are contained in Chapters 4 and 5 of the *1990 High School Transcript Study Technical Report*.

3.1 Data Collection Procedures

Data collection involved contacting schools; collecting transcripts, catalogs, and related data from the schools; reviewing the materials in the field; removing identifying information from transcripts prior to shipping them to Westat; reviewing the material upon receipt at Westat; and logging and filing all the materials. These steps are described in the sections that follow.

3.1.1 Contacts with Districts and Schools

In anticipation of the High School Transcript Study, eligible schools were informed during their 1990 NAEP assessment that such a followup was possible. A letter was left with all schools from which 12th graders were assessed, stating that this study could possibly occur and asking them to hold onto their NAEP materials through January 1991. In the Fall of 1990, a followup letter (with an enclosed postcard) was sent to these participating schools, informing them that the Transcript Study would likely be taking place and asking the schools to hold on to their NAEP materials through June 1991. This second notification should have been received prior to the disposal of any 1990 NAEP assessment lists and other documentation. The schools were asked to return the postcard, indicating whether or not they had retained their NAEP materials. About half the schools returned the postcard and about 65 percent of these schools indicated that they still had these materials. No contact was made at this time with eligible schools which did not participate in the 1990 NAEP assessment.

On February 15, 1991, all districts and schools were sent a packet of information about the project. These packets included letters from NCES and NAEP/Westat and a Summary of

School Activities. In addition, each district received a list of the selected schools from the district. There were two versions of the letter to schools from NAEP - one for schools that participated in NAEP 1990 and one for schools that did not.

Before contacting an individual school, a call was made to the district to obtain approval. It was explained to superintendents from districts/schools which had not participated in the previous assessment that the original sample for 1990 NAEP was a nationally representative sample of schools, and for that reason it was important to go back to all the initial schools. In originally non-participating schools, the plan was to select a sample of about 50 students and provide the same confidentiality safeguards with these samples as with all NAEP students; that is, student names would not be on any papers that left the school. Supervisors also emphasized that a school's participation in the High School Transcript Study would not involve any student time.

Once authorized by the district, individual schools were contacted and the following points discussed:

- Whether a school that participated in NAEP had retained the materials needed for HSTS;
- If the school had not participated in NAEP or could not find the materials, specifications were given for preparing a list of students who were 12th graders in 1990;
- Procedures for obtaining transcripts for the selected students and the method for reimbursing the school for the expense;
- The availability of a course catalog or description; and
- An appointment was set to visit the school to prepare the transcript requests and obtain the course catalogs.

3.1.2 Identifying the Sample Students and Obtaining Transcripts

During the initial visit to schools, supervisors made a final determination as to whether the 1990 NAEP materials were really available and usable. If the materials were available, the supervisor reviewed them by comparing the school's completed copies of the Administration

Schedule with the Westat copy which was included in the School Folder. In some schools where Administration Schedules could not be found but the student lists used in sampling were available, it was possible to reconstruct the NAEP sample by matching demographic characteristics of the sampled students from the Westat copy of the Administration Schedules to the sample list. If more than half the pages from the Administration Schedules were missing and could not be located, a new sample of 1990 12th graders was selected. In the event that a school had gone to the trouble of assembling a list of 1990 12th graders and their misplaced 1990 Administration Schedules turned up while the supervisor was at the school, the 1990 sample of NAEP students was always used.

3.1.2.1 Schools with NAEP Materials

Transcripts were requested for students who were assessed, sample students absent during assessment, and the IEP/LEP students who were sampled but excluded by the school from participating in the 1990 NAEP assessment. A Transcript Request Form (TRF) was completed and given to the appropriate staff in order to request the transcripts. Data available from NAEP files (NAEP ID and demographic variables) were preprinted on the form. The TRFs contained the following information:

- **Student Name** - Supervisors recorded the first name, middle initial, and last name of each assessed, absent, or excluded student listed on the Administration Schedule. These entries were made to correspond to the pre-printed NAEP ID.
- **NAEP ID** - The 8-digit NAEP assessment booklet numbers, absent student form numbers, and excluded student questionnaire numbers from the 1990 assessment were pre-printed in ID order. Since IDs were printed for 12th graders only, this column on the Transcript Request Form identified all students for whom we needed transcripts. On pre-printed forms, this column also indicated whether a student was enrolled in a special education program, had limited English proficiency, or both.
- **Exit Status** - Using information provided by the school, supervisors assigned one of the following codes to describe each student's outcome at the school:
 1. Graduated with a standard diploma;
 2. Graduated with an honors diploma;
 3. Received a diploma with special education adjustments;

4. Received a certificate of attendance;
5. Still enrolled in this school;
6. Dropped out; and
7. Other (such as transferred, GED, unknown).

Sometimes the exit status was determined directly from the transcripts and sometimes it was provided by other sources at the school.

- **Birth date, Sex, and Race/Ethnicity** - This information was pre-printed for each sampled student to help the supervisor identify these students. If for some reason this information was not pre-printed, it was recorded from the Administration Schedule. If the school informed a supervisor that some of this information was incorrect, the supervisor marked the correct information on the TRF.
- **Transcript Received** - Supervisors placed a checkmark in this column to document that the transcript for a given student had been received.

Once the Transcript Request Form had been completed by carefully transferring student information from the Administration Schedules, the supervisor filled out the summary box at the top of the form and requested transcripts according to the procedures set forth by the school.

3.1.2.2 Schools Without NAEP Materials

If a school did not participate in 1990 NAEP or the 1990 materials could not be located, a new sample of students was selected. Schools were asked to compile a list of students enrolled in the 12th grade during the spring of 1990, using either an HSTS Student Listing Form or their own computer-generated or annotated hard-copy lists. In addition to each student's full name, we requested exit status, sex, birth month, birth year, race/ethnicity, and whether a student was enrolled in a special education program or a program for limited English proficient students. If schools preferred to provide this information at the time they prepared the list of all 12th graders, they could do so.

Once the student lists were reviewed for completeness, all student names were numbered sequentially. If there were 60 or fewer students listed, all were automatically selected

for the Transcript Study. In schools where there were more than 60 students, supervisors used a pre-programmed, scientific calculator to select a sample of 50 students. The total number of students listed and the total number selected were recorded on the School Information Form and a Transcript Request Form was completed. The only pre-printed information on the form was an 8-digit student ID starting with 990. Otherwise, procedures for completing the TRF were similar to those used with the TRFs used in schools with NAEP materials. Completed Transcript Request Forms were submitted to the school contact. Once received, individual transcripts were reviewed carefully for legibility and completeness. The supervisor attached an explanation of the reasons for any missing transcripts to the Transcript Request Form that was returned to Westat.

3.1.3 Obtaining Course Catalogs and Other School Information

Course catalogs were also carefully reviewed at the school. Supervisors verified that the catalogs contained those courses that 1990 12th graders could have taken in high school, including vocational, remedial, honors, special education, or off-campus courses, or courses taught in a language other than English. If these course listings were not in the catalog, every effort was made to obtain additional information from school personnel.

The supervisor also gathered general information about class periods, credits, graduation requirements, and other aspects of school policy. Sometimes this information is documented in the course catalog and sometimes in a separate school policy document.

Schools were asked to fill out a School Characteristics and Policy Questionnaire (SCPQ) if the school had not participated in NAEP 1990 or had not filled one out at the time of the NAEP assessment. Somewhat different versions of SCPQ were used in 1990 and in 1991. Because OMB approval of the 1990 SCPQ had expired at the time of the HSTS, the version approved for the 1991 NAEP field test was used. Appendix K contains the 1990 version of the SCPQ, and Appendix L contains the 1991 version of the SCPQ.

3.1.4 IEP/LEP Student Questionnaire

Schools were asked to provide additional information for all sampled 12th graders who had an Individual Educational Program (IEP) except those who were classified as gifted and talented and all sampled students who were classified by the school as having limited English proficiency (LEP). This information was collected on the IEP/LEP Student Questionnaire (Appendix M). In schools with newly sampled students, the school identified the IEP/LEP students in the sample, and filled out an IEP/LEP questionnaire for each of these students. During the 1990 NAEP assessment, this information had been obtained only for IEP/LEP students, who the school **excluded** from taking the assessment. To ensure that we collected comparable information in schools using the 1990 student sample, we needed to obtain more information about IEP and LEP students. Specifically, for any student who had an IEP or was classified as LEP, but was not excluded from participation in NAEP 1990, we asked the school to fill out an IEP/LEP Student Questionnaire. In each case, we asked that the school staff member most familiar with the student complete the questionnaire.

3.1.5 Sending Data to Westat

As with NAEP, safeguards were built into the procedures for the Transcript Study to ensure that applicable privacy requirements were met. This included the removal of all personal identifiers from the transcripts provided by the schools. When the transcripts left the school, students could only be identified by ID numbers. In schools where the NAEP information was available, the ID number was the same as the student's NAEP booklet number. In schools where a sample of students was drawn, new IDs were generated. The form that linked the IDs to individual students by name was left in the school for safekeeping.

After transcripts were collected and all information on sampled students recorded, supervisors prepared the transcripts for transmittal to Westat. This involved "masking" all personally identifying information where it appeared on each transcript. A broad felt tip marker was used to line through all identifiers.

The types of personal identifiers and their location on the transcripts were different for every school and, sometimes, were different for the different categories of students within a single school. Supervisors were careful to examine every transcript and line through the following information each time it appeared: student's name, parent's name, names of guardians or other relatives, addresses (including street, city, state, ZIP), and phone numbers.

3.1.6 Receipt and Review of Data from Data Collectors

When Transcript Study materials arrived at Westat, all items were carefully reviewed for accuracy and completeness. Actual transcripts were matched to the Transcript Request Form. Supervisors were contacted immediately if further clarification was needed.

An automated management system was developed and maintained in Westat's home office. This was a two-part system with separate files for the 304 12th-grade schools that had participated in 1990 NAEP and the 75 non-participating 12th-grade schools. A disposition code structure was developed to indicate the status of each school's participation. As supervisors reported the results of their contacts with district superintendents and individual schools, a receipt clerk keyed a disposition code for each school. Disposition reports were then generated from the receipt system once a week in order that home office staff could review the progress of securing cooperation from the sampled schools. Overall, the cooperation rate was 90 percent. Of the 304 schools that had participated in 1990 NAEP, 286 (95%) agreed to participate in the transcript study. Forty-seven (63%) of the 75 schools that originally refused NAEP agreed to participate in the transcript study.

Once verified, data on the number of transcripts and course catalogs requested and received were entered in the receipt system by a clerk. Weekly status reports were also generated to monitor the progress of obtaining the transcripts. Transcripts and other school materials were maintained in individual school folders and secured until used by data preparation staff. Each school folder included the school's catalog or catalogs, Transcript Request Forms (TRF), student transcripts, IEP/LEP questionnaires, the 1991 School Characteristics and Policies Questionnaire (if it was not obtained during the 1990 NAEP), a School Information Form (SIF), and a shipping transmittal form.

3.2 Data Processing Procedures

Westat processed the data from the 1990 NAEP High School Transcript Study along four simultaneous paths:

- (1) The Student Sampling Information System;
- (2) The Transcript/Catalog Coding System;
- (3) The IEP/LEP Questionnaire System; and
- (4) The School Characteristics and Policy Questionnaire System.

With the exception of the transcripts and the course catalogs, some data processed by each system was collected by Westat field personnel and some data had already been assembled for NAEP into data files by Educational Testing Service (ETS). Staff obtained the relevant NAEP data files from ETS and merged them with the HSTS data that we collected. As described below, appropriate checks were made to ensure that only one set of data was entered for a school or a student, and procedures were adopted for resolving inconsistencies among the data sources. Each of the four data processing paths is described in separately below.

3.2.1 Student Sampling Information

The Transcript Request Form, and (when a sample was drawn in the field) the sampling section of the School Information Form provided the student sampling information. Figure 3-1 provides a schematic of the process for entering the student sampling information. The figure also indicates how intermediate files were used to ensure that all and only valid IDs were processed.

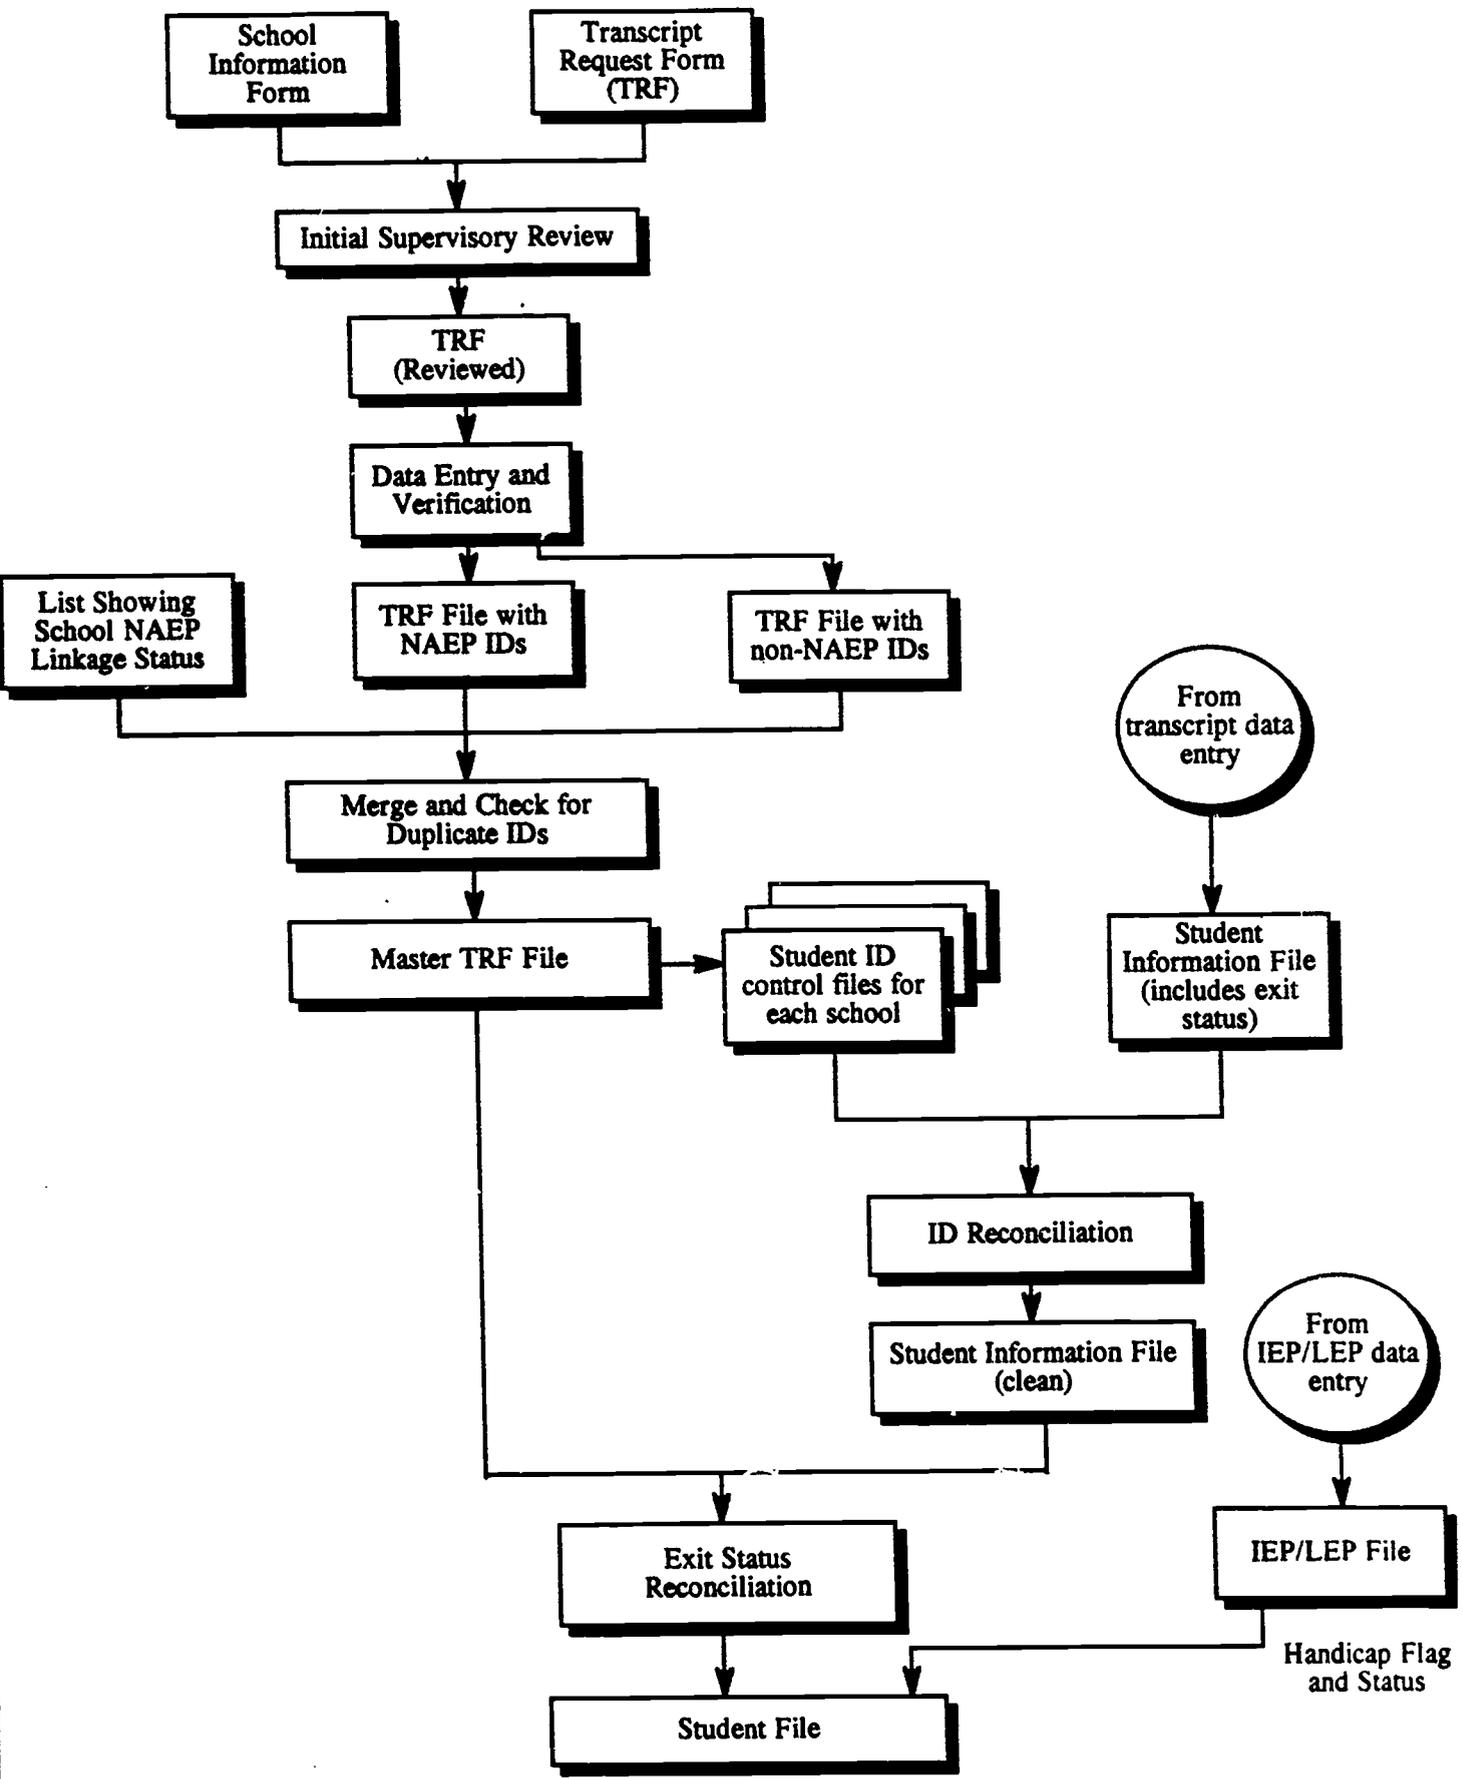

Figure 3-1. Student information processing and ID reconciliation

3.2.1.1 School Information Forms

In schools that participated in NAEP and which had kept their NAEP materials, the student sampling rates were identical to those used in NAEP because the sample was identical. For the 47 schools in which Westat staff drew samples in the field, the number of students listed (i.e., the number of eligible seniors) and the number of students sampled were recorded in the sampling section of the School Information Form. This information was keyed into a file that was checked against the number of unique student IDs on the Transfer Request Form (TRF) and then used in the weighting process (see Chapter 6 of the *1990 High School Transcript Study Technical Report*).

3.2.1.2 Transcript Request Forms

As the preprinted information on the TRFs had been drawn from the NAEP student file, for schools that had kept their NAEP materials, data entry was quite simple. Westat first created a file containing the preprinted information on the TRF with one record per student. Each student's graduation status as indicated on the TRF was entered at the end of each record. Westat staff made corrections to the demographic data preprinted on the TRF at the same time, and then key verified these entries.

Westat key entered and verified all the TRFs from the schools for which samples were drawn in 1991. Frequency distributions for all data values on the TRFs were reviewed in order to ensure that no invalid entries appeared in the file. Outliers were checked against the original documents and corrections made as necessary.

Westat merged the NAEP and non-NAEP TRF files and checked for valid IDs and duplicates. Information in the TRF file was used to create a list of valid school identifiers with a flag indicating each school's linkage status to NAEP. The linkage flag has 4 values: 0 = school did not participate in HSTS; 1 = both school ID and student IDs linked to NAEP; 2 = school participated in HSTS only; 3 = school participated in NAEP, but because a new sample was drawn, the student IDs are not the NAEP booklet numbers. The TRF file was also used to create a list of all valid student IDs within each school. These lists were key control mechanisms that were used throughout all phases of the study to ensure that only valid IDs could be attached to each data

record. For example, during entry of the transcript data, one of the data entry clerk's first steps was to key in the school ID and a student ID. As these IDs were keyed, the computer-assisted data entry system checked the IDs against the control lists and refused to accept any IDs not listed.

3.2.2 Coding Transcripts and Course Catalogs

A significant task of the HSTS was to code all courses taken by students in the study so that course taking patterns can be analyzed. Westat used a three-step process to achieve this goal. First, transcript data were entered into a computerized database. Second, each course offered by a school in the HSTS and appearing in its catalog was assigned a code from the Classification of Secondary School Courses (CSSC). Third, all courses appearing on transcripts were matched to CSSC-coded courses in the catalog. In subsequent batch processing, the CSSC code assigned to each catalog course was then assigned to all transcript courses which had been matched to it. Figure 3-2 is a schematic of our data entry and coding system.

Exhibit 3-1 is a list of standard rules for abbreviation and treatment of numbers that was provided to the data entry staff. These rules were used both for transcript course titles and for catalog course titles.

Titles of courses offered at each school included in the HSTS were entered from a catalog of course offerings provided by the school. If no catalog was provided, a catalog was created for the school, based on all the course titles appearing on students' transcripts (excluding courses that were transferred from other schools). The School File includes variables indicating the type of catalog that the school provided (CATYPE), and the source of catalog titles used to create the Course Offering File (CATSRCE).

Approximately 14 percent of the schools did not provide a catalog of courses offered at the school. For these schools, a computer program was developed to create a list of all course titles which appeared one or more times on transcripts from that school. The result is an unduplicated listing of courses exactly as they appear on transcripts. This process was performed (by necessity) after the transcripts for that school were entered, and the program used the resulting file as the basis for producing the course list. There are significant limitations of creating catalogs for a school in this manner, including: (1) the list only represents courses taken by students in the sample, and may not include all courses actually offered at that school; (2) many courses are repeated, since the same course may have been entered into the transcript file in two different formats (e.g., "ALG 1," "ALGEB 1," "ALGEBRA 1" etc.); and (3) no course description is available to clarify the meaning of a title. These catalogs required considerable review and editing before catalog coding could occur. Schools with catalogs generated using this procedure have the variable CATSRCE set to "0" in the School File. Other schools have the CATSRCE variable set to "1".

Thirty-nine schools provided catalogs of courses offered by their entire school district, while the individual school's specific course offerings were a subset of those included in the district catalog. Often these district catalogs (which were quite large) included programs that we know are not offered at the school (such as an International Baccalaureate program, a vocational program, or a performing arts program). To create a listing of courses actually offered at 14 of these schools, we created a list in the same manner as for schools not providing any catalog (i.e., creating it from titles appearing on transcripts), but supplemented the resulting list with courses from the district catalog that were likely to be offered in the HSTS school (such as Advanced Placement English 12, Accounting, or Basic Biology) even if they did not appear on a transcript. The type of catalog or course list which the school provided (none, district catalog, school-specific course list, or school-specific catalog) is indicated by the CATYPE variable on the School File.

3.2.2.1 Catalog Coding

Using the Computer Aided Coding and Editing (CACE) System, each school catalog was coded, course by course, using the *Classification of Secondary School Courses* (Ludwig, et al., 1982) and modifications made in 1989 by Westat (Westat, 1989). Courses were matched primarily based on descriptive information in the school catalog. If no descriptive information was available,

we used the course title, and any additional information available in school materials such as the School Information Form, transcripts, IEP/LEP Questionnaire, or other documents. Catalog coding included identifying the most appropriate CSSC code, and setting the condition for six "flags" associated with each course. These procedures are described more fully below.

Classification of Secondary School Courses

We used the *Classification of Secondary School Courses (CSSC)*, including modifications we made in 1989 as a standard for classifying and coding the courses offered by all the schools included in the HSTS and for classifying and coding all courses appearing on transcripts of students included in the HSTS. The CSSC is a 6-digit, hierarchical numbering system for all regular and special education courses offered in American secondary schools. Each CSSC entry includes a six-digit code, a course title and alternate titles, as well as a course description. Westat updated the CSSC significantly in 1989 to reflect the changes we found in the breadth and types of courses taken by students in the 1987 HSTS, and we have again supplemented the CSSC in 1992, but only modestly. Appendix O lists 18 courses which we added to the CSSC for the 1990 HSTS. No existing CSSC courses were deleted, nor were any existing codes changed.

Flags

We coded additional information for each course as a series of single-digit "flags." These flags were used to indicate features of a course such as its relationship to other courses in a sequence of courses, the language of instruction for the course, the level of the course (honors, regular, or remedial), whether it is a combination course (a multi-subject course requiring multiple codes such as an art appreciation/music appreciation course), the location of the course, and any enrollment restrictions (regular or handicapped students). A full list of flags and their values is found in Exhibit 3-2.

Exhibit 3-2. Legal values for flags

Sequence Flag:

- 0 Non sequential course
- 1 First course in sequence
- 2 Advanced course in sequence

Language Flag:

- 0 DEFAULT taught in English
- 1 Taught in language other than English

Remedial/Honors Flag:

- 1 Honors course
- 2 DEFAULT Regular course
- 3 Remedial course

Combination Course Flag:

- 1 DEFAULT, Not a combination course
- 2 Yes, the course was assigned 2 CSSC codes
- 3 Yes, the course was assigned 3 CSSC codes
- 4 Yes, the course was assigned 4 CSSC codes

Note: When multiple CSSC codes are assigned to a course, the course credits are divided evenly among each of the codes.

Off Campus Flag:

- 0 DEFAULT No
- 1 Yes, at area Vo-Tech
- 2 Yes, at Special Ed Center
- 3 Yes, other
- 4 Yes, at multiple locations

Transfer:

- 0 Not a transfer course
- 1 Transfer course

Handicapped:

- 0 Self contained special education
 - 1 Non special education
 - 2 Resource special education

CACE System for Catalog Coding

CACE is a computer program which we designed specifically for coding high school catalogs. It consists of two major components: (1) a component for selecting and entering the most appropriate CSSC code and "flags" for each course in a catalog; and (2) a component for matching each entry appearing on a transcript with an entry in the corresponding school's list of course offerings.

In addition to providing for data selection and entry, CACE maintains file consistency and produces output files suitable for further analysis and manipulation. CACE's user interface is designed to reduce the likelihood of user errors by encouraging selection from a list rather than key entry of data items.

The CACE System presents each title in a school's catalog to the catalog coder one at a time. The catalog coder then examines a "suggestion list" of potential codes for that course. The suggestion list consists of CSSC codes that were assigned to similar titles in the 1987 HSTS. The suggestion list is synchronized with an on-line version of the CSSC (in another window on the same screen) so that the catalog coder can compare the description for the course in the CSSC with the course description contained in the school catalog. The catalog coder can select the appropriate CSSC code either in the suggestion list or in the corresponding section of the CSSC. Alternatively, the catalog coder can type the CSSC code directly into the appropriate data field on the screen. The CACE system checks all entries against the master CSSC list before allowing the record to be stored in the database. If the items in the suggestion list are not good matches to the course description, the catalog coder can always browse through the full on-line CSSC, or in the hard copy of the CSSC provided to each catalog coder. If the catalog coder cannot determine an appropriate code for a course, he or she may select a special code from the suggestion list that will mark the course for further consideration by the coding supervisor. Codes for flags (described below) are automatically set to default values when a course is selected or entered, and can then be changed to non-default values by the catalog coder.

Transfer courses (courses taken at other schools that appear on a transcript) are automatically added to the catalog list appearing in CACE with the "transfer flag" indicating their transfer status. In coding these transfer courses, the catalog coder can only use the course title to

assign CSSC codes since no descriptive information is available (unless the transfer course was taken in the same school district and we have a district catalog). Accordingly, the CACE system builds an incremental list of transfer course titles and previously assigned CSSC codes and uses these to assign CSSC codes automatically to transfer courses that match items in the list. Since the number of transfer titles for a school can be quite large (sometimes as many as 80% of the titles for the entire school), this automated procedure saves a great deal of time and ensures that identical titles always receive identical codes. The ability to code transfer courses automatically was developed relatively late in the process of coding catalog files in CACE. Therefore this process became available, it was not used for all schools. Since transfer courses do not represent courses offered by the sampled schools, they were dropped from the final Course Offerings File. They remain on the Transcript File.

3.2.2.2 Matching Transcript Titles to Catalog Titles

Catalog coders complete a table which associates each course title appearing on a transcript with the title of a course in the school's catalog and its corresponding CSSC code and flags. The process is somewhat more difficult than might be expected because of the lack of uniformity in how courses are entered on transcripts, even within the same school. The task is also somewhat complex because flags as well as course titles must be matched, so that "Algebra 1" with an honors flag is appropriately matched with an honors level course in the catalog. For all schools, special education titles on transcripts were matched to appropriate catalog titles by a specialist in special education.

We assign a CSSC code to each course listed on a transcript by matching each unique course title on a transcript to a specific CSSC-coded course in the school's catalog. The CSSC code thereby becomes associated with the transcript title. The associations must be based on a match of the title, level (i.e., average, honors, remedial), and flags (transfer, language of instruction, handicapped) for each transcript entry.

One of the major difficulties we encountered in evaluating transcript course titles occurred when course titles were abbreviated. The original meaning of these abbreviations was difficult to determine. Some abbreviations could be deciphered by knowing the program offered

at a school (e.g., "EFE" is "Economics and Free Enterprise"), but others remained indecipherable, despite all of our efforts (e.g., "ARCS"). Some titles could reasonably be assigned to a broad domain, if not a specific course. For example, "ABC Math" can be matched to the "Math-Other" course title and CSSC code. We matched an ambiguous title to an "other" course and code within a specific discipline whenever possible; otherwise the course was matched to an "uncodeable" course.

3.2.2.3 Credit and Grade Standardization

Since credit and grade information reported on transcripts varies considerably among schools, districts and states, it was necessary to standardize this information so that valid student-level and school-level comparisons can be made. We standardized credit information based on the Carnegie Unit, which we defined as the number of credits a student receives for a course he or she takes every day, one period per day, for a full school year. For each school, the catalog coder filled out a "Carnegie Unit Report" (as shown in Exhibit 3-3). The factor for converting credits reported on the transcript to the standard Carnegie Unit was reviewed by the curriculum specialist and then key entered and verified for each school by data entry personnel.

Grade information on transcripts varied even more widely than credit information. Grades were reported as letters, numbers, or other symbols on a variety of scales. Coders provided standardized information for each school using the form shown in Exhibit 3-4 ("Standardization of Grades"), which were then key entered for each school by data entry personnel. Numeric grades were converted to standardized grades as shown in Table 3-1, unless the school documents specified other letter grade equivalents for numeric grades.

3.2.2.4 Post Standardization Quality Control Checks

After the credits assigned to a school's transcripts were converted to Carnegie units, we calculated the total number of credits that a student had earned and compared them to the minimum number required to graduate from the school. When the total credits that a student had earned was less than the number required to graduate, or greater than 150 percent of the number required to graduate, we examined his or her transcript and the data files to see if a mistake had occurred. Any mistakes that occurred were corrected and the total credits were recalculated and compared to the graduation requirement.

In a small number of cases, we discovered that a student had not actually graduated, and changed his or her exit status accordingly. In another group of cases we found that some students actually had earned substantially more credits than are required to graduate. Often these were students who had spent substantial amounts of time in both Mexican and American high schools. While they were awarded credit for the Mexican courses, they were still required to take an essentially American curriculum in order to obtain the American diploma.

In still other cases we found that although a student had less credits than were required to graduate, the transcript had all the other attributes of a graduated senior such as 4 full years of courses, all required courses, a graduation date, grade point average, and class standing. In these cases, if a careful review of the transcript and the data files showed no data entry or coding errors, we kept the transcript in the database with the apparent inconsistency as recorded on the transcript.

In a substantial number of cases, the transcript being reviewed listed transfer courses that needed to be given special treatment. In some cases it was clear that the appropriate conversion factor for the credits reported on the transcript to Carnegie units was different from that of the school issuing the transcript. When this occurred, we adjusted the conversion factor appropriately for these courses on a student-by-student basis. In other cases, we found entries on transcripts indicating that a student had been awarded some number of credits for transferred courses, but no list of the specific courses. When this happened, we created a dummy course titled "Undifferentiated Transfer Courses" and treated it as an uncodeable course.¹

Inclusion of the Undifferentiated Transfer Courses on the file had the effect of accounting for all the credits that appear on the transcripts. It also provided us with a means of screening essentially incomplete transcripts out of the analyses. Because the intent of the transcript study is to summarize the course taking patterns of graduates of American high schools over the 3 or 4 years that they are in a typical high school, for analytic purposes we treated transcripts that did not list separate credits for the equivalent of at least 3 full years of high school courses as incomplete. We did this by creating a flag (GRREQFLG), which we placed on the student file, that indicates whether the differentiated course credits on a transcript total at least 75 percent of the minimum credits required to graduate. If they do not, the transcript remains in the file, but the student is given a weight of zero and is treated as missing for purposes of projecting national totals (see Section 4.1 of this manual and Section 6.1.4 of the *1990 High School Transcript Study Technical Report* for a description of the nonresponse adjustment procedures). In other words, we fully coded the transcripts for such students and provide them on the file, but did not use them in our estimates.

3.2.3 IEP/LEP Questionnaires

One of the questionnaires obtained in the Transcript Study was the IEP/LEP Questionnaire. This was completed for handicapped students for whom the school had developed an Individualized Educational Program (IEP) and for students with Limited English Proficiency

¹ If a list of transfer courses appeared on a transcript with a number of credits indicated for the group of courses, one of the catalog coders apportioned the credits among the courses using whatever information was available. For example, some transcripts have sections which indicate by a series of check marks which of a set of requirements have been met. If the courses explicitly detailed on the transcript do not account for all of the check marks, then the transferred credits must account for the remainder.

(LEP). We asked the schools to have the person most knowledgeable about a student complete the IEP/LEP questionnaire. In large schools, this person was typically a counselor, a special education teacher, or a teacher of English as a Second Language. In smaller schools, this person was typically a classroom teacher. Part A (questions 1 through 5) of the questionnaire was completed for both groups of students (i.e., those classified as handicapped and for those classified as having limited English proficiency. Part B of the questionnaire (questions 6 through 15) was completed only for students with an IEP. Part C of the questionnaire (questions 16 through 27) was completed only for students with limited English proficiency. A copy of the questionnaire is in Appendix M.

ETS provided Westat with data for all 12th-grade students for whom the IEP/LEP questionnaires had been completed during NAEP. These were students who had been sampled for NAEP, but excluded from the assessment based on their handicap or lack of English proficiency. Another 407 questionnaires were collected during the HSTS as described in Chapter 4. These questionnaires were scanned, edited, and coded by Westat during the HSTS study. Of these questionnaires, only the ones with corresponding records in the Student File were selected for the final IEP/LEP file. When a student had questionnaires in both the NAEP and HSTS data files, the NAEP version was used. A total of 695 students are represented in the final IEP/LEP file.

The IEP/LEP Questionnaires used for NAEP and HSTS were identical and most of the questionnaire items needed no recoding. The data entered were direct representations of the questionnaire responses. There were, however, four items on the NAEP data file that needed some recoding. The same recoding algorithm was used for the following three items:

- Item 5. What percentage of the school day did this student spend in a regular class?
- Item 8. What percentage of the school day was this student served by a special education program?
- Item 19. What percentage of the school day was this student served by a special language program?

The choices on the questionnaire are 0 percent, 10 percent, 20 percent, and so on through 90 percent and 100 percent. For each item, the NAEP data file contains one variable (coded "Yes" or "Missing") for each possible percentage choice. Because of this, it was possible to

have more than one percentage entered in response to the above questions. The following actions were taken in order to create a file with a single field containing the actual percentage indicated on the questionnaire.

- If the respondent checked two adjacent responses, they were averaged; and
- If the respondent checked more than two responses, checked two non-adjacent responses, or checked no responses, the response code became MISSING.

We also recoded one other item from the NAEP data file:

Item 6. Which of the following best describes this student's disability?

Once again, the NAEP file is structured in such a way that each possible selection is a separate variable. This allowed multiple selections to pass by undetected. Our solution was to recode the responses in the following manner:

- If the respondent checked multiple responses and they were VISUALLY HC/BLIND and DEAF/BLIND, then the response became DEAF/BLIND; and
- In any other case where two or more responses were chosen, the code for MULTIDISABLED was used.

Several variables were added to the final IEP/LEP file. The SOURCE variable was added to denote from which study the data originated (NAEP or HSTS). The Student Handicapped status was determined by the students' IEP status as indicated by the first question on the questionnaire and by the pattern of answers to the content questions. The handicapped flag (HCFLAG) was set to "2" if the IEP question (Q1) was answered "YES" or if both the IEP question (Q1) and the LEP question (Q2) were unmarked and there were any non-missing responses to the questions in the disability section (Q6-Q15). The students' exit status, race/ethnicity, grade level, sex, birth month and birth year were obtained from the Student File. If that information did not exist on the Student File, the corresponding data from the IEP/LEP questionnaire were incorporated if available. Frequencies and crosstabulations were run to check the data for valid entries and outliers before, during, and after processing. For the data collected for the HSTS in 1991, unusual values were rechecked against the original documents and corrected as necessary.

3.2.4 School Characteristics and Policy Questionnaires

The School Characteristics and Policy Questionnaire (SCPQ) was used in the 1990 NAEP and was available for 283 of the 330 HSTS schools (the remainder had either not participated in NAEP or had failed to respond to the questionnaire). An additional 63 School Characteristics and Policy Questionnaires were gathered by Westat during the 1991 transcript data collection of February 1991. There are 21 schools participating in the HSTS for whom there were both NAEP and HSTS questionnaires. For these schools, the HSTS data were used. Five schools did not complete SCPQs.

The 1990 and 1991 versions of the SCPQ were quite different, both in the order and content of the questions.² When coding the SCPQs, the coding system used in the 1987 School File was used whenever possible. For the items that were the same in NAEP and HSTS, the coding was performed using identical specifications. Items that differed between the two versions were coded to be as consistent as possible with both the formats of other SCPQ items and the formats used for the 1987 HSTS School File.

The fact that the two questionnaires differed greatly presented a challenge in the naming of the variables. The following rules were applied to the naming conventions:

- Identical questions (with or without the same question number) were treated as one variable on the data file and are identified with the item number from the 1990 NAEP SCPQ. A note in the codebook identifies the corresponding question number in the 1991 SCPQ.
- Item numbers for questions appearing only in NAEP were unchanged. Schools for which we had the 1991 SCPQ have missing values entered for these items.
- Item numbers for questions only in HSTS were renamed with a preceding underscore ("_"), that is Q1 would become _Q1. Schools for which we used the 1990 NAEP SCPQ have missing values entered for these items.

² The 1990 SCPQ was developed for the 1990 NAEP. The 1991 SCPQ was developed for the 1991 NAEP Trial State Assessment. The questionnaires differed because of different research interests and improvements in the questions. It was not possible to use the 1990 SCPQ when collecting the transcripts because OMB approval expired in June 1990.

In the event that more selections were available for a question in one questionnaire than in the other, the responses were combined to reach a final format of the question with the larger range of responses. For example, both the 1990 and 1991 versions of the SCPQ included the question, "What is the highest degree you hold?" The response choices offered in the two questionnaires are shown in Table 3-2 along with the selection number used on each questionnaire.

Table 3-2. Response choices on the 1990 and 1991 SCPQ

Choice	Selection number		Value coded on HSTS file for Item 4*
	1990 Q4	1991 Q14	
High school diploma	1	--	1
Associate degree/ Vocational certificate	2	--	2
Bachelor's degree	3	1	3
Master's degree	4	2	4
Education specialist's or professional diploma	5	3	5
Doctorate	6	4	6
Professional degree	7	5	7

* The HSTS file also uses "8" for "No Response" and "9" for "Multiple Response."

The 1990 questionnaires were processed by ETS as part of NAEP. The 1991 questionnaires were keyed at Westat and were subject to 100 percent key verification. All data were subject to range and logic checks during data entry and verification. We then merged the two files into a single data file and produced frequencies and crosstabulations in order to check for valid ranges and to identify outliers.

Copies of the 1990 and 1991 SCPQs are in Appendix K and Appendix L, respectively.

4. WEIGHTING PROCEDURES AND VARIANCE ESTIMATION

The 1990 High School Transcript Study (HSTS) used a complex sample design with the goal of securing a sample from which estimates of population and subpopulation characteristics could be obtained with reasonably high precision (as measured by low sampling variability). At the same time, it was necessary that the sample be economically and operationally feasible to obtain. The resulting sample had certain properties that had to be taken into account to ensure valid analysis of the transcript data.

The 1990 High School Transcript Study sample was obtained through a stratified multistage probability sampling design that included provisions for sampling certain subpopulations at higher rates. To account for differential probabilities of selection, and to allow for adjustments for nonresponse, each student was assigned a sampling weight. Section 4.1 briefly discusses the procedures used to derive these sampling weights.

Another consequence of the HSTS sample design is its effect on the estimation of sampling variability. Because of the effects of multistage design (students within schools, schools within primary sampling units) and because of the effects of certain adjustments to the sampling weights (poststratification and weighting adjustments), observations made on different students cannot be assumed to be independent of one another. As a result, ordinary formulas used to estimate the variance of sample statistics, based on assumptions of independence, will tend to underestimate the true sample variability. Section 4.2 briefly discusses the jackknife technique used in the HSTS to estimate sampling variability.

Details of the weighting and variance estimation procedures are described in Chapter 6 of the *1990 High School Transcript Study Technical Report*.

4.1 Derivation of the Sample Weights

In order to make valid inferences about the entire population of graduated grade 12 students from the sample of student transcripts collected, it is necessary to use the sampling weights.

The weights reflect the probability sampling scheme used to arrive at the sample of students for whom transcripts were requested. The weights also reflect the impact of sample nonresponse at the school and the student level, and make adjustments for these groups to decrease the potential bias that might arise through differential nonresponse across population subgroups. Finally, improvements to the precision of weighted estimates result from the application of poststratification factors to the sample weights.

The final student weight (variable FINSTUWT) was constructed in four steps. The first step was to construct the student base weight (or design unbiased weight) which is the reciprocal of the overall probability of selection of the student. The second step was to adjust the student base weight for the noncooperating schools, so that the weighted estimates for the students obtained from the cooperating schools will also represent the noncooperating schools. In the third step, the school nonresponse-adjusted student weights were poststratified, so that the estimates obtained by using the poststratified weight for certain subpopulations agreed with independent estimates. The independent estimates were obtained from the Current Populations Survey (CPS) estimates for various student subgroups. These poststratified estimates have a smaller mean squared error than would have otherwise been obtained. The final step was to adjust the poststratified student weight for the graduated students with transcripts to compensate for missing transcripts. Use the variable FINSTUWT to calculate statistics for the entire population of graduated students in the class of 1990.

The student base weight is the reciprocal of the overall probability of selection of the student.

The second weighting step was to compute the school nonresponse adjustment factors to adjust the student base weight for the school nonresponse. The main reason for nonresponse adjustment is to reduce the potential bias in the survey estimates caused by the noncooperating schools. Separate nonresponse adjustment factors were computed for certain subpopulations which are called the nonresponse adjustment classes (or cells). Within these subpopulations, the student transcripts from the cooperating schools will also represent the students from noncooperating schools. The nonresponse adjustment cells were formed by classifying the PSU's and therefore the schools by NAEP Region, PSU certainty/noncertainty and urbanicity status, and PSU high minority

status. Table 4-1 shows the final school nonresponse adjustment classes. It also shows the numbers of eligible and respondent schools and the school nonresponse adjustment factors.

Table 4-1. The number of eligible and respondent schools, and school nonresponse adjustment factors by the school nonresponse adjustment classes

Certainty/ noncertainty (NC) urbanicity	Minority status	Region	Sample counts		School nonresponse adjustment factor
			Eligible	Respondent	
Certainty, MSA	All	Northeast	43	39	1.061
Certainty, MSA	All	Southeast	23	20	1.059
Certainty, MSA	All	Central	26	22	1.177
Certainty, MSA	Low	West	43	38	1.196
Certainty, MSA	High	West	5	5	1.000
NC, MSA	All	Northeast	31	28	1.209
NC, MSA	Low	Southeast	17	17	1.000
NC, MSA	All	Central	32	26	1.150
NC, MSA	Low	West	18	16	1.058
NC, MSA	High	Southeast	19	18	1.010
NC, MSA	High	West	17	14	1.217
NC, NonMSA	All	Northeast	12	10	1.103
NC, NonMSA	Low	Southeast	18	17	1.001
NC, NonMSA	All	Central	21	20	1.012
NC, NonMSA	All	West	24	19	1.067
NC, NonMSA	High	Southeast	22	21	1.101

To reduce the mean square error of estimates using the sampling weights, the respondent weights were further adjusted so that estimated population totals for a specified subgroup population, based on the sum of student weights for specified type, were the same as presumably better estimates based on composites of estimates from 1987 and 1988 Current Population Survey and 1990 population projections made by the Census Bureau. This adjustment, called poststratification, is intended especially to reduce the mean squared error of estimates relating to student populations that span several subgroups of the population. The poststratification classes were defined in terms of race/ethnicity and NAEP region.

The poststratification cells, the factors, and the independent estimates are shown in Table 4-2. For a discussion of the reasons why poststratification factors are based only on students born on or after October 1, 1971, see Rust et al. (1990, Appendix 5). Note that although the poststratification factors were derived using only data for students born on or after October 1, 1971,

the factors shown in Table 4-2 were applied to all students defined by a given race/ethnicity and region combination, regardless of age.

Table 4-2. The control totals for the students 18 or younger and enrolled in the 12th grade by poststratification classes and the poststratification factors

Race/ethnicity	Region	12th-grade students count	Poststratification factor
Black, not Hispanic	All	305,359	1.35
Hispanic	All	173,571	1.10
White, not Hispanic	Northeast	462,262	1.08
White, not Hispanic	Southeast	343,317	0.80
White, not Hispanic	Central	546,337	1.10
White, not Hispanic	West	452,671	1.19
Other	All	97,544	1.03

For a small percentage of students, about two percent, it was not possible to obtain a transcript or the transcript received was incomplete. The transcript of a graduated student was considered as incomplete if the student was graduated with a standard or honors diploma and the total number of credits earned as obtained from the transcript was less than 75 percent of the school's graduation requirement.¹ There were 21,899 graduated students in the sample, and we obtained a complete transcript for 21,435 of these students. For 326 students, the graduation status was unknown and no transcript was received. For weighting purposes only, 292 of these students were imputed as graduated. After the student weights were poststratified, the weights were inflated to compensate for the loss resulting from the graduated students with no transcripts.

The main reason for adjusting the weights is to remove potential bias on the substantive variables caused by not receiving the transcripts for all students. If the probability of not obtaining a transcript (nonresponse) is independent of substantive variables, then no bias would arise. Therefore, the objective is to obtain adjustment classes such that the probability of nonresponse within each class is independent of substantive variables. There are several alternative methods of forming the classes to achieve this result. We formed the classes so that the variation in the

¹ For purposes of this calculation, only credits associated with specific courses were used. As discussed in Section 3.2.2.4, undifferentiated transfer credits were not counted as part of a complete transcript.

response propensity within the classes is minimized. The final student nonresponse adjustment classes are shown in Table 4-3.

Table 4-3. The student nonresponse adjustment classes and the weight adjustment factors

Region	Age	Race/ ethnicity	Sex	Sample counts		
				All graduated	Graduated with complete transcript	Student nonresponse adjustment factor
West	All	Black and Hispanic	Male	726	710	1.024
West	≤18	Black and Hispanic	Female	681	677	1.007
West	>18	Black	Female	40	37	1.091
West	>18	Hispanic	Female	144	142	1.018
West	≤18	White and Other	Male	1,609	1,542	1.040
West	≤18	White and Other	Female	1,910	1,855	1.028
West	>18	White and Other	All	723	685	1.051
All other	≤18	All	All	13,303	13,102	1.013
All other	>18	Black	All	624	596	1.042
All other	>18	All Other	All	2,139	2,089	1.021

The final student weight (variable FINSTUWT) was obtained as a product of the student base weight, the school nonresponse adjustment factor, the poststratification factor and the student nonresponse adjustment factor. Every graduated student with a complete transcript was assigned a positive final student weight.² Table 4-4 presents statistics on the distribution of the final student weight. Note that the weights vary considerably around the mean student weight (130.72), and this is summarized by the coefficient of variation (CV) of the weights (0.70). The factor $1+CV^2$ indicates the relative size of the variance of the survey estimates, resulting from the variation in the weights, as compared to a sample of the same size with all weights equal. (An

² A transcript was considered complete if it contained specific course titles and associated credits that, when totaled, represented at least 75 percent of the school's minimum graduation requirements.

equal-weighted sample would be subject to unknown and possibly large bias in this study, and so is not a viable alternative in practice.) Thus in this case, the variation in weights leads to sampling variances that are about 49 percent higher than from an equal-weighted sample.

Table 4-4. Statistics for the distribution of the final student weight

Number of cases	21,435
Mean	130.72
Standard Deviation	91.30
Coefficient Variation (CV)	0.70
Minimum	3.92
25th percentile	61.76
Median	108.49
75th percentile	176.20
Maximum	646.50

4.2 Procedures Used by HSTS to Estimate Sampling Variability

A major source of uncertainty in estimating the value in the population of a variable of interest exists because information about the variable is obtained on only a sample from the population. To reflect this fact, it is important to attach to any statistic (e.g., a mean) an estimate of the sampling variability to be expected for that statistic. Estimates of sampling variability provide information about how much the value of a given statistic would likely change if the statistic had been based on another, equivalent sample of individuals drawn in exactly the same manner as the achieved sample.

The estimation of the sampling variability of any statistic must take into account the sample design. In particular, because of cluster selection (students within schools, schools within PSUs) and because of effects of nonresponse and poststratification adjustments, observations made on different students cannot be assumed to be independent of each other. Furthermore, to account for the differential probabilities of selection (and the various adjustments), each student has an associated sampling weight, which should be used to compute any statistic which is subject to sampling variability. Ignoring the special characteristics of the sample design and treating the data as if the observations were independent and identically distributed, will generally produce underestimates of the true sampling variability.

The proper estimation of the sampling variability of a statistic based on the HSTS data is complicated and requires techniques beyond those commonly available in standard statistical packages. Fortunately, the jackknife procedure (see, e.g., Wolter, 1985; Kish and Frankel, 1974; Rust, 1985) provides good quality estimates of the sampling variability of most statistics at the expense of increased computation. The procedure can be applied in concert with standard statistical packages to obtain a proper estimate of sampling variability using the approach outlined below.

The jackknife procedure used by HSTS has a number of properties that make it particularly suited for the analysis of HSTS data. When properly applied, a jackknife estimate of the variability of a linear estimator (such as a total) will be the same as the standard textbook variance estimate specified for the sample design (if the first-stage units were sampled with replacement and approximately so otherwise). Additionally, if the finite sampling corrections for the first stage units can be ignored, the jackknife produces asymptotically consistent variance estimates for statistics such as ratios, regression estimates or weighted means and for any other nonlinear statistic that can be expressed as a smooth function of estimated totals of one or more variables (Krewski and Rao, 1981).

Through the creation of student replicate weights, the jackknife procedure allows the measurement of variability attributable to the use of poststratification and other weight adjustment factors that are dependent upon the observed sample data. Once these replicate weights are derived, the jackknife variance estimate of any statistic can be obtained.

The jackknife procedure in this application is based upon developing a set of 56 jackknife replicate weights for each graduated student with a transcript. The 56 replicate weights are developed in such a way that approximately unbiased estimates of the sampling variance of an estimate will result. At the same time it will provide an adequate number of degrees of freedom for making inferences about the parameter of interest. See Chapter 6 of the *1990 High School Transcript Study Technical Report* for a description of the technique for deriving the jackknife replicate weights.

5. 1990 HIGH SCHOOL TRANSCRIPT STUDY DATA FILES

Data from the 1990 High School Transcript Study are organized into eight data files encompassing the different levels of information: (1) Master CSSC File; (2) Course Offerings File; (3) School File; (4) Student File; (5) Linked Weights File; (6) IEP/LEP Questionnaire File; (7) Tests and Honors File; and (8) Transcript File.¹ The relationships among the files are shown in Figure 5-1. Except for the Master CSSC File (which is not related to individual schools or students), all files can be linked by PSU school identifiers. The Student, IEP/LEP Questionnaire, Transcript, Linked Weights, and Tests and Honors Files can be linked by student identifiers; and the Master CSSC can be linked to the Course Offerings or Transcript File by CSSC number.

To identify a specific school, the PSU and school IDs must be used in combination; to identify students, the PSU, school, and student IDs must also be used in combination. Each school has a unique PSU/School ID combination, and each student has a unique PSU/School/Student ID combination. This identification system enables linking an anonymous student to the anonymous school that he or she attended.

Weights, developed using the procedures described in Chapter 4, are contained in the Student File and the Linked Weights File. We have provided the final student weight (FINSTUWT) so that data analyses can be weighted up to national totals. The final student weight should be used in analyses involving only transcript data. The weights in the Linked Weights File should be used in analyses involving both transcript data and data obtained from NAEP data files (not included on this tape).

5.1 Master CSSC File

The Master CSSC File contains all codes in the modified version of the Classification of Secondary School Courses (CSSC) used in this study. There are 2,136 records, sorted by CSSC

¹ A ninth file, the CSSC Text File, also appears on the tape. This file is formatted for ease in printing the CSSC text, which includes the course descriptions.

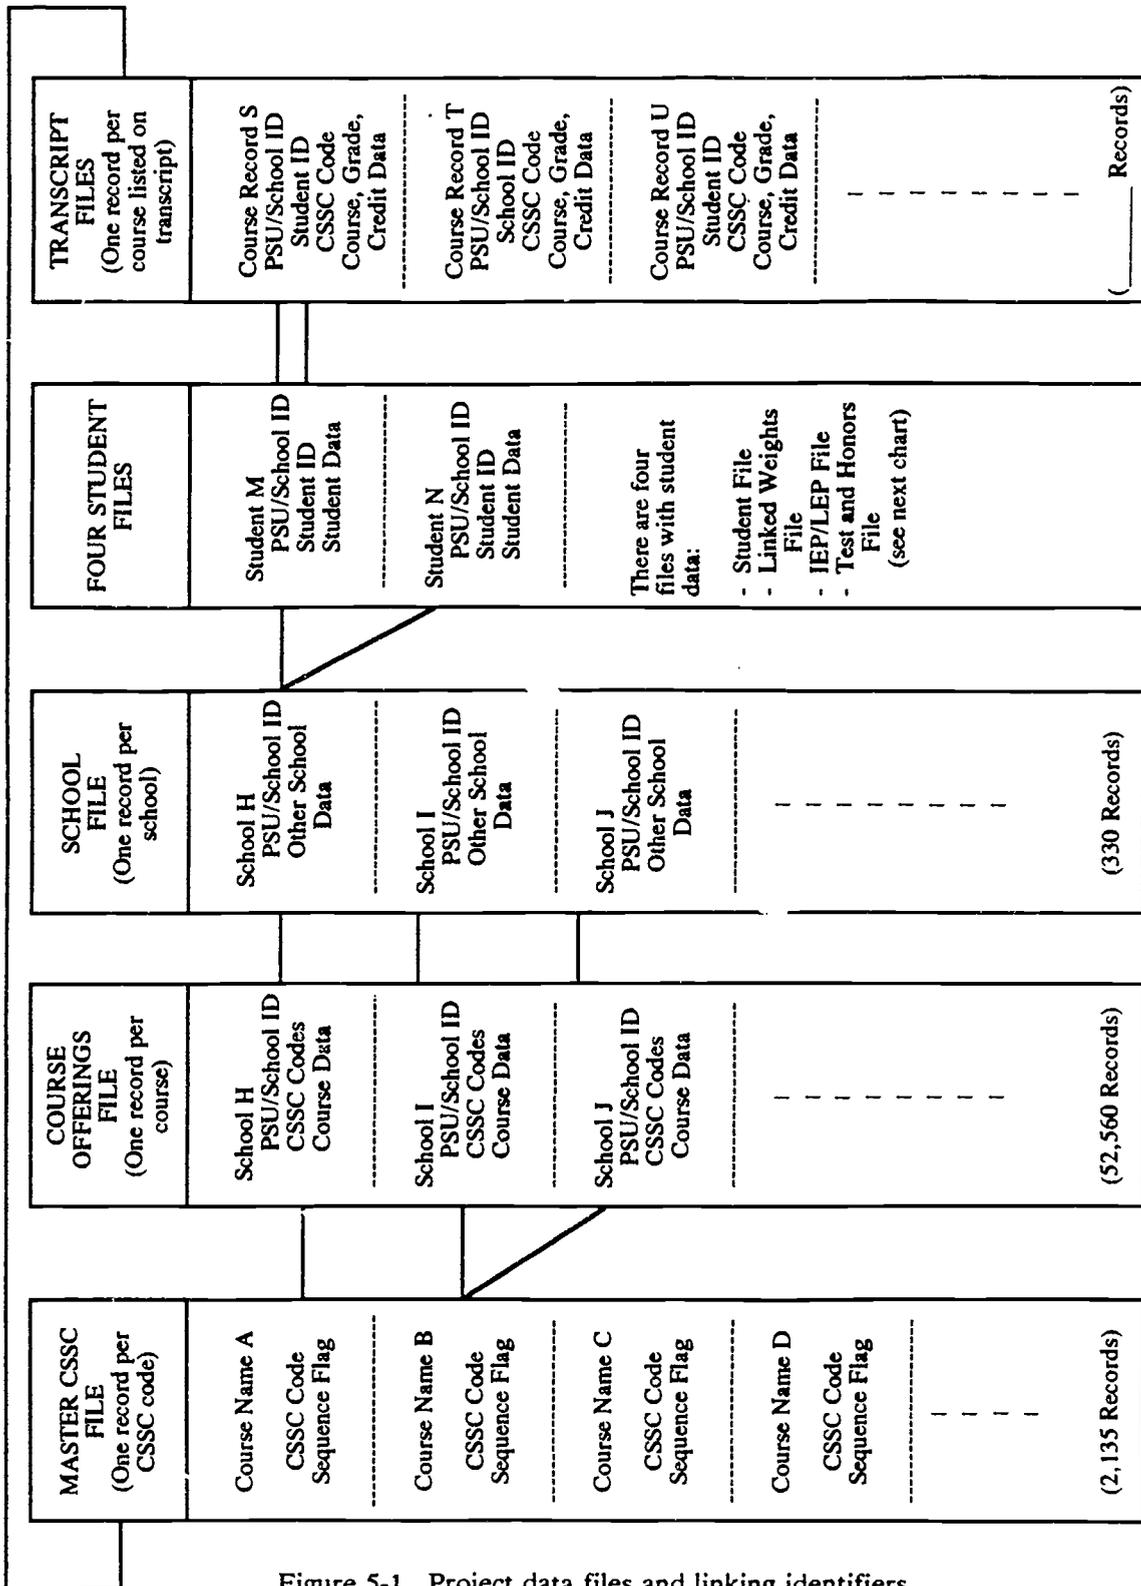

Figure 5-1. Project data files and linking identifiers

Figure 5-1. Project data files and linking identifiers

number. In addition to the original six-digit CSSC codes created in 1982, the file contains the codes added for the 1987 study and 18 additional codes added during the current study.

The new codes are documented in Appendix F of the Technical Report. These codes were added when courses were encountered on the transcripts that were clearly different from codes already contained in the CSSC. No new two-digit or four-digit categories were added during the 1990 transcript study.

A handicapped flag, an expansion to the CSSC initiated during the 1987 transcript study, was retained as part of the current version of the CSSC. When a course on a transcript was limited in enrollment to special education students, it was coded using the regular CSSC code with a special education indicator ("0" or "2")² added as the seventh digit. Any course not so limited has a "1" in the seventh digit.

Beginning with the 1990 transcript study, all CSSC entries have been coded with a sequence flag. A "0" value for the sequence flag indicates that the course is not part of an instructional sequence. A "1" indicates that the course is the first course in an instructional sequence, and a "2" indicates that the course is an advanced course in an instructional sequence (i.e., not the initial course in the sequence).

The CSSC Master File is organized by the CSSC code and contains four variables, the CSSC course code, the handicapped flag, the sequence flag, and the standard course title. A second version of the file which is suitable for printing with 80 characters per line is also included on the tape. This "print file" includes the CSSC course code, the handicapped flag, the standard course title, alternate titles, and course descriptions.

² The values of the seventh digit are as follows: 0 = a functional level course limited in enrollment to special education students; 1 = a regular course not limited in enrollment to special education students; 2 = a special education course not at the functional level, but limited in enrollment to special education students.

5.2 Course Offerings File

The Course Offerings File is organized by school and contains one record for each course listed in the school's course catalog or appearing on a student's transcript as a non-transfer course taken at that school. Each of the 52,563 records contains the PSU ID, school ID, course title, course CSSC code, the source of the catalog (e.g., generated from transcripts or from a school provided catalog) and 6 additional pieces of information about the course: (1) the location of the course (including various off-campus locations); (2) the language of instruction; (3) if it is a remedial or below-grade-level course; (4) if it is an honors-level course; (5) if the course was a combination course (i.e., composed of more than one part, requiring more than one CSSC code for accurate description); (6) if the course is part of an instructional sequence. The file is sorted by the PSU and school IDs.

The Course Offerings File is a complete listing of courses offered in all participating schools that provided us with school-level course catalogs. It contains all courses listed in the school-level course catalogs received and any non-transfer courses listed on the transcripts not otherwise appearing in the catalogs. For example, in a school with grades 10 through 12 whose students all take 9th grade in a junior high, the 9th-grade courses are not treated as transfer courses, but appear as if they were offered by the high school. This treatment provides a more balanced picture of the courses available to American students in 4 years of high school than would be provided by treating such courses as transfer courses. For the 75 schools from which we did not receive a catalog, the list of unique course titles appearing on the sampled transcripts is the only available source of course offering entries. A complete listing of all courses included on the transcripts can be extracted only from the Transcript File, since transfer courses do not appear in the Course Offerings File.

5.3 School File

The School File is sorted by PSU and school ID and contains one record for each of the 330 participating schools. School variables gathered during the Transcript Study are included as well as the school's responses to the NAEP School Characteristics and Policy Questionnaire (see Appendices K and L).

5.4 Student File

The Student File contains two records for each of the 21,531 graduated students for whom transcripts were obtained and coded.³ Students are identified by the combination of PSU, School, and Student ID variables, and the file is sorted by this group of variables and record number. The file contains the demographic information gathered for each student, sampling information, handicapped status, weights to be used in analysis, and replicate weights for variance estimation. The final student weight for each student is the variable "FINSTUWT." The component weights used to derive the final student weight are also included. In addition, the file contains a flag indicating whether or not the student has a handicap and a condition variable indicating the specific nature of the handicap when applicable.⁴ The file also contains a series of derived variables including one designating the student's academic track as academic, vocational, both, or neither, and summaries of the student's course taking record by major educational topic.

Note that this file contains a small number of unusual birth years (e.g., 1985, 1987, 1988). While these are undoubtedly not the actual birth years for these 1990 graduates, they are what was entered on the transcripts.

Also note that 96 students have final student weights (FINSTUWT) of zero. These are students receiving regular or honors diplomas (EXSTAT=1 or 2) whose transcripts do not have enough codeable courses to account for at least 75 percent of the Carnegie units required by their schools to graduate (i.e., GRREQFLG=4). In other words only transcripts fully documenting at least 3 years of high school received positive weights. There are 39 students with a GRREQFLG value of 4 who were given positive weights. Fifteen of these received special education diplomas and 24 received certificates of attendance.

³ The first record has 521 characters and the second has 512 characters. We separated the data in this way to facilitate use with systems or packages that have maximum record size constraints between 522 and 1010.

⁴ The values of the handicapping condition code are 0-not handicapped, 01-multihandicapped, 02-mentally retarded, 03-hard of hearing, 04-deaf, 05-speech-impaired, 06-visually handicapped/blind, 07-deaf/blind, 08-emotionally disturbed, 09-orthopedically impaired, 10-learning disabled, 11-other disability, and 99-not ascertained.

The weights included on the student file are for all students in the study, both those we can link to the NAEP assessment and those we cannot. Analyses of just the linked students must take into account a different set of nonresponse adjustments than the unlinked weights (see Appendix N). The appropriate weights to be used in such a linked analysis are contained in the Linked Weights File.

5.5 Linked Weights File

The Linked Weights File contains the set of weights needed to perform analyses on the subset of schools and students fully linked to the NAEP assessment. Because different sets of schools were eligible to participate in the NAEP and HSTS studies and because different sets of schools chose to participate in each, different school-level nonresponse adjustments need to be used when constructing weights. For similar reasons, different student-level nonresponse adjustments need to be used when constructing weights. Furthermore, since the main 1990 NAEP study consisted of four parallel sets of assessments (reading, regular mathematics, science, and mathematics estimation), separate sets of weights need to be used for each assessment. In addition, we have provided a separate set of weights for students who were excluded from the NAEP assessments on the basis of a handicap or limited English proficiency.

The Linked Weights file contains one record for each of the 13,744 graduates for whom we have NAEP booklet numbers. As in the Student File, students are identified by the combination of PSU, School, and Student ID variables. The file is sorted by these identifier variables. The first two digits of the student ID identify the assessment in which the student participated. Values between 01-07 indicate reading, 08-14, regular mathematics, 15-21 science, 25 math estimation. Excluded student IDs start with "71".⁵ For ease of use, this file also contains the demographic variables included on the Student File.

⁵ Two other sets of student ID prefixes appear on the Student File, but not the Linked Weights File. The prefix "72" was assigned to students who were absent from their assigned assessment. The prefix "99" is used for all non-linked students; that is, students in schools for whom a sample was drawn in the field for the transcript study.

5.6 IEP/LEP Questionnaire File

School special education staff members were asked to fill out a IEP/LEP Questionnaire for each handicapped student sampled for the study. The IEP/LEP Questionnaire File contains one record for each of 695 students, with data from these completed questionnaires. The file is sorted by PSU, School, and Student ID.

5.7 Tests and Honors File

The Tests and Honors File was originally designed to capture information on standardized test scores, honors, and disciplinary actions that appear on high school transcripts. Since none of the transcripts that we collected listed any disciplinary actions, we have renamed the file accordingly. Approximately one-third of the transcripts contained either standardized test scores or notations regarding honors and awards that students have received. The Tests and Honors file lists this information.

As in the Student File, students are identified by the combination of PSU, School, and Student ID variables. The file is sorted by these identifier variables. Each entry on a transcript is identified with a unique sequence number (unique within student). Entries are sorted by sequence number within student. Each entry also contains an indicator of the record type ("T" = test, "H" = honor), the month and year of the test or honor (if available), the semester (Fall or Spring, if available), and a 40 character description of the honor or the test. For most tests, we have also provided the test score. Although it was not always possible to provide meaningful entries for some test scores (e.g., some schools reported SRA tests with percentiles and some with scaled scores) and the subtests which are reported varied tremendously, we attempted to provide complete and consistent scores for the PSAT math and verbal subtests, the SAT math and verbal subtests, and five ACT subtests. The remaining test information is of interest in so far as it can be used to determine the distribution of test data being reported on high school transcripts. The file contains 47,738 records.

5.8 Transcript File

The Transcript File contains one record for each course appearing on the sampled students' transcripts. This is an extremely large file, containing 686,580 records. Courses are identified by PSU, School, Student ID, and course sequence number (within students). Variables for each course record include grade level when taken, school year when taken, course title, grade received (original and standardized), credit received (original and standardized), course CSSC code, if taught off campus, if taught in a language other than English, if it is a remedial or below-grade-level course, and if it is an honors course.

APPENDIX A
1990 HIGH SCHOOL TRANSCRIPT STUDY
TAPE DOCUMENTATION FOR PROJECT DATA FILES

The 1990 High School Transcript Study Tape is an IBM standard labeled tape in EBCDIC format at 6250 BPI. The VOLSER number is 117623. It contains the following files:

Label	DSN	DCB	Description
(1,SL)	SASSPSS.PROGRAMS	LRECL=80 BLKSIZE=3,600 RECFM=FB	Contains this list, JCL, SAS, and SPSS statements
(2,SL)	MASTER.CSSC	LRECL=133 BLKSIZE=14,896 RECFM=FB	The master file of CSSC codes
(3,SL)	COURSE.OFFERING	LRECL=113 BLKSIZE=14,916 RECFM=FB	The Course Offering File for all the schools
(4,SL)	SCHOOL.FINAL	LRECL=399 BLKSIZE=14,364 RECFM=FB	The School File
(5,SL)	STUDENT.FINAL	LRECL=521 BLKSIZE=14,588 RECFM=FB	The Student File
(6,SL)	LINKED.WEIGHTS	LRECL=828 BLKSIZE=14,904 RECFM=FB	The Linked Weights File
(7,SL)	IEPLEP.FINAL	LRECL=66 BLKSIZE=14,916 RECFM=FB	The IEP/LEP Questionnaire File
(8,SL)	TSTHON.FINAL	LRECL=68 BLKSIZE=14,960 RECFM=FB	The Test and Honors File
(9,SL)	TRANS.FINAL	LRECL=76 BLKSIZE=14,972 RECFM=FB	The Transcript File
(10,SL)	CSSC.TEXT	LRECL=80 BLKSIZE=14,880 RECFM=FB	The full text of the CSSC

The remainder of this file contains SAS and SPSS code for manipulating the files and the JCL needed to run the SAS and SPSS jobs. The comments in front of each section of code identify its function. You will need to add a job card to this JCL that satisfies the requirements at your facility. You may also need to modify the JCLLIB statement and the EXEC statement to satisfy the requirements at your facility.

All of the SAS programs appear first. They are followed by the SPSS programs. There are two SAS programs and one SPSS program for each of the data files on the tape. There are no programs for the CSSC.TEXT file which is not a data file per se, but the full text of the CSSC formatted for ease of printing. The programs for the MASTER.CSSC file are reproduced below. The other programs are similar in structure. To obtain a full listing of all the programs, print the file SAS_SPSS.PROGRAMS using your facility's print utility.

1990 HIGH SCHOOL TRANSCRIPT STUDY
SCHOOL FILE

HIGH SCHOOL TRANSCRIPT STUDY
 CODEBOOK FOR SCHOOL FILE
 JANUARY 19, 1993

<u>Question Name</u>	<u>Column Number(s)</u>	
PSU	001-003	<u>PRIMARY SAMPLING UNIT</u> 011-552 = PSU
SCHOOL	004-006	<u>SCHOOL ID (WITHIN PSU)</u> 301-351 = SCHOOL (WITHIN PSU) NOTE : BOTH PSU AND SCHOOL ID MUST BE COMBINED TO UNIQUELY IDENTIFY A SCHOOL WITHIN THE DATA FILE.
CATSRCE	007	<u>SOURCE OF CATALOG TITLES</u> 0 = COURSE LIST GENERATED FROM TRANSCRIPTS 1 = SCHOOL PROVIDED A SCHOOL-LEVEL CATALOG, A DISTRICT CATALOG, OR A COURSE LIST. NOTE : SEE VARIABLE CATTYPE.
CATTYPE	008	<u>TYPE OF CATALOG PROVIDED BY THE SCHOOL</u> 0 = NO MATERIALS AVAILABLE 1 = DISTRICT LEVEL COURSE CATALOG 2 = SCHOOL COURSE LIST 3 = SCHOOL COURSE CATALOG NOTE : A COURSE LIST DOES NOT INCLUDE DESCRIPTIVE INFORMATION REGARDING COURSE CONTENT. A COURSE CATALOG CONTAINS DESCRIPTIVE INFORMATION REGARDING COURSE CONTENT THAT WAS USED IN ASSIGNING CSSC CODES.
SDISP	009-011	<u>SCHOOL DISPOSITION CODE</u> REC = PARTICIPATED

Question Column
Name Number(s)

LINKED 012

SAMPLE TYPE

- 1 = NAEP FULLY LINKED
- 2 = HSTS ONLY
- 3 = NAEP, NOT LINKED

NOTE: IN SCHOOLS WHERE IT WAS POSSIBLE, STUDENTS WHO HAD PARTICIPATED IN OR HAD BEEN SELECTED FOR NAEP ASSESSMENT IN 1989-1990 CONSTITUTED THE SAMPLE; OTHERWISE A NEW SAMPLE OF STUDENTS WAS SELECTED WITHIN THE SCHOOL.

STATE 013-014

STATE CODE

- 01-54 = FIPS STATE NUMBER

STYPE 015

SCHOOL TYPE

- 1 = PUBLIC SCHOOL
- 2 = PRIVATE SCHOOL (OTHER THAN CATHOLIC)
- 3 = CATHOLIC SCHOOL
- 4 = BUREAU OF INDIAN AFFAIRS
- 5 = DEPARTMENT OF DEFENSE SCHOOL

URBAN 016

COMMUNITY TYPE

- 1 = BIG CITY
- 2 = URBAN FRINGE
- 3 = MEDIUM CITY
- 4 = SMALL PLACE

NOTE: COMMUNITY TYPE IS FROM NAEP YEAR 21 THE "DESCRIPTION OF COMMUNITY" VARIABLE.

SCPQ 017

SCHOOL QUEX SOURCE

- 1 = NAEP
- 2 = HSTS
- 9 = MISSING

Question Column
Name Number(s)

NUMTEACH 018-020

NUMBER OF TEACHERS

BLANK = MISSING
000-999 = NUMBER OF TEACHERS IN SCHOOL

NOTE: THE NUMBER OF TEACHERS IS FROM THE 1988 QUALITY EDUCATION DATA (QED). FOR SCHOOLS NOT FOUND IN THE QED THE 1988-1989 COMMON CORE OF DATA (CCD) VALUE WAS USED.

ENROLL 021-024

SCHOOL ENROLLMENT

BLANK = MISSING
0000-9999 = NUMBER OF STUDENTS

NOTE: SCHOOL ENROLLMENT IS FROM THE 1988 QED. FOR SCHOOLS NOT FOUND IN THE QED THE 1988-1989 CCD VALUE WAS USED.

GRADREQ 025-028

TOTAL NUMBER OF CREDITS (CARNEGIE UNITS) REQUIRED FOR GRADUATION IN THIS SCHOOL (FOR THE CLASS OF 1990)

BLANK = MISSING
0000-9999 = CREDITS (ADJUSTED TO THE EQUIVALENT OF CARNEGIE UNITS)

NOTE: IMPLIED DECIMAL BETWEEN POSITIONS 3 AND 4.

NONELCR 029-032

NUMBER OF SPECIFIED, NONELECTIVE CREDITS INCLUDED IN THE ABOVE (TOTAL NUMBER OF CREDITS THAT ARE SPECIFIED AS BEING IN SPECIFIC FIELDS)

BLANK = MISSING
0000-9999 = CREDITS (CARNEGIE UNITS)

NOTE: IMPLIED DECIMAL BETWEEN POSITIONS 3 AND 4.

REQ 033

DO THE ABOVE REQUIRMENTS APPLY TO:

1 = 4 YEARS OF HIGH SCHOOL
2 = 3 YEARS OF HIGH SCHOOL
9 = MISSING

<u>Question Name</u>	<u>Column Number(s)</u>	
COMPTEST	034	<p><u>IS THERE A STATE OR DISTRICT COMPETENCY TEST THAT IS REQUIRED FOR GRADUATION?</u></p> <p>1 = YES 2 = NO 9 = MISSING</p>
CLASSFLG	035	<p><u>WHEN GRADUATION REQUIREMENTS ARE NOT FOR THE CLASS OF 1990</u></p> <p>BLANK: = CLASS OF 1990</p> <p>NOTE: ALL GRADUATION REQUIREMENTS WERE FOR THE CLASS OF 1990.</p>
Q001	036	<p><u>WHAT IS YOUR GENDER? (1991 ITEM 110)</u></p> <p>1 = MALE 2 = FEMALE 8 = NO RESPONSE 9 = MULTIPLE RESPONSE</p> <p>NOTE: THIS AND THE FOLLOWING ITEMS ARE FROM THE SCHOOL CHARACTERISTICS AND POLICIES QUESTIONNAIRE (SCPQ). ITEMS STARTING WITH "Q" ARE FROM THE 1990 VERSION OF THE SCPQ OR APPEAR IN BOTH THE 1990 AND 1991 VERSIONS. ITEMS ONLY IN THE 1990 SCPQ ARE INDICATED BY "(1990 ONLY)." ITEMS IN BOTH SCPQS INCLUDE A REFERENCE TO THE 1991 ITEM NUMBER. ITEMS BEGINNING WITH AN "_Q" ARE FROM THE 1991 VERSION OF THE SCPQ AND DO NOT APPEAR IN THE 1990 VERSION.</p>
Q002	037	<p><u>WHICH BEST DESCRIBES YOU? (1991 ITEM 111)</u></p> <p>1 = WHITE (NOT OF HISPANIC ORIGIN) 2 = BLACK (NOT OF HISPANIC ORIGIN) 3 = HISPANIC, REGARDLESS OF RACE 4 = ASIAN OR PACIFIC ISLANDER 5 = AMERICAN INDIAN OR ALASKAN NATIVE 6 = OTHER 8 = NO RESPONSE 9 = MULTIPLE RESPONSE</p>

<u>Question Name</u>	<u>Column Number(s)</u>	
_Q112	038	<p><u>IF YOU ARE HISPANIC, WHAT IS YOUR HISPANIC BACKGROUND?</u></p> <p>1 ▪ I AM NOT HISPANIC</p> <p>2 ▪ MEXICAN, MEXICAN AMERICAN, OR CHICANO</p> <p>3 ▪ PUERTO RICAN</p> <p>4 ▪ CUBAN</p> <p>5 ▪ OTHER SPANISH OR HISPANIC BACKGROUND</p> <p>8 ▪ NO RESPONSE</p> <p>9 ▪ MULTIPLE RESPONSE</p>
Q003	039-040	<p><u>COUNTING THIS YEAR, HOW MANY TOTAL YEARS OF SCHOOL ADMINISTRATION EXPERIENCE DO YOU HAVE? (1991 ITEM 113)</u></p> <p>00-99 ▪ YEARS</p> <p>BLANK ▪ NO RESPONSE</p>
Q004	041	<p><u>WHAT IS THE HIGHEST ACADEMIC DEGREE YOU HOLD? (1991 ITEM 114)</u></p> <p>1 ▪ HIGH SCHOOL DIPLOMA</p> <p>2 ▪ ASSOCIATE DEGREE/VOCATIONAL CERTIFICATION</p> <p>3 ▪ BACHELOR'S DEGREE</p> <p>4 ▪ MASTER'S DEGREE</p> <p>5 ▪ EDUCATION SPECIALIST'S OR PROFESSIONAL DIPLOMA BASED ON AT LEAST ONE YEAR'S WORK PAST MASTER'S DEGREE LEVEL</p> <p>6 ▪ DOCTORATE</p> <p>7 ▪ PROFESSIONAL DEGREE (e.g. M.D., L.L.B., J.D., D.D.S.)</p> <p>8 ▪ NO RESPONSE</p> <p>9 ▪ MULTIPLE RESPONSE</p>
_Q115	042	<p><u>IN WHAT FIELD IS YOUR HIGHEST DEGREE?</u></p> <p>1 ▪ EDUCATIONAL ADMINISTRATION</p> <p>2 ▪ CURRICULUM AND INSTRUCTION</p> <p>3 ▪ OTHER EDUCATIONAL FIELD (e.g. MATHEMATICS EDUCATION, GUIDANCE, SPECIAL EDUCATION)</p> <p>4 ▪ A SUBJECT OTHER THAN EDUCATION (e.g. MATHEMATICS, ENGLISH, BUSINESS)</p> <p>5 ▪ OTHER</p> <p>8 ▪ NO RESPONSE</p> <p>9 ▪ MULTIPLE RESPONSE</p>

<u>Question Name</u>	<u>Column Number(s)</u>	
_Q1150	043-044	<u>OTHER HIGHEST DEGREE - SPECIFY</u> 01 = PHILOSOPHY 02 = INSTITUTIONAL MANAGEMENT 88 = NO RESPONSE
Q005	045	<u>DO YOU HAVE A MASTER'S AND/OR DOCTORATE IN EDUCATIONAL ADMINISTRATION? (1990 ONLY)</u> 1 = YES 2 = NO 8 = NO RESPONSE 9 = MULTIPLE RESPONSE
Q006	046-048	<u>HOW MANY DAYS ARE IN YOUR SCHOOL YEAR FOR STUDENTS IN THIS SAMPLE? (AGE 17 AND GRADE 12) (1991 ITEM 116)</u> 000-999 = DAYS BLANK = NO RESPONSE
Q007	049-052	<u>HOW LONG IS THE SCHOOL DAY? (1991 ITEM 117)</u> 0000-2359 = HOURS PLUS MINUTES BLANK = NO RESPONSE
Q008	053-055	<u>DURING HOW MUCH OF THE SCHOOL DAY ARE STUDENTS IN CLASSES OF SOME KIND? EXCLUDE HOMEROOM, LUNCH, RECESS, TIME SPENT CHANGING CLASSES AND STUDY HALL (1991 ITEM 118)</u> 000-959 = HOURS PLUS MINUTES BLANK = NO RESPONSE
Q009	056-059	<u>AS OF OCTOBER 1, 1989 (OR THE NEAREST DATE FOR WHICH DATA ARE AVAILABLE) WHAT WAS THE TOTAL STUDENT ENROLLMENT IN YOUR SCHOOL? (1990 ONLY)</u> 0000-9999 = NUMBER OF STUDENTS BLANK = NO RESPONSE

<u>Question Name</u>	<u>Column Number(s)</u>	
Q010	060-061	<p>ON THE AVERAGE, WHAT PERCENTAGE OF YOUR STUDENTS IS ABSENT ON A GIVEN DAY? INCLUDE EXCUSED AND UNEXCUSED ABSENCES IN CALCULATING THIS RATE. (1991 ITEM 119)</p> <p>00-99 = PERCENTAGE OF STUDENTS BLANK = NO RESPONSE</p>
Q011	062-064	<p>ABOUT WHAT PERCENTAGE OF THE STUDENTS WHO ARE ENROLLED AT THE BEGINNING OF THE SCHOOL YEAR IS STILL ENROLLED AT THE END OF THE SCHOOL YEAR? (EXCLUDE STUDENTS WHO TRANSFER INTO THE SCHOOL DURING THE SCHOOL YEAR IN CALCULATING THIS RATE). (1991 ITEM 120)</p> <p>000-100 = PERCENTAGE OF STUDENTS ENROLLED BLANK = NO RESPONSE</p>
Q012	065-067	<p>HOW MANY INDIVIDUALS ARE ON THE TEACHING STAFF? (1990 ONLY)</p> <p>000-999 = NUMBER OF TEACHERS BLANK = NO RESPONSE</p> <p>NOTE: REFERS TO FULL TIME STAFF PROVIDING AT LEAST 75% OF THEIR TIME IN A CLASSROOM.</p>
_Q121	068-070	<p>HOW MANY FULL TIME INDIVIDUALS ARE ON THE TEACHING STAFF?</p> <p>000-999 = NUMBER OF TEACHERS BLANK = NO RESPONSE</p> <p>NOTE: REFERS TO FULL TIME STAFF PROVIDING AT LEAST 50% OF THEIR TIME IN A CLASSROOM.</p>
Q013A	071-073	<p>HOW MANY OF THE TEACHING STAFF ARE AMERICAN INDIAN OR ALASKAN NATIVE? (1990 ONLY)</p> <p>000-999 = NUMBER OF TEACHERS BLANK = NO RESPONSE</p> <p>NOTE: REFERS TO FULL TIME STAFF PROVIDING AT LEAST 75% OF THEIR TIME IN A CLASSROOM.</p>

<u>Question Name</u>	<u>Column Number(s)</u>	
QO13B	074-076	<p>HOW MANY OF THE TEACHING STAFF ARE ASIAN OR PACIFIC ISLANDER? (1990 ONLY)</p> <p>OOO-999 = NUMBER OF TEACHERS BLANK = NO RESPONSE</p> <p>NOTE: REFERS TO FULL TIME STAFF PROVIDING AT LEAST 75% OF THEIR TIME IN A CLASSROOM.</p>
QO13C	077-079	<p>HOW MANY OF THE TEACHING STAFF ARE HISPANIC, REGARDLESS OF RACE? (1990 ONLY)</p> <p>OOO-999 = NUMBER OF TEACHERS BLANK = NO RESPONSE</p> <p>NOTE: REFERS TO FULL TIME STAFF PROVIDING AT LEAST 75% OF THEIR TIME IN A CLASSROOM.</p>
QO13D	080-082	<p>HOW MANY OF THE TEACHING STAFF ARE BLACK (NOT OF HISPANIC ORIGIN)? (1990 ONLY)</p> <p>OOO-999 = NUMBER OF TEACHERS BLANK = NO RESPONSE</p> <p>NOTE: REFERS TO FULL TIME STAFF PROVIDING AT LEAST 75% OF THEIR TIME IN A CLASSROOM.</p>
QO13E	083-085	<p>HOW MANY OF THE TEACHING STAFF ARE WHITE (NOT OF HISPANIC ORIGIN)? (1990 ONLY)</p> <p>OOO-999 = NUMBER OF TEACHERS BLANK = NO RESPONSE</p> <p>NOTE: REFERS TO FULL TIME STAFF PROVIDING AT LEAST 75% OF THEIR TIME IN A CLASSROOM.</p>
QO14	086-088	<p>HOW MANY OF TEACHING STAFF ARE FEMALE? (1990 ONLY)</p> <p>OOO-999 = NUMBER OF TEACHERS BLANK = NO RESPONSE</p> <p>NOTE: REFERS TO FULL TIME STAFF PROVIDING AT LEAST 75% OF THEIR TIME IN A CLASSROOM.</p>

Question Column
Name Number(s)

Q015 089-090 ON THE AVERAGE, HOW MANY OF THE TEACHING STAFF
ARE ABSENT ON ANY GIVEN DAY IN YOUR SCHOOL?
(1990 ONLY)

00-99 = NUMBER OF TEACHERS
BLANK = NO RESPONSE

NOTE: REFERS TO FULL TIME STAFF PROVIDING AT
LEAST 75% OF THEIR TIME IN A CLASSROOM.

_Q122 091-093 ON THE AVERAGE, HOW MANY OF THE FULL TIME
TEACHING STAFF IN YOUR SCHOOL ARE ABSENT ON A
GIVEN DAY?

000-999 * NUMBER OF TEACHERS
BLANK = NO RESPONSE

NOTE: REFERS TO FULL TIME STAFF PROVIDING AT
LEAST 50% OF THEIR TIME IN A CLASSROOM.

_Q123 094-096 WHAT PERCENT OF THE FULL TIME TEACHERS AT THE
END OF THE 1989 - 90 SCHOOL YEAR IS NO LONGER
AT THE SCHOOL FOR REASONS OTHER THAN DEATH OR
RETIREMENT?

000-999 * PERCENTAGE OF TEACHERS
BLANK * NO RESPONSE

NOTE: REFERS TO FULL TIME STAFF PROVIDING AT
LEAST 50% OF THEIR TIME IN A CLASSROOM.

Q016 097-099 WHAT PERCENTAGE OF THE TEACHING STAFF HAS
TAUGHT AT THIS OR ANY OTHER SCHOOL FOR LESS
THAN 3 YEARS? (1990 ONLY)

000-100 = PERCENTAGE OF TEACHERS
BLANK = NO RESPONSE

NOTE: REFERS TO FULL TIME STAFF PROVIDING AT
LEAST 75% OF THEIR TIME IN A CLASSROOM.

<u>Question Name</u>	<u>Column Number(s)</u>	
Q017	100-102	<p>WHAT PERCENTAGE OF THE TEACHING STAFF HAS TAUGHT AT THIS OR ANY OTHER SCHOOL FOR 3 TO 6 YEARS? <u>(1990 ONLY)</u></p> <p>000-100 = PERCENTAGE OF TEACHERS BLANK = NO RESPONSE</p> <p>NOTE: REFERS TO FULL TIME STAFF PROVIDING AT LEAST 75% OF THEIR TIME IN A CLASSROOM.</p>
Q018	103-105	<p>WHAT PERCENTAGE OF THE TEACHING STAFF HAS TAUGHT AT THIS OR ANY OTHER SCHOOL FOR 7 TO 9 YEARS? <u>(1990 ONLY)</u></p> <p>000-100 = PERCENTAGE OF TEACHERS BLANK = NO RESPONSE</p> <p>NOTE: REFERS TO FULL TIME STAFF PROVIDING AT LEAST 75% OF THEIR TIME IN A CLASSROOM.</p>
Q019	106-108	<p>WHAT PERCENTAGE OF THE TEACHING STAFF HAS TAUGHT AT THIS OR ANY OTHER SCHOOL FOR 10 OR MORE YEARS? <u>(1990 ONLY)</u></p> <p>000-100 = PERCENTAGE OF TEACHERS BLANK = NO RESPONSE</p> <p>NOTE: REFERS TO FULL TIME STAFF PROVIDING AT LEAST 75% OF THEIR TIME IN A CLASSROOM.</p>
Q020	109	<p>ARE 12TH GRADERS TYPICALLY ASSIGNED TO CLASSES BY ABILITY AND/OR ACHIEVEMENT LEVELS IN ENGLISH? <u>(1991 ITEM 3)</u></p> <p>1 = YES 2 = NO 8 = NO RESPONSE 9 = MULTIPLE RESPONSE</p>
Q021	110	<p>ARE 12TH GRADERS TYPICALLY ASSIGNED TO CLASSES BY ABILITY AND/OR ACHIEVEMENT LEVELS IN MATH? <u>(1991 ITEM 4)</u></p> <p>1 = YES 2 = NO 8 = NO RESPONSE 9 = MULTIPLE RESPONSE</p>

<u>Question Name</u>	<u>Column Number(s)</u>	
Q022	111	<p>ARE 12TH GRADERS TYPICALLY ASSIGNED TO CLASSES BY ABILITY AND/OR ACHIEVEMENT LEVELS IN <u>SCIENCE? (1990 ONLY)</u></p> <p>1 ▪ YES 2 ▪ NO 8 ▪ NO RESPONSE 9 ▪ MULTIPLE RESPONSE</p>
Q023	112	<p>ARE 12TH GRADERS TYPICALLY ASSIGNED TO CLASSES BY ABILITY AND/OR ACHIEVEMENT LEVELS IN <u>SOCIAL STUDIES/HISTORY/GEOGRAPHY? (1990 ONLY)</u></p> <p>1 ▪ YES 2 ▪ NO 8 ▪ NO RESPONSE 9 ▪ MULTIPLE RESPONSE</p>
Q024	113-114	<p>BEGINNING WITH 9TH GRADE, HOW MANY SEMESTERS (OR EQUIVALENT) OF COURSE WORK DOES YOUR SCHOOL OR DISTRICT REQUIRE OF EACH STUDENT FOR GRADUATION FROM 12TH GRADE IN ENGLISH? (1991 <u>ITEM 9</u>)</p> <p>01 ▪ NONE 02 ▪ 1 03 ▪ 2 04 ▪ 3 05 ▪ 4 06 ▪ 5 07 ▪ 6 08 ▪ 7 09 ▪ 8 88 ▪ NO RESPONSE 99 ▪ MULTIPLE RESPONSE</p>

APPENDIX E
1990 HIGH SCHOOL TRANSCRIPT STUDY
STUDENT FILE

HIGH SCHOOL TRANSCRIPT STUDY
 CODEBOOK FOR STUDENT FILE
 JANUARY 19, 1993

<u>Question Name</u>	<u>Column Number(s)</u>	
PSU	001-003	<u>PRIMARY SAMPLING UNIT</u> 011-552 = PSU
SCHOOL	004-006	<u>SCHOOL ID (WITHIN PSU)</u> 301-351 = SCHOOL (WITHIN PSU)
NOTE : BOTH PSU AND SCHOOL ID MUST BE COMBINED TO UNIQUELY IDENTIFY A SCHOOL WITHIN THE DATA FILE.		
STUDENT	007-014	<u>STUDENT ID (WITHIN SCHOOL)</u> 01700251-72387874 = STUDENT ID (NAEP BOOKLET NUMBER) 99000101-99037545 = STUDENT ID (STUDENT NOT LINKED TO NAEP)
NOTE : PSU, SCHOOL ID, AND STUDENT ID MUST BE COMBINED TO UNIQUELY IDENTIFY A STUDENT WITHIN THE DATA FILE. ID'S BEGINNING WITH NUMBERS LESS THAN 9, REPRESENT THE NAEP BOOKLET NUMBERS USED BY THESE STUDENTS. ID'S BEGINNING WITH 990 ARE STUDENTS FOR WHOM NO NAEP BOOKLET NUMBER IS AVAILABLE. MOST OF THESE STUDENTS COME FROM SCHOOLS WHICH DID NOT PARTICIPATE IN NAEP. THE REMAINDER ARE FOR STUDENTS AT NAEP SCHOOLS FOR WHICH A NEW SAMPLE WAS DRAWN FOR THE TRANSCRIPT STUDY.		
FIL1	015	<u>FILLER ALWAYS BLANK</u>
REC1	016	<u>RECORD NUMBER</u> 1 = RECORD 1
EXSTAT	017	<u>STUDENT EXIT STATUS</u> 1 = STANDARD DIPLOMA 2 = HONORS DIPLOMA 3 = DIPLOMA WITH SPECIAL EDUCATION ADJUSTMENTS 4 = CERTIFICATE OF ATTENDANCE BLANK = MISSING

Question Column
Name Number(s)

HCFLAG 026 STUDENT HANDICAPPED STATUS

1	= NOT HANDICAPPED
2	= HANDICAPPED

NOTE : HCFLAG IS BASED ON A DETERMINATION OF WHETHER THE STUDENT IS HANDICAPPED AND IN A SPECIAL EDUCATION PROGRAM, USING THE BEST INFORMATION AVAILABLE.

HCTYPE 027-028 HANDICAPPING CONDITION

01	= MULTIHANDICAPPED
02	= MENTALLY RETARDED
03	= HARD OF HEARING
04	= DEAF
05	= SPEECH - IMPAIRED
06	= VISUALLY HANDICAPPED/BLIND
07	= DEAF/BLIND
08	= EMOTIONALLY DISTURBED
09	= ORTHOPEDICALLY IMPAIRED
10	= LEARNING DISABLED
11	= OTHER
99	= MISSING
BLANK	= NO IEP/LEP QUESTIONNAIRE

NOTE : THIS VARIABLE WAS OBTAINED THROUGH THE SPECIAL EDUCATION STUDENT QUESTIONNAIRE, COMPLETED BY SCHOOL PERSONNEL.

FILL1 029 FILLER ONE

PSU_WGT 030-041 PSU WEIGHT

GRREQFLG 512

GRADUATION REQUIREMENTS LEVEL FLAG

- | | |
|---|---|
| 1 | = CARNEGIE UNITS >= SCHOOL REQUIREMENTS |
| 2 | = CARNEGIE UNITS > 75%, BUT LESS THAN 100% OF SCHOOL REQUIREMENTS |
| 3 | = CARNEGIE UNITS = 75% OF SCHOOL REQUIREMENTS |
| 4 | = CARNEGIE UNITS < 75% OF SCHOOL REQUIREMENTS |

NOTE : THIS FLAG PROVIDES AN INDICATION OF HOW THE TOTAL CREDITS ON A STUDENT'S TRANSCRIPT COMPARE TO THE SCHOOL'S GRADUATION REQUIREMENTS. TO CONSTRUCT THIS VARIABLE, ALL COURSE CARNEGIE UNITS FOR A STUDENT WERE TOTALED EXCEPT THOSE CODED AS UNSPECIFIED TRANSFER CREDITS (CSSC CODE OF 600001). THIS TOTAL WAS COMPARED TO THE SCHOOL'S CARNEGIE UNITS REQUIRED FOR GRADUATION.

NOTE : TRANSCRIPTS OF GRADUATES WITH GRREQFLG = 4 PROBABLY DO NOT LIST A SUBSTANTIAL NUMBER OF COURSE TITLES FOR WHICH THE STUDENT RECEIVED CREDIT. SUCH TRANSCRIPTS WERE TREATED AS MISSING FOR PURPOSES OF DETERMINING THE NON-RESPONSE ADJUSTMENT FACTOR. THE FINAL STUDENT WEIGHT (FINSWGT) HAS BEEN SET TO ZERO (0) FOR STUDENTS WITH GRREQFLG = 4.

STUB DEFINITIONS

The Student File contains a set of variables called "Stubs" which summarize each student's course taking in a number of subject area categories. The lists which follow indicate which CSSC codes are in each subject-area category used in the 1990 High School Transcript Study. These are the same categories as used in the 1987 transcript study and in the Nation At Risk Update Study tables. Note that the categories are hierarchical in nature. That is, codes in a subcategory are also in the appropriate higher-order category. For example, "AP/Honors English 12" is included in "English 12" and in "English." However, codes in a higher-order category are not necessarily also in a subcategory. The hierarchical outline presented below indicates the categories and subcategories. The numerical coding lists, which provide an exhaustive list of each code in each category, are presented in the same order as the outline. Codes that were not used in the 1990 study, but were included in previous studies are listed for the sake of completeness but are labeled "UNUSED CODE."

There are two types of stubs, those which contain the sum of the Carnegie units that a student earned in all the courses represented by the stub and those which indicate whether the sum of the Carnegie units that a student earned meets or exceeds a specified minimum. In the lists that follow, the name of the variable representing each stub is followed by the stub label (which is used in the tables in *The 1990 High School Transcript Study Tabulations*). We have added an asterisk to the stub labels to indicate stubs that represent sums of credits rather than minimum requirements.

APPENDIX F
1990 HIGH SCHOOL TRANSCRIPT STUDY
LINKED WEIGHTS FILE

HIGH SCHOOL TRANSCRIPT STUDY
CODEBOOK FOR LINKED WEIGHTS FILE
JANUARY 19, 1993

<u>Question Name</u>	<u>Column Number(s)</u>	
PSU	001-003	<u>PRIMARY SAMPLING UNIT</u> 011-552 = PSU
SCHOOL	004-006	<u>SCHOOL ID (WITHIN PSU)</u> 301-351 = SCHOOL (WITHIN PSU)
NOTE : BOTH PSU AND SCHOOL ID MUST BE COMBINED TO UNIQUELY IDENTIFY A SCHOOL WITHIN THE DATA FILE.		
STUDENT	007-014	<u>STUDENT ID (WITHIN SCHOOL)</u> 01700251-72387874 = STUDENT ID (NAEP BOOKLET NUMBER) 99000101-99037545 = STUDENT ID (STUDENT NOT LINKED TO NAEP)
NOTE : PSU, SCHOOL ID, AND STUDENT ID MUST BE COMBINED TO UNIQUELY IDENTIFY A STUDENT WITHIN THE DATA FILE. ID'S BEGINNING WITH NUMBERS LESS THAN 9, REPRESENT THE NAEP BOOKLET NUMBERS USED BY THESE STUDENTS. ID'S BEGINNING WITH 990 ARE STUDENTS FOR WHOM NO NAEP BOOKLET NUMBER IS AVAILABLE. MOST OF THESE STUDENTS COME FROM SCHOOLS WHICH DID NOT PARTICIPATE IN NAEP. THE REMAINDER ARE FOR STUDENTS AT NAEP SCHOOLS FOR WHICH A NEW SAMPLE WAS DRAWN FOR THE TRANSCRIPT STUDY.		
FIL1	015	<u>ALWA'S BLANK</u>
EXSTAT	016	<u>STUDENT EXIT STATUS</u> 1 = STANDARD DIPLOMA 2 = HONORS DIPLOMA 3 = DIPLOMA WITH SPECIAL EDUCATION ADJUSTMENTS 4 = CERTIFICATE OF ATTENDANCE BLANK = MISSING

Question Column
Name Number(s)

DRVDRACE 017

STUDENT RACE/ETHNICITY

1 = WHITE (NOT HISPANIC)
2 = BLACK (NOT HISPANIC)
3 = HISPANIC (MEXICAN, MEXICAN
 -AMERICAN, CHICANO, PUERTO
 RICAN, CUBAN, OTHER SPANISH OR
 HISPANIC DESCENT)
4 = ASIAN OR PACIFIC ISLANDER
5 = AMERICAN INDIAN OR ALASKAN
 NATIVE
6 = OTHER
BLANK = MISSING

GRADE 018-019

STUDENT GRADE LEVEL IN 1989-90

12 = TWELFTH GRADE
BLANK = MISSING

NOTE : GRADE THE STUDENT WAS IN DURING THE
1989-90 SCHOOL YEAR.

SEX 020

STUDENT GENDER

1 = MALE
2 = FEMALE
BLANK = MISSING

BIRTHMO 021-022

STUDENT MONTH BORN

01-12 = MONTH BORN
BLANK = MISSING

BIRTHYR 023-024

STUDENT YEAR BORN

15-18 = YEAR BORN
BLANK = MISSING

Question Column
Name Number(s)

HCFLAG 025 STUDENT HANDICAPPED STATUS

1 = NOT HANDICAPPED
2 = HANDICAPPED

NOTE : HCFLAG IS BASED ON A DETERMINATION OF WHETHER THE STUDENT IS HANDICAPPED AND IN A SPECIAL EDUCATION PROGRAM, USING THE BEST INFORMATION AVAILABLE.

HCTYPE 026-027 HANDICAPPING CONDITION

01 = MULTIHANDICAPPED
02 = MENTALLY RETARDED
03 = HARD OF HEARING
04 = DEAF
05 = SPEECH - IMPAIRED
06 = VISUALLY HANDICAPPED/BLIND
07 = DEAF/BLIND
08 = EMOTIONALLY DISTURBED
09 = ORTHOPEDICALLY IMPAIRED
10 = LEARNING DISABLED
11 = OTHER
99 = MISSING
BLANK = NO IEP/LEP QUESTIONNAIRE

NOTE : THIS VARIABLE WAS OBTAINED THROUGH THE SPECIAL EDUCATION STUDENT QUESTIONNAIRE, COMPLETED BY SCHOOL PERSONNEL.

PSU_WGT 028-039 PSU WEIGHT

000000000000-
999999999999 = WEIGHT

NOTE : IMPLIED DECIMAL POINT BETWEEN POSITIONS 6 AND 7.

SCHWGTR 040-051 SCHOOL WEIGHT, CONDITIONAL ON PSU

000000000000-
999999999999 = WEIGHT

NOTE : IMPLIED DECIMAL POINT BETWEEN POSITIONS 6 AND 7.

<u>Question Name</u>	<u>Column Number(s)</u>	
SESSWT	052-063	<p>SESSION ALLOCATION WEIGHT, CONDITIONAL ON <u>SCHOOL</u></p> <p>000000000000- 999999999999 * WEIGHT</p> <p>NOTE : IMPLIED DECIMAL POINT BETWEEN POSITIONS 6 AND 7.</p>
STUSCHW	064-075	<p><u>STUDENT WEIGHT, CONDITIONAL ON SESSION/SCHOOL</u></p> <p>000000000000- 999999999999 * WEIGHT</p> <p>NOTE : IMPLIED DECIMAL POINT BETWEEN POSITIONS 6 AND 7.</p>
SCHNRA0J	076-087	<p><u>SCHOOL NONRESPONSE ADJUSTMENT FACTOR</u></p> <p>000000000000- 999999999999 * WEIGHT</p> <p>NOTE : IMPLIED DECIMAL POINT BETWEEN POSITIONS 6 AND 7.</p>
STNNRF	088-099	<p><u>STUDENT NAEP NONRESPONSE ADJUSTMENT FACTOR</u></p> <p>000000000000- 999999999999 * WEIGHT</p> <p>NOTE : IMPLIED DECIMAL POINT BETWEEN POSITIONS 6 AND 7.</p>
PSAF	100-111	<p><u>POSTSTRATIFICATION ADJUSTMENT FACTOR</u></p> <p>000000000000- 999999999999 * WEIGHT</p> <p>NOTE : IMPLIED DECIMAL POINT BETWEEN POSITIONS 6 AND 7.</p>

<u>Question Name</u>	<u>Column Number(s)</u>	
STHNR	112-123	<u>STUDENT HSTS NONRESPONSE ADJUSTMENT FACTOR</u> 000000000000- 999999999999 = WEIGHT NOTE : IMPLIED DECIMAL POINT BETWEEN POSITIONS 6 AND 7.
FINSTUW	124-135	<u>FINAL USABLE LINKED STUDENT WEIGHT</u> 000000000000- 999999999999 = WEIGHT NOTE : IMPLIED DECIMAL POINT BETWEEN POSITIONS 6 AND 7.
REPWT1	136-147	<u>JACKKNIFE REPLICATE WEIGHT1</u> 000000000000- 999999999999 = WEIGHT NOTE : IMPLIED DECIMAL POINT BETWEEN POSITIONS 6 AND 7.
REPWT2	148-159	<u>JACKKNIFE REPLICATE WEIGHT2</u> 000000000000- 999999999999 = WEIGHT NOTE : IMPLIED DECIMAL POINT BETWEEN POSITIONS 6 AND 7.

HCFLAG	026
--------	-----

STUDENT HANDICAPPED STATUS

1	= NOT HANDICAPPED
2	= HANDICAPPED

NOTE : HCFLAG IS BASED ON A DETERMINATION OF WHETHER THE STUDENT IS HANDICAPPED AND IN A SPECIAL EDUCATION PROGRAM, USING THE BEST INFORMATION AVAILABLE. IF Q01 = 1, THEN THE HCFLAG WAS SET TO 2 (HANDICAPPED). IF Q02 = 0 AND AT LEAST ONE ITEM IN THE "STUDENT WITH A DISABILITY" SECTION (Q6 - Q15) WAS COMPLETED, THEN THE HCFLAG WAS SET TO 2 (HANDICAPPED).

NOTE : COURSE GRADES REPORTED BY SCHOOLS AS NUMERIC OR AS A SET OF DIFFERENT CODES HAVE BEEN STANDARDIZED ONTO THE ABOVE SCALE.

RAWCRED 053-057 COURSE CREDITS EARNED (AS ON TRANSCRIPT)

0-68000	= CREDITS EARNED
BLANK	= ZERO CREDITS EARNED

NOTE : LEFT JUSTIFIED. IMPLIED PERIOD BETWEEN POSITIONS 2 AND 3.

NOTE : WHEN CREDITS REPORTED ON THE TRANSCRIPT WERE NOT NUMERIC, THEY WERE CONVERTED TO NUMERIC VALUES. FOR EXAMPLE, "NC" WAS CHANGED TO "0".

Question Column
Name Number(s)

CRSECARN 058-062

COURSE CARNEGIE UNITS

0-17500 = CARNEGIE UNITS

NOTE : 1000 = 1 CARNEGIE UNIT

NOTE : CREDITS FROM EACH SCHOOL WERE MULTIPLIED BY A SCHOOL - SPECIFIC CONVERSION FACTOR. FOR EACH SCHOOL, THE REPORTED CREDIT VALUE REFLECTING ONE CLASS PERIOD FOR ONE SCHOOL YEAR OF CONTACT TIME WAS DETERMINED. THE CONVERSION FACTOR IS THAT VALUE WHICH, WHEN MULTIPLIED BY THE CREDIT VALUE, YIELDS A VALUE OF 1000.

NOTE : LARGE CARNEGIE CREDIT VALUES SUCH AS 17.500 OCCUR WHEN A TRANSCRIPT COMBINES ALL TRANSFERRED CREDITS INTO ONE ENTRY.

APPENDIX J
1990 HIGH SCHOOL TRANSCRIPT STUDY
CSSC TEXT FILE -- PRINT FILE VERSION

**HIGH SCHOOL TRANSCRIPT STUDY
CODEBOOK FOR CSSC TEXT FILE
DECEMBER 9, 1992**

All records in the CSSC Text File occupy columns 1-80. The file is arranged so that it can be printed on any standard printer which can process 80-column wide text. No page control characters or page numbers are included in the file.

A CSSC entry has four distinct parts:

1) The CSSC code:

a) The first 6 digits are the original CSSC code.

b) The seventh digit is the handicapped code:

0 = A functional level code limited in enrollment to special education students

1 = A regular course not limited to special education students.

NOTE: In order to improve readability, for codes less than 540000, the "1" is omitted.

2 = A special education course not at the functional level, but limited in enrollment to special education students.

2) The primary course title.

3) Alternate course titles.

NOTE: In some cases, no alternate titles are provided.

4) The course description. The course description is separated from the titles by a blank line and is indented.

NOTE: Not all courses have descriptions.

A full CSSC code contains 7-digits. Because of the hierarchical nature of the coding system, major changes occur at the 2-digit and 4-digit levels of the CSSC code. When these levels change, the full CSSC text provides a short description of the types of courses associated with that 2- or 4-digit level.

The first two pages from the file are reproduced starting on the next page.

01. AGRIBUSINESS AND AGRICULTURAL PRODUCTION. A summary of groups of instructional programs that prepare individuals to apply scientific knowledge and methods, and technical skills in support of agribusiness and agricultural activities concerned with the production and propagation of crops and animals, supplies and services, mechanics, products processing and marketing, and horticulture.

01.01 AGRICULTURAL BUSINESS AND MANAGEMENT. A group of instructional programs that prepare individuals to apply the economic and business principles involved in the organization, operation, and management of farm and agricultural business.

- 01.0111 Agribusiness, Introduction
Agricultural Business
introductory course; agricultural businesses;
management practices
- 01.0121 Agricultural Business Operation
Agricultural Business Leadership
salesmanship; marketing and records; economic
principles; agricultural enterprise
- 01.0131 Farm and Ranch Management
accounting; taxes; production; financing; capital
resources; farm enterprises
- 01.0141 State and Community Agriculture
agricultural information; optimum crop and animal
production geographic locations
- 01.0151 Agricultural Mathematics
agricultural economics; business mathematics
- 01.0161 Agricultural Microprocessing
record keeping; tax records; software selection;
equipment controls
- 01.0171 Agriculture Cooperatives
Agricultural Cooperative Education I
work experience in agribusiness; business
organization
- 01.0172 Agricultural Cooperative Education II
- 01.0181 Agriculture, Independent Study
agriculture studies; independent projects
- 01.0182 SOEP - Supervised Occupational
Experience Program
Agricultural related business operation -
individual study
- 01.0100 Agricultural Business and Management, Other

01.02 AGRICULTURAL MECHANICS. A group of instructional programs that prepare individuals to select, operate, maintain, service, sell, and use agriculture/agribusiness power units, machinery, equipment, structures, and utilities. Includes instruction in agricultural power units; the planning and selection of materials for the construction of agricultural facilities; and the mechanical practices associated with irrigation, drainage, run-off, water conservation, and erosion control.

- 01.0211 Agricultural Mechanics, General
Agricultural Construction and Maintenance
agricultural equipment maintenance; maintenance of
hand and power tools; arc welding
- 01.0212 Agricultural Mechanics 2

- advanced course; agribusiness power equipment; methods of irrigation; land leveling; contouring
- 01.0213 Agricultural Mechanics 3
continued advanced study; agribusiness equipment
- 01.0214 Agricultural Mechanics 4
continued advanced study; agribusiness equipment
- 01.0221 Welding, Agricultural
welding repair and construction of agricultural machinery
- 01.0231 Power and Machinery, Agricultural
Small Engines, Agricultural
equipment selection, operation and repair; agricultural power units
- 01.0241 Farm Construction
planning, materials selection; construction of agricultural structures; environmental facilities construction
- 01.0251 Electricity and Electronics, Agricultural
safe use of electricity; electrical power; automatic controls
- 01.0261 Soil and Water Mechanical Practices
irrigation; drainage; soil contours; terracing; strip cropping; irrigation equipment maintenance
- 01.0271 Surveying, Agricultural
describing geographic areas; agricultural applications; mapping; layout of contours; ponds
- 01.0200 Agricultural Mechanics, Other
- 01.03 AGRICULTURAL PRODUCTION. A group of instructional programs that prepare individuals in planning and economically using facilities, land, water, machinery, chemicals, finance, and labor in the production of plant and animal products.
- 01.0311 Agricultural Production, General
Production Agriculture
animal and plant production; farming production
- 01.0312 Agriculture Technology 1
vocational agriculture; technical information about agriculture
- 01.0313 Agriculture Technology 2
processing and distribution of agricultural products
- 01.0321 Animal Production
Animal and Veterinary Science; Animal Husbandry
livestock production and basic veterinary science; selection, breeding, nutrition, health, housing, feeding, marketing; animal physiology and diseases
- 01.0331 Crop Production
grains; fiber; forages; specialty crops; harvesting; production facilities operation
- 01.0300 Agricultural Production, Other
- 01.04 AGRICULTURAL PRODUCTS AND PROCESSING. A group of instructional programs that prepare individuals to process food and nonfood products and to inspect those products

THE NATION'S
REPORT
CARD

SCHOOL #

--	--	--	--	--	--

Public reporting burden for this collection of information is estimated to average about an hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to the U.S. Department of Education, Information Management and Compliance Division, Washington, DC 20202-4651; and to the Office of Management and Budget, Paperwork Reduction Project 1850-0628, Washington, DC 20503.

A project of the Office of Educational Research and Improvement.

This report is authorized by law (20 U.S.C. 1221 e-1(i)). While you are not required to respond, your cooperation is needed to make the results of the survey comprehensive, accurate, and timely.

O.M.B. NO. 1850-0628 - Approval Expires 6/90

Printed in U.S.A.

During the 1989-90 school year, a sample of students across the country, including some students from your school, will be given a series of questions as part of the National Assessment of Educational Progress (NAEP). The current assessment focuses on achievement in reading, mathematics and science. NAEP will also investigate the relationship between students' achievement and various school, teacher, and home factors which may influence this achievement. We are asking your school to complete this questionnaire about school factors. The first 5 questions should be completed by the principal or headmaster/mistress. The remaining questions may be filled out by another person in your school who is familiar with information about enrollment, facilities, curriculum, and staff development.

We realize that you are very busy; however, we urge you to complete the questionnaire as carefully as possible. None of the information will be released in a manner which would enable any school, teacher, or student to be identified.

NAEP is authorized under law 20 U.S.C. 1221e, Sec 1242. While your participation is voluntary, your responses to these questions are needed to make this survey accurate and complete.

Please answer directly on the questionnaire by circling the appropriate letter or by writing your response in the space provided.

Thank you very much for your help.

School Questionnaire

Please circle one letter for each question or write your answer in the space provided. Questions 1-5 should be completed by the principal or head of the school.

1. What is your gender?

A Male

B Female

C020101

6. How many days are in your school year for students in this sample (age 17 and grade 12)?

(Number)

C002803

2. Which best describes you?

A American Indian or Alaskan Native

B Asian or Pacific Islander

C Hispanic, regardless of race

D Black (not of Hispanic origin)

E White (not of Hispanic origin)

C025701

7. How long is the school day?

plus
(Hrs.) (Minutes)

C021401

3. Counting this year, how many total years of school administration experience do you have?

(Number)

C020501

8. During how much of the school day are students in classes of some kind? Exclude homeroom, lunch, recess, time spent changing classes, and study hall.

plus
(Hrs.) (Minutes)

C021501

9. As of October 1, 1989 (or the nearest date for which data are available), what was the total student enrollment in your school?

(Number)

C028202

4. What is the highest academic degree you hold?

A High school diploma

B Associate degree/vocational certification

C Bachelor's degree

D Master's degree

E Education specialist's or professional diploma based on at least one year's work past master's degree level

F Doctorate

G Professional degree (e.g., M.D., L.L.B., J.D., D.D.S.)

C026101

10. On the average, what percentage of your students is absent on a given day? Include excused and unexcused absences in calculating this rate.

%

C028501

11. About what percentage of the students who are enrolled at the beginning of the school year is still enrolled at the end of the school year? (Exclude students who transfer into the school during the school year in calculating this rate.)

%

C028301

5. Do you have a master's degree and/or a doctorate in educational administration?

A Yes

B No

C020801

Questions 12 - 19 ask about your school's teaching staff, that is, full-time staff who spend at least 75% of their time in a classroom providing instruction to students. Do not include teacher aides.

12. How many individuals are on the teaching staff?

(Number)

C006001

13. How many of the *teaching staff* are members of the following groups?

	Number
American Indian or Alaskan Native	<input type="text"/> <input type="text"/> <input type="text"/>
Asian or Pacific Islander	<input type="text"/> <input type="text"/> <input type="text"/>
Hispanic, regardless of race	<input type="text"/> <input type="text"/> <input type="text"/>
Black (not of Hispanic origin)	<input type="text"/> <input type="text"/> <input type="text"/>
White (not of Hispanic origin)	<input type="text"/> <input type="text"/> <input type="text"/>

C028400

14. How many of the *teaching staff* are female?

(Number)

C022301

15. On the average, how many of the *teaching staff* are absent on any given day in your school?

(Number)

C022501

Questions 16 – 19. Approximately what percentage of the *teaching staff* has taught at this or any other school for each of the following periods of time? Include the current year and include part-time teaching experience. Total should equal 100%.

16. Less than 3 years	<input type="text"/> <input type="text"/> <input type="text"/> %
17. 3 to 6 years	<input type="text"/> <input type="text"/> <input type="text"/> %
18. 7 to 9 years	<input type="text"/> <input type="text"/> <input type="text"/> %
19. 10 or more years	<input type="text"/> <input type="text"/> <input type="text"/> %
	100%

C028400

Questions 20 – 23. Are *twelfth graders* typically assigned to classes by ability and/or achievement levels (so that some classes are higher in average ability and/or achievement level than others) in any of the following subjects? Circle one letter on each line.

	Yes	No	
20. English	A	B	
21. Mathematics	A	B	
22. Science	A	B	
23. Social studies/ history/geography	A	B	C030300

Questions 24 – 34. Beginning with ninth grade, how many semesters (or equivalent) or course work does your school or district require of each student in each of the following subjects for graduation from twelfth grade? Circle one letter on each line.

	None	1	2	3	4	5	6	7	8
24. English	A	B	C	D	E	F	G	H	I
									C023801
25. Mathematics	A	B	C	D	E	F	G	H	I
									C023802
26. Science	A	B	C	D	E	F	G	H	I
									C023803
27. Computers	A	B	C	D	E	F	G	H	I
									C023804
28. Foreign languages	A	B	C	D	E	F	G	H	I
									C023806
29. United States history	A	B	C	D	E	F	G	H	I
									C023807
30. United States government/civics	A	B	C	D	E	F	G	H	I
									C023808
31. Geography	A	B	C	D	E	F	G	H	I
									C023809
32. Other history/social studies	A	B	C	D	E	F	G	H	I
									C023810
33. Art/music	A	B	C	D	E	F	G	H	I
									C023811
34. Physical education	A	B	C	D	E	F	G	H	I
									C023812

Questions 35 – 45. Are the following mathematics courses taught in your school? Circle one letter on each line.

	Yes	No	
35. General mathematics (grades 9-12)	A	B	
36. Business or consumer mathematics	A	B	
37. Remedial mathematics (basic or fundamental)	A	B	
38. Introduction to algebra or pre-algebra	A	B	
39. First-year algebra	A	B	
40. Second-year algebra	A	B	
41. Geometry	A	B	
42. Trigonometry	A	B	
43. Probability or statistics	A	B	
44. Pre-calculus	A	B	
45. Calculus	A	B	C030400

Questions 46 – 54. Are the following science courses taught in your school? Circle one letter on each line.

	Yes	No	
46. General science	A	B	
47. Earth science	A	B	
48. Physical science	A	B	
49. First-year biology	A	B	
50. Second-year biology	A	B	
51. First-year chemistry	A	B	
52. Second-year chemistry	A	B	
53. First-year physics	A	B	
54. Second-year physics	A	B	C030500

Questions 55 – 57. Are students in your school required to take any of the following tests in the following grades? Check as many boxes as apply on each line. Check boxes for grades taught in your school.

	Not required	Grade 9	Grade 10	Grade 11	Grade 12	
55. Minimum competency tests	<input type="checkbox"/>					
56. Curriculum-based tests covering a broad range of competencies	<input type="checkbox"/>					
57. Norm-referenced standardized achievement tests	<input type="checkbox"/>	C030600				

Questions 58 – 62. Are results of school-wide tests used for any of the following? Circle one letter on each line.

	Yes	No	
58. Curriculum planning	A	B	C029101
59. Assigning students to classes, including special classes for high- or low-achieving students	A	B	C029102
60. Student promotion	A	B	C029103
61. Student graduation	A	B	C029105
62. Public and accountability reporting (to parents, district, state, etc.)	A	B	C029104

Questions 63– 68. Has your school identified any of the following subjects as a special priority (i.e., does it receive special emphasis in school-wide goals and objectives, instruction, in-service training, etc.)? Circle one letter on each line.

	Yes	No	
63. Reading	A	B	
64. Writing	A	B	
65. Mathematics	A	B	
66. Science	A	B	
67. Computers	A	B	
68. Other _____	A	B	C029200

Questions 69 – 70. Does your school have any of the following school-wide programs? Circle one letter on each line?

- | | Yes,
required | Yes,
encouraged | No | |
|--------------------------------------|------------------|--------------------|----|---------|
| 69. Sustained silent reading program | A | B | C | C027901 |
| 70. Reading across the content areas | A | B | C | C027902 |

Questions 71 – 73. Are computers available to your students in mathematics classes in any of the following ways? Circle one letter on each line.

- | | Yes | No | |
|--|-----|----|---------|
| 71. Available all the time in mathematics classrooms | A | B | |
| 72. Grouped in a separate computer laboratory available to mathematics classes | A | B | |
| 73. Available to bring to mathematics classrooms when needed | A | B | C029300 |

74. Which of the following best describes your school's policy on calculator use in mathematics classes?

- A The school provides calculators for classroom use.
- B Students are allowed to use their own calculators.
- C Calculators are not permitted.
- D There is no school policy on calculator use.

C029401

Questions 75 – 77. Does your school have the following kinds of science laboratory facilities? Circle one letter on each line.

- | | Yes | No | |
|---|-----|----|---------|
| 75. Science laboratory facilities in one or more classrooms | A | B | C024404 |
| 76. One or more general-purpose science laboratories | A | B | C024402 |
| 77. One or more specialized science laboratories (e.g., for biology, chemistry) | A | B | C024403 |

78. In your school, how many microcomputers or terminals are available for students to use?

(Number)

C029601

79. Approximately what percent of your students use computers in school as part of their instructional programs in any way?

%

C028001

Questions 80 – 87. How many students in your school receive the following special services? Enter a number or zero on each line.

- | | Number | |
|---|--|---------|
| 80. Subsidized school lunch and/or nutrition program | <input type="text"/> <input type="text"/> <input type="text"/> | C025010 |
| 81. Remedial reading instruction | <input type="text"/> <input type="text"/> <input type="text"/> | C025002 |
| 82. Remedial mathematics instruction | <input type="text"/> <input type="text"/> <input type="text"/> | C025003 |
| 83. Bilingual education | <input type="text"/> <input type="text"/> <input type="text"/> | C025004 |
| 84. English-as-a-second-language instruction (not in a bilingual education program) | <input type="text"/> <input type="text"/> <input type="text"/> | C025005 |
| 85. Special education for the handicapped | <input type="text"/> <input type="text"/> <input type="text"/> | C025006 |
| 86. Gifted and talented education | <input type="text"/> <input type="text"/> <input type="text"/> | C025007 |
| 87. Vocational/technical training | <input type="text"/> <input type="text"/> <input type="text"/> | C025008 |

Questions 88 – 95. How many of the following types of specialists or aides work in your school? Use decimal numbers to indicate less than full-time equivalent staff. Enter a number or zero on each line.

	Number of full-time (or full-time equivalent) personnel		
	(Number)	(Decimal)	
88. Remedial reading specialists	<input type="text"/>	<input type="text"/>	C025101
89. Remedial mathematics specialists	<input type="text"/>	<input type="text"/>	C025102
90. Bilingual/English-as-a-second language specialists	<input type="text"/>	<input type="text"/>	C025103
91. Special education teachers	<input type="text"/>	<input type="text"/>	C025104
92. Teacher aides	<input type="text"/>	<input type="text"/>	C025105
93. Counselors	<input type="text"/>	<input type="text"/>	C025107
94. Psychologists	<input type="text"/>	<input type="text"/>	C025108
95. Social workers	<input type="text"/>	<input type="text"/>	C025109

Questions 96 – 99. Do you use any of the following community-based institutions to provide instruction or services *in the school* (not referral services) for your students? Circle one letter on each line.

	Yes, extensive use	Yes, limited use	No	
96. Community social service agencies	A	B	C	
97. Community health service agencies	A	B	C	
98. Local businesses and industries	A	B	C	
99. Community or church service clubs	A	B	C	C029700

Questions 100 – 103. Do the following policies for involving parents exist in your school? Circle one letter on each line.

	Yes	No
100. Parents are notified after 1-3 days of a student's unexcused absence.	A	B
101. Parents are notified in between report cards if a student's grades are low.	A	B
102. Parents are notified when a student is first sent to the office for disruptive behavior.	A	B
103. Regular parent/teacher conferences are held.	A	B

C029800

Questions 104 – 113. Since the beginning of the 1984-1985 school year, has your school made any of the following changes? Circle one letter on each line.

- | | Yes, by
school policy | Yes, by
state or
district policy | No |
|---|--------------------------|--|----|
| 104. Lengthened the school day | A | B | C |
| 105. Lengthened the school year | A | B | C |
| 106. Established a policy of increased homework | A | B | C |
| 107. Implemented testing for promotion | A | B | C |
| 108. Established new, consistently enforced codes of student conduct | A | B | C |
| 109. Established a stricter attendance policy | A | B | C |
| 110. Established grade requirements in athletics or extra-curricular activities | A | B | C |
| 111. Implemented some type of performance-based compensation system for teachers, such as merit pay, a career ladder, or mentor teacher program | A | B | C |
| 112. Increased the number of advanced course offerings | A | B | C |
| 113. Increased graduation requirements in English, mathematics, science, social studies, computer science, or foreign languages | A | B | C |

C028100

Questions 114 – 124. Indicate the degree to which each of the following matters is a problem in your school. Circle one letter on each line.

- | | Not a
Serious
Problem | Mod-
erate | Mod-
severe | Very
Serious |
|--|-----------------------------|---------------|----------------|-----------------|
| 114. Student tardiness | A | B | C | D |
| 115. Student absenteeism | A | B | C | D |
| 116. Student cutting of classes | A | B | C | D |
| 117. Physical conflicts among students | A | B | C | D |
| 118. Robbery or theft | A | B | C | D |
| 119. Vandalism of school property | A | B | C | D |
| 120. Student use of alcohol | A | B | C | D |
| 121. Student use of illicit drugs | A | B | C | D |
| 122. Student possession of weapons | A | B | C | D |
| 123. Physical abuse of teachers | A | B | C | D |
| 124. Verbal abuse of teachers | A | B | C | D |

C028200

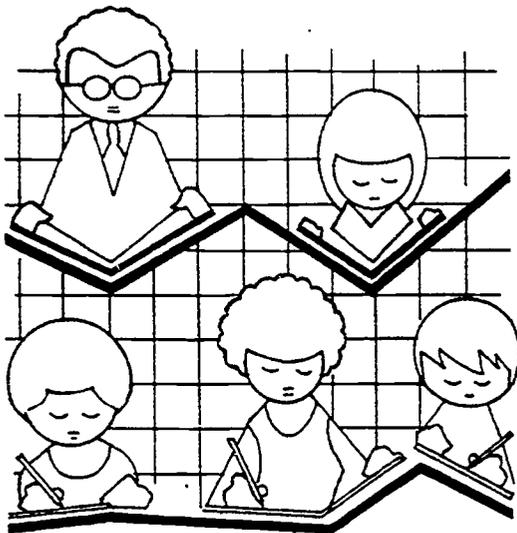

125. What is (are) the title(s) of the person or persons who filled out this questionnaire? Check as many boxes as apply.

- Principal
- Headmaster/Headmistress/Head teacher
- Vice Principal, Assistant Principal
- Counselor
- Curriculum Coordinator, Department Head
- Teacher
- Secretary
- Other (specify) _____

C028300

Thank you for your cooperation.

Public reporting burden for this collection of information is estimated to average about an hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to the U.S. Department of Education, Information Management and Compliance Division, Washington, DC 20202-4651; and to the Office of Management and Budget, Paperwork Reduction Project 1850-0628, Washington, DC 20503.

A project of the Office of Educational Research and Improvement. This report is authorized by law (20 U.S.C. 1221 e-1(i)). While you are not required to respond, your cooperation is needed to make the results of the survey comprehensive, accurate, and timely.

Printed in U.S.A.

During the 1990-91 school year, a sample of students across the country, including some students from your school, will be given a series of questions as part of the National Assessment of Educational Progress (NAEP). The current assessment focuses on achievement in reading, mathematics, and writing. As part of the assessment, NAEP will investigate the relationship between students' achievement and various school, teacher, and home factors that may influence this achievement. We are asking your school to complete this questionnaire about school factors. The questionnaire should be completed by the principal or other head administrator, and another person in your school who can provide detailed information about enrollment.

We realize that you are very busy; however, we urge you to complete the questionnaire as carefully as possible. The information that you provide will be kept confidential.

NAEP is authorized under Public Law 100-297. While your participation is voluntary, your responses to these questions are needed to make this survey accurate and complete.

Please answer directly on the questionnaire by filling in the appropriate oval or by writing your response in the space provided.

When you are finished, please return the questionnaire to your school's NAEP coordinator.

Thank you very much for your help.

School Characteristics and Policies Questionnaire

Please fill in one oval for each question or write your answer in the space provided.
 Questions 1 through 115 should be completed by the principal or the head of the school.

1. Are students assigned from particular areas to achieve a desired racial or ethnic composition in the school?

- A Yes
- B No
- C Not applicable

0000000

2. May students from other schools in this district or from other districts choose to attend this school?

- A Yes
- B No
- C Not applicable

0000000

Questions 3 – 4. Are twelfth graders typically assigned to classes by ability and/or achievement levels (so that some classes are higher in average ability and/or achievement levels than others) in either of the following subjects? Fill in **one** oval on each line.

	Yes	No	
3. English	<input type="radio"/> A	<input type="radio"/> B	0000000
4. Mathematics	<input type="radio"/> A	<input type="radio"/> B	0000000

Questions 5 – 8. Approximately what percentage of your twelfth grade students is in each of the following instructional programs? On each line below, write the appropriate number in the box and fill in the corresponding ovals (e.g., 5 percent would be a "0" on the first line and "5" on the second line; 22 percent would be "2" on the first line and "2" on the second line).

5. General

Percentage:

Tens	<input type="checkbox"/>	<input type="radio"/> 0	<input type="radio"/> 1	<input type="radio"/> 2	<input type="radio"/> 3	<input type="radio"/> 4	<input type="radio"/> 5	<input type="radio"/> 6	<input type="radio"/> 7	<input type="radio"/> 8	<input type="radio"/> 9
Ones	<input type="checkbox"/>	<input type="radio"/> 0	<input type="radio"/> 1	<input type="radio"/> 2	<input type="radio"/> 3	<input type="radio"/> 4	<input type="radio"/> 5	<input type="radio"/> 6	<input type="radio"/> 7	<input type="radio"/> 8	<input type="radio"/> 9

0000000

6. Academic or college preparatory

Percentage:

Tens	<input type="checkbox"/>	<input type="radio"/> 0	<input type="radio"/> 1	<input type="radio"/> 2	<input type="radio"/> 3	<input type="radio"/> 4	<input type="radio"/> 5	<input type="radio"/> 6	<input type="radio"/> 7	<input type="radio"/> 8	<input type="radio"/> 9
Ones	<input type="checkbox"/>	<input type="radio"/> 0	<input type="radio"/> 1	<input type="radio"/> 2	<input type="radio"/> 3	<input type="radio"/> 4	<input type="radio"/> 5	<input type="radio"/> 6	<input type="radio"/> 7	<input type="radio"/> 8	<input type="radio"/> 9

0000000

7. Vocational or technical

Percentage:

Tens 0 1 2 3 4 5 6 7 8 9
 Ones 0 1 2 3 4 5 6 7 8 9 000000

8. Other (specify _____)

Percentage:

Tens 0 1 2 3 4 5 6 7 8 9
 Ones 0 1 2 3 4 5 6 7 8 9 000000

NOTE: PLEASE CHECK TO BE SURE THAT THE PERCENTAGES YOU PROVIDE IN QUESTIONS 5 THROUGH 8 ADD TO 100.

Questions 9 – 18. Beginning with ninth grade, how many semesters (or equivalent) of course work does your school or district require of each student in each of the following subjects for graduation from twelfth grade by June 1991? Fill in **one** oval on each line.

None 1 2 3 4 5 6 7 8

- 9. English/literature/
writing 0 1 2 3 4 5 6 7 8 000000
- 10. Mathematics 0 1 2 3 4 5 6 7 8 000000

- 18. Physical education 0 1 2 3 4 5 6 7 8 000000

Questions 19 – 32. Are the following mathematics courses taught in your school? Fill in one oval on each line.

	Yes	No	
19. Basic or general mathematics	<input type="radio"/> A	<input type="radio"/> B	0000000
20. Business or consumer mathematics	<input type="radio"/> A	<input type="radio"/> B	0000000
21. Pre-algebra	<input type="radio"/> A	<input type="radio"/> B	0000000
22. Algebra I or elementary algebra	<input type="radio"/> A	<input type="radio"/> B	0000000
23. Geometry	<input type="radio"/> A	<input type="radio"/> B	0000000
24. Algebra II or intermediate algebra	<input type="radio"/> A	<input type="radio"/> B	0000000
25. Trigonometry	<input type="radio"/> A	<input type="radio"/> B	0000000
26. Pre-calculus, advanced mathematics, elementary functions, or Algebra III	<input type="radio"/> A	<input type="radio"/> B	0000000
27. Analytic geometry	<input type="radio"/> A	<input type="radio"/> B	0000000
28. Probability and/or statistics	<input type="radio"/> A	<input type="radio"/> B	0000000
29. Unified, integrated or sequential mathematics	<input type="radio"/> A	<input type="radio"/> B	0000000
30. Calculus	<input type="radio"/> A	<input type="radio"/> B	0000000
31. Computer science	<input type="radio"/> A	<input type="radio"/> B	0000000
32. Other (specify _____)	<input type="radio"/> A	<input type="radio"/> B	0000000

Questions 33 – 36. Are students in your school required to take any of the following tests in the following grades? Fill in as many ovals as apply on each line, but only for grades taught in your school.

	Not required	Grade 9	Grade 10	Grade 11	Grade 12	
33. Tests included in district testing programs (e.g., commercially available standardized achievement tests)	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	<input type="radio"/> E	0000000
34. State minimum competency tests	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	<input type="radio"/> E	0000000
35. Other state-mandated tests (e.g., academic achievement tests, tests for program evaluation)	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	<input type="radio"/> E	0000000
36. Other required tests (specify _____)	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	<input type="radio"/> E	0000000

Questions 37 – 42. Are results of district-wide or statewide standardized tests used throughout your school for any of the following? Fill in **one** oval on each line.

- | | Yes | No | |
|--|-------------------------|-------------------------|---------|
| 37. Curriculum planning | <input type="radio"/> A | <input type="radio"/> B | 0000000 |
| 38. Assignment of students to classes, including special classes for high- or low-achieving students | <input type="radio"/> A | <input type="radio"/> B | 0000000 |
| 39. Student promotion and/or retention | <input type="radio"/> A | <input type="radio"/> B | 0000000 |
| 40. Public accountability and reporting (to parents, district, state, etc.) | <input type="radio"/> A | <input type="radio"/> B | 0000000 |
| 41. Instructional planning by individual teachers | <input type="radio"/> A | <input type="radio"/> B | 0000000 |
| 42. Diagnosis of individual student needs | <input type="radio"/> A | <input type="radio"/> B | 0000000 |

Questions 43 – 49. Has your school identified any of the following subjects as a priority in the last two years (i.e., does the subject receive special emphasis in schoolwide goals and objectives, instruction, in-service training, etc.)? Fill in **one** oval on each line.

- | | Yes | No | |
|--------------------------------------|-------------------------|-------------------------|---------|
| 43. Reading | <input type="radio"/> A | <input type="radio"/> B | 0000000 |
| 44. Writing | <input type="radio"/> A | <input type="radio"/> B | 0000000 |
| 45. Mathematics | <input type="radio"/> A | <input type="radio"/> B | 0000000 |
| 46. Science | <input type="radio"/> A | <input type="radio"/> B | 0000000 |
| 47. Computers | <input type="radio"/> A | <input type="radio"/> B | 0000000 |
| 48. Integration of separate subjects | <input type="radio"/> A | <input type="radio"/> B | 0000000 |
| 49. Other (specify _____) | <input type="radio"/> A | <input type="radio"/> B | 0000000 |

Questions 50 – 52. Does your school have any of the following schoolwide programs?
Fill in **one** oval on each line.

- | | Yes,
required | Yes,
encouraged | No | |
|--|------------------|--------------------|-----|---------|
| 50. Writing across the curriculum | (A) | (B) | (C) | 0000000 |
| 51. Integration of computers into the curriculum | (A) | (B) | (C) | 0000000 |
| 52. Innovative mathematics program | (A) | (B) | (C) | 0000000 |

53. How many computers are there in your school that are used exclusively or primarily for instruction?

On each line below, write the appropriate number in the box **and** fill in the corresponding ovals (e.g., 25 computers would be represented by a "0" on the first line, a "2" on the second line, and a "5" on the third line; 120 computers would be represented by a "1" on the first line, a "2" on the second line, and a "0" on the third line).

Hundreds	<input type="checkbox"/>	(0)	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	
Tens	<input type="checkbox"/>	(0)	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	
Ones	<input type="checkbox"/>	(0)	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	0000000

54. Which of the following best describes your school's policy on the use of calculators?

- (A) Students are allowed to use calculators for all schoolwork including tests.
- (B) Students are allowed to use calculators for all schoolwork except tests.
- (C) Individual teachers decide about the use of calculators in their own classes.
- (D) Calculators are not permitted.
- (E) There is no school policy on calculator use.

0000000

Questions 61 – 65. Do you use any of the following community-based resources to provide instruction or services in the school (not referral services) for your students? Fill in **one** oval on each line.

	Yes, extensively	Yes, but limited use	No	
61. Community social service agencies	(A)	(B)	(C)	0000000
62. Community health service agencies	(A)	(B)	(C)	0000000
63. Local businesses and industries	(A)	(B)	(C)	0000000
64. Community or church service clubs	(A)	(B)	(C)	0000000
65. Adult volunteers	(A)	(B)	(C)	0000000

Questions 66 – 73. Does your school do any of the following to involve parents? Fill in **one** oval on each line.

	Yes, routinely	Yes, occasionally	No	
66. Notify parents after 1-3 days of a student's unexcused absence or that the student has been sent to the office for disruptive behavior	(A)	(B)	(C)	0000000
67. Provide information to parents about the school (e.g., publish a parent newsletter)	(A)	(B)	(C)	0000000
68. Sponsor a PTA or PTO	(A)	(B)	(C)	0000000
69. Notify parents of students' academic progress between report cards	(A)	(B)	(C)	0000000
70. Consult parents about placement decisions, course selection, or choice of academic program	(A)	(B)	(C)	0000000
71. Hold scheduled parent-teacher conferences	(A)	(B)	(C)	0000000
72. Use parents as aides in classrooms	(A)	(B)	(C)	0000000
73. Encourage parents to visit classrooms	(A)	(B)	(C)	0000000

Questions 74 – 84. Are any of the following practices or programs in effect in your school this year? Fill in **one** oval on each line.

	Yes	No	
74. Minimum requirements for time spent on homework	<input type="radio"/> A	<input type="radio"/> B	000000
75. Consistently enforced school codes for student conduct	<input type="radio"/> A	<input type="radio"/> B	000000
76. Some type of performance-based compensation system for teachers (e.g., career ladder, merit pay)	<input type="radio"/> A	<input type="radio"/> B	000000
77. Mentoring program for beginning teachers or other teachers in need of assistance	<input type="radio"/> A	<input type="radio"/> B	000000
78. Before- or after-school instructional program	<input type="radio"/> A	<input type="radio"/> B	000000
79. Summer-school program	<input type="radio"/> A	<input type="radio"/> B	000000
80. Year-round school	<input type="radio"/> A	<input type="radio"/> B	000000
81. Before- or after-school child-care program	<input type="radio"/> A	<input type="radio"/> B	000000
82. Site-based planning, management, and/or budgeting	<input type="radio"/> A	<input type="radio"/> B	000000
83. Shared decision-making	<input type="radio"/> A	<input type="radio"/> B	000000
84. Dropout prevention program	<input type="radio"/> A	<input type="radio"/> B	000000

Questions 85 – 92. To what degree is each of the following a problem in your school? Fill in **one** oval on each line.

	Serious	Moderate	Minor	Not a problem	
85. Student tardiness	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	000000
86. Student absenteeism	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	000000
87. Student cutting of classes	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	000000
88. Physical conflicts among students	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	000000
89. Student use of alcohol or illicit drugs	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	000000
90. Teacher absenteeism	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	000000
91. Racial or cultural conflicts	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	000000
92. Student health problems	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	000000

Questions 93 – 99. How would you characterize each of the following within your school? Fill in one oval on each line.

	Very positive	Somewhat positive	Somewhat negative	Very negative	
93. Teachers' relations with administrators	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	000000
94. Morale of teachers	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	000000
95. Students' attitudes toward academic achievement	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	000000
96. Teachers' attitudes toward academic achievement	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	000000
97. Parental support for student achievement	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	000000
98. Regard for school property	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	000000
99. Relations between students and teachers	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> D	000000

Questions 100 – 109. To what extent has each of the following served as an impetus to change in the curriculum or instructional practices within your school during the past five years? (Answer only if you have been at the school or district for at least two years.) Fill in one oval on each line.

	To a great extent	To some extent	Not at all	
100. Adoption of new textbooks	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	0000000
101. District or school testing programs	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	0000000
102. State curriculum mandates	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	0000000
103. State testing mandates	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	0000000
104. Policies of accountability at the district and/or state level	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	0000000
105. Public reporting of school or district performance data	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	0000000
106. National reports (e.g., Carnegie middle school report) or initiatives of professional organizations (e.g., <i>National Council of Teachers of Mathematics Standards</i>)	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	0000000
107. Staff changes	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	0000000
108. Budget changes	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	0000000
109. Changes in student body or in student assignment policies	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	0000000

Questions 110 – 115 are about the principal or head of the school.

110. Are you male or female?
- A Male
- B Female
- 0000000
111. Which best describes you?
- A White (not of Hispanic origin)
- B Black (not of Hispanic origin)
- C Hispanic, regardless of race
- D Asian or Pacific Islander
- E American Indian or Alaskan Native
- 0000000

112. If you are Hispanic, what is your Hispanic background?

- Ⓐ I am not Hispanic.
- Ⓑ Mexican, Mexican American, or Chicano
- Ⓒ Puerto Rican
- Ⓓ Cuban
- Ⓔ Other Spanish or Hispanic background

0000000

113. Counting this year, how many total years of school administration experience do you have? On each line below, write the appropriate number in the box and fill in the corresponding ovals (e.g., 5 years would be a "0" on the first line and "5" on the second line; 12 years would be a "1" on the first line and "2" on the second line).

Tens 0 1 2 3 4 5
Ones 0 1 2 3 4 5 6 7 8 9

0000000

114. What is the highest academic degree you hold?

- Ⓐ Bachelor's degree
- Ⓑ Master's degree
- Ⓒ Education specialist's or professional diploma based on at least one year's work past master's degree level
- Ⓓ Doctorate
- Ⓔ Professional degree (e.g., M.D., LL.B., J.D., D.D.S.)

0000000

115. In what field is your highest degree?

- Ⓐ Educational administration
- Ⓑ Curriculum and instruction
- Ⓒ Other educational field (e.g., mathematics education, guidance, special education)
- Ⓓ A subject area other than education (e.g., mathematics, English, business)
- Ⓔ Other (specify _____)

0000000

116. How many days are in your school year for students in this sample (age 17 and grade 12)?

On each line below, write the appropriate number in the box and fill in the corresponding ovals (e.g., 180 days would be represented by a "1" on the first line, an "8" on the second line, and a "0" on the third line).

Hundreds	<input type="checkbox"/>	0	1	2	3							
Tens	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
Ones	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	0000000

117. How long is your school day for students (in hours plus minutes)?

Hours:

Ones	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
------	--------------------------	---	---	---	---	---	---	---	---	---	---	--

Minutes:

Tens	<input type="checkbox"/>	0	1	2	3	4	5						
Ones	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	0000000	

118. How much of the school day do students spend in classes of some kind? (Exclude homeroom, lunch, recess, time spent changing classes, and study halls.)

Hours:

Ones	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
------	--------------------------	---	---	---	---	---	---	---	---	---	---	--

Minutes:

Tens	<input type="checkbox"/>	0	1	2	3	4	5						
Ones	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	0000000	

119. What percentage of your students is absent on an average day? (Include excused and unexcused absences in calculating this rate.)

Percentage:

Tens	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
Ones	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	0000000

120. About what percentage of students who are enrolled at the beginning of the school year is still enrolled at the end of the school year? (Exclude students who transfer into the school during the school year in figuring this rate.)

Percentage:

Tens	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
Ones	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	0000000

Questions 121 – 123 ask about your school's teaching staff, that is, full-time staff who spend at least half (50%) of their time in classrooms providing instruction to students. (Do not include part-time personnel, teacher aides, or student teachers.)

121. How many full-time individuals are on the teaching staff?

Hundreds	<input type="checkbox"/>	<input type="radio"/>				
Tens	<input type="checkbox"/>	<input type="radio"/>				
Ones	<input type="checkbox"/>	<input type="radio"/>				

0000000

122. On the average, how many of the full-time teaching staff in your school are absent on any given day?

Tens	<input type="checkbox"/>	<input type="radio"/>				
Ones	<input type="checkbox"/>	<input type="radio"/>				

0000000

123. What percentage of the full-time teachers at the end of the 1989-90 school year is no longer at the school for reasons other than death or retirement?

Percentages:

Tens	<input type="checkbox"/>	<input type="radio"/>				
Ones	<input type="checkbox"/>	<input type="radio"/>				

0000000

Questions 124 – 132. How many of the following types of specialists or aides work in your school? Use decimal numbers to indicate less than full-time equivalent staff. On each line below, write the appropriate number in the box and fill in the corresponding ovals (e.g., 5 staff would be a "0" on the first line, and "5" on the second line and "0" on the third line; 12.5 staff would be a "1" on the first line, and "2" on the second line and "5" on the third line).

124. Remedial reading specialists

Tens	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
Ones	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
Tenths	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	0000000

125. Remedial mathematics specialists

Tens	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
Ones	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
Tenths	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	0000000

126. Bilingual education specialists

Tens	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
Ones	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
Tenths	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	0000000

127. English-as-a-second-language specialists

Tens	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
Ones	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
Tenths	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	0000000

128. Special education teachers

Tens	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
Ones	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
Tenths	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	0000000

129. Teacher aides

Tens	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
Ones	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
Tenths	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	0000000

130. Counselors

Tens	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
Ones	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	
Tenths	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	0000000

131. Psychologists

Tens	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9

Tenths	<input type="checkbox"/>	0	1	2	3	4	5	6	7	8	9	0000000

133. What is/are the title/s of the person or persons who filled out this questionnaire?
Fill in **as many ovals as apply**.

- A Principal
- B Headmaster/Headmistress
- C Head teacher
- D Vice Principal, Assistant Principal
- E Counselor
- F Curriculum Coordinator, Department Head
- G Teacher
- H Secretary
- I Other (Specify _____)

000000

Thank you for your cooperation.

APPENDIX M
IEP/LEP QUESTIONNAIRE

SCHOOL # | _ | _ | _ | _ | - | _ | _ | _ | _ |

OMB No: 1850-0628
Expiration Date: 6/91

U.S. Department of Education
1991 High School Transcript Study

IEP/LEP STUDENT QUESTIONNAIRE

The 1991 High School Transcript Study is collecting high school transcripts of a sample of students who were twelfth graders in 1990 in selected schools across the country. The sample of students includes students with Individualized Educational Programs (IEP's) and students who are classified as Limited English Proficient (LEP). Student transcript data will be used to study the types of academic and vocational courses and resource services in which these students enroll during high school.

To obtain information on the characteristics and placements of IEP and LEP students, we are asking you to complete this questionnaire for the student identified below. None of the information collected will be released in a manner which would enable any school, teacher, or student to be identified.

This study is authorized under law (20 U.S.C. 1221e-1(f)). While your participation is voluntary, your responses are needed to make this survey accurate and complete.

Please answer directly on this questionnaire by filling in the appropriate oval or by writing your response in the space provided.

THANK YOU VERY MUCH FOR YOUR HELP

Student ID #: | _ | _ | _ | _ | _ | _ | _ | _ | _ |

Student listed as: IEP (Please complete Sections A & B)
 LEP (Please complete Sections A & C)

Identify student below:

[Empty box for identifying the student]

Section A. Grade Level and Mainstreaming

(Complete this section if this student had a disability and/or limited English proficiency.)

3. What functional grade level had this student achieved in reading English in the spring of 1987?
- | | | | |
|--------------------------|---------------------------|--------------------------|----------|
| <input type="checkbox"/> | No grade level determined | <input type="checkbox"/> | Grade 6 |
| <input type="checkbox"/> | Lower than kindergarten | <input type="checkbox"/> | Grade 7 |
| <input type="checkbox"/> | Kindergarten | <input type="checkbox"/> | Grade 8 |
| <input type="checkbox"/> | Grade 1 | <input type="checkbox"/> | Grade 9 |
| <input type="checkbox"/> | Grade 2 | <input type="checkbox"/> | Grade 10 |
| <input type="checkbox"/> | Grade 3 | <input type="checkbox"/> | Grade 11 |
| <input type="checkbox"/> | Grade 4 | <input type="checkbox"/> | Grade 12 |
| <input type="checkbox"/> | Grade 5 | | |
4. What functional grade level had this student achieved in mathematics in the spring of 1987?
- | | | | |
|--------------------------|---------------------------|--------------------------|----------|
| <input type="checkbox"/> | No grade level determined | <input type="checkbox"/> | Grade 6 |
| <input type="checkbox"/> | Lower than kindergarten | <input type="checkbox"/> | Grade 7 |
| <input type="checkbox"/> | Kindergarten | <input type="checkbox"/> | Grade 8 |
| <input type="checkbox"/> | Grade 1 | <input type="checkbox"/> | Grade 9 |
| <input type="checkbox"/> | Grade 2 | <input type="checkbox"/> | Grade 10 |
| <input type="checkbox"/> | Grade 3 | <input type="checkbox"/> | Grade 11 |
| <input type="checkbox"/> | Grade 4 | <input type="checkbox"/> | Grade 12 |
| <input type="checkbox"/> | Grade 5 | | |
5. What percentage of the school day did this student spend in a regular class (i.e., mainstream) setting in the spring of 1987?
- | | | | | | |
|--------------------------|-----|--------------------------|-----|--------------------------|------|
| <input type="checkbox"/> | 0% | <input type="checkbox"/> | 40% | <input type="checkbox"/> | 80% |
| <input type="checkbox"/> | 10% | <input type="checkbox"/> | 50% | <input type="checkbox"/> | 90% |
| <input type="checkbox"/> | 20% | <input type="checkbox"/> | 60% | <input type="checkbox"/> | 100% |
| <input type="checkbox"/> | 30% | <input type="checkbox"/> | 70% | | |

Section B: Students With a Disability

(Complete this section if this student had a disability)

6. Which of the following best describes this student's disability?
- | | | | |
|--------------------------|----------------------------|--------------------------|-------------------------|
| <input type="checkbox"/> | Multidisabled | <input type="checkbox"/> | Deaf/blind |
| <input type="checkbox"/> | Minimally retarded | <input type="checkbox"/> | Emotionally disturbed |
| <input type="checkbox"/> | Hard of hearing | <input type="checkbox"/> | Orthopedically impaired |
| <input type="checkbox"/> | Deaf | <input type="checkbox"/> | Learning disabled |
| <input type="checkbox"/> | Speech-impaired | <input type="checkbox"/> | Other (specify) _____ |
| <input type="checkbox"/> | Visually handicapped/blind | | |
7. How would you describe this student's condition?
- | | | | |
|--------------------------|----------|--------------------------|----------|
| <input type="checkbox"/> | Profound | <input type="checkbox"/> | Moderate |
| <input type="checkbox"/> | Severe | <input type="checkbox"/> | Mild |
8. What percentage of the school day was this student served by a special education program in the spring of 1987?
- | | | | | | |
|--------------------------|-----|--------------------------|-----|--------------------------|------|
| <input type="checkbox"/> | 0% | <input type="checkbox"/> | 40% | <input type="checkbox"/> | 80% |
| <input type="checkbox"/> | 10% | <input type="checkbox"/> | 50% | <input type="checkbox"/> | 90% |
| <input type="checkbox"/> | 20% | <input type="checkbox"/> | 60% | <input type="checkbox"/> | 100% |
| <input type="checkbox"/> | 30% | <input type="checkbox"/> | 70% | | |

Questions 9-15. In the spring of 1987, did this student receive instruction in any of the following areas as part of a special education program? Fill in one box on each line.

- | | | | |
|-----|---|--------------------------|--------------------------|
| | | Yes | No |
| 9. | Language development _____ | <input type="checkbox"/> | <input type="checkbox"/> |
| 10. | Reading _____ | <input type="checkbox"/> | <input type="checkbox"/> |
| 11. | Mathematics _____ | <input type="checkbox"/> | <input type="checkbox"/> |
| 12. | Speech (e.g., articulation, voice, speech flow) _____ | <input type="checkbox"/> | <input type="checkbox"/> |
| 13. | Self-control and deportment _____ | <input type="checkbox"/> | <input type="checkbox"/> |
| 14. | Personal care and basic life skills _____ | <input type="checkbox"/> | <input type="checkbox"/> |
| 15. | Vocational education _____ | <input type="checkbox"/> | <input type="checkbox"/> |

Section C. Students With Limited English Proficiency

(Complete this section if this student had limited English proficiency.)

16. What was this student's non-English language?
- Spanish
- Another language (specify) _____
17. What percent of the students in this school speak the student's non-English language?
- | | | | |
|--------------------------|-------------|--------------------------|---------------|
| <input type="checkbox"/> | None | <input type="checkbox"/> | 31-40% |
| <input type="checkbox"/> | 10% or less | <input type="checkbox"/> | 41-50% |
| <input type="checkbox"/> | 11-30% | <input type="checkbox"/> | 51-60% |
| <input type="checkbox"/> | 21-30% | <input type="checkbox"/> | More than 60% |
18. In 1988, did this student live in a territory or country where English is not the dominant language?
- Yes
- No
- I don't know
19. What percentage of the school day was this student served by a special language program in the spring of 1987?
- | | | | | | |
|--------------------------|-----|--------------------------|-----|--------------------------|------|
| <input type="checkbox"/> | 0% | <input type="checkbox"/> | 40% | <input type="checkbox"/> | 80% |
| <input type="checkbox"/> | 10% | <input type="checkbox"/> | 50% | <input type="checkbox"/> | 90% |
| <input type="checkbox"/> | 20% | <input type="checkbox"/> | 60% | <input type="checkbox"/> | 100% |
| <input type="checkbox"/> | 30% | <input type="checkbox"/> | 70% | | |

Questions 20-22. Did this student receive any of the following types of instruction as a part of a special language program in the spring of 1987? Fill in one box on each line.

- | | | | |
|-----|--|--------------------------|--------------------------|
| | | Yes | No |
| 20. | English language course designed for speakers of another language _____ | <input type="checkbox"/> | <input type="checkbox"/> |
| 21. | A course in reading and writing in the student's native language _____ | <input type="checkbox"/> | <input type="checkbox"/> |
| 22. | One or more content courses (e.g., mathematics, science, social studies) taught in the student's native language _____ | <input type="checkbox"/> | <input type="checkbox"/> |
| 23. | Counting 1980, how many years had this student been in a special language program? | | |

APPENDIX N
WEIGHTING AND ESTIMATION
OF SAMPLING VARIANCE
FOR LINKED WEIGHTS

APPENDIX N
WEIGHTING AND ESTIMATION OF SAMPLING VARIANCE
FOR LINKED WEIGHTS

The linked weights are developed to perform analysis on the student transcripts which are fully linked to the NAEP assessments. A separate set of weights had to be developed to analyze the linked transcripts and the NAEP assessments for the following reasons: (1) the differences between the definitions of the NAEP and HSTS populations, (2) the selection of a new student sample for the HSTS in some schools, (3) the differences in the cooperation of the schools and the students between the studies. Furthermore, since the main 1990 NAEP study consisted of four parallel sets of assessments (reading, regular mathematics, science and mathematics estimation) a separate set of linked weights were developed for reading and science, regular mathematics (print assessment), and mathematics estimation (tape assessment). In addition, a separate set of weights were provided for the students who were excluded from the NAEP assessments on the basis of a handicap or limited English proficiency.

The NAEP and the 1990 High School Transcripts Study (HSTS) used a complex sample design with the goal of securing a sample from which estimates of population and subpopulation characteristics could be obtained with reasonably high precision (as measured by low sampling variability). At the same time, it was necessary that the sample be economically and operationally feasible to obtain. The resulting sample had certain properties that had to be taken into account to ensure valid analysis of the transcript data.

The NAEP and 1990 High School Transcripts Study sample was obtained through a stratified multistage probability sampling design that included provisions for sampling certain subpopulations at higher rates. To account for differential probabilities of selection, and to allow for adjustments for nonresponse, each student was assigned a sampling weight. Section 1.1 discusses the procedures used to derive the sampling weights.

Another consequence of the sample design is its effect on the estimation of sampling variability. Because of the effects of multistage design (students within schools, schools within primary sampling units) and because of the effects of certain adjustments to the sampling weights

(poststratification and weighting adjustments), observations made on different students cannot be assumed to be independent of one another. As a result, ordinary formulas for the estimation of the variance of sample statistics, based on assumptions of independence will tend to underestimate the true sample variability. Section 1.2 discusses the jackknifing technique used to estimate sampling variability.

1.1 Derivation of the Sample Weights

In order to make valid inferences about the entire population of graduated 12th-grade students from the sample of student transcripts collected and assessments, it is necessary to use the sampling weights. The weights reflect the probability sampling scheme used to arrive at the sample of students who were invited to the sessions and for whom transcripts were requested. The weights also reflect the impact of sample nonresponse at the school and the student level, and make adjustments for these groups to decrease the potential bias that might arise through differential nonresponse across population subgroups. Finally, improvements to the precision of weighted estimates results from the application of poststratification factors to the sample weights.

Since the derivation of the sampling weights and the estimation of the sampling variability are strongly related to the sample design, we will discuss the main features of the sampling design again. The more detailed discussion can be found in Chapter 6 of the *1990 High School Transcript Study Technical Report*.

The transcript study school sample consisted of schools with 12th-grade enrollment which were selected to the NAEP 1990 grade 12/age 17 main school samples. The NAEP and the 1990 High School Transcript Study surveys utilized a multistage probability sample design consisting of several stages of selection. The first-stage unit, or primary sampling unit (PSU), is a county or a group of counties. The second stage unit is a school with 12th-grade enrollment, and the third stage unit is a student enrolled in the 12th grade. Each first-stage unit was selected with probability proportional to its measure of size (PPS), and the probabilities of selection for the subsequent stages of selection were such that the overall probabilities of selection of students were approximately uniform, with exceptions for certain subpopulations that were oversampled by design.

Some schools in certain subpopulations were given a higher probability of selection. Each public school with minority (Black and/or Hispanic) enrollment in excess of 15 percent of total enrollment was given the double the probability of selection of a public school of similar size in the same PSU with minority enrollment below 15 percent. Each private school was given triple the probability of selection of a low-minority public school of similar size. These greater probabilities of selection were used to ensure adequate samples of private school students in order to allow the derivation of reliable estimator for such students. Lower sampling rates were also used for very small schools (those schools with only 1 to 19 eligible students). This was done in an optimum manner to reduce the variances per unit of cost. The estimation of population characteristics must take disproportionate representation into account. This is accomplished by assigning a weight to each respondent, where the weights appropriately account for the sample design and reflect the appropriate proportional representation of the various type of individuals in the populations.

The final student weight was constructed in five steps. The first step was to construct the student base weight (or design unbiased weight) which is the reciprocal of the probability of inclusion of a student to a particular session. The second step was to adjust the student base weight for the schools which could not be linked to NAEP assessments, i.e., the noncooperating schools for both studies and the cooperating schools where a new student sample had to be drawn for the HSTS, so that the weighted estimates for the students obtained from the linked schools will also represent the non-linked schools. The third step was to adjust the student weight to compensate for the nonresponse in the NAEP assessments. In the fourth step, the school nonresponse adjusted student weights were poststratified, so that the estimates obtained by using the poststratified weight for certain subpopulations agreed with independent estimates. The independent estimates were obtained from Current Populations Survey (CPS) estimates for various student subgroups. These poststratified estimates have a smaller mean squared error than would have otherwise been obtained. The final step was to adjust the poststratified student weight for the graduated students with transcripts to compensate for missing transcripts.

1.1.1 Student Base Weight

The student base weight is the reciprocal of the probability of inclusion of a student to a particular session. The base weight for the k-th student in the s-th session of the j-th school and i-th PSU, was computed as a product of four weights:

$$W^{(STB)}_{ijk} = W^{(1)}_i W^{(2)}_{j|i} W^{(3)}_{s|ij} W^{(4)}_{k|ijs}$$

where,

$$W^{(1)}_i = 1/p^{(1)}_i$$

$$W^{(2)}_{j|i} = 1/p^{(2)}_{j|i}$$

$$W^{(3)}_{s|ij} = 1/p^{(3)}_{s|ij}$$

$$W^{(4)}_{k|ijs} = 1/p^{(4)}_{k|ijs}$$

$p^{(1)}_i$ is the probability of selection of the i-th PSU,

$p^{(2)}_{j|i}$ is the conditional probability of selection of the j-th school given the i-th sample PSU,

$p^{(3)}_{s|ij}$ is the conditional probability of allocation of the s-th session type given the j-th sample school and the i-th sample PSU,

$p^{(4)}_{k|ijs}$ is the conditional probability of selection of the k-th student given that he/she was assigned to the s-th session type in the j-th sample school and the i-th sample PSU.

1.1.2 School Nonresponse Adjustment

The second weighting step was to compute the school nonresponse adjustment factors to adjust the student base weight for the school nonresponse.

The HSTS school sample consists of 379 schools. Eight of these schools were found to be ineligible because they did not have any 12th-grade enrollment; 41 schools were considered as nonrespondents of which 38 refused to participate in the survey, 1 (with a 12th-grade enrollment

of 3 students) provided unusable materials, and for the remaining 2 the survey materials were lost in the mail. Thus, 330 schools were respondent for the HSTS.

Table 1 shows the 371 HSTS eligible schools by their cooperating status and linked status. The table shows that out of the 330 schools participated in HSTS, 47 did not cooperate in NAEP, and 79 participated in NAEP but a new student sample had to be drawn for the HSTS. Therefore, it was possible to link the transcripts with NAEP assessment records for only the sample students in the remaining 204 schools.

Table 1. The numbers of the HSTS eligible schools by the NAEP and the HSTS cooperation status, and the NAEP and HSTS link status

HSTS	NAEP	
	Cooperated	Not cooperated
Cooperated and linked	204	0
Cooperated but not linked	79	47
Not cooperated	17	24

The main reason for nonresponse adjustment is to reduce the potential bias in the survey estimates caused by the noncooperating schools and the cooperating but not linked schools. Separate nonresponse adjustment factors were computed for certain subpopulations which are called the nonresponse adjustment classes (or cells). Within these subpopulations the students from the linked schools will also represent the students in not linked schools. The nonresponse adjustment classes were formed by classifying the PSU's and therefore the schools, by NAEP Region, PSU certainty/noncertainty and urbanicity status, and PSU high minority status.

Table 2 shows the final school nonresponse adjustment classes. There are 8 classes instead of 18 because some of the classes were collapsed with others. Without collapsing, the small sample sizes in these classes would have resulted in increased variance and given rise to unstable estimates.

A separate set of nonresponse adjustment factors had to be computed for each session type, because not all the session types were allocated to every school. Some schools were known

Table 2. The number of eligible and linked schools, and the school nonresponse adjustment factors by school nonresponse adjustment classes and by session types

Certainty/ Noncertainty (MC) Urbanicity	Minority Status	Region	Reading and Science			Print Mathematics			Tape Mathematics			Excluded Students		
			Sample Counts		Nonresponse Adjustment Factor	Sample Counts		Nonresponse Adjustment Factor	Sample Counts		Nonresponse Adjustment Factor	Sample Counts	Nonresponse Adjustment Factor	
			Eligible	Linked	Eligible	Linked	Eligible	Linked	Eligible	Linked	Eligible	Linked		
Certainty, MSA	All	Northeast & Central	68	29	2.234	61	23	2.247	56	20	2.234	69	30	2.236
Certainty, MSA	Low	Southeast & West	49	22	2.433	47	20	2.483	41	15	2.600	53	25	2.427
Certainty, MSA	High	Southeast & West	16	13	1.051	17	14	1.050	14	11	1.057	18	15	1.050
MC, MSA	All	Northeast & Central	58	33	1.922	57	30	1.999	46	24	1.941	63	37	1.923
MC, MSA	Low	Southeast & West	34	23	1.626	32	21	1.626	27	18	1.524	35	24	1.625
MC, MSA	High	Southeast & West	31	15	2.106	32	15	2.095	26	12	2.173	36	18	2.096
MC, NorthMSA	All	Northeast & Southeast	48	24	1.537	46	22	1.548	30	17	1.313	52	26	1.541
MC, NorthMSA	All	Central & West	41	27	1.257	35	23	1.270	24	16	1.236	45	29	1.268

to be noncooperating for NAEP before the actual session allocation was carried out. Consequently, no session was allocated in these schools. However, in adjusting for school nonresponse, it was assumed that all session types have been allocated in these schools, and thus these schools were treated as nonrespondent for all session types.

The school weight, the reciprocal of the overall probability of selection of the j -th school in the i -th PSU, $W^{(SC)}_{ij}$, was computed as:

$$W^{(SC)}_{ij} = W^{(1)}_i * W^{(2)}_{j|i}$$

The school nonresponse adjustment factor was computed for each nonresponse class and for each allocated session type as:

$$SCNRAF_{s\alpha} = \frac{\sum_{i \in S(s\alpha)} W^{(SC)}_{i\alpha} W^{(3)}_{s|i\alpha} G12_{i\alpha}}{\sum_{i \in SR(s\alpha)} W^{(SC)}_{i\alpha} W^{(3)}_{s|i\alpha} G12_{i\alpha}}$$

where,

$SCNRAF_{s\alpha}$ is the school nonresponse adjustment factor for the s -th session type and the α -th nonresponse adjustment class,

$W^{(SC)}_{i\alpha}$ is the school weight for the i -th school in the α -th school nonresponse adjustment class (for a substitute school, the school weight is the school weight of the original school for which it substituted),

$W^{(3)}_{s|i\alpha}$ is the session allocation weight for the s -th session type for the i -th school in the α -th school nonresponse adjustment class,

$S(s\alpha)$ is the collection of all eligible (linked and not-linked) original sample schools at which the s -th session type was allocated in the α -th school nonresponse adjustment class (not substitute schools),

$SR(s\alpha)$ is the collection of all linked schools at which the s -th session type was conducted in the α -th school nonresponse adjustment class (including the substitute schools which replaced some of the noncooperating schools),

$G12_{i\alpha}$ is the 12th-grade enrollment for the i -th school in the α -th school nonresponse adjustment class.

The school nonresponse adjustment factors by session type are shown in Table 2.

1.13 NAEP Student Nonresponse Adjustment

The NAEP student nonresponse adjustment factors were computed to reduce the potential bias in the survey estimates due to nonparticipation of the sample students in the NAEP assessments. A separate set of nonresponse adjustment factors were computed for each session type. The nonresponse adjustment cells were formed by classifying the students by NAEP region (northeast, southeast, central and west), PSU certainty/noncertainty and urbanicity status (certainty, noncertainty MSA and noncertainty non-MSA), and PSU high minority status (which was formed only for the southeast and west), and the age of student (18 years old and younger, and over 18). For each session type, 36 nonresponse adjustment classes would have been obtained. However, for some session types because of the small sample sizes some of the classes had to be collapsed. The following classes were collapsed:

For the print mathematics session:

Older student/Certainty/Northeast with older student/Certainty/Central

Older student/Non-MSA/Low minority/Southeast with Older student/Non-MSA/Low minority/West

Older student/Non-MSA/High minority/Southeast with older student/Non-MSA/High minority/West

For tape mathematics session:

Older student/Certainty/Northeast with Older student/Certainty/Central

Older student/Certainty/Low minority/Southeast with Older student/Certainty/Low minority/West

Older student/Certainty/High minority/Southeast with Older student/Certainty/High minority/West

Older student/Noncertainty MSA/Low minority/Southeast with Older student/Noncertainty MSA/Low minority/West

Older student/Noncertainty MSA/High minority/Southeast with Older student/Noncertainty MSA/High minority/West

Older student/Non-MSA/Northeast and Older student/Non-MSA/Southeast with Older student/Non-MSA/West

For the excluded students:

All age classes were collapsed

Certainty/Northeast with Certainty/Central

Noncertainty MSA/High minority/Southeast with Noncertainty MSA/High minority/West

The NAEP student nonresponse adjustment factor for the h-th NAEP student weight adjustment class and for the s-th session type, $STNNRAF_{sh}$ was computed as:

$$STNNRAF_{sh} = \frac{\sum_{i \in B(sh)} W_{shi}^{(STB)} SCNRAF_{shi}}{\sum_{i \in BR(sh)} W_{shi}^{(STB)} SCNRAF_{shi}}$$

where,

$W_{shi}^{(STB)}$ is the student base weight for the i-th student invited to the s-th session in the h-th nonresponse adjustment class,

$SCNRAF_{shi}$ is the nonresponse adjustment factor for the i-th student invited to the s-th session in the h-th nonresponse adjustment class,

$B(sh)$ is the collection of all sample students enrolled in 12th grade and invited to the s-th session type in the h-th nonresponse adjustment class,

$BR(sh)$ is the collection of all sample students enrolled in the 12th grade and invited and assessed for the s-th session in the h-th nonresponse adjustment class.

1.1.4 Poststratified Student Weight

As in most sample surveys, the respondent weights are random variables that are subject to sampling variability. Even if there were no nonresponse, the respondent weights would at best provide unbiased estimates of the various subgroup proportions. However, since unbiasedness refers to average performance over a conceptually infinite number of replications of the sampling, it is unlikely that any given estimate, based on the achieved sample, will exactly equal the population value. Furthermore, the respondent weights have been adjusted for nonresponse and a few extreme weights have been reduced in size.

To reduce the mean square error of estimates using the sampling weights, these weights were further adjusted so that estimated population totals for a specified subgroup population, based on the sum of student weights for specified type, were the same as presumably better estimates based on composites of estimates from 1987 and 1988 Current Population Survey and 1990 population projections made by the Census Bureau. This adjustment, called poststratification, is intended especially to reduce the mean squared error of estimates relating to student populations that span several subgroups of the population. The poststratification classes were defined in terms of race/ethnicity and NAEP region.

The post-stratification adjustment factor, $STPSAF_{sg}$, for the s -th session type and the g -th post-stratification adjustment cell was computed as:

$$STPSAF_{sg} = \frac{C_g}{\sum_{ki \in E(g)} W_{gki}^{(STB)} SCNRAF_{gki} STNNRAF_{gki} f_{sk}}$$

where,

C_g is the 12th grade enrollment control total for the g -th poststratification class,

$E(g)$ is the collection of all sample students enrolled in 12th grade and assessed in NAEP, and whose 18-th birthday was on or after October 1, 1989, in the g -th poststratification class,

$W_{gki}^{(STB)}$ is the full sample student base weight for the i -th student assessed for the k -th session in the g -th poststratification class,

$SCNRAF_{gki}$ is the school nonresponse adjustment factor for the i -th student assessed for the k -th session in the g -th poststratification class,

$STNNRAF_{gki}$ is the NAEP student nonresponse adjustment factor for the i -th student assessed for the k -th session in the g -th poststratification class,

f_{sk} is the k -th element of the vector f_s , which is defined as follows (where k is an index for the session types: reading and science, print mathematics, tape mathematics, and the excluded students):

For $s =$ reading and science: $f_s = (1,0,0,1)$;

for $s =$ print mathematics: $f_s = (0,1,0,1)$;

for $s =$ tape mathematics: $f_s = (0,0,1,1)$;

for $s =$ the excluded students: $f_s = (16/27, 8/27, 1/9, 1)$.

Note that f'_s is the transpose of f_s .

The poststratification cells, the independent estimates, and the poststratification factors by session types are shown in Table 3.

Table 3. The control totals for the students 18 or younger and enrolled in the 12th grade, and the poststratification factors by poststratification classes and the session types

Race/ethnicity	Region	12th-Grade students Count	Poststratification factor			
			Reading and science	Print math	Tape math	Excluded students
Black, not Hispanic	All	305,359	1.61	1.47	1.76	1.58
Hispanic	All	173,571	1.01	1.08	1.01	1.03
White, not Hispanic	Northeast	462,262	1.02	0.99	0.93	1.00
White, not Hispanic	Southeast	343,317	0.81	0.79	0.70	0.79
White, not Hispanic	Central	546,337	1.20	1.17	1.29	1.20
White, not Hispanic	West	452,671	1.26	1.12	1.14	1.20
Other	All	97,544	0.88	0.92	0.99	0.90

Note that although the poststratification factors were derived using only data for students born on or after October 1, 1971, the factors shown in Table 3 were applied to all students within a session type defined by a given race/ethnicity and region combination, regardless of age.

1.1.5 The Adjustment of Student Weights for Students with Missing Transcripts

The HSTS student nonresponse adjustment factors were computed to compensate for missing or incomplete transcripts and to remove the potential bias on the substantive variables.

A separate set of HSTS nonresponse adjustment factors was computed for each session type. The student nonresponse adjustment classes developed for the HSTS weighting were used. Table 4 shows the unweighted counts for the students, and the nonresponse adjustment factors by the nonresponse adjustment classes for each session type.

Table 4.

The sample counts for the graduated students and the graduated students with transcript and the nonresponse adjustment factors by HSTS nonresponse adjustment classes and the MAEP session types

Region	Age	Ethnicity	Sex	Reading and Science				Print Mathematics				Tape Mathematics				Excluded Students	
				Sample Counts		Nonresponse Adjustment Factor	Sample Counts		Nonresponse Adjustment Factor	Sample Counts		Nonresponse Adjustment Factor	Sample Counts		Nonresponse Adjustment Factor	Sample Counts	
				Graduated with Transcript	255		249	1.024		117	114		1.043	42		42	1.000
West	All	Black & Hispanic	Male	255	249	1.024	117	114	1.043	42	42	1.000	35	34	1.145		
West	≤ 18	Black & Hispanic	Female	267	265	1.015	123	123	1.000	51	51	1.000	12	12	1.000		
West	> 18	Black	Female	6	6	1.000	4	4	1.000	3	3	1.000	5	5	1.041 (1)		
West	> 18	Hispanic	Female	44	44	1.000	15	15	1.000	7	7	1.000	9	8	--		
West	≤ 18	White & Other	Male	607	595	1.018	293	284	1.033	124	119	1.041	17	14	1.143 (2)		
West	≤ 18	White & Other	Female	693	678	1.017	367	363	1.018	141	139	1.009	13	12	--		
West	> 18	White & Other	All	236	230	.023	97	92	1.058	36	36	1.000	52	46	1.156		
All other	≤ 18	All	All	5,008	4,959	1.011	2,496	2,481	1.007	1,010	997	1.016	71	61	1.153		
All other	> 18	Black	All	185	184	1.006	103	100	1.029	42	41	1.036	41	36	1.191		
All other	> 18	All other	All	749	738	1.012	331	327	1.012	131	131	1.000	109	99	1.079		

Note: (1) For the excluded students the adjustment classes "west/>18/Black/female" and "west/>18/Hispanic/female" are combined.
 (2) For the excluded students the adjustment classes "west/<18/White & Other/female" and "west/<18/White & Other/male" are combined.

The student nonresponse adjustment factor for a student assessed for the s-th session type and in the p-th nonresponse adjustment class, $STHNRAF_{sp}$, was computed as:

$$STHNRAF_{sp} = \frac{\sum_{i \in G(sp)} W_{spi}^{(STB)} SCNRAF_{spi} STNNRAF_{spi} STPSAF_{spi}}{\sum_{i \in GR(sp)} W_{spi}^{(STB)} SCNRAF_{spi} STNNRAF_{spi} STPSAF_{spi}}$$

where,

$W_{spi}^{(STB)}$ is the student based weight for the i-th student assessed for the s-th session type and in the p-th nonresponse adjustment class,

$SCNRAF_{spi}$ is the school nonresponse adjustment factor for the i-th student assessed for the s-th session type in the p-th nonresponse adjustment class,

$STNNRAF_{spi}$ is the NAEP student nonresponse adjustment factor for the i-th student assessed for the s-th session type in the p-th nonresponse adjustment class,

$STPSAF_{spi}$ is the poststratification adjustment factor for the i-th student assessed for the s-th session type in the p-th nonresponse adjustment class,

$G(sp)$ is the collection of all graduated students assessed for the s-th session type and in the p-th nonresponse adjustment class,

$GR(sp)$ is the collection of all graduated students with transcript assessed for the s-th session type in the p-th nonresponse adjustment class.

1.1.6 The Final Student Weight

The final student weight was obtained as a product of the student base weight, the school nonresponse adjustment factor, the NAEP student nonresponse adjustment factor, the poststratification factor, and the HSTS student nonresponse adjustment factor.

$$W_{spgh-i}^{(ST)} = W_{spgh-i}^{(STB)} SCNRAF_{spi} STNNRAF_{spi} STPSAF_{spi} STHNRAF_{sp}$$

where,

$W_{spgh-i}^{(STB)}$ is the student base weight for the i-th student assessed for the s-th session type in the s-th school nonresponse adjustment class and the h-th NAEP student nonresponse adjustment class and the g-th poststratification class and the p-th HSTS student nonresponse adjustment class,

$SCNRAF_{s,c}$ is the school nonresponse adjustment factor for the i -th student assessed for the s -th session type in the c -th school nonresponse adjustment class,

$STNNRAF_{s,h}$ is the NAEP student nonresponse adjustment factor for the i -th student assessed for the s -th session type in the h -th NAEP student nonresponse adjustment class,

$STPSAF_{s,g}$ is the student poststratification factor for the i -th student assessed for the s -th session type in the g -th poststratification class,

$STHNRAF_{s,p}$ is the HSTS student nonresponse adjustment factor for the i -th student assessed for the s -th session type in the p -th HSTS nonresponse adjustment class.

Table 5 presents statistics for the distribution of the weights by session type: the base weight, and the weights obtained after each stage of adjustment leading to the final student weight.

1.2 The Estimation of Sampling Variability and the Replicate Weights

The procedures developed to estimate the sampling variability for the NAEP and HSTS studies were also used for the linked weights. (See, the *1990 HSTS High School Transcript Technical Report*, Final, Section 6.2.)

The replicates developed for the NAEP and HSTS studies were also utilized for the linked weights. After obtaining a student base weight for each replicate, all remaining full-sample weighting steps leading to the final student weight were performed on each replicate. For each replicate: a school nonresponse adjustment factor, a NAEP student nonresponse adjustment factor, a poststratification factor, and a HSTS student nonresponse adjustment factor were computed and these factors were applied to the replicate student base weight to obtain 56 replicate final student weights.

Table 5. Statistics for the weights by adjustment stage and by session type

Reading and Science					
	n	mean	median	max	cv(%)
