ABSTRACT

This directory contains information about institutions and organizations involved in organic, alternative, or sustainable agriculture, and its focus is on education, training, and provision of information. The directory contains program and contact information for 122 institutions, associations, centers, universities, and foundations; and 4 Sustainable Agriculture Research and Education (SARE) regional program contacts for information on research grants. The scope of coverage is limited to the United States and Canada. (LZ)

INTRODUCTION TO THE SEVENTH EDITION

Information about the institutions and organizations listed in this directory was compiled from a number of sources. Criteria for selection were an institution's involvement in organic, alternative, or sustainable agriculture, and its focus on education, training, or provision of information. Scope of coverage is limited to the United States and Canada. Inclusion of an organization in this directory does not imply a recommendation by the Alternative Farming Systems Information Center (AFSIC).

AFSIC is one of eleven Information Centers at the National Agricultural Library (NAL) that provide in-depth coverage of specific subject areas relating to the food and agricultural sciences. AFSIC focuses on alternative farming systems that aim at maintaining agricultural productivity and profitability, while protecting natural resources, especially sustainable, low-input, regenerative, biodynamic, or organic farming and gardening. Support for the Center comes to the Library from the USDA's Sustainable Agriculture Research and Education (SARE) program, which is under the jurisdiction of the Cooperative State Research, Education, and Extension Service (CSREES).

Each listing in this updated edition of "The Directory" has been verified with the organization. Our thanks to all those who contributed to its compilation.

Jane Potter Gates, AFSIC Coordinator, had significant assistance in the preparation of this edition from **Michael Cassady**, a volunteer at the Center. This assistance is gratefully acknowledged.
