ABSTRACT

This report presents the results of the 1995 study of the performance and management of college and university endowments, based on 394 institutions providing data. A summary abstract provides an overview of performance and investment data; and Part 1 of the study provides a brief commentary covering endowment characteristics, historical performance data, and terminology used. The exhibits in Part 2 are divided into two sections. In the first section, 12 exhibits cover general endowment characteristics, including: first, asset values, institution type, ranked by type of institution and by full-time equivalent student, and type of endowment; second, growth (versus market indexes), withdrawals, payout rates, spending rates and rules, and gift flow rates; and third, asset allocation structure. The larger second section of Part 2 provides data on the investment pool including: (1) dollars of assets; (2) performance measures by institution, by institution rank, returns (by various measures: nominal, real, average, cumulative); (3) asset allocation structure; (4) investment management and custodial expenses; (5) investment managers, by institution, and custodians. Appendix A is a glossary of terms; Appendix B defines various standard market indices. Also appended to the report is a list of contributors, sponsors, and associates. A separate formal acknowledgement booklet listing contributors to the study by level of gift accompanies the report. (CH)

Foreword

Because skillful endowment management is crucial to the financial well-being of America's colleges and universities, the annual NACUBO Endowment Study (NES) seeks to help administrators and trustees evaluate the performance of their endowments and to acquaint them with the investment policies and practices of other higher education institutions.

First published in 1971, the NES was originally based on a prior survey conducted by administrators at Dartmouth College. The earliest editions focused solely on investment performance, but subsequent years have seen the NES expand to include a broad variety of issues of concern to trustees and administrators, including asset allocation, spending rates, and manager and custodial relationships. As the most comprehensive published source of data on college and university endowments, the NES has become the authoritative guide to the investment management practices and trends of these institutions.

Acknowledgments

This study was prepared under the direction of NACUBO by Cambridge Associates, Inc. Cambridge Associates provides investment and financial research and consulting services to nonprofit endowed institutions. The firm has offices in Boston, Washington, D.C., San Francisco, and London. NACUBO would like to thank Cambridge Associates for its fine work in preparing this study and in administering the questionnaires on which it is based.

NACUBO would also like to acknowledge the financial support provided by the firms identified in this volume and in the recognition booklet. Without their generous contributions, NACUBO could not publish so comprehensive an analysis of endowment management practices.

Abstract

1. Of the 463 institutions participating in the *1995 NACUBO Endowment Study* (NES), 461 report endowment assets, which total \$102.5 billion as of fiscal 1995 year-end. These assets remain highly concentrated: 49 institutions (11%) with endowments of \$400 million or more represent 62% of the total, and just 17 institutions (less than 4%) with assets in excess of \$1 billion represent almost 44% of the total.
2. For fiscal year 1995, the equal-weighted mean total return of the 394 college and university investment pools providing June 30 data for this year's study is 15.5%, dramatically more than the 3.0% earned the previous year. The dollar-weighted mean total return is 16.9% (versus 4.5% last year), and the median, 15.5% (versus 3.0% in 1994). Institutions that reported returns on a gross basis (i.e., before deduction of investment management expenses) earned an average return of 16.0%, while those that reported net returns averaged 15.3%.
3. Because endowment assets are invested predominantly in domestic stocks and bonds, the relative performance among endowment investment pools typically depends primarily on their asset allocation between these two major asset classes. In fiscal year 1995, domestic common stocks returned a rousing 24.7% (as measured by the Wilshire 5000), and domestic bonds rallied from their 1994 slump to return 12.5% (as measured by the Lehman Brothers Aggregate Bond Index). Cash equivalents (91-day U.S. Treasury bills), which had outperformed both stocks and bonds in fiscal 1994, returned 5.6%, while foreign stocks (measured by the MSCI EAFE Index), returned only 1.7% compared to 17.0% the previous year. A higher allocation to cash, which is characteristic of smaller endowments, was therefore a drag on performance in 1995, while the higher equity allocations of the larger endowments enabled them to earn the highest return of any group, despite their having the lowest allocation to domestic common stocks. The average return for those investment pools with assets in excess of \$400 million was 16.6%; for those with assets of \$100 million to \$400 million it was 15.9%; for those with assets of \$25 million to \$100 million, 15.8%; and for those with assets of \$25 million and less, 13.8%.
4. In general, there was very little shift in the average asset allocation from June 30, 1994 to June 30, 1995, although it may be worth noting that larger institutions have been increasing their commitments to equity real estate, profiting from the recovery in that asset class. The largest change in the average allocation of assets is the 2.4-percentage-point increase in domestic common stock exposure, presumably as a result primarily of market action. Despite the wide disparity in returns between domestic and foreign currency common stocks, the average allocation to the latter again increased, although by a much smaller margin than in recent years. Among the largest group of institutions, however, the allocation to foreign stocks declined slightly -- but this is also attributable to the superior performance of domestic common stocks rather than to active asset allocation decisions. The most

Abstract (continued)

obvious disparities among institutions are that the larger investment pools have significantly greater allocations to foreign common stocks and to all kinds of alternative equity investments (including real estate), and significantly smaller allocations both to domestic common stocks and to fixed income securities. Last year, for the first time on record, the largest investment pools' average allocation to domestic fixed income dropped below 20%; in fiscal 1995 it continued to decline, and now averages only 17.5%, considerably less than the equal-weighted average of 28.3%.

5. On average, total withdrawals from endowment amounted to 6.1% in fiscal 1995, up slightly from the 6.0% reported last year. Of this, 4.7% consisted of endowment payout (what most institutions label "spending"), while 0.4% went to pay investment management and custody fees, and 1.0% to "other distributions" that include non-recurring capital expenditures funded from endowment. Institutions that congratulate themselves on the maintenance of a spending rate below 5.0% should ensure that "other distributions" are not a recurring mechanism for payout consistently in excess of that mandated by a spending policy designed to provide for the preservation of the endowment's purchasing power.
6. The median figure for new gifts to endowment as a percentage of average assets is 3.2%, well below last year's rate of 4.4%, due both to the increased value of the assets on which these percentage calculations are based and to a significant decline in the dollar level of giving. However, 1994 was a banner year for donations, setting a record for the dollar value of new gifts, and almost matching the record gift flow rate of 4.5% set in 1986. Public institutions continue to experience sharply higher gift flow rates than private institutions (7.9% versus 3.4%), but the largest endowments (which are predominantly private) still attract by far the highest average dollar volume of annual giving.
7. For the ten-year period ended June 30, 1995, the median investment pool, with an average annual return of 11.7%, underperformed the Wilshire 5000 (13.9%), but outperformed the Lehman Brothers Aggregate Bond Index (10.0%), and 91-day U.S. Treasury bills (5.8%). Thus, \$100 invested in the Wilshire 5000 on July 1, 1985, would have been worth \$367.80 on June 30, 1995, compared with \$302.50 for the same investment in the median investment pool, and \$259.60 for the same investment in the Lehman Brothers Aggregate Bond Index.
8. The real (inflation-adjusted) average annual rate of return for the median investment pool over this ten-year period is 7.9% if deflated by the Consumer Price Index (CPI-U), or 7.1% if deflated by the Higher Education Price Index (HEPI). In 1985 constant dollars, therefore, \$100 invested in the median pool on July 1, 1985, would have been worth \$213.40 on June 30, 1995, compared with \$259.50 for the same investment in the Wilshire 5000, and \$183.20 in the Lehman Brothers Aggregate Bond Index (deflated by the CPI-U).

PART I
COMMENTARY

Endowment Characteristics

Distribution of Endowment Wealth. Of the 463 institutions participating in the *1995 NACUBO Endowment Study* (NES), 461 report endowment assets, which total \$102.5 billion as of fiscal 1995 year-end. As Exhibits 1 through 5 indicate, this wealth remains highly concentrated: only 49 (or 11%) of these 461 institutions have endowment assets in excess of \$400 million, yet they control 62% of the total; indeed, the 17 institutions (less than 4%) with endowment assets in excess of \$1 billion control almost 44% of the total.

Endowment Size. The largest endowment among all participating institutions continues to be that of Harvard University (\$7.0 billion), while the University of Texas System (\$5.0 billion) is the largest among participating **public** institutions. At **private** institutions, average¹ endowment assets per full-time equivalent (FTE) student are \$68,885, more than nine times greater than those of the participating **public** institutions with \$7,620 per FTE student. For fiscal year 1995, the participating **public** institution with the greatest endowment assets per FTE student is the Virginia Military Institute Foundation (\$106,931 per FTE student), followed by the Oregon Health Sciences University Foundation (\$67,546 per FTE student), and the University of Virginia (\$45,761 per FTE student). Among **private** institutions, the highest ranking are Princeton University (\$608,625 per FTE student), the Academy of the New Church (\$591,714 per FTE student), and the Webb Institute of Naval Architecture (\$558,160 per FTE student). (See Exhibits 4 and 5.)

Slightly more than one-half of the **public** institutions participating in this year's NES are research universities (according to the Carnegie classifications), and they command the lion's share (87%) of the endowment assets of the public sector colleges and universities. Among **private** institutions, the distribution of participants and assets by Carnegie classification is rather different: 48% of private institutions included in the study are baccalaureate colleges and universities (i.e., liberal arts), and these control 23% of the private institutions' aggregate endowment assets; the 39 private research universities in this year's report constitute 12% of all private institutions participating, but their portion of the private institutions' aggregate endowment assets is 62%. (See Exhibit 1B.)

Endowment Composition. Of the \$88.5 billion in aggregate assets controlled by the 427 institutions providing data on endowment composition for this year's study, approximately 64% (\$56.3 billion) represents **true endowment** (i.e., assets donated to serve as permanent capital, only the **income**

¹ Throughout this report, the "average" of any given data set is the equal-weighted mean, unless otherwise indicated.

from which may be spent).² The remaining 36% (\$32.2 billion) represents **quasi-endowment** (funds designated to function as endowment by governing boards), **term endowment**, and **funds held in trust by others**, but does **not** include life income funds, which are accounted for outside the endowment. Of these three remaining categories, **quasi-endowment** constitutes by far the largest segment (32% of aggregate endowment assets, or roughly \$28.1 billion), with **term endowment** constituting just 3% (approximately \$2.3 billion), and **funds held in trust by others** another 2% (or \$1.8 billion). (See Exhibit 6.)

Endowment Growth. As Exhibit 7 indicates, over the 15-year period ended June 30, 1995, the NACUBO Endowment Wealth Index³ rose approximately 453%, compared with increases of approximately 737% and 681% for the S&P 500 and Wilshire 5000 stock indexes, and 380% for the Lehman Brothers Aggregate Bond Index. In real (i.e., inflation-adjusted) terms, the NACUBO Endowment Wealth Index has increased 200% over this 15-year period, which translates into average annual real compound growth of approximately 7.6%.

Since real endowment growth is the sum of investment returns, gifts and other additions to endowment, and spending, all adjusted for inflation, it follows that such growth can only occur when investment returns plus additions exceeds spending plus inflation. As the earnings power of the baby boom generation rose during the 1980s, the pool of potential donors increased significantly, and gift flow did in fact increase modestly. It should be remembered, however, that the gift flow rate is the dollar value of gifts expressed as a percentage of endowment assets, and so when investment returns are strong, an increasing dollar volume of donations is required to maintain a constant gift flow rate. This was exactly the situation throughout the past 12 years: the modest increase in gift flow rates represents a substantial increase in the dollar volume of gifts because endowment assets were growing rapidly as a result of the bull market. On June 30, 1982, the Dow Jones Industrial Average (DJIA) closed at 811.93 and long-term Treasury bonds yielded 13.8%. Thirteen years later, the DJIA closed at 4,556.10 and the long bond yielded 6.3%. Not since the 1920s have both stocks and bonds provided such unusually generous returns, and during the first eight years of this period the economy experienced its longest period of expansion in 40 years. At a time when many public and private institutions are searching for ways to bridge the gap between revenues and

² Note that the use of these endowment categorizations in the future is at issue. The new FASB-mandated accounting and reporting standards require the classification and reporting of all net assets (including those now characterized as endowment) in three categories: permanently restricted, temporarily restricted, and unrestricted. Ordinarily, only the historic book value of donor-restricted endowment funds will be classified as permanently restricted net assets. The accumulated gains of true endowment funds will be classified either as unrestricted, or in some cases temporarily restricted, depending on the interpretation of applicable law. The quasi-endowment generally will fall into the unrestricted category. We are studying the effect these accounting and reporting changes are likely to have in future years on institutions' abilities to report endowment size and composition reliably and consistently for this study.

³ This index is based on the median market value of participating endowments, and changes reflect investment returns, spending, and new gifts.

expenditures, it is tempting to extrapolate these extraordinary returns into the future and to budget endowment spending accordingly. In this context, however, it is instructive to note that for a representative group of institutions, the average annual real return after spending for the ten-year period ended June 30, 1995, is 3.1%, but for the 20 years ended June 30, 1994, it is only 1.2%.

Endowment Spending. Spending rules for fiscal year 1995 are reported as follows:

<u>Spending Rule</u>	Participating Institutions	
	<u>Number</u>	<u>Percentage</u>
Spend all current income	27	5.8%
Spend a prespecified percentage of current income	13	2.8
Spend a prespecified percentage of beginning market value	25	5.4
Spend a prespecified percentage of a moving average of market values	274	59.2
Increase prior year's spending by a prespecified percentage	28	6.0
Decide on an appropriate rate each year	37	8.0
Other rule	50	10.8
No established policy	5	1.1
No response	4	0.9
Total	463	100.0%

Because the universe of institutions surveyed is not identical to last year's (27 participants in the 1994 NES did not respond to this year's survey, while 43 new institutions have been added), only broad comparisons with last year's data can be made. However, it is worth noting that the percentage of institutions electing to spend a prespecified percentage of a moving average of the endowment's market value has again increased (after marking time last year), as it has for many years, and that most institutions have now recognized that a spending policy based solely on income tends to result either in unmanageable swings in the operating budget, or in distortions in asset allocation decisions as an effort is made to maintain consistent levels of cash flow in different market environments.

Of greater consequence (because it affects so many more institutions), is the question of how many institutions with a policy of spending $x\%$ of a y -year average of endowment market values recognize that a significant ebbing of the bull-market tide could result not only in a diminution in the growth in spending they have enjoyed in the past decade, but quite possibly in an actual decline in spending dollars. Historical precedent indicates that a fund invested approximately 60% in domestic and foreign stocks, 30% in fixed income, and 10% in various other asset classes inevitably experiences recurring periods of absolute decline in market values over three years. Such a decline would trigger a reduction in spending for an institution sticking to a policy of spending a fixed percentage of a three-year moving average of endowment market values. Because institutions have not had to face such a decline in the past dozen years (which makes it all

the more likely they will be faced with such a decline sometime in the next dozen years), very few have any contingency plan for dealing with the possibility of a reduction in revenue from endowment. Those that have thought about the consequences of lower capital market returns have generally responded by cutting their spending rates to less than 5%, or by considering variants of the "constant growth" approach, which improves the predictability of spending by reducing its dependence on relatively short-term (e.g., three-year) shifts in endowment market values.

For fiscal year 1995, the average endowment payout rate reported by responding institutions is 4.7%, while total withdrawals from the endowment average 6.1%.⁴ As in the past, the equal-weighted mean payout rate is higher than the dollar-weighted rate; in addition, smaller institutions report a higher rate of "other distributions," resulting in considerably larger total withdrawals than those of the largest institutions (see Exhibit 8A). Institutions that congratulate themselves on the maintenance of a spending rate below 5.0% should ensure that "other distributions" are not a recurring mechanism for payout consistently in excess of that mandated by a spending policy designed to provide for the preservation of the endowment's purchasing power.

Endowment Gift Flow. For all responding institutions, the median of fiscal year 1995 gifts, expressed as a percentage of average endowment assets during the year, was 3.2%, sharply lower than last year's 4.4%, which almost tied the 1986 record of 4.5% and smashed all previous records for dollar value. Although the average endowment market value on which this year's gift flow rate has been computed is substantially higher than last year's, the dollar value of gifts is nevertheless considerably lower, \$2.0 billion versus \$3.2 billion, but it should also be noted that 26 fewer institutions responded to this question on the survey. (See Exhibit 10.)

There continues to be an inverse relationship between endowment size and gift flow rates (when gift flow is expressed as a percentage of average assets): if two institutions have similar pools of potential donors from whom to solicit gifts, it is obviously easier for the smaller endowment to attain a higher gift flow rate. Thus, the equal-weighted mean for the smallest endowments (\$25 million and less) is 7.2% for fiscal year 1995, while that for the largest is 2.6%. Similarly, public institutions, whose endowments tend to be smaller than those of private colleges and universities, continue to experience a higher average gift flow rate (7.9% versus 3.4%).

An institution's gift flow rate (which is a relative number) should not be confused, however, with the absolute dollar value of the gifts it receives. This year, 354 institutions responded to the survey

⁴ We have added to this year's report Exhibit 8A, "Withdrawals from Endowment," to show the components of total withdrawals from endowment. In that exhibit, "Endowment Payout" (which averages 4.7%) corresponds to what most institutions label as "spending." When all types of withdrawal are considered, however, the total is 6.3% for public institutions, 6.0% for private institutions, and 6.1% on average for all institutions.

question about gifts, reporting total receipts of \$2.0 billion. Of these 354 institutions, 69 (20%) with endowments of \$25 million or less received only 3% of all donations; 146 colleges and universities (41%) with endowments in the range of \$25 million to \$100 million account for 16% of the total; 108 institutions (31%) with endowments in the range of \$100 million to \$400 million received 45% of the donations; and 31 institutions (9%) with the largest endowments attracted 36% of total receipts. Consequently, although larger institutions experience lower gift flow rates, they also manage to attract a disproportionate share of donations. Indeed, from smaller to larger endowments the increase in dollars received is dramatic: on average, the smallest group received gifts amounting to \$974,000, while the average for the next largest group is \$2,195,000; for the next largest, \$8,243,000; and for those endowments over \$400 million, \$22,730,000 -- numbers which are all substantially below those reported last year.

Endowment Asset Allocation. For the purpose of this study, endowment holdings are classified in five broad asset categories. As of the end of the 1995 fiscal year, 89.2% of the assets of responding institutions were invested in marketable securities, 4.8% in nonmarketable securities, 3.7% in noncampus real estate, 0.7% in campus real estate, and the remaining 1.6% in other miscellaneous assets. These dollar-weighted mean percentages do not change materially when the asset allocations of endowments are categorized by institutional type or size, except that the largest endowments (over \$400 million) have a great deal more committed to nonmarketable securities (7.0%) than do endowments falling into the other three size categories. (See Exhibits 11 and 12.)

Life Income Funds

Total life income fund assets of \$4.2 billion were reported by 354 institutions. Of this total, 51% is controlled by institutions with endowment assets in excess of \$400 million, 33% by institutions with endowment assets between \$100 million and \$400 million, 15% by those with endowments in the range of \$25 million to \$100 million, and 2% by the institutions with the smallest endowments. (See Exhibit 1A.)

Investment Pool Characteristics

Of the 463 institutions responding to the 1995 NES survey, 449 provided fiscal 1995 year-end market values for their investment pools and the aggregate value is \$90.7 billion. As one might expect, these assets are concentrated as are endowment assets generally: the 44 pools with assets in excess of \$400 million control 60% (\$54.6 billion) of the total. (See Exhibit 13A.)

Fiscal Year 1995 Investment Pool Performance

Nominal Returns. As Exhibit 15 indicates, the **equal-weighted** mean nominal total return earned by respondents for the fiscal year ended June 30, 1995, is 15.5%, a dramatic improvement over the 3.0% earned the previous year. The **dollar-weighted** mean return is 16.9% (versus 4.5% last year), and the **median** return, 15.5% (versus 3.0% in 1994). The **highest** nominal total return earned by an individual pool is 37.9%, and the **lowest**, 0.3%. (See Exhibits 15, 16, 17A, and 20.) While the range of returns is considerable, their distribution is normal. The returns of 77% of all respondents fall within one standard deviation of the 15.5% equal-weighted mean and 94% are within two standard deviations. This is similar to the distribution for the ten-year period ended June 30, 1995, for which returns of 74% of responding institutions fall within one standard deviation of the equal-weighted mean (11.6%) and 95% fall within two standard deviations.

Among investment pools, the largest have usually maintained the greatest exposure to equities broadly defined and have consequently benefited from the superior long-term performance of equities compared to other asset classes. This is duly reflected in the higher long-term return of the **dollar-weighted mean** compared with the **equal-weighted mean**. Additionally, in recent years their equity holdings have become more diversified than those of smaller institutions, including larger commitments both to foreign stocks and to nonmarketable equity investments like venture capital and buyout funds. This diversification accounted for their superior returns in fiscal year 1994, when domestic stocks and bonds performed relatively poorly, but has also contributed significantly to returns in fiscal year 1995, when poor returns from foreign common stocks were more than offset by exceptional returns from alternative equity investments. As a consequence, the dollar-weighted mean again outperformed the equal-weighted mean in fiscal year 1995 (by 140 basis points), despite the relatively low average allocation of the largest investment pools to domestic common stocks.

As Exhibit 15 shows, the average return for those investment pools with assets over \$400 million was 16.6%, for those with assets in the range of \$100 million to \$400 million, 15.9%, for those with assets in the range of \$25 million to \$100 million, 15.8%, and for those with assets of \$25 million and less, 13.8%.

Comparisons with Capital Markets. For the year ended June 30, 1995, the S&P 500 returned 26.1%, the Wilshire 5000, 24.7%, the Lehman Brothers Aggregate Bond Index, 12.5%, and 91-day U.S. Treasury bills, 5.6%. Measured by the equal-weighted mean return or by the median return (both 15.5%), the average investment pool therefore underperformed a composite index weighted 70% in the Wilshire 5000 and 30% in the Lehman Brothers Aggregate (LBA) Bond Index, which returned 21.0%, and the 22.0% return of a composite weighted 70% S&P 500/30% LBA.⁵ In addition, the average investment pool

⁵ Appendix B contains detailed descriptions of the capital market indexes referred to in this report.

underperformed by 1.7% (170 basis points) a composite index weighted to reflect average investment pool asset allocations as of June 30, 1994 (see Exhibit 28). Although imperfect, this calculation suggests that active stock and bond managers failed on average to match the returns of the capital market indexes during this period, which is typical during periods when the markets are unusually strong.

Real Returns. When nominal returns are adjusted to reflect the increase in consumer prices [a 3.0% increase in the Consumer Price Index (CPI-U) in fiscal 1995 compared to 2.5% in fiscal 1994], the return for both the equal-weighted mean and for the median falls to 12.1%, while that of the dollar-weighted mean falls to 13.4% (see Exhibit 21).

Historical Investment Pool Performance

Investment Pool Returns and Returns for Capital Market Indexes. For the ten-year period ended June 30, 1995, domestic common stocks (as represented by the Wilshire 5000) produced an average annual compound return of 13.9%, bonds returned 10.0% (Lehman Brothers Aggregate Bond Index),⁶ and cash equivalents, 5.8%. At 11.7%, the median annualized return of participating investment pools therefore trailed that of the broad stock market, but exceeded those of bonds and cash equivalents (see Exhibit 15). In dollar terms, \$100 invested in U.S. common stocks on July 1, 1985, would have been worth \$367.80 on June 30, 1995, while \$100 invested in the median investment pool would have grown to \$302.50. A comparable investment in bonds (as represented by the Lehman Brothers Aggregate Bond Index) would have been worth \$259.60. (See Exhibit 19A.)

Investment Pool Returns and Inflation. Over the ten-year period ended June 30, 1995, the median annualized return of 11.7% earned by participating pools exceeds the annualized rate of inflation as measured by the CPI-U (3.5%) by 8.2 percentage points. The median annualized real return for these investment pools for this period is therefore 7.9%, which trails the 10.0% annualized real return of domestic common stocks, but exceeds the 6.2% real return of bonds, and is significantly greater than the 2.2% real return of cash equivalents (see Exhibit 21). In 1985 constant dollars, therefore, \$100 invested on July 1, 1985, in domestic common stocks (as measured by the Wilshire 5000) would have been worth \$259.50 on June 30, 1995, while \$100 invested in bonds (as measured by the Lehman Brothers Aggregate

⁶ Because it is more representative of actively managed common stock portfolios, the Wilshire 5000 rather than the S&P 500 is the index used here as a proxy for the domestic stock market. Both indexes are capitalization weighted and the 500 stocks in the S&P 500 comprise approximately 70% of the total market capitalization of the Wilshire 5000. (Because the Wilshire includes all domestic common stocks, the exact number of issues included in the index varies, but is typically over 6,000.) Similarly, although the Lehman Brothers Government/Corporate Bond Index is perhaps a more familiar benchmark, the broader Lehman Brothers Aggregate Bond Index is a more appropriate reference for most institutions because the Lehman Brothers Government/Corporate Bond Index excludes mortgage-backed securities, which have become a significant component of the fixed income market and of most fixed income portfolios.

Bond Index) would have grown to \$183.20. Invested in the median investment pool, \$100 would have become \$213.40 (see Exhibit 25A).

If the nominal returns for the past decade are deflated by the Higher Education Price Index (HEPI) rather than by the CPI-U, the average annual compound real rate of return for the median investment pool should be restated as 7.1% rather than 7.9% because the annualized increase in the HEPI is 4.3% for this period.

Investment Pool Asset Allocation. As the following table illustrates, there are various minor shifts in the average allocation of investment pool funds across 16 asset classes from June 30, 1994, to June 30, 1995, but no major changes.

Investment Pool Asset Allocation Change from 1994 to 1995

Asset Class	1995		1995		1995		1995		Change

*Lowest dollar amount held by an institution in this asset class is less than 0.1% of its investment pool.

The largest change in the average allocation of assets during the past year is the 2.4-percentage-point increase in domestic common stock exposure, presumably as a result primarily of market action. Despite the wide disparity in returns between domestic and foreign currency common stocks, the average

allocation to the latter again increased, although by a much smaller margin than in recent years. Indeed, among the largest group of institutions, which tend to be trailblazers in asset allocation and have significantly higher weightings in foreign common stock, the allocation to this asset class declined, although by a margin small enough to suggest that this is largely attributable to the superior performance of domestic common stocks rather than to active asset allocation decisions. Active asset allocation decisions have, however, dictated the lower allocations to bonds among the largest group of institutions. Last year, for the first time, this group's allocation to domestic fixed income dipped below 20%, and is now at 17.5%. The money taken from bonds has not, however, been reallocated to domestic common stocks (to which this group of institutions has the *least* exposure), but to a smorgasbord of alternative equity investments (including real estate) which are typically designed, as a package, to deliver equity-like returns, with less market risk, and diversification benefits to the total portfolio. On average, this largest group of institutions has committed approximately 20% of its assets to these alternative equity investments, more than double that of the next largest group, and this constitutes the major distinction among the asset allocation policies of the various investment pools.

In allocating so much to alternative investments, the largest institutions have deliberately reduced their exposure to systematic risk (i.e., risk inherent in an asset class itself) while increasing their exposure to manager-specific risk, since so much more of the return expected from alternative investments derives from manager skill than is the case with more conventional asset classes. However, most of these alternative investments are also more susceptible than stocks and bonds to extended periods of extreme over- and undervaluation; consequently, superior returns are typically realized only by those institutions disciplined enough to invest in a given area only when it appears significantly undervalued, and skillful enough to choose only outstanding managers.

Investment Pool Expenses

Manager Fees on Externally Managed Assets. Average manager fees as a percentage of the average market value of investment pools' externally managed assets were 0.47% (47 basis points) in fiscal year 1995, just one basis point less than the previous year after several years of decline from their high of 54 basis points in 1992 (see Exhibit 29). It is perhaps disappointing that fees have not receded further, confirming a reversal of their long rise from the 20-basis-point average reported in 1976. From 1991 through 1994, many more active common stock managers managed to outperform relevant benchmark indexes (after accounting for fees and expenses) than was the case in the latter half of the 1980s, and so one could make the case that their fees were well earned during that period. In the past year, however, a large percentage of domestic common stock managers have again underperformed the broad market indexes, confirming a pattern observable over several decades: active managers typically underperform broad market indexes when large-cap stocks are leading a strong charge; when mid- and small-cap stocks are outperforming, however, active managers generally have greater success in outperforming their

benchmarks; and when all stock prices head south in a broad bear market, active managers usually do very much better than the indexes. For those inclined to index core stock portfolios, this suggests that the best time to do so is after a period of underperformance by large-cap stocks, and/or after a broad decline in prices.

The situation is quite different among bond managers, many of whom have continued to levy higher fees than a decade ago, despite scant evidence of value added. Where institutions have taken the initiative to suggest to their stock and bond managers that a reduction in fees seems appropriate, they have usually been successful, and Cambridge Associates would encourage more institutions to take this step if their fees are not at least as low as industry averages. As with prices in any industry, investment manager fees are driven primarily by the supply of and demand for good products. Fees rose sharply throughout the 1980s because demand swamped supply, but by the early 1990s that situation had corrected and the imbalance has disappeared. Because they are generally based on assets under management, the dollar value of fees automatically increases when capital market returns are positive; as a result, managers are more susceptible to negotiating fees when returns have been poor and retaining assets becomes more critical to their cash flow. Where active common stock managers can be clearly (and appropriately) measured against a relevant benchmark index (e.g., the S&P 500 or the Wilshire 5000), institutions should consider negotiating performance-based fees, and in all circumstances endowed institutions should insist that the fees they pay are no greater than the lowest fees charged by the manager to any accounts of comparable size.

As pointed out in previous years, one reason why fees are significantly higher today than 20 years ago is the steady diversification of endowment portfolios across multiple managers and asset classes, for which fees are (and will remain) higher than for a single balanced account consisting entirely of domestic stocks and bonds. In general, the effect of fees on endowment returns is often underestimated and overlooked, particularly during bull markets: with an average annual return of 7.0%, a \$1 million endowment will grow to \$3,870,000 in 20 years; if successful fee containment resulted in that return increasing to 7.5%, the end value of the endowment would be \$4,248,000, an increase of \$378,000 or 9.8%.

Custodial Fees. Average custodial fees as a percentage of all investment pools' average market values was 0.08% (8 basis points) during fiscal year 1995, the same average reported for the previous two fiscal years. As with investment manager fees, there are clear economies of scale in custody, with most custodians charging a lower percentage of assets for larger accounts than they do for smaller ones. It should also be noted, however, that comparisons of stated custodial fees can be misleading: many institutions have special relationships with their custodians and the custodial fees incurred by a given institution may also be a function of portfolio turnover, asset allocation, and other factors controlled either by fiduciaries or by outside advisors. Nevertheless, while they still can, institutions should seek to exploit the cutthroat competition still prevailing among custodians. For the past several years, major providers

have reduced prices in order to gain market share, but this period may be drawing to an end as a result of recent, massive, on-going consolidation, which has cut in half the number of capable, full-service custodians, and is rapidly forcing minor-league players out of the game. For now, stated fees still remain susceptible to significant reduction through negotiation, but perhaps not for long.

NOTES ON DATA

Data Collection: NACUBO encourages all its member institutions with endowment assets in excess of \$1 million to participate in the NACUBO Endowment Study. In August 1995, NES questionnaires were mailed to 600 colleges and universities with the request that they be returned by September 15, 1995.

Endowment Data: Of the 600 institutions surveyed, 463 (77%) responded. Of these, 449 (87%) provided endowment market values as of June 30. The next most common fiscal year-end date is May 31 (11%).

Investment Pool Data: Of the 449 respondents providing investment pool data, 403 (90%) provided data as of June 30, 1995; 39 (9%) provided data as of May 31, 1995; and seven reported data as of other dates. To make cross-institutional comparisons more meaningful, certain data presented in Part II (e.g., individual investment pool asset allocation and return) are grouped according to year ending dates.

Because some institutions were unable to complete certain sections of the 1995 NES questionnaire, not all institutions are included in every exhibit. Where an exhibit is based on data derived from significantly fewer than all survey participants, that fact is footnoted.

Three Definitions of "Average" Used in the 1995 NES: Except where otherwise noted in the text or exhibits, the "average" for any set of data (whether returns, asset allocation, or other characteristics) is the equal-weighted mean. The dollar-weighted mean and the median are also cited for some data sets.

The median is the value that divides into two equal parts any given distribution of data (e.g., fiscal year 1995 returns for investment pools). Because the dollar-weighted mean provides as precise a measure as possible of the actual return produced by the aggregate investment assets of participating institutions, it is in many respects a more useful average than the equal-weighted mean. The deficiency of equal-weighted means is that they are in some respects misleading because they ignore the effects of the extreme concentration of endowment wealth among a relatively small percentage of participants in the NES.

Real Rate of Return: The real, or inflation-adjusted, rate of return for a given investment is calculated by dividing the nominal total return by the appropriate deflator for the same time period. Throughout the 1995 NES, the deflation measure used for this purpose is the Consumer Price Index (CPI-U). Note that simply subtracting the deflator from the nominal total return does not result in an accurate computation of real total return. The formula is as follows:

$$\frac{1 + \text{Nominal Total Return}}{1 + \text{Deflator}} - 1 = \text{Real Total Return}$$

Foundations: For those institutions (typically public) for which an independent foundation is the repository of endowment assets, no distinction has been drawn between the foundation and the institution itself.

**ENDOWMENT ASSETS PER FULL-TIME EQUIVALENT (FTE) STUDENT
FISCAL YEAR 1995**

<u>Responding Institutions</u>	<u>Endowment Assets per FTE Student</u>
In Aggregate	
Equal-Weighted Mean	\$49,739
Dollar-Weighted Mean	\$147,188
Median	\$18,615
By Endowment Size (Equal-Weighted Mean)	
\$25 million and under	\$6,148
Over \$25 million to \$100 million	\$33,469
Over \$100 million to \$400 million	\$66,177
Over \$400 million	\$145,918
By Type (Equal-Weighted Mean)	
Public	\$7,620
Private	\$68,885

Note: Based on number of FTE students enrolled Fall term 1994.

EXHIBIT 9B

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

Abilene Christian University

Spend 5% of three-year moving market value average, not to exceed current year's total return.

Academy of the New Church

Increase spending by 5% annually.

Agnes Scott College

Spend board-approved cap for the year.

Akron, University of

Spend 5.5% of a three-year moving average of market values.

Alabama System, University of

Spend 5.5% of a three-year moving average of market (unit) values.

Alaska and Foundation, University of

General pooled endowments: Spend 5% of beginning market value.

Land-grant endowment: Spend all current income in excess of inflation.

All other endowments: Spend all current income.

Albany Foundation, University of

Spend 5% of a three-year moving average of adjusted endowment market values.

Albertson College of Idaho

Spend an amount determined in advance by the investment committee of the board. Amount is equal to projected current income.

Albion College

Base of \$600,000 in 1968 plus 5% of all new gifts received between 1968 and present plus 3% of the 5% gift calculation compounded annually provides income to be expended for current fund operations.

Alfred University

Spend 6% of a three-year moving average, plus an additional fixed amount determined by the board of trustees.

Allegheny College

Spend 5% of the 12-quarter moving average of the market value per unit.

Alma College

Spend 5% of a three-year average of market values.

Alverno College

Total spending withdrawal each quarter estimates total returns based on the past eight quarters.

American Academy in Rome

Spend 5% of a three-year rolling average of market values.

The American University

Spend 5% of the two-year moving average of market values or income, whichever is less.

EXHIBIT 9B

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

Amherst College

Increase spending each year by a factor equal to inflation plus the real growth percentage due to capital gifts. Spending cannot exceed real, long-term total return.

Appalachian State University Foundation, Inc.

Scholarships: Spend 5.5% of a three-year moving average of market values.

Other endowments: Spend 5% of a three-year moving average of market values.

Arizona, University of

Spend all unrestricted current income.

Arizona Foundation, University of

The board of directors establishes a payout rate at the beginning of each fiscal year stated as a fixed percentage of the beginning market value (e.g., 5%). There may be a distribution of income and capital gains to meet the payout rate.

Arizona State University

An earnings distribution rate of 4.65% was established based on the unit market value at July 1, 1994, and distributed on June 30, 1995. Investment income accrued for each endowment is based on the beginning monthly fund balance.

Arizona State University Foundation

Spend 4.65% of earnings, after reducing for investment management expenses, based on starting fiscal year market value. If the distribution rate per unit is lower than the previous year, use the previous year's distribution rate per unit, unless the ASU Foundation finance committee decides to lower the distribution rate per unit.

Arkansas and Foundation, University of

Spend 5% of a 12-quarter moving average of market values.

Asbury Theological Seminary

Spend 6% of three-year moving average of market values, less management fees.

Assumption College

Spend 5% of a moving average of market values.

Auburn University and Foundation

Spend 5.5% of a three-year moving average of market values.

Augustana College (Illinois)

Spend 5.4% of a three-year moving average of market values.

Austin College

Spend up to 6.25% of a three-year moving average of quarterly market values.

Averett College

Spend up to 90% of current income.

Babson College

Spend up to 5% of fair market value. Fair market value is valuation set six months before the start of the fiscal year.

Baldwin-Wallace College

Spend all current income.

EXHIBIT 9B**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995****Ball State University Foundation**

Decide on an appropriate rate each year. Fiscal year 1995 spending rate was set by the board at 4.5%.

Barnard College

Spend all current income plus a portion of appreciation as required.

Barry University, Inc.

Board of trustees has elected not to spend earnings of the endowment fund.

Bates College

The fixed-dollar amount to be committed to the operating budget should not exceed 5% of the estimated market value.

Baylor University

Spending subject to the rules for each endowment account.

Bellarmino College

Spend 5% of a three-year moving average of market values.

Beloit College

Spend 5% of the three-year moving average of market values as of December 31.

Bentley College

Spending should not exceed 5% of the average market value per unit for the last 12 quarters.

Berea College

Spending per unit is increased annually by the preceding fiscal year's inflation rate (Consumer Price Index) plus 0.5%. However, the spending per unit shall not be less than 4.5% nor more than 5.5% of the unit market value at the beginning of the year.

Berklee College of Music

Spend up to 3% of a three-year moving average of endowment market values. Spending can be increased up to 5% with the approval of the finance committee.

Berry College

Spend all current income.

Bethany College (West Virginia)

Spend a percentage (established by the board of trustees) of the average market values of the "managed investments" determined by using 12 quarterly evaluations ending one year before the year in which income is to be used, divided by the year-to-date rise in the Consumer Price Index (Pittsburgh).

Binghamton University

Spend 5% of a five-year moving average of market values (True Endowment only).

Boston College

Spend the yield and a portion of the appreciation. This policy aims to preserve the purchasing power of the endowment.

Boston University

Spend 5% of a 20-quarter moving average of market values.

EXHIBIT 9B

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

Bowdoin College

A spending cap of \$10.125 million is in effect until the eight-quarter moving average of market values exceeds \$200 million. When this occurs, the administration will consider establishing a policy that limits spending to 5% of market value.

Bowling Green State University

Retain 20% of earnings for all funds; specific support is spent from selected funds; other funds retain all income.

Bradley University

Spend 5% of a two-year moving average of market values as of December 31.

Brandeis University

Spend a specific percentage of a three-year moving average of market values.

British Columbia, University of

The budget available to spend is calculated as a percentage of the moving average of the preceding three March 31 year-end endowment market values after recovery of investment management and administrative costs. The initial spending rate is set at 6%.

Brown University

Spend 4.5% to 5.5% of a three-year moving average of market values.

Bryant College

Spend 5% of a three-year moving average of market values.

Bryn Mawr College

Spend 5% of a three-year moving average of market values.

Bucknell University

Spend a specified percentage (currently 4.5%) of a 12-quarter moving average of market values, subject to a "safety net" requiring a 5% increase from the prior year.

Buena Vista University

Spend 5% of the preceding year's market value as of December 31.

Buffalo Foundation, University of

Increase prior year's spending by 4.5%, provided that spending remains between 4.5% and 6% of a three-year moving average of quarterly market values.

Butler University

Spend 6.5% of a three-year moving average of market values.

California, University of

Spend all current income.

UCLA Foundation

Spending rate of 5%, based on the market value of endowment investment pool. (Realized capital gain may be appropriated when income is insufficient.)

California-San Diego Foundation, University of

Spend 4% of a five-year moving average of market values.

EXHIBIT 9B
ENDOWMENT SPENDING RULES
FISCAL YEAR 1995

- California Institute of the Arts
Decide on an appropriate rate each year.
- California Institute of Technology
Spend 5% of a three-year moving average of market values.
- California Polytechnic State University Foundation
Spend 5% based on a three-year moving average calculated at December 31.
- California State University, Long Beach Foundation
CSULBF, in compliance with the Uniform Management of Institutional Funds Act, uses a "total return" spending formula which provides for expending a prudent portion of both the ordinary income from investments and appreciation of the principal. The ordinary income earned is generally distributed to projects monthly in accordance with the terms of the funding source and the prudent return concept. Distribution (if any) of the realized and unrealized appreciation is determined annually or more often if necessary, in arrears, by foundation staff in concert with the Treasurer and Assistant Treasurer.
- Calvin College
Spendable funds equal 6% of the average of the year-end market values for the three most recent years.
- Canisius College
Spend 5% of a 12-quarter average of unit values as of the prior December quarter.
- Carleton College
Increase preceding year's spending by 4.5%, plus a percentage needed to fund a projected five-year capital campaign.
- Carnegie Mellon University
The university will spend 5.9% of a three-year moving average endowment market value based on December 31 valuations.
- Case Western Reserve University
Spend 5.5% of a four-year moving average of market values.
- Centenary College of Louisiana
Total net income was utilized except as designated by donor.
- Central College
Spend a fixed percentage of the book value as of the first day of the fiscal year.
- Central Florida Foundation, University of
Spend 5.5% of beginning market value.
- Central Michigan University
Spend 5.25% of the endowment book value.
- Central Missouri State University Foundation, Inc.
60% of interest earnings is available for expenditure.
30% of interest earnings is returned to endowment.
10% of interest earnings is distributed to foundation for management fees.

EXHIBIT 9B

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

Centre College of Kentucky

Spend 5.5% of a five-year moving average of market values for equity and balanced fund income. Spend all current income for fixed income funds.

Chapman University

Spend 5% of a three-year moving average of market values.

Chatham College

Spend 5.5% of the beginning market value.

Chicago, University of

Spend 5% of a 12-quarter moving average of unit market values, on a two-year lag, with declines limited to 4% below the prior year's payout. The limit on declines is being phased in over a three-year period, beginning with a 1% limit for fiscal year 1994, 2% for fiscal year 1995, and a 4% limit on declines thereafter.

Christian Theological Seminary

Move down to, over time, a spending rate of 5% of the rolling three-year (12-quarter) market value of the invested endowment, net of all reserves.

Cincinnati, University of

The spending policy is determined each year for the forthcoming fiscal year by taking 5% of the average market value per unit for the 12 preceding quarters less estimated pool expenses.

Claremont McKenna College

Spend 5.5% of a 3.5-year average unit market value.

Claremont University Center

For endowments received prior to July 1, 1994, the rate for fiscal year 1995 was 7.84%, which is to be reduced by .33% per year until the rate reaches 5% (fiscal year 2004). For endowments received on or after July 1, 1994, the rate is 5%. The rate is applied to the average value of the pool for 12 quarters ending September 30 prior to the beginning of the fiscal year for which it is applicable.

Clark College Foundation

50% of total return is to remain in the endowment fund. 50% is withdrawn from the endowment fund annually and transferred to a restricted endowment allocation reserve account. Appropriations (not to exceed the maximum available in the reserve account) are made for program support based upon current needs and reserves. Amounts not appropriated will serve as a cushion and be available for future appropriations.

Clark University

Spend 5% of a 20-quarter moving average of market values.

Clarkson University

Spend 5% (net of all fees and commissions) of a three-year moving average of market values as of December 31 of the previous calendar year.

Clemson University and Foundation

Spend up to 5.4% of a three-year average market value of the designated endowment fund. Spending may include realized gains and losses, as well as earned income. All returns (i.e., gains, losses, income) above 5.4% will be reinvested in the designated endowment fund.

EXHIBIT 9B

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

Coe College

Spend an appropriate percentage of an eight-quarter moving average of endowment market values as of December 31.

Colby College

Spend 4.7% of a five-year moving average of market values with adjustments for new gifts.

Colgate University

Increase spending by 6% each year unless: (a) spending is less than 4.5% of the eight-quarter average market value, then increase spending to 4.5% of the eight-quarter average market value; or (b) spending is greater than 5.5% of the four-quarter average market value, then increase the previous year's spending amount by 3%. Income earned in excess of spending is reinvested in principal. Conversely, if spending exceeds earned income, it is supplemented by drawing against previously reinvested earnings.

Colorado Foundation, Inc., University of

Spend 5.4% of a three-year moving average of market values (4.5% is allocated to the university, 0.4% to investment manager and custodian fees, and the remaining 0.5% to the foundation for administrative expenses).

Colorado College

Spend 6% of a 12-quarter moving average of unit market values (revalued as of December 31 each year).

Colorado School of Mines Foundation, Inc.

Spend 7.25% of a three-year moving average of endowment market values.

Colorado State University Foundation

3.5% of average balance in accounts in available for spending.

Columbia University

Spend the lesser of (a) 4.5% of the average market value of the merged pool funds for the previous three-year period; or (b) a 5% to 7% increase over the previous year's spending.

Connecticut Foundation, University of

Increase spending each year by the Consumer Price Index for the prior fiscal year. Spending must range between 4% and 6% of a three-year moving average of market values.

Connecticut College

Spend 5.5% of a three-year moving average of market values.

Cooper Union

Spend 6% of the previous three-year moving average of market values.

Cornell College

Spend 6% of a two-year moving average of market values.

Cornell University

Spending is limited to the difference between the total return on investments and the Higher Education Price Index averaged over a five-year period.

Cranbrook Educational Community

Spend 6% of a three-year moving average of year-end market values.

EXHIBIT 9B
ENDOWMENT SPENDING RULES
FISCAL YEAR 1995

Creighton University

Spend 4% of fixed income units and 4.5% of equity units. In the future, increase fixed income spending by 4% per year and equity spending by 5% per year.

Culver-Stockton College

The income distribution, before expenses, for endowment spending in a fiscal year is 5% of the previous 12-quarter moving average of the market values (i.e., the 12 quarters ending on December 31 immediately preceding the start of the fiscal year).

The Curtis Institute of Music

Spend an amount determined annually by the board of trustees, based on a two-year moving average of market values.

Dallas, University of

Spendable earnings are equal to 5.5% of a three-year average balance, adjusted for additions and withdrawals.

Dartmouth College

Increase per unit spending by an inflation increment approved by the trustees, providing that the resulting distribution is between 4.25% and 6.5% of a 12-quarter moving average of market values.

Davidson College

Spend 5% of the three-year moving average of December 31 market values, plus the cost of investment manager fees.

Dayton, University of

Increase spending each year by 4.5%. Spending must range between 4% and 6% of the beginning market value.

Delaware, University of

Decide on an appropriate rate each year.

Denison University

Spend 4% to 7% of a three-year moving average of market values.

Denver, University of

Spend approximately 1.25% of a 12-quarter moving average of the consolidated endowment fund market values on a quarterly basis.

De Paul University

Spend 5% of the beginning market value.

DePauw University

Spend 6% of a 12-quarter moving average of market values. As of April 1995, gifts in excess of \$1 million are calculated at 5.5% of market value at the beginning of quarter.

Dickinson College

Spend 5% of a 12-quarter moving average of market values.

Dillard University

Spend interest only; reinvest appreciation/gains.

EXHIBIT 9B

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

Doane College

Spend 5% of the three-year moving average of unitized market values as of December 31.

Drake University

Spend a fixed-dollar amount that is predetermined each year by the board of trustees.

Drew University

Spend 5.67% of a three-year moving average of market values.

Duke University

A decreasing rate is applied to a three-year moving average of market values, converging to a 5.5% net spending rate.

Earlham College

Spend 5% of a 12-quarter moving average of market values.

East Carolina University

Spend 6% of the average market value of the nonparticipating endowment accounts. Participating accounts are allocated the annual net income.

East Tennessee State University Foundation

Each endowment operating account received 3% of the four-quarter average balance of the endowment account. Each endowment received 4% of the June 30, 1994, balance. Any additional amounts were reserved for future use.

Eastern Illinois University

Spend 5% of a three-year moving average of market values (4.25% for awards and .75% for administrative fees).

Eastern Michigan University Foundation

Spend a prespecified percentage of a 12-quarter moving average of market values.

Elizabethtown College

Determine an appropriate rate each year.

Elmhurst College

Spend 3% of a three-year moving average of market values. Reinvest earnings in excess of 3% in principal.

Emory University

Spend a percentage of a three-year moving average of market values, with a floor of 4% and a ceiling of 6%; the increase over the previous year's spending is not to exceed the university's expected long-term inflation rate of 4.5%.

Emporia State University Foundation

The policy is to distribute earnings based on the product of the spending rate multiplied by the merged funds trailing three-year average market value as of December 31 of each year.

Evansville, University of

Spend the greater of (a) 5% of the three-year average of market values; or (b) the amount spent the previous year.

EXHIBIT 9B**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995****Fairfield University**

Distribute endowment income for current operations at a predetermined rate set annually (currently 5.3%) by the board of trustees on the average market value of endowment fund assets for the preceding three fiscal years.

Ferris State University

Spend 80% of earned interest with the remainder returned to principal.

Florida Foundation, Inc., University of

Spend a prespecified percentage of the inflation-adjusted endowment, subject to approval by the board of directors.

Florida Atlantic University Foundation, Inc.

Spend 5.375% of beginning market values for fiscal year 1995. Spend 5.25% of beginning market values for fiscal year 1996.

Florida State University Foundation, Inc.

Spend the same amount as in the previous distribution period (quarterly) adjusted for 3.5% historical annual inflation rate within a minimum/maximum range of 5% to 7.5% of market value.

Fordham University

Spend 4.5% of a three-year moving average of market values as of December 31.

Fort Hays State University Endowment Association

Spend all current income.

Franklin College of Indiana

The spending policy for fiscal year 1995 endowment pool was 5.5% of the 12-quarter rolling average unit value as of March 30, 1994, applied to the endowment pool units held June 30, 1994. All nonpooled endowment assets had a spending policy of 100% of income distributed, net of management and custodial fees.

Franklin and Marshall College

Spend an annually determined percentage of a three-year moving average of market values.

Furman University

Spend 5.5% of the May 31, 1993 book value.

Gannon University

All current income is transferred to operating funds.

The George Washington University

For the investment pool: Spend 4% to 6.5% of a 12-quarter moving average of market values.
For separately invested funds: Spend all net income.

Georgetown College

Spend 5% of a 12-quarter moving average of market values.

EXHIBIT 9B

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

Georgetown University

Increase the projected income per unit annually by a budgeted rate of inflation. However, the spending rate shall not exceed 6% of the endowment market value, nor fall below 4% of the market value. The endowment income is distributed quarterly. At the end of the fiscal year, any income earned in excess of the projected distribution is distributed and reinvested in the endowment fund through a nonmandatory transfer.

Georgia and Foundation, University of

Spend up to 4.75% of a 24-month average principal balance.

Georgia Institute of Technology and Foundation

Spend 5% of a 12-quarter moving average of market values.

Gettysburg College

Spend 6.25% of a 12-quarter moving average of market values.

GMI Engineering & Management Institute

Spend 5% of a 12-quarter moving average of market values.

Goshen College

Spending will increase by the Consumer Price Index using the 1994 spending rate as the starting point.

Goucher College

Spending is to be guided primarily by the financial objective enunciated in the statement of investment policies and objectives of the fund. These are (a) to support the operations of the college; and (b) to preserve the purchasing power of the fund's principal. It is recognized that the second of the objectives will not be met if, over the long term, the amount spent exceeds the real rate of return of the fund (historically less than 5%). Spending in excess of the fund's real rate of return (calculated on the basis of five-year moving averages) should be temporary and by exception, and must be approved explicitly by the board of trustees.

Grand Valley State University

Spend 5% of the book value. This equals approximately 4% of market value for items that have spending. Approximately 25% of accounts have a spending rate of zero.

Grinnell College

Spend 4.5% of a three-year moving average of quarterly market values.

Guam Community College

Term Endowments may spend according to rules of such grants, but not more than 50% of the earnings.

Quasi-Endowments may spend 5% which such spending may take them below historical book value.

Other Endowments may spend 5% of the balance, with the exception that the spending not be below historical book value.

Guilford College

Spend 5.7% of the market value as of December 31.

Gustavus Adolphus College

Spend 4.5% of a three-year moving average of market values.

EXHIBIT 9B

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

- Hamilton College**
Spend 5.0% of an eight-quarter moving average of market values.
- Hampden-Sydney College**
Spend 5.3% of a three-year moving average of market values.
- Hampton University**
Spend all current income.
- Hartford, University of**
Spend all current income.
- Hartwick College**
Spend 6.25% of a three-year moving average of endowment market values.
- Harvard University**
An appropriate rate is determined on an annual basis to provide current income and long-term protection against inflation.
- Harvey Mudd College**
The spending amount is based on a model which takes into consideration the endowment market value at December 31, 1993, the projected Consumer Price Index, prior year dollar utilization, and an enhancement factor.
- Haverford College**
Increase spending by 5% annually plus 5% of new endowment gifts. Spending must range between 4.75% and 5.75% of a four-quarter moving average of market values as of September 30 for the prior year.
- Hawaii, University of**
Spending is not to exceed 6% of the preceding year's ending market value.
- Hendrix College**
Spend 6% of a three-year moving average of market values.
- High Point University**
Spend all current income unless donor restricted.
- Hiram College**
Spend approximately 8% of a prior three-year moving average of market values (FY93, FY92, FY91) for restricted portion of endowment and, for unrestricted portion, spend the same dollar amount as budgeted for the prior three years.
- Holy Cross, College of the**
Spend up to 5% of the three-year trailing average of market values.
- Hood College**
Spend 5% of the average of fiscal year beginning and ending book values.
- Hope College**
Spend no more than 5.5% of a four-quarter moving average of endowment market values.

EXHIBIT 9B

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

Houston System, University of

Spend 4.2% of the endowment market value at the end of the preceding fiscal year. This percentage will decrease by 0.2% annually until 4% is reached. Percentage is adjusted annually so nominal value of payment will not decrease from prior year.

Howard University

Spend all current income.

Idaho, University of

Realized gains are to be reinvested as principal and only the income from dividends and interest is expendable.

Illinois, University of

Spend 5.65% of a three-year moving average of market values (0.9% assessed as an administrative fee, 4.75% distributed for spending).

Illinois Foundation, University of

Spend 5.65% of a three-year moving average of market values (0.9% assessed as an administrative fee, 4.75% distributed to the university).

Illinois College

Spend all unrestricted income for general operating purposes and reinvest realized gains in the endowment fund.

Illinois Institute of Technology

Spend a specified dollar amount determined by the investment committee of the board of trustees.

Illinois Wesleyan University

Increase by 10% over previous year.

Indiana University and Foundation

Spend 5% of an eight-quarter moving average of market values.

Indiana University of Pennsylvania and Foundation

For some accounts, the decision for spending was made based on income earned the previous year. Decisions for spending were based on projected income for the current year for all other accounts. Any income in excess of spending is converted to corpus.

Indianapolis, University of

Spend 5% of a 12-quarter moving average of market values as of December 31 of the previous calendar year.

Iowa Foundation, University of

Spend 5.5% of a three-year moving average of market values.

Iowa State University and Foundation

Spend 5% of a three-year moving average of market values.

Ithaca College

Annually establish spending rate between 4% and 6% of a three-year moving average of quarterly pooled unit market values.

EXHIBIT 9B
ENDOWMENT SPENDING RULES
FISCAL YEAR 1995

- John Brown University**
Spend 6.75% of a five-year moving average of market values.
- John Carroll University**
Spend 5% of a three-year moving average of market values as of November 30 of the previous year.
- Johns Hopkins University**
Objective is to spend only 4.5% to 5% by the year 2002, by reducing the rate of increase in the payment to 1.5% per year.
- Johnson & Wales University**
There is zero spending from the endowment.
- Juniata College**
Spend 5% of a five-year moving average of market values as of the end of the previous fiscal year.
- Kalamazoo College**
Spend 6% of a four-quarter average of market values.
- Kansas State University Foundation**
For funds not in the investment pool, spend all current income. For funds in the investment pool, distribute (a) 5% of beginning market value for expenditure by participating funds; (b) 2.25% of beginning market value for university projects and KSU Foundation for management fees, and (c) remainder of total return retained in pool for growth of principal.
- Kansas University Endowment Association**
The current spending rate is 6% of a three-year moving average of portfolio market value of which 5% is allocated to participating funds for current expenditures and 1% is allocated to the Association for administrative purposes.
- Kent State University Foundation**
Spend 5% of a moving average of market values.
- Kentucky, University of**
Spend 5% of the average market value for the preceding 36 months.
- Kenyon College**
Spend 4.5% of a three-year moving average of market values. (This payout percentage is being reduced 0.25% each year until it reaches 4% in fiscal year 1997.)
- King's College (Pennsylvania)**
Spend the lesser of (a) 4% of a three-year moving average of market values; or (b) the actual amount received during the previous calendar year.
- La Salle University**
Determine an appropriate rate each year.
- Lafayette College**
Spend 5% of unrestricted endowment funds.
- Lake Forest College**
Spend 7% of the average market value for previous three years in 1995.

EXHIBIT 9B

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

Lawrence University (Wisconsin)

Spend the board-authorized percentage of a three-year moving average of December 31 market values of the fund balance.

Lehigh University

Spend an amount based on a three-year moving average of market values with a minimum increase of 3%, and a maximum of 6%, over the preceding year's spending.

Lewis and Clark College

Spend a prespecified percentage of the five-year moving average of endowment market values as determined at the beginning of each quarter.

Linfield College

Spend 7% of a 12-quarter moving average of the market values of pools A,D,E, and F.

Long Island University

Spend 5% (net of management fees) of the May 31 market value.

Louisiana State University System

Spend 5% of average invested balance.

Louisville Foundation, University of

Spend 5.5% of a three-year moving average of market values as of December 31.

Loyola College (Maryland)

Spend 5% of a three-year moving average of market values.

Loyola Marymount University

Distribute 5% of the three-year moving average of the endowment pool's fair market values.

Loyola University of Chicago

Spend 4% in fiscal year 1996, 3% in fiscal year 1997, and 2% thereafter.

Loyola University of New Orleans

Increase spending by 4.5% each year. Spending must range between 4% and 6% of a three-year moving average of market values.

Lycoming College

Spend 4% to 6.5% of a 12-quarter moving average of market values as of December 31.

Lynchburg College

Spend all current income.

Lyon College

Spend 8.75% of all endowment funds received prior to July 1, 1991, decreasing by 0.5% each year until 5% is reached based on a 12-quarter moving average of market values. Spend 5% of all endowment funds received after July 1, 1991, based on a 12-quarter moving average of market values.

Macalester College

Spend 5.58% of a 16-quarter moving average of market values.

EXHIBIT 9B

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

Madonna University

Spend 4.5% of the 12-quarter moving average of the endowment market value with March 31 as the base quarter.

Maine Foundation, University of

Spend 5.5% of a three-year moving average of market values.

Maine System, University of

Spend 5.5% of the preceding three-year moving average of market values.

Marietta College

Spend the greater of \$1,100,000 or 5% of a three-year moving average of market values as of December 31.

Marquette University

True Endowment (General): Spend 2.65% of a three-year moving average of market values as of June 30.

True Endowment (Scholarship): Spending will reflect prevailing market rates.

Quasi-Endowment: Spend 3.5% of a three-year moving average of market values for restricted accounts, 2.4% for unrestricted accounts.

Mary Baldwin College

A stated amount of support is budgeted annually. If income is not sufficient to meet budget, then any amount remaining is drawn from realized gains from the endowment.

Maryland System and Foundation, University of

Increase spending by 4.5% each year. Spending must range between 4.5% and 6.5% of a six-quarter moving average of unit market values.

Marymount University

Spend approximately 5% of beginning market values.

Maryville University (Missouri)

Endowed scholarships and other restricted endowment funds are spent directly from the endowment fund as well as external management and administrative fees. The current operating budget is supported by a transfer from the endowment fund of 3% to 4% of the three-year moving average of the market values of the quasi-endowment fund.

Marywood College

Spend up to 5.5% of a three-year moving average of market values. Remainder added to quasi-endowment.

Massachusetts, University of

The amount of endowment return available for expenditure was calculated at a rate of 5.5% at the endowment's average market value for the preceding 12 months. Each account is credited on a pro-rated basis, based on its applicable number of units.

Massachusetts Institute of Technology

Spend an amount equal to real investment returns over time relative to inflation. This amount should be determined in a manner that will meet the need for minimum fluctuations in distribution growth relative to both the rate of inflation and past distributions.

EXHIBIT 9B

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

Medical College of Georgia

All income is distributed from endowments valued \$10,000 or more unless prohibited by the agreement.

Medical College of Hampton Roads Foundation

Target an earnings spread between 2.5% and annual inflation increase, with a dollar cap on total spending allowed on an annual basis. Net capital gains are reinvested. If earnings rate is below a predetermined benchmark, the spending rate equals total interest earned (not including net capital gains) less fees.

Medical College of Wisconsin

Distribute 5.5% of the beginning market value plus 5.5% of one-half of the current year's additions/gifts.

Memphis, University of

Spend 5% of the foundation's balance of income-producing assets at the beginning of each year.

Mercer University

Spend 6% of a three-year moving average of market values.

Messiah College

True Endowment (pooled) - Spend all current income.

Quasi-General - Spend all current income.

Quasi-Fry - 3.5% of average market value over past three years is available for spending.

Miami, University of

Spend 5% of a three-year moving average of market values.

Miami University (Ohio) & Foundation

Spend 5% of a 12-quarter moving average of pooled growth market values.

Michigan, University of

Spend 5.5% of the one-quarter-lagged 12-quarter average share value.

Michigan State University

Increase spending by 5% each year. Under specific market conditions, the spending rate could be frozen at the previous year's level or it could be increased by 8%.

Middlebury College

Distribute \$26.00 per income share to funds in the investment pool.

Midway College, Inc.

Annual spending from the endowment shall be no more than 7.5% of the prior five-year moving average of market values with the rate gradually reduced to 5%.

Millikin University

Spend 5% of a 12-quarter moving average of market values.

Mills College

Spend 5.9% of a 12-quarter average of unit market values for the period ended December 31, 1994.

EXHIBIT 9B

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

- Millsaps College
Spend 5% of a 12-quarter moving average of market values.
- Minnesota, University of
Spend 5.5% of a three-year moving average of market values.
- Minnesota Foundation, University of
Spend 5.5% of a 12-quarter moving average of market values.
- Mississippi, University of
Spend all current income.
- Mississippi State University and Foundation
Spend 5% of a three-year moving average of market values.
- Missouri System, University of
Spend 5% of a 12-quarter moving average of endowment market values.
- Monmouth College (Illinois)
Spend 6% of a 12-quarter moving average of market values, set back one quarter.
- Moravian College
Spend 6% of a three-year moving average of market values.
- Mount Holyoke College
Spend up to 6% of a three-year moving average of market values.
- Mount Mercy College
Spend up to 5% of an eight-quarter moving average of market values.
- Muhlenberg College
Spend all earned income, up to 5% of the beginning market value.
- National University
75% of annual interest earnings are deposited into an expendable account for true endowment.
- Nazareth College of Rochester
Spend 5.75% of a 12-quarter moving average of market values.
- Nebraska, University of
Spend the greater of (a) 5% of the 12-quarter moving average of the endowment market value, adjusted for new gifts; or (b) the previous year's spending.
- Neumann College
Total return policy allows spending of all income, including realized and unrealized gains. However, the college has only been spending interest income.
- Nevada and Community College System, University of
Spend 4.5% of a 12-quarter moving average of market values.
- New Hampshire System, University of
Spend 5% of a three-year moving average of market values.

EXHIBIT 9B**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

- New Jersey, University of Medicine & Dentistry of
Spend an amount less than or equal to anticipated income. Expenditure of endowment principal and income is governed by the gift letter of each individual contributor.
- New Jersey Institute of Technology
It is the university's policy to accumulate endowment earnings during the year of the initial gift and an entire year thereafter. Current use of earnings is generally limited to 5% of principal; excess earnings are retained and available for subsequent awards.
- New Mexico and Foundation, University of
Spend 5% of a 12-quarter moving average of unit market values.
- The New School for Social Research
Spend 5% of a moving average of endowment market values prior to the current fiscal year.
- SUNY, All Other Campuses
See SUNY, University at Buffalo and Foundation.
- SUNY, University at Buffalo and Foundation
University at Buffalo: Spend 4% of a five-year moving average of endowment market values as of June 30, lagged one year.
University at Buffalo Foundation: Spend between 4.5% and 6% of a three-year moving average of quarterly calendar market values.
- SUNY, HSC at Brooklyn, College of Medicine
See SUNY, University at Buffalo and Foundation.
- SUNY, Health Science Center at Syracuse
See SUNY, University at Buffalo and Foundation.
- SUNY, Potsdam College Foundation
Distribute 6% of current principal amount (book value) of endowment funds. Balance of total return after transfer is credited to the principal amount of each endowment fund.
- New York Medical College
Spend 5.25% of book value of pooled investments.
- New York University
Spend a portion of yield; the difference is added back to principal.
- Niagara University
Spend 5% of a three-year moving average of market values.
- North Carolina at Asheville, University of
Spend 5.5% of a three-year moving average of market values.
- North Carolina at Chapel Hill, University of
Increase spending each year by the rate of inflation. Spending must range between 4% and 7% of market value.
- North Carolina at Charlotte, University of
Policy is currently under process of formation. A policy under consideration would allow for utilization of 5% of the beginning market value. This policy is expected to be revised to 5% of a moving fair market value (three-year average).

EXHIBIT 9B**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

- North Carolina at Greensboro, University of
Spend up to 5.5% of a three-year moving average of endowment market values as of December 31.
- North Carolina at Wilmington, University of
Spend 5% of a three-year moving average of market values.
- North Carolina State University
Spend 4% of a 12-quarter moving average of market values.
- North Central College
Spend 6% of beginning market value at a rate of 1.5% per quarter.
- Northeastern University
Spend 5.5% of a three-year moving average of market values.
- Northern Kentucky University Foundation, Inc.
The foundation's long-term target spending rate is 5% of the average endowment market value, based on a 12-quarter moving average of the endowment market value as of June 30 of the previous year.
- Northwestern University
Spend last year's total spending, increased by the Consumer Price Index, unless that total is more than 6% or less than 3.5% of a three-year moving average of the portfolio's market values.
- Norwich University
Spend 5% of a 12-quarter moving average of market values.
- Notre Dame, University of
Increase spending by 4% annually.
- Oakland University and Foundation
Spend 5% of the preceding 12-quarter moving average of market values.
- Oberlin College
Spending is determined by a formula that gives 60% weight to the previous year's spending increased by the rate of growth of nonendowment unrestricted revenue, and 40% weight to a percentage of a 36-month moving average of market values.
- Occidental College
Spend 5% of a 12-quarter moving average of market values as of the previous December 31.
- Ohio Northern University
Spend all current income.
- Ohio State University and Foundation
Spend 5.5% of a three-year moving average of market values per share.
- Ohio University
Spend 6% of a three-year moving average of market values as of December 31. If total return is greater than 6% plus the rate of increase in the Higher Education Price Index, spend up to 9%.

EXHIBIT 9B**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995****Ohio Wesleyan University**

Spend a fixed percentage (varies by year) of the prior year's beginning market value.

Oklahoma State University Foundation

Fiscal year 1995: Spend 4% of the balance of the endowments, with any excess being added to principal.

Starting in fiscal year 1996: All endowments will spend 4% of the three-year moving average of the market value of the endowment.

Oregon, University of

Distribute a total of 7% of a three-year average of market values for current use (5%) and assessment (2%).

Oregon Health Sciences Foundation

Spend 5% of a three-year moving average of market values.

Oregon State Board of Higher Education

Spend 5.5% of a five-year moving average of market values.

Oregon State University Foundation

Spend 5.5% of a 12-quarter moving average of market values.

Ouachita Baptist University

Spend all current income.

College of the Ozarks

Spend interest and dividends; reinvest capital gains in the endowment.

Ozarks, University of the

Spend 6% of a 12-quarter moving average of market values.

Pennsylvania, University of

Spend 5% of a three-year moving average of market values.

Pennsylvania State University

Spend approximately 5% of a three-year moving average of market values.

Philadelphia College of Textiles and Science

Spend 5% of a three-year moving average of market values.

Pittsburg State University

Spend 5% of a three-year moving average of market values.

Pittsburgh, University of

Increase spending by 4% each fiscal year.

Pitzer College

Spend 4.7% of a 12-quarter moving average of market values plus \$391,000.

Plattsburgh College Foundation

Out of income earned expressed as a percentage of the market value, reinvest 1% to endowment principal, transfer 1% to unrestricted endowment, and spend the remainder.

EXHIBIT 9B**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995****Pomona College**

Spend between 4.5% and 5.5% of a 12-quarter moving average of market values.

Portland, University of

The annual spending rate shall not exceed 5.5% of the three-year average of market values as of December 31.

Pratt Institute

Spend endowment income plus an appropriate rate each year.

Presbyterian College

Spend 5.5% of the beginning market value.

Princeton University

Spend a portion of investment income earned by the primary pool in the previous fiscal year. Net income available per unit is increased by 6% over the previous year. Income earned in excess of spending is reinvested quarterly in principal.

Puget Sound, University of

Spend 6% of a five-year moving average of market values.

Purdue University

Distribute interest and dividends net of expenses semiannually, plus an annual bonus from realized gains if equity growth exceeds inflation for the calendar year. Annual distribution of earnings and equity is intended to be 4% of the endowment portfolio's market value at year-end. Distributions to individual participants are adjusted for participation during the respective period.

Radcliffe College

Increase spending by 5% annually.

Randolph-Macon College

Spend 5% of a 12-quarter moving average of market values as of December 31.

Randolph-Macon Woman's College

Spend 7.35% of a 12-quarter moving average of market values for restricted income. Spend all unrestricted income.

Redlands, University of

Spend 5% of a three-year moving average of market values.

Reed College

Spend 6% of the average market value as determined by a 13-quarter moving average evaluated as of December 30 of each year.

Regent University

During fiscal year 1995, the university reinvested virtually all investment yield and appreciation.

Regis College (Massachusetts)

Spend 5% to 6% of a three-year moving average of endowment market values.

EXHIBIT 9B**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995****Rensselaer Polytechnic Institute**

Spend 5.8% of a four-year moving average of endowment market values. The goal is to reduce spending to 5% by fiscal year 1999.

Rhode Island Foundation, University of

Spend 5% of the average of the past two years' March 31 market values.

Rhodes College

Spend 5% of a two-year moving average of market values as of June 30.

Rice University

For planning purposes, increase endowment distribution by 5.9% for fiscal year 1995; 5% for fiscal year 1996; 4.9% for fiscal year 1997. Projected distribution should fall within a band defined by a minimum of 4% and a maximum of 7% of a three-year moving average of beginning-of-year market values.

Richmond, University of

Increase spending by 6% each year. Spending rate must range between 4% and 6% of a three-year moving average of market values.

Rider University

Spend a percentage of a three-year moving average of market values as of December 31.

Ripon College

Spend 5% of a 20-quarter moving average of endowment market values.

Roanoke College

Spend 5% of a three-year moving average of market values.

Rochester, University of

Spend 6.1% of a five-year moving average of market values.

Rochester Institute of Technology

Spend 5% of the average of beginning unit values for the previous 20 quarters ending March 31 of the preceding fiscal year.

Rockefeller University

Spend an amount equal to 5% of a three-year moving average of market values of the endowment and similar funds.

Rockhurst University

Spend 5% to 6% of a three-year moving average of market values.

Rollins College

Spend 6% of a three-year moving average of market values.

Rose-Hulman Institute of Technology

Generally, 50% of the commingled endowment fund income is spent annually, and 50% is reinvested in the fund.

Rowan College Foundation

Spend a prespecified percentage of current income.

EXHIBIT 9B

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

Rush University

Spend 6% of a 16-quarter moving average of market values of the endowment pool as well as all earned income on other investments (1% is assessed as an administrative fee, 5% is distributed for spending).

Rutgers, The State University

Spend 4.5% of a three-year moving average of market values.

The Sage Colleges

Spend 6.2% of a three-year moving average of market values.

Saint Anselm College

Reinvest all earnings save for small expenditures on book fund and some restricted scholarship endowments.

College of Saint Benedict

Spend 6% of the average of the last three years' June 30 market values.

Saint John Fisher College

Spend a prespecified percentage of the average market value of the previous 12 calendar quarters (5.5%).

St. John's College (Maryland)

Spend a prespecified percentage of the market value as of December 31 of the previous calendar year.

St. Lawrence University

Spend 6% of a 12-quarter moving average of market values ended March 31.

Saint Louis University

Spend a fixed percentage of a moving average of the market value of the previous 12 quarters ended June 30, 1994.

Saint Mary's College (Indiana)

Spend 5% of average market value at December 31 of previous three years increased by additions made to fund during the three-year period.

St. Mary's University (Texas)

The university adapted the endowment spending rule at 5.25% of a prior three-year moving average of market values.

Saint Michael's College

Spending rate of 4.5% of the market value of pool is based on previous year's June 30 value. Generally, averages are about 4% for endowment and quasi-endowment. Plant spending rate will depend on what major projects are planned.

Saint Norbert College

Spend 6% of a 12-quarter moving average of market values for the period preceding the development of the budget, plus a small amount for income expected to be generated from new gifts. Spending must be no less than the previous year's budgeted amount.

St. Olaf College

Spend 6% of a 12-quarter moving average of market values.

EXHIBIT 9B

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

- St. Thomas, University of
Decide on an appropriate rate each year. The guideline is based on an expected total return over the long term, less expected inflation.
- San Diego State University Foundation
Spend all current income.
- San Francisco, University of
Spend 4.75% of a three-year moving average of market values.
- Santa Clara University
Spend 5% of a 12-quarter moving average of the ending market values.
- Sarah Lawrence College
Spend 6% of an eight-quarter moving average of market values.
- Scranton, University of
Spend 5% of a two-year average of market values.
- Scripps College
Spend 5.85% of a 12-quarter moving average of market values. If the ordinary income of pooled investments is insufficient to fund the full amount, the balance can be appropriated from realized gains of the pooled investments.
- Seattle Pacific University
Spend 5% of a three-year moving average of market values as of December 31.
- Seattle University
True Endowment: Spend 5% of an eight-quarter moving average of market values as of December 31.
Quasi-Endowment: Spend 5.5% of an eight-quarter moving average of market values as of December 31.
- Seneca, Inc., The Colleges of the
Spend 5% of a three-year moving average (calculated quarterly) of market values as of May 31.
- Seton Hall University
Spend 4.5% of a three-year moving average of market values.
- Shenandoah University
Spend 5% of the endowment market value as of December 31 of the previous year.
- Simmons College
Spend 5% of a three-year moving average of market values, set back one year.
- Simpson College (Iowa)
Spend 5% of a three-year moving average of market values as of December 31.

EXHIBIT 9B**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995****Skidmore College**

Spend 5% of a three-year weighted average of market values as of December 31. The college commenced a major capital campaign in fiscal year 1994, which is predominantly focused on raising endowment funds. During the life of the campaign (estimated to be four to five years), incremental costs associated with the campaign will be added to the endowment spending formula in order to reimburse the current fund for these costs.

Smith College

Spend 5.55% of a 12-month moving average of market values as of March 31 of the previous year, adjusted for net additions.

South, University of the

Spend 6% of the average market value of managed funds for the 12 quarters ended one year before the beginning of the current fiscal year.

South Alabama, The University of

The current spending policy is to spend 5.5% of beginning market values.

South Carolina System, University of

Spend all available income under endowment restrictions.

South Dakota and Foundation, University of

Spend 6% of a 12-quarter moving average of market values.

South Florida Foundation, University of

The spending policy for all endowments is 5% of a five-year average market value as of December 31, 1995.

Southeast Missouri University Foundation

A distribution of 5% of the average quarterly balance for the previous year is provided annually as long as the net return equals or exceeds 5.5%.

Southern California, University of

Increase spending by 5% each year. Spending must range between 4% and 6% of a 12-quarter moving average of market values as of December 31 of the previous year.

Southern California College of Optometry

Spend up to 5% of a three-year moving average of market values, excluding land held for investment purposes.

Southern Illinois University Foundation

Based on a three-year moving average of the endowment account's market value, a prespecified 5% is transferred to current funds. Any residual is reinvested into the endowment fund.

Southern Methodist University

Spend a percentage of a 12-quarter moving average of market values.

Southwest Missouri State University Foundation

Spend 6% of a three-year moving average of endowment market values.

Southwest Texas State University

Decide on an appropriate rate each year.

EXHIBIT 9B**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995****Southwestern University**

Spend 6.0% of a three-year moving average of market values (excluding real estate).

Spelman College

Spend 4.75% of a four-year moving average of market values with specific weight given to each year.

Stanford University

A model determining payment is based on (a) a target of 4.75% of expected market value; or (b) budget needs. The smoothing rule is applied to this combination. Fiscal year 1993 was the first of a two-year exception to the 4.75% target payment model. The current target is 6.75%.

Stetson University

Spend 5% of the previous year's market value.

Stevens Institute of Technology

Spend 6.5% of a three-year moving average of market values.

Stonehill College, Inc.

Spend 5% of a three-year moving average of market values.

Suffolk University

Spend only the necessary income.

Susquehanna University

Spend the lesser of (a) the actual yield from the previous calendar year; or (b) 5% of a three-year moving average of market values.

Swarthmore College

Increase spending each year by a weighted average of the change in the Consumer Price Index plus 1% (weighted 80%) and the growth in the unit market value of the endowment (weighted 20%), all calculated on a per unit distribution and applied to units outstanding. Spending should range between 3.75% and 4.75% of market value.

Sweet Briar College

Increase spending by no more than inflation rate, up to a 4% level.

Syracuse University

Spend a predetermined rate per unit consisting of all income and a portion of realized gains, with a ceiling of 6% of the average market value.

Tampa, University of

Spend interest and dividends only. Capital gains are reinvested in the fund.

Teachers College, Columbia University

Spend 6% of the 16-quarter moving average of market values.

Temple University

Spend all current income.

Tennessee System, University of

Separately invested funds: Spend all current income.

Pooled funds: Spend 5% of a three-year average market value calculated at December 31.

EXHIBIT 9B

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

- Tennessee at Chattanooga Foundation, University of
Spend base or prior year income less administrative expenses, whichever is greater.
- Texas System, University of
The endowment of the University of Texas System is made up primarily by the permanent university fund and the Long Term fund. All income from the permanent university fund is paid out as mandated by the state constitution. The spending policy for Long Term fund is set by the board of regents.
- The Texas A&M University System and Foundations
Income distribution will be, including fees, no more than 5% of the last 16-quarter rolling average of market values.
- Texas Christian University
Major Investment Portfolios: Spend up to 6% of a nine-quarter, time-weighted moving average of market values as of June 30.
Mineral Income: Transfer to endowment no less than 40% of all net oil and gas revenues.
- Texas Tech University
Spend all income except for certain endowment funds which add a percentage of their revenue to principal.
- Toledo and Foundation, University of
Spend 5% of a three-year moving average of endowment market values.
- Toronto, University of
The payout amount is determined each year in advance by the university administration, as per policy based on: (a) the payout for the previous year; (b) an estimate of inflation for the upcoming year; and (c) an adjustment for the estimated and actual Consumer Price Index of the previous year. Over time, the target rate is the real rate of return (currently considered 5%).
- Transylvania University
Decide on an appropriate rate each year.
- Trinity College (Connecticut)
Trinity adjusts the prior year's spending by the Consumer Price Index. The result must be in the 4% to 6% range of the trailing 12-quarter moving average of market values.
- Trinity University (Texas)
Spend 6% to 6.5% of a three-year moving average of market values.
- Tufts University
Increase spending by 5% each year, adjusted for additions.
- Tulane University
Base spending is 6% of fiscal year 1989 market value. Increase spending 4% each year, adjusting for additions.
- Tulsa, University of
Spend 5.5% of a two-year moving average of market values. Rate must be approved by the board of trustees each year.
- Union College (New York)
Spend 5.3% of a moving average of 1991, 1992, and 1993 June market values.

EXHIBIT 9B**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995****Ursinus College**

Spend 6% of a 12-quarter moving average of market values.

Utah, University of

For the unit value pool: Spend 5% of a 12-quarter moving average of endowment unit market values as of the previous December 31.

For other pools: Spend all current income except when donor restricted.

Utah State University

Spend percentage of earnings in accordance with donor agreements; some quasi-endowment earnings will be expended as needed.

Valparaiso University

Spend 5% of a three-year moving average of market values as of the end of the previous calendar year increased by additions made to the fund during the three-year period.

Vassar College

Increase the per unit spending each year by the percentage increase in the Higher Education Price Index provided that the resulting distribution is between 4.5% and 6% of the three-year moving average of unit market values.

Vermont, University of

Spend 4.5% of an average of market values.

Villanova University

Spend 5% of a three-year moving average of endowment market values and quasi-endowment investments as of December 31 of the previous year.

Virginia, University of

Distributable income per share should represent approximately 4% of the previous June 30 market value and grow at a rate of 4%. If in October of any given year the projected distributable income is greater than 5.5% or less than 3.5% of the previous June 30 market value, the distribution may be adjusted.

Virginia Commonwealth University

For majority of the endowment, spend 5% of a three-year moving average of market values.

VMI Foundation, Inc.

Spend 5.5% of a 12-quarter moving average of market values.

Virginia Tech Foundation

Spending is adjusted by the preceding year's inflation rate. Total endowment spending, which includes endowment support, internal administrative expenses, and external management fees, must fall within a 150-basis-point range determined by historical real returns. Current range is 5.20% to 6.70%.

Wabash College

Spend 5.7% more than previous year as long as spending is at least 4% and no more than 6.7% of a 12-quarter moving average of market values.

Wake Forest University

Spend 5.3% of a three-year moving average of unit market values.

EXHIBIT 9B

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

Warren Wilson College, Inc.

Spend 5.5% of 12-quarter moving average of market values as of March 31.

Washington, University of

Spend 5% of a three-year moving average of market values, not to exceed prior year's spending by more than 5%.

Washington and Jefferson College

Spend 4% of three-year moving average of market values.

Washington & Lee University

Utilize the lesser of prior year's spending incremented by inflation plus 1%, 6% of a three-year moving average, or 5% of the endowment market value as of the end of the year.

Washington State University

Spend 6% of market value per year from the consolidated endowment funds. The distribution is made quarterly based on the market value at the beginning of the current quarter. In the land-grant endowment, all current income is spent.

Washington University

Spending must fall within 3% to 6% of the unit value of the pooled endowment based on a five-year moving average of market values. Within this parameter, the spending rate will increase at the rate of the Consumer Price Index plus 0.5%, calculated on a three-year moving average.

Wayne State University

Distribute semiannually from income and realized capital gains using 2.5% of a five-semiannual-period moving average of market values.

Webb Institute of Naval Architecture

Spend all income. Capital additions are supported by income and appreciation of the endowment.

Wellesley College

Endowment spending shall be between 4.5% and 6% of a moving average of the endowment market value.

Wells College

Spend income equal to 5% of a 12-quarter moving average of endowment market values.

Wentworth Institute of Technology

Spend 5% of a trailing three-year average of market values.

Wesleyan University

Spend 5.5% of a 12-quarter moving average of market values as of December 31.

West Virginia University Foundation, Inc.

The spending policy makes a percentage of the 12-quarter average portfolio balance available to the university, provided that the original endowment principal is never spent. The rate presently established for purposes of the spending formula is 5%.

Western Illinois University Foundation

Spend 5% of the previous year's ending book value.

EXHIBIT 9B**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995****Western Maryland College**

A five-year moving average of the (weighted) real total net rate of return on externally managed assets is applied to the market value of the managed assets as of the close of the calendar year. The maximum draw is 6.5%.

Western Michigan University Foundation

Spend approximately 3.1% of the 1994 market value.

Western New England College

Spend 5% of the average market value of the true endowment for the 13 preceding quarters as calculated annually on December 31.

Westminster College (Pennsylvania)

Spend all current income.

Westminster College of Salt Lake City

Spend 5% of a 12-quarter moving average of market values.

Wheaton College (Illinois)

The targeted spending amount for each fund not otherwise restricted will be calculated at 5% of the three-year moving average market value of the fund. Each year the budget for this spending amount will be increased by the average projected percentage increase of the college's overall budget. However, the spending budget shall not exceed 5.5% nor fall below 3.5% of the three-year moving average market value of the fund's assets without the approval of the finance committee.

Wheaton College (Massachusetts)

Spend 5% of a 12-quarter moving average of market values as of June 30.

Whitman College

To preserve purchasing power, spend 5% of a three-year moving average of market values.

Whitworth College

Spend 5% of a five-year moving average of endowment market values.

Wichita State University

Spend 5% of a three-year moving average of endowment market values.

Widener University

Allocate investment income as follows: (a) 48% to the current restricted fund; (b) 41% to the current unrestricted fund; and (c) 11% to the endowment fund.

Willamette University

Spend 6% of an eight-quarter moving average of market values for the investment pool. Spend 4% of an eight-quarter moving average of market values for other major funds.

William & Mary, Endowment Assoc. of the College of

Spend 5.5% of a three-year moving average of market values as of December 31.

Williams College

Spend a prespecified percentage of prior year's spending, currently 104.5%. Income earned in the first year of a new endowment is returned to principal.

EXHIBIT 9B

**ENDOWMENT SPENDING RULES
FISCAL YEAR 1995**

Wilson College

Spend up to a fixed amount which is at a reducing percentage each year.

Wisconsin System, University of

Earnings are distributed on a trailing three-year average of endowment principal market valuations. In years when the actual earned is less than the 5% payout, actual income less 25 basis points is available for spending.

Wittenberg University

Spend 5% of three-year moving average of market values.

Woods Hole Oceanographic Institution

Increase spending by 5% annually. Spending must range between 4% and 5.5% of current year's market value.

Wooster, College of

Spend 6.6% of a 12-quarter moving average of market values.

Worcester Polytechnic Institute

Spend 5.5% of a two-year moving average of market values as of June 30.

Wyoming, University of

Spend a prespecified percentage of a moving average of market values.

Wyoming Foundation, University of

Spend a prespecified percentage of beginning market values.

Xavier University (Ohio)

Spend 4.75% of a three-year moving average of market values.

Yale University

A long-term spending rate of 4.75% is used with a smoothing rule which reduces the volatility of spending levels. Spending for a given year is equal to 30% of the long-term spending rate of 5% applied to the endowment's current market value, plus 70% of spending in the previous year, adjusted for inflation.

Yeshiva University

Spend 5.5% of December 31, 1993, unit market value.

Youngstown State University and Foundation

Spend all current income.

[2] Based on the Morgan Stanley Capital International EAFE index.

[3] Based on the Lehman Brothers Aggregate Bond Index.

[4] Based on the Salomon Brothers Non-U.S. Dollar World Bond Index.

[5] Based on the returns of 91-day Treasury bills.

[6] Based on the Russell-NCREIF Property Index.

[7] Lehman Brothers Mortgage-Backed Securities Index.

[8] Based on the Cambridge Associates, Inc. Nonmarketable Alternative Assets Database.

[9] Based on the Cambridge Associates, Inc. Nonmarketable Alternative Assets Database.

[10] Based on the Cambridge Associates, Inc. Investment Manager Database.

[11] Based on the Salomon Brothers High-Yield Market Index.

[12] Based on the Altman-Merrill Defaulted Debt Index.

[13] Based on the mean return of a representative sample of investment-quality oil and gas partnerships.

[14] Based on the Cambridge Associates, Inc. Investment Manager Database.

EXHIBIT 29

INVESTMENT POOL INVESTMENT MANAGEMENT EXPENSES (%)
FISCAL YEAR 1995

<u>Responding Institutions</u>	<u>External Investment Management Expenses</u>
In Aggregate	
Equal-Weighted Mean	0.47
Dollar-Weighted Mean	0.49
Median	0.44
By Investment Pool Size (Equal-Weighted Mean)	
\$25 million and under	0.50
Over \$25 million to \$100 million	0.47
Over \$100 million to \$400 million	0.45
Over \$400 million	0.45
By Type (Equal-Weighted Mean)	
Public	0.47
Private	0.46

Note: External investment management expenses are fiscal year 1995 expenses as a percentage of the average of beginning and ending market values of externally managed assets.

For this analysis, 76% of respondents provided data.

EXHIBIT 30
INVESTMENT POOL CUSTODIAL EXPENSES (%)
FISCAL YEAR 1995

<u>Responding Institutions</u>	<u>Custodial Expenses</u>
In Aggregate	
Equal-Weighted Mean	0.08
Dollar-Weighted Mean	0.06
Median	0.06
By Investment Pool Size (Equal-Weighted Mean)	
\$25 million and under	0.14
Over \$25 million to \$100 million	0.09
Over \$100 million to \$400 million	0.08
Over \$400 million	0.05
By Type (Equal-Weighted Mean)	
Public	0.08
Private	0.08

Note: Custody expenses are fiscal year 1995 expenses as a percentage of the average of beginning and ending market values of assets held in custody.

For this analysis, 52% of respondents provided data.

APPENDIXES

APPENDIX A

GLOSSARY

Annuity Funds -- Assets donated by individuals or organizations with the stipulation that the institution bind itself to pay stipulated amounts to donor or donor-designated beneficiaries. Payments terminate at a specified time.

Asset Allocation -- The distribution of endowment or investment pool assets among various asset classes, including but not limited to domestic common stock, foreign currency common stock, domestic fixed income, foreign currency fixed income, cash and cash equivalents, real estate, venture capital, leveraged buyouts, oil and gas, and distressed obligations.

Buyout -- The acquisition of an existing company by a new corporation formed for the sole purpose of the acquisition.

Campus Real Estate -- Real estate owned in or around the campus and held primarily for noninvestment purposes.

Cash and Cash Equivalents -- Short-term liquid assets (e.g., Treasury bills, commercial paper, certificates of deposit, nonconvertible bonds with remaining maturities of under one year).

Common Stocks -- Ownership positions in companies that can be traded. Often produce current income, which is paid in the form of quarterly dividends. The common stock holders' claims are subordinate to the claims of preferred stock holders and bond holders.

Custodial Fees -- Charges incurred for the guaranteed safekeeping of assets by an individual, bank, or other external firm.

Dollar-Weighted Mean -- The sum of a set of figures where each figure is weighted by its proportional representation in a specific universe. For example, if there are ten institutions in a universe, nine of which have investment pools of \$9 million and the tenth of which has an investment pool of \$19 million, the dollar-weighted mean return on all ten pools will be the sum of .09 times the individual returns on each of the nine \$9 million pools (.81 weighting in total) plus .19 times the return on the \$19 million pool (.19 weighting).

Endowment -- Assets donated by individuals or organizations to provide permanent capital and an ongoing stream of current income for an institution. Includes one or more of the following components-- true endowment, term endowment, and quasi-endowment -- and generally excludes life income and annuity funds.

Endowment Current Income -- The sum of stock dividends, bond interest, cash equivalent interest, rents, royalties, and other net cash flows earned by assets held in the endowment over a specified period of time. Does not include principal appreciation.

Equal-Weighted Mean -- The sum of a set of figures divided by the number of figures in the set.

Equity Real Estate -- Ownership positions in land and buildings. Includes mortgages or land leases that include participation in revenues and capital appreciation. Does not include publicly traded real estate investment trusts, which are classified as common stock.

Externally Managed Assets -- Assets, including pooled assets, managed by individuals or firms outside an institution.

Faculty Mortgages -- Homeownership loans issued by an institution to faculty or staff.

Financial Futures -- Contracts for the delivery of fixed income securities or currencies at a prespecified transaction price on a predetermined future date.

Full-Time Equivalent (FTE) Students -- The number of all students expressed as full-time credit-hour loads (e.g., two half-time students equal one full-time equivalent student).

Funds Held in Trust by Others -- Assets donated by individuals or organizations to an institution that are held and managed by individuals or firms outside the institution.

Gift Flow Rates -- Gifts as a percentage of the average of beginning and ending endowment market values.

Internally Managed Assets -- Assets managed by individuals or committees within an institution.

Investment Manager -- An individual, firm, or committee, inside or outside the institution, responsible for making decisions to buy, hold, or sell assets. Also known as a money manager or an investment advisor.

Investment Management Fees -- Charges incurred for the external or internal management of assets.

Investment Pool -- The group of assets that an institution deems best represents its investment policies and endowment asset allocation and returns. May include current operating funds.

Life Income Funds -- Assets donated by individuals or organizations on the condition that the institution bind itself to pay a specified level of income, expressed as a percentage of donated assets or as a dollar amount, to the donor or designated beneficiary for the lifetime of such beneficiaries. After the death of the beneficiaries, the institution gains complete ownership of the donated assets. Generally not considered part of an endowment while income is paid to beneficiaries.

Marketable Securities -- Stocks, bonds, or notes that are traded in the marketplace.

Median -- The value that divides any given data distribution into two equal parts.

Mortgage Real Estate -- A fixed income debt security collateralized by real property.

Noncampus Real Estate -- Real estate purchased or retained strictly for investment purposes.

Nonconvertible Bonds -- Long-term promissory notes that cannot be exchanged for other assets. Nonconvertible bonds generally earn interest (coupon rate) which is paid semiannually and are repaid at the principal (par) value.

Nonmarketable Securities -- Investments that are not traded in the marketplace, including but not limited to venture capital, leveraged buyouts, and oil and gas.

Quasi-Endowment -- Assets donated by individuals or organizations to an institution that the institution's governing board has decided to treat as permanent capital. Because this decision is optional, principal as well as income may be expended if the board so chooses.

Spending -- The amount withdrawn from an investment pool or total endowment and not returned to it.

Spending Rate -- The dollar amount of spending for a fiscal year as a percentage of the beginning market value of assets.

Spending Rule -- The guideline an institution uses to determine annual distributions from its endowment (e.g., spend all income, spend 5% of three-year moving average market value, increase spending by 5% each year).

Term Endowment -- Assets donated by individuals or organizations to an institution with the understanding that all or part of the principal may be expended after a stated period of time or the occurrence of a particular event. The income earned is available for expenditure by the institution.

Total Return -- The sum of income earned and appreciation, both realized and unrealized, for a specified period of time. If unit accounting is used, the return for a period is calculated by taking the difference between the ending and beginning unit values, plus unit income earned, then dividing this amount by the beginning unit value.

True Endowment -- Assets donated by individuals or organizations to an institution as permanent capital. Usually only income is spent, although in many cases applicable law provides for the expenditure each year of a defined portion of principal, if a governing board so authorizes.

Unit Income -- Income earned by each unit of an investment pool for a specified period of time.

Unit Spending -- Amount spent per unit of an investment pool for a specified period of time.

Unit Value -- The market value of each unit of an investment pool on a specified date. The unit value is adjusted when principal is added to or withdrawn from an investment pool.

Venture Capital -- Investments in nonmarketable securities of new companies with high risk and the potential for high return.

APPENDIX B
DESCRIPTIONS OF MARKET INDEXES

Altman-Merrill Defaulted Debt Index

The Altman-Merrill Defaulted Debt Index includes all public, nonconvertible corporate debt issues that have either filed for bankruptcy or defaulted on a scheduled interest or principal payment. The index can therefore be used as a benchmark for publicly traded distressed securities, but it should be noted that it does not include private issues.

Lehman Brothers Aggregate Bond Index

The LB Aggregate Bond Index is made up of the LB Government/Corporate Bond Index, the LB Mortgage-Backed Securities Index, and the LB Asset-Backed Securities Index. The mortgage index includes various 15- and 30-year government-backed mortgage pools while the asset-backed index is comprised of credit card, auto, and home equity loans.

Lehman Brothers Mortgage-Backed Securities Index

The Lehman Brothers Mortgage-Backed Securities Index includes 15- and 30-year fixed-rate securities that are backed by various government mortgage pools. Graduated-payment mortgages and balloons are included in the index; buydowns, manufactured homes, and graduated equity mortgages are not.

Morgan Stanley Capital International Europe, Australia, and Far East (EAFE) Index

The EAFE index includes approximately 1,100 companies representing the stock markets of Europe, Australia, New Zealand, and the Far East. The objective of the index is to measure, in U.S. dollars, the total return of the stock markets of the component countries. Because the representation of each country in the index is weighted by market capitalization, Japan accounts for approximately 41% of the total. Morgan Stanley also publishes subindexes composed of parts of EAFE (e.g., EASEA, which is EAFE excluding Japan).

Russell-NCREIF Property Index

The Russell-NCREIF Property Index measures the historical performance of income-producing properties owned by commingled funds on behalf of qualified pension and profit-sharing trusts, or owned directly by these trusts and managed on a separate-account basis. Only unleveraged properties (properties owned free of any debt) are included.

S&P 500 Index

Although it includes stocks traded on the American Stock Exchange and the NASDAQ National Market System, the S&P 500 Index is designed to replicate the broad industry groupings of all issues listed on the New York Stock Exchange and to reflect the price movement of common stocks in general. Prior to 1988, the index included 400 industrials, 40 utilities, 40 financials, and 20 transportation stocks. In 1988, Standard & Poor's Corporation abandoned these rigorous groupings in favor of more flexible selection criteria. This decision did not result in material changes in the composition of the S&P 500, but

S&P 500 Index (continued)

it should be noted that the high incidence of mergers and acquisitions in recent years has resulted in more companies of smaller capitalization being included in the index. Nevertheless, because the index is capitalization weighted, the largest 100 issues constitute 64% of its total market value. Additions to and deletions from the index are selected by the S&P Index Committee on the basis of size, industry classification, capitalization, trading volume, turnover, and stock price. The index may be broken down into more than 80 subindexes categorized by industry group.

Salomon Brothers High-Yield Market Index

The Salomon Brothers High-Yield Market Index is composed of public, nonconvertible, nonfloating-rate, cash-pay, and deferred-interest securities. The maximum quality rating of a security is Ba1 by Moody's or BB+ by Standard & Poor's. Bankrupt and defaulted company securities are not included.

Salomon Brothers Non-U.S. Dollar World Bond Index

The Solomon Brothers Non-U.S. Dollar World Bond Index attempts to measure the total return of high-quality (AA-rated or better) bonds in 43 sectors of the fixed income markets in 13 countries, including Eurodollar- and ECU-denominated issues. The index includes all outstanding securities with maturities of five years or more issued by the governments of Canada, Germany, Japan, the United Kingdom, Switzerland, the Netherlands, France, and Australia, plus representative Eurodollar and foreign corporate issues. Currency changes are not included. Returns are published monthly and the index is reweighted annually. Subindexes exist for each component country, broken down both by market sector and by maturity.

Wilshire 5000 Index

The Wilshire 5000 Index seeks to measure the total return of all U.S. common stocks with readily available price data. Almost 7,000 security returns are used in its construction, but since it is capitalization weighted, approximately 70% of its total market value is composed of S&P 500 stocks.

Strong Capital Management, Inc.

100 Heritage Reserve

P.O. Box 2936

Milwaukee, WI 53201

Strong Capital Management, Inc., is owned by its founder, Richard S. Strong, and various employee associates. The firm serves separate account and mutual fund clients with expertise embracing equity and fixed-income investment strategies. Grouped by investment discipline, Strong employs approximately 50 investment professionals.

Well known for a highly successful history in the mutual fund industry, Strong's strategic business focus today is oriented toward increased visibility of its institutional, separate account business. A team of exceptionally talented investment professionals has been attracted to Strong because of that strategy, and state-of-the-art technology is in place to support them in managing institutional accounts. Strong is aggressively seeking new equity and fixed-income accounts from larger pensions, endowments, foundations, and insurance company general and separate accounts, and is well positioned to manage separate account relationships.
