IDENTIFIERS *Arizona; Job Opportunities and Basic Skills Program

ABSTRACT

Arizona funding for adult education is authorized by Arizona Revised Statutes; federal funding is received under provisions of the Adult Education Act. The mission of Arizona adult education programs is to ensure adults' access to high quality educational opportunities to support them in their employment, job training, and higher educational aspirations and acquire the knowledge and skills necessary for effective participation in society. Current programs include the following: adult basic education, citizenship/naturalization, Department of Economic Security (DES)/Job Opportunities and Basic Skills Program (JOBS), English for Speakers of Other Languages, family literacy, General Educational Development (GED) preparation, GED testing, programs for institutionalized adults, and Project Challenge. Student assessment is conducted on a regular basis, beginning with intake and initial placement and continuing through measuring progress and determining when goals are attained or should be revised. Activities have been instituted to increase emphasis on provision of high quality services and institutionalization of accountability measures. The Arizona Adult Literacy and Technology Resource Center has also been created. (The 15-page report is followed by information from the federal data tables for fiscal year 1996 and a comparison of available program financial data from 1964-96. A summary of demographic trends, changes in demand for particular types of instruction, and funding is provided with the summary tables that follow.) (YLB)

FOREWORD

Education has been a high priority in Arizona since territorial days. When applying for statehood, the participants in the Constitutional Convention of 1910 believed that an educated citizenry was of utmost importance. In fact, the early drafts of Article XI of the State constitution began with “[a] general diffusion of knowledge and intelligence being essential to the preservation of the rights and liberties of the people....” (The Records of the Arizona Constitutional Convention of 1910, John S. Goff, ed., 1991, at p. 1069) and “[t] stability of a Republican form of Government depending mainly on the intelligence of the people....” (Id. At 1064). While the Records indicate that these phrases were rejected as sounding too much like “a good old fashioned Democratic speech,” (Id. at 523), they clearly indicate the priority of education in this State.

The conventioners believed these were more than mere words. By 1910, they had witnessed the most intense immigration in the history of America. They were keenly aware that education was responsible for preserving America’s unity while wave after wave of peoples arrived from other countries. As the heated debates about education as a requirement for voting show, the conventioners believed that a free society could not exist without educated participants. (Records at 564-69)

These reasons are as relevant today as in the early part 1900's, although little attention was given to adult education in territorial days. The State instituted a General Educational Development (GED) testing service and certificate program in the 1940's, but had no formal program for adult education instruction until 1965, when the State Board of Education approved its first State Plan.

Arizona has provided Adult Basic Education (ABE), GED preparation, English for Speakers of Other Languages (ESOL) and citizenship classes since that time.

BACKGROUND

In 1848, as a result of the Mexican-American War, the United States gained both New Mexico and the part of Arizona that lies north of the Gila River. In 1853, the remaining part south of the Gila, was obtained from Mexico through the Gadsden Purchase. In 1863 Arizona was made a territory and it’s boundaries have remained unchanged since it became a state in 1912.

Located in the arid Southwest, Arizona is bounded on the north by Utah, on the east by New Mexico and on the south by the Mexican state of Sonora. On the western border, the Colorado River flows for almost the entire length of the State. The river separates Arizona from California and part of Nevada. The Grand Canyon State is the sixth largest U.S. state in land mass, and is almost square. From north to south its greatest length is 395 miles, and its greatest width is 343 miles. Its total area is 114,000 square miles, including 492 square miles of water surface.

The name *Arizona* may come from the Pima Indian word *Arizuma* or from the Tohono-O’Odham

words *aleh-zon* or *ari-sonac*, or *ali-shonak*, all translated as “little spring” or “place of the little spring.” The Spanish first used the name for a mining map by the Planchas de Plata mine. Arizona’s nickname is the Grand Canyon State, although it has also been called the Copper State, the Apache State, the Aztec State, the Italy of America (for its mountains), and the Baby State and the Valentine State because it was the last state in the union when it was admitted on February 14, 1912.

About 45% of the land in Arizona is owned by the federal government. The United States Department of the Interior works with the Arizona Department of Land and the Department of Game and Fish on many reclamation and conservation projects. Much of the State’s wealth lies in its mineral deposits. Rich copper veins make Arizona the country’s principal copper-producing state as well as one of the great copper-producing areas of the world, and the State is a leading producer of gold, lead and silver. Most of the uranium mined in the United States comes from the Colorado Plateau region. In addition, Northern Arizona claims the largest ponderosa pine forest in the United States.

At one time, Arizona’s economy was said to be based on the “Five C’s”: copper, climate, cotton, cattle and citrus. Coal has recently been added to the list. Arizona’s manufacturing industry was developed during and after World War II, and now includes copper, processed food, aircraft and aircraft parts, vegetable and animal oils, electrical machinery and electronic equipment. (Compton’s Interactive Encyclopedia, 1994)

Arizona’s population is centered in metro Phoenix, Flagstaff, Tucson and Yuma. According to the U.S. Census Bureau, the State’s population soared from 2,716,546 in 1980 to 4,228,900 in 1995. Its growth was third fastest in the nation in 1995 and expected growth for 1996 projected to be 2.6%, or 108,000 new residents. Between 1980 and 1995, the population of Phoenix grew from 789,704 to 1,082,610; Yuma from 42,481 to 60,475, and Tucson from 330,537 to 447,075. Flagstaff lost its “rural” status, exceeding the 50,000 population mark in 1995.

Arizona generated 73,200 new jobs in 1995, a 5.4% increase over 1994 and the third fastest job growth in the nation. Another 59,000 jobs were created in 1996, and more than 58,000 jobs are expected in 1997. The years 1993-1996 will enter the record books as the strongest four-year period of job growth in Arizona history with more than 322,000 jobs having been created during this period. Maricopa County had the greatest job growth of any county in the nation, adding 61,029 jobs in 1994. (Arizona Department of Commerce)

The growth in both population and jobs has had a significant impact on education in Arizona, particularly the growth in, and demand for, adult education programs. The mission of Adult Education, which is printed inside the front cover and again on page 4 of this document, reflects an understanding of the interrelationship between education, employment and the ability of people to function effectively in society. Thus, the role of adult education has become increasingly important.

ARIZONA ADULT EDUCATION

Although the State did not formally adopt a program for adult education until 1965, Arizona has been involved in adult education since the early 1920's. The State's first programs were funded under the provisions of the Smith-Hughes Act for Americanization classes. Currently, State funding for adult education is authorized by Arizona Revised Statutes §15-234 and federal funding is received under the provisions of the Adult Education Act (P.L. 89-750, as amended). The federal funding is contingent upon submission by a state, and acceptance by the U.S. Department of Education, of a State Plan for providing services within the purposes of the Act.

Illiteracy is a serious problem in Arizona and throughout the nation. Even the most conservative figures indicate that there are 27 million functionally illiterate adults in the United States. The concomitant problems impact every aspect of life. Arizona society and economy feel the pressure of supporting 500,000 adults with less than a high school diploma and countless thousands without adequate communication and mathematical skills who are unable to function effectively in society. Adult education addresses the need for making available basic educational programs which will assist these students and enable them to become productive, tax-paying citizens who believe in their own ability to learn, achieve and contribute.

Definitions:

1. The term "adult education" means instruction or services below the college level for adults 16 years of age and older who do not have--
 - (a) the basic skills to enable them to function effectively in society; or
 - (b) a certificate of graduation from a school providing secondary education and who have not achieved an equivalent level of education.
 - (c) are not enrolled in a public school, charter school or home school.
2. The term "adult basic education" means adult education for adults whose inability to speak, read, or write the English language constitutes a substantial impairment of their ability to get or retain employment commensurate with their real abilities. It is designed to help eliminate limitations and raise the level of education of such individuals to a level which makes them less likely to become dependent on others, to improve their ability to benefit from occupational training and otherwise increase opportunities for more productive and profitable employment, and to make them better able to manage adult responsibilities.

These definitions are reflected in the mission statement for the Arizona Department of Education/Division of Adult Education, which addresses both the personal goals for students and the societal benefit from having educated citizens who can participate effectively and contribute to the economy of the State:

MISSION

Arizona Adult Education Programs will assure that adults have access to quality educational opportunities to: 1) bridge and support them in their employment, job training and higher educational aspirations, and
2) acquire the knowledge and skills necessary for effective participation in society.

This mission is accomplished through the administration of programs in such a manner as to ensure that quality programs are offered to adult education students, and that such programs are designed to meet a variety of educational needs. Each type of program currently offered is summarized below.

Programs Offered

In 1990, 33,905 persons were served in programs funded through the Arizona Department of Education/Division of Adult Education (ADE/DEA). By 1993, 44,354 persons were served and in FY 1996, the number rose to 56,242. This represents a six year increase of 22,437 students (60%). The types of instruction offered to students include:

1. Adult Basic Education (ABE)

Adult Basic Education (ABE) was initiated nationally under Title II-B of the Economic Opportunity Act of 1964. This program was started in Arizona in 1965 when it was funded through the Office of Economic Opportunity. In 1966, program administration was changed to the United States Office of Education. The Adult Education Act, as amended, authorizes funding to states with an approved State Plan for providing services as specified in the Act. The annual state grant is administered by the Arizona Department of Education/Division of Adult Education.

It is the purpose of ABE to provide educational opportunities for adults who lack the level of basic skills requisite to effective citizenship and productive employment. Adult education programs are expected to: 1) enable adults to acquire a basic level of functional literacy; 2) provide adults with sufficient basic educational knowledge to enable them to benefit from job

training and retraining programs, maintain productive employment and fully enjoy the benefits and responsibilities of citizenship, and 3) enable adults who so desire to continue their education in basic skill areas to a level comparable to completion of a secondary school program.

ABE Level I is designed for adults who are unable to read, write and apply mathematical skills sufficiently well to meet the requirements of adult life and function effectively in society. Beginning ABE includes functional levels equivalent to grades 0 through 5.9. ABE Level II/Pre-GED is designed for adults who have some competence in reading, writing and computation but are still not sufficiently competent to meet the requirements of adult life and function effectively in society. ABE Level II includes functional levels equivalent to grades 6 through 8.9. **For all ABE programs, students must be 16 years of age or older and not enrolled in a K-12 educational program.**

In addition to the regular ABE programs, many students receive additional assistance through computer-assisted instruction, or one-on-one tutoring offered through volunteer programs such as Literacy Volunteers of America. One of the first statewide computer-assisted instruction programs was Project LEARN. This project was co-sponsored by the Arizona Supreme Court, Administrative Offices of the Court, and the Arizona Department of Education. Targeting high-risk youth, juvenile and adult probationers and parolees, the objectives of Project LEARN included the development of curricula in basic skills, life skills and general education to enhance instruction provided at learning centers, and the development of computer-based centers. It also included an evaluation component. The success of students in the LEARN labs has encouraged the majority of adult education providers to implement computer-assisted instruction for teaching and learning.

Discretionary funding for Project LEARN concluded in FY 1996, and the programs will continue with support from regular adult education funding sources. The program providers now own the software developed by INVEST Learning and will incorporate maintenance of the labs into their regular ABE program budgets.

2. Citizenship/Naturalization

Citizenship is defined as instruction for adult students who plan to become citizens of the United States. The instructional focus is on the citizenship examination. Classes provide students with a foundation in civics, including U.S. history, foundations of federal government, the U.S. Constitution, foundations of state and local government, citizenship rights, duties and responsibilities, community responsibilities, current events, the steps to becoming a citizen, and procedures for filing for citizenship and completion of required forms.

In addition to citizenship classes funded through adult education, a refugee resettlement grant was awarded to Arizona by the U.S. Department of Health & Human Services during FY 1996 and administered through the ADE/DAE. The grant provided funding to six programs which provided instruction in English language skills and in the history and government of the United

Stated to students. The six programs were selected according to interest and need: Cochise College, Nogales Unified High School District, Phoenix Union High School District, Pima County Adult Education, Somerton Elementary School District and Yuma Elementary School district. Qualified students were recruited through community referral agencies, flyers, program brochures, schedules and media coverage. 426 adult students were served through this grant during FY 1996.

3. DES/JOBS

This program is jointly managed by the Arizona Department of Economic Security (DES) and the Arizona Department of Education/Division of Adult Education (ADE/DAE). Funding is provided pursuant to applicable provisions of section 392(a)(19) of the Social Security Act, as amended by sections 201(a) and (b) of the Family Support Act of 1988, otherwise known as the Job Opportunities and Basic Skills (JOBS) program. Since 1993, the DES has contracted with the ADE/DAE to provide adult education services to DES clients who are determined eligible and placed in the JOBS program, all of whom receive public assistance through DES. Persons who do not meet the DES requirements, or who are not enrolled in the JOBS education program, may attend non-JOBS adult education classes on the same basis as any other student. During FY 1996, DES provided funding for approximately 600 DES/JOBS clients.

Prior to FY 1997, DES/JOBS providers received a specific amount of funding for “guaranteed” slots and were able to generate additional funding for accepting additional clients, up to a specified limit, on a “fee for service” basis. JOBS clients were served in classes designed specifically to meet the instructional requirements of the DES and the JOBS clientele. The curriculum included instruction in ABE, with the addition of a Life Skills component, and GED preparation. English for Speakers of Other Languages (ESOL) was provided at designated sites. In order to encourage the use of technology, funding was structured to provide an additional 55 cents per contact hour of instruction for sites which met certain conditions, including the purchase of computers and adult education software. This resulted in all DES/JOBS developing computer-assisted instructional programs between 1993 and 1996.

For FY 1997, all funding was “guaranteed” and providers had the option of serving JOBS clients in regular adult education classes or separate classes, whichever is most cost effective. The provider determined the appropriate types and levels of instruction in order to ensure that clients receive the most appropriate instruction during the 2-year eligibility period dictated by federal welfare reform legislation. Because participation in these types of educational activities no longer qualifies the State for federal matching funds, it is likely that the DES/JOBS program will be discontinued after FY 1997 and clients will be placed in job training instead of educational programs.

4. English for Speakers of Other Languages (ESOL)

These classes provide instruction in English using basic communication skills: listening,

comprehending, speaking, reading and writing. Teachers utilize a variety of instructional methodologies in providing ESOL instruction. Many students find that computerized programs work best because they can work at their own pace; others prefer classroom instruction with other students, as they learn best through interacting with the instructor and other students. The ADE/DAE requires continuous assessment of student progress and the familiarization of students with national and local customs in a multi-cultural context. **For all ESOL programs, students must be at least 16 years of age and not enrolled in a K-12 educational program.**

ESOL I provides instruction for adults who have limited or no proficiency in the English language. Emphasis is placed on listening and speaking. Literacy skills, reading and writing are introduced at this level. ESOL II provides instruction designed for adults who have some competence communicating in English. Instruction in reading and writing is integrated with ongoing development of speaking and listening skills. ESOL III provides instruction designed for adults who can communicate in English, but need instruction in usage. At this level, emphasis is placed on idioms, language for specific purposes and grammatical structure. Reading and writing instruction is integrated with speaking and listening skills.

5. Family Literacy

In a 1994 Special Session which focused on children and family issues, the Arizona Legislature passed H.B. 2001. The bill authorized a four-year pilot program and funded the first two years of that program, defined as "...a program that is...designed to promote the acquisition of learning and reading skills by parents and their preschool children in a shared instructional setting."

Eligibility for the pilot program is based upon the parents: 1) having a three or four year old child; 2) not having a high school diploma or GED, or lacking sufficient mastery of basic educational or basic English language skills necessary to function effectively in society; and 3) being a citizen, legal resident or authorized visitor in the United States.

Instruction is based on a nationally recognized family literacy model, such as that developed by the National Center for Family Literacy (NCFL), or one that is considered superior to that developed by the NCFL. The instruction includes four components: 1) parents receive instruction in adult basic education and GED preparation; 2) children receive developmentally appropriate early childhood instruction; 3) joint literacy-related learning activities are conducted which promote interaction between parents and their children, and 4) parents are connected with appropriate community resources. Currently the pilot program provides funding to 18 local providers at 24 sites, including 2 model programs which assist the other 16 providers with program design and implementation. It is anticipated that the success of the pilot projects will result in legislative approval for a permanent program in 1998.

The importance of parental involvement in their childrens' learning was recently emphasized by the U.S. Secretary of Education. The Secretary cited the results of a new study which indicated that fourth-grade average reading scores were 46 points below the national average where principals judged parental involvement to be low, but 28 points above the national average where

parental involvement was high--a difference of 74 points. Even when other factors such as parents' education were taken into account, the phenomenon remained. (Reading Literacy in the United States, NCES., 1996) Researchers involved with this study noted that children of parents with less than a high school education are at a distinct disadvantage in the classroom. Programs such as Family Literacy are recommended to assist these children and their parents.

6. General Educational Development (GED) Preparation

“GED Preparation” is instruction designed for adults who are literate and can function in everyday life, but are not proficient in the five subject areas and/or who do not hold a high school diploma or equivalency certificate. **Students must be 18 years of age or older to participate in GED Preparation classes; students 16-17 years of age may participate in pre-GED classes, but may not take the GED tests until they reach the age of 18, unless they meet certain conditions, which are discussed in section 7 below.** GED Preparation programs are funded as part of the ABE grants, which are awarded on an annual basis through the ADE/DAE.

GED Preparation is intended to prepare adult students to take and pass each of the five tests in the GED battery, plus the written essay, at a rate which results in a passing cumulative score. GED instruction occurs in a one-to-one setting, a traditional classroom setting, on a computer or any combination of these options. Subjects include mathematics, reading from literature and the arts, writing, social studies and science. After an initial assessment has been completed to determine whether the student has the basic skills necessary to successfully complete the GED program, an individualized education plan is developed. Continuous evaluation is provided to ensure that students receive the level of instruction that is appropriate to their individual abilities and goals, and to assist them in passing the national GED examination.

7. General Educational Development (GED) Testing

The Serviceman's Readjustment Act of 1944, commonly known as the “G.I. Bill,” allocated funding for high education of soldiers returning from World War II. The General Educational Development (GED) tests were developed during the war to accommodate the educational needs of returning veterans and was adopted by the Arizona State Board of Education in 1945. Now any person 18 years of age or older is eligible to study for and take the GED. Persons 16 or 17 years of age who have been officially withdrawn from public education for six months and who present a signed and notarized statement of consent from a parent or legal guardian may also take the GED examination.

Individual high schools or colleges in Arizona do not have the authority to grant the Arizona High School Equivalency Diploma, which is awarded to persons who successfully pass the GED.

The GED test administration is supervised by the Director of GED Testing, who is also the State Chief Examiner. The ADE/DAE administrative duties include test scoring, maintenance of testing records and the awarding of the Arizona High School Equivalency Diploma.

8. Programs for Institutionalized Adults

The provisions of the federal Adult Education Act require that a minimum of 10% of the federal grant be used to provide adult education to institutionalized persons. This is accomplished by funding adult education providers to serve persons in jails or prisons or who are on parole or probation, and providing staff development and technical assistance to these providers.

The ADE/DAE works closely with the education coordinator in the Arizona Department of Corrections to ensure that the goals of the Adult Education Act are carried out. In addition, education staff are invited to attend all training activities sponsored by the Department directly or through the activities of the Arizona Adult Literacy and Technology Resource Center (AALTRC). This includes sharing information and materials, coordinating staff development activities and conducting joint conferences for adult education and correctional education personnel. Substantial support for such activities has been provided through Section 353 discretionary funding (P.L. 102-73) and the efforts of AALTRC.

Programs in jails and prisons are comparable to those offered by non-institution-based providers. Instruction consists of ABE, ESOL and GED Preparation courses. In addition, the ADE/DAE assists in the training and coordination of GED testing in these settings.

9. Project Challenge

The Arizona National Guard Military Youth Corps Challenge is a 17-month program remedial "youth at risk" program that provided leadership development, conflict resolution skills and career exploration and planning. The core curriculum for Project Challenge consists of at least 200 hours of classroom instruction in preparation to take the General Educational Development (GED) tests. For students who demonstrate the desire and ability, concurrent enrollment in community college courses is available.

Phase I of the program consists of a 5-month residential program. Successful participants are eligible to receive an educational stipend to attend post-secondary educational institutions or technical schools, as determined by the students' personal educational goals. Phase II consists of a 12-month mentoring program. Community leaders from throughout Arizona, along with National Guard volunteers, mentor students through personal contact with them and teaching them the personal and professional skills to achieve their educational, employment and personal goals.

Arizona was one of ten states selected by the National Guard Bureau to pilot this program and was one of 15 states participating in the program during FY 1996. Project Challenge focused on GED preparation, discipline and responsibility. The goal was to significantly improve the life skills and employment potential of youth, aged 16-18, who dropped out of regular high school programs. Students were required to meet eligibility requirements, including residency, and be drug free during the entire period of participation. In addition, students could not have a felony conviction or be on parole or probation for a misdemeanor. The GED testing component and

alternative high school credit were provided by Gilbert Public Schools, under the direction of Superintendent Walter Deleckie.

The ADE/DAE provided funding to the Arizona Adult Literacy and Technology Resource Center to conduct a qualitative study of Project Challenge. The initial study was completed during FY 1996 and will be extended to include data from the final class during FY 1997. The study may be obtained from the Division of Adult Education at (602) 542-5280.

Funding

The ADE/DAE receives an annual appropriation from the State legislature, pursuant to Arizona Revised Statutes §§ 15-234, for the purposes of adult education (§15-232), GED testing or an alternative high school diploma (§15-702).

Federal financial assistance has been provided to the State since 1965. Through the Adult Education Act, which has since been amended by the National Literacy Act, funds are provided to the ADE/DAE to carry out the purposes of the Act, which include the establishment or expansion of adult education programs to be carried out by local educational agencies and by public or private agencies, organizations and institutions. Grants may not be used to carry out programs by a for-profit agency, organization or institution unless the agency, organization or institution can make a significant contribution to attaining the objectives of the State Plan and can provide substantially equivalent education at a lesser cost or can provide services and equipment not available in public institutions.

Included in the federal legislation is a mandatory provision that 15% of the federal allocation be used for staff development (10%) and special demonstration projects (5%). A significant portion of the 353 funding is paid to the Arizona Adult Literacy and Technology Resource Center (AALTRC) for the purpose of providing staff development and training activities to all providers in the state. In addition, a percentage is included in the grants awarded directly to providers so they can conduct their own staff development activities locally.

On September 30, 1996, President Clinton signed into a law a spending bill which included a \$95 million increase for adult education. This increased funding for state grants from \$250 million to \$345 million. The increased funding will make it possible for hundreds of thousands more adult with literacy needs, many of whom have been on waiting lists, to participate in basic education programs, beginning in FY 1998.

A history of funding for adult education programs is provided, in spreadsheet format, in the Appendix. Also included is a history of program costs on a per student basis as well as an instructional contact hour basis.

Student Assessment

Each adult who enrolls in an adult education program does so with a variety of past learning, life experiences and skills. The diversity of these experiences makes the assessment of the student both important and difficult. Initially, assessments give the student and educator a foundation from which to develop an individualized education plan.

In adult education programs, assessment instruments are used to establish a learner's previously acquired abilities in reading, language arts, and mathematics. Standardized assessment instruments

are also available to determine the proficiency of students whose primary language is other than English. The goals of student assessment include:

1. Identifying the individual strengths of the student.
2. Identifying the individual academic needs of the student.
3. Developing an individualized education plan for, and with, the student.
4. Effectively communicating the results of standardized, curriculum-based and personalized assessments in order to develop realistic goals for and with the student, within the limitations of the assessment tools and instruments available.
5. Obtaining information regarding the competencies of the student and communicating that information to the student.
6. Measuring student progress on a regular basis in order to accurately assess when adjustments are necessary to the student's goals have been reached.

It is essential that quality assessments be conducted on a regular basis, beginning with intake and initial placement into adult education programs, measuring progress as instruction is taking place, and determining when the student has met individualized education plan goals, or determining that the goals need to be revised. This ensures that the relevance and quality of instruction are evaluated on an ongoing basis, and that the focus is on documentation of performance by the student and the teacher.

The development of a Self-Assessment process, which must be utilized by all providers funded by the ADE/DAE, was intended to assist providers with the ongoing evaluation of students and program quality. Since continued funding from ADE/DAE will be contingent upon documentation that the program is performing well, it is imperative that providers

institutionalize ongoing student and program assessment as the primary method of demonstrating its performance.

Students with Disabilities

All providers receiving funding through ADE/DAE are required to make reasonable accommodations for students with disabilities, as required by Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act. The AALTRC has provided training for providers regarding the provisions of these two laws and the need to avoid discrimination on the basis of disability. Training is expected to be an ongoing activity, both at the state and provider levels.

Occasionally, adult educators are presented with students for whom adult education programs are inappropriate. To best serve all students, and to ensure the best use of limited resources, these students may be denied enrollment or removed from the program. They may not, however, be denied enrollment or removed from the program solely because they have a disability. The reason for denying enrollment or removal from the program must be because the program or services are not appropriate for the student or the student is not qualified to participate in the program, regardless of the presence of a disability. Whenever possible, providers are encouraged to refer students to other programs in the community that can meet the student's needs, including those that will support the student's successful participation in adult education..

EVALUATION ACTIVITIES

The Arizona Department of Education/Division of Adult Education (ADE/DAE) collects information required for federal data tables on December 15 and August 15. The purpose of the interim report (December 15) is to assess trends among the programs which reflect a need for either legislative action during the program year or technical assistance from the State. The final report data is received by August 15 and analyzed in order to: 1) prepare the final evaluation report for the U.S. Department of Education; 2) address the staff development and training needs of providers; 3) evaluate trends to determine, among other issues, how effectively our programs are serving the needs of adults, and to assess demographic changes in the population seeking services, and 4) make needed changes in program funding or administration in order to ensure that programs receive the maximum support possible to operate effectively and efficiently.

During FY 1996, programs in Arizona served 56,242 students. This is 3,586 more students than in FY 1995 (52,656), reflecting an overall increase of about 1%. In addition to serving higher numbers of students, programs documented approximately 7,400 students on waiting lists.

It is significant that 45% (25,138) of all adult education students were enrolled in English for Speakers of Other Languages (ESOL) classes. This is reflective both of demographics and a recognition by students that they cannot function effectively, including obtaining or retaining

substantial employment, without strong English skills. While much of this demand is from Spanish-speaking students, there is a growing demand for ESOL among students from Asia and Eastern Europe. Sixty one percent (61.5%) of the students served in adult education programs were of Hispanic origin and 22.8% were white, not of Hispanic origin.

Program Quality

The data provided on Table 6 indicates that 17,128 students improved in reading ability; 15,301 improved in writing ability and 8,880 improved in math, for a total of 41,309 students (duplicated count) who improved in one or more of these core areas. In addition, 3,112 completed ESOL classes, 60 obtained a high school diploma and 7,320 either passed the GED test or were in the process of completing the test at the close of FY 1996.

The ADE/DAE has instituted three activities to increase the emphasis on provision of quality services and institutionalization of accountability measures:

1. Changed the formula for granting funds to providers to an hourly reimbursement rate, based on a specified number of contact hours to be provided during the contract term (fiscal year). This is intended to decrease the number of students served and provide more services to those who are enrolled in programs, with an emphasis on higher student achievement. By increasing the amount of money available on a per-student basis, programs will be able to increase and improve staffing, purchase sufficient supplies to meet student demand, and increase of the use of instructional technology, including the purchase of computers. It is anticipated that the emphasis on student performance and measurable outcomes versus continually increasing the numbers of students served, will have a positive impact on program quality and student achievement.
2. Formally instituted a process for the self-assessment of all programs funded through the ADE/DAE. The process was designed by providers, with the ADE/DAE facilitating the discussions. The emphasis was on improving program quality and student achievement, and recognizing programs that are performing well.
3. The ADE/DAE contracted with AALTRC to conduct or commission a review of program data for the past several years to identify trends in adult education programs, and to develop a system of data collection that will truly capture program quality data that can be utilized for program review, reporting and legislative purposes. It is anticipated that this study will be commissioned during FY 1997 and an ongoing evaluation system will be in place during FY 1998.

The current Arizona State Plan for Adult Education has established the following two goals for all programs funded through ADE/DAE: 1) Enable all adults to achieve the basic literacy skills necessary to function on the job and in society, to achieve their goals and develop their knowledge and potential. 2) Plan, implement and monitor Section 353 adult education projects,

including an evaluation of 20% of the federally funded adult education projects each year.

In addition to the data previously provided regarding numbers of students served and goals achieved, the ADE/DAE assessed trends at each site and worked with certain program on specific issues which arose during the reporting process. Some of the issues included the following:

1. Programs continue to serve increasing numbers of adult education students with a net decrease in fiscal resources. This has resulted in a shift in priorities to ensure that high quality services are provided to students and that students have the support to achieve their IEP goals.

As indicated previously, ADE/DAE is attempting to reduce the numbers of persons served, in favor of ensuring high quality program which result in measurable progress for students. This is being accomplished through a change in the funding formula for granting ABE funds to providers, as well as staff development activities designed to assist providers in managing their programs more effectively and learning to refuse admission when classes are full. These activities were begun during FY 1996.

2. Increasing demands for adult education classes as restrictions and eligibility limitations on benefits for welfare recipients, such as the DES/JOBS program, are making fewer alternative educational opportunities available for the most needful persons in our State. The increased demand for services has resulted in the mobilization of adult education providers and the ADE/DAE to seek additional funding from the State legislature. In addition, the State is proposing legislation to develop and fund an adult high school program that will result in a regular high school diploma being issued to successful participants. This will be an appealing alternative for students who would like a regular high school diploma in stead of, or in addition to, a GED diploma.
3. The need for the State to train adult education providers to collaborate effectively with other programs in the community. Many providers equate cooperation with collaboration, which does not result in the maximization of resources required by the federal government and ADE/DAE contracts with providers. The State will respond to this need by working with providers and AALTRC to ensure that training and technical support are provided to any provider who requests those services.
4. The need for the State to implement a formal, periodic monitoring system based on the program quality indicators developed for the self-assessment process. This is provide accountability to the State, ensure that problems experienced by providers are addressed effectively and that programs and assessment procedures are focused on improving program quality and student achievement. This system is being developed and is expected to be fully functioning during FY 1997.

Arizona Adult Literacy and Technology Resource Center

The creation of the Arizona Adult Literacy and Technology Resource Center (AALTRC) is in direct response to the second goal in the State Plan. Under the provisions of the 1991 National Literacy Act, J. Fife Symington, III, Governor of Arizona, made application to the U.S. Department of Education for the establishment of the AALTRC in September, 1992. The Application Committee, with input from the State Adult Education Committee, the Arizona Department of Education, Division of Adult Education, program directors and instructors from the field, was instrumental in identifying the focus and framework for the Center.

According to the provisions of the Act, state literacy resource centers could be part of an expanded project. The AALTRC was established as an expansion of the Arizona Staff Development Consortium with Literacy Volunteers of Maricopa County, Inc. (LVMC), housing the Center. The Staff Development Consortium consisted of 12 individuals located geographically throughout Arizona who provided or facilitated staff development opportunities for adult educators in their geographic regions, and who acted as conduits of information between the ADE/DAE and the various programs providing adult education and literacy services. These adult educators also acted as resources for individuals, companies or groups who requested information about or were interested in initiating adult education programs. LVMC was not only designated fiscal agent for AALTRC, but also provided access to state-of-the-art facilities that allowed for on-site, hands-on demonstrations of computer aided instruction. LVMC also provided access to an extensive library of instructional materials which could be reviewed by current and potential providers of literacy services.

AALTRC contains a library of classroom and professional development materials, a technology center to preview audio, visual and software materials, access to a learning laboratory using computer assisted instruction, meeting rooms and classroom facilities for large and small groups. The Center is geographically located in Phoenix and utilizes staff development professionals, who are located across the State and associated with AALTRC, to offer advice, guidance, training and workshops to individuals involved with and interested in adult education and literacy.

Description of Program Data

The following sections include information from the federal data tables for FY 1996 and a comparison of available program and financial data from 1964 through 1996. A summary of demographic trends, changes in demand for particular types of instruction and funding is provided with the summary tables which follow.

Part Time is defined as an employee who is employed as an adult educator in this program LESS THAN FULL TIME.

Full Time is defined as an employee who is employed FULL TIME in this program as an adult educator.

Full Time normally means on a contract equivalent to other full time personnel in your institution.

Each employee should be reported only once. If a person performs more than one staff function, report that person in the staff function in which most of his/her time is spent.

If a position is vacated and subsequently filled during the report period, report the position once.

Annual Performance Report
Fiscal Year 1996

U.S. Department of Education
Office of Educational Research and Improvement (OERI)
Educational Resources Information Center (ERIC)

REPRODUCTION RELEASE
(Specific Document)

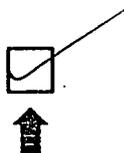

I. DOCUMENT IDENTIFICATION:

Title: <i>Arizona Division of Adult Education. Annual Performance Report. Fiscal Year 1996.</i>	
Author(s):	
Corporate Source: <i>Arizona Department of Education, Adult Education Division.</i>	Publication Date: <i>July 1997</i>

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education* (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic/optical media, and sold through the ERIC Document Reproduction Service (EDRS) or other ERIC vendors. Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following two options and sign at the bottom of the page.

The sample sticker shown below will be affixed to all Level 1 documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY _____ TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 1

The sample sticker shown below will be affixed to all Level 2 documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN OTHER THAN PAPER COPY HAS BEEN GRANTED BY _____ TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 2

Check here For Level 2 Release: Permitting reproduction in microfiche (4" x 6" film) or other ERIC archival media (e.g., electronic or optical), but *not* in paper copy.

Check here For Level 1 Release: Permitting reproduction in microfiche (4" x 6" film) or other ERIC archival media (e.g., electronic or optical) and paper copy.

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but neither box is checked, documents will be processed at Level 1.

"I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic/optical media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries."

III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE):

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents that cannot be made available through EDRS.)
