ABSTRACT

Career and life planning are central to education and provide a unifying focus for school guidance efforts. There is growing evidence that individuals who have goals and dreams often attain them, while those who set no objectives in life frequently fall short of their potential. This guidebook was prepared for schools and institutions to use to improve their current career planning efforts by placing career planning in the context of a comprehensive guidance program. It defines the various activities that make up life planning and provides the framework to conduct self-reviews using the principles as set forth in this information. Part 1 introduces "Career Planning and Comprehensive Guidance Programs." Part 2 details the "Seven Cs of the Career Planning Process," which are clarity of purpose, commitment, comprehensiveness, collaboration, coherence, coordination, and competency. Each chapter contains a brief summary of the key points. Part 3 describes the "Career Planning Self Evaluation Process and Application Review Criteria," and includes sample self-review instruments. Application material and guidelines for schools, institutions, and agencies that would like to submit their programs for recognition are included in part 4 along with a list of names and addresses of State Career Guidance Supervisors. National Consortium of State Career Guidance Supervisors Purpose and Mission Statement

The Consortium is a coalition of guidance representatives for participating state and territorial departments of education. The organization's mission is to enhance career guidance and counseling, leadership and training, support research and facilitate program improvement. The Consortium's purpose is to provide a framework for improving the effectiveness of elementary, secondary and postsecondary programs, counselor education and supervision, and administration of comprehensive career guidance programs in school, community and institutional settings. Specific objectives of the Consortium include the following:

- Provide opportunities which enable states to collaborate on and support projects of mutual priorities, ongoing programs, career development and pre-vocational services;
- Promote the development and improvement of career guidance at all levels of education and training;
- Involve business, industry and government in creating, operating and evaluating quality comprehensive career guidance programs;
- Serve as a clearinghouse through which states can seek assistance from public and private sources for the improvement and expansion of career guidance programs;
- Offer technical assistance to states in developing their annual and long-term plans related to career guidance and counseling;
- Provide assistance in the development, implementation and evaluation of comprehensive guidance programs;
- Provide evidence of program effects and a forum for promoting career guidance as a program of national significance with business industry and governmental entities;
- Influence career guidance professional literature through research, publishing and product development.

PREFACE

There is growing evidence that individuals who have goals and dreams often attain them, while those who set no objectives in life frequently fall short of their potential. This is as true of students in school as it is of adults preparing for retirement. In an ideal situation, planning for a career is an integral part of an individual's school course selection, achievement, postsecondary choices and employment. The career planning process should begin early and involve a wide variety of experiences and decisions related to education and work. Career planning also suggests that guesswork, notions of luck, and other popular myths are not the appropriate path to follow. Planning means individuals take what they already know, relate this to what they would like to do, and then plot a very specific road map of goals and strategies to better assure achieving one's life expectations.

This guidebook was prepared for schools/institutions to use to improve their current career planning efforts by placing career planning in the context of a comprehensive guidance program. The guidebook defines the various activities that make up life planning, and provides the framework to conduct self-reviews using the principles as set forth in this information. Also contained in the guidebook are complete application materials and guidelines for schools, institutions and agencies who would like to submit their program for recognition. Career and life planning are central to education and provide a unifying focus for school guidance efforts.

*Harry N. Drier, Executive Director
National Consortium of State Career Guidance Supervisors*

ACKNOWLEDGMENTS

The U.S. Army Recruiting Command is commended for its dedication to helping youth "be all they can be" through the national *Planning For Life* program. With the support of the Committee for Economic Development and its national advisory committee, this group created the concept of the national and state *Planning for Life* recognition program.

The development of this guide resulted from the vision and encouragement of several state guidance supervisors/coordinators who felt and agreed that a program definition, program structure, and program standards were essential for effective career planning. Appreciation is extended to the following state departments of education and their respective guidance coordinators for their creative thinking, dedication and work: Florida-Zelda Rogers, Louisiana-Joycelyn Brunswick, Michigan-Jack Lawrence, Missouri-Marion Starr, Nebraska-Evelyn Lavaty, Ohio-Edwin Whitfield, Oklahoma-Belinda McCharen, South Dakota-Ken Kompelien, Utah-Lynn Jensen, Virginia-Rebecca Dedmond and Harry Drier-Executive Director. Appreciation is also extended to Jessie Teddlie-Texas and Lynn Voltaggio-Florida for their efforts and contributions.

Our "Thanks" is extended to Carolyn Magnuson-Missouri who took our ideas and gave them form, style and substance, to Beverly Haynes and Mary LaBelle, word processors, to Bill Kunisch-US Army Recruiting Command, and to many others who assisted with the development of this program in a variety of ways.

*Marion F. Starr, Past President
National Consortium State Career Guidance Supervisors*

**PART I:
CAREER PLANNING AND COMPREHENSIVE GUIDANCE PROGRAMS
INTRODUCTION**

If I had my life to live over, I would start barefoot earlier in the spring and stay that way later in the fall. I would go to more dances. I would ride more merry-go-rounds. I would pick more daisies.

Nadine Stair (age 85)

"If I had my life to live over..." "If only..." "If I knew then what I know now..." How easy it is to look back on life and think about what we would have done differently—to speculate how the past might have been different if we had known more or planned more. Unfortunately, opportunities for systematic and informed career planning were not available for many of today's adults when they were in school. Occupational choice frequently was simply left to chance.

Leaving the future of America's youth to chance places young people at risk in an increasingly competitive job marketplace. The changing global community necessitates action to prepare our youth for the competition they will face when they enter the workforce. *Planning for Life* is designed to encourage collaborative career planning processes that help youth and adults become active participants in developing their futures.

The United States Army Recruiting Command and the National Consortium of State Career Guidance Supervisors are committed to promoting the involvement of students, families, business, labor and educators in partnerships that will enable today's youth to "become all they can be" tomorrow. The *Planning for Life* recognition program is one way in which this commitment is demonstrated. *Planning for Life* provides national recognition to selected coalition-based programs that have successfully implemented complete and effective career planning efforts for the youth and/or adults served. State and national recognition of successful local commitment can in turn be an incentive for others to become actively involved in coalitions that will benefit youth in their communities. Career planning is an exciting and challenging opportunity for adults to join together to have a lasting impact on the lives of individuals and communities.

This *Planning for Life* Program Guidebook has four purposes:

1. To place career planning concepts within the framework of a total guidance program
2. To offer ideas for those in the process of designing or improving their career planning activities
3. To provide guidelines for staff of exemplary career planning programs to encourage their participation in the award process
4. To motivate use of self-evaluation guidelines by local practitioners in measuring their career planning efforts, especially as they prepare their award applications

The guidebook is divided into four parts, which address the above purposes in detail. The remainder of Part I focuses on the relationship of career planning to the total guidance program; Part II (Chapters 1-7) elaborates on the seven essential components that will be used to evaluate coalition-based career planning efforts; and Part III provides a self-evaluation process and form designed to help leaders direct a comprehensive self-study. Part IV contains the procedures/guidelines for submission of applications.

A competitive labor market mandates that individuals plan more effectively.

Planning for Life recognizes effective coalition-based career-planning efforts.

This guidebook is designed to provide guidance in developing career planning programs.

Career Planning within Comprehensive Guidance Programs

The current emphasis on school-based individual career planning has evolved as a result of a number of seemingly unrelated initiatives. Actually, these efforts serve to emphasize the interrelatedness of the school community, as well as how various groups can learn from each other. Some of those initiatives include:

- Local efforts to plan career events such as Career Day, Shadowing Day and Career Interviews. Students participate and reason through to a career goal based on their knowledge about their individual interests and abilities.
- Passage of PL 94-142, Education for all Handicapped Children Act of 1975, and PL 101-476, Individuals with Disabilities Education Act of 1990 (IDEA). These initiatives emphasize the importance of individual education plans, including plans to facilitate the transition from school to work (career planning) for individuals with disabilities.
- The national movement to conceptualize and define guidance as a comprehensive program equal in importance to other programs in the total school curriculum.
- The School-to-Work Opportunities Act includes a major component on Career Guidance which emphasizes Career Planning for all students.

Each initiative has at its core the importance of life after high school, and the latter two emphasize the importance of systematic, sequential and comprehensive planning for life. The national movement toward comprehensive guidance programs will be addressed in greater detail here because of its emphasis on all students, and because systematic planning and collaborative effort are an integral part of the comprehensive guidance model.

Gysbers and Starr (*Missouri Comprehensive Guidance: A Model for Program Development, Implementation and Evaluation-1993, revised 1998, copyright Missouri Department of Elementary and Secondary Education*) have articulated the need for school systems to focus on guidance as a program of the total school. That is, guidance programs should be encouraged for all students; they should be based on a specific set of goals and student competencies; and they should function as an ongoing part of the school curriculum, regardless of who is in the position of counselor.

The comprehensive guidance model places an emphasis on school leaders' commitment to designing, planning, implementing and evaluating a guidance program that has a clearly defined purpose; systematically develops identified competencies throughout a student's school career; and is a coordinated effort of all school personnel, led by the counselor.

In order to carry out the comprehensive guidance model, structural and programmatic components are essential. They are listed below (Gysbers and Starr):

Structural Components: Provide the operational direction

- Definition and philosophy
- Facilities
- Advisory council
- Resources
- Staffing patterns
- Budget

School-to-work initiatives emphasize effective career planning for all students.

Career planning cannot stand alone. It is an important element of a total guidance program.

An organized process will bring results.

Programmatic Components: Direct the program activities

- Guidance curriculum
- Individual planning
- Responsive services
- System support

The comprehensive guidance program is developmental and seeks to promote students' life development in career planning and exploration, knowledge of self and others, and educational and vocational development. Competencies in these areas are developed primarily through individual and group activities within the guidance curriculum and individual planning components.

Career planning for all students is a natural and necessary part of any comprehensive guidance program. The career planning process encourages students to use the totality of guidance experiences to date to plot a successful future. The individual planning component allows students to participate in a series of structured activities that result in applying decision-making and planning skills to building their futures. The student formulates and brings into focus a tentative career goal, plans academic and vocational courses, and identifies the levels of competency, certification and/or achievement that will be necessary to reach the established goals. This can be accomplished in any number of ways. For example:

- Portfolios can be used as personalized organizers while the individual is in school.
- Pre-apprenticeship learning may lead to a capstone world-of-work experience.
- Written career plans can offer direction and structure for future activities.
- Mentoring relationships provide possibilities for ongoing reality testing.

Early, complete and ongoing career planning keeps career doors open to numerous possibilities and opportunities. An individual's future is limited only by the imaginations of those involved in the planning. It is the formalized career planning process that this guidebook addresses—so that students are better able to realize opportunities and reach their full potential.

The Seven Cs of Career Planning

Seven essential elements of career planning have been identified by the National Consortium of State Career Guidance Supervisors. The State Guidance Supervisors believe these elements encapsulate the common practices in the field. These Seven Cs are the standards by which career planning efforts will be reviewed and rated in the National *Planning for Life* Recognition Program. They are:

1. **Clarity of Purpose:** Shared understanding of the program's purpose by school, family, business and community.
2. **Commitment:** Ongoing investment of resources in the program by school, family, business, labor, industry and community.
3. **Comprehensiveness:** The degree to which the program addresses all participants and ensures that all career and education opportunities are fairly presented.
4. **Collaboration:** The degree to which schools, family, business and community share program ownership.
5. **Coherence:** The degree to which the program provides a documented plan for all students and furnishes specific assistance and progress assessment.

Career planning brings action today and direction for tomorrow.

The Seven Cs of career planning.

6. **Coordination:** The degree to which the program ensures that career planning is developmental and interdisciplinary.

7. **Competency:** Evidence of student competency attainment.

The next seven chapters more fully address the Seven Cs and include detailed descriptions and ideas for implementation. This information is intended to help schools and agencies focus on the structure and essential elements of complete career planning. Some may choose to use the guidebook to provide direction for development of a new program, while others will use it to assess their current programs and make improvements or refinements. It is hoped that many will find it helpful in preparing an application packet for the Army Recruiting Command's National *Planning for Life* Recognition Program. Participation in this awards effort will help to identify and promote successful career planning processes that operate across the nation.

This guidebook provides the framework for developing, improving and evaluating career-planning activities.

KEY POINTS OF INTRODUCTION

1. School-based career planning is most effective when it is included as an ongoing part of a comprehensive guidance program.

2. The seven components (seven Cs) of coalition-based career planning are: Clarity of Purpose, Commitment, Comprehensiveness, Collaboration, Coherence, Coordination and Competency.

3. The National *Planning for Life* Recognition Program is intended to promote effective career planning process for youth and adults in various settings.

4. This guidebook is designed to provide guidance to those developing or improving career planning activities, including those who have chosen to become a part of the *Planning for Life* Award program.

PART II:
THE SEVEN Cs OF CAREER PLANNING
CHAPTER 1: THE FIRST C—CLARITY OF PURPOSE

CLARITY OF PURPOSE: Shared understanding of the program's purpose by school, family, business and community.

Creating a Clarity of Purpose, a shared understanding of the purpose of the program, is the first step in coalition building, as well as in developing systematic and sequential career planning processes. A key element of the definition is "shared understanding," which implies a collaborative role in developing the purpose for career planning efforts. Thus, it will be important for representatives of all groups involved in the coalition—school, business, labor, families and community—to help set the direction, pace, methods and expectations. If existing efforts are being evaluated, it may be useful to bring together a representative school and community group to review and reaffirm/modify the purpose as currently stated and operating.

Defining the Purpose

The purpose of the national *Planning for Life* program is based on commonly held principles about career planning. The information contained in this chapter is intended to provide starting points for local discussions about the need for becoming involved in a concentrated and complete career planning effort. While it may seem obvious why schools become involved, it is important that all groups in the community have an opportunity to share their unique reasons for involvement as well as their expectations. It is through the process of talking together that the key elements of coalition building—mutual respect and trust—are developed. The following paragraphs provide a discussion of some of the existing deficits that have led to the critical need for improved career planning for all youth and adults.

The Need

Today's youth and adults are faced with the prospect of entering a rapidly changing workforce. This will require all workers to possess ever-increasing academic skills, combined with emerging technical skills such as computer literacy, that a decade ago were required by only a few workers. Most students are not prepared to make education and career-related decisions. A typical eighth-grade student lacks the knowledge and information-gathering skills to determine the best educational route to follow. Consequently, many high school students pursue an easy way through school, satisfy minimum graduation requirements, and leave the system ill-equipped to face the future.

Counselors and teachers have a responsibility to help all students understand the role their present activities and planning play in their future success. One way to do this is to provide systematic and sequential opportunities for students to think about and explore future opportunities.

Shared responsibility and participation evolve from shared belief in the process.

Mutual respect and trust precede involvement and support.

Individuals achieve goals only if they have developed them.

The National Consortium of Career Guidance Supervisors recognizes a set of eight principles as a foundation for career planning. These principles can provide the impetus for defining the specific of individual and locally purpose relevant programs.

1. An individual's career is reflective of lifelong planning and work preparation. Career is defined as the totality of work, paid or unpaid, one experiences in a lifetime.
2. Freedom of choice is one of the most cherished rights in a democratic society. Freedom to choose education and work options is expanded by knowledge and constricted by ignorance.
3. Every student has the right and the responsibility to learn career planning skills and to gain the knowledge necessary to make informed choices, which can then be tested in a supportive environment.
4. All students deserve career assistance regardless of their program of studies or their educational and career goals.
5. Successful education and career planning is the shared responsibility of schools, students, families, employers and communities.
6. Career planning is fundamental to the individual delivery of education. It empowers counselors and teachers to stress the relevance and application of coursework to careers.
7. Parental and employer involvement enriches the educational and career planning efforts in schools.
8. Students who use career planning skills and plans as guides to select education and work options are more adaptable to the changing labor market, carry advantage into the learning process, and are more productive, employable and satisfied at work.

Discussions of local needs and expectations could be stimulated by using these eight principles. This and similar local information should be provided to those defining and reviewing the purpose of local activities. From this discussion, customized core beliefs or principles will be developed. These will lead to a collaborative definition of purpose—one that all groups can own and thus promote. Once the purpose has been defined, it is critical to communicate the purpose of career planning to the full array of those who will be involved—school personnel, families/care-givers, community leaders, employee groups, labor leaders and employers.

Communicating the Purpose

Communication is a means of gaining involvement, input and support in the development process, and it keeps people motivated and informed. While planning ways of communicating the purpose and activities of career planning, consider the following:

- **Defining the audience:** The *Planning for Life* Recognition Award evaluation criteria identify school, family, business and community as key groups to be involved and to whom the purpose should be communicated. Specific groups that need to be informed include PTA/PTSO, chamber of commerce, job service, service organizations.

Career planning principles form the foundation for effective efforts.

Local definition is important

Effective communication is crucial.

Define the audience.

political leaders and postsecondary education institutions. To whom will information be directed in each group? How will all members of the identified groups be informed?

- **Deciding the means:** How will the information be disseminated? In what form (e.g., student handbooks, newsletters, news releases, public service announcements, pamphlets/brochures, public access channels, public forums, orientation sessions)? Should the form be different for each group?
- **Assigning responsibility:** Who will be responsible for organizing and following through on communicating the purpose of career planning to the various groups?
- **Documenting clarity of purpose:** How will shared understanding be documented (e.g., policy statements, copies of printed materials, written communication, videotapes, meeting announcements, minutes)?

Decide the means.

Assign responsibility.

Documenting results is most important.

As this component is being developed or reviewed, the *Planning for Life* Self-Evaluation form found in Part III will be helpful.

KEY POINTS OF CHAPTER 1

1. **Clarity of Purpose** means that the specific purposes of career planning are understood and agreed to by all participants.
2. Shared understanding and agreement are attained by shared discussions.
3. The purpose will be founded in local need and a set of guiding principles/beliefs.
4. Communicating the purpose to all groups who have a role and/or stake in the program's effectiveness will contribute to the career planning successes of students.

CHAPTER 2: THE SECOND C—COMMITMENT

COMMITMENT: Ongoing investment of resources in the program by school, family, business, labor, industry and community.

An effective, systematic and sequential career planning process requires the demonstrated commitment of a variety of individuals and groups. Commitment will be evidenced by investments and support over time. All involved must realize that career planning must be ongoing and broad-based if it is effectively to forge the link between an individual's education and successful career. Broad involvement in Clarity of Purpose sets the stage for securing the required ongoing Commitment to action. It will be a part of the role of the leader of the career planning process actively to seek the continued Commitment of the various groups.

Individuals and groups may have the desire to demonstrate their Commitment; however, they may not know exactly what is needed or expected. This chapter provides examples of the types of Commitments needed from the individuals and groups involved in the process.

The groups whose Commitments are central in providing support and direction to career planning include (but may not be limited to):

- School administrators
- School guidance staff
- Teachers and other school staff
- Business, labor and industry personnel
- Parents/other caregivers
- Students
- Community leaders
- Community agencies

Commitments Needed

The degree of various groups' Commitment will be measured not only by verbal and written statements of support and recognition, but also by actions such as devoting time, personnel and resources (financial, human and material) to the career planning process.

School Board and Administrative Commitment

In school-based career planning, Commitment from the school board (or other governing body) and all levels of the administration is critical to the involvement of all others. The school board/governing body approves programs and activities, and administrators are the link of authority among all other groups. It is important that they believe in the process, expect the involvement of staff and students, provide the environment and resources, and tie the community into delivery. Their Commitment will encourage the involvement of students, the implementation of activities by teachers and counselors, the assumption of responsibility by parents and caregivers, and an increased confidence in the employability of youth by employers.

Commitment leads to real linkages between learning and earning a living.

Commitment is measured by action.

School board and administrative commitment is vital.

The following are examples of actions and positions that demonstrate school board and administrative Commitment:

- Require a written and action-oriented career plan as a part of the curriculum.
- Authorize financial resources for implementation (including personnel, space and materials).
- Provide data and information needed for the career planning process.
- Communicate endorsement of the career planning process to students with a strong sense of expectation.
- Support and require faculty/staff in-service training activities.
- Assist in communicating the nature and value of career planning to staff, students, parents and the community.
- Articulate linkages to other local guidance and employment programs and agencies.

Guidance Personnel Commitment

Guidance personnel will express their Commitment to the career planning process by assuming some form of leadership. They can take the lead in gaining the support required to ensure that all students have written, individualized career plans that are used, reviewed and revised as needed. They can also obtain and maintain the committed involvement of all needed groups. Their Commitment can be further demonstrated by encouraging or conducting local research and evaluation activities.

Suggestions for specific actions include:

- Establish career planning as a priority.
- Commit time to implementing the process.
- Commit time to learning more about the process through reading, seminars, workshops and discussions with other counselors.
- Work with administrators to communicate the nature and value of the career planning process to students, teachers, staff, parents, business, labor, industry and community.
- Involve the community in career planning processes.
- Lead staff development activities related to career planning.
- Assist in the management of ongoing implementation, evaluation and improvement of the career planning process.
- Consult with teachers and other staff members to plan and facilitate the infusion of career planning into all areas of the curriculum.
- Take actions that will ensure that students' career planning and plans are taken seriously, and used by students and all adults involved in the students' lives.

Guidance personnel must lead with commitment.

Career plans and their use depend on counselor leadership.

Teacher and Other School Staff Commitment

The Commitment of the total school staff is demonstrated by their establishing an environment that supports and enhances the development and implementation of career planning activities—especially the development of specific student career goals and individualized career plans. They **should** personalize instruction by using classroom plans to increase student motivation, and model the value and importance of planning for life. Following are some suggestions:

- Support the career planning process during discussions of budget, time and curriculum priorities.
- Review and encourage student use of individual career plans.
- Infuse the elements of career planning into the curriculum and students' classroom experiences.
- Provide data and information about student successes that will support the continuation of the career planning process.
- Work with business, labor and industry to relate employer needs to career planning and the curriculum.
- Integrate students' career interests and needs when planning and implementing instructional strategies.

Business, Labor and Industry Leaders' Commitment

Business, labor and industry leaders have a special stake in the career planning process. They will be the employers of our graduates; as such, they must be partners with the school in preparing students for the workforce. Their active Commitment to school-based career planning has the potential for saving both time and money by helping the interview process and making better staff selection decisions. Just as it is important for top-level school administrators to visibly support the career planning process, so is it important for the chief executive officers of businesses, labor organizations and industries to visibly support the process for their employees and community's schools. By demonstrating that they expect and will reward participation by employees in the career planning process, employers will help facilitate the development of true partnerships. Specific activities include:

- Work with school boards and school administrators to ensure that students leave school with a plan and credentials for employment.
- Serve as consultants to schools that are establishing or reviewing criteria/formats for individual career plans.
- Expect applicants to have and use career plans during interviews for part-time and temporary positions.
- Serve as mentors and encourage employees to serve as mentors for students.
- Provide job-shadowing/internship opportunities.
- Work with teachers to relate the local world of work to classroom curriculum.

Teacher and staff commitment leads to student motivation.

Commitment of business, labor and industry leadership results in strengthened partnerships.

Employer use of students' career plans makes them relevant.

- Devise strategies to demonstrate the relevance of instruction to the world of work.
- Serve on career planning advisory groups.
- Provide needed resources through partnerships.

Parent/Caregivers' Commitment

As primary influencers in the lives of young people, parents and other caregivers are key partners in the career planning process. They can demonstrate their Commitment through their encouragement and support of a systematic and sequential career planning process within the school, as well as within the community at large. They can demonstrate their Commitment by expecting students to develop and implement a career plan, and by subsequently using the plan as a basis for reviewing students' progress, both at home and with school personnel. Some ways parents and other caregivers can demonstrate their Commitment include:

- Express support for a systematic and sequential career planning process to the school board and school administrators, especially during the curriculum and budget adoption processes.
- Volunteer for and serve on curriculum and/or guidance advisory boards.
- When doing business with local businesses, inquire about their involvement in the career planning process. If they are unaware of the career planning effort, encourage them to become involved.
- Help youth develop and then review career plans on a regular basis.
- Support young people's exploration of a variety of career opportunities.
- Attend school functions related to educational and career opportunities.
- Volunteer to serve as role models, mentors and speakers in areas of expertise.
- Use an up-to-date copy of the student's career plan as a basis for discussion during conferences with teachers and other school personnel. If individual teachers do not have a copy, make one available.

Student Commitment

Students' Commitment to planning for life is the most important Commitment of all. Students who are committed to career planning for themselves will be able to take full advantage of the external supports that are developed through a coalition-based career planning effort. Their Commitment and enthusiasm will encourage those outside the school to continue their own Commitment to the process. Student enthusiasm will best be developed through home and school interventions, and by meeting role models with career planning success stories. Depending on the local situation, it may be advantageous to focus on obtaining the commitment of a core group of students, who can then spread the word that Commitment to career planning is actually useful to what they want to achieve. Once positive attitudes are developed and students accept the importance of career planning, their actions demonstrating Commitment might include:

- Expect and seek teacher and counselor assistance in setting, refining and attaining goals.

Commitment of parents and caregivers provides a vital linkage among home, school and community.

Parents are most influential and can set a positive tone.

Students set the tone, but they can't work alone.

- Involve a variety of people—within and outside the school—in the development, improvement, extension and expansion of career plans.
- Claim ownership and responsibility for a career plan and its implementation.
- Work with the student governing body to develop peer mentoring programs that will involve younger students in the career planning process.
- Volunteer to serve as a student representative in the school's planning and decision-making processes—especially those at which curriculum and budget are discussed.
- Indicate systematic and sequential career planning processes as a priority on surveys of student interest and encourage peers to do the same.

Self-expectations take precedence over those developed by others.

Commitments made by these groups will increase in relationship to their involvement, and thus their ownership, in the career planning process. As the benefits of career planning are realized by students, the Commitment of all participants will increase. These Commitments will result in a positive school climate in which systematic and sequential career planning thrives.

KEY POINTS OF CHAPTER 2

1. **Commitment** is the ongoing investment of resources in the program by school, family, business, labor, industry and community.
2. Individuals and groups may need to be educated about the specific Commitments needed to make career planning effective.
3. The proactivity of guidance personnel will be a key in obtaining the Commitments needed.
4. Student Commitment and enthusiasm for systematic and sequential career planning processes will generate ongoing Commitment and enthusiasm from groups and individuals within and outside schools or institutions.

CHAPTER 3: THE THIRD C—COMPREHENSIVENESS

COMPREHENSIVENESS: The degree to which the program addresses all participants and ensures that all career and education opportunities are fairly presented.

For the career planning process to be effective, it must be organized within a developmental, systematic and sequential framework and be available for all individuals within the target population. If career planning is school-based, it should encompass all students; if it is part of an employer's career development program, it should address all employees; and if it is a part of a community agency's programming, it should appeal to a broad base of clientele. Career planning must be delivered by counselors, teachers and human resources development staff, and it should be supported by administrators, parents, managers, union leaders and community administrators. Comprehensive career planning includes the following nine components (suggested strategies for implementing each component are included):

1. **All students or employees participate in a structured career planning process based on a comprehensive set of outcomes or competencies.**
 - School-based career planning strategies are designed to include all students in grades served (6–14), regardless of future plans or present abilities and attitudes. Plans include strategies for homebound students. This might occur through a required class such as English/Language Arts or through a required career planning course.
 - All parents are informed of career planning opportunities and are urged to participate with their student in the planning process.
 - Work site, community-based, adult-focused career planning processes are designed to allow access to information about availability of activities, as well as access to the activities themselves.
 - The overall plan for the career planning process is written and available to all individuals.
2. **Career planning activities are conducted at all levels.**
 - Developmental, systematic and sequential activities build on each other to enable all participants to acquire increasingly more complex knowledge, skills and understanding over time.
 - Adult-focused strategies are designed for those at all stages of their careers—beginning, middle, ending, unemployment and in transition.
 - School-based strategies are relevant to learning outcomes at each grade level.

Career planning must be available for everyone: all students, all employees, all clientele.

Career planning is comprehensive.

- Career plans include processes and strategies to help individuals make the transition from the present level to the next.
 - Age-appropriate out-of-school strategies allow parents and other adult role models to assist in developing career planning skills appropriate to each development level.
- 3. Equity is a theme throughout; that is, all areas of leisure, work, education and training are explored without limitations imposed because of gender, race or physical condition.**
- Opportunities are provided for all participants to explore a vast array of possibilities. Strategies include planned involvement in exploration of areas that have never been considered by the individual.
 - All students are given the opportunity to become familiar with people who are successful in their careers and who happen to be physically challenged.
 - Role models of all races help individuals learn more about specific careers.
 - Print, audio and video materials represent our world's diversity.
 - Parents are involved in seminars and workshops that expand their thinking and help them to encourage their children to explore new possibilities.
- 4. A variety of assessment data are examined, and new assessments are conducted as needed.**
- Standardized and informal group and individual assessment results are interpreted and used to help students plan.
 - Results of field experiences (shadowing, internships, field trips, site observations), simulations and other experiences are included as a part of the assessment process.
 - Students are actively involved in choosing types of assessments to be administered and in the interpretations of the results.
 - Parents and other caregivers provide valuable information about students' at-home interests and activities.
- 5. Individual abilities, aptitudes, achievements and interests form the base of goal setting.**
- The assessment results and input from students, teachers, parents and employers are all a part of the reality-testing of potential goals.
 - Goals may include skill development strategies.
 - Individual abilities, aptitudes and past achievements are utilized to formulate future plans.

Career planning is equitable.

Mentors, models and opportunity to reality-test dreams are important.

Career plans are based on information about the individual.

Reflections of yesterday—not barriers to tomorrow—form the basis for career planning.

6. Extracurricular activities support and assist the career planning process.

- Individuals participate in out-of-school activities that provide hands-on experience in an area of interest.
- Individuals are made aware of clubs and organizations in their areas of interest.
- Students are provided opportunities to talk with individuals in their community, shadow at the work sites, experience internships, etc.

7. A written documented plan is developed by and for each participant.

- Every individual involved in the career planning process is required to develop a relevant and specific career plan. The plan will include long and short range goals.
- The plan is a collaborative effort of the student, school personnel, family members or caregivers and employers.

8. Career planning is ongoing, and individuals are encouraged to use their plans frequently and systematically.

- In school-based career planning, teachers and students use individual career plans when planning individual and group class projects.
- Competencies gained as a result of career planning activities are assessed at least twice each year.
- Individuals are provided information and are assisted in relating current competencies to those deemed necessary to achieve future personal and career goals. Where there are deficits, individuals establish a "mini-plan" and periodically review their progress with the help of a counselor or other professional.
- Career plans are reviewed and revised periodically to ensure their continued relevance to the individual.

9. In school-based career planning, parents, teachers and community employers are provided adequate support information to carry out their respective roles.

- Everyone who is expected to assume a role in the career planning process is provided with a description of responsibilities, with both concise printed resource materials and a list of additional resources available.
- Opportunities to participate in discussions and information seminars are provided for parents, teachers and community employers.
- Teachers assist in delivering career planning concepts by incorporating appropriate learning activities into their regular classroom instruction.

Encouragement is of little help without related expectations.

Expectations are empty without commitment and resources.

KEY POINTS OF CHAPTER 3

1. **Comprehensiveness** of a career planning process will be reflected in the assurances that all students or employees are involved and that the process encompasses a set of specific competencies.
2. A comprehensive process ensures that equal opportunity to a broad range of exploratory activities is guaranteed for all participants.
3. An individual's goals and career plans are based on varied assessment results.
4. The career plan is the focal point for comprehensive career planning strategies.

CHAPTER 4: THE FOURTH C—COLLABORATION

COLLABORATION: The degree to which schools, families, business, labor, industry and community share program ownership.

It is through Collaboration that the first three Cs—**Clarity of Purpose, Commitment and Comprehensiveness**—have been developed, and it is through **Collaboration** that the next three Cs—**Coherence, Coordination and Competency**—will be developed. Collaboration means that family members, teachers, counselors and employers work together to help each student establish and achieve goals through ongoing career planning. Community agencies and organizations representing social service, military and employee groups assist in building, reality-testing and modifying individual career plans.

The group of school, home, community and employer representatives who participated in articulating the program's purpose have demonstrated Commitment. They have also contributed to the comprehensive nature of career planning and will need to continue their input and participation. The local expertise that helped develop a career planning process to meet unique local needs must be used in the ongoing planning, implementation and evaluation cycle to assure that the process continues to meet local needs.

Collaboration means ownership. The operating principle is that those who have been involved in the development will have a commitment to continue their work to make the process successful. Collaboration requires that all community members see the life plans of youth and young adults as important to the entire community. They must recognize the importance of being a collaborator—to themselves and to the individuals they assist. This means more than being cooperative and giving lip service to the concept: it means buying into the action.

Following are examples of collaborative partnerships:

Career Planning	Partnership Strategy	Potential Partners
<p>Function</p> <p>Assessing student needs, interests, past experiences</p>	<p>Bringing together the best assessment staff, tools and settings for student use</p>	<p>Business Schools Guidance/counseling Community agencies Vocational schools Postsecondary Institutions</p>

Collaboration grows from Commitment.

Collaboration means working as a team.

Collaboration means ownership.

Collaboration is more than cooperation: it is partnership.

Career Planning

Function

Interpreting personal data to serve as base for goal setting

Developing specific goals, including short-term and long-term strategies for meeting goals

Providing information and resources needed for individual career planning

Partnership Strategy

Assembling a team of professionals who can best understand and interpret student data

Developing an employer-school mentoring program that matches faculty, employers and employees with students with similar interests

Creating a consortium of community agencies that will share, in centralized locations, all forms of work and education data, structured career planning materials and one-stop centers

Forming a community team annually to evaluate the total program effectiveness

Potential Partners

Personnel directors
Student services
Counselors
Job officers from throughout the community
Vocational school assessment specialist

Interested community members

Postsecondary Institutions
Vocational Schools
Labor unions
Chambers of Commerce
National Alliance of Business
Job Training Partnership Act
Special interest groups
Employer groups
Publishers

Employers
Parents
Community agencies
Labor unions

KEY POINTS OF CHAPTER 4

1. **Collaboration** is the shared ownership individuals have in the career planning process.
2. Collaboration is a key element in each of the other Cs.
3. The entire community must "buy into" the importance of youth's life plans to the community.
4. Individuals and groups who are involved will work together to help youth and in turn will benefit themselves.

CHAPTER 5: THE FIFTH C—COHERENCE

COHERENCE: The degree to which the program provides a documented plan for all students and furnishes specific assistance and assessment of progress.

The heart of the career planning process is the individual's life career plan. This plan demonstrates and measures the effectiveness of the other processes. *Webster's New World Dictionary* defines Coherence as "the quality of being logically integrated, consistent"; coherent is defined as "logically connected; consistent; clearly articulated." Therefore, a coherent career plan will be logically connected and integrated over time.

Coherence means a logical progression.

Coherence relies on the developmental and sequential nature of the career planning process. Individuals will systematically develop their plans, one step at a time, with the assistance of others, both within and outside the school setting. As procedures for formalizing the plan's development are considered, it will be helpful to keep the following in mind:

- Every student must have a plan.
- The plan will be comprehensive, developmental and sequential.
- Procedures must include provision for regular and systematic review and modification.
- Plans will incorporate a student's transition needs. This includes end-of-year or end-of-experience progress assessments and recommendations for next steps.

The remainder of this chapter will discuss the benefits of a documented plan and provide suggestions for content, format, management and use.

Benefits of Developing a Documented Life Career Plan

On the surface, it may appear that the individual benefits most from having a documented life career plan. In reality, evidence shows that everyone associated with that person will benefit equally as a result of the individual's plan.

Benefits to Students

- Developing a plan actively engages students in thinking about their lives—a process they might not realize is important.
- The plan involves students with others in a supportive relationship.
- The process encourages students to recognize personal responsibility for life career decisions.
- The life career plan helps students focus on their own positive aspects.
- The life career plan provides a consistent focus point for students, and enables them to see their progress in a tangible form.

Career plans focus on the positive.

Everyone benefits from motivated students and employees.

Benefits to Classroom Teachers

- Involvement in developing an individual's life career plan enables teachers to become better acquainted with the total individual.
- Individual life career plans can serve as motivators for students to explore course concepts in more depth and with greater interest because of the relevance to their lives.
- Individual life career plans provide starting points for classroom projects.
- Working with individuals to develop a life career plan gives teachers tangible evidence of the difference they make in students' lives.

Benefits to Counselors

- A written life career plan provides all information about an individual in an accessible form.
- The involvement of all school staff in developing individual life career plans ensures that students will be able to have a personalized and coherent plan for their future.
- Other individuals and groups involved in the process gain a better understanding of the importance of the total guidance program.
- The counselor gains a broader understanding of the ways in which career planning processes can fit into the curriculum of each class, thus facilitating long-range guidance program planning.

Career planning enriches teaching and learning.

Benefits to Family

- For families that are committed to encouraging broad exploration of all possibilities, the life career planning process serves as a means for enhancing communication and minimizing conflict.
- Life career plans may give a consistent focus and direction to a previously undirected life.
- Early planning for life after high school provides parents with confidence in their children's future.
- The total process helps parents and other caregivers know they are influential in their children's lives.

Benefits must be measured and reported.

Benefits to Employers

- A documented and tangible life career plan enables employers to more accurately assess the individual's potential for success in the workplace.
- Involvement in developing life career plans provides an opportunity for influencing the preparation of individuals for the workforce.
- Having and using employee career plans assists in employee growth and productivity.

Benefits to the Community

- Implementation of life career plans will help ensure that individuals will be prepared to accept responsibility in the community.
- The direction toward employment that a life career plan provides results in less unemployment.
- Community involvement in the planning process will develop stronger linkages between the community and the schools.

Contents of the Life Career Plan

The first step in ensuring the Coherence that a personalized career plan brings to the career planning process is to define the plan's purpose, and then to determine the information needed for the plan to be accessible and useful for all individuals. Collaboration will be important; many people will be using the individual's plan.

Life career planning is a lifelong commitment to self.

Defining the Plan's Purpose

Clarity of purpose for the actual career plan will ensure that adequate and accessible information will be included. In clarifying purpose, the following questions provide direction:

Plans need structure, sequence to result in action.

- How will the individual's plan be used?
- Who (other than the individual) will be using the plan? In what ways?
- What time period will the plan cover?
- What aspects of the individual's life will be included in the plan?
- What decisions will be made based upon the plan's contents or effectiveness?

Once the plan's purpose is clearly defined, the information needed to meet that purpose can be identified.

Information Needed

While the extent and specificity of information needed to meet the plan's local needs/purposes will vary, it is likely all plans will include the following information:

What information is needed?

- Demographic data about the individual
- School and activity preferences
- Goals
- Desired lifestyle
- Current career choices, including reasons for those choices
- Assessment results
- Work experiences
- Implications of above information

After selecting information to include in the individual's life career plan, the next step is to determine the format for organizing and documenting that information.

Format for the Life Career Plan

The format or formats selected should convey the most comprehensive information about the individual. The portfolio is perhaps the most common "organizing theme" for life career plans. In its broadest form, it includes a variety of formats by which information is collected and stored. This may include computerized information about an individual, a videotape of the individual in various roles, an audiotape of people being interviewed about the individual's skills, and material written by the individual. Today's technology makes the possibilities limitless. All materials must be organized to ensure the information is consistently presented and accessible.

What format should be used?

Format decisions should be made collaboratively by all those involved in the development, use and maintenance of the plans. There are several prepackaged formats available that are worth reviewing.

Management of Individual Life Career Plans

During the planning process, it is critical that consideration be given to the management of the career plans. After attending a workshop on the authentic assessment process, one administrator remarked that the district would have to buy boxcars in order to send students' cumulative records to colleges. This points to the need to plan ahead in regard to the following:

It's not the method but the use that's important.

- Who will be responsible for storing career plans and the accompanying documentation? Where will they be stored?
- Who will have access to the individual's career plan? How?
- When will the plans be reviewed? By whom? By what criteria?

While there are caveats, the concept of a life career plan fits well with the concepts of portfolio and authentic assessment. Many schools are working to develop means by which student progress can be documented in more realistic, varied and equitable ways than the traditional testing methods using standardized pencil-and-paper instruments. This will be an excellent opportunity for collaboration: counselors can use teachers' expertise and experience to develop local guidelines for the life career plan.

Use of Life Career Plans

A factor in the measurement of process Coherence will be the ways in which career plans are used by students and others involved in helping the student. The following are possible uses:

Development and use of career plans facilitates transition into adult life

- During the course selection process, all students' plans are reviewed. An individual education schedule will be used to select courses for the coming semester or year.
- At the end of each year, students and teachers review plans together in order to plan the summer and next year's goals and experiences.
- Plans are systematically reviewed to ensure continued relevance of specified career choices. New information gained through experience and assessment is evaluated and incorporated into the plan as appropriate.

- Career plan discussions are held on a regular basis throughout the school year for all students to talk about activities and to explore any challenges to progress and success.
- Career plans are used, with the student's involvement and/or permission, in student, parent, teacher and counselor meetings about individual students.
- Students with unfocused or limited career plans and involvement are referred for specialized help.
- Career plans are the focus of exit interviews with students who leave the school, whether as dropouts or graduates.

The use of the life career plan will add to the coherence of the total career planning process. It is through the plan that logical connections of course, work and life experience can work together to help the individual reach life goals—in the present as well as in the future.

KEY POINTS OF CHAPTER 5

1. **Coherence** is measured by logical connections throughout the career-planning process.
2. The individual's life career plan is the point at which the connections come together.
3. The life career plan will be developed over time and will be reviewed on a regular basis.
4. Collaboration among all individuals is important to the process of developing Coherence—connectiveness—in the individual's plan.

CHAPTER 6: THE SIXTH C—COORDINATION

COORDINATION: The degree to which the program ensures that career planning is developmental and interdisciplinary

In terms of making things happen, the Sixth C—Coordination—is the most important. Coordination has two requirements. The first is that all of the activities be interconnected; that individuals at each grade level know what has occurred at previous levels and what will occur at the next levels. Not only must there be Coordination among the grade levels: elementary, junior high, secondary and postsecondary schools and institutions, but also among other programs, such as special education, vocational education and Tech Prep.

The second requirement is that someone must be responsible for assuring that the process is indeed operational and coordinated. This individual will be the "pivot point" for action and will monitor the process at all levels. A school-based developmental and sequential career planning process requires the commitment of school personnel, as well as members of the total school community. Each must share in the responsibility and implementation of the program. While a collaborative team approach is, indeed, vital to its success, even more vital is someone being appointed to provide leadership. Time must be made available for the coordination of activities. Examples of activity coordination include:

- Organize initial planning sessions at which Clarity of Purpose is developed and the beginnings of Commitment are established. Identify the participants and make arrangements for meeting rooms, equipment, agenda and food.
- Determine the means by which people will be brought together to articulate the nature of the program's Comprehensiveness. Plan and organize staff development opportunities, and coordinate efforts that will lead to opportunities for all students no matter what their plans after high school might be.
- Coordinate public announcements about career planning to be sure consistent and accurate information is communicated to the public.
- Identify and bring together individuals and groups for periodic discussions about the process, operational as well as content aspects.

The list could continue; however, the point is that without having someone identified as coordinator for the whole process as a part (or totality) of designated work functions (with adequate time provided to make coordination a priority), many great ideas will never be implemented.

Coordination leads to developmental and interdisciplinary career planning.

Time is an important resource commitment.

School and community need to be one.

KEY POINTS OF CHAPTER 6

1. **Coordination** ensures that the career planning process is developmental and interdisciplinary.
2. Coordination between grade levels is mandatory to assure the sequential development of competencies.
3. There must be Coordination between in-school and out-of-school programs.
4. Someone must be assigned responsibility for organizing and coordinating the activities.

CHAPTER 7: THE SEVENTH C—COMPETENCY

COMPETENCY: Evidence of student Competency attainment.

As mentioned in the first chapter, comprehensive guidance programs are based on a set of specific student competencies. These competencies provide the systematic and sequential direction for the program throughout a student's school experience, and encompass development in areas such as career planning and exploration, knowledge of self and others, and educational and vocational development. Competencies are defined as those skills, knowledge and attitudes that are required of individuals as they learn, work and live in our society. They are acquired through school and community-based learning opportunities. The individual's career plan is an integral part of Competency-based strategies. An effective and ongoing Competency-based process has three important dimensions that guide the review of career plans by students in collaboration with teachers, counselors, family and employers:

1. Competencies currently achieved by students are recorded within the plan along with appropriate documentation.
2. Competencies not yet achieved are documented, with a plan of action to guarantee achievement on a planned basis.
3. A review of the career planning process ensures that an individual's planning is based upon known interests, goals and competency requirements.

There are a number of sources for career planning Competencies. Within the comprehensive guidance program, there will be a set of specific Competencies relating to the career planning component. A number of states and national organizations have developed specific comprehensive guidance and career development Competencies. A summary of career development Competencies found within the National Occupational Information Coordinating Committee's National Career Development Guidelines can be found on the inside back cover of this document. Additionally, your State Department of Education Career Guidance Supervisor can provide other resources and examples of career development programs and materials.

The following strategies provide points for discussion as the Competencies for the career planning process are being formulated and specified:

- An assessment of individual needs is conducted to assist in identifying Competencies.
- Individuals are systematically assisted in their development of knowledge, understanding and skills specified by Competencies.
- Developmentally appropriate Competencies are specified for each grade level or employee grouping.
- The career planning curriculum is based on the Competencies identified as priority need areas.
- The curriculum is delivered through individual, small group and large group activities.

Competencies provide direction for student achievement.

Career planning only succeeds within a total guidance program.

Career planning skills can be taught.

- Teachers incorporate appropriate Competency-based learning activities into their classroom curriculum and instruction.
- Individual Competencies are systematically assessed on a regular basis.
- The curriculum's effectiveness in delivering the Competencies at each level is evaluated annually.

Competency evaluation will be an integral part of the career planning process. In order to evaluate individual Competency achievement, counselors, teachers and others need to be involved in the evaluation process. The results will assist in the monitoring process and will facilitate the development of strategies for increasing individual achievement where deficiencies exist. By including individual goals and outcomes, a Competency-based career planning process provides an effective vehicle for keeping parents involved in and informed about their student's progress. An effective comprehensive career planning process will include systematic and regular means for parents, employers and others to work with their children, employees or students to review and evaluate their career plans.

Sharing the group evaluation results will assist the school or agency with communicating the strengths, benefits and value of career planning to the total community. This can result in attaining additional human, time and financial resources for the career planning process. Evaluation results will also provide a basis for measuring growth, and serve as a basis for program enhancement. Communicating program success to community members will also alert employers to individuals' career plans, allowing them to provide feedback about career planning's effectiveness in developing competent workers.

Basing a program on specific Competencies will be beneficial to all involved. It will not only facilitate the planning process, it will provide everyone with benchmarks for progress.

Career planning efforts can be measured

Career planning must be based on specific outcomes.

KEY POINTS OF CHAPTER 7

1. The **Competency** aspect is measured by the degree to which the process provides evidence of student competency attainment.
2. Career planning Competencies are a part of comprehensive guidance programs.
3. Competencies are identified by a needs assessment.
4. Basing career planning on Competencies provides a natural vehicle for evaluation and for communicating results to the community.

**PART III:
CAREER PLANNING SELF EVALUATION PROCESS
APPLICATION REVIEW CRITERIA**

**If you don't know where you're going,
you'll probably end up somewhere else.**

David Campbell

The purpose of this *Planning for Life* Guidebook is to provide assistance in initiating an extensive comprehensive career planning process and to help those who have programs in place to assess and improve the current efforts. This chapter provides direction for a self-evaluation process.

The National Consortium of State Career Guidance Supervisors, with input from national, state and local career guidance practitioners, has formulated criteria for review and rating of career planning efforts. These criteria represent the standards against which local career planning efforts will be reviewed and evaluated when submitted for consideration in the state and national *Planning for Life* Recognition Program. These criteria will be useful in the qualitative review of processes that are already in place, but also as qualitative criteria during the developmental stage.

*Standards for
evaluation are based
on the Seven Cs.*

For career planning efforts already in place, it is suggested that a review team consisting of counselors, teachers, administrators, parents and community members be organized. This team would be responsible for conducting a review of the existing effort and making a qualitative assessment of each component (the Seven Cs) of the career planning process. The criteria listed on the self-evaluation form for each component will provide direction.

Initially, the school/institution career planning processes could be rated according to the presence or absence of each of the seven career planning components. After discussion and opportunity for changes are made, it could be reviewed again with a focus on the *quality* of the program components. The review could be conducted independently by individual review team members or it could be conducted collaboratively. Either way, subsequent group discussion of the rating of each component is an important step in the self-evaluation process. In this way, all concerned gain objective insight about the strengths and weaknesses of the career planning process.

Existing Efforts

If a career planning process is just getting started, the criteria for each component can be used in each step of the design, with the specific criteria directing the plan of action. As the process is developed, the suggested documentation materials can be integrated into the activities. Incorporating quality standards from the beginning will set the stage for an award-winning program. It is suggested that career planning collaborators keep the criteria checklist nearby throughout the design phase to ensure that each component is evident in the activities.

*Improvements are
always possible.*

New Efforts

The following evaluation forms identify measurement criteria and list several documentation suggestions for each of the Seven Cs. A rating scale is provided for assessing each component's quality. These ratings form the basis for discussion and decisions about improvement and further development.

Measure and document quality.

CAREER PLANNING SELF-EVALUATION PROCESS AND APPLICATION REVIEW CRITERIA

You will find below an explanation of the programs seven criteria and associated indicators. The point scale and raters comment section is the same as the one used by your state and national reviewers to rate your application. Based on their review of your documentation and other information provided, they will assign the appropriate number of points for each indicator. A rating of (0) being the lowest point value, meaning there is no evidence provided or the criteria was not addressed. This is also intended for use in reviewing and rating individual/local applications and/or as a self review instrument.

1. CLARITY OF PURPOSE: The extent of shared understanding of the program's purpose by school, family, business and community members.

CRITERIA	Points for Each Indicator
● Expected outcomes are understood by all program participants.	0 1 2 3
● Representatives of school/institution, business, labor and industry were involved in defining program purpose.	0 1 2 3
● Purpose of program is clearly stated.	0 1 2 3
● Career Planning Program is based on identified need and is founded in school philosophy.	0 1 2 3
TOTAL POINTS 	

Suggested Documentation:

- Representatives of school/institution, business, labor and community were involved in defining the purpose (evidenced by announcement/minutes of meetings).
- The purpose of career planning has been communicated to students and parents through such varied channels as news releases, student handbooks, booklets and brochures.
- The full scope and purpose of career planning is understood by teachers, counselors and administrators, and is evidenced by policy documents, program descriptions, activities for students and in-service training activities.

Comments/notes:

2. COMMITMENT: The extent to which there is an ongoing investment of resources to the program from school, parent groups, business, and community.

CRITERIA	Points for Each Indicator
● Sufficient time for career planning activities is provided.	0 1 2 3
● Adequate personnel are dedicated to the career planning process.	0 1 2 3
● School, business, and community show responsiveness to resource needs of the program.	0 1 2 3
● School/institution has involved parents in the career planning.	0 1 2 3
TOTAL POINTS	

Suggested Documentation:

- Pupil/Counselor ratio is within state/national recommendations.
- Educational and occupational information in the career center is current and broad in scope.
- Counselors devote 25-35 percent of their time to the individual planning component of a comprehensive guidance program.
- Adequate time is regularly allocated for teachers and counselors to conference with students and parents.
- Support personnel and technology are used to handle records and student plans.
- Information regarding employers' use of career plans provides examples of employers' commitment to career planning.

Comments/notes:

3. COMPREHENSIVENESS: The extent to which the program addresses the career planning needs of all individuals in a systematic and equitable way.

CRITERIA	Points for Each Indicator
<ul style="list-style-type: none"> ● Complete information relating to work and training is provided to all teachers, students and parents during the career planning process. 	0 1 2 3 4
<ul style="list-style-type: none"> ● Assessment activities that measure abilities, aptitudes, achievement, and interest are incorporated into the career planning process. 	0 1 2 3 4
<ul style="list-style-type: none"> ● A planned sequence of school/community based experiences are included in the career planning processes (e.g., shadowing, mentoring, field trips, internships, etc.). 	0 1 2 3 4
<ul style="list-style-type: none"> ● Career planning program is competency based, developmental and systematic and addresses the needs of diverse populations. 	0 1 2 3 4
TOTAL POINTS 	

Suggested Documentation

- Structured career planning activities are conducted for all students in the school.
- Formal career plans are available for all students beginning no later than eighth grade.
- Equal attention is devoted to assisting all students to plan a challenging program of academic and vocational study.
- The career planning process takes into account student diversity. It challenges all students to discover interests and abilities, and to pursue high levels of achievement regardless of race, ethnic background or past performance levels.

Comments/notes:

4. Collaboration: The degree to which schools, institutions, family, business and community share program ownership.

CRITERIA	Points for Each Indicator
● Partnerships exist between schools, institution, family, business and community.	0 1 2 3 4
● Parental involvement with students career planning program is evident.	0 1 2 3 4
● Employers, administrators, counselors, teachers, and students work as a team to define and achieve goals of the program.	0 1 2 3 4

TOTAL POINTS

Suggested Documentation

- Student-parent-educator career planning conferences take place on a regular basis.
- Parental involvement is evidenced in such things as mailings to parents, home visits, and parents serving on advisory groups.
- Business, labor and community involvement is evident through such activities as sponsorship of apprenticeship and other school-to-work programs, job tryouts and shadowing, and assuring that students have a knowledge of job seeking and job retention skills.
- School/institution collaborative efforts are evident in classroom activities and teachers, counselors and administrators working as a team to advise and encourage students.

Comments/notes:

5. COHERENCE: The extent the program provides a documented career plan for all students and furnishes specific assistance and assessment of progress.

CRITERIA	Points for Each Indicator
● Each student develops, maintains, and uses a documented career plan.	0 1 2 3 4 5 6
● Student career plans are periodically reviewed and modified, at least annually, in order to monitor progress and relevance of career choices.	0 1 2 3 4 5
● Provisions are made for all students to access alternative education and work options relevant to their career choice.	0 1 2 3 4 5
TOTAL POINTS	

Suggested Documentation

- The process is formalized, and results in written career plans for each student.
- There is a variety of sources of student information used in the planning process including (but not limited to) measures of interest, aptitude and achievement.
- Systematic and documented effort is made to help students achieve goals outlined in the plan.
- The school/institution environment and learning process are structured to support student goal attainment.
- Students' plans include such things as four course sequences, and postsecondary goals and plans.
- There is documented follow through with parents relative to ideas for supporting students in realizing goals.
- A written, systematic and verifiable means for monitoring student progress and modifying plans is in place.

Comments/notes:

7. COMPETENCY: The extent to which the program provides evidence of student competency attainment.

CRITERIA	Points for Each Indicator
<ul style="list-style-type: none"> ● All student career plans include individual goals, expected outcomes, and strategies for success. 	0 1 2 3 4
<ul style="list-style-type: none"> ● The program provides for a system of evaluating career plans and student competency attainment. 	0 1 2 3 4
<ul style="list-style-type: none"> ● Assessment is used to identify student competency attainment. 	0 1 2 3 4
<ul style="list-style-type: none"> ● Follow-up data is used as a means of program evaluation and improvement. 	0 1 2 3 4
<ul style="list-style-type: none"> ● There is evidence of attainment of competencies similar to those in the National Career Development Guidelines or a comparable structure. 	0 1 2 3 4
TOTAL POINTS	
<div style="border: 1px solid black; padding: 5px; display: inline-block; margin-bottom: 10px;">Suggested Documentation</div> <ul style="list-style-type: none"> ● Competencies are specified, written and available to all involved. ● Progress toward achievement of career plan goals is measured on a regular basis (exceptional programs may include a student portfolio). ● Students find postsecondary placement into work, training, military or postsecondary education as a result of career planning. ● Students demonstrate planning and decision making skills, responsibility and self confidence and build credentials. <p>Comments/notes:</p> <hr/> <hr/> <hr/>

Strengths: _____

Unique Features: _____

**PART IV:
PLANNING FOR LIFE
NATIONAL RECOGNITION PROGRAM
Application Preparation and Submission Guidelines**

General Information

Purpose:

Planning for Life will recognize and spotlight exemplary career planning programs to underscore the importance and necessity of career planning as a lifelong need and required skill. *Planning for Life* is a vehicle to help identify, promote, and share the stories of successful career planning programs which operate across the nation. The attention will generate interest and promote public understanding of the need for programs which support individuals planning for their future. An important element in the *Planning for Life* National Recognition Program is the emphasis on coalition building among school, family, business and community.

Recognition:

Selected state applicants are recognized with Certificates and Plaques of Excellence and are featured in program materials shared with state and national media. State honorees' applications are sent to compete for a national award. All schools who participate at the state level receive a Certificate of Excellence.

Awards Program Management:

The *Planning for Life* program is sponsored by the U. S. Army Recruiting Command and administered by the National Consortium of State Career Guidance Supervisors. The Consortium works closely with all state career guidance supervisors and depends heavily upon their leadership and assistance in this career planning effort.

Schedule of Activities:

Step # 1

Applications in Step # 1 are submitted to the State Career Guidance Supervisor. Applications may be submitted as early as January 31st or a later date established by each state.

Review and rating of state applications - Spring

Step # 2

Review and rating of applications at national level - Spring (May)

National Honorees announced - Spring (May 31st)

State Recognition Ceremony - Summer/Fall

National Recognition Ceremony - Summer

Eligibility:

All districts, schools, institutions, businesses, or agencies that serve youth and adults in any grade level, 6 and above, are eligible to participate. Each participant must submit an application in order to be eligible for recognition.

The program must be operational at the time of application consideration.

The program meets the guidelines and standards of the appropriate state agencies.

The program must be available to all students within the applying school, institution or agency.

Application Preparation and Submission Information:

The preparation and submission of applications is conducted in a two step process. *Step one* requires only a cover letter from the school, institution or agency; an 8-10 page summary of the program and the completed application cover page. These materials are sent to the State Department of Education for review. This step is to identify at least two of the most effective career planning programs from each state. *Step two*, for those who are selected by the state to continue on in the process, requires all of the above plus full documentation and information related to the 7 Cs as specified. These completed applications are to be sent to the National Consortium of State Career Guidance Supervisors unless otherwise directed by the individual state departments of education. The specific requirements for each of the two steps are as follows:

Step # 1

- Submit your application to your state guidance supervisor (names and addresses are found at the end of this guidebook).
- Application must include the following: (a) letter of transmittal, (b) an 8-10 page summary of the program which addresses the 7 Cs as specified, (c) a copy of the application form cover sheet.
- Submit your application to your state guidance supervisor on or before January 31st or by the date established in each respective state.

If you are selected at the state level to represent your respective state within the national review and rating process, you will agree to complete the additional information required in Step # 2.

Step # 2

- School, institution or agency administrator will prepare a letter of transmittal.
- Submit a typewritten project abstract not to exceed two pages in length.
- Submit a project summary which addresses the 7 Cs as specified. Summary must be typewritten and not more than 10 pages in length.
- Submit **two** copies of the complete application along with documentation. Each copy must fit into a three ring binder no larger than three inches.
- All materials will be submitted to the National Consortium of State Career Guidance Supervisors; materials submitted will become the property of the Consortium.
- Submission of your application assumes your permission to use and describe your program for publicity purposes.
- Documentation may include reference to video tapes. Review panel will not preview video tapes, therefore do not send with application.
- All applications must address the information called for in steps 1 and 2.

Review and Selection:

Step # 1

- Application review will be conducted in each participating state under the direction of the State Department of Education.
- State Department of Education will convene a review panel. Review panel should include guidance and counseling, career education and career development professionals. Other panel members may include parents, business and community representatives.
- Panel will review the application using the seven criteria contained in Part III of this Guidebook.
- Postsecondary institutions may exclude the criteria which refers to parent or family involvement.

Step # 2

- Application review will be conducted by the National Consortium of State Career Guidance Supervisors.
- Review panel will include national leaders in the field of guidance, counseling and career development.

Send all application materials to your state career guidance supervisor. Names and addresses can be found in the back of this guidebook.

Applicant Code: _____

PART 1

PLANNING FOR LIFE APPLICATION FORM

Cover sheet

Complete the cover sheet and each part of the application as specified.

Applicant Name and Location (School/Institution/Agency)

Name: _____

Address: _____

City: _____ State: _____ Zip _____

Administrator

Name: _____ Title _____

Phone: (____) _____ FAX: (____) _____

Contact Person (Counselor/Career Planning Director submitting application)

Name: _____ Title _____

Phone: (____) _____ FAX: (____) _____

Description of applicant setting and organization: (School/Institution/Agency context, population served (type, size, age, grade).

Community Context: (Population, Rural Suburban, Urban, Business, and/or Labor, Economic environment).

I/we understand that if our program is selected as one of the state level "Planning for Life" honorees, we will provide complete documentation/support materials as defined in Step 2 of the application guidelines in order to qualify for state and/or national recognition.

District Administrator _____ Date: _____
Program Coordinator _____ Date: _____

For the Honoree selected by the state review panel in step # 1 they are to complete the application process following the requirement listed below in Parts II, III, IV and V.

Part II.

Program Abstract

Must be typewritten, double spaced, and no more than two pages in length.

Part III.

Program Summary

Submit your proposal application addressing each of the 7 Criteria (7 Cs) that follow in Part IV using the order specified. Use no more than ten typewritten pages, double spaced, using the seven criteria as subheadings.

Part IV.

Documentation

All supporting program documentation must be organized following the program characteristics as given below. Use appropriately marked tabs for each section of your application binders.

Program Characteristics (7 Cs)

1. Clarity of Purpose
2. Commitment
3. Comprehensiveness
4. Collaboration
5. Coherence
6. Coordination
7. Competency

Part V.

List/describe program materials in the following areas:

1. Assessment materials (identify by grade level and for what purpose).
2. Commercially produced materials (include only those that are integral to the program).
3. District/school developed resources (include the materials and resources that have been developed to carry out the program).
4. It is not necessary to include copies of the assessment instruments or other materials listed in this part.

NOTE: Place all materials in a three ring binder. Two complete copies are required.
