**EDUCATION COMMISSION OF THE STATES  
Information Clearinghouse  
1996-97 State Issues Report**

**INTRODUCTION**

Most of the items in this *State Issues Report* cover the preK-12 level. They have been collected from legislators, legislative staff, state newsletters, *StateNet*, *Lexis-Nexis*, school board/teacher associations and various media. ECS staff have made every attempt to validate all information.

Essentially, the information in this report is raw data — rapidly processed to be released in printed form at the earliest possible date. Editing has been kept to a minimum; many items appear in form similar to the one in which they were received. Not all legislation listed here was enacted; some bills or programs were included because we considered them significant. Bill descriptions may have been modified since introduction. A few older records were included to provide perspective about the importance/ longevity of particular issues.

This report was compiled by the ECS Clearinghouse, the centralized resource and research arm of the commission. ECS policy experts and staff are available to assist in the search for state and legislative information, topical research and publications. The Clearinghouse also is linked to a wide range of education-related organizations. If your question deals with education, Clearinghouse staff can provide the answer — or at least point you in the right direction.

The Clearinghouse functions under a "24-hour rule." Staff will respond with an answer — or at least with a promise as to when you can expect an answer — within 24 hours. Prompt and courteous service are hallmarks of the ECS Clearinghouse. Call 303-299-3675 with your request.

<b>FINANCE (also see SPECIAL EDUCATION and TECHNOLOGY)</b>		
AK	Proposed 7/96	Proposes Education Endowment which earmarks portion of Permanent Fund earnings for basic level of K-12 education funding. Plan would be put in place through constitutional amendment voted on by Alaskans in November 1998. Permanent Fund would continue to grow from \$15 billion to \$25 billion in 10 years, protected against inflation. Upon voter approval, education funding would gradually shift from "general fund" to Education Endowment, using some of Permanent Fund's annual earnings. Endowment would be "floor" or "base level" of education funding. Additional funds for education could be appropriated by legislature, but endowment funds could not be spent for any other purpose. Base level of funding could be supplemented from local revenues, state's general fund or other sources. Endowment funding would increase to match any growth in school enrollments, currently estimated at 2% each year. Money from Endowment would be appropriated each year by legislature for K-12 education.  Title: <b>Education Endowment</b> Source: Office of the Governor

State	Status	Summary
ME	Active 12/96	<p>Articulates six "guiding principles" which describe characteristics of well-educated person: clear and effective communicator, self-directed and lifelong learner, creative and practical problem solver, responsible and involved citizen, collaborative and quality worker, and integrative and informed thinker. To fulfill these principles, "learning results" developed within following eight areas: English language arts, foreign languages (modern and classical languages), social studies, visual and performing arts, science and technology, health and physical education, mathematics and career preparation. As structure for "learning results," each area divided into content standards and performance indicators — checkpoints — toward meeting content standard within each of four grade spans: preschool to grade 2, grades 3 and 4, grades 5-8, and secondary school. Of 13 science and technology standards, two directly relate to technology, including: "Students will communicate effectively in applications of science and technology (communication)." In addition, there are technology-related performance indicators in career preparation, English language arts, foreign languages, social studies, and visual and performing arts.</p> <p>Title: <b>Technology Standard Component</b> Source: State of Maine Learning Results</p>

<b>TEACHER EVALUATION</b>		
AK	Enacted 5/96	Requires teachers to spend three years teaching before becoming eligible for tenure (previously two years). Will subject teachers and administrators to regular reviews using performance standards developed by local school boards but based on general state rules. Districts must set standards by July 1, 1997. If tenured teacher fails to meet local standard, he or she will follow improvement plan over several months. If, after that help, teacher is still deemed deficient, he or she could be fired. New plan would allow schools to lay off tenured teachers with rehiring rights in times of financial crisis. 1995 vetoed bill (HB 217) did not include substantial evaluation component.
