# 9th annual comparative analysis of the Racine Unified School District 

## Summary

Over the past decade, the conditions affecting the Racine Unified School District (RUSD) as well as the school outcomes have changed in some ways - and remained remarkably stable in other ways. Therefore, more than in previous report, this 9th analysis of RUSD takes a more longterm view. Even so, this study follows a format similar to that of the first report commissioned in 1998. The analysis compares RUSD to nine peer school districts and the state of Wisconsin. RUSD peer districts, for the most part, are Wisconsin's largest (Milwaukee Public Schools is not included) and their enrollments are similar to the enrollment in Racine. Each district is examined based on enrollment, finances, staffing, student engagement, and student performance. Data collected for the analyses over the past nine years makes it possible to provide a snapshot of how RUSD is faring and puts the latest information in a historical context.

## Major Findings

Enrollment: RUSD enrollment for 2005-06 decreased 0.3\%, to 21,175. RUSD was the third largest in the state when the study was first undertaken, but was overtaken by Kenosha Unified three years ago and now is the fourth largest - behind districts serving Milwaukee, Madison, and Kenosha. As total enrollment in the district decreased, the enrollment of minority students continued to increase.

Student diversity: RUSD is moving toward a majority minority enrollment, primarily because of a rapid growth of Asian and Hispanic students. African American enrollment has increased modestly in recent years, and white enrollment has declined somewhat. Overall, $46.5 \%$ of students who attended RUSD were minority in 2005-06, up from 36.9\% in 1997-98.

Finances: State aid to RUSD increased 10.1 \% while property taxes dropped $6.6 \%$ last year. The district ranked third in state aid and ninth out of 10 districts in property taxes collected per pupil. The tax rate for 2006 was $\$ 6.76$ per $\$ 1,000$ of property value. Racine was third in revenue per pupil and fifth or sixth in every spending category. RUSD spent $\$ 9,997$ per pupil.
Student engagement: For the third consecutive year, RUSD improved its truancy rate. The 2005 rate was $9.7 \%$, the lowest it has been since 1997. This was close to the statewide rate of $9.5 \%$.

Extracurricular activity: During 2005-06 participation in athletics and music declined somewhat whereas participation in academic extracurricular activities improved, increasing by one percentage point to a $12.5 \%$ student participation rate.
Discipline: Suspension and expulsion rates in RUSD increased in 2004-05. Compared to peer districts, it had the highest rates for both suspensions and expulsions. In 2004-05, 202 students were expelled, more than twice the 87 expelled the prior year.

Student performance: Student performance measurements yielded mixed findings. Students in the 4th grade scored lower in both reading and math than in the previous year. Reading scores in the 10th grade also declined. Scores in both reading and math in 8th grade and math scores in 10th grade increased from last year.

## Enrollment characteristics

For the third year in a row, RUSD's total enrollment decreased, making it the fourth largest school district in the state, behind only Milwaukee, Madison, and Kenosha. During the three years, RUSD lost $1.3 \%$ of its total student population; $0.2 \%$ of that loss occurred between 2004-05 and 2005-06. RUSD had the third greatest net loss in student enrollment among peer districts. Only Madison and Oshkosh had greater losses. Declining enrollment in the district has occurred since 1997. Figure 1 shows a decrease in enrollment over a nine-year period.

Figure 1: Public school enrollment trend, 1996 to 2006

RUSD enrolled the highest percentage of minority students among peers for the ninth straight year. Table 1 shows the district's minority enrollment statistics. Minority enrollment increased to $46.5 \%$ of total enrollment from 2004-05 to 2005-06. Madison followed closely with 43.9\%. RUSD's white-student enrollment decreased from 2004-05 to 2005-06. Although the number of white students decreased, enrollment increased in every minority group.

Table 1: Enrollment by race among peer districts, 2005-06

| Enrollment | Overall |  | Racial composition |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Appleton | 15,213 | 1.0\% | 12,301 | 428 | 1,586 | 780 | 118 | 2.8\% | 9 | 19.1\% | 7 |
| Waukesha | 13,611 | 2.2\% | 10,992 | 458 | 391 | 1,707 | 63 | 3.4\% | 6 | 19.2\% | 6 |
| Eau Claire | 10,809 | 3.6\% | 9,239 | 230 | 1,033 | 169 | 138 | 2.1\% | 10 | 14.5\% | 8 |
| Janesville | 10,589 | -0.2\% | 9,121 | 586 | 225 | 611 | 46 | 5.5\% | 5 | 13.9\% | 9 |
| Oshkosh | 10,230 | -0.6\% | 8,827 | 311 | 752 | 286 | 54 | 3.0\% | 7 | 13.7\% | 10 |
| Sheboygan | 10,278 | 0.3\% | 8,457 | 348 | 1,861 | 1,250 | 80 | 2.9\% | 8 | 29.5\% | 5 |
| Milwaukee | 92,395 | -1.3\% | 15,087 | 53,870 | 4,139 | 18,525 | 774 | 58.3\% |  | 83.7\% |  |
| Wisconsin | 875,174 | 1.2\% | 680,760 | 91,606 | 31,104 | 59,012 | 12,692 | 10.5\% |  | 22.2\% |  |

Figure 2: Minority enrollment among peer districts, 9-year comparison

Retention statistics for 2005-06 were encouraging for RUSD. Over the last five years, RUSD has gone from retaining $65 \%$ of its freshmen class as seniors four years later, to retaining $86 \%$. The retention rate for African-American high school students has improved since 2002 from $45 \%$ to $72 \%$; for Hispanics, the rate has grown from $45 \%$ to $83 \%$. White high school students in RUSD continue to have the highest retention rates: 77\% in 2002 and $92 \%$ in 2006.

Beyond public schools, students within Racine city limits have a variety of options to obtaining a high school diploma. Private schools, charter schools, and home schools constitute a large portion of the enrollment in Racine schools. Over 29.9\%, or 5,971 students, in Racine did not attend traditional public schools. RUSD had the highest percentage of students who were home schooled among peer school districts. The district ranked second in both private school and charter school enrollment. Since 2001-2002, private school enrollment in Racine has declined by 90 to 100 students each year, while charter enrollment has stayed mostly stable and the number of home schoolers has grown slightly. However, each schooling option’s share of Racine's students has not changed dramatically in the past five years.

Table 3: Educational options among peer districts, 2005-06

Table 4: Special education enrollment, 2005-06

| Enrollment | Special education |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | Age 3-21 | Age 3-5 | Age 3-21 as <br> \% of total <br> enrollment | Rank |
|  | 4,506 | 385 | $18.4 \%$ | 2 |
| Madison | 3,086 | 479 | $13.9 \%$ | 7 |
| Kenosha | 3,820 | 623 | $18.0 \%$ | 3 |
| Racine | 3,834 | 382 | $18.9 \%$ | 1 |
| Green Bay | 2,091 | 257 | $13.7 \%$ | 8 |
| Appleton | 1,820 | 301 | $13.4 \%$ | 10 |
| Waukesha | 1,469 | 185 | $13.6 \%$ | 9 |
| Eau Claire | 1,703 | 175 | $16.1 \%$ | 6 |
| Janesville | 1,685 | 202 | $16.5 \%$ | 5 |
| Oshkosh | 1,733 | 250 | $16.9 \%$ | 4 |
| Sheboygan |  |  |  |  |
|  | 16,458 | 1,819 | $17.8 \%$ |  |
| Milwaukee | 129,875 | 16,066 | $14.8 \%$ |  |
| State of Wisconsin |  |  |  |  |

RUSD ranked third in the percentage of students - 3-21 years old - receiving special education, behind only Green Bay and Madison. The $18 \%$ of RUSD students who received special education in 2005-06 was slightly higher than last year's percentage of $17.8 \%$. RUSD, Green Bay, and Madison had higher percentages than Milwaukee and the state. Of the 3,820 students who received special education in RUSD, 623 (16.3\%) were 3-5 years old. This put RUSD second among peers, behind only Waukesha. Throughout the state, $14.8 \%$ of students received special education; of those 12.4\% were 3-5 years old.

## Demographic characteristics

From 2004-05 to 2005-06, the average income per tax return and the average income per pupil in RUSD both increased. Despite gains in affluence in the district, the number of students eligible for free and reduced price lunches also grew. Forty-two percent of RUSD students were eligible for free or reduced lunches, up from 40\% a year earlier. For the fourth year in a row this measure has increased, reaching a nine-year high. Green Bay was the only RUSD peer district to have a higher percentage of students receiving free and reduced lunch.

Table 5: Community demographics among peer districts, 2005-06

| $\begin{array}{\|l\|} \hline \text { Community } \\ \hline \text { demographics } \\ \hline \end{array}$ | Affluence |  |  |  |  |  |  |  |

| Green Bay | 43.0\% | 1 | \$44,207 | 6 | \$143,465 | 4 | \$393,980 | 6 |
| Appleton | 26.0\% | 9 | \$46,445 | 4 | \$131,202 | 6 | \$396,292 | 5 |
| Waukesha | 21.0\% | 10 | \$53,685 | 2 | \$180,158 | 3 | \$628,319 | 2 |
| Eau Claire | 30.0\% | 7 | \$59,912 | 1 | \$188,953 | 2 | \$455,418 | 3 |
| Janesville | 31.0\% | 6 | \$43,308 | 7 | \$119,482 | 8 | \$337,244 | 9 |
| Oshkosh | 29.0\% | 8 | \$41,543 | 9 | \$134,322 | 5 | \$415,949 | 4 |
| Sheboygan | 37.0\% | 4 | \$40,023 | 10 | \$106,993 | 9 | \$313,255 | 10 |
| Milwaukee | 72.0\% |  | \$32,736 |  | \$85,181 |  | \$274,004 |  |
| Wisconsin | 33.0\% |  | \$45,083 |  | \$126,380 |  | \$28,927 |  |

Figure 5: Trends in RUSD free lunch or reduced-price lunch eligibility, 1997-2005

Note: Racine's total enrollment declined from 1997-98 to 2000-01, likely effecting the number of students eligible for free or reduced lunch.

Three other key demographic measurements also were measured over a nine year period. The average income filed per return in Racine increased at a rate slower than that of the state over 1- and 9 -year spans. The amount of income earned per pupil within the district also increased at a slower rate than that of the state over the same periods. The final demographic measurement, property value per pupil, increased at a rate slower than the state measurement over the 9 -year period. However, property value per pupil increased at a rate greater than that of the state over the 1-year period. Slow growth in demographic measurements was responsible for RUSD's low ranking in those measurements during 2005.

Table 6: Trends in demographics, 1997-2005 and 2005-06

| Behavior | Free lunch eligible |  | Income per return |  | Income per pupil |  | Property value per pupil |  |

## Finances

RUSD ranks fourth among peer districts in total operations revenue per pupil and is on par with the statewide average revenue per pupil. Madison, Waukesha, and Sheboygan had a higher total operations revenue per pupil than RUSD. The district's total operations revenue was $\$ 10,163$ per pupil for 2005-06 (Table 7). The majority, $67.6 \%$, of this revenue came in the form of state aid, ranking RUSD second among peers. The district also ranked third in federal aid. RUSD ranked ninth among peers in property tax revenue, ahead of only Sheboygan.
Table 7: Revenue per pupil among peer districts, 2005-06

| Finances | Property tax | \% of total op. revenue | Rank | State aid | \% of total op. revenue | Rank | Federal aid | \% of total op. revenue | Rank | Operations revenue | Rank |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

The low tax rate in the district prohibits RUSD from relying heavily on revenue generated by taxes. Last year, Racine ranked ninth in property tax levies among peer districts. The tax rate this year, $\$ 6.76$ per $\$ 1,000$ dollars in assessed property value, was the lowest tax rate among the ten peer districts and was the lowest tax rate within the district since 1998. The declining tax rate mirrored a trend toward decreasing tax levies at the state level and in comparable districts. One reason districts have been able to decrease their rates has been their property values have increased, allowing them to levy a similar amount with a lower tax rate. Thus, although Racine’s tax rate is $11 \%$ lower this year, its tax levy per pupil is only $1.5 \%$ lower than last year.

Table 8: Property tax rates, 2006

| Finances | Rate | Rank |
| :--- | :---: | :---: |
| Madison | $\$ 10.43$ | 1 |
| Kenosha | $\$ 8.16$ | 7 |
| Racine | $\$ 6.76$ | $\mathbf{1 0}$ |
| Green Bay | $\$ 8.57$ | 4 |
| Appleton | $\$ 8.30$ | 5 |
| Waukesha | $\$ 7.78$ | 8 |
| Eau Claire | $\$ 9.90$ | 3 |
| Janesville | $\$ 8.21$ | 6 |
| Oshkosh | $\$ 7.25$ | 9 |
| Sheboygan | $\$ 10.17$ | 2 |
| Milwaukee | $\$ 8.94$ |  |
| Wisconsin | $\$ 8.62$ |  |

Figure 6: Trend in tax rates, 1998-2006

From 2005-06, RUSD saw minor changes in its aggregate revenue sources. Total operations revenue increased $4.7 \%$. This was primarily the result of a $10.1 \%$ gain in state aid to the district. RUSD ranked fourth in growth in total operations revenue and in growth in state aid. Property tax revenue and federal aid in the district also decreased. RUSD ranked ninth in property tax percentage change and seventh in federal aid change among peers.

Table 9: Change in aggregate revenue among peer districts, 2004-05 to 2005-06

| Finances | Property tax |  | State aid |  | Federal aid |  | Operations revenue |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | \% change | Rank | \% change | Rank | \% change | Rank | \% change | Rank |
| Madison | -1.3\% | 4 | 12.1\% | 2 | -26.8\% | 10 | 0.9\% | 10 |
| Kenosha | 7.6\% | 1 | 1.6\% | 10 | -6.8\% | 8 | 3.1\% | 6 |
| Racine | -6.6\% | 9 | 10.1\% | 4 | -4.7\% | 7 | 4.7\% | 4 |
| Green Bay | -4.3\% | 6 | 6.8\% | 5 | 0.2\% | 5 | 2.4\% | 8 |
| Appleton | 5.1\% | 2 | 5.5\% | 8 | 7.6\% | 2 | 4.9\% | 2 |
| Waukesha | -4.6\% | 7 | 13.0\% | 1 | -2.1\% | 6 | 5.7\% | 1 |
| Eau Claire | -1.1\% | 3 | 3.3\% | 9 | -22.4\% | 9 | 1.6\% | 9 |
| Janesville | -5.6\% | 8 | 5.8\% | 6 | 0.7\% | 4 | 2.9\% | 7 |
| Oshkosh | -1.4\% | 5 | 5.5\% | 7 | 20.6\% | 1 | 4.6\% | 5 |
| Sheboygan | -8.6\% | 10 | 11.0\% | 3 | 3.2\% | 3 | 4.8\% | 3 |
| Milwaukee | 1.6\% |  | 2.3\% |  | 4.9\% |  | 2.5\% |  |
| Wisconsin | -1.6\% |  | 6.3\% |  | 0.6\% |  | 3.4\% |  |

RUSD property tax revenue increased at a slower rate than property tax revenue in the rest of the state. RUSD state aid increased at a rate greater than state aid to all districts in the state. The district ranked eighth in state aid growth, increasing 38.2\%. Only Waukesha and Eau Claire had lower increases. Kenosha ranked first with an increase of 65.6\%. RUSD ranked ninth among peers in the 9-year growth of federal aid.

Table 10: Change in aggregate revenue among peer districts, 1997-98 to 2005-06

| Finances | Property tax |  | State aid |  | Federal aid |  |

| Wisconsin | 14.4\% |  | 35.7\% |  | 121.8\% |  |

On the spending side, RUSD had the sixth highest total operations spending among peer districts. Total spending per pupil was $\$ 10,018$ in 2005-06. This was down from a rank of third in 2004-05. RUSD ranked seventh among peers in instructional spending; sixth in pupil services, improving from ninth in 2004-05. RUSD spent $\$ 438$ per pupil on transportation, the highest among peers.

RUSD per pupil spending showed little change during 2005-2006. Racine ranked seventh among peer districts in total operations spending increases. The district had a $2.8 \%$ total increase in spending. The transportation, general administration, and instruction categories all increased. RUSD decreased its spending on pupil services, instructional staff services, and building administration (Table 13). The total operations spending increased $2.8 \%$, slightly below the state average increase in total spending.

Table 13: Change in aggregate spending, 2004-05 to 2005-06

From 1998 to 2006, RUSD spending increased at a rate faster than the state in every expenditure category, except transportation. RUSD had the second highest increase (41.3\%) in spending on administration over the 9-year time period. The district also had the fourth highest spending increases in instructional staff services and total operations spending.

Table 14: Change in aggregate spending, 1997-98 to 2005-06

RUSD had the second highest per pupil spending on special education. It spent $\$ 2,251$ per pupil on special education with the majority going to the cost of instruction. RUSD also ranked second in the amount spent per pupil on special education instruction. Only Madison spent more on special education per pupil.

Special education spending amounted to $22.5 \%$ of total spending in the district. Of the transportation budget, 44.5 \% went to special education transportation. Twenty-seven percent of RUSD's instructional spending was for special education instruction.

Table 15: Special education spending per pupil among peer districts, 2005-06

| Finances | Special education spending |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | Total | Instruction | Pupil services | Instructional staff <br> services | Transportation |
|  | $\$ 2,648$ | $\$ 1,936$ | $\$ 467$ | $\$ 86$ | $\$ 146$ |
| Madison | $\$ 1,648$ | $\$ 1,313$ | $\$ 202$ | $\$ 39$ | $\$ 92$ |
| Kenosha | $\$ 2,251$ | $\$ 1,755$ | $\$ 214$ | $\$ 78$ | $\$ 195$ |
| Racine | $\$ 2,062$ | $\$ 1,602$ | $\$ 229$ | $\$ 91$ | $\$ 112$ |

## Staffing

Staffing is the final of the three school performance inputs considered.
Class size is often used as a key indicator to student success, especially in elementary grades. To determine class size, pupil-to-staff ratios were used. RUSD had the highest pupil-teacher ratio among peer districts in 2005-06 at 16.2, an increase of 1.6 students per teacher from 2004-05. Although RUSD had the highest teacher-pupil ratio, RUSD had the lowest pupil-staff ratio at 7.9, slightly below the state average of 8.1 and one of only three peers below 10. RUSD was the only peer district with an increase in pupil-teacher ratio from 2004-05 to 2005-06.

Table 16: Pupil to staff ratios among peer districts, 2005-06

| Staffing | Pupil to full-time staff ratios |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | Pupil/teacher | Rank | Pupillemployee | Rank |
| Madison | 14.1 | 9 | 8.9 | 9 |
| Kenosha | 15.3 | 6 | 9.0 | 8 |
| Racine | $\mathbf{1 6 . 2}$ | $\mathbf{1}$ | 7.9 | $\mathbf{1 0}$ |
| Green Bay | 14.1 | 8 | 10.5 | 5 |
| Appleton | 15.8 | 3 | 10.0 | 7 |
| Waukesha | 15.9 | 2 | 11.3 | 1 |
| Eau Claire | 15.4 | 4 | 10.7 | 4 |
| Janesville | 14.2 | 7 | 10.8 | 3 |
| Oshkosh | 15.3 | 5 | 11.2 | 2 |
| Sheboygan | 13.9 | 10 | 10.1 | 6 |
|  |  |  |  |  |
| Milwaukee | 18.0 |  | 9.0 |  |
| State of Wisconsin | 15.4 |  | 8.1 |  |

RUSD teachers were paid an average salary of $\$ 46,534$. Including benefits in 2005-06, the average total came to $\$ 66,495$. RUSD ranked seventh in both salary and total compensation among peers in 2005-06, up from its 9th and 10th rankings last year. Racine moved up in the rankings due to its $4 \%$ increase in salary and $15 \%$ increase in benefits. Janesville and Oshkosh were the only two districts with decreases in salary, while Green Bay, Appleton, and Janesville saw declines in total compensation. Teachers throughout the state had an average salary of \$46,394 in 2005-06.

RUSD teachers had an average of 12.3 years of experience in the district in 2005-06, up from 10.4 years in 2004-05, placing them third among peer districts in local teacher experience. RUSD was one of only four peer districts to have an increase in local teacher experience. Explanations may be that RUSD was ahead of other districts in teacher retirements and/or that other districts had high teacher retirements in 2005-06. RUSD teachers had 14 years of total teacher experience in 2005-06, ranking the district sixth among peers. It was one of three peer districts with an increase in overall teacher experience. Overall, teachers in the state had 12 years of local experience and 14.3 years of total experience.

Table 17: Average teacher compensation among peer districts, 2005-06

## Student engagement

RUSD's attendance rate improved for the fourth year in a row. For 2004-05, it was $94.5 \%$, ranking RUSD seventh among peers, up one position from 2003-04. RUSD and Kenosha were the only peer districts to have an improvement in attendance rate from 2003-04 to 2004-05. The state average attendance rate was $94.5 \%$, the same as RUSD and down less than a percentage point from 2003-04.

The percentage of students who were habitually truant in 2004-05 improved dramatically. RUSD ranked 4th in truancy among peers in 2004-05, two spots better than in 2003-04. From 2003-04 to 2004-05, RUSD's percentage of truant students dropped from $18.1 \%$ to $9.7 \%$. This was the fourth consecutive year that the district improved on this indicator (figure 12).

RUSD had the second highest dropout rate (3.4\%) among peers in 2004-05. RUSD's 2003-04 dropout rate was $0.6 \%$, which appeared to be a reporting error due to a change in reporting. The 2004-05 rate of $3.4 \%$ was 1.4 percentage points less than the 2002-03 rate of $4.8 \%$. In 2004-05, only Green Bay had a higher dropout than RUSD. The state average was $1.7 \%$.

Table 19: Attendance, truancy, and dropout rate among peer districts, 2004-05

| Engagement | Attendance |  | Habitual truancy |  | High school dropouts |  |  |  |

Figure 13: Trends in dropout rates, 1996 to 2005

RUSD ranked last in the number of students participating in academic and music-related extracurricular activities. It also ranked ninth out of ten districts based on participation in athletic extracurricular activities. These low rankings were due in part to a decline in participation in athletic and music extracurricular offerings during the 2004-2005 school year.

RUSD saw an increase in participation in academic extracurricular activities. Participation rates grew from $11.5 \%$ in 2003-2004 to $12.5 \%$ in 2004-05. It was the only peer district to have an academic participation rate below $20 \%$.

It should be noted that the participation rate is an unduplicated count. It is based on the number of students participating in each activity category divided by the total enrollment. Extra-/cocurricular activities are reported in one of three categories: academic, athletic, and music. An individual student is counted only once in each activity category no matter how many groups or activities he/she participates in. For example, a student who participates in football, basketball, and golf is counted only once in the athletic extracurricular activity column.

Table 20: Participation in academic extracurricular activities among peer districts, 2004-05

| Engagement | Average <br> offerings | Academic <br> participation | Academic <br> participation rate | Rank |
| :--- | :---: | :---: | :---: | :---: |
| Madison | 44 | 4,014 | $28.9 \%$ | 2 |

| Racine | 15.6 | 3032 | 26.0\% | 9 | 3.8 | 1012 | 8.8\% | 10 |
| Green Bay | 10.6 | 3364 | 30.3\% | 7 | 5.1 | 1903 | 17.2\% | 8 |
| Appleton | 7.4 | 3444 | 40.3\% | 3 | 4.2 | 2509 | 29.3\% | 2 |
| Waukesha | 8.2 | 3830 | 51.3\% | 1 | 14.6 | 2739 | 36.7\% | 1 |
| Eau Claire | 16 | 1719 | 29.1\% | 8 | 3.6 | 1350 | 22.8\% | 4 |
| Janesville | 29.6 | 2646 | 43.3\% | 2 | 8.6 | 1154 | 18.9\% | 7 |
| Oshkosh | 14.7 | 2250 | 38.6\% | 4 | 5 | 1191 | 20.4\% | 6 |
| Sheboygan | 25.8 | 2065 | 37.5\% | 5 | 14.6 | 1192 | 21.6\% | 5 |
| Milwaukee | 7.1 | 13128 | 28.2\% |  | 2.7 | 4125 | 8.8\% |  |
| Wisconsin | 12 | 214370 | 44.5\% |  | 4.7 | 109731 | 22.8\% |  |

In comparison to peer districts, RUSD had the highest suspension and expulsion rates. For $2004-05,13.1 \%$ of students were suspended and $1.0 \%$ of students were expelled. Kenosha had the second highest suspension rate, $12.1 \%$. Janesville had the second highest expulsion rate, $0.4 \%$.

From 2003-04 to 2004-05, RUSD's suspension rate increased 1.1 percentage points and its expulsion rate increased 0.6 percentage points. For the second year in a row, both measures continued to increase.

RUSD's high school completion rate decreased 4.5 percentage points from 2003-04 to 2004-05. The district continued to rank last among peers in high school completion. All but three of the 10 peer districts had a decrease in their high school completion rate from 2003-04 to 2004-05. Appleton, Sheboygan, and Kenosha were the only districts with increases. Three districts, Green Bay, Madison, and Waukesha, had larger decreases in their high school completion rate than RUSD.

## Student performance

The Wisconsin Knowledge and Concepts Exam (WKCE) exam is now administered annually to all 3rd, 4th, 5th, 6th, 7th, 8th, and 10th grade students. The 2005-06 school year was the first year that the WKCE was administered to students in 3rd, 5th, 6th, and 7th grades. In these grades, students are only tested in reading and math, but for the 4th, 8th, and 10th grade test students are tested in reading math, language arts, science, and social studies. The 3rd grade WKCE replaced the Wisconsin Reading and Concepts Test (WRCT), which is no longer administered. Historical comparison can only be made on the 4th, 8th and 10th grade tests due the change in exams and can only be made back to the 2002-03 school year because of changes in the exam.

RUSD ranked tenth among peers on the 3rd grade WKCE in both reading and math. Sixty-six percent of the 3rd graders at RUSD scored at or above proficient in reading in 2005-06. In Green Bay, $68 \%$ scored at or above proficient. These were the only two districts scoring below $70 \%$. Throughout the state $79 \%$ of students scored at or above proficient in reading. At RUSD, $51 \%$ of 3rd graders scored at or above proficient, well below Kenosha's $68.7 \%$, the ninth ranked peer district. The statewide percentage of students scoring at or above proficient in math was $70.5 \%$.

## Student performance

At RUSD, 4th grade WKCE scores declined in four out of the five content areas measured from 2004-05 to 2005-06. Seventy-two percent of 4th graders tested in reading scored at or above proficient in 2005-06, ranking RUSD last among peers. RUSD also ranked last among peers in math, with $57.4 \%$ of students scoring at or above proficient. The 4th grade reading scores at RUSD were down almost five percentage points from 2002-03. Math scores also dropped five percentage points.

Figure 14: 4th grade reading score trends, percent proficient or advanced

Figure 15: 4th grade math score trends, percent proficient or advanced

During the 2005-06 school year, 5th, 6th, and 7th grade students in Wisconsin began taking the WKCE test. The federal "No Child Left Behind Act" required that students be tested at these additional grades. RUSD ranked last among its peer districts in all three grade levels in both reading and math. At RUSD, $70 \%$ of 5th graders scored at or above proficient in reading, while $54 \%$ of 5 th graders scored at or above proficient in math.

Sixth grade students’ scores closely mirrored scores of 5th graders in the district. On the WKCE reading exam, $70 \%$ of 6th graders scored at or above proficient. In math, $55 \%$ of 6 th graders scored at or above proficient.

RUSD students in the 7th grade scored higher on WKCE tests than 5th and 6th graders. In reading scores, $72 \%$ of 7th graders had advanced scores. While math scores were substantially higher, only $68 \%$ of students scored at or above proficient. Although scores in the 7th grade were higher than scores in earlier grade levels, RUSD 7th graders scored below the state level.

This year, RUSD 8th graders ranked last among peers in both math and reading. In reading, $69.8 \%$ of 8th graders tested at or above proficient, making RUSD the only peer district below $70 \%$. Green Bay was the next lowest, with $75.4 \%$ scoring at or above proficient. Fifty-seven percent of 8th graders tested scored at or above proficient in math, well below Janesville’s 71.6\%. Although RUSD ranked last among peers there was some improvement. For example, this was the second year in a row that eighth grade reading and math scores improved at RUSD.

Consistent with findings in the 4th and 8th grades, RUSD 10th graders ranked last on the WKCE. From 2004-05 to 2005-06, RUSD math scores improved while reading scores declined. In reading, $56.1 \%$ of 10th graders tested at or above proficient which was more 10 percentage points behind the next highest peer district, Green Bay. RUSD's percentage of students scoring at or above proficient in math was $53.5 \%$ in 2005-06, again almost 10 percentage points behind the next district, Kenosha.

The achievement gap among races was measured by the differential in the percentage of whites and minorities scoring at or above proficient. At RUSD, the gap between African-Americans and whites was higher than the gap between Hispanics and whites in 4th, 8th, and 10th grades. White 4th graders at RUSD scored 34 percentage points higher than African-American students in 200506, and 17 percentage points higher than Hispanic 4th graders. At the 8th grade level in RUSD, Hispanic students scored 19 percentage points lower than white students. African-American 8th graders scored 33 percentage points lower than white students in 2005-06. In the 10th grade, the disparities are higher than in 4th and 8th grade at RUSD. White 10th graders scored 42 percentage points higher in reading than African-American 10th graders and 27 percentage points higher than Hispanic 10th graders.

Table 31: WKCE percent proficient and advanced by race and ethnicity, 2005-06

Disparities on WKCE test scores were greater among students of different socioeconomic backgrounds than they were among students of different races. RUSD's gap among economically disadvantaged and advantaged students was the highest among peer districts in the 4th and 10th grades. Eighth grade students had the second highest disparity between advantaged and disadvantaged students. The gap among students of different backgrounds was greatest in the 10th grade. Students who were not disadvantaged scored 32 percentage points higher than that of those who were disadvantaged.

ACT scores also measure student performance. In 2004-05, the percentage of RUSD students taking the ACT dropped, with $39.4 \%$ of students taking the exam. One year earlier, $47.9 \%$ of RUSD seniors took the exam. The district ranked 10th among peers in the percentage of students taking the exam. In 2004-05, the average composite score at RUSD was 21.2 points out of 36 . Students scored an average of 21.6 points on the 2003-04 exam. RUSD ranked tenth among districts in composite ACT scores.

Advanced Placement (AP) and International Baccalaureate (IB) classes give students the opportunity to earn college level credit in high school. In 2005, $2.6 \%$ of students in RUSD passed either an AP or IB examination, ranking RUSD tenth among peers. The prior year, $3.8 \%$ of students passed a college level exam. The number of exams administered to RUSD students also decreased, from 439 to 365 . Seventy-two percent of the IB test taken at RUSD were passed in 2005 at RUSD, while only $41 \%$ of the AP taken were passed. The combined percentage of $49.9 \%$ ranked RUSD well behind other peer districts.

Table 34: AP and IB tests among peer districts, 2005

| Performance | Exams taken | \% exams passed | Passed as a <br> $\%$ of enrollment | Rank |
| :--- | :---: | :---: | :---: | :---: |
| Madison | 1224 | $85.3 \%$ | $12.2 \%$ | 2 |
| Kenosha | 403 | $63.8 \%$ | $3.9 \%$ | 9 |
| Racine AP | 264 | $41.3 \%$ | $1.6 \%$ |  |
| Racine IB | 101 | $72.2 \%$ | $0.7 \%$ |  |
| Racine total AP\& IB | 365 | $49.9 \%$ | $\mathbf{2 . 6 \%}$ | $\mathbf{1 0}$ |
| Green Bay | 536 | $75.4 \%$ | $6.2 \%$ | 6 |
| Appleton | 806 | $69.2 \%$ | $11.0 \%$ | 3 |

| Milwaukee | 1,115 | $26.3 \%$ | $1.1 \%$ |  |
| Wisconsin | 29,024 | $67.4 \%$ | $6.9 \%$ |  |

From 1997 to 2005, RUSD witnessed a decrease in the number of AP exams passed as a percentage of enrollment. Scores fell from a high of $73 \%$ of exams passed in 1997, to a low of $41 \%$ of exams passed in 2005. Over the short term, scores fell from $51 \%$ of exams passed to $41 \%$ of exams passed from 2004 to 2005.

## Appendix A-- Definitions of terms

This report is based on information supplied periodically by school districts to the Wisconsin Department of Public Instruction (DPI). Enrollment and financial data, and 3rd, 4th, 5th, 6th, 7th, 8th, and 10th grade test scores, are current as of 2005-06. Other information on performance, attendance, and discipline is from 2004-05.

For 1998-99, the DPI made some important changes in the definitions of several of its outcome measurements. Although these refinements enhance the ability to interpret outcome data, they prevent meaningful comparisons to previous years. In any case, data must be interpreted with caution. Measures of performance, attendance, and behavior are not necessarily a statement about the quality of the district, its staff, or priorities. Many other factors also come into play: the different methods and accuracy of measurement, the priorities of students and their parents, and the validity of measurements should be taken into consideration. Each measurement must be interpreted in light of its limitations.

Here are the definitions of the included measurements:
ACT scores: ACT data are reported for the class of 2005. Most students take the test to fulfill admissions requirements for colleges and universities. If a student has taken the test more than once (in either his or her junior or senior year), the most recent score was reported. The maximum possible score on any individual section is 36 . The four sections of the test are English, math, reading, and science reasoning. The composite score is the weighted average of the subject area scores, out of a possible 36. The percentage of students tested is the number of students tested divided by the "third Friday enrollment" of the 12th grade.

Advanced placement tests: If a high school student receives a score of three, four, or five on an AP exam, he or she passed the test and can receive college credit. Students can take 29 exams in 16 fields. Schools may or may not offer formal courses in preparation for these exams. "Third Friday enrollment" data are used to calculate the percentage of students taking the tests.

Attendance: Based upon the state-required 180 school days, and with attendance taken twice daily, the attendance rate (expressed as a percentage) is computed by dividing the aggregate number of days students are in school by the aggregate number of possible student days in the school year. An attendance rate of $95 \%$ means that five out of every 100 students enrolled were not in school on a typical day.

Dropouts: According to the DPI, the definition of a dropout is a student who was enrolled in school at some time during the reported school year, was not enrolled at the beginning of the following school year, has not graduated from high school or completed a state or districtapproved educational program, and does not meet any of the following exclusionary conditions: transfer to another public school district, private school, or state of district-approved educational program; temporary absence due to expulsion, suspension, or school-approved illness; or death. Starting with 2003-04, the dropout rate is the number of students who dropped out during the school term divided by the total number of students who were expected to complete the school term in that school or district. The latter number may be more or less than the enrollment due to student transfers in and out after the fall enrollment count date. "Total number of students expected to complete the school term" is the denominator used to calculate all dropout rates and is the sum of students who actually completed the school term plus dropouts.

Enrollment: Two types of enrollment data are important: 1) the enrollment as of the third Friday in September, literally a head count of how many children are enrolled in school on a specific day, and 2) the full-time equivalent enrollment, which accounts for pre-school and kindergarten children in school for only a portion of the day to calculate state aid and other financial data. In this report, head count enrollments are reported in the tables, but full-time equivalents are the basis for calculation of spending and revenue per pupil.

Extra/co-curricular activities: Extra-curricular activities are school-sanctioned activities intended to broaden, develop, and enhance a student's school experience in the areas of academics, athletics, and music. Participation is not required and the group or event is not offered for credit or grade. In general, the Wisconsin Uniform Financial Accounting Requirements (WUFAR) describes co-curricular activities as "instructional activities under the guidance and supervision of school staff designed to provide students such experiences as motivation, enjoyment, and improvement of skills. (They) supplement regular instructional activities and include... band, chorus, speech and debate, (and) athletics." Data are collected for 6th through 12th grades.

Extra/co-curricular participation rate: The participation rate for each activity category is the number of participants divided by the 6th through 12th grade enrollment, counted on the third Friday in September.

Expulsions: Expulsion is the removal of a student from school permanently. Expulsions are recorded in terms of students expelled as well as days lost due to expulsion. The expulsion rates were calculated by dividing the number of expelled students by the pre-kindergarten through 12th grade enrollment of the school district.

4th, 8th, and 10th grade knowledge and concepts tests: These tests measure student knowledge in the areas of reading, language arts, mathematics, science, and social studies. Prior to 2002-2003, the scores are the national percentiles, which correspond to the raw scores. In 2002-2003 and 2003-2004, the tests were no longer normalized to a national standard. During these years, the Public Policy Forum reports the district's scores as a percent of the statewide average score.

3rd, 5th, 6th and 7th grade knowledge and concepts tests: These tests measure student knowledge in the areas of reading and mathematics. The 2005-06 school year was the first year in which knowledge and concepts examinations were administered to students in the 3rd, 5th, 6th, and 7th grades. As a result of this change, historical comparisons are not available for these grades.

Free lunch eligibility: The only available measure of the income level of pupils. It is the percentage of pupils who qualify under federal guidelines for free or reduced-price lunch, and, therefore, roughly measures the percentage of low-income children in a school.

Graduation rate: Starting with 2003-04, graduation rates are defined as the number of graduates divided by an estimate of the total cohort group measured from the beginning of high school, expressed as a percentage. This cohort group includes graduates, other high school graduates, and other students who reached the age 21 in the school year. The cohort group also includes cohort dropouts over four years. Prior to 2003-04, it was calculated by taking the number of graduates divided by the number of graduates plus dropouts over four years, expressed as a percentage.

Habitual truancy: According to DPI, the definition of a habitual truant is a student who is absent from school without an acceptable excuse for part or all of five or more days on which school is held during a semester. The habitual truancy rate (expressed as a percentage) is the number of habitual truants divided by kindergarten through 12th grade enrollment counted on the third Friday in September.

Income per pupil: Based on state tax returns, this is a calculation of aggregate earned income among residents of each school district divided by the district full-time enrollment (FTE). The result is an indicator of community wealth that takes into account both the relative number of children in the community and the proportion of the district's children who attend public schools.

Income per return: The aggregate income that was reported to the Wisconsin Department of Revenue divided by the number of returns filed.

Property taxes: An equalized school tax rate, which makes it possible to compare the school tax effort from one community to another. The equalized rate is the amount of money property taxpayers were charged in December 2005 (for the 2005-06 school year) for each $\$ 1,000$ of property value at full market value.

Property value per pupil: Another measure of community wealth, this relates directly to Wisconsin's formula for calculating state aid to school districts. The numbers represent the tax base of the school district as measured by equalized taxable property values as of 2005-06. It is a reliable measurement for purposes of comparing the property wealth of school districts.

Retention rates: Retentions are students who, by local district policy, must either repeat a grade or need additional time to complete the prescribed program. The number of retentions is reported for all grades except pre-kindergarten. The retention rate is the number of retentions divided by the kindergarten through 12th grade enrollment.

Revenue per pupil: Each autumn, school districts file reports on budgeted revenue and spending. Data in this report were taken from those reports filed in fall 2005. The two principal sources of revenue for schools - property taxes and state aid - are reported on a per-pupil basis (using full-time equivalent enrollments). Also reported are the per-pupil revenues from federal sources.

Spending per pupil: Operations spending per pupil refers to the cost of running the system on a daily basis. It is more useful to look at operations spending for comparative purposes because capital spending and debt service can vary dramatically from year to year (depending on whether a district is building new schools). Operations spending is divided into six categories for the purposes of this report:

- Instruction - Direct spending on educational programs that generally take place in the classroom.
- Pupil services - A wide variety of services outside the classroom, such as guidance counseling, social work, curriculum development, libraries, vocational services, and extracurricular activities.
- Instructional staff services - Includes spending on improvement to instructional staff, library media, and supervision and coordination of staff.
- General administration - Central office expenses related to district administration, such as the superintendent's office and the school board.
- Building administration - Expenses related to the administration of each school building, primarily the principal's office.
- Transportation.
- Other - all expenses not included in the above categories, including community recreation programs, staff services, maintenance, utilities, and other overhead functions.
Suspensions: Suspension is an administrative action that temporarily excludes a student from school. Suspensions are recorded three ways: 1) the number of individual students suspended at least once during the school year, 2 ) the number of suspensions (a larger number because some students are suspended more than once), and 3) the number of days lost because of suspension. This report measures suspensions as the number of days lost because of suspension. The measurement is reported as a percentage of total possible school days lost to suspension.
