EXECUTIVE SUMMARY

- In the 2008-09 academic year, more than 88,000 students received lottery funded scholarships with total award allocations in excess of \$259 million.
 - Approximately 61,000 students received HOPE, ASPIRE, or General Assembly Merit Scholarship (GAMS) awards in the 2008-09 academic year, as compared to 54,000 students in 2007-08. These three programs accounted for 90 percent of the entire expenditure for TELS programs.
 - > The Dual Enrollment Grant program, which was added in 2005, continues to grow rapidly, with close to 14,000 high school students participating.
 - > It is estimated that the total expense of TELS programs will be \$287.5 million in 2009-10.
- The demographic breakdown of TELS recipients by gender, race/ethnicity, and postsecondary sector has remained steady over time, with family income being the only exception.
 - > As the program continues, the percentage of students in higher income brackets grows. Though there may be growth in students in the highest income bracket, inflation has also contributed to the growth of family income.
- Fifty-seven percent of TELS recipients who enrolled as first-time freshmen in Fall 2009 met the high school GPA *and* ACT score criteria for initial eligibility.
 - > Additionally, 27 percent qualified solely based on high school GPA, while 16 percent qualified on the basis of their ACT score only.
 - > Students who met both GPA and ACT criteria for initial eligibility were more likely to renew their scholarships than those who met only one of the criteria.
- The second-year scholarship renewal rate was 55 percent for the Fall 2008 cohort, a three percentage point increase from the previous cohort group.
 - > Students at TICUA institutions had the highest scholarship renewal rate (61 percent), as compared to students attending public 4-year universities (56 percent) and community colleges (46 percent).
 - > Third- and fourth-year renewal rates were 45 percent and 38 percent, respectively, for the most recent cohorts.
 - > The scholarship renewal rate increased as family income increased.
- TELS recipients were more likely to remain in school than non-TELS students.
 - > The overall college retention rate for TELS recipients was 82 percent in their second year, 73 percent in their third year, and 65 percent in their fourth year. Meanwhile, the overall college retention rate for non-TELS students was 60 percent in their second year, 46 percent in their third year, and 37 percent in their fourth year.

- Forty-eight percent of Fall 2004 first-time freshmen who began with TELS at fouryear institutions graduated within five years.
 - Among the Fall 2004 Cohort, GAMS recipients had the highest graduation rate at 73 percent, followed by HOPE (50 percent), ASPIRE (35 percent) and Access (25 percent).
 - > Approximately two-thirds of those degree earners did so with their lottery scholarship still intact.
- The college participation rate for Tennessee high school recent graduates at in-state institutions has increased slightly since the inception of TELS.
 - Among Tennessee high school recent graduates who enroll in college, the percentage choosing Tennessee institutions has increased from 82.1 percent prior to the lottery scholarship to 85.4 percent in Fall 2008. Out-of-state universities with High Research Activity and Master's Level institutions have lost the greatest share of this population.
 - > The ACT profile of the entering freshman class has improved at UT Knoxville and appears to be rebounding at the University of Memphis. The average ACT scores of state resident freshmen have increased at other individual institutions, though not for other institutional types as a group.
- Detailed analyses on the Wilder-Naifeh program are available in the Wilder-Naifeh Technical Skills Grant Program Report, published separately.

PROGRAM OVERVIEW AND RECIPIENT DEMOGRAPHICS

STATUTORY CHARGE

This report is prepared pursuant to T.C.A. §49-4-903(b), which directs the Tennessee Higher Education Commission (THEC) to:

"...provide assistance to the general assembly and to the Tennessee Student Assistance Corporation (TSAC) by researching and analyzing data concerning the scholarship and grant programs created under this part, including, but not limited to, student success and scholarship renewal."

The report is divided into four major sections:

- *Program Overview and Recipient Demographics* describes the program's objectives, eligibility requirements, and size and scope;
- *Scholarship Renewal* describes the rates at which freshman cohorts receiving various types of scholarships renewed those awards, focusing particularly on differences in scholarship renewal across levels of family income and academic preparation;
- *College Retention* longitudinally tracks the Fall 2004 first-time freshman class through their fifth year of college and/or graduation, with or without the scholarship; and first-to-second year retention of all classes, with an emphasis on the Fall 2008 first-time freshman class; and
- *Best and Brightest* examines student matriculation patterns prior to and following creation of the lottery scholarship program.

PROGRAM OVERVIEW

The Tennessee Education Lottery Scholarship (TELS) program was designed to meet the unique needs of the state of Tennessee by incorporating the hallmark elements of existing merit-based aid programs in other states. Developed through a process involving elected officials and members of the academic community, the TELS program aims to address the following broad public policy objectives:

- Improve academic achievement in high school through scholarship incentive;
- Provide financial assistance as a means of promoting access to higher education;
- Retain the state's "best and brightest" students in Tennessee colleges and universities; and
- Enhance and promote economic and community development through workforce training.

The Tennessee Education Lottery began operations on January 20, 2004. Lottery proceeds fund scholarships for Tennessee students attending eligible public or private colleges and universities across the state. Initial qualification and renewal criteria for the program were set in 2003. The legislature adjusted the qualification criteria in 2005 and the renewal criteria in 2008. Additionally, the legislature added a Non-traditional Student Grant and Dual Enrollment Grant in 2005 and several smaller provisions in 2006 and 2008.

Pursuant to Public Chapter 1142, which was signed into law in July 2008, the most significant policy changes to the program since inception were implemented in Fall 2008. One of the reforms was a provisional method for maintaining the award after the student attempted 72 credit hours. Additionally, the law approved an expansion of the Non-traditional Student Grant. If a student is age 25 or over, has an adjusted gross income of \$36,000 or less, and has never attended or has been away from college for two years, he or she can become eligible for a Non-traditional Student Grant by completing 12 hours of collegiate coursework with a minimum 2.75 cumulative GPA.

In addition to changes in the scholarship programs, the state has also made lottery-funded grants available to veterans of the Global War on Terror, students pursuing degrees in math and science education, and students who pursue medical education with the intention of serving a rural health shortage area. Also in 2008-09, the state used a combination of lottery reserve earnings and other non-recurring revenues to provide \$10 million so that 5,000 additional students could receive Tennessee Student Assistance Awards (TSAA), which provide grants to financially needy undergraduate students who are residents of Tennessee.

Program Qualification and Renewal Criteria

The TELS program comprises several distinct scholarship awards, each with its own set of eligibility requirements (**Table 1**). The Wilder-Naifeh Technical Skills Grant was designed to address the final goal in the list of public policy goals above and is available to any state resident enrolled in a certificate or diploma program at a Tennessee Technology Center (TTC). All other lottery scholarships and awards require students to achieve a certain high school grade point average (GPA), standardized test score (ACT or SAT), or both.

While initial eligibility criteria differ by award, the renewal criteria are consistent across the three largest award types (HOPE, GAMS, ASPIRE): students must have a minimum cumulative 2.75 college GPA after attempting 24 and 48 credit hours. At each 24-hour checkpoint after that, students may renew the award by maintaining a 3.0 cumulative GPA or by achieving a cumulative 2.75 with a 3.0 GPA in the prior semester. The award is available for up to five years or baccalaureate degree attainment, whichever comes first.

	HOPE (base)	GAMS	ASPIRE (HOPE with need supplment)	Access Award	Wilder-Naifeh Technical Skills Grant	
Amount (4-yr.)	\$4,000	\$5,000	\$5,500	\$2,750	N/A	
Amount (2-yr.)	\$2,000	\$3,000	\$3,500	\$1,750	\$2,000	
Minimum High School GPA	3.00 3.75		3.00	2.75	N/A	
Minimum ACT Composite	or 21 and 29		<u>or</u> 21	<u>and</u> 18-20	N/A	
Family Adjusted Gross Income	N/A	N/A	\$36,000 or less	\$36,000 or less	N/A	
College Retention GPA		- Cumulative 2.75 lative 3.0 at 72, 96	Cumulative 2.75 at 24 hours	Satisfactory		
		a - Cumulative 2.7 ars with 3.0 prior s		allows qualification for HOPE	academic progress	

Table 1							
Tennessee Education Lottery Scholarship Eligibility and Renewal Criteria, 2009-10							

While the programs listed above account for the majority of students and funding in the lottery scholarship program, several other grants and scholarships initiated since 2004 now serve as

components of the overall program. These include the Non-traditional Student Grant, Foster Child Grant, and Dual Enrollment Grant.

Detailed analyses on the Wilder-Naifeh program are available in the Wilder-Naifeh Technical Skills Grant Program Report, published separately.

Program Size and Scope

The TELS program has grown steadily since its inception in 2004-05, reaching maturity with five classes of students in 2007-08. Monetarily, the program grew from expending \$93.4 million in its initial year to \$259.9 million in 2008-09. It is estimated that program expenditures for 2009-10 will be \$287.5 million. Enhanced by a new class of freshman students each year as well as the addition of a Dual Enrollment Grant for high school students, the number of students served grew from 40,000 in the program's inaugural year to 88,000 in 2008-09 (**Table 2**).

Source: Tennessee Student Assistance Corporation (TSAC) year-end report

The distribution of TELS recipients by postsecondary system in 2008-09 shows that colleges and universities in the Tennessee Board of Regents (TBR) system enrolled the largest share of scholarship recipients (49 percent of the total), with 27 percent attending a TBR university and 22 percent attending a community college (**Table 3**). Students attending a University of Tennessee (UT) campus represented 22 percent of all scholarship recipients. More than 13,000 recipients, or 15 percent of all awardees, attended private non-profit institutions that are members of the Tennessee Independent Colleges and Universities Association (TICUA).

Table 3Distribution of Scholarship Recipients and Dollars by System, 2008-09

	Stud	lents	Allocations			
	Number	Percent	Dollars	Percent		
UT System	19,365	22%	\$74,973,576	29%		
TBR 4-Year	24,309	27%	\$95,727,154	37%		
TBR 2-Year	19,393	22%	\$24,989,454	10%		
Independents	13,015	15%	\$49,808,943	19%		
Technology Centers	13,017	15%	\$13,892,296	5%		
Private/Business	138	<1%	\$521,969	<1%		
Total	89,237	100%	259,913,392	100%		

Note: *Students might have enrolled in more than one system over the course of the year. Source: TSAC year-end report

Since award amounts differ depending on the sector attended, the dollar share exceeds the student share in certain sectors, including UT, TBR universities, and independent institutions. The reverse is true of community colleges and technology centers.

The percentage of students attending college with a lottery scholarship has remained steady over the past several years. Sixty-three percent of state resident first-time freshmen attended Tennessee public institutions on a lottery scholarship in Fall 2009 (**Figure 1**). The percentage of students on scholarship was higher at universities than at community colleges, 92 percent of freshmen at UT and 79 percent at TBR Universities as compared to 38 percent at community colleges. **Appendix A** further disaggregates these figures by institution over time from 2004-2009.

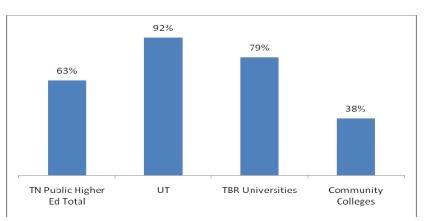

Figure 1 Percentage of Fall 2009 Freshmen Attending Public Postsecondary on a Lottery Scholarship

*Tennessee resident first-time freshmen who were 19 or younger; public institutions only. HOPE, GAMS, ASPIRE, and Access awards only.

Recipient Demographics

This section describes lottery scholarship receipt by student gender, race/ethnicity, family income, and postsecondary sector attended. The analysis is limited to the General Assembly Merit Scholarship (GAMS), HOPE, ASPIRE, and Access awards.

The composition of recipients within the various lottery scholarship programs has remained fairly steady since the program's inception. Percentages of students by gender, race/ethnicity and postsecondary sector have remained relatively unchanged. Only the percentage of students in various family income brackets has changed slightly. Highlights are summarized below, accompanied by data tables.

Scholarship Recipients by Gender

- Female recipients constitute approximately 57 percent of first-time freshmen¹ and 59 percent of all recipients (**Table 4**).
 - Female students also have comprised about 59 percent of total headcount within Tennessee postsecondary higher education over the life of the lottery scholarship program.

¹ In this report, unless otherwise specified, first-time freshmen were defined as students who enrolled for the first time in a given fall term or a preceding summer term and returned in the fall.

	2004	2005	2006	2007	2008	2009
Female First-Time Freshmen	56%	58%	57%	56%	56%	57%
Male First-Time Freshmen	44%	42%	43%	44%	44%	43%
Female All Recipients	58%	60%	60%	59%	59%	59%
Male All Recipients	42%	40%	40%	41%	41%	41%

Table 4Lottery Scholarship Receipt by Gender

Source: THEC SIS

Scholarship Recipients by Race/Ethnicity

The proportions of recipients by student race/ethnicity have remained fairly steady since the inception of the lottery scholarship (**Table 5**).

- Caucasian students have consistently comprised between 83-86 percent of first-time freshmen and 85-87 percent of all recipients.
- African American students currently represent 12 percent of first-time freshmen and 10 percent of all recipients.
- Native American, Asian, Hispanic and students of multiple races have accounted for between 4-6 percent of first-time freshmen and all recipients over the life of the program.

These results are further disaggregated by postsecondary sector and institution in **Appendix B**.

Table 5Lottery Scholarship Receipt by Race/Ethnicity

	2004	2005	2006	2007	2008	2009
African American First-Time Freshmen	12%	10%	11%	12%	12%	12%
Caucasian First-Time Freshmen	84%	86%	85%	83%	84%	83%
Other First-Time Freshmen*	4%	4%	4%	6%	4%	5%
African American All Recipients	11%	9%	9%	9%	9%	10%

Other All Recipients*	4%	4%	4%	5%	4%	5%

Note: *Includes Native American, Asian, Hispanic, and students of multiple races. Students whose ethnicity is unknown are excluded.

Source: THEC SIS

Scholarship Recipients by Postsecondary Sector

The share of recipients by postsecondary sector has varied slightly since the beginning of the lottery scholarship program.

- While the public four-year sector's share of freshman TELS recipients has remained relatively steady from Fall 2004 to Fall 2009, this sector gained four percentage points in its share of total recipients, from 62 to 66 percent (**Table 6**). The inverse is true of recipients at public 2-year institutions.
- The independent sector's share of scholarship recipients has remained relatively steady.

These results are further disaggregated by postsecondary sector and institution in **Appendix C**.

	2004	2005	2006	2007	2008	2009
Public 4-year First-Time Freshmen	63%	63%	61%	62%	62%	61%
Public 2-year First-Time Freshmen	22%	20%	23%	23%	22%	23%
Independent First-Time Freshmen	15%	17%	16%	15%	17%	17%
Public 4-year All Recipients	62%	65%	65%	67%	67%	66%
Public 2-year All Recipients	21%	17%	17%	17%	15%	16%
Independent All Recipients	17%	18%	18%	17%	18%	18%

Table 6Lottery Scholarship Receipt by Postsecondary Sector

Source: THEC SIS

Scholarship Recipients by Family Income

Scholarship applicants must complete the Free Application for Federal Student Aid (FAFSA). This enables THEC to analyze lottery recipients by family income. A unique element of Tennessee's merit program is that recipients from families with adjusted gross income (AGI) of \$36,000 or less qualify for a need-based supplemental award of \$1,500. Students from families that meet this income criterion accounted for 27 percent of all first-time freshmen TELS recipients in Fall 2009 (**Table 7a**).

- The share of freshman TELS recipients from families with an annual income higher than \$96,000 increased by eight percentage points between 2004 and 2009.
 - Though this may be an indication that more wealthy students are qualifying for the awards, it is also important to note that AGI is not adjusted for inflation, which may influence the increased share of students from upper income families.
- The proportion of all recipients with an AGI of \$96,000 or more has also consistently remained higher than the proportion of freshmen recipients with \$96,000 or more (**Table 7b**). The share of these students has risen steadily over time, indicating higher scholarship renewal rates by this group.

These results are further disaggregated by postsecondary sector and institution in **Appendix D**.

Adjusted Gross Income (AGI)	2004	2005	2006	2007	2008	2009
\$12,000 or less	7%	6%	6%	6%	6%	7%

HOPE and ASPIRE Recipients by Academic Preparation

Table 8a shows average high school GPAs and ACT scores for the Fall 2009 first-time freshman recipients, by scholarship type and qualification standards met. The table reveals that the levels of academic aptitude of HOPE and ASPIRE recipients are relatively similar within each qualification standard, indicating that gaps in academic preparation are more visible across the qualification standards.

Table 8a Average High School GPA and ACT Score, Fall 2009 First-time Freshman Scholarship Recipients, by Qualification Standards Met and Scholarship Type

	HO	PE	ASPIRE		
Qualification Met	ACT	GPA	ACT	GPA	
Both GPA and ACT	24.7	3.6	24.6	3.6	
GPA Only	18.0	3.4	17.5	3.4	
ACT Only	24.5	2.1	24.8	2.2	

Source: THEC SIS

Table 8b indicates the various ways in which the Fall 2009 freshman class qualified for the HOPE and ASPIRE awards: meeting the high school GPA standard, meeting the ACT standard, or both.² This analysis only includes students who received the HOPE and ASPIRE awards, as they are the only students who can qualify using either high school GPA or ACT. Results are shown for each award type and are broken down by gender and race/ethnicity. **Appendix E** further disaggregates these results by postsecondary sector and institution.

² Only students for whom both ACT and high school GPA were reported are included in this analysis. Of Fall 2007 first-time freshmen, 92 percent of students are included in the analysis. Of Fall 2008 first-time freshmen, 97 percent of students are included in the analysis.

Student Preparation for HOPE and ASPIRE Combined. Looking across both award types, 57 percent of Fall 2009 first-time freshman recipients met the high school GPA *and* ACT criteria for initial eligibility (Table 8b). An additional 27 percent qualified solely based on high school GPA. Another 16 percent qualified on the basis of their ACT score only.

- While Caucasian students were more likely to meet both criteria than were African American students (61 percent compared to 32 percent), African Americans were much more likely to qualify solely on the basis of high school GPA alone (53 percent to 23 percent). Caucasian and African American students were similar in their likelihood to qualify by meeting only the ACT standard.
- Among students who qualified by meeting only one standard as opposed to both, females were more likely to qualify on the basis of high school GPA standard, while males were more likely to qualify on the basis of an ACT composite score.
- Examining scholarship qualification methods by race and gender, Caucasian females were the group most likely to meet both standards; African American females were the group most likely to qualify on the basis of high school GPA only; and African American males were the group most likely to qualify based on the ACT standard only.

Student Preparation for HOPE. Within the basic HOPE award, the percentage of Fall 2009 first-time freshmen meeting both initial eligibility criteria was higher than the scholarship program overall (i.e. HOPE and ASPIRE combined) – 59 percent as compared to 57 percent. Another 24 percent qualified based on high school GPA only, and 16 percent qualified only on the basis of their ACT score.

• The percentage of Caucasian recipients who met both criteria exceeded the percentage of African American recipients meeting both criteria by 25 points (62 percent compared to 37 percent). Alternatively, 46 percent of African American recipients qualified for HOPE by meeting the high school GPA requirement alone, compared to 22 percent of Caucasians.

Student Preparation for ASPIRE. Within the need-based ASPIRE award, 50 percent of Fall 2009 firsttime freshmen met both initial eligibility criteria, 9 percentage points lower than the HOPE award. Another 35 percent qualified based on high school GPA only, and 15 percent qualified only on the basis of their ACT score.

• The percentage of Caucasian recipients who met both criteria exceeded the percentage of African American recipients meeting both criteria (57 percent compared to 28 percent). Alternatively, African American recipients were more than twice as likely as Caucasians to have qualified by meeting the high school GPA requirement only (60 percent to 27 percent).

SCHOLARSHIP RENEWAL

This section of the report presents lottery scholarship renewal rates. First is an examination of scholarship renewal rates for each award type, then for different levels of family income and high school academic performance.

When reading the ensuing narrative, it is important to keep in mind the following distinction: for scholarship recipients who entered the program in Fall 2004, the program's inaugural year, the ACT composite score requirement was 19. In Fall 2005, the ACT standard was raised to 21, which is the current requirement.

While initial eligibility criteria differ by award, the renewal criteria are consistent across the four basic award types (HOPE, GAMS, ASPIRE, and Access). Renewal criteria changed in Fall 2008 to provide more students the opportunity to renew their awards. Students must have a minimum cumulative 2.75 college GPA after accumulating 24 and 48 credit hours. At each 24-hour checkpoint after that, students may renew the award by maintaining a 3.0 cumulative GPA or by achieving a cumulative 2.75 with a 3.0 GPA in the prior semester. The award is available for up to five years or baccalaureate degree attainment, whichever comes first.

Scholarship Renewal

First to Second Year Scholarship Renewal Rates

Table 9 shows freshman-to-sophomore renewal rates for five cohorts of scholarship recipients: students who entered as first-time freshmen in Fall 2004, Fall 2005, Fall 2006, Fall 2007 and Fall 2008.

Overall Scholarship Renewal Rates

- First-to-second year renewal rates have consistently hovered between 50 and 55 percent. The renewal rate of the most recent entering cohort (Fall 2008 cohort) was 55 percent.
- Scholarship renewal rates vary significantly by program, with the GAMS award having the highest renewal rates, followed by HOPE and then the need-based ASPIRE award.
- The scholarship renewal rate in the public two-year sector for the HOPE is slightly higher than ASPIRE; HOPE and ASPIRE scholarship renewal rates differ by 9 to 11 percentage points within four-year institutions.

HOPE Scholarship Renewal Rates

- Within the basic HOPE award, Fall 2008 freshmen renewed awards the following fall at a rate of 55 percent, as compared to 53 percent for the prior cohort.
- By sector, the rates were 61 percent for independent institutions, 56 percent for public universities, and 46 percent for community colleges. The scholarship renewal rate in the public two-year sector for the HOPE increased by seven percentage points over the prior cohort.

Table 9Scholarship Renewal Rates by Award Type and Initial Postsecondary Sector Attended
(TELS First-time Freshmen Fall 2004 through Fall 2008)

Note: *Indicates original cohort size for a given sector was less than 100. Source: THEC SIS

General Assembly Merit Scholarship Renewal Rates

The initial eligibility requirements for the GAMS award are the most rigorous of all TELS award types. Within the GAMS award:

- Fall 2008 freshmen renewed awards the following fall at a rate of 90 percent.
- By sector, the rates were 90 percent for public universities and independent institutions, consistent with the rates for prior cohorts. The renewal rate of community college students was 84 percent, a substantial increase from the previous year. It should be noted, however, that the number of first-time community college GAMS students was relatively small.

ASPIRE Scholarship Renewal Rates

HOPE and ASPIRE carry the same initial eligibility requirements except that the family income of ASPIRE recipients must be below \$36,000 annually. As seen in Tables 8a and 8b, ASPIRE students are more likely to be less prepared academically than HOPE students. Within this need-based award:

- Fall 2008 freshmen renewed awards the following fall at a rate of 47 percent, as compared to 44 percent in the prior cohort.
- By sector, the rates were 50 percent for independent institutions, 47 percent for public universities, and 44 percent for community colleges. Community colleges experienced the most growth in renewal rates among ASPIRE students.

Access Award Renewal Rates

The Access program provides a reduced award to needy students (AGI \$36,000 and below) who had a high school GPA of 2.75 to 2.99 *and* an ACT score of 18-20, thus not quite meeting the academic criteria in high school for the HOPE award with ASPIRE supplement. Though this is a one-time award, recipients who satisfy the requirements for postsecondary performance receive ASPIRE going forward. As the program is quite small, with just a few hundred students per cohort, renewal rates are sensitive to minor variations in the number of students in either the numerator or denominator of the fraction. Within the Access program:

- Fall 2008 freshmen renewed awards the following fall at a rate of 24 percent, as compared to 15 percent in the prior cohort.
- By sector, the rates were 16 percent for public universities and 32 percent for community colleges. The number of Access students in the fall 2008 cohort at independent institutions was relatively small, thus making the Access renewal rates for independent institutions susceptible to fluctuation.

These results are further disaggregated by postsecondary sector and institution in Appendix F.

Cumulative Scholarship Renewal Rates (Table 10)

By the Fall 2009 term, all Fall 2004 first-time freshmen had exited the TELS program after five years of participation, and Fall 2005 first-time freshmen had progressed to their final year of scholarship eligibility. As of Fall 2009:

- The second year renewal rate for Fall 2008 freshmen was 55 percent;
- The third year renewal rate for Fall 2007 freshmen was 46 percent;
- The fourth year renewal rate for Fall 2006 freshmen was 38 percent; and
- The fifth-year renewal rate for Fall 2005 freshmen, excluding graduation rate, was 15 percent.

The rate at which TELS recipients obtained at least an associate's degree by the end of 2008-09 was 47 percent for the fall 2004 cohort, including those who lost scholarship eligibility before attaining a degree.

These results are further disaggregated by postsecondary sector and institution in **Appendix G**.

Impact of Change in Renewal Criteria in 2008

In order to renew their scholarship prior to Fall 2008, students had to maintain a 2.75 cumulative GPA after their first 24 credit hours and a 3.0 cumulative GPA in subsequent years. In 2008, Public Chapter 1142 altered the renewal criteria, requiring students now to maintain a 2.75 cumulative GPA after 24 and 48 credit hours and either a 3.0 cumulative GPA at subsequent 24 hour benchmarks *or* a 2.75-2.99 cumulative GPA with a 3.0 semester GPA in the previous term. As a result, more students renewed their awards in 2008 than in previous years.

- For the TELS program as a whole, prior to the 2008 changes, cumulative scholarship renewal in the third year had averaged 39 percent and in the fourth year had been 33 percent. Following the statutory changes, third year renewal average increased by 5 percentage points to 44 percent and fourth year renewal average increased by 5 percentage points to 38 percent.
- For basic HOPE, following the 2008 changes, cumulative scholarship renewal in the third year also increased by 6 points to 46 percent and third-to-fourth year renewal increased by 6 points to 39 percent. Because the HOPE program is the largest of the award types, overall renewal rates tend to mirror the HOPE renewal rate.
- For GAMS, which carries the most stringent criteria for initial eligibility and has the highest renewal rates, only slight increases in renewal rates were seen in Fall 2008, with a four percentage point increase in the previous two years' average of 82 percent from second to third year, and a one point increase from third to fourth year.
- For the need-contingent ASPIRE, following the 2008 changes, third year cumulative scholarship renewal also increased by 5 percentage points, and fourth year renewal average increased by six percentage points over the previous cohort.
- No increases were observed in renewal rates for the Access award.

Family Income and Scholarship Renewal

Data from the FAFSA make it possible to analyze the relationship between family income and postsecondary performance outcomes. As family income rises, so does the likelihood of maintaining a TELS award. This relationship proceeds in linear fashion across all award types. Variations within the GAMS and Access awards are likely due to the small number of students within each band of family income.

First to Second Year Scholarship Renewal Rates

- Scholarship renewal tends to increase as family income increases.
 - Overall, there was a difference of 20 percentage points in award renewal rates between the highest and lowest income group (**Table 11**).
 - HOPE students from families earning over \$96,000 renewed their awards at a 59 percent rate, compared to 44 percent for ASPIRE students from families earning \$12,000 and below.

Table 11Scholarship Renewal Rates by Award Type and Family Income*:Fall 2008 First-time Freshmen Who Renewed Award in Fall 2009

	HOPE	GAMS	ASPIRE	ACCESS	Total			
\$12,000 and below	Student	s receive	44%	25%	43%			
12,001-24,000		or Access	46%	23%	44%			
24,001-36,000	ASPIRE	JI ACCESS	51%	26%	49%			
36,001-48,000	49%	92%			51%

Sources: THEC SIS and TSAC FAFSA data

Cumulative Scholarship Renewal Rates by Income

- The gap in scholarship renewal by income has persisted over time. This analysis covers only HOPE and ASPIRE students, as their qualification criteria are equivalent, but their income levels vary, as may the student's actual qualifications.
 - For Fall 2004 first-time freshmen, there is a difference of 14 percentage points between students from the lowest and highest income groups who renewed in their second year (**Table 12**).
 - For third year renewal rates, the gap is 15 percentage points and the linear relationship remains. The gap remained at 15 percentage points as students move to their fourth year.

	HOPE and ASPIRE Students Only													
	Year 1	Year 2	Year 3	Year 4	Year 5	Obtained Degree* Within 5 Years

High School Preparation and Scholarship Renewal

High school preparation and performance are important predictors of college academic success. Students who perform better academically in high school tend to perform better at the postsecondary level. Grade point averages and ACT scores are widely accepted measures of secondary achievement. The TELS program acknowledges the importance of each of these academic indicators by requiring that students meet either the high school grade point average or ACT requirement to gain eligibility for most program awards. Tennessee's requirement that students meet one standard rather than both makes its merit scholarship more accessible than programs in many other states.

Table 13 shows the percentage of Fall 2008 first-time freshmen who renewed their scholarship from their first to second year. The table allows comparison of the renewal rates associated with the manner in which students qualified for an award: meeting the high school GPA standard only, meeting the ACT standard only, or both. Results are shown for different award types and are broken down by gender and race/ethnicity. This analysis only includes students who received the HOPE and ASPIRE awards, as they are the only students who can qualify using *either* high school GPA or ACT.

Renewal Rates for HOPE and ASPIRE

- Looking across both TELS award types, scholarship renewal rates were highest for students who qualified on the basis of both academic criteria.
- For Fall 2008 first-time freshmen who met both academic criteria for initial eligibility, the Fall 2009 scholarship renewal rate for the TELS program overall was 64 percent: 66 percent for basic HOPE and 59 percent for the need-based ASPIRE.
- Scholarship renewal rates were generally higher for females than for males. Looking at scholarship renewal by race and gender, Caucasian females had the highest renewal rates of any group.

• Scholarship renewal rates were generally higher for Caucasian students than for African American students.

HOPE Scholarship Renewal Rates

- Within the basic HOPE award, the scholarship renewal rate for Fall 2008 first-time freshmen was 66 percent for students who qualified by meeting both academic criteria, 48 percent for students who qualified solely on the basis of high school GPA, and 23 percent for students who qualified by ACT score alone.
- Fall 2008 freshman HOPE students were more likely to renew their scholarship if they qualified by high school GPA alone than by ACT alone.
- Renewal rates among Fall 2008 first-time freshman HOPE students ranged from a high of 71 percent for Caucasian females who met both the high school GPA and ACT standards to a low of 19 percent for African American males who qualified on the basis of ACT score alone.

ASPIRE Scholarship Renewal Rates

- Within the need-based ASPIRE award, the scholarship renewal rate for Fall 2008 first-time freshmen was 59 percent for students who qualified by meeting both academic criteria, 41 percent for students who qualified solely on the basis of high school GPA, and 21 percent for students who qualified by ACT score alone.
- Fall 2008 freshman ASPIRE students were more likely to renew their scholarship if they qualified by high school GPA alone than by ACT alone.
- Renewal rates among Fall 2008 first-time freshman ASPIRE students ranged from 62 percent for Caucasian females who met both the high school GPA and ACT standards to 16 percent for African American males who qualified on the basis of ACT score alone.

COLLEGE RETENTION

Having presented the rates at which students renew lottery scholarship awards, the report now describes the rates at which lottery recipients are retained in college. The chapter is divided into three sections.

- <u>Cumulative College Retention</u>. Based on longitudinal tracking of a cohort of TELS freshmen who entered college in each year of the lottery scholarship:
 - The data show how many students from an original TELS freshman cohort were retained in college into their second, third, fourth and fifth year of college.
 - The data also describe how many from the original cohort continued in college, with and without their TELS award.
 - This results in a comprehensive picture of the college retention rates and scholarship renewal rates for these students in their sophomore, junior, senior, and fifth years of college.
- <u>Shifts between Postsecondary Sectors by Persisters and Forfeiters</u>. For those students who stayed in school, a comparison is made between students who did so with and without the scholarship in order to examine enrollment shifts by postsecondary sector. For students who did not renew their scholarship, a comparison is made between students who stayed in college and those who left, examining differences in their family income and sector of initial enrollment.
- <u>College Graduation</u>. As of the end of the 2008-09 academic year, the first full class of lottery scholarship recipients had progressed through their fifth year, including graduation for many. This analysis examines Fall 2004 first-time freshmen who began and ended their college careers at University of Tennessee and Tennessee Board of Regents institutions.
 - The data show how many students from the original TELS freshman cohort graduated with a bachelors degree within five years.
 - The data also describe how many from the original cohort graduated from college, either with or without their TELS award.

Cumulative College Retention

The fall-to-fall college retention rate of the Fall 2008 TELS cohort was 85 percent (**Table 14**), slightly higher than the previous year's cohort (82 percent). The growth in retention rate coincided with the change in scholarship renewal rate, which increased by two percentage points.

Looking at each cohort in the most recent year for which data were available, the following observations can be made about college retention:

- Cumulative college retention rates do not vary more than a few percentage points from cohort to cohort. Students are staying in college at about the same rate regardless of changes in scholarship renewal rates. This indicates the scholarship is not the primary factor in the decision to remain in school for most students.
- Overall: The latest college retention rate for TELS recipients overall -- those who renewed awards and those who did not -- was 85 percent in their second year, 75 percent in their third year, 68 percent in their fourth year, and 48 percent in the fifth year of college, excluding graduates.
- HOPE: The latest college retention rate for HOPE recipients was 86 percent in the second year, 77 percent in the third year, 71 percent in the fourth year, and 50 percent in the fifth year.
- GAMS: The latest college retention rate for GAMS recipients was 97 percent in the second year, 94 percent in the third year, 94 percent in the fourth year, and 54 percent in the fifth year.
- ASPIRE: The latest college retention rate for ASPIRE recipients was 81 percent in the second year, 68 percent in the third year, 59 percent in the fourth year, and 44 percent in the fifth year.
- Access: The latest college retention rate for Access recipients was 75 percent in the second year, 51 percent in the third year, 51 percent in the fourth year, and 40 percent in the fourth year.

Note: Due to the absence of data on non-TELS students in independent institutions, these results are for Tennessee public institutions only. Source: THEC SIS

As compared to students who did not participate in lottery scholarship programs, TELS students are retained in college at a higher rate. **Figure 2** compares Fall 2004 first-time freshman TELS and non-TELS students at public institutions. For TELS recipients, retention in the second year of college exceeded that of non-recipients by 25 percentage points. Degree attainment within a five-year period was 30 points higher for TELS recipients.

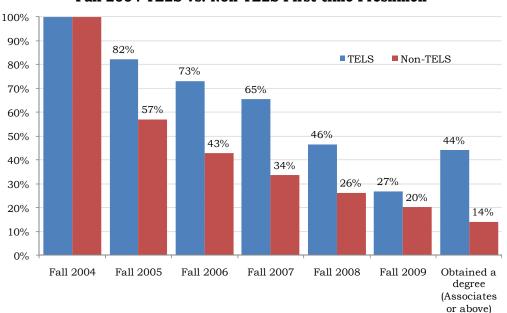

Figure 2 College Retention of Fall 2004 TELS vs. Non-TELS First-time Freshmen³

Note: TELS students who lost scholarship but continued enrollment are reflected in the retention rates of TELS students

Source: THEC SIS

³ Tennessee resident, first-time freshmen, recent high school graduates

Among students who enrolled on TELS in Fall 2008 as first-time freshmen in Tennessee's public higher education system, did not renew the scholarship a year later, but remained enrolled:

- TBR 2-year institutions gained the largest proportion of such students. Community colleges' enrollment share among this group increased from 26 percent to 38 percent.
- UT campuses lost the largest enrollment share of such students, from 32 percent to 25 percent.
- TBR universities' share of such students decreased by 5 percentage points.

These results suggest that among students who lose their scholarship, there is some migration from the four-year to the two-year sector, perhaps due to a combination of financial and academic reasons.

In contrast, the subsequent enrollment patterns for students who renewed their award are in the anticipated direction, as students begin to transfer out of community colleges into the public and independent four-year sectors (**Table 16**).

Table 16Postsecondary Sector Enrollment Shifts:Fall 2004 through Fall 2008 TELS First-time Freshmen who Began at a Public Institution,

Source: THEC SIS

Among students who enrolled on TELS as first-time freshmen, renewed the scholarship a year later, and remained enrolled within Tennessee's public postsecondary system:

- UT institutions gained the largest proportion of students (5 percentage points).
- Community colleges lost the largest share of students (5 percent), an unsurprising result since students routinely begin in the 2-year sector with the intention of moving on to a four-year institution.
- TBR universities' enrollment share among this population remained stable.

Students who remained in school after losing their TELS award were more likely to come from higher income families. Nearly two-thirds of Fall 2008 TELS first-time freshmen from the highest family income group who did not renew their scholarship returned to school. Among such students from the lowest income families, the rate of students returning to college was only 64 percent, a difference of 13 percentage points (**Table 17**).

of Fall 2008 TELS first-time public freshmen who remained enrolled but did not renew scholarship in Fall 2009 /# of Fall 2008 TELS first-time public freshmen who did not renew scholarship in Fall 2009 Sources: THEC SIS and TSAC FAFSA data

College Graduation

First-time freshmen who began their college careers in Fall 2004 and Fall 2005 would have had five or four years, respectively, to complete a bachelors degree by Spring 2009. The following analysis examines:

- Total degree production for students within the TELS program; and
- Cohort based bachelor's degree graduation rates of Fall 2004 first-time freshmen.

The analysis only includes students who began and ended careers within the University of Tennessee and Tennessee Board of Regents university systems. Graduation rates for students who began and ended careers in independent (TICUA) institutions are not available.

Total TELS Degree Production

Almost 26,000 TELS students had attained at least associate's degrees by the end of Spring 2009. Of these graduates, 66 percent graduated with their scholarship intact **(Table 18)**. Sixty-eight percent of graduates who began at UT graduated with their TELS award, as compared to 65 percent of graduates who began at TBR universities. For TICUA institutions, seventy percent of graduates kept scholarships throughout their undergraduate career.

Fall 2004 Freshman Cohort Graduation Rates

Overall, 48 percent of Fall 2004 first-time freshman TELS students who began at UT campuses, TBR universities, or TICUA institutions obtained a bachelor's degree within five years. Approximately two-thirds of those did so with their scholarship intact **(Table 20)**.

Table 20Fall 2004 First-time Freshmen who Graduated within Five Years, by System

Among Fall 2004 first-time freshman TELS recipients who enrolled within Tennessee's public university system:

- Students who began at UT and TICUA institutions graduated at a higher rate than those who began at TBR institutions. Students who began at UT and TICUA on TELS were equally likely to graduate within five years.
- Students who began at UT and TICUA institutions graduated with their TELS awards at a higher rate than those who began at TBR institutions. A little more than one in three students who began at UT and TICUA on TELS graduated with their TELS award within five years.
- Overall, 31 percent of Fall 2004 entering freshmen graduated five years later with their TELS award intact.

GAMS recipients were most likely to graduate within five years and to graduate with their award intact, followed by HOPE recipients, ASPIRE recipients and Access recipients respectively **(Table 21)**.

Source: THEC SIS

- GAMS students graduated within five years at the highest rate and were more likely to graduate with their scholarship than students with any other lottery awards. Of students who began at UT, TBR universities, and TICUA institutions, 73 percent of those who began with GAMS graduated within five years and 88 percent of GAMS graduates did so with their award.
- HOPE students were 15 percentage points more likely to graduate within five years. HOPE graduates were slightly more likely to graduate with their award intact within five years than were ASPIRE graduates, 64 percent as compared to 60 percent of graduates.
- Access students were the least likely to graduate within five years and the least likely to graduate with their award intact. Only 25 percent of Access students graduated by Spring 2009. Overall, only 33 percent of Access graduates graduated with their award by Spring 2009.

BEST AND BRIGHTEST: AN EXAMINATION OF STUDENT ENROLLMENT PATTERNS SINCE CREATION OF THE LOTTERY SCHOLARSHIP

One of the goals of the Tennessee Education Lottery Scholarship program is to retain the state's "best and brightest" students in Tennessee's colleges and universities. Progress has been made toward this goal since the program's inception, with benefits largely localized to the University of Tennessee and the state's private non-profit institutions.

Figure 3 indicates that the lottery years have seen a continuation and acceleration of a trend toward selection of in-state institutions. In Fall 2008, 85.4 percent of Tennessee recent high school graduates enrolled in state institutions, up from 82.2 percent in Fall 2002. Though not shown in the figure, the out-of-state institutions that have lost the greatest market share among Tennessee high school graduates have been Master's level institutions and universities classified as having High Research Activity.⁴

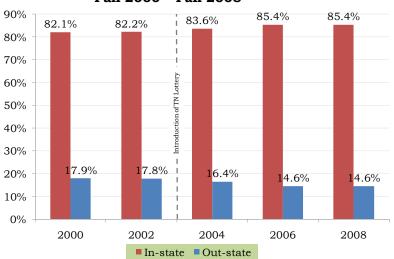

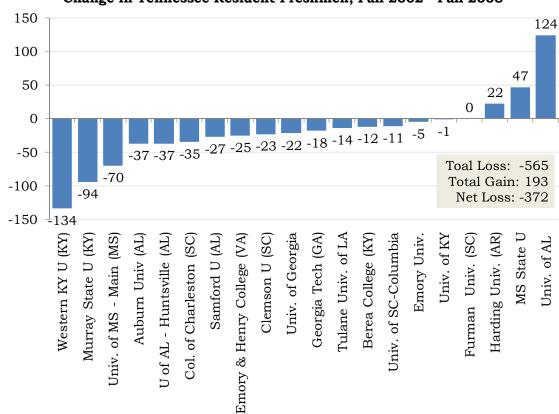

Figure 3 Destination of Tennessee High School Recent Graduates, In-State vs. Out-of-State Institutions, Fall 2000 – Fall 2008

Note: *First-time freshmen who graduated from high school during the past 12 months. Source: IPEDS Residence and Migration Survey, National Center for Education Statistics

⁴ These institutional categories refer to the Carnegie Classification of 2005 and are based on research activity and the number and level of degrees awarded. See <u>www.carnegiefoundation.org/classifications</u> for details.

Figure 4 shows the downward trend in enrollment by Tennessee recent high school graduates in the 20 out-of-state institutions that enrolled the largest number of Tennessee high school graduates in Fall 2002. On net, these institutions lost a total of 372 recent high school graduates from Tennessee between Fall 2002 and Fall 2008. Most of these institutions are moderately- to non-selective public universities near the Tennessee border.

Note: *First-time freshmen who graduated from high school during the past 12 months. Source: IPEDS Residence and Migration Survey, National Center for Education Statistics **Figure 5** illustrates that the enrollment increases by Tennessee high school graduates have translated into an improved freshman class academic profile at one public institution -- the University of Tennessee Knoxville, where the average entering freshman ACT rose from 23.9 in Fall 2001 to 25.1 in Fall 2009. Average ACT scores at the University of Memphis decreased in 2003 and 2004 but have increased steadily each year since the lottery scholarship. At other types of public institutions, the average ACT scores of freshman state residents have also slightly increased. **Appendix H** includes a breakdown of ACT scores over time for every in-state institution.

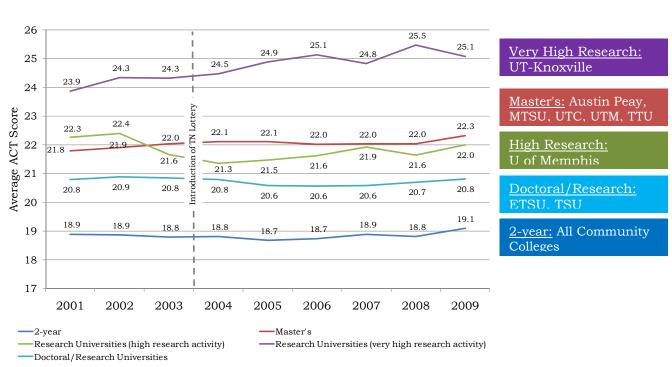

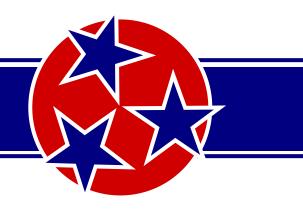

Figure 5 Average ACT Composite Score of Tennessee Resident First-time Freshmen, 19 and Under, by Carnegie Classification, Fall 2001 - Fall 2009

Note: These institutional categories refer to the Carnegie Classification of 2005 and are based on research activity and the number and level of degrees awarded. See <u>www.carnegiefoundation.org/classifications</u> for details. Source: THEC SIS

To date, the impact of the lottery scholarship on enrollment growth has not been dramatic, though enrollment shifts between sectors are discernible – in broad terms, away from community colleges and certain out-of-state institutions toward the University of Tennessee and private non-profit institutions. Furthermore, the brain drain reversal has been dramatic at certain out-of-state institutions near Tennessee's borders. In closing, the lottery scholarship's potential benefits in terms of boosting successful participation in postsecondary education are likely to be enhanced by recent policy developments at the secondary level: the State Board of Education's adoption of more rigorous curricular requirements for high school graduation; and the rapid acceleration of dual enrollment participation, aided by the lottery scholarship's Dual Enrollment Grant.
