# Tennessee County Higher Education Profiles 2010: Technical Notes

The **Tennessee County Higher Education Profiles 2010** provide basic information with respect to higher education for each county in Tennessee. The 2010 **Profiles** represent the fourth year for this report. In the demographic and enrollment sections, a few changes were made to better meet the needs of policymakers. This document explains those changes.

The **Tennessee Higher Education County Profiles 2010** employed the U.S. Census Bureau's American Community Survey (ACS) as the data source to provide current demographic information each Tennessee county. Specifically, the following indicators utilize the ACS:

- Percent of Adult Population with High School Diploma or Higher (Age 25 and up)
- Percent of Adult Population with Associates Degree or Higher (Age 25 and up)
- Percent of Adult Population with Bachelors Degree or Higher (Age 25 and up)
- Degree Attainment of Younger Adults Relative to Older Adults
- Percent of Population in Poverty (18-64 Year Olds)
- Median Family Income
- Per Capita Personal Income

The ACS essentially contains the same survey questions as the long-form decennial census, but it takes place every year with a smaller sample size<sup>1</sup>. Unlike the decennial census, however, ACS cannot release annual estimates for counties whose population is less than 65,000. Many Tennessee counties do not have a population over 65,000. Therefore, for last year's report, we applied regional averages to 75 out of 95 counties. This year, regional averages were applied to only 31 counties because three-year averages are now available for each sampling area. With three-year averages, we are now able to show statistics for individual counties with a population more than 20,000. Thus this year's report displays three year (2006-08) averages for the indicators listed above. Readers may notice that some counties show substantial disparities in these indicators relative to last year. Much of this difference can be explained by the change in the geographical unit of analysis for small counties. The picture below shows the level of data available for each county in the 2008 and 2009 **Profiles**. The 2010 **Profiles** use the same data.

<sup>1</sup> ACS surveys three million households every year

## PUMA Regions

1. Part of Sullivan county is under the PUMA region of Hawkins county
2. Part of Sumner county is under the PUMA region of Wilson county
3. Part of Hamilton county is under the PUMA region of Marion county
