

#### ACCREDITED SECONDARY SCHOOL UNITED STATES.

The lists of accredited secondary schools which are presented now for the fourth time in this bulletin are designed to meet the needs of officers charged with the admission of new students to secondary schools, colleges, universities, professional a hools (especially schools of law and medicine), normal schools, etc.; of State examining "and certifying boards, which are concerned with the status of secondary schools located at a distance; and of parents who may want to know about the high schools of any particular State or section,

The first issue of the bulletin was published in 1913. The introduction to the second bulletin, published in 1915, called attention to the fact that the great annual increase in the number of secondary schools (in 1911-12 there were 13,268; in 1915-16 the number had grown to 14,206; in 1917-18 is reached 16,009), together with the sudden changes in standing, generally for the better of many secondary schools in all parts of the country, make frequent revisions of the lists desirable. It was therefore the purpose of the Bursou of Education to revise the bulletin every two years, but on account of the many other pressing matters engaging the attention of the persons responsible for the preparation of the bulletin during and immediately following the war, it was not possible to carry out this purpose, and the present revision is the first which has been made since 1916.

The lists here presented show many changes in the way of schools added to or dropped from previous lists. The accrediting agencies represented, however, remain the same, except that, because of the almost universal practice of the State accrediting bolies in extending their inspection and accrediting of secondary schools to cover private as well as public high schools, Part III of the preceding bulletin, containing the accredited line of certain private institutions, has been omitted. The arrange. ment of the byfletin is substantially unchanged. The essential parts of the introductions to the previous issues are reprinted here.

# ACCREDITED SECONDARY SCHOOL DEFISED.

An /accredited secondary school," as the term is used in this bulletin, is a school whigh is equipped to prepare students for colleges requiring 15 units for unconditioned alfnission and which has been investigated or approved for this purpose by one of the following agencies: A State officer of education, a university or college inspector or committee on admissions, an officer or committee of an accrediting association. Except in the case of certain of the Southern States, whose high-school courses are based upon seven years of elementary training, it is understood that these 15 units represent secondary work above the standard eight-grade elementary-school course-It is assumed that the curriculum of an accredited school represents four years of 36 or more weeks each; that at least three teachers give their whole time to high-school work, 1 and that the school keeps up an adequate library and laboratory equipment.

\* Exceptions are certain schools in the lists of Georgia, Kansas, Kentucky, Nebraska, North De and Tennessee, which do not conform in every particular to the definition, but are approved by the State officials, 1 -1

### ACCREDITED SECONDARY SCHOOLS.

It will therefore be apparent that the only close correspondence among the requirements of the various institutions mentioned in this pumphlet is the quantitative one. All specify 15 units, except the Universities of Delaware and Maine, which admit with 14 and 141, respectively. None requires more than 16 units for admission.

The requirements of each accrediting agency are briefly stated at the head of the list of schools which each accredite. At the head of each list of schools accredited by a State university are summarized the requirements for admission to the A. B. course. The schools on the accredited list generally have the privilege of certificating students to other courses as well. To outline the admission requirements for all these courses would consume much space and might lead to confusion. The requirements for admission to the A. B. course may in each case be considered fairly typical of the institution's policy with respect to entrance requirements.

### METHODS OF ACCREDITING.

Two methods are in common use for carrying on the system of accrediting in those States where the State authority embraces agencies for higher education. Under the first, the inspection of the work of the high schools is done through an officer or committee of the State university, and the list of acceptable or accredited high schools is published in the catalogue of the university and thus made available for other institutions within the same State or for institutions in neighboring States. Under the second, the inspection and rating are done by the State superintendent of public instruction, the State board of education, or the State education office, acting through specially appointed officers. Examples of the former method are furnished by the Universities of California, Nebraska, and Wisconsin; of the latter method, by the States of New York, Ohio, and Minnesota.

The requirement of the completion of a standard four-year high-school course representing 15 units for admission to college, or as a part of the prescription for admission to professional schools or to the practice of professions, has produced a group of organizations among whose activities are the coordination of standards of secondary education in neighboring States and the compilation of lists of accredited secondary schools. Such sectional organizations are now at work in the North Central States, New England, and the Southern States. These organizations are purely voluntary and have no legal control over the institutions which they rate. The influence which they wield, however, because of the fact that they focus representative educational opinion in their respective sections, is considerable. Occasionally also private institutions, like the University of Chicago, have carried on their own investigation and accrediting.

### CONTENTS OF THE BULLETIN.

### PART I: STATE LISTS.

The bulletin is divided into two parts. The first part, as is appropriate, contains lists of schools accredited by State universities and State officers of education. Sometimes both the State university and the State department of education publish lists of accredited schools. In such cases the list of the State university is printed first, and all schools accredited by the State education department not included in the university list are then added by way of supplement.<sup>3</sup> When the State department of education or the State university publishes lists of accredited or approved high schools of different grades, only schools of the first grade are included in the bulletin,

<sup>1</sup> In six States, Florida, Louisiana, Minnesota, North Dakota, Ohio, and West Virginia, the State education departments accredit or approve only public schools, but private schools having the requisite standards and equipment are accredited in the State universities.

W

#### ACCREDITED SECONDARY SCHOOLS.

10

except in the case of California, Georgia, Kansas, Kentucky Nebraska, North Dakota, and Tennessee 4

PART II: LISTS OF ACCREDITING ASSOCIATIONS.

Part II contains the lists of the three principal associations which undertake to accredit schools. The methods or standards of these associations are not identical. The list accredited by each is preceded by a statement of the basis upon which it is compiled.

The schools are listed alphabetically, according to the towns in which they are located. The names of accredited private secondary schools and academies are printed in italics.

## Part I.-STATE LISTS.1

### ALABAMA.

Schools approved by the Department of Education of Alabama and accredited by the University of Alabama for the year 1920-21.

# Part II.—LISTS OF SCHOOLS ACCREDITED BY VARIOUS ASSOCIATIONS.

# COMMISSION OF THE ASSOCIATION OF COLLEGES AND SECONDARY SCHOOLS OF THE SOUTHERN STATES.

The minimum standard for accrediting shall be:

(a) No school shall be accredited which does not require for graduation the completion of a four-year high-school course of study embracing 15 units as defined by this association. A unit represents a year's study in any subject in a secondary school, constituting approximately a quarter of a full year's work. More than 20 periods per week should be discouraged.

(b) The minimum scholastic áttainment of three-fourths of all secondary school teachers of academic subjects in any accredited school on the southern list shall be equivalent to graduation from a college belonging to the Association of Colleges and Secondary Schools of the Southern States, or a college approved by the commission. Teachers should have had professional training or one year's experience.

(c) The number of daily periods of class instruction given by any teacher should not exceed five periods per day; and the commission will scrutinize with extreme care any school in which instructors teach as many as six daily periods.

 (d) The laboratory and library facilities shall be adequate for the needs of instruction in the courses taught. The library should have 500 volumes exclusive of duplicates and Government publications.

(e) The location and construction of the buildings, the lighting, heating, and ventilation of the rooms, the nature of the lavatories, corridors, water supply, school furniture, apparatus, and methods of cleaning shall be such as to insure hygicnic canditions for both pupils and teachers.

(f) The efficiency of instruction, the acquired habits of thought and speech, the general is tellectual and moral tone of a school are paramount factors; and, therefore, only schools which rank well in these particulars, as evidenced by rigid, thorough-going, systematic inspection, shall be considered eligible for the list.

(g) The commission will decline to consider any school whose teaching force consists of fewer than four teachers of academic subjects giving their full time to high-school instruction. When local conditions warrant the infroduction of the so-called vocational subjects, such as agriculture, manual training, household arts, and commercial subjects, the commission will hold that a sufficient number of teachers and proper equipment must be added to provide adequately for such instruction.

(i) All schools whose records show an excessive number of pupils per teacher, as based on the average number belonging, even though they may technically meet all other requirements, will be rejected. The association recognizes 30 as maximum.

\*

## Schools accredited for the year 1921.

[Where no name of a school follows the name of a town, a high school is to be understood.]

# NORTH CENTRAL ASSOCIATION OF COLLEGES AND SECONDARY SCHOOLS,

The following constitute the standards for accrediting secondary schools for the year 1921-22:

A. BUILDINGS.

Standard 1. The location and construction of the buildings, the lighting, heating, and ventilation of the rooms, the nature of the locations, corridors, closets, water supply, school furniture, apparatus and methods of cleaning shall be such as to insure hygienic conditions for both pupils and teachers. All schools whose buildings are inexcreably inadequate and lacking in modern equipment may expect to have North Central Association accrediting privileges withheld from them. The Standard 2. The approximation according to the indequate to the needs of instruction in the subjects taught.

#### B. OBGANIZATION AND ADMINISTRATION.

Standard 3. A.—No school shall be accredited which does not require 15 mills for graduation. A unit course of study in a secondary school is defined as a course covering as deadenic year that shall include in the aggregate not less than the equivalent of one hundred and twenty 60 minute hours of classroom work, two hours of shop or laboratogy work being equivalent to one hour of propared classroom work. More than 20 periods per week of academic subjects, or 25 periods, including vocational subjects, exclusive of choral nussic and physical training, should be discouraged except in the cases of pupils having more than average ability.

B .- The school year shall consist of a minimum of 36 weeks.

88

Standard 4. The off wency of instruction, the acquired habits of thought and study, the general intellectual and moral tone of a school are paramount factors, and therefore only schools which rank well in these particulars, as evidenced by rigid, thorough-going, sympathetic inspection, shall be considered eligible for the list.

Standard 6. No school shall be easter be every schedule is not sufficient to command and retain teachers whose qualifications are such as required by this association. The interpretation of this requirement shall be a matter of special responsibility for the State committee.

#### C. PREPARATION OF TEACHERS.

Standard 6. All teachers teaching one or more academic subjects must satisfy the following requirements: **A.**—The minimum attainment of teachers of any academic subject shall be equivalent to graduation from a college belonging to the North central Association of Colleges and Secondary Schools requiring the completion of a four-year course of study or 120 semester hours in advance of a standard four-year high school course. Such requirements shall not be construed as retreactive.

B.—The minimum professional training of teachers of any academic subject shall be at least 11 semester hours in education. This should include special study of the subject matter and pedagocy of the subject to be faught. Such requirements shall not be construed as retroactive. (For the succeeding year the board will interpret courses in education as the same courses are interpreted by the colleges or universities offering them.)

The association advises that the following types of courses should be offered as meeting the spirit of this standard: Educational psychology, principles of secondary education, theory of teaching, special methods in subjects taught, observation and practice teaching, history of education and educational sociology. In the case of supervisors (and for the present transitional period only) the asconation will, in applying

this standard, take into consideration the roord of their teaching and administrative experience.

### D. THE TEACHING LOAD.

 Standard 7. A. -The number of daily periods of classroom instruction given by any teacher shall not exceed five. The commission will reject all schools having more than six recitation periods per day for any teacher.

B.-The minimum length of a recitation period shall be 40 minutes, exclusive of all the time used in the changing of classes or teachers.

For interpreting this standard in connection with laboratory work in science, and in connection with study room supervision, a double period may be cointed as the equivalent of one classroom exercise for teachers of academic subjects, provided that  $\eta \rho$  combination of such work amounting to more than 35 periods a weak be required of any teacher.

For schools having some definite plan of supervised study, not more than five classes per day should be assigned to any teacher. The association advises that the maximum be four.

Standard 8. No schools whose records show an excessive number of pupils per teacher based on average standarce shall be accredited. The association recommends 25 for a maximum. In general, no teachers of academic subjects should be assigned more than 160 student hours of classroom instruction per day.
