CHAPTER I.

STATISTICAL SURVEY OF EDUCATION, 1919-20.

Statistics of schools for the year 1919-20 have appeared in separate bulletins, as follows:

- Statistics of State School Systems, Bulletin 1922, No. 29.
- Statistics of City School Systems, Bulletin 1922, No. 17.
- Statistics of Kindergartens, Bulletin 1922, No. 22.
- Statistics of Universities, Colleges, and Professional Schools, Bulletin 1922, No. 28.
- Statistics of Teachers' Colleges and Normal Schools, Bulletin 1922, No. 8.
- Statistics of Public High Schools, Bulletin 1922, No. 37.
- Statistics of Private High Schools and Academies, Bulletin 1922, No. 9.
- Statistics of Private Business and Commercial Schools, Bulletin 1922, No. 4.
- Statistics of Nurse Training Schools, Bulletin 1921, No. 51.

The statistical survey which follows includes a general summary of the statistics, showing the enrollment in public and private schools and institutions of various types, the estimated expenditures for those schools in 1919-20, the distribution of teachers among those schools, and certain combined statistics of public and private high schools reported separately to the bureau by the high schools. It includes, also, tables showing the total enrollment by States, distributed in public and private elementary, secondary, and higher educational institutions.

Graphs have been added to portray certain statistical material from the several bulletins.

SCHOOL ATTENDANCE BY YEARS OF AGE.

Attendance at public and private schools in 1920 was more general among children 11 years of age than among persons of any other age. Statistics of population and school attendance by years of age from

FIG. 1.—Per cent of children attending school at the various ages in 1920 and in 1910. (Taken from the report of the Bureau of the Census.)

5 to 20, taken from reports of the Bureau of the Census, are contained in Table 49 of the bulletin on State School Systems. The per cent of attendance for each year of age in 1920 given in that table and the corresponding per cent for 1910 taken from reports to the Bureau of the Census for that year are shown by the curves in Figure 1.

Among children 12 years old in 1920 attendance was a trifle more general than among children 10 years old, and among those aged 13 a little more general than among those aged 9. The increase in proportion of children attending school between the ages of 6 and 16, which is evident by comparing the curves for 1920 and 1910, is probably due to improvements in legislation regarding compulsory school attendance and in enforcement of existing laws. For ages 16 to 20 the curves vary but slightly, with some decrease in per cent of attendance in 1920 compared with 1910.

STATE SCHOOL SYSTEMS.

The per cent of all pupils in public elementary and secondary schools who were enrolled in high schools in 1920 was 10.2, as compared with 6.7 per cent in 1915 and 5.1 per cent in 1910.

The average number of days attended by each pupil enrolled was the same in 1920 as in 1915, namely, 121.2 days. In 1910 the average number was 113 days.

The per cent of school population in daily attendance, as shown in Figure 4, was computed from the number of pupils in average daily attendance as shown in Table 7 of the bulletin on State school systems. The term "pupils attending" refers wherever used to "pupils in average daily attendance."

In Figure 6 is shown a comparison of the length of term provided for white pupils with the length of term provided for colored pupils in public elementary and secondary schools in certain States which reported separately statistics of schools for white children and of schools for colored children. The graph shows, also, the average number of days attended in schools for each race. The statistics on which the graph is based are found in Table 37 of the bulletin on State school systems. The States have been ranked according to the length of term provided in schools for white pupils.

Data for Figure 7 regarding the per cent of men teachers in public elementary and secondary schools in 1920 and 1910 are found in Table 12 of the bulletin on State school systems. The comparison of the per cents for the two years shown in Figure 7 is not strictly accurate, in that principals and supervisors were included with teachers in 1910, but were reported separately by some States in 1920. In 1910, therefore, the number of men principals and supervisors was included with the number of men teachers. For purposes of comparison with 1910 it was not possible for the year 1920 to add to the number of men teachers the number of principals and supervisors who were men, since principals and supervisors were not reported as to sex. The total number of principals and supervisors reported in 1920 is shown in Table 10 of the bulletin on State school systems.

The average value of school property for each pupil enrolled increased from \$95 in 1918 to \$112 in 1920.

Data for Figure 9, showing a percentage analysis of total revenue receipts, are found in Table 17 of the bulletin on State school systems, and data for Figure 11, showing a percentage analysis of total expenditures, are found in Table 22 of the same bulletin.

CITY SCHOOL SYSTEMS.

are found in Table 2 of the bulletin on city school systems. Figure 19, showing the distribution of cities according to the tax rate for all school purposes on the estimated true property value, is based on Table 3 of the bulletin on city school systems.

UNIVERSITIES, COLLEGES, AND PROFESSIONAL SCHOOLS.

According to Figure 21 more students were enrolled in 1920 in universities, colleges, and professional schools in New York than in any other State. Illinois and Pennsylvania were next in order. The data are taken from Table 6 in the bulletin on universities, colleges, and professional schools.

TEACHERS' COLLEGES AND NORMAL SCHOOLS.

Data for Figures 21-26 are found in Tables 5-18 of the bulletin on teachers' colleges and normal schools.

PUBLIC AND PRIVATE HIGH SCHOOLS.

Figure 27 shows the number of pupils in secondary grades of public and private high schools for each 1,000 of total population. The data for the graph have been compiled in Table 8 from the enrollment reported in the bulletin on public high schools and the bulletin on private high schools.

The total number of public high schools which reported for 1920 was 14,326, or 375 more than the number which reported in 1918. Since 1918, the first year in which statistics of junior high schools were reported separately to the bureau, the number of junior high schools reporting has increased from 557 to 883, an increase of 326 schools, or more than 58 per cent. The increase in the total number of schools between 1918 and 1920 is not due so largely to the increase in the number of junior high schools as is indicated by comparison of the statements above. Eight hundred and twenty-eight junior high schools were housed in the same buildings with senior and regular high schools and were not counted separately in the total number of schools. Forty-five independent junior high schools were counted separately in the total number of all high schools reporting.

The enrollment in junior-senior high schools shown in Table 19 of the chapter on public high schools does not include the enrollment in independent junior high schools, although pupils in those schools are under the junior-senior plan of instruction.

In 1920, 1,857,155 pupils were reported enrolled in public high schools, excluding pupils in the seventh and eighth grades of junior high schools. In the secondary grades of private high schools, 184,153 pupils were reported. Ninety-one per cent, therefore, of all pupils reported enrolled in secondary grades of public and private high schools in 1920 were enrolled in public high schools. This is almost the same as the corresponding per cent in 1918, namely 91.2. From 1918 to 1920 the enrollment in private high schools increased 16 per cent, and the enrollment in secondary grades of public high schools increased 12.9 per cent.

The number of private high schools reporting in 1920 was 2,093, or an increase of 35 over the number reporting in 1918. The number of public high schools was 87.3 per cent of the number of public and private high schools reporting in 1920. In 1918 it was 87.2 per cent.

In 1918 the average number of pupils to a school when public high schools of all types were considered was 124.4, and in 1920 the

FIG. 28.—Pupils to a teacher in regular and senior high schools and in junior high schools, 1919-20.

number was 139.5. The increase in the number of pupils to a school is due in part to the increase in the proportion of pupils in junior high schools from 6.1 per cent of the enrollment in all public high schools in 1918 to 9 per cent in 1920. In 1920 the average number of pupils to a school in junior high schools was 205; in regular high schools, 162; and in three-year senior high schools, 158.

In private high schools the average number of pupils to a school was 88 in 1920 and 77.1 in 1918.

In public high schools of all types the average number of pupils to a teacher in 1920 was 20.5. In regular and senior high schools the average number was 19.9, and in junior high schools, 28.1, as shown in Table 9. The statistics are shown graphically in Figure 28. In private high schools the average number of pupils to a teacher was 12.3.

The average number of teachers to a school in 1920 in public high schools of all types was 6.8 and in private high schools was 7.1.

In Table 10 is shown the enrollment by years of advancement of pupils in a public high school course of four years in 1920. From this table it follows that 39.5 per cent of the pupils enrolled were in the first year of the course; 26.6 per cent in the second year; 18.8 per cent in the third year; 14.7 per cent in the fourth year; and 0.4 per cent in postgraduate and special courses. Among the years of the course the enrollment of girls was more evenly distributed than the enrollment of boys, as shown by the following per cents:

The per cent of pupils in each year of the four-year course who were boys is as follows: First year, 46.5; second year, 44.4; third year, 42.9; fourth year, 41; postgraduate and special, 37.6.

In 1918, in the first year of a high-school course of four years, 614,776 pupils were reported. If this enrollment is divided into the enrollment in the third year in 1920 in a high-school course of four years, the result is approximately the per cent of pupils surviving, namely, 54.5. If the enrollment in the first year in 1919 is considered as 658,815, which is the average of the first year enrollment in 1918 and in 1920, and if that enrollment is divided into the enrollment in the second year of the course in 1920, the per cent surviving is 71.9. The per cent of pupils surviving to the fourth year of the course in 1920 is not available because the enrollment in a high-school course of four years was not reported earlier than 1918.

In 1920 the enrollment in a high-school course of four years in public high schools was 95.9 per cent of the enrollment in secondary grades of all public high schools.

The per cent of the total population enrolled in the secondary grades of public high schools, shown in Table 1, has increased from 1.56 per cent in 1918 to 1.76 per cent in 1920.

Of all public high schools reporting in 1920, 85.6 per cent were rural high schools. A rural high school is one supported by a State, a county, a township, or a district (not in the sense of a single school district), or by an independent village which had a population less than 2,500 in 1910. Union high schools are considered as rural. A high school in a city having a population of more than 2,500 and less than 10,000 is considered rural if it is supported by a rural taxing unit; that is, by a unit larger than that determined by the corporate limits of the city proper.

In Table 11 is shown the per cent of the population 18 years of age graduated from a four-year course in public and private high schools in 1920. The table is computed from the number of graduates from such a course reported in the bulletin on public high schools and the bulletin on private high schools.

The largest public high schools which reported in 1920, and the enrollments in them, were as follows:

- (1) Polytechnic Evening High (for boys), Los Angeles, Calif., enrollment, 7,380.
- (2) Stuyvesant High School (for boys), New York, N. Y., 6,334.
- (3) Morris High School (coeducational), New York, N. Y., 5,799.
- (4) Washington Irving High School (for girls), New York, N. Y., 5,283.
- (5) De Witt Clinton High School (for boys), New York, N. Y., 5,014.
- (6) High School of Commerce (for boys), New York, N. Y., 4,235.
- (7) Manual Training High School (coeducational), Brooklyn, N. Y., 4,224.
- (8) Boys' High School (for boys), Brooklyn, N. Y., 4,067.
- (9) Erasmus Hall High School (coeducational), Brooklyn, N. Y., 4,057.
- (10) Carl Schurz High School (coeducational), Chicago, Ill., 3,855.
- (11) Manual Arts High School (coeducational), Los Angeles, Calif., 3,586.
- (12) Commercial High School (for boys), Brooklyn, N. Y., 3,531.
- (13) Northwestern High School (coeducational), Minneapolis, Minn., 3,078.
- (14) Central High School (coeducational), Washington, D. C., 2,757.
- (15) English High School (for boys), Boston, Mass., 2,591.

Each of these schools includes only pupils above the elementary grades, since none of the schools is organized on the junior-senior plan.

NURSE TRAINING SCHOOLS.

The enrollment in nurse training schools, shown in Figure 29, is that of all the schools for the training of professional nurses reporting to the bureau in 1920, and includes the enrollment in schools in hospitals for the treatment of the insane, as given in Table 9 of the bulletin on nurse training schools.

CHAPTER II.

STATISTICS OF STATE SCHOOL SYSTEMS, 1919-20.

CONTENTS.—General survey—General statistical summary (Table 1)—Attendance (Tables 2-8)—School term (Table 9)—Teachers and officers (Tables 10 and 11)—Salaries and percentage of men teachers (Table 12)—Schools and school buildings (Table 13)—School property (Tables 14 and 15)—Indebtedness (Table 16)—Receipts (Tables 17-21)—Expenditures (Tables 22-28)—Enrollment by school term (Table 29)—Enrollment by grades (Tables 30-33)—Attendance of colored pupils (Tables 34-45)—Population and school attendance compared (Tables 46-49).

The statistics presented herein were supplied by the various State offices of education for the school year 1919-20. Either a special report to the Bureau of Education was executed or the data used were taken from the printed State school report for that year. Unfortunately it was necessary to use figures for 1918-19 for Mississippi and Kentucky. Tables 46, 47, and 48 were taken from the reports of the United States Census Bureau for 1920. The figures in these tables are not comparable with the other data given in this report, since the census figures relate only to school attendance from September 1, 1919, to January 1, 1920, and they represent enrollment in both public and private schools. They contain no duplicate enrollments.

The statistics given relate in general to the public school system, including public kindergarten, elementary, and secondary schools. In no case have the statistics of higher educational institutions been included. The report includes the statistics of urban and rural schools combined. The public-school statistics include both white and colored pupils. In several tables statistics dealing only with colored schools are presented. Such statistics, however, are more or less incomplete, since many State offices of education do not make a complete separation of white and colored school statistics. The only statistics of private schools appearing herein relate to the enrollment in such schools. Wherever such data have been used their inclusion has been definitely indicated.

The statistics of the outlying possessions of the United States have been given in so far as they were reported, but they are not included in the totals for continental United States.

Significant changes since 1918.—Since 1918 the total public-school enrollment has increased from 20,853,516 to 21,578,316. The enrollment in public high schools advanced from 1,933,821 to 2,199,389. The average daily attendance increased from 15,548,914 to 16,150,035,

and the per cent of enrolled pupils in average daily attendance from 74.6 to 74.8.

The total number of teachers increased from 650,709 to 679,533, but the proportion of men teachers decreased from 16.1 per cent to 14.1 per cent. Probably through the movement for the consolidation of schools, the number of school buildings decreased from 276,827 to 271,319. The value of school property increased from \$1,983,568,818 to \$2,409,719,120. This increase was probably due in part to the increased value of property, since the amount spent for outlays in 1920 was only \$154,000,000, and the amount spent the preceding year was about \$136,000,000, making a total of almost \$290,000,000, and leaving \$136,000,000 to be accounted for by the excess of appreciation over depreciation.

The total expenditures for public-school education increased from \$763,678,089 in 1918 to \$1,036,151,209 in 1920, or an increase of over 35 per cent. The per capita expenditures, based on the total population, increased from \$7.26 to \$9.80. The per capita cost, based on the average daily attendance, increased from \$49.12 to \$64.16. The average annual salaries of teachers increased from \$635 to \$871, or more than 37 per cent.

The average length of the school term increased from 160.7 days in 1918 to 161.9 days in 1920. The average number of days attended by each pupil enrolled increased from 119.8 to 121.2 within the same period.

CHAPTER III.

CITY SCHOOL SYSTEMS, 1919-20.

CONTENTS.—Comparative summary of statistics—School terms, teachers, and enrollment—Expenditures—Detailed statistics of school terms, teachers, and enrollment—Kindergartens—Evening schools—Health and recreation, junior high schools—Receipts—Detailed statistics of expenditures and outlays—Bonds, taxation, and property.

This report presents the statistics of city public schools for the school year 1919-20. The cities have been divided into five groups: Group I, including all cities having a population of 100,000 or more; Group II, cities having a population of 30,000 or more but fewer than 100,000; Group III, cities with a population of 10,000 or more but fewer than 30,000; Group IV, cities with a population of 5,000 or more but fewer than 10,000; and Group V, all cities having a population of 2,500 or more but fewer than 5,000. This classification is based upon the population as reported by the Bureau of the Census in 1910; the figures for 1920 were not available in time for use in this connection.

For all cities not reporting, careful estimates have been made in compiling the summaries by States and also the grand summary constituting Table 1. This report contains detailed statistics only for cities having a population of 10,000 or more. The statistics of the smaller cities, i. e., those having a population of 2,500 or more but fewer than 10,000, are not shown in detail, but a brief summary is presented in Tables 19 to 22, inclusive.

TABLE 1.—Comparative summary of school statistics for the three groups of cities of 10,000 population and over, 1919-20.

[The grouping of these cities is based on the United States Census of 1910. Group I includes 50 school systems; Group II, 141 school systems; Group III, 419 school systems.]

| Items. | Group I. Cities of 100,000 population and over. | Group II. Cities of 30,000 to 100,000 population. | Group III. Cities of 10,000 to 30,000 population. | Groups I, II, and III combined. |

CHAPTER IV.

STATISTICS OF UNIVERSITIES, COLLEGES, AND PROFESSIONAL SCHOOLS, 1919-20.

CONTENTS.—Review of the statistics—Benefactions—Summaries of students—Summaries of degrees conferred—Property—Income—Instructors, students, and graduates in 1919-20 (detailed statistics)—Property, fellowships and scholarships, fees, (in detail)—Receipts from all sources.

INSTITUTIONS REPORTING.

This report presents the statistics of 670 universities, colleges, and professional schools for the school year 1919-20. Of this number 109 institutions are under public and 561 are under private control. Only 82 institutions reporting were independent professional schools. Altogether there were 104 schools of theology, 107 schools of law, 77 schools of medicine, 40 schools of dentistry, 53 schools of pharmacy, and 15 schools of veterinary medicine.

STUDENTS.

In all the institutions 521,754 students were enrolled, including 334,226 men and 187,528 women. Of these, 38,398 men and 20,911 women were in preparatory departments; 212,405 men and 128,677 women, in collegiate departments; 9,837 men and 5,775 women, in graduate departments; 53,295 men and 3,836 women, in professional departments, and 27,533 men and 38,326 women were registered as unclassified or special students. The public institutions enrolled 134,007 men and 61,869 women, and the private institutions 200,219 men and 125,659 women. Of the 586 universities and colleges reporting undergraduate students, 117 are exclusively for men and reported 49,847 students; 115 are exclusively for women and reported 31,769 students; and 354 are coeducational and reported 162,558 men and 96,908 women. The schools of theology enrolled 7,216 students; the schools of law, 20,992 students; the schools of medicine, 14,242 students; the schools of dentistry, 8,809 students; the schools of pharmacy, 5,026 students; and the schools of veterinary medicine, 908 students. The engineering schools enrolled 51,908 students. In addition to the figure given above 94,838 students attended summer schools; 9,240 students were enrolled for the short winter course; and 83,100 students were registered in extension and correspondence courses.

DEGREES.

The universities and colleges conferred 23,272 baccalaureate degrees on men and 15,280 on women. These institutions also conferred 3,457 graduate's degrees on men and 1,396 on women. The professional schools conferred 8,774 degrees distributed as follows: Schools of theology, 588; schools of law, 3,273; schools of medicine, 2,806; schools of dentistry, 865; schools of pharmacy, 1,023; and schools of veterinary medicine, 219. Altogether 989 honorary degrees were conferred. Included in the graduate degrees mentioned above there were 532 Ph. D. degrees, 439 being conferred on men and 93 on women.

PROPERTY.

The property of universities, colleges, and professional schools consists of grounds, educational buildings, dormitories, productive funds, libraries, scientific apparatus, machinery, and furniture. The value of the grounds was estimated at \$110,555,552; that of educational buildings, at \$355,733,981; that of dormitories, at \$69,393,142, and that of the library apparatus, machinery, and furniture, at \$110,847,727. The productive funds aggregated \$556,350,140. The total amount of benefactions received during the year was \$54,734,197. The total number of volumes in the libraries of universities, colleges, and professional schools was 24,191,204.

RECEIPTS.

The total receipts of universities, colleges, and professional schools for 1919-20 were \$240,141,994. If the amount added to endowment funds is excluded, the total receipts aggregate \$189,235,242. This amount was received from the following sources: \$40,103,503 from tuition fees; \$4,802,445 from rent of rooms; \$18,035,961 from charges made for board; \$26,165,860 from the income of productive funds; \$6,721,140 from the State or city for the increase of plant; \$46,100,051 from the State or city for current expenses; \$12,782,944 from the United States Government; \$7,274,401 from private benefactions for the increase of plant; \$7,105,006 from private benefactions for current expenses; and \$20,143,928 from all other sources. The total income of the public institutions was \$91,304,185 and that of the private institutions, \$148,837,809.

STATISTICS OF 1918 AND 1920 COMPARED.

Within the past two years the total number of students enrolled in higher educational institutions increased from 375,359 to 521,754; the number of professors and instructors, from 36,522 to 42,882; the number of baccalaureate degrees conferred, from 28,052 to 38,552; the number of graduate degrees conferred, from 3,480 to 4,853; the

amount of productive funds, from \$481,085,952 to \$556,350,145; and the total receipts, from \$153,801,555 to \$240,141,994. In the professional schools the number of students increased from 48,594 to 57,193, while the number of degrees conferred by these schools decreased from 9,863 to 8,774.

TEACHERS' COLLEGES AND NORMAL SCHOOLS, 1919-20.

CONTENTS.—Changes in the normal school list—Additions to endowment funds—Review of statistics of all normal schools and teachers' colleges—Review of statistics of teachers' colleges and State normal schools—Review of statistics of city and county normal schools—Review of statistics of private normal schools—Distribution of normal schools—Expenditures in 50 State normal schools and teachers' colleges—Detailed statistics of teachers' colleges—Detailed statistics of State normal schools—Detailed statistics of city and county normal schools—Detailed statistics of private normal schools.

This report presents the statistics of 371 teachers' colleges and normal schools for 1919-20. For the first time the list of teachers' colleges appears. It is composed of 46 institutions offering four years of work above the secondary school and granting degrees. The work offered in such schools is considered of collegiate grade and is of such importance as to merit separate and special treatment.

CHANGES IN THE NORMAL SCHOOL LIST.

I. Teachers' colleges:

In 1920, 46 institutions having a four-year course above the secondary school and granting a degree are classed as teachers' colleges. The list is composed of 4 institutions, formerly classed among colleges and universities; 37 institutions, among State normal schools; 4 institutions, among private normal schools; and 1 institution, among private secondary schools.

The four following institutions were formerly included among colleges and universities:

- Greeley, Colo., Colorado State Teachers College.
- Cedar Falls, Iowa, Iowa State Teachers College.
- Albany, N. Y., New York State College for Teachers.

CHAPTER VI.

STATISTICS OF PUBLIC HIGH SCHOOLS, 1919-20.

CONTENTS.—Preliminary survey—Summary of statistics of public high schools from 1890-1920 (Table 1)—Summary of statistics of public high schools from 1907-1920 (Table 2)—Teachers in public high schools (Tables 3-8)—Pupils enrolled (Tables 9-21)—Pupils in military drill (Table 22)—Graduates (Tables 23-28).

Statistics of public high schools for 1920, contained in the following pages, include statistics of secondary schools which are controlled by publicly elected or appointed boards of education. Statistics for 1920 of other secondary schools, which are considered as private high schools or academies, are contained in Bulletin, 1922, No. 9.

Statistics of junior high schools are included so far as reported. In States having only seven grades in the elementary schools, pupils in the first year of the junior high school, corresponding to the sixth year of the elementary school, have not been included. Only those two-year junior high schools have been included which were reported in connection with regular high schools. Two-year junior high schools organized separately were considered as resembling departmental organization of elementary grades too closely to be included with junior high schools.

A junior-senior high school, having either the 2-4 plan or the 3-3 plan of organization, has been counted as one school in the number of all high schools reporting. Under either plan of organization the junior portion of a junior-senior school has been counted in the number of junior high schools, and under the 3-3 plan of organization the senior portion has been counted in the number of senior high schools. The senior portion of a junior-senior high school organized on the 2-4 plan has been included with regular high schools. A regular high school is one not organized on the junior, senior, or junior-senior plan.

The statistics have been tabulated to show the enrollment and the number of teachers in regular high schools grouped according to the number of years in the high-school course. To find the number of pupils in a high-school course of four years, the number of pupils in senior high schools and the number of pupils in the third year of three-year junior high schools have been added to the number of pupils in regular four-year high schools. To find the number of teachers instructing those pupils, corresponding groups of teachers should be added together, but full information is not available. The num-

ber of teachers in regular four-year high schools and the number of teachers in senior high schools are given in the following pages. The number of teachers of pupils in the third year of three-year junior high schools (corresponding to the first year in regular high schools) and the proportion of teaching time given to such pupils by teachers who also instruct pupils in the first and second years of such high schools were not reported.

The statistics have been tabulated to show also the number of pupils, of teachers, and of graduates of all public high schools, grouped according to the population of the communities in which they are located. The first group consists of schools in cities of 100,000 population, the second group, of schools in cities, towns, and boroughs having a population of 2,500 to 99,999, and the last group, of schools in rural and village communities. A high school in a rural or village community is a school supported by a State, a county, a township, or a district (not in the sense of a single school district), or by an independent village which had a population less than 2,500 in 1910. Union high schools are considered as rural. A high school in a city, town, borough, or village, having from 2,500 to 9,999 population, has been grouped with the high schools in rural communities, if it is supported by a rural taxing unit, that is, by a unit larger than that determined by the corporate limits of the city proper. A school with this type of support has not been grouped with rural high schools, if it is located in a city having 10,000 population or more, because it is probable that such a city would influence strongly the curriculum of the school and would contribute a large part of its support.

Financial statistics of the high schools have not been tabulated, because other studies of public high school expenditures for approximately the same period have been issued by this bureau.

Of the outlying possessions, reports of high schools in Porto Rico only were received.

Survival percentages, in Table 2, have been computed as follows: The enrollment in the first year of the course at a given date, e. g., 1911, was divided into the enrollment in the second year of the course in the year following, namely, 1912; into the enrollment in the third year of the course in 1913; and into the enrollment in the fourth year in 1914. This method disregards the percentage of retarded pupils, but the percentages of retardation for the several years of the course differs but slightly.¹ Duplication in the enrollment in the years of the course is probably about equal. Since the number of deaths within the high-school ages, 14 to 18, is counterbalanced approximately by the increase in enrollment due to immigration, these factors have been disregarded also.

CHAPTER VII.

PRIVATE HIGH SCHOOLS AND ACADEMIES, 1919-20.

The following tables present the statistics of 2,093 private high schools and academies in the continental United States and of 4 such schools in Hawaii and Porto Rico. Throughout the summary tables the totals for the United States do not include the statistics of these 4 schools in the outlying possessions. No reports from private high schools and academies were received from Nevada, Alaska, Canal Zone, or the Philippine Islands. Tables 1, 2, and 3 contain historical comparative data for five-year periods from 1890 to 1920. More detailed summary tables were given for 1900 to 1918 in the corresponding report on private high schools and academies for 1917-18. Prior to 1890 the statistics of public and private high schools were not kept separately. Tables 4 to 10, inclusive, show distributions of schools according to significant data, while Tables 11 to 19, inclusive, contain summaries of such data as could be totaled.

CHAPTER VIII.

PRIVATE COMMERCIAL AND BUSINESS SCHOOLS, 1919-20.

This report presents the statistics of 902 private commercial and business schools reporting in 1920. Only 12 more schools reported in 1920 than in 1918. In addition to these, there were 380 other schools of this character which did not submit a report. Of the 902 schools reporting, 841 were nondenominational commercial schools and 61 were controlled by some religious denomination. The total number of instructors in these schools increased from 5,240 in 1918 to 6,165 in 1920, and the number of students enrolled, from 289,579 to 336,032, or over 16 per cent, within the same period. The enrollment in the day schools increased from 182,614 to 214,606, and in the night schools from 106,965 to 121,426 in the same period. The average daily attendance increased from 79,675 to 103,388 and that in the night schools from 43,013 to 61,274 during the biennium. Considerable gain is shown for the enrollment in the commercial course, the percentage being almost 54. On the other hand the enrollment in the stenographic course decreased over 17 per cent. This tendency should not be misconstrued, since war demands in 1918 caused the enrollment of stenographic students to increase over twofold over that reported in 1916. The combined course exhibited a gain of about 10 per cent from 1918 to 1920. During this period the number of students in wire telegraphy dropped 43 per cent, and the number studying wireless telegraphy, 21 per cent. Students in accountancy increased 87 per cent, in secretarial courses 66 per cent, and in salesmanship 280 per cent. Thus it is seen that the commercial or bookkeeping, the accountancy, the secretarial, and the salesmanship courses show significant increases, while the stenographic and telegraphic courses have declined.

CHAPTER IX.

NURSE TRAINING SCHOOLS, 1919-20.

This report contains summaries by States, but no detailed statistics of individual schools. Such statistics were published in Bureau of Education Bulletin, 1918, No. 73, and only slight changes have occurred since that document was printed.

SCHOOLS IN OUTLYING POSSESSIONS.

Although statistics were requested from nurse training schools in all our outlying possessions, the only reports received from them were from two schools in Porto Rico. The nurse training school of St. Luke's Memorial Hospital, at Ponce, reported 21 nurse pupils, 5 graduates, 60 beds, and 40 patients daily on an average. The minimum age for admission is 16 years, and eighth-grade education is required. The nurses have nine hours of duty daily, and the length of the course offered is three years. The remuneration granted for each year of the course is \$60.

The nurse training school of the Presbyterian Hospital, at San Juan, reported 34 pupils, 7 graduates, 65 beds, and 64 patients on an average. The minimum age for admission is 17 years, and the minimum educational requirement is one year of high-school work. Nine hours of duty are required daily, and the course offered covers a period of three years. The remuneration given to the nurse pupils is \$48, \$72, and \$120 for the first, second, and third years of the course, respectively. The statistics contained in the tables do not include these figures.

TUITION.

Of the 1,755 nurse training schools reporting, only 46, or 2.6 per cent, charge any tuition whatever. Forty-five of these schools specify a tuition fee for the first year, and 14 charge a fee for the second and the third year. Thus it is seen that 69 per cent of the nurse training schools charging a tuition in the first year of the course discontinue such charge after the first year. One school, contrary to the usual rule, specifies a tuition fee for the second and third years only. The tuition the first year ranges from \$7 to \$96, and that for the second and third years from \$12 to \$60. The tuition rates, however, are not especially significant, since 29 of the 46 schools charging tuition grant a remuneration also in the first year, and the schools charging a tuition fee in the second and third years grant a remuneration as

well, with but a single exception. In the 29 schools giving a remuneration in the first year, and also specifying a tuition fee, all but one grant a remuneration as high or higher than the tuition rate. Consequently, only 18 schools charge a tuition fee in the first year in excess of the remuneration. In the second and third years of the course the remuneration equals or exceeds the tuition fees in all the 14 schools except one. It may be concluded, therefore, that tuition fees when specified are usually offset by an equal or greater remuneration.

CHAPTER X.

STATISTICS OF KINDERGARTENS, 1919-20.

The following tables present in summarized form the statistics of public and of private kindergartens for the various States. The detailed statistics which are summarized in Tables 3 and 4 are given for individual cities and towns in the report on statistics of city school systems for 1919-20. It was not thought desirable to separate the detailed statistics of kindergartens from the statistics of elementary, high, and vocational schools in these cities, since such separation would destroy the unity and completeness of the city school report. The detailed statistics of public kindergartens in cities having a population less than 10,000, and those of private kindergartens, are not printed elsewhere. This summarized report is prepared for the use of those who are interested in the statistics of kindergartens for the country as a whole and for the individual States. Corresponding statistics for 1917-18 appear in Bulletin No. 31, 1920.
