

HANDBOOK

OF COLLEGE ENTRANCE REQUIREMENTS • Bulletin 1941, No. 13

By William W. Hinckley

Federal Security Agency • • • Paul V. McNutt, *Administrator*

U. S. OFFICE OF EDUCATION • John W. Studebaker, *Commissioner*

Handbook of College Entrance Requirements

WITH PUBLICATION of this handbook there is furnished a compilation of entrance requirements of the liberal arts colleges and universities in the United States, as of the commencement of the fall semester, 1940. Its value should be primarily to guidance authorities of high schools and colleges, and to teachers whose assistance is sought by students preparing for college.

The 674 institutions studied are those listed under "Universities and Colleges" in the *Educational Directory, 1940* published by the U. S. Office of Education. Consequently, while the professional schools, teachers colleges, normal schools, junior colleges, and Negro institutions are not included, tabulation for the "Universities and Colleges" group is complete.

This particular table of college entrance requirements cannot, of course, treat certain less tangible aspects of college entrance. For instance, no effort is made here to analyze the important effect that tuition charges and scholarship funds have in determining who enters college. The methods of any given college which elects to impose more stringent standards for one sex than for the other in a given year in order to maintain a previously determined ratio between men and women students is the kind of subject falling beyond the scope of this present study.

The purpose of this bulletin does not encompass a survey of the trends of college entrance requirements, important as that phase is. Such an analysis of trends may well be undertaken at a later time, using the facts made available by this present study and comparing the findings with those of previous studies made by the U. S. Office of Education.

Certain facts relevant to trends of college entrance requirements over a 30-year period have, nevertheless, become easily discernible during the course of the current study. The facts cited below have been revealed in part by comparing the data in the present study with those in the studies of 1912, 1922, and 1931:¹

- (1) With the high-school unit as defined in 1909 as a standard of measurement of the work done in secondary schools, 98 percent of the institutions of higher education require from

¹ The three earlier studies of college entrance requirements made by the U. S. Office of Education were: Kingsley, Clarence D. *College entrance requirements*. Washington, U. S. Government Printing Office, 1913. (Bureau of Education Bulletin 1913, No. 7.) McKown, Harry Charles. *The trend of college entrance requirements*. Washington, U. S. Government Printing Office, 1926. (Bureau of Education Bulletin 1924, No. 36.) Brammell, P. Roy. *Articulation of high school and college*. Washington, U. S. Government Printing Office, 1933. (Office of Education Bulletin 1932, No. 17, Monograph No. 10.)

- applicants the submission of a transcript of high-school units. No other entrance criterion is so universally used.
- (2) Between 1912 and 1922 there was an increase in the proportion of colleges requiring 15 units for college entrance from 57 to 89 percent; and by 1940, the 34 percent of the institutions which in 1912 required 14 and $14\frac{1}{2}$ units had either increased their requirements to 15 or 16 units or done away entirely with the idea of stating a specific number of required units. In 1940, 77 percent of the colleges specified 15 units as necessary for college entrance and 17 percent demanded 16 units.
 - (3) In 1922 all institutions were definite as to the number of high-school units they required for college entrance. In 1940, 5 percent of the colleges and universities did not ask any particular number of units although some of these asked to see the high-school transcript of units.
 - (4) In general the number of units required in specific fields of high-school study is tending downward. A smaller proportion of colleges and universities in 1940 required a definite number of English, mathematics, foreign language, science, and social science units than at any time since the U. S. Office of Education studied entrance requirements at the inauguration of the unit system.
 - (5) The use of standardized college aptitude, intelligence, and high-school achievement tests began after the World War; and to-day, with the more general acceptance of their value in predicting the chances of college success, intelligence test ratings are required for admission by 35 percent and college aptitude tests by 34 percent of the institutions.
 - (6) In 1912, 1 percent; in 1922, 11 percent; in 1931, 26 percent; and in 1940, 41 percent of the colleges based their selection of who should go to college in part on the applicant's rank in his high-school class.
 - (7) Consideration of health standards in determining college entrance has had a consistent growth from rare use in 1913 to use by 58 percent of the colleges and universities in 1940.

Just as this study is not a study of trends in college entrance requirements, neither does it make any effort to evaluate those entrance criteria which prevail most widely.

In preparing this handbook every effort has been made to make the data easily available to those who serve as guides and advisors to individual students as they prepare themselves to enter any given college.

Explanatory notes are so arranged that there is a set for each

institution where there are necessary facts which cannot be told in the table proper. The notes follow the table.

For instance, the cross in column 2 opposite Alabama College at Montevallo means that students can be accepted through two or more alternate plans of admission. The exponent digit 1, above the cross, refers to the first explanatory note under Alabama College at the end of the table. According to the explanatory note there are three avenues by which the student may qualify for admission to the college. He may qualify primarily through meeting certain requirements relating to units taken in high school, as shown by his transcript. If he has attended an unaccredited high school, he must not only submit his transcript but also stand for certain limited examinations as well. Or, third, he may disregard submitting a transcript of high-school units and present himself for comprehensive college entrance examinations.

In order that there will be as little difficulty as possible in interpreting certain parts of the table the following explanations are offered:

In column 12 there is listed the number of units the college will accept in vocational subjects among the total number of high-school units the college requires for entrance. In cases where this column is blank the college, neither in its catalog for 1940-41 nor in reply to the question when asked directly, specified any policy in this matter. In cases where no vocational units are allowed to count toward the total number of units required for college entrance, there is an entry of zero.

* A check mark in column 13 means that specific courses within the fields of English, foreign language, mathematics, physical or natural science, and social science are required. The precise course or courses are generally listed in the explanatory notes to which reference is made—Latin, French, United States history, civics, and the like.

Column 14 tells whether a college uses a system requiring blocks of units called majors and minors in various fields instead of, or as an alternative plan to, requiring rigidly a given number of units in certain specified courses or fields. A major is three units and a minor is two.

The facts for this handbook were compiled from two sources. First, information schedules were filled out on the basis of information available in the catalog of each college. Second, copies of the filled out schedules were then sent to the registrars of each college for verification and elaboration. Six hundred and fourteen of 674 colleges to which the schedules were sent returned them with corrections and final approval during the fall of 1940. In the cases of the 60 institutions from which there were no returned schedules, the original copies, those prepared by referring to the catalogs, were used. An

explanatory note is given when, for a given college, information for the handbook was secured from its catalog statement only.

The purpose of this handbook will be fulfilled if it is useful to those who want a condensed listing of the admission requirements of colleges and universities. If, however, the data also stimulate further study toward a thoroughgoing scientific evaluation of the college entrance requirements at present in use, it will have served a wider purpose than that for which it was originally designed.

Explanatory Notes

ALABAMA

Alabama College, Montevallo

- 1 Transcript from accredited school; transcript and examination from nonaccredited school; examination entirely.
- 2 One unit in history.
- 3 Providing certificate is unsatisfactory. Used also as partial requirement if applicant from a non-accredited school.

Alabama Polytechnic Institute, Auburn

- 1 Transcript; examination for graduates of nonaccredited schools.
- 2 Alternate to transcript.
- 3 Either at institution or by family physician.

Birmingham-Southern College, Birmingham

- 1 Graduation and transcript from approved high school; examinations and certificate of applicant from nonaccredited school or if he stands in lowest quarter of graduating class in high school.
- 2 Used if applicant comes from nonaccredited school.

Howard College, Birmingham

- 1 Certificate; examination.
- 2 Required of applicants from nonaccredited schools or if applicant has attended high school only 3 years.

Huntingdon College, Montgomery

- 1 Transcript; examination.
- 2 Required of applicants from nonaccredited schools.

Judson College, Marion

- 1 Transcript; examination.
- 2 Required of applicants from nonaccredited schools.

Spring Hill College, Spring Hill

- 1 Transcript; examination.
- 2 Required that more than half of applicant's high-school marks be above D unless applicant has already met the standard of ranking in the upper three-fourths of his graduating class.
- 3 Alternate entrance method.

University of Alabama, University

- 1 Transcript; examination.
- 2 Alternate entrance method; required of applicants from nonaccredited schools.

ARIZONA

University of Arizona, Tucson

- 1 Plan A, which includes specific unit requirements in subject-matter fields, includes 1 unit each of algebra, geometry, United States history and civics, and laboratory science.
- 2 Plan B, involving a system of major and minor subject requirements, indicates 3 required units in English, a second academic field from which 3 units are offered, and a third and fourth academic field from each of which 2 units are offered.
- 3 Required of out-of-State applicants only.

ARKANSAS

Arkansas Agricultural and Mechanical College, Monticello

- 1 Transcript; examination; psychological and English examinations for students with insufficient units and for applicants over 21.
- 2 Besides the 5 units required in English and mathematics, a principal group of 3 units and a secondary group of 2 are also required, bringing the total of specified required units to 10.
- 3 Required of applicants submitting insufficient units and also those over 21.
- 4 Alternate admission method.

Arkansas College, Batesville

- 1 Transcript; examination.
- 2 One unit specified in each: Algebra, geometry, history.
- 3 Only criteria for applicants over 21.
- 4 Required of students from nonaccredited high schools.

Arkansas State College, State College

- 1 Graduation from class A high school; 15 units and graduation from class B high school; 15 units on evaluation of State high-school supervisor from other classes of high schools.
- 2 Only requirement of graduates of class A high schools.
- 3 One unit specified in each: Algebra, general science, American history.

College of the Ozarks, Clarksville

- 1 Transcript; examination; psychological examinations if applicant is over 21.
- 2 Class A high-school graduate accepted without reference to the particular units offered.
- 3 Required of applicants presenting 13 or 14 units. Also this is the only criteria for applicants over 21.
- 4 Alternate admission method.

Harding College, Searcy

- 1 Transcript from accredited schools; examinations or intelligence test required of applicants from nonaccredited schools.
- 2 Students with 15 units allowed to work off specific course requirements after he enters college if he cannot meet the specific unit course requirements.
- 3 Required if student applies to enter presenting only 13 units.
- 4 Required of entrants 21 years or older with not sufficient high-school units.

Hendrix College, Conway

- 1 Transcript; examination.
- 2 Required of all applicants over 21.
- 3 Required of applicants from nonaccredited schools unless they are admitted by certificate rated by State Department of Education.
- 4 Examination by family physician or at institution.

John Brown University, Siloam Springs

- 1 Transcript; examination.
- 2 One unit specified in each: American history, algebra, geometry.
- 3 Required of applicants over 21. Also an alternate admission method.
- 4 Photograph required.

Ouachita College, Arkadelphia

- 1 Transcript; examination.
- 2 Besides the 4 units required in English and social sciences, 2 units are required in either mathematics or the physical and natural sciences.

University of Arkansas, Fayetteville

- 1 Graduation from a class A high school even though deficient in 1 or 2 units; 15 acceptable units from class B high school; 15 acceptable units from non-graduates when applicant takes examination or enters on recommendation of principal.
- 2 Required of applicants from class A high schools.
- 3 Required of applicants from class B high schools but not of applicants from class A schools.
- 4 One unit specified in each: Algebra, geometry, history.
- 5 Required of out-of-State applicants only.
- 6 Required of all applicants 21 or over; required also of those with insufficient units; and required of applicants not graduating from class A or class B schools.

CALIFORNIA**Chapman College, Los Angeles**

- 1 Transcript including graduation; equivalent examinations.
- 2 Required that 12 units or more must be "B or better."
- 3 Alternate method of admission.

Claremont Colleges, Claremont (Pomona College)

- 1 Transcript showing 15 units; certificate of graduation, 12 units, a recommendation from high-school principal, grades on scholastic aptitude tests; examinations.
- 2 Twelve units accompanied by principal's recommendation and certain marks on scholastic aptitude test may be substituted.
- 3 Most weight given in selection to high-school achievement record and school recommendation regarding character and personality.
