## Foreword

**T**HE THREE-TWO PLAN has been developed, chiefly in recent years, as one method of attacking the problem of the proper allocation of time in undergraduate engineering education between the liberal and technical subdivisions of the curriculum. The growth in the number of such programs is a clear indication that this relatively new development is serving a useful purpose in the education of engineers so greatly needed in our national economy. The U.S. Office of Education believes that this development has implications, particularly for engineering education, and perhaps in other fields, and that a brief study of this type of program is a worthwhile activity for the Office.

Of special value at this time to educational administrators and to guidance counselors and students is a directory of the institutions, engineering and nonengineering, which are conducting this type of program. A major purpose of this bulletin is to provide such a directory.

HOMER D. BABIDGE, JR.  
*Assistant Commissioner  
for Higher Education*

v

# The Three-Two Plan of Engineering Education

## Introduction

**O**NE OF THE PROBLEMS which has increasingly engaged the attention of engineering educators, especially during the last few decades, has been the allocation of time in undergraduate engineering education between the two major subdivisions of an engineering curriculum, the liberal and the technical. With the growing tendency of industry to call engineers to managerial and administrative positions, it has become increasingly important that engineering education should include such cultural or liberal education as will enable engineers to be well-rounded men, able to carry their share of the duties of good citizens, and able to understand the social, political, and economic implications of their scientific and engineering activities.

## The Three-Two Plan

One method of attack on this problem which is gaining in popularity consists of cooperative arrangements between engineering colleges and nonengineering colleges under which students are enabled to pursue combined liberal arts and engineering curriculums. In some, the two colleges are parts of the same university. The usual pattern, generally called the "three-two plan," provides that a student attend a nonengineering college for 3 years, taking a program agreed upon between the two institutions, and then attend the engineering college for 2 years. If his work is completed satisfactorily, he receives the bachelor of arts degree from the nonengineering college at the end of his fourth college year, and at the end of his fifth year the bachelor of science degree in engineering from the engineering college. The engineering degree is normally based on a 4-year curriculum in engineering.

### *Development of the Three-Two Plan*

Apparently the earliest organized three-two plan was at Case Institute of Technology, Cleveland, Ohio, which had such a program from 1903 to 1927 in collaboration with Adelbert College in the same city. A few other institutions have had programs for many years, but much of the growth in popularity in this type of educational program is comparatively recent.

Since 1952 several lists of three-two programs have been published by the author of this bulletin and others, most of which were based on fragmentary information received from various sources. In October 1952 the *New York Times* reported 13 programs. In the December 1953 issue of *Higher Education*, a journal of the Office of Education, appeared a list of 25 engineering colleges collaborating with 120 different nonengineering colleges situated in 32 States. In July 1959 a list prepared by this writer tabulated 42 engineering colleges in 19 States, which were collaborating with 164 nonengineering colleges in 37 States in the conduct of 266 three-two programs.

### *Current Programs*

In the fall of 1959 information on current three-two programs was supplied by officials of every recognized engineering college in the United States, in connection with the preparation of OE Circular 635 (OE-56003) *Trends in Engineering Education, 1949 to 1959*. These reports show that at that time 55 engineering colleges situated in 26 States were collaborating with 224 nonengineering colleges situated in 40 States and two foreign nations in the conduct of 355 three-two programs.

The extension of the plan to foreign countries is a recent and perhaps significant development. In the fall of 1959 the Mexico City College and the University of the Andes in Colombia were collaborating with three engineering colleges in the United States in the conduct of four such programs.

The data show further that in the 355 programs in operation in the fall of 1959, there were enrolled in the engineering part of the program a total of 509 students, and that up to that time 1,442 students had received both the liberal arts and engineering degrees under this type of program. No data were reported on the numbers of students enrolled in the nonengineering part of the programs.

There are apparent discrepancies in numbers in the above statements because many of the engineering colleges are associated with a considerable number of nonengineering colleges, and some of the non-engineering colleges collaborate with more than one engineering

college. For example, of the nonengineering colleges included in the 1959 tabulation, 52 were collaborating with two engineering colleges each; 23 with three each; and 10 with four or more each. In short, 224 different nonengineering colleges accounted for the 355 programs in which 55 engineering colleges were collaborating.

### *How the Plan Operates*

The general pattern of the three-two program, as described by engineering school officials, includes no formal contract between the schools concerned, but considerable discussion between their officials leading to an agreement on administrative procedures and on the courses to be offered at the nonengineering college and at the engineering college. The engineering college usually accepts only students recommended by the faculty of the nonengineering college.

Several of the statements mention the desirability of keeping the list of participating institutions small so that engineering college officials can become well acquainted with the collaborating institutions and their staffs.

Administrative details described by institutional officials include such items as the exchange between institutions of the results of aptitude, achievement, and other tests and scholastic records, to aid both institutions in guiding and counseling participating students. Joint pamphlets and publicity materials are prepared by the two institutions. Each institution appoints a liaison officer to facilitate the administration of the program. During the last half of the third year a review is made of the records of students eligible for transfer according to standards agreed upon by the two institutions. The nonengineering college certifies to the engineering college the names of students it is willing to fully recommend. Conferences of instructional and administrative personnel associated with the program at the two institutions are held to develop improved articulation between them.

### *The Course of Study*

A typical statement concerning the course of study reads as follows: "The first three years of study will be carefully designed to include the necessary mathematics, science, and other preengineering subjects. Because of the rigorous nature of the engineering curriculum above average grades must be secured during these years to qualify the student for the later engineering work. In some cases a summer course sometime during the five-year period may be needed to complete

all requirements." (The summer camp is mentioned by several of the engineering college officials.)

One official included a statement of the requirements established for the first 3 years at the nonengineering college, expressed in terms of comparable courses at his engineering college. He said, "There has been little difficulty among our associates in meeting these requirements, possibly because we are not too insistent on exact equivalents. All we aim for is a program which will permit entering our junior work without handicap to the student." The requirements cover a total of 40 credit hours in chemistry, mathematics, physics, and drawing, and 30 hours in English, economics, history, literature, and psychology. This is followed by specific additional requirements for certain curriculums in the engineering college, and by a list of suggested electives, which include economics, language, government or political science, history, literature, mathematics, philosophy, advanced chemistry, sociology, and statistics.

### *Variations of Three-Two Plan*

Two variations of the three-two plan have come to the attention of the writer in recent months. One of these programs provides that students attend Lincoln University for three years, followed by 3 years in the engineering cooperative education program at Drexel Institute of Technology, Philadelphia, Pa., which includes 15 months in industrial and professional assignments under Drexel's cooperative education program. Upon completion of the 6-year program, the two degrees will be awarded.

Michigan State University has announced a program which might be called a "two-three" plan, designed primarily to prepare engineering students for work overseas after graduation. In this program the student takes the usual engineering courses for the first 2 years. In the third, fourth, and fifth years he takes the remaining engineering courses, along with liberal arts courses. Completion of this program leads to the receipt of the bachelor of science degree and the bachelor of arts degree, both from the Michigan State University.

### *Advantages to the Student*

Advantages to the student are pointed out by several of the engineering college officials. The following paragraphs are paraphrased or quoted directly from their statements.

This program permits a student to receive liberal and technical education at relatively low cost, by getting a part of his education

at a college nearer to his home than the engineering college from which he hopes to graduate. This helps to provide the Nation with critically needed trained engineers.

The student who is undecided as to the general direction of his future, particularly the boy who is perhaps a little immature for a large institution, might well enter the smaller nonengineering college. If he finds his college mathematics and physics uncongenial, he can shift to a program with less emphasis on science without the need of transferring elsewhere. In general, the student who wishes a taste of life in a smaller college and who is willing to devote 5 years to his undergraduate education may well find the plan suited to his needs.

During the 3 years of study in the nonengineering college an undergraduate is a member of a group with the same interests and tastes. He is likely to absorb much of its atmosphere as well as to acquire a basic knowledge of mathematics and the sciences. Entering the engineering college as a junior on the semiprofessional basis, he is able to devote himself primarily to courses which have an immediate bearing on his future as an engineer.

This program provides a planned sequence of courses which guarantees acceptance at an engineering college, an opportunity which might be denied a student of equivalent standing not participating in the program.

Lafayette College, Easton, Pa., which is sponsored by the Board of Christian Education of the Presbyterian Church, has established three-two programs with 25 nonengineering colleges similarly sponsored, making it possible for students to pursue the entire combined curriculum "with the advantages of attending a more personal church-related college."

### *Student Difficulties*

Students in the three-two program appear to have no more difficulty in making the adjustment to a new institution than students usually have in transferring from one institution to another.

One college official states that the three-two students often become leaders in student activities. He says, "Apparently their three years of experience in an environment where there may not have been quite as heavy an academic responsibility, has meant that they get started doing other things besides academic work, and they continue to do so after transfer."

In another institution an official writes; "There is a break in student activity. Most students do not carry on with their activities—they feel they have had their college life and now wish to receive professional training." He believes that the majority of boys with

a clear-cut interest in and a bent for engineering or science prefer to enter his school directly from a secondary school. This course of action in his opinion has many advantages, among them: (1) Saving of time, which is of particular importance to those who expect to do graduate work; (2) the opportunity to enter at once into the purposeful and stimulating professional atmosphere of the engineering college, and (3) the ready availability of guidance for engineering freshmen in the selection of a professional curriculum.

Another difficulty suggested by a college official is that "the major reason for lack of interest in the plan is the expectation of military service . . . The ROTC program does not fit in with a five-year college course, and I suspect that draft boards are not very sympathetic to such a program."

### *Scholastic Success*

Few data are available on the scholastic success of three-two students. The most complete statement indicates that over a period of 5 years the three-two students have earned slightly higher average grades than the institution's regular students have. It is pointed out, however, that these figures should be used cautiously, since the institution accepts only students who are recommended by the collaborating colleges, which frequently demand a dean's list rating with no mark below "B" in mathematics and science. In other words, the three-two students are a highly selected group.

Another official states that the scholastic records of three-two students in his institution are above the all-student average by about 25 percent. Several other officials state that the three-two students do as well as the regular students, or better.

### *Advantages to the College*

Several institutional officials speak of the advantages to the engineering college inherent in this plan. One says that the combined plan provides the engineering college "the opportunity to concentrate its effort upon giving an outstanding engineering education to a group of mature, highly selected students who have had full opportunity to determine their choice of career."

Another points out that vacancies caused by attrition in freshman and sophomore engineering classes can be filled by these excellent students. He says further that "we feel there is a beneficial influence brought to our campus by these transfer students, who have had educational and social experiences different from those of our own students."

Two others call attention to the fact that the nonengineering college attracts students it might not otherwise get, and avoids the expense of setting up an engineering curriculum.

It is to be presumed that the nonengineering part of the program operates as a screening device to help select the students who have strong aptitudes and abilities for the engineering part of the program.

### *General Appraisal of Plan*

The expansion which has taken place in the adoption of the three-two program indicates rather clearly that this type of program is a worthwhile development in the general field of engineering education. While it is still new enough to be considered as an educational experiment, it holds promise of forming one basis for an effective synthesis of liberal and technical education.

However, the rate of growth in number of programs has declined since 1955, while a growing number of colleges have increased the "humanistic-social" content of their engineering curriculums.

The data concerning the three-two plan of education which were collected in connection with the preparation of the bulletin on *Trends in Engineering Education, 1949 to 1959*, which has been previously mentioned, show that prior to June 1949 eight three-two programs had been established. Between June 1949 and June 1955, 29 new three-two programs were established, an average of 4.8 per year. Between June 1956 and June 1959 there were 11 new programs established, an average of 3.7 per year, and 7 were established in years which were not stated on the information supplied by the engineering institutions. During the 10-year period three programs had been discontinued, and the colleges reported that four additional programs were definitely planned to be started during 1960 and 1961, an average of 2.0 per year.

The date of June 1955 mentioned above is used as a dividing point in the time sequence because in that year the American Society for Engineering Education published its report on "Evaluation of Engineering Education." This report has had a marked effect on engineering education, and many institutions have taken action toward implementing its recommendations.

Among these recommendations was one concerned with the distribution of time in engineering curriculums among five major blocks of courses, one of which is called "humanistic-social studies." The committee recommended that in a scientifically oriented engineering curriculum about one-fifth of the total time should be devoted to this block of courses.

The data collected in the fall of 1959 indicate that between 1949 and 1955 a total of 86 curriculums had been modified, an average of 14 per year. Between 1956 and 1959, the date of the questionnaire, 113 curriculum changes had been made, an average of 28 per year. Definite plans were reported for 114 curriculum changes during the years 1960 and 1961, an average of 57 per year.

Of the changes reported in the humanistic-social content, 195 were in the direction of an increased amount of time devoted to these courses, as compared to 39 changes in the opposite direction. The average percentage of curriculum devoted to this block of courses had increased continuously from 14.5 in 1949 to 14.7 in 1955, to 17.0 in 1959, and to 18.3 projected for 1961.

Since one of the major objectives of the three-two program is to give opportunity for strengthening the liberal content of an engineering education, it is interesting to compare the two trends mentioned above. It can readily be seen that while the numbers of three-two curriculums have increased over the entire period, the rate of increase has been much slower than has been the rate of increase in the percentage of the regular engineering curriculum devoted to this block of courses. Perhaps it is only logical that as one method of strengthening the humanistic-social content increases the other might be expected to increase at a slower rate, which has actually happened.

The number of students enrolled in the engineering part of the three-two program and the numbers of students who have actually completed the entire program indicate quite clearly that numerically the three-two program is not making a very large contribution to the production of engineers for the Nation. However, the combined program does provide a broader and more diversified type of education than is provided by the 4-year engineering curriculum alone.

### Institutions Conducting Three-Two Programs

The two lists which follow contain names of the institutions which were conducting three-two programs in the fall of 1959. In the first list, starting on page 10, the engineering colleges are listed by geographic location, and the name of each engineering college is followed by a list of the nonengineering colleges which were collaborating with it in the conduct of these programs. This will enable anyone interested to determine quickly and easily which engineering colleges are conducting this type of program, and to ascertain for any particular engineering college which nonengineering colleges are collaborating with it.

In the second list, starting on page 20, the nonengineering colleges are listed alphabetically by location, the name of each being followed by the names of the engineering college or colleges with which it is collaborating in the conduct of these programs. This table will enable an interested person to determine quickly and easily whether or not a particular nonengineering college is engaged in this type of program, and if so, with which engineering college or colleges it is collaborating.

## 2. Nonengineering Colleges Conducting Three-Two Programs and Collaborating Engineering Colleges: Fall of 1959

*Nonengineering College and  
Location*

*Collaborating Engineering College(s)*

### Alabama

BIRMINGHAM-SOUTHERN COL- Vanderbilt University, Nashville, Tenn.  
LEGE.

Birmingham

HOWARD COLLEGE..... Vanderbilt University, Nashville, Tenn.  
Birmingham

### Arkansas

COLLEGE OF THE OZARKS.... University of Arkansas, Fayetteville, Ark.  
Clarksville

HENDRIX COLLEGE..... Columbia University, New York, N.Y.  
Conway

OUACHITA COLLEGE..... University of Arkansas, Fayetteville, Ark.  
Arkadelphia Vanderbilt University, Nashville, Tenn.

### California

CLAREMONT MEN'S COLLEGE. Stanford University, Stanford, Calif.  
Claremont

GEORGE PEPPERDINE Stanford University, Stanford, Calif.  
COLLEGE.  
Los Angeles

OCCIDENTAL COLLEGE..... Calif. Inst. of Technology, Pasadena, Calif.  
Los Angeles Columbia University, New York, N.Y.

POMONA COLLEGE..... Calif. Inst. of Technology, Pasadena, Calif.  
Claremont

SAN FRANCISCO STATE COL- Columbia University, New York, N.Y.  
LEGE.  
San Francisco

STANFORD UNIVERSITY..... Colorado College, Colorado Springs, Colo.  
Stanford

UNIVERSITY OF REDLANDS... Stanford University, Stanford, Calif.  
Redlands

UNIVERSITY OF SAN DIEGO.. Loyola University of Los Angeles, Los Angeles,  
San Diego Calif.

University of Santa Clara, Santa Clara, Calif.

WHITTIER COLLEGE..... Stanford University, Stanford, Calif.  
Whittier Univ. of Southern California, Los Angeles, Calif.  
Colorado State University, Fort Collins, Colo.

*Nonengineering College and  
Location*

*Collaborating Engineering College(s)*

**Colorado**

COLORADO COLLEGE..... Colorado Springs	University of Illinois, Urbana, Ill. Columbia University, New York, N.Y. Rensselaer Polytechnic Institute, Troy, N.Y. Carnegie Inst. of Technology, Pittsburgh, Pa.
REGIS COLLEGE..... Denver	Marquette University, Milwaukee, Wis.

**Connecticut**

TRINITY COLLEGE..... Hartford	Columbia University, New York, N.Y. Rensselaer Polytechnic Institute, Troy, N.Y.
WESLEYAN UNIVERSITY..... Middletown	Calif. Inst. of Technology, Pasadena, Calif. Columbia University, New York, N.Y.

**Delaware**

UNIVERSITY OF DELAWARE... Newark	University of Delaware, Newark, Del.
-------------------------------------	--------------------------------------

**District of Columbia**

AMERICAN UNIVERSITY..... Washington, D.C.	Duke University, Durham, N.C.
--	-------------------------------

**Florida**

ROLLINS COLLEGE..... Winter Park	New York University, New York, N.Y.
STETSON UNIVERSITY..... De Land	University of Florida, Gainesville, Fla. Duke University, Durham, N.C.

**Georgia**

UNIVERSITY OF GEORGIA..... Athens	Georgia Institute of Technology, Atlanta, Ga.
--------------------------------------	---

**Idaho**

COLLEGE OF IDAHO..... Caldwell	Stanford University, Stanford, Calif. University of Idaho, Moscow, Idaho Lafayette College, Easton, Pa.
NORTHWEST NAZARENE COL- LEGE. Nampa	University of Idaho, Moscow, Idaho

**Illinois**

CARTHAGE COLLEGE..... Carthage	Valparaiso University, Valparaiso, Ind.
DEPAUL UNIVERSITY..... Chicago	University of Notre Dame, Notre Dame, Ind.
GREENVILLE COLLEGE..... Greenville	University of Illinois, Urbana, Ill.
ILLINOIS COLLEGE..... Jacksonville	Missouri School of Mines, Rolla, Mo.

*Nonengineering College and  
Location*

*Collaborating Engineering College(s)*

### Illinois—Con.

ILLINOIS WESLEYAN UNIVERSITY. Bloomington	Duke University, Durham, N.C.
KNOX COLLEGE..... Galesburg	Stanford University, Stanford, Calif. Columbia University, New York, N.Y.
MACMURRAY COLLEGE..... Jacksonville	University of Illinois, Urbana, Ill.
MONMOUTH COLLEGE..... Monmouth	Case Inst. of Technology, Cleveland, Ohio
ROCKFORD COLLEGE..... Rockford	University of Illinois, Urbana, Ill.
ST. PROCOPIUS COLLEGE..... Lisle	Marquette University, Milwaukee, Wis.
UNIVERSITY OF ILLINOIS..... Urbana	Colorado College, Colorado Springs, Colo.

### Indiana

BALL STATE TEACHERS COLLEGE. Muncie	Purdue University, Lafayette, Ind.
DEPAUW UNIVERSITY..... Greencastle	Purdue University, Lafayette, Ind. Rose Polytechnic Institute, Terre Haute, Ind. Columbia University, New York, N.Y. Case Inst. of Technology, Cleveland, Ohio Carnegie Inst. of Technology, Pittsburgh, Pa.
EARLHAM COLLEGE..... Richmond	Rensselaer Polytechnic Institute, Troy, N.Y. Case Inst. of Technology, Cleveland, Ohio
HANOVER COLLEGE..... Hanover	Lafayette College, Easton, Pa.
MARIAN COLLEGE..... Indianapolis	University of Notre Dame, Notre Dame, Ind. Purdue University, Lafayette, Ind.
NOTRE DAME UNIVERSITY..... Notre Dame	University of Notre Dame, Notre Dame, Ind.
ST. JOSEPH'S COLLEGE..... Rensselaer	University of Illinois, Urbana, Ill. University of Notre Dame, Notre Dame, Ind. Purdue University, Lafayette, Ind. Rose Polytechnic Institute, Terre Haute, Ind.
ST. MARY'S COLLEGE..... Notre Dame	University of Notre Dame, Notre Dame, Ind.
VALPARAISO UNIVERSITY..... Valparaiso	Valparaiso University, Valparaiso, Ind.
WABASH COLLEGE..... Crawfordsville	Columbia University, New York, N.Y. Carnegie Inst. of Technology, Pittsburgh, Pa.

<i>Nonengineering College and Location</i>	<i>Collaborating Engineering College(s)</i>
<b>Iowa</b>	
COE COLLEGE..... Cedar Rapids	Case Inst. of Technology, Cleveland, Ohio Lafayette College, Easton, Pa.
GRINNELL COLLEGE..... Grinnell	Calif. Inst. of Technology, Pasadena, Calif. State University of Iowa, Iowa City, Iowa Columbia University, New York, N.Y. Rensselaer Polytechnic Institute, Troy, N.Y.
LORAS COLLEGE..... Dubuque	University of Notre Dame, Notre Dame, Ind. State University of Iowa, Iowa City, Iowa
MORNINGSIDE COLLEGE..... Sioux City	State University of Iowa, Iowa City, Iowa
UNIVERSITY OF DUBUQUE..... Dubuque	Lafayette College, Easton, Pa.
STATE UNIVERSITY OF IOWA..... Iowa City	State University of Iowa, Iowa City, Iowa
WARTBURG COLLEGE..... Waverly	State University of Iowa, Iowa City, Iowa
<b>Kansas</b>	
BAKER UNIVERSITY..... Baldwin City	Kansas State University, Manhattan, Kans.
BETHANY COLLEGE..... Lindsborg	Kansas State University, Manhattan, Kans.
COLLEGE OF EMPORIA..... Emporia	Lafayette College, Easton, Pa. Kansas State University, Manhattan, Kans.
FORT HAYS KANSAS STATE COLLEGE..... Hays	Kansas State University, Manhattan, Kans.
MCPHERSON COLLEGE..... McPherson	Kansas State University, Manhattan, Kans.
OTTAWA UNIVERSITY..... Ottawa	Kansas State University, Manhattan, Kans.
ST. BENEDICT'S COLLEGE..... Atchison	University of Notre Dame, Notre Dame, Ind. Kansas State University, Manhattan, Kans.
STERLING COLLEGE..... Sterling	Kansas State University, Manhattan, Kans.
TABOR COLLEGE..... Hillsboro	Kansas State University, Manhattan, Kans.
WASHBURN UNIVERSITY OF TOPEKA..... Topeka	Kansas State University, Manhattan, Kans.
MUNICIPAL UNIVERSITY OF WICHITA..... Wichita	Municipal University of Wichita, Wichita, Kans.

*Nonengineering College and,  
Location*

*Collaborating Engineering College(s)*

**Kentucky**

BELLARMINE COLLEGE..... Louisville	University of Notre Dame, Notre Dame, Ind.
CENTRE COLLEGE..... Danville	Columbia University, New York, N.Y. Lafayette College, Easton, Pa. Vanderbilt University, Nashville, Tenn.
MURRAY STATE COLLEGE..... Murray	Vanderbilt University, Nashville, Tenn.
VILLA MADONNA COLLEGE.... Covington	University of Notre Dame, Notre Dame, Ind. University of Dayton, Dayton, Ohio

**Maine**

BATES COLLEGE..... Lewiston	Rensselaer Polytechnic Institute, Troy, N.Y.
BOWDOIN COLLEGE..... Brunswick	Calif. Inst. of Technology, Pasadena, Calif. Columbia University, New York, N.Y.
COLBY COLLEGE..... Waterville	Carnegie Inst. of Technology, Pittsburgh, Pa.

**Maryland**

WESTERN MARYLAND COL- LEGE. Westminster	Johns Hopkins University, Baltimore, Md.
---	--

**Massachusetts**

BRANDEIS UNIVERSITY..... Waltham	Calif. Inst. of Technology, Pasadena, Calif. Carnegie Inst. of Technology, Pittsburgh, Pa.
TUFTS UNIVERSITY..... Medford	Tufts University, Medford, Mass.

**Michigan**

ALBION COLLEGE..... Albion	University of Michigan, Ann Arbor, Mich. Columbia University, New York, N.Y. Carnegie Inst. of Technology, Pittsburgh, Pa.
ALMA COLLEGE..... Alma	University of Michigan, Ann Arbor, Mich. Lafayette College, Easton, Pa.
CALVIN College..... Grand Rapids	University of Michigan, Ann Arbor, Mich.
CENTRAL MICHIGAN UNI- VERSITY. Mount Pleasant	University of Michigan, Ann Arbor, Mich.
EASTERN MICHIGAN UNIVER- SITY. Ypsilanti	University of Michigan, Ann Arbor, Mich.
EMMANUEL MISSIONARY COL- LEGE. Berrien Springs	University of Michigan, Ann Arbor Mich.
KALAMAZOO COLLEGE..... Kalamazoo	University of Michigan, Ann Arbor, Mich.
UNIVERSITY OF MICHIGAN.... Ann Arbor	University of Michigan, Ann Arbor, Mich.

*Nonengineering College and  
Location*

*Collaborating Engineering College(s)*

**Minnesota**

CARLTON COLLEGE..... Northfield	Columbia University, New York, N.Y.
MACALESTER COLLEGE..... St. Paul	Lafayette College, Easton, Pa.
ST. MARY'S COLLEGE..... Winona	Marquette University, Milwaukee, Wis.
THE COLLEGE OF ST. THOMAS. St. Paul	University of Notre Dame, Notre Dame, Ind.

**Mississippi**

MILLSAPS COLLEGE..... Jackson	Columbia University, New York, N.Y. Vanderbilt University, Nashville, Tenn.
TOUGALOO SOUTHERN CHRISTIAN COLLEGE. Tougaloo	Lafayette College, Easton, Pa.

**Missouri**

CENTRAL COLLEGE..... Fayette	Stanford University, Stanford, Calif. Missouri School of Mines, Rolla, Mo. University of Missouri, Columbia, Mo. Vanderbilt University, Nashville, Tenn.
CENTRAL MISSOURI STATE COLLEGE. Warrensburg	Missouri School of Mines, Rolla, Mo. University of Missouri, Columbia, Mo.
CULVER STOCKTON COLLEGE. Canton	Missouri School of Mines, Rolla, Mo. University of Missouri, Columbia, Mo.
DRURY COLLEGE..... Springfield	Missouri School of Mines, Rolla, Mo.
MISSOURI VALLEY COLLEGE.. Marshall	Missouri School of Mines, Rolla, Mo. University of Missouri, Columbia, Mo. Lafayette College, Easton, Pa.
NORTHEAST MISSOURI ST. TEACHERS COLLEGE. Kirksville	Missouri School of Mines, Rolla, Mo. University of Missouri, Columbia, Mo.
NORTHWEST MISSOURI STATE COLLEGE. Maryville	Missouri School of Mines, Rolla, Mo. University of Missouri, Columbia, Mo.
PARK COLLEGE..... Parkville	Missouri School of Mines, Rolla, Mo. Lafayette College, Easton, Pa.
ROCKHURST COLLEGE..... Kansas City	St. Louis University, St. Louis, Mo.
TARKIO COLLEGE..... Tarkio	University of Missouri, Columbia, Mo.
UNIVERSITY OF KANSAS CITY. Kansas City	Carnegie Inst. of Technology, Pittsburgh, Pa.
UNIVERSITY OF MISSOURI.... Columbia	University of Missouri, Columbia, Mo.
WILLIAM JEWELL COLLEGE.... Liberty	Missouri School of Mines, Rolla, Mo. Columbia University, New York, N.Y.

*Nonengineering College and  
Location*

*Collaborating Engineering College(s)*

**Montana**

CARROLL COLLEGE..... University of Notre Dame, Notre Dame, Ind.  
Helena Montana State College, Bozeman, Mont.  
Marquette University, Milwaukee, Wis

**Nebraska**

CREIGHTON UNIVERSITY..... Marquette University, Milwaukee, Wis.  
Omaha  
DOANE COLLEGE..... Columbia University, New York, N.Y.  
Crete  
HASTINGS COLLEGE..... Stanford University, Stanford, Calif.  
Hastings University of Denver, Denver, Colo.  
Lafayette College, Easton, Pa.  
NEBRASKA WESLEYAN UNI- Columbia University, New York, N.Y.  
VERSITY.  
Lincoln

**New Jersey**

RUTGERS UNIVERSITY..... Rutgers University, New Brunswick, N.J.  
New Brunswick

**New York**

ADELPHI COLLEGE..... New York University, New York, N.Y.  
Garden City  
ALFRED UNIVERSITY..... Columbia University, New York, N.Y.  
Alfred  
BARD COLLEGE..... Columbia University, New York, N.Y.  
Annandale-on-Hudson  
CITY COLLEGE OF THE COL- City College of the City of New  
LEGE OF THE CITY OF NEW York, New York, N.Y.  
YORK.  
COLGATE UNIVERSITY..... Columbia University, New York, N. Y.  
Hamilton Rensselaer Polytechnic Institute, Troy, N.Y.  
COLUMBIA COLLEGE FOR MEN. Columbia University, New York, N.Y.  
New York  
COLUMBIA UNIVERSITY..... Colorado College, Colorado Springs, Colo.  
New York  
HAMILTON COLLEGE..... Columbia University, New York, N.Y.  
Clinton Rensselaer Polytechnic Institute, Troy, N.Y.  
HOBART AND WILLIAM SMITH Columbia University, New York, N.Y.  
COLLEGES.  
Geneva  
HOFSTRA COLLEGE..... Columbia University, New York, N.Y.  
Hempstead  
KING'S COLLEGE..... University of Notre Dame, Notre Dame, Ind.  
Briarcliff Manor  
NEW YORK UNIVERSITY..... New York University, New York, N.Y.  
University Heights  
NEW YORK UNIVERSITY..... New York University, New York, N.Y.  
Washington Square

*Nonengineering College and  
Location*
